BIOINFORMATICS: ANIMAL SCIENCES, MS

for the Master of Science in Bioinformatics, Animal Sciences Concentration

Research Areas
The Department of Animal Sciences offers graduate studies with a focus on bioinformatics, quantitative and computational biology, leading to the Master of Bioinformatics. Fields of bioinformatics application and specialization include:

- animal breeding, genetics, and bioinformatics
- animal behavior
- environmental, lactation, and reproductive physiology
- immunobiology
- meat science and muscle biology
- microbiology
- nutrition
- systems of animal management and production, precision management

Beef and dairy cattle, horses, poultry, sheep, swine, and companion and laboratory animals are available for study. Experience in teaching, extension, or outreach is encouraged as part of the academic work.

Admission
Candidates for admission to the M.Sc. in Bioinformatics program must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Candidates for admission who have a GPA between 2.75 and 2.99 can request special consideration of the application materials submitted. Graduate Record Examination (GRE) scores are not required for admission. English proficiency requirements for admission follow Graduate College requirements. Application materials include baccalaureate degree transcripts, a resume, a personal statement, and three letters of recommendation. Admission is possible for fall (mid-August), spring (mid-January), and summer (mid-June) semesters. Candidates for admission are encouraged to submit the complete application package no later than 2 months before the start of the desired admission semester.

Fundamental Bioinformatics (choose one)

- ANSC 542 Applied Bioinformatics
- ANSC 545 Statistical Genomics
- CHBE 571 Bioinformatics
- CPSC 567 Bioinformatics & Systems Biol
- CS 466 Introduction to Bioinformatics
- IB 467 Principles of Systematics
- MCB 432 Computing in Molecular Biology

Computer Science and Informatics (choose one)

- CS 411 Database Systems
- CS 466 Introduction to Bioinformatics
- CS 473 Algorithms
- CPSC 565 Perl & UNIX for Bioinformatics
- IS 455 Database Design and Prototyping
- IS 507 Data, Statistical Models and Information
- STAT 428 Statistical Computing
- STAT 440 Statistical Data Management
- STAT 448 Advanced Data Analysis
- STAT 480 Big Data Analytics
- STAT 525 Topics in Computational Statistics

Graduate seminar (ANSC 590) enrollment is required every semester (max 2 hours can be applied to the degree)

- ANSC 599 Thesis Research (min/max applied toward degree)

Electives

- 14

Total Hours

- 36

Other Requirements

- A concentration is required.
- Minimum 500-level Hours Required Overall: 12
- A comprehensive oral examination concerning the thesis and other areas of Bioinformatics and Animal Sciences is required.
- Thesis Deposit Required: Yes
- Minimum GPA: 3.0

Information listed in this catalog is current as of 06/2024
2. Capacity to execute supervised thesis research including a) understanding of the scientific method, research objectives, materials and methods, advanced data analysis, and appreciation of the findings; and b) leadership on the implementation of essential research activities.

3. Ability to effectively communicate essential bioinformatics and animal sciences knowledge and thesis research findings in oral and written formats.

4. Aptitude to advocate for interdisciplinary research and education efforts to advance food security, food safety, animals and human health and wellbeing or environmental stewardship.
