# TABLE OF CONTENTS

University of Illinois at Urbana-Champaign ............................................................ 13
General Information .................................................................................................. 14
Policy Notes ................................................................................................................ 14
Annual Announcement of Copyright Policies ......................................................... 15
Undergraduate ........................................................................................................... 16
Agricultural, Consumer and Environmental Sciences, College of ......................... 16
Departments .............................................................................................................. 18
Agricultural and Biological Engineering ................................................................. 18
  Agricultural Engineering Concentration ............................................................... 19
  Biological Engineering Concentration ................................................................. 21
  Dual Degree in Agricultural & Biological Engineering/ Agricultural & Biological Engineering Sciences ............... 22
  Major in Technical Systems Management ............................................................ 23
  Minor in Agricultural Safety and Health ............................................................... 24
  Minor in Technical Systems Management ............................................................ 25
Agricultural and Consumer Economics ................................................................ 25
  Agri-Accounting Concentration .......................................................................... 26
  Agribusiness Markets and Management Concentration ...................................... 26
  Consumer Economics and Finance Concentration .............................................. 26
  Environmental Economics and Policy ................................................................. 27
  Farm Management Concentration ....................................................................... 27
  Finance in Agribusiness Concentration ................................................................ 27
  Financial Planning Concentration ....................................................................... 27
  Minor in Agricultural Economics and Law ............................................................ 28
  Minor in Food and Agribusiness Management ...................................................... 28
  Minor in International Development Economics ................................................. 28
Policy, International Trade and Development Concentration .............................. 29
  Public Policy and Law Concentration .................................................................. 29
Animal Sciences ........................................................................................................ 29
  Companion Animal and Equine Science Concentration ...................................... 30
  Science, Pre-Veterinary and Medical Concentration ........................................... 31
  Technology and Management Concentration ..................................................... 33
Crop Sciences ............................................................................................................ 34
  Agroecology Concentration .................................................................................. 35
  Biological Sciences Concentration ....................................................................... 36
  Crop Agribusiness Concentration ....................................................................... 37
  Crops Concentration ......................................................................................... 37
  Horticultural Food Systems Concentration ......................................................... 38
  Plant Protection Concentration ........................................................................... 38
  Plant Biotechnology and Molecular Biology Concentration ................................ 39
Food Science and Human Nutrition ....................................................................... 39
  Dietetics Concentration ..................................................................................... 41
  Food Science Concentration ................................................................................ 41
  Hospitality Management Concentration ............................................................. 42
  Human Nutrition Concentration .......................................................................... 42
  Minor in Food Science .......................................................................................... 42
  Minor in Nutrition ................................................................................................. 43
Human Development and Family Studies ............................................................... 43
  Child and Adolescent Development Concentration ............................................ 45
  Family Studies Concentration ............................................................................ 46
Natural Resources and Environmental Sciences .................................................... 46
  Fish and Wildlife Conservation Concentration .................................................. 47
  Global Change & Landscape Dynamics ............................................................... 48
  Human Dimensions of the Environment Concentration ....................................... 48
  Minor in Natural Resource Conservation ............................................................. 49
  Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences ................................................................. 49
  Resource Conservation and Restoration Ecology ............................................... 50
Agricultural Education ............................................................................................. 50
  Agricultural Leadership Education Concentration .............................................. 51
  Agricultural Science Education Concentration ................................................... 51
  Food and Environmental Systems Minor ............................................................ 52
  International Minor ............................................................................................... 53
  Leadership Studies Minor .................................................................................... 53
Applied Health Sciences, College of ................................................................. 54
  Departments .......................................................................................................... 56
    Kinesiology and Community Health ................................................................. 56
    Community Health ............................................................................................... 56
      Health Education and Promotion ..................................................................... 57
      Health Planning and Administration ............................................................... 57
      Rehabilitation Studies ...................................................................................... 57
      Kinesiology ......................................................................................................... 57
      Recreation, Sport and Tourism .......................................................................... 59
    Speech and Hearing Science ............................................................................... 59
      Concentration in Cultural-Linguistic Diversity ................................................ 61
      Concentration in Neuroscience of Communication ......................................... 62
Concentrations in Audiology and Speech Language
Pathology ................................................................. 62
Aging ................................................................................. 63
Interdisciplinary Health Sciences ................................. 63
Business, College of ............................................................... 65
Departments ................................................................. 67
Accountancy ......................................................................... 67
Business Administration ................................................ 68
Major in Business Process Management ..................... 68
Major in Information Systems and Information Technology ........................................... 69
Major in Management .................................................... 69
Major in Marketing ......................................................... 70
Major in Supply Chain Management ............................. 70
Finance ................................................................................. 71
Minor in Business for Non-Business Majors ................ 71
Technology and Management Minor .......................... 72
Education, College of ............................................................. 73
Early Childhood Education ........................................... 74
Elementary Education ..................................................... 75
Learning and Education Studies .................................... 76
Special Education ............................................................ 79
Teacher Education Minor in Secondary School Teaching .... 81
Engineering, College of ...................................................... 81
Departments ................................................................. 97
Aerospace Engineering ..................................................... 97
Agricultural and Biological Engineering .......................... 100
Bioengineering ..................................................................... 104
Civil and Environmental Engineering ............................... 107
Computer Science .......................................................... 110
Electrical and Computer Engineering ............................. 112
Computer Engineering ..................................................... 112
Electrical Engineering ...................................................... 115
Industrial and Enterprise Systems Engineering .............. 117
General Engineering ........................................................ 117
Industrial Engineering .................................................... 120
Materials Science and Engineering ................................. 123
Mechanical Science and Engineering ............................... 127
Bachelor of Science in Engineering Mechanics ............. 127
Bachelor of Science in Mechanical Engineering ............ 130
Nuclear, Plasma, and Radiological Engineering .............. 132
Physics ............................................................................... 136
Bioengineering .............................................................. 139
Computer Science ......................................................... 139
Electrical and Computer Engineering ........................... 139
International Minor in Engineering ............................... 140
Materials Science and Engineering ................................. 140
Physics Minor ................................................................. 141
Polymer Science and Engineering ...................................... 141
Technology and Management ......................................... 141
Computational Science and Engineering ......................... 142
Fine and Applied Arts, College of ................................. 142
Academic Units .............................................................. 144
Architecture, School of ...................................................... 145
Art and Design, School of .................................................. 147
Art Crafts ............................................................................ 147
Art Education ................................................................. 148
Art Foundation ............................................................... 148
Art History ....................................................................... 149
Graphic Design ............................................................... 150
Industrial Design ............................................................. 150
Minor in Art and Design ..................................................... 151
Minor in Community-Based Art Education .................... 151
New Media ......................................................................... 152
Painting ............................................................................. 152
Photography ....................................................................... 153
Sculpture ............................................................................ 154
Dance, Department of ...................................................... 154
Bachelor of Arts .............................................................. 155
Bachelor of Fine Arts ........................................................ 156
Landscape Architecture, Department of ......................... 157
Music, School of .............................................................. 159
Bachelor of Arts with a Major in Music .......................... 161
Instrumental Performance Major ...................................... 161
Jazz Performance Major .................................................... 162
Music Composition-Theory Major ................................... 162
Music Education ............................................................. 163
Musicology Major ........................................................... 165
Open Studies ..................................................................... 165
Vocal Performance Major ................................................ 166
Theatre, Department of ..................................................... 166
Urban and Regional Planning, Department of ................ 169
Minor in Art History ........................................................ 171
General Studies, Division of ............................................ 171
Biology Teaching ................................................................. 270
Computer Science and Liberal Arts and Sciences Discipline ................................................................. 271
Individual Plans of Study (IPS) ................................................................. 271
Physics ..................................................................................... 272
LAS Specialized Curriculum in Physics ................................................................. 272
Physics Concentration within the Sciences and Letters Curriculum .................................................................. 273
Physics Teaching Concentration within the Sciences and Letters Curriculum ................................................................. 274
Media, College of ........................................................................ 275
Departments ................................................................. 278
Advertising ........................................................................... 278
Journalism ..................................................................................... 279
Media and Cinema Studies ................................................................. 279
Cinema Studies Concentration .......................................................................... 280
Media Studies Concentration .......................................................................... 280
Minor in Cinema Studies ..................................................................................... 281
Agricultural Communications ..................................................................................... 282
Social Work, School of ........................................................................ 283
Minors ..................................................................................... 285
Environmental Fellows Program (EFP) ................................................................. 286

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. The University has earned a reputation as an institution of international stature. It is recognized for the high quality of its academic programs and the outstanding facilities and resources it makes available to students and faculty. Scholars and educators rank it among a select group of the world’s great universities.

The Campus

Located in the adjoining cities of Champaign and Urbana, approximately 140 miles south of Chicago, the University and its surrounding communities offer a cultural and recreational environment ideally suited to the work of a major research institution.

The University is a residential campus of classrooms, laboratories, libraries, residence halls, and recreational and cultural facilities with 211 major buildings on the central campus. Nearby are the University’s Willard Airport; Robert Allerton Park, the University’s nature and conference center; and agricultural land. More farmland elsewhere in Illinois is used by the College of Agricultural, Consumer and Environmental Sciences as experimental fields.

Nearly every facility on campus is accessible to people with physical disabilities, and the University’s programs and services for people with disabilities have served as models worldwide.

Colleges and Schools

Nine undergraduate-serving colleges and schools offer over 150 programs of study leading to baccalaureate degrees. They are the Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Business; Education; Engineering; Fine and Applied Arts; Liberal Arts and Sciences; Media and the School of Social Work. Post-baccalaureate students study in more than 100 fields through the Graduate College and in professional programs through the Colleges of Law and Veterinary Medicine. National surveys consistently rank the University of Illinois at Urbana-Champaign among the top ten institutions in many fields of study, with several colleges and departments ranked among the top five.
GENERAL INFORMATION

The University of Illinois at Urbana-Champaign 2016-2017 Academic Catalog is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the Catalog is in effect.

The class schedule is available each term in the Course Explorer (http://courses.illinois.edu). The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this Catalog are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors.

Courses numbered 200-299 are intended for lower division students who satisfy the published prerequisite(s), if any. Transfer credit from two-year colleges around the state would correspond to 100 and 200-level offerings.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from a community college does not correspond to these numbers.

Courses numbered 400-499 are intended for upper division undergraduate students, sometimes also for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law and veterinary programs.

Course credit is listed after each course title. The University counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer (http://courses.illinois.edu). For information on credit policies, see the Student Code.

A crosslisted course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or several departments and will be noted by the statement: “Same as.” The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department’s course is noted by “See....”

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Degree Programs

The undergraduate degree programs of study are organized by Colleges and Schools. Specific majors can be found by clicking on degree programs in the left-hand navigation or by exploring offerings in each college or school or by using the “Undergraduate Programs” link in the upper navigation bar to find an alpha list of programs offered as majors, minors or concentrations. Graduate programs of study are organized by program. A listing of programs is found in the left-hand navigation as well as the “Graduate Programs” tab in the upper navigation bar.

General Education Requirements

The General Education (GenEd) requirements describe the core courses all students must take in order to graduate. They are an important component of students’ education at the University of Illinois. Besides specializing in a major and training for a career, students should become familiar with some of the many rapidly changing disciplines. Through these requirements, Illinois undergraduates:

• expand their historical, aesthetic, cultural, literary, scientific, and philosophical perspectives
• improve critical and analytical thinking; and
• learn skills in finding, managing, and communicating knowledge.

Courses are noted as fulfilling one or more of the following categories:

• Composition I
• Advanced Composition
• Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
• Natural Sciences and Technology: Life Science or Physical Science
• Social and Behavioral Sciences
• Cultural Studies: Western/Comparative Cultures or Non-Western/US Minority Culture(s)

Policy Notes

Illinois Copyright Policy

The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources)

Annual Copyright Notice to Students (p. 15)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEA are outlined on this page (http://copyright.illinois.edu/heoa).
Religious Observances

The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).

Smoke-Free Campus

As of January 1, 2014, smoking is prohibited on all campus property at the University of Illinois at Urbana–Champaign, both indoors and outdoors, in university-owned vehicles and in privately-owned vehicles parked on campus property. The advertising, sale, or free sampling of tobacco products is also prohibited on campus property. Littering the remains of tobacco products or any other related waste product on campus property is further prohibited. The complete policy is available here (http://cam.illinois.edu/v/v-B-2.1.htm).

Student Code

Policies and procedures applying apply to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code (http://studentcode.illinois.edu).

Student Consumer Information

Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois at Urbana-Champaign is available on the Office of the Provost’s website (http://provost.illinois.edu/consumerinfo). This includes a description of the institution’s accreditation and state authorization, contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.

Annual Announcement of Copyright Policies

Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies, please note that it is not necessary to reply to this email.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) music, movies and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages set at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504 and 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

All campuses of the University of Illinois make every effort to comply with laws and institutional policies on copyright. Students that receive a copyright infringement notice may face disciplinary actions. These disciplinary actions may include, and are not limited to, loss of network access, mandatory training about copyright infringement, sanctions of record on academic transcripts, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: http://copyright.illinois.edu.
The Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Business; Education; Engineering; Fine and Applied Arts; Liberal Arts and Sciences; Media; and the School of Social Work offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

Agricultural, Consumer and Environmental Sciences, College of

227 Mumford Hall
1301 W. Gregory
Urbana, IL 61801-9015
PH: (217) 333-0460
http://aces.illinois.edu

The College of Agricultural, Consumer and Environmental Sciences plays a key role in national and international research initiatives in biological, physical, social, and economic sciences. The scope of the College has broadened dramatically since its founding in 1867, while its purpose remains focused on advancing scientific knowledge that makes life better, healthier, safer, and more profitable for people in Illinois and around the globe. The College offers 10 undergraduate majors with 39 different concentrations.

The ACES College enrolls more than 2,700 students in the seven departments leading to a Bachelor of Science degree. Students can select from majors and concentrations that direct the focus of study to their specific interests.

Teaching, research, and outreach opportunities are supported by excellent resources. The College of ACES Library and Information Center houses the college's collection of educational resources, computing facility and the College of ACES career development and placement office, which assists students in personal and career development through internships and placement after graduation. The Family Resiliency Center, Institute for Genomic Biology, Child Development Laboratory and extensive research centers in Champaign-Urbana and across the state are other examples of unique and excellent college resources. For instance, the Morrow Plots, a national historic landmark established in 1876, are the oldest agronomic research plots in the United States. The Morrow Plots are located on campus next to the undergraduate library.

The ACES James Scholar Honors Program and the Jonathan Baldwin Turner Undergraduate Research Program offer excellent opportunities for students to be involved in cutting edge research and solving contemporary challenges. Research is conducted in the broad areas of consumer behavior, biotechnology, environmental quality and protection, financial planning, food science, human nutrition, natural resource systems, and individual and family well-being.

Increasing the international knowledge and experience of students and faculty helps meets the growing demand for graduates who are internationally literate and able to work effectively in different countries, in different languages and with people of different cultures. The academic programs office provides initiative and focus to College international study abroad programs as well as integrating an international dimension to the educational experience.

The distinguished faculty, innovative programs, and pioneering achievements in teaching, research, and outreach activities, together with an enthusiastic and competitive student body, place the College of ACES among the top institutions in the country in a survey of peers.

Departments and Curricula

The Department of Agricultural and Biological Engineering offers two majors: Agricultural and Biological Engineering/Agricultural Engineering Sciences and Technical Systems Management. Students in the Agricultural and Biological Engineering major earn that degree from the College of Engineering and have the option of a second degree in Agricultural Engineering Sciences. This major is designed to produce graduates who have a basic engineering education for careers of engineering service to the agricultural, environmental, and biofuels industries. The intent of the program is to provide a combination of engineering theory and applications courses to permit students to pursue goals in academia, government or industry. The graduates are expected to provide engineering solutions in agricultural production, bioprocesses and product utilization, natural resources conservation, and are exposed to current social and cultural concepts and ideas. The Technical Systems Management major is designed to prepare students for careers requiring the application, management, and marketing of engineering technologies. Students study technological systems, business and economics (including organization, operations, management, marketing, and sales), and oral and written communications. Graduates of the TSM program accept positions of employment at highly competitive salaries.

The Department of Agricultural and Consumer Economics offers programs designed to prepare students for business- or policy-related fields with special emphasis on agriculture, consumers, and environmental protection. Students' study is concentrated in one of the following areas: agri-accounting; finance in agribusiness; agribusiness markets and management; consumer economics and finance; environmental economics and policy; farm management; financial planning; policy, international trade and development; and public policy and law.

The Department of Animal Sciences offers undergraduate students unique opportunities to conduct research projects with faculty. In addition, many students gain animal experience by working part-time at the U of I Farms. Internships and field study trips are additional avenues of gaining knowledge and experience. Study Abroad experiences are also strongly encouraged. Areas of concentration are companion animal and equine science; science, pre-veterinary and medical; and technology and management.

The Department of Crop Sciences major in Crop Sciences offers concentrations of study in plant biotechnology and molecular biology, crop agribusiness, biological sciences, agroecology, plant protection, horticultural food systems, and crops. In each of these concentrations students receive a strong grounding in science and can apply that knowledge through internship experiences with a wide range of agricultural employers. Each concentration can lead to employment immediately after completion of the B.S. degree, or to graduate or professional study.

The Department of Food Science and Human Nutrition offers concentration of study in dietetics, food science, hospitality management, and human nutrition. Courses in the department include the applications of biology, engineering, chemistry, physics, and
microbiology to the processing, formulation, packaging, and distribution of food.

The Department of Human Development and Family Studies' major allows students to choose to concentrate their study in either child and adolescent development or family studies. The program prepares students for graduate education or employment in areas such as child care services, family life education, social work, human services, marriage and family counseling, pediatric services in hospitals, cooperative extension work or business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender.

The Department of Natural Resources and Environmental Sciences provides students the opportunity to study resource and wildlife conservation and management, restoration ecology, the impacts of global change, and human dimensions of the environment. NRES is an interdisciplinary program that brings biological, physical, and social scientists together to teach and discover techniques to improve the health and integrity of urban and natural ecosystems.

Agricultural Communications is a major offered jointly by the Colleges of ACES and Media. The program is administratively housed in the College of Media. Students specialize in advertising or journalism and go on to careers and graduate study in newspaper and magazine writing and publishing, advertising, broadcasting, and public relations.

The program in Agricultural Education offers the Agricultural Leadership and Science Education major. Students select a concentration of either Agricultural Leadership Education or Agricultural Science Education. This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu)).

Admission Requirements

Freshman applicants must meet general course pattern admission requirements of the University.

Applicants for freshman admission are evaluated on the basis of their ACT scores, high school percentile rank, and statements of personal and professional interest, among other factors. Detailed information on the admission process may be obtained from the Office of Undergraduate Admissions.

Transfer applicants are evaluated on the basis of their transfer grade point averages and completion of core course requisites. Transfer applicants to the Dietetics and Human Nutrition major must have a grade point average of at least 3.0; applicants to Agricultural and Consumer Economics and Agricultural Science Education need a minimum GPA of 2.75, and all other curricula require at least a grade point average of 2.5. Applicants are encouraged to consult the Office of Undergraduate Admissions for specific course requirements.

Graduation Requirements

The minimum number of hours required for graduation varies between 126 and 130 for all curricula within the college. Included in the total must be all courses prescribed in the given curriculum and a sufficient number of electives to obtain the total number.

Each candidate for graduation must have a grade point average of not less than 2.0 (A = 4.0), including grades in courses transferred from other institutions, and a grade point average of not less than 2.0 in all courses taken at the University of Illinois at Urbana-Champaign. Candidates for graduation from Dietetics, Human Nutrition, and Agricultural Science Education must have institutional and overall grade point averages of at least 2.5 (A = 4.0).

Scholarship Information

A number of scholarships for undergraduate students enrolled in the College of ACES are made available through the generous support of alumni and friends of the College. Incoming and currently enrolled ACES students are eligible for consideration for merit-based awards that are awarded annually by the College. Additional information on scholarships for ACES students can be found at academics.aces.illinois.edu/scholarships (http://academics.aces.illinois.edu/scholarships).

For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The agricultural and biological engineering program requires one of two concentrations: Agricultural Engineering and Biological Engineering.

Orientation and Professional Development

These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Concentration Requirements

Students will select one concentration:

Agricultural Engineering Concentration

Biological Engineering Concentration
Electives
Technical electives and biological and natural science electives for the selected concentration 21

Liberal Education
The Liberal education courses develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning. 1
ECON 103 Macroeconomic Principles 5 3
Electives from the campus General Education social & behavioral sciences list. 3
Electives from the campus General Education humanities & the arts list. 6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts. 6

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.
RHET 105 Writing and Research 4
Advanced Composition 6

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors. 7
Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 7

Total Hours 128

1 External transfer students take ENG 300 instead.
2 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3 The extra hour of credit for this course may be used to help meet free elective requirements.
4 Liberal education courses
5 ECON 102 or ACE 100 may be substituted by petition.
6 Satisfied by completing ABE 469 in the Agricultural and Biological Engineering Technical Core.
7 College of Engineering advising Web site.

Concentrations
• Agricultural Engineering (p. 19)

Agricultural Engineering Concentration
The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

• Renewable Energy Systems
• Off-Road Equipment Engineering
• Soil and Water Resources Engineering

Agricultural Engineering Concentration Requirements
Select one of the following: 3
CEE 202 Engineering Risk & Uncertainty
IE 300 Analysis of Data
ABE 440 Applied Statistical Methods I 1
STAT 400 Statistics and Probability I 1
ECE 206 Elec & Electronic Circuits Lab 1
ME 300 Thermodynamics 3
TAM 251 Introductory Solid Mechanics 3
Select one of the following: 4
TAM 335 Introductory Fluid Mechanics
CHBE 421 Momentum and Heat Transfer
ME 310 Fundamentals of Fluid Dynamics

Total Hours 14

1 The extra hour of credit for this course may be used to help meet free elective requirements.

Electives
This elective course work must be completed to fulfill the concentration. The subjects build upon the agricultural and biological engineering technical core.

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group A 1 6
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A, and the remainder approved Other Technical Electives – Group A. 2 15

Total Hours 21

1 Biological and Natural Sciences Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-BioNatSciElectives)
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives), and the remainder approved Other Technical Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives/#tag1).

Semester Hours: 16

Total Hours: 128

1 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.

2 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Information listed in this catalog is current as of 04/2016
Biological Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest. They should be taken. Refer to the appropriate sequence below for each concentration.

¹ May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Suggested Sequence

The schedule that follows for each concentration is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. Refer to the appropriate sequence below for each concentration.

1 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.

2 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

3 Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4 One elective course may satisfy the General Education Advanced Composition requirement. ABE 469 fulfills this requirement.

5 The extra hour of credit for this course may be used to help meet free elective requirements.

6 Students in the Biological Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-BioNatSciElectives).

7 Students in the Biological Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives), and the remainder selected from the approved list of Other Technical Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives).

8 May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Dual Degree in Agricultural & Biological Engineering/Agricultural & Biological Engineering Sciences

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from the College of Engineering as well as Agricultural and Biological Engineering Sciences from the College of ACES. Students first enroll in the College of ACES and then transfer to the College of Engineering after two years. Students then complete the ABET-accredited degree in Agricultural and Biological Engineering in the College of Engineering before entering a fifth year in ACES, in the Agricultural and Biological Engineering Sciences program. The suggested program of
study that follows fulfills graduation requirements for both the College of Engineering and the College of ACES.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing.

Overview of Curricular Requirements

The curriculum for the dual major requires 158 hours for graduation, of which 128 hours are specified for the major in Agricultural and Biological Engineering from the College of Engineering. Curriculum requirements specific to the dual major are organized as follows.

Completion of degree requirements for Agricultural and Biological Engineering major

Communication 3
CMN 101 Public Speaking

Biological Sciences Coursework 1 4
Agricultural Sciences Coursework 2 15

Open Electives 3 158

Total hours required to receive a B.S. in Agricultural and Biological Engineering and a B.S. in Agricultural and Biological Engineering Sciences 158

1 In addition to the Biological and Natural Science Elective hours required for the Agricultural Engineering Concentration (6 hours) and the Biological Engineering Concentration (6 hours), a further 4 hours of biological sciences must be completed from biology, entomology, microbiology, plant biology, physiology, or zoology to make up a total of 10 hours. These hours can be selected from the Biological and Natural Science Elective lists for the two concentrations. Other courses with strong biological science content may be approved by the department.

2 Fifteen hours of agricultural sciences with courses from at least two subject areas other than Agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.

3 Sufficient open electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirements for both degrees.

Major in Technical Systems Management

For the Degree of Bachelor of Science in Technical Systems Management

This major in Technical Systems Management is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of agricultural engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution.

Students can specialize in Construction Systems Management; Environmental Systems Management; Mechanization, Marketing, and Technology Management Systems; Production Systems; or Renewable Energy Systems.

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
RHET 105 Writing and Research
& CMN 101 and Public Speaking (or equivalent (see college Composition I requirement))
CMN 111 Oral & Written Comm I
& CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list. 3-4

Cultural Studies
Two courses; one Western culture and one non-Western/US minority culture course. 6

Foreign Language
Coursework at or above the third level is required for graduation.

Quantitative Reasoning I
MATH 234 Calculus for Business I (or equivalent) 4

Quantitative Reasoning II
Select one of the following: 3-4
ACE 261 Applied Statistical Methods
CPSC 241 Intro to Applied Statistics
ECON 202 Economic Statistics I
PSYC 235 Intro to Statistics
SOC 280 Intro to Social Statistics
STAT 100 Statistics

Natural Sciences and Technology
CHEM 102 General Chemistry I 4
& CHEM 103 and General Chemistry Lab I
PHYS 101 College Physics: Mech & Heat 5
Select one of the following: 4-5
PHYS 102 College Physics: E&M & Modern
CHEM 104 General Chemistry II & CHEM 104 and General Chemistry Lab II

Biological sciences (see campus approved list) 3-5

Humanities and the Arts
Select from campus approved list. 6

Social and Behavioral Sciences
ACE 100 Agr Cons and Resource Econ 4
ECON 103 Macroeconomic Principles 3

Social and behavioral sciences. Select from campus approved list. 3-4

ACES Prescribed
ACES 101 Contemporary Issues in ACES 2

Minor in Technical Systems Management

Note: This minor has prerequisites of a minimum of 60 hours with a 2.5 GPA; completion of MATH 234 or equivalent; PHYS 101 or equivalent; CHEM 102 and CHEM 103 or equivalent; and PHYS 102 or CHEM 104 and CHEM 105 or equivalent.

TSM 100  Technical Systems in Agr  3
Fifteen Hours, at least six of which must be at the 400 level, selected from:

- TSM 232  Materials and Construction Sys
- TSM 233  Metallurgy & Welding Process
- TSM 234  Wiring, Motors and Control Sys
- TSM 262  Off-Road Equipment Management
- TSM 352  Land and Water Mgt Systems
- TSM 363  Fluid Power Systems
- TSM 371  Residential Housing Design
- TSM 372  Environ Control & HVAC Systems
- TSM 381  Grain Drying & Storage Systems
- TSM 435  Elec Computer Ctrl Sys
- TSM 464  Engine and Tractor Power
- TSM 465  Chemical Applications Systems
- TSM 496  Independent Study

Total Hours  18

For the Degree of Bachelor of Science in Agricultural and Consumer Economics

Prescribed Courses including Campus General Education

Composition I and Speech

RHET 105 & CMN 101  Writing and Research and Public Speaking (or equivalent (see College Composition I requirement)

Advanced Composition

Select one of the following:

- BTW 250  Principles Bus Comm
- BTW 261  Principles Tech Comm
- BTW 263  Writing in the Disciplines
- RHET 233  Adv Rhetoric & Composition
- CMN 220  Communicating Public Policy

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of:

- MATH 124  Finite Mathematics
- MATH 125  Elementary Linear Algebra
- MATH 231  Calculus II

Quantitative Reasoning II

Select one of:

- ACE 261  Applied Statistical Methods

Information listed in this catalog is current as of 04/2016
Contents

Humanities and the Arts

Selected from campus approved list.

Natural Sciences and Technology

Farm Management Concentration

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

Minor in Environmental Economics and Law

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply those tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

Policy, International Trade and Development Concentration

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

Public Policy and Law Concentration

Students in Public Policy and Law become expert in the economics of public policy in general and in its application to specific areas of interest. This concentration will expose students to the legal and institutional structures in which policies are developed, the analysis of the economics impacts of policies, and special circumstances of public policy and law pertaining to the environment, consumers, the agricultural sector, international relations, and other.

Animal Sciences

Steven C. Loerch
116 Animal Sciences Laboratory, 1207 West Gregory, Urbana
PH: (217) 244-1681
http://ansci.illinois.edu

Welcome to the Department of Animal Sciences, an academic family that includes more than 6,000 alumni, 500 undergraduate students, and more than 100 graduate students. We are proud of our legacy, and we are dedicated to enhancing the quality of life for our students and stakeholders through excellence in teaching, research and outreach programs.

Why Animal Sciences?

Students in Animal Sciences combine their interests in biology and animals in a learning environment that extends beyond the classroom. The Department of Animal Sciences offers our students opportunities to conduct undergraduate research, gain hands-on experience working in our laboratories and farms, participate in internships, and become active in a number of student organizations. For instance, our students work with beef cattle and poultry in state-of-the-art research facilities, serve internships in animal shelters and zoos, and conduct discovery research in cutting-edge programs in immunology and reproductive biology. We provide opportunities for virtually every area of interest and our students become skilled in applying their knowledge to address real-world problems.

The work of the Department of Animal Sciences is important. Our research, teaching, and Extension programs address subjects such as bioenergy, the environment, food production, animal health, and animal behavior. We study production efficiency, profitability, and well-being of dairy and beef cattle, pigs, and poultry to enhance the supply of food for a growing world population. Our programs in companion animal biology and humane education create information for pet owners and help us understand the value of positive relationships between humans and animals. Fundamental research in physiology, nutrition, and

Information listed in this catalog is current as of 04/2016
behavior solve animal sciences problems and have significant impact on improving human health.

Our Commitment
We have a diverse and nationally respected faculty who solve problems of real importance to society and who are deeply committed to providing the best educational experiences to our students. We care about the success of our students and we provide a high-quality education that will equip them to identify and solve the challenges of the future.

The learning opportunities in the Department of Animal Sciences and the University of Illinois are without limit. Come see for yourself why the Department of Animal Sciences is held in high regard in the nation and throughout the world.

For the Degree of Bachelor of Science with a Major in Animal Sciences
Students pursuing this major select one of three concentrations:
- Companion and Equine Science Concentration (p. 30)
- Science, Pre-Veterinary and Medical Concentration (p. 31)
- Technology and Management Concentration (p. 33)

Minor in Animal Sciences
The minor in Animal Sciences is designed to provide students with a basic understanding and knowledge of a discipline subject matter area of their choice. Subject matter areas include animal production and management, nutrition, genetics, animal behavior, immunology, meat science/muscle biology, microbiology, reproductive physiology, and molecular biology. Courses in the minor cannot be completed Credit/No Credit.

Courses Required
ANSC 100 Intro to Animal Sciences 4
ANSC 101 Contemporary Animal Issues 3
Select two of the following: 6-7
   ANSC 223 Animal Nutrition
   ANSC 224 Animal Reproduction and Growth
   ANSC 221 Cells, Metabolism and Genetics
   ANSC 222 Anatomy and Physiology
Courses Required
Minimum two additional 300- or 400-level ANSC courses. These courses must be distinct from the student’s major or an additional minor. ANSC 398 and ANSC 499 do not count toward the minor. 6-8

Total Hours 20

Companion Animal and Equine Science Concentration
The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

Prescribed Courses including Campus General Education
Composition I and Speech
RHET 105 Writing and Research (or equivalent) (see college Composition I requirement) 4
CMN 101 Public Speaking 3
Advanced Composition
Select from campus approved list. 3-4
Cultural Studies
One Western culture and one non-Western U.S. minority culture course 6
Foreign Language
Coursework at or above the third level is required for graduation.
Quantitative Reasoning I
Select one of the following: 4-5
   MATH 220 Calculus
   MATH 221 Calculus I
   MATH 234 Calculus for Business I
Quantitative Reasoning II
Select one of the following: 3-4
   ACE 261 Applied Statistical Methods
   CPSC 241 Intro to Applied Statistics
   ECON 202 Economic Statistics I
   PSYC 235 Intro to Statistics
   STAT 100 Statistics
   SOC 280 Intro to Social Statistics
Natural Sciences and Technology
CHEM 102 & CHEM 103 General Chemistry I and General Chemistry Lab I 4
CHEM 104 & CHEM 105 General Chemistry II and General Chemistry Lab II 4
MCB 100 Introductory Microbiology 5
& MCB 101 and Intro Microbiology Laboratory
Humanities and the Arts
Courses selected from campus approved list 6
Social Sciences

**Companion Animal and Equine Science Concentration**

**Required**

Select three of the following:

- ANSC 206 Horse Management
- ANSC 250 Companion Animals in Society
- ANSC 306 Equine Science
- ANSC 307 Companion Animal Management
- ANSC 407 Animal Shelter Management
- ANSC 422 Companion Animal Nutrition
- ANSC 467 Applied Animal Ecology

Select one of the following:

- ANSC 201 Principles of Dairy Production
- ANSC 204 Intro Dairy Cattle Evaluation
- ANSC 205 World Animal Resources
- ANSC 211 Breeding Animal Evaluation
- ANSC 219 Meat Technology
- ANSC 301 Food Animal Production, Management, and Evaluation
- ANSC 305 Human Animal Interactions
- ANSC 309 Meat Production and Marketing
- ANSC 310 Meat Selection and Grading
- ANSC 312 Advanced Livestock Evaluation
- ANSC 313 Horse Appraisal
- ANSC 314 Adv Dairy Cattle Evaluation
- ANSC 322 Livestock Feeds and Feeding
- ANSC 370 Companion Animal Policy
- ANSC 400 Dairy Herd Management
- ANSC 401 Beef Production
- ANSC 402 Sheep Production
- ANSC 403 Pork Production
- ANSC 404 Poultry Science
- ANSC 405 Advanced Dairy Management
- ANSC 435 Milk Quality and Udder Health
- ANSC 437 Adv Reproductive Management
- ANSC 471 ANSC Leaders & Entrepreneurs

Select two of the following:

- ANSC 331 Biology of Reproduction
- ANSC 350 Cellular Metabolism in Animals
- ANSC 363 Behavior of Domestic Animals
- ANSC 366 Animal Behavior
- ANSC 406 Zoo Animal Conservation Sci
- ANSC 409 Meat Science
- ANSC 420 Ruminant Nutrition
- ANSC 421 Minerals and Vitamins
- ANSC 431 Advanced Reproductive Biology
- ANSC 438 Lactation Biology
- ANSC 440 Applied Statistical Methods I
- ANSC 441 Human Genetics
- ANSC 444 Applied Animal Genetics
- ANSC 445 Statistical Methods
- ANSC 446 Population Genetics
- ANSC 448 Math Modeling in Life Sciences
- ANSC 449 Biological Modeling
- ANSC 450 Comparative Immunobiology
- ANSC 451 Microbes and the Anim Indust
- ANSC 452 Animal Growth and Development
- ANSC 453 Stem Cell Biology
- ANSC 509 Muscle Biology
- ANSC 510 Science of Animal Well-Being
- ANSC 520 Protein and Energy Nutrition
- ANSC 521 Regulation of Metabolism
- ANSC 522 Advanced Ruminant Nutrition
- ANSC 523 Techniques in Animal Nutrition
- ANSC 524 Nonruminant Nutrition Concepts
- ANSC 525 Topics in Nutrition Research
- ANSC 526 Adv Companion Animal Nutrition
- ANSC 533 Repro Physiology Lab Methods
- ANSC 541 Regression Analysis
- ANSC 542 Applied Bioinformatics
- ANSC 543 Bioinformatics
- ANSC 545 Statistical Genomics
- ANSC 554 Statistical Genomics
- ANSC 559 Animal Stress Physiology

**Additional elective courses must be completed to yield at least 126 total Hours for graduation.**

**Total Hours:** 126

### Science, Pre-Veterinary and Medical Concentration

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

**Prescribed Courses including Campus General Education**

#### Composition I and Speech

- RHET 105 Writing and Research (or equivalent (see college Composition I requirement))

- CMN 101 Public Speaking

#### Advanced Composition

Select from campus approved list.

Total Hours 126

**Technology and Management Concentration**

The Technology and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student’s practical knowledge through business courses.

**Prescribed Courses including Campus General Education**

Information listed in this catalog is current as of 04/2016
Our department offers students opportunities to succeed and find their niche. When our students graduate, they often have more than one lucrative job opportunity waiting. The demand for our students is high and the future looks even more promising for well-trained scientists as societal demands change. For example, by 2020, estimates say 1,430 new graduates will be needed with a master’s degree or Ph.D. in plant breeding alone.

Check out our undergraduate curriculum options in plant biotechnology and molecular biology, plant protection, agroecology, crop agribusiness, biological sciences, crops, and horticultural food systems. We also offer advanced degree programs tailored to your specific interests that will prepare you for enriching careers with a spectrum of public and private organizations in a global agricultural industry.

In order to reach our mission, we are developing and delivering educational and research programs that foster the creation and adoption of agricultural plant production systems that are profitable, environmentally sound, socially responsible and sustainable.

We are developing well educated, highly skilled and creative individuals with the potential to be national and international leaders in their field. If you are looking for a challenging, exciting career that will make a difference, I am confident our department can meet your needs.

Plant your future in the Department of Crop Sciences at the University of Illinois. Join our efforts to advance science to meet the needs of a growing world population. From plant breeding and molecular biology to sustainable food and fuel production systems, our internationally recognized faculty are prepared to educate the future leaders of our industry to use the latest advancements in science and technology to improve food and fuel production.

## Minor in Crop and Soil Management

The Crop and Soil Management minor is designed for students who desire a significant background in crop and soil systems to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student's major and interests. Enrollment in the Crop and Soil Management minor is not available to students enrolled in the Crop Sciences major. Courses in the minor cannot be taken Credit/No Credit.

## Agroecology Concentration

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

**Natural Sciences and Technology**

---

Information listed in this catalog is current as of 04/2016
Biological Sciences Concentration

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than is included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the student's faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

## Crop Agribusiness Concentration

The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.

## Crops Concentration

The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants-how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.
### Horticultural Food Systems Concentration

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

### Plant Protection Concentration

The plant protection concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

Plant Biotechnology and Molecular Biology Concentration

The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

Food Science and Human Nutrition

Sharon Nickols-Richardson
260 Bevier Hall, 905 South Goodwin, Urbana
PH: (217) 244-4498
http://fshn.illinois.edu

The Department of Food Science and Human Nutrition (FSHN) at the University of Illinois at Urbana-Champaign is dedicated to implementing education, research, and outreach programs designed to provide a safe, nutritious, and affordable food supply that enhances human health. To this end, students and faculty work collectively toward learning, discovering, and disseminating new knowledge and in applying novel technologies to achieve the departmental mission. The basic human need for high quality food for optimal health and wellness drives the core of student training within the FSHN Department.

Information listed in this catalog is current as of 04/2016
Undergraduate concentrations leading to the B.S. degree include Dietetics, Food Science, Hospitality Management, and Human Nutrition. Career opportunities for graduates of our program are excellent and include position titles including nutritionists, dietitians, food technologists, product research and development and food systems management. Graduate students may pursue M.S. and Ph.D. degrees, focusing on original research in the general concentrations of Food Science or Human Nutrition. The FSHN Department also offers a non-thesis Professional Science Master’s degree that includes foundational courses within the department along with business and marketing courses. The University of Illinois Online Food Science Master’s Degree Program is a popular option for individuals working full-time and who desire a non-thesis M.S. degree in Food Science. Advanced degrees lead to accelerated careers in industry, government, and academia.

Departmental faculty expertise includes:

* Food microbiology, safety, and nutritional value;
* Food materials science;
* Diets and foods for disease prevention, including obesity, cancer and other metabolic conditions;
* Infant, childhood, and community nutrition;
* Food processing;
* Value-added biotransformation; and
* Gut health and the microbiome.

The FSHN Department values diversity in people, cultures, learning, and science. Collaboration with experts in engineering, biomedical sciences, cellular and molecular biology, and multiple disciplines within the field of agricultural, consumer, and environmental sciences (ACES) is important and routine for students and faculty to promote health, wellness, and sustainable human and economic development.

**Total Hours**

126

Approved concentrations:

1. Food Science Concentration (p. 41)
2. Dietetics Concentration (p. 41)
3. Human Nutrition Concentration (p. 42)
4. Hospitality Management Concentration (p. 42)

1. Students in the Food Science Concentration must select from MATH 220 or MATH 221.
2. Students in the Hospitality Management Concentration must take CHEM 101 instead.
4. Six hours for Food Science concentration.
5. Minor in Food Science (p. 42)
Dietetics Concentration

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this concentration are prepared for careers in many areas of the food industry. A minimum of 130 hours of credit is required for graduation.

Food Science Concentration

The Food Science concentration exposes students to all components of food production: harvesting and raw-product handling, food-processing procedures and techniques, packaging, and food storage. Students selecting this concentration are prepared for careers in many areas of the food industry. A minimum of 130 hours of credit is required for graduation.

1 Students may take both FSHN 322 and 428; one will be counted as the Dietetics Concentration Requirement and other as the Dietetics Concentration Elective, but either single course alone does not “double count” as the Dietetics Concentration Requirement and the Dietetics Concentration Elective.

Information listed in this catalog is current as of 04/2016
Hospitality Management Concentration

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. This concentration is unique compared to other hospitality management programs offered at other institutions because it is science-based. The total number of hours required for graduation is 126.

Social and Behavioral Sciences
PSYC 100 Intro Psych 4
ACE 100 Agr Cons and Resource Econ 3-4
or ECON 102 Microeconomic Principles
SOC 100 Introduction to Sociology 4

Hospitality Management Concentration Required
ACCS 200 Fundamentals of Accounting 3
ACE 161 Microcomputer Applications 3
AGED 280 Training Needs Assessment 2
AGED 300 Training and Development 4
ANSC 309 Meat Production and Marketing 2
BADM 300 The Legal Environment of Bus 3
BADM 310 Mgmt and Organizational Beh 3
BADM 320 Principles of Marketing 3
FHSN 101 Intro Food Science & Nutrition 3
FHSN 120 Contemporary Nutrition 3
FHSN 140 Introduction to Hospitality 3

PSYC 245 Industrial Org Psych 3

Human Nutrition Concentration

This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong human nutrition preparation that is not available elsewhere on campus.

For those interested in practicing nutrition or nutrition counseling, please see Dietetics. The total number of hours required for graduation is 126.

Other Natural Science and Technology Required
CHEM 232 Elementary Organic Chemistry I 3 OR 4
CHEM 233 Elementary Organic Chem Lab I 2
MCB 244 Human Anatomy & Physiology I & MCB 245 and Human Anat & Physiol Lab I 5
MCB 246 Human Anatomy & Physiology II & MCB 247 and Human Anat & Physiol Lab II 5
MCB 450 Introductory Biochemistry 3

Human Nutrition Required
ACE 161 Microcomputer Applications 3
FHSN 101 Intro Food Science & Nutrition 3
FHSN 220 Principles of Nutrition 4
FHSN 420 Nutritional Aspects of Disease 3
FHSN 426 Biochemical Nutrition I 3
FHSN 427 Biochemical Nutrition II 3

Select a minimum of two courses from the following list of Restricted Electives:
FHSN 302 Sensory Evaluation of Foods 4
FHSN 322 Nutrition and the Life Cycle 3
FHSN 329 Communication in Nutrition 3
FHSN 332 Science of Food Systems 3
FHSN 344 Business Etiquette 3
FHSN 345 Hospitality Purchasing 3
FHSN 349 Food Service Sanitation 3
FHSN 398 Undergraduate Seminar 3
FHSN 414 Food Chemistry 3
FHSN 418 Food Analysis 3
FHSN 421 Pediatric Clinical Nutrition 3
FHSN 425 Food Marketing 3
FHSN 428 Community Nutrition 3
FHSN 429 Nutrition Assessment & Therapy 3
FHSN 440 Applied Statistical Methods I 3
FHSN 460 Food Processing Engineering 3
FHSN 461 Food Processing I 3
FHSN 465 Principles of Food Technology 3
FHSN 471 Food & Industrial Microbiology 3
FHSN 480 Basic Toxicology 3

Science electives: A minimum of two science courses, approved by the advisor. Courses cannot be used to fulfill other requirements.

Minor in Food Science

The minor in Food Science is designed to broaden the student’s knowledge of science and in particular food chemistry, food microbiology, and food engineering. The Food Science minor is also suitable for students who intend to pursue careers in engineering, microbiology, chemistry, scientific journalism, hospitality management, or science secondary education.

Courses required for minor in food science
FHSN 101 Intro Food Science & Nutrition 3
The Department of Human Development and Family Studies (HDFS) at the University of Illinois at Urbana-Champaign engages in teaching, research, and outreach to improve the lives of children, youth, and adults in the contexts of families, communities, and societies. The department creates an environment where these efforts are enriched by a multicultural perspective. HCD faculty recognize the diversity of cultures and classes in American society, and this perspective prepares students to address contemporary social issues.

**Teaching:** Our faculty regularly earn campus and national awards for outstanding teaching. Our teaching assistants who provide support to students outside of the classroom and in small discussion sections routinely are rated as among the best TAs on campus. In recent years, Drs. Jennifer Hardesty (http://hcd.illinois.edu/people/faculty/hardesty_jennifer/profile.html) and Ramona Oswald (http://hcd.illinois.edu/people/faculty/oswald_ramona_f/profile.html) have earned national awards for teaching excellence. Lyndal Khaw (http://hcd.illinois.edu/people/graduates/khaw_lyndal/profile.html), a graduate student, earned a campus award for teaching.

**Study Abroad:** There are many opportunities (http://hcd.illinois.edu/student_information/studyabroad.html) for our students to study abroad. We sponsor two short programs in South Africa and Brazil where our students get experience with learning the culture and understanding the needs of children and families in poverty. Currently, about 30% of our students have participated in study abroad sometime during their four years, and more are participating every year.

**Undergraduate Research Experience:** About 50% of our undergraduate students go on to graduate school. During their undergraduate program, they have many opportunities to work with graduate students and faculty on important scientific questions about children and families. Close to 50% of our undergraduate students participate in at least one research opportunity.

**Undergraduate Program:** Our program in Human Development and Family Studies prepares students for careers working with children, adolescents, and families. Students have the opportunity to work with children, families, and professionals in the Child Development Laboratory (http://cdl.illinois.edu), the Child Care Resource Service (http://ccrs.illinois.edu), the Family Resiliency Center (http://familyresiliency.illinois.edu), The Autism Program (http://go.illinois.edu/tap), and numerous social service, child assistance, and family social service agencies. This hands-on experience complements classroom instruction.

**Graduate Program:** This program (http://hcd.illinois.edu/student_information/current_programs.html) prepares students for careers in higher education, social service administration, and public policy settings. Our students are involved in significant research activities and have the opportunity to participate in outreach work that translates research to practice. We have advanced research facilities for studying children in our Child Development Laboratory. We have a unique family observation research facility at the Family Resiliency Center that allows for intricate study of family interactions in a home-like atmosphere. There is support for students in terms of teaching assistantships, research assistantships, and fellowships. Our students complete their programs with many awards, publications, and other important achievements.

**Research:** Our faculty are among the top scientists studying children and families in the world. They focus on significant societal issues. (http://...
Information listed in this catalog is current as of 04/2016

hcd.illinois.edu/research) Our work could be described as “science with a social conscience.” Faculty are interested in the most challenging basic scientific issues, but they are always asking how this information can be applied or how they can make a difference.

Preparation of Advanced Methods in Unique Laboratory Facilities: Faculty and students are engaged in developing and mastering the most sophisticated quantitative and qualitative methods available to social and behavioral scientists and to practicing these skills in state-of-the-art laboratories.

Collaborative and Collegial Interactions: Professor Isabel Bevier, a pioneering scientist in 1900, noted that the wide-open Illinois prairie provided “no boundaries,” and this characterized the faculty’s intellectual orientation as well. Our faculty work across disciplines, programs, and methodologies, and they work with colleagues across settings, departments, and institutions.

Faculty with Major Scientific Leadership Roles: Our faculty are not only excellent researchers and scholars, but they are also leaders in the scientific community. They are recognized by their peers for awards and hold elective office. They are invited to give lectures at major national meetings and at universities across the world. They serve as editors of the major journals in the field.

Outreach and Extension: Our faculty are not content just to find out more about children and families; they want to improve their lives. We have a long tradition of creating unique educational resources and programs for helping families. For the past fifteen years, our faculty have been especially interested in creating web-based educational resources. Dr. Aaron Ebata has been at the forefront of educating parents online with the latest version being Parenting 24/7 (http://parenting247.org). Parents who are interested in managing work and life issues more effectively can gain information from Intentional Harmony (http://worklife.illinois.edu).

In addition to these online educational programs, our Department was one of the pioneers in providing information and resources to parents about child care. From the humble beginnings of a telephone and desk in the hallway staffed by a part-time person, the Child Care Resource Service (http://ccrs.illinois.edu) today is one of the national leaders in innovative methods of providing resource and referral services to families.

Similarly, The Autism Program (http://go.illinois.edu/tap) provides information, consultation, and training for families who have children with autism, as well as for professionals who serve these families.

Another long-time feature of the department is working with Family Life Extension Educators (http://hcd.illinois.edu/outreach/family_life_extension.html) across Illinois who are adept at providing community-based educational programs to fit the specialized needs of family members. These educators have developed unique skills for reaching underserved rural and urban families who often would not have the opportunity to learn about children and families.

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as child care services, family life education, social work, counseling, human services, marriage and family therapy, medicine and allied health fields, pediatric services in hospitals, law, human resources, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students select one of two concentrations within this major: Child and Adolescent Development or Family Studies. Completion of the Family Studies option may qualify some graduates for provisional certification as a Family Life Educator by the National Council on Family Relations. Additional information is available at the NCFR website.

For the Degree of Bachelor of Science with a Major in Human Development and Family Studies

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
- RHET 105 Writing and Research
- & CMN 101 and Public Speaking (or equivalent) (see college Composition I requirement)

CMN 111 Oral & Written Comm I
& CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list. 3-4

Language Other Than English
Coursework at or above the third level is required for graduation.

Cultural Studies
Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list 6

Quantitative Reasoning I
Select one of the following: 3-5
- MATH 124 Finite Mathematics
- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

Quantitative Reasoning II
Select one of the following: 3-4
- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics
- SOC 280 Intro to Social Statistics
- STAT 100 Statistics

Natural Sciences and Technology
- ANTH 143 Biology of Human Behavior 3
- Life or Physical Science course. Select from campus approved list 3-5

Humanities and the Arts
Select from campus approved list. 6

Social and Behavioral Sciences
- PSYC 100 Intro Psych 4
- SOC 100 Introduction to Sociology 4

Select one of the following: 3-4
ACE 100  Agr Cons and Resource Econ
ECON 102  Microeconomic Principles
ECON 103  Macroeconomic Principles

ACES Required

ACES 101  Contemporary Issues in ACES  2

Human Development and Family Studies Required

HDFS 101  Issues & Careers in HDFS  1
HDFS 105  Intro to Human Development  3
HDFS 120  Intro to Family Studies  3
HDFS 220  Families in Global Perspective  3
HDFS 290  Intro to Research Methods  4
ACE 161  Microcomputer Applications  3
ACE 240  Personal Financial Planning  3
CHLH 100  Contemporary Health  3
FSHN 120  Contemporary Nutrition  3

Select one of the following:  3

HDFS 208  Child Fam with Special Needs
HDFS 221  Asian Families in America
HDFS 340  Gender, Relationships & Society
HDFS 341  Asian American Youth
HDFS 379  HDFS Study Abroad Experience
HDFS 322  US Latina and Latino Families
HDFS 444  LGBT Indiv, Fam & Community

Select one of the following:  3-6

HDFS 206  Early Childhood Curriculum Dev
HDFS 261  Self-Help Group Dev & Process
HDFS 294  Research Internship
HDFS 450  Practicum in HDFS
HDFS 494  Applied Research Methods

Required Concentration  16-18

Concentration prescribed courses. See specific requirements for each concentration listed below.

Additional courses must be completed to yield a total of 126 hours for graduation.

Total Hours  126

Approved Concentrations:

- Child and Adolescent Development Concentration (p. 45)
- Family Studies Concentration (p. 46)

Minor in Adult Development

The Adult Development minor combines theoretical and practical approaches to understanding issues faced by adults as individuals, partners, family members, learners, caregivers, and clients of social agencies. Course work examines adults from age 25 to 90+ in the context of evolving family roles, health issues, and social service needs. Students anticipating careers in social or health-related services will find an understanding of adult development and its attendant issues a valuable compliment to other professional skills.

The minor requires a minimum of 18 hours. At least six hours of advanced course work must be distinct from credit earned for the student’s major or another minor. Courses in the minor cannot be taken Credit/No Credit. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Foundation courses  9

HDFS 105  Intro to Human Development
HDFS 310  Adult Development  

One course selected from:

HDFS/  Gerontology
CHLH 404
EPSY 407  Adult Learning and Development
PSYC 361  The Psychology of Aging

Adult roles in the family context  3-4

HDFS 225  Close Relationships
HDFS 425  Critical Family Transitions
HDFS 426  Family Conflict Management

Adult choices/challenges  6

HDFS 294  Research Internship
HDFS 450  Practicum in HDFS
HDFS 494  Applied Research Methods
KIN 459  Physical Activity & Aging
RST 316  Leisure and Human Development
SOCW 240  Death & Dying
SOCW 415  Social Services for the Aged

Total Hours  18-19

1  HDFS majors pursuing the minor may not use this course to meet a major requirement.
2  No more than three combined hours of HDFS 294, 450, 494 or equivalent field/research experience may be counted toward minor requirements. Field/research experience must focus on adults.

Child and Adolescent Development Concentration

The Child and Adolescent Development concentration emphasizes the influence of families, peer groups, schools and communities on the well-being of children and adolescents. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include early childhood education, parent education, developmental therapy, Child Life specialty, adoption case work and day-care administration. Graduates also may choose to pursue graduate education in a variety of fields, including human development research, education, psychology, social work, law, medicine, and business.

Child and Adolescent Development Concentration Required

HDFS 401  Socialization and Development  4

Three courses selected from:  9-10

HDFS 301  Infancy & Early Childhood
HDFS 305  Middle Childhood
HDFS 310  Adult Development
HDFS 405  Adolescent Development

One course selected from:  3-4

HDFS 420  Family Diversity in the U.S.
HDFS 425  Critical Family Transitions
HDFS 426  Family Conflict Management

Information listed in this catalog is current as of 04/2016
Family Studies Concentration

Students in the Family Studies concentration focus on how families operate, develop and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage conflict. Graduates with this concentration are qualified to provide many services to couples and families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including family studies, marriage and family therapy, social work, education, sociology, psychology, law, medicine, or business.

The Family Studies concentration is approved by the National Council of Family Relations (NCFR) for the provisional Certified Family Life Educator credential. Family life education focuses on healthy family functioning within a family systems perspective and provides a primarily preventive approach. The goal of family life education is to teach and foster skills and knowledge to enable individuals and families to function optimally. Within two years after receiving their degree, graduates who have completed the Family Studies curriculum and four elective courses (HDFS 427: Family Adaptation and Resilience, CHLH 206: Human Sexuality, HDFS 401: Socialization and Development, and HDFS 461: Family Life Education) can apply for the Provisional level of the CFLE credential through an abbreviated application process (details available on the NCFR website).

Natural Resources and Environmental Sciences

Jeff Brawn
Student Services Address: N-509 Turner Hall, 1102 South Goodwin Avenue, Urbana
PH: (217) 333-5824
http://nres.illinois.edu
nres-ssc@illinois.edu

NRES provides outstanding undergraduate and graduate educational opportunities. Many alumni of our B.S. program have gone on to complete graduate and professional degrees. Our graduates work in environmental science and natural resource management positions in government, corporations, consulting firms, and non-governmental organizations. NRES also offers traditional Master of Science, online Master of Science, and Doctor of Philosophy degrees. Our graduate students gain employment with research universities, government agencies, national and international non-governmental organizations, and business enterprises.

All NRES educational and research programs center on science, applied ecology, and conservation in a variety of aquatic, terrestrial and human dominated ecosystems. Within that framework, our faculty, staff, and students study a wide variety of ecological systems with emphases on soil, water, people and social systems, forests, plants, animals, and microbes. Much of our research focuses on natural and social processes, such as habitat fragmentation, regulation, dispersal, disturbance, invasion, bioactivity, and decision-making. We research and work in locations locally, across the United States, and around the world.

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world's most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource
planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

Specialization course

Information listed in this catalog is current as of 04/2016
Global Change & Landscape Dynamics

The Global Change and Landscape Dynamics Concentration explores the patterns and processes interlinking biological species with landscape components in order to promote the sustainability and ecological integrity of terrestrial ecosystems at local, regional, and sub-continental geographic scales. This concentration is especially relevant for students interested in invasion biology; biological rarity; wildlife disease epidemiology; energy, nutrient, and organism exchanges; the distribution of land cover and land use; and other elements affecting the earth’s ecology.

Global Change & Landscape Dynamics Concentration Requirements

Required
- NRES 419 Env and Plant Ecosystems 3
- NRES 465 Landscape Ecology 3
- NRES 421 Quantitative Methods in NRES or NRES 440 Applied Statistical Methods I 3-4

Ecology
- Select one of the following: 3-4
  - NRES 420 Restoration Ecology
  - NRES 431 Plants and Global Change
  - NRES 462 Ecosystem Ecology
  - IB 361 Ecology and Human Health
  - UP 405 Watershed Ecology and Planning
  - UP 406 Urban Ecology

Geospatial Techniques
- Select one of the following: 2-4
  - NRES 455 Adv GIS for Nat Res Planning
  - NRES 460 Aerial Photo Analysis
  - NRES 477 Introduction to Remote Sensing
  - GEOG 412 Geospatial Tech & Society
  - UP 316 Urban Informatics II

Planning & Policy
- Select one of the following: 3-4
  - NRES 325 Natural Resource Policy Mgmt
  - NRES 310 Natural Resource Economics
  - NRES 424 US Environ, Justic & Policy
  - NRES 425 Natural Resources Law & Policy
  - NRES 426 Renewable Energy Policy
  - NRES 439 Env and Sustainable Dev

Environmental Quality

Select one of the following: 3-4
- NRES 351 Introduction to Environmental Chemistry
- NRES 403 Watersheds and Water Quality
- NRES 438 Soil Nutrient Cycling
- NRES 474 Soil and Water Conservation
- NRES 475 Environmental Microbiology
- ATMS 449 Biogeochemical Cycles
- ESE 320 Water Planet, Water Crisis
- GEOL 380 Environmental Geology

Human Dimensions of the Environment Concentration

The Human Dimensions of the Environment Concentration emphasizes the social scientific interpretations of human-environment interactions at multiple levels as well as on applied policy and management implications. It is intended for students interested in the study of environmental sociology and psychology, land use planning, environmental management and policy, natural resource allocation, social impacts, resource economics, and environmental law. The Human Dimensions of the Environment Concentration requires advanced coursework in natural resource economics, environmental psychology, communications, social impact assessment, environmental policy, and environmental law.

Human Dimension Concentration Requirements

Required
- NRES 310 Natural Resource Economics 3
  or ACE 210 Environmental Economics
- NRES 325 Natural Resource Policy Mgmt 3
  or NRES 425 Natural Resources Law & Policy
- NRES 340 Environ Social Sci Res Meth 3

Analytical Methods

Select one of the following: 3-4
- NRES 421 Quantitative Methods in NRES
- NRES 440 Applied Statistical Methods I
- SOC 485 Intermediate Social Statistics

Social Science Planning and Policy

Select two of the following: 6-8
- NRES 310 Natural Resource Economics (if not taken as one of the HDC required classes)
- NRES 325 Natural Resource Policy Mgmt (if not taken as one of the HDC required classes)
- NRES 424 US Environ, Justic & Policy
- NRES 425 Natural Resources Law & Policy (if not taken as one of the HDC required classes)
- NRES 426 Renewable Energy Policy
- NRES 430 Comm in Env Social Movements
- NRES 472 Environmental Psychology
- ACE 210 Environmental Economics (if not taken as one of the HDC required classes)
- ACE 406 Environmental Law
- SOC 447 Environmental Sociology
Conservation/Environmental Science/Ecology
Select one of the following:  
NRES 401 Watershed Hydrology  
NRES 407 Wildlife Population Ecology  
NRES 409 Fishery Ecol and Conservation  
NRES 415 Native Plant ID and Floristics  
NRES 420 Restoration Ecology  
NRES 429 Aquatic Ecosystem Conservation  
NRES 439 Env and Sustainable Dev  
NRES 474 Soil and Water Conservation

Minor in Natural Resource Conservation

The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources.

A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills.

In order to be eligible to declare this minor, a student must have successfully completed the Quantitative Reasoning I and Quantitative Reasoning II requirements. The minor requires the completion of an additional 18 hours of coursework selected from the following list. Students must earn credit for at least three hours in each of the three categories. Courses taken to fulfill the minor may not be counted towards the NRES major, but may count towards majors in other fields.

Required Courses for a Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

Statistics & Research Design

Select one of the following:  
NRES 340 Environ Social Sci Res Meth  
NRES 421 Quantitative Methods in NRES  
CPSC 440 Applied Statistical Methods I  
NRES 445 Statistical Methods  
SOC 485 Intermediate Social Statistics  
STAT 200 Statistical Analysis

Mathematical Modeling

Select one of the following:  
NRES 422 Earth Systems Modeling  
NRES 427 Modeling Natural Resources  
ANSC 448 Math Modeling in Life Sciences  
GEOG 468 Biological Modeling

Spatial Analysis

Select one of the following:  
NRES 454 GIS in Natural Resource Mgmt
Resource Conservation and Restoration Ecology

The Resource Conservation and Restoration Ecology Concentration emphasizes the ecology, biology, and management of aquatic, soil, forest, and wildlife resources. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. Through lectures, labs and field exercise, students study biosphere relationships in natural resource systems. The Resource Conservation and Restoration Ecology concentration includes coursework in the areas of restoration ecology, soil science, environmental biology, aquatic ecosystem management, tree and plant physiology, and advanced ecology.

Resource Conservation & Restoration Ecology Concentration Required

- NRES 419 Env and Plant Ecosystems 3
- NRES 420 Restoration Ecology 4
- NRES 421 Quantitative Methods in NRES or NRES 440 Applied Statistical Methods I 3-4

Watershed Science
Select one of the following: 3-4
- NRES 401 Watershed Hydrology
- NRES 403 Watersheds and Water Quality
- NRES 406 Fluvial Geomorphology
- NRES 429 Aquatic Ecosystem Conservation
- NRES 490 Surface Water System Chemistry

Plant Classification/Identification

- NRES 415 Native Plant ID and Floristics 4
  or IB 335 Systematics of Plants

Soil and Environmental Science
Select one of the following: 3
- NRES 351 Introduction to Environmental Chemistry
- NRES 471 Pedology
- NRES 474 Soil and Water Conservation
- NRES 475 Environmental Microbiology
- NRES 487 Soil Chemistry
- NRES 488 Soil Fertility and Fertilizers
- NRES 489 Physics of Plant Environments

Ecology
Select one of the following: 3-4
- NRES 438 Soil Nutrient Cycling
- NRES 452 Community Ecology
- NRES 462 Ecosystem Ecology
- NRES 465 Landscape Ecology
- CPSC 437 Principles of Agroecology

Information listed in this catalog is current as of 04/2016

Agricultural Education

Major in Agricultural Leadership and Science Education

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu)).

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

• Agricultural Leadership Education Concentration (p. 51)
• Agricultural Science Education Concentration (p. 51)

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
- RHET 105 Writing and Research & CMN 101 and Public Speaking (or equivalent (see college Composition I requirement))
- CMN 111 Oral & Written Comm I & CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list. AGED 230 is recommended. 3-4

Cultural Studies
Select one Western cultures course and one non-Western/ U.S. minority cultures course from campus approved lists. 6

Quantitative Reasoning I
Select one of the following: 3-5
- MATH 124 Finite Mathematics
- MATH 220 Calculus
MATH 221  Calculus I  
MATH 234  Calculus for Business I  

**Quantitative Reasoning II**  
Select one of the following: 3-4

**Agricultural Science Education Concentration**  
The Agricultural Science Education concentration prepares students to teach agricultural science, agribusiness, agricultural mechanics and horticulture in Illinois high schools. State of Illinois certification requirements include a minimum of 2,000 hours of employment experience in agriculture. Teacher certification students must maintain a 2.5 GPA or above to remain in good standing. Review procedures are provided by the Council on Teacher Education.

**Agricultural Leadership Education Concentration**  
The Agricultural Leadership Education concentration prepares students for educational leadership, training and outreach positions in agricultural, extension, community and governmental agencies. Coursework focuses on designing educational/training programs, leadership development, teaching/training methods and interpersonal communications. A 4 to 12-week business/agency summer internship is required. The curriculum provides the flexibility for students to specialize in a chosen area of agriculture.

1 Via enrollment in AGED 250, students are concurrently enrolled in EDPR 203.  

Information listed in this catalog is current as of 04/2016.
**Food and Environmental Systems Minor**

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student’s major and interests.

Enrollment in ACES 102, FSHN 101, and NRES 100, four hours from selected 100- and 200-level courses, and six hours of 300- and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

1   Theses courses may only be used to satisfy the requirements of the major in Ag Communications or the Food and Environmental Systems minor, but not both.

International Minor in ACES

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours ACES or non-ACES must come from 400-level courses. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Required Courses for the ACES International Minor

Global Study in the Social Science Disciplines
Minimum of 3 hours, maximum of 9 hours selected from: 3-9

ACE 251   The World Food Economy
ACE 411   Environment and Development
ACE 435   Global Agribusiness Management
ACE 451   Agriculture in Intl Dev
ACE 455   Intl Trade in Food and Agr
AGCM 320   Public Information Campaigns
ANTH 260   World Ethnography
ANTH 262   Women's Lives
BADM 380   International Business
BADM 381   Multinational Management
BADM 382   International Marketing
ECON 420   International Economics
ECON 450   Development Economics
EPS 426   Comparative Education
FIN 451   Intl Financial Markets
GEOG 110
GEOG 204   Cities of the World
GEOG 210   Social & Environmental Issues
GEOG 410   Geography of Dev and Underdev
HDFS 220   Families in Global Perspective
HIST 258   20thC World to Midcentury
HIST 259   20thC World from Midcentury

Global Study in the Natural Science Disciplines
Minimum of 3 hours, maximum of 9 hours, selected from: 3-9

ANSC 205   World Animal Resources
ATMS 140   Climate and Global Change
CPSC 116   The Global Food Production Web
CPSC 431   Plants and Global Change
HORT 464   International Hort Products
NRES 109   Global Environmental Issues
PLPA 200   Plants, Pathogens, and People
TSM 311   Humanity in the Food Web

Regional Specialization
The following four approaches/options can be used (separately or in combinations) to complete this portion of the minor.

Academic credit earned through study or supervised activities outside the U.S. through:

ACES 293   International Internship
ACES 298   International Experience
ACES 299   ACES Study Abroad

Completion of one or more of the following courses offered by the Department of Agricultural and Consumer Economics

ACE 254   Economic Systems in Africa
ACE 452   The Latin American Economies
ACE 454   Econ Dev of Tropical Africa

Completion of courses that are approved by Area Studies Programs (see minor advisor)

Center for African Studies
Center for East Asian and Pacific Studies
Center for Latin American and Caribbean Studies
Program in South Asian and Middle Eastern Studies
European Union Center

Foreign language courses that exceed College of ACES graduation requirements.

Total Hours   21

Leadership Studies Minor

http://leadership.illinois.edu/minor-leadership-studies/overview

The Minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundational courses, five to six hours of elective context courses, and three hours in a capstone course.

Requirements

AGED 260   Intro to Leadership Studies

The programs in the College of Applied Health Sciences provide students with a holistic understanding of health and human behavior. Drawing on the expertise of our faculty and industry partners, we equip students to design, develop and implement initiatives that enhance health and well-being. Students with an interest in health professions, administration, education and advocacy or public policy can find a program of study that will match their interest in the College of Applied Health Sciences.

As America’s approach to health and wellness changes, health care is no longer limited to the traditional practice of doctors and nurses. As a result, the growth market lies in areas related to prevention, quality of life, health planning, and therapeutic intervention. As society struggles with these issues, the College and its graduates will continue to play an important role in shaping the future. A degree from the College of Applied Health Studies allows graduates to pursue a wide array of scientific and professional careers.

Students in the College of Applied Health Sciences enjoy many advantages: high quality degree programs, small classes, an emphasis on student-faculty interaction, active research programs, the opportunity to participate in professional student organizations, the availability of internships, and the largest separate college library in our field.

Along with the relationships they establish with faculty, students work closely with an academic adviser. The College of Applied Health Sciences requires students to meet with advisers to develop a relationship that will guide their studies and experiences while on campus. A solid network of student services available at the University of Illinois enhances the advising experience.

Programs of Study

The bachelor of science degree is offered in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

- Advising services are available to assist with career information and the development of appropriate courses of study.
- Honors programs are available for outstanding students at the college and campus level.
- Internship experiences are required with most departmental curricula. Quality placements are available throughout the United States and around the world in specific degree programs.
- Study abroad programs are available around the world.
- Students have access to the nation’s third largest academic library, including an excellent college library, reference service, inter library loan system, and term-paper counseling system.

Community Health Program

Health care is among the most rapidly evolving industries in the United States today. People in all settings are concerned about maintaining access to effective health care and the costs of securing it. An aging population places greater demand upon health care providers. To address these issues, hospitals and clinics have reorganized, consolidated, and introduced educational components designed to teach patients how to manage their personal health concerns. At the same time, business and industry leaders have invested millions of dollars in new health programs for their employees. Federal and state governments are evaluating ways to make health care more effective and less costly.

Recognized as one of the leaders in the United States with its strong emphasis on research and excellence in scholarship, the Community Health Program prepares students for careers in the rapidly changing world of health and rehabilitative services. It is an exciting time in health care with emerging behavioral and environmental health concerns that challenge the field for new theories, policies, and technological innovations. The department’s programs place special emphasis on the community context in which health care is delivered. Students can become involved in a variety of research projects related to issues such as bioethics, cancer epidemiology, disability studies, cultural aspects of health and disability, information technologies in health education, and health policy.

The Community Health Program offers students the opportunity to focus their studies in Health Planning and Administration, Health Education or Rehabilitation Studies. In addition to the core of community health courses, course work is completed in areas related to business, health behavior, marketing, and promotion. The degree is culminated with a fieldwork experience in setting appropriate to the area of concentration. Graduates are equally prepared for jobs in progressive careers such as health education, policy, planning, and administration or for graduate study in areas such as medicine, nursing, and physical therapy.

Interdisciplinary Health Sciences Program

Based on the premise that human health is too complex to be addressed within a single discipline, the Interdisciplinary Health Sciences (i-Health) degree program integrates knowledge from a variety of social and behavioral fields, such as psychology and sociology, as well as the applied health sciences. While the core curriculum provides students with a solid understanding of human health, students may build a customized program addressing their specific interests within three concentration areas: Health and Aging, Health Behavior Change, and Health Diversity.

Students in this program are equipped to assume leadership roles in a variety of health-related careers, as well as professional and graduate degree programs. Graduates have pursued careers in pharmaceutical sales, health education, corporate wellness and patient/client relations.
Graduates are also fully prepared to pursue graduate school in a variety of professional or biomedical programs such as law, medicine, physical and occupational therapy, nursing, or public health.

Kinesiology Program
The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill of physical activity; physical growth, development, and body form throughout the life span; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

Recreation, Sport and Tourism
The Department of Recreation, Sport and Tourism is internationally renowned for its excellence, low student-faculty ratio, ethnic and cultural diversity, and an extensive alumni network. In short, studying recreation, sport and tourism at the University of Illinois is an ideal way to prepare for a future of leadership in the world’s most vigorous and exhilarating industry.

The curriculum in Recreation, Sport and Tourism prepares students to design, manage, and deliver services to a variety of populations and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses which touch topics such as leadership, marketing, administration and human resource management. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus their studies in Recreation Management, Sport Management or Tourism Management.

Recreation, sport and tourism offer outstanding career prospects because they are each facets of one of the world’s fastest growing industries. Graduates have enjoyed successful careers in amateur and professional sport organizations, public and commercial recreation organizations, resorts, and conference and convention centers.

Speech and Hearing Science
Research has shown that communication is a key element in resolving the major problems of our society; improving communication for all people is an overall goal of study in speech and hearing science. In the Department of Speech and Hearing Science, students learn about human interpersonal communication. Through studies in speech-language pathology and audiology, they focus on the prevention, diagnosis, and treatment of hearing, speech, and language disorders in people of all ages.

This major also equips students with strong oral and written communication skills and necessary tools to enter today’s job market.

Graduates hold positions in school systems, hospitals, medical practices, and clinics. They also work in government agencies, research laboratories, and various businesses. A baccalaureate degree in speech and hearing science also prepares students to enter a graduate program in speech-language pathology or audiology or other areas including psychology, special education, business, medicine, and dentistry.

Special Programs

Honors at Graduation
Graduation from the College of Applied Health Sciences with any honors designation requires that a student must have attained at the University of Illinois at Urbana-Champaign a specific minimum cumulative grade point average based on a minimum of 55 semester hours in residence.

- Bronze Tablet (see Graduation with Honors section)
- Dean’s List (see Graduation with Honors section)
- Highest Honors: 3.75 to 4.0
- High Honors: 3.5 to 3.74
- Honors: 3.25 to 3.49

Edmund James Scholars
The James Scholar Program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. For further information see the Edmund J. James Undergraduate Honors Programs.

Kinesiology and Community Health

Amy Woods, Interm Department Head
117 Huff Hall
1206 South Fourth Street
PH: (217) 244-0823

The Kinesiology (p. 57) curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

The Community Health (p. 56) Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education and Promotion, Health Planning and Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 374). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

For the Degree of Bachelor of Science in Community Health

Requirements Including General Education

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

**Communication Arts**

- Composition I and an approved speech performance course; or CMN 111 and CMN 112
  - 6-7

- Advanced Composition (CHLH 304 fulfills requirement)
  - 3-4

**Quantitative Reasoning I & II**

- From approved campus list (must include a course in statistics from approved campus list) (CHLH 244 and CHLH 421 fulfills requirement)
  - 6

**Humanities and the Arts**

- From approved campus list (CHLH 260 fulfills 3 hours of requirement)
  - 9

**Social and Behavioral Sciences**

- From approved campus list
  - 9

**Natural Sciences and Technology**

- From approved campus list
  - 9

**Cultural Studies**

- From Western cultures approved campus list
  - 3

- From U.S. minority cultures or non-Western cultures approved campus list
  - 3

Foreign Language: Completion through the third level of the same language in high school or college

Kinesiology

Amy Woods, Interim Department Head
117 Freer Hall, 906 South Goodwin, Urbana
PH: (217) 244-0823
http://www.kch.illinois.edu

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

Students who desire certification as a physical education teacher can satisfy the necessary subject matter requirements by appropriate selection of courses within the several categories of the curriculum. Students seeking such certification should ask the undergraduate academic adviser about admission criteria for the teacher certification program in physical education. For teacher certification requirements applicable to all curricula, see the Council on Teacher Education section. Further information on careers in Kinesiology is available from the Academic Advising Office, Department of Kinesiology and Community Health, University of Illinois at Urbana-Champaign, 155 Freer Hall, 906 South Goodwin Avenue, Urbana, IL, 61801, (217) 333-1083 (217) 333-2461.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

For the Degree of Bachelor of Science in Kinesiology

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

Communication Arts
Kinesiology Program Guided Electives

Elective Kinesiology Courses

All courses must be at the 200, 300, or 400 level. One course must be completed in each of the three areas (exercise physiology and athletic training; cultural, pedagogical and interpretive studies; and biobehavioral kinesiology). At least six or more hours must be at the 400 level (at least 12 hours).

Information listed in this catalog is current as of 04/2016

Correlate Area Studies

Students select a standardized correlate that will prepare them for further education toward their career goals (at least 18 hours).

Summary of Degree Requirements

General Education and supporting coursework  49
Kinesiology and Community Health Department Core  6
Kinesiology Core  24
Elective Kinesiology courses  12
Correlate Area  18
Free electives  19
Total Hours  128

Requirements for Teacher Certification

Application to the Teacher Certification curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of Specialization Committee. In addition, students must complete all degree required courses with a grade of C or higher.

In addition to the General Education requirements for all Kinesiology undergraduates, the teacher certification requirements for students in all curricula, and the Kinesiology core requirements, students pursuing certification to teach physical education (K-12) must include the following courses in the elective kinesiology, correlate area studies, and free electives areas:

Required Electives and Correlate Area Studies

KIN 360  Adapted Physical Education  3
KIN 361  Curriculum in Grades K-6  3
KIN 362  Curriculum in Grades 7-12  3
KIN 363  Instructional Strategies in PE  3
KIN 364  Exper in the Common School  3
KIN 401  Measure & Eval in Kinesiology  3
KIN 460  Technology & Pedagogical KINES  3
KIN 260  Teaching Activities I  3
KIN 261  Teaching Activities II  2
CI 473  Disciplinary Literacy  1
EPS 201  Foundations of Education  3
EPSY 201  Educational Psychology  3
EDPR 438  Educational Practice in Special Fields  8
EDPR 442  Educational Practice in Secondary Education  8

Students may not enroll for professional education courses from the Elective Kinesiology area until they have passed the Illinois Certification
Thus, new students should confirm their General Education requirements. Some changes in requirements are expected. Colleges and departments are working to implement enhanced General Education requirements. Including General Education.

Recreation, Sport and Tourism

Laurence Chalip, Department Head
104 Huff Hall, 1206 South Fourth Street, Champaign
PH: (217) 333-4410
http://rst.illinois.edu

The Department of Recreation, Sport and Tourism originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals in the field. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver leisure services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus on a major market segment within the leisure and recreation field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 104 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses and a pre-internship field experience. The pre-internship program requires students to accumulate a minimum of 300 Hours of practical work experience in leisure service settings. It is strongly recommended that students begin acquiring field experiences as early in their academic career as possible. Students register for RST 480 in the first semester of their senior year. During this semester, students make final arrangements for completing RST 484, the Recreation, Sport and Tourism Practicum the following semester.

The practicum is taken after the student satisfactorily completes all course work including RST 480, and fulfills the pre-internship field experience. RST 484 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

For the Degree of Bachelor of Science in Recreation, Sport and Tourism

Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by consulting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

For an overview of the program and career opportunities, see this site (http://shs.illinois.edu/Undergraduates/Careers.aspx). For further information, contact the Department of Speech and Hearing Science (http://www.shs.uiuc.edu), 220 Speech and Hearing Building, 901 S. Sixth Street, Champaign, IL 61820, (217) 333-2230.
(the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women’s Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University’s requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

**Speech and Hearing Science Minor**

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student’s individual needs, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. For more information contact Kathi Ritten, Academic Advisor, at ritten@illinois.edu.

**Concentration in Cultural-Linguistic Diversity**

The **Cultural-Linguistic Diversity** concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socioeconomic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

| SHS 222 | Lang & Culture Deaf Communities | 3 |
| SHS 270 | Comm Disability in the Media | 4 |

| LING 210 | Language History | |
| LING 450 | Sociolinguistics I | |
| SPED 117 | The Culture of Disability | |
| SOC 225 | Race and Ethnicity | |
| SOC 227 | Latina/Latinos in Contemp US | |
| SHS 291 | Research Lab Experience in SHS (Approved for S/U grading only. Must be arranged with individual faculty member.) | |

Total Hours 22

Note: Students must take at least six credits hours of speech and hearing science courses at the 300 or 400 levels from this approved list.
Concentration in Neuroscience of Communication

The Neuroscience of Communication concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

1 Or an approved substitution.
2 Provided courses are not used to satisfy a Gen. Ed. requirement
3 Approved for S/U grading only. Must be arranged with individual faculty member.
4 Prerequisite: Senior level in the SHS program or consent of instructor.

Concentrations in Audiology and Speech Language Pathology

The concentrations in either Speech-Language Pathology or Audiology provide explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association’s web site: http://www.asha.org.

Interdisciplinary Minor in Aging

The Interdisciplinary Minor in Aging provides students with the opportunity to study aging as it relates to health, communication, development and activity. The minor is offered through the Departments of Kinesiology and Community Health, Recreation, Sport and Tourism, Psychology and Sociology; the Department of Human and Community Development; and the School of Social Work. LAS psychology and sociology students interested in the minor should consult with their major department's undergraduate studies director. All other interested students should consult their departmental academic advisor. Minors should be declared by filling out the intent to pursue a minor form which can be found at [http://provost.illinois.edu/programs/advising/intent.pdf](http://provost.illinois.edu/programs/advising/intent.pdf) and turning the form into Julie Bobitt, Interdisciplinary Health Advisor, in 226 Huff Hall or contact Julie via email at jbobitt@illinois.edu.

### Interdisciplinary Health Sciences

**William Stewart**

110 Huff Hall, 1206 South Fourth Street, Champaign

PH: (217) 333-2131

http://ahs.illinois.edu

For the Degree of Bachelor of Science in Interdisciplinary Health Sciences

The undergraduate degree program in Health is interdisciplinary in nature, and focused on applied health and societal issues that cut across a range of traditional fields. The program of study includes a set of core courses that builds an interdisciplinary foundation in the study of health, and provides a basic knowledge of health-related issues. The degree program also includes a set of three concentrations, of which a student must complete at least one, that emphasize some of the foremost issues facing society: health and aging; health behavior change; and health diversity. Finally, the degree program includes a capstone experience with several options for completion, e.g., an internship, faculty-guided research experience. The program of study addresses a major need across the nation and world for graduates prepared to enter a range of biomedical and health-related careers and/or to pursue graduate study in fields relevant to health, wellness, and the biomedical sciences. For questions regarding iHealth contact Julie Bobitt, Interdisciplinary Health Advisor, in 226 Huff Hall or contact Julie via email at jbobitt@illinois.edu.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 374). The requirements are explained in more detail on the MPH program website: [http://www.mph.illinois.edu/Program/](http://www.mph.illinois.edu/Program/).

**Requirements Including General Education**

The curriculum requires certain existing courses from the approved lists to be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

them to enroll in the first course of one of the mathematics sequences
required for graduation (see below).

Graduation

Students in the College of Business who meet the University’s
requirements with reference to registration, residence, and fees and
who maintain satisfactory scholastic records in the college are awarded
degrees appropriate to their curricula.

Each candidate for a degree must have a 2.0 (A = 4.0) grade point
average or above for all courses counted toward graduation, a 2.0 grade
point average or above for all courses taken at this University, a 2.0
grade point average or above for all courses taken in the major or field
of concentration, and a 2.0 grade point average or above for courses taken
in the major or field of concentration at this University.

Students are responsible for meeting the requirements for graduation.
Therefore, students should familiarize themselves with the requirements
listed in this catalog and other information in the Office of Undergraduate
Affairs, 1055 Business Instructional Facility, and should refer to them
each time they plan their programs. The College of Business requires
that undergraduate degrees be completed in nine semesters or less.

If you need assistance with course planning, consult the Office of
Undergraduate Affairs.

Mathematics Requirement

Any one of the sequences described below meets the College of Business
requirement. The most appropriate mathematics sequence depends
on the student’s background, interest, motivation, and objectives.
Background can be evaluated in terms of mathematics courses already
completed and the student’s score on the ALEKS Math Placement Exam.
Interest, motivation, and objectives must be determined by the student.
The three sequences open to the student are:

- MATH 220/MATH 221 Calculus I and MATH 231 Calculus II.
  This sequence is appropriate for those students with a good
  background in mathematics but who have not had analytic geometry.
  Students who believe they may want to take upper-level courses in
  mathematics should take this sequence.

- MATH 125 Elementary Linear Algebra and MATH 234 Calculus for
  Business I. This sequence provides a good background in linear
  algebra and calculus. It is difficult to take upper-level courses in
  mathematics after this sequence.

- MATH 220/MATH 221 Calculus I and MATH 125 Elementary Linear
  Algebra. This is an alternative to the previous sequence. It is
  particularly suitable for those with AP credit in calculus who do not
  plan to take upper-level mathematics courses.
toward the degree. To qualify for graduation honors, transfer students’ University of Illinois at Urbana-Champaign and total cumulative grade point averages both must qualify.

**Curricula**

**Core Curriculum**

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. A required course that is failed must be repeated the next semester.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 002 or MATH 112. Once the math requirement is completed, lower level math courses cannot be taken for credit. For military and naval science courses, only credit at the 300 level and above may be counted toward the degree.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

**University Composition Requirements**

Composition I: Principles of Composition 1 4-7

Advanced Composition 3

**General Education Requirements**

A minimum of six courses is required, as follows: 24

- Humanities & the Arts: Literature & the Arts (1-2 courses) 4
- Humanities & the Arts: Historical & Philosophical Perspectives (1-2 courses) 4
- Natural Sciences & Technology: Physical Sciences (0-2 courses) 5
- Natural Sciences & Technology: Life Sciences (0-2 courses) 5
- Behavioral Sciences (1 course)
- Cultural Studies: Non-Western/U.S. Minorities Cultures (1 course)
- Cultural Studies: Western/Comparative Cultures (1 course)

**Non-Primary Language Requirement**

Completion of the fourth semester or equivalent of a non-primary language is required. Completion of four years of a single language in high school satisfies this requirement. A student may also meet this requirement by completing two non-primary languages to the third level.

**Business Core Requirements**

Accountancy
Jon Davis
360 Wohlers Hall, 1206 South Sixth, Champaign
PH: (217) 333-0857
http://business.illinois.edu/accountancy

For the Degree of Bachelor of Science in Accountancy
Organizations are a nexus of contracts, implicit and explicit, among resource owners who contract with each other to the benefit of all. In most complex organizations, these contracts specify who has the knowledge, and thus the rights, to make decisions about the use and control of the contracted resources. The effectiveness and efficiency of decisions regarding initiation, execution, and monitoring of organizations’ contracts depend on the quantity and quality of information available. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for contracting parties to make effective and efficient contracting decisions. Organizations, in turn, contract with various segments of society such as labor unions, capital markets, regulatory agencies, and governments. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for ensuring that organizations comply with the terms of their social contracts.

Study in accountancy is designed to prepare individuals for entry into the accountancy professions independent of subsequent specialization. This preparation includes knowledge of the activities of organizations, businesses, and accounting practices; intellectual, interpersonal, and communication skills; and personal capabilities and professional attitudes. Specializations in accountancy include such fields as financial accounting, management accounting, accounting information systems, taxation, and auditing. Specialization in an accounting field requires additional graduate education and practical experience.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 65)).

Minimum requirements in the major for the Bachelor of Science Degree in Accountancy are:

Total Hours 21

Information listed in this catalog is current as of 04/2016
Accountancy courses (both required and elective) to be applied toward the 124-hour requirement for the Bachelor of Science Degree in Accountancy may not be taken on a credit/no-credit basis. In addition, a limit of 33 hours of accountancy courses (including ACCY 201 and ACCY 202) may be counted toward the 124 total hour requirement. Finally, students must select from either ACCY 405 or ACCY 415. Both courses cannot count toward the Bachelor of Science degree.

### Business Administration

Aric Rindfleisch  
350 Wohlers Hall, 1206 South Sixth Street, Champaign  
PH: (217) 333-4240  
http://business.illinois.edu/ba

The Department of Business Administration offers five Undergraduate majors: Business Process Management, Information Systems and Information Technology, Management, Marketing and Supply Chain Management. All majors require completion of 27 credit hours within each major’s content area.

In addition to the Business Administration Major requirements, Business Administration students must also fulfill the University’s General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 65)).

### Double Majors Within the Department of Business Administration

Only College of Business students with a declared Business Administration major may earn a second Business Administration major.

Business Students may earn only two Business Administration majors.

The Business Administration Majors:

- Business Process Management
- Information Systems and Information Technology
- Management: only one concentration can be selected: Entrepreneurship or General Management or International Business
- Marketing
- Supply Chain Management

Each Business Administration major requires 9 courses. Students desiring to earn a second Business Administration major must fulfill the course requirements for both majors.

Some Business Administration (BADM) courses will fulfill requirements of both majors, but a second Business Administration major will add 2 to 5 additional BADM courses during a student’s junior and senior years since each Business Administration major requires unique advanced coursework.

Students may earn only one Management Major Concentration.

- Business Process Management (p. 68)
- Information Systems and Information Technology (p. 69)
- Management (p. 69)
- Marketing (p. 70)
- Supply Chain Management (p. 70)

### Major in Business Process Management

For the Degree of Bachelor of Science in Business Process Management

The Business Process Management Major develops concepts and skills for crafting innovative ways to deliver a firm’s goods and services. It focuses upon the productive management of capital, human capital and information resources upon the process of value creation. The coursework devotes particular attention to the definition of business goals and the design of management policies and procedures for achieving those goals. Students majoring in Business Process Management typically will seek careers as operations or strategy consultants, supply chain analysts, quality management professionals, manufacturing or service operations managers, project managers or leaders within other mission-critical functions of an organization.

In addition to the Business Process Management Major requirements, Business Administration students must also fulfill the University’s General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate section (p. 65)).

Requirements for the major are:

Major in Management

For the Degree of Bachelor of Science in Management

The Management Major is designed to prepare students to be leaders and innovators in analyzing and solving managerial problems that every organization faces in its day-to-day operations. To be effective, managers must be able to design organizations that can compete in complex and volatile business environments and to execute their strategies within these organizations. Effective managers also must be ethical leaders and competent decision-makers who formulate goals and long-term plans, build effective teams, and motivate their employees. Students majoring in Management have the option to select one concentration either in Entrepreneurship or General Management or International Business, depending on their career objectives.

The Entrepreneurship Concentration studies how business opportunities are identified and exploited to create wealth. This concentration is intended for students who are interested in new venture creation. Some graduates will work within existing organizations while others will create new organizations. The General Management Concentration is designed to educate and train future business leaders, decision makers and strategic thinkers to skillfully manage human capital in firms and organizations. The International Business Concentration is designed to provide students with the sound understanding of how International Business principles and the managerial issues faced by multinational companies. Students who select the International Business concentration will focus on political, cultural and institutional differences among nations by taking courses offered across the campus.

In addition to the Management Major requirements, Business Administration students must also fulfill the University’s General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 65)).

(https://business.illinois.edu/ba/undergraduate/management/international-business/electives-2) The Elective Courses's Lists will be reviewed periodically and new courses may be added. A student may substitute a course not on the lists by obtaining consent in advance from the Department of Business Administration Head or designee.

Major in Supply Chain Management

For the Degree of Bachelor of Science in Supply Chain Management

The Supply Chain Management Major studies the movement of materials from their procurement as raw material, parts or components through the manufacturing or processing sector to the marketing and distribution of end products for industrial or commercial users. The Supply Chain Management Major is available only to qualified students based upon application and personal interview. For more information, contact the Director of the Supply Chain Management Program.

In addition to the Supply Chain Management Major requirements, Business Administration students must also fulfill the University's General Education requirements and the College of Business Core...
Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 65)).

Students are required to complete an approved internship to graduate with the Bachelor of Science in Supply Chain Management degree.

Finance

Louis Chan
340 Wholers Hall
1206 S. Sixth Street
Champaign, IL 61820
PH: (217) 244-2239
FX: (217) 333-3102
http://www.business.illinois.edu/finance

For the Degree of Bachelor of Science in Finance

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate.

In addition to the finance major requirements, students in finance must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 65)). Minimum requirements in the major for the Bachelor of Science degree in Finance are:

For Students Admitted Prior to Fall 2016

Advising Notes

- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

Minor in Business for Non-Business Majors

Contact busminor@business.illinois.edu to address academic and admission questions.
The Business Minor is designed for students earning Undergraduate degrees in colleges other than the College of Business. The Business Minor provides course work through which Non-Business students can obtain skills and learn tools used in business. Business Minor students will learn the theories, techniques and concepts of Accounting, Finance, Management and Marketing. The Business Minor provides an academic background that will be useful for Non-Business students who wish to pursue a business career. The Business Minor is not available to College of Business students and Technology and Management Minor students. The Business Minor is not to be considered as preparation for transfer into the College of Business to earn an Undergraduate Business degree.

Admission into the Business Minor Program is very competitive and is based upon both the Cumulative GPA of the prerequisite courses and the Overall/Total Cumulative GPA of the pool of applicants. Grade exceptions will be made only for the prerequisite courses fulfilled by Advanced Placement credits, Dual Degree credits, Advanced Level credits and International Baccalaureate credits. Students are admitted by application into the Business Minor Program. Admission Applications are accepted in **350 Wohlers Hall**, January 1st - 31st.

**Admission Requirements:**

1. Applicants must complete at least 36 credits by the end of the fall semester to become eligible for admission from the January Application Period.
2. Applicants must complete all four Prerequisite courses by the end of the fall semester to become eligible for admission from the January Application Period. Please refer to the Business Minor Program’s website (http://go.illinois.edu/busminor) for additional admission and academic information as well as the approved on-campus substitutionary Prerequisite courses.

**Prerequisite Courses Requirement**

All applicants must have Academic Good Standing status (2.00 Cumulative GPA or higher). In addition, a Cumulative 2.50 GPA or higher is required from the four Prerequisite courses. Application is made by submitting the Statement of Intent to Pursue a Campus-Approved Minor (http://provost.illinois.edu/programs/advising/intent.pdf) form into **350 Wohlers Hall**. Admission Applications will be reviewed by the College of Business in February and all applicants will be notified of a decision by mid-February. Planning to earn the Business Minor does not offer special registration privileges.

Only those students officially admitted into the Business Minor Program by the College of Business may earn the Business Minor.

Business Minor students should enroll into Summer Session and Winter Term Business Minor courses to better ensure their completions of the Business Minor before their graduations.

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

Throughout the program, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, eBay, John Deere, Motorola Solutions, and Walmart.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for example, professional branding, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student’s academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website (http://www.techmgmt.illinois.edu) or contact the Technology & Management Program Office (1055 Business Instructional Facility, (217) 244-5752 (http://catalog.illinois.edu/undergraduate/business/tech-mgmt-minor/tel:(217)%20244-5752), tech-mgmt@illinois.edu).

http://education.illinois.edu

The College of Education at the University of Illinois at Urbana-Champaign offers undergraduate degree programs in the majors of Early Childhood Education, Elementary Education, Special Education and a minor in Secondary Education, all of which include teaching licensure. The College of Education also offers a non-licensure undergraduate degree in the major of Learning and Education Studies.

A distinguishing hallmark of the College of Education is the commitment to diversity. Faculty members engage in research, teaching, and service activities developed to ensure that all children, including those who are racially, ethnically, linguistically, and economically different as well as people with different abilities and disabilities, are provided with educational opportunities.

The Early Childhood Education degree program prepares students for recommendation for Illinois Early Childhood licensure (birth through grade three). The program also incorporates course work leading to an Early Childhood Special Education approval. Students who satisfactorily complete the degree program in Elementary Education are eligible for the University’s recommendation for Illinois licensure (grades one through six). The teacher education minor in Secondary Education is a component of the teaching option within the following majors in the College of Liberal Arts and Sciences: Biology, Chemistry, English, Geology, History, Mathematics, and Physics. Students who satisfactorily complete an LAS degree in one of these areas and the teacher education minor in secondary education are eligible for the University’s recommendation for Illinois licensure in grades six through twelve.

For additional information regarding Liberal Arts and Sciences requirements, see the College of Liberal Arts and Sciences (p. 172).

The Special Education major offers an undergraduate field-based professional preparation program designed to prepare teacher candidates to work with individuals with varying disabilities including: learning disabilities, social or emotional disorders, cognitive disabilities, physical disabilities and other health impairments, autism and traumatic brain injury. Candidates who successfully complete the degree program are eligible for the University’s recommendation for Illinois licensure to teach students with disabilities from pre-K through 21 in a range of settings.

The Learning and Education Studies degree program is a non-licensure major with concentrations in Applied Learning Science, Educational Equality and Cultural Understanding, Workplace Training and Development, and Digital Environments for Learning, Teaching and Agency. The curriculum prepares students for a broad range of positions requiring expertise informal and non-formal learning and education. Examples include training and program development, international schools, and other education-related positions in agencies, business, and government.

Requirements

Admission

Admission to the College of Education at any level (freshmen, off campus and on-campus applicants) is competitive. Freshman and off-campus transfer application information is available on the Office of Undergraduate Admissions website (https://www.admissions.illinois.edu/apply). Information for on-campus applicants can be found on the College of Education website (http://education.illinois.edu/programs/information-for/ui-students-applying-to-the-major).

General Education

In order to meet the University’s current requirements in general education, each candidate for a degree from the College of Education must complete the campus general education requirements and the Language other than English through the third semester college course. In most teacher education curricula, specific coursework within the general education areas must be taken. Also, in most teacher education curricula, additional credit in the general education areas is required. For more information on required general education coursework, contact a College of Education academic adviser. Students must select their courses for general education from the campus general education course list (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

Graduation

Undergraduate students in the College of Education must meet the University requirements for graduation. For those in a major leading
to licensure, the requirements of the Council on Teacher Education (http://cote.illinois.edu) for certification must also be met. Students in all curricula must meet the course and academic credit requirements of their curricula with satisfactory scholastic averages. Student teaching is required of all undergraduates in a licensure major and must be completed through the University of Illinois at Urbana-Champaign.

Students in need of additional information concerning regulations and degree requirements of the College of Education should consult their academic advisers or the Assistant Dean for Academic Affairs in the College of Education, University of Illinois at Urbana-Champaign, 142 Education Building, 1310 South Sixth Street, Champaign, IL 61820.

**Special Programs**

**Honors at Graduation**

Eligibility for graduation with honors is established after all grades are recorded following a student’s final semester. A student who achieves the required scholastic average in all work presented for graduation (excluding credit for courses not included in the computation of the grade point average) may be recommended for honors as follows: honors, minimum cumulative grade point average of 3.75; high honors, minimum cumulative grade point average of 3.85; highest honors, minimum cumulative grade point average of 3.90.

**Edmund J. James Scholars**

The James Scholar program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. As a James Scholar, students are entitled to certain academic privileges, including priority assignment of registration time, access to the "stacks" in the library, and official recognition on the University of Illinois transcript.

Entering freshmen in the top 15% of the College’s admitted applicant pool are invited to participate in the James Scholar Program. Transfer and continuing students must have achieved at least a 3.5 cumulative and University of Illinois grade point average to participate.

Students are certified as James Scholars by the college on a yearly basis. To qualify for this certification, the student must successfully complete a James Scholar project/requirement in the fall and spring semester and maintain a 3.5 University of Illinois and cumulative grade point average.

Details are available on the college website (http://education.illinois.edu/current-students/undergraduate/james-scholars).

1 For students graduating after January 31, 2018, the Secondary Education program will prepare students to teach grades 9-12.

- Early Childhood Education (p. 74)
- Elementary Education (p. 75)
- Special Education (p. 79)

Major without teaching licensure

- Learning and Education Studies (p. 76)
- Teacher Education Minor in Secondary School Teaching (p. 81)

**Early Childhood Education**

Fouad Abd El Khalick

For the Degree of Bachelor of Science in Early Childhood Education

Curriculum Preparatory to Early Childhood School Teaching

This program focuses on preparing teachers for preschool, kindergarten, and the early primary grades (one through three) of the elementary school. Graduates of the program can qualify for a professional educator license in Early Childhood Education with Early Childhood Special Education approval. There are seven prerequisite courses that must be completed prior to admission into the Early Childhood Education program. See information on prerequisites (http://education.illinois.edu/programs/undergrad/programs-degrees/ci-ece-ug). A minimum of 129 semester hours of credit, excluding basic military science, is necessary for graduation.

Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher preparation program pass the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (http://www.icts.nesinc.com) prior to admission. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (http://education.illinois.edu/students/prospective-students/ACT). (http://education.illinois.edu/students/prospective-students/ACT)

Students who are admitted to Early Childhood for the fall of their junior year may be able to complete the requirements for the bachelor’s degree in four years, depending on the number of general education and area of concentration courses left to complete. Consult the Early Childhood adviser or the certification officer for additional information.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

**Degree Requirements**

EDUC 101 Education Orientation Seminar

The following degree requirements also meet general education course requirements and must be selected from the campus general education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT) course list. (A list of courses approved for the laboratory, literature, speech performance, and health/physical development requirements
may be found here (http://education.illinois.edu/current-students/undergraduate/coe-undergraduate-handbook.)

**Communication Skills**
- Composition I and a speech performance elective, or CMN 111 and CMN 112 1
- Advanced Composition

**Mathematics/Science** 2
- Life Science
- Physical science (mathematics not acceptable)
- MATH 103 Theory of Arithmetic

**Humanities** 3
- Literature 1
- MUS 130 Intro to the Art of Music
- or MUS 133 Introduction to World Music
- ART 140 Introduction to Art

**Language other than English**
- Three years of one language other than English in high school completion of the third semester of college-level language.

**American History** 4
- Select one of the following: 3-4
  - PSYC 100 Intro Psych
  - PSYC 103 Intro Experimental Psych
  - PSYC 105 Psych Introduction
  - PS 101 Intro to US Gov & Pol
- Social and behavioral science elective 3-4

**Health and/or Physical Development**
- Health and/or Physical Development 1

**Electives**
- Elective Courses (if needed to complete the 129 hour graduation requirement) 0-4

**Areas of Concentration** 3
- Additional study in one academic discipline selected from the categories of mathematics, science, social science, or humanities. At least 9 of the 18 hours required must be 200-level or above. Consult an advisor for the list of approved disciplines.

**Professional Education**
- ART 201 Art in Early Childhood
- CI 420 Found of Early Childhood Educ 3 OR 5
- CI 421 Prin & Prac in Early Childhood
- CI 442 Math, Sci, Tech in Early Child
- CI 444 Social Stud Early Childhood Ed

**Total Hours: 120**

TOTAL minimum hours include general education and professional education credits.  

1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.  
2. Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.  
3. Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.  
4. ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.  
5. PYSC 100 is a prerequisite for EPSY 201.  
6. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.

## Learning and Education Studies

http://education.illinois.edu/

Assistant Dean for Academic Affairs: Kathy Ryan
Admissions Information: saao@education.illinois.edu

142 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

**For the Degree of Bachelor of Science in Learning and Education Studies**

This curriculum prepares individuals for positions requiring expertise in formal and non-formal learning and educational settings that do NOT require licensure (becoming a licensed teacher). Students interested in becoming a licensed teacher should consider the licensure program in the majors of Elementary Education, Early Childhood Education, or Special Education.

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations: 1) Applied Learning Science; 2) Educational Equality and Cultural Understanding; 3) Workplace Training and Development; or 4) Digital Environments for Learning, Teaching and Agency.

### Degree Requirements

| Orientation Seminar | EDUC 101 Education Orientation Seminar | 1 |

The following degree requirements also meet general education course requirements and must be selected from the campus general education course list. Selections of core requirements courses should be made in consultation with the adviser.

### Composition

1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.  
2. Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.  
3. Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.  
4. ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.  
5. PYSC 100 is a prerequisite for EPSY 201.  
6. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.
Composition I 4-6
Advanced Composition 3-4
Quantitative Reasoning 1
STAT 100 Statistics (or another approved basic course in statistical methods such as EPSY 280, SOC 280, or PSYC 235) 3
From approved campus list (Recommended: INFO 102) 3
Natural Sciences and Technology 1
From approved campus list 6
Humanities and the Arts 1
From approved campus list 6

Leadership in a Diverse Global Economy:
EPS 310 Race and Cultural Diversity
EPS 402 Asian American Education 3
EPS 405 Historical & Social Barriers
HRD 415 Diversity in the Workplace
Concentration 2
Students must complete 24 credit hours within one of the following areas of concentration: 1) Applied Learning Science, 2) Educational Equality and Cultural Understanding, 3) Workplace Training and Development, or 4) Digital Environments for Learning, Teaching and Agency.
Electives
Electives (including minor, if taken) 16-34
Total Hours 120
Total minimum hours include general education, language other than English, concentration and core credits.

Area of Concentration and Core Requirement courses found on the General Education Approved Course List (https://courses.illinois.edu) may also be credited toward the General Education requirements.

Course can be counted in the Core requirement or the Concentration requirement but not both.

Applied Learning Science (AppLeS) Concentration
The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University), as well as in education, psychology, business, law, and other more traditional areas of study. In addition, through their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their advisor. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

EPSY 403 Res Methods in Learning Scienc 3
EPSY 398 Thesis (Capstone Research Project) 3
Choose 2 from the following: 6
EPSY 427 Learning from Text
EPSY 490 Developments in Educ Psyc (Learning in Everyday Contexts section)
PSYC 357 Intro Cognitive Science
Choose 1 from the following: 3
EPSY 407 Adult Learning and Development
EPSY 431 Cognitive Dev in Educ Context
Choose 1 from the following: 3
EPSY 402 Sociocultural Infl on Learning
EPSY 404 Adjustment in School Settings

Information listed in this catalog is current as of 04/2016
minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women’s Studies, or LGBT/Queer Studies.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

Choose 3 from the following:
- EPS 380 Education and Social Justice
- EPS 400 History of American Education
- EPS 405 Historical & Social Barriers
- EPS 411 School and Society

Choose 2 from the following Cultural Understanding area:
- EPS 422 Race, Ed Pol, and Soc Science
- EPS 426 Comparative Education

Choose 2 from the following Educational Equality area:
- EPS 412 Critical Thinking for Teachers
- EPS 420 Sociology of Education
- EPS 423 Politics of Education

Elective class from GWS, LLS, AAS, AFRO, AIS, or GLBL 3

Total Hours 24

1 Course can be counted in the Core requirement or the Concentration requirement but not both.

Workplace Training and Development Concentration

Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees. An internship will be a required component of the concentration.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;

Learning and Education Studies
• Individuals who wish to work in the business and industry outreach departments of community colleges;
• Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
• Individuals who wish to serve as a staff member in the human resource development department of an organization; and
• Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

HRD 401 Training in Business/Industry 3
HRD 402 Business Principles for HRD 3
HRD 411 Training System Design 3
HRD 412 Instructional Techniques 3
HRD 414 Facilitation Skills 3
HRD 415 Diversity in the Workplace 3
HRD 440 Work Analysis 3
HRD 472 Learning Technologies 3

Total Hours 24

**Digital Environments for Learning, Teaching and Agency (DELTA) Concentration**

The undergraduate non-licensure concentration in Digital Environments for Learning, Teaching, and Agency (DELTA) will provide students with a strong background in the design, development and implementation of technology for a range of learning environments. Courses will introduce students to learning theory, designing and using technology to support learning, and issues encountered when deploying technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

Graduating students will be prepared to engage with various stakeholders interested in using technology to support learning in a range of different contexts. Examples include selecting and deploying appropriate technology to support pedagogic goals for schools, corporations, or informal learning environments such as Page 5 of 9 museums and afterschool clubs, designing educational games or toys and educational application development. One of the main objectives for students in DELTA is to build new ways to support learning, and prepare them for leadership roles in formal and informal environments, technology design and implementation strategies. They will also be prepared to pursue graduate study in a range of programs, such as educational technology, learning sciences, or instructional technology at the University of Illinois or elsewhere.

Students are encouraged to pursue a relevant minor or coherent set of electives from several related departments. Suggested minors include: computer science, communication, psychology, informatics, media and cinema studies or sociology. Students may also consider a minor in a specific content area from the arts and sciences to develop expertise in a particular field.

The DELTA concentration consists of 24 hours of course work. Students are required to take a minimum of two foundations courses, three core courses and three elective courses. The core courses are designed to ensure students leave the program with foundational knowledge and skills necessary to design, develop, implement, manage, and evaluate digital environments. The elective courses allow students to tailor the concentration to fit individual career goals and areas of interest. Students should take the foundation course *Introduction to Digital Environments* in the first semester they join DELTA. Similarly, the *Capstone Research Project* should be taken in the last semester after the majority of DELTA-related course work is complete.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

**Special Education**

http://education.illinois.edu/SPED

Department: Special Education

Head of Department: Michaelene Ostrosky

Admissions Information: saao@education.illinois.edu
288 Education Building, 1310 South Sixth, Champaign, (217) 333-0260
For the Degree of Bachelor of Science in Special Education

Curriculum Preparatory for Learning and Behavior Specialist I in Special Education

This program is designed to prepare special education teachers for students ages 5-21. An applicant must have a cumulative grade point average of at least 2.5 (A = 4.0), a minimum of 50 hours of prior experience with individuals with disabilities\(^1\), and sophomore or higher standing upon enrollment in the program.

A minimum of 125\(^2\) semester hours of credit is required for graduation. To allow for completion of degree requirements within three years, applicants must have earned 30 hours and must have fulfilled all or most general education requirements prior to enrollment.

Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher education program pass the Illinois Licensure Testing System Test of Academic Proficiency (http://www.icts.nesinc.com) (TAP) prior to admission. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details. (http://cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf)

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade-point averages of 2.5 (A = 4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used in lieu of a passing score on the Test of Academic Proficiency applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

### Engineering, College of

**Office of Undergraduate Programs**

206 Engineering Hall

1308 West Green Street

Urbana, IL 61801

PH: (217) 333-2280

http://engineering.illinois.edu

The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelors level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. The curricula provide a comprehensive education emphasizing analysis and problem solving and an exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

- Mechanical Engineering (p. 127)
- Nuclear, Plasma and Radiological Engineering (p. 132)

Mission
The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. Based on that foundation, the mission of the College of Engineering is to meet the needs of the state and nation through excellence in education, research, and public service. The goals are to instill in students the attitudes, values, vision, and training that will prepare them for lifetimes of continued learning and leadership in engineering and other fields; to generate new knowledge for the benefit of society; and to provide special services when there are needs that the college is uniquely qualified to meet.

Vision
The vision of the College of Engineering is to be a distinguished institution, providing knowledge that focuses on the creation and management of systems and resources. This knowledge is to be shared by motivating and educating qualified students to master the most important components of science and engineering at all levels. The students are also to have an appreciation for human and ethical values and to master the skills of oral and written communication. The value of this combined knowledge is measured by its connection to effective products, processes, and services that address the needs of society.

Educational Objectives
The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelor’s level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. Based on the mission and vision statement of the college, each engineering program has developed educational objectives which are broad statements that describe what graduates are expected to attain within a few years of graduation. In general, all the programs provide students with a comprehensive education that includes in-depth instruction in their chosen fields of study. The programs are designed to emphasize analysis and problem solving and to provide exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

Outcomes and Assessment
To accomplish the educational objectives and to fulfill current engineering accreditation criteria, all engineering programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

An assessment system for continuous measurement, evaluation, and improvement is in place in each academic department. In addition, the college collects college-wide data and provides coordination and assistance to the departments for the overall process.
Professional Component

Each engineering program also contains a professional component, as required for accreditation, that is consistent with the objectives of the program and the institution. The professional component includes:

- one year of a combination of college-level mathematics and basic sciences (some with experimental experience) appropriate to the discipline. Basic sciences are defined as biological, chemical, and physical sciences.
- one and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student’s field of study.
- a general education component that complements the technical content of the program and is consistent with the objectives of the program and the institution.

Students in engineering programs are prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

The paragraphs below further describe these elements of the programs and expected student outcomes and experiences.

Breadth of Programs

The college provides training in the mathematical and physical sciences and their application to a broad spectrum of technological and social requirements of society. The engineering programs, although widely varied and specialized, are built on a general foundation of scientific theory applicable to many different fields. Work in the classroom and laboratory is brought into sharper focus by practical problems that the student solves by methods similar to those of practicing engineers. Engineering design experience is introduced early in the programs, is integrated throughout, and culminates in a major design project teamwork experience in the senior year.

Although each student pursues a program chosen to meet individual career goals, all students take certain courses. Basic courses in mathematics, physics, biology, and computer science are required in the first two years. The scientific and technical portion of the majors provides the rudimentary development of technical skills, the modern engineering tools and methods for solving problems in practice, the design of experiments and associated data analysis, an understanding of values and cost, an understanding of the ethical characteristics of the engineering profession and practice, a sensitivity to the socially related technical problems that confront health and safety, and the ability and emphasis for maintaining professional competence through lifelong learning. Although the programs are progressively specialized in the third and fourth years, each student is required to take some courses outside his or her chosen field.

Non-technical courses are included in each program; they may be required or elective. Many non-technical courses satisfy the broad objectives of the humanities and social sciences requirements of the engineering programs, enabling strong, effective communications, making the student keenly aware of the urgent contemporary problems of society, and developing a deeper appreciation of human cultural achievements in a global context. The humanities and social sciences courses are usually drawn from the liberal arts and sciences, economics, and approved courses in fine and applied arts. A student who desires a broader cultural background may wish to consider a combined engineering-liberal arts and sciences program.

Illinois Engineering Freshman Experience (IEFX)

The Illinois Engineering First-Year Experience (http://iefx.engineering.illinois.edu) is an interdisciplinary program for all first-year engineering students. Students' aspirations are respected, supported, and fostered within program initiatives that lay a solid foundation for your collegiate career.

You have the opportunity to begin your experience by participating in Summer Scholars, a program centered on helping you transition to Illinois and increase your academic performance for the first-year. You attend the eight-week Summer Session II and take the IEFX Projects course and another class of your choice.

For the fall semester, all first-year students attend Launch, your official welcome event to Engineering at Illinois, the Saturday before classes begin. You will meet faculty, staff, and other students at this popular party event that helps you build community and get a strong start.

Your experience continues with ENG 100, a fall-semester orientation course where you will learn important skills and information regarding engineering and the University, and you connect with a peer mentor that is trained and eager to assist you for academic success. You are also encouraged to enroll in one or more of the IEFX Electives. These courses offer variety to and enhancement of the first year.

Along with the opportunities mentioned previously there are other events and sub-programs in IEFX that build community and helps students establish a strong sense of engineering identity.

For further information regarding IEFX, visit the IEFX website (http://iefx.engineering.illinois.edu), contact the IEFX Office (First Floor, Engineering Hall, iefx@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Engineering Career Services

The College of Engineering is committed to your success as a student and beyond. Our Engineering Career Services (ECS) office offers support, guidance, and resources to help you with every step of your job search. Whether you are interested in gaining practical experience through a co-op position or an internship, or entering the professional world upon your graduation, ECS provides a variety of services from career planning to offer evaluation and negotiation. We encourage you to take advantage of these services both as a student and as an alum of the College.

ECS provides comprehensive services and programs designed to enable students to identify, facilitate, and negotiate successful career opportunities. ECS offers an online job system that employers use to communicate with students by posting job opportunities and promoting on-campus recruiting activities.

ECS services include:

- Workshops and seminars
- Career exploration and counseling
- Resume and cover letter reviews
- Mock interviews
- Career fairs and on-campus recruiting events
- Job shadows, internships, co-ops, and full-time job postings
- Company databases and contact information

Information listed in this catalog is current as of 04/2016
Departments and Programs

The engineering degree programs offered at Illinois awarding Bachelor of Science degrees are listed in the table below. The programs accredited by an accreditation commission of ABET (http://www.abet.org) and the year in which first accredited are indicated. The Computer Science program is accredited by the Computing Accreditation Commission (CAC); all others are accredited by the Engineering Accreditation Commission (EAC).

1 Accredited program name was Aeronautical and Astronautical Engineering until August, 2004.
2 The program in agricultural and biological engineering in the Department of Agricultural and Biological Engineering is administered jointly by the College of Agricultural, Consumer, and Environmental Sciences and the College of Engineering with the degree granted by the College of Engineering. It succeeds a program named Agricultural Engineering until August 2008 that was first accredited in 1950.
3 The program in chemical engineering is administered by the Department of Chemical and Biomolecular Engineering in the College of Liberal Arts and Sciences with the degree granted by the College of Liberal Arts and Sciences.
4 The Department of Computer Science also sponsors two majors administered by the College of Liberal Arts and Sciences: a Mathematics and Computer Science Major and a Statistics and Computer Science Major.
5 Accredited program name was Nuclear Engineering until August 2008.
6 The Department of Physics also offers a B.S. degree program in Physics and a Physics Major in the Science and Letters Curriculum, both administered by the College of Liberal Arts and Sciences.

To take advantage of these services and many more, students simply need to register with the Engineering Career Services office (3270 Digital Computer Lab, 217-333-1960, ecs@engr.illinois.edu), or visit the Engineering Career Services website (http://ecs.engineering.illinois.edu).

Admission to Programs in the College of Engineering

Entering Freshman Admissions

Students seeking admission to the College of Engineering who are current high school students, recent high school graduates, or who have earned fewer than 12 semester hours of credit at other collegiate institutions are classified as new freshmen and must meet the entrance requirements to the College of Engineering (http://engineering.illinois.edu/admissions/undergraduate) that are specified for new freshmen. Students are admitted to the college on a best-qualified basis as determined by a number of factors. These include ACT and SAT scores, high school percentile rank, high school grades, high school class selections, extracurricular activities, awards, and essays by the applicant.

Placement in chemistry, mathematics, rhetoric, and foreign languages is required and is based upon ACT and SAT scores, ALEKS (http://citl.illinois.edu/services/for-students/placement-testing/current-cutoffs/mathematics) math assessment results, or specific placement tests.

Proficiency exams in many subjects, including chemistry, mathematics, and physics, are administered shortly after the fall semester begins. A student with advanced placement (AP or IB) credit in mathematics, chemistry, or physics will receive credit toward graduation and will be placed in advanced course work consistent with academic preparation.

All of the engineering curricula are built around a common core of courses. In addition all students in engineering curricula have 18 hours of social sciences and humanities electives and at least 6 hours of free electives; those choices are generally not prescribed by the curriculum. These common elements allow a student to transfer from one curriculum to another early in their college career with minimal loss of credit.

The following table gives an indication of the common elements in the early stages of the engineering curricula. There are math, chemistry, physics, and rhetoric courses required in all curricula. There are also several courses that are common to many curricula. When a course substitution applies (e.g., MATH 286 for MATH 285, or MATH 415 for MATH 225) the most flexible option is to take the more demanding course as it meets the requirements of the less demanding course (and generally provides a stronger education in that subject).

Information listed in this catalog is current as of 04/2016.
Students enrolled in the College of Engineering may petition for transfer to another department within the college. Such a transfer is considered an interdepartmental transfer (IDT).

Approval of an IDT petition will depend upon the reasons given by the petitioner for wanting to transfer, the comments of current and prospective departments, and availability of space in the target curriculum. Each case will be considered individually on its own merits.

For more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageld=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Special Degree Programs

Combined Engineering-Liberal Arts and Sciences Program

A dual degree program of study permits a student to earn a Bachelor of Science degree in a field of engineering from the College of Engineering and a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

This program affords the student the opportunity to prepare for a career of an interdisciplinary nature. A student who desires a broader background than can be provided in the four-year engineering programs can develop a combined program that includes a synergistic scientific education or an enhanced cultural education in addition to an engineering specialty. Each student must file an approved program with the College of Engineering’s Office of the Associate Dean for Undergraduate Programs and with the College of Liberal Arts and Sciences Academic Affairs Office.

Advisors in both colleges assist in planning a program of study to meet the needs and requirements for both degrees. Most combinations of engineering and liberal arts programs may be completed in ten semesters if the student does not have deficiencies in the entrance requirements of either college.

Most engineering programs can be combined with one of a variety of liberal arts and sciences majors, including science, languages, social sciences, humanities, speech communication, and philosophy. This combined program operates under the following conditions:

- Students entering the program must meet admission requirements for both colleges. Students planning completion of the two degrees in 8 semesters are recommended to submit the application in the fifth term of enrollment but no later than the first week of classes in the seventh term. Students planning completion in 10 semesters are recommended to submit the application in the seventh term of enrollment but no later than the first week of classes of the eighth term.
- Beginning with students who matriculated in Fall 2005, an Illinois GPA of 3.25 (or above for certain programs) will be required at the time of application for a second degree.
- Students must complete all of the requirements specified for the additional LAS degree as well as at least an additional 30 hours over and above those required for the first degree. The candidate must also complete 12 distinct advanced hours in the LAS major that are not used in meeting the requirements for any other degree program.
- All second degree candidates in LAS must be enrolled in the College of Liberal Arts and Sciences for a minimum of two semesters. Also, campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree.

Transferring into Engineering from Other Colleges on Our Campus

Any student in good standing in a college outside Engineering is eligible to seek transfer into a curriculum offered by the College of Engineering. The likelihood of success of such an intercollege transfer (ICT) petition depends upon the qualifications of the student, primarily as evidenced by performance in U of I courses. A student with a B average or above and with demonstrated success (primarily A’s and B’s) in Math, Physics, and Chemistry may be a good candidate for transfer.

For more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageld=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Changing Curricula within Engineering

Students enrolled in the College of Engineering may petition for transfer to another department within the college. Such a transfer is considered an interdepartmental transfer (IDT).
• A student who starts in the program and decides to transfer from it is subject to the existing graduation requirements of the college of his or her choice.
• The degrees of Bachelor of Science in engineering and Bachelor of Arts or Bachelor of Science in liberal arts and sciences may be awarded simultaneously. If not, a student must complete the LAS degree first, having fulfilled the two-semester residency requirement in LAS, and transfer back to the College of Engineering to complete the other degree.
• Participants must satisfy the College of Liberal Arts and Sciences foreign language graduation requirement.
• Students electing advanced Reserve Officers’ Training Corps and Naval ROTC programs are required to meet these commitments in addition to the combined program as outlined.
• Students with 75 or more hours of transfer credit are not advised to enter this program because they cannot ordinarily complete it in five years.
• Students transferring from other colleges and universities must plan to complete at least one year in the College of Liberal Arts and Sciences at Urbana-Champaign and one year in the College of Engineering at Urbana-Champaign to satisfy residency requirements if both degrees are to be granted here.

For further information about this program, students should contact the Office of the Associate Dean in either the College of Engineering or the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

Dual-Degree Programs within the College of Engineering

Students enrolled in any department of the College of Engineering may pursue a second engineering degree if the following requirements are fulfilled:

• Students seeking a second engineering degree must apply for the program no later than the first week of classes of the term they intend to graduate with the first degree. The two engineering degrees may be awarded simultaneously or consecutively. All candidates for engineering degrees are accorded a maximum of 10 semesters of Illinois enrollment to complete their degrees. Students must petition to request an extension beyond this limit, which must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering.
• The Department offering the curriculum for the second degree must approve the double-degree request. The criteria for approval are the same as the ones applied for transfer into that curriculum.
• Campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree. The candidate must also complete at least 12 distinct advanced hours in the second degree that are not used in meeting the requirements for the first degree program.

Advanced students with multidisciplinary ambitions may also consider pursuing a graduate master’s degree as an alternative to a second undergraduate engineering degree, particularly if interested in research. Students should seek the advice of advisors and faculty members in the specific departments of interest to gather information on graduate programs and on available research opportunities.

Program Modification

A student can seek to modify his or her program of studies using course substitutions by submitting a Curriculum Modification form to the Office of the Associate Dean for Undergraduate Programs in the College of Engineering, 206 Engineering Hall (note that the forms can be obtained there too). The student should seek an endorsement of the change from his or her academic advisor and the Chief Advisor of the department responsible for the student’s program. The Associate Dean for Undergraduate Programs is responsible for approving all curriculum modifications. No program modification is automatically granted, and each request must come through the formal process. Once approved the student is notified by return copy of the form and the program change is entered in the graduation audit.

Custom Degree Program

Some program changes do not fit the direct course substitution mode anticipated by a Program Modification. In such a case a student may seek permission to vary the program requirements of one of the standard Engineering degree programs by written petition to the Associate Dean for Undergraduate Programs. There is no standard form for this transaction. A student should submit a letter proposal outlining the nature of the request and the justification. The special program must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering, who will consult with the head of the department in which the student is registered.

Affiliations with Other Liberal Arts Colleges

Through a program of affiliation between the College of Engineering and a number of liberal arts colleges, a student may enroll in a five-year program, earn a bachelor’s degree from one of these colleges, and at the same time earn a bachelor’s degree in engineering from Illinois. In general, students spend the first three years at the liberal arts college and the final two years at Illinois. At the time of transfer, students must meet competitive transfer admission requirements and must meet certain residency requirements to participate in this program.

The five-year program encourages a student to develop a broad understanding of the social sciences and humanities while striving for excellence in technical studies. These affiliations have the added benefit of allowing students to take core engineering studies (including mathematics, physics, and chemistry) at liberal arts schools. Students interested in this dual degree program should meet with advisors from both schools to develop an individual plan of study.

Colleges affiliated with the College of Engineering are:

• Augustana College, Rock Island, Illinois
• De Paul University, Chicago, Illinois
• Eastern Illinois University, Charleston, Illinois
• Elmhurst College, Elmhurst, Illinois
• Greenville College, Greenville, Illinois
• Illinois Benedictine College, Lisle, Illinois
• Illinois College, Jacksonville, Illinois
• Illinois State University, Normal, Illinois
• Illinois Wesleyan University, Bloomington, Illinois
• Knox College, Galesburg, Illinois
• Lewis University, Romeoville, Illinois
• Loyola University of Chicago, Chicago, Illinois
• North Central College, Naperville, Illinois
• Olivet Nazarene College, Kankakee, Illinois
• Western Illinois University, Macomb, Illinois
• Wheaton College, Wheaton, Illinois
For more information, view the Office of Admissions Transfer website (http://admissions.illinois.edu/apply/requirements_transfer.html).

Special Off-Campus Programs

Experiential Learning Programs

Co-ops and internships (summer and semester) provide students with a competitive advantage when seeking full-time career opportunities in industry. These Experiential Learning Programs not only enable students to gain up to a full year of professional work experience while paying for their education, but also offer the opportunity to explore engineering-related fields in-depth, to apply what you learn in the classroom to a real situation, and to provide insight into some of the nation’s leading companies.

As a Co-op, a student alternates terms of work with terms of school, working at least two semesters and one summer with the same company. Students that participate in a Co-op opportunity graduate with one year of professional work experience increasing their marketability throughout the recruiting process. Semester Interns work for a period of 4-7 months with one company (a spring or fall semester may be combined with a summer). Many students also participate in summer internships, working for one company during a summer (2-3 months). Students may complete multiple internships, and all internships and co-ops are paid employment positions. Students find these Experiential Learning Programs valuable and rewarding for a number of reasons:

- They are able to explore opportunities within a specific field.
- They gain industry experience prior to graduation.
- They improve their overall communication and team skills.
- Time spent with an employer inspires their performance in their coursework and expands their classroom experiences.
- The practical experience helps them to identify if they have really chosen the right field of interest for them and offers numerous alternative ideas.
- They earn money that can be applied to college expenses.

ECS also offers a job shadow program, which takes place each year during winter break. The Job Shadow Program is a one day program for freshmen and sophomores interested in spending time with an engineer to better understand what it means to work in a specific industry or company. This program provides students with an opportunity for a brief yet valuable introduction to the daily demands of an engineer during the course of a day. Each student is matched with an engineer in the student’s field of interest and spends time at the engineer’s firm. This unique interactive experience will give participants a better idea of how the professional world "feels" in their chosen field of study.

For more information regarding Experiential Learning Programs visit the Engineering Career Services website (http://ecs.engineering.illinois.edu), contact Engineering Career Services (3270 Digital Computer Lab, 217-333-1960, ecs@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Study Abroad Programs

Engineering students at Illinois are presented with very attractive opportunities to study overseas as part of their university experience. Students may spend a summer, semester, or even an entire academic year abroad. Credits earned during this time may be transferred to Illinois to satisfy curricular requirements. Additionally, a student may even elect to pursue an International Minor in Engineering (http://catalog.illinois.edu/undergraduate/engineer/international-minor-engineering) that is focused on the country or region of the student’s choice.

A variety of study abroad and international work programs are available to provide students an international experience. Currently, International Programs in Engineering (IPENG) has programs at universities in Argentina, Belgium, Brazil, Chile, China, Denmark, France, Germany, Italy, Japan, Jordan, Russia, S. Korea, Vietnam, and West Indies, and more are continually being developed in these and other countries.

IPENG’s membership in the International Association for the Exchange of Students for Technical Experience (IAESTE) and Global Engineering Education Exchange (GE3) consortia provides additional overseas locations and fellowships for study abroad. Students can also participate through the main campus programs in several other countries. For information on these programs visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or the Study Abroad Office website (http://studyabroad.illinois.edu) or contact the Engineering Study Abroad Office (210 Engineering Hall, ipeng@illinois.edu)

To help new students gain an understanding of the importance of an international experience during their academic career at Illinois, the College of Engineering offers a freshman course, ENG 191—International Dimensions of Engrg. This course provides an overview of global changes along with industrial perspectives to help prepare graduates for foreign placement as professionals. The course will also provide insights on how engineering students may build coursework and experiences into their undergraduate programs that will prepare them for overseas involvement.

An overseas academic experience can begin as early as the summer after the first year at Illinois. An academic semester or year exchange program provides an even greater depth to the undergraduate experience and will greatly enhance a resume when a student begins their professional job search.

The personal and academic advantages gained by participating in the program are numerous and reflect many financial incentives. These advantages can include: IPENG help with round-trip airfare for all engineering students who study or work abroad on approved programs and a reduced on campus tuition charge when studying. The result is that Illinois provides the opportunity to earn credit overseas at only a fraction of the cost of studying on campus.

The College of Engineering also offers scholarships for Study Abroad participants. The College of Engineering believes in this opportunity so firmly that much has been done to make this as affordable as possible for students. In addition to help with round-trip airfare and tuition incentives, newly admitted students are offered an opportunity to apply for the International Engineering Scholarship. This scholarship provides a one-time payment of $2,500 during the Study Abroad program. Additional scholarships are also provided to students upon acceptance to a study abroad program.

For more information about study abroad, visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or contact IPENG (210 Engineering Hall, 217-244-0054, ipeng@illinois.edu).

Other International Opportunities

The International Association for the Exchange of Students for Technical Experience (IAESTE) is a private, nonprofit organization that enables students of engineering, architecture, and the sciences to obtain on-the-job training in foreign countries. Any student, undergraduate or graduate, who is enrolled in good standing at Illinois and who has completed at
least the sophomore year of study may apply. Generally, the maintenance allowance is adequate to cover living expenses while in training but does not cover transportation costs. Further information about these opportunities may be obtained from the IPENG office or the IPENG website. (http://engineering.illinois.edu/ipeng)

Engineers Without Borders (EWB) Illinois works with disadvantaged communities to improve their quality of life through implementation of environmentally and economically sustainable engineering projects, while developing international responsible engineering students. Current international projects include biofuel electricity generation, charge controller circuit design, and wood-stove emissions control. Furthermore, EWB-Illinois holds local events to create awareness on campus of international development and environmental issues. EWB-Illinois is open to all majors and, indeed, is always in need of dedicated people from all fields. For more information, visit the Engineers Without Borders website (http://www.ewb-usa-uiuc.org).

Advanced ROTC Training
A student in the College of Engineering may elect to participate in the Reserve Officers’ Training Corps Program and earn a commission in the U.S. Army Reserve, Air Force Reserve, or Naval Reserve. A commission is awarded simultaneously with the awarding of the bachelor of science degree in an engineering field. Participation in these programs is limited to students who apply to and are selected by the army, air force, and navy units at Illinois. Monthly stipends are paid to those selected for advanced military training.

These programs require from one to three summer camps or cruises and the earning of specified numbers of credits in advanced military courses. Credits earned appear in all academic averages computed by the College of Engineering. Basic military courses do not count toward graduation. A maximum of 6 hours of upper-level military science courses may be used as free electives. A student should plan on taking nine semesters to obtain both a bachelor’s degree in engineering and a commission in the ROTC program. For further information, write directly to the professor of military science, aerospace studies, or naval science.

Technical Grade Point Average Requirements
Technical grade point average (TGPA) requirements for graduation and advanced-level course registration apply to students enrolled in certain College of Engineering curricula. These rules apply in addition to the Illinois campus-wide drop and probation rules. The table below summarizes the TGPA rules applicable.

Note: TGPA rules for the General Engineering and Industrial Engineering curricula shown in the table below are under review and subject to change. Click here (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements) for the most current information.
Mechanical Engineering

Math courses

Include any course offered by the Mathematics department under the MATH rubric and by the Statistics department under the STAT rubric

Engineering (Eng) courses

Means any course offered by a unit of the College of Engineering (i.e., under the rubrics AE, ABE, BIOE, CEE, ...)

Science courses

Means any course in the basic sciences (physics, chemistry, biology, etc.)

Required

Means that the course is called out by name in the curriculum (i.e., not an elective)

Engineering Honors Programs (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Honors?src=search)

Honors at Graduation

Honors awarded at graduation to superior students are designated on the diploma as honors, high honors, or highest honors. A student receives honors with a cumulative Illinois grade point average of at least 3.50, and high honors with at least a 3.80 grade point average at graduation. Highest honors may be awarded to any student eligible for high honors upon recommendation of his or her department. The criteria used by departments in selecting individuals for highest honors recognition include outstanding performance in course work and in supplementary activities of an academic or professional nature. Ordinarily, such a citation requires completion of an undergraduate thesis or a special project of superior quality.

Tau Beta Pi

Tau Beta Pi is a national engineering honor society that recognizes students, alumni, and engineers for outstanding academic achievements and exemplary character. The Alpha chapter at Illinois was founded in 1897 and is the fifth oldest chapter. In addition to gaining scholastic recognition, members participate in a range of activities that serve the chapter, the College of Engineering, and the community. The scholastic requirement for membership in Tau Beta Pi is that juniors must be in the upper one-eighth of their graduating class and seniors must be in the upper one-fifth of their graduating class.
Edmund J. James Scholars

The honors program in engineering is part of the Illinois James Scholar program, which was established to recognize and develop the talents of academically outstanding students. Engineering students in this program are known as "James Scholars in Engineering." Each is assigned to an honors advisor and receives special consideration in the selection of courses to meet specific needs.

Changes in the selection of entering first-year James Scholars in Engineering will be put in place, to be based on a holistic review of the application rather than on standardized test scores alone. Students selected as James Scholars for Fall freshman admission will be notified in late February. If you did not qualify upon freshman admission, you may still apply to be a Freshman James Scholar during the first two weeks of your second semester if you have achieved a 3.5 Grade Point Average or higher in your first semester. Upon completion of the freshman honors requirement, you will still get honors recognition for the full year on the transcripts.

Continuation in the program or joining as an upperclass student requires a minimum 3.50 GPA and the development and approval of an honors contract, which is a coherent plan of special academic work. For more information about the James Scholar Program, visit the college's James Scholar website (https://wiki.cites.illinois.edu/wiki/display/engrjames/Home) or contact the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Good standing in the James Scholar program at graduation requires completion of the honors contract.

Dean's List

The names of undergraduates who have achieved a grade point average in the top 20 percent of their college class for a given semester will be included on a list prepared for the dean of the college. This list is publicized on campus and is sent to news agencies throughout the state.

To be eligible for Dean's List recognition, students must successfully complete 14 academic semester hours letter grade. Credits earned during the semester through proficiency, CLEP, and advanced placement examinations are not counted.

General Education Requirements

The campus General Education requirements fall into several categories. Those in Composition I, Natural Sciences and Technology, and Quantitative Reasoning are met by courses required in engineering curricula. Beginning with the class that entered in fall 2000, students must complete a third-level college language course. Most students satisfy this requirement by completing three years of high school instruction in a single language.

The campus General Education requirements in social and behavioral sciences and humanities and arts can be met while satisfying the College of Engineering's liberal education course work requirements (see below). Proper choices will assure that these courses also satisfy the campus requirements in the areas of Western and non-Western cultures. Many of these courses satisfy the campus Advanced Composition requirement, which assures that students have the advanced writing skills expected of all college graduates.

Students may obtain credit from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits. All course work taken to satisfy campus general education requirements must be taken for grade.

For more information about General Education course work requirements, consult the campus General Education website (https://courses.illinois.edu).

Elective Course Work

Liberal Education Electives

The College of Engineering requires eighteen hours of liberal education course work. The courses are normally chosen to also satisfy the campus General Education requirements consisting of six hours of social and behavioral sciences (S&BS) and six hours of humanities and arts (H&A) course work. All twelve hours of these must be taken for grade. The remaining six hours of liberal education course work may include more approved General Education S&BS or H&A credit, foreign language credit beyond the basic requirement, and liberal education courses from a list approved by the College (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Course+List?src=search).

Credit for this course work may come from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits.

For more information about College of Engineering liberal education course work requirements, consult the college's Liberal Education website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives).

Technical Electives

All technical elective courses must be selected in accordance with departmental requirements. Technical electives generally include 300- and 400-level courses in engineering, mathematics, and the natural sciences.

Free Electives

These unrestricted electives are selected at the prerogative of the student with certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search). Every curriculum administered by the College of Engineering has at least six free elective hours. This course credit insures the required number of credit hours for the degree is earned.

Credit-No Credit Option

The credit-no credit grade option is available for students who want to explore areas of academic interest that they might otherwise avoid for fear of poor grades. All students considering this option are cautioned that many graduate and professional schools consider applicants whose transcripts bear a significant number of non-grade symbols less favorably than those whose transcripts contain none or very few. Required courses in the College of Engineering may not be taken on this basis. For more details, consult the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Grades).
Combined B.S.-M.S. Engineering Degree Programs

Computer Science (M.S.) (http://cs.illinois.edu/current-students/graduate-students/bs-ms-5-year-program)

The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Illinois Computer Science students enrolled in the College of Engineering with junior standing who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

Course Requirements

B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):

- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
- Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
- Illinois undergraduate student minimum residence requirement satisfied
- Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):

- Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
- Satisfy Illinois’ graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

Admission

For deadlines and procedures, consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-ms-5-year-program). Current Illinois Computer Science students who are in their junior year (normally at least 90+ credit hours, including those in progress, and at least one year of undergraduate course work remaining) with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.

- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.-M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Continued Graduate Study

Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master’s degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master’s degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

Computer Science (M.C.S.) (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program)

The 5-year program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. in Computer Science. This program
is competitive and admission is based on overall academic performance, letters of recommendation, and statement of purpose.

Course Requirements

B.S. Component: 120 hours plus 3 "Breadth Requirement" courses for 9-12 graduate hours

- Same required courses as the traditional B.S. degree with the minimum hours required reduced to 120 hours.
- Must complete 3 out of the 4 "Breadth Requirement" courses: four different courses, each from a different area, from the following eight core areas with a grade of B- or higher.
- University undergraduate minimum residence requirement satisfied.
- Overall GPA of 3.0 or higher maintained through the completion of the B.S. component of the program.

M.C.S. Component: Minimum 20-23 additional coursework hours

- Program is identical to the traditional M.C.S. program with the 3 out of 4 "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)" courses satisfied while still classified as an undergraduate.
- Students who take the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)" courses for 3 credit hours instead of 4 will need to complete a minimum of 23 additional graduate level coursework hours.
- Students must satisfy the university’s graduate student minimum residence requirement.
- Students must complete remaining M.C.S. degree requirements in two semesters (fall-spring, spring-summer, or spring-fall).
- Students must maintain an overall GPA of 3.0 through completion of the M.C.S. component of the program.

Admission

For deadlines and procedures, please consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program). Current Illinois Computer Science students enrolled in the College of Engineering with a junior standing (must have at least one year left of their undergraduate study after admitted into the program) who maintain an excellent academic performance are eligible to apply for this program. Students admitted to this program will receive both degrees once all requirements for both degrees have been successfully completed. Transfer students entering the CS undergraduate program their junior year are also eligible to apply to this program.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the program to remain in the program.
- may register for graduate courses and earn graduate credit hours, with approval from their graduate academic advisor, if they have 12 hours or less to complete in their FINAL semester of their undergraduate studies. Please note that students cannot transfer more than 12 credit hours of coursework over to their M.C.S. degree, which includes the shared coursework.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (this is the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"), and satisfy all B.S. requirements to be officially recommended for admission to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"), and an overall GPA of at least 3.0 GPA, students

- will be officially admitted into the Graduate College, with the application fee paid by the department.
- will be issued letter of admission from the Graduate College Admission Office and the Department of Computer Science, at which time they will be considered graduate students and assessed graduate tuition the following semester. International students may be required to submit additional documentation at this time.
- must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.
- must complete all the remaining M.C.S. degree requirements within two semesters (fall-spring, spring-summer, or spring-fall). Please note that if you finish your B.S. requirements in less than four years, you will not be given extra time to complete the M.C.S. degree requirements. You will just finish this joint program in less than 5-years and be able to start working sooner!

Withdrawal

Students who do not complete all 5-Year B.S.-M.C.S. degree program requirements may request by petition to have graduate hours earned, including the Breadth Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Electrical and Computer Engineering (https://www.ece.illinois.edu/academics/ugrad/jointbsmeng.asp)

The joint B.S. - M.Eng. program in Electrical and Computer Engineering combines two degrees: a B.S. in EE or CompE with a M.Eng. in ECE. Current Illinois ECE students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in the standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S. - M.Eng. degree have been successfully completed.

Students may participate in the graduation ceremonies for their B.S. degree once the 120 credit-hour requirement is met. There will be no Graduate College or BOT waivers allowed for students in this program. This program is not intended for students intending to pursue the Ph.D. degree—such students should apply to the traditional M.S. (with thesis) degree program.
Course Requirements
B.S. Component (120 hours)*
- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 120.
- The reduction of 8 credit hours includes:
  - 6 hours in Free Electives in both EE and CompE curricula
  - 2 hours in ECE courses in EE Technical Electives or 2 hours in ECE or CS courses in CompE Technical Electives.
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Illinois undergraduate student minimum residence requirement must be satisfied.

M.Eng. Component (32 additional hours of coursework)
- Identical to stand-alone M.Eng. degree requirements:

<table>

</tbody>
</table>

Professional Development: ECE 596 4
Master's Project supervised by ECE (or affiliate) graduate faculty or course(s) in leadership, entrepreneurship, or other business-related topic from approved list or as approved by ECE Director of Graduate Studies

Elective courses (subject to Other Requirements and Conditions below) 16

Other Requirements and Conditions (may overlap)
A minimum of 12 credit hours of ECE coursework at 500-level must be applied toward the degree.
Up to 4 hours of ECE 596 and/or ECE 597 (or other individual study) may be applied toward this degree requirement.
Coursework must include at least 18 credit hours of ECE coursework; 15 of these hours must be from no more than 2 different focus areas. The ECE Graduate Committee maintains the Focus area course lists.
Credit in ECE 411, ECE 415, ECE 445, ECE 590, PHYS 404, PHYS 405, PHYS 435, PHYS 436, and STAT 400 do not count toward the degree.
No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.
This degree option is non-thesis only.

Maintain a minimum program GPA of 3.0.

Admission to the Program
For deadlines and procedures, consult the department website. Current Illinois ECE students with at least 90 credit hours and an overall GPA of at least 3.40 may apply for provisional admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:
- must apply and be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College and the ECE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal
Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete all B.S. - M.Eng. degree requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. in Electrical Engineering or B.S. in Computer Engineering degree. Students reverting to a traditional B.S. degree program must complete 128 hours and satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 120-hour B.S. degree from the B.S. - M.Eng. program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program.

Industrial Engineering
The Department offers a combined Bachelor of Science and Master of Science program in Industrial Engineering. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements
The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares to 128 hours of...
undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program shown above, except that the following requirements are waived:

- one IE technical elective — 3 hours
- Free electives — 5 hours

In addition, independent study project courses may not be used as IE or technical electives in the B.S. portion of the combined program.

In the M.S. portion of the program, 32 hours of credit and a thesis are required. There must be at least 24 hours of formal graded course work at the 400 level or greater, eight of which must be at the 500 level, and four of the eight must be in the major field. A Master’s thesis, for which at least four and no more than eight hours of IE 599 credit is required. Students must also register for the graduate seminar course (IE 590) every semester following formal admission into the graduate portion of the program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program. The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission

Formal admission to the combined program normally occurs late in the junior year or early in the senior year. Undergraduate students in IE may apply for formal admission to the combined program with the following provisions:

- Students must have a minimum Illinois GPA of 3.60 or higher, and have earned 96 credit hours towards the B.S.I.E. requirements at the time they are invited to apply.
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ISE Graduate Programs Office, Room 111 Transportation Building. There are two annual application deadlines: September 15 and January 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee for these students.
- Each student is required to identify a graduate advisor and file a graduate course plan in the semester the student is granted formal admission to the graduate portion of the program.
- Once the student is admitted into the B.S.-M.S. program, the Director of Graduate Programs will act as the student’s advisor until a permanent advisor is found.

Withdrawal

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department’s qualifying examination no later than the second calendar semester after graduation from the combined program.

Materials Engineering (http://www.matse.illinois.edu/academics/undergraduate/combined-degree-program.html)

The five-year B.S.-M.Eng. program in Materials Science and Engineering combines two degrees: a B.S. in Materials Science and Engineering (MatSE) with an M.Eng in Materials Engineering. Current Illinois MatSE students enrolled in the College of Engineering, who maintain appropriate academic performance, are eligible to apply for this program. The program is designed to enhance the students experience in the engineering aspects of materials, broaden their knowledge beyond that possible in the standard 4-year curriculum and obtain a foundation in business, technology management, and/or entrepreneurship. Two semesters (or equivalent, a minimum of 30 weeks) of industrial co-op or internship are required; a research thesis is not required. In addition the students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department). Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.Eng. degree program have been successfully completed but will be permitted to participate in the B.S. graduation ceremonies with their class if they have completed the equivalent number of credit hours. Once graduate student status is achieve, students in the program would be eligible for a teaching assistantship in MatSE (only).

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MEB, 2 months before the end of the Fall semester of the students Junior year. The application and letter of reference forms for the B.S.-M.Eng. Program are available from the MatSE department office.

Admission to the Program

Current Illinois MatSE students with Junior standing and with an overall grade point average (GPA) of at least 3.00 (A = 4.00) may apply for provisional admission to the program. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, in order to remain in the program.
Upon successful completion of the B.S. component, with grades of B or better in the advanced area coursework, and an overall GPA of at least 3.00 in all graduate coursework, students:

• will be officially admitted into the Graduate College
• will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester
• may apply or be considered for graduate teaching assistantships and tuition waivers, as well as fellowships and scholarships (in MatSE only) available to graduate students in MatSE.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are not eligible to continue in the Ph.D. program in MatSE. Students wishing to pursue a Ph.D. must apply separately for admission to that program.

Course Requirements

B.S. Component (120 hours)^1

• Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours
• The reduction of 8 credit hours includes:
  • 5 hours of free electives.
  • 3 hours of the area specialty course in a different area (the latter becomes part of M.Eng. program requirements)
• At least one semester (or 2 summers) devoted to an industrial internship or co-op.2
• It is strongly suggested that the student take 2 courses in some aspect of business, economics, environmental studies, labor and industrial relations, technology entrepreneurship or technology and management as the elective component of their Liberal Education requirements. Partial or complete fulfillment of the Technology and Management or Business minor or the Technology Commercialization Certificate is recommended for those admitted by application if available hours permit. The students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department), with additional hours recommended. It is noted that since receipt of the B.S. degree is delayed until the requirements for the M.Eng are completed, the student has the opportunity to complete the undergraduate minors while taking the M.Eng. requirements.
• Overall GPA of 3.00 maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.Eng. Component (minimum 36 additional hours of coursework)

• 36 hours course work, including at least 19 graduate hours of MatSE courses with 12 hours credit overall in 500-level courses. The course work shall include MSE 585 (two semesters or equivalent, 30 weeks total, of industrial internships or co-ops; one of the semesters can be during the B.S. program)^3, 6 hours of 400- or 500-level area specialty courses in the student’s area, 3 hours of 400- or 500-level MSE courses from a different area, 2 hours of MSE 595, and 2 hours of MSE 529 or MSE 559. Ten hours of courses in one or more of the areas of business or technology management, and entrepreneurship are required to be included in the overall program. Completion of the requirements for the various Certificates granted by the Technology Entrepreneur Center is recommended
• MSE 492; credit does not count toward degree.

Withdrawal

Students who do not complete all of the 5-year B.S.-M.Eng. degree program requirements may request, by petition to the Graduate College after obtaining approval by their advisor, the department, and the Associate Dean for Undergraduate Programs in the College of Engineering, to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. degree in MatSE. Students reverting to the traditional B.S. degree program must satisfy all degree requirements, including completion of the required “area specialty course(s) in a different area” and the stated credit hour requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Materials Science and Engineering (http://www.matse.illinois.edu/academics/undergraduate/combined-degree-program.html)

The five-year B.S.-M.S. program in Materials Science and Engineering combines two degrees: a B.S. in MatSE with an M.S. (with thesis) in MatSE. Current Illinois MatSE students enrolled in the College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-Year B.S.-M.S. degree program have been successfully completed but will be permitted to participate in the Graduation Ceremonies with their class if they have completed 128 hours.

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, two months before the end of the Fall semester of the student’s Junior year. Application and letter of reference forms for the B.S.-M.S. Program are available from the MatSE department office.
Admission to the Program
Current Illinois MatSE students with Junior standing with an overall grade point average (GPA) of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.50 through completion of the B.S. component of the program, in order to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
• must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit in advanced level area courses, and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area course work, and an overall GPA of at least 3.00 in all graduate course work, students:

• will be officially admitted into the Graduate College
• will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• may apply or be considered for graduate research or teaching assistantships, and tuition waivers, as well as fellowships and scholarships available to graduate students.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are eligible to apply for the Ph.D. program in MatSE near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master’s degree.

Course Requirements

B.S. component (120 hours including 3 advanced (graduate level) area courses for at least 9 hours):

• Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours; except MSE 395 is dropped (i.e., 1 hour)
• Two of the required remaining four area specialty courses are to be taken at the graduate level (i.e., the students will be held to the course and grading requirements of a graduate student). The third advanced level course can be either in the specialty area or in another specialty area.
• The reduction of 8 credit hours includes:
  • 5 hours of free electives.
  • 3 hours of the area specialty course in a different area (becomes part of M.S. program requirements) for all concentrations.
• Senior thesis is to be taken in lieu of MSE 395 and one area specialty course (5 hours total recommended, with 1 hour being the remaining hour of free elective).
• An overall GPA of 3.50 must be maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.S. component (minimum 24 additional hours of course work plus 8 hours of MSE 599):

• Same overall requirements as for traditional M.S. with thesis.
• At least one 400-500 level course (for the B.S. or M.S.) will be a MatSE area specialty course from a different area.
• Complete a M.S. thesis according to MatSE department requirements; research for the senior thesis will often serve as a beginning for the M.S. thesis but the student may change thesis advisors.

Withdrawal

Students that do not complete all of the 5-year B.S.-M.S. degree program requirements may request, by petition to the Graduate College with approval of their advisor, the department, and the Associate Dean for Undergraduate Programs of the College of Engineering, to have graduate hours earned, including the three advanced area courses, converted to undergraduate hours and applied toward a traditional B.S. in MatSE degree. Students reverting back to the traditional B.S. in MatSE degree program must earn a minimum of 128 hours and satisfy all traditional degree requirements, including MSE 395 and the area specialty course(s) in a different area, to receive the B.S. degree in MatSE. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

1 The B.S. degree from the B.S.-M.S. Program is not ABET accredited.
2 At present, students in their fourth or fifth year considering withdrawing from the M.S. portion of the program should register for MSE 395 in the Spring semester; the resulting B.S. degree would then be ABET accredited. It is anticipated that, in the near future, senior thesis will be accepted by ABET as an appropriate “design experience,” when approved, and if accepted in terms of satisfying the objectives of MSE 395 by the MSE 395 instructor, it can be used for the MSE 395 design project.

Mechanical Engineering

The department offers a combined Bachelor of Science and Master of Science program. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares with 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program, except that the following requirements are waived:

• one MechSE elective — 3 hours
• one Technical elective — 3 hours
• Free electives — 2 hours

In addition, independent study project courses may not be used as MechSE or technical electives in the B.S. portion of the combined program.

The M.S. portion of the program requires completion of 32 hours of credit. This consists of a minimum of 24 hours of formal graded course work at the 400 level or above and eight hours of thesis research credit.
Additionally, the formal graded course work must include eight hours at the 500 level and eight hours in the major area of study (ME) with a minimum of four of those hours at the 500 level. A Master’s thesis is required, consisting of at least four and no more than eight hours of ME 599 credit. Students must also register for the graduate seminar course (ME 590) every semester following formal admission into the graduate portion of the program and complete MSE 492. The seminar and lab safety credits will not count toward the degree. The non-thesis option is not available to students in this combined program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission
Formal admission to the combined program normally occurs late in the junior year or early in the senior year and is by invitation only with the following provisions:

- Students must have a minimum Illinois GPA of 3.80 or higher, and have earned 96 credit hours toward the B.S.M.E. requirements at the time they are invited to apply (60 of these hours must have been earned at Illinois).
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ME Graduate Programs Office, Room 164 MEB. There are two annual application deadlines: October 15 and March 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee ($60 US, $75 International) for these students.
- Each student is required to identify a graduate advisor and provide a tentative thesis topic at the time of application to the program.

Withdrawal
Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study
Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department’s qualifying examination no later than the second calendar semester after graduation from the combined program.

- Aerospace Engineering (p. 97)
- Agricultural and Biological Engineering (p. 100)
- Bioengineering (p. 104)
- Civil Engineering (p. 107)
- Computer Engineering (p. 112)
- Computer Science (p. 110)
- Electrical Engineering (p. 115)
- Engineering Mechanics (p. 127)
- Engineering Physics (p. 136)
- General Engineering (p. 117)
- Industrial Engineering (p. 120)
- Materials Science and Engineering (p. 123)
- Mechanical Engineering (p. 130)
- Nuclear, Plasma and Radiological Engineering (p. 132)

Minors Offered by the College of Engineering
Students are generally eligible to take many campus minors (http://provost.illinois.edu/programs/advising/minors.html). Several of those administered by the College of Engineering are described in this section. To obtain recognition for the College of Engineering minors, students must register in the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

- Bioengineering (p. 139)
- Computational Science and Engineering (p. 142)
- Computer Science (p. 139)
- Electrical and Computer Engineering (p. 139)
- International Minor in Engineering (p. 140)
- Materials Science and Engineering (p. 140)
- Physics Minor (p. 141)

Aerospace Engineering

For the Degree of Bachelor of Science in Aerospace Engineering

The Aerospace Engineering curriculum provides a strong fundamental background in engineering, mathematics, and science, along with the ability to apply this fundamental knowledge to the analysis and design of future aircraft and spacecraft. It also prepares students for lifelong learning and the attainment of their career goals in the field of aerospace engineering and in a wide range of other areas. The concepts of system design are introduced early in the curriculum and culminate in the yearlong senior capstone design experience (AE 442, AE 443), in which students work in teams to respond to a design challenge from industry, government, or a professional engineering society. A total of 18 hours of technical and free electives allows the student to pursue an individualized program of study.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours: 58

1. *STAT 400 may be substituted.*

Technical Electives

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of aerospace engineering.

Selected from the departmentally approved list of Technical Electives, satisfying these distribution requirements:

Chosen from AE Technical Electives: 6
Chosen from AE Technical Electives or Non-AE Technical Electives: 6

Total Hours: 12

1. *List of Technical Electives (http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives).*

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list: 6
Electives from the campus General Education Humanities and the Arts list.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition (satisfied by completing the sequence AE 442 + AE 443 in the Aerospace Engineering Technical Core)

Total Hours 4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Technical electives\(^7\) 9
 Semester Hours 14
 Total Hours: 128

1. Entering freshmen are expected to enroll in AE 100 in the fall of the first year. Section topics vary each term; consult the Class Schedule or departmental Web site for topics offered. This optional course may be used to help meet free elective requirements.

2. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

4. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a liberal education elective.

5. STAT 400 may be substituted.

6. Sequence satisfies the General Education Advanced Composition requirement.

7. Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives (http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives), satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

### Curriculum in Agricultural and Biological Engineering

[abe.illinois.edu/undergrad_programs](http://www.abe.illinois.edu/undergrad_programs)

Fax: (217) 244-0323

E-mail: abe@illinois.edu

### For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

### Concentrations

The agricultural and biological engineering program provides two concentrations: Agricultural Engineering and Biological Engineering. Each concentration has specific areas of specialization related to career interest.

### Agricultural Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Renewable Energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering

### Biological Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
• Ecological Engineering
• Food and Bioprocess Engineering
• Nanoscale Biological Engineering

Suggested Sequence

The schedule that follows for each concentration is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. Refer to the appropriate sequence below for each concentration.

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.
2. MATH 220—Calculus may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4. One elective course must satisfy the General Education Advanced Composition requirement.
5. The extra hour of credit for this course may be used to help meet free elective requirements.
6a. Students in the Agricultural Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-BioNatSciElectives).
6b. Students in the Biological Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-BioNatSciElectives).
7a. Students in the Agricultural Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives), and the remainder selected from the approved list of Other Technical Electives – Group A (http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives/#tag1).
7b. Students in the Biological Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives), and the remainder selected from the approved list of Other Technical Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives).
8. Satisfies the General Education Advanced Composition requirement.
9. May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

http://bioengineering.illinois.edu

**For the Degree of Bachelor of Science in Bioengineering**

Bioengineers use tools from biology, chemistry, physics and math to solve engineering problems that arise in biological systems related to biomaterials, biomechanics and prosthetics, tissue engineering, molecular modeling, imaging, bioinformatics, nanomedicine, synthetic biology, and drug delivery. The goal of research and education in bioengineering is to advance fundamental understanding of how human biological systems function, and to develop effective technology-based solutions to the wide spectrum of societal needs in human development and disease diagnosis, treatment, and prevention.

The Bioengineering department (BIOE) aims to graduate students who:

- Enter into industry jobs in prominent companies as engineers who work in the areas of:
  - Medical device design
  - Manufacturing
  - Quality control
  - Marketing
  - And work toward the advancement of medicine
- Pursue graduate studies in bioengineering-related fields such as:
  - Imaging and Sensing
  - Therapeutics
  - Tissue Engineering
  - Computational and Systems Biology

Information listed in this catalog is current as of 04/2016
• Biomechanics
• Broaden their education by attending professional school in areas of medicine, law, and business
• Maintain professional development through societal memberships and industry workshops

The curriculum includes integration of principles of biology and engineering in coursework such as biomechanics, modeling of human physiology, bioinstrumentation, and cell and tissue engineering. The curriculum is project-based and has a strong emphasis on systems-thinking as an approach to large-scale bioengineering problems. During the first and second years, students take fundamental courses introducing them to bioengineering as a field and introducing clinically relevant projects as learning experiences. The program also features hands-on laboratory courses for real-world experience throughout the curriculum. The final two years allow students to focus on a particular track of Bioengineering for further study. A year-long senior capstone design course provides experience in applying engineering fundamentals to biological problems submitted by faculty, clinicians, and industrial firms.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Bio 120 Introduction to Bioengineering 1

Total Hours 54

1 May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Track Electives
Students must complete 15 hours of study which show coherence, focus, and purpose within a bioengineering context. Students may choose from among the following pre-approved tracks:

• Biomechanics
• Cell and Tissue Engineering
• Computational and Systems Biology
• Imaging and Sensing
• Therapeutics Engineering

Alternately a student may devise a special track and set of courses which must be approved by the Bioengineering Department. In either case, average hours in required courses may be counted toward the 15-hour minimum.

Track electives selected from a departmentally approved list of track elective courses. 1

1 List of track elective courses. (http://bioengineering.illinois.edu/undergraduate-programs/track-electives)

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding

Information listed in this catalog is current as of 04/2016
of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list. 6
Electives from the campus General Education Humanities and the Arts list. 6
Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6
Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

**Composition**

These courses teach fundamentals of expository writing.

RHET 105  Writing and Research 4
Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours 4

**Free Electives**

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/FreeElectives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

1 College of Engineering Advising Website. (https://wiki.cites.illinois.edu/wiki/display/ugadvise/FreeElectives?src=search)

**Suggested Sequence**

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Civil and Environmental Engineering

Benito Marinas
1114 Newmark Civil Engineering Laboratory, 205 North Mathews Avenue, Urbana
PH: (217) 333-8038
http://cee.illinois.edu

For the Degree of Bachelor of Science in Civil Engineering

Civil engineering is a profession that applies the basic principles of science in conjunction with mathematical and computational tools to solve problems associated with developing and sustaining civilized life on our planet. Civil engineering works are generally one-of-a-kind projects; they are often grand in scale; and they usually require cooperation among professionals of many different disciplines. The completion of a civil engineering project involves the solution of technical problems in which uncertainty of information and myriad non-technical factors often play a significant role. Some of the most common examples of civil engineering works include bridges, buildings, dams, airports, highways, tunnels, and water distribution systems. Civil engineers are concerned with flood control, landslides, air and water pollution, and the design of facilities to withstand earthquakes and other natural hazards, in addition to protecting our environment for a sustainable future.

The civil engineering program comprises seven main areas (construction engineering and management, construction materials engineering, environmental engineering, geotechnical engineering, environmental hydrology and hydraulics, structural engineering, and transportation engineering) and three cross-cutting programs (sustainable and resilient infrastructure systems; energy, water, and environmental sustainability; and societal risk management). Although each area has its own special body of knowledge and engineering tools, they all rely on the same fundamental core principles. Civil engineering projects often draw expertise from many of these areas and programs.

CEE’s Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse areas that include structural, transportation, geotechnical, materials, environmental, and hydrologic engineering; construction management; or other related or emerging fields.
2. Pursue graduate education and research at major research universities in civil and environmental engineering, and related fields.
3. Pursue professional licensure.
4. Advance to leadership positions in the profession.
5. Engage in continued learning through professional development.
6. Participate in and contribute to professional societies and community services.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student’s academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Civil Engineering Technical Electives

This course work is designed to give each student a broad background in the areas of civil engineering through the core courses and to allow each student to develop a focused program through advanced technical electives in chosen primary and secondary fields. There are seven areas of study which include:

- Construction Engineering and Management
- Construction Materials Engineering
- Environmental Engineering
- Environmental Hydrology and Hydraulic Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering

In addition to the areas of study, three cross-cutting programs can be chosen by students. They include:

- Sustainable and Resilient Infrastructure Systems
- Energy-Water-Environment Sustainability
- Societal Risk Management

The fundamental principles of civil engineering design and the behavior of civil engineering systems are emphasized throughout the course work. The specific choices of courses in this category are made through the submission of the Plan of Study, which is subject to approval by the faculty Program Review Committee.

Civil engineering technical courses, selected as follows, to at least include:

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.
ECON 102  Microeconomic Principles (Recommended)  3
or ECON 103  Macroeconomic Principles

Electives from the campus General Education Social and Behavioral Sciences list.  3

Electives from the campus General Education Humanities and the Arts list.  6

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.  6

Total Hours  18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105  Writing and Research  4
BTW 261  Principles Tech Comm (satisfies the Advanced Composition requirement)  3

Total Hours  7

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+E Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Computer Science

http://cs.illinois.edu

Head of Department: Rob A. Rutenbar
Department Office: 2232 Siebel Center, 201 N. Goodwin Avenue, Urbana, (217) 333-3373

For the Degree of Bachelor of Science in Computer Science

The computer science curriculum provides both a broad and deep knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework in areas of the student's choosing follows in the second two years, which include either a senior thesis or a senior project. Graduates may go on to graduate study or leading positions in industry.

A combined B.S.-M.S. Computer Science degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 81).

A Software Engineering Certificate (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-softengcert) is also available to all students in the computer science curriculum interested in a career in software engineering. It provides the depth and breadth necessary for satisfying possible future software engineering accreditation requirements.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/TechnicalGPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours 29

\(^1\) The extra hour of credit for this course may be used to help meet free elective requirements.

Technical Electives

These courses stress the rigorous analysis and design principles practiced in major subdisciplines of computer science. Students select eight courses, at least six of what must be advanced CS courses. Three courses must be selected from one area of CS.

Technical electives to be chosen from departmentally approved list. Refer to department website.

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list. 6

Electives from the campus General Education Humanities and the Arts list. 6

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition. May be satisfied by completing one of the following: CS 499; the sequence CS 427 + CS 429; the sequence CS 492 + CS 493; or a course taken in either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours 4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering Advising Website, so that there are at least 128 credit hours earned toward the degree. (19 if a 27 credit-hour Technical Track is chosen; 22 if a 24 credit-hour Technical Track is chosen.)\(^1\)

**Computer Engineering**

**For the Degree of Bachelor of Science in Computer Engineering**

Computer Engineering at Illinois focuses on the development of vital computing technologies, ranging from chips to computers to networks to programming tools to key algorithms for building exciting applications. Fundamentally, Computer Engineering addresses the problem of building scalable, trustworthy computing systems, and the faculty’s interests span a broad spectrum of issues pertinent to this theme. Computer engineering has taken the lead in revolutionizing many science and engineering disciplines with parallel computing, from chips to clouds to planet-scale critical infrastructures, and has defined new standards of security, privacy, and dependability for systems ranging from small circuits to the electric power grids of many nations. Students need a broad and sound set of mathematical and computing skills, and are well-served by a flexible curriculum that enables them to pursue topics of interest among the many subdisciplines in computing.

The computer engineering core curriculum focuses on fundamental computer engineering knowledge: circuits, systems, electromagnetics, computer systems, electronics for information processing and communication, and computer science. The rich set of ECE elective courses permits students to concentrate in any sub-discipline of computer engineering including: hardware systems; cyberphysical systems; foundations and theory; software and languages; algorithms and mathematical tools; trust, reliability, security; networking, mobile and distributed computing; big data analytics and systems; artificial intelligence, robotics, cybernetics.
Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours: 128

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour.
3. Liberal education electives ([https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives](https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives)) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements. MATH 213 may be substituted.
4. All are to be chosen from the departmentally approved List of Technical Electives ([http://www.ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06.asp](http://www.ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06.asp)). STAT 410 may be substituted.
Electrical Engineering

For the Degree of Bachelor of Science in Electrical Engineering

Electrical engineering is a multifaceted discipline that over the last century has produced an astounding progression of technological innovations that have shaped virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing, communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all of the important areas of modern electrical engineering. These range from power and energy systems to electronic, opto-electronic, and photonic devices; integrated circuits; telecommunications and remote sensing; control systems; robotics; signal processing; and bio-medical instrumentation and sensing.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s undergraduate advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

</tbody>
</table>

Advanced Composition (satisfied by completing ECE 445 in the Electrical Engineering Technical Core). May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours 4

### Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors. At least seven hours must be taken for a grade.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

### Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Information listed in this catalog is current as of 04/2016
General Engineering

For the Degree of Bachelor of Science in General Engineering

General Engineering (GE) is a comprehensive, interdisciplinary program that brings together basic sciences, engineering sciences, and engineering design. The GE curriculum provides a strong technical background in design, control, and manufacturing, as well as in optimizing systems containing diverse subsystems. Design experience and project management are emphasized and integrated across the core curriculum with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment taking into consideration economic constraints.

Design experience and project management are emphasized and integrated across the core with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for General Engineering undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

**Composition**
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the General Engineering Technical Core) 4

Total Hours 4

**Free Electives**
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

**Secondary Field Options**
Secondary field options are of two types: preapproved and customized. Preapproved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by pre-approved fields. To do this, a suitable title and all the courses must be...
petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student’s goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

**Preapproved Secondary Fields**

Preapproved secondary fields are listed below. Approved courses for each are specified at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:

- CEE 202, IE 300, STAT 400
- CEE 201, IE 310
- MSE 406, CEE 300
- ECE 486, GE 320, ME 340

Students may petition to the department for inclusion of a course in the secondary fields listed below. The most likely classes to be accepted are non-permanent and experimental offerings relevant to the various fields. A current list of these may be found at the department's secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option).

- Automotive Engineering
- Bioengineering
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer Science
- Construction
- Control Systems
- Digital Prototyping
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Manufacturing Engineering
- Nondestructive Testing and Evaluation
- Operations Research
- Quality Control
- Rehabilitation Engineering
- Robotics
- Theoretical and Applied Mechanics

1 Students fulfilling the corresponding Campus Minor may simultaneously complete the requirements of this General Engineering secondary field option.

**Customized Secondary Fields**

Customized secondary fields differ from preapproved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

The following list contains examples of over sixty titles of customized secondary field options which have been approved. The complete list may be found at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). Additional titles beyond those listed may be proposed.

- A foreign language (several)
- An engineering discipline (several)
- Audio Engineering
- Economics
- Entrepreneurship
- Finance
- Fluid Dynamics
- International Business
- Mathematics
- Pre-Law
- Pre-Med
- Renewable Energy

**Suggested Sequence**

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

*Information listed in this catalog is current as of 04/2016*
Industrial Engineering

For the Degree of Bachelor of Science in Industrial Engineering

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from engineering, from governmental settings.

The technical portion of the industrial engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student’s first year is spent mastering the basics of science: math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. During their senior year, students broaden and deepen their knowledge with additional technical electives.

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101.

2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, highly recommended before the fourth semester. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4. Selected from the departmentally approved lists of Secondary Field Option Electives (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option/preapproved-secondary-field) or by petition to the department.

5. GE 494 and GE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a liberal education elective.

6. Combination satisfies the General Education Advanced Composition requirement.

7. Selected from the departmentally approved list of Design Electives (http://ise.illinois.edu/sites/default/files/documents/ISE%20Electives%202012%202013.pdf).

Information listed in this catalog is current as of 04/2016
courses. Finally, all students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

A combined B.S.-M.S. Industrial Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (http://catalog.illinois.edu/undergraduate/engineer).

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below. Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

Note: the TGPA rules for this curriculum are under review and if changed, will be reflected at the Web site indicated.

**Orientation and Professional Development**

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

**Track Option Electives**

These courses enable the student to tailor his or her studies to one's interests and career goals in the major subdisciplines of industrial engineering.

Track option electives. Courses selected from departmentally approved lists of Track Option Electives or by petition to the department. The current Track options include:

- Industrial Engineering Fundamentals (IEF)
- Operations Research (OR)
- Quality Engineering (QE)
- Supply Chain, Manufacturing and Logistics (SC&L)
- Economics and Finance (E&F)

**Technical Electives**

These courses augment and strengthen the rigorous analysis and design principles practiced in the major subdisciplines of industrial engineering.

Computer science elective selected from the departmentally approved list of Computer Science Electives. 3

IE technical electives selected from the departmentally approved list of IE Technical Electives. 6

Engineering Science technical elective chosen from the departmentally approved list of Engineering Science Electives. 3

**Total Hours** 15

**Liberal Education**

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

For the Degree of Bachelor of Science in Materials Science and Engineering

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. Seniors focus on application areas of MatSE (e.g., biomaterials, ceramics, metals, polymers, and electronic materials), which provide them with the detailed knowledge to be immediately useful to corporations or to provide an introduction to graduate study.

A combined B.S.-M.S. Materials Science and Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 81).

Areas of Concentration

The MatSE program provides five standard areas of concentration as well as the option to design a custom concentration of interest to the student. Students are encouraged to take technical electives outside of the department in related disciplines of interest to them and of relevance to their career goals. The five standard areas of concentration are:

- Biomaterials: A relatively new focus area teaching the science and engineering of materials for use in biological applications, particularly in the human body. This concentration is based on basic and intermediate chemistry along with basic and intermediate biology concepts, with relatively less use of physics topics. This focus area includes a subset of the standard junior year courses and requires additional chemistry and biology in the junior year.
- Ceramics: Studies the science and engineering of ceramic materials, including alloy design, composites, synthesis, and processing methods. This concentration makes significant use of concepts from both basic physics and basic chemistry.
- Electronic Materials: Describes the design and engineering of materials primarily for the microelectronics industries. Topics span the ceramics, metals, and polymers areas. Concepts from basic and intermediate physics are used along with basic chemistry.

### Materials Science and Engineering

David G. Cahill

___________________

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvice/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, highly recommended before the fourth semester. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Cours

1. Selected from the departmental list of approved area technical electives ([http://www.matse.illinois.edu/academics/undergraduate/specializations.html#approved](http://www.matse.illinois.edu/academics/undergraduate/specializations.html#approved)) for areas of concentration.

### Summary of Topics Courses for Standard Areas of Concentration

Each area of concentration requires at least one course covering each of the topics processing, design, and characterization (senior lab). For the five standard areas of concentration in the MatSE curriculum outlined above, the relevant courses are categorized in the following table.

<table>
<thead>
<tr>
<th>Area of Concentration</th>
<th>Processing</th>
<th>Design</th>
<th>Characterization (Senior Lab)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biomaterials</td>

</tr>
<tr>
<td>Polymers</td>
<td>MSE 453*</td>
<td>MSE 453*</td>
<td>MSE 452</td>
</tr>
</tbody>
</table>

* same course counts as both topics
Customized Concentration

Students wishing to pursue an area of concentration other than the ones described above should consult with the chief advisor of the MatSE department. A Customized Concentration (e.g., composites, bio-based materials, materials for renewable energy or sustainability, etc) must include a total of 24 credit hours: 15 hours of appropriate “area specialty courses”, 3 hours from a different specialty area; and 6 hours of electives selected from the list of approved technical electives (http://www.matse.illinois.edu/academics/undergraduate/curriculum/technical.html) established by the department. In the 15 hours of “area specialty courses” there must be a course identified for each of the topic categories in the table immediately above. The other courses may be suitable electives pertaining to the area of study. Customized Concentrations require the approval of the department and will be identified only as Customized Concentration on the transcript.

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first two years of the Suggested Sequence is the same for all MatSE students. The third and fourth years vary with the Area of Concentration chosen. Refer to the appropriate third and fourth year sequence.

For the Degree of Bachelor of Science in Engineering Mechanics

Engineering mechanics is the discipline devoted to the solution of mechanics problems through integrated application of mathematical, scientific, and engineering principles. Special emphasis is placed on the physical principles underlying modern engineering design.

The program derives its strength from rigorous treatments of statics, dynamics, solid mechanics, fluid mechanics, and mechanics of materials. These topics form the basis of all the mechanical sciences and have wide applicability in modern engineering. Students in engineering mechanics also develop a strong background in mathematics, physics, and chemistry, while specializing in one of several secondary fields within mechanics, such as experimental mechanics.

Information listed in this catalog is current as of 04/2016
Special emphasis is placed on advanced dynamics, continuum mechanics, and the rapidly emerging field of computational mechanics. Laboratory experiments in fluid mechanics and mechanics of materials complement an integrated design sequence, starting in the freshman year, which culminates in a team-based design project in one of the professional engineering disciplines, such as aerospace, civil, or mechanical engineering. Students also have the opportunity for independent, creative work in a one-on-one or small group environment under the supervision of a faculty member.

## Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

### Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

### Secondary Field Option Electives

This component of the curriculum enables the student to specialize further by electing a secondary field, a coherent group of technical courses in mechanics and closely related subjects. The current secondary fields are:

- Biomechanics
- Computational Mechanics
- Engineering Science and Applied Mathematics
- Experimental Mechanics
- Fluid Mechanics
- Mechanics of Materials
- Solid Mechanics

Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for them are indicated on the Engineering Mechanics Secondary Field Webpage (http://mechanical.illinois.edu/undergraduate/engineering-mechanics/em-secondary-fields). To add flexibility to the program and accommodate particular interests, the student may petition to substitute appropriate courses, including 500-level courses if the student has the adequate preparation, for any of the secondary field elective courses. Without petition, a student may select any one course listed as required in one of the secondary field options to satisfy elective course credits in a chosen secondary field.

Secondary field electives selected from departmentally approved courses for Secondary Field Options: 12

### Senior Design Elective

### Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+E Electives?src=search) develop students'...
understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list.

Electives from the campus General Education Humanities and the Arts list.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition (satisfied by completing TAM 324 in the Engineering Mechanics Technical Core)

Total Hours 4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering Advising Website, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Mechanical Engineering may be the most diverse of the engineering fields, embracing many subfields and affecting all aspects of our lives. Mechanical engineers work on new machines, products, and processes that hold the promise of better lives for all of us. They are concerned with both technological and economic aspects in the design, development, and use of their products. Today, one of the challenges is to design efficient, low-cost machines and processes that use the fewest possible natural resources to improve the lives of people throughout the world.

The technical portion of the mechanical engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student’s first year is spent mastering the basics of science: math, chemistry, and physics. Building on this base, in the second year students begin to take fundamental engineering courses such as statics, dynamics, basic circuits and electronics, thermodynamics, and strength of materials. By the third year, students are taking specialized mechanical engineering courses in the subfields of fluid mechanics, heat transfer, dynamic systems and controls, materials, mechanical design, and manufacturing. Finally, during the senior year, students have the opportunity to both broaden and deepen their knowledge of the field through technical elective courses. At the end of the curriculum, students take the capstone senior design course in which the knowledge and skills they have learned are applied to projects submitted to the department by industrial firms or by faculty members. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout the curriculum from the first year to the last year.

A combined B.S.-M.S. Mechanical Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 81).

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives?src=search). The alternative is ME 170.

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

</table>

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is ME 170.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives?src=search) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirement.

4. Science elective(s) — 4 hours required. Choose from CHEM 104 + CHEM 105, MCB 150, or PHYS 213 + PHYS 214. If MCB 150 is taken, then MCB 151 is also recommended. Note that PHYS 213 and PHYS 214 will normally be taken in the fourth semester or later, since they have PHYS 211 and PHYS 212, respectively, as prerequisites, in addition to MATH 241.

6. Statistics elective—3 hours required. Choose either IE 300 or STAT 400.

7. Technical electives—6 hours required. Choose from a departmentally approved list of Technical Electives. (http://mechanical.illinois.edu/undergraduate/mechanical-engineering/me-tech-electives)

*Information listed in this catalog is current as of 04/2016*
For the Degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering

Nuclear, plasma, and radiological engineering is a branch of engineering that is concerned with the development and use of nuclear energy and radiation sources for a wide variety of applications in energy production, in materials processing and science, and for biomedical and industrial uses. Areas of interest include the continued safe and reliable application of fission reactors as central electric power plant thermal sources; plasma processing applications and the longer term development of fusion reactors for electric power generation; and the use of radiation sources in such areas as materials, biological systems, medical treatment, radiation instrumentation, environmental systems, and activation analysis.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to digital computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in bioengineering. To complete this concentration area, students should take certain chemistry and biology courses in the first two years of the curriculum.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100 Engineering Orientation 1 0
NPRe 100 Orientation to NPRE 1
Total Hours 1

1 External transfer students take ENG 300 instead.

Foundational Mathematics and Science
These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Professional Concentration Area Electives
The NPRE Professional Concentration Area requirement is fulfilled by taking certain required technical and some elective technical courses stressing the rigorous analysis and design principles practiced in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

Professional Concentration Area electives. See the Professional Concentration Areas section below.

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding

Information listed in this catalog is current as of 04/2016
of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102  Microeconomic Principles  3
or ECON 103  Macroeconomic Principles
Electives from the campus General Education Social and Behavioral Sciences list.  3
Electives from the campus General Education Humanities and the Arts list.  6
Electives either from a list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.  6
Total Hours  18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105  Writing and Research  4
Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation. Alternately, NPRE 481 should be considered, which may also be applied to the Professional Concentration elective hours.

Total Hours  4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvice/FreeElectives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Professional Concentration Areas
Students are expected to develop a solid background in one of the various subfields within a Professional Concentration Area which are defined below.

Power, Safety, and the Environment
TAM 335  Introductory Fluid Mechanics  4
or ME 310  Fundamentals of Fluid Dynamics
NPRE 421  Plasma and Fusion Science  3
NPRE 423  Plasma Laboratory  2
NPRE 429  Plasma Engineering  3
Technical electives selected from departmentally approved Plasma and Fusion Science and Engineering elective course work in one of the following subfields: Physical Science, Electrical Engineering, or Electronic Materials. The student's academic advisor must approve the chosen course set to insure that a strong program is achieved.  

Total Hours  25

Radiological, Medical and Instrumentation Applications
NPRE 435  Radiological Imaging  3
Select one from:
MCB 403  Cell & Membrane Physiology Lab  2
BIOE 415  Biomedical Instrumentation Lab
NPRE 444  Nuclear Analytical Methods Lab
Technical electives selected from departmentally approved Radiological, Medical and Instrumentation Applications elective course work in one of the following subfields: Biomolecular Engineering, Biomedical Engineering, and Radiation Detection and Analysis. The student's academic advisor must approve the chosen course set to ensure that a strong program is achieved.  

Total Hours  25

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

A minimum of 6 hours of departmentally approved NPRE Electives.

For the Degree of Bachelor of Science in Engineering Physics

The Engineering Physics curriculum is a flexible program that combines a firm foundation in physics and mathematics with the freedom to choose from a diverse range of technical options. The curriculum is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/TechnicalGPA+Requirements).
Flexible physics core electives. Choose three courses from a departmentally approved list with at least one being a lab course, PHYS 401, PHYS 402, PHYS 403, PHYS 404, or PHYS 406. The number of hours varies depending upon the courses chosen.  

1  Departmentally Approved List

Mathematics Elective
Mathematics elective, chosen from a departmentally approved list of Mathematics Electives.  

1  Approved list of Mathematics Electives

Technical/Professional Option Electives
Students may select from a list of preapproved options or design a custom option, subject to departmental approval. The current preapproved options, requiring 12-22 credit hours of course work, are:

- Acoustical Physics
- Astrophysics
- Atmospheric Science
- Biophysics
- Business
- Computational Physics
- Computer Engineering
- Energy/Sustainability
- Materials Science
- Nuclear Physics
- Optical Physics
- Law
- Professional Physics
- Solid State Electronics
- Pre-Med
- Pre-Law

The course work is selected in consultation with the student's advisor to address an intellectually coherent body of knowledge.

1  List of Technical/Professional Option Electives

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Eelectives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

<table>

#### First Semester

Information listed in this catalog is current as of 04/2016
Minor in Bioengineering

http://bioengineering.illinois.edu

Bioengineering is a broad, interdisciplinary field that brings together engineering, biology, and medicine to create new techniques, devices, and understanding of living systems to improve the quality of human life. Its practice ranges from the fundamental study of the behavior of biological materials at the molecular level to the design of medical devices to help the disabled.

Any of the existing engineering programs can provide a good foundation for work in bioengineering. However, the engineering undergraduate needs additional education in the biologically oriented sciences to obtain a strong background for bioengineering. With such a background, the student should be able to progress rapidly on the graduate level in any branch of bioengineering. In industry, the graduate will be competent to handle engineering tasks related to biology.

For students pursuing the Bioengineering Minor from non-engineering backgrounds, please note that upper level electives may have engineering courses as prerequisites and these, and any subsequent prerequisite courses, are required for anyone taking the course.

Students may fulfill the requirements for a minor in bioengineering by completing the following course sequence. Engineering students who are proficient in biology may waive MCB 150 as a prerequisite for courses in this minor.

BIOE 120 Introduction to Bioengineering 1
BIOE 414 Biomedical Instrumentation 3
or CHBE 472 Techniques in Biomolecular Eng
CHEM 232 Elementary Organic Chemistry I 3 OR 4
MCB 244 Human Anatomy & Physiology I 3
MCB 246 Human Anatomy & Physiology II 3
or MCB 250 Molecular Genetics 3
MCB 252 Cells, Tissues & Development 3
MCB 253 Exp Techniqs in Cellular Biol 2
Bioengineering Related Technical Elective 1 3
Total Hours 21

1 Courses to be selected from a list of departmentally approved list of 300- and 400-level Bioengineering Related Technical Electives (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students/#related%20courses).

For more information regarding the Bioengineering minor, visit the Bioengineering minor Web site (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students), contact the Bioengineering Department Office (1270 Digital Computer Laboratory, 217-333-1867, bioengineering@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Computer Science

This minor is offered by the Department of Computer Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except Computer Science and Computer Engineering majors.

The foundation upper-level courses in computer programming and software and in theory of computation are required. Three elective 200- and 300-level courses provide some specialization and depth and breadth of study. Specific requirements are listed below. Note that some courses have other prerequisites.

1 The following substitutions are routinely allowed: ECE 220 for CS 125; MATH 213 for CS 173; and ECE 391 for CS 241.

For more information regarding the CS minor, visit the CS minor Web site (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor), contact the Computer Science Academic Office (1210 Siebel Center, 217-333-4428, undergrad@cs.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Electrical and Computer Engineering

Electrical and computer engineering transforms our day-to-day lives through a multitude of innovative technologies and products. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

Circuits Requirement:
Select one of the following: 3-4
- ECE 110 Introduction to Electronics
- ECE 205 Elec & Electronic Circuits
- ECE 206 and Elec & Electronic Circuits Lab

Programming Requirement:
Select one of the following (with no particular preference): 3-4
- CS 101 Intro Computing: Engrg & Sci
- CS 125 Intro to Computer Science

A probability or statistics course chosen from an approved list. 3-4

Select one of the following options: 2 12
A. Electrical Engineering Option
Core requirement:
- ECE 210 Analog Signal Processing

Advanced Core Electives:
International Minor in Engineering

Many College of Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation. The requirements are:

- completion of all degree requirements in the student's selected engineering discipline;
- completion of foreign language studies in a language of the student's choice of geographical area (proficiency level will vary with the geographical area selected);
- completion of a minimum of 21 hours of cultural and language studies related to the geographical area of concentration; 9 hours must be other than language credit and include at least one 300- or 400-level course. These courses can be used as campus and college general education requirements. Courses taken on campus for the minor must be taken for grade;
- completion of a minimum five-week approved residence in the chosen country or geographic area, whether it be for work or study.

The student will be expected to select a specific geographical area for concentration, which will be identified in the designation of the minor; for example International Minor-Latin American studies. Course work selected for the minor must be approved by the International Programs in Engineering Office; a list of suggested courses is available.

International Programs in Engineering sponsors academic year, semester, and summer programs that include language and cultural courses and satisfy the residency requirement. With sufficient foreign language background before entering engineering, a student will normally be able to complete the degree and minor in four years. Those not having this background, or taking a year of study at a foreign institution, may take four and one-half to five years to complete their degrees.

For more information regarding the International Minor, visit the International Minor website (http://engineering.illinois.edu/ipeng/opportunities/international-minor-in-engineering.html), contact the Engineering Study Abroad Office (210 Engineering Hall, (217)-244-0054 (http://catalog.illinois.edu/undergraduate/engineer/international-minor-engineering/tel:(217)-244-0054), ipeng@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Materials Science and Engineering

Materials are the basis for all engineering and also are the basis for much of the research in various areas of science. The Minor in Materials Science and Engineering is designed to give students in other areas of engineering and science both a broad view of all materials as well as several courses in a particular area of materials, knowledge that will be of value whether the student pursues a career in industry, government, or academia.

The courses, listed below, have been selected to give an undergraduate student both a strong background in all types of materials as well as more detailed knowledge of a particular area of materials (e.g., ceramics, metals, polymers, electronic materials or biomaterials)

The following six courses are required:

<table>

<td></td>
</tr>
</tbody>
</table>

Total Hours 18

1 Other thermodynamics courses may be substituted upon petition.
2 Advanced List of Core Courses.
3 Approved List for Area Introductory Courses, Senior Lab Courses, and Advanced Area Courses.

For more information regarding the Materials Science and Engineering minor, visit the Materials Science and Engineering minor Web site (http://matse.illinois.edu/academics/matse_minor.html), contact the MatSE Department Office (201 MSEB, 217-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.
## Physics Minor

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

Total Hours: 21-25

For more information regarding the Physics minor, visit the Physics minor website, (http://physics.illinois.edu/undergrad/minor.asp) contact the Physics Undergraduate Programs Office (233 Loomis Laboratory of Physics, 217-333-4361, undergrad@physics.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

## Polymer Science and Engineering Minor

Polymer science and engineering is a broad, interdisciplinary field that brings together various aspects of chemistry, physics, and engineering for the understanding, development, and application of the materials science of polymers. Many of the existing engineering programs provide a good foundation for work in polymer science and engineering. However, the undergraduate student needs additional courses specifically dealing with the science and engineering of large molecules. With such a background, the student should be able to progress rapidly in industry or at the graduate level. In addition to those students specifically desiring a career in polymers, this minor also can be valuable to students interested in the development, design, and application of materials in general.

The courses listed below have been selected specifically to give an undergraduate student a strong background in polymer science and engineering. A minimum of eight courses is required, including 3 Core courses, one course each in thermodynamics, mechanical properties, and chemistry and two additional polymer-related courses, as listed below. Several of these the student would normally take to satisfy the requirements of the basic degree. The student should consult the Department of Materials Science and Engineering when formulating a plan of course work.

The following courses are required. Credit hours will exceed 25 if a Thermodynamics course-pair option is chosen.

### Core Course Work

</tr>
</tbody>
</table>

Polymer-Related Course Work: two courses chosen from an approved list.

Total Hours: 25-30

For more information, visit the Polymer Science and Engineering minor website (http://www.matse.illinois.edu/academics/undergraduate/curriculum/polymer.html), contact the MatSE Department Office (201 MSEB, (217)-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

## Minor in Technology and Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

### Required Courses Taken by Engineering Students Only (in order taken)

Information listed in this catalog is current as of 04/2016
Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, eBay, John Deere, and Motorola Solutions.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for example, professional branding, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student’s academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website (http://www.techmgmt.uiuc.edu) or contact the Technology & Management Program Office (470K Wohlers Hall, (217) 244-5752, techmgmt@illinois.edu).

#### Application Coursework/Computing Elective

- **OPTION 1**

  Three 400-level CSE courses; see list at http://cse.illinois.edu/courses

- **OPTION 2**

  Two 400-level CSE courses AND an independent study on a computational topic

1. An equivalent (or advanced) programming course may be used to satisfy this requirement.
2. Any advanced corresponding course from the above list of topics may be taken in lieu of an equivalent introductory course.
3. In order for an independent study to fulfill the minor requirement, the student must conduct the undergraduate research with one of the CSE affiliated faculty listed on the Computational Science and Engineering website: http://cse.illinois.edu/research/affiliates

The College of Fine and Applied Arts prepares men and women for professional work in architecture, art and design, dance, landscape architecture, music, theatre, and urban and regional planning. Freshmen and transfer students may apply for admission. In each curriculum specific basic courses, professional courses, and general education requirements must be completed in order to qualify for the specific baccalaureate degree offered.

Graduate degrees are offered in all areas of study through the Graduate College.

The College of Fine and Applied Arts offers introductory courses designed to increase aesthetic appreciation and development, and to portray the role of the arts in civilization for all students who are
attending the University of Illinois at Urbana-Champaign. Participation in
the many bands, choruses, and orchestras on campus, as well as private
instruction on most instruments and in voice, is available to students in
colleges by audition.

To serve the total academic community and all citizens in the state of
Illinois, the college features the arts in exhibitions, concerts, lectures,
performances, demonstrations, and conferences. Many outstanding
professionals and works in these fields are brought to the University
campus. All departments in the College of Fine and Applied Arts reserve
the right to retain, exhibit, and reproduce the works submitted by
students for credit in any course.

In addition to the teaching divisions, the College of Fine and Applied Arts
includes the Krannert Center for the Performing Arts, the Krannert Art
Museum and Kinkead Pavilion, Japan House, the Smart Energy Design
Assistance Center, and the Visual Resources Center.

**Special Facilities**

**Career Services Office**
The Career Services Office (https://faa.illinois.edu/current-students/
career-services) in the College of Fine and Applied Arts recognizes
the unique career needs of students in the visual and performing arts.
The office provides presentations and individual appointments to help
students explore all of their options. The office also serves as a resource
for concerned parents.

**Krannert Art Museum and Kinkead Pavilion**
Krannert Art Museum (http://www.kam.uiuc.edu) is an accredited general
art museum with eight permanent galleries, four temporary exhibition
galleries, and an open virtual-reality lab. Its outstanding permanent
collection places it among the top tier of university art museums in the
country. But the space is used as more than an art museum by students at
the University of Illinois. Here they can gather to hear improvised music
played by international artists, watch films, and participate in an open mic
hip-hop cafe. Come and experience a space that allows for simultaneous
interplay between more than one artistic form.

**Krannert Center for the Performing Arts**
The Krannert Center for the Performing Arts (http://
www.krannertcenter.illinois.edu) is a remarkable four-theatre performing
arts complex with spaces for instruction, rehearsal, and performance
in theatre, opera, dance, and music. The Foellinger Great Hall, seating
2,200, is designed for large-scale musical events. The Tryon Festival
Theatre, with 1,000 seats, is for opera, dance, and other musical stage
productions. The Colwell Playhouse seats 700 and is the home of
the Department of Theatre. The Studio Theatre, seating 150, is for
experimental productions. An outdoor amphitheater, rehearsal rooms,
ofices, dressing rooms, technical shops, and underground parking on
two levels for 650 cars complete this monumental facility.

**Japan House**
The study of Japanese culture began at the University of Illinois in 1900,
with the arrival of the first Japanese student. Throughout the last century,
the University’s role as a leader in Japanese studies began to take form.
A major theme of Japan House (http://japanhouse.art.illinois.edu/en)
is peace. The focus of Japan House is its three tea rooms. The grounds
also feature a Japanese tea garden, strolling garden, and Zen-style rock
garden.

**SEDAC – Smart Energy Design Assistance Center**
The Smart Energy Design Assistance Center (http://
smartenergy.illinois.edu/about-us.html) provides advice and analyses
enabling private and public facilities in the State of Illinois to increase
their economic viability through the efficient use of energy resources.

**University Music Performance Organizations**
The School of Music offers credit for all students enrolled in its many
performance organizations. These organizations include ensembles
in the nationally recognized Band Division: a Wind Symphony, two
Symphonic Bands, three Concert Bands, Basketball Band, Brass Band,
Clarinet Choir, and the world-famous Marching Illini. The Choral Division
offers singers the opportunity to perform in the Oratorio Society, Black
Chorus, Women’s Chorus, University Chorus, Men’s and Women’s Glee
Clubs, Concert Choir, and UI Chorale. The University Symphony and Illini
Symphony, three jazz bands, gamelan and other ethnomusicology
performance ensembles, and ensembles specializing in contemporary
music, chamber music, and early music, among others, satisfy student
interest both as performers and concertgoers.

A student in any college wishing to enroll in a performance organization
should contact the Office of Academic Affairs, Room 3076 Music Building
(phone: 217-244-2670) or the appropriate ensemble director to receive
further information and arrange for an audition.

**Visual Resources Center**
The Visual Resources Center facilitates access to images and other
visual formats, provides instruction on using a variety of educational
software, works with users on image related research projects, and
provides consultation related to digitization best practices. The digital
collection is available via ARTstor. 35mm and lantern slide collections are
available during business hours.

**Libraries**
Students in the college have at their disposal outstanding library
resources. In addition to the University Library, one of this country’s great
university collections, there are specialized libraries serving the needs of
specific fields. The Ricker Library of Architecture and Art contains more
than 49,000 books (with almost 50,000 additional publications in the
same fields located in the main University Library), 33,000 photographs,
and 9,400 clippings.

The City Planning and Landscape Architecture Library houses about
20,000 volumes of current interest, while more than 110,000 additional
related volumes in the Funk Library.

The Music and Performing Arts Library, located in the Music Building,
contains more than 765,000 items. These include introductory,
instructive, research, and reference materials including books, editions of
music, recordings, manuscripts, microfilm, and other materials.

library.illinois.edu (http://library.illinois.edu)

**Departments, Schools, and Curricula**
The College of Fine and Applied Arts consists of the Departments
of Dance, Landscape Architecture, Theatre, and Urban and Regional
Planning; the Schools of Architecture, Art and Design, and Music.
The specific functions of each department or school and the
undergraduate curricula are described on the following pages. Consult
the Undergraduate Handbook available on the college website for specific
academic policies and procedures for students and faculty in the college.

*Information listed in this catalog is current as of 04/2016*
Special Programs

Study Abroad
International study can be a life transforming experience. The college provides the opportunity for students to obtain campus credit for foreign study and/or travel for a summer session, one semester, or an academic year. Students in FAA have a range of opportunities for study abroad. They can pick from programs developed specifically for students in their major (e.g., senior year abroad in Barcelona for Architecture students) or from the many programs available through the Study Abroad Office (http://www.studyabroad.illinois.edu) which serves the entire university population.

Prior to departure students are required to submit a study plan for review by their advisor and the college. Students with approved study plans retain their status as UI students and may continue their student health insurance while abroad. Participation in an approved UI program also counts as time in residence at the University.

The Study Abroad Office also provides information on financial aid specifically for study away from campus. The office is located in the International Studies Building, 910 S. Fifth St., Champaign, IL.

Graduation Honors
The College honors superior students honors at graduation. To be eligible, students must have completed a minimum of four semesters of work and 65 hours of credit in residence at the Urbana-Champaign campus. More information on specifics may be found on the College website.

Dean’s List
Each semester students are recognized by the College for academic excellence through the Dean’s List. Eligible students must successfully complete at least 14 academic hours, taken for a letter grade (A through F), and earn a grade-point average that places them in the top 20 percent (approximately) of the College. Students with grades that are excused or deferred are not considered for the Dean’s List until letter grades have been submitted for those courses. The GPA level necessary to be placed on the Dean’s List is revised annually and is posted on the College website.

James Scholar Honors Program
The James Scholars Program in the College of Fine and Applied Arts focuses on developing Socially Engaged Artists by offering a series of required courses that provide progressive experiences in community engagement. James Scholars have opportunities to develop research projects within the local communities, to apply for funding to support their research, and to participate in symposia presenting their research to the campus and the general public. Detailed information on admission and requirements are available on the College website.

Requirements

Admission
All incoming students hoping to enroll in the College of Fine and Applied Arts as undergraduates must first complete the application for admission available from the university’s Office of Undergraduate Admissions. Several programs within the college (majors in Art, Dance, Music and Theatre) require a portfolio, audition and/or interview as part of the admissions process. All application materials must be received before an admission decision can be made.

Graduation
Students who meet the general University requirements with reference to registration, residence, scholarship, fees, and general education requirements, and who maintain the minimum grade-point average required in their degree program, receive degrees appropriate to the curriculum completed. Refer to the specific unit and curricular requirements listed in the following sections. In addition, students must complete the required senior courses in their major field of study in residence at the Urbana-Champaign campus.

General Education
The Campus Senate, the faculty General Education Board, and the colleges have developed campus wide common general education requirements. Students are advised that some general education requirements may be fulfilled by courses required in the major. All FAA curricula require students to meet the minimum campus general education requirements for graduation. Some programs require additional general education courses. See the individual programs of study for each curriculum.

At Illinois, we are an internationally recognized leader in educating future professionals and scholars in architecture and allied fields. We provide a robust technical and conceptual program that enables students to create and innovate. The depth and breadth of our curriculum enables students to become leaders in a range of disciplinary specialties. Our comprehensive programs prepare students to design and research in a rapidly changing global context from the macro to the micro scale through our bachelors, masters, and doctoral degrees.

School Office: 117 Architecture Building, Champaign, (217) 333-7720, lwaldrep@illinois.edu

The School of Architecture offers a four-year preprofessional curriculum leading to the Bachelor of Science in Architectural Studies (BSAS) degree as well as a minor in Architectural Studies. The BS in Architectural Studies degree provides an undergraduate academic education in architecture that can serve as a foundation for advanced professional education. The undergraduate curriculum offers an appropriate balance of basic professional studies in architectural design, architectural history, practice and technology, structures, and studies in the arts and sciences.

The following statement is from the National Architectural Accrediting Board (NAAB):

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree."

The University of Illinois at Urbana-Champaign, College of Fine and Applied Arts, School of Architecture offers the following NAAB-accredited degree programs:

Master of Architecture (Pre-professional undergraduate degrees + 62 graduate credits)
Master of Architecture (Undergraduate degree + 65 prerequisite credit hours + 54 graduate credits)

Next accreditation visit for all programs: 2023

The NAAB Conditions for Accreditation (including Student Performance Criteria) may be found on the NAAB Web site (http://www.naab.org).

Since 1967, the School of Architecture operates a full academic-year study abroad program in Barcelona, Spain, which is open to qualified students on a priority basis. Course offerings parallel those available to students on the Urbana-Champaign campus but stress the European context.

For the Degree of Bachelor of Science in Architectural Studies

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted. For the Bachelor of Science in Architectural Studies degree, a total of 127 semester hours are required.

1. See current University of Illinois General Education requirements. (https://courses.illinois.edu/gened/DEFAULT/DEFAULT)

   The General Education quantitative reasoning requirement I is satisfied by the required MATH 220 or MATH 221 course; the quantitative reasoning II requirement is satisfied by the MATH 231 or PHYS 101 course. Students considering a concentration in Building Structures or Structural Engineering should take MATH 231. The Advanced Composition requirement may be fulfilled by either a separate, approved Advanced Composition course or by an Advanced Composition course which also satisfies one of the general education distribution list requirements. If by the latter, electives would be taken to make up the credit deficiency.

   General Education foreign language requirement 0-12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language must take a foreign language placement test to determine the courses in which to enroll.

2. The Composition I requirement may be fulfilled by any of the following courses or course sequences (placement is determined by examination): ESL 111 and ESL 112; ESL 115, RHET 100, RHET 101, and RHET 102; or RHET 105; or CMN 111 and CMN 112.

3. For information about electives, see the Undergraduate Handbook at the FAA website (https://faa.illinois.edu). A maximum of nine hours may be taken as professional electives.

4. Architectural history: All students in the undergraduate program in architecture must fulfill the architectural history requirement: three courses in addition to ARCH 210. Select from: ARCH 222, ARCH 314, ARCH 402, ARCH 403, ARCH 407, ARCH 409, Section B (Barcelona only), ARCH 410, ARCH 411, ARCH 412, ARCH 413, ARCH 414, ARCH 415, ARCH 416, ARCH 417, or ARCH 418.

5. The UP 101 requirement can be fulfilled by substituting one of the following approved courses: ARCH 418, ARCH 468, GEOG 204, GEOG 210, and GEOG 483.

### Minor in Architectural Studies

The minor in Architectural Studies allows non-architecture undergraduate students to gain an overview of architecture by taking a series of required courses in architecture. This is the only undergraduate minor offered by the School of Architecture.

### Course Requirements

The architecture minor requires the successful completion of a minimum of 20 hours of architecture courses. Students entering the program with advanced credit for required courses must take courses from the Additional Courses list to attain the total hours needed for completion of the minor. All students in the minor must have at least 6 hours of 300- or 400-level courses.

### Prerequisites

Students must comply with the prerequisite requirements of courses to be taken under this program. Some of these requirements may be satisfied while in the program.
Admission

Admission to the minor will be processed by the School of Architecture Undergraduate Programs Office. Students may enter the Minor in Architectural Studies from sophomore year until such time that allows the completion of the minor before graduating in their major area of study.

Advising

Advising of students in the minor will be conducted by the advisors in the Undergraduate Programs Office of the School of Architecture.

Certification of Successful Completion

The Associate Dean for Undergraduate Academic Affairs in the College of Fine and Applied Arts (FAA) will certify successful completion of the minor.

Students must declare their intentions and be admitted to the program to pursue the Minor in Architectural Studies.

Art and Design, School of

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. All major’s first-year experience will include courses in drawing, 2D, 3D, and 4D practices. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission.

For the Degree of Bachelor of Fine Arts in Crafts

The curriculum in Crafts consists of a concentration in Metal. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened(DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened(DEFAULT/DEFAULT).

For the Degree Bachelor of Fine Arts in Art Education

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/programs).

Illinois law and Council on Teacher Education policy require that all candidates for a teacher education program pass the Illinois Certification Testing System Test of Basic Skills prior to admission. In order to be recommended for certification, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

For the Degree Bachelor of Fine Arts in the History of Art

The curriculum in the history of art requires 122 credit hours and offers a broad cultural education that unites academic and studio training. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

To be eligible for distinction, a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate advisor for further details

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
School Office: 140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

Students must complete a fourth-level college foreign language course or its equivalent for graduation with a B.F.A. in Art History.

Art History Requirements

Select three of the following (Credit will not be given for both ARTH 112 and ARTH 115):

| ARTH 111  Ancient to Medieval Art |
| ARTH 112  Renaissance to Modern Art |
| ARTH 113  Introduction to African Art |
| ARTH 114  Introduction to East Asian Art |
| ARTH 115  Art in a Global Context |
| ARTH 395  Junior Seminar in Art History |
| ARTH 495  Senior Seminar in Art History (offered fall semester only) |

One advanced Art History (200-400 level) course each from the following categories:

| African or East Asian Art |
| Art History before 1700 |
| Art History after 1700 |

Advanced Art History (course not used elsewhere)

Total Hours 30

Humanities Electives

Students are required to complete a minimum of 6 hours of electives in a single area from the following options: ancient and modern literatures, classics, anthropology, history, and philosophy. Students should select these courses with the FAA Art History Advisor’s consent.

Total Hours 6

Art and Design Requirements

| ARTF 101  Contemporary Issues in Art |
| ARTF 102  Drawing I |
| & ARTF 104  and Drawing II |

**Graphic Design**

Alan Mette  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://art.illinois.edu

**For the Degree Bachelor of Fine Arts in Graphic Design**

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, advanced interaction design, and the design of *Ninth Letter* (http://www.ninthletter.com), a nationally-distributed and award-winning literary arts journal.

Minor in Art and Design

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The Art and Design Minor provides students with the opportunity to integrate creative art and design practices with other academic or research pursuits. Students selecting the Art and Design Minor do not necessarily wish to pursue a career as a practicing artist or designer, but do want the chance to work creatively in the visual arts and design, and develop related skills. Students can choose to focus on one particular art form (e.g., photography) or a variety of different media (e.g., photography, typography, and ceramics).

Applicants for admission to the Minor in Art+Design should submit a personal essay explaining their interest in art and design to the Minor Advisor. A minimum cumulative GPA of 2.00 is required.

Contact: Guen Montgomery
Art and Design Minor Advisor
129 Art and Design Building, 333-0855, montgo@illinois.edu

Course Requirements

Students must meet the following course requirements for a total of 18 hours.

Students will be required to have passed one of the approved courses for non-majors (ART 102-105, 140) for entry into the Minor.

Distribution of Courses

A minimum of 2 courses from the academic course menu. 6
Academic courses include: ART 100, ART 140, ARTE 260, ARTE 475, ARTE 480, and any 100, 200, 300, or 400 level ARTH course. 1
A minimum of 3 courses from the studio course menu. Studio courses include: ART (except 100, 140), ARTD, ARTE (except 260, 475, 480), ARTF, and ARTS courses. 2
At least 1 additional course in either an academic or studio course menu.
A minimum of six hours must be completed at the 300 or 400 level.

Total Hours 18

1 At least one of these courses must be chosen from the following: ARTH 111, ARTH 112, ARTH 113, ARTH 114, ARTH 115, or ART 100.
2 High demand Industrial Design and Graphic Design courses are typically not available to minors.

Minor in Community-Based Art Education

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The Community-Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings. In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

Contact: Jennifer O’Connor
Community-Based Art Education Minor Advisor

#### For the Degree of Bachelor of Fine Arts in New Media

The curriculum in New Media requires 122 credit hours. Students are trained in the production and critique of works for art or design that explore forms and technologies identified as new or emerging. Students receive instruction in technical execution, formal composition, historical precedents and theoretical framing. Advanced course work produces both assigned and self-directed projects that utilize time-based, interactive, physically networked and performative media, and address emerging practices in art and design.

### Painting

Alan Mette

143 Art and Design Building, 408 East Peabody, Champaign

PH: (217) 333-0855

http://art.illinois.edu

#### For the Degree of Bachelor of Fine Arts in Painting

The curriculum in painting requires 122 credit hours and provides extensive training in preparation for professional practice as an artist.

The first year is devoted primarily to the study of design, composition, and the acquisition of both representational and abstract drawing skills. The second year concentrates on introducing the student to beginning painting skills and techniques with further studies in drawing and composition. The last two years are devoted to the development of individual creative expression in painting and other media.

When followed by a program leading to a degree of Master of Fine Arts in Painting, this curriculum is recommended as preparation for a career as an artist and as a teacher of painting and drawing and related subjects at the college level.

For the Degree of Bachelor of Fine Arts in Photography

The curriculum in photography requires 122 credit hours; its purpose is to encourage the study of photographic media for personal expression, to explore the social implications of pictures, and to develop the skills needed for careers in photography. General art requirements and electives provide a broad foundation in the visual arts, and photography courses provide a strong background in the history, theory, and practice of photography as art.

Information listed in this catalog is current as of 04/2016
to explore careers related to dance and/or create interdisciplinary performance works.

The performance component of the department is housed in the Krannert Center for the Performing Arts, utilizing the exceptional performing, production, and teaching resources of this world-class facility. Additional studio and classroom facilities and the faculty and administrative offices are housed in two adjacent buildings in close proximity to the Krannert Center. Four department concerts per year are produced in the theatres of the Krannert Center, including two concerts of student choreography. The resident lecture-demonstration company performs in community schools, and additional performing opportunities are provided in concerts presented in the dance studio/theatre, in operas and music performances, in University and community musicals, and in regional and national college dance festivals.

**Bachelor of Arts in Dance**

The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study three core areas in Dance: Technique, Creative Process, and Dance Academics. Students will identify at least one other key area of interest such as Theater, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Major, Minor or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will create a BA Capstone Project in their senior year as a synthesis of the studies within dance and another area of study.

Students pursuing a Dance degree at the University of Illinois must be admitted to the BFA in Dance (audition required). Once admitted, those desiring a broader education may choose to enroll in the BA in Dance, rather than continuing in the BFA.

A total of 120 hours is required for this degree.

- Bachelor of Arts in Dance (p. 155)

**Bachelor of Fine Arts in Dance**

The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screendance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required. Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

- Bachelor of Fine Arts in Dance (p. 156)

**Common Requirements**

In addition to the degree-specific requirements listed above, students in either the BA or the BFA in Dance are required to complete the courses in the table below.

| General Education Requirements |  
|--------------------------------|---|
| Composition I                  | 4-6 |
| Advanced Composition           | 3-4 |
| Humanities & the Arts          | 6-8 |
| Social & Behavioral Sciences   | 6-8 |
| Cultural Studies: Non-Western/U.S. Minority Culture(s) | 3-4 |
| Cultural Studies: Western/Comparative Culture(s) | 3-4 |
| Natural Sciences & Technology  | 6-10 |
| Quantitative Reasoning         | 6-9 |

The Language Requirement may be satisfied by:

- Successfully completing a third-semester college-level course in a language other than English;
- Successful completion, in high school, of the third year of a language other than English; or
- Demonstrating proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

**Foundation Courses**

| FAA 101 Arts at Illinois       | 2  |

  DANC 268  Music Theory for Dancers
Select one of the following (both meet a general education requirement):
  MUS 130  Intro to the Art of Music
  MUS 133  Introduction to World Music
Four hours of Dance Sciences courses:
  DANC 245  Introduction to Somatics
  DANC 345  Dance Anatomy and Kinesiology
Choose 3 hours from the following Dance Education courses:
  DANC 350  Creative Dance for Children
  DANC 450  Teaching Workshop
Current issues and topics
DANC 495  Senior Career Seminar  1
Senior Capstone Project
DANC 498  Senior Thesis Production  1 or 2
DANC 499  Senior Thesis Project  1 to 2

Professional Electives  6-9
Focused Electives, chosen in consultation with an advisor.
Additional courses in dance such as technique, choreography, performance, and non-categorized courses in dance, coursework in Music, Theater, or Art.

Electives as needed to reach a minimum of 130 hours  130
1 A maximum of 16 hours may be accumulated toward degree requirements in DANC 220, DANC 221, DANC 222, DANC 223, DANC 420, DANC 421, DANC 422, DANC 423.
2 A minimum of 6 - 9 hours must be taken in the area of professional electives, to bring total of Dance courses to 84 hours. It is strongly recommended that dance majors consider taking theatre/arts courses outside of the Department of Dance offerings.

Fax: (217) 244-4568

The Department of Landscape Architecture offers a four-plus-year undergraduate curriculum, leading to the professional degree of Bachelor of Landscape Architecture as well as a minor in Landscape Studies. The degree is accredited by the Landscape Architecture Accreditation Board (LAAB).

The curriculum is a balanced program of technical, design, and general education courses that prepare the student with the necessary skills for entry-level professional practice in private offices or public agencies. Program requirements include design studio courses and classes in construction, plants, history, and design communication. Following the third year, students complete a professional internship to further advance their knowledge of built landscapes and the practice of landscape architecture. The curriculum also includes a minimum of 12 hours of credit in supporting electives that are taken in related art and science courses. A total of 124 semester hours of credit are required for graduation.

Bachelor of Landscape Architecture
A student must have and maintain a minimum 2.00 cumulative grade point average and a 2.50 technical GPA based on grades in the following courses:
  LA 233  Foundation Design Studio  5
  LA 234  Site Design Studio  5
  LA 241  Landform Design & Construction  3
  LA 250  Environmental Site Analysis  3
  LA 280  Design Communications I  3

Information listed in this catalog is current as of 04/2016
University of Illinois transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.0 (A = 4.0). Transfer students from other institutions must have earned a GPA of at least 2.5 (A = 4.0). Prerequisite credits in composition and pre-calculus are required. Courses in physical geography and plant or environmental biology are highly recommended.

The department’s administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The sophomore studio is located in Mumford Hall.

Total Hours: 124

---

1. IB 103, IB 105 or UP 205 and GEOG 103/GEOL 100, GEOL 103 fulfill the natural sciences and technology general education requirements for this curriculum.

2. Foreign Language Requirement 0 - 12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.

4. A minimum of 12 credit hours of professionally related courses selected from the department’s recommended list of supporting electives is required, with a minimum of three credit hours in each of the categories of history, communications, techniques, and environment.

### Landscape Studies Minor

The Minor in Landscape Studies enables students to gain considerable knowledge of the ecological, social, cultural and historical factors that have shaped landscapes of the western and non-western world. Students interested in integrative studies of the natural, cultural and built environment, and those concerned with landscape as context for art and design, will develop a comprehensive theoretical framework for work in their major field of study.
Course Requirements
A minimum of 17 credit hours from the following three categories is required for completion of the minor. A minimum of 6 hours at the 300-level is required.

Studies of the Professions Engaged in Landscape Inquiry
LA 101  Introduction to Landscape Arch  2

Studies of the Professions Engaged in Landscape Inquiry
Select a minimum of 6 hours from the following:
  LA 212  Water and Society
  LA 250  Environmental Site Analysis
  LA 270  Behavioral Factors in Design
  LA 370  Environmental Sustainability

Study of Historical and Cultural Landscapes
Select a minimum of 9 hours from the following:
  LA 218  S Asian Cultural Landscapes
  LA 220  Exploring African Cities
  LA 222  Islamic Gardens & Architecture
  LA 242  Nature and American Culture
  LA 314  History of World Landscapes
  LA 315  History of Modern Landscape
  LA 390  Independent Study
  LA 427  Amer Vernacular Cultural Land
  LA 470  Social/Cultural Design Issues

Admission
University of Illinois students with a minimum GPA of 2.0 and completion of the campus Composition I requirement are eligible for admission. Applicants from other institutions must have a minimum GPA of 2.5. Students must declare their intentions and be admitted to the program by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Prerequisites
Students must comply with any prerequisite requirements of courses to be taken under this program.

Advising
Advising of students in the minor will be conducted by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Certification of Successful Completion
Completion of the Minor in Landscape Studies will be certified by the student’s home college office.

Music, School of
Professor Jeffrey Magee
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 244-2676
http://www.music.illinois.edu

2040 Music Building

1114 West Nevada Street
Urbana, IL 61801
(217) 333-2620

The School of Music occupies the Music Building, Smith Memorial Hall, Harding Band Building, Music Annex, and space in both the Krannert Center for the Performing Arts and the Levis Center (Robert E. Brown Center for World Music). These facilities include faculty studios, classrooms, and practice and rehearsal rooms; experimental electronic music, computer music, digital piano, two computer-assisted music instruction laboratories, and jazz multimedia practice rooms; and musical instruments, audio equipment, and several auditoriums used for concert, recital, opera, and musical theatre performances. The Music Library is the home of one of the largest collections of music items in America.

The faculty and students of the school present more than 1,000 concerts, recitals, and stage performances throughout the year, both on and off campus. In addition, visiting artists and scholars from throughout the world present master classes and lectures that complement the concert and academic offerings provided on the Urbana-Champaign campus. The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

The School offers two professional undergraduate degrees: the Bachelor of Music and the Bachelor of Music Education. Undergraduate students whose musical interests are in the broad historical, cultural, and theoretical aspects of music (rather than professional training) may want to investigate the Bachelor of Arts degree, also offered by the School of Music. Graduate degrees are offered in a variety of fields of study in music at the master’s and doctoral levels. The School also offers a post-Master's Artist Diploma degree.

Bands, choral ensembles, orchestras, jazz bands, new music ensembles, world music ensembles, opera theatre, and many other musical organizations are open by audition to music and non-music majors and members of the university and civic communities. Private lessons and courses in music history, theory, and music appreciation are open to all qualified students in the University. A minor in music for non-music majors is also available.

All applicants for admission to the School of Music must apply and be admitted to the University of Illinois, must audition successfully on their major performance instrument or in voice, and must take the Music Fundamentals Proficiency Exam. On-campus auditions are preferred, but taped auditions are acceptable under certain circumstances. In addition, applicants for music composition-theory and history of music majors must submit original scores or other pertinent writings to substantiate their ability to pursue work in these areas. Applicants in music education, composition-theory and music history must also complete an interview with faculty in those respective areas.

For complete information concerning audition schedules, special admission requirements, and curricula (including a minor in music), prospective students should visit the School's web site (http://www.music.illinois.edu) or contact the Music Admissions Office, School of Music, 1114 West Nevada Street, Room 2014, Urbana IL 61801. Phone: (217) 244-7899 | Email: musicadmissions@illinois.edu.

Bachelor of Music Specific Majors:
  • Instrumental Performance Music (p. 161)

Information listed in this catalog is current as of 04/2016
Curricula

For the Degree of Bachelor of Music

This degree requires 130 semester hours of credit for graduation.

Public performance is an integral part of the training in applied music, and all students, when sufficiently prepared, are required to participate in student recitals.

All students pursuing this degree are required to successfully complete at least one course in conducting (normally MUS 242) and must demonstrate keyboard competency by examination at the outset of their matriculation, or by enrolling in MUS 172 and/or MUS 173; keyboard performance majors must demonstrate competency by successfully completing MUS 454.

Foreign language study may be required according to the major chosen, experience in or study of languages prior to matriculation, and/or the results of language placement tests at the University.

For a semester-by-semester sequential listing of classes a student might take during a four-year course of study, please consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate).

Students majoring in music should meet with their adviser at least once per semester and consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate), for clarification and explanations concerning the Bachelor of Music majors.

Common Requirements for all Bachelor of Music Degrees

Students in the School of Music must complete the Campus General Education requirements. Some Music courses apply toward the General Education requirements.

Course Requirements

The music minor requires the successful completion of 21 semester hours of courses in music according to the following distribution:

1. Five to six semester hours in music history or literature courses, to be selected from MUS 110, MUS 130-MUS 134, MUS 313, MUS 314, or courses at the 400-level for which students meet the prerequisites (see 5);
2. Six semester hours in music theory courses to be selected from MUS 103 and MUS 104, or the equivalent (MUS 101, MUS 107, MUS 102, and MUS 108 – please note, however, that the student may not receive credit for both MUS 103 and MUS 101);
3. Four semester hours of applied music (a minimum of two semesters of study in the same instrument or voice) to be selected from MUS 178-MUS 198 pending successful completion of an audition;
4. The five to six remaining hours may be selected from any of the areas included in 1-3, and may include up to three hours of a conducted music ensemble (to be selected from MUS 250, MUS 252, MUS 260-MUS 266, or MUS 268-MUS 272; not more than three semester hours of ensemble may count toward the minor);
5. At least six semester hours must derive from upper division or advanced music courses - for music minors, this includes MUS 313, MUS 314, or any 400-level music course;
6. Topics offered under MUS 199 or MUS 499 must be approved for credit toward the minor in advance by the music minor advisor.
Bachelor of Arts with a Major in Music

http://music.illinois.edu/

The Bachelor of Arts with a Major in Music is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students select a specific area of study, called an option. Options include music theory, composition, music technology, and the various branches of musicology; students may also work with an advisor to explore alternate options not listed here. BA students work with their BA advisor to designate supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study (option) during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students must designate their option by no later than the start of the spring semester of sophomore year.

For admission requirements for the BA, please see the School of Music's Admissions website (http://www.music.illinois.edu/prospective-students) or contact the Music Admissions Office:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801
Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

Advising documents are available online:

Bachelor of Arts in Music - Curriculum Overview (http://illinois.edu/cms/4232/bacurroverview.pdf)

Bachelor of Arts in Music - Plan of Study (http://illinois.edu/cms/4230/ba_planningdocument.pdf)

Bachelor of Arts in Music - Music Technology option (http://illinois.edu/cms/4229/ba_musictechcourseplan.pdf)

Minimum required major and supporting course work normally equates to 48-50 hours excluding keyboard skills requirement, and includes 37-41 hours in music courses and 29-31 hours in core courses. Students who wish to study voice or an instrument for credit, in addition to satisfying the requirement of MUS 172 and MUS 173, are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music; credits earned in applied music beyond the keyboard requirement stated above are generally considered elective.

Minimum hours required for graduation: 120 hours

Students must complete the following core courses and and select an area of study, called an "option". An option consists of 8-9 hours of advanced music courses and 11-12 hours of supporting (non-Music) coursework. The coursework is determined in consultation with the student's advisor.

Advanced Music Courses

Supporting Coursework

Total Hours 52

Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

For All Options:

- Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus.
- A Major Plan of Study Form must be completed and submitted to the Academic Affairs Office (Music Building 3076) before the end of the fifth semester (60-75 hours). Please see your BA Music advisor for assistance in completing the form.

Instrumental Performance Major

http://www.music.illinois.edu

Students may major in piano, organ, harpsichord, violin, viola, violoncello, double bass, harp, flute, oboe, clarinet, saxophone, bassoon, trumpet, horn, euphonium, baritone, trombone, tuba, or percussion.

A student enrolled in this major normally takes two applied subjects, one a major (24-32 semester hours in the same applied area) and the other a minor (8 semester hours in the same applied area). Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Instrumental Performance Major within the Bachelor of Music degree.

Electives as needed to total 130 hours

1. Concurrent registration in MUS 250 is required for all students who register for any of MUS 183-MUS 186 and MUS 483-MUS 486.
2. String majors will register for four semester hours of applied music in the first year; thereafter, string majors will register for three semester hours of applied music and one semester hour of MUS 267 in the second, third, and fourth years. Brass majors will register for three semesters hours of applied music and one semester hour of MUS 267 each semester for all four years.
3. Piano majors are required to complete only 6 hours of minor applied music.
4. For piano majors only. Other majors may choose four semester hours of electives.

### Jazz Performance Major

http://www.music.illinois.edu

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, or guitar as the major instrument. Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242.

### Music Composition-Theory Major

http://www.music.illinois.edu

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

Music Education

Professor Jeffrey Magee
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 333-2620
http://www.music.illinois.edu

For the Degree of Bachelor of Music Education

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (http://cote.illinois.edu). Students complete a concentration in instrumental (band or strings), choral, or elementary-general music education. For more detailed information, see the music education advising Website at http://go.illinois.edu/muebme.

In order to be recommended for certification, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) gpa of 2.75, and professional education course gpa of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

Illinois state law and Council on Teacher Education policy require that all candidates for teacher education programs pass the Illinois Certification Test System Test of Academic Proficiency (TAP), or submit a composite ACT+Writing score of 22, or a composite SAT (mathematics and critical reading) score of 1030. before admission. All music education students must earn a grade of C or better in all music courses required for certification.

All students are required to enroll in at least one approved performance ensemble each semester in residence, except the semester when they student teach, and must demonstrate keyboard competency through a proficiency exam or by enrolling in MUS 172 and/or MUS 173.

1 Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school certification is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student's applied major, music theory, or music history.

- MUS 447: Advanced Music Ed Technology
- MUS 449: Music in Early Childhood

Total Hours: 26

Musicology Major

http://www.music.illinois.edu

This major offers a broad cultural education that unites academic and musical training. It also provides preparation for the graduate study required for research and teaching in musicology or ethnomusicology.

Students must complete a fourth-level college foreign language course or its equivalent for graduation. French, German, or Italian are strongly encouraged.

The fourth-year student, working with an adviser, must complete a satisfactory thesis (MUS 299) as part of the requirements for the Music History Major Bachelor of Music Degree.

Music Theory Core

- MUS 101: Music Theory and Practice I
- MUS 102: Music Theory and Practice II
- MUS 201: Music Theory and Practice III
- MUS 202: and Music Theory and Practice IV
- MUS 107: Aural Skills I
- MUS 108: Aural Skills II

Electives as needed to total 130 hours

- MUS 207: Aural Skills III
- MUS 208: and Aural Skills IV
- Advanced Music Theory

Music History and Literature Core

- MUS 110: Introd Art Mus: Intl Perspect
- MUS 313: The History of Music I
- MUS 314: and The History of Music II

Advanced Music History

Open Studies

Open Studies allows students to focus on diverse fields such as music of other cultures, piano pedagogy, or other areas not included in the majors above. Open Studies requires completion of the common requirements for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the associate dean of the College of Fine and Applied Arts. Additional information may be obtained from the:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801

Information listed in this catalog is current as of 04/2016
Vocal Performance Major

http://www.music.illinois.edu

The primary applied subject in this major includes both private lessons in voice and classes in vocal diction.

At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

Electives as needed to total 130 hours

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2. All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree.

Theatre, Department of

Jeffrey Eric Jenkins
4-122 Krannert Center for the Performing Arts, 500 South Goodwin, Urbana
PH: (217) 244-6189
FX: Fax (217) 244-1861
http://theatre.illinois.edu

The curricular concentrations in the Department of Theatre provide intensive and extensive preparation for the rigorous demands of a professional career in the theatre. A strong commitment to work in the theatre and a realistic understanding of its intellectual, aesthetic, and physical demands are therefore necessary in students who enter the department.

Before acceptance into theatre, applicants must participate in auditions or interviews, which take place at the Krannert Center for the Performing Arts five or more weekends each year, and at selected regional locations (normally Chicago and New York). In these auditions, applicants who plan to pursue the concentration in acting should present a three-minute audition, comprising two contrasting works from dramatic literature. Applicants wishing to pursue one of the concentrations in design, technology, and management should present a portfolio of previous theatre work. Applicants who intend to pursue the theatre studies concentration should also bring evidence of their previous theatre work and a 500-word essay addressing the aspects of the theatre studies program that interest them most and why they want to pursue those aspects. Information on these auditions and interviews will be sent to applicants once they have applied to the University and their eligibility has been determined by the Office of Admissions and Records.

Concentrations in theatre are in Acting, Costume Design and Technology, Lighting Design, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. Students are initially accepted as theatre majors and then formally admitted to one of these concentrations after an evaluation by the faculty during the student’s first or second year. The concentrations in acting and design, technology, and management are intended for students who, in the judgement of the faculty, are ready to concentrate in these specialties in an intensive undergraduate professional training curriculum. The theatre studies concentration is intended for students who plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As one of the resident producing organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year and three each summer. The theatres and workshops of the Krannert Center serve as laboratories for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists, preparing performances in theatre, opera, and dance. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100-Practicum I. Acting and theatre studies students cast in Krannert Center productions
or assigned to assist in Krannert Center productions must also take THEA 400-Practicum, II. Design, technology, and management students are required to work on Krannert Center productions as assigned for THEA 400-Practicum, II, credit. Students seeking credit for practical theatre work outside the Krannert Center must secure the approval and supervision of theatre faculty in the form of an Individual Project (THEA 391 or THEA 392) or as a Professional Internship (THEA 490) or Creative Project (THEA 595).

Curricula in Theatre
For the Degree of Bachelor of Fine Arts in Theatre
A minimum of 128 hours of credit is required for the degree.

¹ First year theatre foundations courses.

Acting Program

The acting program provides intensive training in a wide variety of performing media. In the first and second years, students take introductory courses in movement, voice, and acting. In their second year of study in the department, students must audition for acceptance into the studio in acting. In addition to successful completion of all classes in their first and second years, acceptance will be based on an evaluation of each student’s potential for professional-caliber performance, commitment to theatre, and the necessary discipline for intensive study. Third- and fourth-year students meet in daily four-hour sessions, each of which includes sections in dynamics, voice and speech, movement, and acting. Semester-long acting sections include advanced scene study, musical theatre, Shakespeare, and acting for the camera. Students in the professional studio in acting must audition for department productions and perform as cast.

Division of Design, Technology, and Management

Students planning careers in costume design and construction, lighting design, scenic design, scenic technology, sound design and technology, and stage management are selected for the options in this division by a process of faculty evaluation at the end of their first year of study in the department. Criteria for acceptance and continuance in these options include satisfactory completion of all course work in the first and second years, potential for professional-caliber work, commitment to theatre, and the necessary discipline for intensive study and practice. Students in these options are assigned to teams that design, mount, and manage more than fifteen productions annually in the Krannert Center for the Performing Arts.

**Theatre Studies Program**

The theatre studies program focuses on the practical application of theatre scholarship and explores theatrical production as a collaborative art form that is grounded in theory, criticism, history, research, and writing.

The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

Emphasis is given to a comprehensive study of theatre practices of the past, material participation in theatre practices of the present, and the discovery and application of theatre practices for the future.

Minor in Theatre

The Minor in Theatre offers students a comprehensive overview of the study of theatre, including both academic (history and criticism) and production (acting, design and technology) courses. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses, totaling ten hours. They then take a minimum of ten hours of electives in two general areas (History/Criticism and Production/Performance) with at least one course from each area.

Urban and Regional Planning, Department of

Rob Olshansky
111 Temple Hoyne Buell Hall
611 East Lorado Taft Drive
Champaign, IL 61820
PH: (217) 333-3890
http://www.urban.illinois.edu

BAUSP Director: Alice Novak, Assistant Head

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

The Department also offers a minor in Urban Studies and Planning. The minor provides students with the opportunity to apply disciplinary knowledge from a variety of fields (such as economics, politics, environmental science, informatics, sociology, architecture, landscape architecture) toward understanding urban phenomena and planning for orderly, efficient, functional, environmentally friendly, and aesthetically pleasing urban development. The minor introduces students to a) cities as arenas with challenges such as housing affordability, population segregation, neighborhood disinvestment and decline, environmental pollution, and traffic congestion; and b) professional planning practice, which devises actions to address such issues and improve the quality of life in urban areas. Urban issues are explored on a range of scales from the neighborhood to the mega city.

The Department's administrative and faculty offices, classrooms, and computer laboratory space are located in Temple Hoyne Buell Hall. Students may go to Room 111 for information.

The Department of Urban and Regional Planning also offers a program of graduate studies leading to the Master of Urban Planning degree, joint degree programs with the Master of Architecture, Master of Landscape Architecture and the Juris Doctor degrees, and the Doctor of Philosophy in Regional Planning.

Curriculum in Urban and Regional Planning

For the Degree of Bachelor of Arts in Urban Studies & Planning (BAUSP)

A minimum of 120 hours is required for this degree.

Current University of Illinois General Education requirements include courses in humanities, composition, social sciences, cultural studies, quantitative reasoning, and foreign language. See the General Education Web site (http://www.courses.illinois.edu/gened) for information on courses that meet these requirements.
## Summary of Requirements

### 1st Year
- UP 101 Introduction to City Planning

### 2nd Year
- UP 201 Planning in Action
- UP 203 Cities: Planning & Urban Life
- or UP 204 Chicago: Planning & Urban Life

### 3rd Year
- UP 312 Communication for Planners
- UP 316 Urban Informatics II

### 4th Year
- Concentration Workshop (UP 455, UP 447, UP 455, UP 456, UP 457, or UP 478)
- Capstone Experience (UP 390 or UP 397)
- UP 401 Undergraduate Capstone Seminar

### Foundation Courses
- RHET 105 Writing and Research (or equivalent)

### 3-4 hours selected from:
- AAS 100 Intro Asian American Studies
- AFRO 100 Intro to African American St
- AIS 101 Intro to Amer Indian Studies
- GEOG 101 Global Development&Environment
- GEOG 104 Social and Cultural Geography
- LLS 100 Intro Latina/Latino Studies
- SOC 100 Introduction to Sociology
- ECON 102 Microeconomic Principles
- or ACE 100 Agr Cons and Resource Econ
- UP 116 Urban Informatics I (or equivalent)
- or STAT 100 Statistics

**Total Hours:** 10

### Urban Studies and Planning Core
- UP 101 Introduction to City Planning
- UP 201 Planning in Action
- UP 203 Cities: Planning & Urban Life
- UP 312 Communication for Planners
- UP 316 Urban Informatics II

### Sustainability Concentration
- UP 205 Ecology & Environmental Sustainability (Gateway)

**Select 2 courses from:** 6-8
- UP 136 Urban Sustainability
- UP 405 Watershed Ecology and Planning
- UP 420 Plng for Historic Preservation
- UP 446 Sustainable Planning Seminar

**Information listed in this catalog is current as of 04/2016**

### Policy and Planning Concentration
- UP 311

**Select 2 courses from:** 6-8
- UP 330 The Modern American City
- UP 340 Planning for Healthy Cities
- UP 345 Economic Development Planning
- UP 407 State and Local Public Finance
- UP 420 Plng for Historic Preservation
- UP 430 Urban Transportation Planning
- UP 460 Transportation/Land Use Policy
- UP 473 Housing & Urban Policy
- UP 474 Neighborhood Revitalization

**Select 1 Workshop Course from:**
- UP 447 Land Use Planning Workshop
- UP 455 Economic Development Workshop
- UP 457 Small Town/Rural Planning Workshop

### Social Justice Concentration
- UP 260 Social Inequality and Planning (Gateway)

**Select 2 courses from:** 6-8
- UP 335 Cities and Immigrants
- UP 340 Planning for Healthy Cities
- UP 423 Community Development in the Global South
- UP 473 Housing & Urban Policy
- UP 478 Community Development Workshop (Workshop)

### Global Cities Concentration
- UP 185 Cities in a Global Perspective (Gateway)

**Select 2 courses from:** 6-8
- UP 335 Cities and Immigrants
- UP 423 Community Development in the Global South

**Workshop: Study Abroad** 4

### Capstone

#### Required Courses:

**Capstone Preparation:** During the 3rd year, students enroll in UP 301, Capstone Preparation. Students meet individually with their capstone advisor to develop a plan to meet the capstone requirement. To pass this course students must turn in a proposal at the end of the semester.

**Required Hours:**
Capstone Experience: Students engage in a semester or summer-long applied activity outside of the classroom. The Capstone Experience is intended to engage the students in the real world and prepare them for the job market. Students typically complete this requirement during their junior year, but have the option to complete it during the summer between their 3rd and 4th year. Examples include a paid or unpaid internship, volunteer work, consulting project with a client, summer research and more. Students enroll in UP 390, Planning Internship, and/or UP 397, Undergraduate Capstone, to receive credit.

Capstone Seminar: During the 4th year, students enroll in UP 401 for 2 semesters. Students will participate in monthly activities to discuss and reflect on the Capstone Experience. In addition, students will present a poster summarizing their capstone experience in a public setting; for example at a public engagement conference, public meeting or community meeting, McNair Scholars conference, James Scholars event, Illinois American Planning Association meeting, undergraduate research symposium, or other venue. The seminar sessions also include career development such as resume writing, interviewing and networking with professionals through the Wetmore Lecture Series.

Minor in Art History

The minor in art history is designed for students who seek to study art history in depth as a compliment to their major area of study. The minor provides students with an education in art history that is balanced and diverse culturally, temporally, and geographically. It allows students to choose from a variety of introductory courses that cover a variety of regions, cultures, and periods.

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Course Requirements

Students must meet the following course requirements for a total of 20 hours

Select two of the following (one of which must be ARTH 113 or ARTH 114):

ARTH 111 Ancient to Medieval Art
ARTH 112 Renaissance to Modern Art
ARTH 113 Introduction to African Art
ARTH 114 Introduction to East Asian Art
ARTH 115 Art in a Global Context
ARTH 395 Junior Seminar in Art History

ARTH courses at the 200, 300, or 400 level

1 A maximum of one course from either the History of Architecture or the History of Landscape Architecture will count toward the requirements of the Art History Minor.

2 At least one of the upper-level Art History courses must be primarily concerned with a subject outside of Europe and the Modern Americas. A maximum of one course from other universities will satisfy the requirements for upper-level Art History courses.

General Studies, Division of

Daniel J. Turner, Ph.D., Director
Kristi Kuntz, Associate Provost
Campus Center for Advising and Academic Services (CCAAS)
Illini Union Bookstore Building,
Fifth Floor
807 S. Wright Street
Champaign, IL 61820
(217) 333-4710
http://dgs.illinois.edu
genstudies@illinois.edu

The Division of General Studies (DGS) assists undeclared students with the process of exploring and declaring majors at the University of Illinois by providing holistic, developmental academic advising. DGS offers students the ability to connect with academic advisors who are committed to their success.

The Division of General Studies helps students:

1 UP 311 will be discontinued and reconfigured as UP 211, a 3-hour Gateway course, effective starting with the Fall, 2016 semester.
• Clarify their academic, personal, and career goals;
• Identify their strengths, skills, interests, and values;
• Understand the process of exploring majors at Illinois;
• Identify the programs of study available at Illinois;
• Understand specific programmatic and degree requirements;
• Understand the Intercollegiate Transfer (ICT) process at Illinois;
• Recognize the significance of and their responsibility in the academic advising relationship;
• Learn about and connect with appropriate campus resources and services;
• Learn about the educational opportunities available at the University of Illinois including undergraduate research, study abroad, tutoring, leadership development, involvement in student organizations, volunteer experiences, and connections with faculty.

DGS provides students with opportunities to participate in academic achievement programs, the James Scholar Honors program, and short-term study abroad experiences. In addition, all DGS students enroll in an introduction to the university course, General Studies 101 (GS 101), to assist with their transition to college life and provide insight into the major exploration process at Illinois. Students may be enrolled in the Division of General Studies for up to four semesters before being required to declare a major in one of the undergraduate colleges at the University of Illinois.

Liberal Arts and Sciences, College of

2002 Lincoln Hall
702 South Wright Street
Urbana, IL 61801
(217) 333-1705
http://las.illinois.edu

The College of Liberal Arts and Sciences (LAS) has four missions: scholarly inquiry and the generation of knowledge, preparation of individuals for an array of careers and professions, service to the public, and the provision of the intellectual core of the University. The college shares the first three missions with professional schools and other colleges on this campus, but the last mission is uniquely the responsibility of the College of Liberal Arts and Sciences. By fulfilling this responsibility, the college helps develop broadly educated individuals who are committed to or characterized by open inquiry, critical thinking, effective communication, and responsiveness to the needs of individuals and society.

Students in the college are expected to understand the content of and to develop skills in areas that reflect the overall purpose of the college: fluency and facility in English; literacy in at least one additional language; broad exposure to a number of different disciplines; and intensive study in one discipline (or an interdisciplinary program). The student has a wide choice of courses to satisfy these requirements; however, ultimately he or she must plan a diverse and intensive program of study, prepare for an occupational, professional and intellectual future, and develop that clarity and range of mind that is the goal of educated people.

Information for current students may be found here: http://www.las.illinois.edu/students/

Information for newly admitted students may be found here: http://www.las.illinois.edu/students/admission/

Information for prospective students may be found here: http://www.las.illinois.edu/prospective/

African American Studies

Ronald Bailey, Department Head
1201 West Nevada, Urbana
PH: (217) 333-7781
http://www.afro.illinois.edu

The Department of African American Studies undergraduate offerings include an undergraduate major and minor.

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications

Information listed in this catalog is current as of 04/2016
of race in the United States and world political economy, society and
culture, over time. AAS students will learn diverse concepts, theories and
methodologies for analyzing the experiences and perspectives and the
cultural and intellectual production of African Americans and African
descended people, largely though not exclusively in the United States. An
African American studies major will be encouraged to achieve excellence
in developing vital creative and critical competencies, including oral
and written communication, computer and statistical skills. Students
majoring in AAS will also be encouraged to join a new generation
of leadership grounded in African American studies knowledge and
committed to public engagement to meet the continuing challenges of a
diverse democratic society; and to foster national discourse to produce
public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily
interested in the social sciences and humanities, though all students are
welcome and encouraged to enroll in the program. This program prepares
students for graduate study and research in traditional disciplines and
interdisciplinary fields and for careers in the private or public sectors
such as teaching, social work, human resources, criminal justice,
management and administration, city planning, marketing, policy-making,
medicine and law.

For the Degree of Bachelor of Arts in
Liberal Arts and Sciences
Major in Sciences and Letters Curriculum

E-mail: loturner@illinois.edu (loturner@uiuc.edu)

Minimum required major and supporting course work equates to 48
hours.

General Education: Students must complete the Campus General
Education (https://courses.illinois.edu) requirements including the
campus general education language requirement.

Twelve hours of 300- and 400-level African American Studies courses
must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the
LAS Student Academic Affairs Office before the end of the fifth semester
(60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction:
To graduate with distinction, students must complete the following:
1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or
better

I. Core course requirements

</table>

II. Theory and Methods Requirement

At least one theory and one methods course beyond the core.  
6
The courses must be selected from a list maintained in the
Department’s advising office.

III. Thematic Areas

Students must take at least one course each from the
following five areas. At least 6 of the remaining hours must be
taken from only one of any of the five areas. A list of courses
is maintained in the Department’s advising office.

A. Comparative Race, Racialized Communities and
   Identities
B. Cultural Production and Cultural Movements
C. Political Economy, Public Policy and Contemporary
   Issues
D. Global Interconnections: Black Transnationalism and the
   African Diaspora
E. Black Women, Gender and Sexuality Studies

IV. Cognate or Supporting Coursework

Students must complete 9 hours of supporting coursework.
Supporting coursework courses consists of a set of courses
which are logically grouped, and which reflect or support a
student’s interests outside of the African American Studies
major. Supporting coursework courses must be approved by
the Department’s undergraduate advisor.

Total Hours 48

Interdisciplinary Minor in African-American Studies

The Department of African American Studies offers a campus-wide
interdisciplinary minor in African American Studies. The minor is
premised on the following principles: Interdisciplinarity, the centrality of
Black women and gender, the use of the Global Africa/African Diaspora
contextualizing framework and an emphasis on black agency or self-
determining activity of African peoples. A minimum grade point average
of 2.33 is required for completion of courses taken in the program. The
Department of African American Studies must approve a student’s minor
course plan.

II. Areas of Concentration

A. Comparative Race, Racialized Communities &
   Identities. Students must take at least one course in this area.
   Students may choose courses from a list in the Department
   office.
B. Cultural Production &; Cultural Movements. Students
   must take at least one course in this area. Students may
   choose courses from a list in the Department office.
C. Political Economy, Public Policy &; Contemporary
   Issues. Students must take at least one course in this area.
   Students may choose courses from a list in the Department
   office.

Elective in any of the above areas 3

Information listed in this catalog is current as of 04/2016
Students must take at least one course focusing on Black Women, Gender, and Sexuality Studies chosen from a list in the Department office. Students may count this course toward any of the required areas above.

Total Hours 21

Students must not take more than 6 hours of 100-level courses. A minimum of 6 hours of 300- and 400-level courses is required.

African Studies, Center for

Room 210, International Studies Building, 910 South Fifth Street, Champaign
PH: (217) 333-6335
http://www.afrst.illinois.edu

Interdisciplinary Minor in African Studies

The Center for African Studies offers an interdisciplinary minor as a complement to any major. The 20 hours selected by students for the African studies minor should form a coherent program of study. This program must be approved by the Center for African Studies. The Dean of the College of Liberal Arts and Sciences will verify that the student has completed the program on the recommendation of the Director of the Center for African Studies and on completion of the requirements below.

E-mail:african@illinois.edu

Requirements

Study of an indigenous African Language. Acceptable languages include but are not limited to Arabic, Bamana, Lingala, Swahili, Wolof, and Zulu.

African Studies core courses. These courses contain a minimum of 50 percent African content and are defined according to a list maintained and regularly updated by the Center for African Studies. Courses completed to satisfy the core must come from at least 3 separate departments and must include the following three components:

- Course-work surveying the continent. Choose one of the following:
  - AFST 210 Intro to Mod African Lit
  - AFST 222 Introduction to Modern Africa
  - AFST 254 Economic Systems in Africa
  - HIST 110 History of Africa
  - SOC 122 Africa in World Perspective

- 300- or 400-level core courses. Language courses cannot be used to meet this requirement.

- Additional core courses at any level. African language courses may be used to satisfy this requirement if they are at the advanced level (fifth semester or higher). Only 3 hours of AFST 199 may be used to satisfy the requirements of the minor.

Total Hours 20

American Indian Studies, Program in

Robert Warrior

American Indian Studies (AIS) at the University of Illinois at Urbana-Champaign prepares students in a range of methodologies, theories, technologies, and teaching approaches that compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students in preparing for graduate school or for careers in a variety of pursuits including public and business administration, education, public relations, marketing, politics, and government, especially as they relate to American Indian and Native American constituencies. Career opportunities also exist in agencies such as Indian Health Services, the Bureau of Indian Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual foundation for success in an increasingly challenging world.

Minor in American Indian Studies

American Indian Studies (AIS) at the University of Illinois at Urbana-Champaign is an interdisciplinary program with four subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The courses must form a coherent program of study and be approved by an AIS advisor.

Information listed in this catalog is current as of 04/2016
Only three courses (9 hours total) at the 100-level may be counted toward the minor. Students also are required to complete two courses (6 hours) at the 300- or 400-level. These advanced course credits must be distinct from credit earned for the student’s major or another minor.

**Anthropology**

Andrew Orta
109 Davenport Hall, 607 South Mathews, Urbana
PH: (217) 333-3616
http://www.anthro.illinois.edu/

The Department of Anthropology offers two major concentrations and a minor. In addition, students may pursue Anthropology as part of the LAS Major in Computer Science and Anthropology (p. 271).

Anthropology, which views human biology, behavior, and society (both past and present) in a cross-cultural perspective, combines scientific and humanistic interests in a modern social sciences framework. The General Anthropology Concentration includes the four fields of biological anthropology (biological diversity and evolutionary history of human and nonhuman primates), archaeology (human prehistory and the organization and growth of technology and society), sociocultural anthropology (comparative study of identity and power in social contexts), and linguistic anthropology (comparative study of languages and communication). Although the student should strive for a topical and geographical balance, an undergraduate may specialize in one of these four branches and may also study some world cultural area intensively through an area studies program.

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in sociocultural and linguistic anthropology. Sociocultural anthropology is the study of the daily lives of people around the world, both at home and abroad. Sociocultural anthropologists conduct field research to get a hands-on feel for people’s lives and passions. They examine everything from beauty pageants to political protest marches, from Disney films to nuclear scientists’ lab practices. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a wonderful window on the largest processes and problems of our time, from globalization to race relations and violence. Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the “English Only” movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom or at the United Nations, as well as how the way we talk creates our sense of self and reality. Because the field of anthropology presents a wide range of disciplinary perspectives on the human condition, students electing this major concentration are encouraged to select from among relevant course offerings in archaeology or biological anthropology to fulfill General Education requirements.

Anthropology is an appropriate major for those seeking a general liberal education; for those preparing for professional study and careers in law, medicine, bioscience and technology, business, or international relations, and for those planning further graduate study in anthropology. These majors prepare college graduates to enter into a broad range of jobs and professions by providing them with research, writing and analytical skills that will enable them to confront problems, issues and situations that require cultural sensitivity. College graduates with a background in anthropology thrive in social services, teaching, law, medicine, government, NGOs, business, and many more lines of work. Professional anthropologists work as research scientists and teachers in museums, universities, and archaeological surveys; as staff members in government agencies, social service programs, and business firms in which international understanding of human and social concerns is important; or as independent consultants to such agencies, programs, and firms.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

**Major in Sciences and Letters Curriculum**

Students must select one of the following concentrations in consultation with an advisor:

- General Anthropology Concentration (p. 177)
- Sociocultural and Linguistics Anthropology Concentration (p. 178)

**Minor in Anthropology**

The minor in anthropology may be tailored to each student’s individual needs, thus accommodating students with interests as diverse as premedicine, prelaw, geography, and art history.

Ethnographic Themes and Modes of Thinking

Four courses selected from the list maintained in the advisor’s office. At least one of these courses must be at the 300-level and at least one of these courses must be at the 400-level. One of these courses may be a topically oriented archaeology or biological anthropology course, or ANTH 499, chosen in consultation with your advisor.

| ANTH 230 Sociocultural Anthropology | 3 |

Ethnographic Places

Four courses selected from the list maintained in the advisor’s office. At least one of these courses must be at the 300 or 400 level. One of these courses may be a topically oriented archaeology or biological anthropology course, or ANTH 499, chosen in consultation with your advisor.

Capstone Course in Sociocultural/Linguistic Anthropology | 3 |

Supporting coursework

Information listed in this catalog is current as of 04/2016
Consulting closely with your anthropology faculty advisor, you should plan to take supporting course work from other departments and/or subdisciplines in anthropology that relates to your anthropological work and interests. At least three of these supporting courses must be taken in other departments. Of these four supporting courses, two should be at the 300- or 400-level.

1. Relevant archaeology and biological anthropology courses include ANTH 180, ANTH 241, ANTH 249, ANTH 277, and ANTH 452.
2. Relevant archaeology and biological anthropology courses include ANTH 157, ANTH 223, and ANTH 376.
3. Either ANTH 495 or ANTH 497; or any existing 400-level course, or ANTH 399 as an independent study, if the student works closely with the instructor to adapt it to fulfill this requirement by beginning and completing a new research/writing project relevant to the course. Can be repeated for up to 6 hours.
4. If you have not selected a course from another subdiscipline of anthropology as part of your “Ethnographic Themes/Modes of Thinking” or “Ethnographic Places” courses, or have not taken such a course in fulfillment of General Education requirements, one of these supporting courses must be selected from course offerings in archeology or biological anthropology.

Asian American Studies

Soo Ah Kwon
Head
1208 West Nevada, Urbana
PH: (217) 244-9530
http://aasp.illinois.edu

The Department of Asian American Studies offers a campus-wide Interdisciplinary Minor. This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of a diverse and transnational United States. It is relevant to curricula such as letters and sciences, business, economics, education, health studies, pre-law, social work, and urban and regional planning.

Interdisciplinary Minor in Asian American Studies

A student’s plan of courses for the minor must be approved by the Department of Asian American Studies. The minor will consist of 21 hours of approved courses from diverse departments and must include:

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Course Code(s)</th>
<th>Required Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intro Asian American Studies</td>
<td>AAS 100</td>
<td>3</td>
</tr>
<tr>
<td>Sciences from Asian American Studies Program approved course list</td>
<td></td>
<td>18</td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>21</td>
</tr>
</tbody>
</table>

No course may be used to satisfy more than one requirement.

1. No more than 6 hours (beyond AAS 100) may be at the 100 level. At least six hours of 300- or 400-level courses are required.

Astronomy

Brian Fields
103 Astronomy Building, 1002 West Green, Urbana
PH: (217) 333-3090
http://www.astro.illinois.edu

The Department of Astronomy offers a minor and a major in astronomy. In addition, students may pursue astronomy as part of the LAS Major in Computer Science and Astronomy (p. 271).

The major in astronomy, administered by the Department of Astronomy, is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education. It may be chosen by students who wish to have an astronomy research career or an astronomy background for use in related fields, such as working in national laboratories, observatories, planetariums, NASA, aerospace industry, many computer-related fields, journalism, or science writing to name a few. Astronomy courses can also be customized to satisfy a secondary field for the undergraduate curriculum in General Engineering.

Astronomy students are also encouraged to double major or minor in a second field such as chemistry, computer science, geology, mathematics or physics. Specific programs of study in other areas such as biology, economics, English, history, or journalism for individual students can be designed and periodically updated through mutual discussions between the students and their academic advisers.

The Department of Astronomy also sponsors the Minor in Astronomy.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: astronomy@illinois.edu

Minimum required major and supporting course work normally equates to 47-48 hours.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level Astronomy/Physics courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction. A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at UIUC. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

Minor in Astronomy

The minor in astronomy is designed to broaden the student’s knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

Advanced Astronomy

| Courses at any level taught by the Department of Astronomy | 3-6 |

Minimum total hours

1. Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.
2. No more than 4 hours of ASTR 390 will be counted towards the minor.

Atmospheric Sciences

Robert Rauber
101 Atmospheric Sciences Building, 105 South Gregory Street, Urbana
PH: (217) 333-2046
http://atmos.illinois.edu

The Science and Letters Curriculum in Atmospheric Sciences prepares students for careers in a wide range of disciplines within the atmospheric sciences including meteorology, environmental science, climate, remote sensing, atmospheric chemistry, computational science and other areas. The curriculum is tailored to achieve the student’s long term educational goals, their career aspirations in atmospheric sciences and their general interests in the field. All students receive a firm foundation in mathematics, physics and chemistry and develop data analysis and computational skills that can be used in a wide range of applications within and beyond the atmospheric sciences. Students can emphasize specific areas of interest in their elective choices. Students majoring in Atmospheric Sciences will have opportunities for employment within agencies of government (e.g. the National Weather Service/NOAA, NASA, EPA, DOD, DOE), many private firms and in colleges and universities for those who continue with graduate education. All students can take part in independent study, internship or research projects as a capstone experience in their senior year. Students interested in a research career in atmospheric sciences are encouraged to undertake research projects in the capstone experience.

The undergraduate curriculum in atmospheric sciences is modeled on the recently published recommendations of the American Meteorological Society. The American Meteorological Society is the professional society for atmospheric scientists and meteorologists in the United States. Their "recommended attributes" for undergraduate degree programs in the atmospheric sciences are guidelines for graduates to be successful in finding employment or in seeking admission to graduate programs. Therefore, we have closely adhered to these recommended attributes in designing our program.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Email: atmos-sci@illinois.edu

Minimum required major and supporting course work normally equates to 58-59 hours including at least 32 hours in Atmospheric Sciences.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in Atmospheric Sciences can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

For distinction: A minimum cumulative grade point average of 3.2 in all of their Atmospheric Sciences courses, and completing three Atmospheric Sciences Elective courses.
For high distinction: A minimum cumulative grade point average of 3.4 in all of their Atmospheric Sciences courses, and completing four Atmospheric Sciences Elective courses.

For highest distinction: A minimum cumulative grade point average of 3.6 in all of their Atmospheric Sciences courses, and completing five Atmospheric Sciences Elective courses.

ATMS 304 Radiative Transfer-Remote Sens 3
ATMS 305 Computing and Data Analysis 3
ATMS 307 Climate Processes 3
ATMS 313 Synoptic Weather Forecasting 4
ATMS 314 Mesoscale Dynamics 3
ATMS Electives at the 300 or 400 - level selected from an approved course list maintained by the Department of Atmospheric Sciences 3

Total Hours 58-59

Minor in Atmospheric Sciences
The minor in Atmospheric Sciences is designed for students who desire a significant background in Atmospheric Sciences to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture; or scientific pursuits such as chemistry, physics, biology, and scientific writing.

Choose from the following:

ATMS 100 Introduction to Meteorology 0-6
ATMS 120 Severe and Hazardous Weather
ATMS 140 Climate and Global Change
ATMS 201 General Physical Meteorology

300- and 400-level courses from the approved course list. 12-18

Please see the Atmospheric Sciences advisor for a current list.

Total Hours 18

Chemical and Biomolecular Engineering
Paul Kenis

For the Degree of Bachelor of Science in Chemical Engineering
Major in Specialized Curriculum in Chemical Engineering
The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses.

It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two concentrations: Chemical Engineering and Biomolecular Engineering. Each concentration is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration’s technical electives focus more on bio-applied processing and technology.

Areas of Concentration
- Chemical Engineering: The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- Biomolecular Engineering: The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

Overview of Curricular Requirements
The curriculum requires 129 hours for graduation and is organized as shown below.

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.
## Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

<table>

1. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. MATH 441 may be substituted for MATH 285. MATH 286 (4 hours) may be substituted for MATH 285 (3 hours).

## Chemical and Biomolecular Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of chemical engineering and chemical science.

2. A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit.

## For the Concentration in Biomolecular Engineering

Selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories A and B (http://chbe.illinois.edu/undergraduate-program/current-students/curricula-information-concentration-and-year)
A maximum of 3 hours from this Category may be undergraduate research credit.

A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

### Social Sciences and Humanities

The social sciences and humanities courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

Electives in social sciences and humanities satisfying the campus general education requirements for social sciences and humanities, including cultural studies western and non-western components.

### Composition

These courses teach fundamentals of expository writing.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

### Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eight semesters vary with the Concentration chosen. Refer to the appropriate sequence continuation below.

---

1. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

2. For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

4. At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

5. Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

6. Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.

7a. MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

7b. MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

8a. At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://www.scs.uiuc.edu/chem_eng/undergrad/techlect.php), satisfying these distribution requirements:
   a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
   b) 3 hours any 400-level course from List 1.
   c) 6 hours any courses from List 1.
   d) 4 hours any 400-level courses from List 2.
   A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in 209 RAL or from the department Web site. (http://www.scs.uiuc.edu/chem_eng/undergrad/techlect.php)

8b. At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://www.scs.uiuc.edu/chem_eng/undergrad/techlect_bio.php), satisfying these distribution requirements:
   a) 9 hours must be from Category A
   b) 6 hours must be from Category B
   c) 4 hours must be 400-level courses from List 2.
   A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 209 RAL or from the department Web site. (http://www.scs.uiuc.edu/chem_eng/undergrad/techlect_bio.php)

9. Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.

10. Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.
The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

Minor in Biomolecular Engineering

Biomolecular Engineering is a broad, interdisciplinary field with its main goal of engineering value-added biomolecules and biomolecular systems for applications in medical, chemical, agricultural and food industries. Its practice ranges from fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare non-chemical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in chemical engineering. Those students should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For further information, please contact the Department of Chemical and Biomolecular Engineering.

<table>

1. Students must take at least three "Biomolecular Engineering" courses offered by the Department of Chemical and Biomolecular Engineering (for example, including CHBE 471, CHBE 472, CHBE 473, and CHBE 474). Students may obtain a current list of courses that may be used to satisfy this requirement in Room 209 RAL.

2. Course to be selected from a departmentally approved list of biomolecular engineering related technical electives.

For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@illinois.edu.

Chemistry

Gregory Girolami
107 Noyes Laboratory, 505 South Mathews, Urbana
PH: (217) 333-0711
http://chemistry.illinois.edu

Students may pursue chemistry by following either the specialized curriculum in chemistry (p. 188) (leading to the Bachelor of Science in Chemistry), or one of two concentrations (Chemistry Concentration (p. 186) or Chemistry Teaching Concentration (p. 186)) in the Sciences and Letters Curriculum (leading to the Bachelor of Science in Liberal Arts and Sciences). Students within the specialized curriculum in Chemistry may choose the Environmental Chemistry concentration (p. 187). In addition, students may pursue chemistry as part of the LAS Major in Computer Science and Chemistry (p. 271). The department also sponsors a minor in chemistry (p. 185). These programs of study are administered by the Department of Chemistry.

The specialized curriculum in chemistry (p. 188) is a rigorous, specialized program suitable for those planning careers in chemistry. It meets standards prescribed by the American Chemical Society. The chemistry concentration (p. 186) in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

Cooperative Education Program: Students accepted into the School of Chemical Sciences Cooperative Education Program spend alternate periods of attendance at the University with periods of employment in industry or government. Transcript recognition is given as well as a certificate of participation at graduation. Additional information and applications are available in the School of Chemical Sciences Placement and Student Services office.

Chemistry Advising Information:

For the Chemistry Majors and Minor, contact SCS Academic Advising (http://publish.illinois.edu/scsadvising).

The following courses may not be used to complete the minor: CHEM 315, CHEM 397, CHEM 420, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and CHEM 499.

Chemistry Concentration

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising)

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in Chemistry and/or Biochemistry must be taken on this campus.

NOTE: Transfer credit in chemistry must be approved by an adviser in chemistry in order to be included in the 30 hours.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Chemistry and biochemistry courses including: \(^1\) \(^2\)

<table>
<thead>

<td>University Physics: Elec &amp; Mag</td>
</tr>
</tbody>
</table>

\(^1\) Excluding CHEM 101, CHEM 108, and CHEM 199.

\(^2\) No more than 10 hours of the following courses may count toward the 22-26 hours in Chemistry: CHEM 197, CHEM 199, CHEM 297, CHEM 397, CHEM 496, CHEM 497, and CHEM 499.

Chemistry Teaching Concentration

This concentration is designed to prepare the student to teach chemistry with a second teaching field in general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising).

Degree title: Bachelor of Science in Liberal Arts and Sciences

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement. In addition, one course must be selected from: CMN 101 or CMN 113.

Twelve hours of 300- or 400-level courses in Chemistry must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Students in the Chemistry Teaching Concentration may submit their final teaching portfolio for evaluation in lieu of taking CHEM 499 and submitting a senior thesis. Final decisions on awarding Distinction honors will be made by the Head or designee.

Prerequisites to transfer to the Teaching Concentration (must be completed or be in progress prior to transfer into the teaching concentration):

<table>
<thead>
<tr>

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 220</td>
<td>Calculus</td>
</tr>
<tr>
<td>&amp; MATH 23 and Calculus II</td>
<td></td>
</tr>
</tbody>
</table>
MATH 221  Calculus I  
& MATH 231 and Calculus II

In addition, the student is required to pass the State Basic Skills Test before application to the teaching minor.

**Requirements**

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 81) (37-38 hours). Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require 10 semesters to complete this program.

Select one group of courses:

**Environmental Chemistry Concentration**

For advising see the Chemistry Overview Section (p. 185)

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas. These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

**Required Courses for the Specialized Curriculum in Chemistry**

Information listed in this catalog is current as of 04/2016
Basic Courses
CHEM 360  Chemistry of the Environment  3
or CEE 330  Environmental Engineering  3

Advanced Courses: Select three courses from the following:  9
CHEM 460  Green Chemistry  3
CEE 443  Env Eng Principles, Chemical  3
GEOL 380  Environmental Geology  3
IB 485  Environ Toxicology & Health  3
CHEM 397  Individual Study Junior  3
CHEM 497  Individual Study Senior  3
CHEM 499  Senior Thesis  3

Other 400-level courses dealing with economic, engineering, biological aspects of environmental chemistry upon consultation with the faculty advisor.

Nontechnical Requirements for the Specialized Curriculum in Chemistry 7

General education:
Foreign language - three semesters of college study (or three years of high school study) in a single foreign language
Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)
Advanced Composition writing requirement 8
Humanities/Arts to satisfy the campus general education requirements
Social/Behavioral sciences to satisfy the campus general education requirements
Cultural Studies to satisfy the campus general education requirement 8

Free electives 10  31

1 Hours given are those typical to meet requirement.
2 If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.
3 The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.
4 Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list maintained in the advising office. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation are required to complete only one laboratory course from the list maintained in the advising office.
5 Students contemplating transfer to the chemical engineering curriculum should choose MATH 225.
6 The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required course work in the curriculum.
7 The course taken to satisfy the Advanced Composition requirement may also be used to partially satisfy one of the core chemistry, advanced chemistry, mathematics, physics, or technical electives requirements (if appropriate), or may be used to partially satisfy the free electives requirements.
8 The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechnical and/or free elective categories.
9 Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

Major in Specialized Curriculum in Chemistry

The typical program of courses required to satisfy this degree totals 128-134 hours; in no case will a program totaling less than 120 hours qualify for graduation. Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses. The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Students in the specialized curriculum in Chemistry must include a course in Biochemistry in the Advanced Hours area or the Technical Elective area to be certified by the American Chemical Society as having met its specifications.

For advising see the Chemistry Overview Section (p. 185)

Web address for department: www.chemistry.illinois.edu (http://www.chemistry.illinois.edu)

Degree title: Bachelor of Science in Chemistry

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have an major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Core Chemistry 1
CHEM 202  Accelerated Chemistry I  3
CHEM 203  Accelerated Chemistry Lab I  1
CHEM 204  Accelerated Chemistry II  3
CHEM 205  Accelerated Chemistry Lab II  2

University of Illinois at Urbana-Champaign
faculty and students, individual attention, tutorial instruction, opportunity for study abroad in Greece and Italy, and the unmatched resources of the Classics Library and the collections of ancient art and other objects from classical antiquity in the museums on campus provide unique advantages for the pursuit of classical studies.

B.A. in the Teaching of Latin prepares students to teach Latin.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
Students in Classics must choose one of the following concentrations. Each concentration requires an additional 12 hours of approved supporting course work which may be drawn from a wide range of fields and disciplines. Students must plan their programs in consultation with a departmental adviser.

  • Classical Archaeology Concentration (p. 190)
  • Classical Civilization Concentration (p. 190)
  • Classics Concentration (p. 190)
  • Greek Concentration (p. 191)
  • Latin Concentration (p. 192)

For the Degree of Bachelor of Arts in
Teaching of Latin
Curriculum Preparatory to the Teaching of Latin (p. 191)

The department sponsors minors in Classical Archaeology (p. 192), Classical Civilization (p. 192), Greek (p. 192), and Latin (p. 193).

Classical Archaeology Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
E-mail: classics@illinois.edu

Minimum required major and supporting course work normally equates to 42-48 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the campus general education language requirement with one of the classical languages.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department’s honors committee at the earliest opportunity.

Classical Civilization courses of which at least 20 hours must be chosen from the following list:

Classical Civilization Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
E-mail: classics@illinois.edu

Minimum required major and supporting course work normally equates to 42-48 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the campus general education language requirement with one of the classical languages.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department’s honors committee at the earliest opportunity.

Classical Civilization courses at the level of 114 and above 30

**Communication**

David Tewksbury, Head of Department

3001 Lincoln Hall, 702 South Wright, Urbana

PH: (217) 333-2683

http://communication.illinois.edu

The Communication major prepares 21st century students to become critical thinkers, avid consumers of information, and effective problem solvers in both their personal and professional lives.

The goal of the Communication course of study is for undergraduates to learn about communication from a broad liberal arts perspective. Students will study the nature of effective communication across domains, develop effective communication skills, and gain knowledge of how to help others improve their skills. Students gain theoretical and practical knowledge of public advocacy and debate and the critical capacity to evaluate the face-to-face and mediated political and cultural information upon which we all depend. They also should achieve a sophisticated understanding of the political and social import of communication on all aspects of public and private life, from public policy and health care to cultural norms, personal interactions, and notions of racial, class, gender, and sexual identity.

Communication is an appropriate major for:

- students seeking a general liberal arts education, with a particular focus on communication issues
- students preparing for careers in many different fields involving communication skills (for example, law, business management, sales, public relations, human resources, corporate communication, consulting, media-related fields, or politics)
- students preparing for graduate work in areas such as communication, media studies, public policy, or public health
- students preparing for advanced study in law, medicine, business, or human resources

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

**Major in Sciences and Letters Curriculum**

E-mail: communication@illinois.edu

Minimum required major course work equates to a minimum of 37 hours of Communication courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

At least 15 hours of the required 37 hours in Communication must be at the 300 level or above.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: Superior students are encouraged to consult the departmental honors adviser about requirements and opportunities for participation in the departmental honors program.

</tr>
</tbody>
</table>

Communication Courses: Students will select an option (A or B) and a specialization (if Option B is chosen) in consultation with an undergraduate advisor in Communication.

**OPTION A:** Students who wish a general course of study will take at least one course from five of the following six areas and the remaining hours will be selected in consultation with an advisor.

**OPTION B:** Students who choose to concentrate within an area must take four courses from one of the six areas listed below and the remaining hours will be selected in consultation with an advisor. Students may complete more than one specialization by completing four courses in each area desired; however, individual courses may not be counted toward more than one specialization.

Special topics courses (CMN 199, CMN 396, or CMN 496) may count toward a specialization with the approval of an advisor; however, CMN 199, CMN 390, CMN 491, and CMN 493 taken as independent studies may not count toward the four required courses for a specialization.

Approved lists of courses within these areas are available from the Communication academic advisor:

- Communication and Culture
- Communication and Health
- Communication and Organizations
- Interpersonal Communication
- Mediated Communication and Technology
- Rhetoric and Public Communication

Total Hours 37

1 CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the minimum of 37 hours of Communication courses required for the major.

**Minor in Communication**

E-mail: communication@illinois.edu

The undergraduate minor in Communication is designed for students who wish to obtain a deeper understanding of communication processes.
and how they influence social, cultural, and political processes. It is appropriate for students majoring in a variety of disciplines in the social sciences or humanities and for students in professionally-oriented programs.

At least 6 hours must be at the 300-level or 400-level.

## Comparative and World Literature, Program in

Lilya Kaganovsky
3080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-4987
http://www.complit.illinois.edu/Welcome.html

A student who elects comparative literature as a major must complete 48 hours, including at least 12 hours in courses numbered 300 or above. The major comprises two concentrations, a Comparative Literature concentration (p. 195) and a World Literature concentration (p. 195) (foreign literatures in translation). Besides knowing English, the student who chooses the Comparative Literature concentration must have sufficient linguistic skill in at least one foreign language to participate in 200- to 400-level literature courses offered by the various foreign language and literature departments.

As soon as a student contemplates choosing comparative and world literature as a major, the faculty adviser should be consulted. The adviser will assist the student in selecting appropriate courses that will be especially helpful as preparation for the advanced comparative literature training beginning with the junior year. Courses in classical civilization and in literature (particularly courses dealing with works from several countries) are especially recommended at relatively early stages of study. An ample selection of such courses at the 100- and 200-levels exists in the various literature departments.

The distribution of course work allows for considerable flexibility. The major is administered by the Program in Comparative and World Literature.

## Comparative Literature Concentration

### For the Degree of Bachelor of Arts in Liberal Arts and Sciences

**Major in Sciences and Letters Curriculum**

E-mail: comlit@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum required major and supporting course work equate to 48 hours with at least 15 hours of Comparative Literature courses in the Comparative Literature concentration and 21 hours of Comparative Literature courses in the World Literature concentration.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

**Minimum hours required for graduation: 120 hours**

Departmental distinction. To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

### Comparative Literature Courses (minimum of 15 hours required):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CWL 201</td>
<td>Comparative Lit Studies</td>
</tr>
<tr>
<td>CWL 202</td>
<td>Literature and Ideas</td>
</tr>
</tbody>
</table>

The remaining hours should be selected from different types of courses (e.g., CWL 114, CWL 189, CWL 190, CWL 208, CWL 241, CWL 242, CWL 441, CWL 461, CWL 471).

One Literature in the Original Language (minimum of 15 hours required):

Ancient or modern (including Far Eastern and African) 12 hours of which are at the 200-level or above, studied in depth and in its historical development. (Normally this is the primary literature of the student’s educational background.)

Second Literature in the Original Language (minimum of 9 hours required):

200-level or above courses in a second literature in the original language. With the assistance of the adviser, these courses should be carefully chosen so as to correlate meaningfully with the student’s primary literature. A student may center his or her interest on a cultural period such as medieval, Renaissance, neo-classical and enlightenment, or modern (nineteenth and twentieth centuries), or on genres, relations, or critical theory.

Information listed in this catalog is current as of 04/2016

</tr>
</tbody>
</table>

The remaining hours should be selected from four of the following 100- or 200-level courses: CWL 114, CWL 151, CWL 189, CWL 190, CWL 208, CWL 241, CWL 242.

One of the following upper-level methodology courses
East Asian Languages and Cultures

Jerome Packard, Head of Department
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 244-1432
http://www.ealc.illinois.edu

The Department of East Asian Languages and Cultures offers two concentrations within the East Asian Languages and Cultures major. The goal of the East Asian Languages and Cultures Concentration is that the student gain an introductory knowledge of the civilizations of East Asia, a firm competence in an East Asian language, a solid familiarity with East Asian cultures through multiple disciplines, and a more advanced knowledge of the region including research and writing in a seminar or senior project. This concentration is useful for the student seeking a broad liberal arts education and preparation for graduate or professional study involving East Asia.

The Concentration Preparatory to the Teaching of East Asian Languages is to prepare its graduates for certification for teaching an East Asian Language (currently Mandarin Chinese or Japanese) in the public schools in Illinois.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain University of Illinois, cumulative, content area and professional education grade point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Minimum required course work normally equates to 89 hours.

General education: Consult the Curriculum Preparatory to the Teaching of Foreign Languages (http://catalog.illinois.edu/undergraduate/las/foreignlangteach).

Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.25 overall, a 3.5 average in the major and complete an approved project or series of projects. Consult the Japanese or Chinese teacher education advisor for details.

Foreign study: Future teachers of Mandarin or Japanese are strongly encouraged to engage in one or more semesters of study abroad in China or Japan. Some of the curricular requirements may be met through the Year-in-Japan Program at Konan University or other approved programs or at an exchange program in China.

Students must complete the Professional education course sequence and one teaching area of specialization sequence.

Professional education courses. See the Curricula Preparatory to Teaching Foreign Languages (http://catalog.illinois.edu/undergraduate/las/foreignlangteach)
Teaching Area of Specialization: Japanese

JAPN 201 & JAPN 202
Elementary Japanese I and Elementary Japanese II
10

JAPN 203 & JAPN 204
Intermediate Japanese I and Intermediate Japanese II
10

JAPN 305 & JAPN 306

The total of hours for Teaching Area of Specialization may be reduced by as much as 20 hours through prerequisite credit for work equivalent to Japan or Chinese 201 through 204 taken in secondary school or by demonstrated proficiency by examination.

Concentration in East Asian Languages and Cultures

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 37-57 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours.

One year of a single East Asian Language beyond the intermediate level (i.e., beyond CHIN 204 or CHIN 242; JAPN 204; KOR 204 or KOR 241). 1

Disciplinary and period courses: 2

EALC 120
East Asian Civilizations
12

One course on East Asia dealing substantially with the period before 1800

One course in East Asian history

One course in East Asian literature

Advanced courses:

Four non-language courses at the 300- or 400-level.

EALC 398
Colloquium in EALC (or an approved senior project.) 3

1 Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.

2 No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.

3 Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.

Economics

Martin Perry
101 David Kinley Hall, 1407 W. Gregory, Urbana
PH: (217) 333-2682
http://www.economics.illinois.edu/

Economics is a social science that studies the problems caused by scarcity and how individuals, institutions, and societies may deal with these problems. Economics shares common interests with business-oriented disciplines such as finance and business administration. Economists frequently require quantitative skills, such as calculus and statistics, to derive economic principles that are useful in forming policies designed to solve economic problems.

Creative Writing

Michael Rothberg
208 English Building, 608 South Wright, Urbana
PH: (217) 333-2391
http://www.english.illinois.edu

The Creative Writing major, administered by the Department of English, combines small workshops (poetry, fiction, nonfiction) and a variety of literature courses. The result is a strong but flexible program of study that develops students’ analytical and creative skills and prepares them for work of graduate study in any number of fields.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: english@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required core and supporting course work normally equates to 36 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus, of which at least three hours must be Creative Writing Courses (CW 404 or CW 406). All Creative Writing courses must be taken in sequence (CW 104 before CW 204, etc.).
General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

**Literature Foundational Coursework**

<table>
<thead>
<tr>

<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CW 243</td>
<td>Inter Expository Writing</td>
<td>3</td>
</tr>
</tbody>
</table>

**Creative Writing Coursework**

Students complete 12 hours of creative writing coursework, including at least one of the following 3-course (9-hour) sequences:

- **CW 106** Introductory Poetry Writing
  - **& CW 206** and Intermediate Poetry Writing
  - **& CW 406** and Advanced Poetry Writing

- or

- **CW 104** Introductory Narrative Writing
  - **& CW 204** and Intermediate Narrative Writing
  - **& CW 404** and Advanced Narrative Writing

The remaining three hours of writing coursework can be satisfied by a fourth CW workshop outside of the mandatory sequence or any of the following writing courses: ENGL 401, 402, 403, and 481; BTW 250, 261, and 271; CMN 310, 423, and 432; JOUR 475; and THEA 211

**ENGL 418** Shakespeare

or **ENGL 218 Introduction to Shakespeare**

**Literature Coursework:**

6 hours of English or American literature coursework chosen from approved list.

**Supporting coursework**

History and Culture Coursework: Choose one of the following pairs:

- **CWL 241** Lit Europe & the Americas I
  - **& CWL 242** and Lit Europe and the Americas II
- **HIST 141** Western Civ to 1660
  - **& HIST 142** and Western Civ Since 1660
- **HIST 171** US Hist to 1877
  - **& HIST 172** and US Hist Since 1877
- **HIST 255** British Isles to 1688
  - **& HIST 256** and Britain and World Since 1688

**Total Hours** 36

---

1 Credit is not given for both RHET 233 and CW 243. Students who have taken RHET 233 prior to declaring the CW major must take CW 208 instead of CW 243 to complete this requirement. Students who take CW 208 for their Expository Writing requirement cannot count CW 208 toward the required 12 hours of Creative Writing coursework.

**English Concentration**

E-mail: englishadvising@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 42 hours including a minimum of 36 hours of English Department courses.

Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 300, ENGL 301, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the major. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate/streams.html (http://www.english.illinois.edu/undergraduate/streams.html).

</tr>
</tbody>
</table>

**Period Courses (American, British, transatlantic, anglophone, etc.)**

At least two courses focused on literature, text, and/or culture in two or more of the following categories:

- Medieval (before 1550)
- Shakespeare
- Early modern (1550-1660 other than Shakespeare)
- The long eighteenth century (1600-1800)

One course focused on literature, text and/or culture in the category 1800-1900

**Additional Coursework**

At least four courses chosen from those controlled by or crosslisted with the Department of English (Business and Technical Writing, Creative Writing, and English).

One course must focus on race/ethnicity/indigeneity/post-coloniality/sexuality. This course can be used to fulfill part of the Textual Analysis, Period Courses, or Additional Coursework requirements.

Supporting Coursework—History and Culture Coursework: Choose one of the following pairs:

- **CWL 241** Lit Europe & the Americas I
  - **& CWL 242** and Lit Europe and the Americas II
- **HIST 141** Western Civ to 1660
  - **& HIST 142** and Western Civ Since 1660

---

Information listed in this catalog is current as of 04/2016
English Teaching Concentration

http://english.illinois.edu

This concentration is designed for students preparing to teach English at the secondary level.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: englishadvising@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required concentration and supporting coursework normally equates to 78 hours. 36 hours of English Department courses, 6 hours of supporting coursework (History and Culture Coursework), and 37-38 hours of courses from the Teaching Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement. In addition students must take a speech performance course, CMN 101, or course sequence CMN 111 and CMN 112. Completion of the CMN 111/CMN 112 sequence also satisfies the Campus Composition I requirement.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Prerequisites to transfer to the Teaching Concentration. In addition to EPSY 201 and EPS 201, students must also complete ENGL 200 and at least nine hours from ENGL 209, ENGL 210, ENGL 255, or ENGL 256 prior to transfer into the Teaching Concentration.

Note: In addition to the requirements for the concentration listed below, students must complete the Teaching Education Minor in Secondary School Teaching (p. 81) (37-38 hours). Conferral of the degree of Bachelor of Arts in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office.

While it is possible to complete this program in 8 semesters, many students may require an extra semester or two.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the concentration. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate/streets.html (http://www.english.illinois.edu/undergraduate/streets.html).

Teacher Education Minor in Secondary School Teaching: 37-38

The professional education component of the program will be divided into two phases:

Pre-education courses:
- EPSY 201 Educational Psychology (prerequisite: PSYC 100)
- EPS 201 Foundations of Education

The professional education sequence as approved by the Council on Teacher Education:
- 5 semester hours in the fall of the junior year
- 6 in the spring of the junior year
- 8 in the fall of the senior year
- 12 in the spring of the senior year (combining courses in pedagogy and the student teaching experience)

Total Hours: 80-81

1. Students are encouraged to take ENGL 209 and ENGL 255 as early as possible after completing ENGL 200.
2. Chosen from the list maintained in the Department of English.
3. Student may count 1 Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

French and Italian

Marcus Keller
2090 Foreign Languages Building, 707 South Mathews Avenue, Urbana
PH: (217) 333-2020
http://www.frit.illinois.edu
French-Italian@illinois.edu

The Department offers three majors - French, Italian and Teaching of French - two minors - French and Italian - and a 5-year BA/MA in French or Italian and European Union Studies.

The BALAS in French allows students to specialize in one of the following concentrations:

- The French Studies concentration focuses on courses in language, literature and culture, film and linguistics.
- The Commercial French Studies concentration combines a focus in French with appropriate courses in business.
- The BALAS in Italian allows students to study Italian language, literature, film, linguistics, and cultural studies.
- The B.A. in the Teaching of French prepares students to teach French.
- Study Abroad opportunities enhance the undergraduate education in French and Italian.
- The minors in French and Italian offer a unique opportunity for students to enhance their education with the study of language and culture courses.

5 Year BALAS/MA in French and European Union Studies allows students to receive two degrees, a BALAS in French and an MA in European Union Studies.

5 Year BALAS/MA in Italian and European Union Studies allows students to receive two degrees, a BALAS in Italian and an MA in European Union Studies.

5 Year BALAS/MA in French or Italian and European Union Studies
The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in French or Italian and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Information listed in this catalog is current as of 04/2016
**Gender and Women's Studies**

Stephanie Foote  
1205 W. Nevada Street, Urbana  
PH: (217) 333-2990  
http://gws.illinois.edu

The mission of the Department of Gender & Women’s Studies is to examine relationships of power, identity and transformation by:

1. reading narratives and representations  
2. questioning institutions and cultures  
3. challenging discrimination and inequity; and  
4. understanding racialized, sexualized, and queer bodies

A major in Gender & Women’s Studies encourages students to think broadly about intersections of race, gender and sexuality while challenging discrimination and inequities. Students majoring in Gender & Women’s Studies gain foundational skills to examine gender, race, class, ethnicity, religion and sexuality in relation to local, national, colonial, post-colonial and transnational contexts. The major forges together an array of feminist and intersectional approaches which draw upon social sciences, humanities, sciences, arts and community engagement. Students will sharpen their abilities to critically analyze gender, approach problems theoretically, and utilize cross-disciplinary research methods to question institutions and cultures.

**Major in Sciences and Letters Curriculum**

E-mail: gws@illinois.edu  
www.gws.illinois.edu (http://www.gws.illinois.edu)

Minimum required courses: 33 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a cumulative grade-point average (GPA) of 3.5 and a 3.5 GPA within the major.

High distinction. To be eligible for graduation with high distinction, a student must have a cumulative grade point average (GPA) of 3.5, a GPA of 3.7 within the major, and complete a thesis or project in a 400-level GWS course that is approved by the department.

Advising: The Department of Gender and Women’s Studies provides advising for students to help plan a coherent program of study.

**Required Courses**

</tbody>
</table>

**Additional Coursework**

At least 15 additional hours of coursework offered by the Gender & Women’s Studies Department, with no more than 3 hours at the 100 or 200 level. Required courses are offered by the Department of Gender & Women’s Studies and are on an approved list maintained in the department office and with the GWS advisor.

**Area Electives**

Two courses in Gender and Women’s Studies. No more than one may be counted from the 100 or 200 level. For a list of approved courses contact the GWS department or the GWS advisor.

Of the 33 hours in the major, students must take at least one course focused on transnational or non-U.S. issues. For a list of approved courses contact the GWS department or the GWS advisor.

Total Hours: 33

1 Topics courses (GWS 199, GWS 295, GWS 395, GWS 495) may count up to 3 hours toward the additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

- Minor in Gender and Women’s Studies (p. 205)
- Minor in LGBT/Queer Studies (p. 205)

Information listed in this catalog is current as of 04/2016
Minor in Gender and Women's Studies

A minor in GWS provides complementary tools for many majors in the humanities, arts and sciences. The minor advocates actively reading, questioning, challenging, and understanding racialized, sexualized, and gendered bodies. The Department of Gender and Women’s Studies must approve a student’s minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

E-mail: gws-email@illinois.edu

</tr>
</tbody>
</table>

Additional Coursework: At least 9 additional hours of coursework offered by the Gender and Women’s Studies Department at the 300- or 400-level. Required courses consist of a selected list of courses offered by the Department of Gender & Women’s Studies; they are on an approved list maintained in the department office and with the GWS advisor. ¹

3 hours of area electives at any level. For a list of approved courses contact the GWS department office or the GWS advisor.

At least 6 hours of advanced coursework must be distinct from credit earned for the student’s major or another minor.

Minor in LGBT/Queer Studies

The LGBT/Queer Studies minor provides students the opportunity to explore how various political, social, and cultural definitions of sexual identities and their expression have been constructed and challenged in different places and points in time. Attention is given to queer politics, and interactions with nation, race, ethnicity, and gender. A minor in LGBT/ Queer Studies provides complementary tools for many majors in the humanities, arts and sciences.

The Department of Gender and Women’s Studies must approve a student’s minor course plan. Students must register their minor with the Gender and Women’s Studies advisor.

GWS 202 Sexualities ³
or GWS 255 Queer Lives, Queer Politics
GWS 370 Queer Theory ³

Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

Geography and Geographic Information Science

Sara McLafferty
255 Computing Applications Building, 605 East Springfield, Champaign, IL 61820
PH: (217) 333-1880
http://geog.illinois.edu

The Department of Geography and Geographic Information Science offers four areas of undergraduate specialization.

General Geography (p. 207)
Geography majors study how space on the earth’s surface is arranged and occupied. Majors in the General Geography track can sample courses from different subfields of geography without having to choose one specialty of the discipline. Upon completion, the students are prepared for a number of diverse employment opportunities, or for further studies in our graduate program in geography.

Geographic Information Science (GIS) (p. 207)
The GIS program emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS program provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth’s systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

Human Geography (p. 208)
The Human Geography option gives students an opportunity to pursue specialization in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences through patterns and processes. Employment opportunities for the Human Geographer include: urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Physical Geography (p. 209)
The Physical Geography option is for those wishing to specialize in the earth science emphasis of modern geography. Patterns of climates, land...
forms, vegetation, soils, and water are all included in this option. As a graduate, Physical Geography majors will be equipped for careers in weather forecasting, land and water resources management, rangelands, and river management.

The department also offers a minor in Geography and GIS. The minor will expose students to a comprehensive selection of courses embracing our three broad areas of study: human geography, physical/environmental geography, and geographic information science.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
E-mail: geograph@illinois.edu

Students must complete the core requirements listed below and select one concentration in consultation with an academic advisor.

- General Geography Concentration (p. 207)
- Geographic Information Science Concentration (p. 207)
- Human Geography Concentration (p. 208)
- Physical Geography Concentration (p. 209)

Geography and Geographic Information Core Requirements

Geology

Tom Johnson
156 Computing Applications Building, 605 East Springfield, Champaign, IL 61820
PH: (217) 333-3540
http://www.geology.illinois.edu
The Sciences and Letters Curriculum major in Geology, administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose one concentration: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

The Specialized Curriculum in Geology and Geophysics is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology concentrations, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one concentration: Geology, Geophysics, or Environmental Geology.

The Department of Geology also sponsors the Minor in Geology.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
Select one concentration in consultation with an adviser.
- Earth and Environmental Science Concentration (p. 211)
- Earth Science Teaching Concentration (p. 210)
- Geology Concentration (p. 212)

For the Degree of Bachelor of Science in Geology

Major in Specialized Curriculum in Geology and Geophysics
Select one concentration in consultation with an adviser.
- Geology Concentration (p. 213)
- Geophysics Concentration (p. 214)
- Environmental Geology Concentration (p. 212)

Minor in Geology
The geology minor is designed for students who desire a significant background in Geology to support study and practice of their major field. Selection of courses at the 300- or 400- level will depend on the major and interests of the student.

E-mail: geology@illinois.edu
Web address for department: www.geology.illinois.edu (http://www.geology.illinois.edu)

GEOL 107  Physical Geology

Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Earth Science Teaching Concentration within the Sciences and Letters Curriculum

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: geology@illinois.edu
Web address for department: www.geology.illinois.edu (http://www.geology.illinois.edu)

Minimum required course work normally equates to 56-60 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement. In addition, students must take one of the following speech performance courses: CMN 101, CMN 113, CMN 321, or CMN 323.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Completion of this concentration fulfills state certification requirements to teach both earth science and general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: The student must have a grade-point average of at least 3.5 in all geology courses as well as all courses in the Teacher Education Minor and a GPA of at least 3.0 in all other science and mathematics courses and must present evidence of exemplary teaching.

Prerequisites to transfer to the Teaching Concentration (must be completed or be in progress):

Earth and Environmental Science Concentration within the Sciences and Letters Curriculum

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: geology@illinois.edu

Minimum required coursework normally equates to 43 hours including at least 26 hours in Geology.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least four hours of credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Ten to twelve hours of additional advanced geology courses

Six to eight hours Environmental Studies electives. (see Geology advisor for list of approved courses)

1 Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

2 An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended.
Environmental Geology Concentration within the Specialized Curriculum

For the Degree of Bachelor of Science in Geology

Major in Specialized Curriculum in Geology and Geophysics

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

E-mail: geology@illinois.edu

Web address for department: www.geology.illinois.edu (http://www.geology.illinois.edu)

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours

Departmental distinction: Students who maintain a grade point average of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least 4 hours credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Chemistry- Select one group of courses: 8-9

CHEM 102 General Chemistry I
CHEM 103 General Chemistry Lab I
CHEM 104 General Chemistry II
CHEM 105 General Chemistry Lab II
or
CHEM 202 Accelerated Chemistry I
CHEM 203 Accelerated Chemistry Lab I
CHEM 204 Accelerated Chemistry II
CHEM 205 Accelerated Chemistry Lab II

24 hours of Geology Courses

GEOL 107 Physical Geology 1 4
GEOL 208 History of the Earth System 4
GEOL 380 Environmental Geology 4
GEOL 401 Geomorphology 4
GEOL 451 Env and Exploration Geophysics 4
or GEOL 452 Introduction to Geophysics 4
GEOL 470 Introduction to Hydrogeology 4

Mathematics 11-12

MATH 220 Calculus 1
or MATH 221 Calculus I
MATH 231 Calculus II
MATH 241 Calculus III

Physics 8-10

 PHYS 211 University Physics: Mechanics & PHYS 212and University Physics: Elec & Mag
or
 PHYS 101 College Physics: Mech & Heat & PHYS 102and College Physics: E&M & Modern

Statistics- Select one of the following: 4
CPSC 440 Applied Statistical Methods I
STAT 400 Statistics and Probability I

Additional Technical Requirements 24

Select from the following courses. At least 9 hours must be geology courses and at least 9 hours must be non-geology courses.

CEE 330 Environmental Engineering
CHEM 232 Elementary Organic Chemistry I
CS 101 Intro Computing: Engrg & Sci
CS 125 Intro to Computer Science
ENVS 431 Environ Toxicology & Health
GEOG 477 Introduction to Remote Sensing
GEOL 411 Structural Geol and Tectonics
GEOL 417 Geol Field Methods, Western US 2
GEOL 432 Mineralogy and Mineral Optics
GEOL 436 Petrology and Petrography
GEOL 440 Sedimentology and Stratigraphy
GEOL 460 Geochemistry
MATH 225 Introductory Matrix Theory
MATH 415 Applied Linear Algebra
MATH 285 Intro Differential Equations
MATH 441 Differential Equations
MCB 100 Introductory Microbiology
MCB 101 Intro Microbiology Laboratory
PHYS 213 Univ Physics: Thermal Physics
PHYS 214 Univ Physics: Quantum Physics
STAT 420 Methods of Applied Statistics
TAM 210 Introduction to Statics
TAM 211 Statics

Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

CEE 417 is a 6-hour summer field course taught off campus.

Geology Concentration within the Sciences and Letters Curriculum

For the Degree of Bachelor of Science in Liberal Arts and Sciences

1 Students transferring into the geology concentration from another science or engineering program may substitute up to 8 hours of 300- or 400-level science or engineering credits for 8 hours of 300- or 400-level geology courses with departmental approval.

2 Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

3 GEOL 417 is a 6-hour summer field course taught on campus.

Geophysics Concentration within the Specialized Curriculum

For the Degree of Bachelor of Science in Geology

Major in Specialized Curriculum in Geology and Geophysics

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

E-mail: geology@illinois.edu

Web address for department: www.geology.illinois.edu (http://www.geology.illinois.edu)

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours

Departmental distinction: Students who maintain a grade point average of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least 4 hours credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Chemistry: Select one group of courses:

</table>

Six hours of other 300- or 400-level science, math, or engineering courses selected with adviser approval.

1 Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Germanic Languages and Literatures

Stephanie Hilger
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-1288
http://www.germanic.illinois.edu

The Department of Germanic Languages and Literatures offers the following majors and minors along with study abroad programs:
The **BALAS in Germanic Languages and Literatures** serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, and science. Students specialize in one of the following concentrations:

- Modern German Studies Concentration
- German and Commercial Studies Concentration
- Language and Literature Concentration
- Languages Studies Concentration
- Scandinavian Studies Concentration

The **BA in the Teaching of German** prepares students to teach in German.

The **5 year BALAS/MA in Germanic Languages and Literatures** allows students to receive two degrees, a BALAS in Germanic Languages and Literatures and an MA in German.

The **minor in German** offers students a background in the language through the advanced undergraduate level, an introduction to the study of German literary classics, and a knowledge of the history of German culture.

The **minor in Scandinavian Studies** offers students exposure to the study of a Scandinavian language and broad knowledge of Scandinavian culture, literature, film, art, and history.

The **5 Year BALAS/MA in German and European Union Studies** allows students to receive two degrees, a BALAS in Germanic Languages and Literatures and an MA in European Union Studies.

**For the Degree of Bachelor of Arts in Liberal Arts and Sciences**

Students must select one concentration in consultation with an adviser.

- Modern German Studies Concentration (p. 218)
- German and Commercial Studies Concentration (p. 216)
- Language and Literature Concentration (p. 217)
- Languages Studies Concentration (p. 216)
- Scandinavian Studies Concentration (p. 218)

**For the Degree of Bachelor of Arts in the Teaching of German**

Curriculum Preparatory to the Teaching of German (p. 215)

**5 year BALAS/MA in Germanic Languages and Literatures**

The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Languages and Literatures and an MA in German. In order to be admitted to this program, student can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their second year, students will need to be in good standing, have finished GER 211 and GER 331, have a general GPA of 3.0, and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their third year, students will have to have finished GER 401 and GER 420, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students’ admission to the 5-year program will be made by the graduate admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

**5 Year BALAS/MA in German and European Union Studies**

The Department of Germanic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in German (including a Scandinavian Studies Concentration) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the standalone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

- Minor in German (p. 217)
- Minor in Scandinavian Studies (p. 217)

**Curriculum Preparatory to the Teaching of German**

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: german@illinois.edu

Web address for department: www.germanic.illinois.edu (http://www.germanic.illinois.edu)

Degree title: Bachelor of Arts in the Teaching of German

Minimum required course work normally equates to 75 hours

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (http://catalog.illinois.edu/undergraduate/las/foreignlangteach).

Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation. Consult the certification officer
Departmental distinction: Students should consult their advisers by the second semester of the junior year for information pertaining to seminar honors work and honors awards in the department.

The total of 47 hours may be reduced by as much as 16 hours through prerequisite credit for work equivalent to GER 101-GER 104 taken in secondary school.

Total Hours 76

NOTE: GER 299 is strongly recommended.

German and Commercial Studies Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: german@illinois.edu

Minimum required major and supporting course work normally equates to 51 hours with at least 31 hours in German.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

The German and Commercial Studies concentration is designed to provide students with an understanding of the language and customs of the business world in German-speaking countries, together with study of international affairs and commerce, especially trade with Europe.

Minimum of 31 hours of German courses including:

<table>

Courses outside of German language and literature selected in consultation with the major adviser.

## Minor in German

The minor in German offers students a background in the language through the advanced undergraduate level, an introduction to the study of German literary classics, and a knowledge of the history of German culture.

E-mail: german@illinois.edu

Web address for department: www.germanic.illinois.edu (http://www.germanic.illinois.edu)

Select four of the following:

| GER 104 | Intermediate German II |
| GER 211 | Conversation and Writing I |
| GER 212 | Conversation and Writing II |
| GER 320 | German for Business |
| GER 321 | German for Economics |
| GER 401 | Global Issues in German |

Select one of the following:

| GER 331 | Intro to German Literature |
| GER 332 | German Literature and Culture |
| GER 465 | Ling Structures of German |
| GER 470 | Middle Ages to Baroque |
| or GER 471 | Enlightenment to Romanticism |
| GER 472 | Realism to Expressionism |
| GER 473 | 1920s to Today |

Total Hours: 19

## Minor in Scandinavian Studies

The Minor in Scandinavian Studies offers students exposure to the study of a Scandinavian language and broad knowledge of Scandinavian culture, literature, film, art, and history. Prerequisite: SCAN 101 or the equivalent.

E-mail: german@illinois.edu (german@uiuc.edu)

Web address for department: www.germanic.illinois.edu (http://www.germanic.illinois.edu)

Any of the following, with at least 6 credits at the 300- or 400-level:

| SCAN 102 | Beginning Scandinavian II |

Total Hours: 18 to 22

---

Information listed in this catalog is current as of 04/2016
Modern German Studies Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum

E-mail: german@illinois.edu

Minimum required major and supporting course work normally equates to 51 hours with at least 31 hours in German.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

Fulfilling the requirements for the Major usually involves one semester of study abroad at a Scandinavian university.

Language Courses beyond SCAN 101-SCAN 102: 1

1. Students with credit in SCAN 103 and SCAN 104 will not receive credit for SCAN 110.

Information listed in this catalog is current as of 04/2016
The Global Studies major develops knowledge sets, skills and values necessary for the analysis and solution of contemporary world problems. The requirements of the major enrich, complement, and coordinate departmental offerings with the goals of:

- providing knowledge of diverse cultures: their social, economic and political interactions and impacts on the world;
- developing skills for successfully negotiating realities of contemporary societies;
- fostering values that respect diverse ways of living and deepen commitment to sustainability.

The Global Studies major is interdisciplinary, drawing upon the resources of faculty and departments across the university. The major has three elements. The Foundations requirement introduces a variety of global issues and skills necessary for their analysis. The Language and Culture requirements allow students to develop area expertise in one world region through on-campus coursework and a semester-long study abroad. The Thematic Area focuses student programs on a topic of global importance to allow for an in-depth and multidisciplinary understanding of relevant historical and emerging issues, how they are analyzed and addressed. Students work with an advisor to customize the major curriculum most appropriate to their individual interests and career plans.

This program of study was developed in response to the growing demand for knowledge and skills to successfully navigate concerns at international and global levels. The competencies established through this program are critical for students preparing for careers or further study in a variety of fields including international affairs, public policy, business, law, finance, education, and communications.

The LAS Global Studies program with the European Union Center offers a 5 Year BALAS/MA in Global Studies and European Union Studies.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: globalstudies@illinois.edu

Minimum required major and supporting course work equates to 51-56 hours and includes a semester-long full time study abroad program and a minimum of 12 hours of 300- and 400-level courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who successfully completes 3 hours of GLBL 494 or other approved research methods course and who completes a distinction research project. See the departmental academic advisor for details.

Foundations Requirements

 Supporting coursework comprised of study in areas relevant for Scandinavian Studies, chosen in consultation with the Scandinavian Studies faculty advisor. Areas could include: Germanic Languages and Literatures, English, Linguistics, History, Political Science, Comparative and World Literatures, International and Area Studies, European Studies.

1 Students may substitute credit in SCAN 110 for SCAN 103 and/or SCAN 104. Students should meet with the Scandinavian advisor for information.
Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum of a minimum of 18 hours. Students cannot include more than 3 hours of 100-level work and must complete 9 hours of 300- and 400-level coursework. Courses must be taken from more than one department.

Approved thematic areas are:

A. Cultures in Contact
B. Wealth and Poverty in a Globalized World
C. Human Rights
D. Governance, Conflict and Resolution
E. Knowledge, Communication and Information Systems
F. Environment, Sustainability, and Social Responsibility
G. Global Health
H. Special Topic: Curriculum must be approved prior to pursuing a special topic.

GLBL 494 & GLBL 495 Research Methods I and Research Methods II (Senior Capstone. Students do an individual research project based on their Thematic Area.)

Total Hours 51-56

5 Year BALAS/MA in Global Studies and European Union Studies

The Program in Global Studies with the European Union Center offers a 5-year BALAS /MA degree program in Global Studies and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Minor in Global Studies

The Global Studies Minor provides a multidisciplinary study of a global theme with the requirement of advanced language training to promote the development of intercultural skills. In consultation with an advisor, students select 21 hours of thematically-related courses from a variety of departments to form a coherent program of study suited to individual interests, educational and/or career aspirations. The Global Studies Minor can complement any major.

E-mail: globalstudies@illinois.edu

Global Studies. Three courses must be selected from the approved course list; they must include no more than one course each from three of the following departments: Anthropology, Economics, Geography, History, Political Science, and Sociology.

Language and Culture. Select courses from the approved course list in a language other than your primary language. These various courses represent the 5th level of study or above.

Thematic Area: Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum. Students must choose 200- to 400-level courses and at least 6 hours must be at the 300- or 400-level.

Total Hours 21

A minimum of 6 hours of 300- and 400-level course work must be completed.

History

Clare Crowston, Chair of Department
309 Gregory Hall, 810 South Wright, Urbana
PH: (217) 333-1155
http://history.illinois.edu

Administered by the Department of History, students in the history concentration should acquire a broad background from the study of the human experience in different cultures and time periods. A wide distribution of courses is therefore advisable. This is especially true for those who wish to enter government service, or professional schools for law, social work, museum and library science, business administration, or labor and industrial relations. The Social Science: History Teaching Concentration (p. 221) prepares students to teach social studies in Secondary School. The department also offers an undergraduate minor.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Students must select one concentration.

- History Concentration (p. 221)
- Social Science: History Teaching Concentration (p. 221)

Minor in History

A history minor is designed for students who desire to understand the historical background of their major field and to provide an evolutionary or developmental perspective on the study and practice of their major field. Selection of courses will depend on the major and on the interests of the student.

E-mail: history@illinois.edu

Web address for department: www.history.illinois.edu (http://www.history.illinois.edu)

Students must have at least 9 hours in one of the following fields: US, European, or Nonwestern and 6 hours in a second of those fields.

Six hours of coursework in History at any level 1 6
A minimum of 9 hours of 300- or 400-level History courses taken on the Champaign-Urbana campus, with permission, 3 hours may be study abroad hours
A minimum of 6 hours of history courses above the 100 level 6

Total Hours 21

1 A maximum of 6 hours at the 100 level may be used in the minor.
History Concentration

E-mail: history@illinois.edu

Minimum required major course work normally equates to 36 hours of History courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Students must pass HIST 200 with a grade of a C (2.0) or better in order to remain in good standing in the major. Students transferring to the major after freshman year must have passed two 100-level history courses and have passed HIST 200 on this campus with a grade of C (2.0) or better. Transfer students must enroll in HIST 200 during their first semester on campus.

Minimum hours required for graduation: 120 hours

Departmental distinction:

To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 495, HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR

2. the completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only (not high or highest distinction).

Minimum of 36 hours of History courses including:

Two introductory History courses at the 100 level (preliminary coursework)

<table>

Select one of the following:

- ANTH 143 Biology of Human Behavior
- ECON 102 Microeconomic Principles
- ECON 103 Macroeconomic Principles

HIST 140 Western Civ to 1660-ACP 3-4
or HIST 141 Western Civ to 1660
HIST 142 Western Civ Since 1660 3-4
or HIST 143 Western Civ Since 1660-ACP

One additional History course (HIST 200 - Intro Hist Interpretation recommended) 1

1 HIST 200 is required for the major and recommended for transfer into the program.

The four history courses above will count toward the 36 hours required in history courses overall to complete the concentration but only one of the 4-hour Advanced Composition History courses (HIST 140, HIST 143, HIST 170, HIST 173) may be used.

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 81) (37-38 hours). See the College of Education (p. 73) for requirements of the minor. Conferral of the degree of Bachelor of Arts in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office.

You must also complete 50 hours of tutoring at the secondary level and pass the Illinois Basic Skills Test. Please contact the Director of Secondary Education Programs for more information about these and all of the requirements for the teaching concentration.

HIST 141 Western Civ to 1660 3-4
or HIST 140 Western Civ to 1660-ACP
HIST 142 Western Civ Since 1660 3-4
or HIST 143 Western Civ Since 1660-ACP

United States History:

HIST 171 US Hist to 1877 4
or HIST 170 US Hist to 1877-ACP
HIST 172 US Hist Since 1877
or HIST 173 US Hist Since 1877-ACP
HIST 273 Illinois History
or HIST 288 American Indians of Illinois

One 200-400 level course in 18th-19th century
One 200-400 level course in 20th-21st century

Nonwestern and Global History:

- HIST 100 Global History
- One 200-400 level course in global or nonwestern history

European History:

- One 200-400 level course to 1700
- One 200-400 level course since 1700
- HIST 200 Intro Hist Interpretation 3

Students must take HIST 498 - Research and Writing Seminar or HIST 495 - Honors Research & Writing Sem (for those students in the Honors Program). Students may count the 3 hours towards any of the history areas noted above: US, Nonwestern/Global, or European.

Social Science Requirement (many of these will also satisfy general education requirements):

- PS 100 Intro to Political Science
- PS 101 Intro to US Gov & Pol
- PS 240 Intro to Comp Politics
- PS 241 Comp Politics in Dev Nations
- SOC 100 Introduction to Sociology
- SOC 380 Social Research Methods
- ANTH 143 Biology of Human Behavior
- ANTH 230 Sociocultural Anthropology
- PSYC 100 Intro Psych
- ECON 102 Microeconomic Principles
- ECON 103 Macroeconomic Principles
- GEOG 103 Earth’s Physical Systems
- GEOG 104 Social and Cultural Geography

Integrative Biology, School of

Carla Caceres
286 Morrill Hall, 505 South Goodwin Avenue, Urbana
PH: (217) 333-3044
http://sib.illinois.edu/

Students in Integrative Biology (http://sib.illinois.edu/undergraduate/) focus on the disciplines of genetics, physiology, behavior, ecology and evolution. In Integrative Biology, the emphasis is on bringing multiple disciplines to bear on complex scientific questions. From genomics to global change, Integrative Biology seeks to discover the complex interrelationships between organisms and the physical and biological environment in which they live. This major prepares students for careers in medicine and the health professions, research, organisms, and the environment. The School of Integrative Biology also sponsors two minors. The Minor in Integrative Biology is designed for students intending to have a career for which a background in integrative biology is complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. The Minor in Ecology and Conservation Biology prepares students for diverse careers, including environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.
For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
Students must select one concentration.

- Integrative Biology Concentration (p. 223)
- Integrative Biology Honors Concentration (p. 223)
- Minor in Integrative Biology (p. 225)
- Minor in Ecology and Conservation Biology (p. 224)

Integrative Biology Concentration
For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
E-mail: sib@illinois.edu

The Integrative Biology Concentration provides students with a solid preparation in genetics, evolution, anatomy, physiology, ecology, and molecular biology. After completion of the foundational 100- and core 200-300-level courses in IB, students complete the required advanced coursework by taking a variety of IB and other courses or focusing on a limited area of IB. Plans for the student’s combination of advanced courses are developed in consultation with an adviser.

All undergraduates in this field are required to have a strong background in the biological and physical sciences. Students who do not begin mathematics, chemistry, and biology in their freshman year generally will be at a disadvantage.

Students pursuing a degree in Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Minimum Required Courses normally equate to 66-76 hours.

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum Hours Required for Graduation: 120 hours

Integrative Biology Distinction: To be eligible for distinction a student must graduate with a grade-point average of at least 3.25 and submit a report of an independent student project (IB 490) about two months prior to graduation for approval by the Integrative Biology Distinction Committee. For additional information visit: http://sib.illinois.edu/undergraduate/distinction

Integrative Biology Honors provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors.

E-mail: honors@sib.illinois.edu (ibhonors@life.illinois.edu)

Minimum required courses normally equate to 82-89 hours including 25 hours of 300- and 400-level courses.

Students earning the Integrative Biology Honors Concentration will automatically complete the Chemistry minor.

Students pursuing a degree in Integrative Biology Honors will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology Honors will not be allowed to double major in Molecular and Cellular Biology.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

No more than 8 hours of credit in 100-level courses in IB or MCB may be counted toward graduation.

Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.

Substitutions or other changes in the requirements below may be made only by petition to and approval of the director of the Integrative Biology Honors Concentration.

Minimum hours required for graduation: 120 hours

Departmental distinction: Candidates for distinction must:

1. Consult with an IB Honors adviser no later than the beginning of their junior year to discuss their proposed research plan.
2. Present an acceptable written report on the research to the Integrative Biology Distinction Committee about two months prior to graduation. The research must have been an in-depth experience and produced substantial results to be considered eligible for distinction. Additional details on requirements, procedures, and deadlines are available at sib.illinois.edu (http://www.sib.illinois.edu).

Students must consult with their Integrative Biology Honors adviser at least once each semester.

IB 150 Organismal & Evolutionary Biol 4
MCB 150 Molec & Cellular Basis of Life 4
IB 270 Evolution of Molecules & Cells 5
IB 271 Organismal Biology 5
IB 372 Ecology and Evolution 5
MATH 220 Calculus 4-5
or MATH 221 Calculus I 4
MATH 231 Calculus II 3
MATH 241 Calculus III 4
Select one group of courses: 14-16
CHEM 202 Accelerated Chemistry I
CHEM 203 Accelerated Chemistry Lab I

Information listed in this catalog is current as of 04/2016

CHEM 204 Accelerated Chemistry II
CHEM 205 Accelerated Chemistry Lab II
CHEM 236 Fundamental Organic Chem I
CHEM 237 Structure and Synthesis
or
CHEM 102 General Chemistry I 2
CHEM 103 General Chemistry Lab I
CHEM 104 General Chemistry II
CHEM 105 General Chemistry Lab II
CHEM 236 Fundamental Organic Chem I
CHEM 237 Structure and Synthesis

MCB 450 Introductory Biochemistry 3
BIOC 455 Technqs Biochem & Biotech 4
Select one group of courses 8-12
PHYS 211 University Physics: Mechanics
PHYS 212 University Physics: Elec & Mag
OR
PHYS 101 College Physics: Mech & Heat
PHYS 102 College Physics: E&M & Modern
One 400-level course in biological or earth systems modeling 3
An approved 300- or 400- level course in statistics 4 3
IB 490 Independent Study (2 semesters) 6
300- or 400- level courses in the biological sciences 10

1 Continuation in the Integrative Biology Honors Concentration requires a grade of B or better in each of IB 270, IB 271, and IB 372 and a 3.0 overall GPA.
2 Introductory chemistry should be completed prior to enrolling in IB 270.
3 IB 494 is recommended. Other suitable courses are ATMS 421 or GEOG 477.
4 NRES 421 is recommended. Other suitable courses are CPSC 440 or STAT 400.

Minor in Ecology and Conservation Biology

The minor, administered by the School of Integrative Biology, is designed for students interested in gaining strength in this subdiscipline of biology. Preparation for many careers is advanced by coursework in ecology and conservation, e.g. environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.

Students must contact an SIB advisor for acceptance into the minor. Web address for School advising information: sib.illinois.edu/undergraduate/advising (http://sib.illinois.edu/undergraduate/advising)

IB 150 Organismal & Evolutionary Biol 4
IB 203 Ecology 4
IB 204 Genetics 3 OR 4
Select two of the following: 6-8
NRES/IB Fish and Wildlife Ecology 348
IB 431 Behavioral Ecology
### Minor in Integrative Biology

The minor, administered by the School of Integrative Biology, is designed for students intending to have a career in a field other than biology, but for whom a background in biology is nevertheless complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. A minor in integrative biology provides an understanding of fundamental principles for one major subdiscipline of biology, whether this be organismal and evolutionary biology; behavior, ecology and the environment; or integrative anatomy, physiology, and molecular biology.

Students must contact an SIB advisor for acceptance into the minor.

Web address for School advising information: sib.illinois.edu/undergraduate/advising

Select one of the following: 4
- IB 150 Organismal & Evolutionary Biol
- IB 103 Introduction to Plant Biology
- IB 104 Animal Biology

Select two of the following: 6-8
- IB 202 Anatomy and Physiology
- IB 203 Ecology
- IB 204 Genetics
- IB 302 Evolution

Two additional courses at the 300 or 400 level (3-4 hours, some 5 hours) selected from the IB Area Courses. The prerequisite course(s) must be taken if specified by an advanced course. (http://sib.illinois.edu/courses/area)

### Interdisciplinary Studies

College of Liberal Arts and Sciences
2002 Lincoln Hall, 702 South Wright Street, Urbana
http://las.illinois.edu

### Interdisciplinary Studies Majors

Departments in the College of Liberal Arts and Sciences, in addition to their own disciplinary majors, have developed and sponsor an interdisciplinary program of study, which encompasses several distinct programs designed to acquaint students in a coherent manner with topics that cross disciplinary boundaries. Administered by the College of Liberal Arts and Sciences, the interdisciplinary studies major includes program concentrations in American Civilization, Jewish Studies, Medieval Studies, and Renaissance Studies. Although it is not possible to offer concentrations in all specialties or topics of humanistic study, students whose interests do not coincide with one of the specific concentrations are encouraged to consider developing their own programs through the Individual Plans of Study (IPS) major. Enrollment in the major in interdisciplinary studies requires election of one of the concentrations. The College of Liberal Arts and Sciences also sponsors an Interdisciplinary Minor in Science and Technology in Society.

Each concentration of the major in interdisciplinary studies is supervised by faculty members whose own scholarship and educational interests have involved them in interdisciplinary teaching and research. An advisor for students is available in each concentration and is responsible for approving students’ plans of study.

### For the Degree of Bachelor of Arts in Liberal Arts and Sciences

#### Major in Sciences and Letters Curriculum

Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

### Requirements for the Major

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the distribution requirements listed below; at least 25 hours must be at the 200,300 or 400 level.

- American Civilization Concentration (p. 226)
- Jewish Studies Concentration (p. 227)
Minor in Science and Technology in Society

The Interdisciplinary Minor in Science and Technology in Society requires students to integrate and synthesize a wide variety of materials. Students will enrich their experiences in diverse disciplines with a substantive engagement with science studies. Required courses in the minor emphasize critical and creative thinking and many courses require substantial writing and research. This minor is administered by the LAS Student Academic Affairs Office.

All courses must be selected in consultation with the adviser from the list of courses approved for the minor. No more than 3 hours of course work may be 100-level. Students must maintain a 3.0 GPA in course work in the minor.

American Civilization Concentration

This concentration offers a comprehensive introduction to the study of American civilization primarily through the study of art, history, literature, philosophy, and the social sciences.

Two introductory courses chosen with the approval of the concentration advisor; the introductory courses should provide a broad overview of the development of American culture; for example, HUM 141 and HUM 142.

Nine hours selected from the following: 9

Select in consultation with the concentration advisor from courses offered in the departments of anthropology, economics, geography, political science, and sociology.

HUM 397     Special Topics Junior (An advanced-level course with an American focus may be substituted with the approval of the advisor.) | 3 |

HUM 498     Special Topics Senior            | 3 |

Substitutions for any of the above specific courses may be permitted with the approval of the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.
Jewish Studies Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

All substitutions must be approved by the Advisor in the Program in Jewish Culture and Society Office (http://www.jewishculture.illinois.edu/academics/major). Substitution for specific courses listed will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

The Program in Jewish Culture & Society (http://www.jewishculture.illinois.edu/academics/major) sponsors this concentration.

This concentration provides the student with knowledge of the Hebrew language, the opportunity to begin a study of Yiddish, and a broad appreciation of Jewish religion, culture, and history.

JS 199 Undergraduate Open Seminar (An Independent Study experience to be arranged with a Jewish Studies affiliated faculty member)

Hebrew and/or Yiddish language courses, including:

HEBR 201 Elementary Modern Hebrew I
HEBR 202 Elementary Modern Hebrew II
HEBR 403 Intermediate Modern Hebrew I
HEBR 404 Intermediate Modern Hebrew II
HEBR 405 Advanced Modern Hebrew I
or YDSH 10 Beginning Yiddish I
RLST 205 Intensive Biblical Hebrew
or HEBR 40 Advanced Modern Hebrew II
or YDSH 10 Beginning Yiddish II

One course at the 100 or 200 level from each of the following clusters in the Jewish Studies Minor: Religion, Culture, and History. List maintained by the Advisor in the Program in Jewish Culture and Society Office.

Three courses at the 300 level or above from any of the four clusters in the Jewish Studies Minor: Religion, Culture, History, and Language. List maintained by the Advisor in the Program in Jewish Culture and Society Office.

Medieval Studies Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Substitution for specific courses listed above will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

The Program in Medieval Studies (http://www.medieval.illinois.edu/education/undergrad) sponsors this concentration.

This concentration introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographic regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; (III) advanced medieval coursework selected by the student in consultation with...
a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a diverse range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study in Medieval Studies should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Information listed in this catalog is current as of 04/2016

Additional Medieval Studies Coursework

Medieval-related coursework from participating departments requires approval of the concentration advisor. At least 12 hours must be at the 300- or 400-level. A list of courses in Medieval Studies is maintained on the Medieval Studies Program website. Up to 12 hours of appropriate language study can be applied to meet this requirement with approval of a Medieval Studies faculty advisor.

Capstone Experience

A capstone experience (normally in the student’s senior year) involving intensive interdisciplinary research and writing on a medieval topic. Any 400-level MDVL course (or medieval-related course not cross-listed with MDVL, with the approval of a Medieval Studies faculty advisor) can be designated as a capstone experience with approval of the instructor. For the course to qualify as a capstone experience, the student must undertake a substantial research project that supplements the standard course requirements, in the form either of an additional project or of a longer and more research-intensive version of an existing course project. The project must involve both primary and secondary research using advanced disciplinary methodologies and resources.

Renaissance Studies Concentration

This concentration incorporates course work in the Renaissance and related periods and places an emphasis on independent study and the completion of research papers in the junior and senior years.

NOTE: Students must acquire a reading knowledge of a foreign language relevant to their interests in Renaissance study, selected in consultation with the concentration advisor. These hours will not count towards the minimum of 45 hours required for this concentration.

Renaissance-related course work in a single discipline at the 200 to 400 level from among the following: art, history, literature, or music.

Renaissance-related course work in the following areas with at least one course in each: art, history, music, philosophy, and literature. At least one of these courses must be in classical literature or culture.

HUM 397 Special Topics Junior (An advanced-level course with a Renaissance focus may be substituted with the approval of the advisor.)

Total Hours 18

Of the 18 required hours, two courses (6 hours) must be 300- or 400-level courses. HEBR 403 and HEBR 404 cannot be used to satisfy this requirement.

Latin American and Caribbean Studies, Center for

Anna Maria Escobar, Director of Center
201 International Studies Building, 910 South Fifth Street, Champaign
PH: (217) 333-3182
http://www.clacs.illinois.edu

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student's interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken in at least three of these five areas or perspectives:

1. anthropological and geographical;
2. historical;
3. humanistic;
4. social, political, and economic;
5. ecological and environmental.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

Major in Latin American Studies

Major in Sciences and Letters Curriculum

E-mail: clacs@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 45 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.
Interdisciplinary Minor in Latin American Studies

The Center for Latin American and Caribbean Studies offers an interdisciplinary minor for students majoring in another discipline. The minor in Latin American Studies consists of a total of 21 credit hours selected from offerings by the Center and various departments. This program must be approved by the Associate Director.

The minor is for those students who wish to concentrate their work in a specific discipline yet maintain a Latin American focus in their coursework. For students completing a major sponsored by the College of Liberal Arts and Sciences, the department or unit sponsoring the student’s major must approve the minor.

E-mail: clacs@illinois.edu

Web address for department: http://www.clacs.illinois.edu

Two courses in a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America) beyond the level specified by the LAS language requirement, or the equivalent as demonstrated by special examination. At the end of their language study, all students are urged to take an oral proficiency test based on ACTFL guidelines.

</table>

1 Each student’s course of study is devised in consultation with the Associate Director of the Center for Latin American and Caribbean Studies and is subject to the Associate Director’s approval.

2 Normally taken in the freshman or sophomore year.

3 Normally taken in the senior year.

4 Includes 12 hours in one of the listed perspectives, 9 semester hours each in two other perspectives. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Information listed in this catalog is current as of 04/2016
General education: The LAS General Education requirements will fulfill the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Latina/Latino Studies courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Advising: The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

**Thematic Areas**

Students must take two courses in each of the following three areas. A list of courses is maintained in the Department’s office.

A. Literature, Media and Culture | 6
B. Race, Gender, and Sexuality   | 6
C. History, Politics, and Society| 6

No more than 3 hours may be at the 100 level and at least 6 hours must be 300 and 400-level courses.

Students must officially declare their minor by registering with the Latina/Latino Studies advisor.

Completion of the program requires a minimum grade point average of 2.75 (A+ = 4.0) in Latina/Latino Studies courses.

**Linguistics**

James Yoon  
4080 Foreign Languages Building, 707 South Mathews, Urbana  
PH: (217) 333-3563  
http://linguistics.illinois.edu

The Department of Linguistics offers undergraduate instruction of four types: courses in linguistics, in English as an International Language, English as a Second Language, and in non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest not only to linguistics majors, but to students in any field where the analysis of languages is important: anthropology, speech and hearing science, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages, and are useful to any students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with literatures and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture.

**Interdisciplinary Minor in Latina/Latino Studies**

The Interdisciplinary Minor in Latina/Latino Studies will allow students following any major plan of study to gain extensive knowledge in Latina/Latino Studies by completing seven courses (at least 21 credit hours) chosen in consultation with the Department of Latina/Latino advisor. The courses must form a coherent program of study and be approved by the Department of Latina/Latino Studies or Latina/Latino Studies advisor.

Undergraduate Major offered by the Department of Linguistics

- Linguistics

In addition, students may pursue linguistics as part of the LAS Major in Computer Science and Linguistics (p. 271).

Undergraduate Minors offered by the Department of Linguistics

- Arabic Studies
- English as a Second Language
- Hindi Studies
- Linguistics
- Sub-Saharan African Languages
Languages Offered by the Department of Linguistics

- African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu)
- Arabic
- Hindi
- Modern Greek
- Persian
- Sanskrit
- Turkish

Major in Linguistics

Major in Sciences and Letters Curriculum

E-mail: lasersoh@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum major and supporting course work normally equates to 50-52 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Students must complete 21 hours of coursework at the 300- or 400-level, including at least 12 hours of 300- or 400-level linguistics courses on this campus. These courses may be included in the core courses or electives.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

Major core courses:

- LING 100 Intro to Language Science
- LING 210 Language History
- LING 301 Elements of Syntax
- LING 302 Elements of Phonology
- LING 307 Elmnts Semantics & Pragmatics
- LING 401 Intro to General Phonetics

Select one of the following:

- LING 225 Language, Mind, and Brain
- LING 250 Language Diversity in the USA

Major electives: 15 hours of Linguistics courses at the 200- to 400-level, chosen in consultation with the student’s advisor. Students must fulfill the LAS foreign language requirement, and in addition, complete at least 8 hours in a second foreign language. One of these languages must be a non-Western language chosen from the following list or approved in consultation with the student’s advisor: American Sign Language, Arabic, Bamana, Basque, Chinese, Hebrew, Hindi/Urdu, Japanese, Korean, Lingala, Persian, Quechua, Sanskrit, Swahili, Turkish, Wolof, Zulu. Courses used to complete this requirement may also be used to meet the requirement of courses in linguistically relevant areas.

Courses in linguistically relevant areas chosen in consultation with the student’s advisor. There are two ways of meeting this requirement:

A. The courses may come from any of the following disciplines: any foreign language, anthropology, classics, computer science, English, English as an international language, philosophy, psychology, speech and hearing science, communication.

B. Students desiring to specialize in the linguistics of a particular language should complete at least four semesters of instruction in that language beyond the elementary level, and a linguistics course or independent study focusing on the selected language or its language family.

- Minor in Arabic Studies (p. 232)
- Minor in English as a Second Language (p. 233)
- Minor in Hindi Studies (p. 233)
- Minor in Linguistics (p. 233)
- Minor in Sub-Saharan African Languages (p. 233)
- Teacher Education Minor in English as a Second Language (p. 234)

Minor in Arabic Studies

The minor in Arabic Studies is designed for students interested in developing an expertise in one, or more, aspect of the Arab World, as complement to their disciplinary major. Completion of the minor requires at least 18 hours in applicable courses.

Language requirement

ARAB 405 Advanced Standard Arabic I
ARAB 406 Advanced Standard Arabic II

Arabic Culture and Linguistics courses

LING/ARAB 411 Survey of Arabic Varieties

3 hours: Choose one course from the following in consultation with the advisor: ARAB 150 - Lang:Culture of Arab World OR ARAB 210: Colloquial Arabic I or a Study Abroad Equivalent (must be approved by the advisor)

Two Interdisciplinary courses related to the Arab World (To be chosen from the following list in consultation with the advisor)

ARAB 407 Topics Stand Arabic Lang&Lit I
ARAB 408 Topics Stand Arabic LangLit II
ARAB 409 Adv Top Stand Arabic LangLit I
ARAB 410 AdvTop Stand Arabic LangLit II

**Minor in English as a Second Language**

This minor, sponsored by the Department of Linguistics, prepares a student to teach English overseas and in contexts other than U.S. public schools. Completion of the minor fulfills the course work requirement for a Certificate in Teaching English as a Second Language (TESL). To receive a Certificate in TESL and a letter of completion from the department, the student must apply for the Certificate after completing all certificate requirements. Students must declare their minor at the start of their study. The Certificate in TESL does not lead to ISBE State certification for K-12 Schools.

**Minor in Sub-Saharan African Languages**

The minor in Sub-Saharan African Languages is designed for students who are interested in developing proficiency in any one of the languages for which there is faculty expertise, and to develop their understanding of the region, as a complement to their disciplinary major. Available African
Languages include: Bamana, Lingala, Swahili, Wolof and Zulu. Completion of the minor requires at least 18 hours.

E-mail: gathogo@illinois.edu (Gathogo@illinois.edu)

**Languages**

Advanced African Language courses beyond the second year courses chosen in consultation with the minor advisor. Only one African Language can be chosen to fulfill this requirement.

**African Linguistics**

3 hours: Introductory course chosen from the following:

- LING 100 Intro to Language Science
- LING 400 Intro to Linguistic Structure

3 hours: 300 or 400-level course chosen from the following:

- LING 412 Lang in African Culture & Soc
- LING 420 Intro to African Linguistics

A similar course at the 300- or 400-level approved by the advisor.

**African Studies**

Courses must be selected in consultation with the advisor. One course chosen from the list of approved introductory courses; and one course chosen from the list of approved courses at the 300 or 400-level.

Note that many courses on the list require a prerequisite such as AFST 222 or HIST 110.

**Teacher Education Minor in English as a Second Language**

For those in another teacher education curriculum who want to prepare themselves to gain an ESL approval on their teacher’s certificate related to their major field. Teacher education minors are available only to students seeking to add additional teaching fields to their teaching majors.

Students are advised that additional course work is necessary to teach middle grades six through eight. Consult the certification officer at 505 East Green suite 203 for additional information.

E-mail: rsadler@illinois.edu

Select one of the following:

- EIL 214 TESL in the Elementary School
- EIL 215 TESL in the Secondary School
- EIL 422 Engl Grammar for ESL Teachers
- EIL 411 Intro to TESL Methodology

Select one of the following:

- EIL 456 Lang and Social Interaction I
- CI 446 Culture in the Classroom
- EIL 460 Principles of Language Testing
- EIL 488 English Phon & Morph for TESL
- LING 489 Theoretical Foundations of SLA

**Mathematics**

Matthew Ando, Department Chair
273 Altgeld Hall, 1409 West Green, Urbana
PH: (217) 333-3350
http://math.illinois.edu

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 during the first semester. Admission to MATH 220 requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

The Department of Mathematics sponsors the Mathematics major, including the Teaching of Mathematics concentration; the Mathematics minor; Teacher Education Minors; the Actuarial Science (p. 234) major; and a major in Mathematics and Computer Science (p. 237) in coordination with the Department of Computer Science.

**The Department of Mathematics offers the following majors:**

- **Actuarial Science** (p. 234) - an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management.

  Mathematics: Students must select a concentration in consultation with their adviser:

  - Mathematics Concentration (p. 236)
  - Graduate Preparatory Concentration (p. 236)
  - Applied Mathematics Concentration (p. 235)
  - Operations Research Concentration (p. 238)
  - Teaching of Mathematics Concentration (p. 240)

  Mathematics and Computer Science (p. 237) - Prepares students for professional or graduate work in mathematics and computer science.

  - Minor in Mathematics (p. 238)
  - Teacher Education Minor in Mathematics, Grades 6-8 (p. 239)
  - Teacher Education Minor in Mathematics, Grades 9-12 (p. 239)

**Actuarial Science**

Matthew Ando
273 Altgeld Hall, 1409 West Green, Urbana
PH: (217) 333-3350
http://www.math.illinois.edu/ResearchAreas/actsci.html

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial
profession, as well as to provide a background in quantitative finance and risk management. See also Mathematics (p. 234) and Mathematics and Computer Science (p. 237).

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

**Major in Sciences and Letters Curriculum**

E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 57-59 hours including 29-30 hours of mathematics beyond calculus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for distinction, the student must take MATH 472, have a grade point average in mathematics courses of at least 3.25, and pass at least six hours of examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least eight hours of professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

**Calculus through:**
- MATH 241 Calculus III (or equivalent) 11-12
- Select one of the following: 3
  - CS 101 Intro Computing: Engrg & Sci
  - CS 105 Intro Computing: Non-Tech
  - CS 125 Intro to Computer Science
- MATH 210 Theory of Interest 3
- MATH 408 Actuarial Statistics I 3-4
- or MATH 461 Probability Theory
- MATH 409 Actuarial Statistics II 4
- MATH 469 Methods of Applied Statistics 3
- MATH 410 Lin Algebra & Financial Apps 3
- MATH 471 Actuarial Theory I 4
- Select two of the following: 6
  - MATH 472 Actuarial Theory II
  - MATH 476 Actuarial Risk Theory
  - MATH 478 Actuarial Modeling
  - MATH 479 Casualty Actuarial Mathematics
- A third course from the list above or an approved section of MATH 490 (e.g. financial mathematics) 3
- FIN 221 Corporate Finance 3
- FIN 300 Financial Markets 3
- FIN 321 Advanced Corporate Finance 3
- Select two of the following: 6
  - ECON 302 Inter Microeconomic Theory
  - ECON 303 Inter Macroeconomic Theory
  - FIN 230 Introduction to Insurance

**Applied Mathematics Concentration**

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

Major in Sciences and Letters Curriculum

E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

**Required Core Courses**
- MATH 241 Calculus III 1
- MATH 347 Fundamental Mathematics or MATH 348 Fundamental Mathematics-ACP
- MATH 416 Abstract Linear Algebra 2
- MATH 417 Intro to Abstract Algebra or MATH 427 Honors Abstract Algebra
- MATH 424 Honors Real Analysis or MATH 444 Elementary Real Analysis or MATH 447 Real Variables
- MATH 461 Probability Theory or STAT 400 Statistics and Probability I
- CS 101 Intro Computing: Engrg & Sci or CS 125 Intro to Computer Science
- Approved supporting coursework or any minor 12

**Applied Mathematics Courses**
- MATH 441 Differential Equations
- MATH 446 Applied Complex Variables
- MATH 448 Complex Variables

Information listed in this catalog is current as of 04/2016
Information listed in this catalog is current as of 04/2016

Minimum hours required for graduation: 120 hours

Mathematics Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

The courses chosen from the core and the Graduate Preparatory concentration must include at least two of MATH 424, MATH 425, MATH 427, MATH 428.

MATH 418 Intro to Abstract Algebra II
or MATH 428 Honors Topics in Mathematics
MATH 448 Complex Variables
MATH 423 Differential Geometry
or MATH 425 Honors Advanced Analysis
or MATH 432 Set Theory and Topology

CS 357 Numerical Methods I
or MATH 442 Intro Partial Diff Equations
or MATH 489 Dynamics & Differential Eqns
MATH 412 Graph Theory
or MATH 413 Intro to Combinatorics
or MATH 482 Linear Programming
One additional 400- or 500-level Math course 3

Total Hours 49-52

1 Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
2 Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.
3 If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied.
4 If STAT 400 is completed, a requirement for the Operations Research concentration has been satisfied.
Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

**Mathematics Concentration Courses**

Select a total of two courses from two of the following three lists:

1. **Geometry**
   - MATH 402 Non-Euclidean Geometry
   - MATH 403 Euclidean Geometry
   - MATH 423 Differential Geometry
   - MATH 481 Vector and Tensor Analysis

2. **Differential Equations and Complex Analysis**
   - MATH 441 Differential Equations
   - MATH 446 Applied Complex Variables
   - MATH 448 Complex Variables

3. **Number Theory**
   - MATH 453 Elementary Theory of Numbers

Two additional 400- or 500-level Math courses

**Total Hours**: 46-49

---

1. Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
2. Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.

**Mathematics and Computer Science**

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

**Major in Sciences and Letters Curriculum**

E-mail: academic@cs.illinois.edu or mathadvising@illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 68-70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following: CS 196, CS 296, CS 397, CS 492, CS 493, CS 499, any CS course numbered 411 or higher, MATH 412, MATH 414, MATH 417, MATH 418, MATH 423, MATH 432, MATH 448, MATH 482, MATH 484, MATH 496.

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

400-level mathematics and computer science requirements: 21-22

Students must select at least seven 400-level mathematics and computer science courses, including one from each of the following groups:

**GROUP I**

- MATH 461 Probability Theory
- STAT 400 Statistics and Probability I
- MATH 463

Information listed in this catalog is current as of 04/2016
Minor in Mathematics

E-mail: mathadvising@illinois.edu

Web address for department: www.math.illinois.edu (http://www.math.illinois.edu)

MATH 241 Calculus III 4
Completed in one of two ways:
- MATH 347 Fundamental Mathematics (and four courses chosen from at least two of the following lists of courses) 15

OR
- five courses chosen from at least two of the following lists of courses.

Algebra
- MATH 410 Lin Algebra & Financial Apps
- MATH 415 Applied Linear Algebra
- MATH 416 Abstract Linear Algebra
- MATH 417 Intro to Abstract Algebra
- MATH 418 Intro to Abstract Algebra II
- MATH 427 Honors Abstract Algebra
- MATH 453 Elementary Theory of Numbers

Discrete Mathematics
- MATH 412 Graph Theory
- MATH 413 Intro to Combinatorics
- MATH 414 Mathematical Logic
- MATH 482 Linear Programming

Analysis
- MATH 284 Intro Differential Systems
- MATH 285 Intro Differential Equations
- MATH 286 Intro to Differential Eq Plus
- MATH 424 Honors Real Analysis
- MATH 425 Honors Advanced Analysis
- MATH 441 Differential Equations
- MATH 442 Intro Partial Diff Equations
- MATH 444 Elementary Real Analysis
- MATH 446 Applied Complex Variables
- MATH 447 Real Variables
- MATH 448 Complex Variables
- CS 450 Numerical Analysis
- MATH 484 Nonlinear Programming
- MATH 487 Advanced Engineering Math
- MATH 489 Dynamics & Differential Eqns

Geometry
- MATH 402 Non Euclidean Geometry
- MATH 403 Euclidean Geometry
- MATH 423 Differential Geometry
- MATH 428 Honors Topics in Mathematics
- MATH 432 Set Theory and Topology
- MATH 481 Vector and Tensor Analysis

Probability and Statistics
- MATH 461 Probability Theory
- STAT 400 Statistics and Probability I
- STAT 410 Statistics and Probability II 1 or STAT 420 Methods of Applied Statistics

Total Hours 19

1 Students may use STAT 410 or STAT 420, but not both toward the minor.

Operations Research Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in
Mathematics or Mathematics Education. Full details are available at the departmental website.

### Teacher Education Minor in Mathematics, Grades 6-8

For students in teacher education curricula other than mathematics who wish to be qualified to teach mathematics at the middle school level.

E-mail: mathadvising@illinois.edu

Web address for department: www.math.illinois.edu

To obtain an endorsement to teach mathematics in grades 9-12, students must also pass the Illinois Certification Testing System Test in Mathematics. Information and practice exams are available at www.icts.nesinc.com.

Information listed in this catalog is current as of 04/2016
Teaching of Mathematics Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

General education: Students must fulfill the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement. In addition, students must take a speech performance course chosen from the following list: CMN 101, CMN 113, CMN 321, CMN 323 or satisfy the Composition I requirement with CMN 111 and CMN 112.

Required Prerequisite Courses

Prerequisite courses must be completed prior to transfer into the teaching concentration and hence must be in progress or completed at the time of application.

EPSY 201 Educational Psychology 3
EPS 201 Foundations of Education 3
or EPS 202 Foundations of Education-ACP
MATH 220 Calculus 4-5
or MATH 221 Calculus I
MATH 231 Calculus II 3
MATH 241 Calculus III 4

Three advanced mathematics courses, including

MATH 347 Fundamental Mathematics
or MATH 348 Fundamental Mathematics-ACP

Required Core Courses

MATH 416 Abstract Linear Algebra 3
MATH 417 Intro to Abstract Algebra 3
or MATH 427 Honors Abstract Algebra 3
MATH 424 Honors Real Analysis 3
or MATH 444 Elementary Real Analysis 3
or MATH 447 Real Variables 3
MATH 461 Probability Theory 4
or STAT 400 Statistics and Probability I 3-4
CS 101 Intro Computing: Engrg & Sci 3-4
or CS 125 Intro to Computer Science

Approved supporting course work or any minor 12

Teaching of Mathematics Courses

MATH 402 Non Euclidean Geometry 3
or MATH 403 Euclidean Geometry 3
MATH 453 Elementary Theory of Numbers 3
Two additional 400- or 500-level mathematics courses 6

Total Hours 50-53

In addition to the requirements listed above, students must complete the Teacher Education Minor in Secondary School Teaching (Total Hours: 37 - 38 hours). Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Academic Affairs Office. While it is possible to complete this program in eight semesters, many students may require an extra semester or two. Please note- the Secondary School Teaching Minor requires 2 groups of courses listed above under Required Prerequisite Courses (EPSY 201 and EPS 201/EPs 202). The hours for those courses are calculated in the Minor total hours (37-38 hours), not the Teaching of Mathematics Concentration total hours (50-53 hours).

Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.

If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied.

If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Medieval Studies, Program In

Eleonora Stoppino, Director
4080 Foreign Languages Building
707 S. Mathews Avenue
Urbana, Illinois 61801
e-mail: medievalstudies@illinois.edu

PH: (217) 265-6254
FX: (217) 244-8430
http://medieval.illinois.edu

The purpose of the Program in Medieval Studies is to foster the interdisciplinary and cross-cultural study of the history, literature, languages, religion, philosophy, art, and archaeology of cultures across the globe from approximately the fourth through the fifteenth centuries C.E., by sponsoring activities such as seminars, conferences, symposia, and lectures, visiting scholars, and exchange and outreach programs, and by offering an undergraduate Interdisciplinary Studies Medieval Studies Concentration (p. 227) and Minor in Medieval Studies (p. 241).

Interdisciplinary Minor in Medieval Studies

This minor introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographical regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Introduction to Medieval Studies

ENGL 202/ MDVL 201/ CWL 253

Geographical Distribution Coursework

3 hours- Medieval Europe- One course chosen from the following:

 ARTH/ MDVL 231
                Northern Renaissance Art

 ITAL/ MDVL 240
                Italy Middle Ages & Renaiss

 HIST/ MDVL 245
                Women & Gender Pre-Mod Europe

 HIST/ MDVL 247
                Medieval Europe

 SCAN/ MDVL 251
                Viking Mythology

 SCAN/ MDVL 252
                Viking Sagas in Translation

 HIST/ MDVL 255
                British Isles to 1688

 ARCH/ MDVL 412
                Medieval Architecture

3 hours- Classical and Medieval East Asia- One course chosen from the following:

 HIST 220
                Traditional China

 HIST 226
                Premodern Japanese History

 EALC 240
                Chinese Civilization

 EALC 275
                Masterpieces of East Asian Lit

 RLST 287
                Introduction to Buddhism

3 hours- Medieval Central Asia, South Asia, or the Middle East- One course chosen from the following:

 HIST 130
                History of South Asia

 HIST 135
                History of Islamic Middle East

 LA 218
                S Asian Cultural Landscapes

 LA 222
                Islamic Gardens & Architecture

 RLST 213
                Intro to Islam - ACP
 or RLST 214
                Introduction to Islam

 RLST 223
                The Qur’an (Koran)

 RLST 260
                Mystics and Saints in Islam

 RLST 283
                Jewish Sacred Literature

 CWL 208
                Cultures & Lits of South Asia

Additional Medieval Studies Coursework

Medieval-related coursework from participating departments selected in consultation with the minor advisor. At least 6 hours must be at the 300- or 400-level. A list of courses is maintained on the Medieval Studies Program website. 3 hours of appropriate language study can be applied to meet this requirement with approval of the Director of the Program in Medieval Studies.

Total Hours: 21

1 A student may substitute the "Medieval World" section of HIST 100 by petition to the Director of Medieval Studies. Only the section of HIST 100 devoted to the Middle Ages may be substituted.

2 A student may substitute 3 hours in geographical distribution coursework with a course on the medieval civilizations of the Americas: ANTH 277 or ANTH 278.

3 List of courses to fulfill Additional Medieval Studies Coursework. (http://www.medieval.illinois.edu/education/undergrad)
Molecular and Cellular Biology, School of

Stephen Sligar, Director of School
393 Morrill Hall, 505 South Goodwin Avenue, Urbana
PH: (217) 333-3166
http://mcb.illinois.edu

The Molecular and Cellular Biology major provides students with a solid preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology. Students will also acquire a strong background in chemistry, math and physical sciences. After completion of the core curriculum in MCB, students may complete the required advanced course work by taking a variety of MCB courses or by selecting a more focused group of courses in any of the following areas: biochemistry, cells and tissues, developmental biology, infection and immunity, microbiology, genetics, neurobiology and physiology. The MCB Advising Program (MAP) staff is available to help students plan their combination of advanced courses.

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB major. Students must satisfy all of the requirements for the MCB major in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration should contact the MCB Honors Concentration coordinator during the freshman year for more information.

The School of Molecular and Cellular Biology also sponsors the Minor in MCB and the Biochemistry Specialized Curriculum.

The School of Molecular and Cellular Biology offers the following degree programs:

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students choose the Molecular and Cellular Biology concentration (p. 242) or the MCB Honors concentration (p. 243)

For the Degree of Bachelor of Science in Biochemistry

Major in Specialized Curriculum in Biochemistry (p. 244)

Minor in Molecular and Cellular Biology

The minor, administered by the School of Molecular and Cellular Biology, is designed to provide students with an understanding of foundational principles of physiology, cellular and developmental biology, microbiology, molecular genetics and biochemistry. A minor in Molecular and Cellular Biology will prepare students for training in medicine and other health sciences, graduate studies in related disciplines, as well as for employment opportunities in pharmaceutical and biotechnology industries.

Students must contact an MCB advisor (https://mcb.illinois.edu/undergrad/advising) for acceptance into the minor. MCB 150 must be completed or in progress before acceptance into the minor.

Information listed in this catalog is current as of 04/2016
To be eligible for graduation with Academic Distinction a student must:

- Maintain a minimum cumulative GPA of 3.90 at the end of their penultimate semester.

Molecular and Cellular Biology Honors Concentration

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB concentration (p. 242). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (http://mcb.illinois.edu/undergrad/honors) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

**Distinction**

Students in MCB can qualify for Distinction via one of the following:

**Distinction for Excellence in Research:**

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

**Distinction for Excellence in Academics:**

To be eligible for graduation with Academic Distinction a student must:

Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

**Select one group of courses:**

Distinction

Students in MCB can qualify for Distinction via one of the following:

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics.

To be eligible for graduation with Academic Distinction a student must:

Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

Information listed in this catalog is current as of 04/2016
Specialized Curriculum in Biochemistry

For the Degree Bachelor of Science in Biochemistry

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

E-mail: biocug@life.illinois.edu

Web address for department: http://mcb.illinois.edu/departments/biochemistry

All students must complete the General education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: A student seeking distinction must satisfy the following:

• Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.
• Earn at least a 3.25 grade-point average.
• Present a senior thesis to the department.

Select one of the following:

CHEM 202 Accelerated Chemistry I
& CHEM 20:and Accelerated Chemistry Lab I
& CHEM 20-and Accelerated Chemistry II
& CHEM 201and Accelerated Chemistry Lab II (preferred sequence)

CHEM 102 General Chemistry I
& CHEM 103and General Chemistry Lab I
& CHEM 104and General Chemistry II
& CHEM 105and General Chemistry Lab II (with advisor approval)

Organic chemistry, select from:

CHEM 236 Fundamental Organic Chem I
& CHEM 23:and Structure and Synthesis
& CHEM 43:and Fundamental Organic Chem II (preferred sequence)

Select one of the following:

CHEM 232 Elementary Organic Chemistry I
& CHEM 23:and Elementary Organic Chem Lab I
& CHEM 33:and Elementary Organic Chem II (with advisor approval)

Molecular and Cellular Biology

MCB 150 Molec & Cellular Basis of Life
MCB 250 Molecular Genetics
MCB 251 Exp Techniqs in Molecular Biol
MCB 252 Cells, Tissues & Development
MCB 253 Exp Techniqs in Cellular Biol
MCB 354 Biochem & Phys Basis of Life

or equivalent as approved by academic advisor

Physical chemistry, select one group of courses:

CHEM 440 Physical Chemistry Principles (Biological Perspective Section)

BIOC 446 Physical Biochemistry (preferred sequence)
or

CHEM 442 Physical Chemistry I

CHEM 444 Physical Chemistry II (with advisor approval)

Mathematics

MATH 220 Calculus
or MATH 221 Calculus I
MATH 231 Calculus II
MATH 241 Calculus III

Physics, select from:

PHYS 211 University Physics: Mechanics
& PHYS 212 and University Physics: Elec & Mag
& PHYS 213 and Univ Physics: Thermal Physics
& PHYS 214 and Univ Physics: Quantum Physics (preferred sequence)

PHYS 101 College Physics: Mech & Heat
& PHYS 102 and College Physics: E&M & Modern (or equivalent as approved by academic advisor (with advisor approval)

Biochemistry:

BIOC 455 Technqs Biochem & Biotech
BIOC 460 Biochemistry Senior Seminar
BIOC 406 Gene Expression & Regulation
BIOC 445 Current Topics in Biochemistry

Select 10 hours of Advanced Science/Technical Electives (may include up to 7 hours of BIOC 492, Senior Thesis) from approved list.

Nontechnical Requirements:

General education:

Foreign language - three semesters of college study (or three years of high school study) in a single foreign language to satisfy the campus foreign language requirement
Composition I writing requirement to satisfy the campus Composition I requirement
Advanced Composition writing requirement (BIOC 460 is required)

Humanities/Arts to satisfy the campus general education requirements
Social/Behavioral sciences to satisfy the campus general education requirements

Information listed in this catalog is current as of 04/2016
Cultural Studies to satisfy the campus general education requirement

Electives (not including any credit in satisfaction of the above variable requirements)

1. Transfer credit must be approved by an advisor in biochemistry in order to be used to satisfy degree requirements.

2. A more detailed description of the requirements is listed in the Biochemistry Curriculum Handbook, available in room 419A of Roger Adams Laboratory.

3. PHYS 213 is not required if CHEM 442/CHEM 444 sequence is taken.

4. Freshman orientation course is under development and will be required. See advisor for details.

5. An approved list of current courses will be updated annually in January/February for the coming year. Contact advisor.

6. The requirements for the Campus General Education categories of Natural Sciences and Technology and Quantitative Reasoning I are fulfilled through coursework in the curriculum.

Philosophy

Kirk Sanders, Chair of Department
105 Gregory Hall, 810 South Wright, Urbana
PH: (217) 333-2889
http://www.philosophy.illinois.edu/

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one’s ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

Major in Philosophy

Major in Sciences and Letters Curriculum
E-mail: phildept@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 44 hours including at least 32 hours of Philosophy courses

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Eligibility for distinction may be pursued by either:

1. the thesis option, which requires at least 35 hours of philosophy courses (including 5 courses at the 300- or 400-level), a grade point average of 3.5 in all philosophy courses, and writing a thesis; or

2. the course work option, which requires 38 hours of philosophy courses (including 8 advanced courses) and a 3.5 grade point average in all philosophy courses. For further information, inquire in the department office.

32 hours of Philosophy courses including:

Select one of the following:

- PHIL 102 Logic and Reasoning
- PHIL 103 Logic and Reasoning QR II
- PHIL 202 Symbolic Logic

At least one course in Ethics and Value Theory chosen from:

- PHIL 421 Ethical Theories
- PHIL 422 Recent Developments in Ethics
- PHIL 429 Value Theory
- PHIL 435 Social Philosophy
- PHIL 441 Value Theory
- PHIL 436 Phil of Law and of the State
- PHIL 441 Existential Philosophy

At least one course in Epistemology and Metaphysics chosen from:

- PHIL 425 Philosophy of Mind
- PHIL 426 Metaphysics
- PHIL 430 Theory of Knowledge
- PHIL 438 Philosophy of Language
- PHIL 443 Phenomenology

At least 15 additional hours of course work in philosophy, with 12 of those hours being above the 100 level (including at least two 300- or 400-level courses).

A student may select either of two types of programs of supporting course work and should work out a specific program of the type chosen with the help and approval of a departmental adviser.

Twelve hours minimum. Select from:

Option I: Intensive study in another discipline. Courses normally beyond the 100 level in one other discipline. Most approved minors satisfy this requirement. A second major may also be used to satisfy this requirement

or

Option II: A special program of study built around a unifying theme or topic. Course work outside philosophy in one or more other discipline(s), normally beyond the 100 level.

Total Hours 44

1. If possible, students should take these courses prior to the senior year. Substitutions may be made only with the approval of the chair of the department.

2. Those considering graduate work in philosophy should take PHIL 202.
Minor in Philosophy

E-mail: phildept@illinois.edu

Web address for department: www.phil.illinois.edu (http://www.philosophy.illinois.edu)

PHIL 203    Ancient Philosophy    4
PHIL 206    Early Modern Philosophy    4
Four other Philosophy courses, including at least 6 hours at the 300- or 400-level    12
Total Hours    20

Political Science

Robert Pahre, Head of Department
420 David Kinley Hall, MC - 713, 1407 West Gregory Drive, Urbana, IL
PH: (217) 333-3881
http://www.pol.illinois.edu

The Department of Political Science encourages students to acquire a broad understanding of political science and to pursue selected subfields of the discipline in depth. To accomplish these objectives, the department provides courses of study that introduce students to the discipline and to its principal fields. Among these are American government and politics, comparative government and politics, international relations, and political philosophy. Supporting courses are an integral part of the program and should be selected with a view toward building a coherent selection adapted to the student’s particular interests.

The Department of Political Science with the European Union Center offers a 5 year BALAS/MA in Political Science and European Union Studies.

The Civic Leadership Program

Students are admitted to the Civic Leadership Program through a competitive process administered by the Department of Political Science. The Civic Leadership Program offers a plan of study to enable students with the capacity, skills, and knowledge to provide informed, principled, and effective civic leadership. Students can participate either as Political Science Majors with a concentration in Civic Leadership or as majors in other fields with a Minor in Political and Civic Leadership. All students in the Civic Leadership Program must complete 17 hours of courses related to and distributed within the Civic Leadership Program. See the Civic Leadership concentration and Political and Civic Leadership minor for full information.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Students must complete the Political Science Core Requirements and select one concentration in consultation with an academic adviser.

- General Concentration in Political Science (p. 247)
- Civic Leadership Concentration (p. 247)

1 Credit is not given for PS 100 and PS 200.

Departmental distinction

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
   c. Earn a grade point average in PS 496 of 3.67 or higher.

2. Honors Program Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
   c. Be admitted to and maintain good standing within the departmental honors program, and
   d. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of PS 230 or PS 231 or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) of political science on this campus,
4. Application and affirmative vote of a departmental committee.

High Distinction

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 of 3.67 or higher.

5 Year BALAS/MA in Political Science and European Union Studies

The Department of Political Science with the European Union Center offers a 5-year BALAS/MA degree program in Political Science and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint
Civic Leadership Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: pol@illinois.edu

Minimum required major and supporting course work equates to 50 hours including 30 hours of Political Science courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours for internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. PS 496 is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 50-hour minimum required for the major.

Minimum hours required for graduation: 120 hours

Civic Leadership Concentration Requirements:

Completion of the Civic Leadership Concentration must include either as major or supporting coursework one course in each of the following areas, chosen from a list maintained by the department:

1. An intermediate or advanced course in public policy (3 hours)
2. A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender (3 hours)
3. A course exploring different perspectives on a just, ordered, and moral society (3 hours)

At least four political science courses at the advanced level

Supporting coursework is required and must be selected in consultation with the student’s adviser. Supporting courses should complement subfields in political science chosen by the student. At least 12 of these 20 hours must be in courses numbered 200 or above.

At least two sections of PS 199 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science. 

PS 491 Internship

One additional course (1-3 credits) in political science at any level

1. Credit is not given for both PS 100 and PS 200.
2. Most advanced level courses will require as prerequisites the appropriate 200-level courses (or, in the case of American politics courses, PS 101) or the consent of the instructor. Students may count a maximum of six hours of credit in PS 300 and six hours of credit in PS 494 toward this requirement. Neither PS 495 nor PS 496 toward the 30 credits of PS required for the major.
3. PS 199 is a temporary designation. As these courses are developed and receive PS numbers, these new course numbers will take the place of PS 199.

Supporting course work is required and must be selected in consultation with the student's adviser. Supporting courses should complement subfields in political science chosen by the student. At least 12 of these 20 hours must be in courses numbered 200 or above.

1 Credit is not given for both PS 100 and PS 200.
2 Most advanced level courses will require as prerequisites the appropriate 200-level courses (or, in the case of American politics courses, PS 101) or the consent of the instructor. Students may count a maximum of six hours of credit in PS 300 and six hours of credit in PS 494 toward this requirement. Neither PS 495 nor PS 496 toward the 30 credits of PS required for the major.

**Minor in Political Science**

A minor in political science is designed for students who desire to enhance their ability to deal intelligently and critically with issues and ideas about government and politics. The minor permits choices among five sub-fields, each involving important theoretical and applied questions about the role of citizens, associations, and states in the application of political power. These sub-fields are: American Government and Politics, Comparative Government and Politics, International Relations, Political Philosophy, and Public Policy/Public Administration. Within a given sub-field, students will be exposed to advanced courses that build on relevant introductory courses. These advanced courses will provide students with in-depth treatments of topics relevant to issues dealt with in their major field of study.

Select one of the following:

<table>
<thead>
<tr>

An intermediate (200 level) or advanced (300 level) course in public policy

A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender

A course exploring different perspectives on a just, ordered, and moral society

PS 491 or approved internship course in another department

At least two sections of PS 199 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science.

Total Hours: 17

1 Credit is not given for both PS 100 and PS 200.
2 Choose from a list maintained by the Department of Political Science.
3 PS 199 is a temporary designation. As these courses are developed and receive PS numbers, these new course numbers will take the place of PS 199.

**Psychology**

Wendy Heller, Head of Department
315 Psychology Building, 603 East Daniel, Champaign
PH: (217) 333-0631
http://www.psychology.illinois.edu

Information listed in this catalog is current as of 04/2016
Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major:

• Behavioral Neuroscience is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organismic processes.
• Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.
• Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.
• Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.
• Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.
• Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.
• Engineering psychology is the study of human behavior in the context of interactions between humans and machines.
• Organizational psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.
• Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual’s behavior and to predict an individual’s future behavior.
• Quantitative psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.
• Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.
• Visual cognition and human performance is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Prescribing Psychologists:

The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

• 2-semester course sequence in chemistry or biochemistry with lab
• 1 semester microbiology with lab
• 1 semester general biology for science majors
• 1 semester physiology
• 1 semester human anatomy
• 1 semester physiology and anatomy
• Medical terminology (class or proficiency)

For more information on becoming a prescribing psychologist and a detailed list of which courses meet these requirements, please consult with one of the academic advisors in psychology.

Undergraduate Program

The Psychology program of study is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others.

In formulating their Plan of Study, students can decide either to undertake a concentration in General Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

Departmental Distinction: To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor’s thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics an laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.
Academic Advising

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Major in Sciences and Letters Curriculum

E-mail: advising@psychology.illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences.

Students must meet the requirements for one of the concentrations as listed below. Minimum required concentration and supporting course work equates to 32-36 hours of Psychology courses. Please see your academic advisor. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

For all concentrations, twelve hours of 300- and 400-level courses in Psychology must be taken on this campus.

Minimum hours required for graduation is 120.

Students must also complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT) including the campus general education language requirement.

Concentrations

- General Psychology (p. 250)
- Behavioral Neuroscience (p. 250)
- Clinical/Community Psychology (p. 251)
- Cognitive Psychology (p. 251)
- Developmental Psychology (p. 252)
- Organizational Psychology (p. 252)
- Social/Personality Psychology (p. 253)

Total Hours 36

Information listed in this catalog is current as of 04/2016
A minimum of 30 hours of coursework is required for the major. This includes (a) RLST 230 or RLST 231, and (b) completing a Capstone course, as explained below.

At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level. Twelve hours of 300 or 400-level courses in your major must be taken on this campus.

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental adviser.

**Capstone Experience**

Research paper for one 400-level course in RLST: Each major must make special arrangements with a professor teaching a 400-level RLST course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each RLST major has conducted a significant research project. RLST 493 can be used to satisfy this requirement.

Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements.

Language Requirements: The major in Religion does not require any language study beyond meeting the University's general education language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate language study.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of RLST 493. The level of distinction is based on evaluation of the thesis.

Minimum of 30 hours of Religion courses including:

<table>
<thead>
<tr>
<th>PHIL/RLST</th>
<th>Philosophy of Religion Intro 230</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>or RLST 231</td>

</tr>
<tr>
<td>Capstone Experience: a 400-level RLST course in which a research project is undertaken and a 20 page research paper is written. This course can be RLST 493 and can also be used to fulfill part of the distribution or primary or secondary area of study requirement.</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

1 Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the primary area of study cannot also be used to fulfill the secondary area of study.

### Minor in Religious Studies

E-mail: religion@illinois.edu

Web address for department: www.religion.illinois.edu (http://www.religion.illinois.edu)

**RLST 110** World Religions 3

**One course in Ethics or Philosophy of Religion** 3

Recommended courses are as follows:

- RLST 230 Philosophy of Religion Intro
- RLST 424 Philosophy of Religion

**Five additional courses:** 15

- Two courses (6 hours) must be from an Asian religious tradition (Hinduism, Buddhism, or Islam, with at least one course in Hinduism and Buddhism)

- Two courses (6 hours) must be from the Western religious traditions (Biblical Studies, Judaism, Christianity, Islam, with at least one course in Biblical Studies, Judaism, or Christianity)

Total Hours 21

No more than nine (9) hours may be selected from courses at the 100 level.

At least six (6) hours must be selected from courses at the 300 or 400 level.

### Russian, East European, and Eurasian Studies Center

David Cooper, Director of Center

104 International Studies Building, 910 South Fifth Street, Champaign

PH: (217) 333-1244
There are two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The major in Russian, East European, and Eurasian Studies has a multidisciplinary area studies focus. Students take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. Language study can be in Russian or in any of the other languages of the region offered here. Students often go on to careers in government service or to work at NGOs.

The major in Slavic Studies enables students to specialize in one of five concentrations: Russian Language, Literature, and Culture; Polish Studies; South Slavic Studies; Czech Studies; Ukrainian Studies. Unlike the major in Russian, East European, and Eurasian Studies, which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

That said, the majors are only as different, or as similar, as you make them. You can choose literature as your primary field for the REEES major, or take social science courses to develop broad area expertise in your supporting coursework for the Russian language and literature major. Both are excellent preparation for law school or graduate school and careers in teaching or research.

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student's interests and career goals, in consultation with the undergraduate advisor of the Center.

The aim of the REEES major is to provide students with a knowledge base in one discipline that will permit them to qualify for graduate study, an interdisciplinary focus on issues critical to the region, and foundational language training necessary for professional specialization in the area.

**Major in Russian, East European, and Eurasian Studies**

**Major in Sciences and Letters Curriculum**

E-mail: reec@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting courses equate to 48 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.

Component 1: Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.

Component 2: Russian and East European studies core courses, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>REES 200</td>
<td>Intro to Russia and Eurasia</td>
</tr>
<tr>
<td>REES 201</td>
<td>Introduction to Eastern Europe</td>
</tr>
<tr>
<td>REES 495</td>
<td>Senior Seminar</td>
</tr>
</tbody>
</table>

15 hours: Choose one course from each of three departments other than the department used for component 3 below. The courses comprising the remaining hours of component 2 may be from the same discipline as those under component 3; however, a course may be counted toward the total for only one component. Language courses that concentrate on the basic skills of speaking, listening, reading, and writing cannot be counted as part of this component.

Component 3: Courses in a single discipline. Among those disciplines that are most commonly used with this specialization are anthropology, economics, geography, history, political science, Russian language and literature, and sociology. Among disciplines also used are business administration, comparative literature, education, English, fine arts, French, German, journalism, linguistics, mathematics, music, philosophy, psychology, and various natural sciences. Others are permitted. Consult your advisor.

1 The Center maintains a list of applicable courses on its web site.

2 If the study of a language is used for this component, 20 hours must be taken beyond the requirement of 6 additional hours outlined under component 1 above.
Interdisciplinary Minor in Russian, East European, and Eurasian Studies

The interdisciplinary minor in Russian, East European, and Eurasian studies allows students in diverse fields to complement their programs with a study of Russia, Eastern Europe, and Eurasia. Programs of study can be tailored to the needs and interests of individual students, in consultation with the undergraduate advisor.

E-mail: reec@illinois.edu

Web address for department: www.reec.uiuc.edu (http://www.reec.uiuc.edu)

The equivalent of three semesters of college-level language study in Russian or another language of Eastern Europe or Eurasia. This stipulation may be satisfied through partial fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. If a non-REEE language is selected to meet the LAS requirement, then the three semesters of REEE language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only those hours earned in the second and third semester of language study are calculated into the degree, as the first semester represents a prerequisite for the other two.

Courses on Russia, Eastern Europe, or Eurasia from at least three different academic units. (Literature courses are acceptable for this requirement; language courses are not.)

No more than 6 hours may be counted from any one unit; 6 hours must be at the 300- or 400-level.

Total Hours 2

1 The Center maintains a list of applicable courses.
2 No more than 9 hours may be taken at the 100-level.

School of Earth, Society, and Environment

Stephen Marshak, Director of School
152 Computing Applications Building, 605 East Springfield, Champaign, IL 61820
PH: (217) 333-3440
http://www-earth.illinois.edu/students/

The major in Earth, Society, and Environmental Sustainability (ESE) offers a unique, multidisciplinary program in the College of Liberal Arts and Sciences (LAS). Students will learn about the interconnectedness of environmental, economic, and social systems of the world; the implications of our actions on the environment; factors that determine the sustainability of human institutions, organizations, cultures, and technologies; finding solutions through innovative approaches; and expanding future options by practicing environmental stewardship. Following the classical definition of sustainability, the aim is to develop citizens, businesses, and societies that meet the needs of the present without compromising the ability of future generations to do the same.

Required introductory coursework provide breadth in the essential natural and social sciences needed for interdisciplinary environmental sustainability study. The major offers two concentrations within which majors gain content expertise: Science of the Earth System, and Society and the Environment. Depth of knowledge is achieved by requiring a minimum of five advanced classes in a coherent field of study.

The major is available to both on-campus and off-campus students. On-campus students need only be eligible to be in LAS to transfer to the degree. The program is also designed so that students with an associates (or equivalent) degree, or who have sufficient previous coursework, can transfer to the University and complete a Bachelor of Science degree entirely off-campus. Students interested in completing the course off-campus, but have less than 60 hours of coursework, should consult with the program advisor.

The degree will prepare students for a variety of career paths in either the private or the public sector, as well as for graduate study. The interdisciplinary background in both scientific and human aspects of environmental problems will prepare students for a variety of positions with businesses, state and federal regulatory agencies, research institutions, consulting firms and nongovernmental education and advocacy organizations. The major also provides a platform for entry into professional schools (e.g. law, business, and public policy programs) as well as graduate study in a variety of physical science and social science disciplines, and in interdisciplinary programs related to the environment.

For the Degree of Bachelor Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: program-info@eses.uiuc.edu

Earth, Society, and Environmental Sustainability

On-campus UIUC students can transfer to this degree without any special requirements.

Off-campus students who plan to transfer to this degree should have completed, or have in progress, the following:

• the Composition 1 requirement.
• the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at UIUC or elsewhere) and should consult the program advisor:

• the UIUC LAS language requirement should be satisfied.
• the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
• the Cognate Coursework should be completed.

Students must complete the ESE Core requirements listed below and select one concentration in consultation with an academic advisor.

• Society and the Environment (SAE) Concentration (p. 258)
• Science of the Earth System (SES) Concentration (p. 257)

ESE Core Requirements

ESES Introductory Core: Students take one approved introductory or advanced course from at least four of the following five areas. Approved courses within these areas are available from the ESE advisor 1

Information listed in this catalog is current as of 04/2016
Science of the Earth System (SES) Concentration

For the Degree of Bachelor Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: program-info@eses.uiuc.edu

Earth, Society, and Environmental Sustainability

Minimum required major and supporting courses equate to 48-58 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

Twelve hours of 300- or 400-level courses must be taken on this campus.

Substitutions may be made with advisor approval.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

ESE Core Requirements:

ESES Introductory Core: Students take one approved introductory or advanced course from at least four of the following five areas. Approved courses within these areas are available from the ESE advisor

| Environment and the Human Response |
| Sustainability, Policy, and Global Change |
| Earth's Physical Systems, Resources, and Hazards |
| Visualizing the Earth System |
| Earth's Biosphere and Ecology |

ESE coursework 6

GEOG 379 Intro to GIS Systems

ESE 200 Earth Systems

Advanced Courses 15-20

A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the “ESE Introductory Core” requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400-level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.

Select a Concentration (hours required depend on concentration chosen): 15-18

Total Hours 48-58

OR in the ESE School office OR at http://www.earth.illinois.edu/students/guides

Minor in Earth, Society, and Environment

The ESE minor is designed for students who desire to obtain a background in topics related to environmental studies, in order to support study and practice of their major field. A minimum of 18 hours is required.

For more information and a list of approved courses visit: www.earth.illinois.edu (http://www.earth.illinois.edu)

Questions may be addressed to Jonathan Tomkin, tomkin@illinois.edu.

Introductory course from the Earth's Physical Systems, Resources, and Hazards Area course list. 3-4

Introductory course from either the Environment and the Human Response or Sustainability, Policy, and Global Change Area course lists 3-4

ESE 200 Earth Systems 3

Three Advanced Courses from a list maintained by the minor advisor, at least two of which must be listed or cross listed as ESE courses 9-12

Total Hours 18-23
A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the “ESE Introductory Core” requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400-level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.

Slavic Languages and Literatures

Michael Finke
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-0680
http://www.slavic.illinois.edu

The major in Slavic Studies enables students to specialize in one of five concentrations:

1. Russian Language, Literature, and Culture
2. Polish Studies
3. South Slavic Studies
4. Czech Studies
5. Ukrainian Studies

Unlike the major in Russian, East European, and Eurasian Studies (p. 254), which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

The department also offers a minor in Russian Language and Literature and a minor in Slavic Language, Literature, and Culture.

The 5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies allows students to receive two degrees, a BALAS in Slavic Studies and an MA in European Union Studies.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: slavic@illinois.edu

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

- Russian Language, Literature, and Culture Concentration (p. 261)
- Polish Studies Concentration (p. 260)
- Slavic Studies Concentration (p. 262)
- Czech Studies concentration (p. 259)
- Ukrainian Studies Concentration (p. 262)

5 Year BALAS /MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies

The Department of Slavic Languages & Literatures with the European Union Center offers a 5-year BALAS /MA degree program in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS -granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

- Minor in Russian Language and Literature (p. 260)
- Minor in Slavic Language, Literature, and Culture (p. 260)

Czech Studies Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: slavic@illinois.edu

Minimum required major courses equate to 30 hours including 6 hours in advanced language and 24 hours in literature and culture.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

- GPA in departmental courses of 3.75; or
- GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Language: A minimum of 6 hours beyond the second year of the Czech language: CZCH 484 Readings in Czech for 6 hours or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Czech

Literature and Culture: A minimum of 24 hours is required in the following areas:

- 6 hours of Introductory Culture courses:
- SLAV 120 Russian & E Euro Folktales (and)
- Choose one of the following:
- REES 201 Introduction to Eastern Europe
- RUSS 261 Intro Russian-Jewish Culture
- SLAV 117 Russ & E Euro Science Fiction
- 6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹
- 12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following:

- RUSS 493 Honors Senior Thesis (2 hrs); or
- (2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or
- (3) Study abroad in the region.

Information listed in this catalog is current as of 04/2016
Majors should consult with the Undergraduate Advisor to plan their capstone experience.

1 Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Czech region.

Minor in Russian Language and Literature

A minor in Russian language and literature may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure. Additional information may be obtained from the undergraduate adviser in the Department of Slavic Languages and Literatures.

E-mail: slavic@illinois.edu

Introduction to Slavic culture. Select from:

<table>
<thead>

Russian literature and culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Russian language (RUSS 301, 302, 305, or equivalent) can substitute for one course in this requirement. Also, one course at the same level in another department, chosen in consultation with the advisor, that treats the history, culture, and society of the region can count toward this requirement.

Total Hours 18-20

6 hours must be advanced (300- or 400-) level courses.

Minor in Slavic Language, Literature, and Culture

A minor in Slavic language, literature, and culture may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure.

In completing the requirements for the minor, students may choose to pursue study of a particular Slavic language and culture, or may combine study of a single language with other courses that treat the region more broadly. For example, a student could specialize in Polish by taking POL 201, POL 202, POL 301 for the language and POL 115, POL 245, and HIST 467 for the literature and culture requirements. Please consult the Undergraduate Advisor to choose coursework.

Language: A minimum of 6 hours beyond the second year of a South Slavic language: SCR 301, 302-Third-Year Serbian/Croatian I, II- or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to SCR.

Literature and Culture: A minimum of 24 hours is required in the following areas:

6 hours of Introductory Culture courses:

BCS 115 South Slavic Cultures (and)

Choose one of the following:

REES 201 Introduction to Eastern Europe
SLAV 117 Russ & E Euro Science Fiction
SLAV 120 Russian & E Euro Folktales

6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following:

(1) RUSS 493 Honors Senior Thesis (2 hrs); or
(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or
(3) Study abroad in the region.

Ukrainian Studies Concentration
For the Degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
E-mail: slavic@illinois.edu

Minimum required major courses equate to 30 hours including 6 hours in advanced language and 24 hours in literature and culture.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

• GPA in departmental courses of 3.75; or
• GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Language: A minimum of 6 hours beyond the second year of the Ukrainian language: UKR 301, 302- or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Ukrainian

Literature and Culture: A minimum of 24 hours is required in the following areas:

6 hours of Introductory Culture courses:

UKR 113 Ukrainian Culture (and)

Choose one of the following:

REES 200 Intro to Russia and Eurasia
REES 201 Introduction to Eastern Europe
RUSS 261 Intro Russian-Jewish Culture
SLAV 117 Russ & E Euro Science Fiction
SLAV 120 Russian & E Euro Folktales

6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

¹ Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the South Slavic region.
12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. 

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following:

1. RUSS 493 Honors Senior Thesis (2 hrs); or
2. a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or
3. Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Ukrainian region.

### Sociology

Kevin Leicht, Head of Department
3120 Lincoln Hall, 702 S. Wright Street, Urbana
PH: (217) 333-1950
http://www.sociology.illinois.edu

Large-scale societal change begins with individuals like you — hungry for knowledge and ready to make a real difference; in the Department of Sociology you will study the inner workings of society with a focus on either Inequalities or Global Sociology.

Sociologists explore human social life at every level, from personal relationships to global society. Major topics of study include inequality, social movements, criminology, race and class relations, gender, social institutions such as religion and education, and fundamental population processes like immigration and mortality. Sociologists use a range of methods and theories to develop and evaluate ideas about social life.

As a student of Sociology, you will train in research methods and become fluent in social statistics while understanding the complexity of societal diversity and social change. These skills are usable in a wide variety of work settings and are skills that employers value.

Recent graduates have pursued careers with the FBI, as Human Resource Specialists, with non-profit organizations, as police officers, and have earned advanced degrees in Social Work, Sociology, Law, Medicine and more. The career paths of Sociology alumni are as diverse as our student population - who represent the best and the brightest from a variety of backgrounds.

Each student should see a sociology departmental adviser at least once a year to choose sociology courses and supporting course work, and to monitor progress.

### Major in Sociology

**Major in Sciences and Letters Curriculum**

E-mail: soc@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 44 hours including 32 hours of Sociology courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours.

**Departmental distinction:** In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

1. Have completed SOC 490 or SOC 495
2. Attain a UIUC GPA of 3.25 or higher
3. If both these requirements are met, then the MAJOR GPA distributes as follows:
   - 3.25 – Distinction
   - 3.50 – High Distinction
   - 3.75 – Highest Distinction

1. If a statistics course is taken outside the Department of Sociology, that course does not count toward the 32 hours of Sociology courses.
2. Supporting course work is designed to expand the student’s education in the social sciences. All supporting course work is taken outside the Department of Sociology. A student may take supporting course work from one department, such as psychology, economics, history or statistics, or from a cohesive selection of courses in a variety of departments. With an adviser’s approval, departmental or interdisciplinary minors, or a double major may be used to fulfill the requirements of supporting course work.

### Minor in Sociology

A minor in sociology requires that students learn the basic theoretical and methodological approaches in sociology. Students must also learn about the substance of sociology in some depth and are thus required to take at least two sociology courses at an advanced level and a total of at...
least 18 hours of sociology courses. The course work must include the requirements listed below.

E-mail: soc@illinois.edu

SOC 100 Introduction to Sociology 4
SOC 200 Intro to Sociological Theory 3
SOC 280 Intro to Social Statistics 1 4
At least two Sociology courses at the 300- or 400-level 6
Elective Sociology hours, as needed to fill the 18-hour requirement 3-6

Total Hours 18

1 If a statistics course is taken outside the Department of Sociology, that course does not count toward the 18 hours of Sociology courses.

South Asian and Middle Eastern Studies, Center for

Behrooz Ghamari-Tabrizi, Interim Director
http://www.csames.illinois.edu/

The Center for South Asian and Middle Eastern Studies offers two Interdisciplinary Minors: South Asian Studies and Study of the Islamic World.

For additional information, please contact:

Associate Director: Angela Williams
Email: aswilliams@illinois.edu
Phone: 244-5939

- Interdisciplinary Minor in South Asian Studies (p. 264)
- Interdisciplinary Minor in the Study of the Islamic World (p. 264)

Interdisciplinary Minor in South Asian Studies

The Center for South Asian and Middle Eastern Studies (http://www.csames.illinois.edu) offers an Interdisciplinary Minor in South Asian Studies. The minor is especially suited for students interested in a program of studies with focus on South Asia, as a complement to their disciplinary study. The structure of the minor provides students a great amount of flexibility; possible areas of emphasis include language and literature, as well as history and social sciences.

A minimum grade-point average of 2.75 in South Asian Studies courses is required for completion of the minor. The 18-20 hours of courses selected by students for the South Asian Studies Minor should form a coherent program of study and must meet the approval of an advisor in the Center for South Asian and Middle Eastern Studies. The program must include at least 6 hours of 300- or 400-level courses. A student's plan of courses for the minor must be approved by the program.

Fourth-semester course work in an area-relevant language. Courses that meet this requirement and are currently offered on a regular basis are HNDI 404 (5 hours) AND SNSK 404 (3 hours) The requirement may also be met by comparable courses in these and other South Asian and South Asia-related languages, taught at UIUC or at other universities, through online courses (where available), and through a proficiency examination.

HIST/ANTH History of South Asia 130 3

Courses on South Asian history, language, literature, culture, and society from the following list: 1

ANTH 499 Topics in Anthropology (appropriate sections)
ASST 398 Colloquium in Asian Studies (appropriate sections)
CWL 189 Lit of Asia & Africa I (appropriate sections)
or CWL 190 Lit of Asia & Africa II
ECON 450 Development Economics (appropriate sections)
HNDI 405 Advanced Hindi I
& HNDI 406 and Advanced Hindi II
HNDI 408 Intro to South Asian Lit
HIST 430 India from Colony to Nation
LA/ASST S Asian Cultural Landscapes 218
PS/ASST Gov & Pol of South Asia 346
RLST 104 Asian Mythology
RLST 213 Intro to Islam - ACP
RLST 260 Mystics and Saints in Islam
RLST 286 Introduction to Hinduism
RLST 494 Topics in Religious Thought (appropriate sections)
RLST/ ANTH Women in Muslim Societies (Same as ANTH 403 GWS 403, HIST 434)
RLST 408 Islam & Politics in Mid. East

Total Hours 18-20

1 Other area-relevant courses may be substituted as they are offered, with approval of the advisor. These include courses in languages other than Hindi and independent study courses with South Asia teaching faculty and with appropriate topics, such as the following ANTH 390, HIST 490, LING 290, PS 490, RLST 390, SOC 390. Students wanting to take such independent study courses need to get permission from the instructor; not more than two independent study courses may be taken to meet the degree requirements.

Interdisciplinary Minor in the Study of the Islamic World

An interdisciplinary minor in the Study of the Islamic World is offered by the Center for South Asian and Middle Eastern Studies. It is designed for students interested in developing an expertise in one or more parts of the Islamic world or in Islamic culture generally, as a complement to their disciplinary major. Completion of the minor requires 19 credit hours in applicable courses with a minimum grade-point average of 2.75.
Completion of a fourth semester course in an Islamic language (e.g. Arabic, Turkish, Swahili, Wolof). Select courses from the approved course list.

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 135</td>
<td>History of Islamic Middle East</td>
</tr>
<tr>
<td>SAME 152</td>
<td>The New Middle East</td>
</tr>
<tr>
<td>RLST 214</td>
<td>Introduction to Islam</td>
</tr>
<tr>
<td>or RLST 213</td>
<td>Intro to Islam - ACP</td>
</tr>
</tbody>
</table>

Additional courses chosen from the approved course list. The courses must come from at least two disciplines. At least six hours must be at the 300- or 400-level.

Total Hours: 19

---

**Spanish and Portuguese**

Silvina Montrul, Head of Department
4080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-3390
http://www.spanport.illinois.edu/

The Dept of Spanish and Portuguese offers majors in the following areas: Spanish, Portuguese, and a Curriculum Preparatory to the Teaching of Spanish. The department also offers the following undergraduate minors: Spanish and Portuguese. The 5 year BALAS /MA in Spanish and European Union Studies allows students to receive two degrees, a BALAS in Spanish and an MA in European Union Studies.

**Spanish**

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
- Spanish (p. 266)

For the Degree of Bachelor of Arts in the Teaching of Spanish
- Teaching of Spanish (p. 265)

**Portuguese**

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
- Portuguese (p. 266)

**5 Year BALAS/MA in Spanish and European Union Studies**

The Department of Spanish and Portuguese with the European Union Center offers a 5-year BALAS /MA degree program in Spanish and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

- Minor in Spanish (p. 266)
- Minor in Portuguese (p. 266)

---

**Curriculum Preparatory to the Teaching of Spanish**

For the Degree of Bachelor of Arts in the Teaching of Spanish

E-mail: span-port@illinois.edu

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 29 hours of professional education courses.

Minimum hours required for graduation: A minimum of 123 hours of credit is required for graduation.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (http://catalog.illinois.edu/undergraduate/las/foreignlangteach).

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

Study Abroad: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (http://www.spanport.illinois.edu/studyabroad/spanish).

Professional education courses. (See Foreign Languages-Curricula Preparatory to Teaching Foreign Languages.)

Statistics

Douglas G. Simpson
101 Illini Hall, 725 South Wright St., Champaign, IL 61820
PH: (217) 333-2167
FX: (217) 244-7190
http://www.stat.illinois.edu

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

The Department of Statistics offers the following majors:

- Statistics (p. 267): The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

- Statistics and Computer Science (p. 268): This major is sponsored jointly by the Departments of Statistics and Computer Science. The Statistics and Computer Science major is designed for students who would like a strong foundation in computer science, coupled with significant advanced coursework in statistics. The major prepares students for professional or graduate work in statistics and computer science, and for applications of computing in which knowledge of statistics is particularly important, such as data mining and machine learning.

Minor in Statistics

- Applied Status Track Minor (p. 268)
- Mathematical Statistics Track Minor (p. 268)

The minor, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students to for graduate studies in statistics or in one of many areas where data analysis plays an important role. Interested students should contact the Statistics undergraduate advisor for admission into the minor. Students should have completed the calculus sequence through MATH 241 before entering the minor. Students must choose from either the Applied or Mathematical Statistics Track.

Other Specified Requirements. At least six other statistics, computer science, and mathematics courses, with at least one chosen from each of the following groups: 18

Group I: Applied Statistics

- **STAT 200**  Statistical Analysis (or a 300 or 400-level statistics course, with STAT 426 recommended)  

Group II: Analysis and Differential Equations

- **MATH 347**  Fundamental Mathematics  
- **MATH 441**  Differential Equations  
- **MATH 444**  Elementary Real Analysis  
- **MATH 447**  Real Variables  

Group III: Foundations

Information listed in this catalog is current as of 04/2016
Art History

David O'Brien
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

Like the other humanities, the history of art as an undergraduate major offers an enrichment of and a preparation for life, rather than training for a specific occupation. The student who goes on to graduate work in the field can pursue a career in teaching, museum work, or employment in a commercial art gallery, or auction house.

Working in consultation with the LAS undergraduate adviser for art history in the School of Art and Design, each student will design a program of study that satisfies the requirements listed below. Students who wish to take a considerable number of studio courses as part of their major should enroll in the history of art option offered by the School of Art and Design within the College of Fine and Applied Arts.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail address: tweissma@illinois.edu

Minimum required major and supporting course work equates to 48 hours including 30 hours of Art History courses, 15 hours of supporting coursework and 3 hours of studio.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

For students considering graduate work in Art History French or German is strongly recommended for the language requirement. Other languages including Chinese or Japanese may be used with the approval of the adviser as the needs of the student's program dictate.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

Supporting Requirements in Art

Studio course in Art and Design 3

Supporting Requirements in Art History
Select three of the following:

ARTH 111 Ancient to Medieval Art
ARTH 112 Renaissance to Modern Art
ARTH 113 Introduction to African Art
ARTH 114 Introduction to East Asian Art
ARTH 115 Art in a Global Context

ARTH 395 Junior Seminar in Art History 3
ARTH 495 Senior Seminar in Art History 3

One upper-level course from each of the following categories:

African or East Asian Art or Architecture 12
Art or Architectural History before 1700
Art or Architectural History after 1700

200- to 400-level courses in supporting areas chosen with the approval of the adviser. Although the program in art history allows considerable latitude in the selection of such courses, they should be chosen with the goal of enhancing the student's understanding of the cultural context within which works of art and architecture have been created. Recent practice suggests that supporting courses will most commonly be drawn from such fields as anthropology, classics, history, literature, music and dance history, philosophy, psychology, and religious studies.

Credit will not be given for ARTH 112 and ARTH 115.

Courses in the history of architecture, excluding ARCH 210, may be used with the approval of the adviser for as many as 9 hours of credit in meeting the requirement for 18 hours of art history at the 200-400 level.

Biology

Students interested in applying to either school of biology should simply choose Biology as their major. After taking two introductory courses, students will choose a major in either Integrative Biology or Molecular and Cellular Biology.

Integrative Biology, School of (http://www.life.uiuc.edu/sib)

Director of School: Carla Caceres

School Office: 286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044
Molecular and Cellular Biology, School of  (http://mcb.illinois.edu)

Director of School: Stephen Sligar

School Office: 393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166

An interschool option in Teaching of Biology (p. 270) is sponsored by the School of Integrative Biology and the School of Molecular and Cellular Biology.

Also, see majors in Integrative Biology (p. 222) and Molecular and Cellular Biology (p. 242).

Biology Teaching

For the Degree of Bachelor of Science in Liberal Arts and Sciences

See interschool concentrations in Biology (p. 269), major in Integrative Biology (p. 222), and major in Molecular and Cellular Biology (p. 242).

Completion of this concentration fulfills state certification requirements to teach both biology and general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education (p. 292) for the list of courses used to compute these grade-point averages.

E-mail: advising@life.uiuc.edu

Minimum required courses normally equate to 79-81 hours

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement. In addition, one course must be selected from CMN 101 or CMN 113.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, the student must have at least a 3.5 grade point average for all work completed, and present evidence of exemplary student teaching.

Prerequisites to transfer to the Teaching Concentration

- CHEM 102  General Chemistry I
- & CHEM 103 and General Chemistry Lab I
- & CHEM 104 and General Chemistry II
- & CHEM 105 and General Chemistry Lab II

In addition, the student is required to take the Illinois Certification Testing System test of Basic Skills by the December before applying to the Teacher Education Minor in Secondary School Teaching. A passing grade on this test is required before admission to the Teacher Education Minor in Secondary School Teaching.

Requirements

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 81) (37 - 38 hours). See the College of Education section for requirements of the minor. Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require ten semesters to complete this program.

Select one of the following:

- EPSY 480  Educational Statistics
- STAT 100  Statistics

Additional 300- and 400-level courses selected from IB and/or MCB in consultation with the advisor.

Information listed in this catalog is current as of 04/2016
Students should speak with an advisor to help choose the appropriate section of CHEM 232.

IB 202 and IB 302 requires animal dissection and no equivalent alternative is available.

Computer Science and Liberal Arts and Sciences Discipline

The LAS major in Computer Science and an LAS Discipline is a flexible program for students who plan to pursue technical or professional careers in arts and sciences areas requiring a sound grounding in computer science. This major allows students to combine study of computer science with training in a field in Liberal Arts and Sciences to offer students novel perspectives in interdisciplinary work. Students can use the supporting coursework to prepare for employment immediately upon graduation or for pursuing graduate study in a wide variety of fields or to complete a significant body of courses in a single area, such as a double major or minor.

Students are strongly encouraged to get involved in undergraduate research through independent studies and funded research experiences, with the goal of learning from the University of Illinois CS and LAS internationally recognized scholars outside the classroom and participating in the exciting quest for new contributions to the field.

Students interested in Mathematics or Statistics should enroll in the Math/CS (p. 237) or Stat/CS (p. 268) degree

Current approved curricula include:

Computer Science and Anthropology
Computer Science and Astronomy
Computer Science and Chemistry
Computer Science and Linguistics

For the degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Please see the computer science advisor as well as the advisor in your LAS discipline.

Current approved curricula include:

Computer Science and Anthropology

LAS Discipline coursework (Min. of 24 hours) 1

An additional 24 hours of coursework in one of the following Liberal Arts and Sciences disciplines: Anthropology, Astronomy, Chemistry, or Linguistics. Coursework must be chosen in consultation with an advisor and approved by the LAS department. Must include at least 12 hours at the 300- or 400-level.

Total Hours 66

1 Students should discuss pursing a LAS Minor or double majoring in a LAS discipline with the Computer Science academic advisor and the advisor in the appropriate LAS discipline (http://www.las.illinois.edu/students/programs/majors).

Individual Plans of Study (IPS)

Elaina Kutz, LAS Academic Advisor
2002 Lincoln Hall, 702 S. Wright St., Urbana, IL 61801
http://www.las.illinois.edu/students/programs/majors/ips/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Information listed in this catalog is current as of 04/2016
Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must

1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the IPS advisory committee.

Further information on requirements for graduation with distinction may be obtained from the secretary of the IPS advisory committee.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major—the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Cinematography, Entomology, Neuroscience, Meteorology, and Middle Eastern Studies.

The development of an IPS program begins with the student’s perception that a more appropriate field of study could exist beyond the present majors. Consultation with the secretary of the IPS advisory committee and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the IPS advisory committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The IPS Advisory Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student's junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

• Physics Concentration (p. 273)
• Physics Teaching Concentration (p. 274)

For the Degree of Bachelor of Science in Physics

• LAS Specialized Curriculum in Physics (p. 272)

LAS Specialized Curriculum in Physics

E-mail: undergrad-info@physics.illinois.edu

Degree Title: Bachelor of Science in Physics

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126

Departmental distinction: Graduation with distinctions awarded to students who complete 8 additional hours of 300- or 400-level physics courses or advanced courses in closely related technical subjects and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.
The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. However, students who want to pursue a combined major and minor, a double major, or a double degree should consider the LAS Science and Letters Curriculum in Physics because of the greater flexibility it offers. Students in the Specialized Curriculum beyond the freshman year must maintain an overall grade point average of at least 2.5 and also a grade point average of 2.5 in all required mathematics and physics courses.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement can plan ahead to allow space in their programs for undergraduate research.

Physics Concentration within the Sciences and Letters Curriculum

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 65-73 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction is awarded to students who complete 8 additional hours of 300- or 400- or 500-level physics courses or advanced courses in closely related technical subjects, and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

The Physics Concentration is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees. Students in the concentration must maintain an overall grade point average of at least 2.0 and also a grade point average of at least 2.0 in all required physics and mathematics courses. To be permitted to enroll in advanced physics courses in this concentration a student must maintain at least a 2.0 average in all attempts at science and mathematics courses taken at the University of Illinois.

Students in this concentration must choose an approved elective technical or professional option no later than the end of the second semester of the sophomore year. A set of pre-approved options is available via the departmental web site (http://physics.illinois.edu/undergrad/las-options.asp) and from the departmental undergraduate studies office. Students may also design and follow a "custom option" subject to departmental approval. Students completing the Astrophysics option will earn a minor in Astronomy, if appropriate Minor form is filed.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

Web address for department: http://physics.illinois.edu

Information listed in this catalog is current as of 04/2016
The College of Media strives to give students solid backgrounds in social sciences and humanities and to provide them broad career competence in advertising, journalism or media studies. The College's premise is that students need to understand the world and its people if they are to communicate effectively and enjoy fulfilling and meaningful lives.

The College offers Bachelor of Science degrees in Advertising, Agricultural Communication and Media and Cinema Studies and Bachelor of Science in Journalism degrees in Broadcast Journalism and News-Editorial Journalism. Students who seek to become leaders in cutting-edge media study with leading professionals and scholars and learn using the latest equipment and facilities. Included are laboratories for reporting, editing, design, and multimedia-journalism; editing suites for radio and television production; and a television studio.

The Communications Library is recognized as one of the best in the nation. Dedicated Career services are available for students in the College.

The College also includes Illinois Public Media, which operates the local PBS and NPR stations WILL-AM, FM, TV and online.

### Departments and Curricula

The College, fully accredited by the Accrediting Council on Education in Journalism and Mass Communication, offers these majors:

- **ADVERTISING (ADV)**, which offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a better and longer-lasting education for students.

- **AGRICULTURAL COMMUNICATION (AGCM)**, which prepares students for a variety of opportunities in communications with a focus on food, agricultural, energy and environmental sciences. Students pursuing this major choose one of two specializations: Journalism or Advertising. The College of Media and the College of Agricultural, Consumer and Environmental Sciences jointly offer this curriculum.

- **JOURNALISM (JOUR)**, prepares students for exciting and fulfilling careers in traditional broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

- **MEDIA AND CINEMA STUDIES (MACS)**, prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media and emerging technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment. MACS offers an undergraduate and graduate minor in CINEMA STUDIES.

The College also offers undergraduate certificate programs in PUBLIC RELATIONS, MEDIA SALES, and SPORT MEDIA.

The Departments of Advertising and Journalism offer graduate programs leading to Master of Science degrees in Advertising and in Journalism. The Department of Media and Cinema Studies offers an undergraduate and graduate Minor in Cinema Studies. The College also offers an interdisciplinary program leading to a Doctor of Philosophy degree in communications and media.

**Media, College of**

Student Services Center  
19 Gregory Hall  
810 S. Wright St., MC-477  
Urbana, IL 61801  
PH: (217) 244-4329  
http://media.illinois.edu  
media-ssc@illinois.edu

The College has a rich past and a bright future. It traces its history to 1902, when instruction in journalism began. A school of journalism was established in 1927. In 1950 it became the School of Journalism and Communications. In 1957 the school was elevated to college status. The name College of Communications was adopted in 1968. To better reflect the College's emphasis on mediated communication, the name College of Media was adopted in 2008 becoming one of the first Colleges of Media in the country.

The College also houses the Institute of Communications Research.

---

Information listed in this catalog is current as of 04/2016
Requirements
Admission
High school seniors and transfer students from another institution should contact the Office of Admissions and Records for admission requirements and applications for a specific term.

Current University of Illinois students who will have completed at least one year on the Urbana-Champaign campus should apply during the first weeks of the semester during which they will complete their 30th hour of course credit. Successful applicants will be admitted for the following semester. Applications also will be accepted from more advanced students provided that by the end of the semester in which they apply, they will have completed no more than 90 hours. Forms are available on the College web site. Specific deadlines are cited on the forms.

Students seeking to transfer from another university may apply early in the spring semester provided they will have completed at least 30 transferable hours by the end of the spring semester. Forms planned during upcoming summer semesters are not considered. Forms are available from the University Office of Admissions and Records.

Inter-college transfer students (students already on campus) should include a personal essay of up to 500 words. The essay should demonstrate the applicant’s media-related abilities and detail the applicant’s interest in and demonstrated commitment to a career for which a College of Media degree would be appropriate.

Admission is competitive. While there is no specific requirement regarding grades, a strong GPA is advantageous especially in core classes that are part of the major you wish to transfer in to. Students with the best essays and the best academic or professional qualifications, including any pertinent extracurricular activities or internships, will receive highest priority. For a University of Illinois student, one way to demonstrate interest is to have earned a grade of B or better in introductory courses such as ADV 150, JOUR 200, MACS 100, MACS 101, MACS 261, MACS 262, or Discovery courses taught by the College.

Students currently enrolled in other colleges on campus are accepted on the condition that by the time they join the College at the start of the semester after they apply, they must:

- Have completed at least two semesters in the University of Illinois college to which they were admitted, if admitted as freshmen.
- Be classified by the University as sophomores (at least 30 credit hours) or as juniors (fewer than 90 credit hours).
- Be in good academic standing.
- Have completed approximately one-fourth (if sophomores) or one-half (if juniors) or more of the total credit hours required to satisfy the University’s General Education requirements.
- Have made substantial progress toward completing any departmental requirements for courses outside the College of Media. However, for example, applicants for Advertising ideally will have completed ADV 150, ECON 102 and ECON 103, STAT 100 and two of these three courses: SOC 100, ANTH 103 and PSYC 100.

Students may apply to any major in the College: Advertising, Agricultural Communications, Broadcast Journalism, Media and Cinema Studies or News-Editorial Journalism. College of Media students may not pursue a Minor in Cinema Studies and may not complete double majors within the College.

Students who would require more than nine total semesters of overall college or university enrollment to complete their degree will be denied admission. Students must complete their College of Media degrees within seven semesters of joining the College as sophomores or within five semesters of joining the College as juniors. A minimum of three semesters within the College is required for students admitted as sophomores. A minimum of five semesters within the College is required for students admitted as sophomores.

Minors in areas outside the College are strongly encouraged. However, because considerable coursework in other colleges is implicit within the requirements for all College of Media degrees, students are not admitted to the College of Media for the purpose of pursuing second majors or second undergraduate degrees.

Students completing freshman and sophomore studies at institutions other than the University of Illinois at Urbana-Champaign are strongly advised to defer courses in Media and Cinema Studies, Journalism, Agricultural Communication, and Advertising until they enroll in the College of Media. Students may transfer up to eight hours of Advertising, Agricultural Communication, Journalism, Media and Cinema Studies or College of Media electives. However, these hours will not be applied to the minimum number of hours required in College of Media courses and may not be used to replace required courses.

Graduation
To graduate, students must satisfy all University requirements as to residency, scholarship, and fees and must complete the University's general education requirements. Although the College currently requires completion only of the equivalent of a third-semester college-level course in a language other than English, students planning to join the College as freshmen in future years are strongly urged to plan for completion of the equivalent of a fourth-semester language course as this requirement may change in the future. All students also must fulfill these general requirements of the College of Media:

- Complete a total of 124 semester hours of course credit of which no more than 12 hours total may be in basic physical education activity courses (KIN 100-KIN 111, KIN 122), vocational and technical education courses, basic courses in military science (AFAS, MILS and NS courses numbered below 300), Institute of Aviation courses, Undergraduate Open Seminar (199) courses, and independent study courses and other experimental or special topics courses (such as LAS 110) outside the College of Media. The exception is that Agricultural Communication majors must complete 126 semester hours of credit. Independent study courses additionally must be approved by the College to ensure that credit is given only for academic work directly supervised by a faculty member. The College encourages its students to have appropriate professional internships and to participate in professional activities. While it does not allow academic credit for such experience, one credit hour is possible through an academic course or independent study supervised by a College of Media faculty member and taken in conjunction with an internship.
- Agricultural Communication majors must complete 20 hours from the College of Media in one of three specializations: advertising, broadcast journalism, or news-editorial journalism. All other majors must complete not less than 36 hours in courses offered by or crosslisted with Advertising (ADV), Journalism (JOUR) or Media and Cinema Studies (MS, CINE, or MACS), Agricultural Communications (AGCM) or the College of Media (MDIA).
• Complete not less than 80 hours of credit outside the College of Media, of which 65 hours must be taken in traditional liberal arts and sciences, which may include courses offered outside the College of Liberal Arts and Sciences. Math courses numbered below 100 may not count in this total.

• No course of any number that is offered by or cross-listed with Advertising, Agricultural Communications, Journalism or Media and Cinema Studies or is substantially similar to courses offered by Advertising, Agricultural Communications, Journalism or Media and Cinema Studies may count in this total, regardless of the rubric under which it is taken. For each hour of credit beyond 44 in such courses, the number of hours required for graduation increases by one additional hour to ensure that the requirement of 80 hours outside the College is met.

• Complete not less than 20 hours in courses numbered 200 or above outside the College of Media and not cross-listed in the College of Media, regardless of the rubric under which they are taken. At least 9 of the 20 hours must be in courses numbered 300 and above.

• Complete the specific requirements of one of the five curricula offered by the College.

• Earn a cumulative grade point average of 2.00 (A = 4.00) in all courses presented for the degree and a cumulative 2.00 grade point average for all courses taken in the College.

Special Programs

Dean's List
To be eligible for Dean's List recognition for any semester, students must rank in the top 20 percent of the College in grade point average and must complete at least 14 hours taken for a letter grade (A through F) on the Urbana-Champaign campus. Transfer, study abroad and guided individual study coursework is excluded.

The specific grade point average necessary to achieve Dean's List recognition may vary. College of Media standards are high.

Dean's List recognition is determined before the start of the ensuing semester. Students who are not initially selected but who believe they might qualify because of the late resolution of incomplete, deferred or missing grades may petition before the end of the next semester for retroactive addition to the list.

Honors at Graduation
For graduation with honors, a student must rank in the upper 20 percent of his or her graduation class in overall grade point average. For graduation with high honors, a student must additionally rank in the upper 10 percent. For graduation with highest honors, a student must additionally rank in the upper 5 percent.

For purposes of this award, "graduating class" means all students listed as receiving or as being candidates for receiving bachelor's degrees in all College majors at the College's annual commencement convocation each May. This includes students who graduated in the previous December and those who are candidates for graduation in May and August. Grade point averages are computed through the fall semester immediately preceding the annual convocation and include all transfer courses and other grades posted as of that date.

Transfer students, in addition to meeting the general requirement, must have cumulative University of Illinois at Urbana-Champaign grade-point averages as high as the lowest ones listed for students who qualify on the basis of having completed all of their work at the University of Illinois at Urbana-Champaign and must have earned 40 or more semester hours at the University of Illinois at Urbana-Champaign through the fall semester immediately preceding the annual convocation.

Kappa Tau Alpha
Each year, scholastically high-ranking graduating juniors and seniors in the College of Media are considered for membership in Kappa Tau Alpha, the seventh oldest national honorary society, founded to recognize and promote academic excellence and scholarship in journalism and mass communication.

Students must rank in the upper 10 percent of their class, must have completed at least five semesters of degree work and must have completed at least nine semester hours in professional skills courses, as defined by the national society.

Edmund J. James Scholars
The James Scholar Program, named for the University of Illinois’ fourth president, Edmund J. James, focuses on giving high-ability students the opportunity to gain additional knowledge by working closely with instructors.

To remain in good standing as a James Scholar in the College of Media, students must maintain semester and cumulative GPAs of 3.5 and higher, complete at least 14 credit hours for traditional letter grades each semester and complete at least one honors course or project each academic year. Students may choose from taking a Campus Honors Program course, completing an Honors Credit Learning Agreement with a professor in any course, working on an honors project with a College of Media professor as an independent study, or from the pre-approved honors activity list as provided by the honors coordinator to complete the honors requirement. Freshmen must take a College honors course during the spring semester. Students who study abroad will be exempt of the GPA and credit hour requirements during the semester(s) they are abroad. The honors requirement should be completed the semester the student is on campus.

James Scholars' academic records are reviewed each summer. If a student has met the stated requirements for each of the two past semesters at the time of the review, he or she will be certified as a James Scholar for the next academic year and the James Scholar designation will be added to his or her transcripts for that academic year. Any student who does not fulfill the requirements will be removed from the James Scholars program. Because James Scholar review takes place once a year, a student who does not meet the requirements in the fall semester will remain in the program for the spring. However, s/he will be dropped during the summer review period and the James Scholar notation will not appear on the transcript for the previous academic year. In order to graduate with the James Scholar designation, all students must have completed a minimum of four honors activities, with at least one being completed each year the student is in the program.

Students entering the College of Media as freshmen are invited to join the James Scholars program during the summer if they rank in the top 20 percent of the College's incoming class, as determined by an Office of Admissions and Records standard that combines factors such as standardized test scores and high school GPA.

Students already in the College of Media are invited to become James Scholars for the upcoming fall semester if they have completed fewer than 75 hours, have at least a 3.5 overall GPA and were included on the Dean's List for the spring semester. If a student loses the James Scholar status, he or she must sit out of the program for at least one
For the Degree of Bachelor of Science in Advertising

To graduate from the advertising curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

**Advanced Hours Requirement**

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 or above.

Please note: Courses used to fulfill University General Education requirements or to fulfill requirements for a minor may count toward these requirements. Courses used to fulfill the College of Media’s advanced outside hours requirement may also count toward these requirements.

**124 total hours are required for graduation**

1. College Electives must include at least six credits of Advertising elective courses numbered 300 or above for students admitted to the major starting in Fall 2016. Students admitted to the major prior to Fall 2016 are also strongly encouraged to fulfill six credits of Advertising elective courses numbered 300 or above.

2. College Media elective courses offered by or cross-listed with Agricultural Communications (AGCM), Journalism (JOUR), Media and Cinema Studies (MACS) or the College of Media (MDIA) count toward the remainder.

3. Which may be credited toward the College requirement of advanced hours outside the College.

College of Media Electives 18-26

College Electives must include at least three 3- or 4-hour Journalism courses numbered 200 or above and not cross-listed with other departments (12 hours minimum) must be taken. Courses in the sequence not chosen may be used to fulfill this requirement. Remaining College of Media elective hours offered by or cross-listed with Advertising (ADV), Agricultural Communications (AGCM), Journalism (JOUR), Media and Cinema Studies (MACS) or the College of Media (MDIA) count in this total.

Hours outside the College of Media (72 hours minimum)

Special Department Requirements

Including at least six hours in each of these seven areas:

- Economics
- Literature (ENGL/CWL) but no film courses
- History
- Philosophy
- Political Science
- Sociology or Anthropology
- Natural Science or Technology

Two Areas of Specialization

12 hours in each of two specialized areas outside the College of Media

Advanced Hours Requirement

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. 9 of the 20 hours must be in courses numbered 300 or above.

Please note: Courses used to fulfill University General Education requirements or to fulfill requirements for a minor may count toward these requirements. Courses used to fulfill the College of Media’s advanced outside hours requirement may also count toward these requirements.

Free electives to reach minimum required for graduation 0-8

Minimum total hours required for graduation 124

1. Must be taken one at a time and in sequence

Media and Cinema Studies

Dr. C. L. Cole, Department Head
119 Gregory Hall, 810 South Wright Street, Urbana
PH: (217) 333-1549
https://media.illinois.edu/degrees/media-and-cinema-studies-bs/undergraduate-programs

The Department of Media and Cinema Studies in the College of Media offers a B.S. Degree in Media and Cinema Studies with two concentrations, Media Studies and Cinema Studies. Students from outside the College can earn an undergraduate Minor in Cinema Studies and a graduate Minor in Cinema Studies. College of Media students may not pursue the Minor in Cinema Studies.

Students in the Media and Cinema Studies program develop an understanding of modern communications, media, and cinema from an interdisciplinary perspective. They explore the theory behind contemporary media and the origins, structures and implications for our society. Students also address the history of media and cinema both in the United States and internationally. The development of all mediated forms is considered in light of more general concerns about technology, culture, society, and politics.

For the Degree of Bachelor of Science in Media and Cinema Studies

To graduate from the media and cinema studies curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses:

- Media Studies Concentration (p. 280)
- Cinema Studies Concentration (p. 280)

Minor in Cinema Studies

The Minor in Cinema Studies provides undergraduate students with certain core courses in the discipline while also allowing them the freedom to explore the various approaches to the subject presented by different departments.

The Minor in Cinema Studies requires a minimum of 21 hours distributed over seven courses as follows. At least six hours of advanced (300 or 400) level courses must be included:

- MACS 261 Survey of World Cinema I 3
- MACS 262 Survey of World Cinema II 3
- Select one of the following (Non-US Cinema): 3-4

Information listed in this catalog is current as of 04/2016

- ENGL 272 Minority Images in Amer Film

**Sequence Elective Requirements** 6-7

Select TWO courses from the following Media Studies core requirements:

- MACS 264 Creative and Information Economies 4
- MACS 317 Media History 3
- MACS 320 Popular Culture 3
- MACS 331 Media and Democracy 3
- MACS 351 Social Aspects of Media 3
- MACS 410 Media Ethics 3

**College of Media Electives** 21-30

Students must earn at least 44 hours in the College of Media. Remaining hours are completed with ADV, AGCM, JOUR, MACS, or MDIA electives.

**Required Area of Study or Minor outside the College of Media** 72

In addition to the 44+ hours within the College described above, students must complete at least 18 hours in one or 9 hours in two approved areas outside of the College of Media, such as African American Studies, American Indian Studies, Anthropology, Art History, Asian American Studies, Economics, Gender and Women's Studies, History, Latina/o Studies, Linguistics, Literature, Non-English Languages, Philosophy, Political Science, Psychology, Regional Area Studies, Communication, or Sociology. A university-approved minor that requires at least 18 hours may substitute for this requirement. Courses may, if they qualify, also count against the requirement for advanced hours outside the College.

**Advanced Hours Requirement**

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 or above.

124 total hours are required for graduation

- Students must earn at least 44 hours in the College of Media. Remaining hours are completed with ADV, AGCM, JOUR, MACS, or MDIA electives.

### Required Area of Study or Minor Outside the College of Media 72
In addition to the 44+ hours within the College described above, students must complete at least 18 hours in one or 9 hours in two approved areas outside of the College of Media, such as African American Studies, American Indian Studies, Anthropology, Art History, Asian American Studies, Economics, Gender and Women's Studies, History, Latina/o Studies, Linguistics, Literature, Non-English Languages, Philosophy, Political Science, Psychology, Regional Area Studies, Communication, or Sociology. A University-approved minor that requires at least 18 hours may substitute for this requirement. Courses may, if they qualify, also count against the requirement for advanced hours outside the College.

### Advanced Hours Requirement
At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 or above.

124 total hours are required for graduation

## Minor in Cinema Studies

Dr. C. Cole, Department Head

The Minor in Cinema Studies provides undergraduate students with certain core courses in the discipline while also allowing them the freedom to explore the various approaches to the subject presented by different departments.

The Minor in Cinema Studies requires a minimum of 21 hours distributed over seven courses as follows. At least six hours of advanced (300 or 400) level courses must be included:

### Required Courses:
- MACS 261 Survey of World Cinema I 3
- MACS 262 Survey of World Cinema II 3
- Select ONE of the following Non-US Cinema/Foreign Language courses: 3-4
  - MACS 207 Indian Cinema in Context
  - MACS 382 French & Comparative Cinema I 3
  - MACS 419 Russian & East European Film 3
  - MACS 490 Green Screen: Film and Nature 3
  - MACS 492 Scandinavian Cinema 3
  - MACS 493 German Cinema I 3
  - MACS 494 German Cinema II 3
  - ITAL 270 Introduction to Italian Cinema
  - ANTH 266 African Film and Society
- Select ONE of the following Culture, Identity and Politics in Media courses: 3
  - MACS 211 Intro to African-American Film
  - MACS 250 Latina/os on the Bronze Screen
  - MACS 275 Am Indian and Indigenous Film
  - MACS 335 Film, TV, and Gender
  - MACS 365 Asian American Media and Film
  - MACS 381 Black Women and Film
  - MACS 432 Commodifying Difference
  - MACS 461 Politics of Popular Culture
  - AAS 120 Intro to Asian Am Pop Culture
- ENGL 272 Minority Images in Amer Film

Select TWO from these additional Cinema Studies courses: 6-7
- MACS 117 Shakespeare on Film 3
- MACS 300 Topics in Film and History 3
- MACS 361 Film Theory and Criticism 3
- MACS 391 Individual Study 0 to 3
- MACS 395 Special Media/Cinema Topics 3
- ENGL 104 Intro to Film 3
- ENGL 117 Shakespeare on Film 3
- ENGL 273 American Cinema Since 1950 3
- ENGL 373 Special Topics in Film Studies 3
- HIST 300 Topics in Film and History 3

Information listed in this catalog is current as of 04/2016
RUSS 219  Russian Cinema Survey 3
SCAN 490  Green Screen: Film and Nature 3 or 4
SLAV 419  Russian & East European Film 3 or 4
Select ONE of the following Media Studies courses: 3-4
MACS 100  Intro to Popular TV & Movies 3
MACS 199  Undergraduate Open Seminar 1 TO 5
MACS 264  Creative and Information Economies
MACS 317  Media History
MACS 320  Popular Culture
MACS 331  Media and Democracy
MACS 351  Social Aspects of Media
MACS 410  Media Ethics
Advanced Hours Requirement: 6
Six hours of advanced (300 or 400) level courses must be included
Please note, we cannot guarantee that all of these courses will be taught on a regular basis, so keep this in mind when selecting courses.

Agricultural Communications

Dr. Lulu Rodriguez, Director
274 Bevier Hall
905 S. Goodwin Ave.
PH: 217-300-1045
http://academics.aces.illinois.edu/majors/agcom

For the Degree of Bachelor of Science with a Major in Agricultural Communications

The major in Agricultural Communications is for students wishing to pursue careers as professionals in writing, editing, and publishing; public relations; advertising; radio and television broadcasting; photography; and related activities with an emphasis on the fields of food, agriculture, the environment, energy and consumer behavior. Concentrations in journalism or advertising allow students to pursue these professional interests. Program requirements in each concentration include the completion of an interdisciplinary minor in Food and Environmental Systems. The College of Media and the College of Agricultural, Consumer and Environmental Sciences jointly offer this curriculum.

A minimum of 126 hours are required for graduation, including:
General Education Requirements
Agricultural Communications major requirements
Minor in Food and Environmental Systems requirements
College of Media concentration requirements

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
RHET 105  Writing and Research
& CMN 101  and Public Speaking (See College Composition I requirement)
OR

CMN 111  Oral & Written Comm I & CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list. (JOUR 200; AGCM 220). 3-4

Cultural Studies
Select one course from Western/Comparative culture and one from non-Western/U.S. minority culture from campus approved list.

Foreign Language
Coursework at or above the third level is required for graduation.

Quantitative Reasoning I
Select one of the following: 3-4

ACE 261  Applied Statistical Methods
CPSC 241  Intro to Applied Statistics
ECON 202  Economic Statistics I

- PS 101 Intro to US Gov & Pol

**Agricultural Communications Required**

- AGCM 110 Intro to Ag and Env Comm 3
- AGCM 320 Public Information Campaigns 4
- JOUR 200 Introduction to Journalism 3

Select two of the following: 6-7

- AGCM 220 Communicating Agriculture
- AGCM 270 Ag Sales and Persuasive Communication
- AGCM 315 Emerging Media
- AGCM 330 Environmental Communications
- AGCM 398 Undergraduate Seminar
- AGCM 430 Comm in Env Social Movements

Students must also complete the ACES Minor in Food and Environmental Systems (http://catalog.illinois.edu/undergraduate/aces/food-envrion-systems-minor) 18

**COLLEGE OF MEDIA CONCENTRATION** 21-23

Students must choose one of two concentrations:

**ADVERTISING** 21

Required courses:

- ADV 150 Introduction to Advertising 3
- ADV 281 Advertising Research Methods 3
- ADV 283 Advertising and Brand Strategy 3
- ADV 284 Consumer Insight 3

Choose three of the following:

- ADV 390 Content Creation
- ADV 409 Media Entrepreneurship
- ADV 460 Innovation in Advertising
- ADV 483 Audience Analysis

**JOURNALISM** 23

Required courses:

- JOUR 210 News gathering Across Platforms 4
- JOUR 215 Multimedia Reporting 4
- JOUR 311 Media Law 3

Choose three of the following:

- JOUR 315 Adv Public Affairs Reporting
- JOUR 320 News Editing
- JOUR 425 Multimedia Editing and Design
- JOUR 335 Audio Journalism
- JOUR 340 Video Reporting & Storytelling
- JOUR 445 Video Storytelling 2-Producing

---

**Overview of Curriculum and Requirements**

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, health care, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing status in many masters of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive a MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

**Degree title: Bachelor of Social Work**

The social work major prepares practitioners for generalist social work practice with individuals, groups, families and communities. The curriculum requires a minimum of 120 hours for graduation. Minimum required course work in the major equates to 50 course hours of core professional education, including 8 hours for an agency-based field practicum (internship) where students receive additional supervision and training 4 days per week for one semester.

**Admission Requirements for Freshman**

The following requirements must be met for consideration for admission as a freshman into the BSW Program:

- University of Illinois application-The application includes a major selection, an essay, a list of activities, work experience, community service, honors and awards, and an accurate email address
- Application fee
- Self-Reported Academic Record (SRAR)
- Official test scores-Standardized test scores are required for admission review: either ACT (code 1154) or SAT I (cod 1836) scores are accepted
- English proficiency
- We do NOT accept letters of recommendation

For more detailed information regarding application requirements and the application process, please visit the University of Illinois Admissions website at: www.admissions.illinois.edu

**Admission Requirements for Transfer and Inter-College Transfer Students (ICT)**

The following requirements must be met for consideration for admission into the BSW Program:
• Completion and documentation of a minimum of 50 (fifty) hours of volunteer or paid work experience prior to submission of the BSW application. These hours must be completed by working with or for an underrepresented population or population in need. All volunteer hours must have been completed within 2 calendar years of application date.
• Cumulative minimum GPA 2.5 or higher
• Evidence of strong communication and interpersonal skills
• Evidence of personal attributes that are suitable for the profession of social work
• Successful completion of the application process for entry https://socialwork.illinois.edu/academics/bachelor-of-social-work/admissions-information/bsw-application/.

Volunteer hours can be completed through service learning projects completed for course requirements, as well as, through volunteer experiences with community organizations, registered student organizations, Greek organization affiliation, etc. The office of Volunteer Programs at the University http://union.illinois.edu/get-involved/office-of-volunteer-programs/programming (http://union.illinois.edu/get-involved/office-of-volunteer-programs/programming) is a good resource for ideas on how to get involved.

Applications for both fall and spring are accepted. Applications are accepted on a rolling admissions basis.

Sustainability, Energy, and Environment Fellows Program (SEE FP)

http://sustainability.illinois.edu/education/sustainability-minor/

Why is true sustainability so hard to achieve? Behind every environmentally friendly practice is a web of consequences, trade-offs, feedbacks, and barriers — and this undergraduate minor administered by the Institute for Sustainability, Energy, and Environment (iSEE) will help you develop a systems-level perspective of the economic, environmental and social dimensions of sustainability to help you navigate them.

The Sustainability, Energy, and Environment Fellows Program (SEE FP) is a campuswide undergraduate minor that prepares students for pursuing careers in the corporate sector, nonprofit organizations, government agencies and environmental advocacy groups.

To find out more about the minor and the enrollment process, email Professor Madhu Khanna, iSEE Associate Director for Education & Outreach, at see-fellows@illinois.edu.

Dentistry

Dentistry is a career requiring a professional degree (D.D.S. or D.M.D). Students wishing to apply to dental school are encouraged to choose an undergraduate major that aligns with their interests and strengths. Because course requirements may change from year to year, students should research the admissions requirements for their schools of interest. The requirements for each school can be found in the Official Guide to Dental School (http://www.adea.org/publications/Pages/OfficialGuide.aspx), published by the American Dental Education Association (ADEA). This print resource is available at The Career Center. Additional information about preparation for dental school can be found at www.adea.org (http://www.adea.org/GoDental). Admission to one of the 65 U.S. dental schools is highly competitive, requiring solid academic performance, demonstrated interpersonal skills, exposure to the profession, and completion of the Dental Admission Test (DAT). In addition to academic advising provided by the colleges and academic departments, students pursuing dentistry are encouraged to take advantage of Health Professions Advising services at The Career Center early in their academic career at Illinois.

Health Professions Advising at The Career Center (https://www.careercenter.illinois.edu/healthprofessions)

The Career Center provides health professions advising for students interested in pursuing dentistry as a career, including discussion of required and recommended coursework, preparation outside the classroom, details of the application process, and characteristics of competitive applicants. In addition to one-on-one appointments, health professions advisors present workshops, host events, and coordinate campus visits for deans and admissions officers. More information for both current and prospective students (https://www.careercenter.illinois.edu/sites/default/files/u8846/Prospective
Students are strongly encouraged to research their specific schools of interest.

**Medicine**

http://aamc.org

**Preprofessional Requirements for Medicine**

Medicine is a career requiring a professional degree (M.D. or D.O.). Students wishing to apply to medical school are encouraged to choose an undergraduate major that aligns with their interests and strengths. Because course requirements may change from year to year, students should research the admissions requirements for their schools of interest. These requirements are available through the Medical School Admissions Requirements (https://www.aamc.org/students/applying/requirements/msar) (MSAR) website managed by the Association of American Medical Colleges (http://www.aamc.org) (AAMC) and the Osteopathic Medical College Information Book (http://www.aacom.org/news-and-events/publications/cib_final) (CIB), published by the American Association of Colleges of Osteopathic Medicine (http://www.aacom.org) (AACOM). Both resources are available at The Career Center. Additional information about preparation for medical school can be found at www.aamc.org (http://www.aamc.org) and www.aacom.org (http://www.aacom.org). Admission to medical school is highly competitive, requiring solid academic performance, demonstrated interpersonal skills, exposure to the profession, and completion of the Medical College Admission Test (MCAT). In addition to academic advising provided by the colleges and academic departments, students pursuing medicine are encouraged to take advantage of Health Professions Advising services at The Career Center early in their academic career at Illinois.

The Career Center provides health professions advising for students interested in pursuing medicine as a career, including discussion of required and recommended coursework, preparation outside the classroom, details of the application process, and characteristics of competitive applicants. In addition to one-on-one appointments, health professions advisors present workshops, host events, and coordinate campus visits for deans and admissions officers. More information for both current and prospective students (https://www.careercenter.illinois.edu/sites/default/files/u8846/Prospective%20Students_0.pdf) is available on The Career Center’s website at http://www.careercenter.illinois.edu (http://www.careercenter.illinois.edu). Current students can make an appointment with a Health Professions Advisor at The Career Center by calling (217) 333-0820, stop by during weekly drop-in hours, or email the health professions advising team at tcc-healthgrad@illinois.edu. Information about upcoming programs and services is available via the Health Careers Chronicle (https://www.careercenter.illinois.edu/connect) weekly e-newsletter.

The following chart represents common course requirements to prepare for medical school. Colleges of Medicine may require additional coursework and/or expect students to go beyond minimum preparation. Students are strongly encouraged to research their specific schools of interest.

Information listed in this catalog is current as of 04/2016
may be completed in 4 semesters (two academic years). There is also an
option for students who are RN’s to complete their BSN online in as little
as 16 months. More information about this online option can be found at
online.uic.edu/nurses (http://online.uic.edu/nurses).

Admission to the professional phase is on recommendation of the
Admissions Committee of the College of Nursing after completion of
the following requirements with a cumulative gpa of 2.75 (A=4.0) and a
gpa of 2.5 for the 5 required science courses. A minimum grade of C is
required in all prerequisite courses.

For additional information about the programs in nursing, write to the
University of Illinois at Chicago College of Nursing-Urbana Regional
Program, 408 S. Goodwin Avenue, Urbana, IL 61801, or email to
conurbana@illinois.edu.

General Education Courses:

- Understanding the Individual and Society
- Understanding US Society
- Understanding Creative Arts
- Understanding the Past
- Understanding World Cultures

Upper division course in social science, humanities, or natural
sciences (may be completed after admission to the College of
Nursing)

Transfer guides for most community colleges are available from the
College of Nursing or online at www.uic.edu (http://www.uic.edu).

Students may obtain a guide to UIUC courses that meet Nursing GEN
ED’s from the College of Nursing.

Occupational Therapy

Preprofessional Requirements for Occupational Therapy

Occupational Therapy is a career requiring a professional degree (MOT
or OTD). Students wishing to apply to occupational therapy school are
couraged to choose an undergraduate major that aligns with their
interests and strengths. Because course requirements may change from

year to year, students should research the admissions requirements for their schools of interest. Additional information about preparation for occupational therapy school, including a list of all accredited master’s and doctoral level programs, can be found on the American Occupational Therapy Association (http://www.aota.org/Education-Careers/Considering-OT-Career/Resources.aspx) website. Admission to occupational therapy school is highly competitive, requiring solid academic performance, demonstrated interpersonal skills, exposure to the profession, and completion of the Graduate Records Exam (GRE). In addition to academic advising provided by the colleges and academic departments, students pursuing Occupational Therapy are encouraged to take advantage of Health Professions Advising services at The Career Center early in their academic career at Illinois.

The Career Center provides health professions advising for students interested in pursuing occupational therapy as a career, including discussion of required and recommended coursework, preparation outside the classroom, details of the application process, and characteristics of competitive applicants. In addition to one-on-one appointments, health professions advisors present workshops, host events, and coordinate campus visits for deans and admissions officers. More information for both current and prospective students (https://www.careercenter.illinois.edu/sites/default/files/u8846/Prospective%20Students_0.pdf) is available on the Career Center’s website at www.careercenter.illinois.edu (http://www.careercenter.illinois.edu). Current students can make an appointment with a Health Professions Advisor at The Career Center by calling (217) 333-0820, stop by during weekly drop-in hours, or email the health professions advising team at tcc-healthgrad@illinois.edu. Information about upcoming programs and services is available via the Health Careers Chronicle (https://www.careercenter.illinois.edu/connect) weekly e-newsletter.

The following chart represents common course requirements to prepare for occupational therapy school. Occupational therapy programs may require additional coursework and/or expect students to go beyond minimum preparation. Students are strongly encouraged to research their specific schools of interest.

Preprofessional Requirements for Optometry
Optometry is a career requiring a professional degree (O.D.). Students wishing to apply to optometry school are encouraged to choose an undergraduate major that aligns with their interests and strengths. Because course requirements may change from year to year, students should research the admissions requirements for their schools of interest. These requirements are described on the Association of Schools and Colleges of Optometry (ASCO) website at www.opted.org (http://www.opted.org). Admission to optometry school is highly competitive, requiring solid academic performance, demonstrated interpersonal skills, exposure to the profession, and completion of the Optometry Admission Test (OAT). In addition to academic advising provided by the colleges and academic departments, students pursuing optometry are encouraged to take advantage of Health Professions Advising services at The Career Center early in their academic career at Illinois.

The Career Center provides health professions advising for students interested in pursuing optometry as a career, including discussion of required and recommended coursework, preparation outside the classroom, details of the application process, and characteristics of competitive applicants. In addition to one-on-one appointments, health professions advisors present workshops, host events, and coordinate campus visits for deans and admissions officers. More information for both current and prospective students (https://www.careercenter.illinois.edu/sites/default/files/u8846/Prospective%20Students_0.pdf) is available on the Career Center’s website at www.careercenter.illinois.edu (http://www.careercenter.illinois.edu). Current students can make an appointment with a Health Professions Advisor at The Career Center by calling (217) 333-0820, stop by during weekly drop-in hours, or email the health professions advising team at tcc-healthgrad@illinois.edu. Information about upcoming programs and services is available via the Health Careers Chronicle (https://www.careercenter.illinois.edu/connect) weekly e-newsletter.

Physical Therapy

Preprofessional Requirements for Physical Therapy

Physical therapy is a career requiring a professional degree (DPT). Students wishing to apply to physical therapy school are encouraged to choose an undergraduate major that aligns with their interests and strengths. Because course requirements may change from year to year, students should research the admissions requirements for their schools of interest. These requirements are listed in the Course Prerequisites Summary, available through the Physical Therapist Centralized Application Service (PTCAS) at www.ptcas.org (http://www.ptcas.org), as well as through individual physical therapy program websites. Additional information about preparation for physical therapy programs can be found at www.apta.org (http://www.apta.org). Admission to physical therapy school is highly competitive, requiring solid academic performance, demonstrated interpersonal skills, exposure to the profession, and completion of the Graduate Records Exam (GRE). In addition to academic advising provided by the colleges and academic departments, students pursuing physical therapy are encouraged to take advantage of Health Professions Advising services at The Career Center early in their academic career at Illinois.

The Career Center provides health professions advising for students interested in pursuing physical therapy as a career, including discussion of required and recommended coursework, preparation outside the classroom, details of the application process, and characteristics of competitive applicants. In addition to one-on-one appointments, health professions advisors present workshops, host events, and coordinate campus visits for deans and admissions officers. More information for both current and prospective students (https://www.careercenter.illinois.edu/sites/default/files/u8846/Prospective%20Students_0.pdf) is available on the Career Center's website at www.careercenter.illinois.edu (http://www.careercenter.illinois.edu).

Current students can make an appointment with a Health Professions Advisor at The Career Center by calling (217) 333-0820, stop by during weekly drop-in hours, or email the health professions advising team at tcc-healthgrad@illinois.edu. Information about upcoming programs and services is available via the Health Careers Chronicle (https://www.careercenter.illinois.edu/connect) weekly e-newsletter.

1 MCB and IB majors do NOT take MCB 151 or IB 151. Pre-physical therapy students in any major who choose to take upper level labs do not need to take MCB 151 and/or IB 151. Pharmacy schools require a minimum of two biology labs.

2 UIC and Northwestern require Calculus. Other schools may require statistics or no math.

Veterinary Medicine

Preprofessional Requirements for Veterinary Medicine

For information regarding the College of Veterinary Medicine at the University of Illinois at Urbana-Champaign contact the Office of the Associate Dean for Academic and Students Affairs (217)-265-0380 for

Information listed in this catalog is current as of 04/2016
academic advising questions or refer to the Office’s website at http://vetmed.illinois.edu/asa/.

Specific admissions questions may be answered by reference to: http://publish.illinois.edu/vetmed-admissions/. More individualized or specific admissions questions can be addressed to admissions@vetmed.illinois.edu.

Students wishing to complete the preprofessional requirements for veterinary medicine may do so within a variety of curricula. Science course prerequisites are similar to those required for most post-graduate medical professions curricula.

Because of the competition for admission, students should strongly consider completing a bachelor’s degree. In recent years, there have been approximately eight applicants for each space available in the entering class for the D.V.M. (Doctor of Veterinary Medicine) program. The mean grade point average of recently admitted students has been 3.5.

**Teacher Education**

Chris Roegge, Executive Director
505 E. Green Street, Suite 203
Champaign, IL 61820

PH: 217-333-7195
FX: 217-265-5188
http://cote.illinois.edu

The Council on Teacher Education formulates, modifies, implements, and monitors compliance with policies related to the education of future educators. The Council also facilitates communication and promotes collaboration among all participants involved in the preparation and continuing professional development of educators. The Council is the designated unit responsible for the coordination of teacher, school support personnel, and administrator education curricula at the Urbana campus and serves as the liaison between the campus and state educator licensure and program approval authorities.

Six colleges and two schools of the University of Illinois at Urbana-Champaign offer degree programs in teacher, school support personnel, and administrator education: the Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Education; Fine and Applied Arts; Liberal Arts and Sciences; and the Graduate College. The list of teacher education curricula can be found at the end of this section.

Candidates may consult their teacher education advisers or the Council for additional information about academic regulations and other policies affecting teacher education. Consult the Executive Director of the Council for information about the Grievance Policy and Procedures for Students Enrolled in Educator Preparation Programs under the purview of the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education (ISBE) or the Illinois General Assembly.

**Requirements**

**Admissions**

Applicants to educator preparation programs must meet the admission requirements of the colleges and departments offering the chosen curricula. Council policy mandates candidates pass an ISBE approved test of basic skills before they may be admitted to an educator preparation program. With final approval from ISBE, candidates may use an ACT or SAT score to meet the test of basic skills if it meets ISBE requirements for substitution. See [www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf](http://www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf) for information regarding specific requirements.

Applicants are advised that certain felony convictions, enumerated in Articles 10-21.9 and 21B-80 of the School Code of Illinois (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1005& ChapAct=105%C2%A0ILCS&160;5/ &ChapterID=17&ChapterName=SCHOOLS&ActName=School+Code.html), prohibit licensure or employment in public schools. Questions pertaining to this matter should be addressed to the Council.

**Continuation in Teacher Education**

To be eligible for continuation in teacher education, candidates must satisfy all requirements of the applicable Common Assessment Plan (CAP), which includes maintaining University of Illinois at Urbana-Champaign and overall grade point averages of 2.5 (A = 4.0) or higher. In addition, candidates must meet the content area and professional education grade-point requirements specific to their programs. The full text of the three Common Assessment Plans is available on the Council website (http://www.cote.illinois.edu/about/professional/cap.html).

The Council on Teacher Education reviews each candidate’s academic progress after the fall and spring semesters. Candidates who do not meet the criteria of the appropriate CAP will receive a warning letter from the Council advising them that their continuation in the program, entry into student teaching, and receiving a recommendation for licensure from the University are at risk. Candidates will be directed to their college deans for more information. Candidates may be dropped from licensure programs by the Council if they fail to meet the criteria of the appropriate CAP after receiving an initial warning letter.

Teaching effectiveness is influenced not only by academic proficiency, but also by the dispositions and professional behaviors of the candidate. Therefore, faculty members take these characteristics into account as they evaluate candidates’ progress in the program. Teaching effectiveness can also be influenced by the candidate's health. For this reason, the University provides counseling and medical services for all students. A candidate wishing additional information about these services may call or visit the Council office.

Because it is essential that counseling and medical services be offered as soon as the need becomes apparent, teacher education advisers and faculty members are asked to recommend for assistance or examination any candidate about whom they feel concern. A candidate who is recommended for assistance or examination will receive a written request to make an appointment to discuss the situation. It is a requirement of the Council on Teacher Education that a candidate who receives such a request must respond. Failure to do so will jeopardize the candidate's continuation in teacher education. During the appointment, the candidate will be informed of the counseling (http://www.counselingcenter.illinois.edu) and medical services (http://www.mckinley.illinois.edu) available at the University. The candidate's use of these services is usually optional. In exceptional cases, however, the Council may require a candidate to satisfactorily complete a mental health or physical examination with one of the campus services.

Candidates who wish to continue in teacher education must comply with such referrals.
Student Teaching
State law mandates candidates pass the appropriate content area test prior to student teaching. Students who have not passed the appropriate content area test will not be permitted to student teach. Student teaching application forms are available in the college clinical experiences office that houses each program. (Candidates may obtain referrals to the appropriate office by contacting the Council.) A candidate seeking placement in student teaching should contact the appropriate program’s clinical experiences office no later than October 1 of the academic year preceding the desired placement to determine departmental deadlines and meeting dates. Departments may set earlier deadlines. Candidates who apply after their departments’ deadlines cannot be guaranteed a student teaching assignment during the next academic year. A candidate who will not be on campus during the fall semester, but who expects to enroll in educational practice (student teaching) during the next school year, should secure an application form from his or her program’s clinical experiences office before leaving campus. A candidate who has submitted an application will receive a student teaching assignment pending verification that he or she has completed all requirements of the appropriate Common Assessment Plan.

Only those candidates officially registered in teacher education curricula are eligible for student teaching placements. The Council reserves the right to deny student teaching placement to candidates who have not met all requirements of the appropriate Common Assessment Plan. Candidates may also be denied a student teaching placement for health reasons.

Candidates in teacher education should anticipate and plan for student teaching assignments. For most candidates, additional expense will be incurred during the semester in which student teaching is scheduled. Candidates cannot be guaranteed assignments in local schools. Student teaching is a full-time commitment on the part of teacher candidates. Teacher candidates should not plan to take additional coursework outside their program during student teaching, nor should they plan to be employed. School districts have the right to not accept a candidate and therefore, the Council cannot guarantee each candidate a placement. However, each program will exhaust every effort to seek a placement for each candidate.

Candidates are expected to complete all field experiences, including student teaching, at the University of Illinois at Urbana-Champaign. A candidate who wishes to complete student teaching through another university, yet receive a University of Illinois at Urbana-Champaign degree and recommendation for licensure, must secure the prior approval of his or her adviser, clinical experiences program coordinator, college, and the Council on Teacher Education via petition. The petition must be supported by verification from the other university that it will accept the candidate as a student teacher and will comply with all Council on Teacher Education requirements. Approvals of such arrangements are rare, and candidates should expect to incur additional costs. Consult the Council for additional information.

Teacher Licensure
A candidate who completes all of the coursework and other requirements in a program approved for purposes of licensure by the Illinois State Board of Education is entitled to receive the recommendation of the University for the appropriate license and endorsement(s), provided the candidate has met all of the requirements of the appropriate Common Assessment Plan and has passed all licensure tests and assessments required by the State of Illinois. In addition, all professional education and content-area coursework that forms part of an application for licensure, endorsement, or approval must have been passed with a grade no lower than “C” or equivalent in order to be counted towards fulfillment of the applicable requirements. CR/NC and proficiency credit may not be used toward licensure, endorsement, or approvals. However, AP credit may be used.

In some instances a candidate may be denied a recommendation for licensure but be granted a degree by his or her college. A candidate who believes that the recommendation for licensure has been withheld unjustly may seek redress through the grievance policy established by the Council on Teacher Education.

General Education
Candidates for licensure are required to complete coursework that includes the theoretical and practical understanding generally expected of a liberally educated person. General education includes developing knowledge related to the arts, communications, history, literature, mathematics, philosophy, sciences, and the social studies from multicultural and global perspectives. This requirement is satisfied by the University of Illinois general education pattern incorporated into all undergraduate teacher education programs.

Licensure Tests
All candidates for licensure as teachers, school administrators, and school support personnel must pass tests mandated by the Illinois State Board of Education as a condition for licensure. Illinois law requires that applicants to all educator preparation programs pass a test in basic skills (reading, writing, grammar, and mathematics) and a separate test in their major area. All candidates in programs leading to teaching must also pass a teacher performance assessment (edTPA). Candidates for Learning Behavior Specialist I licensure must pass a fourth test: Special Education General Curriculum.

State law requires prospective candidates for licensure as school administrators or school support personnel pass a test of basic skills, as determined by the State, if the Illinois Test of Basic Skills was not passed previously. If the basic skill tests was not already taken and passed, the Test of Academic Proficiency must be passed prior to admission to the educator preparation program. In addition, candidates must pass the appropriate content-area test. With final approval from ISBE, candidates may use an ACT or SAT score to meet the test of basic skills if it meets ISBE requirements for substitution. See www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf for information regarding specific requirements.

Time Limit on Licensure
Because licensure requirements are subject to change at any time as a result of new mandates from the Illinois State Board of Education and the Illinois General Assembly, the University is unable to guarantee a recommendation for licensure to anyone who does not apply for licensure immediately upon completion of licensure requirements. A candidate completing an approved program is strongly encouraged to apply for licensure during his or her last term on campus and claim said license on the Educator Licensure Information System (ELIS) once it has been entitled. Applications for licensure are available on the candidate’s student portal or in the Council office. Failure to claim a license through the Educator Licensure Information System once it has been entitled could result in additional requirements should candidate seek to claim license at a later date.
Background Investigation of Applicants for Field Placement and Employment

State law mandates that all candidates for public school licensure in programs under the purview of the Council on Teacher Education complete a criminal background check and checks of the Statewide Sex Offender Database and Statewide Child Murderer and Violent Offender Against Youth Database before they may be placed in schools. Candidates are responsible for all fees connected with this procedure.

Final decisions regarding the placement of candidates in schools are made in agreement between the relevant department/college/program and the school/district.

The criminal background check is typically conducted at the time a candidate enters the program and before student teaching or internship.

Each applicant for employment, which includes student teaching, in an Illinois school district is required to authorize the employing school district to initiate a criminal background check which will include a request for fingerprints. A school district may employ a person, or host a student teacher, only after a background check has been initiated and may not knowingly employ a person, or host a student teacher, who has been convicted of a felony or of attempting to commit certain offenses enumerated in The School Code of Illinois. This criminal background check is in addition to that required for field placements at the University of Illinois at Urbana-Champaign.

Curricula

A candidate seeking licensure must complete the requirements of both his or her chosen curriculum, Council on Teacher Education requirements, and all additional State mandated requirements. Teacher education, school support personnel, and administrator curricula and the colleges and departments that offer them are listed below. All curricula have been approved by the Illinois State Board of Education.

Candidates are advised that licensure requirements may be altered at any time by the Illinois State Board of Education or the legislature. In such cases, candidates may be compelled to satisfy the new requirements to qualify for the University's recommendation for licensure.

- Department of Special Education

Learning Behavior Specialist II
- Options: Curriculum Adaptation, Behavior Interventions, Multiple Disabilities, Transition Specialist
- Department of Special Education

Library Information Specialist
- Graduate School of Library and Information Science

Music
- School of Music

Principal
- Department of Education Policy, Organization and Leadership

Reading Specialist
- Department of Curriculum and Instruction

School Social Worker
- School of Social Work

Secondary Education (English Language Arts, Mathematics, Sciences, Social Science: History)
- Department of Curriculum and Instruction

Speech-Language Pathologist: Non-teaching
- Department of Speech and Hearing Science

Information listed in this catalog is current as of 04/2016
Superintendent
- Department of Education Policy, Organization and Leadership

Teacher Leader
- Department of Education Policy, Organization and Leadership

1 Individuals completing these programs who wish to be able to teach departmentalized subjects in grades five through eight must complete additional coursework and receive the endorsement prior to January 1, 2018. Contact the Council on Teacher Education for additional information.

2 Individuals entering this program Fall 2014 or after will be entitled for grades 1-6 upon completion of all requirements. Individuals who were admitted Fall 2013 or before will be entitled for K-9 upon completion of all requirements if their program is completed by September 1, 2017 and a license is claimed prior to September 1, 2018. Candidates in this category who wish to be able to teach departmentalized subjects in grades five through eight must complete additional coursework and receive the endorsement prior to January 1, 2018. Contact the Council on Teacher Education for additional information.

3 This minor is a required component of the teaching option within the following Science and Letters majors in the College of Liberal Arts and Sciences: biology, chemistry, English, geology, history, mathematics, and physics. It is available only to students registered in these programs.

4 Per State rules, no candidates may be admitted into this program on or after September 1, 2017. Individuals entering this program must complete program no later that August 31, 2019.

5 Per State rules, no candidate may be admitted into this program on or after September 1, 2016.

Teacher Education Minors
- English as a second language
- Mathematics: Grades 6-8 (must be completed and endorsement received prior to Fall 2017.)
- Mathematics: Grades 9-12

Candidates should be aware that the state recognizes teaching fields that are not listed above. Candidates may obtain subsequent teaching endorsements for any fields for which they satisfy the state minimum requirements. Contact the Council on Teacher Education for additional information regarding the endorsement fields available and the qualifications for each. Endorsement requirements (http://www.cote.illinois.edu/certification/Endorsements.html) are also listed on the Council on Teacher Education Web site. (http://cote.illinois.edu)

Further questions may be directed to the Council on Teacher Education.

Minor in Informatics

Allen Renear, Interim Director, Illinois Informatics Institute
3014 NCSA
1205 W. Clark, MC-257
Urbana, IL 61801
PH: 217-333-4930
FX: 217-333-5878
http://informatics.illinois.edu

The Minor in Informatics will teach you to become a better creator and user of computing technology in your major area and to think critically about new technology's role in society. No other field has, and will have, a greater influence on humanity in our generation.

Informatics studies the design, application, use and impact of information technology. The ability to handle vast amounts of information cheaply has changed the way we live. Advances in computer power, the World Wide Web, search engines, social networking, mobile technology, GIS, and large-scale collaborative initiatives, to name a few, have revolutionized the way knowledge is created and shared. Information has become a ubiquitous, indispensable component of our everyday lives, as we strive to manage information, create knowledge, and make decisions.

The Informatics Minor signals that you have concrete expertise in computing and Information Technology (IT) and understand their human implications.

Students from any major interested in applying technology or studying its affect on humanity are encouraged to apply, preferably by the end of sophomore year. Although there are no prerequisites, basic familiarity with computers is expected.

To receive the Informatics Minor students must complete three core courses plus three upper-level classes with sufficient informatics or computational content from an approved list of courses offered from a wide range of disciplines. The core courses are INFO 102, CS 105, and INFO 202. INFO 102 is a broad introduction to computer science and provides an understanding of the nature, capabilities, and limitations of IT. CS 105 is an introduction to computer programming for non-science and non-engineering majors. INFO 202 explores the ways in which IT has and is transforming society and how these technologies affect a range of social, political, and economic issues from the individual to societal levels. Some substitutions can be made. The list of upper-level courses that count toward the minor is here: http://www.informatics.illinois.edu/informatics-minor/upper-level-related-course/. This list is dynamic as new classes are added.

Course requirements for students who are not CS majors or minors or ECE majors:

Minor in Global Labor Studies

Global Labor Studies analyzes the interplay of class, gender, race, and labor organizations in the workplace, the economy, and the political arena from a multi-disciplinary and global perspective. A minor in Global Labor Studies requires 18 credit hours in LER Global Labor Studies Courses.

A minimum grade point average of 2.75 is required for completion of the minor and all courses required for the minor must be taken for a grade.

### Concentrations

A graduate concentration constitutes a coherent program of study requiring additional breadth or considerable depth of knowledge. A concentration may refer to a subfield within a discipline, or to an interdepartmental and/or interdisciplinary area of knowledge. Concentrations appear on academic transcripts.

Some concentrations (major-based) are only open to a student majoring in the offering department. Other concentrations (floating) are open to students in a broad range of majors. Both types are listed here, with the eligible programs listed below each concentration.

#### Accountancy (p. 303)
- Business Administration (M.B.A. (p. 354) and M.S. (p. 346))
- Finance (M.S.) (p. 417)

Graduate Programs

Legend:

College/School

ACES  College of Agricultural, Consumer and Environmental Sciences
AHS  College of Applied Health Sciences
BUS  College of Business
Major: Accountancy

Degrees Offered: M.A.S., M.S., Ph.D.

Graduate Concentration: Business and Public Policy (p. 419) (M.A.S., M.S.), Corporate Governance and International Business (p. 349) (M.A.S., M.S.), Finance (p. 419) (M.A.S. only), Information Technology and Control (p. 349) (M.A.S., M.S.), Supply Chain Management (p. 350) (M.A.S., M.S.), Taxation (M.A.S. only)

Graduate Minor: Accountancy

Graduate Concentration: Accountancy

Off Campus Program: Major: Taxation

Degrees Offered: M.S.

Graduate Degree Programs

The Department of Accountancy offers on campus graduate programs leading to the degrees of Master of Accounting Science (M.A.S.), Master of Science in Accountancy (M.S.A.), and Doctor of Philosophy in Accountancy. The M.A.S., M.S.A. and Ph.D. degrees are offered on the Urbana-Champaign campus. We also offer the Master of Science in Taxation (M.S.T.) at the Illini Center in Chicago. The master’s degree requirements can be completed in one year. The Ph.D. degree takes approximately four to five years of full-time study and research.

Admission

All applicants for the M.S.A. and Ph.D. programs, domestic or international, are required to take the Graduate Management Admission Test (GMAT). This test should be taken early enough to ensure that the results will be available to the department before action on admission. The admission requirements of the Graduate College also apply, including prior academic performance and references. In addition, all international applicants must take the Internet-Based Test of English as a Foreign Language (TOEFL iBT) or the International English Language Testing System (IELTS) test. The M.S.T. offered in Chicago does not require the GMAT for applicants who meet the two-year minimum work experience requirement. Applications for admission to the doctoral program, supported by three letters of recommendation, must be approved by the department admissions committee, which may require an oral or a written examination.

- Master of Accounting Science (M.A.S.) (p. 303)
- Master of Accounting Science (M.A.S.), Taxation Concentration (p. 304)
- Master of Science in Accountancy (p. 304)
- Master of Science in Taxation (p. 305)

Doctor of Philosophy

The student’s doctoral program is determined in consultation with a faculty advisory committee. The student’s evolving plans for the doctoral thesis serve as a guide in planning the program. Program coursework is comprised of two general categories: core studies and advanced studies within an area of specialization (i.e., a supporting field). The latter coursework is tailored to facilitate the student’s dissertation.

In addition, candidates must pass a written accountancy core examination and both oral preliminary and oral final examinations on the doctoral thesis. In the accountability core examination, candidates must demonstrate a thorough knowledge of research methods and accounting
theory; a general acquaintance with the subject matter of the variety addressed within accountancy doctoral core studies; and proficiency in the required areas of economic theory, quantitative methods, behavioral science and financial economics.

**Requirements**

Graduate study, at least 16 hours of which are in a supporting field (e.g., economics, finance, psychology).

A two-course introduction to mathematical statistics and probability theory.

Accountancy core doctoral seminars:

Minimum Hours Required Within the Unit: 56

Minimum 500-level Hours Required Overall: 60

Students must present a research paper at the Accountancy Research Forum in the beginning of their third year.

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the accountancy Ph.D. program.

Masters Degree Required for Admission to PhD? No

Qualifying Exam Required (Accountancy Core Examination) Yes

Preliminary Exam Required Yes

Final Exam/Dissertation Defense Required Yes

Dissertation Deposit Required Yes

Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/phd) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Graduate Minor in Accountancy**

The minor in Accountancy seeks to develop business leaders who understand the role of accountancy and accounting in the conduct of business and the allocation of resources within society.

This minor requires twelve graduate hours of coursework. Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

Note: Students within the major cannot minor in the same program.

- ACCY 501 Accounting Analysis I 4
- ACCY 502 Accounting Analysis II 4
- ACCY 503 Managerial Accounting 4
  - or ACCY 517 Financial Statement Analysis 4
  - or substitute graduate accountancy courses approved by a program advisor

**Total Hours** 12

1 For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Graduate Concentration in Accountancy**

This concentration is available to students in the following degree programs:

- Master of Science in Finance (MSF)
- Master of Science in Technology Management (MSTM)
- Master of Business Administration (MBA)
- Master of Science in Business Administration (MSBA)

  - or ACCY 517 Financial Statement Analysis 4
Or, substitute graduate accountancy courses approved by an Accountancy MSA program advisor.

**Total Hours** 12

**Other Requirements**

In addition to the concentration requirements, students must also complete the requirements of their major degree.

**Master of Accounting Science (M.A.S.) in Accountancy**

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from the University of Illinois. Students select from either a Taxation or Audit option. Graduate concentrations in finance (p. 419), corporate governance and international business (p. 349), information technology and control (p. 349), business and public policy (p. 419), and supply chain management (http://catalog.illinois.edu/graduate/graduate-majors/bus-admin-ms/).
The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from the University of Illinois at Urbana-Champaign. The Concentration in Taxation is one of the primary options available within the M.S.A program.

ACCY 551 Corporate Income Taxation
ACCY 552 Partnership Income Taxation
ACCY 554 International Taxation
ACCY 556 Tax Research

Graduate Electives (students would have the option to pursue one of the Concentrations open to the MAS students). Student not admitted to a concentration must complete ACCY 512.

Total Hours 32

Course substitutions may be approved by the Department of Accountancy.
Other requirements may overlap.

For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/mas) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Master of Science in Accountancy

The University of Illinois at Urbana-Champaign has consistently ranked among the top accountancy schools in the United States. The Public Accounting Report and Accounting Degree Review have rated the Illinois graduate accounting program as one of the top accountancy masters programs in the United States.

The MS in Accountancy (MSA) program offers a one year accounting degree. Our students include those with limited prior accounting education as well as students with an undergraduate degree in accounting. The MSA core curriculum applies to all of our students. However, for those students who have previously taken significantly equivalent courses to any of those in our core curriculum, we will work with our students to find a suitable replacement to recognize the sufficiency of their prior accounting education. Our MSA program prepares students for success in accounting careers and provides the academic prerequisites for candidates who wish to take the United States Uniform Certified Public Accountant (CPA) exam.

The MSA program consists of at least 20 hours in graduate-level accounting courses, together with 12 hours of appropriate graduate electives, at least 4 hours of which must be in non-accountancy graduate courses.

The MSA program begins in June each year with Summer Session II.

Requirements
ACCY 501 Accounting Analysis I 4

Information listed in this catalog is current as of 04/2016.
Other Requirements

Other requirements may overlap
Minimum 500-level Hours Required
Overall: 20 (of the total 32 required)
Students shall earn at least 24 of the 32 total graduate hours while enrolled in the Graduate College at Urbana-Champaign.
Electives shall form a coherent program of study approved by a program advisor.
Minimum MSA program coursework 3.0 cumulative GPA, both by semester and program overall
Minimum MSA accountancy coursework cumulative GPA, both by semester and program overall

An optional CPA Review course (ACCY 398) is available. The credit hours for the CPA Review Course do not count towards the 32 credit hours required to graduate.

1 For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/msa) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Master of Science in Taxation

The Master of Science in Taxation (M.S.T.) is an executive-style degree offered only at the Illini Center in Chicago. The M.S.T. is a one-year program for students with at least two years of work experience. The program begins in May and meets weekly on Friday afternoons and all day Saturday. Students applying for admission should have acquired a background in business and an accounting undergraduate major from an accredited college or university. Graduation requires 36 graduate hours of study that consists of twelve required courses delivered in three thirteen-week semesters.

Graduate Degree Program

I. The Department of Advertising offers a graduate program on campus leading to the Master of Science degree. This program is designed to prepare graduates for an advanced degree in advertising research or industry careers in research and strategy. The preparatory nature of the curriculum combines the theoretical foundations, methodological tools, and practical applications. The Department of Advertising at the University of Illinois is the oldest such program in the country. We are grounded in the principles of our founder and "father of advertising education" Charles H. Sandage, that students must understand the theory of advertising as well as the practice. His goal was to enable students to become leaders and problem solvers. We honor that vision by maintaining a cohesive curriculum that provides foundational courses, tools, and practical applications. The Department of Advertising at Urbana-Champaign.

For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/msa) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

II. The Master of Science in Strategic Brand Communication (MS SBC) degree an online program is jointly sponsored by the Charles H. Sandage Department of Advertising in the College of Media and the Department of Business Administration in the College of Business. Graduates from this program receive the MS SBC degree awarded by the Graduate College. Strategic Brand Communication (SBC) is a data-driven, purposeful conversation with a brand’s stakeholders. SBC combines traditional advertising practices with contemporary business thinking that pertains to delivering consistent, meaningful messages to consumers. In so doing, SBC seeks to integrate multiple consumer contact points that occur through the purchase of commercial messages in paid, earned, and owned media to deliver persuasive and impactful statements about...
brands and companies. This management process integrates all aspects of marketing communications such as advertising, public relations, personal selling, social media, sales promotion, and direct marketing. Such integration impacts a firm's business-to-business, marketing channel, customer-focused, and internally directed communications.

The MS SBC degree program is designed for current working professionals with at least two years full-time experience in their field. It is designed to be completed in 15 months. The curriculum prepares students to be strategic leaders in an ever-changing global media environment; be analytic and integrative thinkers; be effective brand communicators and managers; and respond agilely to new technologies, emerging media, new demographics, and market trends; be team-oriented in their approach to management and communications; and be prepared to continue to learn as the media environment evolves.

Admission

I. Admission to graduate study in advertising requires completion of the requirements for a bachelor's degree in an accredited institution of recognized standing. Applicants are required to submit results from either the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) and are required to upload to the application a short essay indicating why they want to pursue graduate work in advertising. The Department of Advertising requires non-native English-speaking applicants to show evidence of English proficiency, which is provided by a satisfactory score on the Test of English as a Foreign Language (TOEFL). Minimum scores for TOEFL (international students only): 253 (CBT), 104 (IBT), 607 (PBT), and IELTS greater than 6.5. Three letters of recommendation are required. Transcripts from all universities that you have attended must be submitted (note: can be uploaded in your application). The required method of applying is online through the Graduate College Web site, and the Graduate College admission requirements also apply, see http://www.grad.illinois.edu/admissions/apply/requirements. Completed applications are due February 1, and applications are accepted for fall admission only.

II. Admission to the MS in Strategic Brand Communication program requires a minimum of two years of full-time work experience. All applicants are expected to have a minimum grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate study and a 3.0 for any previous graduate work completed. A course in statistics or calculus from an accredited institution is a prerequisite. Applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of 102 (iBT), 253 (CBT), or 607 (PBT) or minimum International English Language Testing System (IELTS) exam scores of 6.5 overall and 6.0 in all subsections. Admission will be based upon an evaluation of each applicant’s work experience, GPA, English aptitude, and letters of recommendation.

Faculty Research Interests

Faculty profiles ([https://media.illinois.edu/degrees/advertising-bs-ms/faculty/faculty-profiles](https://media.illinois.edu/degrees/advertising-bs-ms/faculty/faculty-profiles)) are available at the Advertising Department’s Web site.

- Master of Science in Advertising (p. 396)
- Master of Science in Strategic Brand Communication (p. 351)

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements and contact the M.B.A. program and their major department office for more information.

Master of Science in Advertising

Students are required to complete 36 hours towards the degree, including a professional project or thesis requirement. Full-time status requires 12 hours per semester, making it possible to complete the degree in three semesters. Admission is only granted for fall semester.

A graduate course listing ([https://courses.illinois.edu](https://courses.illinois.edu)) for Advertising students is available online.

Information listed in this catalog is current as of 04/2016
Graduate programs: Aerospace Systems Engineering (http://aerospace.illinois.edu/graduate-programs/aerospace-systems-engineering), and the Systems Engineering Option (SE) (http://aerospace.illinois.edu/education-programs/graduate-program), the Energy via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-program), the Energy and Sustainability Engineering (EaSE) Option, (http://ease.illinois.edu) and the Systems Engineering Option (SE) (http://aerospace.illinois.edu/graduate-programs/aerospace-systems-engineering).

Graduate Degree Programs

The Department of Aerospace Engineering (AE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The AE graduate program provides students with a strong background in engineering and applied science while placing emphasis on aircraft and spaceflight engineering. Students may major in one of the following general areas: aerodynamics, astrodynamics, combustion and propulsion, control systems, dynamical systems, fluid mechanics, structural mechanics, and materials. Opportunity also exists for specializing in:

1. computational science and engineering,
2. energy and sustainability engineering, and
3. systems engineering within the department’s graduate programs

via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-program), the Energy and Sustainability Engineering (EaSE) Option, (http://ease.illinois.edu) and the Systems Engineering Option (SE) (http://aerospace.illinois.edu/graduate-programs/aerospace-systems-engineering).

The Medical Scholars Program (http://www.med.illinois.edu/msp) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Aerospace Engineering. Additional information about the Aerospace Engineering graduate program may be found on the department’s graduate program Web site (http://www.aerospace.illinois.edu).

Admission

The Department of Aerospace Engineering accepts applications for admission to the graduate program for both fall and spring semesters. The application deadline for the fall semester for the Ph.D. and M.S. with Thesis programs and for full consideration for funding opportunities is January 1. The application deadline for the MS Non-thesis and the MS Non-thesis Systems Engineering option for the fall semester is July 1. The deadline for spring admission for all programs is October 8.

Typically, the prerequisite for graduate study is the equivalent of the B.S. in aerospace engineering (http://aerospace.illinois.edu/undergraduate-programs); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org) general test are required of all applicants. There are no minimum score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants may select up to three areas from the following list:

- aerodynamics
- aeroelasticity
- astrodynamics
- combustion
- computational mechanics
- control and estimation
- dynamical systems
- experimental mechanics
- fluid mechanics
- information technology
- materials
- propulsion
- robotics
- structural mechanics-structural dynamics
- systems engineering

All applicants whose native language is not English are required to submit a minimum TOEFL (http://www.toefl.org) score of 103 (IBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 7.0 overall and 6.0 in all subscores. No exemptions from the TOEFL are granted by the department. Full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to Aerospace Engineering are above the minimum scores demonstrating an acceptable level of English

Information listed in this catalog is current as of 04/2016
language proficiency. Applicants wishing to be considered for teaching assistantships must score 24 on the SPEAK portion of the TOEFL exam.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Aerospace Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Aerospace Engineering graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, (217)-333-8146, mspo@illinois.edu).

Full information on admission requirements and how to apply, see the department’s graduate programs Web site (http://aerospace.illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (http://med.illinois.edu/mdphd) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Aerospace Engineering graduate degree.

Graduate Teaching Experience

M.S. students are not required to hold a teaching assistantship. Ph.D. students are required to hold a 25% teaching assistantship for at least one semester in order to meet the requirements for the Department of Aerospace Engineering doctoral program. Information about teaching assistantships can be found in the department’s Web site (http://aerospace.illinois.edu).

Faculty Research Interests

Research activities in the AE Department encompass a wide range of problem areas in aerospace engineering and related engineering disciplines cited in the Graduate Programs section above and more fully described at the department’s research area Web site (http://aerospace.illinois.edu/research).

Centers, Programs, and Institutes

Several nationally renowned interdisciplinary centers exist within the College of Engineering in which Aerospace Engineering faculty members along with many other campus faculty engage in research. A list of these, along with links to full descriptions, appears at the department’s interdisciplinary centers Web site (http://aerospace.illinois.edu/research/interdisciplinary-centers). Among these are the Beckman Institute for Advanced Science and Technology, the Center for the Simulation of Advanced Rockets (CSTAR), the Coordinated Science Laboratory (CSL), the Micro and Nanotechnology Laboratory, and the National Center for Supercomputing Applications (NCSA).

Facilities and Resources

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research laboratories Web site (http://aerospace.illinois.edu/research/research-laboratories).

Financial Aid

Students in the M.S. non-thesis option are not provided funding by the department. Financial aid for graduate students in thesis graduate programs is available in the form of fellowships, teaching and research assistantships. A block grant from the National Aeronautics and Space Administration supports a multidisciplinary research and training program. Qualified candidates are considered for financial support upon application. In addition, graduate students making satisfactory progress toward their degrees may also be considered for financial support. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

For additional details and requirements refer to the department’s Website (http://aerospace.illinois.edu) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

### Doctor of Philosophy

**AE 599**  
**Thesis Research (min-max applied toward degree)**

**AE 590**  
**Seminar (continuous registration through the 4th semester after the qualifying exam for 0 hours)**

One advanced mathematics course from an approved list (3-4 hours) (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)  
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below).  
Total Hours

### Other Requirements and Conditions

A minimum of 16 hours of AE course credit overall at the 500 level, beyond the bachelor’s degree.  
A minimum of 24 credit hours overall at the 500 level, beyond the bachelor’s degree.  
A maximum of 8 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.  
A 25% or more teaching assistantship for at least one semester.  
A Master’s degree is not required for admission to the Ph.D. program, but the Master’s level requirements must be met (32 hours).  
Qualifying exam  
Preliminary exam  
Final exam or dissertation defense  
Dissertation deposit  
Minimum GPA: 3.0

For additional details and requirements refer to the department’s Website (http://aerospace.illinois.edu) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

### Direct Entry

In addition to the traditional Ph.D., a "Direct" Ph.D. is available. This program allows a student with a bachelor's degree to go directly into the Ph.D. program without writing a M.S. thesis. For the Direct Ph.D., a B.S. student submits a graduate application. Generally, admission to the Direct Ph.D. program is granted for GPA equal to 3.75 and higher. Students currently in the M.S. program may petition the AE Graduate Policy Committee for entry into the Direct Ph.D. program before the end of the second semester after enrollment.

### Online Program

The degree requirements are the same as for the on-campus non-thesis M.S. program (p. 308)—32 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

Students should develop a course program plan in consultation with their advisor. Suggested program tracts are provided for each of the three main technical divisions in the department:

1. Aerodynamics, Fluid Mechanics, Combustion and Propulsion (AFMCP);
2. Astrodynamics, Controls and Dynamical Systems (ACDS); and

The Aerospace Systems Engineering option is also available online.

**Joint M.B.A. Program**

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 355) (link to MBA POS) and contact the M.B.A. program and their major department office for more information.

**African American Studies**

Ronald Bailey
1201 West Nevada
Urbana, IL 61801
PH: (217) 333-7781
FX: (217) 244-4809
http://www.afro.illinois.edu/

E-mail: aasrp@illinois.edu

- Graduate Concentration: African American Studies
- Participating Programs: African Studies (M.A.), Educational Policy, Organization and Leadership (M.A. and Ph.D.), Educational Psychology (all, except online degrees), History (all degrees), Political Science (all degrees), Sociology (all degrees)

Graduate Minor: African American Studies

**Graduate Minor in African American Studies**

The Department of African American Studies also offers a graduate minor in African American Studies. The minor is designed to complement graduate work in a variety of disciplines. Students wishing to take advantage of the minor must be in good standing, and must apply for acceptance into the minor.

**Total Hours** 12

1 For additional details and requirements refer to the department's program information online (http://www.afro.illinois.edu/education/gradminor) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**African American Studies**

- History
- Educational Policy, Organization and Leadership
- Educational Psychology
- African Studies
- Sociology
- Political Science

Those wishing to apply for the concentration must submit three letters of recommendation, as well as a brief personal essay describing their background and career plans and explaining how a concentration in African American Studies enhances their primary program of study. Students must be accepted into the concentration. Students also would be expected to have a faculty member affiliated with the department on their doctoral committee. For admission to the concentration or for more information, please contact DAAS. A student's intent to pursue a graduate concentration must be approved by the student's adviser and graduate program director.

- Joint Degree Program: African Studies and Library and Information Science
- Degrees offered: M.A. and M.S.

**Graduate Degree Programs**

The Center for African Studies administers a two-year program of area studies courses and intensive African language instruction leading to a Master of Arts degree designed to give students an interdisciplinary

*Information listed in this catalog is current as of 04/2016*
perspective on the study of Africa. The program provides both language and area training for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. For more information about the Center’s graduate programs, please visit: http://www.afrst.illinois.edu/academics/grad/.

Admissions
The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor's degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) – 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For more information about the Center’s admission requirements and procedures, and deadlines please visit www.afrst.illinois.edu/academics/grad/apply/ (http://www.afrst.illinois.edu/academics/grad/apply). Students interested in the minor must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact the Center.

Faculty Research
The Center for African Studies’ has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit: http://www.afrst.illinois.edu/people/faculty/

Facilities and Resources
Established since 1970, the Center for African Studies is one of the largest and most dynamic African National Resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the university of Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

The Africana Library is among the finest in the world. The collection covers all African countries and includes materials in more than 150 African languages. The collections are interdisciplinary, in all formats, and concentrated mainly in the humanities, social sciences, and agriculture. The Library has an extraordinary collection of primary source materials for Africana, and has acquired approximately 100 printed sources and 85 microform collections (over 10,000 pieces) covering all areas of Africa. The collection also includes 120,000 pages of Arabic manuscripts and thousands of government documents. African materials in European and African languages at the University of Illinois Libraries include more than 180,000 books (including 15,000 in Arabic, and 3,000 in Bamana, Hausa, Lingala, Swahili, and Zulu); 2,800 journals; 46,000 maps; 10,000 microforms; over 250 videotapes, 37 newspapers, and several CD-ROMs.

The African studies bibliographer runs the Africana library and teaches LIS 530, one of the Center’s core courses and plays a key role in the Center’s graduate program. For further information about the Africana library, please visit: http://www.library.illinois.edu/ias/africana/index.html

Financial Aid
The Center for African Studies is a Title VI African National Resource Center funded by the U.S. Department of Education. Each year the center is generally able to assist a limited number of graduate students in area studies through awards of Foreign Language and Area Studies (FLAS) Fellowships. The Center evaluates and ranks incoming students on the basis of academic promise. Funding usually covers the fall and spring semesters. The center cannot guarantee multiple years of funding, but considers it a priority to provide financial support to eligible students until completion of their program. African Studies MA Students can also apply for the FLAS fellowship through the Center for Global Studies. The Center for African Studies has graduate assistantships which include a tuition and fee waiver, but they are very limited. Students may be eligible to compete for other fellowships on campus. Students are also encouraged to check with the graduate fellowships office (https://www.grad.illinois.edu/fellowship) for funding opportunities. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in GSLIS. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition. More information about funding opportunities is available at: http://www.afrst.illinois.edu/academics/grants/.

M.S. African Studies and M.S. Library and Information Science

This joint master's degree includes a program of language and area studies courses leading to an interdisciplinary Master of Arts degree in African Studies as well as a program of study leading to the Master of Science in Library and Information Science. The joint degree matches area expertise with professional education, and prepares students for professional careers in all types of information organizations, including libraries. Students will enroll in LIS their first semester and thereafter be enrolled as students in African Studies.

Graduate Minor in African Studies

The interdisciplinary graduate minor in African Studies promotes training in African Studies for masters and doctoral students in other disciplines interested in complementing their degree program with an interdisciplinary perspective on Africa.

Note: Students within the major cannot minor in the same program.

Information listed in this catalog is current as of 04/2016
AFST 522 Development of African Studies 4
Electives hours that relate to Africa that are outside the student's major department. At least four hours must be at the 500 level.
A minimum of four semesters of college level study of an African language. NOTE: Hours for language cannot be applied toward minor requirements.

Total Hours 12

Other Requirements 1
If the student's thesis deals in whole or in part with Africa, it is strongly recommended that a faculty member from the Center be a formal member of the student’s committee.

1 For additional details and requirements refer to the department’s Graduate Programs [http://www.afrst.illinois.edu/academics/grad] and the Graduate College Handbook [http://www.grad.illinois.edu/gradhandbook].

Agricultural Education

David Rosch, Associate Director of Agricultural Education Programs
174 Bevier Hall
905 South Goodwin Avenue
Urbana, IL 61801
PH: (217) 333-3165
http://aged.illinois.edu/

E-mail: aces-aged@illinois.edu

Major: Agricultural Education

Degrees offered: M.S.

Online and Off-Campus Programs: Agricultural Education

Degrees offered: M.S.

Graduate Degree Programs

The M.S. in Agricultural Education is a professional degree for training community and classroom based educators to address psychological, educational, and research issues as they pertain to teaching and learning in and about the agricultural, life, and environmental sciences. Students may choose among the teacher education option (teaching certification, non-thesis), applied research (non-certification, thesis) option, the program development (non-certification, non-thesis) option, and the online option. Students completing the teacher education option will be eligible for Illinois teacher certification in agricultural education for grades 9-12.

Admission

We are looking for highly motivated students with strong academic records. Students with backgrounds in education, behavioral or social sciences are especially encouraged to apply. The minimum grade-point average for admission is 3.0 (A = 4.0). Applicants for the online/off-campus program are not required to take the Graduate Record Examination (GRE), however applicants for the on-campus options must take the GRE. As a guideline, GRE scores should be greater than 500 for the quantitative and verbal tests and 4.0 for analytical writing, though the Admissions Committee may admit candidates with lower scores who demonstrate compelling strengths in other areas. International applicants from non-English-speaking countries must have official TOEFL scores of at least 575 (written version) or 233 (computer-based version) to be eligible for admission. Our application deadline for the on-campus program is January 15 for possible admission the following fall semester. Applications for the online program are accepted March 15, June 15, and November 15 for possible admission the following semester.

In addition to meeting the above criteria, applicants to the teacher education option in the Master of Science program in agricultural education must pass the Illinois Certification Testing System test of Basic Skills test prior to admission. If taking this examination prior to admission presents substantial hardship (e.g., the applicant is from another state), the applicant should contact the director of the agricultural education graduate program to discuss the possibility of a conditional admission. Students conditionally admitted must pass the examination by the end of the first semester of enrollment. Each applicant’s undergraduate transcript will be evaluated for completion of general education courses required for certification by the Illinois State Board of Education. Students with deficiencies may be admitted with the stipulation that these be met before completion of the master’s program.

Financial Aid

We are committed to funding all of our students who are making timely progress. The duration and amount of our commitment varies by program. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. For information regarding federal and state financial aid, please refer to [www.osfa.illinois.edu/](http://www.osfa.illinois.edu).

Minimum GPA: 2.75
Agricultural Education can be pursued as an online degree. Please refer to http://aged.illinois.edu/grad/online-MS for more information.

Information listed in this catalog is current as of 04/2016
Admission

Admission requirements for either master’s program include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum (in the case of the ABE M.S.) or the Technical Systems Management (TSM) curriculum (in the case of the TSM M.S.) with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work. Applicants must submit Graduate Record Examination (GRE) scores.

Admission to the Ph.D. program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining a Master of Science degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the M.S. degree program.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Graduate Degree Programs

The Department of Agricultural and Biological Engineering offers a graduate degree program which is at the forefront of the application of engineering principles to solve problems of agricultural production, utilization, environmental control, and biological systems and to improve the quality of life. Students may concentrate study in one of the faculty research interest areas listed below. Supporting course work includes: mathematics; computer science; statistics; engineering mechanics; chemical, civil, electrical, and mechanical engineering; animal science; crop sciences; food science; and other appropriate fields. Opportunity also exists for specializing in

1. computational science and engineering and
2. energy and sustainability engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-program) and the Energy and Sustainability Engineering (EaSE) Option (http://ease.illinois.edu)

The Medical Scholars Program (http://med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Agricultural and Biological Engineering.

Information listed in this catalog is current as of 04/2016
Biological Engineering

Doctor of Philosophy in Agricultural and Biological Engineering

Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)

**Total Hours**

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. For all other students, fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/) conducted prior to the start of the semester.

**Other Requirements**

- Master of Science in Agricultural and Biological Engineering (p. 316)
- Master of Science in Technical Systems Management (p. 317)
- Master of Science in Technical Systems Management, Professional Science Masters Concentration (p. 318)

Thesis Option

**Total Hours**

Master of Science in Agricultural and Biological Engineering

Other Requirements and Conditions may overlap

- A maximum of 4 hours of ABE 597 (or other independent study) may be applied toward the elective course work requirement.
- Teaching experience determined in consultation with advisor with guidance provided by the department’s Graduate Handbook.
- The minimum program GPA is 3.0.
- A Masters degree is required for admission to the Ph.D. program.

Elective courses – chosen in consultation with advisor

**Total Hours**

For additional details and requirements for all degrees, please refer to the program’s Graduate Degree Requirements (http://www.psm.illinois.edu/prospectivestudents/programs/agripro.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

http://www.ace.illinois.edu

(217) 333-1810
Fax: (217) 333-5538
Director of Graduate Studies: Amy Ando
Director of Graduate Recruiting and Admissions: Madhu Khanna
E-mail: ace-grad@illinois.edu

Graduate Degree Programs

The Department of Agricultural and Consumer Economics (ACE) offers courses of study that lead to the Master of Science and the Doctor of Philosophy degrees. Applicants with a baccalaureate degree are initially admitted to the M.S. program. Students who fulfill specific requirements in the first year of the M.S. program may request transfer into the Ph.D. program.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English must have a Test of English as a Foreign Language (TOEFL iBT) score of at least 88 (230 computer-based and 570 paper-based) or an International English Language Testing System (IELTS) academic examination overall score of at least 6.5 with a minimum sub-section score of 6 in each of the four modules (speaking, listening, writing, and reading). Graduate Record Examination (GRE) general test scores are required for candidates seeking financial aid and are requested for all applicants. Applicants to the Ph.D. program are requested to provide a sample of their academic writing. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. An applicant with a master's degree in an appropriate discipline will be considered for the Ph.D. degree. Students may commence study in either semester, but initial enrollment in fall semester is preferable.

Student Thesis and Dissertation Research

Our students’ research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees. Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis...
of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

**Medical Scholars Program**

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Agricultural and Applied Economics. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

**Master of Science in Agricultural and Applied Economics**

The M.S. offers considerable flexibility. Students using the degree as a foundation for a doctorate emphasize economic theory and analytical research tools. Students seeking the terminal master's degree focus their study on the concepts and analytical techniques used by analysts and managers in industries, governments, and other organizations.

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit. M.S. students entering the ACE graduate program will be admitted only to the Thesis Option. For the Thesis Option, a thesis is prepared under the supervision of a faculty advisory committee. The thesis is defended in a formal oral examination, which usually coincides with an open departmental seminar, administered by the thesis committee. The Non-Thesis Option requires advanced coursework in lieu of a thesis. The Non-Thesis Option is available only to students already enrolled in the Thesis Option of the ACE M.S. program or in the ACE Ph.D. program. Application for admission to the Non-Thesis Option is by petition to the Department after at least two semesters of graduate coursework have been completed.

6 hours in quantitative and research methods from departmental list (these do not count toward the 500 level course requirement)

Electives 14

ACE 599 Thesis Research 1 8-48

Total Hours 32

**Other Requirements**

Other requirements may overlap

Only 2 hours of ACE 566 may count towards the degree

**Non-Thesis Option**

24 hours selected from the ACE doctoral core sequence, including at least 12 hours in applied economic theory and 8 hours in quantitative methods

Electives 8

Total Hours 32

**Other Requirements**

Other requirements may overlap

Only 2 hours of ACE 566 may count towards the degree

Minimum Hours Required Within the Unit: 8 at the 500 level, not including 566, 599 or independent study

Minimum 500-level Hours Required Overall: 12

Minimum GPA: 3.0

1 If students enter the program with a bachelor's degree only, a maximum of 48 thesis hours may be applied toward the total. If students enter the program with a master of science degree, a maximum of 32 thesis hours may be applied toward the total.

2 For additional details and requirements refer to the department's Graduate Program information for the Master's degree (http://ace.illinois.edu/grad/masters) and the Graduate College Handbook (http://www.grad.uiuc.edu/gradhandbook).

**Doctor of Philosophy in Agricultural and Applied Economics**

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- agricultural finance
- environmental and natural resource economics
- family and consumer economics
- farm and agribusiness management
- international and policy economics
- price analysis and agricultural marketing
- regional economics and public policy

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses.

Information listed in this catalog is current as of 04/2016
and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

A 3.0 (A = 4.0) GPA is required in all courses completed in the program.

**Core courses**

- 4 hours (minimum) of quantitative methods beyond the courses specified in the core
- 16 hours at the 500 level to define two fields of expertise. At least 8 of those 16 hours must be in ACE
- 4 hours in Advanced Research and Scholarly Communication (ACE 561)

**ACE 599** Thesis Research (max applied toward degree) 32

**Total Hours** 64

**Other Requirements** 1

Fax (217) 244-4565
E-mail: ab@life.illinois.edu
Contact: Lisa J. Smith

Major: Biology

**Degrees Offered:** M.S., Ph.D.

Graduate Concentration: Ecology, Ethology & Evolution (in all degrees)

**Medical Scholars Program:** Doctor of Philosophy (Ph.D.) in Biology-Ecology, Ethology & Evolution and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

**Graduate Degree Programs**

The Department of Animal Biology administers graduate degree programs as concentrations in biology. Areas of training include physiological, population, community, and evolutionary ecology; population, molecular and quantitative genetics; evolutionary biology, behavioral ecology and evolution, physiology, evolution and development, functional anatomy, systematics, and conservation biology.

**Admission**

Acceptance for graduate study in animal biology is based on the applicant’s research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Courses required for admission are inorganic and organic chemistry, a year of physics, and mathematics through calculus. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is mandatory, and good scores on the Graduate Record Examination (GRE) are necessary. Considerable emphasis is placed on a student’s interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are considered for fall admission only. The deadline for application materials is January 1. A minimum paper-
based Test of English as a Foreign Language (TOEFL) score of 570 (230 on the computer-based version, 88 on the internet-based version) is preferred for international applicants.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biology-Ecology, Ethology & Evolution. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.

Doctor of Philosophy in Biology with Concentration in Ecology, Ethology & Evolution

Candidates for the Ph.D. degree must demonstrate excellence by examination and, in consultation with an adviser and doctoral committee, plan and carry out original thesis research with distinction. A preliminary examination evaluating the ability of students to integrate subject matter related to their fields is given during the third year. Additional requirements may be prescribed by the adviser and doctoral committee. A final examination, in which the student defends the thesis, and a presentation of the thesis at the departmental seminar complete the program.

Graduate Degree Programs
The Department of Animal Sciences offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. Fields of specialization include:

- animal breeding and genetics
- animal behavior
- biochemistry
- environmental physiology
- immunobiology
- meat science and muscle biology
- microbiology
- nutrition
- systems of animal management and production
- physiology of lactation
- physiology of reproduction

Beef and dairy cattle, horses, poultry, sheep, swine, and a variety of companion and laboratory animals are available for study.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the Bioinformatics program will be able to integrate basic and applied concepts in the three areas and applied them to biotechnology and medical research.

Admission
Candidates for admission to the M.S. and Ph.D. programs must have a bachelor’s degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. Candidates for admission to the Ph.D. program must meet Masters level requirements. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Students must take the Graduate Record Examination (GRE) and are recommended to take the advanced test in biology. English proficiency requirement for admission follow Graduate College requirement. Emphasis is placed on a student’s interest and ability in research as demonstrated by previous work and letters of recommendation. Admission is possible for spring and summer semesters.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Animal Sciences. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is encouraged as part of the academic work of students in this program.

Financial Aid
Financial aid for graduate students is available in the form of fellowships, teaching and research assistantships, tuition and partial fee waivers, and traineeships. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a full tuition waiver and a partial fee waiver, as well as a stipend.

- Master of Science in Animal Sciences (p. 323)
- Master of Science in Bioinformatics, Animal Sciences Concentration (p. 323)

Doctor of Philosophy in Animal Sciences
Students must pass preliminary and final examinations administered by committees appointed by the dean of the Graduate College. The final examination is limited to a presentation and defense of the thesis research.

| Advanced lecture and laboratory courses (400- and 500-level courses; excludes ANSC 590 and ANSC 599) | 20-28 |
| Graduate seminar (ANSC 590) enrollment is required every semester (max 4 hours can be applied to the degree) | 4 |
| ANSC 599 Thesis Research (min/max applied toward degree) | 32-40 |
| Total Hours | 64 |

Other Requirements

- Masters Degree Required for Admission to Ph.D?
- Qualifying Exam Required: No
- Preliminary Exam Required: Yes
- Final Exam/Dissertation Defense Required: Yes
- Dissertation Deposit Required: Yes
- Minimum GPA: 3.0

and/or a doctoral proposal, all to be defended in an oral examination. For specific details and requirements for admission to and navigation of the Ph.D. program, please refer to the Anthropology Department Graduate Programs Handbook (http://www.anthro.illinois.edu/programs/graduate/resources/AnthGradHandbook.pdf) and the University of Illinois Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Medical Scholars Program**

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Anthropology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146, or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, the Anthropology Department recognizes the importance of teaching experience as part of a graduate education. Most Anthropology graduate students will have the opportunity to work as teaching assistants, to learn to design their own classes, and possibly teach their own classes.

**Faculty Research Interests and Facilities**

Courses and individualized study provide broad coverage of sociocultural, linguistic, archaeological, and physical anthropology. The department provides special emphases in the analyses of state ideologies and cultural transformations; complex societies in transition; kinship and gender relations; politics, economics, and business studies; social movements and youth; border studies, criminality, violence, and security; religion, race, and ethnicity; democracy, governance, and policing; social classification; performance and embodiment; food and environment; language and culture; discourse and narrative analysis; transnationalism and diasporas; human evolution; agricultural origins and development; landscape histories and heritage; hunter-gatherer adaptations; climate change and sustainability; diet and nutrition; paleoecology and paleobiology; evolutionary genetics; population genetics; peopling of the Americas; ancient DNA; biomechanics of locomotion; exercise and neurobiology; functional morphology; comparative and analytical osteology; forensics; demography; immunology; evolutionary medicine; microbe-host interaction; reproductive ecology; female reproductive physiology; conservation; and nonhuman primate evolution, morphology, behavior, and ecology. The department’s research facilities include laboratories for archaeology, GIS and spatial computing, faunal analysis, casting, stable-isotope analysis, ethnography, ancient DNA, skeletal biology, locomotion and motion analysis, and endocrinology.

Departmental funds and a grant from the National Science Foundation, as well as from area studies centers, are available for graduate students’ summer field research. An archaeology field school is held at various locations in Illinois and outside of the US (location varies from year to year). Graduate student programs are enriched by close departmental relationships with the various interdisciplinary units, including area studies centers on campus (African, East Asian and Pacific, European

**Financial Aid**

University fellowships, Graduate College fellowships for underrepresented minorities, and teaching and research assistantships provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany most fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. University of Illinois public archaeology programs, including the Illinois State Archaeological Survey and the Public Service Archaeology and Architecture Program, have provided support and research employment for graduate students in the past, as has the U.S. Army Construction Engineering Research Laboratory in Champaign.

**Master of Arts in Anthropology**

The master’s degree can be a first stage toward the doctorate or may be used by students wishing to apply knowledge of anthropology to a related field. Candidates must present a thesis or paper in lieu of a thesis acceptable to their advisers and another member of the graduate faculty within the department.

**Thesis Option**

Minimum Hours Required Within the Unit: 12
Minimum GPA: 3.0

For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Doctor of Philosophy in Anthropology**

The preliminary examination consists of a pre-dissertation research paper, a proposal for doctoral research, and a written examination designed by the student’s doctoral committee followed by a two-hour oral examination. The final examination is a defense of the doctoral thesis. Fieldwork is strongly recommended, although not required.

Master’s degree or equivalent number of hours: 32
Electives: 32
Language Requirement: High proficiency in one, or reading ability in two, foreign languages is required. Statistics, computer modeling, or similar expertise, however, may be used in lieu of one foreign language.
ANTH 599 Thesis Research (min/max applied toward degree): 0-32

Total Hours: 96

**Other Requirements**

For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Graduate Minor in Museum Studies**

The Graduate Minor in Museum Studies is designed for MA and PhD students who wish to complement their degree program with interdisciplinary study of the theory, organization and management of museums and museum collections. The program offers broad coverage of different disciplines’ approaches to museum theory, and practice, including interdisciplinary perspectives from Anthropology, Art History, Landscape Architecture, History, Education, and Library and Information Sciences. The program also focuses on the collaborative, international and multicultural nature of museum work in curating, researching and communicating the tangible and intangible evidence of people and their environment. Students acquire the applied theory required to successfully work on, with or in museums. Students may tailor the minor to their career goals by choosing among electives that emphasize different theoretical and technical aspects of museum studies.

MUSE 500 Core Prob Museum Theory & Prac: 4
Electives from an approved list of museum-related courses, at least one of which must be at the 500-level: 12

The student must participate in a capstone experience consisting of an approved museum-based internship, museum-related project or museum-related research paper. Every student must provide a product of this experience in the form of either a formal professional presentation or a written document. If a student chooses to write their MS thesis or PhD dissertation on a museum topic, this will fulfill (but is not required for) the capstone experience, provided that a member of the Museum Studies Steering Committee is a formal member of the student’s thesis or dissertation committee. Student may receive academic credit for their capstone experience through their home department or MUSE 590.

Total Hours: 16

**Other Requirements**

Minimum 500-level Hours Required: 8
Overall:

For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Architecture**

Director of the School: Peter Mortensen, PhD
Interim Director of Graduate Studies: Randy Deutsch
117 Temple Hoyne Buell Hall
611 Taft Drive
Champaign, IL 61820
(217) 244-4723
E-Mail: arch-grad@illinois.edu

Major: Architecture
Degrees Offered: M. Arch, Ph. D.
Graduate Concentration: Medieval Studies (p. 486) (M. Arch and Ph. D.)

Major: Architectural Studies
Degrees Offered: M. S.
Graduate Concentration: Structures (p. 327) (M. S.)

Joint Degree Program: the Master of Architecture can be earned jointly with the following Degrees Offered:
M.B.A. in Business Administration
M.C.S. in Computer Science
M.U.P. in Urban Planning
M.S. in Civil Engineering (Construction Engineering and Management) or (Structures)

**Graduate Degree Programs**

The School of Architecture offers two graduate programs, leading to a Masters degree:

1. a two-year Master of Architecture (Professional Degree) and
2. a one-year Master of Science in Architectural Studies (Post-professional Degree).
The Master of Architecture program is for students holding a four-year Bachelor of Science in Architectural Studies (or similar degree in architecture). One may be admitted to the Master of Architecture program with Limited Standing if the student holds a bachelor’s degree (or higher) in any field other than architecture. Student in M. Arch (Limited Standing) typically take two years to complete undergraduate prerequisite courses to attain full standing in the M. Arch program. The Master of Architecture degree is a professional degree accredited by the National Architectural Accreditation Board (NAAB).

The Master of Science in Architectural Studies (Post-professional Degree) program is for students holding a five-year Bachelor of Architecture professional degree. The MSAS degree is not accredited by NAAB.

The School of Architecture, together with the graduate programs of business administration, computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Business Administration, Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

The School of Architecture, together with the Department of Landscape Architecture, offers a graduate program leading to the Doctor of Philosophy degree.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

Applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

- Master of Architecture (Professional Degree) (p. 328)
- Master of Architecture (Limited Standing) (p. 327)
- Master of Science in Architectural Studies (Post-professional Degree) (p. 329)

Doctor of Philosophy in Architecture

This program offers advanced, rigorous education for those students whose goal is the advancement of the intellectual base of the discipline through a career of research and scholarship. Three areas of concentration are offered: history and theory, environment and technology, and behavioral and cultural factors in design. The program is administered jointly with the Department of Landscape Architecture.

All students are required to enroll in the PhD colloquium during the fall of their first year of course work.

Master of Architecture and Master of Urban Planning

This joint degree program offers an opportunity to obtain an education for a career that combines the disciplines of architecture and urban planning. For entry into this program, applicants must satisfy the admission requirements of each academic unit. Application for
admission may be made either simultaneously to both units or in sequence.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 86 hours of graduate work (54 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in six semesters and one summer session. Candidates entering the program with a five-year Bachelor of Architecture degree must complete at least 64 hours of graduate work (32 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in four semesters and a summer session.

Master of Architecture and Master of Business Administration

This joint master’s degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

Candidates entering the Master of Architecture/Master of Business Administration joint degree program with a four-year baccalaureate in architectural studies must complete 110 hours of graduate work, 50 hours in Architecture and 60 hours for the M.B.A.

Master of Architecture and Master of Computer Science

This joint master’s degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

The combination of Master of Architecture and Master of Computer Science degrees requires 74 graduate hours if no prerequisites are needed in computer science. Candidates entering either of these programs with a five-year bachelor of architecture degree must complete at least 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Master of Architecture and Master of Science in Civil Engineering (Construction Management) or (Structures)

This joint degree program offers qualified applicants the opportunity to develop competence in a career that combines the disciplines of architecture and civil engineering (construction management) or (structures). For entry into these programs, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission should be made to the School of Architecture. Admission to the other unit may be sought after the first semester of graduate study in architecture.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 78 (32 in Civil Engineering and 46 in Architecture) hours of graduate work and, if admitted with full status, may complete the program in five semesters. Candidates entering the program with a five-year Bachelor of Architecture degree must complete 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

- Medieval Studies Concentration (p. 486)
- Structures Concentration (p. 327)

Master of Science in Architectural Science Structures Concentration

The School of Architecture offers a Structures Concentration under its MS in AS degree program. Completion of this in-depth plan of study will result in recording of Structures as a Concentration on the student's transcript under the MS in AS degree. Students interested in participating in the Structures Concentration must be admitted to the School of Architecture's MS in AS degree program; register their intent to enter the Structures Concentration with the School's Graduate Office prior to completing their first semester in their degree program and complete 27 graduate credit hours of architectural structures courses from the required courses list below. Prerequisite subjects for the Structures Concentration include the following: calculus I and II; statics and dynamics; mechanics of materials; one course in structural steel design and one course in reinforced concrete design. Students without these prerequisites may enter the Structures Concentration upon completion of their prerequisite courses.

Master of Architecture Limited Standing

The variable-length professional degree program has been designed for applicants who have a bachelor’s degree in any field other than architecture. Emphasis is placed on the development of sufficient background in introductory architectural studies so that the applicants may successfully complete the equivalent of the two-year graduate program described above.

Applicants accepted into this program will initially be admitted with limited status. Full status may be attained by completion of introductory architectural studies. Once full status is attained, a minimum of 54 hours of graduate work is required for completion.

The time necessary to complete the program will depend on the nature of undergraduate coursework completed by the applicant.
Candidates attaining full standing may complete the program in two years of full-time academic study.

**Thesis Option**

One course in architectural practice

One core elective each from a select list of courses in architectural thought

One core elective each from a select list of courses in professional practice

Four studios including two semesters of comprehensive design

One course in structural planning

Students must also complete prerequisites, which are determined individually and do not count toward the required number of hours required

**Master of Architecture Professional Degree**

The two-year professional degree program, intended for students entering with a four-year baccalaureate in architectural studies, emphasizes further study in architectural disciplines, study in depth in one optional area of specialization, and/or participation in research.

The two-year graduate program is comprised of advanced study in architectural disciplines, building upon the fundamentals established in a four-year undergraduate study program.

Students may elect to concentrate in any one of the areas of specialization including Design, Structures, Technology, History and Preservation as well as newly developing areas of research by taking additional courses in those areas.

Candidates admitted with full or limited status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

**Thesis Option**

One course in architectural practice

One core elective each from a select list of courses in architectural thought

One core elective each from a select list of courses in professional practice

Four studios including two semesters of comprehensive design

Graduate Concentrations: Medieval Studies (available to M.A. and Ph.D.); Writing Studies (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Art Education or Art History and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

**Graduate Degree Programs**

The School of Art and Design offers the Master of Arts in Art Education and in Art History, the Master of Education in Art Education, the Master of Fine Arts in Art and Design, the Doctor of Philosophy in Art Education, and the Doctor of Philosophy in Art History. In addition to the listed concentrations, we also offer a specialization in New Media in the M.F.A. program.

**Admission**

Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores. International applicants or applicants who are not native English speakers must present a TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

**Medical Scholars Program**

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Art History and Art Education. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

**Facilities and Resources**

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

**Financial Aid**

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

- Master of Education in Art Education (p. 332)
- Master of Arts in Art Education (p. 331)
- Master of Arts in Art History (p. 331)
- Master of Fine Arts in Art and Design (p. 332)
- Doctor of Philosophy in Art Education (p. 330)
- Doctor of Philosophy in Art History (p. 331)

**Minor in Art History**

The Graduate Minor in Art History is designed to provide UIUC graduate students, both at the master's and doctoral levels from any discipline, a foundation in the histories, theories and methods of art history and visual cultures. The Minor is taken in conjunction with, and is intended to complement the student's work in their primary disciplines.

In addition to the minor requirements, students must also complete the requirements of their major degree. Students interested in the Art History Graduate Minor should contact the Director of Graduate Studies in Art History.

**Doctor of Philosophy in Art Education**

The doctoral program in art education is designed for advanced graduate students who want to pursue scholarly study and research in art education. Doctoral level coursework includes studies in both art education and in relevant disciplines and departments within the university. Applicants for admission must hold a master's degree in art education or the equivalent from an accredited institution. Admission is determined by a sample of academic writing, official records of previous education and experience, and letters of recommendation.

| Course work Hours in residency on this campus | 32 |

| Total Hours | 64 |

**Other Requirements**

| Masters Degree Required for Admission to PhD? | Yes |
| Qualifying Exam Required | Yes |
| Preliminary Exam Required | Yes |
Doctor of Philosophy in Art History

The program leading to the degree of Doctor of Philosophy in Art History is designed to prepare students for scholarship and for teaching at the college level. Applicants must have the Master of Arts in Art History or the equivalent. Students earning the master's degree must pass the qualifying examination with a high score and write a thesis or research paper of superior quality in order to be admitted to the doctoral program. Students taking the master's degree elsewhere must satisfy the Graduate Committee on the History of Art and Architecture as to their preparation to undertake work on a doctoral level. Students usually elect to major and write a dissertation in one of various fields:

- Classical
- Medieval
- Renaissance
- Baroque
- Modern
- Contemporary
- American
- African
- Asian or Latin American

Coursework Hours (in residency on this campus): 32
Language Requirement: An effective reading knowledge in two languages chosen with the approval of the student’s academic adviser and the program chair is required. Language requirements must be met before the student has earned 32 hours of graduate credit beyond the requirements for the master's degree.

- Minimum GPA: 2.75

For additional details and requirements refer to the department’s graduate studies requirements and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Master of Arts in Art History

This program provides basic preparation for teaching at the college level, background in the history of art for museum work, and preliminary study for the doctoral degree. In addition to the general requirements, the prerequisite for admission is ordinarily an undergraduate degree in art history or a strong preparation in related humanistic studies. Applicants with little background in art history but who have done exceptionally well as undergraduates in other disciplines will be seriously considered. A thesis or scholarly essay is required for completion of the degree.

**Thesis Option**

Graduate hours in the history of art and architecture: 24, including 16 hours in art history graduate seminars

Language Requirement: Proficiency in a language outside of English and appropriate to the student’s field of study must be demonstrated by the end of the first year of residence.

Master of Arts, Art Education

The program of study leading to the degree of Master of Arts in Art Education is designed to provide advanced level professional study for students who are interested in research in art education. It can serve as preparation for a variety of careers, such as museum education, school-based art education, and related professional service positions. Students also elect a minor in another field of art history in consultation with their major adviser and appropriate faculty.

Coursework Hours (in residency on this campus): 32
Language Requirement: Proficiency in a language outside of English and appropriate to the student’s field of study must be demonstrated by the end of the first year of residence.

community arts, arts advocacy, arts policy formation; professional development for art teachers and supervisors in the public schools; and as preparation for the doctoral degree.

In addition to required courses in art education, students can choose electives from studio, art education and art history, and any other graduate courses offered by the university that complement their studies or professional aspirations. Specific course selection is determined in consultation with the student's adviser. Students may simultaneously study for teaching certification but graduate credit is not usually granted for such study. A thesis is required.

Master of Fine Arts in Art and Design

The degree of Master of Fine Arts in Art and Design is designed to prepare qualified individuals for distinctive achievement in the professional area of their choice. Fields of concentration include Graphic Design, Industrial Design, Photography, Metal, Ceramics, and an interdisciplinary Studio which includes concentrations in Painting, Sculpture, and specialization in New Media. A minimum of 64 hours of graduate credit is required for the M.F.A. degree, requiring three years of full-time residence. Individual studio space and specialized resources essential to the acquisition of a high-quality professional education are available to students in all areas of study. The Graphic Design, Photography, Metal, Ceramics, and interdisciplinary Studio which includes Painting, Sculpture, and New Media programs require a graduation exhibition of creative work and a written thesis approved by a thesis committee for deposit in the School of Art and Design’s graduate office. The Industrial Design Program requires a graduation exhibition, a written thesis approved by a thesis committee and a thesis deposit in the Graduate College Thesis Office. Admission for all programs is determined by a faculty review of a portfolio of the applicant’s creative work, records of previous education and experience, letters of recommendation, and other significant achievements that may be viewed as predictors for success in the program.

Astronomy, and Physics have research interests related to a variety of faculty members in the departments of Chemistry, Faculty Research Interests graduates) or the Department of Astronomy. Graduates of the Chemistry and Astronomy Ph.D. programs, students should submit applications directly to either the Department of Chemistry (http://chemistry.uiuc.edu/astrochemistry.uiuc.edu/concentration.php) is a part of the Chemistry and Astronomy Ph.D. program. Admission. It is an addition to the Chemistry and Astronomy Ph.D. programs at Illinois and offers transcript recognition that will ensure that students are recognized as qualified by scientists in both traditional fields (chemistry and astronomy).

Facilities and Resources

Facilities that can be utilized by astrochemistry students in their thesis research include a wide variety of laboratory spectroscopy equipment in Chemistry, the Combined Array for Research in Millimeter-wave Astronomy, computing facilities in both Chemistry and Astronomy, and other national and international observational astronomy facilities.

Financial Aid

Financial aid in the form of teaching assistantships and/or research assistantships is generally provided for admitted students by the Departments of Chemistry and Astronomy.

The requirements for the Astrochemistry graduate concentration (http://astrochemistry.illinois.edu/concentration.php) are supplemental to the degree requirements of the Ph.D. in either Chemistry or Astronomy, and are summarized in the table below. For this concentration, at least 24 hours of graduate level coursework (at the 400- and 500-level) are required, of which at least 12 must be in chemistry courses and at least 12 in astronomy courses. A list of recommended courses is given on the Astrochemistry concentration website (http://astrochemistry.illinois.edu/concentration.php), but students may substitute other courses with consent of the Astrochemistry concentration steering committee.

All students in the concentration are required to take CHEM/ASTR 450, Astrochemistry, which may count toward either the astronomy or chemistry requirements. Students concentrating in astrochemistry should have at least one member from each department on their thesis committee.

Graduate Concentration: Astrochemistry
Participating Programs: Astronomy (PhD only) and Chemistry (PhD only)

Graduate Degree Programs

Astrochemistry is an interdisciplinary area of knowledge at the intersection between chemistry and astronomy. As a few examples, topics of active research in this area include identifying organic molecules in interstellar space, building models of the chemical reactions that occur in interstellar space, laboratory measurements of astronomically important molecules, searching for Earthlike planets using molecular signatures, and understanding the contributions of interstellar molecules to the chemical origin of life. In order to succeed in this field, students require training in both of the traditional disciplines of chemistry and astronomy.

The Astrochemistry graduate concentration (http://astrochemistry.illinois.edu) is intended for Ph.D. students in Chemistry or Astronomy who wish to gain the necessary background to perform original research in the emerging interdisciplinary field of astrochemistry. It is an addition to the Chemistry and Astronomy Ph.D. programs at Illinois and offers transcript recognition that will ensure that students are recognized as qualified by scientists in both traditional fields (chemistry and astronomy).

Admission

As the Astrochemistry graduate concentration (http://astrochemistry.uiuc.edu/concentration.php) is a part of the Chemistry and Astronomy Ph.D. programs, students should submit applications directly to either the Department of Chemistry (http://chemistry.uiuc.edu/graduates) or the Department of Astronomy.

Faculty Research Interests

A variety of faculty members in the departments of Chemistry, Astronomy, and Physics have research interests related to astrochemistry. A partial listing of research groups is available on the Astrochemistry concentration website (http://astrochemistry.illinois.edu/groups.php).

Facilities and Resources

Facilities that can be utilized by astrochemistry students in their thesis research include a wide variety of laboratory spectroscopy equipment in Chemistry, the Combined Array for Research in Millimeter-wave Astronomy, computing facilities in both Chemistry and Astronomy, and other national and international observational astronomy facilities.

E-mail: astronomy@illinois.edu

Major: Astronomy
Degrees offered: M.S., Ph.D.
Graduate Concentration: Astrochemistry (p. 333) (Ph.D. only)

Graduate Degree Programs
The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy for a small and carefully selected student body. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of modern physics as well as of general astronomy. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Admission
Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by test scores, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor's degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 (A = 4.0) and satisfactory scores on the Graduate Record Examination (GRE) (verbal, quantitative, and advanced physics portions) are required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the Graduate College Admissions Web site (http://www.grad.illinois.edu/admissions/instructions/04c).

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by January 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions Web site (www.astro.illinois.edu/academics/graduate/) (http://www.astro.illinois.edu/academics/graduate) for more information and application materials.

---

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests
Research activity in the Department of Astronomy includes observational and theoretical investigations of a wide array of astronomical objects:

- Early-universe cosmology (inflation, particle dark matter, cosmic nucleosynthesis)
- Large-scale structure of the universe (cosmic microwave background, galaxy clusters)
- Extragalactic systems (galaxy structure and evolution, interacting galaxies, active galaxies, jets, and quasars)
- Interstellar medium (multiple phases, molecular clouds, HII regions, bubbles and superbubbles, planetary nebulae, supernova remnants, magnetic fields, and galactic structure)
- Stars (formation, structure and evolution, atmospheres, nucleosynthesis, novae, supernovae, pulsars, and stellar statistics)
- Compact objects (black holes, neutron stars, white dwarfs)

Theoretical astrophysics is also a strong research interest many faculty members in the Department of Astronomy and the Department of Physics. Current activity centers on:

- Astrophysical fluid dynamics, magnetohydrodynamics and radiation hydrodynamics
- Physics of dense stellar matter
- Accretion phenomena
- High energy and relativistic astrophysics
- Cosmic inflation and structure formation
- Nuclear and particle processes in cosmology and astrophysics
- Black hole physics and astrophysics
- Gravitational lensing
- Gravitational wave phenomena

Facilities and Resources
- The Dark Energy Survey
- The Large Synoptic Survey Telescope
- The South Pole Telescope
- Astronomy students and faculty successfully compete for time on national facilities. These include ground-based telescopes of the National Radio Astronomy Observatory, such as the Atacama Large Millimeter Telescope and the Very Large Array, and the National Optical Astronomy Observatory telescopes. Illinois research involves many space-based telescopes, including the Hubble, Planck, Spitzer, Herschel, Chandra, and Fermi.
- A number of projects in the Department of Astronomy partner with the National Center for Supercomputing Applications (NCSA) at Illinois. This includes development and application of astrophysical simulations such as the FLASH package and general relativistic magnetohydrodynamic codes that provide insight into the nature of structure formation and the physics of black holes. Astronomy faculty also leverage NCSA's pioneering development of cyberinfrastructure environments to facilitate data transport for the Sloan Digital Sky Survey (SDSS), the Dark Energy Survey, the Square Kilometer Array, and the Large Synoptic Survey Telescope. NCSA
and the Astronomy Department also jointly founded the Laboratory for Cosmological Data Mining to apply novel algorithms to the rich datasets now available for cosmological analysis, including those from the SDSS and Wilkinson Microwave Anisotropy Probe.

- Illinois is the home of the Blue Waters National Petascale Computing Facility, one of the most powerful supercomputers in the world, and the most powerful on a university campus. A portion of Blue Waters time is dedicated to Illinois faculty, and Astronomy students and faculty use Blue Waters for their research.

**Financial Aid**

University fellowships are available and may be combined with part-time teaching assistantships. Most resident students are supported for their first two or three years by half-time teaching assistantships. The typical teaching assistant takes two or three graduate courses per semester and spends twenty hours per week handling quiz sections in elementary astronomy courses. Teaching assistantships are responsible positions, and the concomitant duties are considered to be a valuable part of the student's educational experience. Advanced students may compete for research assistantships offered by faculty members whose research is partially supported by federal grants.

105 South Gregory Street  
Urbana, IL 61801  
(217) 333-2046  
E-mail: atmos-sci@illinois.edu

Major: Atmospheric Sciences

Degrees offered: M.S., Ph.D.

Graduate Degree Programs

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are offered. Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (http://www.cse.illinois.edu).

Admission

Applications for admission are encouraged from students with bachelor's degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to take the Graduate Record Exam (GRE) and submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include the physics of aerosol, clouds and precipitation; atmospheric radiative processes, radar and satellite meteorology, remote sensing, convective phenomena including severe storms, synoptic and mesoscale meteorology, boundary layer meteorology, tropical meteorology, hydrometeorology, numerical weather prediction, atmospheric dynamics, climate variability and climate modeling including chemical, radiative, and transport effects; atmospheric chemistry, land-atmosphere interactions, oceanography, human and natural perturbations of global ozone and climate, biogeochemical cycles, and climate impacts, risks, and policy. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

With more than 2.5 computers per person, the department maintains a capable and extensive computing infrastructure as this is a vital component of all of its educational, research and outreach endeavors. All graduate students, staff, and faculty members have a desktop computer, usually a Windows PC or Mac. There is a departmental computer lab for hands-on class exercises, computers and display projectors in each of
the classroom areas and wireless access throughout the buildings. An up-to-date high-capacity network connects these to various departmental computing resources including e-mail, file and web servers, resources provided by the campus as well as our linux-based research computing systems.

These research systems include the department’s ever-expanding computing cluster, dozens of terabytes worth of storage, other departmental systems and a number of systems specific to each faculty member’s research group. These systems are used for numerical simulations, analysis and modeling of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including agencies like NOAA, UCAR, international sources and other peer institutions. These are available for visualization with a variety of tools to aid in the understanding of current weather events and case studies of recent major events. We have a synoptic lab that is used for weather briefings.

Because computers are only good when they work and you understand how to use them, the department maintains a dedicated computer support staff which is responsible for maintaining everything and personally assisting users with problems, questions and accomplishing their research goals.

Additionally we have access to the resources of the University as well as supercomputing centers, such as those at NCSA (which is on campus), NCAR and others.

**Financial Aid**

Financial aid is available in the form of research and teaching assistantships, University fellowships, and waivers of tuition and service fees. More information is available at the Department Website (https://www.atmos.illinois.edu/cms/One.aspx?portalId=127458&pageId=187177).

## Biochemistry

[http://www.mcb.illinois.edu/graduate/gradprospect.html](http://www.mcb.illinois.edu/graduate/gradprospect.html)

Head of the Department: Susan A. Martinis
Associate Head of Department: Robert B. Gennis
Director of Graduate Studies: David M. Kranz
419 Roger Adams Laboratory
600 South Mathews Avenue
Urbana, IL 61801
(217) 333-2013
E-mail: biochem@mcb.uiuc.edu

Major: Biochemistry
Degrees offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Biochemistry and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/msp)

## Graduate Degree Programs

The Department of Biochemistry offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website at [http://www.mcb.illinois.edu/graduate/gradprospect.html](http://www.mcb.illinois.edu/graduate/gradprospect.html).

The Department of Biochemistry is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Cell and Developmental Biology, Microbiology and Molecular and Integrative Physiology as well as Programs in Biophysics and Neurosciences. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. In addition, dual degrees via the Medical Scholars Program are offered. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the College of Medicine, and the College of Veterinary Medicine.

## Admission

Interested students must apply directly to the School of Molecular and Cellular Biology ([http://www.mcb.illinois.edu/graduate/gradprospect.html](http://www.mcb.illinois.edu/graduate/gradprospect.html)). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December in mutual agreement with their desired advisor and formally join the appropriate graduate program/department at that time.

Students electing biochemistry as a major for an advanced degree should have a strong background in chemistry, biology, physics, and calculus and a grade point average of a 3.0 or higher (A = 4.0). Admission requirements include: a bachelor's degree, Graduate Record Examination (GRE) scores. In addition to the above requirements, international students must attain a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 590 (243 on the computer-based test). A score of 96 on the internet-based test (iBT), with a score of 24 on the speaking section, is also accepted. The department does not normally admit students directly into the M.S. program.

## Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biochemistry. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at [www.med.illinois.edu/msp](http://www.med.illinois.edu/msp).

## Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

## Faculty Research Interests

Faculty research in the Department of Biochemistry covers a broad spectrum of the most dynamic areas of current research in biological chemistry and molecular biology: physical approaches to the structure and function of macromolecules and membranes; nucleic acid biochemistry and enzymology, enzyme mechanisms and evolution; membrane biochemistry and bioenergetics; protein-lipid interactions; protein-nucleic acid interactions and molecular recognition; molecular biological approaches to gene organization and expression; immunology; microbial physiology, and signal transduction.

## Centers, Programs, and Institutes

Biochemistry faculty are appointed and active in several cross-campus academic and research units, including the Center for Biophysics & Computational Biology, the Beckman Institute for Advanced Science and Technology, the Institute for Genomic Biology, as well as the...
interdepartmental graduate programs in Biophysics & Computational Biology, and Neuroscience, and the joint M.D./Ph.D. Medical Scholars Program of the College of Medicine.

Facilities and Resources
Campus resources for science research are state-of-the-art and available to all faculty research programs. Notably among these is the Roy J. Carver Biotechnology Center, which comprises the W.M. Keck Center for Comparative and Functional Genomics (Custom Library Services, High-Throughput Sequencing and Genotyping, DNA Core Sequencing, Fragment Analysis, Oligonucleotide Synthesis, Functional Genomics and Bioinformatics), Proteomics Services (Protein Science Facility, Immunological Resource Center and Flow Cytometry Facility), a Metabolomics Center and a Transgenic Mouse Facility. It also provides career counseling through the Career Services Office. Many other cross-campus facilities are important for the faculty research programs in Biochemistry, including the Fred Seitz Materials Research Laboratory, the National Center for Supercomputing Applications (NCSA), the high-field VOICE NMR Laboratory, Mass Spectrometry Center, Microanalysis Laboratory, Cell Media Facility, and many electronics, machine and glass shop service facilities. The University of Illinois is also a full member of the LS-CAT beamline for macromolecular crystallography at the Advanced Photon Source, Argonne National Laboratory.

Financial Aid
Financial aid for Ph.D. graduate students in biochemistry is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. In addition, interdepartmental training grants from the National Institutes of Health support multidisciplinary training programs. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a stipend, as well as a full tuition waiver and a partial fee waiver.

Master of Science Biochemistry
A coursework master’s degree requires a minimum of two full-time semesters. A thesis master’s degree usually requires a minimum of three semesters.

Urbana, IL 61801
(217) 244-9270

Information listed in this catalog is current as of 04/2016
Graduate Degree Programs

The Integrated Bioprocessing Research Laboratory in the College of ACES offers a Master of Science with a Major in Bioenergy and a Concentration in Professional Science Master’s. In addition to receiving training in the general field of bioenergy, students gain relevant professional experience in business and related topics through coursework and an internship. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities.

Admission

In addition to meeting the Graduate College admission requirements, applicants should have a baccalaureate degree in a recognized field of biological, physical, agricultural, socio-economic or engineering science. Graduate Record Examination (GRE) scores are required of all applicants. The minimum recommended Test of English as a Foreign Language (TOEFL) score is 590 on the paper-based test, 243 on the computer-based test, and 79 on the internet-based test. Applications are only accepted for the fall semester. Transfer credit may not be applied to this program due to the cohort nature of this program.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

Master of Science in Bioenergy

The curriculum requires 42 graduate hours, consisting of a core and elective program, in addition to the required PSM concentration. The areas of specialty are Plants, Soils and Feedstocks; Production, Processing and Use; Environment, Economics and Policy & Law, and Tools and Methods.

Major: Bioengineering

Degrees Offered: M.S., Ph.D.

Major: Bioinstrumentation

Degrees Offered: M.Eng.

Graduate Concentrations: Bioengineering, Biomechanics, Cancer Nanotechnology

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Bioengineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioinstrumentation (M.Eng.), the Master of Science in Bioengineering (M.S.), and the Doctor of Philosophy (Ph.D.) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the M.S. and Ph.D. programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology. Opportunity also exists for specializing in (1) computational science and engineering and (2) energy and sustainability engineering via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-program) and the Energy and Sustainability Engineering (EaSE) Option (http://ease.illinois.edu). The Medical Scholars Program (https://www.med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Bioengineering.

Admission

For the M.S. and Ph.D. programs, applicants should have an undergraduate or graduate degree, respectively, in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required.
Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. All applicants must submit results from the Graduate Record Examination (GRE) (http://www.ets.org) general test.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 97 (IBT), 243 (CBT), or 590 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores of 103 (TOEFL iBT) or greater, 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Please see the admission requirements for the M.Eng. in Bioinstrumentation under the "Masters" tab.

Degree Requirements
For additional details and requirements for all degrees, please refer to the department's Graduate Studies Web site (http://bioengineering.illinois.edu) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Bioengineering. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Bioengineering and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. An application to the Medical Scholars Program will also serve as the application to the Bioengineering graduate program. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146, mspo@illinois.edu or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Faculty Research Interests
Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale, Molecular, Cellular and Tissue Engineering, Bio-Micro and Nanotechnology, Computational Bioengineering, and Synthetic Bioengineering. In addition to Bioengineering faculty (http://bioengineering.illinois.edu/directory), Department of Bioengineering has more than 50 affiliate faculty (http://bioengineering.illinois.edu/directory).

Financial Aid
For the M.S. and Ph.D. programs, qualified students may apply for financial aid in the form of fellowships, teaching and research assistantships, and waivers of tuition and service fees. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Please see the financial aid eligibility for the M.Eng. in Bioinstrumentation under the "Masters" tab.

One course from the approved Bioinformatics list of Computer Sciences core courses (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)

One course from the approved Bioinformatics list of Biology core courses (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)

One course in systems biology from departmental list (http://bioengineering.illinois.edu/graduate-programs/prospective-graduate-students/bioengineering-courses-illinois/#electives)

Elective Courses (http://bioengineering.illinois.edu/graduate-programs/prospective-graduate-students/bioengineering-courses-illinois/#electives)

Total Hours 40

#### Other Requirements and Conditions

**1.** For additional details and requirements for all degrees, please refer to the department's Graduate Studies Web site (http://bioengineering.illinois.edu/graduate-programs/current-graduate-students) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

**Minimum GPA:** 3.0

**A concentration is required.**

**A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being Bioengineering courses; a maximum of 2 hours of seminar courses can be counted to towards these 12 hours.**

---

Information listed in this catalog is current as of 04/2016
A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being Bioengineering courses; a maximum of 2 hours of seminar courses can be counted towards these 12 hours.

The non-thesis option is only available with permission of the advisor. Requirements include an additional 8 hours of elective courses which, with the approval of an advisor, may include supervised research experiences including internships and projects.

Minimum GPA: 3.0

For additional details and requirements for all degrees, please refer to the department’s Graduate Studies Web site (http://bioengineering.illinois.edu/graduate-programs/current-graduate-students) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

Degree Requirements

*For additional details and requirements for all degrees, please refer to the department’s Graduate Studies Web site (http://bioinstrumentation.illinois.edu/academics/curriculum.html) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

Master of Engineering in Bioinstrumentation

Bioengineering

b (http://www.bioen.illinois.edu)oinstrumentation.illinois.edu (http://bioinstrumentation.illinois.edu)

Head of Department: Rashid Bashir
Director of Graduate Studies: Deborah Leckband
Academic Program Contacts: Liezl Bowman (Program Coordinator) and Dipanjan Pan (Program Faculty Director)
1270 Digital Computer Laboratory
1304 West Springfield Avenue
Urbana, IL 61801
(217) 333-1867
E-mail: bioinstrumentation@illinois.edu (http://www.bioinstrumentation@illinois.edu)

Major: Bioinstrumentation
Degrees Offered: M.Eng.

Graduate Degree Programs

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioinstrumentation. For more information, visit bioinstrumentation.illinois.edu (http://bioinstrumentation.illinois.edu).

Admission

For the M.Eng. program, applicants should have an undergraduate engineering degree or must have taken engineering-related coursework. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. In addition, applicants must submit results from the Graduate Record Examination (GRE) (http://www.ets.org) general test. Students in the program are not expected to continue in and do not have automatic admission to the Ph.D. program in any engineering department.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. Applicants with lesser scores may still apply. Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Bachelor of Science in Bioengineering

BS 401 Bioinstrumentation Seminar 2
BS 402 Biological Measurement I 4
BS 403 Biological Measurement II 4
BS 404 Biomedical Systems Engineering 4
BS 405 Bioinstrument Innovation 4
Track Electives 1 12
BS 406 Bioinstrumentation Project 6

Minimum Hours Overall Required Within the Unit:
Maximum 500-level Hours Required Overall:
Other Requirements:*
Total Hours 40

1 courses from approved list

Financial Aid

The tuition and fees for the M.Eng. in Bioinstrumentation are different from the standard university tuition rates. For tuition information and external funding resources, please visit http://bioinstrumentation.illinois.edu/admissions/tuition-fees.html. Students in the Bioinstrumentation major for the M.Eng. degree are not eligible for tuition waivers through research assistantships or teaching assistantships.

Graduate Concentration in Cancer Nanotechnology

The Cancer Nanotechnology Concentration requires students to earn a B or better in each concentration course. Students must complete 12 credit hours, including at least one core Cancer course and one core Nanotechnology course. Participants may take a second core Cancer course and/or a second core Nanotechnology course as an elective. Fulfillment of these requirements will be monitored by the graduate coordinator in Bioengineering.

Core Cancer Classes

Information listed in this catalog is current as of 04/2016
BIOE 498  Special Topics (Section RB, Cancer Science and Technology)
MCB 400  Cancer Cell Biology

Core Nanotechnology Classes
ABE 446  Biological Nanoengineering
BIOE 416  Biosensors
ECE/ME 485  MEMS Devices & Systems

Elective Courses
FSHN 480  Basic Toxicology
ME 483  Mechanobiology
ME 487  MEMS-NEMS Theory & Fabrication
ME 586  Mechanics of MEMS

Total hours required for the concentration: 12

Courses taken toward this concentration will count toward the student's graduate degree.

Students must notify their department of their plan to pursue this concentration.

When choosing courses, students must work directly with their department to ensure that all degree requirements will be met.

Note that students who intend to complete both a Biomechanics Concentration and a Cancer Nanotechnology Concentration may only overlap one course between the two concentrations.

Biology

Fax: (217) 244-6697
E-mail: gradinfo@mcb.illinois.edu

Major: Biology
Degrees Offered: M.S., Ph.D.

Graduate Degree Programs

The M.S. in Biology allows students to increase their knowledge of biology and become involved with graduate-level research in biology without the long-term commitment of a Ph.D. program. The work is personally designed by each student in consultation with an adviser. Breadth of training is encouraged.

Admission

The Master of Science in Biology Program is being phased out and is no longer accepting applications or transfer students.

Financial Aid

Financial assistance is not available to M.S. students through the program.

Master of Science in Biology

To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. If a student has a teaching or research appointment he or she may register for 8 credit hours. A research report or thesis is required of all candidates for the degree. To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. If a student has a teaching or research appointment he or she may register for 8 credit hours. A research report or thesis is required of all candidates for the degree.

Thesis Option

Thesis Hours Required – 599 (min/max applied toward degree): 4-8

Total Hours 32

Other Requirements 1

Other requirements may overlap

Minimum 500-level Hours Required 12
Overall:

Courses taken "credit/no credit" may not be used toward degree requirements

Courses taken outside of the Schools must be approved in advance by the Program Director

Approval of research topic is required

Minimum GPA: 3.0

1  For additional details and requirements refer to the program requirements (http://www.life.illinois.edu) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Non-Thesis Option

Research/Project/Independent Study Hours (min/max applied toward degree): 4-8

Total Hours 32

Other Requirements 1

Other requirements may overlap

Minimum 500-level Hours Required 12
Overall:

Courses taken "credit/no credit" may not be used toward degree requirements

Information listed in this catalog is current as of 04/2016
IELTS is required for international applicants. The Biophysics and Quantitative Biology Program does not require the subject GRE for students with a general Graduate Record Examination (GRE) score in the 70%-90% range. The Biophysics Program admits students who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Admission
The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broad-based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however, deficiencies in one of these areas can be corrected during the first two years of study. Most applicants who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Quantitative Biology Admissions web page (http://www.life.illinois.edu/biophysics/program/admissions.html) for additional information and application deadlines.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biophysics and Quantitative Biology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests
Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics web site (http://biophysics.illinois.edu/people/faculty).

Facilities and Resources
Center faculty and students have access to world-class research facilities at the University of Illinois, including the Beckman Institute, the Institute for Genomic Biology, Blue Waters, the National Center for Supercomputing Applications, the Illinois Electron Paramagnetic Resonance (EPR) Research Center, the Biomedical Imaging Center, the Biotechnology Center, and the School of Chemistry Mass Spectroscopy Lab.

Financial Aid
All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.
Master of Science in Biophysics and Quantitative Biology

**Thesis Option**

10 hours of 500-level biophysics courses with a minimum GPA of 3.25 (does not include seminar courses and/or research units and can include no more than 2 hours of tutorials). 500-level courses in other departments count towards this 500-level formal course requirement if they are on the approved Biophysics course list.

- BIOP 401 Introduction to Biophysics (or equivalent) 3 hours
- Elective hours approved by Center Director to bring total hours to 32
- BIOP 599 Thesis Research (4 min applied toward degree) 4 hours

**Total Hours** 32

**Other Requirements**

Other requirements may overlap

- Minimum 500-level Hours Required 12
- Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Non-Thesis Option**

10 hours of 500-level biophysics courses with a minimum GPA of 3.25 (does not include seminar courses and/or research units and can include no more than 2 hours of tutorials). 500-level courses in other departments count towards this 500-level formal course requirement if they are on the approved Biophysics course list.

- BIOP 401 Introduction to Biophysics (or equivalent) 3 hours
- Research/Project Hours (4 min applied toward degree) 4 hours
- Elective hours approved by Center Director to bring total course work hours to 32

**Total Hours** 32

**Other Requirements**

Other requirements may overlap

- Minimum 500-level Hours Required 12
- Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Doctor of Philosophy in Biophysics and Quantitative Biology

The Ph.D. degree is a research degree, and the program is designed with a major emphasis on individual research.

A qualifying examination is offered each spring. This qualifier must be passed by the end of the second year. After formulating a definite research problem, and by the end of the third year, the student takes a preliminary examination where the chosen research topic is presented to the student’s faculty committee. The committee also examines the candidate on their chosen general research area. Finally, a thesis is defended at the final examination. The Ph.D. thesis is based on original work of the student. The thesis and the exam must demonstrate a thorough knowledge of theory and techniques in one of the areas of biophysics.

- BIOP 401 Introduction to Biophysics (or equivalent) 3 hours
- BIOP 595 Biophysics Seminars (Sections A & B) 3 hours
- BIOP 586 Special Topics in Biophysics & BIOP 590 and Individual Topics 10 hours
- MCB 580 Res Ethics & Responsibilities 1 hour
- BIOP 581 Lab Rotation I 2 hours
- BIOP 582 Lab Rotation II 2 hours
- BIOP 583 Lab Rotation III 2 hours
- Two 500-level courses from the pre-approved Biophysics course list
- One computational or experimental lab course – based on the student’s research focus
- BIOP 599 Thesis Research (32 max applied toward degree) 32 hours

**Total Hours** 64

**Other Requirements**

Other requirements may overlap

- Students are required to teach for a minimum of one semester during their graduate career
- Masters Degree Required in Biophysics and Quantitative Biology: No, but Masters level requirements must be met (32 additional hours for Admission to Ph.D. min)
- Qualifying Exam Required: Yes
- Preliminary Exam Required: Yes
- Final Exam/Dissertation Defense Required: Yes
- Dissertation Deposit Required: Yes
- Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Business Administration

Graduate Concentrations: Business Data Analytics, Information Technology and Control, Corporate Governance and International Business, Supply Chain Management

Graduate Degree Programs

The Department of Business Administration offers graduate programs leading to the Master of Science in Technology Management, Master of Science and the Doctor of Philosophy (Ph.D.) in Business Administration degrees.

Admission

Admission to the Ph.D. program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Records Examination (GRE), three letters of recommendation, and a statement of career goals including research interests.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Ph.D. candidates must achieve the University minimum scores on these examinations.

www.grad.illinois.edu/admissions/apply (http://www.grad.illinois.edu/admissions/apply)

The Ph.D. program allows fall admission only. Please check the Departmental listing for current requirements and program information:

www.business.illinois.edu/ba/programs/phd/ (http://www.business.illinois.edu/ba/programs/phd)

Admission to the MS in Technology Management program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals.

Admission to the MS in Business Administration requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT).

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Financial Aid

Most Ph.D. students receive some form of financial assistance. This assistance is likely to be in the form of a teaching or research assistantship, which includes a waiver of tuition and some fees, and/or the award of a merit-based fellowship. The M.S. in Business Administration, the M.S. in Strategic Brand Communication, and the M.S. in Technology Management do not provide assistantships.

- Master of Science in Business Administration (p. 351)
- Master of Science in Technology Management (p. 352)

Doctor of Philosophy in Business Administration

This program offers an in-depth education in teaching and research in selected areas of business and administration. Doctoral students can specialize in marketing, organizational behavior/theory, management science/process management, information systems, and strategic management. The program is intensive, flexible, and adapted to individual needs.

Each student’s program entails sufficient study and preparation to achieve the following:

1. competence in a common core covering substantive and research methods courses, which are formulated by the faculty in each area;
2. in-depth expertise in a major area;
3. expertise in at least one area in addition to the chosen major area, with this minor area selected from within or outside the department;
4. teaching experience; and
5. research or problem-solving competence.

Competency is determined by comprehensive written and/or oral examinations. Following successful completion of all coursework and comprehensive examinations in major and minor areas, students must propose and gain approval of a thesis topic at a public colloquium. The final program requirement is the successful oral defense of the thesis. Applicants should contact the department for current requirements and program design.
The program usually is completed in four years. Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

**Entering with approved M.S./M.A. degree**

Business Administration core requirement 4  
Concentration area courses (12 min) 12  
Minor area courses (12 min) 12  
3 courses in research methodology (12 min) 12  
Students are required to attend pro-seminars in their respective areas 0-4  
BADM 599 Dissertation Research (min/max applied toward degree) 32  
Total Hours 64

**Other Requirements**

Other requirements may overlap

Ph.D. candidates must maintain continuous registration through the approval of a dissertation proposal, unless a leave has been approved by the department.

Qualifying Exam Required No  
Preliminary Exam Required Yes  
Final Exam/Dissertation Defense Required  
Dissertation Deposit Required Yes  
Minimum GPA: 2.75

1 For additional details and requirements refer to the department's Programs of Study (http://www.business.illinois.edu/ba/programs/phd) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

**Graduate Concentration in Business Data Analytics**

The concentration in Business Data Analytics is designed to develop leaders in various business fields who understand (1) how to leverage data to identify new customer segments and market; (2) how to optimize the supply chain and logistics; and (3) how to collect, manipulate, and visualize data for business decisions. The concentration will develop skills using data as a foundation for sound decision making in business.

The concentration is open to students enrolled in the Master of Business Administration, Master of Science in Business Administration, and Master of Science in Technology Management programs in the College of Business but required of none.

This concentration requires twelve graduate hours of Business Data Analytics related coursework and completion of an analytics-related project in their Practicum or an equivalent course. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of the programs approved for the concentration. Admission is limited, and acceptance is considered based on a student's academic standing and space availability.

Select four hours of course work from each of the three areas below:

1. Customer  
   - BADM 590 Consumer Analytics  
   - BADM 590 Social Media Analytics
2. Operation and Supply Chain  
   - BADM 590 Predictive Data Analytics  
   - BADM 590 Business Process Improvement
3. Information Systems  
   - BADM 554 Enterprise Database Management  
   - BADM 557 Data Support and Knowledge Mgt  
   - BADM 590 Data and Visual Analytics
In addition, students pursuing this concentration will be required to select an analytics-related project in their Practicum or an equivalent course.

Course substitutions may be approved by the Department of Business Administration.

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Concentration in Corporate Governance and International Business

The concentration in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as (1) how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance structures; and (2) how managerial practices differ in various national/cultural contexts and why managers must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations. The concentration will provide a strong foundation in the International Business and Governance area and can be tailored to fit the specific career needs of students.

This concentration requires submission of twelve graduate hours of Corporate Governance and International Business related coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of these programs:

- Master of Science in Business Administration
- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Finance
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

Total Hours 12

Other Requirements
Course substitutions may be approved by the Department after consultation with the IB & Business Law Area faculty.

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Concentration in Information Technology and Control

The concentration in Information Technology and Control is designed to develop leaders in various business fields who understand (1) how to leverage information technology to create value for customers, external partners, and shareholders by designing better information systems to improve business processes and controls; and (2) how managers can assess the strategic, financial, and economic benefits and risks of investing in advanced information systems. The concentration will provide a strong foundation in the IS/IT area and can be tailored to fit the specific career needs of students.

This concentration requires submission of twelve graduate hours of Information Technology and Control related coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of these programs:

- Master of Science in Technology Management
- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Finance
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Course substitutions may be approved by the Department after consultation with the IT Area faculty.
### Graduate Concentration in Supply Chain Management

The concentration in Supply Chain Management is designed to develop leaders who understand (1) how to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends; and (2) how to coordinate and integrate supply chain solutions across various intra-organizational and inter-organizational interfaces in any business or organization. The minor or concentration not only will provide a strong foundation in supply chain management principles and practices, but also can be tailored to fit the specific needs of students interested in careers across a wide variety of industries. This minor or concentration requires submission of twelve graduate hours of Supply Chain Management coursework. Successful completion of the minor or concentration assumes certain knowledge of business and prior coursework.

Admission to the minor or concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of these programs:

- Master of Science in Technology Management
- Master of Science in Business Administration
- Master of Business Administration
- Master of Science in Accountancy
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

### Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their major degree.

**Graduate Minor in Corporate Governance and International Business**

The minor in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as

1. how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance; and
2. how managerial practices differ in various national/cultural contexts and why managers must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations.

The minor will provide not only a strong foundation in the International Business and Governance area but could be tailored to fit the specific career needs of our students.

This minor requires twelve graduate hours of related coursework. Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

Select three of the following: 12

- BADM 582 Multinational Management
- BADM 583 Current Topics in Intl Bus
- BADM 584 Global Marketing
- BADM 586 Intl Comparative Management
- BADM 590 Seminar in Business Admin (Corporate Governance in International Context)
- BADM 590 Seminar in Business Admin (Management Challenges in Emerging Economies)

or substitutions approved by the Department of Business Administration

**Total Hours** 12

### Other Requirements

In addition to the minor requirements, students must also complete the requirements of their major degree.

Please contact your department for more information regarding the addition of a minor to your program of study.

For additional details and requirements refer to the department's Programs of Study (http://www.business.illinois.edu/ba/programs/phd) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

### Graduate Minor in Information Technology and Control

The minor in Information Technology and Control is designed to develop leaders in various business fields who understand

1. how to leverage information technology to create value for customers, external partners, and shareholders by designing better information systems to improve business processes and controls; and
2. how managers can assess the strategic, financial, and economic benefits of investing in advanced information systems.

The minor will provide not only a strong foundation in IS/IT area but could be tailored to fit the specific career needs of our students.

Admission to the minor requires an application to the Department of Business Administration and admission to one of the MS programs in the College of Business or a graduate program in a related discipline.

Graduate Minor in Supply Chain Management

The minor in Supply Chain Management is designed to develop leaders who understand (1) how to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends; and (2) how to coordinate and integrate supply chain solutions across various intra-organizational and inter-organizational interfaces in any business or organization. The minor or concentration not only will provide a strong foundation in supply chain management principles and practices, but also can be tailored to fit the specific needs of students interested in careers across a wide variety of industries. This minor or concentration requires submission of twelve graduate hours of Supply Chain Management coursework. Successful completion of the minor or concentration assumes certain knowledge of business and prior coursework.

Admission to the minor or concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of these programs:

- Master of Science in Technology Management
- Master of Science in Business Administration
- Master of Business Administration
- Master of Science in Accountancy
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

Master of Science in Business Administration

The Master of Science in Business Administration is a 40 graduate hours master's program best suited for those with a strong technical expertise in one of the concentrations offered within the Ph.D. program. The focus is on preparation for advanced study in the doctoral program or for a research-oriented position. The coursework can usually be completed in four semesters. A major must be specified from one of six areas offered within the Department of Business Administration: organizational behavior/theory, strategic management, marketing, decision sciences and information systems, and process management/management science. At least two courses should be chosen from another area within the Department of Business Administration or a related area outside the department or college.

Total Hours 40

Other Requirements
Other requirements may overlap

Minimum 500-level Hours Required 12

Overall:

Minimum GPA: 2.75

1 For additional details and requirements refer to the department's Program Curriculum (http://business.illinois.edu/msba/academics) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Master of Science in Strategic Brand Communication

Jacquie Hitchon, Head, Department of Advertising
Aric Rindfleisch, Head, Department of Business Administration
This Master of Science in Strategic Brand Communication (MS SBC) degree is an online program jointly sponsored by the Charles H. Sandage Department of Advertising in the College of Media and the Department of Business Administration in the College of Business. The degree program will launch in January 2017 and graduates from this program receive the MS SBC degree awarded by the Graduate College. Strategic Brand Communication (SBC) is a data-driven, purposeful conversation with a brand’s stakeholders. SBC combines traditional advertising practices with contemporary business thinking that pertains to delivering consistent, meaningful messages to consumers. In so doing, SBC seeks to integrate multiple consumer contact points that occur through the purchase of commercial messages in paid, earned, and owned media to deliver persuasive and impactful statements about brands and companies.

This management process integrates all aspects of marketing communications such as advertising, public relations, personal selling, social media, sales promotion, and direct marketing. Such integration impacts a firm’s business-to-business, marketing channel, customer-focused, and internally directed communications.

The MS SBC degree program is designed for current working professionals with at least two years full-time experience in their field. The proposed program is designed to be completed in 15 months. The curriculum will prepare students to: be strategic leaders in an ever-changing global media environment; be analytic and integrative thinkers; be effective brand communicators and managers; respond agilely to new technologies, emerging media, new demographics, and market trends; be team-oriented in their approach to management and communications; and be prepared to continue to learn as the media environment evolves.

To be admitted into this program, applicants must have at least two years of full-time work experience. All applicants are expected to have a minimum grade point average of at least 3.0 (A = 4.00) for the last two years of undergraduate study and a 3.0 for any previous graduate work completed. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of at least 102 (iBT), 253 (CBT), or 610 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 6.5 overall and 6.0 in all subsections. Prerequisite: course in Statistics or Calculus from an accredited institution. The admissions criteria will be based upon an evaluation of each applicant’s work experience, GPA, English aptitude, and letters of recommendation.

A minimum GPA of 2.75 is required for continued enrollment.

Graduate Degree Programs
The College of Business offers a degree program leading to the Master of Business Administration (M.B.A.) in four delivery modes. The traditional full-time MBA and the part-time, evening MBA are offered on the Urbana campus. The Executive MBA is offered weekends in downtown Chicago, and the online edition is offered for students who need more flexibility in their MBA program.

The Executive MBA (EMBA) program is offered in a lockstep, face-to-face cohort program comprised of eighteen courses covering all major disciplines of business study. The courses are organized into ten modules with only two courses running at any moment in time, each lasting about four weekends. This focused format, using four days per month (Friday and Saturday) maximizes learning while minimizing disruption to professional and personal commitments.

The online MBA (iMBA) uses a flexible program format. As with the EMBA program, the iMBA consists of eighteen four-credit courses for a total of 72 credit hours. During each course, virtual study teams are created that are designed to draw upon the diverse academic and professional backgrounds of the class. The online MBA caters to a segment of the population that values mobility, convenience, and believes that the online programs better fit their learning styles and life circumstances.

Admission
The Executive MBA begins a new class cohort each October in Chicago. Admissions decisions are made on a rolling basis beginning in January. Candidates must have a minimum of seven years of full-time, professional work experience to be considered for the program. All applicants are expected to be employed full-time while pursuing the degree. The Executive MBA application does not require the GMAT or GRE.

Applicants to the Illinois iMBA program must have completed an earned undergraduate degree. Applicants must submit scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) if available, two letters of recommendation, and essays. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOFEL) or the IELTS.

Scholarships/Financial Aid
The Illinois Executive MBA offers a limited number of scholarships to outstanding applicants. Scholarships are awarded at the time of admission. U.S. citizens and permanent residents may be eligible for federal and private student loans. The program also offers a monthly payment plan which can extend payments beyond your final semester thus lowering your average monthly payment.

Scholarships are generally not available for the iMBA.

Executive MBA (EMBA)
The program culminates with an international study experience in which students consult on real business issues with international organizations and travel overseas to present their recommendations to these companies.

This program caters to senior executives. Each course in the EMBA program is conducted over four weekends. Since the class schedule is compressed over a short period of time, exams / final projects / final assignments are due two weeks after the last class meeting.

iMBA (online)
The goal for the iMBA program at Illinois is to deliver a high-quality program that is accessible to global audiences. A mirror of the EMBA curriculum, the online MBA (iMBA) uses a flexible program format. During each iMBA course, virtual study teams are created that are designed to draw upon the diverse academic and professional backgrounds of the class. The program caters to a segment of the population that values mobility, convenience, and believes that the online programs better fit their learning styles and life circumstances.

Applicants to the online MBA (iMBA) program must have completed an earned undergraduate degree and submit scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) if available. Two letters of recommendation and essays are also required. Applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOFEL) or the IELTS.

Financial Aid
The Illinois MBA offers a limited number of merit scholarships to outstanding domestic and international applicants. The merit scholarships are awarded at the time of admission. U.S. citizens and permanent residents may be eligible for federal and private student loans.

- Master of Business Administration (MBA), Full-time option (p. 355)
- Master of Business Administration (MBA), Professional option (p. 356)
- Master of Business Administration (MBA), EMBA option and iMBA option (p. 352)

M.B.A. and Master’s or Ph.D.
The M.B.A. can be earned jointly with any masters or Ph.D. program offered on campus. All joint degree programs require the completion of 60 credit hours of MBA coursework, as well as the requirements of the other program, as described here (p. 355). For admission to a joint program, students must receive approval from both programs.

M.B.A. and Master of Architecture in Architecture
For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

Candidates entering the Master of Architecture/Master of Business Administration joint degree program with a four-year baccalaureate in architectural studies must complete 110 hours of graduate work, 50 hours in Architecture and 60 hours for the M.B.A.

M.B.A and Master of Human Resources and Industrial Relations
This joint program with the Master of Human Resources and Industrial Relations (p. 456) program is usually completed in two-and-one-half years. Independent admission decisions are made by each unit, and the student must be accepted by both. The degrees are awarded simultaneously upon completion of all joint degree requirements.

M.B.A. and J.D. in Law
Contact the M.B.A. program for more information about the joint program with Law.

M.B.A. and M.D. in Medicine
Contact the M.B.A. program for more information about the joint program with Medicine.

M.B.A. and Masters or Ph.D.
Joint M.B.A. Program
The M.B.A. can be earned jointly with any masters or Ph.D. program offered on campus. All joint degree programs require the completion of 60 credit hours of MBA coursework, described below, as well as the requirements of the other program. For admission to a joint program, students must receive approval from both programs.

Cell and Developmental Biology

http://mcb.illinois.edu/departments/cdb/

Head of the Department: Jie Chen
B107 Chemical and Life Sciences Laboratory
601 South Goodwin Avenue
Urbana, IL 61801
(217) 333-6118
E-mail: mcbinfo@life.uiuc.edu (biochadm@scs.uiuc.edu)

Major: Cell and Developmental Biology
Degrees Offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Cell and Developmental Biology and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)

Graduate Degree Program

The graduate curriculum in Cell and Developmental Biology is designed to educate students for careers in research and teaching in the biological sciences. Departmental faculty are concerned with the structural and functional relationships of cells and organisms, with research emphases upon eukaryotic cell and molecular biology, neurobiology, developmental biology, and molecular genetics. The department has embarked on a major program to develop research strengths in molecular aspects of developmental, neural, structural, and eukaryotic cell biology to complement existing faculty interests. Students are not admitted to the M.S. program; M.S. requirements are completed as part of the Ph.D. program.

Admission

Students interested in this program must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program/department at that time.

Important factors in the evaluation of applications are general academic performance, background in the biological and chemical sciences and mathematics, Graduate Record Examination (GRE) scores, and letters

Information listed in this catalog is current as of 04/2016
of recommendation from college professors. The department does not admit students to the M.S. program.

**Medical Scholars Program**

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Cell and Developmental Biology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

**Graduate Teaching Experience**

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

**Facilities and Resources**

Facilities include modern, well-equipped laboratories for cellular, developmental, genetic, molecular, and structural studies. The University offers exceptional and broadly based research support services. These include the Center for Electron Microscopy, with state-of-the-art instrumentation; the Center for Biotechnology, which includes facilities for molecular cloning, DNA and protein synthesis and sequencing, and transgenic animals; the Cell Science Center, which houses and staffs a hybridoma facility and flow cytometry unit; School of Molecular and Cellular Biology-subsidized shops; and a superb university library system, the third largest in the nation. The University offers outstanding computer services and is home to the National Center for Supercomputing Applications. The Beckman Institute for Advanced Science and Technology combines research in the physical and biological sciences. Opportunities for interaction in the cellular and molecular sciences are also available in many other units within the Schools of Molecular and Cellular Biology, Integrative Biology, and Chemical Sciences and the Colleges of Medicine, Agricultural, Consumer and Environmental Sciences, and Engineering.

**Financial Aid**

Financial aid is available to qualified applicants in the form of university fellowships (awarded on a competitive basis), teaching assistantships (awarded by the department), research assistantships, and tuition and fee waivers. Outstanding applicants are nominated for support from the Cell and Molecular Biology, Molecular Biophysics.

Approved elective coursework hours to bring total course work hours to 32

Total Hours: 32

**Other Requirements**

Other requirements may overlap

Completion of one of the following:

- Pass the Preliminary Exam, or approval of the graduate program committee (chaired by a tenured CDB faculty member and comprised of at least 5 CDB faculty members),
- or by approval of the research advisor and department head.

Minimum GPA: 2.75

1 For additional details and requirements refer to the department’s Graduate Student Handbook [http://mcb.illinois.edu/departments/cdb/gradcurrent.html](http://mcb.illinois.edu/departments/cdb/gradcurrent.html) and the Graduate College Handbook [http://www.grad.illinois.edu/gradhandbook](http://www.grad.illinois.edu/gradhandbook).

**Information listed in this catalog is current as of 04/2016**
Chemical Physics

http://www.chemistry.illinois.edu

Head of the Department of Chemistry: Gregory S. Girolami
Head of the Department of Physics: Dale Van Harlingen

Students with undergraduate degrees in chemistry should direct inquiries and applications to the Department of Chemistry
106 Noyes Laboratory
505 South Mathews Avenue, Urbana, IL 61801.

Students with undergraduate degrees in physics should direct inquiries and applications to the Graduate Advising Office, Department of Physics
227 Loomis Laboratory of Physics
1110 West Green Street, Urbana, IL 61801-3080

Major: Chemical Physics
Degree Offered: Ph.D.

Graduate Degree Programs

A chemical physics program leading to the Doctor of Philosophy makes it possible for students to gain the necessary background and perform original research in this interdisciplinary field of science. Fundamental research on many properties of molecular and solid-state systems is based on an understanding of chemistry, physics, and mathematics that can best be obtained by training in more than one department. Students may use the facilities in both the School of Chemical Sciences and the Department of Physics.

Admission

Applicants who have fulfilled the usual undergraduate course requirements, including at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), may be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, applicants must submit results from the Graduate Record Examination general test and the Graduate Record Examination chemistry subject test.

International students whose native language is not English are required to have a minimum paper-based TOEFL score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the Chemistry graduate program and there are special requirements for applicants whose native language is not English. The University requires a minimum TOEFL iBT speaking score of 24 for a contact teaching assistant appointment. Any applicant whose native language is not English is expected to provide TOEFL scores in order to receive full consideration for admission and financial aid.

Please contact chemistry graduate admissions for further information.

Financial Aid

Students may apply for fellowships and assistantships from either the Department of Chemistry or the Department of Physics.

Doctor of Philosophy in Chemical Physics

Students entering through the Department of Chemistry must satisfy the registration examination, literature seminar, preliminary examination, and original research proposal requirements of Physical Chemistry. The guidelines for these requirements are in the Department of Chemistry Graduate Manual. Students entering through the Department of Physics must satisfy the PhD requirements of the Department of Physics. Research for the thesis is performed under the direction of faculty members who are currently active in chemical physics. Many of these staff members are affiliated with the Materials Research Laboratory (MRL). MRL is a multidisciplinary facility shared by staff and students from the Departments of Physics, Chemistry, Materials Science and Engineering, Electrical and Computer Engineering, and other related departments that have common interests in materials science.

Entering with approved M.S./M.A. degree

E-mail: ChBE-GradRecruiting@Illinois.edu

Major: Chemical Engineering

Degrees Offered: M.S., Ph.D.

Major: Bioinformatics

Degree Offered: M.S.

Graduate Concentration: Chemical and Biomolecular Engineering

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Chemical Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.uiuc.edu/mdphd)

Graduate Degree Programs

The Department of Chemical and Biomolecular Engineering offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. Those interested should write to the address above for application materials and a departmental brochure, which gives greater detail on programs, offerings, admission, degree requirements, and financial aid. Opportunity also exists for specializing in computational science and engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/students/why-cse).

Admission

Candidates for advanced degrees in chemical engineering should have a background in chemistry and chemical engineering comparable to the training offered in the undergraduate chemical engineering curriculum at the University of Illinois at Urbana-Champaign. Students whose prior training is deficient in one or more basic areas of chemistry or chemical engineering will be admitted with the understanding that their deficiencies will be removed to the extent prescribed by their advisers. Graduate College admission requirements also apply. In addition, applicants must submit results from the Graduate Record Examination (GRE) general test.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 610 (257 on the computer-based test). In addition, teaching is a requirement in the chemical engineering graduate program and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50 for a contact teaching assistant appointment. It is desirable for applicants whose native language is not English to provide TSE scores in order to receive full consideration for admission and financial aid.

Multi-institutional Ph.D. Degree with National University of Singapore

Students in this program will spend approximately equal proportions of their study at the Urban-Champaign campus and at the National University of Singapore (NUS), taking courses and/or working on their research. The project comprising the research component of the Ph.D. will be cooperatively overseen by faculty at Illinois and NUS. Students pursuing the multi-institutional degree must meet all of the requirements of the existing Ph.D. programs at each of the two institutions. Courses taken at each university must be approved by the other university before they are taken in order to be credited toward degree requirements.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Chemical Engineering. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Faculty Research Interests

Opportunity also exists for specializing in
program leading to the Doctor of Philosophy in Chemical Physics (see
The degrees offered in chemistry are the Master of Science in Chemistry, Master of Science in the Teaching of Chemistry, and Doctor of Philosophy in Chemistry. This catalog also provides information on a joint program leading to the Doctor of Philosophy in Chemical Physics (see Chemical Physics (p. 358)). Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (http://www.cse.illinois.edu).

Graduate Degree Programs

Graduate College requirements apply. Further, applicants should have at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), to be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, we ask applicants to submit results from the Graduate Record Examination (GRE) General Test and the GRE Chemistry Subject Test.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the chemistry graduate program, and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50. Any applicant whose native language is not English is expected to provide TSE scores in order to receive full consideration for admission and financial aid.

Students who are currently enrolled in graduate programs at other institutions are advised that they should first complete degree work at their current institution before they will be considered for admission to the chemistry PhD program at the University of Illinois. In addition, we require a statement from the applicant and a letter from the applicant's research adviser or department head detailing the situation. Students might be admitted without a degree from their current institution under exceptional circumstances that will need to be described in detail via a letter from the applicant and a separate statement from the department head of the student's current graduate program.

Contact chemistry graduate admissions for further information. The department does not currently accept applications for the MA program.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Chemistry. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

• Master of Science in Chemistry (p. 363)
• Master of Science in Teaching of Chemistry (p. 363)
Doctor of Philosophy in Chemistry

Doctoral programs are offered in a wide range of specialties, including the traditional areas of analytical, inorganic, organic, and physical chemistry as well as materials chemistry and chemical biology. The formal course requirements involve 12 or more hours of 500-level courses, plus 8 or fewer hours of 400-level courses, for a total of 20 hours in chemistry and allied relevant fields. Besides completing formal coursework, students will present a literature seminar, have a formal review of progress following the completion of coursework, pass an oral preliminary examination on research preparation, present and defend an original research proposal not related to their thesis research, and submit a thesis on original research, which is defended at a final oral examination.

Entering with M.S./M.A. degree

J.D. in Law and M.S. in Chemistry

This joint degree program is intended principally for law students who desire to specialize in an area of law in which expertise in chemistry would be a clear asset. Students electing the joint degree option will select a major area of emphasis within chemistry that complements their chosen area of legal emphasis. Each student must develop and gain approval of a coherent, focused plan of study that draws upon related coursework in both law and chemistry.

The JD/MS program involves interdisciplinary work and a flexible plan of study. Students will consult with a faculty adviser in selecting courses. While enrolled in the Department of Chemistry, students have the opportunity to hold an assistantship with a tuition and service fee waiver. It is possible that joint degree students may accelerate their programs by attending summer sessions over one or more summers and thus complete the requirements for both the MS and the JD degrees in three years.

In order to enter the joint program, students must be admitted separately to both departments. Each program’s application requirements and deadlines for admission must be met.

Master of Science in Teaching of Chemistry

The Master of Science in the Teaching of Chemistry (MSTC) at the University of Illinois provides advanced studies for those interested in teaching chemistry at the secondary or community college level. The program serves two different audiences:

- Those who already have a teaching certificate or will teach in situations which do not require a certificate;
- Those who wish to obtain a master’s degree and a teaching certificate simultaneously.

The MSTC degree (without certification) can be completed in one year. The MSTC degree (with certification) requires two years.

Graduate hours in education 8
Graduate hours in chemistry 16
Graduate electives in either education or physical science 8
Total Hours 32

Other Requirements

Fax (217) 333-9464
Email: civil@illinois.edu

Major: Civil Engineering
Degrees Offered: M.S., Ph.D.

Major: Environmental Engineering in Civil Engineering
Degrees Offered: M.S., Ph.D.

Online Program: Civil Engineering
Degrees offered: M.S.

Joint Degree Program: the M.S. in Civil Engineering can be earned jointly with the following Degrees Offered:
M.Arch. in Architecture (p. 326) (Construction Management or Structures),
M.B.A. in Business Administration (p. 355)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Civil Engineering or Environmental Engineering in Civil Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master’s and doctoral degrees. These are in a variety of specialized areas through departmental and joint programs which are described on this page. Opportunity also exists for earning certificates in

1. computational science and engineering and
2. energy and sustainability engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-
The Medical Scholars Program (https://www.med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Civil and Environmental Engineering. In working toward the department's graduate degrees, an emphasis is placed on advanced study and participation in creative research.

Admission

Admission to the Graduate College with full status in civil engineering or in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the bachelor’s degree are substantially equivalent to those of the University of Illinois, provided the applicant’s preparation is appropriate for advanced study in his or her chosen major field and his or her scholastic average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (http://www.ets.org.portal/site/ets/menuitem.fab2360b16451de9b3a0779f1751509/?vgnnextoid=b195e3b56f44a010VgnVCM10000022f95190RCRD) is required. Applications are considered for both spring and fall admissions. In general, a 3.00 grade point average for the last two years of the undergraduate program and for any previous graduate work is a minimum requirement for admission to the M.S. program. Requirements for admission to the Ph.D. program are variable, but are usually substantially higher. For additional information, see the departmental Web site (http://cee.illinois.edu/programs/Grad/GradApps).

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 79 (iBT), 213 (CBT), or 550 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Applicants to the joint M.Arch or M.B.A degree programs must meet the admissions standards for both programs and be accepted by both programs.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Civil and Environmental Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Civil and Environmental Engineering graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, 217-333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (https://www.med.illinois.edu/mdphd) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the graduate degree.

Faculty Research Interests

Areas of study and research pursued by our world-renowned faculty are focused in the following specializations:

- construction management
- environmental engineering and science
- environmental hydrology and hydraulic engineering
- geotechnical engineering
- information technology
- materials
- structural engineering
- transportation engineering
- sustainable and resilient infrastructure systems
- energy-water-environment sustainability
- societal risk management

Within these specializations, current research programs include:

- air quality
- aquatic biology and ecology;
- computer-aided engineering systems (artificial intelligence, expert systems, and neural networks)
- construction engineering and management
- construction materials (concrete composition, microstructure, and engineering properties)
- earthquake engineering
- environmental chemistry
- environmental fluid mechanics
- geotechnical engineering (rock mechanics, soil mechanics, and foundation engineering)
- hazardous-waste management
- hydrology and hydraulic engineering
- information technology including distributed sensors and monitoring
- nondestructive diagnostics
- railway engineering
- river mechanics and morphology, stochastic structural dynamics and random vibrations
- structures (analysis, design, and behavior)
- structural and computational mechanics
- traffic engineering
- transportation (facilities, planning, systems design, and operations)
- water quality process engineering
- water resources and environmental systems analysis

Centers, Programs, and Institutes

Mid-America Earthquake (MAE) Center (http://mae.cee.illinois.edu) – originally established by the National Science Foundation, works to develop an integrated framework and application tools for loss assessment due to earthquake and other disruptive events, disaster planning, response and mitigation strategies, and decision-making engines that enable policy makers to effectively manage risk.
Illinois Center for Transportation (ICT) (http://ict.uiuc.edu) – funded by the Illinois Department of Transportation and the State of Illinois, promotes innovation and progress in transportation through interdisciplinary research.

Center of Excellence for Airport Technology (CEAT) (http://ceat.illinois.edu) – founded in 1995 as a Federal Aviation Administration (FAA) Center of Excellence, aims to develop new scientific knowledge and technology for the development, maintenance, and operation of airports.

Fabricated Geomembrane Institute (http://www.fabricatedgeomembrane.com) – conducts research and disseminates technical information about geomembranes that can be factory fabricated, transported to a project, and deployed, e.g., polypropylene, PVC, LDPE, and EPDM geomembranes, and answers technical questions regarding testing, design, fabrication, installation, and performance of these geomembranes.

Safe Global Water Institute (http://cee.illinois.edu/SGWI_established) – founded in 2012 with the goal of seeking sustainable solutions to the world’s safe water and sanitation challenges.

Facilities and Resources

The Newmark Structural Engineering Laboratory (NSEL) features a nearly 6,000 square foot structural testing floor (strong floor), a three-story clear height, and a multiplicity of testing equipment (including a shake table, stand-alone universal testing machines, reaction frames, actuators, controllers, transducers, and a data acquisition) that can be used for conducting large-scale experimental structural, materials, and earthquake engineering research. The Environmental Engineering and Science Laboratories contain over 11,000 square feet with state-of-the-art analytical equipment. The Hydrosystems Laboratory covers an area of more than 11,000 square feet and includes several flumes, a rainfall generator, a stratified flow tank, and a water tunnel. The Advanced Transportation Research and Engineering Laboratory (ATREL) is a unique and comprehensive transportation research, educational, and testing laboratory. It is located on 47 acres, 15 miles north of the main campus, and it contains 60,000 square feet of laboratories, continuing education classrooms, office space, and a technical library. It is home to the Illinois Center for Transportation (ICT). The Multi-Axial Full-Scale Sub-Structured Testing and Simulation (MUST-SIM) Facility is one of 15 networked national facilities conducting research that will lead to significant advances in seismic design and analysis. It provides a new experimental environment for conducting integrated distributed hybrid tests on components of large bridge and building structures. The Smart Structures Technology Laboratory seeks to implement advanced sensing and control technologies to more effectively monitor and protect our nation’s civil infrastructure. The Laboratory houses a new medium-scale 6 Degree-of-Freedom seismic simulator, as well as extensive instrumentation and telepresence capabilities. The Research & Innovation Laboratory (RAIL), located on the Construction Engineering Research Laboratory campus, supports the Rail Transportation and Engineering Center. This laboratory is dedicated to improving performance and design of railway infrastructure.

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 40P is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for resident credit for the degree.

The minimum program GPA is 2.75.

For additional details and requirements refer to the department’s Graduate Handbook and the Graduate College Handbook.

Doctor of Philosophy, all majors

The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master’s degree.

The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

CEE 599 Thesis Research (min-max applied toward degree) 32

Elective courses (subject to Other Requirements and Conditions below) 32

Total Hours 64

Other Requirements

Other Requirements and Conditions may overlap

A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement; approval required.

There is no department-wide foreign language requirement. However, the faculties of some areas of specialization may require foreign language proficiency if essential to the conduct of research in that area.

64 graduate hours must be completed in residence.

A Masters degree is required for admission to the Ph.D. program.

Ph.D. exam and dissertation requirements:
Qualifying exam
Preliminary exam
Final exam or dissertation defense
Dissertation deposit

The minimum program GPA is 2.75.

1 For additional details and requirements refer to the department’s Graduate Handbook and the Graduate College Handbook.

Joint Degree Programs

Master of Science in Civil Engineering and Master of Architecture

The M.Arch.-M.S.C.E. joint degree program with the School of Architecture requires a total of 78 graduate hours (Architecture Track II), 70 graduate hours (Architecture Track III), or 64 graduate hours (Architecture Track I). Full details of requirements are presented at the School of Architecture’s Web site; the thesis option is not available.

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 355) and contact the M.B.A. program and their major department office for more information.

Online Program

The degree requirements are the same as for the on-campus non-thesis M.S. program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The M.S. degree in Civil Engineering offered online is currently available for specialization in Construction Management, Infrastructure, Structural Engineering, and Transportation Engineering. Students can also develop cross-disciplinary programs in consultation with their advisers. Additional courses are available online in the following areas of concentration to complement the student’s area of specialty above: Construction Materials, Environmental Engineering and Science, Environmental Hydrology and Hydraulic Engineering, and Geotechnical Engineering.

Classics

http://www.classics.illinois.edu

Head of the Department: Ariana Traill
Director of Graduate Studies: Craig Williams
4080 Foreign Languages Building
707 South Mathews Avenue
Urbana, IL 61801
(217) 333-1008

Information listed in this catalog is current as of 04/2016
E-mail: classics@illinois.edu

Major: Classics
Degrees offered: M.A.
Graduate Concentrations: Greek (p. 369), Latin (p. 369), Medieval Studies (p. 486)

Major: Teaching of Latin
Degrees offered: M.A.

Major: Classical Philology
Degrees offered: Ph.D.
Graduate Concentration: Medieval Studies

Graduate Degree Programs
The Department of the Classics offers programs of study leading to the Master of Arts in Classics. Within the master's degree program, students may choose from three options: both Greek and Latin (= Classics), Greek, or Latin. In addition, the department offers the Master of Arts in the Teaching of Latin and the Doctor of Philosophy in Classical Philology. A further concentration in Medieval Studies is available to students pursuing graduate degrees in the Classics.

Although the graduate program is designed to provide a thorough education in classical studies in the widest sense, students may concentrate at different stages upon Greek and Latin language and literature (including papyrology, paleography, gender studies, and medieval and renaissance Greek and Latin authors); classical archaeology; ancient philosophy or, in conjunction with the appropriate department, comparative literature, ancient history, and classical linguistics. Additional information is available at: www.classics.illinois.edu (http://www.classics.illinois.edu).

Admission
Applicants for admission to the master's program in the classics curriculum must ordinarily present a minimum of 20 semester hours in either Greek or Latin and 15 semester hours in the other language; candidates for admission to the master's program with specialization in Greek or Latin or the teaching of Latin must ordinarily present at least 20 semester hours in that language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online (www.grad.illinois.edu/admissions/apply (http://www.grad.illinois.edu/admissions/apply)) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant’s ability to work in the original classical languages and incorporates relevant secondary sources as appropriate. Original transcripts showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Certifications
Students wishing to add teacher certification in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the Foreign Language Teacher Education Program and consult its Director, Hugh Bishop (hbishop@illinois.edu) about requirements.

Students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin or an M.A. in the Teaching of Latin in order to receive certification.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Classical Philology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Faculty Research Interests
Greek and Latin literature of all periods, Greek and Roman epic, Greek and Roman tragedy, Greek and Roman comedy, Greek and Latin epigraphy, ancient philosophy (Epicureanism, Hellenistic moral theory), Greek political theory, Greek and Roman religion, Roman historiography and biography, gender studies of the Greco-Roman world, ancient Greek music theory, Greek mythology, Medieval Greek and Latin philology, the ancient world in film, the reception of Greek and Latin literature history of classical scholarship, Greek and Roman archaeology. For details see www.classics.illinois.edu/people/ (http://www.classics.illinois.edu/people).

Facilities and Resources
The superb Classics Library (see www.library.illinois.edu/clx/ (http://www.library.illinois.edu/clx)) at the University of Illinois houses over 60,000 volumes on open shelves and boasts two specialist librarians. The University of Illinois Library's Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic Archive of Papyri. The Department of the Classics also publishes the journal Illinois Classical Studies and its Supplements. The Krannert Art Museum and the Spurlock Museum of
World Cultures have outstanding collections of ancient vases and other artifacts.

Financial Aid

University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

The Master of Arts may be taken in Classics requiring advanced work in both Greek and Latin (Master of Arts in Classics), or with a concentration in either Greek, or a concentration in Latin. Only the Master of Arts in Classics leads to Ph.D. level work in Classical Philology. The master's degrees with concentrations in Latin or Greek and likewise the Master of Arts in the Teaching of Latin are all terminal degrees.

- Master of Arts in Classics (p. 368)
- Master of Arts in Classics, Greek Concentration (p. 369)
- Master of Arts in Classics, Latin Concentration (p. 369)
- Master of Arts in Teaching of Latin (p. 369)

Doctor of Philosophy in Classical Philology

The Doctor of Philosophy is offered only in classical philology, which requires advanced work in both Greek and Latin. Candidates for the Ph.D. program are eligible for acceptance upon completion of the master's degree in classics or its equivalent. Once admitted, they must complete at least 64 additional graduate hours of coursework. Admission to Stage III requires passing examinations in Greek and Latin sight-translation, the history of Greek and Latin literature, and a special author, as well as the preliminary oral examination.

CLCV 550 Intro to Teaching of Classics (if not taken previously) 0 or 4
24 hours of Greek and Latin, with at least eight hours in each language and at least twenty at the 500 level, including:

GRK 595 Intro to Classical Studies (if not taken previously) or LAT 595 Intro to Classical Studies

GRK 511 Advanced Composition (if not taken previously) or LAT 511 Advanced Prose Composition

GRK 580 Greek Seminar

LAT 580 Latin Seminar

Elective 4-8

Language Requirement: Reading knowledge of two ancillary languages; German and either French or Italian. Knowledge of one of these languages must be demonstrated at the time of admission to Stage II and the second before the start of the second year at Stage II.

GRK/LAT 599 Thesis Research 12-32

Total Hours 64

Other Requirements

Other requirements may overlap

A concentration is not required.

Satisfactory examinations in Greek and Latin

Minimum 500-level Hours Required 12 (excluding 500-501)

College of Engineering

http://engineering.illinois.edu

William Buttlar
Associate Dean for Graduate, Professional, and Online Programs

Information listed in this catalog is current as of 04/2016
Graduate Degree Programs

The College of Engineering offers a Master of Engineering (M.Eng.) degree program for students whose primary intent is a professional career in industry or government. This degree differs from the Master of Science (M.S.) degree in that it is a terminal degree and not a pathway to a doctoral program. The Major in Engineering for the M.Eng. degree requires the selection of an interdisciplinary concentration.

Admission

Students with bachelor's or master's degrees in engineering or related sciences will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the spring semester, but most admissions are for the fall semester. Full details of admission requirements are on the Web page of the department offering the concentration. Currently a Concentration in Energy Systems is administered by the department of Nuclear, Plasma and Radiological Engineering.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. Full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to M.Eng. are above the minimum scores demonstrating an acceptable level of English language proficiency.

Available Concentrations

Energy Systems (p. 507), Department of Nuclear, Plasma, and Radiological Engineering (p. 505).

Master of Engineering in Engineering, must include a Concentration

Professional Development (an internship with a company, laboratory, or agency with a subsequent archiveable report; a design project; or business-oriented or leadership courses)

<table>

Information listed in this catalog is current as of 04/2016
(TOEFL) examination as part of their applications. The department follows the Graduate College’s recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department’s Web site (http://www.communication.illinois.edu/prospective/grad/apply). Ordinarily, students are admitted to begin graduate study in the fall semester.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Communication. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid
Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

• Master of Arts in Communication (p. 371)
• Master of Science in Health Communication (p. 372)

Doctor of Philosophy in Communication
To be accepted as a candidate for the Ph.D. degree, a student must either present a well-rounded undergraduate education with an emphasis in communication and a master's in a cognate discipline, or hold a master's degree in communication from an accredited institution.

In addition to meeting general requirements of the Graduate College, the student must satisfactorily complete written and oral preliminary examinations, an oral defense of the thesis prospectus, and an oral defense of the thesis. Students must demonstrate competency in research procedures and tools that may include proficiency in one or more foreign languages, various research methods, or cognate academic work. Students must enroll in CMN 595 in the semester of the preliminary examination and in CMN 599 (thesis hours) in semesters spent working on the dissertation.

Minimum in appropriate research method; these are in addition to the 40 hours of additional coursework. (8 min)

Online Program in Health Communication
The Department of Communication also offers an online Master of Science degree (M.S.) in Health Communication. The required hours are listed in Master of Science in Health Communication (p. 372). Apply to the Master of Science program only; applications to the online Master of Arts in Communication are not being accepted. More information about the online program is available at www.hcom.illinois.edu (http://www.hcom.illinois.edu).

Master of Arts in Communication
The entering student should present the equivalent of 16 semester hours of undergraduate work in communication or a related area. In some cases an oral examination is also stipulated. A thesis is optional.

Major: Public Health
Degrees offered: M.P.H.

Information listed in this catalog is current as of 04/2016

Graduate Degree Programs

The Community Health Program in the Department of Kinesiology & Community Health offers programs of study leading to the Master of Science in Community Health, Master of Science in Rehabilitation, Master of Public Health (M.P.H.), and Doctor of Philosophy in Community Health degrees.

The Chronic Disease, Disability, and Society specialization prepares graduates for advanced research or as health specialists who are well versed in social determinants of health. Graduates from this specialization will have a strong foundation related to health disparities, chronic disease and disability. The specialization in Epidemiology prepares students for the analysis of disease occurrences and problems in populations and instruction in the various methodologies, statistical techniques and designs for obtaining such understanding. The Global Health specialization focuses on international health from an interdisciplinary perspective. Students in this concentration may take courses that provide a broad view of global health contexts from various departments across campus. Finally, the specialization in Health Policy and Administration prepares students for the examination of management principles related to health care institutions and in procedures and methods for the analysis of health policy development, implementation and evaluation.

The M.S. in Community Health has specializations in Chronic Disease, Disability, and Society; Epidemiology; Global Health; and Health Policy and Administration. The M.S.P.H. program is not currently accepting applications, and individuals interested in pursuing a Master’s degree in public health are encouraged to apply to the M.P.H. degree program. The M.P.H. degree is a professionally focused degree designed to prepare students for a career in public health practice. The M.P.H. degree offers a specialization in health policy and management and an area of concentration in health behavior and promotion. The Ph.D. program is designed to prepare graduates for positions of leadership in teaching, research, and service in universities, industries, and private and government agencies in the United States and in other countries.

Admission

Applications for all degrees except the Master of Public Health (MPH) are due on January 15 for fall admission. Applications for spring semester are due October 1. Applications for the Master of Public Health (MPH) degree are only accepted for Fall admission until April 1.

The Graduate College admission requirements apply for all applicants. Candidates for admission to master’s degree programs should have
a grade point average of at least 3.0 (A = 4.0) for the last 60 semester hours of their undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses). In addition, satisfactory scores on the Graduate Record Examination (GRE) are required. Applicants should have a bachelor’s degree in a health or disability-related discipline and/or a strong background in social and biological sciences and quantitative methods. A statement of education and career goals, and three letters of recommendation are required. All degree programs with the exception of the Master of Public Health (MPH) require one example of professional writing with the date of its completion.

Admission requirements for the Ph.D. program include the following: a grade point average of at least 3.0 (A = 4.0) for the last 60 hours of undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses), a GPA of 3.6 for master’s degree work with thesis, and acceptable scores on the Graduate Record Examination. Candidates are encouraged to have a personal interview with the coordinator of graduate studies or other representative of the department. Preference is given to students who have had at least two years of professional experience.

Applicants for all degrees whose native language is not English, or who have not obtained a university degree from an institution in a country where the native language is English, are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Applicants submitting TOEFL scores must obtain a minimum score of 600 on the paper-based, 250 on the computer-based, or 100 on the internet based (iBT) Test of English as a Foreign Language (TOEFL). Applicants submitting IELTS scores must obtain a 6.5 on all subsections. Applicants whose native language is not English and who are seeking a teaching assistantship must provide evidence of spoken English language proficiency by meeting minimum score requirements specified by the University (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Community Health. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Faculty research interests cover a wide range of subjects, including global health, health education, community health development, health behavior, health policy, health planning and management, rehabilitation and disability studies, chronic disease, epidemiology, biostatistical and epidemiologic research methodology, health economics, evaluation research, and aging studies.

Financial Aid

Financial aid is available on a competitive basis to qualified students in the form of teaching and research assistantships, as well as tuition and service fee waivers.

- Master of Science in Community Health (p. 375)
- Master of Science in Rehabilitation (p. 376)
- Master of Science in Public Health (p. 375)
- Master of Public Health (p. 374)

Graduate course experience in public health and statistics with grades of B or better is expected prior to admission. Before admission to the Ph.D. program, students may be required to take up to 12 hours of additional coursework to remedy deficiencies. The candidate is required to pass written preliminary examinations covering disciplinary and professional aspects of community health, the literature and theoretical perspectives in the major area of study and methodological perspectives and research techniques. Students must also pass an oral preliminary examination on the area of specialization and dissertation proposal; and to pass an oral defense of dissertation research.

Master of Public Health

The MPH degree program requires a minimum of 48 hours. The program includes:

1. six required core courses in basic content areas of public health;
2. three required courses in the Health Behavior and Promotion concentration, as well as one additional concentration course from an approved list;
3. a practicum;
4. a capstone project; and
5. seminars and electives.

MPH students must complete all core coursework before enrolling in the MPH practicum. It is highly preferable for the practicum to occur during summer term. The capstone project must be completed in the last term of study. There is no thesis requirement. A pre-requisite for applying to the MPH program is a college level course in mathematics, statistics, biostatistics, or epidemiology. Applications for the Master of Public Health (MPH) are only accepted for Fall admission, and are accepted until April 1. The program generally takes 1.5 to 2 years to complete. University of Illinois undergraduate students who major in Kinesiology, Community Health, or I-Health are eligible to apply for a 5 year joint BS MPH degree program after their 3rd (junior) year of undergraduate study. Students in the BS MPH program begin some MPH coursework in their 4th (senior) year of undergraduate study, and take MPH coursework in a 5th year of study in fall, spring, and summer terms.

Master of Science in Community Health

http://kch.illinois.edu/

The specializations in Epidemiology and Health Policy & Administration require completion of 12 hours of core courses, which are intended to provide overall knowledge of the public health field and the tools necessary for successful functioning as a health specialist.

Students entering the Epidemiology specialization will be expected to have completed undergraduate coursework in data collection and processing, including issues of measurement and questionnaire design, computerization, descriptive health measures, and statistical analysis through regression. Courses must have been completed with grades of B or better. Deficiencies in these areas will require additional coursework, as necessary, for successful completion of the Master of Science degree.

The specialization in Health Policy and Administration generally takes two years, depending upon prior education and experience. Students entering the program are expected to have completed undergraduate coursework in economics, social sciences, and data collection and processing, which includes issues of measurement, questionnaire design, computerization, descriptive health measures, and statistical analysis through regression. Courses must have been completed with grades of B or better. Deficiencies in these areas will require additional coursework, as necessary, for successful completion of the degree.

Candidates for the M.S. in Rehabilitation may choose to complete the CORE accredited counseling program, for which a minimum of 48 hours must be completed. Students entering the program will be expected to have completed an undergraduate degree in a rehabilitation-related discipline and/or have a strong background in the social and biological sciences, and a course in introductory statistics. A full-time student can complete the program in three or four semesters. As with all programs, the Graduate College allows students to petition to transfer up to 12 hours of coursework completed prior to admittance to the department. Any approved graduate courses taken on campus in the summer immediately prior to admission count toward the degree and do not have to be transferred.

Major: Comparative Literature
Degrees Offered: M.A., Ph.D.

Graduate Minors, Certificates, and Concentrations: Medieval Studies (p. 486) (available to all degrees); Criticism and Interpretive Theory (http://criticism.english.illinois.edu/affiliation.htm#Cert) (available to all degrees); Gender and Women's Studies (p. 574) (available to all degrees); Cinema Studies (p. 573) (available to all degrees). For a full list, please see the Director of Graduate Study.

Graduate Degree Programs
The Program in Comparative & World Literature offers graduate programs leading to the degrees of Master of Arts and Doctor of Philosophy and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts.

Admission
A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee. All students are admitted at the MA level. Students entering with a recognized Masters degree from another university or from another department of this University have the option of taking the comparative literature and critical theory component and a literary component of this program's regular Master of Arts examination at the end of the first year as a qualifying test. For internal applicants to the Ph.D. curriculum, the Master of Arts will function as the qualifying test.

Applicants should apply online (www.grad.illinois.edu/admissions/apply/ (http://www.grad.illinois.edu/admissions/apply)), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services, 3070 Foreign Languages Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Financial Aid
A limited number of University fellowships and teaching assistantships, in cooperation with other departments, are available.

The Program aims to support as many graduate students as possible through teaching and other means, but support is always contingent on the student making timely progress to the degree. Such progress is measured by course load, taking exams on time, grades, and other factors.

Master of Arts in Comparative Literature
The candidate must demonstrate a competency in at least two foreign languages as well as in English. Latin is required for students specializing in European and/or American literatures before 1800. Competence in the languages offered is measured either by the successful completion of one advanced course in each of the languages chosen or by passing an examination administered by the program in comparative literature with the assistance of an expert in the language concerned. This choice is intended to provide for languages that may not be taught in regular departments.

The candidate must complete a minimum of 32 gh of credit, including two courses in the theory of literature (CWL 501 and CWL 502), and two seminars in comparative literature selected from CWL 551, CWL 561, CWL 571, and CWL 581. At least 12 of the other 16 gh should be taken in two or three national literatures in a distribution approved by the adviser. The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

CWL 501 Theory of Literature 8
CWL 502 Methods of Comparative Lit 8
Select two of the following: 8
CWL 551 Seminar Lit Movements
CWL 561 Seminar Genres - Forms
CWL 571 Seminar in Literary Relations
CWL 581 Seminar Lit Themes
One or two courses in the major literature 4-8
At least one course in the minor literature 4
One or two courses from the above categories. (A student may take one course in a non-literary field that will provide cultural and historical contexts for the study of the student’s literatures.) 4-8

Total Hours 32

Other Requirements
Other requirements may overlap
The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

Minimum 500-level Hours Required 20
Overall:

Information listed in this catalog is current as of 04/2016
Information listed in this catalog is current as of 04/2016

Doctor of Philosophy in Comparative Literature

A candidate for the Doctor of Philosophy degree must fulfill the general requirements of the Graduate College in addition to those specified for the master’s degree. At least 12 additional gh of work, normally at the 500 level, should be taken in courses regularly offered by the literature departments; among these, courses cross listed with the program in comparative literature are especially recommended. The candidate is responsible for a knowledge of the history of the literature in one modern language. The student also selects a period of major interest and is responsible for a knowledge of two other literatures in this period, which are considered as minors. The periods may be the Middle Ages, Renaissance, Neoclassicism and the Enlightenment, or the modern (nineteenth and twentieth centuries). Some chronological variations in coordinating the minors will be allowed for students studying non-Western literatures. A preliminary examination, i.e. a four-part written examination based on the individual program, and an oral examination with emphasis on the thesis project must be passed. The candidate must present an acceptable thesis embracing several national literatures and pass a final oral examination on the thesis.

CWL 582 Proseminar 4
Select three of the following:

CWL 551 Seminar Lit Movements 12
CWL 561 Seminar Genres - Forms
CWL 571 Seminar in Literary Relations
CWL 581 Seminar Lit Themes

Two courses in the major literature 8
One course in each of the minor literatures of specialization 8
Language Requirement: Command of at least three languages besides English. Three of these four languages must coincide with the student’s areas of specialization and with the dissertation field.

CWL 599 Thesis Research (min/max applied toward degree) 24-32

Total Hours 64

Other Requirements

Other requirements may overlap

Students must be enrolled in graduate seminars until the preliminary examinations are taken and passed.

Major: Computer Science
Degrees Offered: M.S., M.C.S., Ph.D.

Major: Bioinformatics
Degrees Offered: M.S.

Graduate Concentration: Computer Science

Online Program: Illinois Internet Computer Science (I2CS)
Degrees Offered: M.C.S. in Computer Science

Joint Degree Programs: the M.C.S. in Computer Science can be earned jointly with the following

Degrees Offered:
M.Arch. in Architecture
J.D. in Law

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Computer Science and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program. The department offers graduate work leading to a master's or doctoral degree, with an interdisciplinary master's degree program in bioinformatics. In addition, the department offers an online professional master's degree to reach students who are working full-time and unable to come to campus.

The Medical Scholars Program (https://www.med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Computer Science. Computer Science is not currently admitting to any joint master's programs at this time.

Application

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for graduate students entering a Computer Science graduate degree program is a bachelor's or master's degree in computer science or computer engineering. The Graduate Record Examination (GRE) (http://
www.ets.org) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science Ph.D. program must have a minimum grade point average (GPA) of 3.40 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. MS and MCS applicants must have a minimum GPA of 3.20. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department’s Prospective Graduate Student Information Web site (http://cs.illinois.edu/prospective-students/graduate-students). To apply, click here (http://www.grad.uiuc.edu/admissions/apply).

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 79 (IBT), 213 (CBT); or International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT) or 6.5 (IELTS). Limited status (http://www.grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Computer Science and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Computer Science graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, 217-333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (https://www.med.illinois.edu/mdphd) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent working on requirements of the Computer Science graduate degree.

Faculty Research Interests

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 9 research areas (http://cs.illinois.edu/research), 60+ faculty members (http://cs.illinois.edu/directory/faculty) conduct research with over 450 graduate students, and about 30 research staff members. They regularly collaborate with researchers across campus, in other departments or research units.

Facilities and Resources

The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (http://cs.illinois.edu/about-us/about-siebel-center), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to the College of Engineering (http://engineering.illinois.edu), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

Financial Aid

 Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships (the most common form of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Master of Computer Science and Master of Architecture

A total of 70 graduate hours of credit are required: 32 for the M.C.S. degree as prescribed above and 38 for the Master of Architecture (p. 326) degree. Course credit required for the individual degrees is mutually exclusive.

Master of Computer Science and Juris Doctor in Law

Specific graduate hours of credit for each degree are required: 32 hours for the M.C.S. as prescribed above and 90 for the Juris Doctor (p. 461). However, some credits used in each program may apply to the other, allowing students to earn both degrees in a shorter time. For the M.C.S. degree

1. at least 12 credit hours must be law course work relating to legal protections for intellectual property or in related business law fields and
2. at least 6 credit hours must be from approved law courses as determined by the College of Law.

For the J.D. degree, 12 credit hours may be computer science or other scientific course work leading to the M.C.S. degree.

Online Program

Master of Computer Science (I2CS M.C.S.)

The Illinois Internet Computer Science option allows individuals to earn a Master of Computer Science (p. 380) degree from a leader in information technology entirely online with no required campus visits. All students receive the same lectures, class assignments, exams and projects as on-campus students. The degree requirements are the same as for the on-campus M.C.S. program (p. 381). Off-campus students have 5 years in which to complete the program. The degree awarded is the same as the on-campus M.C.S. degree. Admissions procedures and forms can be found at Degree Admissions (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-apply-now).

Master of Computer Science

This degree (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs) is offered as an on-campus program or via the Internet through the I2CS program.

Breadth Requirement (http://cs.illinois.edu/current-students/professional-masters-mcs)
Advanced courses — chosen from CS 500 - CS 590 and CS 598; CS 597, or an approved non-CS 500-level course may satisfy 4 credit hours of this requirement.

Elective courses (subject to Other Requirements and Conditions below) 4-8

Total Hours 32

Other Requirements and Conditions

Other Requirements and Conditions may overlap

A minimum of 24 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.

A minimum of 12 500-level credit hours overall.

A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.

A grade of B- or higher is required for Breadth course work.

At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.C.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign campus may be transferred and applied to the M.C.S. degree requirements.

All degree requirements must be completed within three consecutive semesters (only fall and spring semesters are counted).

Off-campus students have 5 years in which to complete this degree.

The minimum program GPA is 3.0.

1 For additional details and requirements refer to the department’s Graduate Degree Requirements (http://cs.illinois.edu/prospective-students/graduate-students) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

Master of Science in Computer Science

The Master of Science (M.S.) in Computer Science is a research-oriented degree that can be counted toward the Computer Science Ph.D.

CS 599 Thesis Research (minimum applied toward degree) 4

Breadth Requirement - One course from each of three different (out of eight) core areas (http://cs.illinois.edu/current-students/graduate-students/ms-thesis)

Advanced courses – One 500-level course from one of the three areas selected in the Breadth Requirement. Remaining hours from any 500-level CS course (500-590 or 598) except CS 591 or CS 597. An approved 500-level non-CS course may satisfy 4 credit hours of this requirement; CS 599 (thesis) may satisfy 4 credit hours of this requirement.

Elective courses (subject to Other Requirements and Conditions below) 4-7

Total Hours 32

Other Requirements

Other Requirements and Conditions may overlap

A minimum of 16 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.

A minimum of 12 500-level credit hours overall.

A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.

A grade of B- or higher is required for Breadth Requirement course work.

At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign may be transferred and applied to the M.S. degree requirements.

It is each student’s responsibility to secure a M.S. thesis advisor and start thesis research no later than the beginning of the third semester in the program.

All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

The minimum program GPA is 3.0.

1 For additional details and requirements refer to the department’s Graduate Degree Requirements (http://cs.illinois.edu/prospective-students/graduate-students) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).
Creative Writing

http://creativewriting.english.illinois.edu/

Head of the Department: Michael Rothberg
Director of Graduate Studies: Eleanor Courtemanche
Director of Creative Writing: Jodee Stanley
Associate Director of Creative Writing: Steve Davenport

210 English Building
608 South Wright Street
Urbana, IL 61801
(217) 333-3646
E-mail: engl_resources@ad.uiuc.edu

Major: Creative Writing
Degrees offered: M.F.A.

Graduate Degree Programs

The Department of English offers a program of study leading to a Master of Fine Arts. A candidate for the MFA must spend at least four semesters or the equivalent in residence and complete at least 48 graduate hours. A full-time student typically completes this program in three academic years.

Admission

Graduate Record Examination (GRE) scores are required, but the GRE subject test for literature in English is not. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of a student capable of doing outstanding work in the field and earning a degree within a reasonable time. Preference is given to applicants who will be full-time students and active degree candidates. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is December 17.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all MFA candidates in this program.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at http://creativewriting.english.illinois.edu/graduate/about/.

Crop Sciences

http://www.cropsci.illinois.edu

Head of the Department: G. A. Bollero
AW-101 Turner Hall
1102 South Goodwin Avenue
Urbana, IL 61801
(217) 244-0396
E-mail: sdcarson@illinois.edu

Major: Crop Sciences
Degrees Offered: M.S., Ph.D.

Major: Bioinformatics
Degrees Offered: M.S.

Graduate Concentration: Crop Sciences

Online Program: Crop Sciences
Degrees Offered: M.S.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Crop Sciences and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Crop Sciences offers programs leading to the Master of Science and Doctor of Philosophy degrees. Great flexibility exists for planning programs in various areas, and no rigid curricula are prescribed. The following areas of specialization, along with some of the corresponding disciplines, indicate the breadth of opportunities:

- plant pathology including epidemiology, control, mycology, phytopathology, virology, nematology, and host plant resistance;
- plant breeding and genetics including cytogenetics, molecular genetics, quantitative genetics, and genetics of host-pathogen interactions;
- molecular biology and physiology including biochemistry, plant physiology, tissue culture, and plant-pathogen interactions;
- plant pathology including epidemiology, control, mycology, phytopathology, virology, nematology, and host plant resistance;
- plant breeding and genetics including cytogenetics, molecular genetics, quantitative genetics, and genetics of host-pathogen interactions;
- molecular biology and physiology including biochemistry, plant physiology, tissue culture, and plant-pathogen interactions;
• crop production including management, crop ecology, plant nutrition, and international crop production;
• weed science including biology, control, and ecology;
• bioinformatics;
• biometry including experimental design and data analysis;
• integrated pest management including response of crops to climate changes and fate of agricultural chemicals.

These areas of specialization apply to both agronomic and horticulture crops including ornamentals, turf grasses, fruits and vegetables.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the bioinformatics program will be able to integrate basic and applied concepts in the three areas and apply them to biotechnology and medical research. For additional information, please see our website at cropsci.illinois.edu/graduate/programs/ (http://cropsci.illinois.edu/graduate/programs).

Admission

Applicants are considered for admission to the Master of Science program if they have a bachelor’s or equivalent degree comparable to that granted by the University of Illinois. Admission to the Ph.D. program will be considered for applicants with the M.S., those nearing completion of the M.S., and in some cases, those with the B.S. Because of the diversity of programs in the Department of Crop Sciences, the preparation that is needed varies considerably. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant’s credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found at: www.grad.illinois.edu/prospective/international.htm (http://www.grad.illinois.edu/prospective/international.htm). Results of the Graduate Record Examination (GRE) are required for applicants to all programs except the Online Master of Science degree program. Please see our web page for additional information: cropsci.illinois.edu/graduate/admission. (http://cropsci.illinois.edu/graduate/admission)

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Crop Sciences. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest cropsci.illinois.edu/directory/faculty (http://cropsci.illinois.edu/directory/faculty).

Facilities and Resources

The department of crop sciences has excellent laboratory, greenhouse, and field research facilities available for all types of research. A network of experimental locations throughout the state and cooperative arrangements with other states make research possible under a wide range of environmental and climatic conditions. The department’s involvement in international programs may provide opportunities to conduct thesis research abroad. All phases of research, from bioinformatics, molecular biology and biophysics to field testing and crop production, are supported by state-of-the-art facilities. A map of the facilities can be seen at cropsci.illinois.edu/about/facilities (http://cropsci.illinois.edu/about/facilities).

Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate’s academic record, statement of plans, letters of reference, and GRE scores.

• Master of Science in Crop Sciences (p. 385)
• Master of Science in Bioinformatics, Crop Sciences Concentration (p. 384)

Doctor of Philosophy in Crop Sciences

Students are required to pass a preliminary examination within five semesters of first enrolling, not including the summer terms, and after substantial completion of the Ph.D. graded coursework requirement. The preliminary examination is comprised of both an oral and written component and students are expected to defend their Thesis Proposal at the oral component of the examination. Those students on the BA to PhD plan must also pass a Qualifying Exam. An acceptable dissertation is required. Residence requirements are the same as those of the Graduate College.
**Entering with approved M.S./M.A. degree**

Coursework approved by the graduate guidance committee an including CPSC 594, with a grade point average of at least a B, including 16 hours outside the core specialization area are required. (CPSC 594 is not required if it was taken in fulfillment of the master's degree.)

1 For additional details and requirements refer to the department's graduate handbook (http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

The Online M.S. in Crop Sciences program enables students to strengthen their education typically through part-time study, as most students are working professionals. Courses are delivered mainly through online and other distance education technologies and occasional site-based programming (site-based courses are optional and not required to complete the degree). The Crop Sciences online M.S. program is typically completed as a non-thesis degree, but a thesis option can be pursued pending Departmental approval. (p. 385) The program has a 30-plus year history of providing high quality University of Illinois courses and began granting off-campus MS degrees in 1986 to agriculture professionals across Illinois, as well as in neighboring states. Students may enroll in individual courses for personal or professional advancement or may apply for admission to the master's degree program in Crop Sciences. Students who successfully complete three qualifying courses may also receive a Professional Development Certificate in Crop Sciences.

The Online M.S. in Crop Sciences program also works in conjunction with the Natural Resources and Environmental Studies Online M.S. program and the Agriculture Education Online M.S. program to offer a diverse set of courses. The Department of Crop Sciences is looking to the future and the needs of non-traditional students. Therefore, new courses are continually in development for online delivery and blended formats. A student may complete their entire degree requirements online from anywhere in the world and they are available to in-state students and out-of-state students at the same tuition rates. For more information on Crop Sciences, the Online M.S. in Crop Sciences degree program or certificate offerings, please visit cropsci.illinois.edu/online-program.

**Master of Science in Bioinformatics, Crop Sciences Concentration**

The Crop Sciences concentration within the M.S. degree in Bioinformatics can be earned with a thesis option or a non-thesis option, which requires optional supervised research experiences.

**Thesis Option**

Curriculum and Instruction
http://education.illinois.edu/ci

Interim Head of the Department: David Brown
Director of Graduate Studies: Karla Möller
Graduate Admissions Information: Myranda Crist
311 Education Building
1310 South Sixth Street
Champaign, IL 61820
(217) 244-8286
E-mail: cigradprograms@education.illinois.edu

Major: Curriculum and Instruction
Degrees offered: Ed.M., M.S., M.A., C.A.S., Ph.D., and Ed.D.
Graduate Concentration: Second Language Acquisition and Teacher Education (Ph.D. only), Writing Studies (Ph.D. only)

Major: Early Childhood Education
Degrees offered: Ed.M. with teacher licensure

Major: Elementary Education
Degrees offered: Ed.M. with teacher licensure

Major: Secondary Education
Degrees offered: Ed.M. with teacher licensure
Graduate Concentrations: English, Mathematics, Sciences, Social Studies

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Curriculum and Instruction and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)
Graduate Degree Programs
The Department of Curriculum and Instruction offers graduate programs leading to the degrees of Master of Education (Ed.M.), Master of Science (M.S.), Master of Art (M.A.), Certificate of Advanced Study (C.A.S.), Doctor of Philosophy (Ph.D.), and Doctor of Education (Ed.D.). An example of faculty research areas:

- Aesthetics Education
- Bilingual/ESL Education
- Curriculum Studies
- Early Childhood Education
- Early Literacy
- Elementary Education
- English Education
- Literature for Children and Adolescents
- Mathematics Education
- Multicultural Education
- Reading Education
- Science Education
- Second Language Literacy
- Secondary Education
- Social Studies Education
- Teacher Education
- Technology Studies
- Writing Education

Graduate students interested in writing can obtain a concentration in Writing Studies (http://www.cws.illinois.edu/graduate) at the Ph.D. level.

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master's degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education, Elementary Education, and Secondary Education. In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master's students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master's candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

Admission
Interested applicants should start at http://education.illinois.edu/programs/grad/how-to-apply. In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Beginning with Spring 2017 admissions, scores for the Graduate Record Examination (GRE) must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master's thesis, article, or paper, is required for application to a doctoral program. Applicants for the master's degree with teacher licensure must submit passing scores on the Illinois Licensure Testing System Test of Academic Proficiency (TAP) or use their ACT/SAT score in lieu of passing the TAP (http://education.illinois.edu/students/prospective-students/ACT) and for secondary education licensure, the appropriate content area examination. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook www.grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c).

Degree Requirements
- Masters (p. 387)
- Doctoral (p. 387)
- C.A.S. (p. 387)

For additional details and requirements refer to the department's Web site (http://www.education.illinois.edu/ci), the College of Education Graduate Programs Handbook (http://www.ed.illinois.edu/students/grad_handbook), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Curriculum and Instruction. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).
Faculty Research Interests
For information about specific faculty research interests, current grants, and publications, please visit the Faculty Research Profiles web site: www.ed.illinois.edu/ci/frp (http://education.illinois.edu/ci/people).

Facilities and Resources
Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: International Journal of Education & the Arts, Journal of Curriculum Studies, and American Educational Research Journal. The department also has resources for graduate students such as the Language and Literacy Student Organization and other student-initiated groups in Curriculum, Aesthetics, and Teacher Education; and Mathematics, Science, and Technology.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students.

Financial Aid
Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (http://education.illinois.edu/programs/grad/financial-aid) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs) and the Office of Student Financial Aid (http://www.osfa.illinois.edu). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

- Master of Education in Curriculum and Instruction (p. 388)

| General Coursework Required: 16 hours |
| Research/Project/Independent Study Hours (min/max applied toward degree): 0-8 |
| Total Hours: 32 |

Other Requirements
Other requirements may overlap
Enrollment must be preceded by at least two years of acceptable professional work experience.

| 500-Level Hours Required: 16 hours (Independent Study included) |
| Minimum GPA: 3.0 |

Information listed in this catalog is current as of 04/2016
Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 355) and contact the M.B.A. program and their major department office for more information.

Doctor of Education in Curriculum and Instruction

Cognate Requirement (minimum applied toward degree)  16
Research Methods  8
Elective Hours:  36

General Course Work
Research/Project/Independent Study Hours (min/max applied toward degree):  0-12
CI 599  Thesis Research (min/max applied toward degree)  4-16

Total Hours  64

Information listed in this catalog is current as of 04/2016
The Dance Department expects MFA candidates to conduct a creative inquiry that leads to the development of a sophisticated sense of self-definition. Individual research and analysis should culminate in the development of a personal artistic process and mission and should be evident in the following contexts:

- **Choreographing:** Candidates will develop a distinctive choreographic research methodology and demonstrate its skillful application in a performative context. This ideology must establish solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.
- **Communicating:** Candidates will develop the ability to express their choreographic vision and practice in verbal and written language that is clear, cogent, and convincing and demonstrates clear analytic skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.
- **Moving:** Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.
- **Teaching:** Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/learning environment.
- **Career Planning:** Candidates are assessed on their ability to develop innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.

### Admission Requirements

Prerequisites for admission to the MFA program are:

1. An undergraduate degree and significant experience in dance is required.
2. Demonstrated choreographic achievement and potential to make innovative contributions to the field.
3. Demonstrated potential to engage in critical thinking and writing.
4. A minimum grade point average of 3.0 on a 4 point scale, computed from the last 60 hours of undergraduate work and any graduate work completed.

International students must have a minimum TOEFL score of 79 on the internet-based test, 213 on the computer-based tests, or 550 on the paper test for limited status admission. Students with these minimum scores must take the English as a Second Language Placement Test (EPT) upon entry to the University. International students who receive a score greater than 103 on the internet-based test, 257 on the computer-based test, or 613 on the paper test are eligible for full status admission. Students with these scores are exempt from the English as a Second Language Placement Test. The GRE is not required.

### Faculty Research Interests

An extraordinary faculty of artists, researchers and scholars has gathered at Illinois, who are creating new paradigms for interactions between the professional arena and the academic training ground. Our group of professional artists includes Jan Erkert, Sara Hook, Philip Johnston, Linda Lehovec, Jennifer Monson, Rebecca Nettl-Fiol, Tere O’Connor, Cynthia Oliver, Kirstie Simson, Endalyn Taylor, John Toenjes, Renee Wadleigh, and Abby Zbikowski, all of whom share a commitment to teaching and preparing students for leadership roles in the field of dance.
Financial Aid

Two forms of financial aid are offered to graduate students by the Department of Dance:

- Teaching, video and administration assistantships are available to graduate students. Assistantships of 25% or greater qualify the student for a tuition waiver. All students are required to apply for Federal Work Study.
- A variety of Fellowships are available through The Graduate College each year, including: (A full listing of Fellowships can be found at: www.grad.illinois.edu/fellowships (http://www.grad.illinois.edu/fellowships))
  - The Creative and Performing Arts Fellowship, which may include stipends up to a maximum of $6,000 for a student demonstrating outstanding choreographic and performance talent.
  - The Graduate College Fellowship for Underrepresented Students provides fellowships in the amount of $8,000 and are available to outstanding minority students.

Graduate teaching assistantships are awarded to experienced teachers. A letter of recommendation from a dance professional who has observed the applicant’s teaching is required with the application.

Prospective MFA candidates are encouraged to apply for financial assistance through the Office of Student Financial Aid, 420 Student Services Bldg., University of Illinois at Urbana-Champaign, Champaign, IL 61820. (217) 333-0100.

Master of Fine Arts in Dance

The MFA Curriculum is designed to promote a candidate’s progress through our stated objectives: Choreography, Communication, Moving, Teaching, and Career Planning.

Included in these are courses in dance studies, somatics, pedagogy, and two semesters devoted to an innovative lab team taught by our faculty and designed in collaboration with students. The final year of study is devoted to synthesizing the above objectives evidenced by the production of the candidate’s choreography, their written thesis document, oral presentation, and plans for propelling students’ career into the professional sphere.

Physical Practice, at least 2 hours through DANC 560 6

Other Requirements

Other requirements may overlap
Course work taken to completed undergraduate deficiencies will not receive graduate credit.
Residency requirement of three years (six semesters)
Minimum GPA: 2.75

1 For additional details and requirements refer to the department’s MFA Handbook (http://dance.uic.edu/prospective-students/mfa) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

- Minor in Dance (p. 392)

Minor in Dance

The Graduate Minor in Dance offers physical, creative, and theoretical engagement with contemporary dance and performance. The program of study presents interested graduate students the chance to endow their major graduate degree studies with interdisciplinary ideas and presents an alternate pedagogic window into research through the body. Prospective graduate minor students will be required to have successfully completed one of the required Dance Graduate Minor courses prior to official admission to the program. In addition, they will have to be interviewed by the MFA in Dance Program Director, and they will have to provide a letter of endorsement from their home department advisor that is co-signed by their home department Graduate Program Director.

For additional information, please contact dance@illinois.edu.

East Asian Languages and Cultures

http://ealc.illinois.edu

Head of Department: Jerome Packard
Director of Graduate Studies: Makoto Hayashi
2090 Foreign Languages Building
Graduate Degree Programs

The Department of East Asian Languages and Cultures offers academic programs in the languages and the humanistic cultures of China, Japan, and Korea, and of the East Asian region as a whole, leading to the Master of Arts in East Asian Studies and the Doctor of Philosophy in East Asian Languages and Cultures.

www.ealc.illinois.edu/programs/graduate/ (http://www.ealc.illinois.edu/programs/graduate)

Admission

Applicants are expected to have a strong background in at least one East Asian language; normally, this means a minimum of two years of formal study. Applicants to the graduate program must submit an application for admission online (www.grad.illinois.edu/admissions/apply (http://www.grad.illinois.edu/admissions/apply)) and submit a statement of purpose, three letters of reference completed by teachers, advisers, or recent employers, and a 10-20 page writing sample. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 103 on the internet-based test (iBT) for admission with full standing; they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c)). Students with a B.A. or B.S. only should apply to the M.A. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu. (slclgradservices@illinois.edu)

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including East Asian Languages and Cultures. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at https://www.med.illinois.edu/mdphd/.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.

www.grad.uiuc.edu/admissions/taengprof.htm (http://www.grad.uiuc.edu/admissions/taengprof.htm)

Financial Aid

The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. In recent years, almost all EALC graduate students have received some form of financial support. Financial aid for graduate students in the Department of East Asian Languages and Cultures may include:

• University Fellowships
• Foreign Language and Area Studies (FLAS) Fellowships
• University Dissertation Completion Fellowships
• Minority Academic Partnership Plan (MAPP) Fellowships
• teaching assistantships
• research assistantships

All awards of financial aid are made following competitive application.

https://www.grad.uiuc.edu/fellowship/

Master of Arts in East Asian Studies

Thesis Option

Two 500-level courses in the major field including one course designated as a research seminar in which the student produces a research paper using Asian language sources.

EALC 500 Proseminar in EALC

Distribution requirements. a minimum of two (8 hours) 400- or 500-level courses that are: 1. outside the major field of interest. 2. in an East Asian culture other than the major areas of interest. 3. in a Second Period (modern or premodern)

Elective hours

Language Requirement: Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.

Information listed in this catalog is current as of 04/2016
EALC 599 Thesis Research (min/max applied toward degree) 4

Total Hours 32

Other Requirements 1
Other requirements may overlap
Minimum 500-level Hours Required 12
Overall:
Minimum GPA: 2.75

1 For additional details and requirements refer to the department's guide to Graduate Programs (http://www.ealc.illinois.edu/programs/graduate) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Non-Thesis Option
Two 500-level courses in the major field including one course designated as a research seminar in which the student produces a research paper using Asian language sources.

EALC 500 Proseminar in EALC 4

Distribution requirements. a minimum of two (8 hours) 400- or 500-level courses that are: 1. outside the major field of interest. 2. in an East Asian culture other than the major areas of interest. 3. in a Second Period (modern or premodern) 8

Elective hours 12

Language Requirement: Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.

Total Hours 32

Other Requirements 1
Other requirements may overlap
Minimum 500-level Hours Required 12
Overall:
M.A. Examination
Minimum GPA: 2.75

1 For additional details and requirements refer to the department's guide to Graduate Programs (http://www.ealc.illinois.edu/programs/graduate) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Doctor of Philosophy in East Asian Languages and Cultures
Applicants to the Ph.D. program normally must hold a master's degree in East Asian studies or a related discipline with an East Asian concentration.

Candidates for the Ph.D. may specialize in culture (e.g., religion, literature, history, anthropology), language acquisition, or language pedagogy, with a major concentration in China, Japan, or Korea.

Other general requirements include: an annual review of progress, including an evaluation of research capability; a written and oral preliminary examination in the major and two minor fields (after completion of coursework); presentation of a dissertation proposal (often as part of the preliminary exam); and completion and defense of the dissertation.

Entering with approved M.S./M.A. degree
Courses in the major field defined by culture and discipline (500-level) 16
Research seminars (500-level) 8
Elective 500-level courses 8

Two graduate courses in a second discipline and two in a second culture must be completed as part of the Ph.D. coursework

Language Requirement:
Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.

Demonstration of proficiency in a second language relevant to the student's course of study usually Chinese, Japanese, Korean evidenced by either a) completion of minimum of two years of an approved sequence courses; or b) by examination.

EALC 599 Thesis Research (32 max applied toward degree) 0-32
Total Hours 64

Other Requirements 1
Other requirements may overlap
In addition to the language requirements noted above, Ph.D. students whose primary focus is Japan are required to take one year of classical Japanese, and those whose primary focus is China are required to take one year of classical Chinese. These may be counted toward degree requirements.

Qualifying Exam Required No
Preliminary Exam Required Yes
Final Exam/Dissertation Defense Required
Dissertation Deposit Required Yes
Minimum GPA: 2.75

1 For additional details and requirements refer to the department's guide to Graduate Programs (http://www.ealc.illinois.edu/programs/graduate) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Entering with approved B.S./B.A. degree
EALC 500 Proseminar in EALC 4

Two 500-level courses in the major field including one course designated as a research seminar in which the student produces a research paper using Asian language sources.

Distribution requirements. a minimum of two (8 hours) 400- or 500-level courses that are: 1. outside the major field of interest. 2. in an East Asian culture other than the major areas of interest. 3. in a Second Period (modern or premodern) 8

Information listed in this catalog is current as of 04/2016
Elective hours to earn MA equivalency 12
Courses in the major field defined by culture and discipline (500-level) 16
Research seminars (500-level) 8
Elective 500-level courses 8
EALC 599 Thesis Research (32 max applied toward degree) 32

Total Hours 96

Other Requirements
Other Requirements may overlap
In addition to the language requirements noted above, Ph.D. students whose primary focus is Japan are required to take one year of classical Japanese, and those whose primary focus is China are required to take one year of classical Chinese. These may be counted toward degree requirements.

Qualifying Exam Required No
Preliminary Exam Required Yes
Final Exam/Dissertation Defense Required
Dissertation Deposit Required Yes
Minimum GPA: 2.75

For additional details and requirements refer to the department's guide to Graduate Programs and the Graduate College Handbook.

Economics

http://www.economics.illinois.edu

Head of the Department: Martin Perry
Associate Head: George Deltas
214 David Kinley Hall
1407 W. Gregory Dr.
Urbana, IL 61801
(217) 333-0120
Fax: (217) 244-6571
E-mail: econ@illinois.edu

Major: Economics
Degrees Offered: M.S., Ph.D.
Graduate Concentration: Policy Economics (M.S. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Economics and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd/)

Graduate Degree Programs
The Department of Economics offers graduate programs leading to the Master of Science in Policy Economics and Doctor of Philosophy degrees. The candidate for a Ph.D. may specialize in the following fields:

- microeconomic theory
- public economics
- macroeconomic theory
- international economics
- labor economics
- development economics
- mathematical economics
- econometrics
- industrial organization

The department is not admitting students to the M.A. at this time.

Admission
Admission to the Ph.D. program is available only for the fall semester. In addition to the standard undergraduate preparation in economics, students are expected to have had at least two semesters of calculus and one of linear algebra to be admitted to the Ph.D. program. The results of the Graduate Record Examination (GRE) should accompany applications for admission. Graduate College admission requirements apply. In addition, international students must submit Test of English as a Foreign Language (TOEFL) or IELTS results; if they wish to apply for a teaching assistantship, the Test of Spoken English (TSE) or completion of the speaking section of the TOEFL-iBT or IELTS is also required.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Economics. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the Department of Economics and the College of Medicine. Students in the combined program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at https://www.med.illinois.edu/mdphd/.

Graduate Teaching Experience
Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid
In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the Ph.D. program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

- Master of Science in Economics (p. 396)
- Master of Science in Economics, Policy Economics Concentration (p. 397)

Doctor of Philosophy in Economics
Students must pass comprehensive qualifying examinations on Econometrics, Macroeconomics and Microeconomics. Those who fail the comprehensive examinations will have a 2nd chance in the start of the fall semester and a 3rd chance at the end of the fourth semester.

Information listed in this catalog is current as of 04/2016
(in this 3rd chance they will take the exams with the first year students of the next cohort). Students who have failed the 3rd chance will not be allowed to register for the following year. Upon meeting course and GPA requirements, they will be eligible to receive a master’s degree in Economics, provided they have not previously received such a degree from another institution.

Candidates must also successfully complete two fields through coursework and/or a written examination. A research paper must be submitted prior to the start of the third year and approved prior to the end of that year. Students who fail to meet these deadlines will have reduced financial support and be placed on academic probation. Unless they return to good standing by satisfying the requirement, they will be dropped from the program at the end of the following semester.

A dissertation is also required. In addition, candidates are required to give an oral defense of the dissertation proposal and pass an oral final examination covering the research. A student with an appropriate background who devotes full time to graduate work can complete the Ph.D. degree in four years beyond the bachelor’s degree. An additional year or more is usually necessary, especially for those holding part-time assistantships. Students in the Ph.D. program may earn a master’s degree as they work toward the Ph.D. degree.

Optional: A not-for-credit Math Camp after campus orientation, consisting of 12 hours of instruction. The aim of the Math Camp is to prepare students with no master’s level coursework in mathematical economics for the program’s first year classes. However, it will be open to all incoming students.

Additional information can be found at www.economics.illinois.edu/programs/phdprogram/ (http://www.economics.illinois.edu/programs/phdprogram).

Master of Science in Economics, Policy Economics Concentration

This is a specially designed one- to two-year program to address the needs of two groups of students. One is promising young professionals and administrators who need additional training in the areas of economic analysis and quantitative techniques. The other is students who are potentially interested in pursuing a Ph.D. degree but require additional qualification to enable them to do so. While earning the master’s degree and acquiring the necessary tools for further studies, they will learn if the pursuit of a Ph.D. degree is within their reach and suits their purposes.

Students enter the program only in the fall term.

The required coursework is further enriched through

1. academic advising wherein an academic advisor with an open-door policy allows the MSPE students to drop by his office at their convenience, discuss their academic questions with him, and re-optimize their program of study on a continual basis. The academic advisor also provides guidance on study plans beyond graduation and provides support in achieving them;

2. an orientation program that includes an intensive mathematics course; this course serves as a refresher for the math content to be utilized during the students’ courses in the program;

3. opportunities to participate in field trips to observe the operation of financial institutions, modern industrial production facilities, federal and state government agencies, and international institutions;

4. scheduled lectures by outstanding, internationally known economists;

5. discussion groups and tutoring for participants who are having difficulty;

6. program staff assistance with visas, housing, and other nonacademic concerns; and

7. participation in social activities, including graduation dinners, holiday parties, picnics, and special luncheons.

This is a designated full-cost recovery program and no financial aid is available for the students in this program.

Please see www.mspe.illinois.edu (http://www.mspe.illinois.edu) for detailed information on the MSPE Program.

Minimum 500-level Hours Required 32
Overall:
Minimum GPA: 3.0

Information listed in this catalog is current as of 04/2016
Facilities and Resources

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college and campus. There are opportunities available through the department (http://education.illinois.edu/epol), the College of Education (http://education.illinois.edu/students/graduate-financialaid), and the Bureau of Educational Research (http://www.ed.illinois.edu/ber/fundingresources.html). Please note: Graduate students employed as

We offer a Master of Education degree that enables students to receive a University of Illinois education without ever coming to our campus. The online Master of Education in Education Policy, Organization, and Leadership follows the requirements as listed under the Masters tab (p. 398). Students may select an optional concentration (p. 401). Concentrations are available in Diversity & Equity in Education, Educational Administration and Leadership, Global Studies in Education, Human Resource Development, and Learning Design and Leadership.

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (https://mba.illinois.edu/academics/joint-degrees) and contact the M.B.A. program and their major department office for more information.

Educational Psychology

http://education.illinois.edu/edpsy

Chair: Dan Morrow
Director of Graduate Studies: Kiel Christianson
Graduate Admissions Information: Myranda Crist
210 Education Building
1310 South Sixth Street
Champaign, IL 61820-6990
Phone: (217) 333-2245
Fax: (217) 244-7620
edpsy@illinois.edu

Major: Educational Psychology
Degrees offered: Ed.M., M.S., M.A., C.A.S., Ph.D.
Graduate Concentration: African American Studies (http://www.afro.illinois.edu/education/gradconc) (available to all on-campus degrees), Second Language Acquisition and Teacher Education (http://www.slate.illinois.edu) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Educational Psychology and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Educational Psychology offers admission to doctoral programs in the following areas of specialization:

- Cognitive Science of Teaching and Learning (CSTL)
- Child Development
- Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES)
- Counseling Psychology

Students entering without a master’s degree must first complete the requirements for a Master of Science (including a master’s thesis).

The Department offers admission to a terminal on-campus Master of Science (M.S.) degree with a focus on Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES). There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning, Child Development, or Counseling Psychology areas of specialization.

Admission

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor’s degrees and those who have a master’s degree. Students who enter the program without a prior master’s incorporate their master’s class work and research into their doctoral program, and earn a master’s degree as the first step toward their Ph.D. The department does not accept applications for master’s degrees in CSTL, Child Development or Counseling Psychology.

Applications

Doctoral applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department Web site (http://www.education.illinois.edu/edpsy). Applicants to our doctoral program apply for Fall enrollment. Current deadlines are posted on our department Web site (http://www.education.illinois.edu/edpsy).

Doctoral candidates are admitted into one of four divisions: CSTL, Child Development, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores, letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master’s candidates are only admitted into QUERIES.

Grade Point Average

The preferred department standard for grade point average is 3.5 on a 4.0 scale. The University calculates undergraduate GPAs on the last two years of grades for degree applicants and in the last one year for students who have not yet completed their bachelor’s degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must have demonstrated English language competence with TOEFL scores of greater than 610 (paper and pencil test), greater than 253 (computer-based test), or greater than 102 iBT. An IELTS score of greater than 6.5 overall, with at least 6 in each sub-section, can be substituted for the TOEFL score. Students who are accepted with lower scores will be required by the University to enroll on a limited status basis for at least their first semester.

Area of Study Affiliation

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Child Development

Information listed in this catalog is current as of 04/2016
Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college and campus. Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs) and the Office of Student Financial Aid (http://www.osfa.illinois.edu).

The department does not require a separate financial aid application.

- Master of Education in Educational Psychology (p. 407)
- Master of Education in Educational Psychology, African American Studies Concentration (p. 407)
- Master of Science and Master of Arts in Educational Psychology (p. 408)
- Master of Science and Master of Arts in Educational Psychology, African American Studies Concentration (p. 408)
- Doctor of Philosophy (Ph.D.) in Educational Psychology (p. 406)
- Doctor of Philosophy (Ph.D.) in Educational Psychology, African American Studies Concentration (p. 406)
- Certificate of Advanced Study (C.A.S.) in Educational Psychology (p. 405)
- Certificate of Advanced Study (C.A.S.) in Educational Psychology, African American Studies Concentration (p. 405)

Master of Education in Educational Psychology

Educational Psychology offers an online professional Master of Education (Ed.M.) degree specialization in Evidence-Based Decision Making. Admissions requirements are somewhat different and applicants should consult the college's on-line program Web site (http://education.illinois.edu/online-offcampus) for current admissions criteria and specific course requirements.

Other Requirements:¹

¹ Information listed in this catalog is current as of 04/2016
Minimum of 12 hours at the 500 level
Minimum GPA 3.0

1 For additional details and requirements refer to the department's Web site, (http://education.illinois.edu/edpsy) the College of Education Graduate Programs Handbook, and the Graduate College Handbook.

Certificate of Advanced Study (C.A.S.) in Educational Psychology

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2016/2016%20Disclosures/CAS_EPSY/Gedt.html).

If the student does not have a Masters degree from the University of Illinois at Urbana-Champaign, Foundations Courses must be completed:

Psychological Foundations Courses in Educational Psychology
Select one of the following:

- EPSY 400 Psyc of Learning in Education
- EPSY 401 Child Language and Education
- EPSY 402 Sociocultural Infl on Learning
- EPSY 404 Adjustment in School Settings
- EPSY 405 Personality and Soc Dev
- EPSY 406 Psyc of Classroom Management
- EPSY 407 Adult Learning and Development
- EPSY 408 Learning & Hum Dev w/ EdTech
- EPSY 430 Early Adolescent Development
- EPSY 490 Developments in Educ Psyc
- OR EPSY 485 for 2 hours plus 2 hours of a previously named EPSY course

Philosophical and Social Foundations Courses in Educational Policy Studies
Select one of the following:

- EPS 400 History of American Education
- EPS 401 History of Educational Ideas
- EPS 402 Asian American Education
- EPS 403 European Education to 1600
- EPS 404 European Education since 1600
- EPS 405 Historical & Social Barriers
- EPS 410 Philosophy of Education
- EPS 411 School and Society
- EPS 412 Critical Thinking for Teachers
- EPS 413 Aesthetic Education
- EPS 415 Technology & Educational Reform
- EPS 420 Sociology of Education
- EPS 421 Racial and Ethnic Families
- EPS 423 Politics of Education
- EPS 424 Economics of Education
- EPS 426 Comparative Education

Elective Hours: 32
500-Level Hours Required: 16 hours (Independent Study included)
General Coursework Required: 16 hours
Research/Project/Independent Study Hours (min/max applied toward degree): 0-8
Total Hours 32

Other Requirements: 1
Enrollment must be preceded by at least two years of acceptable professional work experience.
Minimum GPA 3.0

1 For additional details and requirements refer to the department's Web site, (http://education.illinois.edu/edpsy) the College of Education Graduate Programs Handbook, and the Graduate College Handbook.

Certificate of Advanced Study in Educational Psychology, Concentration in African American Studies

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2016/2016%20Disclosures/CAS_EPSY/Gedt.html).

If the student does not have a Masters degree from the University of Illinois at Urbana-Champaign, Foundations Courses must be completed:

Psychological Foundations Courses in Educational Psychology
Select one of the following:

- EPSY 400 Psyc of Learning in Education
- EPSY 401 Child Language and Education
- EPSY 402 Sociocultural Infl on Learning
- EPSY 404 Adjustment in School Settings
- EPSY 405 Personality and Soc Dev
- EPSY 406 Psyc of Classroom Management
- EPSY 407 Adult Learning and Development
- EPSY 408 Learning & Hum Dev w/ EdTech
- EPSY 430 Early Adolescent Development
- EPSY 490 Developments in Educ Psyc
- OR EPSY 485 for 2 hours plus 2 hours of a previously named EPSY course

Philosophical and Social Foundations Courses in Educational Policy Studies
Select one of the following:

- EPS 400 History of American Education
- EPS 401 History of Educational Ideas
- EPS 402 Asian American Education
- EPS 403 European Education to 1600
- EPS 404 European Education since 1600

Major: Electrical and Computer Engineering
Degrees Offered: M.Eng., M.S., Ph.D.

Medical Scholars Joint Degree Program: Doctor of Philosophy (Ph.D.) in Electrical and Computer Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The department offers graduate study and research in electrical and computer engineering leading to the degrees of Master of Engineering, Master of Science, and Doctor of Philosophy. Virtually every specialty within electrical and computer engineering is represented. Courses and research opportunities exist in the following areas:

- applied computation theory
- bioengineering, acoustics, and magnetic resonance engineering
- communications
- computer-aided design and test
- computer systems
- computer vision and robotics
- decision and control
- electromagnetic fields
- electrooptics, lasers, and plasmas
- integrated circuits
- microelectro-mechanical systems
- mobile computing and communication
- optoelectronics
- power and energy systems
- power electronics
- remote sensing and propagation
- semiconductor materials and devices
- semiconductor physics and computational electronics
- signal, image, and speech processing

The Master of Engineering degree in ECE is designed for students having a B.S. degree in ECE or a related field and offers an opportunity to broaden knowledge of areas in ECE beyond what is possible in a four-year undergraduate curriculum. The M.Eng. is a professional degree and is not intended for students interested in obtaining research experience. Students interested in a research-oriented career and all students interested in obtaining a Ph.D. should instead apply to the traditional M.S. program.

The programs are very flexible to encourage interdisciplinary studies and research. Opportunity also exists for specializing in:

1. computational science and engineering and
2. energy and sustainability engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education-programs/graduate-program) and the Energy and Sustainability Engineering (EaSE) Option. (http://ease.illinois.edu)

The Medical Scholars Program (https://www.med.illinois.edu/mdphd) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Electrical and Computer Engineering.

For complete program information, visit the Electrical and Computer Engineering graduate program Web site (http://www.ece.illinois.edu/students/grad).

Admission

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, because of space limitations, applicants with GPAs below 3.50 are rarely admitted. All applicants must submit scores from the general test of the Graduate Record Examination (GRE) (http://www.ets.org).

A master’s degree is required for admission to the PhD program. Applicants with master’s degrees are admitted only if a faculty member is willing to serve as the Ph.D. thesis advisor. Accordingly, such applicants should write, call, or e-mail prospective Ph.D. advisors and discuss their research interests and potential Ph.D. thesis topics well in advance of application deadlines. Admission for the spring semester is possible, in addition to the usual fall semester admissions.

Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 96 (iBT), 243 (CBT), or 590 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c)
is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Electrical and Computer Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Electrical and Computer Engineering graduate program. Further information on this program is available by contacting the:

Medical Scholars Program
125 Medical Sciences Building
(217) 333-8146
mspo@illinois.edu

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (https://www.med.illinois.edu/mdphd) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Electrical and Computer Engineering graduate degree.

Faculty Research Interests

Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department’s research Web site (http://ece.illinois.edu/research).

Centers, Programs, and Institutes

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department’s research Web site (http://ece.illinois.edu/research).

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are available for the majority of students who are admitted to the M.S. and Ph.D. programs. International applicants generally are not awarded teaching assistantships but are eligible for the other forms of financial aid. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Please see the financial aid eligibility for the M.Eng. in Electrical and Computer Engineering under the "Masters" tab.

Doctor of Philosophy in Electrical and Computer Engineering

Other Requirements and Conditions

Other Requirements and Conditions may overlap
Credit in ECE 415, ECE 445, ECE 590 (seminar), ECE 596, ECE 597 (individual study), PHYS 404, PHYS 435, and PHYS 436, STAT 400, or any other seminar or individual study course does not count toward the degree.

At least one ECE 500-level course must be taken.

No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.

A Masters degree is required for admission to the Ph.D. program.

Ph.D. exam and dissertation requirements:
Qualifying exam
Preliminary exam
Final exam or dissertation defense
Dissertation deposit
Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Graduate Study Manual (http://www.ece.illinois.edu/academics/grad/overview) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

2 Qualifying Exam information (http://www.ece.illinois.edu/students/grad/QualExams/qual.html)
Master of Science in Electrical and Computer Engineering

Required Courses: Required Hours
Thesis research -- ECE 599 (min/max applied toward degree) 8
ECE Colloquium -- ECE 500 (registration for 0 hours every term while in residence) 0
Elective courses (subject to Other Requirements and Conditions below) 24
Total hours 32

Other Requirements and Conditions
Credit in ECE 415, ECE 445, ECE 590, ECE 596, PHYS 404, PHYS 435, PHYS 436, and STAT 400 does not count toward the degree.
12 credit hours must be 500-level ECE courses other than ECE 590, ECE 596, ECE 597, and ECE 599.
No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.
A maximum of 4 hours of ECE 597 (or other individual study) may be applied toward the elective coursework requirement.
There is no final examination for the M.S. degree.
M.S. thesis deposit
Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Graduate Study Manual (http://www.ece.illinois.edu/academics/grad/overview) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

Master of Engineering in Electrical and Computer Engineering

Required Courses: Required Hours
ECE 500-registration (0 hours) every term while in residence 0
500-level ECE courses (subject to Other Requirements and Conditions below) 12
Total credit hours for the degree 32

Other Requirements and Conditions
A minimum of 12 credit hours of ECE coursework at the 500-level must be applied toward the degree.
Up to 4 hours of ECE 596 and/or ECE 597 (or other individual study) may be applied toward this degree requirement.
Coursework must include at least 18 credit hours of ECE courses; 15 of these hours must be from no more than 2 different focus areas. The ECE Graduate Committee maintains the focus area course lists.
Credit in ECE 411, 415, 445, 590, PHYS 404, 405, 435, 436, and STAT 400 do not count toward the degree.
No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.
This degree option is non-thesis only.
Minimum program GPA: 3.0

For additional details and requirements refer to the department’s Graduate Study Manual (http://www.ece.illinois.edu/academics/grad/overview) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

For tuition information and external funding resources, please visit the department’s graduate program website (https://www.ece.illinois.edu/academics/grad/overview). Students in the ECE major for the M.Eng. degree are not eligible for BOT tuition waivers.

English

http://www.english.illinois.edu

Head of the Department: Michael Rothberg
Director of Graduate Studies: Eleanor Courtemanche
210 English Building
608 South Wright Street
Urbana, IL 61801
(217) 333-3646
E-mail: engl_resources@ad.uiuc.edu

Major: English

Information listed in this catalog is current as of 04/2016
Degrees Offered: M.A., Ph.D.
Graduate Concentrations: Medieval Studies (p. 486) (available to all degrees), Writing Studies (p. 570) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in English and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd)

Affiliated Programs offering certificates or minors:
- Department of African American Studies
- Asian American Studies Program
- American Indian Studies
- Center for Latin American and Caribbean Studies
- Gender and Women’s Studies Program
- The Holocaust, Genocide, and Memory Studies Initiative
- Illinois Program for Research in the Humanities
- Latina-Latino Studies Program
- The Program in Jewish Culture and Society
- Unit for Cinema Studies
- Unit for Criticism and Theory

Graduate Degree Programs
The Department of English offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. We welcome qualified students who wish to pursue their interests in English, American, and Anglophone language, literature and film beyond the undergraduate level. The Ph.D. program is, in general, designed to educate and train teacher-scholars who will take positions in colleges and universities throughout the country. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Both the M.A. and Ph.D. may be earned with a specialization in Writing Studies. Also, doctoral students specializing in other fields may earn a graduate concentration in Writing Studies.

For information on the Master of Fine Arts (M.F.A.) program in Creative Writing, see Creative Writing (p. 382).

Admission
A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores for the verbal and subject tests are required for those applying for the literature program. The GRE subject test for literature in English is not required of writing studies applicants. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 2nd.

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including English. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting:

Medical Scholars Program
125 Medical Sciences Building
(217) 333-8146
or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp)

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid
Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at www.english.illinois.edu/graduate/program/ (http://www.english.illinois.edu/graduate/program/) or write to the above address.

Master of Arts in English
A full-time student can complete this program in two academic years. Students must choose to complete a specialization in Literature or Writing Studies.

Virtually every student will teach rhetoric classes, and is required to enroll in a teaching proseminar (ENGL 593).

Course work selected from list below in consultation with advisor

Language Requirement: Students must demonstrate a reading knowledge of at least one foreign language.

Total Hours 32

Other Requirements

Virtually every student will teach rhetoric classes, and is required to enroll in a teaching proseminar (ENGL 593).

Course work selected from list below in consultation with advisor

Language Requirement: Students must demonstrate a reading knowledge of at least one foreign language.

Other Requirements

Other requirements may overlap

At least two semesters or the equivalent in residence

Minimum Hours Overall Required 24 (12 at 500-level)

Within the Unit:

Minimum 500-level Hours Required 16

Overall:

Information listed in this catalog is current as of 04/2016
Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s Graduate Studies in English (http://www.english.illinois.edu/graduate) Website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Course work listing for M.A. requirements for the Literature Specialization:
Eight semester-long courses in British and American Literature and Critical Theory.

Courses (worth four hours of credit each) must be taken in six of the following nine areas:

- Medieval British Literature (beginning to 1485)
- Renaissance British Literature (1485-1660)
- Restoration/Eighteenth-Century British Literature (1660-1800)
- Nineteenth-Century British Literature (1800-1900)
- Twentieth-Century British Literature (1900-2000)
- Early American Literature (beginning to Civil War)
- Later American Literature (Civil War to present)
- Anglophone Literature (other than British and American)
- Critical Theory

Candidates may substitute another area (such as film) for one on the above list with the permission of the Director of English Graduate Studies. However, all students must take at least one course in a period before 1660, and one course in either Early or Later American Literature.

At least four of the eight courses must be in 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be in 400-level courses (limited to 36 students) in which graduate students complete work beyond that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar in the teaching of composition or business and technical writing for four hours of credit. (ENGL 593)

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a University of Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better.

Course work listing for M.A. requirements for the Writing Specialization:
Eight semester-long courses in Writing Studies, Literature, and Theory.

Courses (worth four hours each) must be taken as follows:

At least 16 of the 32 required hours must be in 500-level courses. Eight of the 16 hours must be ENGL 505 and 1 course from the following list: ENGL 582, ENGL 583, ENGL 584. In addition, students must take two courses in Literature or Theory and four courses approved by the Writing Studies advisor.

At least four of the eight courses must be 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be 400-level courses (limited to 36 students) in which graduate students complete work in addition to that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar (ENGL 593) in the teaching of composition or the teaching of business and technical writing for four hours of credit.

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a University of Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better.

Doctor of Philosophy in English

Students in the program who have earned their master’s degrees must apply formally to the Ph.D. program. Applicants who have completed their master’s degrees elsewhere may also apply. Seldom are applicants accepted with graduate grade point averages below 3.5. Students must choose to complete a specialization in Literature or Writing Studies. In addition, students may choose to complete the graduate concentration in Writing Studies (p. 569).

Interdisciplinary work is encouraged. Students may take courses outside of English. The special field examination is taken as the student completes coursework and prepares to write the thesis. The student then goes on to complete and defend the thesis under the direction of a committee composed of four professors. A full-time student can complete this program in four years beyond the master’s degree.

Virtually every student will teach rhetoric classes, and is required to enroll in a teaching proseminar (ENGL 593) if s/he has not taken such a class at the Master’s level.

Elective hours selected from the list below in consultation with advisor, to bring total course work hours to 32

Language Requirement: Students must demonstrate knowledge of one foreign language in a level equivalent to that required of master’s candidates in the English Department’s program.

Information listed in this catalog is current as of 04/2016
Specialization:
Course work listing for Ph.D. requirements for the Writing Studies Specialization:

- Eight additional semester-long courses at the 400 and 500 level.
- These, selected in consultation with a faculty advisor, either focus on the proposed field of specialization and allied fields—in English or in other disciplines—or fill gaps in the student's background.
- Doctoral students in literature will either take a Professional Seminar in the teaching of literature or film or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. They are expected to teach at least one literature course during their Ph.D. work.
- The Foreign Language Requirement (if not already satisfied at the M.A. level) may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways: By completing the equivalent of three full years of undergraduate work; By passing a proficiency exam administered by a UIUC foreign language department; By passing a non-credit 501 language course with a grade of B or better.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student’s approved special field list—which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Course work listing for Ph.D. requirements for the Literature Specialization:

- Eight additional semester-long courses at the 400 and 500 level.
- These, selected in consultation with a faculty advisor, focus on the proposed field of specialization and allied fields—in English or in other disciplines—or fill gaps in the student's background.
- Doctoral students in literature will either take a Professional Seminar in the teaching of literature or film or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. They are expected to teach at least one literature course during their Ph.D. work.
- The Foreign Language Requirement (if not already satisfied at the M.A. level) may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways: By completing the equivalent of three full years of undergraduate work; By passing a proficiency exam administered by a UIUC foreign language department; By passing a non-credit 501 language course with a grade of B or better.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student’s approved special field list—which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Course work listing for Ph.D. requirements for the Writing Studies Specialization:

- Eight additional semester-long courses at the 400 and 500 level.
- These, selected in consultation with a faculty advisor, focus on the proposed field of specialization and allied fields—in English or in other disciplines—or fill gaps in the student's background and include ENGL 505 and 2 methodology courses (at least one of which is an ENGL 582), the second methodology course should be approved by the advisor and typically will be approved by the Center for Writing Studies for the methodology requirement in its Writing Studies Graduate Concentration). In addition, students must take one course in Literature or Theory. Specific courses taken at the MA level (ENGL 505 and ENGL 582) are counted as fulfilling those specific requirements at the PhD level.
- Students who enter the Ph.D. program with an M.A. from another institution must show demonstrated reading knowledge of a foreign language.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student’s approved special field list—which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Entomology

http://www.life.illinois.edu/entomology/

Head of the Department: May R. Berenbaum
320 Morrill Hall
505 South Goodwin Avenue
Urbana, IL 61801
(217) 333-2910
E-mail: entowork@life.uiuc.edu

Major: Entomology
Degrees Offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Entomology and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Entomology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The program is designed to accommodate incoming students with a wide range of entomological expertise. The goal of the program is to provide students with a strong background in basic biology as it relates to insects and to equip them with the specialized intellectual and technical skills to pursue a career in research, teaching, and service in entomology and related biological disciplines.

Major areas of specialization within the department include systematics, evolutionary biology, molecular genetics, genomics, phytochemical ecology, population biology, toxicology, neurophysiology, neuroanatomy, developmental biology, behavior, sociobiology, endocrinology, and integrated pest management.

Admission

The Graduate Record Examination (GRE) general test is not required, but strongly recommended. A Test of English as a Foreign Language (TOEFL) score of 550 or better is preferred. Previous training in entomology is unnecessary. It is recommended that students who intend to study for advanced degrees in entomology gain a thorough grounding in the physical and biological sciences, mathematics, and the liberal arts. Spring Admission is possible.
Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Entomology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended.

Financial Aid
Graduate student awards are available, including teaching and research assistantships. In addition, fellowships and traineeships are offered by the Graduate College and the School of Integrative Biology, and the Program in Ecology, Evolution and Conservation Biology. A single application to the department is sufficient for consideration for all awards currently available.

Master of Science in Entomology
A candidate for the M.S. degree is expected to become knowledgeable in entomology through coursework and independent research and to complete a research thesis in an area of interest chosen in consultation with an adviser.

Contact: Matthew A. Rosenstein
(217) 265-7515
Email: eucenter@illinois.edu

Major: European Union Studies
Degrees Offered: M.A.
Graduate Minor: European Union Studies

Graduate Degree Programs

The European Union Center administers an interdisciplinary program of language and area courses leading to a Master of Arts degree. The program is intended to serve three constituencies of students: those seeking to combine area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those seeking a stand-alone, professional degree.

Admission

Applicants for admission to the Master of Arts program should have completed at least two years of a language of the European Union and hold a bachelor’s degree from an accredited institution of higher education. The Graduate Record Examination (GRE) is required. Admission requirements of the Graduate College also apply. The minimum paper-based Test of English as a Foreign Language (TOEFL) score is 550 (213 on the computer-based test or 79 on the iBT).

Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), a writing sample, and three letters of reference. Applicants must also submit to the European Union Center a statement of purpose showing how the M.A. degree in European Union Studies fits into their educational and career plans. This statement must show that the interdisciplinary nature of the MA in EU Studies will serve the student better than a disciplinary degree. Admission is ordinarily limited to the fall semester, but exceptions are made for spring and summer admission.

Master of Arts in European Union Studies

Students pursuing the thesis option are required to conduct an oral thesis defense before an MA thesis committee. The thesis committee must consist of at least two individuals, with at least one member drawn from the EU Center Executive Staff. The thesis advisor (committee chair) must be a member of the Graduate Faculty.

Graduate Concentrations: Accountancy (p. 303) (M.S. only), Business and Public Policy (p. 419) (M.S. only), Corporate Governance and International Business (p. 349) (M.S. only), Information Technology and Control (p. 349) (M.S. only)

Graduate Minor: Finance
Graduate Concentrations: Business and Public Policy, Finance

Graduate Degree Programs

The Department of Finance offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. The following fields are available for specialization: banking and financial institutions, corporate finance, insurance and risk management, investments, and real estate and urban land economics.

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). To be admitted without deficiencies, the applicant should have completed one undergraduate course each in computer science, financial accounting, managerial accounting, and principles of economics as well as two courses each in calculus, probability and statistics, and financial management. Courses to remove deficiencies may be taken after beginning the program, but such courses will not count toward the departmental requirements for graduation. All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or iBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant’s qualifications for graduate study.

Master of Science in Finance

Terminal masters: The Master of Science in Finance (terminal master’s) is a 15 month program designed primarily for practitioners in finance-related positions. The program is designed to be completed in 15 months, beginning in August.

Admission requirements and other details about the program can be found at www.business.illinois.edu/msf (http://www.business.illinois.edu/msf).

Ph.D. only option

For Ph.D. students: A Master of Science degree is available for students in the Ph.D. program. Ph.D. students may earn a masters degree as they work toward the Ph.D. degree. Students interested in a terminal masters degree are not admitted to the Ph.D. program. Options available at this University for a terminal masters degree in finance include the M.S. in Finance (terminal masters) described above, and the MBA with a track in finance as described under the section on Business Administration - MBA.

Doctor of Philosophy in Finance

The first stage toward the degree of Doctor of Philosophy ends when the candidate receives a master’s degree in finance or earns the equivalent credit (a minimum of 32 graduate hours at this University or 32 semester hours or 48 quarter hours of acceptable work at another recognized university). The second stage comprises certain minimum coursework, fulfillment of other departmental requirements, and successful completion of qualifying and preliminary examinations. The third stage includes preparation of a dissertation and the final examination. The minimum number of graduate hours required for the second and third stages combined is 64. A student plans courses and research with his or her adviser. Consideration is given to previous academic training, career objective, and the general requirements of the Graduate College and the department. The student should become familiar with these requirements and satisfy them as soon as possible.

To enter the third stage of the doctoral program, a candidate must pass a written qualifying examinations to test his or her qualifications for further advanced study and research, as well as teaching. An oral preliminary examination is required for the field of finance. An oral defense of the proposal for the dissertation is the final step in the second stage.

The Doctor of Philosophy is primarily a research degree, and the candidate must demonstrate the capacity for independent research by producing an original thesis on a topic within his or her major field of study. The subject of the thesis must be reported to the doctoral committee and to the Graduate College at the time of the preliminary examination. The candidate is admitted to the final oral examination by the dean of the Graduate College upon completion of the dissertation and the recommendation of the department.

The doctoral program generally begins in the fall semester. The application period typically runs October 1 through February 1.

Additional details on the program may be found at https://business.illinois.edu/finance/programs/ ECON 502 Economic Statistics (and prerequisites if required (ECON 500, ECON 501, ECON 506) 4-16

ECON 507 Computational G E Modeling 4

At least two doctoral level courses beyond the minimum course requirements in econometrics and statistics, with a minimum grade of B in each

FIN 590 Individual Study and Research 4

FIN 591 Theory of Finance 4

FIN 592 Empirical Analysis in Finance 2-4

Graduate Minor in Finance

The graduate minor in Finance is reserved for students admitted to the Master of Accounting Science program. Accountants with expertise in finance are increasingly highly valued by many employers. The graduate minor in Finance is designed to allow students in the MAS program to demonstrate substantive competency in the field of Finance. Counting
the prerequisite requirement, the graduate minor is the equivalent of four graduate courses. Admission is limited and acceptance is on a competitive basis.

Prerequisites for the Minor
Admission to the minor requires the completion of either FIN 221 and FIN 300 or FIN 520 as a prerequisite. All courses must have been taken for a grade.

Admission to the Minor
Admitted MAS students should first consult with the MAS Program Advisor to determine if the minor is appropriate for the student. Information on how to apply will be available through the MAS Program Advisor. Students admitted to the MAS program may also email finance@illinois.edu for more information on the Finance Minor.

Advising Notes
The graduate minor can only be completed within the Fall semester of the fifth year of the MAS program. The three required graduate courses are not available in the Spring semester. Students who drop any of the three required courses in Fall will be treated as having dropped the minor.

Students should have already completed FIN 300 before enrolling in the graduate minor. Students may apply while enrolled in FIN 300; however, the application decision may be deferred until successful completion of FIN 300. FIN 300 must be taken on this campus. Students who plan to take the graduate minor SHOULD NOT register for FIN 321, FIN 411, or FIN 412 as undergraduates. Students who have completed any of the following courses are not eligible to pursue the minor: FIN 411, FIN 321, or FIN 412.

Note: Students within the major can not minor in the same program.

FIN 511 Investments 4
FIN 512 Financial Derivatives 4
FIN 521 Advanced Corporate Finance 4
Total Hours 12

Other Requirements
The Finance minor consists of these 3 courses, designated for the MAS students, completed during the Fall semester. There are no substitute courses.

Please contact your department for more information regarding the addition of a minor to your program of study.

1 For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Graduate Concentrations
- Finance (p. 419)
- Business and Public Policy (p. 419)

Graduate Concentration in Business and Public Policy
Today's business leaders must make strategic decisions in an extremely complex world. In addition to navigating the rapidly changing market forces in their industry, companies operate in an environment that is strongly influenced by regulatory and public policy considerations. Furthermore, our public sector leaders must also understand how market forces can help or hinder alternative solutions to society's most pressing problems. The business and public policy graduate concentration is designed to provide graduate business students a framework for evaluating the impact of public policy on firms and the markets in which they operate.

The concentration is open to all master's programs (Master of Accountancy Science, Master of Science in Accountancy, Master of Science in Finance, Master of Science in Business Administration, Master of Science in Technology Management, and Master of Science in Business Administration (International Management) in the College of Business but required of none.

Candidates will apply to the Department of Finance for admission into the concentration. Students wishing to be admitted to the concentration should consult with their program advisor before applying.

Complete 12 hours from the following list: 12
- FIN 536 Government Insurance Programs
- FIN 571 Retirement Policy
- FIN 572 Health Care Policy
- FIN 573 Competition Policy
- FIN 574 Individual Tax Policy
- FIN 575 Business Tax Policy
- FIN 576 Domestic Environmental Policy
- FIN 577 International Environmental Policy
- FIN 578 Govt Market Economy

Total Hours 12

Other Requirements
In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Concentration in Finance
This concentration is only available to students enrolled in the Master of Accounting Science program. Students admitted into the concentration must have successfully completed Finance 300. The Finance concentration consists of these 3 courses, with sections designated for the MAS students, completed during the Fall semester. There are no substitute courses.

Admitted MAS students should first consult with the MAS Program Advisor to determine if the concentration is appropriate for the student. Information on how to apply will be available through the MAS Program Advisor. Students admitted to the MAS program may also email finance@illinois.edu for more information on the Finance Concentration.

Graduate Degree Programs

This Master of Science in Financial Engineering (MSFE) degree program is jointly sponsored by the Department of Industrial and Enterprise Systems Engineering (ISE) in the College of Engineering and the Department of Finance in the College of Business. Graduates from this program receive the MSFE degree awarded by the Graduate College. The MSFE program complements other Finance (http://www.business.illinois.edu/finance) and ISE (http://www.iese.illinois.edu) graduate programs offered by the sponsoring departments.

Financial Engineering (FE) is a relatively young, multidisciplinary field that pertains to the application of engineering approaches and methods to the analysis and management of financial problems, particularly in the financial asset arena. Common problems involve identifying and managing financial risk in asset portfolios and asset positions and pricing of financial derivatives. Other applications exist in proprietary security trading operations, as well as in practically all practical domains where risk is an important concern. The field has emerged as the result of the ever growing complexity required in describing and solving these business problems whose resolution requires fundamental economic principles and finance theory coupled with state-of-the-art mathematical methods, computational tools, and computer programming expertise.

Admission

Successful applicants to the MSFE Program will have a Bachelor’s degree with one year of calculus, one semester of linear algebra and differential equations, one semester of programming (preferably in C/C++), and one semester of probability and statistics. Knowledge of basic finance and economics is helpful but not necessary. Given its technical emphasis, applicants to this program typically will have completed a Bachelor’s degree in an engineering field, mathematics, physics, computer science, or economics that provides sufficient preparation to facilitate a fast-paced, in-depth learning environment.

All applicants are expected to have a minimum grade point average of at least 3.25 (A=4.00) for the last two years of undergraduate study and a 3.50 for any previous graduate work completed. Scores on the Graduate Record Examination (GRE) general test are required of all applicants. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of at least 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 7.0 overall and 6.0 in all subsections.

Master of Science in Financial Engineering

Covering topics in finance, economics, numerical methods, stochastic calculus, and computer programming, the MSFE is a rigorous, three-semester, 48-credit, resident degree program with a summer internship opportunity. Twelve courses each of 4 graduate credits are required for graduation; they are expected to be taken in sequence in the respective semesters. Details on the program may be found at msfe.illinois.edu (http://msfe.illinois.edu).

Major: Food Science and Human Nutrition
Degrees Offered: M.S., Ph.D.
Graduate Concentrations: Food Science (all degrees), Human Nutrition (all degrees), Professional Science Master’s (p. 425) (M.S. only)
Off-Campus Program: Food Science and Human Nutrition
Degree Offered: M.S.

Joint Degree Program: Doctor of Philosophy in Food Science and Human Nutrition and Master of Public Health (p. 374)

Degrees Offered: Ph.D. and M.P.H.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Food Science and Human Nutrition and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd)

Graduate Degree Programs

The Department of Food Science and Human Nutrition offers traditional graduate programs leading to the Master of Science and Doctor of Philosophy degrees with either a food science or human nutrition concentration. In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- food processing and food engineering
- food packaging
- food chemistry
- food biochemistry
- food microbiology
- food safety
- biotechnology
- human nutrition through the life cycle
- nutritional aspects of exercise
- nutrient metabolism
- nutrition and disease interactions
- nutrient composition of foods
- sensory and instrumental evaluation of food quality
- community nutrition
- clinical nutrition

For additional information go to fshn.illinois.edu/graduate (http://fshn.illinois.edu/graduate).

The department also offers a Professional Science Master’s (PSM) concentration. The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to psm.illinois.edu/prospectivestudents/programs/foodscience.htm (http://psm.illinois.edu/prospectivestudents/programs/foodscience.htm).

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Graduate Record Examination (GRE) scores are required of all applicants, and those whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Minimum TOEFL and IELTS scores can be found at grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c). Students can be admitted to start in fall, spring, or summer semesters except for the PSM concentration, which admits fall semester only. For information on the role faculty have in the admissions process go to fshn.illinois.edu/graduate/applying (http://www.fshn.illinois.edu/graduate/applying).

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master’s and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program please contact Ms. Jessica Madson (jamadson@illinois.edu).

Off-Campus Program

A Master of Science in Food Science and Human Nutrition degree program is offered online in live, synchronous sessions using distance education technology. Courses are typically offered in the evening or on Saturdays. Most students in this program choose the non-thesis option. For requirements and additional information, please contact Dr. Dawn Bohn at dbrehart@illinois.edu.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Food Science and Human Nutrition. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. Financial aid for non-PSM graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid for graduate students can be found at fshn.illinois.edu/graduate/financial-assistance (http://fshn.illinois.edu/graduate/financial-assistance).
