Courses

SOC 100  Introduction to Sociology  credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOC/100/)
Sociology offers a unique lens through which we can examine the world around us. In this course you will develop a perspective that will allow you to analyze the social world in a way that reveals the hidden and/or overlooked social forces that shape our lives. This approach, the sociological imagination, will enable you to explore how social forces influence the ways we view and navigate our social world. We will discuss how sociologists use theory and research to better understand important social issues such as inequalities of race, class, gender, sexualities and how social order and social change are possible. We will discuss how society affects individuals and in turn how individuals can affect society.

SOC 163  Social Problems  credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOC/163/)
A study of social problems in the United States necessarily entails a discussion of global issues. To that end, this course will examine many contemporary social issues such as crime, war and terrorism, the environment, inequality, poverty, discrimination, the economic recession, and others, through a global framework. Many of the topics we will cover could motivate an entire semester’s study in their own right; indeed, some scholars devote their entire careers to but one of these topics. However, this breadth allows us to think broadly about the issues that are identified as social problems and the ways in which individuals and groups attempt to resolve those problems; both processes are revealing about the time and society in which we live. One of the main objectives of this class is to learn about how sociologists examine social problems through analysis and research. Alongside that process, you will improve your critical thinking skills and become a better/mor informed consumer of information.

SOC 170  Integration, Assimilation and Multiculturalism: America's Immigrant Society  credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOC/170/)

Using texts, films, memoirs, we will gain insight into the challenges faced by immigrant groups, gain familiarity with how immigrants are classified, and develop basic understandings of core theories, measures, and methods relating to immigrant flows, acceptance and socio-cultural equality.

This course provides an introduction to the study of political sociology, which, broadly conceived, is concerned with the social bases of power and the social consequences of the organization of power. SOC 230 The Sociology of Political Polarization: Bigots and Snowflakes  credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOC/230/)
Communicating across ideological and political divides has become increasingly difficult and conversations that touch sensitive topics (like race, gender, or immigration) often lead nowhere. This is, in part, due to a collective tendency to oversimplify problems that are anything but simple. In this course, we examine the prevalence, nature, and sources of these communication breakdowns. Our class is an informed exploration of the kind of society we want to live in, where we currently stand, and how we might get closer to where we want to be.

SOC 364  Impacts of Globalization  credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOC/364/)
In this course, we seek to make sense of the impacts of globalization. Is the freer flow of trade, people, and capital around the world responsible for the
world's economic, social, and political ills, or are we inclined to say that, on balance, it is still a good thing? As more people become more connected
across larger distances in different ways, are they following more of the same norms and growing aware of what they share, or are they more aware of
cultural differences and see integration as a threat to social cohesion? Upon completion of this course, students should be able to demonstrate
content expertise using both written and verbal communication skills. They will do so by: identifying the different drivers of the phenomenon widely
described as globalization; distinguishing between the social, cultural, political, and economic processes of globalization and give examples of how
they interact in specific and contingent ways; analyzing the advantages and disadvantages of further global integration; combining the different
aspects of globalization into a coherent narrative; designing and defending their own alter-globalization campaign. Prerequisite: One of the following:

SOC 373  Social Inequality  credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOC/373/)
Who gets what, and why? How are power, privilege, and prestige distributed across individuals and groups, and why is it that some enjoy more than
others? We consider how different dimensions of inequality have evolved over time, with special focus on inequalities across race, class, and gender.
We assess how inequality shapes the lives of individuals in society, how and why inequality persists, and how people have worked to both challenge
and reproduce their places in society. We approach social inequality from a variety of angles, developing an understanding of how inequality works
in and through schooling, labor markets, employment, identity and prejudice, social mobility, and the role of major social institutions such as work,
family, education, politics and law. We examine core statements of social stratification from sociology and engage with contemporary theories from
sociology, psychology, political science, and economics. By the end of this course, you will have a clearer understanding of the types of inequality that
exist in society, how inequality operates through the broader social context, and the constraints and opportunities faced by individuals in different
positions in society. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163.
