CHEMISTRY, MS & BUSINESS ADMINISTRATION, MBA

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (https://mba.illinois.edu/academics/joint-degrees) and contact the M.B.A. program and their major department office for more information.
