INDUSTRIAL AND ENTERPRISE SYSTEMS ENGINEERING

http://ise.illinois.edu

Head of Department: Rakesh Nagi
Associate Head for Graduate Studies: Ramavarapu S. Sreenivas
117 Transportation Building
104 South Mathews Avenue
Urbana, IL 61801
(217) 333-2731
E-mail: ise-grad@illinois.edu

Major: Industrial Engineering
Degrees Offered: M.S., Ph.D.

Concentrations: Advanced Analytics (available to M.S. only), Computational Science and Engineering (M.S. and Ph.D.)

Major: Systems and Entrepreneurial Engineering
Degrees Offered: M.S., Ph.D.

Concentrations: Computational Science and Engineering (M.S. and Ph.D.)

Joint Degree Program: Master of Science in Industrial Engineering or Systems and Entrepreneurial Engineering and Master of Business Administration (http://catalog.illinois.edu/graduate/graduate-majors/bus-admin-mba)
Degrees Offered: M.S. and M.B.A.

Graduate Degree Programs

The Department of Industrial and Enterprise Systems Engineering (ISE) offers graduate study leading to master’s and doctoral degrees in Industrial Engineering (IE) and Systems and Entrepreneurial Engineering (SEE). The program offers an approach to industrial engineering and systems engineering, engineering design, and entrepreneurial engineering that crosses disciplinary lines. The IE program is based in advanced studies that focus on operations research, optimization, supply chain management, financial engineering, quality and reliability engineering and production management, with the aim to advance modeling, simulation, analysis and decision making for complex engineering and economic systems. The SEE program is founded on the premise of dual competency in both traditional engineering and systems integration. The SEE program offers flexibility by permitting the student to select from a menu of advanced courses and take a wide range of electives to meet individual career goals. Graduates of these programs are prepared to enter academic and professional engineering positions in universities, industry, government, and private practice. Opportunity also exists for students to complete a(n):

1. Computational Science and Engineering (CSE) Concentration (M.S. and Ph.D.)
2. Energy and Sustainability Engineering (EaSE) Certificate

The Department is a joint sponsor with the Department of Finance for the M.S. degree in Financial Engineering (http://catalog.illinois.edu/graduate/graduate-majors/financial-eng).

Admission

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (http://www.ets.org) general test are required of all applicants. Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.ets.org/toefl) score of 103 (iBT), or 613 (PBT), or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. Full admission status is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to ISE are above the minimum scores demonstrating an acceptable level of English language proficiency.

Applicants to the joint M.B.A. degree program must meet the admissions standards for both programs and be accepted by both programs.

Faculty Research Interests

Faculty research by ISE faculty is pursued in the following fields:

• computer-aided design
• data analytics
• optimization
• design systems
• manufacturing systems
• nondestructive testing and evaluation
• system dynamics and simulation
• control
• robotics
• real-time decision making
• reliability
• financial engineering
• operations research/management science
• biomechanics

In ISE, research is conducted in operations research, production engineering, quality and reliability engineering, supply chain and logistics, transportation, financial engineering, and business analytics. Study in the areas of cognitive engineering, computer-aided manufacturing, ergonomics, facilities planning, human-machine interaction, large-scale systems analysis, machine tool systems design, mathematical programming and optimization, production planning and control, and project management is aimed at improving the design and implementation of integrated systems of persons, materials, planning, and equipment.
Facilities and Resources

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research laboratories Web site (http://ise.illinois.edu/research/ise-labs).

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://citl.illinois.edu/professional-development/ta-orientation) conducted prior to the start of the semester.

Two Masters programs are offered:

• Industrial Engineering, MS (http://catalog.illinois.edu/graduate/graduate-majors/iese/ms-indust-eng)
• Systems and Entrepreneurial Engineering, MS (http://catalog.illinois.edu/graduate/graduate-majors/iese/ms-systems-entre-eng)

Two Doctor of Philosophy Programs are offered:

• Industrial Engineering, PhD (http://catalog.illinois.edu/graduate/graduate-majors/iese/dr-philo-indust-eng)
• Systems and Entrepreneurial Engineering, PhD (http://catalog.illinois.edu/graduate/graduate-majors/iese/dr-philo-entre-eng)

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (http://catalog.illinois.edu/graduate/graduate-majors/bus-admin-mba/master-ba-fulltime) and contact the M.B.A. program and their major department office for more information.

Information listed in this catalog is current as of 09/2019
