The combined program must meet the specific requirements for both the Department of Economics and the College of Medicine. Students in the program must meet the admissions standards for and be accepted into both the graduate program. Applicants to the Medical Scholars Program must apply to the Medical Scholars Program prior to beginning graduate school or while in the second discipline, including Economics. Students may apply to the Medical Scholars Program and complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at https://www.med.illinois.edu/mdphd/.

**Graduate Teaching Experience**

Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

**Financial Aid**

In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the Ph.D. program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

- Master of Science in Economics (http://catalog.illinois.edu/graduate/graduate-majors/economics/ms)
- Master of Science in Economics, Policy Economics Concentration (http://catalog.illinois.edu/graduate/graduate-majors/economics/ms-policy-econ)

**Doctor of Philosophy in Economics**

Students must pass comprehensive qualifying examinations on Econometrics, Macroeconomics and Microeconomics. Those who fail the comprehensive examinations will have a 2nd chance in the start of the fall semester and a 3rd chance at the end of the fourth semester (in this 3rd chance they will take the exams with the first year students of the next cohort). Students who have failed the 3rd chance will not be allowed to register for the following year. Upon meeting course and GPA requirements, they will be eligible to receive a master’s degree in Economics, provided they have not previously received such a degree from another institution.

Candidates must also successfully complete two fields through coursework and/or a written examination. A research paper must be submitted prior to the start of the third year and approved prior to the end of that year. Students who fail to meet these deadlines will have reduced financial support and be placed on academic probation. Unless they return to good standing by satisfying the requirement, they will be dropped from the program at the end of the following semester.

A dissertation is also required. In addition, candidates are required to give an oral defense of the dissertation proposal and pass an oral final examination covering the research. A student with an appropriate background who devotes full time to graduate work can complete the Ph.D. degree in four years beyond the bachelor’s degree. An additional year or more is usually necessary, especially for those holding part-time assistantships. Students in the Ph.D. program may earn a master’s degree as they work toward the Ph.D. degree.

Optional: A not-for-credit Math Camp after campus orientation, consisting of 12 hours of instruction. The aim of the Math Camp is to prepare students with no master’s level coursework in mathematical economics for the program’s first year classes. However, it will be open to all incoming students.

Additional information can be found at www.economics.illinois.edu/programs/phdprogram/ (http://www.economics.illinois.edu/programs/phdprogram).
