GRADUATE CONCENTRATION IN BUSINESS DATA ANALYTICS

The concentration in Business Data Analytics is designed to develop leaders in various business fields who understand (1) how to leverage data to identify new customer segments and market; (2) how to optimize the supply chain and logistics; and (3) how to collect, manipulate, and visualize data for business decisions. The concentration will develop skills using data as a foundation for sound decision making in business.

The concentration is open to students enrolled in the Master of Business Administration, Master of Science in Business Administration, and Master of Science in Technology Management programs in the College of Business but required of none.

This concentration requires twelve graduate hours of Business Data Analytics related coursework and completion of an analytics-related project in their Practicum or an equivalent course. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of the programs approved for the concentration. Admission is limited, and acceptance is considered based on a student's academic standing and space availability.

Select four hours of coursework from each of the three areas below:

1. Customer
   - BADM 590 Consumer Analytics
   - BADM 590 Social Media Analytics

2. Operation and Supply Chain
   - BADM 590 Predictive Data Analytics
   - BADM 590 Business Process Improvement

3. Information Systems
   - BADM 554 Enterprise Database Management
   - BADM 557 Dec Support and Knowledge Mgt
   - BADM 590 Decision Support Systems and Knowledge Management

In addition, students pursuing this concentration will be required to select an analytics-related project in their Practicum or an equivalent course.

In addition to the concentration requirements, students must also complete the requirements of their major degree.
