

# CROP SCIENCES, PHD

for the degree of Doctor of Philosophy in Crop Sciences

## Graduate Degree Programs in Crop Sciences

Crop Sciences, MS (<http://catalog.illinois.edu/graduate/aces/crop-sciences-ms/>) (on campus & online)

Bioinformatics: Crop Sciences, MS (<http://catalog.illinois.edu/graduate/aces/concentration/crop-sciences/bioinformatics/>)

Crop Sciences, PhD (p. 1)

## Admission

Admission to the Ph.D. program will be considered for applicants with the M.S., those nearing completion of the M.S., and highly motivated students with the B.S. Because of the diversity of programs in the Department of Crop Sciences, the preparation that is needed varies considerably. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant's credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found at: <https://grad.illinois.edu/admissions/apply/begin/international> (<https://grad.illinois.edu/admissions/apply/begin/international/>). Please see our web page for additional information: <https://cropsciences.illinois.edu/graduate/admissions/>.

## Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

## Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest <https://cropsciences.illinois.edu/people/faculty/>.

## Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference.

for the degree of Doctor of Philosophy in Crop Sciences

Students are required to pass a preliminary examination within five semesters of first enrolling, not including the summer terms, and after substantial completion of the Ph.D. graded coursework requirement. The preliminary examination is comprised of both an oral and written component and students are expected to defend their Thesis Proposal at the oral component of the examination. Those students on the BA to PhD plan must also pass a Qualifying Exam. An acceptable dissertation is

required. Residence requirements are the same as those of the Graduate College.

For additional details and requirements refer to the department's graduate handbook ([http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad\\_Student\\_Handbook\\_2013.pdf](http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf)) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook/>).

## Entering with approved M.S./M.A. degree

Code	Title	Hours
Minimum Graded Coursework approved by the graduate guidance committee not including CPSC 594 or CPSC 598, with a grade point average of at least a B.		
CPSC 594	Professional Orientation CPSC (not required if it was taken in fulfillment of the master's degree.)	1
CPSC 598	Seminar (CPSC 598: Graduate Student Seminar (enrollment required each semester)) <sup>Maximum applied toward degree</sup>	14
CPSC 599	Thesis Research (minimum applied toward degree)	37
<b>Total Hours</b>		<b>64</b>

## Other Requirements

Requirement	Description
Other requirements and conditions may overlap	
64 hours of in-residence credit beyond the M.S.	
Qualifying Exam Required:	No
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

## Entering with approved B.S./B.A. degree

Code	Title	Hours
Coursework approved by the graduate guidance committee not including CPSC 594 or CPSC 598, with a grade point average of at least a B.		
CPSC 594	Professional Orientation CPSC	1
CPSC 598	Seminar (Enrollment required each semester) <sup>Maximum applied toward degree</sup>	14
CPSC 599	Thesis Research (minimum applied toward degree)	49
<b>Total Hours</b>		<b>96</b>

## Other Requirements

Requirement	Description
Other requirements and conditions may overlap	
64 hours of in-residence credit beyond the M.S.	
Minimum 500-level Hours Required	36
Overall:	

Qualifying Exam Required:	Yes
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

*for the degree of Doctor of Philosophy in Crop Sciences*

---

#### BA Track

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution. They will also learn to independently conceive and develop their research projects.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

#### MS Track

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution. They will also learn to independently conceive and develop their research projects.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.
