CANCER NANOTECHNOLOGY GRADUATE CONCENTRATION

for the graduate concentration in Cancer Nanotechnology

The Cancer Nanotechnology Concentration prepares students for collaborative research across the disciplines of engineering, biology, and the sciences. Students must be enrolled in a graduate degree program:

- Bioengineering, MS
- Bioengineering, PhD
- Bioinformatics: Bioengineering, MS
- Electrical & Computer Engineering, MS
- Electrical & Computer Engineering, PhD
- Materials Engineering, MEng
- Materials Science & Engineering, MS
- Materials Science & Engineering, PhD
- Mechanical Engineering, MEng
- Mechanical Engineering, PhD
- Theoretical & Applied Mechanics, MS
- Theoretical & Applied Mechanics, PhD

Other Graduate Programs in the Department of Bioengineering

degrees:

- Bioengineering, MEng
  - concentrations:
    - Bioinstrumentation
    - Computational Genomics
    - General
    - Bioengineering
  - Bioengineering, MS
  - optional concentrations:
    - Biomechanics
    - Cancer Nanotechnology
  - Bioengineering, PhD
  - optional concentrations:
    - Biomechanics
    - Cancer Nanotechnology
  - Computational Science and Engineering

concentrations:

- Biomechanics

available for:

- Bioengineering, MS
- Bioengineering, PhD
- Bioinformatics: Bioengineering, MS
- Electrical & Computer Engineering, MS
- Electrical & Computer Engineering, PhD
- Materials Engineering, MEng
- Materials Science & Engineering, MS
- Materials Science & Engineering, PhD
- Mechanical Engineering, MEng
- Mechanical Engineering, PhD
- Theoretical & Applied Mechanics, MS
- Theoretical & Applied Mechanics, PhD

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MEng), the Master of Science in Bioengineering (MS), the Master of Science in Biomedical Image Computing (MS in BIC), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology.
