All applicants whose native language is not English or who are from any country other than the US, the United Kingdom, Canada, Australia, or New Zealand (even if they are native English speakers) are required by the University to submit the results of an English language proficiency test. The university will accept the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) to determine admission eligibility.

- The minimum total TOEFL iBT score for admission (including all four sections): 79
- Minimum total TOEFL iBT score for exemption from the English as a Second Language Placement Test (EPT) for admission (including all four sections): 103
- Minimum total IELTS score for admission: 6.5, including a minimum subscore of 6 on all four modules. Students receiving scores below 7 will be required to take the EPT for placement in English as Second Language courses.

In addition to the general requirement for English proficiency testing described above, the University of Illinois is also required by state law and University policy to give teaching appointments only to international graduate students who have more specifically passed an English language SPEAKING proficiency test. Applicants have the following options to satisfy this requirement:

- Minimum score of 24 on the speaking section of the TOEFL iBT
- Minimum score of 8 on the speaking section of the IELTS
- Minimum score of 50 on the TSE
- Minimum score of 5 on the EPI (English Proficiency Interview) test.

International applicants must present documentation for one of the above-listed tests of spoken English at the time of application to the Psychology Department.

Refer to [www.psychology.illinois.edu](http://www.psychology.illinois.edu) (Graduate Program) for additional information about the Department of Psychology's admission requirements.

## Graduate Teaching Experience

The department requires Ph.D. candidates to gain teaching experience as part of their academic work. Such experience is considered a vital part of the graduate program and usually takes the form of a teaching assistantship. Students have the option of teaching two class sections (50% TA) for one semester or one class section (25% TA) for two semesters in order to meet the requirement.

## Faculty Research Interests

The program is designed to prepare students for academic and research-oriented careers. Students become actively involved in research during their first semester, devoting an increasing percent of time toward independent research throughout their graduate careers.

For the most part, we view graduate education as an apprenticeship. Our task is to provide an environment where mature young scholars can gain experience in research as they collaborate with faculty and with other graduate students. The program encourages interdisciplinary study both within psychology and between psychology and other fields. Faculty research interests can be reviewed here [http://www.psychology.illinois.edu/people/faculty](http://www.psychology.illinois.edu/people/faculty).
Facilities and Resources

Students have everything they need, including personal office space and full access to research, library, and computing services, as well as to a large pool of research participants. The excellent cooperation between program areas in the department and with other units in the University provides access to expertise and methodology in a variety of areas including but not limited to:

- the Psychological Services Center
- the Counseling Center
- the Beckman Institute for Advanced Science and Technology
- the Center for the Study of Reading
- the Institute of Communications Research
- the School of Labor and Employee Relations
- the Family Resiliency Program
- the Neuroscience Program
- the Institute for Genomic Biology
- the Departments of Computer Science
- Educational Psychology
- Linguistics
- Molecular and Cellular Biology and Statistics
- the Colleges of Law and Medicine

Financial Aid

Students generally complete the doctoral degree in 4-6 years, and the Psychology Department makes financial support available to all Ph.D. students in good standing for up to 6 years. The University application form and supplemental application materials provide all the information that is required by the committees administering various funding sources, which include teaching assistantships, research assistantships, and fellowships.

- Master of Arts in Psychology (http://catalog.illinois.edu/graduate/graduate-majors/psychology/ma)
- Master of Science in Psychology (http://catalog.illinois.edu/graduate/graduate-majors/psychology/ms)

Doctor of Philosophy in Psychology

The Doctor of Philosophy degree is awarded to candidates who complete an approved program in their area of specialization and meet departmental and Graduate College requirements for the degree. These must include at least 64 or 96 graduate hours of graduate work; satisfactory performance in courses or examinations dealing with quantitative methods and chosen areas of specialization; a master’s thesis or equivalent; appropriate advanced courses and seminars in the area of specialization and in related and supporting areas; satisfactory performance on a doctoral qualifying examination; satisfactory performance on an oral preliminary examination; completion of an acceptable Ph.D. thesis; and satisfactory performance on an oral examination in defense of the thesis.

Entering with approved M.S./M.A. degree
