COMPUTER SCIENCE

cs.illinois.edu (http://cs.illinois.edu)

Head of the Department: Rob A. Rutenbar
Director of Graduate Admission and Advancement: Chandra Chekuri (chekuri@illinois.edu)

1210 Siebel Center
201 N. Goodwin
Urbana, IL 61801
(217) 333-4428
Email: academic@cs.illinois.edu

Major: Computer Science
Degrees Offered: M.S., M.C.S., Ph.D.

Major: Bioinformatics
Degrees Offered: M.S.
Graduate Concentration: Computer Science

Online Program: Illinois Internet Computer Science (I2CS)
Degrees Offered: M.C.S. in Computer Science

Joint Degree Programs: the M.C.S. in Computer Science can be earned jointly with the following
Degrees Offered:
M.Arch. in Architecture
J.D. in Law

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Computer Science and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program. The department offers graduate work leading to a master’s or doctoral degree, with an interdisciplinary master’s degree program in bioinformatics. In addition, the department offers an online professional master’s degree to reach students who are working full-time and unable to come to campus.

The Medical Scholars Program (https://www.med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Computer Science. Computer Science is not currently admitting to any joint master’s programs at this time.

Admission

Applicants must hold a bachelor’s degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for graduate students entering a Computer Science graduate degree program is a bachelor’s or master’s degree in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science Ph.D. program must have a minimum grade point average (GPA) of 3.40 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. MS and MCS applicants must have a minimum GPA of 3.20. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department’s Prospective Graduate Student Information Web site (http://cs.illinois.edu/prospective-students/graduate-students). To apply, click here (http://www.grad.uiuc.edu/admissions/apply).

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 79 (IBT), 213 (CBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT) or 6.5 (IELTS). Limited status (http://www.grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Computer Science and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Computer Science graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, 217-333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (https://www.med.illinois.edu/mdphd) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent working on requirements of the Computer Science graduate degree.

Faculty Research Interests

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 9 research areas (http://cs.illinois.edu/research), 60+ faculty members (http://cs.illinois.edu/directory/faculty) conduct research with over 450 graduate students, and about 30 research staff members. They regularly collaborate with researchers across campus, in other departments or research units.

Facilities and Resources

The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (http://cs.illinois.edu/about-us/about-siegel-center), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to the College of Engineering (http://engineering.illinois.edu), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine...
communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

**Financial Aid**

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships (the most common form of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

- Master of Science in Computer Science (http://catalog.illinois.edu/graduate/graduate-majors/computer-science/ms-comp-science)
- Master of Science in Bioinformatics, Computer Science Concentration (http://catalog.illinois.edu/graduate/graduate-majors/computer-science/ms-bioinformatics)
- Master of Computer Science in Computer Science (http://catalog.illinois.edu/graduate/graduate-majors/computer-science/master-sci-comp-sci)

**Doctor of Philosophy in Computer Science**

**Entering with approved M.S. degree**

</table>

**Total Hours**: 64

**Other Requirements and Conditions**

Other Requirements and Conditions may overlap

- Minimum hours of CS course work: 12
- CS 597 and CS 591 may not be applied to the 500-level course work requirement.
- CS 591 section PHD must be taken in the first semester. A maximum of 4 credit hours of CS 591 can be applied toward the Ph.D. degree.
- A teaching assistantship for an entire term, with a satisfactory performance evaluation by the department, is required by the end of the 5th year.

**Ph.D. exam and dissertation requirements**:

International Students must show demonstration of English proficiency (equivalent to that necessary to be a TA-see Financial Aid) before taking the Qualifying Exam.

Minimum GPA: 3.0

---

For additional details and requirements refer to the department's Graduate Degree Requirements (http://cs.illinois.edu/prospective-students/graduate-students) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).  

Qualifying Exam information (http://cs.illinois.edu/current-students/graduate-students/phd-students/phd-qualifying-exam)
Master of Computer Science and Master of Architecture

A total of 70 graduate hours of credit are required: 32 for the M.C.S. degree as prescribed above and 38 for the Master of Architecture degree. Course credit required for the individual degrees is mutually exclusive.

Master of Computer Science and Juris Doctor in Law

Specific graduate hours of credit for each degree are required: 32 hours for the M.C.S. as prescribed above and 90 for the Juris Doctor. However, some credits used in each program may apply to the other, allowing students to earn both degrees in a shorter time. For the M.C.S. degree

1. at least 12 credit hours must be law course work relating to legal protections for intellectual property or in related business law fields and
2. at least 6 credit hours must be from approved law courses as determined by the College of Law.

For the J.D. degree, 12 credit hours may be computer science or other scientific course work leading to the M.C.S. degree.

Online Program

Master of Computer Science (I2CS M.C.S.)

The Illinois Internet Computer Science option allows individuals to earn a Master of Computer Science degree from a leader in information technology entirely online with no required campus visits. All students receive the same lectures, class assignments, exams and projects as on-campus students. The degree requirements are the same as for the on-campus M.C.S. program. Off-campus students have 5 years in which to complete the program. The degree awarded is the same as the on-campus M.C.S. degree. Admissions procedures and forms can be found at Degree Admissions.
