The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from an accredited U.S. institution. Each student will select either Taxation or Financial Reporting & Assurance for their core accounting concentration. Students are also required to select a secondary graduate elective concentration. By design, the program emphasizes the emerging trend of data analytics in the practice of accounting, with a standard course plan that leads to a graduate concentration in Data Analytics in Accountancy to fulfill the graduate elective requirement. Students who wish to deviate from the standard course plan or select from among the following alternative graduate concentrations to fulfill the graduate elective requirement: Corporate Governance and International Business, Finance, Financial Reporting & Assurance, Information Technology & Control, Real Estate, and Supply Chain Management. Students who wish to deviate from the standard course plan, but do not wish to pursue a listed graduate concentration, may petition to take other graduate courses of interest subject to approval of an Accountancy Advisor. Admission to a concentration requires application to the Department. Admission to some concentrations may be competitive.
