GENERAL INFORMATION

The University of Illinois at Urbana-Champaign 2017-2018 Academic Catalog is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the Catalog is in effect.

The class schedule is available each term in the Course Explorer (http://courses.illinois.edu). The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this Catalog are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors.

Courses numbered 200-299 are intended for lower division students who satisfy the published prerequisite(s), if any. Transfer credit from two-year colleges around the state would correspond to 100 and 200-level offerings.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from a community college does not correspond to these numbers.

Courses numbered 400-499 are intended for upper division undergraduate students, sometimes also for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law and veterinary programs.

Course credit is listed after each course title. The University counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer (http://courses.illinois.edu). For information on credit policies, see the Student Code.

A crosslisted course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or several departments and will be noted by the statement: “Same as.” The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department’s course is noted by “See...”

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Degree Programs

The undergraduate degree programs of study are organized by Colleges and Schools. Specific majors can be found by clicking on degree programs in the left-hand navigation or by exploring offerings in each college or school or by using the "Undergraduate Programs" link in the upper navigation bar to find an alpha list of programs offered as majors, minors or concentrations. Graduate programs of study are organized by program. A listing of programs is found in the left-hand navigation as well as the "Graduate Programs" tab in the upper navigation bar.

General Education Requirements

The General Education (GenEd) requirements describe the core courses all students must take in order to graduate. They are an important component of students’ education at the University of Illinois. Besides specializing in a major and training for a career, students should become familiar with some of the many rapidly changing disciplines. Through these requirements, Illinois undergraduates:

• expand their historical, aesthetic, cultural, literary, scientific, and philosophical perspectives
• improve critical and analytical thinking; and
• learn skills in finding, managing, and communicating knowledge.

Courses are noted as fulfilling one or more of the following categories:

• Composition I
• Advanced Composition
• Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
• Natural Sciences and Technology: Life Science or Physical Science
• Social and Behavioral Sciences
• Cultural Studies: Western/Comparative Cultures or Non-Western/US Minority Culture(s)

Policy Notes

Illinois Copyright Policy

The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources)
Annual Copyright Notice to Students (p. 2)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (http://copyright.illinois.edu/compliance).

Information listed in this catalog is current as of 03/2017
Religious Observances
The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).

Smoke-Free Campus
As of January 1, 2014, smoking is prohibited on all campus property at the University of Illinois at Urbana–Champaign, both indoors and outdoors, in university-owned vehicles and in privately-owned vehicles parked on campus property. The advertising, sale, or free sampling of tobacco products is also prohibited on campus property. Littering the remains of tobacco products or any other related waste product on campus property is further prohibited. The complete policy is available here (http://cam.illinois.edu/v/v-B-2.1.htm).

Student Code
Policies and procedures applying apply to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code (http://studentcode.illinois.edu).

Student Consumer Information
Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois at Urbana-Champaign is available on the Office of the Provost’s website (http://provost.illinois.edu/student-consumer-information). This includes a description of the institution’s accreditation and state authorization, contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.

Annual Announcement of Copyright Policies
Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies, please note that it is not necessary to reply to this email.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) music, movies and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages set at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504 and 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

All campuses of the University of Illinois make every effort to comply with laws and institutional policies on copyright. Students that receive a copyright infringement notice may face disciplinary actions. These disciplinary actions may include, and are not limited to, loss of network access, mandatory training about copyright infringement, sanctions of record on academic transcripts, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: http://copyright.illinois.edu.

Agricultural, Consumer and Environmental Sciences, College of

The College of Agricultural, Consumer and Environmental Sciences plays a key role in national and international research initiatives in biological, physical, social, and economic sciences. The scope of the College has broadened dramatically since its founding in 1867, while its purpose remains focused on advancing scientific knowledge that makes life better, healthier, safer, and more profitable for people in Illinois and around the globe. The College offers 10 undergraduate majors with 39 different concentrations.

The ACES College enrolls more than 2,700 students in its seven departments, leading to a Bachelor of Science degree. Students can select from majors and concentrations that direct the focus of study to their specific interests.

Teaching, research, and outreach opportunities are supported by excellent resources. The College of ACES Library and Information Center houses the college’s collection of educational resources, computing facility and the College of ACES career development and placement office, which assists students in personal and career development through internships and placement after graduation. The Family Resiliency Center, Institute for Genomic Biology, Child Development Laboratory and extensive research centers in Champaign-Urbana and across the state are other examples of unique and excellent college resources. For instance, the Morrow Plots, a national historic landmark established in 1876, are the oldest agronomic research plots in the United States. The Morrow Plots are located on campus next to the undergraduate library.

The ACES James Scholar Honors Program and the Jonathan Baldwin Turner Undergraduate Research Program offer excellent opportunities for students to be involved in cutting edge research and solving contemporary challenges. Research is conducted in the broad areas of consumer behavior, biotechnology, environmental quality and protection, financial planning, food science, human nutrition, natural resource systems, and individual and family well-being.
Increasing the international knowledge and experience of students and faculty helps meet the growing demand for graduates who are internationally literate and able to work effectively in different countries, in different languages and with people of different cultures. The academic programs office provides initiative and focus to College international study abroad programs as well as integrating an international dimension to the educational experience.

The distinguished faculty, innovative programs, and pioneering achievements in teaching, research, and outreach activities, together with an enthusiastic and competitive student body, place the College of ACES among the top institutions in the country in a survey of peers.

Departments and Curricula

The Department of Agricultural and Biological Engineering offers two majors: Agricultural and Biological Engineering/Agricultural Engineering Sciences and Technical Systems Management. Students in the Agricultural and Biological Engineering major earn that degree from the College of Engineering and have the option of a second degree in Agricultural Engineering Sciences. This major is designed to produce graduates who have a basic engineering education for careers of engineering service to the agricultural, environmental, and biofuels industries. The intent of the program is to provide a combination of engineering theory and applications courses to permit students to pursue goals in academia, government or industry. The graduates are expected to provide engineering solutions in agricultural production, bioprocesses and product utilization, natural resources conservation, and are exposed to current social and cultural concepts and ideas. The Technical Systems Management major is designed to prepare students for careers requiring the application, management, and marketing of engineering technologies. Students study technological systems, business and economics (including organization, operations, management, marketing, and sales), and oral and written communications. Graduates of the TSM program accept positions of employment at highly competitive salaries.

The Department of Agricultural and Consumer Economics offers programs designed to prepare students for business- or policy-related fields with special emphasis on agriculture, consumers, and environmental protection. Students' study is concentrated in one of the following areas: agri-accounting; finance in agribusiness; agribusiness markets and management; consumer economics and finance; environmental economics and policy; farm management; financial planning; policy, international trade and development; and public policy and law.

The Department of Animal Sciences offers undergraduate students unique opportunities to conduct research projects with faculty. In addition, many students gain animal experience by working part-time at the U of I Farms. Internships and field study trips are additional avenues of gaining knowledge and experience. Study Abroad experiences are also strongly encouraged. Areas of concentration are companion animal and equine science; science, pre-veterinary and medical; and technology and management.

The Department of Crop Sciences major in Crop Sciences offers concentrations of study in plant biotechnology and molecular biology, crop agribusiness, biological sciences, agroecology, plant protection, horticultural food systems, and crops. In each of these concentrations students receive a strong grounding in science and can apply that knowledge through internship experiences with a wide range of agricultural employers. Each concentration can lead to employment immediately after completion of the B.S. degree, or to graduate or professional study.

The Department of Food Science and Human Nutrition offers concentration of study in dietetics, food science, hospitality management, and human nutrition. Courses in the department include the applications of biology, engineering, chemistry, physics, and microbiology to the processing, formulation, packaging, and distribution of food.

The Department of Human Development and Family Studies’ major allows students to choose to concentrate their study in either child and adolescent development or family studies. The program prepares students for graduate education or employment in areas such as child care services, family life education, social work, human services, marriage and family counseling, pediatric services in hospitals, cooperative extension work or business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender.

The Department of Natural Resources and Environmental Sciences provides students the opportunity to study resource and wildlife conservation and management, restoration ecology, the impacts of global change, and human dimensions of the environment. NRES is an interdisciplinary program that brings biological, physical, and social scientists together to teach and discover techniques to improve the health and integrity of urban and natural ecosystems.

Agricultural Communications is a major offered jointly by the Colleges of ACES and Media. The program is administratively housed in the College of ACES. Students specialize in advertising or journalism and go on to careers and graduate study in newspaper and magazine writing and publishing, advertising, broadcasting, and public relations.

The program in Agricultural Education offers the Agricultural Leadership and Science Education major. Students select a concentration of either Agricultural Leadership Education or Agricultural Science Education. This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu)).

Admission Requirements

Freshman applicants must meet general course pattern admission requirements of the University.

Applicants for freshman admission are evaluated on the basis of their ACT scores, high school percentile rank, and statements of personal and professional interest, among other factors. Detailed information on the admission process may be obtained from the Office of Undergraduate Admissions.

Information listed in this catalog is current as of 03/2017
Transfer applicants are evaluated on the basis of their transfer grade point averages and completion of core course requisites. Transfer applicants to the Dietetics and Human Nutrition major must have a grade point average of at least 3.0 (A = 4.0); applicants to Agricultural and Consumer Economics and Agricultural Science Education need a minimum GPA of 2.75, and all other curricula require at least a grade point average of 2.5. Applicants are encouraged to consult the Office of Undergraduate Admissions for specific course requirements.

Graduation Requirements

The minimum number of hours required for graduation varies between 126 and 130 for all curricula within the college. Included in the total must be all courses prescribed in the given curriculum and a sufficient number of electives to obtain the total number.

Each candidate for graduation must have a grade point average of not less than 2.0 (A = 4.0), including grades in courses transferred from other institutions, and a grade point average of not less than 2.0 in all courses taken at the University of Illinois at Urbana-Champaign. Candidates for graduation from Dietetics, Human Nutrition, and Agricultural Science Education must have institutional and overall grade point averages of at least 2.5 (A = 4.0).

Scholarship Information

A number of scholarships for undergraduate students enrolled in the College of ACES are made available through the generous support of alumni and friends of the College. Incoming and currently enrolled ACES students are eligible for consideration for merit-based awards that are awarded annually by the College. Additional information on scholarships for ACES students can be found at academics.aces.illinois.edu/scholarships (http://academics.aces.illinois.edu/scholarships).

Agricultural and Biological Engineering

Alan Hansen, Interim Head
338 Agricultural Engineering Sciences Building
304 West Pennsylvania Avenue
PH: (217) 333-3570
http://abe.illinois.edu

The Department of Agricultural and Biological Engineering offers two academic majors through the College of ACES: The five-year combined program in Agricultural and Biological Engineering Sciences and the major in Technical Systems Management. The Department also offers a four-year major in Agricultural and Biological Engineering through the College of Engineering.

- Major in Agricultural and Biological Engineering (p. 147)
- Dual Degree in Agricultural and Biological Engineering/Agricultural and Biological Engineering Sciences (p. 12)
- Major in Technical Systems Management (p. 13)
- Minor in Technical Systems Management (p. 14)
- Minor in Agricultural Safety and Health (p. 14)

ABE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ABE)

Agric Biological Engineering Courses

ABE 100 Intro Agric & Biological Engrg  credit: 1 Hour.
Introduction to the engineering profession with career opportunities in the agricultural and biological engineering discipline. Concepts necessary for becoming a successful engineer including time management, design concepts, ethics, and teambuilding. Familiarization with laboratories, computer facilities, internships, and other opportunities. Team design experience. Emphasis on technical communication and problem-solving skills as well as career planning.

ABE 141 ABE Principles: Biological  credit: 2 Hours.
Principles of biology relevant to agriculture, food, energy, and the environment, including microbiology, biochemistry, genetics, plant and animal systems, and ecosystems. Case studies of engineering applications where these biological principles have been taken into account or leveraged for the purpose of design.

ABE 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 12 hours.
ABE 222  ABE Principles: Machine Syst  credit: 2 Hours.
Machinery systems for off-road applications: internal combustion engines; fluid power; tractors, and traction; chemical application; grain harvesting. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 224  ABE Principles: Soil & Water  credit: 2 Hours.
Engineering principles and methods of design and management of natural resources and environmental systems; watershed and hydrologic cycle; infiltration and surveying; runoff and erosion; water quality; non-point source pollution. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 225  ABE Principles: Bioenvironment  credit: 2 Hours.
Principles of environmental control for biological structures: psychrometrics; mass and heat transfer through buildings; ventilation requirements. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 226  ABE Principles: Bioprocessing  credit: 2 Hours.
Principles of bioprocess engineering applied to food and agricultural products: material balances; fluid flow; heat and mass transfers; drying; evaporation; fermentation; distillation; process simulation. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 341  Transport Processes in ABE  credit: 3 Hours.
Principles of transport processes involving momentum, heat, and mass as applied to biological systems in agriculture, food, energy, and the environment. Credit is not given for both ABE 341 and CHBE 421. Prerequisite: ABE 223, ABE 224, ABE 225, ABE 226, and PHYS 213.

ABE 361  Off-Road Machine Design  credit: 3 Hours.
Design and development concepts of agricultural and industrial machines; analysis and synthesis of tillage, planting, harvesting, chemical application, material handling mechanisms, and precision farming tools. Prerequisite: ABE 223 and TAM 212.

ABE 397  Independent Study  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development or design work under the supervision of a member of the faculty. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

ABE 398  Special Topics  credit: 1 to 3 Hours.
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate term if topics vary to a maximum of 12 hours.

ABE 425  Engrg Measurement Systems  credit: 4 Hours.
Principles of instrumentation systems, including sensing, signal conditioning, computerized data acquisition, test design, data analysis and synthesis. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 425 and ME 360. Prerequisite: ECE 205.

ABE 430  Project Management  credit: 2 Hours.
Engineering team effectiveness; project definition; assessing related technologies; marketing and business planning related to engineering; budgeting and financial analyses of engineering projects; safety, ethics and environmental considerations; intellectual property; engineering proposal presentation. Same as TSM 430. 2 undergraduate hours. 2 graduate hours.

ABE 436  Renewable Energy Systems  credit: 3 or 4 Hours.
Renewable energy sources and applications, including solar, geothermal, wind, and biomass. Renewable energy's role in reducing air pollution and global climate change. Capstone project to design a system for converting renewable energy into thermal or electrical energy. 3 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 436 and TSM 438. Prerequisite: PHYS 211.

ABE 440  Applied Statistical Methods I  credit: 4 Hours.
Same as ANSC 440, CPSC 440, FSHN 440, and NRES 440. See CPSC 440.

ABE 445  Statistical Methods  credit: 4 Hours.
Same as ANSC 445 and NRES 445. See ANSC 445.

ABE 446  Biological Nanoengineering  credit: 3 or 4 Hours.
Nanodevice design through organization of functional biological components; bio-molecular function and bioconjugation techniques in nanotechnology; modulation of biological systems using nanotechnology; issues related to applying biological nanotechnology in food energy, health, and the environment. 3 undergraduate hours. 4 graduate hours. Prerequisite: MCB 150.

ABE 454  Environmental Soil Physics  credit: 3 Hours.
Provides the theoretical basis for understanding and quantifying the physical, hydrological, geotechnical, and thermal properties of soil in relation to environmental processes. Topics include general soil properties as a porous media, particle size, soil structure and aggregation, water retention and potential, flow in saturated soil, flow in an unsaturated soil, soil temperature and heat flow, soil mechanics, infiltration, and soil-plant-water relations. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 335 or NRES 201 or consent of instructor.

ABE 455  Erosion and Sediment Control  credit: 2 Hours.
Processes, estimation, and control of soil erosion by water, wind and resultant sedimentation. Upland, in-channel, urban, agricultural, disturbed (both military training and mining), and forested environments. Capstone experience in site planning and design. 2 undergraduate hours. 2 graduate hours. Prerequisite: CEE 350 or NRES 401; CEE 380 or NRES 201.

ABE 456  Land & Water Resources Engrg  credit: 3 or 4 Hours.
Hydrology, hydraulics, design, construction and cost estimating of structures for the conservation and quality control of soil and water resources; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality control of soil and water for agriculture. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in TAM 335.

ABE 457  NPS Pollution Processes  credit: 2 Hours.
Principles, concepts, and analysis of processes for nonpoint source pollution involving sediment, inorganic and organic chemicals, and microbial pathogens; hydrologic and pollutant interactions, pollutant fate and transport processes from storm water runoff and percolation; impact of pollutant transport on receiving water and ecosystems. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 224 or CEE 350.

ABE 458  NPS Pollution Modeling  credit: 2 Hours.
Concepts, principles, and application of modeling for assessment and management of agricultural nonpoint source pollution. Modeling of agroecosystems and land use impacts on hydrologic and water quality response of upland catchments. Model selection, calibration, validation, and application for comparative analysis. Case studies in current watershed management issues, with a focus on agricultural waste and nutrient management, using existing field and watershed nonpoint source pollution models. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 457.
ABE 459 Drainage and Water Management credit: 3 or 4 Hours.
Design, construction, performance, and maintenance of agricultural
drainage systems to meet both production and water quality objectives.
Modeling drainage systems. Principles of conservation drainage. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or
concurrent registration in TAM 335.

ABE 463 Electrohydraulic Systems credit: 3 Hours.
Engineering principles of electrohydraulic control systems related
to off-road vehicles. Basics of fluid power systems, concepts of
electrohydraulic systems and controls, analysis and design of
electrohydraulic control, and applications of electrohydraulic control.
3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 110
or both ECE 205 and ECE 206; ME 310 or TAM 335.

ABE 466 Engineering Off-Road Vehicles credit: 3 Hours.
Design and application of off-road vehicles for farm and construction use;
thermodynamics of engines; measurement of power and efficiencies;
power transmission and traction; chassis mechanics; operator
environment. 3 undergraduate hours. 3 graduate hours. Credit is not
given for both ABE 466 and TSM 464. Prerequisite: ME 300.

ABE 469 Industry-Linked Design Project credit: 4 Hours.
Industry-submitted and sponsored design projects which utilize
principles of design, engineering analysis and functional operation
of engineering systems. Design teams develop concepts, evaluate
alternatives, model and analyze solutions, and build and test a final
product. Emphases on communication skills, technical writing, and
interaction with industry representatives. 4 undergraduate hours. 4
graduate hours. Prerequisite: One of ABE 361, CHBE 421, TAM 335; or
credit or concurrent registration in ME 370.

This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

ABE 474 Indoor Environmental Control credit: 3 Hours.
Analysis of indoor environments and relationship with humans, animals
and plants. Interactions between facilities operation and both human
comfort and animal plant production. Psychrometrics, occupant
health and comfort, structural heat transfer, heating and cooling loads,
and energy and mass balances as related to indoor environment, air
properties, and ventilation. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: TAM 335, and ME 300 or CHBE 321, or consent of instructor.

ABE 476 Indoor Air Quality Engineering credit: 4 Hours.
Principles and applications of indoor air quality. Particle mechanics,
gas kinetics, air quality sampling principles and techniques, air cleaning
technologies such as filters, cyclones, electrostatic precipitation for
indoor environments; ventilation effectiveness for pollutant control.
Research or design project. 4 undergraduate hours. 4 graduate hours.
Prerequisite: PHYS 213, MATH 285, and TAM 335.

ABE 482 Package Engineering credit: 3 Hours.
Same as FSHN 469. See FSHN 469.

ABE 483 Engrg Properties of Food Matls credit: 3 Hours.
Physical properties of foods and biological materials; properties relating
to equipment design and the sensing and control of food processes;
thermal, electromagnetic radiation, rheological, and other mechanical
properties. 3 undergraduate hours. 3 graduate hours. Prerequisite:
TAM 251; either CHBE 421 or both ME 330 and TAM 335.

ABE 488 Bioprocessing Biomass for Fuel credit: 3 Hours.
Engineering and scientific principles governing bioprocessing of biomass
for production of ethanol and other fermentation products. Process unit
operations; conventional and alternative feed stock materials; recovery
of value-added coproducts and other variables involved in producing fuel
ethanol; process simulation; economic analysis. 3 undergraduate hours.
3 graduate hours. Prerequisite: CHBE 321 and TAM 335.

ABE 497 Independent Study credit: 1 to 4 Hours.
Individual research, special problems, thesis, development or design work
under the supervision of a member of the faculty. 1 to 4 undergraduate hours.
No graduate credit. May be repeated to a maximum of 8 hours.
Prerequisite: Consent of instructor.

ABE 498 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in
agricultural and biological engineering intended to augment the existing
curriculum. See Class Schedule or departmental course information for
topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate
hours. May be repeated in the same or separate terms if topics vary to a
maximum of 16 hours.

TSM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/TSM)

Technical Systems Management Courses

TSM 100 Technical Systems in Agr credit: 3 Hours.
Examples, problems, discussions, and laboratory exercises pointing
to present and potential engineering applications in agriculture;
emphasis on power and machinery, soil and water control, electricity, and
structures.

TSM 130 Basics of CAD credit: 1 Hour.
Introduction to Computer Aided Drawing and Design (CAD). Application
of two and three dimensional CAD tools in construction systems for
creating project plans, structures and building floor plans with fixtures
and layers representing electrical and plumbing configurations.
Self-paced learning through on-line tutorials with instructor guidance.
Prerequisite: TSM 100.

TSM 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Open seminar or experimental course on a topic in technical systems
management. May be repeated to a maximum of 12 hours.

TSM 232 Materials and Construction Sys credit: 3 Hours.
Selection, use, and maintenance of hand and power tools; shop
safety; selection of building and roofing materials; concrete masonry
construction; and site preparation. Includes laboratory. Priority is given
to technical systems management majors.

TSM 233 Metallurgy & Welding Process credit: 3 Hours.
Selecting and using metal-arc, inert-gas, submerged arc, oxyacetylene
welding and plasma cutting processes for construction and maintenance.
Includes laboratory. Additional fees may apply. See Class Schedule.

TSM 234 Wiring, Motors and Control Sys credit: 3 Hours.
Selecting and using wiring materials, electric motors and controls in
lighting, heating, ventilation, and materials handling problems. Includes
laboratory. Prerequisite: TSM 100.

TSM 262 Off-Road Equipment Management credit: 3 Hours.
Performance, costs, application, selection, and replacement of off-road
machinery and field implements; analysis of mechanized field operations.
Includes laboratory. Prerequisite: TSM 100.
TSM 292 Advanced Internship credit: 1 to 4 Hours.
Supervised off-campus experience in a field directly pertaining to technical systems management. May be repeated to a maximum of 6 hours. Prerequisite: Sophomore standing and consent of instructor.

TSM 298 Undergrad Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated to a maximum of 12 hours. Prerequisite: Sophomore standing, cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

TSM 924 Ag Safety-Injury Prevention credit: 3 Hours.
Issues associated with agricultural injuries and their prevention. Areas include: agricultural injury situation; injury causation; injury intervention strategies and their applications to agricultural issues; and, specific safety issues in the areas of farm machinery, grain and forage systems, animals, materials handling, electricity, fire safety, special populations, and emergency preparedness. Course Information: 3 undergraduate hours. 3 graduate hours.

TSM 396 UG Honors Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.
TSM 465  Chemical Applications Systems  credit: 3 Hours.
Hydraulic principles; liquid application systems including pumps, controls, and spray nozzles; granular application systems; safe storage, handling, and disposal of pesticides and fertilizers; federal and state legal requirements. Includes laboratory. 3 undergraduate hours. 3 graduate hours.

TSM 467  Precision Agric Technology  credit: 3 Hours.
Practices and equipment used in precision agriculture. Global positioning systems; geographic information systems; mapping; grid sampling of soil fertility and physical properties; yield monitoring; remote sensing; variable-rate technologies. 3 undergraduate hours. 3 graduate hours.

TSM 486  Grain Bioprocessing Coproducts  credit: 3 Hours.
Bioprocessing of cereals and oilseeds by milling, fermentation and extraction processes in the production of a wide variety of coproducts used in animal foods. Includes the effects of the process variables and bioprocess on coproduct quality and the post-processing of coproducts. 3 undergraduate hours. 3 graduate hours.

TSM 496  Independent Study  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of a faculty member. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: consent of instructor.

TSM 499  Seminar  credit: 1 to 3 Hours.
Group discussion or an experimental course on a special topic in technical systems management. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 12 hours.

Agricultural and Biological Engineering

The Department of Agricultural and Biological Engineering offers a four-year degree program in Agricultural and Biological Engineering through the College of Engineering that is described below.

The Department also offers a five-year dual degree program through both the College of Engineering and the College of ACES. Students who successfully complete this five-year academic program receive the Bachelor of Science in Agricultural and Biological Engineering from the College of ACES. The requirements can be found here (http://catalog.illinois.edu/undergraduate/aces/departments/ag-bio-eng/dual-major-agricultural-biological-engineering-sciences). Both degree programs are joint between the College of Engineering and the College of ACES with students beginning as new freshmen in the College of ACES.

Fax: (217) 244-0323
E-mail: abe@illinois.edu

For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The agricultural and biological engineering program requires one of two concentrations: Agricultural Engineering and Biological Engineering.

Orientation and Professional Development

These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

| ABE 100  Intro Agric & Biological Engrg | 1 |
| ENG 100  Engineering Orientation | 0 |

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

| CHEM 102  General Chemistry I | 3 |
| CHEM 103  General Chemistry Lab I | 1 |
| CHEM 104  General Chemistry II | 3 |
| CHEM 105  General Chemistry Lab II | 1 |
| MATH 221  Calculus I | 4 |
| MATH 225  Introductory Matrix Theory | 2 |
| MATH 231  Calculus II | 3 |
| MATH 241  Calculus III | 4 |
| MATH 285  Intro Differential Equations | 3 |
| PHYS 211  University Physics: Mechanics | 4 |
| PHYS 212  University Physics: Elec & Mag | 4 |
| PHYS 213  Univ Phys: Thermal Physics | 2 |

Agricultural and Biological Engineering Technical Core

| ABE 141  ABE Principles: Biological | 2 |

Concentration Requirements

Students will select one concentration: 14

Agricultural Engineering Concentration

Biological Engineering Concentration

Electives

Technical electives and biological and natural science electives for the selected concentration 21

Liberal Education

The Liberal education courses develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning. 4

Information listed in this catalog is current as of 03/2017
Electives from the campus General Education social & behavioral sciences list.

Electives from the campus General Education humanities & the arts list.

Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Compositions

These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition 6

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Total Hours 128

1 External transfer students take ENG 300 instead.
2 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3 The extra hour of credit for this course may be used to help meet free elective requirements.
4 Liberal education courses
5 ECON 102 or ACE 100 maybe substituted by petition.
6 Satisfied by completing ABE 469 in the Agricultural and Biological Engineering Technical Core.
7 College of Engineering advising Web site.

Concentrations

- Agricultural Engineering (p. 9)
- Biological Engineering (p. 11)

Agricultural Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Renewable Energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering

### Total Hours: 128

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.
2. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 or (ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4. One elective course must satisfy the General Education Advanced Composition requirement. ABE 469 fulfills this requirement.
5. The extra hour of credit for this course may be used to help meet free elective requirements.
6a. Students in the Agricultural Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural).
Students in the Agricultural Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural), and the remainder selected from the approved list of Other Technical Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural).

Biological Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

1. May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Electives

This elective course work must be completed to fulfill this concentration. The subjects build upon the agricultural and biological engineering technical core.

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group B; must include 1 course with a lab component.

Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives - Group B, and the remainder approved Other Technical Electives – Group B; must include one course with a lab component.

Total Hours

2. Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives), and the remainder approved Other Technical Electives – Group B (http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives/#tag1)

Suggested Sequence

The schedule that follows for each concentration is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. Refer to the appropriate sequence below for each concentration.

### Dual Degree in Agricultural & Biological Engineering/Agricultural & Biological Engineering Sciences

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from the College of Engineering as well as Agricultural and Biological Engineering Sciences from the College of ACES. Students first enroll in the College of ACES and then transfer to the College of Engineering after two years. Students then complete the ABET-accredited degree in Agricultural and Biological Engineering in the College of Engineering before entering a fifth year in ACES, in the Agricultural and Biological Engineering Sciences program. The suggested program of study that follows fulfills graduation requirements for both the College of Engineering and the College of ACES.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are

#### Total Hours: 128

---

<sup>1</sup> RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.

<sup>2</sup> MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

<sup>3</sup> Liberal education electives (<https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

<sup>4</sup> One elective course must satisfy the General Education Advanced Composition requirement. ABE 469 fulfills this requirement.

<sup>5</sup> The extra hour of credit for this course may be used to help meet free elective requirements.

<sup>6b</sup> Students in the Biological Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-BioNatSciElectives>), and the remainder selected from the approved list of Other Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>), or additional course work from the campus General Education lists for social & behavioral sciences and 6 hours of humanities & the arts course work.

<sup>7b</sup> Students in the Biological Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>), and the remainder selected from the approved list of Other Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>), or additional course work from the campus General Education lists for social & behavioral sciences and 6 hours of humanities & the arts course work.

<sup>8</sup> May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.
employed by industry, consulting firms, and government for research, education, and manufacturing.

**Overview of Curricular Requirements**

The curriculum for the dual major requires 158 hours for graduation, of which 128 hours are specified for the major in Agricultural and Biological Engineering from the College of Engineering. Curriculum requirements specific to the dual major are organized as follows.

**Completion of degree requirements for Agricultural and Biological Engineering major**

<table>

1. In addition to the Biological and Natural Science Elective hours required for the Agricultural Engineering Concentration (6 hours) and the Biological Engineering Concentration (6 hours), a further 4 hours of biological sciences must be completed from biology, entomology, microbiology, plant biology, physiology, or zoology to make up a **total of 10 hours**. These hours can be selected from the Biological and Natural Science Elective lists for the two concentrations. Other courses with strong biological science content may be approved by the department.

2. Fifteen hours of agricultural sciences with courses from at least two subject areas other than Agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.

3. Sufficient open electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirements for both degrees.

**Major in Technical Systems Management**

**For the Degree of Bachelor of Science in Technical Systems Management**

This major in Technical Systems Management is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of agricultural engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution.

Students can specialize in Construction Systems Management; Environmental Systems Management; Mechanization, Marketing, and Technology Management Systems; Production Systems; or Renewable Energy Systems.

**Prescribed Courses including Campus General Education**

**Composition I and Speech**

Select one of the following: 6-7

- RHET 105 Writing and Research
- & CMN 101 and Public Speaking (or equivalent (see college Composition I requirement))

- CMN 111 Oral & Written Comm I
- & CMN 112 and Oral & Written Comm II

**Advanced Composition**

Select from campus approved list. 3-4

**Cultural Studies**

Two courses; one Western culture and one non-Western/US minority culture course. 6

**Foreign Language**

Coursework at or above the third level is required for graduation.

**Quantitative Reasoning I**

MATH 234 Calculus for Business I (or equivalent) 4

**Quantitative Reasoning II**

Select one of the following: 3-4

- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics
- SOC 280 Intro to Social Statistics
- STAT 100 Statistics

**Natural Sciences and Technology**

- CHEM 102 General Chemistry I & CHEM 103 General Chemistry Lab I 4
- PHYS 101 College Physics: Mech & Heat 5

Select one of the following: 4-5

- CHEM 104 General Chemistry II & CHEM 105 General Chemistry Lab II

Biological sciences (see campus approved list) 3-5

**Humanities and the Arts**

Select from campus approved list. 6

**Social and Behavioral Sciences**

- ACE 100 Agr Cons and Resource Econ 4
- ECON 103 Macroeconomic Principles 3

Social and behavioral sciences. Select from campus approved list. 3-4

**ACES Prescribed**

ACES 101 Contemporary Issues in ACES 2

**TSM Required**

- ACE 161 Microcomputer Applications (or equivalent) 3
- ACCY 200 Fundamentals of Accounting or ACCY 201 Accounting and Accountancy I
- CPSC 112 Introduction to Crop Sciences 4
- NRES 201 Introductory Soils 4
- TSM 100 Technical Systems in Agr 3
- TSM 430 Project Management 2

Information listed in this catalog is current as of 03/2017
Minor in Agricultural Safety and Health

Note: This minor has prerequisites of a minimum of 30 hours with a 2.5 GPA.

- TSM 421 Ag Safety-Injury Prevention 3
- TSM 422 Ag Health-Illnesses Prevention 3
- TSM 425 Managing Ag Safety Risk 3

A minimum of three credit hours is required from the following courses:

- TSM 293 Off-Campus Internship
- TSM 295 Undergrad Research or Thesis
- TSM 496 Independent Study

A minimum of six credit hours selected from:

- CHLH 101 Introduction to Public Health
- CHLH 244 Health Statistics
- CHLH 274 Introduction to Epidemiology
- CHLH 304 Foundations of Health Behavior
- CHLH 469 Environmental Health
- CHLH 474 Principles of Epidemiology
- CHLH 540 Health Behavior: Theory
- FSHN 480 Basic Toxicology
- HDFS 105 Intro to Human Development
- KIN 262 Motor Develop, Growth & Form
- PSYC 100 Intro Psych
- PSYC 103 Intro Experimental Psych
- PSYC 358 Human Factors
- PSYC 456 Human Performance and Cognition in Context

Total Hours: 18

Minor in Technical Systems Management

Note: This minor has prerequisites of a minimum of 60 hours with a 2.5 GPA; completion of MATH 234 or equivalent; PHYS 101 or equivalent;

Information listed in this catalog is current as of 03/2017
Chem 102 and Chem 103 or equivalent; and Phys 102 or Chem 104 and
Chem 105 or equivalent.

TSM 100 Technical Systems in Agr 3
Fifteen Hours, at least six of which must be at the 400 level, selected from:
  TSM 232 Materials and Construction Sys
  TSM 233 Metallurgy & Welding Process
  TSM 234 Wiring, Motors and Control Sys
  TSM 262 Off-Road Equipment Management
  TSM 352 Land and Water Mgt Systems
  TSM 363 Fluid Power Systems
  TSM 371 Residential Housing Design
  TSM 372 Environ Control & HVAC Systems
  TSM 381 Grain Drying & Storage Systems
  TSM 435 Elec Computer Ctrl Sys
  TSM 464 Engine and Tractor Power
  TSM 465 Chemical Applications Systems
  TSM 496 Independent Study

Total Hours 18

Agricultural and Consumer Economics

John Braden, Interim Head
332 Mumford Hall, 1301 West Gregory Drive, Urbana
PH: (217) 333-1810
http://ace.illinois.edu

The Department of Agricultural and Consumer Economics (ACE) has
roots that reach back over 75 years at the University of Illinois at Urbana-
Champaign, a world-wide reputation for its academic excellence, and a
forward-looking vision for excellence in teaching, research, and outreach
related to important economic and social challenges. Visit the ACE
faculty (http://ace.illinois.edu/faculty) websites to learn more about each
faculty member’s interests, publications, and current projects. Sample
highlights include:

• Publications in high impact journals such as Science, PNAS,
  the American Journal of Agricultural Economics, the Journal of
  Environmental Economics and Management, Food Policy and World
  Development
• Steady funding through competitive research grants from sources
  like the NSF, USDA, DOD, and EPA
• Editor of the AJAE and Associate Editors of other top journals
• Fellows of the Agricultural and Applied Economics Association
• Elected leadership positions in professional organizations
  (Agricultural and Applied Economics Association, Association of
  Environmental and Resource Economists)

GRADUATE PROGRAM: Our graduate program is highly ranked nationally
and received a rating of “Excellent” on the Tier-1 research university
campus of UIUC. We have three department seminars in which students
can see and present work in progress, strong core coursework, and
professional development through the second-year research paper
requirement and end-of-program job-market seminar. Our graduate
students have excellent placement both in and out of academia.

UNDERGRADUATE PROGRAM: Our thriving undergraduate program has
over 700 students. We offer concentrations in subjects like agribusiness,
accounting, finance in agribusiness, consumer economics and finance,
environmental economics, farm management, financial planning, policy
and law, and international trade and development. Our hallmarks are
experiential learning outside the classroom; research opportunities in
classes and through independent studies; and excellent placements both
in employment and in graduate and law schools.

Synergies between the undergraduate and graduate programs give
graduate students opportunities for professional development in
instruction and undergrad students opportunities to learn about career
options from graduate student role models.

For the Degree of Bachelor of Science in
Agricultural and Consumer Economics

Prescribed Courses including Campus General
Education

Composition I and Speech 1
Rhett 105 & CMN 101 Writing and Research
and Public Speaking (or equivalent (see
College Composition I requirement)

Advanced Composition 2
Select one of the following:
  BTW 250 Principles Bus Comm
  BTW 261 Principles Tech Comm
  BTW 263 Writing in the Disciplines
  Rhett 233 Adv Rhetoric & Composition
  CMN 220 Communicating Public Policy

Foreign Language
Coursework at or above the third level is required for
graduation.

Quantitative Reasoning I
Select one of:
  Math 124 Finite Mathematics
  Math 125 Elementary Linear Algebra
  Math 231 Calculus II
Select one of:
  Math 220 Calculus
  Math 221 Calculus I
  Math 234 Calculus for Business I

Quantitative Reasoning II 3
Select one of:
  ACE 261 Applied Statistical Methods
  Econ 202 Economic Statistics I
  & Econ 202 Economic Statistics II

Humanities and the Arts
Selected from campus approved list.

Natural Sciences and Technology
Selected from campus approved list.

Social and Behavioral Sciences
Selected from campus approved list.

Cultural Studies
Select one course from Western culture and one from non-
Western/U.S. minority culture from campus approved list.

Information listed in this catalog is current as of 03/2017
**Approved Concentrations:**

- Agri-Accounting (p. 20)
- Agribusiness Markets and Management (p. 20)
- Finance in Agribusiness (p. 21)
- Consumer Economics and Finance (p. 20)
- Environmental Economics and Policy (p. 20)
- Farm Management (p. 21)
- Financial Planning (p. 21)
- Policy, International Trade and Development (p. 22)
- Public Policy and Law (p. 23)

1. Requirement must be satisfied by end of first year.

2. Students are encouraged to complete this requirement prior to the seventh semester.

3. Students pursuing Agricultural Accounting or Finance in Agribusiness must select ECON 202 and ECON 203.

**Concentration prescribed courses.** See specific requirements for each concentration listed below.

**Total Hours**

126

**Courses**

**ACE 100 Agr Cons and Resource Econ credit: 4 Hours.**
Principles of microeconomics; demand, production, supply, elasticity, markets, and trade are presented and used in the analysis of decisions of individuals relating to agricultural production, food and textile consumption, and natural resource use. Macroeconomic concepts are also introduced. Credit is not given for ACE 100 if credit for ECON 102 has been earned.

This course satisfies the General Education Criteria for:

- UIUC: Social Sciences

**ACE 161 Microcomputer Applications credit: 3 Hours.**
Instruction and practice in solving data-related problems with microcomputers and general purpose software packages.

**ACE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.**
Experimental course on a special topic in agricultural and consumer economics. Topic may not be repeated except in accordance with the Code. Additional fees may apply. See Class Schedule. Approved for letter and S/U grading. May be repeated up to 5 hours in a semester, to a maximum of 12 hours.

**ACE 210 Environmental Economics credit: 3 Hours.**
Economic issues surrounding environmental quality, including: costs and benefits of environmental protection; economics of environmental policies (such as those dealing with toxins, water, and air pollution, and municipal solid waste); and economics of international environmental problems (such as ozone depletion and climate change). Same as ECON 210, ENVS 210, NRES 210, and UP 210.

This course satisfies the General Education Criteria for:

- UIUC: Social Sciences

**ACE 222 Agricultural Marketing credit: 3 Hours.**
Examines factors affecting the size of the market for agricultural products and the scope of marketing activities; functions and services performed; pricing agricultural products, including the nature and causes of price fluctuations; and costs of marketing and efforts to reduce costs and improve the marketing system. Prerequisite: ACE 100 or ECON 102 or consent of instructor.

**ACE 231 Food and Agribusiness Mgt credit: 3 Hours.**
Overview of management in the food and agribusiness sector. Major topics covered include: introduction to the food and agribusiness sector; the environment of the firm; fundamentals, structural design, and change in organizations; leadership, motivation, communication; and planning and control. Coverage is at the introductory level with a focus on textbook material and current issues. Prerequisite: Sophomore standing and ACE 100 or ECON 102.

**ACE 232 Management of Farm Enterprises credit: 3 or 4 Hours.**
Economic principles are applied to the management of farms using budgeting system analysis, record analysis, financial management, and lease analysis. Problems related to resource appraisal and business organization are also addressed. Three hours credit without home farm problem, or four hours credit with home farm problem. Prerequisite: ACE 100 or ECON 102 or consent of instructor.

**ACE 240 Personal Financial Planning credit: 3 Hours.**
Examines principles of financial planning applied to individuals and households, with attention to organizing and analyzing financial information, budgeting, acquiring financial assets, managing credit, planning for taxes, investments, risk management, retirement, and estate planning. Prerequisite: Sophomore standing or consent of instructor.
ACE 251 The World Food Economy  credit: 3 Hours.
Examination of global food production, consumption, and trade; problems of
hunger and population; the role of agricultural development, trade, and
aid in relieving hunger. Prerequisite: ACE 100 or ECON 102 or consent of
instructor.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ACE 254 Economic Systems in Africa  credit: 3 Hours.
Examines systems of production and exchange in Africa. Through
lectures, discussions, readings and films participants will study the ways
African people interact in local markets and the impact of national and
international markets on their welfare. Same as AFST 254.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ACE 255 Econ of US Rural Poverty & Dev  credit: 3 Hours.
Examination of rural poverty and development issues in the United
States, with particular attention to current anti-poverty policies and
programs and alternative programs. Topics include measurement of
poverty; causes of rural poverty; income maintenance, education, and
employment policies and their consequences; and rural development
strategies. Prerequisite: ACE 100 or ECON 102 or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ACE 261 Applied Statistical Methods  credit: 4 Hours.
Statistical methods and computer applications for agricultural and
consumer economics, including descriptive statistics, probability
distribution, interval estimation, hypothesis testing, analysis of variance,
simple and multiple regression, and non-parametric methods. Credit is
not given for ACE 261 if credit for any of ECON 202, CPSC 440, STAT 100,
or equivalent has been earned. Prerequisite: MATH 124 or MATH 125.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning I

ACE 270 Consumer Economics  credit: 3 Hours.
Introduction to the study of the consumer in the American economy;
sources of consumer information and consumer protection; and
examination of current consumer issues within an economic framework.
Prerequisite: Sophomore standing or consent of instructor.

ACE 291 Ag Policy & Leadership  credit: 3 Hours.
Current policy issues affecting agriculture and the legislative and
rulemaking process that determines those policies will be studied. A
trip to Washington, DC during spring break will give the students an
opportunity to interact with legislators, federal agencies, organization
leaders and representatives of the national and international agricultural
policy community to better understand the policy making process and the
issues moving through it. Student participation will focus on developing
leadership skills and having an opportunity to meet with leaders who are
actively engaged in creating and changing public policy. Additional fees
may apply. See Class Schedule. Prerequisite: Junior or Senior standing
required or the approval of the instructor.

ACE 292 Farm, Food & Environmental Policy  credit: 3 Hours.
This course seeks to broaden students' understanding of the breadth
and complexity of agriculture in the United States and the challenges
and opportunities to be found in the U.S. food and agricultural system. It
includes a week-long trip to an area outside of Illinois (such as California)
during spring break where students will meet with farm, food and
environmental leaders who are deeply involved in driving the issues
shaping farm, food, and environmental policy. Additional fees may apply.
See Class Schedule. Prerequisite: Sophomore, Junior or Senior standing
required AND approval of the instructor.

ACE 293 Off-Campus Internship  credit: 1 to 4 Hours.
Supervised, off-campus experience in a field directly pertaining to a
subject matter in agricultural and consumer economics. Additional fees
may apply. See Class Schedule. Approved for S/U grading only. May
be repeated up to 4 hours in a semester, to a maximum of 10 hours.
Prerequisite: Sophomore standing, cumulative GPA of 2.5 or above at the
time the internship is arranged, and consent of instructor.

ACE 294 On-Campus Internship  credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in
research. Approved for S/U grading only. May be repeated up to 4 hours
in a semester, to a maximum of 10 hours. Prerequisite: Sophomore
standing, cumulative GPA of 2.5 or above at the time the internship is
arranged, and consent of instructor.

ACE 295 Independent Study  credit: 1 to 4 Hours.
Individual or small group research, special problems, or other studies
under the supervision of an appropriate member of the faculty. Approved
for both letter and S/U grading. May be repeated in the same or
subsequent terms as topics vary. May be repeated up to 4 hours in a
semester, but no more than 12 hours of special problems, research,
thesis and/or individual studies may be counted toward the degree.
Prerequisite: Junior standing, cumulative GPA of 2.5 or above at the time
the activity is arranged, and consent of instructor.

ACE 306 Food Law  credit: 3 Hours.
Explores the legal and political dimensions of food law, policy and
trade in the United States and major trading partners. Examines the
development of major national and state laws that apply to production,
distribution and retail sale of food. Evaluates current issues in food
regulation, including: biotechnology, organics, health labeling claims,
food safety and products liability litigation. Discusses food regulation in
other countries within the context of international treaties such as the

ACE 310 Natural Resource Economics  credit: 3 Hours.
Economic principles are used to analyze a broad range of natural
resource policy and management issues. Economic concepts developed
include public goods, social welfare, discounting, dynamic efficiency,
and resource scarcity. Natural resources examined include biodiversity,
fisheries, forests, minerals, soil, and water resources. Same as ENVS 310
and NRES 310. Prerequisite: ACE 100 or ECON 102.

ACE 321 Principles of Public Policy  credit: 3 Hours.
Same as ACCY 321, BADM 303, and PS 321. See PS 321.

ACE 341 Issues&Careers in Applied Econ  credit: 1 or 2 Hours.
Students study contemporary issues and career opportunities associated
with various concentrations in the Department of Agricultural and
Consumer Economics. An in-depth dialogue with industry professionals
helps develop an understanding of the skill sets needed to succeed in
each of the different career paths discussed. May not be repeated for
credit.
ACE 345 Finan Decision Indiv Sm Bus  credit: 3 Hours.
Introduction to financial decision-making for small businesses and individuals. Examines financial statement preparation and analysis; capital structure (use of debt and equity); investment analysis and portfolio theory; time value of money; interest rates and term structure; asset markets (pricing theories); evaluation of financial risk and insurance concepts, and an introduction to credit markets and financial capital suppliers. In addition, there is a class project involving a visit to either a lender or a financial planner/advisor, and other experiences to introduce students to services and careers in financial sectors. Prerequisite: ACCY 201 or equivalent, or consent of instructor.

ACE 346 Tax Policy and Finan Planning  credit: 3 Hours.
Explores the federal tax system, including income, social security, Medicare, and estate taxes, and state and local tax systems. Students learn basic tax principles, public policy issues embedded in the tax systems, and how tax law influences financial plans and decisions. Helps students make wiser financial decisions through increased understanding of the tax impacts of those decisions, participate knowledgeably in public debates surrounding tax policy, and prepare for careers as financial planners. Prerequisite: Sophomore standing.

ACE 360 Spreadsheet Models & Applc  credit: 2 Hours.
Spreadsheet development and modeling skills intended for economics and finance applications. Advanced uses of spreadsheet software, development of user-defined functions, use of Visual Basic and comparable external interface languages, data query designs, and advanced data analyses, summary and presentation skills are stressed. Intended to serve as a prerequisite for advanced modeling courses in specific disciplinary areas. Prerequisite: ACE 100 or equivalent, ACE 161 or CS 105, and completion of ACE 261 or ECON 203 or equivalent.

ACE 396 Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms as topics vary. May be repeated up to 4 hours in a semester, but no more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward the degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

ACE 398 Seminar  credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in agricultural and consumer economics. Approved for both letter and S/U grading. May be repeated to 3 hours in a semester, up to a maximum of 12 total hours. Prerequisite: Junior standing and consent of instructor.

ACE 403 Agricultural Law  credit: 3 to 4 Hours.
Relation of common-law principles and statutory law to land tenure, farm tenancy, farm labor, farm management, taxation, and other problems involving agriculture. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing.

ACE 406 Environmental Law  credit: 3 to 4 Hours.
Examination of environmental law issues. Topics include common-law pollution control; role of administrative agencies and courts; federal and state power; air and water pollution; regulation of toxic substances; protection of land, soil and other natural resources. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 403, or BADM 300, or BADM 301 recommended.

ACE 410 Energy Economics  credit: 3 or 4 Hours.
Use of economics tools to understand and evaluate public policy issues surrounding energy markets and related environmental markets. Focus is on the economic drivers of energy production and use, biofuel policy, transportation and storage of energy commodities, regulation of energy markets, and policies designed to mitigate the impact of energy production and consumption on the environment. 4 graduate hours. Prerequisite: ECON 302 or equivalent.

ACE 411 Environment and Development  credit: 3 to 4 Hours.
Relationship between economic development and environmental sustainability through application of cost-benefit analysis and environmental economics. Developing and developed country issues are considered with an emphasis on hands-on applications of project appraisal, social benefit-cost analysis, green accounting, and non-market valuation. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECON 302 or equivalent.

ACE 427 Commodity Price Analysis  credit: 3 Hours.
A comprehensive and in-depth survey of commodity price analysis with emphasis on the fundamental factors affecting prices of agricultural products; sources of information relating to production and demand factors; government activities as they relate to prices of agricultural products; technical analysis of agricultural product prices; and market efficiency and forecasting. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 100 or ECON 102; ACE 261, or equivalent.

ACE 428 Commodity Futures and Options  credit: 3 Hours.
Development of futures trading; operation and governance of commodity exchanges; economic functions of futures trading; operational procedures and problems in using futures markets; public regulation of futures trading; evaluation of market performance. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 222 or FIN 300 or equivalent.

ACE 430 Food Marketing  credit: 3 Hours.
Performance of the food system; marketing margins; transportation, advertising, and retailing of food products; structure, conduct, and performance of food marketing firms and industries; government and public interest in the food system. Same as FSHN 425. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 100 or ECON 102, ACE 222 recommended.

ACE 431 Agri-food Strategic Management  credit: 3 Hours.
Process of strategic decision-making in food and agribusiness firms; methods for analysis of business and regulatory environment; organizational issues in strategy choice for firms and supply chains. Same as BADM 438. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 231, BADM 320, or ACE 222; or consent of instructor.

ACE 432 Farm Management  credit: 3 or 4 Hours.
Students develop expertise in evaluating and making decisions similar to those faced by farm operators and managers. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 232; credit or concurrent registration in ACE 360 or equivalent.

ACE 435 Global Agribusiness Management  credit: 3 Hours.
Examination of the economic and strategic management of food, textile, and agribusiness firms within a global business environment; topics include the global business environment and its institutions, organizational strategies and policies, and business operations in global agricultural, food and textile industries. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 231, ACE 222, or BADM 320 or consent of instructor.

Information listed in this catalog is current as of 03/2017
ACE 436  Intl Business Immersion  credit: 4 Hours.
Provides participants an in-depth, experiential immersion into the complex issues and constraints that confront international marketing channel participants. Contextually grounded and themed in a specific industry, the course combines on-campus lectures with an intensive international immersion experience to Europe, Asia, or Latin America. By following the complete marketing channel from raw materials procurement to final consumption, participants gain first-hand knowledge of the necessary managerial decision-making skills required to successfully operate in today's global business environment. Same as BADM 436. 4 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 undergraduate and/or 8 graduate hours. Prerequisite: Consent of instructor.

ACE 440  Finan Plan for Professionals  credit: 3 or 4 Hours.
Capstone course applies financial planning principles and concepts in realistic case studies of specific planning needs, requires a comprehensive financial planning exercise, and covers professional ethics and responsibilities. 3 undergraduate hours. 4 graduate hours. Prerequisite: Concurrent enrollment in or completion of ACE 345, ACE 346, ACE 444, and ACE 449.

ACE 444  Finan Serv & Invest Plan  credit: 3 or 4 Hours.
Advanced skills in and understanding of asset pricing, equity and debt investment, portfolio theory and diversification, asset allocation, financial risk management, and financial intermediation and regulation emphasizing applications in financial planning and agricultural finance. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 240, ACE 345, or FIN 221, and ECON 302 or consent of instructor.

ACE 445  Intermediate Personal Fin Plan  credit: 4 Hours.
Financial planning philosophies, techniques, and procedures. Course uses case studies and problem-solving activities to construct financial plans for individuals and families in various life cycle stages and family structures. 4 undergraduate hours. 4 graduate hours. Prerequisite: ACE 240, ECON 302, and junior standing or consent of instructor; FIN 230 is recommended.

ACE 446  Modeling App's Finan Plan  credit: 2 Hours.
Improves ability to make effective financial plans and decisions. Involves development of decision tools that are applied to "real world" financial data sets and planning/decision-making circumstances. Topics include applied data management techniques (designing queries/storable forms), financial statement analysis, numeric optimization tools, leverage assessment, incorporating risk in decisions, capital budgeting and time value of money, term structure of interest rates, and currency exchange. 2 undergraduate hours. 2 graduate hours. Prerequisite: One of ACE 240, ACE 345, FIN 221; or consent of instructor and advanced knowledge of spreadsheet software equivalent to the coverage of ACE 360.

ACE 447  Case Stud Agr Accy & Fin Plan  credit: 3 Hours.
Capstone course for agricultural accounting, agricultural finance, and financial planning; applies business and planning concepts and tools to real-world situations; emphasizes group decision making; industry professions participate in the learning experience. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of ACCY 301, ACE 444, FIN 300; or consent of instructor.

ACE 448  Rural Real Estate Appraisal  credit: 3 or 4 Hours.
Valuation methods and value bases of rural real estate; legal aspects of property rights, appraisal theory and procedures, condemnation appraisal, characteristics of the rural land market, soil identification and productivity, and other legal, economic, agronomic, and engineering aspects of real estate valuation. Laboratory field trips, including a practice appraisal; see Class Schedule for approximate cost. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 232 or ACE 360, NRES 201.

ACE 449  Retirement & Benefit Planning  credit: 3 or 4 Hours.
Employee benefit and retirement planning, including employer-sponsored or individually managed options, with particular attention to determining benefit and retirement needs and managing risks in specific planning situations. 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both ACE 449 and FIN 434. Prerequisite: ACE 240, ACE 345, and ECON 302 or consent of instructor.

ACE 451  Agriculture in Intl Dev  credit: 3 to 4 Hours.
Economics of agricultural development and the relationships between agriculture and other sectors of the economy in developing nations; agricultural productivity and levels of living in the less developed areas of the world; and studies of agricultural development in different world regions including Africa, Asia, and Latin America. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ACE 452  The Latin American Economies  credit: 2 to 4 Hours.
Same as ECON 452. See ECON 452.

ACE 454  Econ Dev of Tropical Africa  credit: 2 to 4 Hours.
Types of African economies and growth of the exchange economy; development of natural resources, industry, trade, finance, and education; analysis of economic integration, governmental planning, and development projects; and demographic, land tenure, and institutional influences on development. 3 undergraduate hours. 2 to 4 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ACE 455  Intl Trade in Food and Agr  credit: 3 Hours.
Economic theory used to analyze trends and patterns of international trade in major agricultural commodities and to understand interaction between economic development, policy, and trade; welfare implications of policies affecting production, consumption, and trade; implications of protectionism, free trade, regional trade blocs, and multilateral trade liberalization, and the role for international trade institutions. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ACE 456  Agr and Food Policies  credit: 3 to 4 Hours.
Analysis of agricultural and food policies and programs and their effects on producers and consumers of agricultural products. Formulation of agricultural and food policies are examined with an emphasis on historical and current economic problems affecting agriculture and rural America. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ACE 471  Consumer Economic Policy  credit: 3 Hours.
Analysis of choice-making, buying, using, and disposing of consumer goods by families, social policy Perspectives considered. 3 undergraduate hours. No graduate credit. Prerequisite: ACE 100 or equivalent and junior standing.
ACE 474  Econ of Consumption  credit: 3 to 4 Hours.
Concepts, theories, and methods for analysis of the micro and macro aspects of consumption; includes standards and content of consumption and description of consumption patterns and trends in the USA and selected other countries. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: ECON 302 or consent of instructor; a course in statistics; junior standing.

ACE 476  Family Economics  credit: 2 to 4 Hours.
Economic welfare of American families, application of economic theory to the behavior of families and individuals with respect to time allocation between the home and the market; family forms; human capital accumulation; gender differences in income; income inequality; and poverty. Role of public policy is considered. 3 undergraduate hours. 2 to 4 graduate hours. Prerequisite: ECON 302 or consent of instructor; a course in statistics; senior standing.

ACE 496  Practicum  credit: 4 to 12 Hours.
Cooperatively supervised field experience in management and administration in a textile marketing business. Only four hours may be applied to the total required for a graduate degree. At the undergraduate level, up to four hours may be counted toward the hours required in Agricultural and Consumer Economics. 4 to 12 undergraduate hours. 4 to 12 graduate hours. Approved for both letter and S/U grading. Prerequisite: Consent of instructor. Not available to students on probation.

ACE 499  Seminar  credit: 1 to 4 Hours.
Group discussion or an experimental course on a special topic in agricultural and consumer economics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for both letter and S/U grading. May be repeated in the same semester to 4 hours, or subsequent terms to a maximum of 12 hours as topics vary.

Agri-Accounting Concentration

Students in Agri-Accounting complete a comprehensive program that enables them to apply accounting principles in production, processing, or retailing sectors in agribusiness industries. Graduates find professional opportunities as consultants and managerial accountants.

1  BADM 310 may also satisfy this requirement.

Agribusiness Markets and Management Concentration

Students in Agribusiness Markets and Management obtain management skills; strategy development and implementation; and an awareness of the interaction among agricultural technology, supply, distribution, processing, and marketing firms in the business environment. Graduates are prepared for entry-level management, sales and marketing, and technical analyst positions, and are sought by firms involved in the production, marketing, sales, and financing of farm inputs, agricultural commodities, and food and other retail products.

Consumer Economics and Finance Concentration

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

Environmental Economics and Policy

Students in Environmental Economics and Policy study environmental and resource management issues at the local, state, national, and international levels. Graduates are prepared for positions in...
governmental, environmental, and resource management agencies; interest groups; and the environmental area of private firms. Course concentrations include law, policy, management, administration, quantitative methods, and sociology, as well as economics.

**Farm Management Concentration**

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

**Financial Planning Concentration**

Students in the Financial Planning concentration study finance and economics as they apply to individuals, households, and small businesses in the course of accumulating and using financial resource. Students are introduced to issues of credit management, insurance and other risk management strategies, saving and investing, retirement planning, and estate planning. Students also study the financial marketplace as it relates to the needs of households and small businesses.

**Minor in Environmental Economics and Law**

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply these tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

Policy, International Trade and Development Concentration

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies
dealing with policy, trade, or development; in trade organizations; and in public interest groups.

**Public Policy and Law Concentration**

Students in Public Policy and Law become expert in the economics of public policy in general and in its application to specific areas of interest. This concentration will expose students to the legal and institutional structures in which policies are developed, the analysis of the economics impacts of policies, and special circumstances of public policy and law pertaining to the environment, consumers, the agricultural sector, international relations, and other.

**Animal Sciences**

Steven C. Loerch  
116 Animal Sciences Laboratory, 1207 West Gregory, Urbana  
PH: (217) 244-1681  
http://ansci.illinois.edu

Welcome to the Department of Animal Sciences, an academic family that includes more than 6,000 alumni, 500 undergraduate students, and more than 100 graduate students. We are proud of our legacy, and we are dedicated to enhancing the quality of life for our students and stakeholders through excellence in teaching, research and outreach programs.

**Why Animal Sciences?**

Students in Animal Sciences combine their interests in biology and animals in a learning environment that extends beyond the classroom. The Department of Animal Sciences offers our students opportunities to conduct undergraduate research, gain hands-on experience working in our laboratories and farms, participate in internships, and become active in a number of student organizations. For instance, our students work with beef cattle and poultry in state-of-the-art research facilities, serve internships in animal shelters and zoos, and conduct discovery research in cutting-edge programs in immunology and reproductive biology. We provide opportunities for virtually every area of interest and our students become skilled in applying their knowledge to address real-world problems.

The work of the Department of Animal Sciences is important. Our research, teaching, and Extension programs address subjects such as bioenergy, the environment, food production, animal health, and animal behavior. We study production efficiency, profitability, and well-being of dairy and beef cattle, pigs, and poultry to enhance the supply of food for a growing world population. Our programs in companion animal biology and humane education create information for pet owners and help us understand the value of positive relationships between humans and animals. Fundamental research in physiology, nutrition, and behavior solve animal sciences problems and have significant impact on improving human health.

**Our Commitment**

We have a diverse and nationally respected faculty who solve problems of real importance to society and who are deeply committed to providing the best educational experiences to our students. We care about the success of our students and we provide a high-quality education that will equip them to identify and solve the challenges of the future.

The learning opportunities in the Department of Animal Sciences and the University of Illinois are without limit. Come see for yourself why the Department of Animal Sciences is held in high regard in the nation and throughout the world.

**For the Degree of Bachelor of Science with a Major in Animal Sciences**

Students pursuing this major select one of three concentrations:

- Companion Animal and Equine Science Concentration (p. 29)
- Food Animal Production and Management Concentration (p. 30)

Information listed in this catalog is current as of 03/2017
• Science, Pre-Veterinary and Medical Concentration (p. 31)

## Minor in Animal Sciences

The minor in Animal Sciences is designed to provide students with a basic understanding and knowledge of a discipline subject matter area of their choice. Subject matter areas include animal production and management, nutrition, genetics, animal behavior, immunology, meat science/muscle biology, microbiology, reproductive physiology, and molecular biology. Courses in the minor cannot be completed Credit/No Credit.

ANSC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ANSC)

### Courses

**ANSC 100 Intro to Animal Sciences** credit: 4 Hours.
Survey of beef and dairy cattle, companion animals, horses, poultry, sheep, and swine. Includes the importance of product technology and the basic principles of nutrition, genetics, physiology, and behavior as they apply to breeding, selection, feeding, and management. Lecture and lab.

**ANSC 101 Contemporary Animal Issues** credit: 3 Hours.
Provides an understanding of fundamental issues impacting the care and use of animals, and their role in human welfare. Topics addressed include the fundamental principles of animal domestication and its impact on humans, animal welfare and care, animal-environmental interactions, food safety, diet and health issues, economic and societal issues facing the world today, and bioethical issues.

**ANSC 103 Working With Farm Animals** credit: 2 Hours.
Introductory course that will provide novice students with the fundamentals of animal-animal and animal-human interactions for domestic farm animals. Emphasizes hands-on experiences to develop a background in the concepts and practice of recognizing and understanding the animal’s physiology and behavior, animal well being, and animal responses to human interactions. Prerequisite: ANSC 100.

**ANSC 110 Life With Animals and Biotech** credit: 3 Hours.
Lecture/discussion course that will provide students an overview of biotechnology and animals. Focuses on biotechnological achievements involving animals and how they influence the global development of agriculture, medicine, and industry. Topics will be covered from scientific, discovery, historical, social, and political perspectives.
This course satisfies the General Education Criteria for: UIUC: Life Sciences

**ANSC 199 Undergraduate Open Seminar** credit: 1 to 5 Hours.
An experimental course on a special topic in animal sciences. Topic may not be repeated except in accordance with the Code. May be repeated to a maximum of 12 hours. No more than 12 hours may be counted toward graduation.

**ANSC 201 Principles of Dairy Production** credit: 3 Hours.
Surveys the dairy industry; examines principles of breeding, selection, reproduction, feeding, milking and management of dairy cattle. Prerequisite: ANSC 100.

**ANSC 204 Intro Dairy Cattle Evaluation** credit: 2 Hours.
Evaluation of physical traits of dairy cattle in relation to economic value and genetic improvement; sire selection, mating systems, and genetic merit for dairy cattle. Field trip required. Prerequisite: ANSC 100 or consent of instructor.

**ANSC 205 World Animal Resources** credit: 3 Hours.
Examination of the world’s animals, domesticated and wild, and their uses in various climatic, economic and cultural contexts. Exploration of their contemporary management and their future prospects. Provides background for international experiences, such as ACES 298 and ACES 299. Prerequisite: Completion of the campus Composition I general education requirement.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition

**ANSC 206 Horse Management** credit: 3 Hours.
Focus on the principles of managing horses from birth through breeding; topics include reproductive physiology, breeding management, nutrition, diseases, parasites, herd health programs, genetics, facility design and exercise physiology.

**ANSC 207 Companion Animal Biology &Care** credit: 3 Hours.
An introduction to companion animal biology through consideration of the physical structure, nutrition, behavior, and reproduction of animal species most commonly kept as companions. The basic information is applied to discussion of basic preventive health care. Course content is largely focused on cats and dogs, although other mammals, birds and reptiles will be briefly considered. Legal and economic issues, and ethical considerations associated with companion animals are also incorporated into the course discussion.
This course satisfies the General Education Criteria for: UIUC: Life Sciences

**ANSC 211 Breeding Animal Evaluation** credit: 3 Hours.
Application of current scientific tools, methods, and performance programs available to livestock breeders for improving beef cattle, swine, and sheep; emphasis on the changing nature of modern breeds of livestock as influenced by selection, economics, and consumer and market trends. Course requires visits (including weekends) to farms, related companies, and events to observe the latest techniques and scientific principles associated with livestock selection and evaluation. Students are responsible for personal expenses on the field trips. Prerequisite: Junior standing; credit or concurrent registration in ANSC 209.

**ANSC 219 Meat Technology** credit: 3 Hours.
Student participation in the transformation of live animals through harvest and carcass fabrication into food products for human consumption; includes laboratory. Purchase of personal equipment is required.
ANSC 221 Cells, Metabolism and Genetics  credit: 3 Hours. Provides an introductory background in basic aspects of cell biology, physiology, and genetics. Topics addressed include cell structure, cell organelles, and different types of cells, protein synthesis and gene expression, chromosome structure, basic mechanisms of chromosome replication, basic principles of quantitative and population genetics, and an introduction to genomics and proteomics. Prerequisite: ANSC 100, CHEM 102 and 103 or concurrent enrollment.

ANSC 222 Anatomy and Physiology  credit: 3 Hours. Provides an introductory background in basic and fundamental principles of animal anatomy and physiology. The major organ systems (muscle, skeletal, neural, endocrine, cardiovascular, respiratory, and renal) will be presented with an emphasis on comparative anatomy, integrated function, and specific homeostatic mechanisms. Prerequisite: ANSC 100.

ANSC 223 Animal Nutrition  credit: 3 Hours. Provides an introductory background in the fundamental principles of animal nutrition and how nutrition impacts animal well-being and performance. Students will develop comprehensive knowledge in gastrointestinal and digestive anatomy and physiology, nutrient function and requirements, and energy utilization in various species. Specific topics include different classes and properties of nutrients, differences in digestive mechanisms in monogastric vs. ruminant animals, and how carbohydrates, lipids, proteins, minerals, and vitamins contribute to the nutrient requirements of animals. Prerequisite: ANSC 100, ANSC 221, and CHEM 104 and CHEM 105.

ANSC 224 Animal Reproduction and Growth  credit: 4 Hours. Study of the basic principles of reproduction, lactation, growth, and hormonal regulation in animals as well as humans, including cell growth and differentiation, processes of reproduction, biotechnological methods of reproductive control, manipulation, performance enhancement of lactation and growth. Prerequisite: ANSC 100, ANSC 221.

ANSC 250 Companion Animals in Society  credit: 3 Hours. Explores the current and historical functions and influences of companion animals in American society. Topics include the evolution of animal protection, the use of assistance and service animals, and the growth of the pet supply industry. Controversial issues which are of current concern to society will also be examined. This course satisfies the General Education Criteria for: UIUC: Western Compartv Cult

ANSC 256 Horse's Role in Human History  credit: 3 Hours. Provides an understanding of the crucial roles that horses have played in the development and expansion of human civilization, including how the role of the horse in culture and society has changed throughout history. Topics addressed include an understanding of the evolution and domestication of horses, use of horses for transportation, sport, warfare and power, and the impact of horses on societal issues facing the world today.

ANSC 293 Internship Off Campus  credit: 1 to 4 Hours. Supervised, off-campus learning experience in an animal-related enterprise. May be repeated in the same or separate terms to a maximum of 10 hours. Prerequisite: Good academic standing; ANSC 100.

ANSC 294 Intern On Campus Practical Exp  credit: 1 to 5 Hours. Supervised, on-campus learning experience associated with subject matter specific to animal sciences. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 10 hours. Prerequisite: Good academic standing; ANSC 100.

ANSC 295 UG Research or Thesis  credit: 1 to 5 Hours. Individual research in animal sciences. May be repeated in the same or separate terms to a maximum of 10 hours. Prerequisite: Minimum GPA of 2.5; not open to students on probation; consent of instructor.

ANSC 298 Undergraduate Seminar  credit: 1 Hour. Presentations and discussion of employment opportunities, departmental research activities, and topics relevant to animal agriculture. Prerequisite: Sophomore standing.

ANSC 299 Animal Mgt Field Studies  credit: 1 or 2 Hours. Field studies of farms and service industries; discusses and demonstrates management practices on commercial farms. Trip normally taken during spring break. May be repeated up to 8 hours in separate terms if topics vary.

ANSC 301 Food Animal Production, Management, and Evaluation  credit: 3 Hours. Provides an overview of how nutrition, genetics, and environment affect beef cattle, swine, and sheep growth, development, and end-product quality and value. Students get hands-on experience evaluating and determining value of live animals and carcasses. Prerequisite: Credit or concurrent enrollment in ANSC 223 and ANSC 224; or consent of instructor.

ANSC 305 Human Animal Interactions  credit: 3 Hours. Explores the relationships between humans and companion animals and the roles and functions that animals play in today's society. Examines the evolution of the human/companion animal bond, benefits and disadvantages of this bond, and working/nonworking roles of companion animals. Controversial issues which are of current concern to society will be examined in detail. Writing and in-class discussions are emphasized. Prerequisite: ANSC 250.

ANSC 306 Equine Science  credit: 3 Hours. Understand and apply current scientific research and principles of equine science to intensive horse production. An in-depth approach to equine reproductive physiology, nutrition, anatomy and exercise physiology will be followed using a combined lecture and laboratory format. Emphasis on current research and hands-on techniques. Prerequisite: ANSC 206, ANSC 222 or equivalent, and credit or concurrent enrollment in ANSC 224 or equivalent; or consent of instructor.

ANSC 307 Companion Animal Management  credit: 3 Hours. This course provides an advanced overview of companion animal biology through consideration of the physical structure, nutrition, behavior, and reproduction of animal species most commonly kept as companions. Course content is applied to discussion of best management practices and basic preventive health care. Course content is largely focused on cats and dogs, although other mammals, birds and reptiles are briefly considered. Legal and economic issues, ethical considerations, and career opportunities associated with companion animals are also incorporated into course discussion. Credit is not given for both ANSC 307 and ANSC 207.

ANSC 309 Meat Production and Marketing  credit: 2 Hours. General approach to meat utilization with emphasis on selecting, grading, cutting, and pricing meat for the retail, restaurant, and food service industry. This course includes laboratory and may use field trips to establishments to highlight course concepts.

ANSC 310 Meat Selection and Grading  credit: 3 Hours. Study characteristics associated with the value of carcasses, primal and retail cuts from meat animals; emphasize USDA grading and specifications as well as written communication. Field trips to meat packing plants are required.
### ANSC 312 Advanced Livestock Evaluation credit: 3 Hours.
Advanced instruction in the selection of breeding animals of beef, sheep, and swine species and in the evaluation of market animals for slaughter. This course requires visits to farms, related companies, and events to observe the latest techniques and scientific principles associated with livestock selection and evaluation. Prerequisite: ANSC 211 or consent of instructor.

### ANSC 313 Horse Appraisal credit: 2 Hours.
Advanced course for students interested in improving their performance and conformation evaluation skills; provides exposure to the horse show industry and the career opportunities associated with this facet of the horse industry; students may compete in intercollegiate judging contests.

### ANSC 314 Adv Dairy Cattle Evaluation credit: 2 Hours.
Advanced instruction in the selection of breeding dairy animals. Involves visits to farms, related companies and events to observe the latest techniques and scientific principles associated with dairy cattle selection and evaluation. Field trips for cattle judging are required. May be repeated to a maximum of 4 hours. Prerequisite: ANSC 204 or consent of instructor.

### ANSC 322 Livestock Feeds and Feeding credit: 3 Hours.
Livestock feeds and practical feeding applications for livestock will be addressed. Feed identification and ration formulation will be strongly emphasized. One session of this class will take place at the UIUC Feed Mill. Prerequisite: ANSC 223.

### ANSC 331 Biology of Reproduction credit: 2 to 4 Hours.
Study of comparative reproduction, lactation, behavior, reproductive strategies, assisted reproduction, and reproductive diseases in domestic and wild animals including mammals, birds, reptiles, and amphibians. Prerequisite: Sophomore standing; IB 104 or one introductory level biology course.
This course satisfies the General Education Criteria for: UIUC: Life Sciences

### ANSC 350 Cellular Metabolism in Animals credit: 3 Hours.
Principles and regulation of cellular metabolism in animals, emphasizing energy derivation and its relationship to domestic animal and food production. Prerequisite: CHEM 104, CHEM 105, and ANSC 221 or equivalent.

### ANSC 363 Behavior of Domestic Animals credit: 4 Hours.
Introduction to concepts of animal behavior with emphasis on domestic animals; lecture and lab. Prerequisite: ANSC 100.

### ANSC 366 Animal Behavior credit: 3 Hours.
Same as ANTH 342 and IB 329. See IB 329.

### ANSC 370 Companion Animal Policy credit: 3 Hours.
This course provides an overview of public policy with respect to the use and treatment of companion animals in the United States. Current and alternative policies are considered in terms of their effectiveness in improving or otherwise altering the treatment of companion animals. The influences of animal protection organizations, consumer groups, politicians, the scientific community, and other stakeholders on the development and enforcement of policies are examined in detail. Prerequisite: ANSC 250.

### ANSC 396 UG Honors Research or Thesis credit: 1 to 5 Hours.
Independent study, under the supervision of a faculty member, on a problem of appropriate scope and character that culminates in writing a thesis. Intended primarily for honors students who plan on conducting research or pursuing graduate study. Thesis projects must be supervised by a faculty member and reviewed by a departmental committee. Students must present a satisfactory thesis to receive credit. May be repeated in the same or subsequent terms to a maximum of ten hours. Prerequisite: Junior standing, minimum GPA of 3.4; consent of a faculty member.

### ANSC 398 UG Experiential Learning credit: 1 to 5 Hours.
Student-directed experiential learning on special topics directly pertaining to subject matter in animal sciences. Students are required to complete a Memorandum of Agreement prior to enrolling in this course. Approved for both letter and S/U grading. May be repeated up to 5 hours per semester, up to a maximum of 10 total hours.

### ANSC 400 Dairy Herd Management credit: 3 Hours.
The technology of modern milk production practices; application of principles in nutrition, physiology, economics, health and hygiene, waste management, and facilities design for efficient dairy herd management systems. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 201 or consent of instructor.

### ANSC 401 Beef Production credit: 3 Hours.
The principles of the management of beef cattle enterprises. Applies science and technology to the breeding, selection, feeding, health and production of beef and beef products. Emphasizes the use of research findings in decision-making. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ANSC 401 and ANSC 213. Prerequisite: ANSC 223 or equivalent.

### ANSC 402 Sheep Production credit: 3 Hours.
Study of management, nutrition, reproduction, genetics, marketing, economics, housing, health and production record programs as they apply to sheep production. History of the U. S. sheep industry will be explored along with a study of wool production, marketing and processing. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent.

### ANSC 403 Pork Production credit: 3 Hours.
Applies science and technology to the selection, breeding, feeding, housing and management of swine in a production enterprise; emphasizes use of research findings in decision making. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ANSC 403 and ANSC 213. Prerequisite: ANSC 221 or equivalent; ANSC 223 or equivalent; ANSC 467; and ANSC 224 or equivalent or ANSC 431.

### ANSC 404 Poultry Science credit: 3 or 4 Hours.
Basic principles of genetics, physiology, nutrition, and health of avian species; the application of science and technology in solving the breeding, nutrition, disease, housing, and other management problems encountered in commercial egg and poultry meat production. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Undergraduate and graduate students must complete research project to obtain 4 hours.

### ANSC 405 Advanced Dairy Management credit: 2 Hours.
Advanced dairy management compliments the four other classes offered in the dairy certificate program featuring applied management principles and practices needed in modern dairy production. 2 undergraduate hours. 2 graduate hours. Prerequisite: ANSC 201 or equivalent or consent of instructor.
ANSC 406  Zoo Animal Conservation Sci  credit: 3 Hours.
Topics related to the conservation, physiology and management of exotic animal species in a captive setting will be addressed. These include conservation biology, population genetics, nutrition, reproduction (natural and assisted), behavior, exhibitry, environmental enrichment and veterinary care. Also covers taxonomy, zoo research, the role of zoos in conservations, and the ethics of maintaining captive animals. 3 undergraduate hours. 3 graduate hours. One Saturday field trip may be required. Prerequisite: ANSC 221 or IB 104, or equivalent.

ANSC 407  Animal Shelter Management  credit: 3 Hours.
Basic management concepts related to maintaining the physical and behavioral health of companion animals in a shelter setting will be addressed. Population dynamics and management will be heavily emphasized. Utilizes practical resources available through local and national animal welfare organizations. Two class sessions will take place at the Champaign County Humane Society. One Saturday field trip is required. 3 undergraduate hours. No graduate credit. Prerequisite: ANSC 207 or ANSC 307.

ANSC 409  Meat Science  credit: 3 Hours.
Fundamental biological principles that influence composition, processing, preservation, and quality of meat and meat products. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 221 or equivalent, ANSC 222 or equivalent, ANSC 223 or equivalent, and ANSC 224 or equivalent.

ANSC 420  Ruminant Nutrition  credit: 3 Hours.
Physiology and microbiology of digestion in the ruminant, and biochemical pathways of utilization of the absorbed nutrients for productive purposes. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent.

ANSC 421  Minerals and Vitamins  credit: 3 Hours.
Nutritional implications and metabolic roles of minerals and vitamins in animal metabolism. The course is designed to instill a basic understanding of vitamin and mineral functions, absorption, metabolism, and excretion. Research methodologies used in the study of vitamin and mineral nutrition will also be discussed. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent, credit or concurrent registration in MCB 450 or ANSC 350, or consent of instructor.

ANSC 422  Companion Animal Nutrition  credit: 3 Hours.
Digestive physiology and basic nutritional considerations of companion animals, with primary focus on dogs and cats. Topics discussed include nutritional idiosyncrasies of dogs and cats, the importance of nutrition in various physiological states, and nutrient needs during disease. Information on pet food regulations, common ingredients and formulation, manufacturing methods, and trends in the pet food industry will also be covered. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent.

ANSC 423  Advanced Dairy Nutrition  credit: 2 Hours.
All aspects of dairy cattle nutrition will be discussed including nutrients, phase feeding (milk curve analysis, dry matter intake, and body weight loss), dry and transition cow programs, forage feeding systems, feed delivery approaches, metabolic disorders related to nutrition, and application of various dairy feeding guides. 2 undergraduate hours. 2 graduate hours. Prerequisites: ANSC 201 or equivalent, or consent of instructor.

ANSC 424  Pet Food & Feed Manufacturing  credit: 3 Hours.
Integrates principles of animal nutrition with various aspects pertaining to pet food and animal feed manufacturing. Topics discussed in this course include processing technologies (e.g., extrusion, retorting, baking) involved in the manufacturing of pet foods and animal feeds, principles of diet formulation and nutritional guidelines, and an overview of regulatory affairs, quality control, and good manufacturing practices. This course includes two field trips to a pet food manufacturing facility and a food and feed ingredient company. 3 undergraduate hours. 3 graduate hours. Prerequisite: Required - ANSC 223; Recommended - ANSC 322 and ANSC 422.

ANSC 431  Advanced Reproductive Biology  credit: 3 Hours.
Course is an upper-level undergraduate or entry-level graduate course dealing with reproductive biology. It will include the study of basic cell biology of reproduction, lactation, growth and hormone regulation of domestic and non-domestic animals as well as humans, including biotechnology methods of reproduction control, manipulation, performance enhancement of lactation and growth, and disease control. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 224 or equivalent.

ANSC 435  Milk Quality and Udder Health  credit: 2 Hours.
An advanced course on the physiological basis of mammary growth, milk secretion, and udder health. Topics covered include mammary gland anatomy, hormonal control, causes and control of mastitis, milk harvesting, and milk quality. The course will be delivered via CD and web-based synchronous discussion. Students should have a basic course in dairy/animal sciences, or physiology, or consent of the instructor before taking this course. 2 undergraduate hours. 2 graduate hours. Prerequisite: ANSC 201 or equivalent or consent of instructor.

ANSC 437  Adv Reproductive Management  credit: 2 Hours.
The focus of this course is advanced techniques and technologies used to manage production livestock. The course will emphasize advanced and emerging technologies such as embryo transfer, cloning, semen sexing, and ultrasound pregnancy diagnosis and fetal sexing and innovations in existing procedures including artificial insemination, reproductive health management, and estrus synchronization. Implementation of existing and emerging techniques and technologies and research and discovery will be covered for individuals focusing on careers in livestock production, clinical veterinary medicine, education, technical service/support, and research and development. 2 undergraduate hours. 2 graduate hours. Prerequisite: ANSC 331 or equivalent, or consent of instructor.

ANSC 438  Lactation Biology  credit: 4 Hours.
Examines the structural and functional development of the mammary gland, cell biology, and control of milk synthesis, and composition and biochemistry of milk. Compares and analyzes the physiological processes of lactation in mammals. 4 undergraduate hours. 4 graduate hours. Prerequisite: ANSC 224 or equivalent.

ANSC 440  Applied Statistical Methods I  credit: 4 Hours.
Same as ABE 440, CPSC 440, FSHN 440, and NRES 440. See CPSC 440.

ANSC 441  Human Genetics  credit: 3 or 4 Hours.
Same as ANTH 441. See ANTH 441.

ANSC 444  Applied Animal Genetics  credit: 3 Hours.
Principles of heredity and their application to the problems of animal improvement. 3 undergraduate hours. 3 graduate hours.
ANSC 445  Statistical Methods  credit: 4 Hours.
Design and analysis of experiments: multiple regression, method of
fitting constants, factorial experiments with unequal subclass numbers,
analysis of covariance, experimental design; computer applications to
agricultural experiments using statistical packages. Same as ABE 445
and NRES 445. 4 undergraduate hours. 4 graduate hours. Prerequisite:
CPSC 440, or equivalent.

ANSC 446  Population Genetics  credit: 3 or 4 Hours.
Conceptual and mathematical approach to the genetics of populations:
estimation of allele and genotype frequencies; Hardy-Weinberg principle;
measures of genetic diversity and distance; selection; non-random
mating; genetic drift; mutation; neutral theory; migration and population
subdivision; linkage and recombination; coalescence and phylogenetic
inference. Applications to animals, plants, human health and wildlife
conservation. Same as IB 416. 3 or 4 undergraduate hours. 3 or 4
graduate hours. Students desiring 4 hours credit do additional work in some area of population genetics. Prerequisite: An introductory genetics
course (ANSC 221 or IB 204); one of MATH 220, MATH 221, or MATH 234;
or consent of instructor.

ANSC 447  Advanced Genetics and Genomics  credit: 4 Hours.
Current principles and methods in genetics and genomics to better
understand genome function, genome evolution, the genetic architecture
of complex traits, the genetic basis of human and animal diseases, and
animal productivity. To build a strong foundation for the application
of novel genomic tools, the course will provide an overview of main
concepts in genetics and genomics, including gene-environment
interaction and epigenetic modifications. The focus of the course will be
on mammals, but novel applications of the new sequencing technologies
to other systems will be discussed. In addition to the presentation of
scientific concepts and discoveries, the course will include a significant
practical component. Students will learn software programs used for
gene mapping and bioinformatics analysis, will review and present
scientific papers, and will write a research paper proposing their own
experiments. 4 undergraduate hours. 4 graduate hours. Prerequisite:
ANSC 221, MCB 150, or IB 150.

ANSC 448  Math Modeling in Life Sciences  credit: 3 or 4 Hours.
Introduction to deterministic and stochastic mathematical models for
the life sciences, statistical methods for fitting and testing models, and
computer simulation programs. Applications to populations, processes,
and products of animals, plants, and humans. Same as IB 487 and
STAT 458. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Students
desiring 4 hours credit do additional work in some area of mathematical
modeling in the life sciences. Prerequisite: IB 104; a course in calculus,
and a course in computer sciences; or consent of instructor.

ANSC 449  Biological Modeling  credit: 3 or 4 Hours.
Same as CPSC 448, GEOG 468, and IB 491. See GEOG 468.

ANSC 450  Comparative Immunobiology  credit: 4 Hours.
Advanced concepts of immunophysiology and immunogenetics.
Immunophysiology with an emphasis on immune-neuroendocrine
interactions. The molecular and cellular basis of self-nonself recognition
with an emphasis on the major histocompatibility complex in vertebrates
and innate immunity in both vertebrates and invertebrates. The mucosal
immune system, which requires a complex interplay between innate
and acquired immunity to protect mucosal surfaces exposed to
the environment. A working knowledge of genetics and cellular and
molecular biology is recommended. Same as MCB 442 and PATH 410. 4
undergraduate hours. 4 graduate hours.

ANSC 451  Microbes and the Anim Indus  credit: 3 Hours.
Fundamental aspects of the ecology of microorganisms and their
biochemical activities related to the degradation of organic matter
with emphasis on the gastrointestinal tract of production animals. 3
undergraduate hours. 3 graduate hours. Prerequisite: MCB 100, and
ANSC 350, MCB 300, MCB 424, or equivalent.

ANSC 452  Animal Growth and Development  credit: 3 or 4 Hours.
Basic principles of animal growth from early fetal development through
typical marketing ages for the major domestic animal species. Topics
discussed include molecular and cellular determinants of tissue
development and whole animal growth, with coverage of current
and future technologies for manipulating growth to enhance animal
production. 3 or 4 undergraduate hours. 4 graduate hours. Prerequisite:
ANSC 221, ANSC 222, ANSC 223, and ANSC 224.

ANSC 453  Stem Cell Biology  credit: 3 or 4 Hours.
The history of stem cell biology as well as up-to-date topics in stem cell
research will be presented and discussed with emphasis on experimental
approaches. Each student is expected to present research articles
relative to each focus area and lead the discussion for the whole
class every week. Topics include Molecular Reproductive Biology,
Genetics, Physiology of both adult- and embryo-derived stem cells,
and their application to Biotechnology and Regenerative Medicine.
3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 100 or
equivalent, MCB 316, ANSC 221, ANSC 224, or equivalent; or consent
of instructor.

ANSC 457  Applied Animal Ecology  credit: 3 Hours.
An in-depth multidisciplinary approach (physiology, behavior,
immunology, neuroscience) to understanding animal-environment
interactions (including thermal, air, microbial, photic and behavioral
factors) as basis for prescribing practical environments for keeping
animals. Courses in physiology, biology, nutrition, microbiology, and
genetics are recommended. 3 undergraduate hours. 3 graduate hours.
Prerequisite: ANSC 221 or equivalent, ANSC 222 or equivalent, and
ANSC 223 or equivalent; or consent of instructor.

ANSC 471  ANSC Leaders & Entrepreneurs  credit: 3 Hours.
Designed to familiarize students with the tools and skills necessary
for successful business operation in industry and entrepreneurial
environments including food animal production farms. The overall aim
is to explore how enhanced interpersonal and leadership skills facilitate
positive relations in business. Students will design a business plan, an
entrepreneurial enterprise, that will be read by an external committee of
professors, community members, and business owners and evaluated
for its viability and creativity. This course is relevant for leaders as well
as future entrepreneurs interested in acquiring valuable skills that may
be applied to many careers. 3 undergraduate hours. 3 graduate hours.
Prerequisites: Any advanced composition course.

ANSC 483  Outreach Education Skills  credit: 3 Hours.
Same as CPSC 483. See CPSC 483.

ANSC 498  Integrating Animal Sciences  credit: 2 Hours.
Introduction to the theoretical basis of and skills associated with
leadership, inquiry, and collaborative learning. Capstone experience in
integrating knowledge, practicing skills, and applying theory through
collaborative projects that address current issues in animal sciences.
Projects relate to the impact of animals and animal use on humans
and societal issues facing the world today. 2 undergraduate hours. 2
graduate hours. Prerequisite: Must have completed one of the following:
ANSC 293, ANSC 294, ANSC 295, ANSC 299, ANSC 396, ANSC 398,
ACES 293, ACES 298 or ACES 299.
ANSC 499  Seminar  credit: 1 to 4 Hours.
Group discussion or an experimental course on a special topic in animal sciences. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated.

**Companion Animal and Equine Science Concentration**

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

**Prescribed Courses including Campus General Education**

**Composition I and Speech**
- RHET 105  Writing and Research (or equivalent) (see college Composition I requirement)  4
- CMN 101  Public Speaking  3

**Advanced Composition**
Select from campus approved list.  3-4

**Cultural Studies**
One Western culture and one non-Western U.S. minority culture course  6

**Foreign Language**
Course work at or above the third level is required for graduation.

**Quantitative Reasoning I**
Select one of the following:  4-5
- MATH 220  Calculus
- MATH 221  Calculus I
- MATH 234  Calculus for Business I

**Quantitative Reasoning II**
Select one of the following:  3-4
- ACE 261  Applied Statistical Methods
- CPSC 241  Intro to Applied Statistics
- ECON 202  Economics Statistics I
- PSYC 235  Intro to Statistics
- STAT 100  Statistics
- SOC 280  Intro to Social Statistics

**Natural Sciences and Technology**
- CHEM 102  General Chemistry I  4
  & CHEM 103  and General Chemistry Lab I
- CHEM 104  General Chemistry II  4
  & CHEM 105  and General Chemistry Lab II
- MCB 100  Introductory Microbiology
  & MCB 101  and Intro Microbiology Laboratory  5

**Humanities and the Arts**
Courses selected from campus approved list  6

**Social Sciences**
- ECON 102  Microeconomic Principles  3
  or ACE 100  Agr Cons and Resource Econ

Additional social or behavioral science course; cannot be an economics course.  3-4

**ACES Required**
- ACES 101  Contemporary Issues in ACES  2

**Animal Sciences Required**
- ANSC 100  Intro to Animal Sciences  4
- ANSC 101  Contemporary Animal Issues  3
- ANSC 103  Working With Farm Animals  2
- ANSC 221  Cells, Metabolism and Genetics  3
- ANSC 222  Anatomy and Physiology  3
- ANSC 223  Animal Nutrition  3
- ANSC 224  Animal Reproduction and Growth  4
- ANSC 298  Undergraduate Seminar  1
- ANSC 398  UG Experiential Learning  1
- ANSC 498  Integrating Animal Sciences  2

**Companion Animal and Equine Science Concentration Required**
Choose one group:  6
- ANSC 250  Companion Animals in Society
  & ANSC 307 and Companion Animal Management

or
- ANSC 206  Horse Management
  & ANSC 306 and Equine Science

Select two of the following Applied Sciences courses:  6
- ANSC 201  Principles of Dairy Production
- ANSC 204  Intro Dairy Cattle Evaluation
- ANSC 205  World Animal Resources
- ANSC 206  Horse Management
- ANSC 211  Breeding Animal Evaluation
- ANSC 219  Meat Technology
- ANSC 250  Companion Animals in Society
- ANSC 301  Food Animal Production, Management, and Evaluation
- ANSC 305  Human Animal Interactions
- ANSC 306  Equine Science
- ANSC 307  Companion Animal Management
- ANSC 309  Meat Production and Marketing
- ANSC 310  Meat Selection and Grading
- ANSC 312  Advanced Livestock Evaluation
- ANSC 313  Horse Appraisal
- ANSC 314  Adv Dairy Cattle Evaluation
- ANSC 322  Livestock Feeds and Feeding
- ANSC 370  Companion Animal Policy
- ANSC 400  Dairy Herd Management
- ANSC 401  Beef Production
- ANSC 402  Sheep Production
- ANSC 403  Pork Production
- ANSC 404  Poultry Science
- ANSC 405  Advanced Dairy Management
- ANSC 407  Animal Shelter Management
- ANSC 424  Pet Food & Feed Manufacturing
- ANSC 435  Milk Quality and Udder Health
- ANSC 437  Adv Reproductive Management

Information listed in this catalog is current as of 03/2017
Food Animal Production and Management

The Food Animal Production and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student’s practical knowledge through business courses.

Prescribed Courses including Campus General Education

Composition I and Speech
RHET 105 Writing and Research (or equivalent (see college Composition I requirement)) 4
CMN 101 Public Speaking 3

Advanced Composition
Select from campus approved list. 3-4

Cultural Studies
One Western culture and one non-Western U.S. minority culture course 6

Foreign Language
Coursework at or above the third level is required for graduation.

Quantitative Reasoning I
Select one of the following: 4-5
MATH 220 Calculus
MATH 221 Calculus I
MATH 234 Calculus for Business I

Quantitative Reasoning II
Select one of the following: 3-4
ACE 261 Applied Statistical Methods
CPSC 241 Intro to Applied Statistics
ECON 202 Economic Statistics I
PSYC 235 Intro to Statistics
SOC 280 Intro to Social Statistics
STAT 100 Statistics

Natural Sciences and Technology
CHEM 102 General Chemistry I 4
& CHEM 103 and General Chemistry Lab I
CHEM 104 General Chemistry II 4
& CHEM 105 and General Chemistry Lab II
MCB 100 Introductory Microbiology 5
& MCB 101 and Intro Microbiology Laboratory

Humanities and the Arts
Courses selected from campus approved list 6

Social and Behavioral Sciences
ECON 102 Microeconomic Principles 3-4
or ACE 100 Agr Cons and Resource Econ

Additional social or behavioral science course; cannot be an economics course.

ACES required
ACES 101 Contemporary Issues in ACES 2

Additional elective courses must be completed to yield at least 126 total Hours for graduation.

Total Hours 126

1 ANSC 206, 250, 306 and 307 may NOT be used to meet more than one requirement.
ANSC 100  Intro to Animal Sciences  4
ANSC 101  Contemporary Animal Issues  3
ANSC 103  Working With Farm Animals  2
ANSC 221  Cells, Metabolism and Genetics  3
ANSC 222  Anatomy and Physiology  3
ANSC 223  Animal Nutrition  3
ANSC 224  Animal Reproduction and Growth  4
ANSC 298  Undergraduate Seminar  1
ANSC 398  UG Experiential Learning  1-5
ANSC 498  Integrating Animal Sciences  2

**Technology and Management Concentration Required**

Select four of the following Applied Sciences courses:  12

- ANSC 201  Principles of Dairy Production
- ANSC 204  Intro Dairy Cattle Evaluation
- ANSC 205  World Animal Resources
- ANSC 206  Horse Management
- ANSC 211  Breeding Animal Evaluation
- ANSC 219  Meat Technology
- ANSC 250  Companion Animals in Society
- ANSC 301  Food Animal Production, Management, and Evaluation
- ANSC 305  Human Animal Interactions
- ANSC 307  Companion Animal Management
- ANSC 309  Meat Production and Marketing
- ANSC 310  Meat Selection and Grading
- ANSC 312  Advanced Livestock Evaluation
- ANSC 313  Horse Appraisal
- ANSC 314  Adv Dairy Cattle Evaluation
- ANSC 322  Livestock Feeds and Feeding
- ANSC 370  Companion Animal Policy
- ANSC 400  Dairy Herd Management
- ANSC 401  Beef Production
- ANSC 402  Sheep Production
- ANSC 403  Pork Production
- ANSC 404  Poultry Science
- ANSC 405  Advanced Dairy Management
- ANSC 407  Animal Shelter Management
- ANSC 424  Pet Food & Feed Manufacturing
- ANSC 435  Milk Quality and Udder Health
- ANSC 437  Adv Reproductive Management
- ANSC 471  ANSC Leaders & Entrepreneurs

Select two of the following Basic Sciences courses:  6

- ANSC 306  Equine Science
- ANSC 331  Biology of Reproduction
- ANSC 350  Cellular Metabolism in Animals
- ANSC 363  Behavior of Domestic Animals
- ANSC 366  Animal Behavior
- ANSC 406  Zoo Animal Conservation Sci
- ANSC 409  Meat Science
- ANSC 420  Ruminant Nutrition
- ANSC 421  Minerals and Vitamins
- ANSC 422  Companion Animal Nutrition
- ANSC 431  Advanced Reproductive Biology
- ANSC 438  Lactation Biology
- ANSC 440  Applied Statistical Methods I
- ANSC 441  Human Genetics
- ANSC 444  Applied Animal Genetics
- ANSC 445  Statistical Methods
- ANSC 446  Population Genetics
- ANSC 447  Advanced Genetics and Genomics
- ANSC 448  Math Modeling in Life Sciences
- ANSC 449  Biological Modeling
- ANSC 450  Comparative Immunobiology
- ANSC 451  Microbes and the Anim Indust
- ANSC 452  Animal Growth and Development
- ANSC 453  Stem Cell Biology
- ANSC 467  Applied Animal Ecology
- ANSC 509  Muscle Biology
- ANSC 510  Science of Animal Well-Being
- ANSC 520  Protein and Energy Nutrition
- ANSC 521  Regulation of Metabolism
- ANSC 522  Advanced Ruminant Nutrition
- ANSC 523  Techniques in Animal Nutrition
- ANSC 524  Nonruminant Nutrition Concepts
- ANSC 525  Topics in Nutrition Research
- ANSC 526  Adv Companion Animal Nutrition
- ANSC 533  Repro Physiol Lab Methods
- ANSC 541  Regression Analysis
- ANSC 542  Applied Bioinformatics
- ANSC 543  Bioinformatics
- ANSC 545  Statistical Genomics
- ANSC 554  Immunobiological Methods
- ANSC 561  Animal Stress Physiology

Additional elective courses must be completed to yield at least 126 total Hours for graduation.  23-32

**Total Hours**  126

**Science, Pre-Veterinary and Medical Concentration**

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

**Prescribed Courses including Campus General Education**

**Composition I and Speech**

- RHET 105  Writing and Research (or equivalent (see college Composition I requirement))  4
- CMN 101  Public Speaking  3

Plant your future in the Department of Crop Sciences at the University of Illinois. Join our efforts to advance science to meet the needs of a growing world population. From plant breeding and molecular biology to sustainable food and fuel production systems, our internationally recognized faculty are prepared to educate the future leaders of our industry to use the latest advancements in science and technology to improve food and fuel production.

Our department offers students opportunities to succeed and find their niche. When our students graduate, they often have more than one lucrative job opportunity waiting. The demand for our students is high and the future looks even more promising for well-trained scientists as societal demands change. For example, by 2020, estimates say 1,430 new graduates will be needed with a master's degree or Ph.D. in plant breeding alone.

Check out our undergraduate curriculum options in plant biotechnology and molecular biology, plant protection, agroecology, crop agribusiness, biological sciences, crops, and horticultural food systems. We also offer advanced degree programs tailored to your specific interests that will prepare you for enriching careers with a spectrum of public and private organizations in a global agricultural industry.

In order to reach our mission, we are developing and delivering educational and research programs that foster the creation and adoption of agricultural plant production systems that are profitable, environmentally sound, socially responsible and sustainable.

We are developing well educated, highly skilled and creative individuals with the potential to be national and international leaders in their field. If you are looking for a challenging, exciting career that will make a difference, I am confident our department can meet your needs.

For the Degree of Bachelor of Science in Crop Sciences

Prescribed Courses including Campus General Education

Composition I and Speech
RHET 105 Writing and Research
& CMN 101 and Public Speaking (or equivalent - see College Composition I requirement) 6-7

Advanced Composition
Select from campus approved list. 3-4

Cultural Studies
Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list. 6

Foreign Language
Coursework at or above the third level is required for graduation.

Quantitative Reasoning I
Select one of the following: 4-5
MATH 220 Calculus
MATH 221 Calculus I
MATH 234 Calculus for Business I

Quantitative Reasoning II
CPSC 241 Intro to Applied Statistics 3

Natural Sciences and Technology

Required Concentration 58-79
Concentration prescribed courses. See specific requirements for each concentration listed below.

Total Hours 126

Approved Concentrations:
- Agroecology Concentration (p. 40)
- Biological Sciences Concentration (p. 41)
- Crop Agribusiness Concentration (p. 41)
- Crops Concentration (p. 42)
- Horticultural Food Systems Concentration (p. 42)
- Plant Biotechnology and Molecular Biology Concentration (p. 44)
- Plant Protection Concentration (p. 43)

Minor in Crop and Soil Management (p. 44)
Minor in Horticulture (p. 45)

CPSC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CPSC)
### Crop Sciences Courses

**CPSC 111**  
Farming Systems  
credit: 2 Hours.  
General introduction to the equipment and practices commonly used on Midwest farms. Classes will consist of short lectures followed by demonstrations. All classes and demonstrations will be conducted at the University of Illinois Crop Sciences Research and Education Center. Includes field trips to local production and agribusiness facilities.

**CPSC 112**  
Introduction to Crop Sciences  
credit: 4 Hours.  
Introductory course covering the principles and practices of crop production and sustainable agroecosystem management. Topics include plant growth and development, environmental factors influencing plant productivity, soil management, fertility, and nutrient cycling, pest control principles, and sustainability challenges facing modern crop production. Concepts are discussed in lecture and reinforced in hands-on laboratory sections.  
This course satisfies the General Education Criteria for:  
UIUC: Life Sciences

**CPSC 113**  
Environment, Agric, & Society  
credit: 3 Hours.  
Introduction to agriculture and the environment; examine the largest managed ecosystem and its influence on natural ecosystems; develop a working understanding of natural and agriculture ecosystems and their interaction; examine various agriculture management strategies that can be used to produce food for an increasing world population while maintaining or improving environmental quality.  
This course satisfies the General Education Criteria for:  
UIUC: Life Sciences

**CPSC 116**  
The Global Food Production Web  
credit: 3 Hours.  
Introduces students to the global web involved in the production of food we consume on a daily basis. Selected ecosystems of plants, people, and cultures in Asia, Africa, and Latin America will be studied based on involvement with various crops. Presents the origin and biology of plants; their evolution with humankind in various cultures; the spread and economic importance of crops around the world; and considers current hunger and environmental issues resulting from the global food web. Interactive communications with selected scientists, producers, and traders around the world through the World Wide Web and email system of the INTERNET permit students to get personal exposure to information and activities.  
This course satisfies the General Education Criteria for:  
UIUC: Non-Western Cultures

**CPSC 117**  
Agriculture and Science of Coffee  
credit: 3 Hours.  
The growth and production of coffee and its impact on society and culture. The botanical aspects of coffee, coffee varieties/cultivars, and technologies for coffee growth, harvesting, post-harvest processing, and roasting will be discussed. The wide variety of coffee beverages, coffee flavor evaluation, coffee chemistry, coffee economics, and the physiological effects of coffee will also be examined.  

**CPSC 131**  
Agriculture in Mythology  
credit: 3 Hours.  
Compare and contrast the role agriculture and plant sciences played in the development of ancient cultures. Study agricultural references in ancient global mythology. Develop an appreciation of how agricultural diversity of various ancient cultures influenced mythology in the cultures in different regions.  
This course satisfies the General Education Criteria for:  
UIUC: Non-Western Cultures

**CPSC 180**  
Medicinal Plants and Herbology  
credit: 3 Hours.  
Same as HORT 180. See HORT 180.

**CPSC 199**  
Undergraduate Open Seminar  
credit: 0 to 5 Hours.  
Experimental course on a special topic in crop sciences. Topic may not be repeated except in accordance with the Code. May be repeated up to a maximum of 12 hours in separate terms if topics vary.

**CPSC 213**  
Evolution in Action  
credit: 2 Hours.  
Introduction to evolutionary theory. Examination of how domesticated species have evolved. Develops an appreciation of how agroecosystems have influences evolution of adjacent natural ecosystems. Elucidation of evolutionary mechanisms necessary for agricultural species to adapt to global climate change.

**CPSC 215**  
The Prairie and Bioenergy  
credit: 3 Hours.  
Designed for students who are interested in bioenergy and its production from prairie land. Instructors will provide information on the global trend of bioenergy production and consumption, importance of bioenergy, the role of Illinois prairie land in bioenergy production, potential U.S. bioenergy production, biofuels from plants, and socio-environmental benefits of bioenergy.

**CPSC 226**  
Introduction to Weed Science  
credit: 3 Hours.  
Fundamentals of weed biology, ecology, and management. Emphasis is placed on basic principles and specific management strategies that are relevant to both crop and non-crop ecosystems. Includes a laboratory/discussion. Same as HORT 226. Prerequisite: CPSC 112 or HORT 100 or IB 103.

**CPSC 241**  
Intro to Applied Statistics  
credit: 3 Hours.  
Introduces fundamental statistical procedures used to analyze and interpret data. General principles of descriptive and inferential statistics, measures of central tendency and dispersion, probability, correlation and regression, and tests of hypotheses are covered. An emphasis is placed on biological, environmental, and agricultural sciences, but numerous examples from other areas are discussed. Course content enhances students’ ability to critically assess statistical information encountered in professional and every day activities. Credit is not given for both CPSC 241 and STAT 100 or ACE 261.

**CPSC 246**  
Biotechnology in Agriculture  
credit: 3 Hours.  
Basic introduction to the techniques and application of biotechnology to a wide range of agricultural areas, and specific examples are given. May serve as either a terminal course explaining the techniques or as an introductory base for future studies. Same as HORT 246. Prerequisite: Any 100-level course in a biosciences discipline.

**CPSC 261**  
Biotechnology in Agriculture  
credit: 3 Hours.  
Laboratory/discussion course that provides a hands-on introduction to the techniques and principles of genetic engineering, recombinant DNA and the impact of molecular genetics on society. Students will isolate DNA from plants and clone specific genes into bacterial plasmids, perform polymerase chain reactions, DNA restriction analysis and DNA blotting, and discuss the relevance of these techniques to both medicine and agriculture. Prerequisite: A general biology course.
CPSC 266 Data in Biology and Agriculture  credit: 4 Hours.
This course focuses on the use of computing and data analysis to solve problems in biology and agriculture and includes an overview of computer methods and limitations of current computer, network and storage hardware for big data sets. The nature, use and future potential of different types of computer hardware and software in biology and agriculture (e.g. mobile applications, high performance computing, wireless networking) will be discussed. Examples of computing-related and computing-limited problems in biology and agriculture, such as image analysis, remote sensing and genetic analysis will be used as case studies. The potential of computing to improve the food system, medicine and other applications will be presented.

CPSC 270 Applied Entomology credit: 3 Hours.
Lectures, laboratory, and field trips cover the biology of insects and the recognition and management of insect pests of agricultural, forest, and urban ecosystems. Covers insect structure and physiology, classification, life histories, behavior, and pest management. Same as IB 220 and NRES 270.
This course satisfies the General Education Criteria for: UIUC: Life Sciences

CPSC 293 Off-Campus Crop Sci Internship credit: 1 to 5 Hours.
Supervised, off-campus experience in a field directly pertaining to a subject matter in crop sciences. Approved for S/U grading only. May be repeated to a maximum of 10 hours. For registration in this course, students should contact the Department Teaching Coordinator. Prerequisite: Sophomore standing, cumulative GPA of 2.0 or above at the time the internship is arranged, and consent of instructor.

CPSC 294 On-Campus Crop Sci Internship credit: 1 to 5 Hours.
Supervised, on-campus learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated to a maximum of 10 hours. For registration in this course, students should contact the Department Teaching Coordinator. Prerequisite: Sophomore standing, 2.0 GPA, consent of the advisor, and consent of the Department Teaching Coordinator.

CPSC 295 Undergrad Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

CPSC 396 Undergrad Honors Res or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

CPSC 382 Organic Chem of Biol Processes  credit: 4 Hours.
An overview of the structure, properties, and reactions of carbon-containing compounds relevant to biological processes and cellular structure. The chemistry of hydro carbon, aromatic, as well as oxygen-nitrogen-, phosphorus-, and sulfur-containing compounds will be examined. Macromolecular structures including biological membranes, carbohydrates, proteins and nucleic acids will also be discussed. Prerequisites: CHEM 102 and CHEM 104 or CHEM 202 and CHEM 204.

Information listed in this catalog is current as of 03/2017
CPSC 416 Native Plants and Agroecosystems credit: 4 Hours.
Introduction to native plants and to their conservation use and agronomic benefit. Topics include learning to identify native plants using a regional flora, knowing the different ecological niches in the state of Illinois and which plants inhabit them, and choosing appropriate native plants to enhance the interaction between agronomic crops and natives. 4 undergraduate hours. 4 graduate hours. Credit is not given for CPSC 416 if credit for NRES 415 has been earned. Prerequisite: HORT 100 or IB 103.

CPSC 418 Crop Growth and Management credit: 3 Hours.
Crop physiology and management as influenced by environment, plant species, and cropping system; relates plant growth processes to crop production practices based on current research. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 103 or CPSC 112 or equivalent, or consent of instructor.

CPSC 419 Midwest Agricultural Practices credit: 1 Hour.
Introduces agronomic production practices in the Midwest and economics of the crop production value chain. Specifically designed for beginning graduate students in crop genetic improvement from non-agricultural backgrounds. 1 undergraduate hour. 1 graduate hour.

CPSC 426 Weed Mgt in Agronomic Crops credit: 3 Hours.
Principles of weed ecology and biology, and their application to weed management. Herbicides and their use in corn, soybeans and other agronomic crops. Specialized topics include weed management in reduced tillage, herbicide tolerant crops and management of problem weeds. 3 undergraduate hours. 3 graduate hours. Prerequisite: CPSC 226 or consent of instructor.

CPSC 428 Weed Science Practicum credit: 2 Hours.
Intensive course on field diagnostic skills in weed science. Topics include weed and weed seed identification, sprayer calibration, herbicide application, herbicide injury symptomatology, and field diagnostics. Students who complete the course will be encouraged to enter the North Central Weed Science Society weeds contest, which occurs during the summer. 2 undergraduate hours. 2 graduate hours. Prerequisite: CPSC 226 or CPSC 426 or consent of instructor.

CPSC 431 Plants and Global Change credit: 3 Hours.
The science of global atmospheric and climate change in the 21st Century. Understanding of how plants, including crops, will respond and may be adapted to these changes. Using plants to ameliorate predicted climate change. Same as IB 440 and NRES 431. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: CPSC 112 or IB 103.

CPSC 433 Basic Toxicology credit: 3 Hours.
Same as CB 449, ENV 480 and FSHN 480. See FSHN 480.

CPSC 436 Conservation Biology credit: 4 Hours.
Same as ENV 420 and IB 451. See IB 451.

CPSC 437 Principles of Agroecology credit: 3 Hours.
Examines the dynamics and function of agricultural ecosystems and reviews fundamental concepts of ecology. Agricultural systems will be compared on the basis of energy flow, nutrient cycling, diversity, stability and required inputs. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: IB 100 or IB 103 or equivalent.

CPSC 438 Soil Nutrient Cycling credit: 3 Hours.
Same as NRES 438. See NRES 438.

CPSC 439 Env and Sustainable Dev credit: 3 Hours.
Same as NRES 439. See NRES 439.

CPSC 440 Applied Statistical Methods I credit: 4 Hours.
Statistical methods involving relationships between populations and samples; collection, organization, and analysis of data; and techniques in testing hypotheses with an introduction to regression, correlation, and analysis of variance limited to the completely randomized design and the randomized complete-block design. Same as ABE 440, ANSC 440, FSHN 440, and NRES 440. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 112 or equivalent.

CPSC 448 Biological Modeling credit: 3 or 4 Hours.
Same as ANSC 449, GEOG 468, and IB 491. See GEOG 468.

CPSC 452 Advanced Plant Genetics credit: 3 Hours.
Survey of selected contemporary topics in plant genetics and genomics. Topics include the nature of genes and genomes, crop domestication, selection, allelic diversity in populations, and genetics mapping. Serves as an introduction to functional genomics, population genetics, transmission genetics, quantitative genetics, and bioinformatics. Same as IB 478. 3 undergraduate hours. 3 graduate hours. Prerequisite: CPSC 352 or IB 204, or consent of instructor.

CPSC 453 Principles of Plant Breeding credit: 4 Hours.
Principles, concepts and tools used in plant breeding. Includes methods and breeding schemes used with different plant species. Same as HORT 453. 4 undergraduate hours. 4 graduate hours. Prerequisite: IB 103; CPSC 352 or equivalent.

CPSC 454 Plant Breeding Methods credit: 2 Hours.
Discussion of the application of current scientific tools and methods available to plant breeders for improving plants; emphasis on actual use of plant breeding methods and production of high quality seed. 2 undergraduate hours. 2 graduate hours. Offered summer only in alternate years. Prerequisite: CPSC 453.

CPSC 456 Genomics for Plant Improvement credit: 2 Hours.
An overview of applying the methods of genomics to discover variation in genes and their expression, creating new genetic variation, and applying this information to the improvement of economically important plants. Emphasis is on recent advances in genomic science and activities where functional genomics information is used to efficiently create and manipulate desirable phenotypes. Same as IB 477. 2 undergraduate hours. 2 graduate hours. Prerequisite: CPSC 352 or a similar course, or consent of instructor.

CPSC 457 Plant Genomics credit: 1 Hour.
Same as IB 473. See IB 472.

CPSC 466 Plant Proteomics-Metabolomics credit: 2 Hours.
Same as IB 474. See IB 474.

CPSC 473 Mgmt of Field Crop Insects credit: 3 Hours.
Ecological principles of insect populations in agroecosystems including: sampling insect populations, threshold development, bioeconomics and decision-making, population regulation, designing management strategies for field crop insect pests, and deployment of transgenic crops for management of insect pests. Case studies describing various pest management programs in field-crop settings will be provided. 3 undergraduate hours. 3 graduate hours. Prerequisite: CPSC 270 or an equivalent course, or consent of instructor.

CPSC 475 Insect Pathology credit: 3 Hours.
Same as IB 483. See IB 482.

CPSC 479 Insect Pest Management credit: 3 Hours.
Same as IB 482. See IB 482.
CPSC 482 Plant Tissue Culture credit: 4 Hours.
Same as HORT 482. See HORT 482.

CPSC 483 Outreach Education Skills credit: 3 Hours.
Provides graduate and undergraduate students interested in outreach and extension education programs with opportunities to develop their skills and effectiveness in development and presentation of outreach and extension programs. Same as ANSC 483. 3 undergraduate hours. 3 graduate hours. Prerequisite: Senior or graduate student status.

CPSC 484 Plant Physiology credit: 3 Hours.
Same as IB 420. See IB 420.

CPSC 488 Soil Fertility and Fertilizers credit: 3 Hours.
Same as NRES 488. See NRES 488.

CPSC 489 Photosynthesis credit: 3 Hours.
Same as BIOP 432 and IB 421. See IB 421.

CPSC 491 Ugrad Bioinformatics Seminar credit: 0 to 2 Hours.
Same as INFO 491 and LIS 483. See INFO 491.

CPSC 498 Crop Sci Professional Development credit: 1 Hour.
Topics related to professional development including resumes, interview skills, business etiquette, ethics, and presentations on opportunities in crop sciences and horticulture. 1 undergraduate hour. No graduate credit. Prerequisite: Junior standing in Crop Sciences or Horticulture.

CPSC 499 Seminar credit: 1 to 4 Hours.
Group discussion or an experimental course on a special topic in crop sciences. Approved for both letter and S/U grading. May be repeated to a maximum of 12 hours.

HORT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HORT)

Horticulture Courses

HORT 100 Introduction to Horticulture credit: 3 Hours.
Basic principles of plant growth and development as they apply to the production, marketing, and utilization of fruits, vegetables, and ornamental plants.

HORT 105 Vegetable Gardening credit: 3 Hours.
The science and art of growing vegetables and the connection between gardening and food. Topics include nutrient and pest management, history, folklore, growing requirements, and quality characteristics of vegetables. Lecture and laboratory. Additional fees may apply. See Class Schedule. Credit is not given to horticulture majors.

HORT 106 The Sustainable Home Garden credit: 3 Hours.
Create inviting and sustainable indoor and outdoor living spaces with plants, whether your landscape is several acres or a few containers on an urban balcony. This blended-format class meets 1 hour per week for lecture and discussion with additional instruction presented through independent learning activities including virtual field trips, on-line lectures, and instructional videos. Learn the fundamentals of environmentally sound resource use when designing with and maintaining flowering, fruit and vegetable plants, lawns, trees and shrubs around your home. Become a savvy horticultural consumer and develop a healthy lifestyle that supports positive physical and mental well-being by including greenspace activities in your daily life. Prerequisite: Not open to students in the Horticulture curriculum.

HORT 107 Introduction to Floral Design credit: 2 Hours.
Introduces the art of arranging flowers, foliages, and accessories according to the principles of design. Additional fees may apply. See Class Schedule.

HORT 180 Medicinal Plants and Herbology credit: 3 Hours.
The use of cultivated and wild plants in medicines and health products according to Eastern and Western medical traditions. Consideration of herbal medicine use from ancient times to the present, important medicinal chemicals produced by plants, and the evaluation of plant chemical products as potential human medicines. Same as CPSC 180.

HORT 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Experimental course on a special topic in horticulture. Topic may not be repeated except in accordance with the Code. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.

HORT 205 Local Food Networks credit: 3 Hours.
Prepares students to be leaders and facilitators in local food networks. The focus is on providing the knowledge and skills to initiate and manage community food gardens, school gardens and curricula, institutional buying programs, farmers markets, community supported agriculture, and urban farm networks. Requires a group food network project and an experience with a local food organization. Prerequisite: An introductory course in HORT or CPSC or consent of instructor.

HORT 226 Introduction to Weed Science credit: 3 Hours.
Same as CPSC 226. See CPSC 226.

HORT 240 Plant Propagation credit: 3 Hours.
Examines theories and methods employed in propagation of plants, emphasizing anatomical, physiological, and ecological principles involved in sexual propagation (seeds) and asexual propagation (division, cuttings, budding, grafting, tissue culture, etc.) Prerequisite: IB 103.

HORT 246 Floral Design I credit: 3 Hours.
Applies principles of design to the composition and decorative use of flowers, foliages, and accessories. Additional fees may apply. See Class Schedule. Prerequisite: Enrollment in Horticulture, Human and Community Development, or Hospitality Management.

HORT 255 Multifunctional Landscapes credit: 3 Hours.
Introduction to research and technology in sustainable and multifunctional landscapes, within the context of plant science. Topics covered include: site inventory/analysis, plant biodiversity, stormwater management, green roofs, sustainable construction materials, and urban agriculture. This is a project-based course; students will develop sustainable solutions to landscape problems using multimedia applications, graphic design, written text, and video presentation.

HORT 261 Biotechnology in Agriculture credit: 3 Hours.
Same as CPSC 261. See CPSC 261.
This course satisfies the General Education Criteria for: UIUC: Life Sciences

HORT 293 Professional Internship credit: 1 to 4 Hours.
Off-campus experience in a field directly pertaining to a subject matter in horticulture. Approved for S/U grading only. May be repeated to a maximum of 4 hours.

HORT 294 Resident Internship credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated to a maximum of 4 hours. For registration in this course, students should contact the Department Teaching Coordinator.

Information listed in this catalog is current as of 03/2017
HORT 295 Undergrad Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

HORT 298 Undergraduate Seminar credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in horticulture. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing.

HORT 301 Woody Landscape Plants I credit: 4 Hours.
Systematic approach to the identification, ornamental characters, culture, and use of woody landscape deciduous trees and shrubs with special emphasis on cultivated varieties. Prerequisite: IB 102 or IB 103.

HORT 316 Landscaping with Native Plants credit: 4 Hours.
Herbaceous native plants suitable for home and commercial landscapes. Emphasis on native plant identification, landscape use, and culture. Prerequisite: HORT 100 or IB 103.

HORT 341 Greenhouse Mgmt and Production credit: 4 Hours.
The course focuses on how controlled environments can be managed to obtain optimal plant growth. Lectures cover greenhouse operations, management, and production, including: greenhouse design, culture, glazing, heating, cooling, environmental control, irrigation systems, light control, root media, fertilization, watering, integrated pest management, and automation. The course also has a large laboratory component, in which students conduct experiments in the greenhouse. A required all-day field trip to nearby greenhouse operations rounds out the course experience. Additional fees may apply. See Class Schedule. Prerequisite: NRES 201 and HORT 100.

HORT 343 Herbaceous Plants I credit: 3 Hours.
Course includes identification, culture, and landscape use of herbaceous, frost-tender ornamental plants. Emphasis on flowering annuals, tropical foliage plants used for outdoor displays, and foliage plants used for interiorscaping. Elements of design will be addressed; design projects will integrate concepts. Prerequisite: IB 103.

HORT 344 Planting for Biodiversity and Aesthetics credit: 3 Hours.
As the demand for food increases, plants in ornamental landscapes will need to provide not only beauty but also species biodiversity critical for supporting sustainable food production. Course emphasizes species identification (predominantly herbaceous perennials), management, and planting design principles. Designing for multiple contexts, such as residential and community gardens, and large scale production sites, to provide multiple ecosystem services, especially supporting human aesthetic preferences, and habitat for pollinators. Prerequisite: IB 103.

HORT 355 Landscape Graphics & Design credit: 4 Hours.
Focuses on the development of graphic skills to represent the landscape, using both hand-drawn (pencil and color rendering) and introductory digital methods (e.g., AutoCAD and Photoshop). Students will learn basic principles for organizing space and designing for function, using plant materials that are appropriate for site conditions. A variety of drafting tools and access to specific design software programs are required. AutoCAD and Photoshop will be available for students to use in the classroom.

HORT 360 Vegetable Crop Production credit: 3 Hours.
Instruction on the commercial production of vegetable crops. The first part of the class focuses on broad issues important to all crops including methods of vegetable production, basic soil and nutritional management, irrigation, and weed, insect, and disease management. Both organic and conventional production are discussed with a focus on sustainability. Basic farm and business management topics, including postharvest handling, food safety, crop and farm budgets, business structures, marketing, insurance, and regulations are also discussed. The second part of the class focuses on specific crops, emphasizing their origin, production, growth and development, insects, and diseases as well as harvesting and postharvest handling. Prerequisite: HORT 100 or equivalent.

HORT 361 Small Fruit Production credit: 2 Hours.
Technological application of biological principles to the culture of strawberry, grape, blueberry, raspberry, blackberry, gooseberry, and miscellaneous small fruits. Prerequisite: HORT 100 or IB 103.

HORT 362 Tree Fruit Production credit: 2 Hours.
Examines biological principles and cultural practices involved in the growth and production of apple, pear, peach, cherry, plum, apricot, almond, and miscellaneous citrus and nut crops. Offered every fall semester. Prerequisite: HORT 100 or IB 103.

HORT 363 Postharvest Handling Hort Crop credit: 2 Hours.
Provides theoretical and practical experience in the principles and practices of postharvest handling of cut flowers, ornamentals, fruits, and vegetables, emphasizing factors that impact quality, shelf-life, and safety. Requires two field trips, one to a local produce warehouse and the other to local supermarkets. Offered every fall semester. Prerequisite: HORT 100, CHEM 102, CHEM 103, IB 103.

HORT 396 Ug Honors Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

HORT 421 Horticultural Physiology credit: 4 Hours.
Horticultural crop growth is examined in relation to plant structure, environment, and cultural practices. Emphasizes environmental control of whole plant growth as influenced by the supply of the raw materials required for growth: water, carbon dioxide, radiant energy, including the influence of temperature and photoperiod on plant growth and development. The shoot and root interactions with the environment are characterized relative to cultural practices. 4 undergraduate hours. 4 graduate hours. Prerequisite: HORT 100 or IB 103 and junior standing.

HORT 430 Children and Nature credit: 2 Hours.
Study of research theory and evidence suggesting the importance of children's contact with natural environments including, designed urban greenspaces, managed sustainable landscapes, and wilderness, for healthy child development, ecological literacy, and pro-environmental behavior as adults. Discussion of research implications and applications for redesigning our communities' outdoor spaces, societal values, public policies and education systems to foster children's access to, and bonding with, nature. Same as LA 430. 2 undergraduate hours. 2 graduate hours.
HORT 434  Designing Urban Agriculture  credit: 2 Hours.
Emphasizes the design process and principles related to food production in urban environments. Lecture topics will include assessing, planning, and transforming the landscape at multiple scales from regional to neighborhood to specific site. In group discussions students will critically review readings from peer-reviewed and popular literature. Students will engage in analysis and design of an existing site to integrate multiple functions, emphasizing the permanent infrastructure and perennial vegetation. Access to a computer that can be loaded with appropriate software (Sketchup) is necessary for mapping and design projects. Online lecture/discussion course. 2 undergraduate hours. 2 graduate hours. HORT 100 or CPSC 112 or equivalent introductory course in plant science, one course in Humanities & the Arts, and one course in Social & Behavioral Sciences. Prerequisite: Junior standing required.

HORT 435  Urban Food Production  credit: 3 Hours.
Explore opportunities and challenges for maximizing the productivity and sustainability of urban food production systems, considering agricultural, environmental, energy, social, and economic issues. Students will examine the science and practice of urban agriculture through scientific and popular literature, case studies, online discussion, and service-learning opportunities. Production systems covered will include both outdoor (e.g., vacant lot urban farms) and controlled environment (e.g., hydroponics and aquaponics) agriculture. 3 undergraduate hours. 3 graduate hours. Prerequisite: HORT 100 or CPSC 112 or equivalent introductory course in plant science.

HORT 441  Floral & Nursery Crops Product  credit: 4 Hours.
An intensive study of specific production technologies used to commercially grow landscape and floriculture crops. Emphasis will be on the growth and development of major floral and nursery crops as influences by the environmental and cultural techniques. Field trip required. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: HORT 240 and HORT 341.

HORT 442  Plant Nutrition  credit: 4 Hours.
Mechanisms and factors affecting the absorption, transport, distribution, and functions of the essential elements required by higher plants. 4 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: NRES 201 and IB 420.

HORT 447  Horticultural Plant Breeding  credit: 3 Hours.
Methodology, objectives, and constraints of breeding for improved cultivars of flowers, woody ornamentals, turfgrasses, fruits, and vegetables. Emphasis on breeding objectives unique to horticultural commodities such as color, appearance, flavor, shelf-life, nutritional value, and other characteristics that determine product quality. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: CPSC 352.

HORT 453  Principles of Plant Breeding  credit: 4 Hours.
Same as CPSC 453. See CPSC 453.

HORT 456  Sustainable Landscape Design  credit: 4 Hours.
This course will allow students from different disciplines to work together developing design alternatives for a multifunctional landscape. Students will learn to work at multiple scales, considering the surrounding context, the site itself, and detailed features within the large site. For some projects, students will work in teams, since most ‘real-world’ projects require participation among multiple experts. Instructor- and student-led discussions will focus on scientific and popular literature in horticulture, urban agriculture, ecological design, and landscape ecology, and students are encouraged to synthesize and translate the material into design solutions. 4 undergraduate hours. 4 graduate hours. Prerequisite: Introductory courses in Horticulture and Design.

HORT 464  International Hort Products  credit: 3 Hours.
Survey of the international trade in and production of horticultural foods, beverages, herbs, spices, floricultural crops, interior plants, and landscape plants. Important export and import crops will be discussed. Legal and environmental issues are explored. Term project required. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: CPSC 112, or HORT 100 or IB 103.

HORT 466  Growth and Dev of Hort Crops  credit: 4 Hours.
Factors affecting growth, development, and quality of horticultural crops, such as photoperiodism, growth regulators, and carbon dioxide levels. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 104; HORT 421 or IB 420.

HORT 475  Permaculture & Agroforestry  credit: 3 Hours.
Lecture/discussion course covering the scientific basis and design of permaculture (permanent agriculture) and temperate agroforestry systems. Lecture topics will include: permaculture principles, site assessment, soil remediation, water management, agroforestry case studies, urban food forests, and integration of livestock, among others. Education resources will be provided from peer-reviewed literature and popular sources. Students will work on projects to critically review the principles of permaculture and to design a multifunctional agroforestry system for a temperate site. 3 undergraduate hours. 3 graduate hours. Prerequisite: HORT 100 or CPSC 112 or equivalent introductory course in plant science and one course in ecology, environmental sciences, or natural resources. Junior standing required.

HORT 482  Plant Tissue Culture  credit: 4 Hours.
Survey, description, and applications of cell and tissue culture strategies for plant research and production. Topics include culture environment, media composition, tissue manipulation, organogenesis, somatic hybridization, bioreactors and use of these techniques for plant propagation and physiological and biochemical research. Independent research project is conducted by each student. Same as CPSC 482. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 232 and IB 103.

HORT 499  Special Topics  credit: 1 to 4 Hours.
Experimental course on a special topic in Horticulture. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 12 hours as topics vary. See Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PLPA)

Plant Pathology Courses

PLPA 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in plant pathology. Topic may not be repeated except in accordance with the Code. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.

PLPA 200  Plants, Pathogens, and People  credit: 3 Hours.
Plant diseases and their impact on food supplies and human history are studied in lectures, demonstrations and discussions. Issues of food production and safety, pesticide use and human health, and the environment are considered. Includes the biology of pathogens that cause plant disease. Designed for non-science and science majors. Prerequisite: RHET 105 or equivalent.

This course satisfies the General Education Criteria for: University of Illinois at Urbana-Champaign Life Sciences
PLPA 204  Introductory Plant Pathology  credit: 3 Hours.
Concepts relating to causal agents of representative plant diseases, symptoms and diagnosis, modes of infection and spread, effects of environment on disease development, and methods of control. This course satisfies the General Education Criteria for: UIUC: Life Sciences

PLPA 395  Undergrad Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated to a maximum of 12 hours.

PLPA 401  Plant Pathogenic Fungi  credit: 4 Hours.
Principles of the biology, ecology and pathogenesis of fungi that cause plant diseases; morphology, classification, and history of these pathogens. The course includes both lecture and laboratory components. 4 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: One year of biology or plant biology; and plant and animal genetics; and an introductory plant pathology course; or consent of instructor.

PLPA 402  Phytobacteriologic Nematodes  credit: 2 Hours.
Study of plant-pathogenic nematodes with emphasis on economically important groups; nematode morphology, identification, classification, development biology, ecology, and host-parasite relationships; interaction with fungi, bacteria and viruses in plant disease development, experimental and diagnostic techniques; and symptomology and control. 2 undergraduate hours. 2 graduate hours. Prerequisite: An introductory course in plant pathology and an introductory course in zoology, or consent of instructor.

PLPA 404  Plant Virology  credit: 2 Hours.
Current knowledge of viruses and the diseases they cause in plants studied in lectures, discussions and laboratories. Topics include virus structure, replication, expression, taxonomy and transmission and viral disease detection, diagnosis, epidemiology and management. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: An introductory course in plant pathology and an introductory course in genetics, or consent of instructor.

PLPA 405  Plant Disease Diagnosis & Mgmt  credit: 3 Hours.
Field and laboratory techniques in plant disease diagnosis and appraisal; identification of diseases of small grains, turf, corn, soybeans, forage crops, vegetables, fruit, forest and shade trees, and ornamentals, both on field trips and in laboratory exercises. Includes fundamentals of disease management. 3 undergraduate hours. 3 graduate hours. Prerequisite: PLPA 204 or equivalent.

PLPA 406  Phytophagous Nematodes  credit: 2 Hours.
Provides up-to-date coverage of prokaryotes that cause plant diseases. Lectures, discussions, and laboratories cover taxonomy, molecular biology, etiology, detection and identification, epidemiology and management of major plant pathogenic prokaryotes. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: An introductory course in Plant Pathology and Microbiology, or consent of instructor.

PLPA 407  Diseases of Field Crops  credit: 3 Hours.
Studies the symptoms of major field crop diseases, life histories of causal organisms, and methods of control. Lecture and laboratory. Same as CPSC 407. 3 undergraduate hours. 3 graduate hours. Prerequisite: PLPA 204 or PLPA 401.

Agroecology Concentration
The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

### Biological Sciences Concentration

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the student's faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

### Crop Agribusiness Concentration

The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

Crops Concentration

The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants—how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.

Horticultural Food Systems Concentration

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will...
also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

**Plant Protection Concentration**

The plant protection concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.

**Plant Biotechnology and Molecular Biology Concentration**

The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

Minor in Horticulture

The Horticulture minor is designed for students who desire a significant background in horticulture to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student's major and interests. Courses in the minor cannot be taken Credit/No Credit. At least 6 hours of the minor must be advanced (300 or 400) level courses that are distinct from classes meeting requirements in the student's major.

Horticulture Minor Required Courses

Select one of the following: 3
- HORT 100 Introduction to Horticulture
- HORT 105 Vegetable Gardening
- HORT 106 The Sustainable Home Garden
- HORT 240 Plant Propagation 3-4
  or HORT 341 Greenhouse Mgmt and Production
Select four or five of the following: 12-15
- HORT 240 Plant Propagation if not used above
- HORT 261 Biotechnology in Agriculture
- HORT 301 Woody Landscape Plants I
- HORT 341 Greenhouse Mgmt and Production if not used above
- HORT 343 Herbaceous Plants I
- HORT 344 Planting for Biodiversity and Aesthetics
- HORT 360 Vegetable Crop Production
- HORT 361 Small Fruit Production
- HORT 362 Tree Fruit Production
- HORT 363 Postharvest Handling Hort Crop
- HORT 421 Horticultural Physiology
- HORT 434 Designing Urban Agriculture
- HORT 435 Urban Food Production
- HORT 442 Plant Nutrition
- HORT 475 Permaculture & Agroforestry
- HORT 482 Plant Tissue Culture

Total Hours 18-22

Food Science and Human Nutrition

Sharon Nickols-Richardson
260 Bevier Hall, 905 South Goodwin, Urbana
PH: (217) 244-4498
http://fshn.illinois.edu

The Department of Food Science and Human Nutrition (FSHN) at the University of Illinois at Urbana-Champaign is dedicated to implementing education, research, and outreach programs designed to promote a safe, nutritious, and affordable food supply that enhances human health. To this end, students and faculty work collectively toward learning, discovering, and disseminating new knowledge and in applying novel technologies to achieve the departmental mission. The basic human need for high quality food for optimal health and wellness drives the core of student training within the FSHN Department.

Undergraduate concentrations leading to the B.S. degree include Dietetics, Food Science, Hospitality Management, and Human Nutrition. Career opportunities for graduates of our program are excellent and include position titles including nutritionist, dietitian, food technologist, product developer, food scientist, senior scientist, entrepreneur, restauranteur, and food systems manager. Graduate students may pursue M.S. and Ph.D. degrees, focusing on original research in the general concentrations of Food Science or Human Nutrition. The FSHN Department also offers a non-thesis Professional Science Master's degree that includes foundational courses within the department along with business and marketing courses. The University of Illinois Online Food Science Master’s Degree Program is a popular option for individuals working full-time and who desire a non-thesis M.S. degree in Food Science. Advanced degrees lead to accelerated careers in industry, government, and academia.

Departmental faculty expertise includes:

* Integrated food, nutrition and health
* Food materials science and engineering
* Biochemical and molecular nutrition
* Food safety and security
* Food service management

The FSHN Department values diversity in people, cultures, learning, and science. Collaboration with experts in engineering, biomedical sciences, cellular and molecular biology, and multiple disciplines within the field of agricultural, consumer, and environmental sciences (ACES) is important and routine for students and faculty to promote health, wellness, and sustainable human and economic development.

For the Degree of Bachelor of Science in Food Science and Human Nutrition

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following: 6-7
- RHET 105 Writing and Research
  & CMN 101 and Public Speaking (or equivalent) (see college Composition I requirement)
- CMN 111 Oral & Written Comm I
  & CMN 112 and Oral & Written Comm II

Advanced Composition

Select one course from campus approved list of Advanced Composition courses.

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list.

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 4-5
- MATH 220 Calculus
- MATH 221 Calculus I

Information listed in this catalog is current as of 03/2017
Courses

FSHN 101  Intro Food Science & Nutrition  credit: 3 Hours.
Discusses the evolution of the food system to meet the needs and desires of a complex, heterogeneous society. Provides an overview of food in relation to nutrition and health, composition and chemistry, microbiology, safety, processing, preservation, laws and regulations, quality, and the consumer.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

FSHN 120  Contemporary Nutrition  credit: 3 Hours.
Fundamental principles of human nutrition and their application to the selection of an adequate diet for health and wellness; current nutrition topics of importance. Credit is not given for FSHN 120 if credit has been given for FSHN 220. Prerequisite: CHEM 101 or equivalent.
This course satisfies the General Education Criteria for:
UIUC: Life Sciences

FSHN 125  Intro to Human Nutrition  credit: 1 Hour.
Introductory course for students in Human Nutrition. Explore department, college and campus resources. Learn about current issues, opportunities, and careers in the nutrition field. Prerequisite: FSHN major with a concentration in Human Nutrition only.

FSHN 130  Introduction to Food Science  credit: 1 Hour.
Introductory course for students in Food Science (FS) focused on student learning and success, current issues, and opportunities and careers in the field of food science. In addition, students will learn about how to enhance their learning strategies. Approved for S/U grading only. Prerequisite: For freshman majoring in FSHN with a concentration in Food Science only.

FSHN 140  Introduction to Hospitality  credit: 3 Hours.
Overview of the hospitality industry with emphasis on organizational and operational structures of the major segments of the industry and career opportunities within each. Field trips required.

FSHN 145  Intro Hospitality Management  credit: 3 Hours.
Explore the foodservice aspect of the hospitality industry by assisting Hospitality Management seniors taking FSHN 443 in the operation of the Spice Box. Course covers the planning, production, and service of meals in specialized settings. Additional fees may apply. See Class Schedule.

FSHN 150  Introduction to Dietetics  credit: 1 Hour.
Introductory course for students in dietetics. Addresses current issues, opportunities and careers in the dietetics profession. Freshmen or transfer student into dietetics given priority.

FSHN 195  Intro to Undergrad Research  credit: 1 Hour.
Learn about research opportunities available to undergraduate students in the FSHN department, and find a laboratory that fits a student’s interests and education goals. Guest faculty members present research opportunities in their laboratory, and then give a laboratory tour for students to learn more about the research activities there. Approved for S/U grading only. Prerequisite: For FSHN majors only.

FSHN 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in food science and human nutrition. Topic may not be repeated except in accordance with the Code. Approved for letter and S/U grading. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.
FSHN 220  Principles of Nutrition  credit: 4 Hours.
Course focuses on the nutritive value of foods and metabolism of essential nutrients, as well as the application of principles of nutrition to the requirements of normal individuals throughout the life cycle. Prerequisite: CHEM 102; MCB 244 and 246.

FSHN 230  Food Sci Professional Issues  credit: 1 Hour.
Discussion of current topics in food science and professional issues, including ethics, undergraduate research, study abroad, graduate school options and internships. Approved for S/U grading only. Prerequisite: Sophomore and Junior transfer students with a Food Science concentration only.

FSHN 232  Science of Food Preparation  credit: 3 Hours.
Application of food preparation principles and techniques in the preparation of standard food products; principles of food management and their application in the planning and preparation of meals. Additional course fees may apply. See Class Schedule. Prerequisite: FSHN 101 or concurrent registration.

FSHN 260  Raw Materials for Processing  credit: 4 Hours.
Problems involved with procurement, harvesting, handling, and storage of fruits, vegetables, cereal grains, dairy products, red meat, poultry, fish, and eggs for the food-processing industry. Field trips to specialized operations. Additional fees may apply. See Class Schedule. Prerequisite: One high school course in biological science and FSHN 101.

FSHN 274  NonMajors Food Microbiology  credit: 1 Hour.
Introduction to food microbiology and the role of microorganisms in foodborne illness and food manufacture. Credit is not given for both FSHN 274 and FSHN 101. Prerequisite: Sophomore standing or higher.

FSHN 293  Off Campus Internship  credit: 2 to 4 Hours.
Supervised, off-campus experience in a field directly pertaining to the subject matter. Approved for letter and S/U grading. May be repeated to a maximum of 10 hours.

FSHN 294  On Campus Internship  credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for both letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 10 hours. Prerequisite: Sophomore standing, 2.0 GPA, consent of the advisor, and consent of the Department Teaching Coordinator.

FSHN 295  UG Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. Approved for letter and S/U grading. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisites: Cumulative GPA of 2.5 or above at the time the activity is arranged and consent of instructor.

FSHN 302  Sensory Evaluation of Foods  credit: 3 Hours.
This course is devoted to learning the 1) physiological and psychological basis of human subjects, 2) chemistry of aroma and taste, 3) basic sensory methodologies in food evaluation, and 4) analysis and interpretation of sensory data. Additional fees may apply. See Class Schedule. Prerequisite: Recommended to students in junior and senior levels. Recommended to have taken foundational statistics course, i.e., STAT 100, STAT 200 or FSHN 440.

FSHN 312  Applied Microbiology Methods  credit: 2 Hours.
Consideration, through experimentation, of properties of bacteria, yeasts, molds, and actinomycetes important to industrial processes; exploration of methods of control of microbial processes in industry and sanitation. Prerequisite: MCB 100 and MCB 101 or consent of instructor.

FSHN 322  Nutrition and the Life Cycle  credit: 3 Hours.
Examines physiological changes that occur during gestation, postnatal growth, and aging and the influence of these changes on nutritional requirements. Offered every other year. Prerequisite: FSHN 220 or consent of instructor.

FSHN 329  Communication in Nutrition  credit: 3 Hours.
Application and integration of the principles of nutrition and their transmission to groups and individuals. Students will learn individual counseling techniques as well as how to present nutrition information to groups. Open to Dietetics and Human Nutrition juniors and seniors only. Prerequisite: RHET 105, CMN 101, and FSHN 220 or equivalents.

FSHN 332  Science of Food Systems  credit: 3 Hours.
Application of chemical principles and physical behavior of ingredients in food systems and the effects processing and storage have on finished food products. Additional fees may apply. See Class Schedule. Prerequisite: CHEM 102 and 103 or equivalent; CHEM 104 and 105 or equivalent; FSHN 232.

FSHN 340  Food Production and Service  credit: 4 Hours.
Introduction to the management of commercial and noncommercial foodservice systems through the operation of Bevier Cafe. Students experience managing the procurement, production and service of food, as well as the sanitation and maintenance of equipment and facilities. Prerequisite: FSHN 332, credit or concurrent registration in FSHN 349 and FSHN 345.

FSHN 344  Business Etiquette  credit: 1 Hour.
The fundamentals of business etiquette as they are applied to the modern multicultural and global business environments. Content includes the importance of the first impression, polite conversation, personal appearance, office politics, diplomacy, telephone and cell phone etiquette, high-tech etiquette, proper oral and written communication, and the protocol of meetings both in the United States and abroad. Students will also participate in a formal dining experience. Offered every other year. Prerequisite: Junior standing.

FSHN 345  Hospitality Purchasing  credit: 3 Hours.
Introduction to the principles and procedures for the purchasing, selection and procurement of food and non-food items in the hospitality industry. Field Trips. Prerequisite: FSHN 232.

FSHN 349  Food Service Sanitation  credit: 1 Hour.
Examines the dangers, costs and prevention of foodborne illness as well as the training and motivation of food service employees in sanitary food handling and quality assurance practices. Upon completion of this course, student will be eligible to apply for the food service sanitation certificate issued by the State of Illinois. Prerequisite: FSHN 101 and FSHN 232, or consent of instructor; MCB 100 and MCB 101 recommended. Course should be taken concurrently with or prior to FSHN 340.

FSHN 396  UG Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward the degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.
FHN 398 Undergraduate Seminar  credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in food science and human nutrition. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 12 hours. Prerequisite: Sophomore standing.

FHN 414 Food Chemistry  credit: 3 Hours.
Examines the chemical aspects of major food components; water, carbohydrates, proteins, and lipids; properties of pigments, salts, and food dispersions. Undergraduate Food Science majors must enroll concurrently in FHN 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 232 and CHEM 233.

FHN 416 Food Chemistry Laboratory  credit: 2 Hours.
Chemical and physical properties of water, proteins, lipids, carbohydrates, and other food components/additives are discovered in the context of their interactions and functional roles in foods. 2 undergraduate hours. 2 graduate hours. Prerequisite: CHEM 232 and CHEM 233 and concurrent enrollment in FHN 414.

FHN 417 Neuroscience of Eating & Drinking  credit: 3 or 4 Hours.
Same as PSYC 417. PSYC 417.

FHN 418 Food Analysis  credit: 4 Hours.
Principles and application of the chemical, physical, and instrumental methods used to determine the constituents of foods; special considerations applicable to the analysis of certain foods. Lecture and lab. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 232 and FHN 414; FHN 416 or consent of instructor.

FHN 420 Nutritional Aspects of Disease  credit: 3 Hours.
Examines nutritional, biochemical, and physiological aspects of disease processes and studies the role of nutrition in prevention, management, and treatment of disease. Same as NUTR 420. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220 or comparable course with a physiology prerequisite; MCB 450 or equivalent.

FHN 421 Pediatric Clinical Nutrition  credit: 3 Hours.
Examines physiological, biochemical and nutritional aspects of disease processes relevant to infants, children and adolescents. Topics covered include prematurity, developmental disabilities, inborn errors of metabolism, food allergy, obesity and eating disorders. The role of nutrition in prevention, management and treatment of disease is also covered. Offered every other year. 3 undergraduate hours. 3 graduate hours. Prerequisite: FHN 420; FSHN 322 is highly recommended.

FHN 423 Advances in Foods & Nutrition  credit: 2 Hours.
New developments in foods and nutrition; readings, lectures, and discussions. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 220 and FSHN 332, or equivalent.

FHN 425 Food Marketing  credit: 3 Hours.
Same as ACE 430. See ACE 430.

FHN 426 Biochemical Nutrition I  credit: 3 Hours.
The dietary and hormonal regulation of carbohydrate, lipid and amino acid metabolism. Emphasizes the regulation of enzyme activity and the different roles the major organs have in whole animal energy balance. Same as NUTR 426. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220, or FSHN 120 and FSHN 414, and MCB 450 or concurrent enrollment.

FHN 427 Biochemical Nutrition II  credit: 3 Hours.
Biochemistry and metabolism of the water and fat soluble vitamins and minerals. Emphasizes the digestion, transport, metabolism and intercellular functions of these nutrients and how diet/food intake and physiological states affect these processes. Same as NUTR 427. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 426.

FHN 428 Community Nutrition  credit: 3 Hours.
Application of nutrition principles to needs assessments, program planning, delivery and evaluation in local, national, and international settings using behavioral theory frameworks. Same as NUTR 428. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220 or equivalent, one introductory statistics course, and one course in the social or behavioral sciences.

FHN 429 Nutrition Assessment & Therapy  credit: 3 Hours.
Problem-based learning application (via cases) of the nutrition care process with emphasis on nutrition assessment, diagnosis, intervention, monitoring and evaluation, as related to the management and treatment of disease states. This course is the clinical capstone course for the dietetics curriculum. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 420, or concurrent enrollment required.

FHN 440 Applied Statistical Methods I  credit: 4 Hours.
Same as ABE 440, ANSC 440, CPSC 440, and NRES 440. See CPSC 440.

FHN 442 HM Skills and Applications  credit: 3 Hours.
Application of behavioral science and management techniques, methods and strategies to the hospitality industry. Applied management techniques will focus on those managerial behaviors needed to develop and maintain positive and productive relationships with subordinates, peers, supervisors and individuals external to the hospitality organization. 3 undergraduate hours. No graduate credit. Prerequisite: FSHN 340 or consent of instructor.

FHN 443 Management of Fine Dining  credit: 4 Hours.
Advanced application of food production and management principles to specific food service demands; emphasis on artistry in preparation, serving, and merchandising high quality food in quantity. 4 undergraduate hours. No graduate credit. Prerequisite: FSHN 340 and credit or concurrent registration in FSHN 442.

FHN 450 Dietetics: Professional Issues  credit: 2 Hours.
Discussion of current topics in dietetics, professional issues (ethics, outcomes research, marketing, legislation, registered dietitian exam) and preparing for dietetic internships. Required of all dietetics students. 2 undergraduate hours. 2 graduate hours. Prerequisite: Senior standing in dietetics.

FHN 453 Nutrition for Performance  credit: 3 or 4 Hours.
Same as KIN 453. See KIN 453.

FHN 460 Food Processing Engineering  credit: 3 Hours.
Examines application of process engineering principles to the conversion of raw agricultural materials into finished food products. Topics include basics of engineering analysis, units and dimensions, materials balances, energy balances, thermodynamics, heat transfer, psychrometry, refrigeration and mechanical separations. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 101 and MATH 220; or consent of instructor.
FSHN 461 Food Processing I  
Credit: 4 Hours.
Principles, unit operations, and applications of food preservation and processing by high temperature, refrigeration, and freezing processes; includes heat transfer, kinetics, chemical and microbial changes in food as a result of processing. Also, principles and applications of food processing unit operations based upon the combination of heat and/or mass transfer, including such unit operations as evaporation, freeze-concentration, membrane separation, dehydration, centrifugation, extrusion, as well as water activity control. Lecture-based course. 4 undergraduate hours. 4 graduate hours. Prerequisite: FSHN 414 or equivalent; FSHN 460 or equivalent, and FSHN 418. FSHN 260 is recommended.

FSHN 462 Food Processing II  
Credit: 2 Hours.
Laboratory course for FSHN 461. Includes labs on Blanching, pasteurization, sterilization, freezing, freeze drying, dehydration (tray drying, drum drying and spray drying), evaporation, and extrusion; discussion and labs. Additional fees may apply. See Class Schedule. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 461.

FSHN 464 Beverage Science & Technology  
Credit: 2 Hours.
Explores the research, science and technology of the production of safe, high quality beverages through the application of food chemistry, food microbiology, and food processing principles. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 414 or FSHN 332 or consent of instructor. FSHN majors only, junior or senior standing required.

FSHN 465 Principles of Food Technology  
Credit: 3 Hours.
Overview of processing techniques in the food industry, including thermal/non-thermal processing, refrigeration, freezing, moisture removal, and separation. Presentations cover basic principles of each technology with examples of processing equipment. The changes of food components and nutrients caused by processing is also discussed. Lecture and field trips. 3 undergraduate hours. 3 graduate hours. Credit is not given for both FSHN 465 and the FSHN 461 - FSHN 462 sequence. Undergraduate food science majors or graduate students specializing in food processing/engineering may not enroll in FSHN 465. Recommended: FSHN 332 or food chemistry equivalent.

FSHN 466 Food Product Development  
Credit: 3 Hours.
Principles of food product development: target market evaluation, concept development and presentation, formulation, manufacturing, packaging, product costs, pricing, safety, and marketing. May include a product in accordance with Institute of Food Technologists national competition guidelines. Products will be unveiled and presented for faculty evaluation. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours in separate terms if topics vary. Prerequisite: FSHN 332 or FSHN 414; FSHN 471 or FSHN 472; concurrent registration or completion of FSHN 461 and FSHN 462, or FSHN 465. This capstone course is limited to seniors in the Food Science or Foods Industry and Business options in FSHN. Graduate students will be allowed to register pending sufficient space in the class.

FSHN 469 Package Engineering  
Credit: 3 Hours.
Cross-disciplinary study of the materials, machinery, research, design, techniques, environmental considerations, ethics and economics used in the global packaging industry with emphasis on the implementation of improved technologies for the problems unique to food packaging. An emphasis on the broad, systems-based nature of packaging will be maintained throughout the course. Same as ABE 482. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 220; one each of 100-level Chemistry and Physics courses or their equivalent; junior-senior standing or higher, or consent of instructor.

FSHN 471 Food & Industrial Microbiology  
Credit: 3 Hours.
Relationship of microorganisms to food manufacture and preservation, to food and industrial fermentation and processing, and to food-borne illness. Same as MCB 434. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 101 or MCB 301 or equivalent.

FSHN 480 Basic Toxicology  
Credit: 3 Hours.
Emphasizes basic toxicology principles and the pharmacokinetics, absorption, distribution, metabolism and excretion of drugs, non-nutrient dietary supplements and other compounds foreign to the body. Toxic effects on major target organ systems are discussed, including an introduction to how foreign compounds can initiate, enhance or prevent the carcinogenic process. Briefly surveys diverse areas of toxicology such as eco-, nano-, forensic, genetic, nutritional, clinical and reproductive toxicology, review the federal regulatory aspects of safety assessment and consumer protection. Same as CB 449, CPSC 433, and ENVS 480. 3 undergraduate hours. 3 graduate hours. Prerequisite: Biochemistry - MCB 450 or equivalent, or consent of instructor.

FSHN 499 Cur Topics in FS & Human Nutr  
Credit: 1 to 3 Hours.
Group discussion or an experimental course on a special topic in food science and human nutrition. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated in the same or subsequent terms to a maximum of 12 hours as topics vary.

Dietetics Concentration

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and the Dietetic Internship Program Requirements. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this concentration who do not complete an internship will be prepared for entry-level supervisory positions in food service facilities and in the food and pharmaceutical industries. A minimum of 126 hours of credit is required for graduation.

Food Science Concentration

The Food Science concentration exposes students to all components of food production: harvesting and raw-product handling, food-processing procedures and techniques, packaging, and food storage. Students selecting this concentration are prepared for careers in many areas of the food industry. A minimum of 130 hours of credit is required for graduation.

Hospitality Management Concentration

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. Through the integration of food-focused theory, practice, and experience, it is the mission of the program to prepare leaders in the hospitality industry with a foundation in science, business, and management. The total number of hours required for graduation is 126.

Human Nutrition Concentration

This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong nutrition concentration that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see Dietetics. The total number of hours required for graduation is 126.

Science electives: A minimum of two science courses, approved by the advisor. Courses cannot be used to fulfill other requirements.

Minor in Food Science

The minor in Food Science is designed to broaden the student’s knowledge of science and in particular food chemistry, food microbiology, and food engineering. The Food Science minor is also suitable for students who intend to pursue careers in engineering, microbiology, chemistry, scientific journalism, hospitality management, or science secondary education.

Total Hours Required 18

*For a FS minor with an emphasis in food processing it is recommended that students select the FSHN 461 and FSHN 462 option. However, FSHN 461 and FSHN 462 have prerequisites that not every student seeking a minor may choose to meet. Note: Students cannot take both FSHN 461 and FSHN 462 and FSHN 465.*

Minor in Nutrition

The minor in Nutrition is designed to broaden the student’s knowledge of the biological sciences, with a particular emphasis on the interdisciplinary nature of nutrition. A minor in nutrition would benefit those who intend to pursue careers in the food, health, and fitness industries, or those planning to enter medicine, dentistry, nursing, and other health professions such as physician’s assistant, physical or occupational therapy, nutrition research, and nutrition communication.

Human Development and Family Studies

Susan Koerner
222 Bevier Hall
905 South Goodwin Ave.
Urbana IL 61801
PH: (217) 333-3790
http://hdfs.illinois.edu/

The Department of Human Development and Family Studies (HDFS) at the University of Illinois at Urbana-Champaign engages in teaching, research, and outreach to improve the lives of children, youth, and adults in the contexts of families, communities, and societies. The department creates an environment where these efforts are enriched by a multicultural perspective. HDFS faculty recognize the diversity of cultures and classes in American society, and this perspective prepares students to address contemporary social issues.

Teaching: Our faculty regularly earn campus and national awards for outstanding teaching. Our teaching assistants who provide support to students outside of the classroom and in small discussion sections routinely are rated as among the best TAs on campus. In recent years, Drs. Jennifer Hardesty (http://hcd.illinois.edu/people/faculty/hardesty_jennifer/profile.html) and Ramona Oswald (http://hcd.illinois.edu/people/faculty/oswald_ramona_f/profile.html) earned national awards for teaching excellence. Lyndal Khaw (http://hcd.illinois.edu/people/graduates/khaw_lyndal/profile.html), a graduate student, earned a campus award for teaching.

Study Abroad: There are many opportunities (http://hcd.illinois.edu/student_information/studyabroad.html) for our students to study abroad. We sponsor two short programs in South Africa and Brazil where our students get experience with learning the culture and understanding the needs of children and families in poverty. Currently, about 30% of our students have participated in study abroad sometime during their four years, and more are participating every year.

Undergraduate Research Experience: About 50% of our undergraduate students go on to graduate school. During their undergraduate program, they have many opportunities to work with graduate students and faculty on important scientific questions about children and families. Close to 50% of our undergraduate students participate in at least one research opportunity.

Undergraduate Program: Our program in Human Development and Family Studies prepares students for careers working with children, adolescents, and families. Students have the opportunity to work with children, families, and professionals in the Child Development Laboratory (http://cdli.illinois.edu), the Child Care Resource Service (http://ccrs.illinois.edu), the Family Resiliency Center (http://familyresiliency.illinois.edu), The Autism Program (http://go.illinois.edu/tap), and numerous social service, child assistance, and family social service agencies. This hands-on experience complements classroom instruction.

Graduate Program: This program (http://hcd.illinois.edu/student_information/current_programs.html) prepares students for careers in higher education, social service administration, and public policy settings. Our students are involved in significant research.

Information listed in this catalog is current as of 03/2017...
reaching underserved rural and urban families who often would not have 
the opportunity to learn about children and families.

The Human Development and Family Studies program prepares students 
for graduate/professional education or employment in areas such as 
pediatric services in hospitals, medicine and allied health fields, marriage 
and family therapy, family law, human resources, child care services, 
family life education, social work, counseling, human services, and 
business activities related to children and families. Students select 
course work according to their interests in human development, such as 
infancy, early childhood or adolescence, or family studies, such as the 
marital relationship, parent-child interaction, family change or conflict 
and conflict management in the family. Basic courses in these areas are 
linked to practical experiences in educational and community settings, 
and most courses emphasize issues related to cultural diversity and 
gender. Students select one of two concentrations within this major: 
Child and Adolescent Development or Family Studies. Completion of 
the Family Studies option may qualify some graduates for provisional 
certification as a Family Life Educator by the National Council on Family 
Relations. Additional information is available at the NCFR website.

**For the Degree of Bachelor of Science**
**with a Major in Human Development and 
Family Studies**

### Prescribed Courses including Campus General Education

**Composition I and Speech**
Select one of the following: 6-7
- RHET 105  Writing and Research
- & CMN 101 and Public Speaking (or equivalent) (see college Composition I requirement)

**CMN 111**  Oral & Written Comm I
- & CMN 112 and Oral & Written Comm II

**Advanced Composition**
Select from campus approved list. 3-4

**Language Other Than English**
Coursework at or above the third level is required for graduation.

**Cultural Studies**
Select one course from Western/Comparative culture(s) and one from non-Western/U.S. minority culture(s) from campus approved list. 6

**Quantitative Reasoning I**
Select one of the following: 3-4
- STAT 100  Statistics 3
- ACE 261  Applied Statistical Methods 4
- CPSC 241  Intro to Applied Statistics 3
- ECON 202  Economic Statistics I 3
- PSYC 235  Intro to Statistics 3
- SOC 280  Intro to Social Statistics 4

**Quantitative Reasoning II**
Select one of the following: 3-5
- STAT 200  Statistical Analysis 3
- CHLH 244  Health Statistics 3
- MATH 220  Calculus 5

**MATH 221**  Calculus I 4
- MATH 234  Calculus for Business I 4
- PHIL 103  Logic and Reasoning QR II 3

**Natural Sciences and Technology**
- ANTH 143  Biology of Human Behavior 3
- Life or Physical Science course. Select from campus approved list.

**Humanities and the Arts**
Select from campus approved list. 6

**Social and Behavioral Sciences**
- PSYC 100  Intro Psych 4
- SOC 100  Introduction to Sociology 4
- Select one of the following: 3-4
  - ACE 100  Agr Cons and Resource Econ
  - ECON 102  Microeconomic Principles
  - ECON 103  Macroeconomic Principles

**ACES Required**
- ACES 101  Contemporary Issues in ACES 2

**Human Development and Family Studies Required**
- HDFS 101  Issues & Careers in HDFS 1
- HDFS 105  Intro to Human Development 3
- HDFS 120  Intro to Family Studies 3
- HDFS 220  Families in Global Perspective 3
- HDFS 290  Intro to Research Methods 4
- ACE 161  Microcomputer Applications 3
- ACE 240  Personal Financial Planning 3
- FSHN 120  Contemporary Nutrition 3
- or CHLH 100  Contemporary Health
- Select one of the following: 3
  - HDFS 208  Child Fam with Special Needs
  - HDFS 221  Asian Families in America
  - HDFS 340  Gender, Relationshps & Society
  - HDFS 341  Asian American Youth
  - HDFS 379  HDFS Study Abroad Experience
  - HDFS 322  US Latina and Latino Families
  - HDFS 444  LGBT Indiv, Fam & Community
- Select one of the following: 3-6
  - HDFS 261  Early Childhood Curriculum Dev
  - HDFS 467  Research Internship
  - HDFS 450  Practicum in HDFS
  - HDFS 494  Applied Research Methods

**Required Concentration** 16-18
See specific requirements for each concentration listed below.
Additional courses must be completed to yield a total of 126 hours for graduation.

**Total Hours** 126

Approved Concentrations:
- Child and Adolescent Development Concentration (p. 57)
- Family Studies Concentration (p. 57)
Minor in Adult Development

The Adult Development minor combines theoretical and practical approaches to understanding issues faced by adults as individuals, partners, family members, learners, caregivers, and clients of social agencies. Course work examines adults from age 25 to 90+ in the contexts of evolving family roles, health issues, and social service needs. Students anticipating careers in social or health-related services will find an understanding of adult development and its attendant issues a valuable compliment to other professional skills.

The minor requires a minimum of 18 hours. At least six hours of advanced course work must be distinct from credit earned for the student’s major or another minor. Courses in the minor cannot be taken Credit/No Credit. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Total Hours 18-19

¹ HDFS majors pursuing the minor may not use this course to meet a major requirement.
² No more than three combined hours of HDFS 294, 450, 494 or equivalent field/research experience may be counted toward minor requirements. Field/research experience must focus on adults.

HDFS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HDFS)

Courses

HDFS 101  Issues & Careers in HDFS  credit: 1 Hour.
Introduction to career opportunities related to human development and family studies, academic and other preparation for different fields, and emerging issues for practitioners and researchers.

HDFS 105  Intro to Human Development  credit: 3 Hours.
Systematic overview of the psychological, biological, familial, and cultural factors related to human growth and development across the life span. This course satisfies the General Education Criteria for: UIUC: Behavioral Sciences

HDFS 120  Intro to Family Studies  credit: 3 Hours.
Overview of current concepts, theories, and substantive issues in family studies from an interdisciplinary perspective. Gives attention to variation in family form and function across different social/cultural contexts and how family experience is structured by gender. Examines issues of family development (marriage, parenting, divorce, remarriage, aging family) and explores the links between families and other social institutions. This course satisfies the General Education Criteria for: UIUC: Social Sciences

HDFS 140  Intro Gender & Women's Studies  credit: 3 Hours.
Same as GWS 100 and SOC 130. See GWS 100. This course satisfies the General Education Criteria for: UIUC: Social Sciences

HDFS 143  Biology of Human Behavior  credit: 3 Hours.
Same as ANTH 143. See ANTH 143. This course satisfies the General Education Criteria for: UIUC: Life Sciences

HDFS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in human development and family studies. Approved for both letter and S/U grading. May be repeated in the same or subsequent terms as topics vary.

HDFS 206  Early Childhood Curriculum Dev  credit: 4 Hours.
Introduces development of curriculum for children from birth to age five; integrates child development theory and principles with programming for young children in preschool and childcare setting. Prerequisite: HDFS 105.

HDFS 208  Child Fam with Special Needs  credit: 3 Hours.
Multi-disciplinary approach to the study of issues related to exceptional children and their families. Explores social, emotional, and economic aspects of exceptionality for both children and families; examines processes of identification, intervention, and integration of children who deviate significantly from developmental norms. Designed for students studying child development, early childhood education, special education, social work, nursing and other disciplines involved with children who have special needs and their families. Recommended for students preparing for internships and careers as Child Life Specialists. Prerequisite: HDFS 105.

HDFS 220  Families in Global Perspective  credit: 3 Hours.
Explores economic, political, cultural and social factors affecting families in different countries; examines variations among families in developed and developing nations and their historical, political and cultural contexts. Same as ANTH 210. This course satisfies the General Education Criteria for: UIUC: Non-Western Cultures UIUC: Social Sciences

HDFS 221  Asian Families in America  credit: 3 Hours.
Same as AAS 297 and SOCW 297. See SOCW 297. This course satisfies the General Education Criteria for: UIUC: Social Sciences UIUC: US Minority Culture(s)
HDFS 225 Close Relationships credit: 3 Hours.
Initiation, development, and dissolution of committed relationships with same- or opposite-sex partners within familial, cultural, and societal contexts. Prerequisite: Sophomore standing.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

HDFS 259 Motor Development and Control credit: 3 Hours.
Same as KIN 259. See KIN 259.
This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

HDFS 261 Self-Help Group Dev & Process credit: 3 Hours.
Defines nature and use of self-help groups in different contexts. Includes role of professionals in group formation and maintenance and develops group planning and management skills. Includes practice in group formation and visits to working groups in the community.

HDFS 262 Motor Develop, Growth & Form credit: 3 Hours.
Same as KIN 262. See KIN 262.
This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

HDFS 263 Diversity in Recreation, Sport, and Tourism credit: 3 Hours.
Same as KIN 230 and RST 230. See RST 230.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

HDFS 290 Intro to Research Methods credit: 4 Hours.
Introduction to quantitative and qualitative research methods used to study human development and families. Provides experience conducting observations and survey interviews, evaluating research results, and writing research reports. Prerequisite: HDFS 105.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

HDFS 291 Grad/Prof School Plan & Prep credit: 1 Hour.
Overview of graduate and professional school programs that prepare students for careers in counseling, health care, social work, higher education, policymaking and other fields related to human development and family studies. Examines types of graduate and professional opportunities and the preparation they require. Students develop personal graduate/professional school preparation plans. Approved for S/U grading only.

HDFS 293 Off-Campus Internship credit: 1 or 2 Hours.
Supervised, off-campus experience in a field directly pertaining to subject matter in Human Development and Family Studies. Intended primarily for students seeking supervised internship experience needed for certification as a Child Life Specialist. Approved for letter and S/U grading. May be repeated to a maximum of 4 hours. Prerequisite: Prior or concurrent enrollment in HDFS 408 and consent of instructor.

HDFS 294 Research Internship credit: 1 to 4 Hours.
Students work one-on-one or in a small group with a faculty member engaged in research. Students must arrange this research experience with a professor prior to registering for the course. A list of possible research projects can be found at: http://hdfs.illinois.edu/undergraduate/research-opportunities. Once you have found a project that interests you, email the professor and ask to participate in his or her research opportunity. Approved for Letter and S/U grading. May be repeated in the same or separate terms to a maximum of 10 hours. Prerequisite: Consent of instructor; not open to students on probation.

HDFS 295 Independent Study or Research credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms.

HDFS 301 Infancy & Early Childhood credit: 4 Hours.
Reviews development during the first five years of life, including cognitive, social, and biological aspects of early development; includes first-hand observation of young children to supplement and extend lecture material. Prerequisite: HDFS 105 or PSYC 216.

HDFS 305 Middle Childhood credit: 3 Hours.
Systematic overview of the normative changes that occur in the physical, cognitive, social, emotional, and moral domains during the middle childhood period as well as current social issues that confront many of today's children (such as school violence or poverty). Prerequisite: HDFS 105.

HDFS 310 Adult Development credit: 3 Hours.
Focuses on adult development as a means for understanding the quality of family relationships and community functioning. Uses current theoretical approaches to understand adult development and evaluate each approach's usefulness for adults in the contexts of family, health, work, leisure and challenges over the life course. Prerequisite: HDFS 105 or equivalent.

HDFS 314 Introduction to Aging credit: 3 Hours.
Same as CHLH 314, RST 314, PSYC 314, and REHB 314. See CHLH 314.

HDFS 322 US Latina and Latino Families credit: 3 Hours.
Explores a variety of topics and provides a basic overview of issues relevant to the understanding of Latina/Latino families and children in the United States. Examines recent demographic changes in the U.S. population and their implications for the socialization and education of Latina/Latino children and their families. Course content looks at such areas as who are Latina/Latino families; how are those families different from others; what are the similarities and differences within Latinas/Latinos; how does acculturation and language fit into our understanding of these families; and what are the implications for the education success of current and future Latina/Latino children. Same as LLS 322.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

HDFS 324 African Amer Families in Film credit: 3 Hours.
Same as AFRO 382. See AFRO 382.

HDFS 340 Gender, Relationships & Society credit: 3 Hours.
Explores the production of gender through social interaction within families and other specific interpersonal and institutional relationships that change over time. Gender is also linked to race, class, ability, and sexuality. Same as GWS 340 and SOC 322. Prerequisite: HDFS 105 or SOC 100.

HDFS 341 Asian American Youth credit: 3 Hours.
Same as AAS 346. See AAS 346.

HDFS 361 Creative Dance for Children credit: 3 Hours.
Same as ARTE 350 and DANC 350. See DANC 350.

HDFS 379 HDFS Study Abroad Experience credit: 1 to 4 Hours.
International experience in areas related to human development and family studies involving foreign travel and study without enrollment in another institution. Experience must be planned and approved in advance via consultation with an HDFS faculty member. May be repeated in the same or separate terms to a maximum of 8 hours as topics vary.

Information listed in this catalog is current as of 03/2017
HDFS 396  Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. Prerequisite: Junior standing, admission to the ACES Honors Program.

HDFS 398  Undergraduate Seminar  credit: 1 to 3 Hours.
Special topics in a field of study directly pertaining to subject matter in human development and family studies. May be repeated in the same or subsequent terms to a maximum of 12 hours as topics vary. Prerequisite: Junior standing.

HDFS 401  Socialization and Development  credit: 4 Hours.
Presents and uses theories of socialization to evaluate and analyze current issues and socialization practices; delineates historical and philosophical trends in socialization, and discusses the implications of these trends for generating social policy affecting the developing individual. 4 undergraduate hours. 4 graduate hours. Prerequisite: HDFS 301 and HDFS 290.

HDFS 404  Gerontology  credit: 3 or 4 Hours.
Same as CHLH 404. See CHLH 404.

HDFS 405  Adolescent Development  credit: 3 Hours.
Examines paths of experience and individual development within the family, the peer group, and other domains through this socially-defined stage of life. 3 undergraduate hours. 3 graduate hours. Prerequisite: HDFS 105 and PSYC 100.

HDFS 406  Child Dev Class Supervision  credit: 5 Hours.
Examines the relationships between child development theories and developmentally appropriate and individualized instruction techniques, discipline and guidance strategies, and the role of the family in child development programs. Emphasizes program supervision. Includes direct experience with children and families in a laboratory setting. 5 undergraduate hours. 5 graduate hours. Prerequisite: HDFS 206, HDFS 220, and junior standing.

HDFS 408  Hospitalized Children  credit: 3 or 4 Hours.
Examines the development needs and stress reactions of children in hospitals and their families; introduces the role of Child Life programs and the Child Life Specialist; examines responses of family and staff facing terminal illness and the death of a child; familiarizes students with general hospital procedures, medical terms, and illnesses. Optional one-hour clinical placement includes direct experience with hospitalized children and their families. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: HDFS 206 and HDFS 208.

HDFS 420  Family Diversity in the U.S.  credit: 3 or 4 Hours.
Examines influence of economic, demographic and social changes on families in the U.S. and on the opportunities and life-chances of individual family members. Explores interactions of social class, poverty, race and gender and their effects on family life and on child and adolescent development. Includes critical analysis of employment, immigration, health care, family leave, welfare and other social policy options that affect family life. 3 undergraduate hours. 4 graduate hours. Prerequisite: HDFS 120.

HDFS 424  Racial and Ethnic Families  credit: 2 to 4 Hours.
Same as AFRO 421, EPS 421, and SOC 421. See EPS 421.

HDFS 425  Critical Family Transitions  credit: 4 Hours.
Life-span development approach to the study of normative changes and non-normative events and their impact on marriage and family relationships; attention to variations in the socio-economic contexts of family transitions, and to methods for reducing the negative effects of such transitions. 4 undergraduate hours. 4 graduate hours. Prerequisite: HDFS 120 and HDFS 290.

HDFS 426  Family Conflict Management  credit: 3 or 4 Hours.
Examines processes of conflict management in family and community disputes; emphasizes negotiation and mediation as modes of dispute settlement. 3 undergraduate hours. 4 graduate hours. Prerequisite: HDFS 120.

HDFS 427  Family Adaptation & Resilience  credit: 3 Hours.
Examines complex factors, including culture, economy, and values conflicts, that challenge families and the range of adaptive strategies that families deploy amid various challenges and stressors. Activities include developing a research or action proposal related to developing family resiliency. 3 undergraduate hours. 3 graduate hours. Credit is not given for both HDFS 427 and HDFS 527. Prerequisite: HDFS 425 or consent of instructor.

HDFS 444  LGBT Indiv, Fam & Community  credit: 3 or 4 Hours.
Examines contemporary sexual and gender minority experiences in the context of societal inequality. Of particular interest to students pursuing educational, human service, legal, and/or health profession careers. Same as CHLH 444. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOC 100 or an introductory course on gender issues.

HDFS 459  Physical Activity & Aging  credit: 3 or 4 Hours.
Examines the theory and practice of designing family life education programs for children, youth, and/or families. Introduces strategies for translating science-based information into learning experiences. Family life education topics such as parenting (including managing difficult children and children with special needs), relationships (dating, marriage), family transitions (becoming new parents, divorce, & stepfamilies), and health and well-being (obesity, stress) will be reviewed. Principles of effective program design will be explored along with online program delivery skills. 3 undergraduate hours. No graduate credit. Credit is not given for both HDFS 459 and HDFS 561. Prerequisite: HDFS 120 or consent of instructor.

HDFS 461  Family Life Education  credit: 3 Hours.
Examines the theory and practice of designing family life education programs for children, youth, and/or families. Introduces strategies for translating science-based information into learning experiences. Family life education topics such as parenting (including managing difficult children and children with special needs), relationships (dating, marriage), family transitions (becoming new parents, divorce, & stepfamilies), and health and well-being (obesity, stress) will be reviewed. Principles of effective program design will be explored along with online program delivery skills. 3 undergraduate hours. 3 graduate hours. Credit is not given for both HDFS 461 and HDFS 561. Prerequisite: HDFS 120 or consent of instructor.

HDFS 494  Applied Research Methods  credit: 1 to 4 Hours.
Participation in faculty-supervised research as a member of a transdisciplinary team investigating questions related to the health and well-being of children and families. Students propose their own research questions and present findings developed from data gathered by the team. 1 to 4 undergraduate hours. No graduate credit. May be repeated in the same term to a maximum of 6 hours. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.
Family Life Education can apply for the Provisional level of the CFLE. Sexuality, HDFS 401: Socialization and Development, and HDFS 461: courses (HDFS 427: Family Adaptation and Resilience, CHLH 206: Human who have completed the Family Studies curriculum and four elective optimally. Within two years after receiving their degree, graduates foster skills and knowledge to enable individuals and families to function within a family systems perspective and provides a primarily preventive approach. The goal of family life education is to teach and operate, develop and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage conflict. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include early childhood education, parent education, developmental therapy, Child Life specialty, adoption case work and day-care administration. Graduates also may choose to pursue graduate education in a variety of fields, including human development research, education, psychology, social work, law, medicine, and business.

Child and Adolescent Development Concentration

The Child and Adolescent Development concentration emphasizes the influence of families, peer groups, schools and communities on the well-being of children and adolescents. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include early childhood education, parent education, developmental therapy, Child Life specialty, adoption case work and day-care administration. Graduates also may choose to pursue graduate education in a variety of fields, including human development research, education, psychology, social work, law, medicine, and business.

Family Studies Concentration

Students in the Family Studies concentration focus on how families operate, develop and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage conflict. Graduates with this concentration are qualified to provide many services to couples and families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including family studies, marriage and family therapy, social work, education, sociology, psychology, law, medicine, or business.

The Family Studies concentration is approved by the National Council of Family Relations (NCFR) for the provisional Certified Family Life Educator credential. Family life education focuses on healthy family functioning within a family systems perspective and provides a primarily preventive approach. The goal of family life education is to teach and foster skills and knowledge to enable individuals and families to function optimally. Within two years after receiving their degree, graduates who have completed the Family Studies curriculum and four elective courses (HDFS 427: Family Adaptation and Resilience, CHLH 206: Human Sexuality, HDFS 401: Socialization and Development, and HDFS 461: Family Life Education) can apply for the Provisional level of the CFLE credential through an abbreviated application process (details available on the NCFR website).

Total Hours 16-17

Natural Resources and Environmental Sciences

Jeff Brawn
Student Services Address: N-509 Turner Hall, 1102 South Goodwin Avenue, Urbana
PH: (217) 333-5824
http://nres.illinois.edu
nres-ssc@illinois.edu

NRES provides outstanding undergraduate and graduate educational opportunities. Many alumni of our B.S. program have gone on to complete graduate and professional degrees. Our graduates work in environmental science and natural resource management positions in government, corporations, consulting firms, and non-governmental organizations. NRES also offers traditional Master of Science, online Master of Science, and Doctor of Philosophy degrees. Our graduate students gain employment with research universities, government agencies, national and international non-governmental organizations, and business enterprises.

All NRES educational and research programs center on science, applied ecology, and conservation in a variety of aquatic, terrestrial and human dominated ecosystems. Within that framework, our faculty, staff, and students study a wide variety of ecological systems with emphases on soil, water, people and social systems, forests, plants, animals, and microbes. Much of our research focuses on natural and social processes, such as habitat fragmentation, regulation, dispersal, disturbance, invasion, bioactivity, and decision-making. We research and work in locations locally, across the United States, and around the world.

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world's most pressing problems.
Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

For the Degree of Bachelor of Science in Natural Resources and Environmental Sciences

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
- RHET 105 Writing and Research
- CMN 101 and Public Speaking (or equivalent) (see College Composition I requirement)
- CMN 111 Oral & Written Comm I
- CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list 3-4

Cultural Studies
Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list. 6

Foreign Language
Coursework at or above the third level is required for graduation.

Information listed in this catalog is current as of 03/2017

Quantitative Reasoning I
Select one of the following: 4-5
- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

Quantitative Reasoning II
Select one of the following: 3-4
- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics
- SOC 280 Intro to Social Statistics
- STAT 100 Statistics

Natural Sciences and Technology
- CHEM 102 General Chemistry I
- CHEM 103 and General Chemistry Lab I
- CHEM 104 General Chemistry II
- CHEM 105 and General Chemistry Lab II
- IB 103 Introduction to Plant Biology
- IB 104 Animal Biology

Select one of the following: 3-5
- GEOG 103 Earth's Physical Systems
- GEOL 107 Physical Geology
- PHYS 101 College Physics: Mech & Heat
- MCB 100 Introductory Microbiology

Humanities and the Arts
Select from campus approved list. 6

Social and Behavioral Sciences
- ACE 100 Agr Cons and Resource Econ
- or ECON 102 Microeconomic Principles

Select from campus approved list. 3-4

Natural Resources and Environmental Sciences Required
- NRES 102 Introduction to NRES 3
- NRES 201 Introductory Soils 4
- NRES 219 Principles of Ecosystem Mgmt 3
- NRES 287 Environment and Society 3
- NRES 348 Fish and Wildlife Ecology 3
- NRES 454 GIS in Natural Resource Mgmt 4
- NRES 456 Integrative Ecosystem Mgmt 3

Two Repeatable Field Methods Courses selected from: 2-4
- NRES 276 Introduction to Field Pedology
- NRES 285 Field Experience

ACES Required
- ACE 101 Contemporary Issues in ACES 2

Required Concentration
Concentration prescribed courses. See specific requirements for each concentration listed below. 22-32

Total Hours 126

Approved Concentrations:
- Fish and Wildlife Conservation Concentration (p. 64)
- Global Change and Landscape Dynamics (p. 64) Concentration (p. 64)
• Human Dimensions of the Environment Concentration (p. 64)
• Resource Conservation and Restoration Ecology Concentration (p. 66)
• Minor in Natural Resource Conservation (p. 65)
• Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences (p. 65)

HDES Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HDES)

Human Dimensions of Env Sys Courses
HDES 410 Neighborhoods and Politics credit: 3 or 4 Hours.
Same as PS 410. See PS 410.

NRES Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/NRES)

Natural Resources Environ Sc Courses
NRES 100 Fundamentals of Env Sci credit: 3 Hours.
Introduction to environmental sciences and current environment issues. Topics include population growth, world food supplies, agriculture and the environment, biodiversity, fossil fuels and "green" energy issues, endangered and threatened species, water use, conservation and pollution, global warming, acid rain, ozone depletion, waste management and reduction, recycling, toxins and health, mineral resources, and environmental policies and regulations. Course addresses the complex relationships between the human race and the natural systems that contain our air, water, energy, and biotic and food resources. Credit is not given for both NRES 100 and NRES 102. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

NRES 101 Wildlife Conserv 21st Century credit: 3 Hours.
This course is an introduction to the conservation, diversity and ecology of animals. The diversity of fish, reptiles, amphibians, mammals, and birds both around the world and in Illinois will be explored. The course will have a strong conservation component where students are introduced to a variety of threats facing animals. The students will be introduced to how to manage sustainable wildlife populations. The students will be exposed to current issues in Illinois to illustrate how people and animals can co-occur and a broad overview of the management, restoration, and conservation techniques.

NRES 102 Introduction to NRES credit: 3 Hours.
Introduction to natural resources (forests, fisheries, soils, aquatic systems) and environmental science. Emphasizes renewable natural resources, ecological concepts, energy use, biodiversity of species, biogeochemical cycles, and air, water, and soil pollution. Provides natural science basis for understanding contemporary environmental issues and natural resource management. Credit is not given for both NRES 100 and NRES 102.

NRES 108 Env Sc & Nat Resource Careers credit: 1 Hour.
Explores career options in the fields of Natural Resource Management and Environmental Sciences. Students will improve understanding of their career goals, expand their knowledge of careers available in these fields, improve their job searching skills, and develop a plan for pursuing a career. Approved for S/U grading only.

NRES 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Discussion course that focuses on analyzing opposing points of view on contemporary environmental issues. Students engage in role-playing activities, debates, and other participatory activities to explore the ecological and social dimensions of the issues.

NRES 201 Introductory Soils credit: 4 Hours.
The nature and properties of soil including origin, formation, and biological, chemical, and physical aspects. Prerequisite: Successful completion of MATH 234, or equivalent and CHEM 102 is required. CHEM 104 is recommended.

NRES 202 American Environmental History credit: 3 Hours.
Same as ESE 202 and HIST 202. See HIST 202. This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Western Compartv Cult

NRES 203 Environmental Economics credit: 3 Hours.
Same as ACE 210, ECON 210, ENV 210, and UP 210. See ACE 210. This course satisfies the General Education Criteria for:
UIUC: Social Sciences

NRES 210 Environmental Economics credit: 3 Hours.
Same as ESE 202 and HIST 202. See HIST 202. This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Western Compartv Cult

NRES 210 Environmental Economics credit: 3 Hours.
Same as ACE 210, ECON 210, ENV 210, and UP 210. See ACE 210. This course satisfies the General Education Criteria for:
UIUC: Social Sciences

NRES 219 Principles of Ecosystem Mgmt credit: 3 Hours.
The principles of ecosystem management are based in ecology, which is the branch of science that explores how organisms interact with their environment. In this course, students will learn about ecological principles that are the foundation for understanding biological systems on many different levels of organization. Topics include abiotic influences on organisms, energy acquisition, population ecology, species interactions, biological communities, and ecosystem ecology. Particular attention is given to integrating these basic principles into a better understanding of ecology in a world that is increasingly dominated by human activities. Completion of a prior course in biology, zoology, or botany is recommended.

NRES 220 Communicating Agriculture credit: 3 Hours.
Same as AGCM 220 and ENV 220. See AGCM 220. This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

NRES 221 Watching the Environment credit: 3 Hours.
Same as MDIA 223. See MDIA 223. This course satisfies the General Education Criteria for:
UIUC: Social Sciences

NRES 242 Nature and American Culture credit: 3 Hours.
Same as HIST 282, LA 242, and RST 242. See RST 242. This course satisfies the General Education Criteria for:
UIUC: Western Compartv Cult

NRES 270 Applied Entomology credit: 3 Hours.
Same as CPSC 270 and IB 220. See CPSC 270. This course satisfies the General Education Criteria for:
UIUC: Life Sciences

NRES 271 Introduction to Field Pedology credit: 2 Hours.
Laboratory and field course involving description, interpretation, and classification of soil profiles. Several day, overnight field trip required; fee required. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 4 hours. Prerequisite: NRES 201.
NRES 285  Field Experience  credit: 1 or 2 Hours.
Field based course that exposes students to procedures and methods used in various resource settings in a hands-on manner. Includes weekly field trips to visit representative natural resource and environmental science settings with supporting laboratory exercises. Content of offerings vary by section, but all focus on resource management, environmental quality and assessment, and effects of consumption and use on the environment. Field trips required. Additional fees may apply. See Class Schedule. May be repeated in the same or subsequent semesters to a maximum of 6 hours. Prerequisite: NRES 201 and NRES 219.

NRES 287  Environment and Society  credit: 3 Hours.
Examination of the relationship between environment and society and implications for ecological and human well-being. Social science perspective covered on topics such as environmental change, environmental decision-making, natural resource management, agricultural systems, and environmental risks, hazards, and disasters. Students will build critical thinking skills focused on contemporary problems in the interface between people and the physical environment. Same as ESE 287, GEOG 287, PS 273, and SOC 287. Prerequisite: NRES 102 and sophomore or higher standing. Introductory social science course recommended. This course satisfies the General Education Criteria for: UIUC: Social Sciences

NRES 293  Professional Internship  credit: 1 to 4 Hours.
Off-campus experience in a field directly pertaining to a subject matter in natural resources and environmental sciences. Approved for Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Consent of academic advisor or Department Internship Coordinator.

NRES 294  Resident Internship  credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of academic advisor or Department Internship Coordinator.

NRES 295  Undergraduate Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

NRES 298  Undergraduate Seminar  credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in natural resources and environment sciences. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing.

NRES 302  Dendrology  credit: 4 Hours.
Emphasizes nomenclature, classification, and the distinguishing morphological characteristics of the native and naturalized tree species of North America. Introduces disciplines related to the systematics of tree species, including: morphology, physiology, phenology, ecology, soil-site relationships, silviculture, geographic range and natural distribution, wood characteristics, economic uses, and natural history (including major diseases and insect pests). Incorporates tree and forest habitats that provide cover, breeding sites, and food for a variety of wildlife species. Serves as a basis for studies in natural resources management, environmental science, and for advanced studies of botany, genetics, and tree physiology. Field trips required. Additional fees may apply. See Class Schedule. Prerequisite: IB 103.

NRES 310  Natural Resource Economics  credit: 3 Hours.
Same as ACE 310 and ENVS 310. See ACE 310.

NRES 325  Natural Resource Policy Mgmt  credit: 3 Hours.
Explores policy processes and institutions relating to allocation, utilization, and preservation of natural resources. Considers conceptual models of policy processes, and examines both historical examples and current issues. Prerequisite: ECON 102 or ACE 100.

NRES 330  Environmental Communications  credit: 3 Hours.
Same as AGCM 330 and ENVS 330. See AGCM 330.

NRES 340  Environ Social Sci Res Meth  credit: 3 Hours.
Introduction to social science research methods for addressing environmental issues. It provides basic information about social science concepts and methods (especially observation, surveys, focus groups, and interviews), helps students become informed users of social science research, and guides selection of appropriate social science tools to meet environmental challenges. A group focus on a local environmental issue offers a practical experience in which course content is applied within a specific community context. Field trips within the local community may be required. Additional fees may apply. See Class Schedule. Prerequisite: STAT 100 or equivalent.

NRES 348  Fish and Wildlife Ecology  credit: 3 Hours.
Application of ecological principles and modeling to management of fish and wildlife populations; significance of abiotic and biotic factors, including life-history parameters in population growth and management; and techniques and procedures for the development of management strategies for animal populations, emphasizing vertebrates. A course in statistics is highly recommended. Same as IB 348. Prerequisite: IB 203 or NRES 219.

NRES 351  Introduction to Environmental Chemistry  credit: 3 Hours.
Introduces major inorganic and organic chemical pollutants, their sources and their fates in the atmosphere, hydrosphere and pedosphere. In particular, the course covers 1) translocation/distribution of chemicals in the environment, and 2) abiotic and biotic transformation of chemicals (e.g., photochemical reactions, hydrolysis, redox, adsorption and volatilization. Geared towards students in agricultural, natural, environmental and life science majors. Prerequisite: Successful completion of MATH 234 (or equivalent) and CHEM 104 is required. One semester of organic chemistry (CHEM 232 or CHEM 236) is recommended.

NRES 352  Plant Genetics  credit: 4 Hours.
Same as CPSC 352. See CPSC 352.
NRES 362 Ecology of Invasive Species credit: 3 Hours.
Focused on the ecology and management of biological invasions, with an emphasis on understanding the introduction, establishment, spread and impact stages of the invasion process. Students will identify the causes and impacts of biological invasions, as well as management strategies for preventing new invasions and mitigating impacts of established invaders in freshwater, marine, and terrestrial ecosystems. No special equipment will be required, and any optional, weekend field trips will occur on campus. Prerequisite: NRES 219 or similar introductory course in ecology.

NRES 368 Vertebrate Natural History credit: 4 Hours.
Same as IB 368. See IB 368.

NRES 370 Environmental Sustainability credit: 3 Hours.
Same as ENSU 300 and LA 370. See LA 370.

NRES 396 UG Honors Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

NRES 401 Watershed Hydrology credit: 3 Hours.
Precipitation, evapotranspiration, stream flow, and other aspects of the hydrologic cycle are studied in a watershed context. Measurement techniques, statistical analyses of hydrologic data, and simulation modeling are discussed. Case studies that quantify water movement in specific watersheds are used to integrate course topics. Same as GEOG 401. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 102, completion of the Quantitative Reasoning I requirement, and completion of the statistics requirement.

NRES 403 Watersheds and Water Quality credit: 3 Hours.
Examines water quality in streams, rivers, lakes, and wetlands. The responses of watershed systems to pollution and other human impacts will be described in terms of their biological, geochemical, and physical processes. The technical analyses necessary to establish policies aimed at preserving or restoring these natural resources will be emphasized. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of CEE 330, CHEM 232, NRES 351; one of MATH 220, MATH 221, MATH 234.

NRES 406 Fluvial Geomorphology credit: 4 Hours.
Same as GEOG 406 and GEOL 406. See GEOG 406.

NRES 407 Wildlife Population Ecology credit: 4 Hours.
This course includes the application of principles of population biology to the analysis, management, and conservation of wildlife populations, models of population growth, spatio-temporal variation in abundances, estimation of demographic parameters and methods of decision-making. 4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 348. One semester of calculus or statistics is recommended.

NRES 409 Fishery Ecol and Conservation credit: 4 Hours.
Ecological and conservation concepts are applied to fisheries management practices. Will discuss current literature related to the interface between basic and applied aspects of fish populations, focusing on life history, conservation biology and genetics, growth and recruitment, competition, predation, trophic and community ecology, ecosystem management, and human dimensions. 4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 348.

NRES 415 Native Plant ID and Floristics credit: 4 Hours.
Focuses on gaining skills in identification of native vascular plants in the field and classroom. Methods of plot-based and plotless vegetation sampling methods will be introduced. Procedures and applications for botanical inventory and assessment will be covered. Field trips are required. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Credit is not given for NRES 415 if credit for CPSC 416 has been earned.

NRES 416 Forest Biology credit: 3 Hours.
Interactions of biotic and abiotic components of forests as they relate to the health, structure and function of these ecosystems. The course is ecophysiological and organismic in approach, but includes biochemical concepts central to the understanding of forest biology. Lecture-discussion combined with assigned readings, field projects, and a paper. One Saturday field trip required. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 419 and NRES 302 or HORT 301.

NRES 418 Wetland Ecology & Management credit: 3 Hours.
Wetlands are important ecosystems that support high biodiversity and provide numerous benefits to society. This course provides a comprehensive examination of wetland science, management, and governance. Lectures, readings and class discussions will focus on the structure and processes of wetland ecosystems, wetland biota, wetland conservation and management, and U.S. and international wetland policies. Special emphasis will be placed on the application of wetland science to policy and restoration. Offered in alternate years. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and NRES 219, or consent of instructor.

NRES 419 Env and Plant Ecosystems credit: 3 Hours.
Relationships among environmental factors and plant processes and functions; impact of human activities on the environment and the structure and function of plant ecosystems. Examples will be drawn from a variety of managed and unmanaged plant ecosystems. Field trip required. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 219 or LA 450 or IB 103 and CHEM 104 or NRES 201. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

NRES 420 Restoration Ecology credit: 4 Hours.
Historical development of ecological restoration, its philosophical foundation, multi-disciplinary borrowings from the natural, applied, and social sciences, and varied practical applications, with emphasis on the application of ecological principles. Case studies, field trips, and laboratory activities on restoration planning. Field trip required. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 219 or LA 450.

NRES 421 Quantitative Methods in NRES credit: 3 Hours.
Explores the fundamental principles, procedures, and practices that underlie the most common statistical and sampling methods used in natural resources and environmental sciences. This course covers hypothesis testing, regression, and analysis of variance. There is also a strong focus on sampling theory and experimental design. Computer labs utilize the open source R statistical computing environment. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of MATH 220, MATH 221, MATH 234; completion of the statistics requirement.

NRES 422 Earth Systems Modeling credit: 4 Hours.
Same as ATMS 421, ESE 421, GEOG 421 and GEOL 481. See ATMS 421.
NRES 423  Politics of International Conservation and Development  credit: 3 Hours.
Conserving the earth's rich biological heritage while enhancing the well-being of the poor stands as a critical global challenge. This course examines this complex issue using the lens of political science and allied fields. Readings, discussion, and written work will demonstrate how insights and approaches from these areas of scholarship can help understand and address the twin problems of biodiversity loss and human poverty in developing countries. Examples focus on forest and wildlife conservation and management. Same as GEOG 423. 3 undergraduate hours. 3 graduate hours. Prerequisite: One 200 or 300 level social science course or consent of instructor. Junior standing required.

NRES 424  US Environ, Justic & Policy  credit: 4 Hours.
In the course students will: (a) write about the roles that race, class, and other social differences play in shaping human-environment relationships, (b) understand the role of the Environmental Protection Agency in considering environmental justice in policy, and (3) identify ways that policies for ecological sustainability can be configured to improve the equity of environmental and natural resource decision-making. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior class standing.

NRES 425  Natural Resources Law & Policy  credit: 3 Hours.
Using the case study method and discussion problems, students in this course will study how laws in the U.S. regulate the use of natural resources, including public ownership and preservation of natural resources through other federal and state public lands. Also examines major federal environmental statues designed to protect natural resources, including the Clean Water Act, the Endangered Species Act, the National Environmental Policy Act, and federal acts related to forest, national parks, and wilderness protection. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing.

NRES 426  Renewable Energy Policy  credit: 3 Hours.
Considers how policies can be designed to optimize economic, environmental, and social solutions to transforming the world's unsustainable energy production, distribution, and consumption paradigm. Provides an up-front primer on climate change policy in the U.S., Europe, and internationally, which have become the primary driver of sustainability initiatives in the energy sector. Examines policies that define "renewability" within various energy sectors including fossil fuels (e.g., coal, natural gas, petroleum), biofuels, nuclear power, hydropower, wind, solar, geothermal, and wave energy. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing.

NRES 427  Modeling Natural Resources  credit: 4 Hours.
Examines basic modeling concepts and methods. Modeling skills, model development, and natural resource issues and problems will be emphasized. Content areas include fisheries, forests, wildlife, economics, human dimensions, groundwater and surface water. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of MATH 220, MATH 221, MATH 234.

NRES 429  Aquatic Ecosystem Conservation  credit: 3 Hours.
Application of the principles of aquatic ecology to a broad range of conservation issues. The structure and function of aquatic systems are discussed from an ecosystem perspective, including the major threats and disturbances to aquatic ecosystems. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 102 and PHYS 101 or PHYS 140, and MATH 220 or MATH 221 or MATH 234, and IB 203 or NRES 219.

NRES 430  Comm in Env Social Movements  credit: 3 Hours.
Same as AGCM 430, ENV 430, and SOC 464. See AGCM 430.

NRES 431  Plants and Global Change  credit: 3 Hours.
Same as CPSC 431 and IB 440. See CPSC 431.

NRES 438  Soil Nutrient Cycling  credit: 3 Hours.
The ecology of decomposition and plant nutrient acquisition in terrestrial soils will be addressed using applied ecology concepts. Discussion will focus on the scientific literature addressing biological, physical, and chemical controls over nutrient availability in soils. Writing assignments will teach students to summarize scientific literature. Students will learn about analytical and quantitative methods used in this field of study and gain the interpretive and communication skills needed to assess and/or carry out applied research in plant and soil science arenas. Same as CPSC 438. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: IB 203 or NRES 219, and NRES 201.

NRES 439  Env and Sustainable Dev  credit: 3 Hours.
Comprehensive overview and synthesis of global environmental problems and their relationships to human activities, with a focus on ecological and natural resource elements. Concerns include unsound ethics and concepts of development and modernization, the lack of motivation or funding to implement available technical solutions, the promotion of alternative development ethics, and a review of opportunities to maintain or improve the well-being of people, other organisms, and the environment. Same as CPSC 439. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 219 or ACE 210.

NRES 440  Applied Statistical Methods I  credit: 4 Hours.
Same as ABE 440, ANSC 440, CPSC 440, and FSHN 440. See CPSC 440.

NRES 441  Biogeography  credit: 3 Hours.
Same as ANTH 436, ESE 439, GEOG 436 and IB 439. See IB 439.

NRES 442  Mammalogy  credit: 4 Hours.
Same as IB 462. See IB 462.

NRES 445  Statistical Methods  credit: 4 Hours.
Same as ABE 445 and ANSC 445. See ANSC 445.

NRES 446  Sustainable Planning Seminar  credit: 4 Hours.
Same as GEOG 446 and UP 446. See UP 446.

NRES 452  Community Ecology  credit: 3 Hours.
Same as IB 453. See IB 453.

NRES 454  GIS in Natural Resource Mgmt  credit: 4 Hours.
Geographic Information Systems (GIS) and remote sensing for natural resource management. Personal computers and GIS software are used to demonstrate the utility of these techniques for data acquisition, image processing, and map modeling. Exercises include problems relevant to the management of natural resources such as land cover mapping, monitoring, suitability and productivity assessment, landscape pattern analysis, land use change analysis, spatial modeling, and decision making. 4 undergraduate hours. 4 graduate hours.

NRES 455  Adv GIS for Nat Res Planning  credit: 2 Hours.
Examines the application of Geographic Information Systems (GIS) to natural resource planning and decision making. Integrates principles of decision making in various contexts: public and private, single and multiple criteria, and various forms of management constraints. Management alternatives are then incorporated into a GIS system for further review and analysis. Course combines GIS software with computer-based optimization and quantitative decision making models. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: GEOG 479 or NRES 454.
NRES 456 Integriative Ecosystem Mgmt credit: 3 Hours.
Examines ecological and human dimensions of ecosystem management
trough case studies in settings such as the Pacific Northwest,
Southwest, Great Lakes, Gulf Coast, and Mississippi River Basin
ecosystems. Capstone course for seniors in the NRES major. Additional
fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate
hours. Prerequisite: Senior standing; NRES 219 and NRES 287.
NRES 460 Aerial Photo Analysis credit: 3 or 4 Hours.
Same as GEOG 460. See GEOG 460.
NRES 461 Ornithology credit: 4 Hours.
Same as IB 461. See IB 461.
NRES 462 Ecosystem Ecology credit: 3 Hours.
Same as ESE 452 and IB 452. See IB 452.
NRES 463 Ichthyology credit: 4 Hours.
Same as IB 463. See IB 463.
NRES 464 Herpetology credit: 4 Hours.
Same as IB 464. See IB 464.
NRES 465 Landscape Ecology credit: 3 Hours.
Introduction to the theory, methods, and application of landscape
ecology, with an emphasis on characterizing heterogeneity and
examining its consequences for ecological processes across a variety
of spatial and temporal scales. Special attention will be given to the
role of natural and human disturbances in shaping spatial patterns.
Laboratory exercises are computer-based and focus on concepts and
tools in landscape ecology. 3 undergraduate hours. 3 graduate hours.
Prerequisite: NRES 219 or equivalent, NRES 454 or equivalent.
NRES 471 Pedology credit: 3 Hours.
The science of soil genesis, classification, and morphology. Includes
factors of soil formation, properties and methods used in distinguishing
soils, interpretation of soil profiles and soil stratigraphy, causes of soil
variability, and the impact of soil properties upon soil management, land-
use decisions, and the environment. 3 undergraduate hours. 3 graduate
hours. Prerequisite: NRES 201.
NRES 472 Environmental Psychology credit: 4 Hours.
Theory and research in environmental psychology. Topics include
environmental perception, cognition, experience, values and emotion,
perceived environmental quality, environmental hazards and risk
perception, and conservation attitudes and behavior. Same as PSYC 472.
4 undergraduate hours. 4 graduate hours. Prerequisite: Jr. standing:
PSYC 100 or PSYC 103.
NRES 473 Soil Testing Practicum credit: 2 or 3 Hours.
Chemical procedures useful in assessing soil/plant relationships for
field crops. Topics include agronomic principles, field sampling, performance of
soil tests, interpretation of analytical results, and formulation of
nutrient management programs. 2 or 3 undergraduate hours. 2 or 3
graduate hours. Field trip required. Additional laboratory work and
consent of instructor required for 3 hours. Prerequisite: NRES 201.
NRES 474 Soil and Water Conservation credit: 3 Hours.
Application of principles of soil conservation and management to the
solution of land-use problems; influence of soil characteristics on erosion
control, cropping intensity, water management, and land-use planning.
Includes a field trip. Additional fees may apply. See Class Schedule. 3
undergraduate hours. 3 graduate hours. Prerequisite: NRES 201.
NRES 475 Environmental Microbiology credit: 3 Hours.
Introduction to the diversity of microbial populations and their important
role in environmental processes in air, water, soils, and sediments.
Microbial community ecology and interactions with plants and animals
will also be discussed. Students will learn how microbial activities
sustain natural ecosystems and contribute to environmental quality,
and also how these functions are harnessed to support managed
and artificial systems. Molecular biology techniques for investigating
microbial communities and their activities will also be discussed. 3
undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and
CHEM 104.
NRES 477 Introduction to Remote Sensing credit: 3 Hours.
Same as GEOG 477. See GEOG 477.
NRES 478 Environmental Stable Isotopes credit: 3 Hours.
Same as ATMS 422, GEOL 488, and IB 488. See IB 488.
NRES 479 Soil Chemistry credit: 3 Hours.
Emphasizes inorganic reactions involved in soil development and plant
nutrition in soils; topics include colloid systems, properties of water,
ion exchange equilibria, plant nutrient forms, and methods of analyses.
3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and
CHEM 104.
NRES 481 Soil Fertility and Fertilizers credit: 3 Hours.
Provides a broad-based understanding of the basic principles of
soil fertility and their application. Coverage includes the occurrence,
cycling, and plant availability of the essential mineral nutrients in soils;
fertilizer sources, soil reactions, and efficiency; evaluating fertilizer
and lime needs; methods of fertilizer application; and the economics
of fertilization. Same as CPSC 488. 3 undergraduate hours. 3 graduate
hours. Prerequisite: NRES 201.
NRES 488 Physics of Plant Environments credit: 4 Hours.
The physics of transport processes in the soil and aerial environment
of plants; exchanges of energy and gases in crop canopies, and
the retention and flow of water, gases, solutes, and heat in soils. 4
undergraduate hours. 4 graduate hours. Prerequisite: PHYS 101 or
PHYS 140; one of MATH 220, MATH 221, MATH 234; NRES 201.
NRES 490 Surface Water System Chemistry credit: 4 Hours.
Examines the interaction of chemical and biological processes that
govern the chemistry of streams, lakes, and wetlands, and the response
of aquatic organisms to pollution. Chemical equilibrium and kinetic
principles are used to analyze the behavior of surface water systems
through the use of models. Topics include modeling of field studies in
environmental inorganic chemistry and biogeochemistry. The laboratory
section will be devoted to instruction in the use of computer models and
to their practical application. 4 undergraduate hours. 4 graduate hours.
Credit not given for both NRES 490 and CEE 443. Prerequisite: CHEM 104;
one of MATH 220, MATH 221, MATH 234; NRES 201.
NRES 492 Experimental Course on Special Topic credit: 1 to 4 Hours.
Experimental course on a special topic in natural resources and
environmental sciences. Additional fees may apply. See Class Schedule.
1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for both
letter and S/U grading. May be repeated in the same or separate terms to
a maximum of 12 hours as topics vary.
### Fish and Wildlife Conservation Concentration

The Fish and Wildlife Conservation concentration is designed for the student interested in the fundamental properties of natural resource systems with emphasis on the ecology, biology, conservation, and management of fish and wildlife resources.

**Fish and Wildlife Conservation Concentration Required**

**Organismal Biology**

Select one of the following:

- NRES 368  Vertebrate Natural History
- NRES 461  Ornithology
- IB 462   Mammalogy
- IB 463   Ichthyology
- IB 464   Herpetology

**Specialization course**

Select one of the following:

- NRES 419  Env and Plant Ecosystems
- NRES 420  Restoration Ecology
- NRES 429  Aquatic Ecosystem Conservation
- NRES 465  Landscape Ecology
- IB 329   Animal Behavior
- IB 451   Conservation Biology

**Plant Classification/Identification**

Select one of the following:

- NRES 415  Native Plant ID and Floristics
- IB 335   Systematics of Plants

### Global Change & Landscape Dynamics

The Global Change and Landscape Dynamics Concentration explores the patterns and processes interlinking biological species with landscape components in order to promote the sustainability and ecological integrity of terrestrial ecosystems at local, regional, and sub-continental geographic scales. This concentration is especially relevant for students interested in invasion biology; biological rarity; wildlife disease epidemiology; energy, nutrient, and organism exchanges; the distribution of land cover and land use; and other elements affecting the earth’s ecology.

**Global Change & Landscape Dynamics Concentration Required**

**Ecology**

Select one of the following:

- NRES 420  Restoration Ecology

---

**Information listed in this catalog is current as of 03/2017**

### Geospatial Techniques

Select one of the following:

- NRES 455  Adv GIS for Nat Res Planning
- NRES 460  Aerial Photo Analysis
- NRES 477  Introduction to Remote Sensing
- GEOG 412  Geospatial Tech & Society
- UP 316   Urban Informatics II

### Planning & Policy

Select one of the following:

- NRES 325  Natural Resource Policy Mgmt
- NRES 310  Natural Resource Economics
- NRES 424  US Environ, Justic & Policy
- NRES 425  Natural Resources Law & Policy
- NRES 426  Renewable Energy Policy
- NRES 439  Env and Sustainable Dev
- NRES 446  Sustainable Planning Seminar
- ACE 406  Environmental Law

### Environmental Quality

Select one of the following:

- NRES 351  Introduction to Environmental Chemistry
- NRES 403  Watersheds and Water Quality
- NRES 438  Soil Nutrient Cycling
- NRES 474  Soil and Water Conservation
- NRES 475  Environmental Microbiology
- ATMS 449  Biogeochemical Cycles
- ESE 320   Water Planet, Water Crisis
- GEOL 380  Environmental Geology

### Human Dimensions of the Environment Concentration

The Human Dimensions of the Environment Concentration emphasizes the social scientific interpretations of human-environment interactions at multiple levels as well as on applied policy and management implications. It is intended for students interested in the study of environmental sociology and psychology, land use planning, environmental management and policy, natural resource allocation, social impacts, resource economics, and environmental law. The Human Dimensions of the Environment Concentration requires advanced coursework in natural resource economics, environmental psychology, communications, social impact assessment, environmental policy, and environmental law.

**Human Dimension Concentration Required**

### Analytical Methods
Select one of the following: 3-4
- NRES 421 Quantitative Methods in NRES
- NRES 440 Applied Statistical Methods I
- SOC 485 Intermediate Social Statistics

### Social Science Planning and Policy
Select two of the following: 6-8
- NRES 310 Natural Resource Economics (if not taken as one of the HDC required classes)
- NRES 325 Natural Resource Policy Mgmt (if not taken as one of the HDC required classes)
- NRES 424 US Environ, Justic & Policy
- NRES 425 Natural Resources Law & Policy (if not taken as one of the HDC required classes)
- NRES 426 Renewable Energy Policy
- NRES 430 Comm in Env Social Movements
- NRES 472 Environmental Psychology
- ACE 210 Environmental Economics (if not taken as one of the HDC required classes)
- ACE 406 Environmental Law
- SOC 447 Environmental Sociology

### Conservation/Environmental Science/Ecology
Select one of the following: 3-4
- NRES 401 Watershed Hydrology
- NRES 407 Wildlife Population Ecology
- NRES 409 Fishery Ecol and Conservation
- NRES 415 Native Plant ID and Floristics
- NRES 420 Restoration Ecology
- NRES 429 Aquatic Ecosystem Conservation
- NRES 439 Env and Sustainable Dev
- NRES 474 Soil and Water Conservation

### Minor in Natural Resource Conservation
The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources.

A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

**Required Courses for a Minor in Natural Resource Conservation**
- NRES 102 Introduction to NRES 3
- or NRES 100 Fundamentals of Env Sci 3
- NRES 287 Environment and Society 3

### Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences
The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills.

In order to be eligible to declare this minor, a student must have successfully completed the Quantitative Reasoning I and Quantitative Reasoning II requirements. The minor requires the completion of an additional 18 hours of coursework selected from the following list. Students must earn credit for at least three hours in each of the three

**Minimum of 12 credit hours, at least 6 of which must be 400-level, selected from:**
- NRES 108 Env Sc & Nat Resource Careers
- NRES 109 Global Environmental Issues
- NRES 201 Introductory Soils
- ACE/NRES 210 Environmental Economics
- NRES 219 Principles of Ecosystem Mgmt
- ACE/NRES 310 Natural Resource Economics
- NRES 325 Natural Resource Policy Mgmt
- NRES 340 Environ Social Sci Res Meth
- NRES 348 Fish and Wildlife Ecology
- NRES 351 Introduction to Environmental Chemistry
- NRES 407 Wildlife Population Ecology
- NRES 409 Fishery Ecol and Conservation
- NRES 415 Native Plant ID and Floristics
- NRES 419 Env and Plant Ecosystems
- NRES 420 Restoration Ecology
- NRES 421 Quantitative Methods in NRES
- NRES 424 US Environ, Justic & Policy
- NRES 425 Natural Resources Law & Policy
- NRES 426 Renewable Energy Policy
- NRES 427 Modeling Natural Resources
- NRES 429 Aquatic Ecosystem Conservation
- NRES 438 Soil Nutrient Cycling
- NRES 439 Env and Sustainable Dev
- NRES 454 GIS in Natural Resource Mgmt
- NRES 455 Adv GIS for Nat Res Planning
- NRES 471 Pedology
- NRES 472 Environmental Psychology
- NRES 474 Soil and Water Conservation
- NRES 475 Environmental Microbiology
- NRES 488 Soil Fertility and Fertilizers

**Total Hours** 18
categories. Courses taken to fulfill the minor may not be counted towards the NRES major, but may count towards majors in other fields.

Required Courses for a Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

Statistics & Research Design
Select one of the following: 3-4
- NRES 340 Environ Social Sci Res Meth
- NRES 421 Quantitative Methods in NRES
- CPSC 440 Applied Statistical Methods I
- NRES 445 Statistical Methods
- SOC 485 Intermediate Social Statistics
- STAT 200 Statistical Analysis

Mathematical Modeling
Select one of the following: 3-4
- NRES 422 Earth Systems Modeling
- NRES 427 Modeling Natural Resources
- ANSC 448 Math Modeling in Life Sciences
- GEOG 468 Biological Modeling

Spatial Analysis
Select one of the following: 3-5
- NRES 454 GIS in Natural Resource Mgmt
- NRES 455 Adv GIS for Nat Res Planning
- NRES 465 Landscape Ecology
- GEOG 478 Techniques of Remote Sensing
- GEOG 479 Advanced Topics in GIS
- GEOG 489 Programming for GIS

Minimum hours required for the minor 18

Resource Conservation and Restoration Ecology

The Resource Conservation and Restoration Ecology Concentration emphasizes the ecology, biology, and management of aquatic, soil, forest, and wildlife resources. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. Through lectures, labs and field exercise, students study biosphere relationships in natural resource systems. The Resource Conservation and Restoration Ecology concentration includes coursework in the areas of restoration ecology, soil science, environmental biology, aquatic ecosystem management, tree and plant physiology, and advanced ecology.

Resource Conservation & Restoration Ecology Concentration Required
- NRES 419 Env and Plant Ecosystems 3
- NRES 420 Restoration Ecology 4
- NRES 421 Quantitative Methods in NRES 3-4
  or NRES 440 Applied Statistical Methods I

Watershed Science
Select one of the following: 3-4
- NRES 401 Watershed Hydrology
- NRES 403 Watersheds and Water Quality
- NRES 406 Fluvial Geomorphology

For the Degree of Bachelor of Science with a Major in Agricultural Communications

The major in Agricultural Communications is for students wishing to pursue careers as professionals in writing, editing, and publishing; public relations; advertising; radio and television broadcasting; photography; and related activities with an emphasis on the fields of food, agriculture, the environment, energy and consumer behavior. Concentrations in journalism or advertising allow students to pursue these professional interests. Program requirements in each concentration include the completion of an interdisciplinary minor in Food and Environmental Sciences. The College of Agricultural, Consumer and Environmental Sciences and the College of Media jointly offer this curriculum.

A minimum of 126 hours are required for graduation, including:
- General Education Requirements
- Agricultural Communications major requirements
- Minor in Food and Environmental Systems requirements
- College of Media concentration requirements

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7
RHET 105  Writing and Research
& CMN 101 and Public Speaking (See College Composition I requirement)

OR
CMN 111  Oral & Written Comm I
& CMN 112 and Oral & Written Comm II

Advanced Composition
Select from campus approved list. (JOUR 200; AGCM 220).  3-4

Cultural Studies
Select one course from Western/Comparative culture and one from non-Western/U.S. minority culture from campus approved list.  6

Foreign Language
Coursework at or above the third level is required for graduation.

Quantitative Reasoning I
Select one of the following:  3-4
ACE 261  Applied Statistical Methods
CPSC 241  Intro to Applied Statistics
ECON 202  Economic Statistics I
EPSY 280  Elements of Statistics
PSYC 235  Intro to Statistics
SOC 280  Intro to Social Statistics
SOCW 225  Intro Stat for Social Work
STAT 100  Statistics (or its equivalent)

Quantitative Reasoning II
Select one from campus approved list.  3-4

Natural Sciences and Technology
Physical Science
Select one from the following:  3-5
ATMS 100  Introduction to Meteorology
ATMS 120  Severe and Hazardous Weather
ATMS 140  Climate and Global Change
CHEM 102  General Chemistry I
& CHEM 10:and General Chemistry Lab I
ENVS 101  Introduction to Energy Sources
ESE 117  The Oceans
ESE 118  Natural Disasters
GEOL 107  Physical Geology
PHYS 101  College Physics: Mech & Heat

Life Science
Select one from the following:  3-4
ANSC 207  Companion Animal Biology &Care
ANTH 249  Evolution and Human Disease
CPSC 112  Introduction to Crop Sciences
CPSC 113  Environment, Agric, & Society
FSHN 120  Contemporary Nutrition
IB 103  Introduction to Plant Biology
IB 105  Environmental Biology
IB 109  Insects and People
MCB 100  Introductory Microbiology
& MCB 101 and Intro Microbiology Laboratory

Humanities and the Arts

Select from campus approved list.  6

Social and Behavioral Sciences
PSYC 100  Intro Psych  4
Select one course from:
ACE 100  Agr Cons and Resource Econ
PS 101  Intro to US Gov & Pol

Agricultural Communications Required
ACES 101  Contemporary Issues in ACES  0-2
or ACES 200  ACES Transfer Orientation
AGCM 110  Intro to Ag and Env Comm  3
AGCM 320  Public Information Campaigns  4
JOUR 200  Introduction to Journalism  3
Select two of the following:  6-7
AGCM 220  Communicating Agriculture
AGCM 270  Ag Sales and Persuasive Communication
AGCM 315  Emerging Media
AGCM 330  Environmental Communications
AGCM 398  Undergraduate Seminar
AGCM 430  Comm in Env Social Movements

Students must also complete the ACES Minor in Food and Environmental Systems (p. 72)

COLLEGE OF MEDIA CONCENTRATION  21-23

Students must choose one of two concentrations:

ADVERTISING  21
Required courses:
ADV 150  Introduction to Advertising  3
ADV 281  Advertising Research Methods  3
ADV 283  Advertising and Brand Strategy  3
ADV 284  Consumer Insight  3
Choose three of the following:
ADV 390  Content Creation
ADV 409  Media Entrepreneurship
ADV 460  Innovation in Advertising
ADV 483  Audience Analysis

JOURNALISM  23
Required courses:
JOUR 210  Newsgathering Across Platforms  4
JOUR 215  Multimedia Reporting  4
JOUR 311  Media Law  3
Choose three of the following:
JOUR 315  Adv Public Affairs Reporting
JOUR 320  News Editing
JOUR 425  Multimedia Editing and Design
JOUR 335  Audio Journalism
JOUR 340  Video Reporting & Storytelling
JOUR 445  Video Storytelling 2-Producing

AGCM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DOWNLOAD/AGCM)
Courses

AGCM 110  Intro to Ag and Env Comm  credit: 3 Hours.
Development and role of communication in relation to food, feed, fiber, energy, natural resources, international development and other dimensions of agriculture. Introduction to channels, methods, challenges and opportunities for improving communication within agriculture and communicating agriculture to the public.

AGCM 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in agricultural communications. May be repeated in the same or separate terms as topics vary.

AGCM 220  Communicating Agriculture  credit: 3 Hours.
Skills necessary to communicate complex information about the broad agriculture domain to different audiences. Application of communication theories. Emphasis on essential communication skills, including writing, conducting interviews, planning, and critical evaluation of information sources. Same as ENVS 220 and NRES 220. Prerequisite: Completion of a Composition I course. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AGCM 230  Agricultural and Environmental Photography  credit: 3 Hours.
Application of photojournalism principles and techniques in the communication of topics related to food, agriculture, the environment, energy and community development for print, broadcast and computer-mediated applications. Emphasis on creative and technical aspects of digital photography.

AGCM 270  Ag Sales and Persuasive Communication  credit: 3 Hours.
Sales concepts and persuasive business communication techniques. Role, dynamics, and principles of sales communications related to food, agriculture, and the environment. Sales objectives, market segmentation, prospecting, handling obligations, relationship building, and the nuances of sales communications.

AGCM 293  Communications Internship  credit: 1 to 3 Hours.
Supervised experience in a field directly pertaining to agricultural communications. Approved for S/U grading only. May be repeated. Prerequisite: Sophomore standing. AGCM Program approval required.

AGCM 294  Research Internship  credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated in the same or subsequent terms to a maximum of 10 hours. Prerequisite: Sophomore standing.

AGCM 295  Independent Study or Research  credit: 1 to 3 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated. Prerequisite: AGCM Program and instructor approval required.

AGCM 315  Emerging Media  credit: 3 Hours.
Theories, principles and practices of applying emerging tools, technology, and norms to communicate agriculture to broad audiences. Focus on the strategies and tactics of using new media to communicate food, fuel, fiber, natural resources, health, human nutrition and related topics. Same as ADV 315. Prerequisite: AGCM 220 or ADV 150 or consent of instructor.

AGCM 320  Public Information Campaigns  credit: 4 Hours.
Coordinated approach to planning, implementing and evaluating information campaigns in the broad domain of food and agriculture. Students work with groups, agencies and organizations in designing communication campaigns strategies and tactics. Prerequisite: Sophomore standing and Composition I course. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AGCM 330  Environmental Communications  credit: 3 Hours.
Basics of communicating about environmental issues to various audiences, emphasizing communicating to lay publics. Gathering information about a current environmental issue, analyzing interests of groups involved, and examining strategies for communicating clearly to different groups. Same as ENVS 330 and NRES 330. Prerequisite: Sophomore standing.

AGCM 396  Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated for up to 6 hours in separate terms. Prerequisite: Junior standing, admission to the ACES Honors Program.

AGCM 398  Undergraduate Seminar  credit: 1 to 3 Hours.
Special topics in a field of study directly pertaining to subject matter in agricultural communications. May be repeated in the same or subsequent terms to a maximum of 12 hours.

AGCM 430  Comm in Env Social Movements  credit: 3 Hours.
Examines the interests, values systems and communications strategies of key participants in the environmental movement. Students examine environmental issues and predict possible reactions from key participants in the environmental arena. Same as ENVS 430, NRES 430, and SOC 464. 3 undergraduate hours. 3 graduate hours. Prerequisite: Composition I course.

AGCM 499  Seminar  credit: 1 to 4 Hours.
Special topics in agricultural communications. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 12 hours as topics vary.

Major in Agricultural Leadership and Science Education

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the

Information listed in this catalog is current as of 03/2017
agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu)).

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

- Agricultural Leadership Education Concentration (p. 71)
- Agricultural Science Education Concentration (p. 71)

Prescribed Courses including Campus General Education

Composition I and Speech
Select one of the following: 6-7

- RHET 105 Writing and Research
- CMN 101 Oral & Public Speaking (or equivalent (see college Composition I requirement))

CMN 111 Oral & Written Comm I
& CMN 112 Oral & Written Comm II

Advanced Composition
Select from campus approved list. AGED 230 is recommended. 3-4

Cultural Studies
Select one Western cultures course and one non-Western/ U.S. minority cultures course from campus approved lists. 6

Quantitative Reasoning I
Select one of the following: 3-5

- MATH 124 Finite Mathematics
- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

Quantitative Reasoning II
Select one of the following: 3-4

- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics
- SOC 280 Intro to Social Statistics
- STAT 100 Statistics

Natural Sciences and Technology
CHEM 102 General Chemistry I 4
& CHEM 103 and General Chemistry Lab I

Physical science - select from campus approved list. 3-4

CPSC 112 Introduction to Crop Sciences 4

Humanities and the Arts
Select from campus approved list. 6

Social and Behavioral Sciences
ACE 100 Agr Cons and Resource Econ 4

PSYC 100 Intro Psych 4

ACES Required
ACES 101 Contemporary Issues in ACES 2

AGED Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AGED)

Courses

AGED 100 Intro to Ag & Leadership Ed credit: 2 Hours.
Overview of agricultural and leadership education career pathways in school and non-school settings, including extension, corporate and government sectors, and international and industry organizations. Includes overview of certification requirements, professional development, and current issues for agricultural education professionals.

AGED 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
An experimental course on a special topic in agricultural education. May be repeated in the same or separate terms as topics vary to a maximum of 12 hours.

AGED 220 Prog Del in Ag & Leadership Ed credit: 3 Hours.
Introduces formal and non-formal methods used to deliver education and training in agricultural and leadership education programs. Focuses on types and purposes of agricultural education, program components, principles of teaching and learning, community relationships, and reflective teaching. Technology-supported lab component provides skills needed to develop teaching and training materials.

AGED 230 Leadership Communications credit: 3 Hours.
Application of communication skills used in the dissemination of information by public or organizational leaders in contemporary times. Founded on empirical leadership studies and through use of experiential learning activities, presentations, projects, and examinations, students will consider how identity and the setting impact what they write, say, and do when communicating a message.

This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: Social Sciences

AGED 250 Observation and Program Analys credit: 4 Hours.
Early field experience in agricultural education, including observation and analysis activities in public schools, extension programs, or other selected settings; participation in clinical field experience activities; examination of educational program development and operation, teaching and learning processes, contextual factors in learning, evaluation of student learning; and professionalism. Approximately 45 hours of early field experience will be acquired. Off-campus observation begins the first week of January. Agricultural education programs in both school and non-school settings are examined. Prerequisite: AGED 220; concurrent enrollment in EDPR 203.

AGED 260 Intro to Leadership Studies credit: 3 Hours.
Study of leadership theories and their application to the development of leadership skills. Students develop a personal philosophy of leadership, prepare a development plan for enhancing leadership skills, and begin a portfolio to record their leadership growth. Explores topics concerning diversity, ethics, and leadership/follower roles.

This course satisfies the General Education Criteria for:
UIUC: Social Sciences

Information listed in this catalog is current as of 03/2017
AGED 280  Training Needs Assessment  credit: 2 Hours.
Students in this course will be equipped to analyze an employee and/or organization's performance to determine the training needs for a business or organization. Helps learners determine whether or not training is the solution to a job performance problem.

AGED 293  Ag Leadership Internship  credit: 1 to 6 Hours.
Supervised off-campus experience in a field directly pertaining to subject matter in agricultural leadership education. Approved for S/U grading only. May be repeated in the same or subsequent terms to a maximum of 12 hours.

AGED 295  Independent Study or Research  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms.

AGED 300  Training and Development  credit: 4 Hours.
Students will learn to assess, design, develop, implement, and evaluate a training program in agricultural and non-agricultural industries. Topics will emphasize the theory of training and development, methods of assessing training needs and learning styles, design of effective training, presentation skills, and program evaluation. Different types of training programs will be examined, including orientation, skills training, team building, management development, and diversity training. Students will create and present a training program for an actual client utilizing the training design process. Prerequisite: AGED 280.

AGED 310  Prof Dev in Leadership Ed  credit: 2 Hours.
Provides agricultural leadership education students with non-formal professional experiences prior to enrollment in the student internship. A minimum of 32 hours of observation and participatory experiences with professionals in extension/outreach, business and industry, political and/or communications/human resources are required for satisfactory completion of this class.

AGED 340  Leadership Ethics & Pluralism  credit: 3 Hours.
Theory and research in leadership ethics and multicultural competence in a leadership context. Students will examine the underpinning of multiculturalism and identity development, and how both affect leadership practice. Also explores issues of power, oppression, privilege and the responsibilities of leadership. Integrates both ethics and multiculturalism through the examination of cases that include topics such as globalization, immigration, etc. Prerequisite: AGED 260. This course satisfies the General Education Criteria for: UIUC: US Minority Culture(s)

AGED 350  Early Field Experience  credit: 3 Hours.
Supervised experience during the summer months and fall semester including: supervision of students' agricultural experience programs and projects; development of problem-solving and decision-making skills related to use of instructional technologies, management of FFA activities, and supervision of agricultural experiences; review of teacher certification requirements and application for teacher certification; development of online teacher certification portfolio meeting state, UIUC, and program requirements. A minimum of 50 hours or early field observation is required. Prerequisite: AGED 250.

AGED 360  Advanced Leadership Studies  credit: 3 Hours.
Examines current and emerging leadership theories and their practical application in real-world settings. Continues exploration of advanced leadership theories begun in AGED 260, and includes opportunities for self-assessment and person leadership development. Prerequisite: AGED 260. This course satisfies the General Education Criteria for: UIUC: Social Sciences

AGED 380  Leadership in Groups and Teams  credit: 3 Hours.
Theory and practice of group and team leadership, including leadership assessment, group dynamics, group process, goal-setting, conflict management and resolution, leadership skill development, and case study analyses. Students engage in group activities throughout the semester. Prerequisite: AGED 260 and completion of the General Education Composition I requirement.

AGED 396  Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. Prerequisite: Junior standing, admission to the ACES Honors Program.

AGED 400  Foundations of Ag & Extn Ed  credit: 3 Hours.
Comparative examination of the mission, purpose, and historical foundations of agricultural and extension education. Topics include review of agricultural education programs and delivery systems, the nature of teaching in school and non-school settings, and trends and developments in agricultural education. Also examines teacher characteristics and approaches to teaching, education program components, community relationships, and reflective teaching. 3 undergraduate hours. 3 graduate hours.

AGED 410  Grad Early Field Experience  credit: 2 Hours.
An introduction to the application of pedagogy through early field experiences in agricultural education. Students participate in eight weeks of instruction and 40 hours of participatory experiences in approved agricultural education programs. Off-campus observation begins the first week of January. Restricted to graduate students in the teacher education option. 2 undergraduate hours. 2 graduate hours. Prerequisite: Concurrent enrollment in EDPR 203.

AGED 420  Curr Design & Instruction  credit: 3 Hours.
This instructional methodology course provides students the opportunity to analyze the principles of learning and teaching as they influence the academic motivation of learners in formal and non-formal environments within agricultural, food and environmental sciences. Topics include: the understanding and implementation of psychological aspects of learning, planning and development of agricultural courses and curricula, creating teaching plans, managing positive learning environments, evaluating student learning, and the utilization of effective self-reflective teaching behaviors. 3 undergraduate hours. 3 graduate hours. Prerequisite: AGED 220 for majors; consent of instructor for non-majors.

AGED 421  Teaching Strategies in AGED  credit: 3 Hours.
Synthesis of principles of teaching and learning as they influence educational activities in formal and non-formal environments within agricultural and related sciences. Gives individuals an opportunity to apply the educational concepts covered in AGED 300 or AGED 420. Individuals will design, implement, and evaluate learner-centered approaches in a variety of simulated educational environments. 3 undergraduate hours. 3 graduate hours. Prerequisite: AGED 300 or AGED 420 or graduate standing.

AGED 430  Youth Development Programs  credit: 3 or 4 Hours.
Instruction in the youth development process, including learning: philosophy and purposes of youth development policies, programs, and organizations; relationships to organizational missions; principles and procedures for developing, coordinating, and implementing youth development programs; and examining research and practice in youth-at-risk initiatives. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AGED 220, or HDFS 105, or PSYC 100.
AGED 450  Program Delivery and Eval credit: 4 Hours.
Students complete this course during their twelve-week practice teaching or internship experience. Written assignments will focus on development of teaching plans, program initiation and improvement plans, and actual evaluation studies of agricultural education programs. Instruction will be provided during on-site faculty visits and by cooperating personnel. 4 undergraduate hours. 4 graduate hours. Prerequisite: AGED 420.

AGED 451  Professional Dev in Ag Ed credit: 2 Hours.
Analysis of teaching and learning processes, program evaluation and improvement strategies, curriculum development and modification, professional development, facility development, using community resources, program management, and discussion of trends and issues in agricultural education. 2 undergraduate hour. 2 graduate hour.
Prerequisite: Senior standing.

AGED 480  Collaborative Leadership credit: 3 or 4 Hours.
Leadership operates within the context of community. The course will teach the research, theory, and practice of building effective community collaborations to deal with complex societal issues. A collaborative framework will be delivered by which students apply their knowledge of person, organizational, and community leadership to real-world problems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AGED 260 or equivalent.

AGED 490  Adult Learning Principles credit: 3 or 4 Hours.
Theory and practice of adult learning including: overview of teaching and learning theory related to adults; core adult learning principles; individual and situational learning differences; goals and purposes for learning; and the future of adult learning. 3 undergraduate hours. 4 graduate hours.

AGED 499  Seminar credit: 1 to 4 Hours.
Special topics in agricultural education. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or subsequent terms to a maximum of 12 undergraduate or graduate hours as topics vary.

Agricultural Leadership Education Concentration

The Agricultural Leadership Education concentration prepares students for educational leadership, training and outreach positions in agricultural, extension, community and governmental agencies. Coursework focuses on designing educational/training programs, making professional presentations, leadership development, teaching/training methods and interpersonal communications. A 4 to 12-week business/agency summer internship is required. The curriculum provides the flexibility for students to specialize in a chosen area of agriculture.

Agricultural Leadership Education Concentration Required

AGED 250  Observation and Program Analys 1 4
AGED 350  Early Field Experience 3
AGED 420  Curr Design & Instruction 3
AGED 450  Program Delivery and Eval 4
CI 473  Disciplinary Literacy 3

or EPS 202  Foundations of Education-ACP 3
EPS 201  Educational Psychology 3
SPED 405  Gen Educator’s Role in SPED 3
EDPR 442  Educational Practice in Secondary Education 8

Technical Subject Matter Required

ANSC 100  Intro to Animal Sciences 4
ACE 232  Management of Farm Enterprises 3 or 4
HORT 100  Introduction to Horticulture 3
FSHN 101  Intro Food Science & Nutrition 3
TSM 100  Technical Systems in Agr 3

Select one of the following: 3

AGED 260  Intro to Leadership Studies
AGED 280  Training Needs Assessment
AGED 340  Leadership Ethics & Pluralism
AGED 360  Advanced Leadership Studies
AGED 380  Leadership in Groups and Teams
AGED 400  Foundations of Ag & Extn Ed
AGED 430  Youth Development Programs
AGED 490  Adult Learning Principles

Total Hours 126

1 Via enrollment in AGED 250, students are concurrently enrolled in EDPR 203.
Food and Environmental Systems Minor

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student’s major and interests.

Enrollment in ACES 102, FSHN 101, and NRES 100, four hours from selected 100- and 200-level courses, and six hours of 300- and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Theses courses may only be used to satisfy the requirements of the major in Ag Communications or the Food and Environmental Systems minor, but not both.

International Minor in ACES

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours (ACES or non-ACES) must come from 400-level courses. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Required Courses for the ACES International Minor

Global Study in the Social Science Disciplines

Minimum of 3 hours, maximum of 9 hours selected from:

- ACE 251  The World Food Economy
- ACE 411  Environment and Development
- ACE 435  Global Agribusiness Management
- ACE 451  Agriculture in Intl Dev
- ACE 455  Intl Trade in Food and Agr
- AGCM 320  Public Information Campaigns
- ANTH 262  Women’s Lives
- BADM 380  International Business
- BADM 381  Multinational Management
- BADM 382  International Marketing
- ECON 420  International Economics
- ECON 450  Development Economics
- EPS 426  Comparative Education
- FIN 451  Intl Financial Markets
- GEOG 204  Cities of the World
- GEOG 210  Social & Environmental Issues
- GEOG 410  Green Development
- HDFS 220  Families in Global Perspective
- HIST 258  20thC World to Midcentury
- HIST 259  20thC World from Midcentury
- NRES 287  Environment and Society
- PS 241  Comp Politics in Dev Nations
- PS 280  Intro to Intl Relations
- PS 382  Intl Political Economy
- PS 389  International Communications
- REL 110  World Religions
- UP 423  Community Development in the Global South

Global Study in the Natural Science Disciplines

Minimum of 3 hours, maximum of 9 hours, selected from:

- ANSC 205  World Animal Resources
- ATMS 140  Climate and Global Change
- CPSC 116  The Global Food Production Web
- CPSC 431  Plants and Global Change
- HORT 464  International Hort Products
- NRES 109  Global Environmental Issues
- PLPA 200  Plants, Pathogens, and People
- TSM 311  Humanity in the Food Web

Regional Specialization

The following four approaches/options can be used (separately or in combinations) to complete this portion of the minor.

- Academic credit earned through study or supervised activities outside the U.S. through:
  - ACES 293  International Internship
  - ACES 298  International Experience
  - ACES 299  ACES Study Abroad
- Completion of one or more of the following courses offered by the Department of Agricultural and Consumer Economics
  - ACE 254  Economic Systems in Africa
  - ACE 452  The Latin American Economies
  - ACE 454  Econ Dev of Tropical Africa
- Completion of courses that are approved by Area Studies Programs (see minor advisor)
  - Center for African Studies
  - Center for East Asian and Pacific Studies
  - Center for Latin American and Caribbean Studies
  - Program in South Asian and Middle Eastern Studies
  - European Union Center
- Foreign language courses that exceed College of ACES graduation requirements.

Total Hours 21

Leadership Studies Minor

http://leadership.illinois.edu/minor-leadership-studies/overview

The Minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundational courses, five to six hours of elective context courses, and three hours in a capstone course.

Requirements

- AGED 260  Intro to Leadership Studies 3
- AGED 380  Leadership in Groups and Teams 3
- PSYC 245  Industrial Org Psych 3
Electives from a list of leadership context courses 1  5-6
AGED 480  Collaborative Leadership  3

1 For more information about this minor and to view the elective course list visit www.leadership.illinois.edu/minor-leadership-studies/overview (http://www.leadership.illinois.edu/minor-leadership-studies/overview) or contact the Program Coordinator, Lisa Burgoon, at burgoon@illinois.edu.

The programs in the College of Applied Health Sciences provide students with a holistic understanding of health and human behavior. Drawing on the expertise of our faculty and industry partners, we equip students to design, develop and implement initiatives that enhance health and well-being. Students with an interest in health professions, administration, education and advocacy or public policy can find a program of study that will match their interest in the College of Applied Health Sciences.

As America’s approach to health and wellness changes, health care is no longer limited to the traditional practice of doctors and nurses. As a result, the growth market lies in areas related to prevention, quality of life, health planning, and therapeutic intervention. As society struggles with these issues, the College and its graduates will continue to play an important role in shaping the future. A degree from the College of Applied Health Studies allows graduates to pursue a wide array of scientific and professional careers.

Students in the College of Applied Health Sciences enjoy many advantages: high quality degree programs, small classes, an emphasis on student-faculty interaction, active research programs, the opportunity to participate in professional student organizations, the availability of internships, and the largest separate college library in our field.

Along with the relationships they establish with faculty, students work closely with an academic adviser. The College of Applied Health Sciences requires students to meet with advisers to develop a relationship that will guide their studies and experiences while on campus. A solid network of student services available at the University of Illinois enhances the advising experience.

Programs of Study

The bachelor of science degree is offered in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

• Honors programs are available for outstanding students at the college and campus level.
• Internship experiences are required with most departmental curricula. Quality placements are available throughout the United States and around the world in specific degree programs.
• Study abroad programs are available around the world.
• Students have access to the nation’s third largest academic library, including an excellent college library, reference service, inter library loan system, and term-paper counseling system.

Community Health Program

Health care is among the most rapidly evolving industries in the United States today. People in all settings are concerned about maintaining access to effective health care and the costs of securing it. An aging population places greater demand upon health care providers. To address these issues, hospitals and clinics have reorganized, consolidated, and introduced educational components designed to teach patients how to manage their personal health concerns. At the same time, business and industry leaders have invested millions of dollars in new health programs for their employees. Federal and state governments are evaluating ways to make health care more effective and less costly.

Recognized as one of the leaders in the United States with its strong emphasis on research and excellence in scholarship, the Community Health Program prepares students for careers in the rapidly changing world of health and rehabilitative services. It is an exciting time in health care with emerging behavioral and environmental health concerns that challenge the field for new theories, policies, and technological innovations. The department’s programs place special emphasis on the community context in which health care is delivered. Students can become involved in a variety of research projects related to issues such as bioethics, cancer epidemiology, disability studies, cultural aspects of health and disability, information technologies in health education, and health policy.

The Community Health Program offers students the opportunity to focus their studies in Health Planning and Administration, Health Education or Rehabilitation Studies. In addition to the core of community health courses, course work is completed in areas related to business, health behavior, marketing, and promotion. The degree is culminated with a fieldwork experience in setting appropriate to the area of concentration. Graduates are equally prepared for jobs in progressive careers such as health education, policy, planning, and administration or for graduate study in areas such as medicine, nursing, and physical therapy.

Interdisciplinary Health Sciences Program

Based on the premise that human health is too complex to be addressed within a single discipline, the Interdisciplinary Health Sciences (i-Health) degree program integrates knowledge from a variety of social and behavioral fields, such as psychology and sociology, as well as the applied health sciences. While the core curriculum provides students with a solid understanding of human health, students may build a customized program addressing their specific interests within three concentration areas; Health and Aging, Health Behavior Change, and Health Diversity.

Students in this program are equipped to assume leadership roles in a variety of health-related careers, as well as professional and graduate degree programs. Graduates have pursued careers in pharmaceutical sales, health education, corporate wellness and patient/client relations. Graduates are also fully prepared to pursue graduate school in a variety of health-related fields. Study abroad programs are available around the world.

Information listed in this catalog is current as of 03/2017
of professional or biomedical programs such as law, medicine, physical and occupational therapy, nursing, or public health.

Kinesiology Program
The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill of physical activity; physical growth, development, and body form throughout the life span; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

Recreation, Sport and Tourism
The Department of Recreation, Sport and Tourism is internationally renowned for its excellence, low student-faculty ratio, ethnic and cultural diversity, and an extensive alumni network. In short, studying recreation, sport and tourism at the University of Illinois is an ideal way to prepare for a future of leadership in the world's most vigorous and exhilarating industry.

The curriculum in Recreation, Sport and Tourism prepares students to design, manage, and deliver services to a variety of populations and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses which touch topics such as leadership, marketing, administration and human resource management. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus their studies in Recreation Management, Sport Management or Tourism Management. Recreation, sport and tourism offer outstanding career prospects because they are each facets of one of the world's fastest growing industries. Graduates have enjoyed successful careers in amateur and professional sport organizations, public and commercial recreation organizations, resorts, and conference and convention centers.

Speech and Hearing Science
Research has shown that communication is a key element in resolving the major problems of our society; improving communication for all people is an overall goal of study in speech and hearing science. In the Department of Speech and Hearing Science, students learn about human interpersonal communication. Through studies in speech-language pathology and audiology, they focus on the prevention, diagnosis, and treatment of hearing, speech, and language disorders in people of all ages.

This major also equips students with strong oral and written communication skills and necessary tools to enter today's job market. Graduates hold positions in school systems, hospitals, medical practices, and clinics. They also work in government agencies, research laboratories, and various businesses. A baccalaureate degree in speech and hearing science also prepares students to enter a graduate program in speech-language pathology or audiology or other areas including psychology, special education, business, medicine, and dentistry.

Special Programs

Honors at Graduation
Graduation from the College of Applied Health Sciences with any honors designation requires that a student must have attained at the University of Illinois at Urbana-Champaign a specific minimum cumulative grade point average based on a minimum of 55 semester hours in residence.

- Bronze Tablet (see Graduation with Honors section)
- Dean's List (see Graduation with Honors section)
- Highest Honors: 3.75 to 4.0
- High Honors: 3.5 to 3.74
- Honors: 3.25 to 3.49

Edmund James Scholars
The James Scholar Program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. For further information see the Edmund J. James Undergraduate Honors Programs.

- Community Health (p. 76)
- Interdisciplinary Health Sciences (p. 94)
- Kinesiology (p. 80)
- Recreation, Sport and Tourism (p. 85)
- Speech and Hearing Science (p. 88)
- Interdisciplinary Minor in Aging (p. 94)
- Speech and Hearing Science (p. 89)

1206 South Fourth Street
PH: (217) 244-0823

The Kinesiology (p. 79) curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

The Community Health (p. 76) Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education and Promotion, Health Planning and Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

- Community Health (p. 76)
- Kinesiology (p. 79)

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 693). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

For the Degree of Bachelor of Science in Community Health

Requirements Including General Education

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

- Communication Arts
- Social and Behavioral Sciences
- Natural Sciences and Technology
- Humanities and the Arts
- Cultural Studies
- Foreign Language

Total Hours

1 Courses in cultural studies may be completed through other categories where appropriate.

Kinesiology and Community Health Department Core Requirements

Kinesiology and Community Health Department Core Requirements

CHLH 101 Introduction to Public Health 3
KIN 122 Physical Activity and Health 3

Community Health Program Core Requirements
This course satisfies the General Education Criteria for:

- Health Planning and Administration (p. 79)
- Rehabilitation Studies (p. 79)

Correlate Areas

Each student completes correlates that are planned with the assigned advisor. These courses are designed to enhance and support career goals.

Select courses from the departmentally approved list.

CHLH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CHLH)

Courses

CHLH 100  Contemporary Health  credit: 3 Hours.
Examines concepts of health and health promotion in contemporary society with emphasis on a healthy lifestyle for individuals and groups. Topics include self care, health insurance, exercise, nutrition and weight control, sexuality, contraception, tobacco, alcohol, cardiovascular health, infectious diseases, and cancer. This course satisfies the General Education Criteria for: UIUC: Social Sciences

CHLH 125  Orientation KIN & Comm Health  credit: 1 Hour.
Serves as an introduction to the Kinesiology and Community Health Department and provides an overview of the Kinesiology and Community Health curricula, areas of study, and opportunities available for careers in the field. Enrollment required for Community Health freshmen and transfer students. Credit is not given for both CHLH 125 and KIN 125.

CHLH 200  Mental Health  credit: 2 Hours.
Introduction to the science of mental health and illness including personality development, the genesis and manifestations of mental illness, and the maintenance of mental health; taught with an emphasis on the preventive and medical aspects of mental health.

CHLH 201  Public Health Research Methods  credit: 3 Hours.
This course is designed to provide students with an introduction to the basic principles and concepts underlying research methods on public health. Topics include conceptualization, measurement, research design, sampling, evaluation, data sources and ethics. The students will be exposed to a wide range of quantitative, and mixed methods.

CHLH 206  Human Sexuality  credit: 2 Hours.
Emphasizes the behavioral aspects of human sexuality. Topics include: birth control; prenatal care, pregnancy and childbirth; sex roles; premarital sex; lifestyles; marriage and divorce.

CHLH 210  Community Health Organizations  credit: 2 Hours.
Overview of institutions and agencies which provide health information, education, services, and care. Includes historical foundations, constituencies, organizational goals and structure, funding and expenditures, modes of service delivery, political and ethical issues.

CHLH 243  Drug Use and Abuse  credit: 2 Hours.
Introduction to the biological, psychological, pharmacological, and legal aspects of drug use and abuse; surveys community and university resources concerned with drug use and abuse; emphasizes personal and social actions for responsible drug use.

CHLH 244  Health Statistics  credit: 3 Hours.
Introduction to biostatistics. Students learn concepts necessary to understand statistical inference as applied to health issues. This course satisfies the General Education Criteria for: UIUC: Quant Reasoning I

CHLH 250  Health Care Systems  credit: 3 Hours.
Overview of the major issues confronting health care systems from a macro perspective. Identification and analysis of the functions, major participants and trends in health care systems in the United States and abroad. Attention on current and emerging issues having implications for health care systems in industrialized nations.
CHLH 260  Introduction to Medical Ethics  credit: 3 Hours.
Course stresses normative bioethics: decisions about what is ethical behavior in a variety of real and practical issues. Analysis of medical ethical cases at the individual, community and wider national and international levels will be addressed. Approved for both letter and S/U grading.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
CHLH 274  Introduction to Epidemiology  credit: 3 Hours.
Basic concepts and methods of epidemiology; patterns of disease occurrence; applications of epidemiology to health education, health services administration and planning, health policy, and environmental health.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect

CHLH 304  Foundations of Health Behavior  credit: 4 Hours.
Examination of the application of the social and behavioral sciences to health and health behavior. Psychological, social psychological, and sociological approaches to health behavior are analyzed. Topics covered include development of health attitudes and behaviors, perceptions of health and illness, methods of changing health behavior and patient-provider interaction. Prerequisite: CHLH 100, or consent of instructor; completion of the campus Composition I requirement.
This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences
UIUC: Advanced Composition
CHLH 314  Introduction to Aging  credit: 3 Hours.
A multidisciplinary introduction to the study of aging; the social, psychological and physiological context of changing roles in later life; public and private policies that affect older people and their families. Same as HDFS 314, RST 314, PSYC 314, and REHB 314.
CHLH 330  Disability in American Society  credit: 3 Hours.
Same as REHB 330. See REHB 330.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

CHLH 336  Tomorrow's Environment  credit: 3 Hours.
Same as CPSC 336 and ENVS 336. See CPSC 336.
CHLH 340  Health Promotion Practicum  credit: 3 Hours.
Preparation and presentation of lifestyle workshops to campus community groups. Practica selected from one or more of the following topics: chemical education, sexuality, stress management or campus acquaintance rape education (CARE). Same as SOCW 350. Approved for both letter and S/U grading. May be repeated to a maximum of 6 hours.
Prerequisite: Junior standing or consent of instructor.

CHLH 365  Civic Engagement in Wellness  credit: 3 Hours.
Same as AHS 365, KIN 365, RST 365, and SHS 370. See KIN 365.
CHLH 380  Orientation to Internship  credit: 1 Hour.
Provides students with information concerning placement in internship. Topics include internship requirements; student responsibilities; preparation of resumes and cover letters; selecting an organization or site; interviewing; issues of professional development. Prerequisite: Junior standing.

CHLH 390  Honors  credit: 2 Hours.
Same as KIN 390 and RST 390. See KIN 390.
CHLH 393  Special Projects  credit: 2 or 3 Hours.
Special projects in research and independent investigation in any phase of health, kinesiology, recreation, and related areas selected by the students. May be repeated to a maximum of 12 hours.

CHLH 402  Cancer Epidemiology  credit: 3 or 4 Hours.
Class on cancer epidemiology will address the investigation of the descriptive and analytic epidemiology of cancer. It will include information on the development of malignancy and characteristics of tumor cells. The investigation of the relationship between various risk and protective factors and the development of different types of cancer will be discussed in an epidemiologic context. The role of primary prevention and secondary prevention (screening) will also be covered. 3 undergraduate hours. 4 graduate hours. Prerequisite: Previous or concurrent class in epidemiology or consent of instructor. Junior standing or above.

CHLH 404  Gerontology  credit: 3 or 4 Hours.
Interdisciplinary approach to the study of aging and the aged from physiological, psychological, and social perspectives. Same as HDFS 404. 3 or 4 undergraduate hours. 3 or 4 graduate hours.

CHLH 405  Aging with Disability  credit: 3 or 4 Hours.
Due to improvements in medical management, persons with disabilities are living longer lives. They, however, face new problems and impairments. This course will explore the psychological and physical changes persons with disabilities face as they age. In addition, the course examines the impact that aging with disability has on the US healthcare system, legislation and healthcare professionals. 3 undergraduate hours. 4 graduate hours.

CHLH 407  Disability, Culture & Society  credit: 3 or 4 Hours.
Examines the cultural and social contexts of disability, their consequences for the experience and management of disability, and implications for cultural competence in disability-related research and practice. Same as ANTH 404, KIN 407, and REHB 407. 3 or 4 undergraduate hours. 3 or 4 graduate hours.

CHLH 410  Public Health Practice  credit: 4 Hours.
Theory and practice of public health promotion as they relate to educational approaches in solving community health problems. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHLH 210 or consent of instructor.

CHLH 415  International Health  credit: 3 or 4 Hours.
Explores the various factors that impact the health of populations around the world. Political, cultural, social, environmental and other domains will be examined in relation to how they affect the health of residents of various countries. 3 or 4 undergraduate hours. 3 or 4 graduate hours.

CHLH 421  Health Data Analysis  credit: 3 or 4 Hours.
Introduces health data analysis, sources and uses of health data, collection techniques and classification procedures, commonly used health indices, techniques of rate adjustment, graphic presentation of data as they relate to the planning, conducting, and evaluating of community health programs. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Quantitative Reasoning I course or equivalent.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning II

Information listed in this catalog is current as of 03/2017
CHLH 429  Research Techniques  credit: 4 Hours.
Study of the ethics of research, research literature, research designs, and
health measurement techniques utilized in the public health sciences.
Emphasizes developing skills in analyzing research and assessment of
health behaviors, and problem identification and research design for
individual student research projects. 4 undergraduate hours. 4 graduate
hours. Prerequisite: CHLH 590, or SOC 485, or EPSY 480; or equivalent.

CHLH 439  Health Applications of GIS  credit: 3 Hours.
Same as GEOG 439 and PATH 439. See PATH 439.

CHLH 444  LGBT Indiv, Fam & Community  credit: 3 or 4 Hours.
Same as HDFS 444. See HDFS 444.

CHLH 448  Exercise & Health Psychology  credit: 3 or 4 Hours.
Same as KIN 448. See KIN 448.

CHLH 455  Health Services Financing  credit: 3 Hours.
Examines major topics and emerging trends in health financing,
including sources of revenue, public and private financing organizations,
reimbursement and sources of revenue to health providers, and capital
financing in the health care industry. 3 undergraduate hours. 3 graduate
hours. Prerequisite: Junior standing.

CHLH 456  Organization of Health Care  credit: 2 to 4 Hours.
Examines types and performance of health care organizations (e.g.,
doctors’ offices, clinics, hospitals, and nursing homes), networks of
health services, evaluation of health care, and social policy issues
relating to organizations in the U.S. health care system. Same as
SOC 476. 2 to 4 undergraduate hours. 2 to 4 graduate hours.

CHLH 457  Health Planning  credit: 3 Hours.
Survey of the history and objectives of health planning as related
to medical care delivery in the United States; methods of health,
institutional and community planning; planning and marketing concepts
and methods; analysis of consumer behavior, public policies, and private
competitive forces. Same as SOCW 457. 3 undergraduate hours. 3 graduate
hours. Prerequisite: CHLH 250 and junior standing.

CHLH 458  Health Administration  credit: 3 Hours.
Examines management principles relative to health care institutions
emphasizing goal setting, decision making, system analysis,
organizational structure, conflict resolution, and leadership theories. 3
undergraduate hours. 3 graduate hours. Prerequisite: Senior or graduate
standing, or consent of instructor.

CHLH 460  Environ Toxicology & Health  credit: 3 Hours.
Same as ENVS 469. See ENVS 469.

CHLH 469  Environmental Health  credit: 3 or 4 Hours.
Appreciation of the concepts and mechanisms used to prevent or
control environmental conditions that may lead to infectious or other
environmentally induced diseases. Presents topics from a public health
perspective that include air pollution, water supply management, waste
management, radiation protection, food hygiene, occupational health
and disaster management. Same as ENVS 469. 3 or 4 undergraduate hours. 3
or 4 graduate hours. Prerequisite: CHLH 274 or equivalent.

CHLH 473  Immigration, Health & Society  credit: 3 or 4 Hours.
Same as LLS 473, SOC 473, and SOCW 473. See LLS 473.

CHLH 474  Principles of Epidemiology  credit: 4 Hours.
Investigation of descriptive epidemiologic techniques (comparisons of
disease rates in different populations) and analytic study designs (case-
control and cohort studies and randomized trials). Applications to and
examples from infectious and chronic diseases are presented. Group
exercises involving the investigation of epidemiologic problems and
application of analytic epidemiologic techniques are performed. Same
as ENVS 474 and PATH 474. 4 undergraduate hours. 4 graduate hours.
Prerequisite: One statistics course.

CHLH 485  Community Health Internship  credit: 8 Hours.
Supervised field experience in official, voluntary and professional health
agencies; designed to provide students with work experience in actual
field situations. Students work in University approved health agencies
for a minimum of 320 undergraduate hours. 8 undergraduate hours. 8
graduate hours. Approved for S/U grading. Prerequisite: Senior standing
in Community Health.

CHLH 494  Special Topics  credit: 1 to 4 Hours.
Lecture course in topics of current interest; specific subject matter
announced in the Class Schedule. 1 to 4 undergraduate hours. 1 to 4
graduate hours. May be repeated.

Kinesiology

Amy Woods, Department Head
117 Freer Hall, 906 South Goodwin, Urbana
PH: (217) 244-0823
http://www.kch.illinois.edu

The Kinesiology program is committed to the study and research of
human movement in all its dimensions. Undergraduate study focuses
on exercise stress, movement efficiency, and fitness; the social, cultural,
and psychological aspects of participation in physical activity and sport;
coordination, control, and skill of physical activity; physical growth,
development, and body form throughout the lifespan; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

For the Degree of Bachelor of Science in Kinesiology

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

1 Students pursuing teacher licensure must complete PSYC 100 or PSYC 103 in addition to KIN 259.
2 Courses in cultural studies may be completed through other categories where appropriate.
3 Fulfills University General Education Requirements

Kinesiology Program Guided Electives

Elective Kinesiology Courses

All courses must be at the 200, 300, or 400 level. At least six or more hours must be at the 400 level (at least 12 hours).

Correlate Area Studies

Students select a standardized correlate that will prepare them for further education toward their career goals (at least 18 hours).

Summary of Degree Requirements

| General Education and supporting coursework | 46 |
| Kinesiology and Community Health Department Core | 6 |
| Kinesiology Core | 22 |
| Elective Kinesiology courses | 12 |
| Correlate Area | 18 |
| Free electives | 24 |
| Total Hours | 128 |

Requirements for Teacher Certification

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements and having passed an Illinois approved test of basic skills. Approved tests consist of the Illinois Test of Academic Proficiency (TAP), ACT or SAT with approved scores. In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute
these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of Specialization Committee. In addition, students must complete all professional education and content-area courses with a grade of C or better for licensure.

In addition to the General Education requirements for all Kinesiology undergraduates, the teacher licensure requirements for students in all curricula, and the Kinesiology core requirements, students pursuing licensure to teach physical education (K-12) must include the following courses in the elective kinesiology, correlate area studies, and free electives areas:

### Required Electives and Correlate Area Studies

Students may not enroll for professional education courses from the Elective Kinesiology area until they have applied to the Teacher Education K-12 program and passed an Illinois approved test of basic skills. Approved tests consist of the Illinois Test of Academic Proficiency (TAP), ACT, or SAT with approved scores.

KIN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/KIN)

### Courses

**KIN 100 Development Activities credit: 1 to 2 Hours.**
Skills and knowledge essential for leisure-time activities which are classified as developmental activities. Prerequisites and descriptions for each developmental activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 2 hours.

**KIN 101 Dance Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as dance activities. May be repeated; more than one activity (Sections A through Z) may be taken in the same term. Prerequisite: See Class Schedule for prerequisites for each dance activity.

**KIN 102 Individual and Dual Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as individual and dual activities. Prerequisites for each individual or dual activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

**KIN 103 Indoor Court Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as indoor court activities. Prerequisites for each indoor court activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term.

**KIN 104 Skating Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as skating activities. Prerequisites for each skating activity are provided in the Class Schedule. Additional Ice Skating Rink Facility charges are required and provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

**KIN 107 Aquatic Sport Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as aquatic sport activities. Prerequisites for each aquatic sport activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

**KIN 109 Team Sport Activities credit: 1 Hour.**
Skills and knowledge essential for leisure-time activities which are classified as team sport activities. Prerequisites for each team sport activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term.

**KIN 110 Intro to the Health Sciences credit: 3 Hours.**
Same as CHLH 110. See CHLH 110.

**KIN 111 Prescribed Exercise credit: 1 Hour.**
Prescribed exercises adapted to individual needs, capacities, and interests; open to persons with paraplegia, permanently disabled, and individuals with significant temporary disabilities who will require long term rehabilitation. Students must be registered or eligible to register with DRES. May be repeated to a maximum of 4 hours. Prerequisite: Enrollment restricted to students with permanent disabilities or disabilities which are long-term in nature. Student should be registered or eligible to register with DRES.

**KIN 120 Injuries in Sport credit: 2 Hours.**
Emphasizes injury mechanisms, means of injury prevention, and emergency care applied to various types of sport injuries; laboratory sessions emphasize preventive and therapeutic taping and emergency first aid. Additional fees may apply. See Class Schedule.

**KIN 121 Survey of Sports Medicine credit: 3 Hours.**
Introduction to sports medicine for non-kinesiology majors; includes discussion of training, conditioning, preparation for sports, injury aspects of sports, and rehabilitation.

**KIN 122 Physical Activity and Health credit: 3 Hours.**
Provides the scientific evidence of physical activity in preventing disease and optimizing quality of life. Teaches behavioral change strategies to achieve an active lifestyle.

**KIN 125 Orientation KIN & Comm Health credit: 1 Hour.**
Serves as an introduction to the Kinesiology and Community Health Department and provides an overview of the Kinesiology and Community Health curricula, areas of study, and opportunities available for a career in the field. Enrollment required for Kinesiology freshmen and transfer students. Credit is not given for both KIN 125 and CHLH 125.
KIN 130 Analysis of Basic Movement credit: 2 Hours.
Introduction to human movement through development of skills and knowledge relative to structure and function of the human body in selected physical activities including: basic postural and locomotion patterns and fundamental throwing patterns; also studies developmental aspects of typical and atypical movement skills. Emphasizes performance and qualitative analysis of movement skills.

KIN 140 Social Sci of Human Movement credit: 3 Hours.
Introduction to the social scientific aspects of human movement including sport; particular emphasis on concepts derived from the social sciences (including psychology) that are appropriate to human movement. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: UIUC: Social Sciences

KIN 142 Contemporary Issues in Sport credit: 3 Hours.
Examines current issues in sport relative to competition, economics, race, sex, youth, educational institutions, deviant behavior, religion, psychology, and the media.

KIN 150 Bioscience of Human Movement credit: 3 Hours.
Integrates anatomical and physiological aspects of human movement; emphasizes how the body moves, physiological responses to exercise stress, physical conditioning and physical fitness. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: UIUC: Life Sciences

KIN 160 Introduction to Kinesiology credit: 3 Hours.
Kinesiology is the interdisciplinary study of physical activity that includes a number of sub-disciplines. This course will examine these areas of study within Kinesiology from scientific, applied, and experiential perspectives. Students will study fundamental/introductory concepts associated with each area of Kinesiology, explore those concepts within research and applied contexts, and complete activities in which they experience various dimensions of those concepts.

KIN 199 Undergraduate Open Seminar credit: 0 to 5 Hours.
Additional fees may apply. See Class Schedule. Approved for letter and S/U grading. May be repeated.

KIN 201 Physical Activity Research Methods credit: 3 Hours.
This course provides an introduction of physical activity measurement and methods. The course will focus on (a) defining physical activity and associated terms and concepts; (b) providing detailed understanding of approaches and tools for measuring physical activity; and (c) facilitating understanding of scientific methods for physical activity research (e.g., experimental and non-experimental designs).

KIN 230 Diversity in Recreation, Sport, and Tourism credit: 3 Hours.
Same as HDFS 263 and RST 230. See RST 230. This course satisfies the General Education Criteria for: UIUC: US Minority Culture(s)

KIN 247 Intro to Sport Psychology credit: 3 Hours.
Analysis of the competitive sport process, with study of how personality and situational variables affect motivation, anxiety, and aggression in sport. Attention is given to the psychological skills needed by coaches and athletes for successful and enjoyable sports participation.

KIN 249 Sport & Modern Society credit: 3 Hours.
The sociological analysis of sport in modern societies with regard to social class, politics, community, education, and collective behavior. Same as SOC 249. This course satisfies the General Education Criteria for: UIUC: Social Sciences

KIN 257 Coordination, Control & Skill credit: 3 Hours.
Introduction to the concepts and principles of the coordination and control of movement and the development of skilled action. The course will focus on such topics as fundamental movement activities; movement control processes; acquisition, retention and transfer of skill; and the role of constraints to action. These topics have implications for understanding skilled performance, motor development and human performance in general. Additional fees may apply. See Class Schedule. Prerequisite: KIN 140 and KIN 150 or consent of instructor.

KIN 259 Motor Development and Control credit: 3 Hours.
This course provides students with an overview of motor development across the life span as well as an introduction to the discipline of motor behavior/control. Specifically, it focuses on the concepts and principles of coordination, the control of movement, and development of skilled action throughout the life span. The course focuses on such topics as the development of fundamental movement activities; movement control processes; acquisition, retention and transfer skill; and the role of constraints to action. Same as HDFS 259. Additional fees may apply. See Class Schedule. Credit is not given for both KIN 259 and KIN 257. This course satisfies the General Education Criteria for: UIUC: Behavioral Sciences

KIN 260 Teaching Activities I credit: 3 Hours.
An activity-based course focusing on skills, knowledge, and teaching progressions related to territorial and net sports for school age students. Students will develop knowledge of the basic skills and teaching progressions related to the activities covered in the class. Prerequisite: KIN 130.

KIN 261 Teaching Activities II credit: 2 Hours.
An activity-based course focusing on skills, knowledge, and teaching progressions related to target sports, rhythms, dance and fitness activities, and adventure education activities for school age students. Students will develop knowledge of the basic skills and teaching progressions related to the activities covered in the class. Prerequisite: KIN 130.

KIN 262 Motor Develop, Growth & Form credit: 3 Hours.
Examination of the concepts of motor development, physical growth, and body form throughout the lifespan. Major emphasis is on the period of birth through adolescence. Same as HDFS 262. This course satisfies the General Education Criteria for: UIUC: Behavioral Sciences

KIN 268 Children's Movement credit: 3 Hours.
Introduction and overview of kinesiology principles and physical activity related to children. Laboratory portion of class focuses on the application of information to teaching physical activity to elementary school children. Prerequisite: For non-kinesiology majors.

KIN 340 Soc & Psych of Phys Activity credit: 3 Hours.
Discusses how social and psychological processes and constraints affect human action in physical activity environments. Attention is given to socialization, personal dynamics, stratification, and ideological and economic constraints upon the manifestations of physical activity. Prerequisite: KIN 140 or PSYC 100 and completion of the Campus Composition I general education requirement. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

KIN 345 Sport and Society credit: 3 Hours.
Same as HIST 390. See HIST 390.
KIN 346  Case Study: Endless Summer  credit: 3 Hours.
The 1966 classic film—The Endless Summer—and related films and literature are used as lenses for the historical-cultural study of human movement in the form of riding waves of water. Surf culture and films are global phenomena and by using such as unique cases, students gain mastery in cultural-interpretive theories, themes, and vocabulary, and in articulating perspectives on social roles, knowledge, and power. Same as RST 346 and MACS 346.

KIN 352  Bioenergetics of Movement  credit: 3 Hours.
Study of the nature of energy transfer during physical activity; mechanisms of metabolic control, force production, cardiorespiratory support and adaptation relative to physical activity. Additional fees may apply. See Class Schedule. Prerequisite: MCB 103.

KIN 355  Biomechanics of Human Movement  credit: 3 Hours.
Studies the biological and mechanical principles of human motor performance; analyzes selected movement skills in depth. Additional fees may apply. See Class Schedule. Prerequisite: MCB 334, MATH 012 or above, or consent of instructor.

KIN 360  Adapted Physical Education  credit: 3 Hours.
Organization, administration, and conduct of physical education programs for the most prevalent types of medical conditions found in school settings; emphasis on analyzing motoric needs and prescribing programs of motor activity for special populations, including individuals with mental retardation and learning disabilities Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of instructor.

KIN 361  Curriculum in Grades K-6  credit: 3 Hours.
Examines the theoretical and philosophic curricular principles necessary to the development of a sound, professionally grounded, and research-based curriculum for children in grades K-6. Requires planning a variety of developmentally appropriate learning activities that are taught to children during micro-teaching experiences in the field. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of the instructor.

KIN 362  Curriculum in Grades 7-12  credit: 3 Hours.
Provides students with theoretical knowledge and professional practice in secondary physical education curriculum and instruction. This research-based course emphasizes effective teaching, development of content, and analysis of curricular models in grades 7-12. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of instructor.

KIN 363  Instructional Strategies in PE  credit: 3 Hours.
Analyzes the teaching-learning process, emphasizing the identification of instructional strategies specific to the development of skilled performance in movement activities. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program.

KIN 364  Exper in the Common School  credit: 3 Hours.
Supervised practice in observing, assisting, and teaching children in elementary, junior high school, and senior high school. Emphasis is on understanding motor behavior, teacher-learner behavior, and interrelatedness with other aspects of the learning environment. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of the instructor.

KIN 365  Civic Engagement in Wellness  credit: 3 Hours.
Provides scholarly knowledge and practical experience related to environmental, intellectual, physical, psychological, spiritual, and social wellness. Students acquire leadership and real-world skills while working in teams to develop and implement projects that facilitate health and well-being in the population of adults living in the community. Projects emphasize integrative learning and are showcased in both written and oral formats. Same as AHS 365, CHLH 365, RST 365, and SHS 370.

KIN 369  Coaching Strategies  credit: 3 Hours.
Examination of philosophy, ethics, strategies, motivational techniques, performance analysis, program organization, contest administration, and equipment and facility management related to coaching.

KIN 375  Comm Partners & Health  credit: 3 Hours.
Same as AHS 375 and SHS 375. See SHS 375.

KIN 385  Exper in Kinesiology Research  credit: 3 Hours.
Supervised laboratory experiences in kinesiology research; individual work under the supervision of members of the faculty in their respective fields. The student assists with data collection, processing, and analysis for research in progress. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

KIN 386  Exercise Instruction & Elderly  credit: 3 Hours.
This course is designed to offer practical experience opportunities to undergraduate Kinesiology students aspiring to work in applied exercise fields with a diverse aged population. It will entail extensive "on the job" training through the Lifetime Fitness Program, an older adult service program of the Department of Kinesiology. Additionally, students will gain training in current program management practices. May be repeated to a maximum of 6 hours. Prerequisite: KIN 352 or consent of instructor is required. A current CPR is required at the beginning of the term and certification must remain current.

KIN 387  Exper in the Agency Setting  credit: 3 Hours.
Supervised practical experience in leadership roles in nonschool agency settings; emphasis on observing, planning, and conducting physical activity programs for children and/or adults in preschool, recreation, or other social agencies. May be repeated for a maximum of 6 hours.

KIN 390  Honors  credit: 2 Hours.
Course is restricted to James Scholars pursuing the Civic Commitment and Leadership Tracks. Designed to support completion of the James Scholar honors project. Same as CHLH 390 and RST 390. May be repeated to a maximum of 6 hours. Prerequisite: James Scholar standing.

KIN 391  Special Project-Problems  credit: 2 or 3 Hours.
Special projects in research and independent investigation in any phase of health, kinesiology, physical education, and related areas selected by the students. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; grade-point average of 2.5; consent of instructor.

KIN 393  Honors Thesis  credit: 3 Hours.
Planning, researching and writing of an honors thesis, under supervision of a faculty member, on a problem of appropriate scope and character. Paper will be presented at a suitable meeting and/or seminar. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing when enrolling; minimum grade point average (total, University and Kinesiology prefix courses) of 3.25; a minimum of one full year (2 semesters) remaining at the University of Illinois, Urbana-Champaign campus; and submission of a written proposal.
KIN 401  Measure & Eval in Kinesiology  credit: 3 or 4 Hours.
Examines the concepts of observation, measurement, and evaluation of human motor performance and functioning in physical activity contexts. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 140 and KIN 150, or graduate standing, or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning II

KIN 407  Disability, Culture & Society  credit: 3 or 4 Hours.
Same as ANTH 404, CHLH 407, and REHB 407. See CHLH 407.

KIN 442  Body, Culture & Society  credit: 3 or 4 Hours.
Analysis of the significant social aspects of the human body including anthropological, historical, psychological and sociological perspectives. Places emphasis on cross-culture and cross-national studies of bodily behavior with particular stress on exercise, health and sport practices. Same as GWS 442. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 249 or SOC 249, or graduate standing, or consent of instructor.

KIN 443  Psychophysiology in Ex & Sport  credit: 3 or 4 Hours.
Designed to give the student an understanding of the interaction between psychological processes and physiological parameters in exercise and sport. Examines psychophysiological exercise and sport research with particular attention to relevant models and theories. Same as PSYC 443. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior or senior standing, KIN 340, or graduate standing, or consent of instructor.

KIN 444  Physical Activity and Chronic Diseases  credit: 3 or 4 Hours.
Focuses on the scientific evidence regarding the health benefits of exercise, physical activity, and physical fitness in the prevention and management of chronic diseases. 3 undergraduate hours. 4 graduate hours.

KIN 447  Psych of Sport Performance  credit: 3 or 4 Hours.
Outlines the social psychological parameters which influence behavior and performance in sport; emphasizes the impact of social influences upon the individual within the sport context, including such factors as achievement motivation, competition, anxiety, aggression, and personality. Same as PSYC 447. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 140, KIN 247, or PSYC 201, or graduate standing, or consent of instructor.

KIN 448  Exercise & Health Psychology  credit: 3 or 4 Hours.
Examines the psychological determinants and consequences of exercise and physical activity as a health promoting behavioral process. Same as CHLH 448. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above, or graduate standing, or consent of instructor.

KIN 450  Biochemistry of Exercise  credit: 3 or 4 Hours.
Introduces the metabolic and biochemical adaptation of the body in response to acute and chronic physical activity. Primary focus is given to the subcellular and enzymatic regulation and integration during exercise. Substrate metabolism, bioenergetics, hormonal action and nutritional influences as related to exercise are emphasized. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352 or MCB 450; or consent of instructor.

KIN 451  Skeletal Muscle Physiology  credit: 3 or 4 Hours.
Offers basic information on skeletal muscle anatomy, physiology and function which will provide a basis for understanding changes in muscle structure and function during periods of increased or decreased us. Knowledge gained in this course can be used in areas such as design of training programs, physical therapy, or injury prevention. 3 undergraduate hours. 4 graduate hours. Prerequisite: The student is expected to have taken at least one or more of the following: MCB 103, MCB 240, KIN 352 or prior consent of the instructor.

KIN 452  Clin & Applied Ex Physiology  credit: 3 Hours.
Physical fitness appraisal and guidance in clinical and applied settings with emphasis on medical clearance, risk factor assessment, physical fitness assessment and exercise prescription. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352, or graduate standing, or consent of instructor.

KIN 453  Nutrition for Performance  credit: 3 or 4 Hours.
Nutrition for performance is the fusion of two disciplines, nutrition and exercise physiology, which provides the knowledge-base to support and optimize training, performance, and recovery. This course will provide information regarding the use of nutrition to increase performance in athletes training for strength or endurance. Same as FSHN 453. 3 undergraduate hours. 4 graduate hours.

KIN 457  Motor Learning & Control  credit: 3 Hours.
Discussion and analysis of scientific principles related to the learning and control of motor skills; review of related literature and research in motor learning and control. The focus of the course is on mechanisms for the control of movement and recent theories of how movements are acquired and performed. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 257 or graduate standing or consent of instructor.

KIN 458  Neurobio of Aging  credit: 0 to 4 Hours.
Same as PSYC 451 and NEUR 451. See PSYC 451.

KIN 459  Physical Activity & Aging  credit: 3 or 4 Hours.
Examines aging and age-related changes in the cells, tissues, organs, and systems of the human body; emphasizes the role of physical activity and other lifestyle choices in modifying the aging process and in influencing the onset and progression of the chronic diseases which accompany aging. Same as HDFS 459. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, Senior, or graduate standing or consent of instructor.

KIN 460  Technology & Pedagogical KINES  credit: 3 or 4 Hours.
Promotes mastery of technology skills and complex computer applications through the analysis of research and critical issues related to technology in Kinesiology. The completion of technology modules, requiring problem solving and the collection and analysis of assessment data, will culminate in an interactive, multimedia project. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing.

KIN 470  Exercise Endocrinology  credit: 3 or 4 Hours.
The objective of this course is to gain a better understanding of the endocrine system and its response to physical exercise. Therefore, this course will provide a basic review of 1) the major glands and tissues that secrete chemical messengers, 2) the ability of acute exercise and exercise training to regulate chemical messengers, and 3) the physiological consequences of endocrine adaptation to exercise. Clinical disorders associated with endocrine dysfunction will also be discussed when relevant. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MCB 103, MCB 240, KIN 352.

Information listed in this catalog is current as of 03/2017
The program consists of two courses and a pre-internship field experience. The pre-internship program requires students to accumulate a minimum of 300 Hours of practical work experience. It is strongly recommended that students enter the program by choosing an area of concentration. A total of 128 hours is needed for graduation. For the Degree of Bachelor of Science in Recreation, Sport and Tourism Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by contacting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

Recreation, Sport and Tourism

Laurence Chalip, Department Head
104 Huff Hall, 1206 South Fourth Street, Champaign
PH: (217) 333-4410
http://rst.illinois.edu

The Department of Recreation, Sport and Tourism originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing an active professional workforce. RST 480 in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

For the Degree of Bachelor of Science in Recreation, Sport and Tourism Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by consulting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The practicum is taken after the student satisfactorily completes all course work including RST 480, and fulfills the pre-internship field experience. RST 484 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

Recreation, Sport and Tourism

Laurence Chalip, Department Head
104 Huff Hall, 1206 South Fourth Street, Champaign
PH: (217) 333-4410
http://rst.illinois.edu

The Department of Recreation, Sport and Tourism originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing an active professional workforce. RST 480 in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

For the Degree of Bachelor of Science in Recreation, Sport and Tourism Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by consulting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The practicum is taken after the student satisfactorily completes all course work including RST 480, and fulfills the pre-internship field experience. RST 484 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

Restricted Electives: Departmental courses not required in the core or counted toward concentration requirement.

Free Electives: Any courses not counted toward core requirements, concentration requirements, or restricted electives.

Internship 12
RST 485 Practicum 12

Summary of Degree Requirements

General Education 36
Recreation, Sport and Tourism Core Courses 39
Concentration Requirements 9
Electives (12 of which are restricted electives) 32
Internship 12
Total Hours 128

128 hours minimum required for graduation.

RST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/RST)

Courses

RST 100  RST in Modern Society  credit: 3 Hours.
Central issues in defining leisure, historical, philosophical, sociological, psychological, and economic approaches to understanding leisure behavior, its meanings, social contexts, and personal and social resources. This course satisfies the General Education Criteria for: UIUC: Social Sciences

RST 101  Orientation to RST  credit: 1 Hour.
Introduction to Recreation, Sport and Tourism which provides an overview of the RST curriculum, areas of study, and opportunities available for a career in the field.

RST 110  Service Delivery in RST  credit: 2 Hours.
Introduces students to the concepts, principles, and practices related to the provision of leisure services; description of the various fields of professional practices and basic elements of leisure service systems such as budgeting, planning, staffing, and characteristics of client populations.

RST 120  Foundations of Recreation  credit: 3 Hours.
Examines historical and philosophical foundations of various organizations responsible for providing recreation opportunities and services. Program planning, evaluation, and marketing and financing strategies are examined in the public, not-for-profit and private recreation delivery systems.

RST 130  Foundations of Sport Mgt  credit: 3 Hours.
Examines career opportunities within the sport industry and provides knowledge relevant to the management, marketing, legal, and financial operations of sport organizations. Incorporates applications in a variety of sport entities including intercollegiate athletics, campus recreation, event and facility management, professional sport, management and marketing agencies, and international sport.

RST 140  Nature and Wilderness  credit: 2 Hours.
Origins of the nature and wilderness preservation movements; philosophy behind nature conservation and outdoor activities; role of parks, outdoor recreation, and nature-tourism in contemporary life.

RST 150  Foundations of Tourism  credit: 3 Hours.
Survey of travel and tourism with emphasis upon tourist behavior, motivations, preferences, decision-making, attractions, transportation services, facilities and information sources. Examines travel and tourism as an element of leisure service delivery from an interdisciplinary perspective.

RST 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Covering various topics for undergraduates in Recreation, Sport & Tourism. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated.

RST 200  Leadership in RST  credit: 2 Hours.
Leadership theories and practices as related to design and delivery of leisure programs. Processes of group development and interpersonal communication in leisure service organizations.

RST 216  Leisure and Technology  credit: 3 Hours.
Focuses on the roles of technology in leisure and related industries and explores the impact of technology on leisure from both the consumer and producer perspectives. Reviews important technologies, discusses their use as transformative mechanisms, and considers their impact on leisure activities in society.

RST 217  Public Recreation  credit: 3 Hours.
Course examines the public sector and its role in the provision of local park and recreation services. Students will explore its philosophical foundations, organizational structure, policy-making process, and the administrative tasks of public recreation providers.

RST 218  Entrepreneurship  credit: 3 Hours.
In-depth study of the delivery of leisure services in the for-profit sector. Covers the scope and administrative functions of recreation enterprises, including an analysis of planning, controlling, and developing recreation enterprises.

RST 224  Politics of the National Parks  credit: 2 or 3 Hours.
Same as PS 224. See PS 224. This course satisfies the General Education Criteria for: UIUC: Social Sciences

RST 225  Environmental Politics & Policy  credit: 3 Hours.
Same as PS 225. See PS 225. This course satisfies the General Education Criteria for: UIUC: Social Sciences

RST 230  Diversity in Recreation, Sport, and Tourism  credit: 3 Hours.
Course is designed to increase awareness and knowledge of the needs of members of ethnic and racial minorities, people of lower socio-economic status, women, older adults, people of alternative lifestyles, and people with disabilities when it comes to recreation, sport, and tourism services. It introduces students to concepts and factors that influence the delivery of recreation, sport, and tourism services to diverse populations. Same as HDFS 263 and KIN 230. This course satisfies the General Education Criteria for: UIUC: US Minority Culture(s)
RST 242  Nature and American Culture  credit: 3 Hours.
Appreciation and critique of cultural meanings associated with American
natural landscapes. Traditional perspectives including colonial American,
romantic, and science-based conservation are characterized, as well as
revisionist themes aligned with gender, cultural pluralism, and societal
meanings of parks and protected areas. Implications of diversity in
cultural meanings toward nature are developed and provide the basis for
assessing tenets of contemporary environmental policy and supporting
concepts associated with community-based conservation. Same as
HIST 282, LA 242, and NRES 242.
This course satisfies the General Education Criteria for:
UIUC: Western Compary Cult

RST 255  Ethical Issues in RST  credit: 2 Hours.
Explores ethical issues related to government, recreational sport, sport
tourism and travel, journalism and media, education, coaching, and
business. Students become familiar with concepts and principles of
applied ethics and gain insight into the complexity of ethical issues in
recreation, sport and tourism.

RST 300  Leisure Programming  credit: 3 Hours.
Develops understanding of the process of leisure/recreation
programming and the practical aspects of program design and delivery.
Prerequisite: RST 100.

RST 312  Discovery, Tourism and Travel  credit: 3 Hours.
Same as HIST 315. See HIST 315.

RST 314  Introduction to Aging  credit: 3 Hours.
Same as CHLH 314, HDFS 314, PSYC 314, and REHB 314. See CHLH 314.

RST 316  Leisure and Human Development  credit: 3 Hours.
Examines changes in expressive style and behavior over the life course,
and the interaction of leisure with developmental processes. Prerequisite:
RST 100 or consent of instructor.

RST 325  Leisure Services Marketing  credit: 3 Hours.
Application of marketing concepts to the delivery of leisure services.
Introduces consumer decision theory analysis. Provides an integrative
study of the methods and models for developing and evaluating
alternative marketing strategies.

RST 335  Leisure and Consumer Culture  credit: 3 Hours.
Examination of contemporary patterns and meanings of leisure in a
consumer society. Understanding of the impact of consumption
expressions of identity, gender, social class, race and ethnicity.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: Western Compary Cult

RST 340  Facility Management in RST  credit: 3 Hours.
Basic understanding of park operations, facility design, construction,
and maintenance practices; staff allocations, job analysis, contract
administration, organizational structures. Prerequisite: RST 100 and
RST 110.

RST 341  Community Recreation Planning  credit: 3 Hours.
Studies the outdoor recreational use of lands in the public domain and
their planning, concepts, and processes related to planning resource
based systems; multiple-use in planning; planning criteria for outdoor
recreation facilities. Additional fees may apply. See Class Schedule.
Prerequisite: Junior standing; or consent of instructor.

RST 346  Case Study: Endless Summer  credit: 3 Hours.
Same as KIN 346 and MACS 346. See KIN 346.

RST 350  Tourism and Culture  credit: 3 Hours.
Studies the relationships that exist between tourists, hosts, their
respective culture(s), and the cultural environments in which they
interact. Studies tourism and its impacts across cultural boundaries,
as well as concepts of cultural authenticity, modernity, image creation,
social justice, diversity, and representation of social, racial and ethnic
groups. Field trip required. Additional fees may apply. See Class
Schedule. Prerequisite: Junior or Senior standing.

RST 354  Legal Aspects of Sport  credit: 3 or 4 Hours.
A study of legal principles and their impact on the sport industry; the
course examines the application of different areas of law including
tort, contract, constitutional, anti-trust, and intellectual property law to
professional, amateur and recreational sport.

RST 357  Technology & Sport  credit: 3 Hours.
Same as HIST 343. See HIST 343.

RST 365  Civic Engagement in Wellness  credit: 3 Hours.
Same as AHS 365, CHLH 365, KIN 365, and SHS 370. See KIN 365.

RST 370  Research Methods & Analysis  credit: 3 Hours.
Educates students in principles of research design, data collection,
measurement, methods of statistical analysis, techniques in
summarizing data, and the interpretation and application of research
findings to the field of Leisure Studies.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning II

RST 390  Honors  credit: 2 Hours.
Same as CHLH 390 and KIN 390. See KIN 390.

RST 393  Special Problems  credit: 1 to 3 Hours.
Special projects in research and independent investigation in any phase
of health, physical education, recreation, or related areas selected by the
student. May be repeated to a maximum of 6 hours. Prerequisite: Junior
or senior standing; grade-point average of 3.0; consent of academic
counselor, instructor, and head of department.

RST 410  Administration of Leisure Serv  credit: 3 or 4 Hours.
Development of overall leisure management function. Analysis
of administration and policies such as organizational structure,
executive leadership, decision-making, financing, and public relations.
3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite:
Undergraduates: Completion of campus Composition I general education
requirement and upper level standing.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

RST 429  Contemporary Issues in RST  credit: 4 Hours.
Provides a capstone experience to encourage critical and creative
thinking regarding knowledge students accrued from prior courses. The
first eight weeks students will meet as a whole and focus on leisure
concepts in general, and the second eight weeks students will focus on
their specific concentration, (Sport Management, Tourism, or Community
Recreation). 4 undergraduate hours. 4 graduate hours. Prerequisite:
RST 120, or RST 130, or RST 150, and senior status.

RST 440  HR Management in RST  credit: 3 Hours.
Concepts, principles, and objectives of supervision; the nature of
the supervisory relationship; supervisory functions and processes;
identification and application of methods and techniques; organizational
and operational patterns of supervision in recreation and park settings. 3
undergraduate hours. No graduate credit.
RST 450  Tourism Planning & Development  credit: 4 Hours.
Examines tourism planning and development processes from both applied and conceptual perspectives. Emphasis is placed on tourism planning and development strategies that evaluate destination potential and consider travel destination choice behavior. 4 undergraduate hours. 4 graduate hours. Prerequisite: RST 150 or consent of instructor. Not intended for students with Freshman or Sophomore class standing.

RST 459  Heritage Management  credit: 3 or 4 Hours.
Same as ANTH 460 and LA 460. See ANTH 460.

RST 480  Orientation to Practicum  credit: 1 Hour.
Prepares and places students in the Leisure Studies Practicum. Students must document completion of 300 hours of field work. Topics include placement requirements and policies, resumes, interviewing, letters of application, and the role and issues of professional practice. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing; RST 100 and RST 110.

RST 485  Practicum  credit: 12 Hours.
Students are assigned to University-approved field training stations in an internship capacity for a minimum of forty hours per week for sixteen weeks. Both the agency and the University provide supervision. 12 undergraduate hours. 12 graduate hours. Approved for S/U grading only. Prerequisite: Senior standing; RST 480 and RST 410.

Speech and Hearing Science

Karen Kirk, Department Head
901 South Sixth Street, Champaign
PH: (217) 333-2230
http://shs.illinois.edu

The undergraduate curriculum in Speech and Hearing Science provides a broad background in the biological, behavioral, linguistic, and social foundations of human communication and communication disorders. The major prepares students to pursue a career or graduate education in many fields related to human communication and healthy communication practices. The degree requires at least 128 hours. The program has four concentrations: Audiology, Speech-Language Pathology, Neuroscience of Communication, and Cultural-Linguistic Diversity. Each of the four concentrations can be combined with pre-certification requirements from the American Speech-Language-Hearing Association for undergraduates wanting to pursue a career as either a speech-language pathologist or audiologist. The American Sign Language sequence of courses is available to students across all four concentrations.

A concentration must be declared prior to the senior year. Academic advising is required in the College of Applied Health Sciences and students are advised to consult Undergraduate Advising (http://shs.illinois.edu/undergrad-advising) on a regular basis to ensure they are meeting all requirements.

For an overview of the program and career opportunities, see this site (http://labs.shs.illinois.edu/Undergraduates/Careers.aspx). For further information, contact the Department of Speech and Hearing Science (http://www.shs.uiuc.edu), 220 Speech and Hearing Building, 901 S. Sixth Street, Champaign, IL 61820, (217) 333-2230.

For the Degree of Bachelor of Science in Speech and Hearing Science

General Education

Students are advised to select their General Education course requirements from the University's approved list of courses (www.courses.illinois.edu/cis/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

Communication Skills

Composition I

RHET 105  Writing and Research  4-6
or CMN 111  Oral & Written Comm I & CMN 112  and Oral & Written Comm II

Advanced Composition

One course in Advanced Writing/Composition II from approved list 1

Quantitative Reasoning I

One course from the approved Gen. Ed. list 2

Quantitative Reasoning II

One course from the approved list required.

Humanities and the Arts

Minimum of two courses from approved list required

Social and Behavioral Sciences

Minimum of two courses from approved list required

Natural Sciences and Technology

Two classes or six hours from the university approved Gen. Ed. list required. 3

Cultural Studies

One course from Western cultures approved campus list
One course from U.S. Minority Cultures or Non-Western Cultures approved campus list

Foreign Language

0-12

May be satisfied if had three years of one non-English language in high school or completed the equivalent of three semesters of college level foreign language (through the intermediate level).

Total Hours 37-51

1 must be taken at U of I
2 A course in general statistics will address the BS degree requirement; however, those planning to pursue a graduate degree in communication science and disorders are advised to consider taking additional math (calculus may be required by some programs).
3 While not specifically required for the BS degree, students planning to pursue the Speech-Language Pathology or Audiology concentrations and eventual graduate studies in these areas, are advised to take one course in Life Science (a biological science is suggested) and one course in Physical Science (a course in Physics or Chemistry is recommended) to satisfy eventual ASHA certification requirements.

Speech and Hearing Science Professional Core Requirements

All students must complete a series of SHS core classes regardless of their area of concentration. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in
Speech and Hearing Science Minor

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student's individual needs, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. For more information contact Kathi Ritten, Academic Advisor, at ritten@illinois.edu.

SHS 170  Intro Hum Comm Sys & Disorders  3
SHS 191  Freshmen Seminar  1
SHS 200  General Phonetics  3
SHS 240  Intro Sound & Hearing Science  3
SHS 300  Anat & Physiol Spch Mechanism  4
SHS 301  General Speech Science  4
SHS 320  Development of Spoken Language  3
SHS 450  Intro Audiol & Hear Disorders  4

Total Hours  25

1  Same as LING 300.
2  Same as LING 303. Should be taken after SHS 300.

Areas of Concentration (24-30 Hours)

- Audiology (p. 93)
- Cultural-Linguistic Diversity (p. 92)
- Neuroscience of Communication (p. 93)
- Speech-Language Pathology (p. 93)

Electives

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women's Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University’s requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

Note: Students must take at least six credits hours of speech and hearing science courses at the 300 or 400 levels from this approved list.

SHS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SHS)

Courses

SHS 111  Living-Learning ASL Part 1  credit: 2 Hours.

An introductory course in American Sign Language (ASL); no previous knowledge or skills are needed. It is offered through the Living in Residence Program at Allen Hall. The focus is on the acquisition of beginning-level vocabulary items and grammar of ASL. ASL is a non-Indo-European language that uses the visual/manual rather than spoken/auditory modality. Students develop a core vocabulary and basic grammar to enable you to communicate using ASL. The Deaf Community, like other cultural groups, defines a population that shares both a language and pattern of transmission of beliefs and values. The course provides an introduction to the culture, traditions, and values of the Deaf Community.
SHS 112  Living-Learning ASL Part 2  credit: 2 Hours.
The second part of an introductory course in American Sign Language (ASL); some knowledge of and skills in ASL are required. It is offered through the Living in Residence Program at Allen Hall. The focus is on the continued acquisition of beginning-level vocabulary items and grammar of ASL. ASL is a non-Indo-European languages that uses the visual/manual rather than spoken/auditory modality. Students develop core vocabulary and grammar to enable you to communicate using ASL. The Deaf Community, like other cultural groups, defines a population that shares both a language and pattern of transmission of beliefs and values. The course provides further information of the culture, traditions, and values of the Deaf Community.

SHS 120  Child, Comm, & Lang Ability  credit: 3 Hours.
Provides an introduction to the study of the human communication and language capacity and includes an overview of three areas of inquiry: language science, language development in children, and language disability in children.

This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

SHS 121  American Sign Language I  credit: 4 Hours.
This is an introductory course in American Sign Language (ASL). No prior experience with the language is necessary. Students will learn vocabulary, elementary-level grammatical structures, and elements of U.S. Deaf Culture in order to engage in entry-level conversations in ASL. Basic social and communication skills associated with the use of ASL will be emphasized. This course is part of a sequence of courses that will fulfill the foreign language requirement for UIUC undergraduate students. Approved for Letter and S/U grading.

SHS 150  Hearing Processes & Disorders  credit: 3 Hours.
An introduction to basic and clinical aspects of audition and their relevance to communication processes and communication disabilities from biological, humanistic, and technological perspectives. Communication processes and development are explored within historical, behavioral, and scientific frameworks. Hearing disabilities are described according to prevention etiology, manifestation, evaluation and treatment. The effects of disability on individuals and families across the lifespan are also addressed.

SHS 170  Intro Hum Comm Sys & Disorders  credit: 3 Hours.
Examines broad perspectives of theories and information regarding normal and abnormal communication: how speech and language develop, how people hear, how they produce speech and what can go wrong; addresses the impact of speech and hearing science on society, culture, and modern technologies.

This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

SHS 171  Evolution of Human Comm  credit: 3 Hours.
Provides an introduction to the study of how human communication evolved, including evolutionary physiologic bases, animal and human communication systems, language changes over time, and implications for speech, language, and hearing disorders. Same as ANTH 171.

This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

SHS 191  Freshmen Seminar  credit: 0 to 9 Hours.
Special experimental seminar or independent study course intended to cover topics not treated by regular course offerings; open to undergraduates at any level. Requests for activation of this course may be made by students or by faculty and should be directed to the head of the academic department concerned. Although credit toward graduation is normally granted, credit toward satisfying specific college or departmental requirements is contingent upon approval by the appropriate college or departmental committee. Approved for S/U grading only.

SHS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated, if topics vary.

SHS 200  General Phonetics  credit: 3 Hours.
Basic principles of phonetic study; includes observation and representation of pronunciation, ear training, and practice in transcription.

SHS 221  American Sign Language II  credit: 4 Hours.
This intermediate course in American Sign Language (ASL) is part of a sequence to fulfill the foreign language requirement. Students must have successfully completed SHS 121 or should be able to demonstrate advanced beginner ASL skills. Students will continue to learn vocabulary items and intermediate-level grammatical structures in order to improve conversation skills. As compared to SHS 121, a greater focus is placed on ASL constructions involving the complex use of space (e.g., verb inflections, so-called "classifiers", and constructed action). Same as LING 221. Approved for letter and S/U grading. Prerequisite: SHS 121 or equivalent language skills.

SHS 222  Language & Culture of Deaf Communities  credit: 3 Hours.
Students will learn about culture and how it is manifested in various subgroups of society with a particular focus on the culture and language of Deaf people in the United States. Themes include: the linguistics of American Sign Language, aspects of social unity for Deaf people, common experiences of Deaf individuals, the educational system and Deaf students, and current issues that affect the Deaf community. For those students requiring 4 semesters of language other than English credit (LAS or BUS), SHS 222 can be used as the fourth course in the American Sign Language sequence that includes SHS 121, 221, and 321 to fulfill that requirement but cannot also then be used for Gen Ed requirements. Same as EPSY 222.

This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

SHS 231  Lang Diff Dis: American Persp  credit: 3 Hours.
Same as AFRO 231. See AFRO 231.

This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

SHS 240  Intro Sound & Hearing Science  credit: 3 Hours.
Acoustics, anatomy, and physiology of the auditory system; psychophysical methods; and a consideration of auditory theories and mechanisms.

SHS 270  Comm Disability in the Media  credit: 4 Hours.
Introduction to the study of human communication disability across the lifespan as depicted in the media and includes an overview of three areas of inquiry: behavioral/psychosocial impact of communication disability, ethical decisions in rehabilitation interventions, and disability rights.

This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: Social Sciences
SHS 270 Communication and Aging credit: 3 Hours.
Course introduces social and physical issues of communication and aging, with particular emphasis on intergenerational interactions and on the physical disabilities of aging (e.g., hearing loss, Parkinson’s disease, strokes, dementia). Discourse analysis techniques are used to integrate the social and physical aspects of aging and communication that are discussed in class.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

SHS 280 Communication Neuroscience credit: 3 Hours.
This course provides and overview of neuroscience with emphasis on human communication, moving from general concepts in neuroanatomy and neurophysiology to the specifics of the neuroscience of hearing, speech and language.

SHS 291 Research Lab Experience in SHS credit: 1 to 3 Hours.
Supervised participation in research laboratory and scholarly activities, usually as an assistant to an investigator. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 6 hours.

SHS 300 Anat & Physiol Spch Mechanism credit: 4 Hours.
Introduction to the anatomic and physiologic characteristics of the normal speech mechanism. Same as LING 300.

SHS 301 General Speech Science credit: 4 Hours.
Consideration of the physiology of the speaking act, and the acoustical and perceptual aspects of speech. Same as LING 303.

SHS 320 Development of Spoken Language credit: 3 Hours.
Study of the correlates of language development from the prelinguistic period to adulthood.

SHS 321 American Sign Language III credit: 4 Hours.
This advanced-intermediate course in American Sign Language (ASL) is part of a sequence to fulfill the foreign language requirement. Students must have successfully completed SHS 221 or should be able to demonstrate intermediate ASL conversation skills. Students will learn technical vocabulary items and complex elements of ASL narratives. In this course, students will focus on the fluid use of ASL across various registers and situations. Special emphasis will be placed on receptive fluency of complex constructions in ASL. Same as LING 321. Approved for letter and S/U grading. Prerequisite: SHS 221 or equivalent language skills.

SHS 352 Hearing Health and Society credit: 3 Hours.
An analysis of how hearing loss influences behavior of individuals and interactions among individuals within larger social/societal groups across the lifespan. Considers issues associated with early detection of hearing loss and promoting hearing conservation in different environments. Approaches to promoting behaviors that enhance communication in the presence of hearing loss will be explored. Philosophical, policy, and cultural controversies for defining hearing loss as a disability will be examined. Each of these topics will be considered within the interplay between the individual person, culture, age, disability, educational environment, community, and social/family interactions.

SHS 370 Civic Engagement in Wellness credit: 3 Hours.
Same as AHS 365, CHLH 365, KIN 365, and RST 365. See KIN 365.

SHS 375 Comm Partners & Health credit: 3 Hours.
Combines a community-based volunteer experience with class-based readings/discussion to introduce students to the study of communication in context. Students will use learning journals to document their volunteer experiences, describe the characteristics of conversational interactions they observe, and reflect on their own skills as flexible communication partners with people of various backgrounds and abilities and in a variety of clinical and professional settings.
Includes a one-hour weekly discussion section (taught by SHS faculty/ instructional staff) and three-four hour weekly community volunteer experiences (supervised by volunteer site employees). Same as AHS 375 and KIN 375. May be repeated in separate terms to a maximum of 6 hours.

SHS 380 Comm Competence and Disorders credit: 3 Hours.
This course explores ways of defining and documenting communicative competence for individuals with communication disorders in everyday interactions. It introduces students to theories of communication-in-context and methods of discourse analysis. Students will critically review research on discourse of individuals with communication disorders across the lifespan and discuss its relevance to clinical practice.
Prerequisite: Minimum sophomore standing or consent of instructor.

SHS 383 Special Topics credit: 3 or 4 Hours.
Lecture course in topics of current interest in speech and hearing science; specific subject matter announced in the Class Schedule. May be repeated if topics vary.

SHS 385 Evidence-Based Practice in Communication Sciences and Disorders credit: 3 Hours.
This course is designed to examine how the field of Speech and Hearing Science creates knowledge or evidence to support the assessment and intervention for individuals with communication disorders. Students will gain an introductory understanding of clinical research methodology and become familiar with the process of selecting evidence-based practices.
Prerequisite: Sophomore standing or consent of instructor.

SHS 390 Individual Study credit: 2 to 4 Hours.
Individual investigation of special problems. May be repeated to a maximum of 6 hours. Prerequisite: Ten hours of speech and hearing science, and written approval by the faculty members who will supervise the student’s work.

SHS 395 Honors Individual Study credit: 2 Hours.
Individual study leading either to a thesis or to departmental honors. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing; a cumulative grade point of 3.5 or consent of the head of the department.

SHS 410 Stuttering: Theory & Practice credit: 3 or 4 Hours.
Study of the theoretical and research literature concerning the causes, diagnosis, and treatment of stuttering and an analysis of clinical procedures in stuttering therapy. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduate credit, students must have senior level status in the SHS Program or consent of instructor. For graduate credit, students must have graduate level status in SHS Program or consent of instructor. Additional work involved.

SHS 411 Normal and Disordered Voice credit: 3 or 4 Hours.
Study of the biomechanics of normal and disordered voice production with application to both clinical and pedagogical voice training and care. 3 undergraduate hours. 4 graduate hours. Additional work is involved for 4 credit hours.
Concentration in Cultural-Linguistic Diversity

The Cultural-Linguistic Diversity concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socioeconomic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Information listed in this catalog is current as of 03/2017
concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association’s web site: http://www.asha.org.

Concentration in Neuroscience of Communication

The Neuroscience of Communication concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association’s web site: http://www.asha.org.

Concentration in Audiology and Speech Language Pathology

The concentrations in either Speech-Language Pathology or Audiology provide explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association’s web site: http://www.asha.org.

Concentration for Audiology

SHS 280 Communication Neuroscience 3
SHS 285 Quantitative Bases in SHS, or an approved substitution 1 3
SHS 352 Hearing Health and Society 3
SHS 385 Evidence-Based Practice in Communication Sciences and Disorders 3
SHS 451 Aural Rehab Children to Adults (requires senior standing and completion of core classes) 2 to 4
SHS 475 Prepracticum in SHS (requires senior standing and completion of core classes) 1 to 2

Students must also take 6 hours from the following specified electives: 6

SHS 222 Language & Culture of Deaf Communities
SHS 270 Comm Disability in the Media
SHS 271 Communication and Aging
SHS 291 Research Lab Experience in SHS (Approved for S/U grading only. Must be arranged with individual faculty member.)
SHS 375 Comm Partners & Health
SHS 473 Augmentative & Alt Comm (Requires senior standing and completion of core classes)

NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours. These should be completed and recorded prior to graduation (some may be completed prior to serving as a clinical participant in the required SHS 475 pre-practicum).

Total Hours 22-23

Interdisciplinary Health Sciences

William Stewart
110 Huff Hall, 1206 South Fourth Street, Champaign
PH: (217) 333-2131

For the Degree of Bachelor of Science in Interdisciplinary Health Sciences

The undergraduate degree program in Health is interdisciplinary in nature, and focused on applied health and societal issues that cut across a range of traditional fields. The program of study includes a set of core courses that builds an interdisciplinary foundation in the study of health, and provides a basic knowledge of health-related issues. The degree program also includes a set of three concentrations, of which a student must complete at least one, that emphasize some of the foremost issues facing society: health and aging; health behavior change; and health diversity. Finally, the degree program includes a capstone experience with several options for completion, e.g., an internship, faculty-guided research experience. The program of study addresses a major need across the nation and world for graduates prepared to enter a range of biomedical and health-related careers and/or to pursue graduate study in fields relevant to health, wellness, and the biomedical sciences. For questions regarding iHealth contact Julie Bobitt, Assistant Director, or Patty Pyrz, Academic Advisor at jbobitt@illinois.edu; pspyrz@illinois.edu (jbobitt@illinois.edu).

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for
the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 693). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

Requirements Including General Education

The curriculum requires certain existing courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

Communication Arts
Composition I 3-6
Advanced Composition 3
Quantitative Reasoning I & II From approved campus list 6

Humanities and the Arts
From approved campus list 6

Social and Behavioral Sciences
From approved campus list 6

Natural Sciences and Technology
From approved campus list 6

Cultural Studies
From Western cultures approved campus list 3
From U.S. minority cultures or non-Western cultures approved campus list 3
Foreign Language: Completion through the third level of the same language in high school or college

Total Hours 36-39

1 Courses in cultural studies may be completed through other categories where appropriate.

Health Major Requirements
CHLH 101 Introduction to Public Health 3
CHLH 274 Introduction to Epidemiology 3
CHLH 456 Organization of Health Care 2-4
KIN 122 Physical Activity and Health 3
RST 100 RST in Modern Society 3
SHS 170 Intro Hum Comm Sys & Disorders 3
FSHN 120 Contemporary Nutrition 3
PSYC 100 Intro Psych 4
STAT 100 Statistics 3
REHB 330 Disability in American Society 3
IHLT 101 Introduction to i-Health 1
IHLT 102 Survey of Interdisc Health 1
IHLT 375 Interdis Collab in Health Serv 4
IHLT 474 Pre-Field Experience in Health 1

IHLT 475 Field Experience in i-Health 4

Total Hours 42

Concentrations (at least one concentration is required)

Health and Aging
KIN 259 Motor Development and Control 3
CHLH 404 Gerontology 3, 4
SHS 271 Communication and Aging 3
PSYC 361 The Psychology of Aging 3
Select three of the following (at least two at the 300- or 400-level):
CHLH 494 Special Topics 9
EPSY 407 Adult Learning and Development
IHLT 498 Interdisciplinary Health Study Abroad

SOCW 300 Diversity: Identities & Issues

IHLT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IHLT)

IHLT 232 Health Disparities in the U.S. credit: 3 Hours.
Provides an overview of health disparities in the United States, including existence and magnitude of health disparities, theories that explain health disparities, strategies to address their complexity, and solution required to eliminate them. Disparities are examined related to groups of diverse racial/ethnic backgrounds, socio-economic status, gender, age, and ability level.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

IHLT 375 Interdis Collab in Health Serv credit: 4 Hours.
Provides scholarly knowledge and field experiences for interdisciplinary collaboration in the health services. Topic include health service delivery systems, vulnerable populations, models of health and health promotion, communication, policy and ethics in health care. Emphasis on introducing students to the importance of working with individuals from a variety of health disciplines to best address issues of health in society.

IHLT 474 Pre-Field Experience in Health credit: 1 Hour.
This is an independent study course that expands student's knowledge of health professions and prepares them for field work in an applied setting with a variety of health professionals. 1 undergraduate hour. 1 graduate hour.

IHLT 475 Field Experience in i-Health credit: 4 Hours.
Designed to emphasize field/research experiences that facilitate working with individuals from a variety of health disciplines. Field experience/research placements will be selected to best prepare students address issues of health within their concentrations areas. In class sessions will focus on interdisciplinary collaboration, professionalism and important global health issues. Serves as the capstone course for i-Health majors. 4 undergraduate hours. 4 graduate hours. Prerequisite: Restricted to senior i-Health majors.

IHLT 498 Interdisciplinary Health Study Abroad credit: 1 to 6 Hours.
An advanced-level study abroad experience where students complete assigned scholarly readings; participate in facilitated discussions prior to, during, and/or after the trip; and write a final paper. The on-campus and abroad activities are supervised and facilitated by campus faculty. 1 to 6 undergraduate hours. No graduate credit. May be repeated in separate terms for a total of 12 undergraduate hours, if the countries differ between terms. Prerequisite: Social & Behavioral Sciences General Education requirement fulfilled, and sophomore or higher standing.

Business, College of
Office of Undergraduate Affairs
1055 Business Instructional Facility
515 East Gregory Drive
Champaign, IL 61820
PH: (217) 333-2740
FX: (217) 244-9992
http://www.business.illinois.edu
undergrads@business.illinois.edu

The purpose of the College of Business is to provide an educational experience that will help students develop their potential for leadership and service in business, government, teaching, and research. The undergraduate curricula provide a study of the basic aspects of business and preparation for careers in fields such as accounting, business management, banking, insurance, and marketing.

The curricula, leading to the Bachelor of Science degrees in the various degree programs in business, are based on 124 hours of college work.
Students are required to elect courses in other colleges of the University, including mathematics, rhetoric, humanities and the arts, speech, and natural and behavioral sciences, and to secure as liberal an education as possible to avoid the narrowing effects of overspecialization.

The College of Business offers graduate and professional programs in business areas. Detailed information on graduate programs may be obtained from the Graduate College or visit our web site (https://business.illinois.edu).

**Departments and Curricula**

Undergraduate instruction in the College of Business is organized under the Departments of Accountancy, Business Administration, and Finance. Each of these departments offers courses that provide one or more curricula that a student may elect. These curricula lead to Bachelor of Science degrees in the various fields of study in the college and are designed to encourage each student to fully realize his or her intellectual promise. There can be changes to curricular requirements and new course offerings. For the most current information, visit our advisors in 1055 Business Instructional Facility and our web site (http://www.business.uiuc.edu/undergrad).

**Requirements**

**Admission**

Applicants must meet general University requirements as well as those specified by the College of Business.

Students transferring from other institutions must have met the requirements specified by the college. See our web site (http://www.business.uiuc.edu) and the Illinois Office of Undergraduate Admissions (http://admissions.illinois.edu) for further information.

**Mathematics Placement Test**

The ALEKS Math Placement Exam is used to place the students in the appropriate math course. The results of the test are used to place students in MATH 112 or to exempt them from college algebra and allow them to enroll in the first course of one of the mathematics sequences required for graduation (see below).

**Graduation**

Students in the College of Business who meet the University's requirements with reference to registration, residence, and fees and who maintain satisfactory scholastic records in the college are awarded degrees appropriate to their curricula.

Each candidate for a degree must have a 2.0 (A = 4.0) grade point average or above for all courses counted toward graduation, a 2.0 grade point average or above for all courses taken at this University, a 2.0 grade point average or above for all courses taken in the major or field of concentration, and a 2.0 grade point average or above for courses taken in the major or field of concentration at this University.

Students are responsible for meeting the requirements for graduation. Therefore, students should familiarize themselves with the requirements listed in this catalog and other information in the Office of Undergraduate Affairs, 1055 Business Instructional Facility, and should refer to them each time they plan their programs. The College of Business requires that undergraduate degrees be completed in nine semesters or less. If you need assistance with course planning, consult the Office of Undergraduate Affairs.

**Mathematics Requirement**

Any one of the sequences described below meets the College of Business requirement. The most appropriate mathematics sequence depends on the student's background, interest, motivation, and objectives. Background can be evaluated in terms of mathematics courses already completed and the student's score on the ALEKS Math Placement Exam. Interest, motivation, and objectives must be determined by the student. The three sequences open to the student are:

- **MATH 220/MATH 221 Calculus I and MATH 231 Calculus II.** This sequence is appropriate for those students with a good background in mathematics but who have not had analytic geometry. Students who believe they may want to take upper-level courses in mathematics should take this sequence.
- **MATH 125 Elementary Linear Algebra and MATH 234 Calculus for Business I.** This sequence provides a good background in linear algebra and calculus. It is difficult to take upper-level courses in mathematics after this sequence.
- **MATH 220/MATH 221 Calculus I and MATH 125 Elementary Linear Algebra.** This is an alternative to the previous sequence. It is particularly suitable for those with AP credit in calculus who do not plan to take upper-level mathematics courses.

**Residency**

Students must earn no fewer than 60 semester hours of University of Illinois Urbana-Champaign coursework applicable to their degree-including at least 21 credit hours of advanced coursework.

**Special Programs**

**Honors At Graduation**

Honors, designated on diplomas, are awarded to superior students as follows: for graduation with honors, a minimum grade point average of 3.5 (A = 4.0) in all courses accepted toward the student's degree; for graduation with high honors, a minimum grade point average of 3.75 in all courses accepted toward the degree; and for graduation with highest honors, a minimum grade point average of 3.90 in all courses accepted toward the degree. To qualify for graduation honors, transfer students' University of Illinois at Urbana-Champaign and total cumulative grade point averages both must qualify.

**Curricula**

**Core Curriculum**

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. A required course that is failed must be repeated the next semester.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 002 or MATH 112. Once the math requirement is completed, lower level math courses cannot be taken for credit. For military and naval
science courses, only credit at the 300 level and above may be counted toward the degree.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

**University Composition Requirements**

Composition I: Principles of Composition 1 4-7
Advanced Composition 3

**General Education Requirements**

A minimum of six courses is required, as follows: 18
Humanities & the Arts: Literature & the Arts (1-2 courses) 4
Humanities & the Arts: Historical & Philosophical Perspectives (1-2 courses) 4
Natural Sciences & Technology: Physical Sciences (0-2 courses) 5
Natural Sciences & Technology: Life Sciences (0-2 courses) 5
Behavioral Sciences (1 course)
Cultural Studies: Non-Western/U.S. Minorities Cultures (1 course)
Cultural Studies: Western/Comparative Cultures (1 course)

**Non-Primary Language Requirement**

Completion of the fourth semester or equivalent of a non-primary language is required. Completion of four years of a single language in high school satisfies this requirement. A student may also meet this requirement by completing two non-primary languages to the third level.

**Business Core Requirements**

BUS 101 Business Prof Responsibility 2 2
ACCY 201 Accounting and Accountancy I 6
& ACCY 202 and Accounting and Accountancy II 6
BADM 300 The Legal Environment of Bus 3
BADM 310 Mgmt and Organizational Beh 6 3
BADM 320 Principles of Marketing 3
BADM 449 Business Policy and Strategy 3

ECON 102 Microeconomic Principles & ECON 103 and Macroeconomic Principles 6
ECON 302 Inter Microeconomic Theory 3
FIN 221 Corporate Finance 3
MATH 125 Elementary Linear Algebra & MATH 234 and Calculus for Business l 3
CMN 101 Public Speaking 3

Total Hours 51

Courses to yield this total 15-38
Elective course work 0-32

**Minimum total hours for the degree** 124

---

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2 BUS 101 is required for all College of Business students. All students entering the College of Business take BUS 101 in the fall semester, including Inter-College Transfers (ICT) and Off-Campus Transfers (OCT). MATH 220/MATH 221 and MATH 231, or MATH 220/MATH 221 and MATH 125 may be substituted for MATH 125 and MATH 234. (See college mathematics requirement above.)

3 Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

4 Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete course in the Physical Sciences and Life Sciences subcategories.

5 This course includes limited voluntary participation as a subject in experiments.

For the Degree of Bachelor of Science in Accountancy

Organizations are a nexus of contracts, implicit and explicit, among resource owners who contract with each other to the benefit of all. In most complex organizations, these contracts specify who has the knowledge, and thus the rights, to make decisions about the use and control of the contracted resources. The effectiveness and efficiency of decisions regarding initiation, execution, and monitoring of organizations’ contracts depend on the quantity and quality of information available. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for contracting parties to make effective and efficient contracting decisions. Organizations, in turn, contract with various segments of society such as labor unions, capital markets, regulatory agencies, and governments. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for ensuring that organizations comply with the terms of their social contracts.

Study in accountancy is designed to prepare individuals for entry into the accountancy professions independent of subsequent specialization. This preparation includes knowledge of the activities of organizations, businesses, and accounting practices; intellectual, interpersonal, and communication skills; and personal capabilities and professional attitudes. Specializations in accountancy include such fields as financial accounting, management accounting, accounting information systems, taxation, and auditing. Specialization in an accounting field requires additional graduate education and practical experience.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 96)).

Minimum requirements in the major for the Bachelor of Science Degree in Accountancy are:

Total Hours: 21

Accountancy courses (both required and elective) to be applied toward the 124-hour requirement for the Bachelor of Science Degree in Accountancy may not be taken on a credit/no-credit basis. In addition, a limit of 33 hours of accountancy courses (including ACCY 201 and ACCY 202) may be counted toward the 124 total hour requirement. Finally, students must select from either ACCY 405 or ACCY 415. Both courses cannot count toward the Bachelor of Science degree.

ACCY Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ACCY)

Courses
ACCY 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.
ACCY 200  Fundamentals of Accounting  credit: 3 Hours.
Survey course in the principles of accounting for students registered in
schools and colleges other than the College of Business. Credit is not
given for both ACCY 200 and either ACCY 201 or ACCY 202. Prerequisite:
Sophomore standing.

ACCY 201  Accounting and Accountancy I  credit: 3 Hours.
Introduction to the role of accounting information in establishing
organization objectives and goals and identification of strategies to
best achieve such objectives and goals. Topics focus on the utility of
information necessary for the formation, execution and monitoring of
the variety of contracts embedded in organization strategies. Projects
facilitate self-discovery of knowledge and development of a variety of
professional skills and attitudes. Credit is not given for both ACCY 201
and ACCY 200. Prerequisite: ECON 102, and credit or concurrent
enrollment in ECON 103.

ACCY 202  Accounting and Accountancy II  credit: 3 Hours.
Continuation of ACCY 201 with focus on strategic management of
economic resources, together with acquisition of such resources, and
financial and non-financial measures of organizational performance.
Credit is not given for both ACCY 202 and ACCY 200. Prerequisite:
ACCY 201 or equivalent.

ACCY 211  Understanding Financial Statements  credit: 3 Hours.
Provides a basic understanding of financial statements. Topics include
financial statement components and their meaning, the broader purpose
of financial statements, and the role of accounting in producing financial
statements. Emphasizes the ability to read and, to some extent, interpret
real-world financial statements. Credit is not given for ACCY 211 if credit
has been given for ACCY 200, ACCY 201, and/or ACCY 202. ACCY 211
does not count toward undergraduate degree requirements for degrees
offered through the College of Business or toward the Business Minor.
Prerequisite: Intended for non-business majors.

ACCY 212  Understanding Accounting for Business Decisions  credit: 3
Hours.
This course provides a fundamental understanding of how accounting
facilitates and influences decisions made by owners, managers, and
employees within an organization. Accounting provides information for
all types of decisions, ranging from everyday operational and procedural
decisions to decisions about the long-term strategy and direction of
the firm. Course topics include pricing, product selection, resource
planning and allocation, and operational and strategic performance
measurement. Credit is not given for ACCY 212 if credit has been given for
ACCY 200, ACCY 201, and/or ACCY 202. ACCY 212 does not count
toward undergraduate degree requirements for degrees offered through
the College of Business or toward the Business Minor. Prerequisite:
Intended for non-business majors.

ACCY 290  Prof Internship in Accountancy  credit: 0 to 3 Hours.
Formalized learning experience in combination with practice of
accounting while engaged in an internship with a public accounting firm,
business, or other off-campus organization; prior approval of learning
plan and a summary report of learning experience are required. Approved
for Letter and S/U grading. May be repeated in subsequent terms to a
maximum of 3 hours. Prerequisite: Open to Department of Accountancy
students; completion of ACCY 201 and ACCY 202 (or equivalent); and
consent of department.

ACCY 301  Atg Measurement & Disclosure  credit: 3 Hours.
Introduction to measurement and reporting of organizational
performance for strategic and operational purposes with a focus on a
variety of financial and non-financial performance measures suitable
for both internal and external decision-making. Projects, together with a
series of practical workshops, facilitate self-discovery of knowledge and
development of a variety of professional skills and attitudes. Prerequisite:
ACCY 202 or equivalent and concurrent enrollment in ACCY 302 by
students majoring in accountancy (recommended for non-accountancy
majors); or consent of department.

ACCY 302  Decision Making for Atg  credit: 3 Hours.
Decision making implications of information provided to organization
managers and to external stakeholders such as investors, creditors,
customers, and regulators. Concepts from economics, statistics, and
psychology emphasize the use of quantitative techniques to comprehend
uncertainty and risk. Projects, together with a series of practical
workshops, facilitate self-discovery of knowledge and development of
a variety of professional skills and attitudes. Prerequisite: ACCY 202
or equivalent; ECON 203 or equivalent or concurrent enrollment; and
concurrent enrollment in ACCY 301 by students majoring in Accountancy
(recommended for non-Accountancy majors); or consent of department.

ACCY 303  Atg Institutions and Reg  credit: 3 Hours.
Regulation theory and practice as applied to accounting information. A
general framework for regulation of accounting procedures is developed.
This framework is applied to reporting, taxation, and regulated business
activities. Projects facilitate self-discovery of knowledge and the
development of professional attitudes and skills with emphasis on
professional research. Prerequisite: ACCY 301 and ECON 302 and
FIN 221; or consent of department.

ACCY 304  Accounting Control Systems  credit: 3 Hours.
Broad perspective on accounting and control that considers attainment of
goals of an organization, including those concerned with financial
objectives. Topics include the conceptual foundations of control
and application of practical, analytical tools to the evaluation of an
organization’s control environment. Cases, class discussion and field
research projects emphasize independent thinking, group processes, and
communication. Prerequisite: ACCY 301 and ACCY 302 and BADM 310; or
consent of department.

ACCY 312  Principles of Taxation  credit: 3 Hours.
Introduction to the United States federal income tax system with an
emphasis on income tax determination and the taxation of property
transactions. Topics include the tax environment, tax provisions relevant
to businesses, employees and business owners. Projects facilitate self-
discovery of knowledge and envelopment of a variety of professional
skills and attitudes. Prerequisite: ACCY 202 or equivalent.

ACCY 321  Principles of Public Policy  credit: 3 Hours.
Same as ACE 321, BADM 303, and PS 321. See PS 321.

ACCY 352  Database Design and Management  credit: 3 Hours.
Same as BADM 352. See BADM 352.

ACCY 353  Info Sys Analysis and Design  credit: 3 Hours.
Same as BADM 353. See BADM 353.
ACCY 398  Practical Problems in Atg  credit: 0 to 16 Hours.
Course covers the professional standards relating to corporate financial reporting, taxation, auditing and public sector reporting. Serves as a review course for the Uniform Certified Public Accountant (CPA) Examination. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated up to 16 hours in separate terms, if topics vary. Credit is not given towards degree requirements. Prerequisite: Consent of the Department. Intended for students enrolled in the BS in Accountancy, Certificate in Accountancy, MAS, and MSA programs. Students from other UIUC programs must demonstrate that they have taken courses in financial accounting (beyond introductory level), cost/managerial accounting (beyond introductory level), auditing, and taxation.

ACCY 405  Assurance and Attestation  credit: 3 Hours.
Conceptual introduction to diverse means by which assurers improve the quality of information used by third parties for contracting purposes, with emphases on the credibility and relevance-enhancement properties of assurers' services. Topics include the economics of assurance and attestation, and concepts including independence, risk, evidence, and control. Projects facilitate self-discovery of knowledge and development of professional skills and attitudes. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACCY 304 or consent of department.

ACCY 410  Advanced Financial Reporting  credit: 3 or 4 Hours.
Current authoritative accounting standards and applications to accounting practice. Topics do not represent the full range of financial reporting issues, but are selected based on relevance of the underlying business transaction, complexity of the topic, consistency of applicable standard with underlying reporting concepts, and transferability of the standard to other accounting issues. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACCY 303 or consent of department.

ACCY 415  Auditing Stds and Practice  credit: 3 Hours.
Framework for understanding and evaluating the professional auditing standards for assurance services. Model of financial reporting provides an overview of the types of information disseminated by companies to external users, and provides the basis for identifying professional standards areas for future standards' development. 3 undergraduate hours. No graduate credit. Credit is not given for both ACCY 415 and ACCY 515. Prerequisite: ACCY 304 or consent of department.

ACCY 451  Advanced Income Tax Problems  credit: 3 or 4 Hours.
Introduction to the U.S. federal income taxation of corporations, their shareholders and owners, as well as entities receiving flow-through treatment under U.S. federal tax law e.g., Subchapter S corporations, partnerships and limited liability companies). 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Senior standing and ACCY 312.

ACCY 499  Senior Research  credit: 2 to 4 Hours.
Research and readings course for students majoring in accountancy. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Cumulative grade-point average of 3.0., honors in the junior year, or consent of department; senior standing.

Business Administration

B. Joseph White, Interim Department Head
350 Wohlers Hall, 1206 South Sixth Street, Champaign
PH: (217) 333-4240
http://business.illinois.edu/ba

The Department of Business Administration offers five Undergraduate majors: Business Process Management, Information Systems and Information Technology, Management, Marketing and Supply Chain Management. All majors require completion of a minimum of twenty-seven credit hours within each major's content area.

In addition to the Business Administration majors' requirements, Business Administration students must also fulfill the Urbana-Champaign campus's General Education requirements and the College of Business's Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 96)).

**Double Majors Within the Department of Business Administration**

Only College of Business students with a declared Business Administration major may earn a second Business Administration major.

Business Students may earn only **two** Business Administration majors.

The Business Administration Majors:
- Business Process Management
- Information Systems and Information Technology
- Management- only **one** concentration can be selected: Entrepreneurship or General Management or International Business
- Marketing
- Supply Chain Management

Each Business Administration major requires nine courses. Students desiring to earn a second Business Administration major must fulfill the course requirements for both majors.

Some Business Administration (BADM) courses will fulfill requirements of both majors, but a second Business Administration major will add two to five additional BADM courses during a student's junior and senior years since each Business Administration major requires unique advanced coursework.

Students may earn only **one** Management Major Concentration.
- Business Process Management (p. 106)
- Information Systems and Information Technology (p. 106)
- Management (p. 107)
- Marketing (p. 108)
- Supply Chain Management (p. 108)

**Business Administration Courses**

BADM 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

BADM 205  Business Location Decisions  credit: 3 Hours.
Same as GEOG 205. See GEOG 205.
BADM 261 Technology & Mgmt Seminar credit: 1 Hour.
Current topics in technology and management presented by senior executives from a wide range of industries. Executives discuss challenges they confront and approaches taken in execution of their respective businesses. Format encourages dialogue and discussions between executives and students. Same as ENG 261. Credit is not given toward technical electives in the College of Engineering nor business electives in the College of Business, nor toward the T&M Minor.

BADM 300 The Legal Environment of Bus credit: 3 Hours.
Introduction to law and the legal system, tort law, products liability, agency law, introduction to business organizations, introduction to government regulation, securities regulation, antitrust law.

BADM 301 Summary of Business Law credit: 3 Hours.
Basic principles of the private law of business including the law of contracts, agency, and business organizations; a brief introduction to the law of sales, negotiable instruments, security devices, and property. Credit is not given for both BADM 301 and BADM 403. Course is not open to students in the College of Business.

BADM 303 Principles of Public Policy credit: 3 Hours.
Same as ACCY 321, ACE 321, and PS 321. See PS 321.

BADM 310 Mgmt and Organizational Beh credit: 3 Hours.
General analysis of management and organizational behavior from a systems point of view, including classical organizational theory and management, organizational behavior, and management science; environmental forces; planning, organizing, and control processes; motivation, incentives, leadership, communication, and interpersonal relations; and discussion of production and decision-making and mathematical models.

BADM 311 Individual Behavior in Orgs credit: 3 Hours.
Understanding the behavior of employees in work organizations; particular attention to the motivation of individuals to join and perform in organizations and to employee satisfaction with elements of the work environment; and emphasis on various management strategies to modify employee motivation and satisfaction. Prerequisite: BADM 310.

BADM 312 Org Design and Environment credit: 3 Hours.
Understanding of complex organizations; particular attention to ways of dividing work, achieving coordination, and issues connected with change and adaptation. Prerequisite: BADM 310.

BADM 313 Human Resource Management credit: 3 Hours.
Studies concepts and methods used by the staff personnel unit in building and maintaining an effective work force in an industrial organization; development of ability to design the personnel subsystem within the firm and to deal effectively with problems encountered in such areas as recruitment, selection, training, and wage and salary administration; and considerable emphasis on case analysis, role playing, and research. Credit is not given for both BADM 313 and PSYC 245. Prerequisite: BADM 310.

BADM 314 Leading Negotiations credit: 3 Hours.
Aims to advance students’ ability to negotiate formal and informal business agreements and resolve conflicts effectively. Because leaders depend on others to accomplish goals, leaders need to be skilled negotiators to generate solutions that are acceptable, valuable, and able to be implemented. Students will engage in a series of negotiations that provide practice and impart a framework for planning for, conducting, and analyzing negotiations. Restricted to College of Business students and Business Minor students. Restricted to students with Junior or Senior class standing.

BADM 320 Principles of Marketing credit: 3 Hours.
Emphasizes the concepts of planning, organization, control, and decision making as they are applied in the management of the marketing function. Provides an overview of aspects of the marketing discipline.

BADM 321 Principles of Retailing credit: 3 Hours.
Gives a general analysis of the structure of retailing emphasizing the retailing environment and operating efficiencies; includes patronage behavior, merchandise control, pricing, promotion, location, and vendor relations; and gives special attention to emerging trends in retailing. Prerequisite: BADM 320.

BADM 322 Marketing Research credit: 3 Hours.
Focuses on the techniques and methods of marketing research; emphasizes primarily survey research and experimental design; and offers students the opportunity to apply techniques to real-world situations. Prerequisite: BADM 320 and ECON 202.

BADM 323 Marketing Communications credit: 3 Hours.
Introduces the student to the topic of marketing communications and promotion management. Topics covered include: advertising, sales promotion, point-of-purchase communications, interactive marketing, and event sponsorships. Prerequisite: BADM 320.

BADM 324 Purchasing and Supply Mgmt credit: 3 Hours.
Examines the analysis, planning, and forms of organization that are associated with the buying functions in business. Major focus on the principal issues involved in the procurement of raw materials, components, equipment, operating supplies, and services. Also treats the unique aspects of institutional and government purchasing. Case problems constitute a major vehicle of instruction. Prerequisite: Credit or concurrent enrollment in BADM 320.

BADM 325 Consumer Behavior credit: 3 Hours.
Studies the factors affecting customer behavior in household and organizational markets and their relevance for marketing management planning and analysis; provides an overview of explanations of consumption differences anchored in socioeconomic, demographic, cultural, and psychological processes; and surveys buyer decision-making processes and their implications for marketing strategy. Prerequisite: BADM 320.

BADM 326 Pricing Policies credit: 3 Hours.
The role of pricing in contemporary marketing and major pricing decisions facing the firm; theoretical, economic, and practical methods and models for setting prices; pricing new products, initiating price changes, and responding to competitive pricing; the relationship of pricing objectives and strategies to the goals of the firm; and sealed bidding for contracts. Prerequisite: BADM 320.

BADM 327 Marketing to Business and Govt credit: 3 Hours.
Introduces the general area of industrial marketing; examines the nature of industrial markets especially as they compare to consumer markets and emphasizes such factors as the demand for industrial goods, marketing intelligence systems for industrial firms, marketing strategy in industrial markets, and analyses and control of industrial marketing programs; integrates important concepts from sales management and business logistics throughout the course; uses case studies. Prerequisite: BADM 320.
BADM 328 Business-to-Business Selling credit: 3 Hours. Introduces the use of persuasive personal communication in attracting and retaining customers. Uses experiential learning exercises to address principles and techniques of personal selling and the administration of the selling function as it relates to the development of marketing strategy and the achievement of corporate objectives. Prerequisite: Junior standing.

BADM 329 New Product Development credit: 3 Hours. Exposes student to business and marketing decisions in the context of new product development and marketing. Helps students learn how to use state-of-the-art management techniques to identify markets, develop new product ideas, measure customer benefits, and design profitable new products. Prerequisite: BADM 320.

BADM 332 Prod Dvlpmnt for Sub Mktplaces credit: 4 Hours. Focuses on sustainable product and market development for subsistence marketplaces; virtual immersion in subsistence contexts; emersion of principles for business, design and engineering; idea generation and evaluation by groups of business, engineering and design students; optional international field trip over winter break; option to enroll in a spring course on developing product prototype and business plan. Prerequisite: Application process. Junior or senior class standing.

BADM 333 Mktg Innov for Sub Mktplaces credit: 4 Hours. Sustainable Product Design and Marketing Plan Development: Project based course focusing on systematic approach for designing sustainable products and developing business plans that address the issues of economic, social and ecological sustainability; covers concept generation and evaluation, detailed design, cost modeling, testing and prototyping, and sustainable business plan development; also a continuing course for students enrolled in sustainable product and market development for subsistence marketplaces. Prerequisite: BADM 332 must be completed in previous fall semester. Junior or senior class standing.

BADM 335 Supply Chain Management Basics credit: 3 Hours. Course broadly exposes students to the basics of supply chain management. It concentrates on the basic concepts, terminology, techniques and tools in supply chain management. Introduces the main functions of supply chain management and its interface with marketing, finance, and information management. Studies the interactions among the logistics of manufacturing, inventory, and transportation. Students are introduced to mathematical modeling and computer simulations to optimize the performance of supply chains.

BADM 336 Modeling the Supply Chain credit: 3 Hours. Course introduces students to supply chain modeling. It covers optimization and simulation modeling, value stream mapping, and the SCOR model for representation of supply chains. Models for strategic and tactical decision-making in supply chain design and operations will be considered. Presents examples of supply chain modeling in practice and integration of supply chain models with other business functions. Prerequisite: BADM 335.

BADM 337 Practicum in Supply Chn Mgt credit: 3 Hours. This is the capstone course for the Supply Chain Management major. Students are required to work in teams to solve real-world supply chain management problems using the tools and techniques learned from their other classes. Students are required to present their progress and final reports to both the faculty and company sponsors. Also covers some basic elements of project management and a large case study.

BADM 340 Ethical Dilemmas of Business credit: 3 Hours. Examines business decision making and the role ethics plays in that process. Analysis of how managers behave and whether ethical choices are knowingly made or only realized thereafter. The object is to increase awareness of the moral dimension of business activity.

BADM 350 IT for Networked Organizations credit: 3 Hours. Examines the information technology and its impact on modern organizations. Topics include: (1) IT, Internet Technologies, E-Commerce and business models, (2) organizing and modeling enterprise data, (3) Network protocol and architecture, (4) development of IT systems, and (5) IT management and organization design.

BADM 351 E-Business Management credit: 3 Hours. Designed to provide current perspective about enterprise IT-applications and the management issues that such applications entail. Emphasis is on current developments that will be explored with lectures, case studies, and hands-on applications. The course builds on BADM 350. May be repeated in subsequent terms. Prerequisite: BADM 350.

BADM 352 Database Design and Management credit: 3 Hours. Introduce the modern concepts, techniques and management practices when dealing with data and use of data in organizations. Topics include data modeling, database logical and physical designs, implementation, database administration and web-based database environment. Students will be involved in constructing a database and researching an advanced topic to solidify the learning. Same as ACCY 352.

BADM 353 Info Sys Analysis and Design credit: 3 Hours. Methodologies and techniques used and deliverables created in developing large-scale information systems, including preliminary planning, feasibility analysis, design implementation, and post-implementation review of the system; a term-long project which familiarizes students with methodology and techniques is required. Same as ACCY 353. Prerequisite: BADM 350.

BADM 354 Mgmt of Data Communications credit: 3 Hours. Designed to provide current perspective about enterprise IT-applications and the management issues that such applications entail. Emphasis is on current developments that will be explored with lectures, case studies, and hands-on applications. The course builds on BADM 350. May be repeated in subsequent terms. Prerequisite: BADM 350.

BADM 355 Enterprise Software Management credit: 3 Hours. Almost every professional who works in a field related to Information Technology requires an understanding of how enterprise projects and IT projects, in general, should be managed. Provides fundamental managerial skills for students who will work on IT projects. Covers different kinds of enterprise software applications - Enterprise Resource Planning Systems, Customer Relationship management systems and supply chain management IT systems. Students will get hands-on understanding through a term project and project-management software. Discusses approaches to estimate and manage costs, schedules and resources. Students get an understanding of real-world challenges through case studies throughout the course. May be repeated in subsequent terms. Prerequisite: BADM 350.

BADM 365 New Product Marketing credit: 3 Hours. Exposes engineering students to the discipline of marketing and to business decision-making in the unique context of new product marketing decisions. Credit is not given for both BADM 365 and BADM 320.
BADM 366  Product Design and Development  credit: 3 Hours.
 Presents an overview of the product development process from concept
generation to design manufacturing and project management. There
is an emphasis on product definition, early concept development,
visual reasoning and engineering graphics. Students work in cross
disciplinary teams working through product development projects.
Same as TMGT 366. Prerequisite: Admission to the Technology and
Management Program.

BADM 367  Mgmt of Innov and Technology  credit: 3 Hours.
 Course is the first jointly taken course for the engineering and business
college undergraduates in the Technology and Management program.
It focuses on the strategic management of technology and innovation
in organizations. It builds primarily on broad models of technological
evolution and organizational change. Same as TMGT 367. Prerequisite:
Admission to the Technology and Management Program.

BADM 374  Management Decision Models  credit: 3 Hours.
 Introduction to methods of operations research from an executive or
managerial viewpoint, emphasizing formulation of business problems
in quantitative terms; industrial applications of linear programming,
dynamic programming, game theory, probability theory, queuing theory,
and inventory theory. Prerequisite: ECON 203.

BADM 375  Business Process Management  credit: 3 Hours.
 Explores methods of design and management of manufacturing and
service business processes; central concepts include managing process-
speed, capacity, inventory, and uncertainty; additional topics include
simultaneous product and process design, and an introduction to quality
management, process improvement and lean thinking.

BADM 376  Enterprise Proc Integr & Dynm  credit: 3 Hours.
 Enterprise-level study of a business that focuses on the integration and
management of many interrelated processes. The focus is on linkages
between these business processes and the management of these
linkages in a dynamic business environment. Prerequisite: BADM 375.

BADM 377  Project Management  credit: 3 Hours.
 In-depth treatment of management concepts, tools, and techniques that
apply to the organization, planning, and control of projects; particular
emphasis on analyzing needs, defining work, scheduling tasks, allocating
resources; assessing costs, managing risks; tracking and evaluating
performance; and building and leading teams.

BADM 378  Logistics Management  credit: 3 Hours.
 Treats the total flow of materials from their acquisition as basic or
unprocessed supplies to delivery of the finished product, as well as the
related counter-flows of information that both record and control material
movement. Major topics include forecasting material requirements;
transportation planning; order processing system; raw material, in-
process and finished goods inventory management; packaging; in plant
and field warehousing; location theory (space, time, and cost trade-offs);
communications; and control.

BADM 379  Business Process Improvement  credit: 3 Hours.
 The survival and growth of any organization requires the continuous
improvement of its processes. This course focuses on philosophies and
tools for enhancing customer-defined value created through processes.
Contemporary process improvement programs are emphasized along
with conventional ideas - topics include Statistical Quality Control, Value
Stream Mapping, Total Quality Management, and Six Sigma.

BADM 380  International Business  credit: 3 Hours.
 Introduces the field of international business and management.
Examines the economic, political, and legal environments of international
business. Analyzes differences in financial management, marketing, and
management practices for firms doing business abroad.

BADM 381  Multinational Management  credit: 3 Hours.
 Examines critical issues facing managers who work in multinational
firms. Designed to develop students' skills for working in a global
business environment. Topics include foreign market entry strategies,
global management of the functional areas of business, and
management and control of multinational firms in the global
marketplace.

BADM 382  International Marketing  credit: 3 Hours.
 Analyzes marketing strategy across national boundaries, the problems
of marketing within foreign countries, and the coordination of global
marketing programs. Includes problems faced by the exporter, licensor,
joint venture, and multinational firm. The full range of market activities
are discussed from a global perspective. Prerequisite: BADM 320.

BADM 394  Senior Research I  credit: 2 to 4 Hours.
 Research and readings course for students majoring in business
administration. May be taken by students in the college honors program
in partial fulfillment of the honors requirements. May be repeated in
the same or separate terms for unlimited undergraduate hours. Not
applicable to graduate or professional hours.

BADM 395  Senior Research II  credit: 1 to 4 Hours.
 Research and readings course for students majoring in business
administration. May be taken by students in the college honors program
in partial fulfillment of the honors requirements. Additional fees may
apply. See Class Schedule. May be repeated in the same or separate
term for unlimited undergraduate hours. Not applicable to graduate or
professional hours.

BADM 403  Principles of Business Law  credit: 4 Hours.
 Contracts, sales, debtor-creditor relations, negotiable instruments,
property, business organizations. 4 undergraduate hours. 4 graduate
hours.

BADM 420  Advanced Marketing Management  credit: 3 Hours.
 Integrative study of methods and models for marketing decision-making;
emphasizes the application of analytical tools and behavioral and
quantitative models to marketing decision-making. Uses lectures, case
studies and simulation exercises. 3 undergraduate hours. No graduate
credit. Prerequisite: BADM 320.

BADM 436  Intl Business Immersion  credit: 4 Hours.
 Same as ACE 436. See ACE 436.

BADM 438  Agri-food Strategic Management  credit: 3 Hours.
 Same as ACE 431. See ACE 431.

BADM 440  Business Applications of GIS  credit: 3 Hours.
 Same as GEOG 440. See GEOG 440.

BADM 445  Small Business Consulting  credit: 4 Hours.
 Through guided experience, students identify and offer advice to local
small business firms; exposes students, serving as consultants, to the
wide variety of problems facing the smaller firm as well as enables them
to apply current business methods to real problems. Students work in
teams. 4 undergraduate hours. 4 graduate hours. Credit is not given for
both BADM 445 and ENG 465.

Information listed in this catalog is current as of 03/2017
BADM 446  Entrepreneurship Sm Bus Form  credit: 4 Hours.
Studies entrepreneurship for those with a serious interest in owning their own business within five years of graduation; students prepare a comprehensive business plan for starting or acquiring such a business; also studies the problems of an existing small business. 4 undergraduate hours. 4 graduate hours.

BADM 447  Legal Strat for Entrepri Firm  credit: 4 Hours.
Addresses the legal and managerial strategies important to the emerging firm, with particular focus on defensive legal strategies in the context of entrepreneurship. From the entrepreneur’s perspective, examines the law of partnerships, sole proprietorships, corporations, joint ventures, agency, and defensive strategies to thwart takeovers. 4 undergraduate hours. 4 graduate hours.

BADM 449  Business Policy and Strategy  credit: 3 Hours.
Analysis of policy formulation and implementation from a company-wide standpoint; emphasis on integration of knowledge and approaches across functional areas; both endogeneous and exogeneous factors which affect company policies; and the role of the firm in society. 3 undergraduate hours. No graduate credit.

BADM 451  E-com Apps & Web-based Systems  credit: 3 or 4 Hours.
Provides students with technical skills for building web-based e-commerce applications using the Microsoft.NET framework as well as knowledge of web services. Topics include: ActiveServerPages.NET (ASP.NET), VisualBasic.NET (VB.NET), XML, web services, the Microsoft.NET framework. 3 undergraduate hours. 4 graduate hours. Prerequisite: BADM 350.

BADM 453  Decision Support Systems  credit: 3 Hours.
This advanced course examines recent developments in information technology for managerial decision support with an emphasis on Internet-based and mobile information technologies. Real-world cases will be used to discuss the application of these technologies to management information systems. 3 undergraduate hours. No graduate credit.

BADM 454  Enterprise Computing Mgmt  credit: 3 Hours.
Aims to prepare students with programming skills for building and managing enterprise applications. Java is used as the language for implementation. C and C++ are also introduced briefly. General principles of computing are emphasized over specific languages. 3 undergraduate hours. No graduate credit. Prerequisite: BADM 350.

BADM 455  IT Governance  credit: 3 or 4 Hours.
Provides students with a core body of knowledge concerning the state of development, research and business practice of IT governance on topics such as: managerial issues for the prevention of business frauds and threats; the key technology for IT governance for users and businesses; issues concerning integrity control, privacy, ethics, risk management, and reliability; best practices concerning regulatory compliance requirements; and enterprise information management issues, policies and practices. 3 undergraduate hours. 4 graduate hours. Prerequisite: BADM 350.

BADM 458  Business Process Modeling  credit: 3 Hours.
Introduces the identification and analysis of various aspects of business processes. The course defines business processes and provides tools for designing and analyzing them. Same as TMGT 460. 3 undergraduate hours. No graduate credit. Prerequisite: BADM 367.

BADM 461  Tech, Eng, & Mgt Final Project  credit: 2 Hours.
Course is the capstone interdisciplinary new product development project course for the Technology & Management Program. Students work in cross-functional teams (joint business and engineering teams) to solve new product development project problems provided by client firms. Because the client firms differ each year, so do the problems. Same as TMGT 461. 2 undergraduate hours. No graduate credit. May be repeated up to 4 hours. Prerequisite: BADM 366, BADM 367, BADM 460.

BUS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/BUS)

Business Courses

BUS 101  Business Prof Responsibility  credit: 2 Hours.
Introduces all College of Business students to professional responsibility in Business. Begins by developing the concept of professional responsibility within a personal and interpersonal context. Students will discover the meaning of professional responsibility in their career and in professional relationships. Continues by expanding the concept of professional responsibility to an ethical balance of the profit motive and corporate responsibility within the global context.

BUS 120  Business Honors Seminar  credit: 2 Hours.
Introduction to business and an overview of the role of the College of Business and the University of Illinois in providing opportunities for undergraduates to prepare to become business leaders. Introduction to the College of Business Honors Program, a leadership program for approximately 40 incoming freshmen in the College of Business. Students will begin to work as a team to use leadership in service to all undergraduates in the College of Business. Approved for both letter and S/U grading. Prerequisite: Membership in freshman class of College of Business Honors Program.

BUS 199  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

BUS 299  BUS Internship  credit: 0 Hours.
Accommodates students who must be registered for a course at the University while completing an internship, either because the internship is unpaid and the company requires registration, or because of visa requirements. Only internships in the College of Business will be considered. Approved for S/U grading only.

BUS 301  Principles Prof Responsibility  credit: 3 Hours.
Examines in depth a number of the multi-dimensional attributes required to advance understanding of professional responsibility in the context of an ever-changing business environment, focusing on principles for addressing dilemmas that regularly arise in professional life in the work of business. Examines connections between academic integrity while in school and professional responsibility in later work life. Builds on BUS 101 and provides a breadth and depth of that body of knowledge that will enable highly successful students in BUS 301 to be considered for the role of section leaders in BUS 101. Aspiring section leaders in BUS 101 must have excelled in BUS to be considered for the position. Prerequisite: BUS 101; by application and interview.
BUS 399 Business Study Abroad credit: 0 to 18 Hours.
Upon prior written approval of the College of Business' Office of Undergraduate Affairs, a student may earn up to 18 credit hours per term undertaking a study and/or research project in international business at accredited foreign institutions or approved overseas programs. Final determination of appropriate credit will be made upon completion of the work done abroad. While absent from the Urbana-Champaign campus, the student must continue to pay all fees required by the University of Illinois to retain continuity of enrollment and to allow the time spent away from this campus to count toward residency. Approved for both letter and S/U grading. Maximum of 18 hours per term and 36 hours total. Prerequisite: One academic year (or one semester in the case of transfer students) in residence at UIUC, good academic standing, completion of at least thirty semester hours toward the bachelor's degree, and prior approval of course work by the College of Business' Office of Undergraduate Affairs. Some programs have additional requirements.

**Major in Business Process Management**

**For the Degree of Bachelor of Science in Business Process Management**

The Business Process Management major develops concepts and skills for crafting innovative ways to deliver a firm's goods and services. It focuses upon the productive management of capital, human capital and information resources upon the process of value creation. The coursework devotes particular attention to the definition of business goals and the design of management policies and procedures for achieving those goals. Students majoring in Business Process Management typically will seek careers as operations or strategy consultants, supply chain analysts, quality management professionals, manufacturing or service operations managers, project managers or leaders within other mission-critical functions of an organization.

In addition to the Business Process Management major's requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 96)).

Requirements for the major are:

- **BADM 350** IT for Networked Organizations 3
- **BADM 374** Management Decision Models (Prerequisite: ECON 203) 3
- **BADM 375** Business Process Management 3
- **BADM 377** Project Management 3
- **BADM 378** Logistics Management 3
- **BADM 379** Business Process Improvement 3
- Select three of the following: 9-10
  - **BADM 311** Individual Behavior in Orgs (Prerequisite: BADM 310)
  - **BADM 312** Org Design and Environment (Prerequisite: BADM 310)
  - **BADM 324** Purchasing and Supply Mgmnt (Prerequisite: Credit or concurrent enrollment in BADM 320)
  - **BADM 329** New Product Development (Prerequisite: BADM 320)
  - **BADM 353** Info Sys Analysis and Design (Prerequisite: BADM 350)

**Total Hours** 27

1 One of these three course requirements may be satisfied by an appropriate internship, approved in advance by the Head of the Department of Business Administration or designee.

**Major in Information Systems and Information Technology**

**For the Degree of Bachelor of Science in Information Systems and Information Technology**

The Information Systems and Information Technology Major provides students the skills necessary to understand and manage information, information technology development, systems analysis, e-business management and electronic commerce.

In addition to the Information Systems and Information Technology Major requirements, Business Administration students must also fulfill the University’s General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 96)).

- **BADM 350** IT for Networked Organizations 3
- **BADM 352** Database Design and Management 3
- **BADM 353** Info Sys Analysis and Design (Prerequisite: BADM 350) 3
- Select two of the following: 6
  - **BADM 351** E-Business Management (Prerequisite: BADM 350)
  - **BADM 355** Enterprise Software Management (Prerequisite: BADM 350)
  - **BADM 435** Decision Support Systems (Prerequisite: BADM 350)
  - **BADM 458** IT Governance (Prerequisite: BADM 350)
- Select four of the following: 12-14
  - **BADM 311** Individual Behavior in Orgs (Prerequisite: BADM 310)
  - **BADM 312** Org Design and Environment (Prerequisite: BADM 310)
  - **BADM 322** Marketing Research (Prerequisite: BADM 320)
  - **BADM 324** Purchasing and Supply Mgmnt (Prerequisite: Credit or concurrent enrollment in BADM 320)
  - **BADM 374** Management Decision Models (Prerequisite: ECON 203)
  - **BADM 375** Business Process Management
  - **BADM 377** Project Management
  - **BADM 379** Business Process Improvement
  - **BADM 380** International Business
  - **BADM 445** Small Business Consulting
  - **BADM 446** Entrepreneurship Sm Bus Form

**Total Hours** 27

*Information listed in this catalog is current as of 03/2017*
Major in Management
For the Degree of Bachelor of Science in Management

The Management major is designed to prepare students to be leaders and innovators in analyzing and solving managerial problems that every organization faces in its day-to-day operations. To be effective, managers must be able to design organizations that can compete in complex and volatile business environments and to execute their strategies within these organizations. Effective managers also must be ethical leaders and competent decision-makers who formulate goals and long-term plans, build effective teams, and motivate their employees. Students majoring in Management have the option to select one concentration either in Entrepreneurship or General Management or International Business, depending on their career objectives.

The Entrepreneurship Concentration studies how business opportunities are identified and exploited to create wealth. This concentration is intended for students who are interested in new venture creation. Some graduates will work within existing organizations while others will create new organizations. The General Management Concentration is designed to educate and train future business leaders, decision makers and strategic thinkers to skillfully manage human capital in firms and organizations. The International Business Concentration is designed to provide students with the sound understanding of how International Business principles and the managerial issues faced by multinational companies. Students who select the International Business concentration will focus on political, cultural and institutional differences among nations by taking courses offered across the campus.

In addition to the Management major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the College of Business’s Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 96)).

### Major in Marketing

**For the Degree of Bachelor of Science in Marketing**

The Marketing Major studies those business activities directly related to the process of placing meaningful assortments of goods and services in the hands of the consumer. The Marketing Student is concerned with the efficient performance of marketing activities and with their effective coordination with the other operations of the firm.

In addition to the Marketing Major requirements, Business Administration students must also fulfill the University's General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the College of Business Undergraduate Section (p. 96)).

http://www.business.illinois.edu/finance

For the Degree of Bachelor of Science in Finance
The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate.

In addition to the finance major requirements, students in finance must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 96)). Minimum requirements in the major for the Bachelor of Science degree in Finance are:

For Students Admitted Prior to Fall 2016

Advising Notes

- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

The Finance Academy is an enrichment program for outstanding undergraduate Finance majors. A select program that focuses on developing future business leaders via enhanced academic and career opportunities. Students are normally invited to participate by the faculty during their junior year, when they are enrolled in FIN 300. If inducted, students participate throughout their junior and senior years. Approved for letter and S/U grading. May be repeated in separate terms. Course will not satisfy Finance major requirements. Prerequisite: FIN 300.

Information listed in this catalog is current as of 03/2017
FIN 391 Investment Banking Academy credit: 1 Hour.
A diversified curriculum designed to prepare students for a successful career in investment banking; course incorporates peer mentorship, guest lectures (from bankers, accountants, private equity associates and hedge fund analysts), a case competition and a field trip. Course will not satisfy Finance major requirements. May be repeated for a maximum of 6 hours in separate terms. Prerequisite: Admission by application only.

FIN 392 Investment Management Academy credit: 1 Hour.
Overview of security analysis with the objective of how to value an investment proposition for inclusion in a portfolio of securities managed by students in the class. Focus will be in areas of fundamental securities analysis with the emphasis on equity valuation. Course will not satisfy Finance major requirements. May be repeated to a maximum of 6 hours in separate terms. Prerequisite: Admission by application only. Primarily for Finance majors with sophomore standing or above who show interest in pursuing their CFA credential.

FIN 411 Investment & Portfolio Mgmt credit: 3 Hours.
Current theories of portfolio management are covered in considerable detail to provide a conceptual framework for the evaluation of investment strategies. Applications and implementation are covered in depth, including performance evaluation and international diversification. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300.

FIN 412 Options and Futures Markets credit: 3 Hours.
Introduction of options and futures markets for financial assets; examination of institutional aspects of the markets; theories of pricing; discussion of simple as well as complicated trading strategies (arbitrage, hedging and spread); applications for asset and risk management. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 413 Financial Engineering credit: 3 Hours.
This course will present and analyze modern tools for identification, measurement, and management of financial risk faced by corporations and institutional investors; in particular as related to the application of futures, forwards, options, swaps, and other derivatives. The focus will be evenly split between theoretical models and practical applications, and will include careful consideration of parameter estimation and numerical implementation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 414 Urban Economics credit: 3 or 4 Hours.
Same as ECON 414. See ECON 414.

FIN 415 Fixed Income Portfolios credit: 3 Hours.
Conceptual foundations and implementation of strategies for the selection, evaluation, and revision of portfolios of fixed-income financial assets (bonds). 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 418 Financial Modeling credit: 3 Hours.
The objective is to learn the fundamentals and practice building financial models using Microsoft Excel. By the end of the term, each student should be able to develop an understanding of any financial relationship and build that financial relationship into a model using the built-in functions of Excel. Financial modeling, by definition, requires significant work outside of the classroom. Models are introduced, demonstrated, and reviewed in class, but each student is expected to research and collect data, and to construct the models, prior to each week's class meeting. 3 undergraduate hours. 3 graduate hours. Prerequisite: FIN 300 and FIN 321, or consent of instructor.

FIN 419 Real Client Managed Portfolios credit: 3 Hours.
Applies academic topics on financial markets, security analysis/valuation and portfolio management to hands-on investment management. Students will form and review objectives, constraints, and investment policy as it relates to the client's money under management. They will purchase securities, monitor performance of the portfolio, and make recommendations for any adjustments to the holdings. They will be fully educated and responsible to the fiduciary and ethical standards of professional money management as guided by the CFA Institute. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 9 hours. Prerequisite: FIN 321 or consent of instructor.

FIN 422 Cases in Corporate Finance credit: 3 Hours.
Course totally devoted to the study of financial management cases, provides students a hands-on learning experience. The case work helps students to develop their analytical and interpretative skills in solving unstructured real world problems. The theoretical concepts and tools learned in the introductory finance courses provide the foundation for the case studies. Topics discussed include financial forecasting and working capital management; capital budgeting and cost of capital; and capital structure, dividend policy, corporate financing, financial restructuring, financial distress, mergers, acquisitions and firm valuation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 and FIN 321.

FIN 423 Financing Emerging Businesses credit: 3 or 4 Hours.
The study of the business environment, alternative methods of organization and financing, use of financial statements as a management tool, valuation methods and approaches to ethical dilemmas from the perspective of an owner-manager. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 300 or consent of instructor.

FIN 424 Mergers and Acquisition credit: 3 Hours.
Focuses on identifying ways to increase firm value through mergers and acquisitions (M&A) and corporate restructurings. Surveys the drivers of success (failure) in M&A transactions and develop your skills in the design and evaluation of transactions. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 425 Private Equity/venture Capital credit: 3 Hours.
Provides students with an understanding of the nature of the private equity market, the principal participants in this market, and how they function. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 431 Property-Liability Insurance credit: 3 or 4 Hours.
Examines in detail the functions of property-liability insurers, including marketing, underwriting, claims, ratemaking and administration, and the major current issues facing this industry. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 230.

FIN 432 Managing Fin Risk for Insurers credit: 3 or 4 Hours.
Introduces basic concepts in financial economics used in the analysis and management of financial risks, with an emphasis on the applications by insurers and pension plans; topics include decision making under uncertainty, economic statistics, deterministic and stochastic interest rate models, derivative securities, valuation, binomial models and option pricing models. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 300; either FIN 230 or FIN 232; MATH 409; MATH 415; electronic spreadsheet proficiency.

FIN 433 Corporate Risk Management credit: 3 or 4 Hours.
Case study course examining how corporations deal with pure risk. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 221, FIN 431, and FIN 434.
FIN 434  Employee Benefit Plans  credit: 3 Hours.  
Studies the purpose, structure, and financial aspects of employee benefit plans, including pensions, health insurance, life insurance, and disability plans. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 435  Personal Wealth Management  credit: 3 Hours.  
Studies personal wealth management techniques with an emphasis on life insurance products; covers life insurance policies, annuities, trusts, buy-sell arrangements, investing in stocks, bonds and mutual funds, banking and borrowing, purchasing residential and commercial real estate, income and estate taxation and management of personal financial portfolio. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300.

FIN 442  Urban Real Estate Valuation  credit: 3 Hours.  
The terminology, theory and techniques of real estate valuation (appraisal); a modern view of the three approaches to estimating value - sales comparison, cost and income. Special requirements include local field trips to appraise at least one single-family property and one income property. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of the instructor, FIN 241 is recommended but not required.

FIN 443  Legal Issues in Real Estate  credit: 3 or 4 Hours.  
Overview of legal concepts, issues, and principles involving real estate. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

FIN 444  Financial Institutions and Markets  credit: 3 Hours.  
The mechanics of financial statement analysis and ratio analysis; development of investment banking/corporate finance valuation models (including DCF, leveraged buyout and merger models) in order to determine the intrinsic value of companies and price investment banking deals. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 (FIN 300 is waived if student is admitted to FIN 391 IBA). Priority to finance majors.

FIN 445  Real Estate Investment  credit: 3 Hours.  
An approach to the evaluation of real estate investment opportunities. Begins with the identification of the investor's goals and ends with an investment decision. Considers legal, physical, locational, and financial constraint, aggregate real estate and financial markets, tax considerations and investment criteria. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of the instructor, FIN 241 is recommended but not required.

FIN 446  Real Estate Development  credit: 3 or 4 Hours.  
Provides students with an exposure to the real world of real estate through a series of lectures by real estate professionals focused primarily on retail real estate development. A side benefit of the class will be to provide graduating seniors some insights into different career paths to help improve the career choices that they make. 3 undergraduate hours. 4 graduate hours. Prerequisite: FIN 221 or FIN 241.

FIN 447  Employee Benefit Plans  credit: 3 or 4 Hours.  
This course covers the three major international financial markets; the foreign exchange market, the eurocurrency market, and the international equity and bond market. The course looks at international financial decisions including operations, structure and valuation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 and FIN 321.

FIN 448  Financial Intermediaries  credit: 3 Hours.  
Financial intermediaries survey of the structure, functions, regulation, and risk management activities of financial intermediaries; central banking and monetary policy effects on financial intermediaries. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 451  International Financial Markets  credit: 3 Hours.  
The mechanics of financial statement analysis and ratio analysis; development of investment banking/corporate finance valuation models (including DCF, leveraged buyout and merger models) in order to determine the intrinsic value of companies and price investment banking deals. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 (FIN 300 is waived if student is admitted to FIN 391 IBA). Priority to finance majors.

FIN 452  Investment Management  credit: 3 or 4 Hours.  
Students learn the fundamental equity research process including valuation and market and industry analysis. Students then select their own multi-asset portfolios using an online trading simulation software program. The course pays special attention to risk management. Ultimately, students implement hedging strategies based on real returns over the course of the semester. 3 undergraduate hours. 4 graduate hours. Prerequisite: FIN 300. Priority given to finance majors.

FIN 453  Investment Banking  credit: 3 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 454  Real Estate Financial Markets  credit: 3 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 455  Real Estate Financial Markets  credit: 3 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 456  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 457  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 458  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 459  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 460  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 461  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 462  Real Estate Development  credit: 3 or 4 Hours.  
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.
exceptions will be made only for the Prerequisite courses fulfilled by Advanced Placement credits, Dual Degree credits, Advanced Level credits and International Baccalaureate credits. Students are admitted by application into the Business Minor Program. Admission Applications are accepted in 350 Wohlers Hall, January 1st - 31st.

Admission Requirements:

1. Applicants must complete at least 36 credit hours prior to the January Application period to become eligible for admission review.
2. Applicants must complete all four Prerequisite courses prior to the January Application period to become eligible for admission review. Please refer to the Business Minor Program's website (http://go.illinois.edu/busminor) for additional admission and academic information as well as the approved on-campus substitutionary Prerequisite courses.

All applicants must have Academic Good Standing status (2.00 Cumulative GPA or higher). In addition, a Cumulative 2.50 GPA or higher is required from the four Prerequisite courses. Application is made by submitting the Statement of Intent to Pursue a Campus-Approved Minor (http://provost.illinois.edu/educational-innovation/advising-resources/pursuing-undergraduate-minor) into 350 Wohlers Hall. Admission Applications will be reviewed by the College of Business in February and all applicants will be notified of a decision by mid-February.

Only those students officially admitted into the Business Minor Program by the College of Business may earn the Business Minor.

Business Minor students should enroll into Summer Session and Winter Term Business Minor courses to ensure their completions of the Business Minor requirements before their graduations.

Technology and Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management for students in the College of Business is outlined below.

Throughout the program, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, eBay, John Deere, Motorola Solutions, and Walmart.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for
example, professional branding, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student’s academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website (http://www.techmgmt.uiuc.edu) or contact the Technology & Management Program Office (1055 Business Instructional Facility, (217)244-5752, tech-mgmt@illinois.edu).

http://education.illinois.edu

The College of Education at the University of Illinois at Urbana-Champaign offers undergraduate degree programs in the majors of Early Childhood Education, Elementary Education, Middle Grades Education, Special Education and a minor in Secondary Education, all of which include teaching licensure. The College of Education also offers a non-licensure undergraduate degree in the major of Learning and Education Studies.

A distinguishing hallmark of the College of Education is the commitment to diversity. Faculty members engage in research, teaching, and service activities developed to ensure that all children, including those who are racially, ethnically, linguistically, and economically different as well as people with different abilities and disabilities, are provided with educational opportunities.

The Early Childhood Education degree program prepares students for recommendation for Illinois Early Childhood licensure (birth through grade three). The program also incorporates course work leading to an Early Childhood Special Education approval. The Elementary Education program prepares students for recommendation for Illinois licensure (grades one through six). The Middle Grades Education program prepares students for recommendation for Illinois licensure for grades five through eight in one or more areas of concentration from Math, Social Science, Science, or Literacy. The concentrations align with the Illinois State Board of Education areas of endorsement. The teacher education minor in Secondary Education is a component of the teaching option within the following majors in the College of Liberal Arts and Sciences: Biology, Chemistry, English, Geology, History, Mathematics, and Physics. Students who satisfactorily complete an LAS degree in one of these areas and the teacher education minor in secondary education are eligible for the University’s recommendation for Illinois licensure in grades nine through twelve. For additional information regarding Liberal Arts and Sciences requirements, see the College of Liberal Arts and Sciences (p. 302).

The Special Education major offers an undergraduate field-based professional preparation program designed to prepare teacher candidates to work with individuals with varying disabilities including: learning disabilities, social or emotional disorders, cognitive disabilities, physical disabilities and other health impairments, autism and traumatic brain injury. Candidates who successfully complete the degree program are eligible for the University’s recommendation for Illinois licensure to teach students with disabilities from pre-K through 21 in a range of settings.

The Learning and Education Studies degree program is a non-licensure major with concentrations in Applied Learning Science, Educational Equality and Cultural Understanding, Workplace Training and Development, and Digital Environments for Learning, Teaching and Agency. The curriculum prepares students for a broad range of positions requiring expertise in formal and non-formal learning and education. Examples include training and program development, international schools, and other education-related positions in agencies, business, and government.

Requirements

Admission

Admission to the College of Education at any level (freshmen, off campus and on-campus applicants) is competitive. Freshman and off-campus transfer application information is available on the Office of Undergraduate Admissions website (https://www.admissions.illinois.edu/apply). Information for on-campus applications can be found on the College of Education website (http://education.illinois.edu/programs/information-for/ui-students-applying-to-the-major).

General Education

In order to meet the University’s current requirements in general education, each candidate for a degree from the College of Education must complete the campus general education requirements and the Language other than English through the third level. In most teacher education curricula, specific coursework within the general education areas must be taken. Also, in some teacher education curricula, additional credit in the general education areas is required. For more information on required general education coursework, contact a College of Education academic adviser. Students must select their courses for general education from the campus general education course list (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).
Graduation
Undergraduate students in the College of Education must meet the University requirements for graduation. For those in a major leading to licensure, the requirements of the Council on Teacher Education (http://cote.illinois.edu) for licensure must also be met. Students in all curricula must meet the course and academic credit requirements of their curricula with satisfactory scholastic averages. Student teaching is required of all undergraduates in a licensure major and must be completed through the University of Illinois at Urbana-Champaign.

Students in need of additional information concerning regulations and degree requirements of the College of Education should consult their academic advisers or the Assistant Dean for Academic Affairs in the College of Education, University of Illinois at Urbana-Champaign, 142 Education Building, 1310 South Sixth Street, Champaign, IL 61820.

Special Programs
Honors at Graduation
Eligibility for graduation with honors is established after all grades are recorded following a student’s final semester. A student who achieves the required scholastic average in all work presented for graduation (excluding credit for courses not included in the computation of the grade point average) may be recommended for honors as follows: honors, minimum cumulative grade point average of 3.75; high honors, minimum cumulative grade point average of 3.85; highest honors, minimum cumulative grade point average of 3.90.

Edmund J. James Scholars
The James Scholar program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. As a James Scholar, students are entitled to certain academic privileges, including priority assignment of registration time, access to the "stacks" in the library, and official recognition on the University of Illinois transcript.

Entering freshmen are invited to participate for the upcoming fall semester based on the Office of Undergraduate Admissions standard that combines factors such as standardized test scores and high school GPA. Transfer and continuing students must have achieved at least a 3.5 cumulative and University of Illinois grade point average to participate.

Students are certified as James Scholars by the college on a yearly basis. To qualify for this certification, the student must successfully complete a James Scholar project/requirement in the fall and spring semester and maintain a 3.5 University of Illinois and cumulative grade point average.

Details are available on the college website (http://education.illinois.edu/current-students/undergraduate/james-scholars).

For the Degree of Bachelor of Science in Early Childhood Education
Curriculum Preparatory to Early Childhood School Teaching
This program prepares student candidates to teach birth to grade 2. A minimum of 120 semester hours of credit is necessary for graduation.

Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher preparation program pass the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (http://www.icts.nesinc.com) prior to admission. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (http://education.illinois.edu/students/prospective-students/ACT). (http://education.illinois.edu/students/prospective-students/ACT)

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This is a Gateways to Opportunity (http://www.ilgateways.com/en) approved program.

Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Degree Requirements

Total Hours 120

TOTAL minimum hours include general education and professional education credits. 5

1 Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2 Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.
3 Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.
4 ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.
5 The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.
6 PYSC 100 is a prerequisite for EPSY 201.
7 Students will register for EDPR 250 during their spring term of the year one professional education sequence year for zero credit hours and register for EDPR 250 again their fall term of the year two professional education sequence for four credit hours.

EDUC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EDUC)

Courses
EDUC 101 Education Orientation Seminar credit: 1 Hour.
Informational orientation seminar for Education majors to enhance their understanding of college life and the field of education as a profession.

EDUC 102 Freshman Honors Seminar credit: 1 Hour.
Provides an introduction to critical issues in education with focus on selected contemporary issues in the field; emphasis is on critical analysis and reflection on relationships between teachers, schools, and society.

EDUC 201 Identity and Difference in Edu credit: 3 Hours.
Focuses on the role of identity in schooling and the way in which identity is socially constructed. Examine how power and privilege impact equity and opportunities based on socially constructed identities such as race, social class, gender, sexual identity, language, (dis)ability, and nationalism. Explore asset-based frameworks that are identity affirming and counter deficit-based perspectives. This course is designed for students interested in reflecting on their own experiences as learners by critically examining their socially constructed identities and “ways of knowing” and the societal implications of these experiences. It is also for those considering careers in teaching, and anyone interested in reflecting on how issues of inclusion, exclusion, power, and privilege play out in education. (Graduate candidates may take this course or approved graduate-level College of Education Educational Policy Studies Foundations Requirement course; undergraduates may take this or program-approved equivalent coursework).

This course satisfies the General Education Criteria for: UIUC: US Minority Culture(s)
EDUC 202  Social Justice Sch & Society  credit: 3 Hours.  
Examines the nature of justice and the dynamics of a pluralistic society to derive a conception of social justice. Working with this conception, it asks how schools function to perpetuate and/or remediate social injustice. The course will consider the history and nature of schooling, issues of access and tracking, and notions of the public and the common. The course is designed for students interested in reflecting on their own educational histories, for those considering careers in teaching, and for all future parents and citizens needing to be able to reflect critically on justice, school, and society. (Graduate candidates may take this course or approved graduate-level College of Education Educational Policy Studies Foundation Requirement course; undergraduates may take this or program-approved equivalent coursework). 
This course satisfies the General Education Criteria for:  
UIUC: Advanced Composition  
UIUC: HistPhilosoph Perspect

Learning and Education Studies
http://education.illinois.edu/

Assistant Dean for Academic Affairs: Kathy Ryan  
Admissions Information:  saao@education.illinois.edu
142 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

For the Degree of Bachelor of Science in Learning and Education Studies

This curriculum prepares individuals for positions requiring expertise in formal and non-formal learning and educational settings that do NOT require licensure (becoming a licensed teacher). Students interested in becoming a licensed teacher should consider the licensure program in the majors of Elementary Education, Early Childhood Education, Special Education, or Middle Grades.

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations: 1) Applied Learning Science; 2) Educational Equality and Cultural Understanding; 3) Workplace Training and Development; or 4) Digital Environments for Learning, Teaching and Agency.

Degree Requirements

Orientation Seminar
EDUC 101  Education Orientation Seminar  1

The following degree requirements also meet general education course requirements and must be selected from the campus general education (https://courses.illinois.edu) course list. Selections of core requirements courses should be made in consultation with the adviser.

Composition  1
Composition I  3-4  
Advanced Composition  3-4
Quantitative Reasoning  1

EPSY 280  Elements of Statistics (or another approved basic course in statistical methods such as STAT 100, SOC 280, or PSYC 235)  3-4

From approved campus list  3

Natural Sciences and Technology  1
From approved campus list  6

Humanities and the Arts  1
From approved campus list  6

Social and Behavioral Sciences  1
From approved campus list (must include PSYC 100)  6

Cultural Studies  1
From Western Culture(s) approved campus list  3
From U.S. Minority Culture(s) or Non-Western Culture(s) approved campus list  3

Language other than English
Three years of one language other than English in high school or completion of the third semester of college-level language

Core Requirements  3
Choose 2 from the following:  6-7
SPED 117  The Culture of Disability
EPS 201  Foundations of Education  
or EPS 202  Foundations of Education-ACP
EPSY 236  Child Dev in Education

Choose 6 from the following, with at least 2 in each area:  18-20
Teaching and Learning:
CI 260  Serving Child in Schools/Comm
CI 415  Lang Varieties,Cult,& Learning
EPSY 401  Child Language and Education
EOL 440  Prof Issues for Teachers
EPSY 201  Educational Psychology
EPSY 400  Psyc of Learning in Education

Leadership in a Diverse Global Economy:
EPS 310  Race and Cultural Diversity
EPS 402  Asian American Education  4
EPS 405  Historical & Social Barriers
HRD 415  Diversity in the Workplace

Concentration  3
Students must complete 24 credit hours within one of the following areas of concentration: 1) Applied Learning Science, 2) Educational Equality and Cultural Understanding, 3) Workplace Training and Development, or 4) Digital Environments for Learning, Teaching and Agency.

Electives
Electives (including minor, if taken)  16-34
Total Hours  120

Total minimum hours include general education, language other than English, concentration and core credits.

1 General Education Requirement. Courses must be selected from the Campus General Education Approved Course List (https://courses.illinois.edu).
2 EPSY 280 is recommended for the AppLeS concentration.
Information listed in this catalog is current as of 03/2017

Applied Learning Science (AppLeS) Concentration

The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University), as well as in education, psychology, business, law, and other more traditional areas of study. In addition, their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

Educational Equality and Cultural Understanding Concentration

This undergraduate non-licensure concentration will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Understanding how education as an institution operates to perpetuate social and economic stratification will give students a perspective on the challenges of creating a more equitable distribution of education. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory. Students will understand the contemporary and historical barriers to the distribution of education and examine recent human rights-based demands for extending education to people of all social classes, regions, ethnicity, language groups, and genders.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediate classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to international and domestic students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested
minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women’s Studies, or LGBT/Queer Studies.

The following courses are required for this concentration. Changes/ additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

Total Hours 24

1 Course can be counted in the Core requirement or the Concentration requirement but not both.

Workplace Training and Development Concentration

Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees.

An internship is recommended during the program, but it is not required. For internship credit, students can register in HRD 491 Professional Skill Development before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Workplace Training and Development departmental contact.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;
- Individuals who wish to work in the business and industry outreach departments of community colleges;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

The following courses are required for this concentration. Changes/ additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

Digital Environments for Learning, Teaching and Agency (DELTVA) Concentration

The undergraduate non-licensure concentration in Digital Environments for Learning, Teaching, and Agency (DELTVA) will provide students with a strong background in the design, development and implementation of technology for a range of learning environments. Courses will introduce students to learning theory, designing and using technology to support learning, and issues encountered when deploying technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

Graduating students will be prepared to engage with various stakeholders interested in using technology to support learning in a range of different contexts. Examples include selecting and deploying appropriate technology to support pedagogic goals for schools, corporations, or informal learning environments such as museums and afterschool clubs, designing educational games or toys and educational application development. One of the main objectives for students in DELTVA is to build new ways to support learning, and prepare them for leadership roles in formal and informal environments, technology design and implementation strategies. They will also be prepared to pursue graduate study in a range of programs, such as educational technology, learning

Information listed in this catalog is current as of 03/2017
sciences, or instructional technology at the University of Illinois or elsewhere.

Students are encouraged to pursue a relevant minor or coherent set of electives from several related departments. Suggested minors include: computer science, communication, psychology, informatics, media and cinema studies or sociology. Students may also consider a minor in a specific content area from the arts and sciences to develop expertise in a particular field.

The DELTA concentration consists of 24 hours of course work. Students are required to take a minimum of two foundations courses, three core courses and three elective courses. The core courses are designed to ensure students leave the program with foundational knowledge and skills necessary to design, develop, implement, manage, and evaluate digital environments. The elective courses allow students to tailor the concentration to fit individual career goals and areas of interest. Students should take the foundation course Introduction to Digital Environments in the first semester they join DELTA. Similarly, the Capstone Research Project should be taken in the last semester after the majority of DELTA-related course work is complete.

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office. Approvals related course work is complete.

*Information listed in this catalog is current as of 03/2017*

---

**For the Degree of Bachelor of Science in Middle Grades Education**

This program prepares teachers for grades five through eight. A minimum of 120 semester hours is necessary for graduation.

Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher preparation program pass the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (http://www.icts.nesinc.com) prior to admission. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (http://education.illinois.edu/students/prospective-students/ACT). (http://education.illinois.edu/students/prospective-students/ACT)

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

Students are admitted to Middle Grades Education as freshmen. In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional grade point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. Per State rule, courses with a grade of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. For teacher education licensure applicable to all curricula, see the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Students in the Middle Grades Education licensure program must complete the Campus General Education Requirements, the courses for one or more concentration (literacy, social sciences, science or math) and the professional education coursework.

**Degree Requirements**

**Orientation Seminar**
EDUC 101 Education Orientation Seminar

Note: Only CI 402, M (3 hours) counts toward ISBE content

MATH 117  Elementary Mathematics  4
Theory of Numbers: Select one from the following:  3-4
MATH 103  Theory of Arithmetic
MATH 453  Elementary Theory of Numbers

Geometry: Select one from the following:  3-4
MATH 119  Ideas in Geometry
MATH 402  Non Euclidean Geometry
MATH 403  Euclidean Geometry

Statistics: Select one from the following:  3-4
STAT 100  Statistics
STAT 200  Statistical Analysis
STAT 400  Statistics and Probability I
STAT 410  Statistics and Probability II

Calculus: Select one from the following:  4-5

Total: At least one course in the math content categories must be taken for more than the minimum hours to reach the ISBE requirement of 24 content hours.

Special Education
http://education.illinois.edu/SPED

For the Degree of Bachelor of Science in Special Education
Curriculum Preparatory for Learning and Behavior Specialist I in Special Education

This program is designed to prepare special education teachers for students ages 3-21. An applicant must have a cumulative grade point average of at least 2.5 (A = 4.0), a minimum of 50 hours of prior experience with individuals with disabilities, and sophomore or higher standing upon enrollment in the program. A minimum of 125 semester hours is required.
hours of credit is required for graduation. To proceed to the five semester professional education sequence, students must have completed all degree requirements outside of the professional education coursework.

Council on Teacher Education policy requires all candidates for admission to a teacher education program pass an Illinois approved test of basic skills. Approved tests consist of the Illinois Test of Academic Proficiency (http://www.icts.nesinc.com) (TAP), ACT, or SAT with approved scores. Previously passed Illinois Test of Basic Skills (096, 300, or 400) may also be used to meet this requirement. See information on the details. (http://cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf)

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade-point averages of 2.5 (A = 4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

**Degree Requirements**

**Orientation Seminar**

EDUC 101  Education Orientation Seminar  1

**Composition**

Composition I  4-6

Advanced composition. Students are encouraged to select a course that will also meet a requirement in another general education area.

**Language other than English**

Three years of one language other than English in high school or completion of the third semester of college-level language  0-12

**Humanities/Arts**

SPED 117  The Culture of Disability  3

**Cultural Studies**

One Western/Comparative Culture(s)  0-8

One Non-Western/US Minority Culture(s)  0-8

**Natural Sciences and Technology**

Life and/or Physical Sciences  6

**Social/Behavioral Sciences**

Select one of the following:

- PSYC 100  Intro Psych  4
- PSYC 103  Intro Experimental Psych
- PSYC 105  Psych Introduction
- KIN 262  Motor Develop, Growth & Form  3

**Quantitative Reasoning**

Quantitative Reasoning I (MATH 103 is recommended)  3-4

Quantitative Reasoning II  3

**Electives**

Elective courses (if needed to complete the 125 hour graduate requirement)  0-8

**Professional Education Requirements**

EDUC 201  Identity and Difference in Edu & EDUC 202 and Social Justice Sch & Society  6

Select one of the following:

- PSYC 216  Child Psych  3
- EPSY 201  Educational Psychology
- HDFS 105  Intro to Human Development
- or other approved course

- SHS 320  Development of Spoken Language  3

SPED 448  Curriculum Development III  4

SPED 461  AAC and Literacy  3

SPED 470  Learning Environments I  3

SPED 471  Learning Environments II  3

**Total Hours**  125

TOTAL minimum hours include general education and professional education credits.

1. Applicants may contact the Department of Special Education for further information on the prior experience requirement.
2. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
3. General Education Requirement: Courses must be selected from the Campus General Education Approved Course List.
4. The total hours required for the degree may be higher for students who do not complete the language other than English requirement in high school.

SPED Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SPED)

Information listed in this catalog is current as of 03/2017
Courses

SPED 117  The Culture of Disability  credit: 3 Hours.
The purpose of this course is to provide an introduction to the culture of disability across the lifespan. The impact of disabilities on an individual across the lifespan will be explored, and the unique culture that is created by having a disability will be addressed. The historical basis for the disability movement and special education will be addressed, including legislation and litigation that has had a significant impact on the field. Students also will learn about the characteristics of individuals with diverse abilities as well as current trends in educational services. This course satisfies the General Education Criteria for: UIUC: HistPhilosoph Perspect

SPED 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated.

SPED 312  Introduction to Educational Technology  credit: 2 or 3 Hours.
This course provides preservice teachers with the foundation for growth in technology integration through professional preparation, student teaching, and licensure. Major areas covered include the use of productivity tools, effective integration of the internet, and enhancing instruction through the use of multimedia. Additional topics include learning theories, professional development, evaluation, and technology use across multiple disciplines. Special equipment needed includes a USB-Flash Drive and SCD-R disks.

SPED 317  Characteristics & Eligibility  credit: 3 Hours.
The purpose of this course is to provide an introduction to issues associated with the identification and characteristics of students with disabilities, eligibility for special education, and placement to meet students' educational needs. Prerequisite: SPED 117 and admission into the teacher education program in special education.

SPED 322  Intro Intellectual Disability  credit: 3 Hours.
Study of the history and current status of the social, emotional, physical, and learning characteristics and problems of persons with an intellectual disability; identification and diagnosis; available services and provisions; and educational programs and lifelong processes of adaptation for these individuals and their families. Same as PSYC 322 and REHB 322. Prerequisite: PSYC 100 or SPED 117; or equivalent.
This course satisfies the General Education Criteria for: UIUC: Behavioral Sciences

SPED 391  thesis  credit: 2 Hours.
Prerequisite: Senior standing.

SPED 395  Independent Study  credit: 2 Hours.
Study of problems not considered in other courses; designed for students who excel in self-direction and intellectual curiosity. Prerequisite: Upperclassman; upper five percent of class in grade-point average; demonstrated writing competence, research potential, scholarly attitude, and interest as attested to by instructors; consent of adviser and staff member who supervises the work.

SPED 405  Gen Educator's Role in SPED  credit: 3 Hours.
Examination of issues in educating students with special needs: service delivery models, roles of teachers and related service providers, student assessment, curriculum individualization, instructional strategies, management of problem behaviors, and program evaluation. 3 undergraduate hours. 3 graduate hours. Prerequisite: Must be registered in teacher licensure program.

SPED 413  New Media & Learner Differences  credit: 4 Hours.
An investigation of the dimensions of learner diversity: material (class, locale), corporeal (age, race, sex and sexuality, and physical and mental characteristics) and symbolic (culture, language, gender, family, affinity and persona). Examines social-cultural theories of difference, as well as considering alternative responses to these differences in educational settings - ranging from broad, institutional responses to specific pedagogical responses within classes of students. No undergraduate credit. 4 graduate hours. Prerequisite: Acceptance into the Master of Education with an emphasis on New Learning and New Literacies program.

SPED 414  Assessment in ECSE  credit: 3 Hours.
Practice in designing and applying assessment devices and procedures and in using them to make educational decisions for children with special needs, birth through kindergarten age. 3 undergraduate hours. No graduate credit. Prerequisite: Credit or concurrent registration in SPED 524 or consent of instructor.

SPED 416  Perspectives on Gifted Edu  credit: 3 or 4 Hours.
Consideration of persons in society exhibiting gifted behavior; who they are, their physical, psychological, social, and educational characteristics, and society's needs and provisions for them. The major portion of the course is devoted to the consideration and evaluation of instructional and administrative adjustments that should be made for the gifted in the educational structure. 3 undergraduate hours. 3 or 4 graduate hours.

SPED 424  Foundations of Assessment  credit: 3 Hours.
Course focuses on the theoretical and practical considerations in the psychological and educational assessment of individuals with disabilities. An emphasis will be placed on understanding the technical and practical aspects of current assessment procedures and their application to the education of children and youth with disabilities. 3 undergraduate hours. 3 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 426  Collaboration and Teaming  credit: 3 or 4 Hours.
Course is designed to provide participants with the information needed for effective collaboration and interactive teaming. Participants will learn effective models of collaboration and consultation, team member roles and responsibilities, collaborative practices for participating on teams, and strategies for securing appropriate resources for students with disabilities. Emphasis is placed on skills necessary for working collaboratively with parents, teachers, and other service providers. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Requires concurrent enrollment in SPED 524 or EDPR 420, or consent of instructor.

SPED 431  Assistive Tech & Phys Disab  credit: 2 Hours.
Course focuses on specialized health care needs, policies, and procedures for working with students with disabilities. An overview is provided of methods for accommodating students including task or environmental modifications, assistive technology, and adaptive equipment options. 2 undergraduate hours. 2 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 432  Multiple Disabilities  credit: 3 Hours.
Focuses upon the physical and educational characteristics of individuals with multiple disabilities, particularly those with physical disabilities and other health and sensory impairments; covers educational curricula, teaching methods, and other educational considerations such as working with parents, medical personnel, and support staff, and educational adaptations. 3 undergraduate hours. 3 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

Information listed in this catalog is current as of 03/2017
SPED 435  Behavior Analysis in SPED  credit: 3 Hours. 
Remediation of behavior problems of exceptional students and adults using applied behavior analysis techniques; includes defining, observing, recording, charting, and evaluating behavior change and application of behavioral procedures to remediate behavior problems in the classroom. 3 undergraduate hours. 3 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 436  Systematic Instruction in SPED  credit: 4 Hours. 
Elements of data-based instruction emphasizing educational planning for individuals with special needs; includes task and developmental analysis, writing instructional programs, and individualization of instruction. Covers infancy to young adults; mild to severe disabilities. 4 undergraduate hours. 4 graduate hours. Prerequisite: Credit or concurrent registration in SPED 435, or consent of instructor.

SPED 437  Curriculum for Severe Disab  credit: 4 Hours. 
Curriculum design, development, and adaptation for students with moderate and severe disabilities; includes the following basic curriculum areas: domestic/home living, self-care, socialization, community living, leisure and recreation, and functional academics; a focus is on providing instruction in these areas in inclusive educational settings; and an emphasis throughout the course is on the evaluation of curriculum and program effectiveness. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 436.

SPED 438  Collaborating with Families  credit: 3 or 4 Hours. 
The impact of children with special needs on their families; models for the study of family systems are applied to understanding families of children with special needs; emphasis on planning family-focused interventions and exploring strategies for working with parents in a variety of settings. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Practicum experience or consent of instructor.

SPED 440  Instructional Strategies I  credit: 4 Hours. 
Course is designed to provide participants with information on effective instructional practices for working with students with disabilities. Participants are provided with information on generic strategies and principles of learning, instructional formats and strategies for informal assessment. Throughout this course emphasis is placed on methods and strategies for instructing individuals and groups of students. Important consideration is given to legal and ethical issues and an understanding of diverse needs in instructional design and delivery. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 317 and SPED 517 or consent of instructor.

SPED 441  Instructional Strategies II  credit: 4 Hours. 
Course focuses the design of instruction based on diverse student characteristics, student performance data, curriculum goals, and the community context. Emphasis is placed on application of techniques and strategies to facilitate learning and on evaluating assessment information to modify methods, materials, or environments to enhance student success. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 440 and concurrent enrollment in SPED 524 or EDPR 250, or consent of instructor.

SPED 444  Career Development and Transition  credit: 1 or 3 Hours. 
Course focuses on developing transition plans and activities that prepare students with disabilities for adulthood, including post school employment, independent living, and postsecondary education. Particular emphasis is placed on career development including determining job interests, career exploration, work experiences prior to graduation, job development, and job placement. 1 or 3 undergraduate hours. 1 or 3 graduate hours. Prerequisite: Admission to the Department of Special Education, or consent of instructor.

SPED 446  Curriculum Development I  credit: 4 Hours. 
Principles and practices for teaching students with disabilities. Topics include models of curriculum development, procedures for identifying curriculum priorities across content areas, and relationships between curriculum and instructional settings. Emphasis is on development of inclusive educational programs that are outcome-driven and on evaluation of program effectiveness. 4 undergraduate hours. 4 graduate hours. Prerequisite: Admission to the Department of Special Education, or consent of instructor.

SPED 447  Curriculum Development II  credit: 4 Hours. 
Course focus is on ensuring access for students with disabilities to the general education curriculum in English language arts, mathematics, science and social studies by considering the interaction among content area knowledge, pedagogical knowledge, and evidence-based practice. Construction of curriculum in academic content areas with a scope and sequence tailored to individual student's characteristics in an area of emphasis. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 446 and admission to the Department of Special Education, or consent of instructor.

SPED 448  Curriculum Development III  credit: 4 Hours. 
Review and application of curriculum development and adaptation principles and strategies to life skill domain areas. Curriculum areas addressed include domestic/home-living, leisure and recreation, community living, and vocational programs and job preparation. Emphasis on designing instruction to address life skill curriculum needs in inclusive educational programs and on critically evaluating curriculum and program effectiveness. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 446 and admission to the Department of Special Education, or consent of instructor.

SPED 450  Introduction to ECSE  credit: 2 Hours. 
Overview of the history, trends, and issues of the field of Early Childhood Special Education (ECSE) with particular attention to federal and state policy, service system models, and professional roles and ethics. Emphasis is on current research, theory, and practice. 2 undergraduate hours. 2 graduate hours. Prerequisite: Junior standing.

SPED 460  Communication and Phys Disab  credit: 4 Hours. 
Focuses upon issues and intervention strategies that can impact the communication skills of persons with moderate or severe intellectual and/or physical disabilities. Specific assessment and intervention strategies are discussed as they relate to both verbal and augmentative communication. 4 undergraduate hours. 4 graduate hours.

SPED 461  AAC and Literacy  credit: 2 or 3 Hours. 
Course focuses on issues and strategies for teaching communication and literacy to individuals with significant intellectual or physical disabilities. Specific assessment and intervention strategies are discussed as they relate to alternative and augmentative communication (AAC) and the development of beginning literacy skills. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Prerequisite: Concurrent enrollment or prior completion of SPED 440, and admission to the Department of Special Education, or consent of instructor.

SPED 465  Curriculum and Methods in ECSE  credit: 3 Hours. 
Introduction to the field of early childhood special education, including its history and major issues; instructional methods used in teaching and facilitating development in young children with disabilities are covered in depth. 3 undergraduate hours. 3 graduate hours. Prerequisite: Concurrent registration in SPED 524 or consent of instructor.
Teacher Education Minor in Secondary School Teaching

College of Education

Director of Teacher Education: Sarah McCarthey

142 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

Liberal Arts and Sciences

Academic Adviser: Lori Davis

Admissions Information: las-teach@illinois.edu (las-teach@illinois.edu?subject=Question about the Teaching Education Minor in Secondary School Teaching)

2002 Lincoln Hall, 702 S. Wright Street, Urbana

This minor is a component of the teaching option within the following Science and Letters majors: biology (http://catalog.illinois.edu/undergraduate/las/teach-biology), chemistry (http://catalog.illinois.edu/undergraduate/las/academic-units/chemistry/chemistry-teaching-concentration), English (http://catalog.illinois.edu/undergraduate/las/academic-units/english/english-teaching-concentration), geology (http://catalog.illinois.edu/undergraduate/las/academic-units/geology/geology-teaching-concentration), history (http://catalog.illinois.edu/undergraduate/las/academic-units/history/social-science-history-teaching-concentration), mathematics (http://catalog.illinois.edu/undergraduate/las/academic-units/math/math-teaching-mathematics-concentration), and physics (http://catalog.illinois.edu/undergraduate/education/secondary/%20http://catalog.illinois.edu/undergraduate/las/physics/physics-teaching-concentration). Enrollment is limited to candidates in these options. Students are admitted into the College of Liberal Arts and Sciences (http://www.las.illinois.edu/students/) programs/majors’ major of interest and apply to enter the minor in their sophomore year.

Transfer into the teaching option within a major can be made only by students who have received approval to complete the minor in education. Approval for admission to the minor in education is gained by successful application to the College of Education, upon recommendation by the joint Education/LAS content area admissions committees. Council on Teacher Education policy requires that all candidates for admission to a teacher preparation program pass an Illinois approved test of basic skills. The Illinois test of basic skills options include the Test of Academic Proficiency (TAP) (https://www.il.nesinc.com/TestView.aspx?f=HTML_FRAG/IL400_TestPage.html) or an ACT/SAT (http://cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf) score that meets specific criteria.

Prerequisites for the minor: Students must pass one of three State approved basic skills tests (Test of Academic Proficiency; ACT Plus Writing; or SAT); be in good academic standing; and have a minimum content, UIUC, and cumulative GPA of 2.5. Additionally, each major stipulates prerequisite courses that must be completed before admission to the teaching option. Interested students should see the academic advisers in the major or the LAS Secondary Education Program Adviser for further information.

Most students will be able to complete all the prerequisite courses for transfer into the teaching option of their major by the spring of their sophomore year; those students may be able to complete the requirements for the bachelor’s degree in LAS, as well as the minor in education and all other requirements for teacher licensure in four years (five years for biology majors). Students who establish eligibility to transfer into the teaching option of their major in the spring of their junior year may need more time to satisfy the requirements for teacher licensure.

In order to be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois Licensure, Endorsements, or Approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelor's level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. The curricula provide a comprehensive education emphasizing analysis and problem solving and an exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

Outcomes and Assessment

To accomplish the educational objectives and to fulfill current engineering accreditation criteria, all engineering programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

An assessment system for continuous measurement, evaluation, and improvement is in place in each academic department. In addition, the college collects college-wide data and provides coordination and assistance to the departments for the overall process.

Professional Component

Each engineering program also contains a professional component, as required for accreditation, that is consistent with the objectives of the program and the institution. The professional component includes:

- one year of a combination of college-level mathematics and basic sciences (some with experimental experience) appropriate to the discipline. Basic sciences are defined as biological, chemical, and physical sciences.
- one and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student’s field of study.
- a general education component that complements the technical content of the program and is consistent with the objectives of the program and the institution.

Students in engineering programs are prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

The paragraphs below further describe these elements of the programs and expected student outcomes and experiences.

Breadth of Programs

The college provides training in the mathematical and physical sciences and their application to a broad spectrum of technological and social requirements of society. The engineering programs, although widely varied and specialized, are built on a general foundation of scientific theory applicable to many different fields. Work in the classroom and laboratory is brought into sharper focus by practical problems that the student solves by methods similar to those of practicing engineers. Engineering design experience is introduced early in the programs, is integrated throughout, and culminates in a major design project teamwork experience in the senior year.

Although each student pursues a program chosen to meet individual career goals, all students take certain courses. Basic courses in mathematics, chemistry, physics, rhetoric, and computer science are required in the first two years. The scientific and technical portion of the majors provides the rudimentary development of technical skills, the modern engineering tools and methods for solving problems in practice, the design of experiments and associated data analysis, an understanding of values and cost, an understanding of the ethical characteristics of the engineering profession and practice, a sensitivity to the socially related technical problems that confront health and safety, and the ability and emphasis for maintaining professional competence through lifelong learning. Although the programs are progressively specialized in the third and fourth years, each student is required to take some courses outside his or her chosen field.

Non-technical courses are included in each program; they may be required or elective. Many non-technical courses satisfy the broad objectives of the humanities and social sciences requirements of the engineering programs, enabling strong, effective communications, making the student keenly aware of the urgent contemporary problems of society, and developing a deeper appreciation of human cultural achievements in a global context. The humanities and social sciences courses are usually drawn from the liberal arts and sciences, economics, and approved courses in fine and applied arts. A student who desires a broader cultural background may wish to consider a combined engineering-liberal arts and sciences program.

Illinois Engineering Freshman Experience (IEFX)

The Illinois Engineering First-Year Experience (http://iefx.engineering.illinois.edu) is an interdisciplinary program for all first-year engineering students. Students’ aspirations are respected, supported, and fostered within program initiatives that lay a solid foundation for your collegiate career.

You have the opportunity to begin your experience by participating in Summer Scholars, a program centered on helping you transition to Illinois and increase your academic performance for the first-year. You attend the eight-week Summer Session II and take the IEFX Projects course and another class of your choice.

For the fall semester, all first-year students attend Launch, your official welcome event to Engineering at Illinois, the Saturday before classes begin. You will meet faculty, staff, and other students at this popular party event that helps you build community and get a strong start.

Your experience continues with ENG 100, a fall-semester orientation course where you will learn important skills and information regarding engineering and the University, and you connect with a peer mentor that is trained and eager to assist you for academic success. You are also

Information listed in this catalog is current as of 03/2017
encouraged to enroll in one or more of the IEFX Electives. These courses offer variety and enhancement of the first year.

Along with the opportunities mentioned previously there are other events and sub-programs in IEFX that build community and helps students establish a strong sense of engineering identity.

For further information regarding IEFX, visit the IEFX website (http://iefx.engineering.illinois.edu), contact the IEFX Office (First Floor, Engineering Hall, iefx@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Engineering Career Services

The College of Engineering is committed to your success as a student and beyond. Our Engineering Career Services (ECS) office offers support, guidance, and resources to help you with every step of your job search. Whether you are interested in gaining practical experience through a co-op position or an internship, or entering the professional world upon your graduation, ECS provides a variety of services from career planning to offer evaluation and negotiation. We encourage you to take advantage of these services both as a student and as an alum of the College.

ECS provides comprehensive services and programs designed to enable students to identify, facilitate, and negotiate successful career opportunities. ECS offers an online job system that employers use to communicate with students by posting job opportunities and promoting on-campus recruiting activities.

ECS services include:

- Workshops and seminars
- Career exploration and counseling
- Resume and cover letter reviews
- Mock interviews
- Career fairs and on-campus recruiting events
- Job shadows, internships, co-ops, and full-time job postings
- Company databases and contact information
- Salary and placement statistics
- Offer evaluation and negotiation
- Presentations for classes and student organizations
- Personal consultation appointments

To take advantage of these services and many more, students simply need to register with the Engineering Career Services office (3270 Digital Computer Lab, 217-333-1960, ecs@engr.illinois.edu), or visit the Engineering Career Services website. (http://ecs.engineering.illinois.edu)

Departments and Programs

The engineering degree programs offered at Illinois awarding Bachelor of Science degrees are listed in the table below. The programs accredited by an accreditation commission of ABET (http://www.abet.org) and the year in which first accredited are indicated. The Computer Science program is accredited by the Computing Accreditation Commission (CAC), all others are accredited by the Engineering Accreditation Commission (EAC).

<table>

Physics<sup>6</sup> Engineering Physics --

1 Accredited program name was Aeronautical and Astronautical Engineering until August, 2004.
2 The program in agricultural and biological engineering in the Department of Agricultural and Biological Engineering is administered jointly by the College of Agricultural, Consumer, and Environmental Sciences and the College of Engineering with the degree granted by the College of Engineering. It succeeds a program named Agricultural Engineering until August 2008 that was first accredited in 1950.
3 The program in chemical engineering is administered by the Department of Chemical and Biomolecular Engineering in the College of Liberal Arts and Sciences with the degree granted by the College of Liberal Arts and Sciences.
4 The Department of Computer Science also sponsors two majors administered by the College of Liberal Arts and Sciences: a Mathematics and Computer Science Major and a Statistics and Computer Science Major.
5 Accredited program name was Nuclear Engineering until August 2008.
6 The Department of Physics also offers a B.S. degree program in Physics and a Physics Major in the Science and Letters Curriculum, both administered by the College of Liberal Arts and Sciences.

Admission to Programs in the College of Engineering

Entering Freshman Admissions

Students seeking admission to the College of Engineering who are current high school students, recent high school graduates, or who have earned fewer than 12 semester hours of credit at other collegiate institutions are classified as new freshmen and must meet the entrance requirements to the College of Engineering (http://engineering.illinois.edu/admissions/undergraduate) that are specified for

Information listed in this catalog is current as of 03/2017
new freshmen. Students are admitted to the college on a best-qualified basis as determined by a number of factors. These include ACT and SAT scores, high school percentile rank, high school grades, high school class selections, extracurricular activities, awards, and essays by the applicant.

Placement in chemistry, mathematics, rhetoric, and foreign languages is required and is based upon ACT and SAT scores, ALEKS (http://citi.illinois.edu/services/for-students/placement-testing/current-cutoffs/mathematics) math assessment results, or specific placement tests. Proficiency exams in many subjects, including chemistry, mathematics, and physics, are administered shortly after the fall semester begins. A student with advanced placement (AP or IB) credit in mathematics, chemistry, or physics will receive credit toward graduation and will be placed in advanced course work consistent with academic preparation.

All of the engineering curricula are built around a common core of courses. In addition all students in engineering curricula have 18 hours of social sciences and humanities electives and at least 6 hours of free electives; those choices are generally not prescribed by the curriculum. These common elements allow a student to transfer from one curriculum to another early in their college career with minimal loss of credit. The following table gives an indication of the common elements in the early stages of the engineering curricula. There are math, chemistry, physics, and rhetoric courses required in all curricula. There are also several courses that are common to many curricula. When a course substitution applies (e.g., MATH 286 for MATH 285, or MATH 415 for MATH 225) the most flexible option is to take the more demanding course as it meets the requirements of the less demanding course (and generally provides a stronger education in that subject).

<table>
<thead>
<tr>
<th>Subject</th>
<th>Core Courses Common to All Engineering Curricula</th>
<th>Core Courses Common to Many Engineering Curricula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Math</td>
<td>MATH 221, MATH 231, MATH 241, MATH 285</td>
<td>MATH 225, MATH 415</td>
</tr>
<tr>
<td>Physics</td>
<td>PHYS 211, PHYS 212</td>
<td>PHYS 213, PHYS 214</td>
</tr>
<tr>
<td>Chemistry</td>
<td>CHEM 102, CHEM 103</td>
<td>CHEM 104, CHEM 105</td>
</tr>
<tr>

<td>RHET 105</td>
<td></td>
</tr>
<tr>
<td>Other Foundational Courses</td>
<td>GE 101, ME 170, ECE 110, CS 101</td>
<td></td>
</tr>
</tbody>
</table>

1. Students with no background in calculus should take MATH 220 instead of MATH 221. Four of the five credit hours of MATH 220 apply to the degree requirements.
2. MATH 286 is required in some curricula and is an acceptable substitute for MATH 285 in all curricula.
3. MATH 415 is an acceptable substitute for MATH 225 in all curricula that require MATH 225. Note that MATH 415 can be used in the Mathematics Minor whereas MATH 225 cannot.
4. CMN 111 + CMN 112 are acceptable substitutes for RHET 105 in all curricula for those who qualify to take those courses.

Transferring into Engineering from Other Institutions

The College of Engineering admits qualified transfer students from both community and four-year colleges and has worked closely with many of these schools in Illinois to implement coordinated engineering programs.

Students may complete courses at other accredited institutions and transfer to Illinois with little or no loss of credit, provided that they follow the proper program. A suggested list of courses that should be completed before transferring may be viewed at the College of Engineering Transfer website (http://engr.illinois.edu/students/prospective/transfer_admission.php).

Students may also apply and participate in the Pathways program, a guaranteed admission program for qualifying students. To learn more, go to the Pathways website (http://pathways.engineering.illinois.edu).

Students may transfer to the college for the fall, spring, or summer session. Both the overall grade point average (GPA) of all transferable courses and the separate GPA of the technical courses (mathematics, physics, chemistry) must meet or exceed the competitive cutoffs. Transfer students are normally required to have also completed the basic mathematics (through calculus), physics, chemistry, and English (rhetoric and composition). Transfer students starting their studies in the fall semester are allowed to advance enroll during the preceding summer. Students are informed of this opportunity after they are admitted.

For more information, view the Office of Admissions Transfer website, (http://admissions.illinois.edu/apply/requirements_transfer.html) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Transferring into Engineering from Other Colleges on Our Campus

Any student in good standing in a college outside Engineering is eligible to seek transfer into a curriculum offered by the College of Engineering. The likelihood of success of such an intercollege transfer (ICT) petition depends upon the qualifications of the student, primarily as evidenced by performance in U of I courses. A student with a B average or above and with demonstrated success (primarily A’s and B’s) in Math, Physics, and Chemistry may be a good candidate for transfer.

For much more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageld=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Changing Curricula within Engineering

Students enrolled in the College of Engineering may petition for transfer to another department within the college. Such a transfer is considered an interdepartmental transfer (IDT).

Approval of an IDT petition will depend upon the reasons given by the petitioner for wanting to transfer, the comments of current and prospective departments, and availability of space in the target curriculum. Each case will be considered individually on its own merits.

For much more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageld=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Special Degree Programs

Combined Engineering-Liberal Arts and Sciences Program

A dual degree program of study permits a student to earn a Bachelor of Science degree in a field of engineering from the College of Engineering and a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences at the Urbana-Champaign campus.
This program affords the student the opportunity to prepare for a career of an interdisciplinary nature. A student who desires a broader background than can be provided in the four-year engineering programs can develop a combined program that includes a synergistic scientific education or an enhanced cultural education in addition to an engineering specialty. Each student must file an approved program with the College of Engineering’s Office of the Associate Dean for Undergraduate Programs and with the College of Liberal Arts and Sciences Academic Affairs Office.

Advisors in both colleges assist in planning a program of study to meet the needs and requirements for both degrees. Most combinations of engineering and liberal arts programs may be completed in ten semesters if the student does not have deficiencies in the entrance requirements of either college.

Most engineering programs can be combined with one of a variety of liberal arts and sciences majors, including science, languages, social sciences, humanities, speech communication, and philosophy. This combined program operates under the following conditions:

- Students entering the program must meet admission requirements for both colleges. Students planning completion of the two degrees in 8 semesters are recommended to submit the application in the fifth term of enrollment but no later than the first week of classes in the seventh term. Students planning completion in 10 semesters are recommended to submit the application in the seventh term of enrollment but no later than the first week of classes of the eighth term.
- Beginning with students who matriculated in Fall 2005, an Illinois GPA of 3.25 (or above for certain programs) will be required at the time of application for a second degree.
- Students must complete all of the requirements specified for the additional LAS degree as well as at least an additional 30 hours over and above those required for the first degree. The candidate must also complete 12 distinct advanced hours in the LAS major that are not used in meeting the requirements for any other degree program.
- All second degree candidates in LAS must be enrolled in the College of Liberal Arts and Sciences for a minimum of two semesters. Also, campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree.
- A student who starts in the program and decides to transfer from it is subject to the existing graduation requirements of the college of his or her choice.
- The degrees of Bachelor of Science in engineering and Bachelor of Arts or Bachelor of Science in liberal arts and sciences may be awarded simultaneously. If not, a student must complete the LAS degree first, having fulfilled the two-semester residency requirement in LAS, and transfer back to the College of Engineering to complete the other degree.
- Participants must satisfy the College of Liberal Arts and Sciences foreign language graduation requirement.
- Students electing advanced Reserve Officers’ Training Corps and Naval ROTC programs are required to meet these commitments in addition to the combined program as outlined.
- Students with 75 or more hours of transfer credit are not advised to enter this program because they cannot ordinarily complete it in five years.
- Students transferring from other colleges and universities must plan to complete at least one year in the College of Liberal Arts and Sciences at Urbana-Champaign and one year in the College of Engineering at Urbana-Champaign to satisfy residency requirements if both degrees are to be granted here.

For further information about this program, students should contact the Office of the Associate Dean in either the College of Engineering or the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

**Dual-Degree Programs within the College of Engineering**

Students enrolled in any department of the College of Engineering may pursue a second engineering degree if the following requirements are fulfilled:

- Students seeking a second engineering degree must apply for the program no later than the first week of classes of the term they intend to graduate with the first degree. The two engineering degrees may be awarded simultaneously or consecutively. All candidates for engineering degrees are accorded a maximum of 10 semesters of Illinois enrollment to complete their degrees. Students must petition to request an extension beyond this limit, which must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering.
- The Department offering the curriculum for the second degree must approve the double-degree request. The criteria for approval are the same as the ones applied for transfer into that curriculum.
- Campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree. The candidate must also complete at least 12 distinct advanced hours in the second degree that are not used in meeting the requirements for the first degree program.

Advanced students with multidisciplinary ambitions may also consider pursuing a graduate master’s degree as an alternative to a second undergraduate engineering degree, particularly if interested in research. Students should seek the advice of advisors and faculty members in the specific departments of interest to gather information on graduate programs and on available research opportunities.

**Program Modification**

A student can seek to modify his or her program of studies using course substitutions by submitting a Curriculum Modification form to the Office of the Associate Dean for Undergraduate Programs in the College of Engineering, 206 Engineering Hall (note that the forms can be obtained there too). The student should seek an endorsement of the change from his or her academic advisor and the Chief Advisor of the department responsible for the student’s program. The Associate Dean for Undergraduate Programs is responsible for approving all curriculum modifications. No program modification is automatically granted, and each request must come through the formal process. Once approved the student is notified by return copy of the form and the program change is entered in the graduation audit.

**Custom Degree Program**

Some program changes do not fit the direct course substitution mode anticipated by a Program Modification. In such a case a student may seek permission to vary the program requirements of one of the standard Engineering degree programs by written petition to the Associate Dean for Undergraduate Programs. There is no standard form for this transaction. A student should submit a letter proposal outlining the nature of the request and the justification. The special program must be approved by the Associate Dean for Undergraduate Programs in the
College of Engineering, who will consult with the head of the department in which the student is registered.

**Affiliations with Other Liberal Arts Colleges**

Through a program of affiliation between the College of Engineering and a number of liberal arts colleges, a student may enroll in a five-year program, earn a bachelor’s degree from one of these colleges, and at the same time earn a bachelor’s degree in engineering from Illinois. In general, students spend the first three years at the liberal arts college and the final two years at Illinois. At the time of transfer, students must meet competitive transfer admission requirements and must meet certain residency requirements to participate in this program.

The five-year program encourages a student to develop a broad understanding of the social sciences and humanities while striving for excellence in technical studies. These affiliations have the added benefit of allowing students to take core engineering studies (including mathematics, physics, and chemistry) at liberal arts schools. Students interested in this dual degree program should meet with advisors from both schools to develop an individual plan of study.

Colleges affiliated with the College of Engineering are:

- Augustana College, Rock Island, Illinois
- De Paul University, Chicago, Illinois
- Eastern Illinois University, Charleston, Illinois
- Elmhurst College, Elmhurst, Illinois
- Greenville College, Greenville, Illinois
- Illinois Benedictine College, Lisle, Illinois
- Illinois College, Jacksonville, Illinois
- Illinois State University, Normal, Illinois
- Illinois Wesleyan University, Bloomington, Illinois
- Knox College, Galesburg, Illinois
- Lewis University, Romeoville, Illinois
- Loyola University of Chicago, Chicago, Illinois
- North Central College, Naperville, Illinois
- Olivet Nazarene College, Kankakee, Illinois
- Western Illinois University, Macomb, Illinois
- Wheaton College, Wheaton, Illinois

For more information, view the Office of Admissions Transfer website (http://admissions.illinois.edu/apply/requirements_transfer.html).

**Special Off-Campus Programs**

### Experiential Learning Programs

Co-ops and internships (summer and semester) provide students with a competitive advantage when seeking full-time career opportunities in industry. These Experiential Learning Programs not only enable students to gain up to a full year of professional work experience while paying for their education, but also offer the opportunity to explore engineering-related fields in-depth, to apply what you learn in the classroom to a real situation, and to provide insight into some of the nation’s leading companies.

As a Co-op, a student alternates terms of work with terms of school, working at least two semesters and one summer with the same company. Students that participate in a Co-op opportunity graduate with one year of professional work experience increasing their marketability throughout the recruiting process. Semester Interns work for a period of 4-7 months with one company (a spring or fall semester may be combined with a summer). Many students also participate in summer internships, working for one company during a summer (2-3 months). Students may complete multiple internships, and all internships and co-ops are paid employment positions.

Students find these Experiential Learning Programs valuable and rewarding for a number of reasons:

- They are able to explore opportunities within a specific field.
- They gain industry experience prior to graduation.
- They improve their overall communication and team skills.
- Time spent with an employer inspires their performance in their course work and expands their classroom experiences.
- The practical experience helps them to identify if they have really chosen the right field of interest for them and offers numerous alternative ideas.
- They earn money that can be applied to college expenses.

ECS also offers a job shadow program, which takes place each year during winter break. The Job Shadow Program is a one day program for freshmen and sophomores interested in spending time with an engineer to better understand what it means to work in a specific industry or company. This program provides students with an opportunity for a brief yet valuable introduction to the daily demands of an engineer during the course of a day. Each student is matched with an engineer in the student’s field of interest and spends time at the engineer’s firm. This unique interactive experience will give participants a better idea of how the professional world “feels” in their chosen field of study.

For more information regarding Experiential Learning Programs visit the Engineering Career Services website (http://ecs.engineering.illinois.edu), contact Engineering Career Services (3270 Digital Computer Lab, 217-333-1960, ecs@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

### Study Abroad Programs

Engineering students at Illinois are presented with very attractive opportunities to study overseas as part of their university experience. Students may spend a summer, semester, or even an entire academic year abroad. Credits earned during this time may be transferred to Illinois to satisfy curricular requirements. Additionally, a student may even elect to pursue an International Minor in Engineering (http://catalog.illinois.edu/undergraduate/engineer/international-minor-engineering) that is focused on the country or region of the student’s choice.

A variety of study abroad and international work programs are available to provide students an international experience. Currently, International Programs in Engineering (IPENG) has programs at universities in Argentina, Australia, Austria, Belgium, Brazil, Chile, China, Denmark, France, Germany, Ireland, Italy, Japan, Netherlands, Singapore, S. Korea, and the U.K. More are continually being developed in these and other countries. IPENG’s membership in the Global Engineering Education Exchange (GE3) consortia provides additional overseas locations and fellowships for study abroad. Students can also participate through the main campus programs in several other countries. For information on these programs visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or the Study Abroad Office website (http://studyabroad.illinois.edu) or contact the Engineering Study Abroad Office (210 Engineering Hall, ipeng@illinois.edu)

To help new students gain an understanding of the importance of an international experience during their academic career at Illinois, the
College of Engineering offers short programs for freshman level students to “get their feet wet”. These are 10-14 day trips in either the winter break (Guatemala) or spring break (Cuba) and also one for women in engineering at the end of the spring semester to Uruguay. Some of these programs include the opportunity to earn credit towards degree requirements.

An overseas academic experience can begin as early as the summer after the first year at Illinois. An academic semester or year exchange program provides an even greater depth to the undergraduate experience and will greatly enhance a resume when a student begins their professional job search.

The personal and academic advantages gained by participating in the program are numerous and reflect many financial incentives. These advantages can include: IPENG help with round-trip airfare for all engineering students who study or work abroad on approved programs and a reduced on campus tuition charge when studying. The result is that Illinois provides the opportunity to earn credit overseas at only a fraction of the cost of studying on campus.

The College of Engineering also offers scholarships for Study Abroad participants. The College of Engineering believes in this opportunity so firmly that much has been done to make this as affordable as possible for students. In addition to help with round-trip airfare and tuition incentives, newly admitted students are offered an opportunity to apply for the International Engineering Scholarship. This scholarship provides a one-time payment of $2,000 during the Study Abroad program. Additional scholarships are also provided to students upon acceptance to a study abroad program.

For more information about study abroad, visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or contact IPENG (210 Engineering Hall, 217-244-0054, ipeng@illinois.edu).

Other International Opportunities

New Internship programs through Global Experiences and Sage Corps have been included in the College of Engineering’s repertoire of programs. These are non-paid experiential internships that will help enhance a student’s resume and provide hands-on engineering related experiences. See the International Programs in Engineering Website (http://www.engineering.illinois.edu/studyabroad)

Engineers Without Borders (EWB) Illinois works with disadvantaged communities to improve their quality of life through implementation of environmentally and economically sustainable engineering projects, while developing international responsible engineers. Current international projects include biofuel electricity generation, charge controller circuit design, and wood-stove emissions control. Furthermore, EWB-Illinois holds local events to create awareness on campus of international development and environmental issues. EWB-Illinois is open to all majors and, indeed, is always in need of dedicated people from all fields. For more information, visit the Engineers Without Borders website (http://www.ewb-usa-uiuc.org).

Advanced ROTC Training

A student in the College of Engineering may elect to participate in the Reserve Officers’ Training Corps Program and earn a commission in the U.S. Army Reserve, Air Force Reserve, or Naval Reserve. A commission is awarded simultaneously with the awarding of the bachelor of science degree in an engineering field. Participation in these programs is limited to students who apply to and are selected by the army, air force, and navy units at Illinois. Monthly stipends are paid to those selected for advanced military training.

These programs require from one to three summer camps or cruises and the earning of specified numbers of credits in advanced military courses. Credits earned appear in all academic averages computed by the College of Engineering. Basic military courses do not count toward graduation. A maximum of 6 hours of upper-level military science courses may be used as free electives. A student should plan on taking nine semesters to obtain both a bachelor’s degree in engineering and a commission in the ROTC program. For further information, write directly to the professor of military science, aerospace studies, or naval science.

Technical Grade Point Average Requirements

Technical grade point average (TGPA) requirements for graduation and advanced-level course registration apply to students enrolled in certain College of Engineering curricula. These rules apply in addition to the Illinois campus-wide drop and probation rules. The table below summarizes the TGPA rules applicable.

Note: TGPA rules for the General Engineering and Industrial Engineering curricula shown in the table below are under review and subject to change. Click here (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements) for the most current information,

Engineering Honors Programs (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Honors?src=search)

Honors at Graduation
Honors awarded at graduation to superior students are designated on the diploma as honors, high honors, or highest honors. A student receives honors with a cumulative Illinois grade point average of at least 3.50, and high honors with at least a 3.80 grade point average at graduation. Highest honors may be awarded to any student eligible for high honors upon recommendation of his or her department. The criteria used by departments in selecting individuals for highest honors recognition include outstanding performance in course work and in supplementary activities of an academic or professional nature. Ordinarily, such a citation requires completion of an undergraduate thesis or a special project of superior quality.

Tau Beta Pi
Tau Beta Pi is a national engineering honor society that recognizes students, alumni, and engineers for outstanding academic achievements and exemplary character. The Alpha chapter at Illinois was founded in 1897 and is the fifth oldest chapter. In addition to gaining scholastic recognition, members participate in a range of activities that serve the chapter, the College of Engineering, and the community. The scholastic requirement for membership in Tau Beta Pi is that juniors must be in the upper one-eighth of their graduating class and seniors must be in the upper one-fifth of their graduating class.

Edmund J. James Scholars
The honors program in engineering is part of the Illinois James Scholar program, which was established to recognize and develop the talents of academically outstanding students. Engineering students in this program are known as "James Scholars in Engineering." Each is assigned to an honors advisor and receives special consideration in the selection of courses to meet specific needs.

Admission for incoming freshmen is based on a holistic review of the application rather than on standardized test scores alone. Students selected as James Scholars for Fall freshman admission will be notified in late February. If you did not qualify upon freshman admission, you may still apply to be a Freshman James Scholar during the first two weeks of your second semester if you have achieved a 3.5 Grade Point Average or higher in your first semester. Upon completion of the freshman honors requirement, you will still get honors recognition for the full year on the transcripts.

Continuation in the program or joining as an upperclass student requires a minimum 3.50 GPA and the development and approval of an honors contract, which is a coherent plan of special academic work. For more information about the James Scholar Program, visit the college’s James Scholar website (https://wiki.cites.illinois.edu/wiki/display/engrjames/Home) or contact the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Good standing in the James Scholar program at graduation requires completion of the honors contract.

Dean’s List
The names of undergraduates who have achieved a grade point average in the top 20 percent of their college class for a given semester will be included on a list prepared for the dean of the college. This list is publicized on campus and is sent to news agencies throughout the state.

To be eligible for Dean’s List recognition, students must successfully complete 14 academic semester hours letter grade. Credits earned during the semester through proficiency, CLEP, and advanced placement examinations are not counted.

General Education Requirements
The campus General Education requirements fall into several categories. Those in Composition I, Natural Sciences and Technology, and Quantitative Reasoning are met by courses required in engineering curricula. Beginning with the class that entered in fall 2000, students must complete a third-level college language course. Most students satisfy this requirement by completing three years of high school instruction in a single language.

The campus General Education requirements in social and behavioral sciences and in humanities and the arts can be met while satisfying the College of Engineering’s liberal education course work requirements (see below). Proper choices will assure that these courses also satisfy the campus requirements in the areas of Western and non-Western cultures. Many of these courses satisfy the campus Advanced Composition requirement, which assures that students have the advanced writing skills expected of all college graduates.

Students may obtain credit from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits. All course work taken to satisfy campus general education requirements must be taken for grade.

For more information about General Education course work requirements, consult the campus’ General Education website (https://courses.illinois.edu).

Elective Course Work
Liberal Education Electives
The College of Engineering requires eighteen hours of liberal education course work. The courses are normally chosen to also satisfy the campus General Education requirements consisting of six hours of social and behavioral sciences (S&BS) and six hours of humanities and arts (H&A) course work. All twelve hours of these hours must be taken for grade. The remaining six hours of liberal education course work may include more approved General Education S&BS or H&A credit, foreign language credit beyond the basic requirement, and liberal education courses from a list approved by the College (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Course+List?src=search).

Credit for this course work may come from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits.

For more information about College of Engineering liberal education course work requirements, consult the college’s Liberal Education website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives).

Technical Electives
All technical elective courses must be selected in accordance with departmental requirements. Technical electives generally include 300-
and 400-level courses in engineering, mathematics, and the natural sciences.

**Free Electives**
These unrestricted electives are selected at the prerogative of the student with certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search). Every curriculum administered by the College of Engineering has at least six free elective hours. This course credit insures the required number of credit hours for the degree is earned.

**Credit-No Credit Option**
The credit-no credit grade option is available for students who want to explore areas of academic interest that they might otherwise avoid for fear of poor grades. All students considering this option are cautioned that many graduate and professional schools consider applicants whose transcripts bear a significant number of non-grade symbols less favorably than those whose transcripts contain none or very few.

Required courses in the College of Engineering may not be taken on this basis. For more details, consult the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Grades).

**Combined B.S.-M.S. Engineering Degree Programs**

**Computer Science (M.S.)** (http://cs.illinois.edu/academics/graduate/fifth-year-masters-programs)
The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Illinois Computer Science students enrolled in the College of Engineering with junior standing who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

**Course Requirements**

**B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):**
- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
- Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
- Illinois undergraduate student minimum residence requirement satisfied
- Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

**M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):**
- Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
- Satisfy Illinois’ graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

**Admission**
For deadlines and procedures, consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-ms-5-year-program). Current Illinois Computer Science students who are in their junior year (normally at least 90+ credit hours, including those in progress, and at least one year of undergraduate course work remaining) with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:
- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:
- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

**Withdrawal**
Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.-M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Information listed in this catalog is current as of 03/2017
Continued Graduate Study

Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master's degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master's degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

Computer Science (M.C.S.) (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program)

The 5-year program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. in Computer Science. This program is competitive and admission is based on overall academic performance, letters of recommendation, and statement of purpose.

Course Requirements

B.S. Component: 120 hours plus 3 "Breadth Requirement" courses for 9-12 graduate hours

• Same required courses as the traditional B.S. degree with the minimum hours required reduced to 120 hours.
• Must complete 3 out of the 4 "Breadth Requirement" courses: four different courses, each from a different area, from the following eight core areas with a grade of B- or higher.
• University undergraduate minimum residence requirement satisfied.
• Overall GPA of 3.0 or higher maintained through the completion of the B.S. component of the program.

M.C.S. Component: Minimum 20-23 additional coursework hours

• Program is identical to the traditional M.C.S. program with the 3 out of 4 "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"
• Students who take the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)" courses for 3 credit hours instead of 4 will need to complete a minimum of 23 additional graduate level coursework hours.
• Students must satisfy the university's graduate student minimum residence requirement.
• Students must complete remaining M.C.S. degree requirements in two semesters (fall-spring, spring-summer, or spring-fall).
• Students must maintain an overall GPA of 3.0 through completion of the M.C.S. component of the program.

Admission

For deadlines and procedures, please consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program). Current Illinois Computer Science students enrolled in the College of Engineering with a junior standing (must have at least one year left of their undergraduate study after admitted into the program) who maintain an excellent academic performance are eligible to apply for this program. Students admitted to this program will receive both degrees once all requirements for both degrees have been successfully completed. Transfer students entering the CS undergraduate program their junior year are also eligible to apply to this program.

Students provisionally admitted to the program:

• are assigned a graduate academic advisor.
• must maintain an overall GPA of 3.0 through completion of the B.S. component of the program to remain in the program.
• may register for graduate courses and earn graduate credit hours, with approval from their graduate academic advisor, if they have 12 hours or less to complete in their FINAL semester of their undergraduate studies. Please note that students cannot transfer more than 12 credit hours of coursework over to their M.C.S. degree, which includes the shared coursework.
• must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (this is the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"), and an overall GPA of at least 3.0 GPA, students
• will be officially admitted into the Graduate College, with the application fee paid by the department.
• will be issued letter of admission from the Graduate College Admission Office and the Department of Computer Science, at which time they will be considered graduate students and assessed graduate tuition the following semester. International students may be required to submit additional documentation at this time.
• must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.
• must complete all the remaining M.C.S. degree requirements within two semesters (fall-spring, spring-summer, or spring-fall). Please note that if you finish your B.S. requirements in less than four years, you will not be given extra time to complete the M.C.S. degree requirements. You will just finish this joint program in less than 5-years and be able to start working sooner!

Withdrawal

Students who do not complete all 5-Year B.S.- M.C.S. degree program requirements may request by petition to have graduate hours earned, including the Breadth Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.
Electrical and Computer Engineering (https://www.ece.illinois.edu/academics/ugrad/jointbsmeng.asp)

The joint B.S. - M.Eng. program in Electrical and Computer Engineering combines two degrees: a B.S. in EE or CompE with a M.Eng. in ECE. Current Illinois ECE students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in the standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S. - M.Eng. degree have been successfully completed. Students may participate in the graduation ceremonies for their B.S. degree once the 120 credit-hour requirement is met. There will be no Graduate College or BOT waivers allowed for students in this program. This program is not intended for students intending to pursue the Ph.D. degree--such students should apply to the traditional M.S. (with thesis) degree program.

Course Requirements

B.S. Component (120 hours)*

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 120.
- The reduction of 8 credit hours includes:
  - 6 hours in Free Electives in both EE and CompE curricula
  - 2 hours in ECE courses in EE Technical Electives or 2 hours in ECE or CS courses in CompE Technical Electives.
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Illinois undergraduate student minimum residence requirement must be satisfied.

M.Eng. Component (32 additional hours of coursework)

- Identical to stand-alone M.Eng. degree requirements:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Required Hours</th>

<tr>
<td>500-level ECE courses (subject to Other Requirements and Conditions below)</td>
<td>12</td>
</tr>
</tbody>
</table>

Professional Development: ECE 596 4
Master's Project supervised by ECE (or affiliate) graduate faculty or course(s) in leadership, entrepreneurship, or other business-related topic from approved list or as approved by ECE Director of Graduate Studies

Elective courses (subject to Other Requirements and Conditions below) 16

Other Requirements and Conditions (may overlap)

A minimum of 12 credit hours of ECE coursework at 500-level must be applied toward the degree. Up to 4 hours of ECE 596 and/or ECE 597 (or other individual study) may be applied toward this degree requirement.

Coursework must include at least 18 credit hours of ECE coursework; 15 of these hours must be from no more than 2 different focus areas. The ECE Graduate Committee maintains the Focus area course lists.

Credit in ECE 411, ECE 415, ECE 445, ECE 590, PHYS 404, PHYS 405, PHYS 435, PHYS 436, and STAT 400 do not count toward the degree.

No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.

This degree option is non-thesis only.

Maintain a minimum program GPA of 3.0.

Admission to the Program

For deadlines and procedures, consult the department website. Current Illinois ECE students with at least 90 credit hours and an overall GPA of at least 3.40 may apply for provisional admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.40 through completion of the B.S. component of the program in order to remain in the program.
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, when they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 120 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component students:

- must apply and be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College and the ECE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students
who do not complete all B.S. - M.Eng. degree requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. in Electrical Engineering or B.S. in Computer Engineering degree. Students reverting to a traditional B.S. degree program must complete 128 hours and satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 120-hour B.S. degree from the B.S. - M.Eng. program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program.

Industrial Engineering

The Department offers a combined Bachelor of Science and Master of Science program in Industrial Engineering. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares to 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program shown above, except that the following requirements are waived:

- one IE technical elective — 3 hours
- Free electives — 5 hours

In addition, independent study project courses may not be used as IE or technical electives in the B.S. portion of the combined program.

In the M.S. portion of the program, 32 hours of credit and a thesis are required. There must be at least 24 hours of formal graded course work at the 400 level or greater, eight of which must be at the 500 level, and four of the eight must be in the major field. A Master's thesis, for which at least four and no more than eight hours of IE 599 credit is required. Students must also register for the graduate seminar course (IE 590) every semester following formal admission into the graduate portion of the program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission

Formal admission to the combined program normally occurs late in the junior year or early in the senior year. Undergraduate students in IE may apply for formal admission to the combined program with the following provisions:

- Students must have a minimum Illinois GPA of 3.60 or higher, and have earned 96 credit hours towards the B.S.I.E. requirements at the time they are invited to apply.

- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ISE Graduate Programs Office, Room 111 Transportation Building. There are two annual application deadlines: September 15 and January 15.

- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.

- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.

- The department will pay the application fee for these students.

- Each student is required to identify a graduate advisor and file a graduate course plan in the semester the student is granted formal admission to the graduate portion of the program.

- Once the student is admitted into the B.S.-M.S. program, the Director of Graduate Programs will act as the student's advisor until a permanent advisor is found.

Withdrawal

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department's qualifying examination no later than the second calendar semester after graduation from the combined program.

Materials Engineering (http://www.matse.illinois.edu/academics/undergraduate/combined-degree-program.html)

The five-year B.S.-M.Eng. program in Materials Science and Engineering combines two degrees: a B.S. in Materials Science and Engineering (MatSE) with an M.Eng in Materials Engineering. Current Illinois MatSE students enrolled in the College of Engineering, who maintain appropriate academic performance, are eligible to apply for this program. The program is designed to enhance the students experience in the engineering aspects of materials, broaden their knowledge beyond that possible in the standard 4-year curriculum and obtain a foundation in business, technology management, and/or entrepreneurship. Two semesters (or equivalent, a minimum of 30 weeks) of industrial co-op or internship are required; a research thesis is not required. In addition the students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department). Students admitted to the program will receive
both degrees once all requirements for the 5-year B.S.-M.Eng. degree program have been successfully completed but will be permitted to participate in the B.S. graduation ceremonies with their class if they have completed the equivalent number of credit hours. Once graduate student status is achieve, students in the program will be eligible for a teaching assistantship in MatSE (only).

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, 2 months before the end of the Fall semester of the students Junior year. The application and letter of reference forms for the B.S.-M.Eng. Program are available from the MatSE department office.

**Admission to the Program**
Current Illinois MatSE students with Junior standing and with an overall grade point average (GPA) of at least 3.00 (A = 4.00) may apply for provisional admission to the program. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:
- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, in order to remain in the program
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component
- must earn at least 120 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area coursework, and an overall GPA of at least 3.00 in all graduate coursework, students:
- will be officially admitted into the Graduate College
- will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester
- may apply or be considered for graduate teaching assistantships and tuition waivers, as well as fellowships and scholarships (in MatSE only) available to graduate students in MatSE
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are not eligible to continue in the Ph.D. program in MatSE. Students wishing to pursue a Ph.D. must apply separately for admission to that program.

**Course Requirements**

**B.S. Component (120 hours)**

- Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours
- The reduction of 8 credit hours includes:
  - 5 hours of free electives.
  - 3 hours of the area specialty course in a different area (the latter becomes part of M.Eng. program requirements)
  - At least one semester (or 2 summers) devoted to an industrial internship or co-op.

- It is strongly suggested that the student take 2 courses in some aspect of business, economics, environmental studies, labor and industrial relations, technology entrepreneurship or technology and management as the elective component of their Liberal Education requirements. Partial or complete fulfillment of the Technology and Management or Business minor or the Technology Commercialization Certificate is recommended for those admitted by application if available hours permit. The students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department), with additional hours recommended. It is noted that since receipt of the B.S. degree is delayed until the requirements for the M.Eng are completed, the student has the opportunity to complete the undergraduate minors while taking the M.Eng requirements.
- Overall GPA of 3.00 maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

**M.Eng. Component (minimum 36 additional hours of coursework)**

- 36 hours course work, including at least 19 graduate hours of MatSE courses with 12 hours credit overall in 500-level courses. The course work shall include MSE 585 (two semesters or equivalent, 30 weeks total, of industrial internships or co-ops; one of the semesters can be during the B.S. program), 6 hours of 400- or 500-level area specialty courses in the student’s area, 3 hours of 400- or 500-level MSE courses from a different area, 2 hours of MSE 595, and 2 hours of MSE 529 or MSE 559. Ten hours of courses in one or more of the areas of business or technology management, and entrepreneurship are required to be included in the overall program. Completion of the requirements for the various Certificates granted by the Technology Entrepreneur Center is recommended.
- MSE 492; credit does not count toward degree.

**Withdrawal**

Students who do not complete all of the 5-year B.S.-M.Eng. degree program requirements may request, by petition to the Graduate College after obtaining approval by their advisor, the department, and the Associate Dean for Undergraduate Programs in the College of Engineering, to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. degree in MatSE. Students reverting to the traditional B.S. degree program must satisfy all degree requirements, including completion of the required “area specialty course(s) in a different area” and the stated credit hour requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

1. The B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional B.S. program or if the student completed all of the requirements of the standard B.S. degree (8 additional hours, as specified).
Students find internship companies and positions with the help of the departmental and College Placement offices. The MSE 585 internship requires approval by the departmental Director of Graduate Studies to ensure that it matches the student's individual career objectives and meets the learning goals of the program. Students taking an internship as part of their undergraduate B.S. program should also check with the Director of Graduate Studies; his/her approval is required if the student is already accepted in the combined B.S./M. Eng. Program. Students will be expected to present an oral report on their internship in either MSE 529 or MEE 559, as appropriate, the semester following completion of the internship.

Materials Science and Engineering (http://www.matse.illinois.edu/academics/undergraduate/combined-degree-program.html)
The five-year B.S.-M.S. program in Materials Science and Engineering combines two degrees: a B.S. in MatSE with an M.S. (with thesis) in MatSE. Current Illinois MatSE students enrolled in the College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-Year B.S.-M.S. degree program have been successfully completed but will be permitted to participate in the Graduation Ceremonies with their class if they have completed 128 hours.

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, two months before the end of the Fall semester of the student’s Junior year. Application and letter of reference forms for the B.S.-M.S. Program are available from the MatSE department office.

Admission to the Program
Current Illinois MatSE students with Junior standing with an overall grade point average (GPA) of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.50 through completion of the B.S. component of the program, in order to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
• must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit in advanced level area courses, and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area course work, and an overall GPA of at least 3.00 in all graduate course work, students:

• will be officially admitted into the Graduate College
• will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• may apply or be considered for graduate research or teaching assistantships, and tuition waivers, as well as fellowships and scholarships available to graduate students.

Students in the program are eligible to apply for the Ph.D. program in MatSE near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master’s degree.

Course Requirements
B.S. component (120 hours including 3 advanced (graduate level) area courses for at least 9 hours):

• Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours; except MSE 395 is dropped (i.e., 1 hour)
• Two of the required remaining four area specialty courses are to be taken at the graduate level (i.e., the students will be held to the course and grading requirements of a graduate student). The third advanced level course can be either in the specialty area or in another specialty area.
• The reduction of 8 credit hours includes:
  • 5 hours of free electives.
  • 3 hours of the area specialty course in a different area (becomes part of M.S. program requirements) for all concentrations.
• Senior thesis is to be taken in lieu of MSE 395 and one area specialty course (5 hours total recommended, with 1 hour being the remaining hour of free elective).
• An overall GPA of 3.50 must be maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.S. component (minimum 24 additional hours of course work plus 8 hours of MSE 599):

• Same overall requirements as for traditional M.S. with thesis.
• At least one 400-500 level course (for the B.S. or M.S.) will be a MatSE area specialty course from a different area.
• Complete a M.S. thesis according to MatSE department requirements; research for the senior thesis will often serve as a beginning for the M.S. thesis but the student may change thesis advisors.

Withdrawal
Students that do not complete all of the 5-year B.S.-M.S. degree program requirements may request, by petition to the Graduate College with approval of their advisor, the department, and the Associate Dean for Undergraduate Programs of the College of Engineering, to have graduate hours earned, including the three advanced area courses, converted to undergraduate hours and applied toward a traditional B.S. in MatSE degree. Students reverting back to the traditional B.S. in MatSE degree program must earn a minimum of 128 hours and satisfy all traditional degree requirements, including MSE 395 and the area specialty course(s) in a different area, to receive the B.S. degree in MatSE. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

1 The B.S. degree from the B.S.-M.S. Program is not ABET accredited.
At present, students in their fourth or fifth year considering withdrawing from the M.S. portion of the program should register for MSE 395 in the Spring semester; the resulting B.S. degree would then be ABET accredited. It is anticipated that, in the near future, senior thesis will be accepted by ABET as an appropriate "design experience," when approved, and if accepted in terms of satisfying the objectives of MSE 395 by the MSE 395 instructor, it can be used for the MSE 395 design project.

Mechanical Engineering

The department offers a combined Bachelor of Science and Master of Science program. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares with 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program, except that the following requirements are waived:

- one MechSE elective — 3 hours
- one Technical elective — 3 hours
- Free electives — 2 hours

In addition, independent study project courses may not be used as MechSE or technical electives in the B.S. portion of the combined program.

The M.S. portion of the program requires completion of 32 hours of credit. This consists of a minimum of 24 hours of formal graded course work at the 400 level or above and eight hours of thesis research credit. Additionally, the formal graded course work must include eight hours at the 500 level and eight hours in the major area of study (ME) with a minimum of four of those hours at the 500 level. A Master's thesis is required, consisting of at least four and no more than eight hours of ME 599 credit. Students must also register for the graduate seminar course (ME 590) every semester following formal admission into the graduate portion of the program and complete MSE 492. The seminar and lab safety credits will not count toward the degree. The non-thesis option is not available to students in this combined program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission

Formal admission to the combined program normally occurs late in the junior year or early in the senior year and is by invitation only with the following provisions:

- Students must have a minimum Illinois GPA of 3.80 or higher, and have earned 96 credit hours toward the B.S.M.E. requirements at the time they are invited to apply (60 of these hours must have been earned at Illinois).
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ME Graduate Programs Office, Room 164 MEB. There are two annual application deadlines: October 15 and March 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee ($60 US, $75 International) for these students.
- Each student is required to identify a graduate advisor and provide a tentative thesis topic at the time of application to the program.

Withdrawal

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department’s qualifying examination no later than the second calendar semester after graduation from the combined program.

Minors Offered by the College of Engineering

Students are generally eligible to take many campus minors (http://provost.illinois.edu/educational-innovation/advising-resources/pursuing-undergraduate-minor). Several of those administered by the College of Engineering are described in this section. To obtain recognition for the College of Engineering minors, students must register in the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

For the Degree of Bachelor of Science in Aerospace Engineering

The Aerospace Engineering curriculum provides a strong fundamental background in engineering, mathematics, and science, along with the ability to apply this fundamental knowledge to the analysis and design of future aircraft and spacecraft. It also prepares students for lifelong learning and the attainment of their career goals in the field of aerospace engineering and in a wide range of other areas. The concepts of system design are introduced early in the curriculum and culminate in the yearlong senior capstone design experience (AE 442, AE 443), in which students work in teams to respond to a design challenge from industry, government, or a professional engineering society. A total of 18 hours of technical and free electives allows the student to pursue an individualized program of study.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

1. This optional course may be used to help meet free elective requirements.
2. External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

1 STAT 400 may be substituted.

Technical Electives
These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of aerospace engineering.

Selected from the departmentally approved list of Technical Electives, satisfying these distribution requirements: 1

Chosen from AE Technical Electives 1 6
Chosen from AE Technical Electives or Non-AE Technical Electives 6
Total Hours  12

1 List of Technical Electives (http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives).

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list.
6
Electives from the campus General Education Humanities and the Arts list.
6
Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.
6
Total Hours  18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.
RHET 105 Writing and Research  4
Advanced Composition (satisfied by completing the sequence AE 442 + AE 443 in the Aerospace Engineering Technical Core )  4
Total Hours  4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Total Hours: 128

1 Entering freshmen are expected to enroll in AE 100 in the fall of the first year. This optional course may be used to help meet free elective requirements.
2 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3 Liberal education electives must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a liberal education elective.
5 STAT 400 may be substituted.
6 Sequence satisfies the General Education Advanced Composition requirement.
7 Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives, satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

AE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AE)

Courses
AE 100 Intro to Aerospace Engineering credit: 2 Hours.
Introduction to the Aerospace Engineering curriculum and career. Typical section topics include aircraft and rocket design and flight. Overviews of the topics are presented along with theory to be experimentally verified.

AE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
1 to 5 credit hours. May be repeated.

AE 202 Aerospace Flight Mechanics credit: 3 Hours.
Fundamental principles of aerospace flight mechanics applied to spacecraft and aircraft. Orbital mechanics, rocket propulsion, and dynamics and control applied to spacecraft design. Aerodynamics, maneuvering, stability and flight performance applied to aircraft design. MATLAB examples and assignments. Prerequisite: Credit or concurrent registration in TAM 212.

AE 298 Special Topics credit: 1 to 4 Hours.
Lectures and discussions relating to new areas of interest. See class schedule for topics and prerequisites. May be repeated if topics vary.

AE 302 Aerospace Flight Mechanics II credit: 3 Hours.
Fundamentals of aircraft and spacecraft dynamics and orbital mechanics; aircraft performance in various flight attitudes; aircraft stability and control; spacecraft attitude dynamics and control; the two-body problem of orbital mechanics; orbit transfer. Prerequisite: AE 352.

AE 311 Incompressible Flow credit: 3 Hours.
Equations of motion for incompressible flow, both inviscid and viscous; potential flow theory, inviscid airfoil theory: two- and three-dimensional, Navier-Stokes equations, laminar boundary layer and transition to turbulence. Prerequisite: Credit or concurrent registration in AE 202 and MATH 241.
AE 312  Compressible Flow  credit: 3 Hours.
Dynamics of compressible fluid; conservation of mass, momentum, and energy; one-dimensional and quasi-one-dimensional flow; oblique shock waves & Prandtl-Meyer expansion fans; unsteady wave motion; linearized theory. Application to nozzles, diffusers, airfoils, shock tubes and other geometries. Prerequisite: AE 202 and MATH 285. Credit or concurrent registration in ME 300.

AE 321  Mechs of Aerospace Structures  credit: 3 Hours.
Fundamental concepts in the linear theory of elasticity, including stress, strain, equilibrium, compatibility, material constitution and properties. Failure mechanisms and criteria. Application to plane stress-strain problems, beams in extension and bending, and shafts in torsion. Prerequisite: MATH 285 and TAM 210.

AE 323  Applied Aerospace Structures  credit: 3 Hours.

AE 352  Aerospace Dynamical Systems  credit: 3 Hours.
Particle kinematics and dynamics; Lagrange's equations; vibration of multiple degree-of-freedom systems; rotational kinematics and dynamics of rigid bodies. Credit is not given for both AE 352 and TAM 212. Prerequisite: MATH 225, MATH 285, and TAM 212.

AE 353  Aerospace Control Systems  credit: 3 Hours.
Modeling of linear dynamic systems; Laplace transform techniques; linear feedback control systems; stability criteria; design techniques. Credit is not given for both AE 353 and either GE 320 or ME 340. Prerequisite: MATH 225, MATH 285, and TAM 212.

AE 370  Aerospace Numerical Methods  credit: 3 Hours.
Numerical methods used in aerospace engineering. Numerical integration, curve fitting, root finding, numerical solution of ODE, solution of linear systems of equations. Finite difference. Rayleigh-Ritz, and Finite element methods. Applications to simple structural mechanics and aerodynamics problems encountered in aerospace engineering. Prerequisite: Credit or concurrent registration in AE 311 or AE 312; credit or concurrent registration in AE 321 or AE 323.

AE 395  Honors Project  credit: 1 to 4 Hours.
Special aerospace engineering project or reading course for James Scholars in engineering. Prerequisite: Consent of instructor.

AE 396  Honors Seminar  credit: 1 to 4 Hours.
Special lecture sequences or discussion groups arranged each term to bring James Scholars in engineering into direct contact with the various aspects of engineering practices and philosophy. Prerequisite: Consent of instructor.

AE 397  Independent Study  credit: 1 to 3 Hours.
Independent theoretical and experimental projects in aerospace engineering. May be repeated. Prerequisite: Consent of instructor.

AE 398  Special Topics  credit: 1 to 4 Hours.
Lectures and discussions relating to new areas of interest. See class schedule for topics and prerequisites. May be repeated if topics vary.

AE 402  Orbital Mechanics  credit: 3 or 4 Hours.
Analysis of orbits in an inverse-square gravitational field; elementary rocket dynamics, impulsive orbit transfer and rendezvous, and Lambert's Theorem with applications; patched-conic trajectories, planetary gravity-assist maneuvers, and linearized orbit theory with application to simplified analytical models; perturbations. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 202.

AE 403  Spacecraft Attitude Control  credit: 3 or 4 Hours.
Theory and applications of spacecraft attitude dynamics and control; Euler angles, direction cosines, quaternions, and Gibbs-Rodrigues parameters; attitude sensors and control actuators; spin, three-axis active, reaction wheel, control moment gyro, and gravity gradient control systems; environmental effects. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 352 and AE 353.

AE 410  Computational Aerodynamics  credit: 3 or 4 Hours.
Computational technologies as solution tools for various aerodynamic problems; modeling and solution of one-and two-dimensional, incompressible and compressible, steady and unsteady inviscid external flow fields. Computational laboratory for practical experience. SAME as AER 432. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 311; credit or concurrent enrollment in AE 312.

AE 412  Viscous Flow & Heat Transfer  credit: 4 Hours.
Momentum and thermal transport in wall boundary-layer and free shear flows, solutions to the Navier-Stokes equations for heat conducting laminar and turbulent shear flows; similarity concepts; thermal boundary layers in ducts and high-speed aerodynamic boundary layers. Same as AE 412. 4 undergraduate hours. 4 graduate hours. Prerequisite: AE 311 or ME 310.

AE 416  Applied Aerodynamics  credit: 3 or 4 Hours.
Two-dimensional and finite wing theory with emphasis on the mechanisms of lift and drag generation; Reynolds number and Mach number effects; drag analysis; high-lift wing systems; propeller and rotor aerodynamics; control surface design; application of V/STOL aerodynamics. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 311.

AE 419  Aircraft Flight Mechanics  credit: 3 or 4 Hours.
Steady and quasi-steady aircraft flight performance; take-off and landing, climbing and diving, cruise, level turn, and energy methods; longitudinal, directional, and lateral static stability and control; longitudinal and lateral motion and dynamic stability. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 202 and AE 353.

AE 420  Finite Element Analysis  credit: 3 or 4 Hours.
Same as MSE 451 and ME 471. See ME 471.

AE 427  Mechanics of Polymers  credit: 3 Hours.
Same as MSE 454 and TAM 427. See TAM 427.

AE 428  Mechanics of Composites  credit: 3 Hours.
Same as MSE 456 and TAM 428. See MSE 456.

AE 433  Aerospace Propulsion  credit: 3 or 4 Hours.
Fundamentals of rocket and airbreathing jet propulsion devices electric propulsion; prediction of thrust, combustion reactions, specific fuel consumption, and operating performance; ramjets; turbojets; turbofans; turboprops; aerothermodynamics of inlet, combustor, and nozzle; compressors, turbines; component matching, fundamentals of electrothermal, electromagnetic elastostatic thrusters, and solar sails. 3 undergraduate hours. 4 graduate hours. Prerequisite: AE 312 and PHYS 212.

AE 434  Rocket Propulsion  credit: 3 or 4 Hours.
Basic principles of chemical rocket propulsion and performance, rocket component design, liquid rockets, solid rocket motors, combustion processes, combustion instability. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 312 and AE 433.
AE 435  Electric Propulsion  credit: 3 or 4 Hours.
Elements of electric propulsion as applied to near-earth and deep-space missions; impact on spacecraft design; physics of ionized gases; plasmodynamics; electrothermal, electromagnetic, and electrostatic acceleration of gases to high velocity; high-impulse thruster design and performance; the resistojet, arcjet, ion engine, Hall thruster, MPD arc thruster, and plasma gun. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 433.

AE 442  Aerospace Systems Design I  credit: 3 Hours.
Principles of systems engineering as they apply to the design process for aerospace flight systems; general design methodology; application of these concepts to the initial sizing of both aircraft and spacecraft systems. Intensive technical writing. 3 undergraduate hours. No graduate credit. AE 442 and AE 443 taken in sequence fulfill the Advanced Composition Requirement. Prerequisite: Credit or concurrent registration in AE 311, AE 323, and AE 352.

AE 443  Aerospace Systems Design II  credit: 3 Hours.
Continuation of AE 442. Conceptual design project of either an aircraft or spacecraft flight system to satisfy a given set of requirements. Project team organization. Emphasis on sizing, trade studies and design optimization, subsystem integration, and technical communication skills. 3 undergraduate hours. No graduate credit. To fulfill the Advanced Composition Requirement, credit must be earned for both AE 442 and AE 443. Prerequisite: AE 442. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AE 451  Aeroelasticity  credit: 3 or 4 Hours.
In-depth examination of aerodynamic and dynamic structural phenomena associated with flexible airplanes and missiles; divergence of linear and nonlinear elastic lifting surfaces; effect of elastic and inelastic deformations on lift distributions and stability; elastic flutter of straight and swept wings; equations of disturbed motion of elastic and inelastic aircraft; dynamic response to forces, gusts, and continuous atmospheric turbulence; creep divergence of lifting surfaces; flutter in the presence of creep; effect of temperature on inelastic divergence and flutter. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 352 or TAM 412; TAM 251.

AE 454  Systems Dynamics & Control  credit: 3 or 4 Hours.
Examination of the common core of dynamics and control theory. Fundamental concepts of Lagrangian dynamics, state space representations, Hamiltonian and modern dynamics, stability theory, and control of dynamical systems. 3 undergraduate hours. 4 graduate hours. Prerequisite: AE 353.

AE 456  Global Nav Satellite Systems  credit: 4 Hours.
Same as ECE 456. See ECE 456.

AE 460  Aerodynamics & Propulsion Lab  credit: 2 Hours.
Theory and application of experimental techniques in aerospace engineering with emphasis on fluid dynamic, aerodynamic, thermal, combustion, and propulsion phenomena. 2 undergraduate hours. No graduate credit. Prerequisite: AE 311; credit or concurrent registration in AE 433.

AE 461  Structures & Control Lab  credit: 2 Hours.
Theory and application of experimental techniques in aerospace engineering with emphasis on structural mechanics, vibrations, dynamics, and control systems. 2 undergraduate hours. No graduate credit. Prerequisite: AE 321 and AE 352. Credit or concurrent registration in AE 323 and AE 353.

AE 468  Optical Remote Sensing  credit: 3 Hours.
Same as ECE 468. See ECE 468.

AE 482  Introduction to Robotics  credit: 4 Hours.
Same as ECE 470 and ME 445. See ECE 470.

AE 483  Unmanned Aerial Vehicle (UAV) Navigation and Control  credit: 3 Hours.
Design, analysis, and application of decision algorithms to modern aerospace systems: global positioning systems, air traffic control systems, unmanned aerial vehicles, imaging and communication satellites, and planetary ground vehicles. 3 undergraduate hours. No graduate credit. Prerequisite: AE 202, AE 352, AE 353, AE 370, IE 300, and PHYS 212.

AE 497  Independent Study  credit: 1 to 4 Hours.
Independent theoretical and experimental projects in aerospace engineering. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

AE 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in aerospace engineering intended to augment the existing curriculum. See Class Schedule or department course information for topics and prerequisite. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 undergraduate hours or 12 graduate hours.

Agricultural and Biological Engineering

Alan Hansen, Interim Head
338 Agricultural Engineering Sciences Building, 1304 West Pennsylvania Avenue, Urbana
PH: (217) 333-3570
http://abe.illinois.edu

The Department of Agricultural and Biological Engineering offers a four-year degree program in Agricultural and Biological Engineering through the College of Engineering that is described below.

The Department also offers a five-year dual degree program through both the College of Engineering and the College of ACES. Students who successfully complete this five-year academic program receive the Bachelor of Science in Agricultural and Biological Engineering degree from the College of Engineering as well as the Bachelor of Science in Agriculture degree with a major in Agricultural and Biological Engineering from the College of ACES. Both degree programs are joint between the College of Engineering and the College of ACES with students beginning as new freshmen in the College of ACES.

Curriculum in Agricultural and Biological Engineering

Fax: (217) 244-0323
E-mail: abe@illinois.edu

For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food

Information listed in this catalog is current as of 03/2017.
systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

### Concentrations
The agricultural and biological engineering program provides two concentrations: Agricultural Engineering and Biological Engineering. Each concentration has specific areas of specialization related to career interest.

#### Agricultural Engineering Concentration
The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Renewable Energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering

#### Biological Engineering Concentration
The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

### Overview of Curricular Requirements
The curriculum requires 128 hours for graduation. The curriculum is organized as follows.

#### Orientation and Professional Development
These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

<table>
<thead>
<tr>

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

#### Agricultural and Biological Engineering Technical Core
These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of agricultural and biological engineering and the background for the technical courses and electives in each student’s concentration.

Total Hours 14

Total for the Agricultural Engineering Concentration 44

1 The extra hour of credit for this course may be used to help meet free elective requirements.

1 2 3

Other Technical Electives · Group A (http://abe.illinois.edu/undergraduate/agricultural)

For the Biological Engineering Concentration

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group A 1

Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A, and the remainder approved Other Technical Electives – Group B 2 3

Total Hours 21

1 Biological and Natural Science Electives · Group B (http://abe.illinois.edu/undergraduate/biological)

2 Agricultural and Biological Engineering Technical Electives · Group B (http://abe.illinois.edu/undergraduate/biological)

3 Other Technical Electives · Group B (http://abe.illinois.edu/undergraduate/biological)

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 103 Macroeconomic Principles 1 3

Electives from the campus General Education Social and Behavioral Sciences list.

ECON 102 or ACE 100 may be substituted by petition.

ECON 102 or ACE 100 may be substituted by petition.

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105 Writing and Research

Advanced Composition (satisfied by completing ABE 469 in the Agricultural and Biological Engineering Technical Core)

Total Hours 4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home), give the student the opportunity to explore any intellectual area of unique interest. This
freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising website, so that there are at least 128 credit hours earned toward the degree.

1 College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home)

Suggested Sequence
The schedule that follows for each concentration is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. Refer to the appropriate sequence below for each concentration.

For the Agricultural Engineering Concentration

First Year

</table>

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.
2. MATH 220—Calculus may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4. One elective course must satisfy the General Education Advanced Composition requirement.
5. The extra hour of credit for this course may be used to help meet free elective requirements.
6a. Students in the Agricultural Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural).
6b. Students in the Biological Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group B (http://abe.illinois.edu/undergraduate/biological).
7a. Students in the Agricultural Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural), and the remainder selected from the approved list of Other Technical Electives – Group A (http://abe.illinois.edu/undergraduate/agricultural).
7b. Students in the Biological Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group B (http://abe.illinois.edu/undergraduate/biological), and the remainder selected from the approved list of Other Technical Electives – Group B (http://abe.illinois.edu/undergraduate/biological).
8. Satisfies the General Education Advanced Composition requirement.

Information listed in this catalog is current as of 03/2017.
Courses

ABE 100  Intro Agric & Biological Engrg  credit: 1 Hour.
Introduction to the engineering profession with career opportunities in the agricultural and biological engineering discipline. Concepts necessary for becoming a successful engineer including time management, design concepts, ethics, and teambuilding. Familiarization with laboratories, computer facilities, internships, and other opportunities. Team design experience. Emphasis on technical communication and problem-solving skills as well as career planning.

ABE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 12 hours.

ABE 223  ABE Principles: Machine Syst  credit: 2 Hours.
Machinery systems for off-road applications: internal combustion engines; fluid power; tractors, and traction; chemical application; grain harvesting. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 224  ABE Principles: Soil & Water  credit: 2 Hours.
Engineering principles and methods of design and management of natural resources and environmental systems; watershed and hydrologic cycle; infiltration and surveying; runoff and erosion; water quality; non-point source pollution. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 225  ABE Principles: Bioenvironment  credit: 2 Hours.
Principles of environmental control for biological structures: psychrometrics; mass and heat transfer through buildings; ventilation requirements. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 226  ABE Principles: Bioprocessing  credit: 2 Hours.
Principles of bioprocess engineering applied to food and agricultural products: material balances; fluid flow; heat and mass transfers; drying; evaporation; fermentation; distillation; process simulation. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 341  Transport Processes in ABE  credit: 3 Hours.
Principles of transport processes involving momentum, heat, and mass as applied to biological systems in agriculture, food, energy, and the environment. Credit is not given for both ABE 341 and CHBE 421. Prerequisite: ABE 223, ABE 224, ABE 225, ABE 226, and PHYS 213.

ABE 361  Off-Road Machine Design  credit: 3 Hours.
Design and development concepts of agricultural and industrial machines; analysis and synthesis of tillage, planting, harvesting, chemical application, material handling mechanisms, and precision farming tools. Prerequisite: ABE 223 and TAM 212.

ABE 397  Independent Study  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development or design work under the supervision of a member of the faculty. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

ABE 398  Special Topics  credit: 1 to 3 Hours.
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate term if topics vary to a maximum of 12 hours.

ABE 425  Engrg Measurement Systems  credit: 4 Hours.
Principles of instrumentation systems, including sensing, signal conditioning, computerized data acquisition, test design, data analysis and synthesis. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 425 and ME 360. Prerequisite: ECE 205.

ABE 430  Project Management  credit: 2 Hours.
Engineering team effectiveness; project definition; assessing related technologies; marketing and business planning related to engineering; budgeting and financial analyses of engineering projects; safety, ethics and environmental considerations; intellectual property; engineering proposal presentation. Same as TSM 430. 2 undergraduate hours. 2 graduate hours.

ABE 436  Renewable Energy Systems  credit: 3 or 4 Hours.
Renewable energy sources and applications, including solar, geothermal, wind, and biomass. Renewable energy’s role in reducing air pollution and global climate change. Capstone project to design a system for converting renewable energy into thermal or electrical energy. 3 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 436 and TSM 438. Prerequisite: PHYS 211.

ABE 440  Applied Statistical Methods I  credit: 4 Hours.
Same as ANSC 440, CPSC 440, FSHN 440, and NRES 440. See CPSC 440.

ABE 445  Statistical Methods  credit: 4 Hours.
Same as ANSC 445 and NRES 445. See ANSC 445.

ABE 446  Biological Nanoeengineering  credit: 3 or 4 Hours.
Nanodevice design through organization of functional biological components; bio-molecular function and bioconjugation techniques in nanotechnology; modulation of biological systems using nanotechnology; issues related to applying biological nanotechnology in food energy, health, and the environment. 3 undergraduate hours. 4 graduate hours. Prerequisite: MCB 150.

ABE 454  Environmental Soil Physics  credit: 3 Hours.
Provides the theoretical basis for understanding and quantifying the physical, hydrological, geotechnical, and thermal properties of soil in relation to environmental processes. Topics include general soil properties as a porous media, particle size, soil structure and aggregation, water retention and potential, flow in saturated soil, flow in an unsaturated soil, soil temperature and heat flow, soil mechanics, infiltration, and soil-plant-water relations. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 335 or NRES 201 or consent of instructor.

ABE 455  Erosion and Sediment Control  credit: 2 Hours.
Processes, estimation, and control of soil erosion by water, wind and resultant sedimentation. Upland, in-channel, urban, agricultural, disturbed (both military training and mining), and forested environments. Capstone experience in site planning and design. 2 undergraduate hours. 2 graduate hours. Prerequisite: CEE 350 or NRES 401; CEE 380 or NRES 201.
ABE 456 Land & Water Resources Engrg credit: 3 or 4 Hours.
Hydrology, hydraulics, design, construction and cost estimating of structures for the conservation and quality control of soil and water resources; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality control of soil and water for agriculture. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in TAM 335.

ABE 457 NPS Pollution Processes credit: 2 Hours.
Principles, concepts, and analysis of processes for nonpoint source pollution involving sediment, inorganic and organic chemicals, and microbial pathogens; hydrologic and pollutant interactions, pollutant fate and transport processes from storm water runoff and percolation; impact of pollutant transport on receiving water and ecosystems. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 224 or CEE 350.

ABE 458 NPS Pollution Modeling credit: 2 Hours.
Concepts, principles, and application of modeling for assessment and management of agricultural nonpoint source pollution. Modeling of agroecosystems and land use impacts on hydrologic and water quality response of upland catchments. Model selection, calibration, validation, and application for comparative analysis. Case studies in current watershed management issues, with a focus on agricultural waste and nutrient management, using existing field and watershed nonpoint source pollution models. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 457.

ABE 459 Drainage and Water Management credit: 3 or 4 Hours.
Design, construction, performance, and maintenance of agricultural drainage systems to meet both production and water quality objectives. Modeling drainage systems. Principles of conservation drainage. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in TAM 335.

ABE 463 Electrohydraulic Systems credit: 3 Hours.
Engineering principles of electrohydraulic control systems related to off-road vehicles. Basics of fluid power systems, concepts of electrohydraulic systems and controls, analysis and design of electrohydraulic control systems, and applications of electrohydraulic control. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 110 or both ECE 205 and ECE 206; ME 310 or TAM 335.

ABE 466 Engineering Off-Road Vehicles credit: 3 Hours.
Design and application of off-road vehicles for farm and construction use; thermodynamics of engines; measurement of power and efficiencies; power transmission and traction; chassis mechanics; operator environment. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ABE 466 and TSM 464. Prerequisite: ME 300.

ABE 469 Industry-Linked Design Project credit: 4 Hours.
Industry-submitted and sponsored design projects which utilize principles of design, engineering analysis and functional operation of engineering systems. Design teams develop concepts, evaluate alternatives, model and analyze solutions, and build and test a final product. Emphasizes on communication skills, technical writing, and interaction with industry representatives. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of ABE 361, CHBE 421, TAM 335; or credit or concurrent registration in ME 370. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

ABE 474 Indoor Environmental Control credit: 3 Hours.
Analysis of indoor environments and relationship with humans, animals and plants. Interactions between facilities operation and both human comfort and animal plant production. Psychrometrics, occupant health and comfort, structural heat transfer, heating and cooling loads, and energy and mass balances as related to indoor environment, air properties, and ventilation. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: TAM 335, and ME 300 or CHBE 321, or consent of instructor.

ABE 476 Indoor Air Quality Engineering credit: 4 Hours.
Principles and applications of indoor air quality. Particle mechanics, gas kinetics, air quality sampling principles and techniques, air cleaning technologies such as filters, cyclones, electrostatic precipitation for indoor environments; ventilation effectiveness for pollutant control. Research or design project. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 213, MATH 285, and TAM 335.

ABE 482 Package Engineering credit: 3 Hours.
Same as FSHN 469. See FSHN 469.

ABE 483 Engrg Properties of Food Matls credit: 3 Hours.
Physical properties of foods and biological materials; properties relating to equipment design and the sensing and control of food processes; thermal, electromagnetic radiation, rheological, and other mechanical properties. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 251; either CHBE 421 or both ME 330 and TAM 335.

ABE 488 Bioprocessing Biomass for Fuel credit: 3 Hours.
Engineering and scientific principles governing bioprocessing of biomass for production of ethanol and other fermentation products. Process unit operations; conventional and alternative feed stock materials; recovery of value-added coproducts and other variables involved in producing fuel ethanol; process simulation; economic analysis. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHBE 321 and TAM 335.

ABE 497 Independent Study credit: 1 to 4 Hours.
Individual research, special problems, thesis, development or design work under the supervision of a member of the faculty. 1 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

ABE 498 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 16 hours.

Bioengineering

For the Degree of Bachelor of Science in Bioengineering

Bioengineers use tools from biology, chemistry, physics and math to solve engineering problems that arise in biological systems related to biomaterials, biomechanics and prosthetics, tissue engineering, molecular modeling, imaging, bioinformatics, nanomedicine, synthetic biology, and drug delivery. The goal of research and education in bioengineering is to advance fundamental understanding of how human
biological systems function, and to develop effective technology-based solutions to the wide spectrum of societal needs in human development and disease diagnosis, treatment, and prevention.

The Bioengineering department (BIOE) aims to graduate students who:

- Enter into industry jobs in prominent companies as engineers who work in the areas of:
  - Medical device design
  - Manufacturing
  - Quality control
  - Marketing
  - And work toward the advancement of medicine
- Pursue graduate studies in bioengineering-related fields such as:
  - Imaging and Sensing
  - Therapeutics
  - Tissue Engineering
  - Computational and Systems Biology
  - Biomechanics
- Broaden their education by attending professional school in areas of medicine, law, and business
- Maintain professional development through societal memberships and industry workshops

The curriculum includes integration of principles of biology and engineering in coursework such as biomechanics, modeling of human physiology, bioinstrumentation, and cell and tissue engineering. The curriculum is project-based and has a strong emphasis on systems-thinking as an approach to large-scale bioengineering problems. During the first and second years, students take fundamental courses introducing them to bioengineering as a field and introducing clinically relevant projects as learning experiences. The program also features hands-on laboratory courses for real-world experience throughout the curriculum. The final two years allow students to focus on a particular track of Bioengineering for further study. A year-long senior capstone design course provides experience in applying engineering fundamentals to biological problems submitted by faculty, clinicians, and industrial firms.

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home).

### Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

1. May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.
Track Electives

Students must complete 15 hours of study which show coherence, focus, and purpose within a bioengineering context. Students may choose from among the following pre-approved tracks:

- Biomechanics
- Cell and Tissue Engineering
- Computational and Systems Biology
- Imaging and Sensing
- Therapeutics Engineering

Alternately a student may devise a special track and set of courses which must be approved by the Bioengineering Department. In either case, overage hours in required courses may be counted toward the 15-hour minimum.

Track electives selected from a departmentally approved list of track elective courses.¹

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list.

Electives from the campus General Education Humanities and the Arts list.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105 Writing and Research

Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

¹ College of Engineering Advising Website. (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+E lectives?src=search)

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is MCB 150.
3 Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+E) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4 May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.
5 To be selected from a departmentally approved list of track elective courses (http://bioengineering.illinois.edu/undergraduate-programs/track-electives) if a pre-approved track is chosen. Alternately a student may devise a special track which must be approved by the Bioengineering Department.

BIOE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/BIOE)

Courses

BIOE 100 Bioengineering Freshman Seminar credit: 0 Hours.
Seminar surveying a broad range of Bioengineering topics. Approved for S/U grading only. Prerequisite: Bioengineering Freshmen Only.

BIOE 120 Introduction to Bioengineering credit: 1 Hour.
Lectures and discussions of recent trends in bioengineering; topics typically include biological interaction with ultrasound and microwave radiation, modeling, instrumentation, biomaterials, biomechanics, biological heat and mass transfer, and medical imaging techniques.

BIOE 198 Special Topics credit: 1 to 3 Hours.
Subject offerings related to Bioengineering intended to augment the Bioengineering curriculum. Offerings will be at the freshman level. See class schedule or course information websites for topics and prerequisites. May be repeated if topics vary. Prerequisite: Majors only.

BIOE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

BIOE 201 Conservation Principles Bioeng credit: 3 Hours.
Material, energy, charge, and momentum balances in biological problems. Steady-state and transient conservation equations for mass, energy, charge, and momentum will be derived and applied to mathematically analyze physiological systems using basic mathematical principles, physical laws, stoichiometry, and thermodynamic properties. Prerequisite: CHEM 104, MCB 150, and PHYS 211.

BIOE 202 Cell & Tissue Engineering Lab credit: 2 Hours.
Principles of cell biology inherent in tissue engineering design. Lab experience in safely and skillfully manipulating cells of the four tissue types and performing various quantitative analyses on products produced by cells that have differentiated. Prerequisite: MCB 150, and credit or concurrent enrollment in BIOE 206.

BIOE 205 Signals & Systems in Bioengr credit: 3 Hours.
Introduction to signals and linear systems with examples from biology and medicine. Linear systems and mathematical models of systems, including differential equations, convolution, Laplace transforms, Fourier series and transforms, and discrete representations. Class examples and coursework apply general techniques to problems in biological signal analysis, including circuits, enzyme kinematics, and physiological system analysis. Use of Matlab and Simulink software to understand more complex systems. Prerequisite: CS 101, MATH 285, and PHYS 212.

BIOE 206 Cellular Bioengineering credit: 3 Hours.
Molecular and cellular biology focusing on instrumentation and measurement techniques: gene expression, translation, and regulation; cellular energetics and enzyme kinetics; membrane transport and cell signaling; cytoskeleton and the cell cycle; cell biology fundamentals emphasizing modern imaging and measurement systems to quantify cellular function. Credit is not given for both BIOE 206 and MCB 252. Prerequisite: MCB 150.
BIOE 220  Bioenergetics  credit: 4 Hours.
An integrative view of functional organization and energy transfer in biological systems. Emphasis on dynamics and kinetics of quantum, sub-molecular, and molecular interactions for metabolism. Topics include biomolecules of life, laws of thermodynamics, enzyme kinetics, protein-ligand binding, DNA binding, and modeling of molecular systems. Credit is not given for both BIOE 220 and ME 300, PHYS 214, or CHBE 321. Prerequisites: BIOE 201 and BIOE 206.

BIOE 297  Individual Study  credit: 1 to 4 Hours.
Special project or reading activity. May be repeated in the same or separate terms to a maximum of 12 hours. Prerequisite: Approved written application to department as specified by department or instructor.

BIOE 298  Special Topics  credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in bioengineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary to a maximum of 8 hours.

BIOE 301  Introductory Biomechanics  credit: 3 Hours.
Structure and mechanics of biological systems. Statics, dynamics, stress-strain analysis, Newtonian mechanics, and continuum mechanics. Applications to bone, soft tissue, and cells. Prerequisite: PHYS 211.

BIOE 302  Modeling Human Physiology  credit: 3 Hours.
Description, quantification, and modeling of human physiological systems, based on systems fundamentals. Components, relationships, and homeostatic controls of neural, musculoskeletal, respiratory, cardiovascular, endocrine, digestion, and renal-filtration systems. Application of mathematical modeling and MATLAB simulation to further understanding of the systems and relate physiological consequences to changes in environment or component function. Prerequisite: CS 101, BIOE 205, MATH 285, and MCB 252 or BIOE 206.

BIOE 303  Quantitative Physiology Lab  credit: 2 Hours.
Experiments involving the modeling and measurement of animal and human physiology systems. Use of computer simulations to provide mathematical descriptions of physiology behavior. Calibration and validation of models through hands-on experiments. Focus on quantitative measurement of neural, cardiovascular, respiratory, muscular, and endocrine system functions. Prerequisite: BIOE 302.

BIOE 306  Biofabrication Lab  credit: 3 Hours.
Experiments involving design of bioreactors and microfluidic systems, advanced cell culture, and quantitative analysis techniques such as polmerase chain reaction and atomic force microscopy. Laboratory techniques relating to current literature and state of the art in the field of bioengineering. Prerequisite: BIOE 202. Departmental approval required for non-majors.

BIOE 310  Comp Tools Bio Data  credit: 3 Hours.
Fundamental and applied statistics, including probability distributions, parameter estimation, descriptive statistics, hypothesis testing, and linear regression. Statistical methods in genomics including sequence analysis, gene expression data analysis, human genomic variation, regulatory genomics, and cancer genomics. Credit is not given for both BIOE 310 and IE 300. Prerequisites: BIOE 205 and BIOE 206.

BIOE 360  Transport & Flow in Bioengrg  credit: 3 Hours.
Fundamentals of fluid dynamics and mass transport applied to analysis of biological systems. Quantitative understanding of microscopic to macroscopic phenomena in biological systems related to their sensing by imaging techniques. Molecular phenomena in both healthy tissue and disease using examples from cardiovascular problems and cancer using ultrasound, optical and MRI techniques. Credit is not given for both BIOE 360 and any of CHBE 421, CHBE 451, or TAM 335. Prerequisites: BIOE 201 and BIOE 301.

BIOE 380  Biomedical Imaging  credit: 3 Hours.
Same as ECE 380. See ECE 380.

BIOE 397  Individual Study  credit: 1 to 4 Hours.
Special project or reading activity. May be repeated up to 8 hours in a term to a maximum of 12 total hours. Prerequisite: Approved written application to department as specified by department or instructor.

BIOE 398  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in bioengineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary to a maximum of 8 hours.

BIOE 410  Computational Cancer Biology  credit: 3 Hours.
Mathematical modeling of the process of carcinogenesis as somatic cell evolution. Focus on current research topics in cancer biology using data from next-generation sequencing technologies. Overview of database resources and algorithmic and modeling methods relating to biological problems. 3 undergraduate hours. No graduate credit. Prerequisite: BIOE 206, CS 101, MATH 285.

BIOE 414  Biomedical Instrumentation  credit: 3 Hours.
Engineering aspects of the detection, acquisition, processing, and display of signals from living systems; biomedical sensors for measurements of biopotentials, ions and gases in aqueous solution, force, displacement, blood pressure, blood flow, heart sounds, respiration, and temperature; therapeutic and prosthetic devices; medical imaging instrumentation. Same as ECE 414. 3 undergraduate hours. 3 graduate hours. Prerequisite: BIOE 205, ECE 205 or ECE 210.

BIOE 415  Biomedical Instrumentation Lab  credit: 2 Hours.
Laboratory to accompany BIOE 414. use of sensors and medical instrumentation for static and dynamic biological inputs. Measurement of biomedical signals. 2 undergraduate hours. 2 graduate hours. Same as ECE 415. Prerequisite: Credit or concurrent registration in BIOE 414.

BIOE 416  Biosensors  credit: 3 Hours.
Same as ECE 416. See ECE 416.

BIOE 420  Intro Bio Control Systems  credit: 3 Hours.
Systems engineering approach to modeling physiological systems to examine natural biological control systems, homeostasis, and control through external medical devices. Introduces open loop and closed loop feedback control; Laplace and Fourier analysis of system behavior; impulse and steady state responses; physiological modeling and system identification; and stability. Includes biological systems for endocrine function, muscle position, neuronal circuits, and cardiovascular function. Mathematical modeling, MATLAB and Simulink simulation, and physiological measurements to relate control systems to maintenance of internal environment. 3 undergraduate hours. No graduate credit. Credit is not given for BIOE 420 if credit for AE 353, ECE 486, GE 320, or ME 340 has been earned. Prerequisites: BIOE 205, BIOE 302, BIOE 303, BIOE 414, BIOE 415.

Information listed in this catalog is current as of 03/2017
BIOE 430  Introduction to Synthetic Biology credit: 3 or 4 Hours.
Introduction to the field of synthetic biology. Engineering applications of
biomolecular systems and cellular capabilities for a variety of application
biological background of gene regulation, experimental methods for
circuit engineering, and mathematical basis for circuit modeling.
Examples in biofuels, biomechanics, and other areas will be discussed.
3 undergraduate hours. 4 graduate hours. Prerequisite: BIOE 206 or
MCB 252; and MATH 285.

BIOE 435  Senior Design I credit: 2 Hours.
Capstone bioengineering design activity to develop solutions to projects
provided by academia, industry, or clinical settings, utilizing principles
of design, engineering analysis, and functional operation of engineering
systems. Concept-design, safety, human-factors, quality, and Six-
Sigma considerations. Initial solution proposals meeting professional
technical-writing and communication standards. Concluded in BIOE 436.
2 undergraduate hours. No graduate credit. Prerequisite: BIOE 301,
BIOE 414, and BIOE 415.

BIOE 436  Senior Design II credit: 2 Hours.
Continuation of BIOE 435. Design teams finalize concepts, evaluate
alternatives, model and analyze solutions, build and test a final
product, and present the results professionally to project sponsors. 2
undergraduate hours. No graduate credit. Prerequisite: BIOE 435.

BIOE 461  Cellular Biomechanics credit: 4 Hours.
Same as TAM 461. See TAM 461.

BIOE 467  Biophotonics credit: 3 Hours.
Same as ECE 467. See ECE 467.

BIOE 473  Biomaterials Laboratory credit: 3 Hours.
Same as MSE 472. See MSE 472.

BIOE 474  Metabolic Engineering credit: 3 or 4 Hours.
Same as CHBE 474. See CHBE 474.

BIOE 476  Tissue Engineering credit: 3 Hours.
Tissue engineering therapies for cell-based, material-based, and
therapeutic-based solutions. Stem cells, immunology, and clinical
applications. 3 undergraduate hours. 3 graduate hours. Prerequisite:
BIOE 301.

BIOE 479  Cancer Nanotechnology credit: 3 Hours.
Applications in Cancer and Mechanobiology will provide an introduction
to basic concepts in applications of nanotechnology in mechanobiology
and in cancer. This is a highly interdisciplinary field of research
where knowledge from various discipline need to be presented and
integrated. The course will be a team taught course by faculty from
Engineering and LAS. There will be 4 main sections of the course; (i)
biological concepts and cancer biology, (ii) introduction to bottom
nanotechnology and nanomedicine, (iii) Microfluidics, Lab on Chip, and
Top Down Nanotechnology, and (iv) applications in cellular mechanics,
i.e. mechanobiology and nanotechnology. The course will be targeted
for first year graduate students and senior undergraduate students. 3
undergraduate hours. 3 graduate hours. Approved for letter and S/U
grading. Prerequisite: BIOE 206, CHEM 232.

BIOE 480  Magnetic Resonance Imaging credit: 3 or 4 Hours.
Same as ECE 480. See ECE 480.

BIOE 481  Whole-Body Musculoskel Biomech credit: 3 or 4 Hours.
Same as ME 481. See ME 481.

BIOE 482  Musculoskel Tissue Mechanics credit: 3 Hours.
Same as ME 482. See ME 482.

For the Degree of Bachelor of Science in Civil Engineering

Civil engineering is a profession that applies the basic principles of
science in conjunction with mathematical and computational tools to
solve problems associated with developing and sustaining civilized life
on our planet. Civil engineering works are generally one-of-a-kind projects;
they are often grand in scale; and they usually require cooperation
among professionals of many different disciplines. The completion of
a civil engineering project involves the solution of technical problems
in which uncertainty of information and myriad non-technical factors
often play a significant role. Some of the most common examples of civil
engineering works include bridges, buildings, dams, airports, highways,
tunnels, and water distribution systems. Civil engineers are concerned
with flood control, landslides, air and water pollution, and the design of
facilities to withstand earthquakes and other natural hazards, in addition
to protecting our environment for a sustainable future.

The civil engineering program comprises seven areas (construction
engineering and management, construction materials engineering,
environmental engineering, geotechnical engineering, environmental
hydrology and hydraulics, structural engineering, and transportation
engineering) and three interdisciplinary programs (sustainable and
resilient infrastructure systems; energy, water, and environmental
sustainability; and societal risk management). Although each area has its
own special body of knowledge and engineering tools, they all rely on the
same fundamental core principles. Civil engineering projects often draw
expertise from many of these areas and programs.

CEE’s Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering
   profession as practicing engineers and consultants with prominent
companies and organizations in diverse areas that include structural, transportation, geotechnical, materials, environmental, and hydrologic engineering; construction management; or other related or emerging fields.

2. Pursue graduate education and research at major research universities in civil and environmental engineering, and related fields.

3. Pursue professional licensure.

4. Advance to leadership positions in the profession.

5. Engage in continued learning through professional development.

6. Participate in and contribute to professional societies and community services.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student’s academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

<table>

Science Elective

This elective allows the student to gain additional depth in science. The course should be selected according to the requirements and recommendations for the selected area of study, which is subject to approval by the faculty Program Review Committee.

Civil Engineering Technical Electives

This course work is designed to give each student a broad background in the areas of civil engineering through the core courses and to allow each student to develop a focused program through advanced technical electives in chosen primary and secondary fields. There are seven areas of study which include:

- Construction Engineering and Management
- Construction Materials Engineering
- Environmental Engineering
- Environmental Hydrology and Hydraulic Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering

In addition to the areas of study, three interdisciplinary programs can be chosen by students. They include:

- Sustainable and Resilient Infrastructure Systems
- Energy-Water-Environment Sustainability
- Societal Risk Management

The fundamental principles of civil engineering design and the behavior of civil engineering systems are emphasized throughout the course work.
The specific choices of courses in this category are made through the submission of the Plan of Study, which is subject to approval by the faculty Program Review Committee.

Civil engineering technical courses, selected as follows, to at least include:

- **Civil Engineering Core Courses**
  - The courses that are required and recommended for the primary and secondary fields are listed in the Civil Engineering Undergraduate Handbook. Select at least 5 courses from the following list:
    - CEE 300 Behavior of Materials 4
    - CEE 310 Transportation Engineering 3
    - CEE 320 Construction Engineering 3
    - CEE 330 Environmental Engineering 3
    - CEE 340 Energy and Global Environment 3
    - CEE 350 Water Resources Engineering 3
    - CEE 360 Structural Engineering 3
    - CEE 380 Geotechnical Engineering 3

- **Primary Field Advanced Technical Electives**
  - Select courses from approved lists for appropriate programs of study within the seven areas or three interdisciplinary programs of civil engineering. Design experience is distributed in 200-level, 300-level, and 400-level CEE courses including integrated design courses. Course lists can be found in the Civil Engineering Undergraduate Handbook.

- **Secondary Field Advanced Technical Electives**
  - Select courses from approved lists to complement the primary area and add breadth to the program of study. Course lists can be found in the Civil Engineering Undergraduate Handbook.

**Liberal Education**

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

- **ECON 102** Microeconomic Principles (Recommended) 3
- **ECON 103** Macroeconomic Principles 3
- **Electives from the campus General Education Social and Behavioral Sciences list** 3
- **Electives from the campus General Education Humanities and the Arts list** 6
- **Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts** 6

**Total Hours** 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

**Composition**

These courses teach fundamentals of expository writing.

<table>
<thead>
<tr>

**Total Hours** 7

**Free Electives**

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+E electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

**Suggested Sequence**

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Total Semester Hours: 15

Total Hours: 128-127

1. Offered in the fall semester should be taken in the first or second semester of enrollment in Civil Engineering.

2. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101.

3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

4. Liberal education electives ([https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives](https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives)) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

5. Civil engineering technical courses are defined as core courses and advanced technical electives and must total 34 hours of credit. Five courses and a minimum of fifteen hours must be core courses as outlined in the Civil Engineering Undergraduate Handbook. ([http://cee.illinois.edu/handbooks](http://cee.illinois.edu/handbooks)) Advanced technical electives are selected to correspond with chosen primary and secondary areas of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook. ([http://cee.illinois.edu/handbooks](http://cee.illinois.edu/handbooks)) A minimum of twelve and six hours must be taken for the primary and secondary areas, respectively.

6. The science elective is selected in accord with recommendations for the chosen primary area of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook ([http://cee.illinois.edu/handbooks](http://cee.illinois.edu/handbooks)).

CIVIL ENGINEERING PROGRAM COMPLETION

CIVIL ENGINEERING PROGRAM COMPLETION

1. CEE 202 & CEE 201
2. CEE 300 & CEE 310
3. CEE 495 & CEE 496
4. CEE 498 & CEE 499

TOTAL CIVIL ENGINEERING MANDATORY COURSES: 25 CREDITS

Advanced technical electives and must total 34 hours of credit. Five courses and a minimum of fifteen hours must be Core Courses as outlined in the Civil Engineering Undergraduate Handbook. ([http://cee.illinois.edu/handbooks](http://cee.illinois.edu/handbooks)) Advanced technical electives are selected to correspond with chosen primary and secondary areas of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook. ([http://cee.illinois.edu/handbooks](http://cee.illinois.edu/handbooks)) A minimum of twelve and six hours must be taken for the primary and secondary areas, respectively.

1. Information listed in this catalog is current as of 03/2017.
CEE 320 Construction Engineering credit: 3 Hours.
Construction engineering processes: contracting and bonding, planning and scheduling, estimating and project control, productivity models, and construction econometrics. Prerequisite: CEE 201; credit or concurrent registration in CS 101 and CEE 202.

CEE 330 Environmental Engineering credit: 3 Hours.
Sources, characteristics, transport, and effects of air and water contaminants; biological, chemical, and physical processes in water; atmospheric structure and composition; unit operations for air and water quality control; solid waste management; environmental quality standards. Prerequisite: CHEM 104.

CEE 340 Energy and Global Environment credit: 3 Hours.
Introduction to evaluating multiple impacts of engineering decisions. Topics include mass and chemical balances; effects of engineered systems on local and global environment, health, and risk; economic, consumer, and social considerations; provision of conventional and renewable energy; and future projections. Design projects emphasize making appropriate decisions by quantifying total impact and evaluating social environment. Approved for both letter and S/U grading. Prerequisite: PHYS 211; PHYS 213; CEE 201 or IE 310; CEE 202, IE 300, or STAT 200; or permission of instructor. CEE students only.

CEE 350 Water Resources Engineering credit: 3 Hours.
Quantitative aspects of water in the earth's environment and its engineering implications, including design and analysis of systems directly concerned with use and control of water; quantitative introduction to hydrology, hydraulic engineering, and water resources planning. Prerequisite: CEE 202; credit or concurrent registration in CEE 201.

CEE 360 Structural Engineering credit: 3 Hours.
Analysis, behavior, and design of trusses and framed structures under static loads; member forces in trusses, shear and moment diagrams, deflections, simple applications of the force method and slope-deflection; computer applications. Prerequisite: TAM 251.

CEE 380 Geotechnical Engineering credit: 3 Hours.
Classification of soils, compaction in the laboratory and in the field, soil exploration, boring and sampling, permeability of soils, one-dimensional settlement analyses, strength of soil, and foundations. Prerequisite: TAM 251.

CEE 398 Special Topics credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in civil and environmental engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. Approved for letter and S/U grading. May be repeated in the same or separate terms if topics vary.

CEE 401 Concrete Materials credit: 4 Hours.
Examination of the influence of constituent materials (cements, water, aggregates and admixtures) on the properties of fresh and hardened concrete, concrete mix design, handling and placement of concrete, and behavior of concrete under various types of loading and environment. Laboratory exercises utilize standard concrete test methods. Field trips are held during some scheduled laboratory sessions. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 300.

CEE 405 Asphalt Materials I credit: 3 or 4 Hours.
Properties and control testing of bituminous materials, aggregates for bituminous mixtures, and analysis and design of asphalt concrete and liquid asphalt cold mixtures; structural properties of bituminous mixes; surface treatment design; recycling of mixtures. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 406 Pavement Design I credit: 3 or 4 Hours.
Analysis, behavior, performance, and structural design of highway flexible and rigid pavements; climate factors, drainage, traffic loading analysis, and life cycle cost analysis. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 407 Airport Design credit: 3 or 4 Hours.
Basic principles of airport facilities design to include aircraft operational characteristics, noise, site selection, land use compatibility, operational area, ground access and egress, terminals, ground service areas, airport capacity, and special types of airports. 3 undergraduate hours. 3 or 4 graduate hours.

CEE 408 Railroad Transportation Engineering credit: 3 or 4 Hours.
Principles and analysis of railroad transportation efficiency, economics, energy, and engineering; effect on production and markets. Railroad infrastructure; locomotive and rolling stock design, function, and operation. Computation of train speed, power, and acceleration requirements; railway traffic control and signaling. Quantitative analytical tools for rail-transportation decision-making and optimization. Field trip to observe railroad infrastructure, equipment and operations. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 409 Railroad Track Engineering credit: 3 or 4 Hours.
Railroad track engineering concepts including track component and system design, construction, evaluation, maintenance, load distribution, and wheel-rail interaction. Design and analysis tools for railroad track engineering and maintenance. Field trip to observe railroad track system and components. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 410 Railway Signaling & Control credit: 3 or 4 Hours.
Railway traffic control and signaling systems; train performance and scheduling tools; analysis of temporal and spatial separation of trains for safety and efficiency; train movement authority and operating rules, track circuit and wireless train position monitoring technology; interlocking design; railroad capacity modeling tools; economic analysis of traffic control system design, optimization, and selection. Field trip to observe signal system infrastructure and railway traffic operations control center. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 411 RR Project Design & Constr credit: 3 or 4 Hours.
Critical elements in the development and planning of railroad construction projects; project economic justification; route alternative analysis procedures; cost estimation; site civil design; computer-aided track design; surveying; construction management; construction procedures for typical railroad projects. Design project covering a typical railroad capital construction projects. Field trip to observe the construction of a railroad capital project. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 412 High-Speed Rail Engineering credit: 3 or 4 Hours.
Development, engineering, design and construction of high-speed rail (HSR) passenger transport systems with particular emphasis on the unique engineering elements of HSR technology. Key elements of HSR systems and subsystems including: core systems (trains, power, signal, communication and control), track system and civil infrastructure (earthwork, bridges, viaducts and tunnels). Also covered are basic design and construction of HSR stations and rolling stock maintenance facilities. 3 undergraduate hours. 4 graduate hours.
CEE 415 Geometric Design of Roads credit: 4 Hours.
Highway classification; analysis of factors in developing a transportation facility; highway geometrics design and safety standards; roadway design element; human factors in roadway design; roadway location principles; intersection, interchange, and ramp design; drainage factors. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 310.

CEE 416 Traffic Capacity Analysis credit: 3 or 4 Hours.
Fundamentals of traffic engineering; analysis of traffic stream characteristics; capacity of urban and rural highways; design and analysis of traffic signals and intersections; traffic control; traffic impact studies; traffic accidents. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 310.

CEE 417 Urban Transportation Planning credit: 4 Hours.
Same as UP 430. See UP 430.

CEE 418 Public Transportation Systems credit: 3 or 4 Hours.
Transit systems basics, demand issues, design standards, economic and sustainability implications. Transit service planning for shuttle, corridor, and network systems, hybrid hierarchical systems, paratransit and demand-responsive services. Management of transit systems, fleet operations, and crew scheduling. Operational issues, vehicle movement, headway and schedule control. 3 undergraduate hours. 4 graduate hours. Prerequisite: CEE 310 or equivalent.

CEE 420 Construction Productivity credit: 3 or 4 Hours.
Application of scientific principles to the measurement and forecasting of productivity in construction engineering. Conceptual and mathematical formulation of labor, equipment, and material factors affecting productivity. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 320.

CEE 421 Construction Planning credit: 3 or 4 Hours.
Project definition; scheduling and control models; material, labor, and equipment allocation; optimal schedules; project organization; documentation and reporting systems; management and control. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 320.

CEE 422 Construction Cost Analysis credit: 3 or 4 Hours.
Application of scientific principles to costs and estimates of costs in construction engineering; concepts and statistical measurements of the factors involved in direct costs, general overhead costs, cost markups, and profits; the fundamentals of cost recording for construction cost accounts and cost controls. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 320.

CEE 424 Sustainable Const Methods credit: 4 Hours.
Identification of cutting edge sustainable construction materials, technologies, and project management strategies for use in the construction industry and evaluation of their potential to reduce the negative environmental impacts of construction activity. Examination of the current LEED for New Construction rating system, and case study analysis of highly successful recent "green construction projects" through student team assignments and presentations. Preparation for the LEED Green Associate professional licensing exam. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 320; two of CEE 420, CEE 421, or CEE 422.

CEE 430 Ecological Quality Engineering credit: 2 Hours.
Characteristics of rivers and lakes which affect the management of domestic and industrial wastewaters; chemical hazards assessment, surveillance and biomonitering, and review of regulations governing effluents. 2 undergraduate hours. 2 graduate hours. Prerequisite: CEE 330.

CEE 432 Stream Ecology credit: 3 or 4 Hours.
Description of physical, chemical, and biological characteristics in streams and rivers including an integrated treatment of the environmental factors affecting the composition and distribution of biota; emphasizes the application of ecological principles in aquatic ecosystem protection and management. Same as IB 450. 3 undergraduate hours. 3 or 4 graduate hours.

CEE 433 Water Technology and Policy credit: 3 or 4 Hours.
This course will cover technical and social concepts of water and wastewater treatment; water resources; water law, policy, and economics; and water in integrated systems. Emphasis will be on the intersection between engineering and policy. Communication is an important element of this course: engineers will learn to “speak” policy via writing assignments, multimedia presentation, and briefings. Course activities include lecture, discussion, presentations, and field trips. 3 undergraduate hours. 4 graduate hours. Prerequisite: CEE 340 or CEE 350.

CEE 434 Environmental Systems I credit: 3 Hours.
Introduction to the concepts and applications of environmental systems analysis. Application of mathematical programming and modeling to the design, planning, and management of engineered environmental systems, regional environmental systems, and environmental policy. Economic analysis, including benefit-cost analysis and management strategies. Concepts of tradeoff, non-inferior sets, single- and multi-objective optimization. Practical application to case studies to convey an understanding of the complexity and data collection challenges of actual design practice. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 201 and CEE 330.

CEE 437 Water Quality Engineering credit: 3 Hours.
Fundamental theory underlying the unit processes utilized in the treatment of water for domestic and industrial usage, and in the treatment of domestic and industrial wastewaters. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 330; credit or concurrent registration in TAM 335.

CEE 438 Science & Environmental Policy credit: 3 Hours.
Environmental treaties, the role of science and scientists in managing the national and global environment, effective science communication, scientific assessments, and the use of quantitative tools to inform policy decisions. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 202 or IE 300, STAT 400, or equivalent introductory probability and statistics course. Senior and Graduate students.

CEE 440 Fate Cleanup Environ Pollutant credit: 4 Hours.
Investigation of the regulatory and technical issues affecting solid and hazardous waste management, with an emphasis on the principles governing the transport, fate, and remediation of solid and hazardous waste in the subsurface, including advection, dispersion, sorption, interphase mass transfer, and transformation reactions. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 330.

CEE 442 Environmental Engineering Principles, Physical credit: 4 Hours.
Analysis of the physical principles which form the basis of many water and air quality-control operations; sedimentation, filtration, inertial separations, flocculation, mixing, and principles of reactor design; energy flows, thermal pollution, earth’s energy balance. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 437.
CEE 443  Env Eng Principles, Chemical  credit: 4 Hours.
Application of principles of chemical equilibrium and chemical kinetics to air and water quality. Thermodynamics, kinetics, acid-base chemistry, complexation, precipitation, dissolution, and oxidation-reduction. Applications. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 437.

CEE 444  Env Eng Principles, Biological  credit: 4 Hours.
Application of principles of biochemistry and microbiology to air and water quality, wastes, and their engineering management; biological mediated changes in water and in domestic and industrial wastewater. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 443.

CEE 445  Air Quality Modeling  credit: 4 Hours.
Practical and advanced approaches to pollutant transport and fate in the environment with emphasis on air pollution modeling, including aspects of pollutant dispersion, chemical transformation, and loss. Gaussian plume, chemical mass balance, chemical reaction, grid and trajectory models. Evaluation of models and the development of efficient air quality management strategies. Applications with use of regulatory USEPA air quality models. Same as ATMS 425. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 330 and credit or concurrent registration in TAM 335; or ATMS 302.

CEE 446  Air Quality Engineering  credit: 4 Hours.
Description and application of chemical and physical principles related to air pollutants, aerosol mechanics, attenuation of light in the atmosphere, air quality regulation, generation of air pollutants, methods to remove gaseous and particulate pollutants from gas streams, and atmospheric dispersion. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 330; credit or concurrent registration in TAM 335.

CEE 447  Atmospheric Chemistry  credit: 4 Hours.
Same as ATMS 420. See ATMS 420.

CEE 449  Environmental Engineering Lab  credit: 3 Hours.
Traditional analysis tools and techniques in analysis, control, and design of natural and engineered environmental systems including air, water, wastewater, solid and hazardous waste, and ecological systems. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 437 or CEE 446.

CEE 450  Surface Hydrology  credit: 3 Hours.
Descriptive and quantitative hydrology dealing with the distribution, circulation, and storage of water on the earth's surface; principles of hydrologic processes; methods of analysis and their applications to engineering and environmental problems. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 350.

CEE 451  Environmental Fluid Mechanics  credit: 3 Hours.
Incompressible fluid mechanics with particular emphasis on topics in analysis and applications in civil engineering areas; principles of continuity, momentum and energy, kinematics of flow and stream functions, potential flow, laminar motion, turbulence, and boundary-layer theory. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 350.

CEE 452  Hydraulic Analysis and Design  credit: 3 Hours.
Hydraulic analysis and design of engineering systems: closed conduits and pipe networks; hydraulic structures, including spillways, stilling basins, and embankment seepage; selection and installation of hydraulic machinery. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 335.

CEE 453  Urban Hydrology and Hydraulics  credit: 4 Hours.
Hydraulic analysis and design of urban, highway, airport, and small rural watershed drainage problems; discussion of overland and drainage channel flows; hydraulics of storm-drain systems and culverts; determination of design flow; runoff for highways, airports, and urban areas; design of drainage gutters, channels, sewer networks, and culverts. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 350.

CEE 457  Groundwater  credit: 3 Hours.
Physical properties of groundwater and aquifers, principles and fundamental equations of porous media flow and mass transport, well hydraulics and pumping test analysis, role of groundwater in the hydrologic cycle, groundwater quality and contamination. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 350 and TAM 335.

CEE 458  Water Resources Field Methods  credit: 4 Hours.
Scientific principles of measurement technologies and protocols used for water-resources measurements and experimental design of field-scale water-resources and environmental studies. Planning field studies; instruments and protocols for surface-water, and water-quality sampling; description of data quality. One-half-day laboratory field trips to streamflow monitoring stations and groundwater monitoring wells nearby. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 350.

CEE 460  Steel Structures I  credit: 3 Hours.
Introduction to the design of metal structures; behavior of members and their connections; theoretical, experimental, and practical bases for proportioning members and their connections. 3 undergraduate hours. No graduate credit. Prerequisite: CEE 360.

CEE 461  Reinforced Concrete I  credit: 3 Hours.
Strength, behavior, and design of reinforced concrete members subjected to moments, shear, and axial forces; emphasis on the influence of the material properties on behavior. 3 undergraduate hours. No graduate credit. Prerequisite: CEE 360.

CEE 462  Steel Structures II  credit: 3 or 4 Hours.
Metal members under combined loads; connections, welded and bolted; moment-resistant connections; plate girders, conventional behavior, and tension field action. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 460.

CEE 463  Reinforced Concrete II  credit: 3 or 4 Hours.
Strength, behavior, and design of indeterminate reinforced concrete structures, with primary emphasis on slab systems; emphasis on the strength of slabs and on the available methods of design of slabs spanning in two directions, with or without supporting beams. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 461.

CEE 465  Design of Structural Systems  credit: 3 Hours.
Examination of the whole structural design process including definition of functional requirements, selection of structural scheme, formulation of design criteria, preliminary and computer-aided proportioning, and analysis of response, cost, and value. 3 undergraduate hours. No graduate credit. Prerequisite: Credit in either CEE 460 or CEE 461 with concurrent registration in the other.
CEE 467 Masonry Structures  credit: 3 or 4 Hours.
Analysis, design, and construction of masonry structures. Mechanical properties of clay and concrete masonry units, mortar, and grout. Compressive, tensile, flexural, and shear behavior of masonry structural components. Strength and behavior of unreinforced bearing walls. Detailed design of reinforced masonry beams, columns, structural walls with and without openings, and complete lateral-force resisting building systems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 461.

CEE 468 Prestressed Concrete  credit: 3 or 4 Hours.
Strength, behavior, and design of prestressed reinforced concrete members and structures, with primary emphasis on pretensioned, precast construction; emphasis on the necessary coordination between design and construction techniques in prestressing. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 461.

CEE 469 Wood Structures  credit: 3 or 4 Hours.
Mechanical properties of wood, stress grades, and working stresses; effects of strength-reducing characteristics, moisture content, and duration of loading and causes of wood deterioration; glued-laminated timber and plywood; behavior and design of connections, beams, and beam-columns; design of buildings and bridges; other structural applications: trusses, rigid frames, arches, and pole-type buildings; prismatic plates and hyperbolic paraboloids. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 460 or CEE 461.

CEE 470 Structural Analysis  credit: 4 Hours.
Direct stiffness method of structural analysis; fundamentals and algorithms; numerical analysis of plane trusses, grids and frames; virtual work and energy principles; finite element method for plane stress and plane strain. 4 undergraduate hours. 4 graduate hours. Credit is not given for both CEE 470 and ME 471. Prerequisite: CEE 360.

CEE 471 Structural Mechanics  credit: 3 or 4 Hours.
Beams under lateral load and thrust; beams on elastic foundations; virtual work and energy principles; principles of solid mechanics, stress and strain in three dimensions; static stability theory; torsion; computational methods. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MATH 285 and TAM 251.

CEE 472 Structural Dynamics I  credit: 3 or 4 Hours.
Analysis of the dynamic response of structures and structural components to transient loads and foundation excitation; single-degree-of-freedom and multi-degree-of-freedom systems; response spectrum concepts; simple inelastic structural systems; systems with distributed mass and flexibility. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 360, MATH 285, and TAM 212.

CEE 480 Foundation Engineering  credit: 3 Hours.
Analysis and design of foundations, bearing capacity and settlement of foundations; stability of excavations and slopes; ground movements due to construction; analysis and design of excavations, retaining walls, slopes, and underground structures in soil and rock. 3 undergraduate hours. No graduate credit. Prerequisite: CEE 380.

CEE 483 Soil Mechanics and Behavior  credit: 4 Hours.
Composition and structure of soil; water flow and hydraulic properties; stress in soil; compressibility behavior and properties of soils; consolidation and settlement analysis; shear strength of soils; compaction and unsaturated soils; experimental measurements. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 380.

CEE 484 Applied Soil Mechanics  credit: 4 Hours.
Application of soil mechanics to earth pressures and retaining walls, stability of slopes, foundations for structures, excavations; construction considerations; instrumentation. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 483.

CEE 491 Decision and Risk Analysis  credit: 3 or 4 Hours.
Development of modern statistical decision theory and risk analysis, and application of these concepts in civil engineering design and decision making; Bayesian statistical decision theory, decision tree, utility concepts, and multi-objective decision problems; modeling and analysis of uncertainties, practical risk evaluation, and formulation of risk-based design criteria, risk benefit trade-offs, and optimal decisions. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 202.

CEE 493 Sustainable Design Eng Tech  credit: 4 Hours.
Quantitative sustainable design (QSD) and how to navigate engineering decision-making. Economic (life cycle costing, techno-economic assessment) and environmental (life cycle assessment, LCA) sustainability assessments, and how to link these tools to design decisions under uncertainty. Design of engineered technologies individually and in teams, with special attention to water infrastructure and bioenergy production. Semester-long design project that includes components from two of the following three CEE sub-disciplines: environmental, hydraulic, geotechnical. 4 undergraduate hours. 4 graduate hours. Prerequisite: CEE 340 or Graduate Standing.

CEE 495 Professional Practice  credit: 0 Hours.
Series of lectures by outstanding authorities on the practice of civil engineering and its relations to economics, sociology, and other fields of human endeavor. 0 undergraduate hours. 0 graduate hours. Approved for S/U grading only.

CEE 497 Independent Study  credit: 1 to 16 Hours.
Individual investigations or studies of any phase of civil engineering selected by the student and approved by the department. 1 to 4 undergraduate hours. 1 to 16 graduate hours. May be repeated. Prerequisite: Consent of instructor.

CEE 498 Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in civil and environmental engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

Computer Science

http://cs.illinois.edu

Head of Department: Rob A. Rutenbar
Department Office: 2232 Siebel Center, 201 N. Goodwin Avenue, Urbana, (217) 333-3373

For the Degree of Bachelor of Science in Computer Science

The computer science curriculum provides both a broad and deep knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and
from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework in areas of the student’s choosing follows in the second two years, which include either a senior thesis or a senior project. Graduates may go on to graduate study or leading positions in industry.

A combined B.S.-M.S. Computer Science degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 127).

A Software Engineering Certificate (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-softengcert) is also available to all students in the computer science curriculum interested in a career in software engineering. It provides the depth and breadth necessary for satisfying possible future software engineering accreditation requirements.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours: 3

1. This optional course is highly recommended and may be used to help meet free elective requirements.
2. External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Science elective, from departmentally approved list | 3

Total Hours: 25

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Computer Science Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of computer science.

Technical Electives

These courses stress the rigorous analysis and design principles practiced in major subdisciplines of computer science. Students select eight courses, at least six of which must be advanced CS courses. Three courses must be selected from one area of CS and at least one course should satisfy the team project requirement.

Technical electives to be chosen from departmentally approved list. Refer to department website.

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-liberalCulturalStudies) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list. 6

Electives from the campus General Education Humanities and the Arts list. 6

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6

Total Hours: 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

Advanced Composition. May be satisfied by taking any course in either the liberal education or free elective categories which has the Advanced Composition designation.

| Total Hours | 4 |

**Free Electives**

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. 19

**Suggested Sequence**

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Semester Hours 15

Total Hours 128

1. This optional course is highly recommended for freshmen, who may use it to help meet free elective requirements.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. RHET 105 should be taken in the first or second semester of the first year as authorized. The alternative is a social sciences or humanities elective.
4. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
5. To be chosen from a departmentally approved list, and to include at least three courses from a single focus area.

CS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CS)

Information listed in this catalog is current as of 03/2017
Courses

CS 100 Freshman Orientation credit: 1 Hour.
Introduction to Computer Science as a field and career for computer science majors. Overview of the field and specific examples of problem areas and methods of solution.

CS 101 Intro Computing: Engng & Sci credit: 3 Hours.
Fundamental principles, concepts, and methods of computing, with emphasis on applications in the physical sciences and engineering. Basic problem solving and programming techniques; fundamental algorithms and data structures; use of computers in solving engineering and scientific problems. Intended for engineering and science majors. Prerequisite: MATH 220 or MATH 221.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning II

CS 102 Little Bits to Big Ideas credit: 4 Hours.
Same as INFO 102. See INFO 102.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning I

CS 105 Intro Computing: Non-Tech credit: 3 Hours.
Computing as an essential tool of academic and professional activities. Functions and interrelationships of computer system components: hardware, systems and applications software, and networks. Widely used application packages such as spreadsheets and databases. Concepts and practice of programming for the solution of simple problems in different application areas. Intended for non-science and non-engineering majors. Prerequisite: MATH 112.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning I

CS 125 Intro to Computer Science credit: 4 Hours.
Basic concepts in computing and fundamental techniques for solving computational problems. Intended as a first course for computer science majors and others with a deep interest in computing. Prerequisite: Three years of high school mathematics or MATH 112.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning I

CS 126 Software Design Studio credit: 3 Hours.
Fundamental principles and techniques of software development. Design, documentation, testing, and debugging software, with a significant emphasis on code review. Credit is not given for both CS 242 and CS 126. Prerequisite: CS 125. For majors only.

CS 173 Discrete Structures credit: 3 Hours.
Discrete mathematical structures frequently encountered in the study of Computer Science. Sets, propositions, Boolean algebra, induction, recursion, relations, functions, and graphs. Credit is not given for both CS 173 and MATH 213. Prerequisite: One of CS 125, ECE 220; one of MATH 220, MATH 221.

CS 196 Freshman Honors credit: 1 Hour.
Offered for honors credit in conjunction with other 100-level computer science courses taken concurrently. A special examination may be required for admission to this course. May be repeated. Prerequisite: Concurrent registration in another 100-level computer science course (see Schedule).

CS 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

CS 200 Ethical & Professional Issues credit: 2 Hours.
Ethics for the computing profession. Ethical decision-making; licensing; intellectual property, freedom of information, and privacy. Credit is not given for both CS 210 and ECE 316. Prerequisite: CS 225. Junior standing required.

CS 225 Data Structures credit: 4 Hours.
Data abstractions: elementary data structures (lists, stacks, queues, and trees) and their implementation using an object-oriented programming language. Solutions to a variety of computational problems such as search on graphs and trees. Elementary analysis of algorithms. Prerequisite: CS 125 or ECE 220; CS 173 or MATH 213.
This course satisfies the General Education Criteria for:
UIUC: Quant Reasoning II

CS 233 Computer Architecture credit: 4 Hours.
Fundamentals of computer architecture: digital logic design, working up from the logic gate level to understand the function of a simple computer; machine-level programming to understand implementation of high-level languages; performance models of modern computer architectures to enable performance optimization of software; hardware primitives for parallelism and security. Prerequisite: CS 125 and CS 173; credit or concurrent enrollment in CS 225.

CS 241 System Programming credit: 4 Hours.
Basics of system programming, including POSIX processes, process control, inter-process communication, synchronization, signals, simple memory management, file I/O and directories, shell programming, socket network programming, RPC programming in distributed systems, basic security mechanisms, and standard tools for systems programming such as debugging tools. Credit is not given for both CS 241 and ECE 391. Prerequisite: CS 225; credit or concurrent registration in CS 233.

CS 242 Programming Studio credit: 3 Hours.
Intensive programming lab intended to strengthen skills in programming. Prerequisite: CS 241.

CS 296 Honors Course credit: 1 Hour.
Group projects for honors credit in computer science. Sections of this course are offered in conjunction with other 200-level computer science courses taken concurrently. A special examination may be required for admission to this course. May be repeated. Prerequisite: Concurrent registration in another 200-level computer science course (see Schedule).

CS 357 Numerical Methods I credit: 3 Hours.
Fundamentals of numerical methods for students in science and engineering; floating-point computation, systems of linear equations, approximation of functions and integrals, the single nonlinear equation, and the numerical solution of ordinary differential equations; various applications in science and engineering; programming exercises and use of high quality mathematical library routines. Same as MATH 357. Credit is not given for CS 357 if credit for CS 450 has been earned. (Counts for advanced hours in LAS). Prerequisite: A 100-level computer science course; MATH 225 or MATH 415; MATH 241.
CS 361 Probability & Statistics for Computer Science credit: 3 Hours.
Introduction to probability theory and statistics with applications to computer science. Topics include: visualizing datasets, summarizing data, basic descriptive statistics, conditional probability, independence, Bayes theorem, random variables, joint and conditional distributions, expectation, variance and covariance, central limit theorem. Markov inequality, Chebyshev inequality, law of large numbers, Markov chains, simulation, the PageRank algorithm, populations and sampling, sample mean, standard error, maximum likelihood estimation, Bayes estimation, hypothesis testing, confidence intervals, linear regression, principal component analysis, classification, and decision trees. Same as STAT 361. Credit is not given for both CS 361 and ECE 313. Prerequisite: MATH 220 or 221; credit or concurrent registration in MATH 225. For majors only.

CS 374 Introduction to Algorithms & Models of Computation credit: 4 Hours.
Analysis of algorithms, major paradigms of algorithm design including recursive algorithms, divide-and-conquer algorithms, dynamic programming, greedy algorithms, and graph algorithms. Formal models of computation including finite automata and Turing machines. Limitations of computation arising from fundamental notions of algorithm and from complexity-theoretic constraints. Reductions, undecidability and NP-completeness. Same as ECE 374. Prerequisite: CS 225; MATH 225 or MATH 415.

CS 397 Individual Study credit: 1 to 3 Hours.
May be repeated. Prerequisite: Consent of instructor.

CS 398 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in computer science intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

CS 410 Text Information Systems credit: 3 or 4 Hours.
Theory, design, and implementation of text-based information systems. Text analysis, retrieval models (e.g., Boolean, vector space, probabilistic), text categorization, text filtering, clustering, retrieval system design and implementation, and applications to web information management. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 411 Database Systems credit: 3 or 4 Hours.
Examination of the logical organization of databases: the entity-relationship model, the hierarchical, network, and relational data models and their languages. Functional dependencies and normal forms. Design, implementation, and optimization of query languages; security and integrity; concurrency control, and distributed database systems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 412 Introduction to Data Mining credit: 3 or 4 Hours.
Concepts, techniques, and systems of data warehousing and data mining. Design and implementation of data warehouse and on-line analytical processing (OLAP) systems; data mining concepts, methods, systems, implementations, and applications. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 413 Intro to Combinatorics credit: 3 or 4 Hours.
Same as MATH 413. See MATH 413.

CS 414 Multimedia Systems credit: 3 or 4 Hours.
Organization and structure of modern multimedia systems; audio and video encoding; quality of service concepts; scheduling algorithms for multimedia within OS and networks multimedia protocols over high-speed networks; synchronization schemes, user-interface design; multimedia teleservices. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391.

CS 418 Interactive Computer Graphics credit: 3 Hours.
Basic mathematical tools and computational techniques for modeling, rendering, and animating 3-D scenes. Same as CSE 427. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225; MATH 225 or MATH 415; MATH 241.

CS 419 Production Computer Graphics credit: 3 or 4 Hours.
Advanced methods for representing, displaying, and rendering two-, three-, and four-dimensional scenes. General algebraic curves and surfaces, splines, Gaussian and bump-function representation, fractals, particle systems, constructive solid geometry methods, lighting models, radiosity, advanced ray-tracing methods, surface texturing animation techniques, data visualization methods. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 418.

CS 420 Parallel Progrmg: Sci & Engr credit: 3 or 4 Hours.
Fundamental issues in design and development of parallel programs for various types of parallel computers. Various programming models according to both machine type and application area. Cost models, debugging, and performance evaluation of parallel programs with actual application examples. Same as CSE 402 and ECE 492. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 421 Progmm Languages & Compilers credit: 3 or 4 Hours.
Structure of programming languages and their implementation. Basic language design principles; abstract data types; functional languages; type systems; object-oriented languages. Basics of lexing, parsing, syntax-directed translation, semantic analysis, and code generation. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 233 and CS 373.

CS 422 Programming Language Design credit: 3 or 4 Hours.
Exploration of major language design paradigms using imperative and functional programming as unifying themes. Tools include both practical language processor construction and theoretical models. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 421.

CS 423 Operating Systems Design credit: 3 or 4 Hours.
Organization and structure of modern operating systems and concurrent programming concepts. Deadlock, virtual memory, processor scheduling, and disk systems. Performance, security, and protection. Same as CSE 423. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391.

CS 424 Real-Time Systems credit: 3 or 4 Hours.
Supervisory control aspects of Cyber Physical Systems (CPS): fundamentals of reliability analysis, real-time scheduling, simple feedback control, software fault tolerance architecture, wireless networking and energy saving, principles of safety critical system engineering. Student groups design and demonstrate supervisory control architecture for a robot. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241.

CS 425 Distributed Systems credit: 3 or 4 Hours.
Protocols, specification techniques, global states and their determination, reliable broadcast, transactions and commitment, security, and real-time systems. Same as ECE 428. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391.

Information listed in this catalog is current as of 03/2017
CS 426 Compiler Construction credit: 3 or 4 Hours.
Compiler structure, syntax analysis, syntax-directed translation, automatically constructed recognizers, semantic analysis, code generation, intermediate language, optimization techniques. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 421.

CS 427 Software Engineering I credit: 3 or 4 Hours.
Software process, analysis and design. Software development paradigms, system engineering, function-based analysis and design, and object-oriented analysis and design. Course will use team-projects for hands-on exercises. Same as CSE 426. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225 and CS 373.

CS 428 Software Engineering II credit: 3 or 4 Hours.
Continuation of CS 427. Software development, management, and maintenance. Project and configuration management, collaborative development models, software quality assurance, interoperability domain engineering and software reuse, and software re-engineering. Same as CSE 429. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 427.

CS 429 Software Engineering II, ACP credit: 3 Hours.
Continuation of CS 427. Identical to CS 428 except for the additional writing component. See CS 428. 3 undergraduate hours. 3 graduate hours. Prerequisite: CS 427.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition

CS 431 Embedded Systems credit: 3 Hours.
A survey of sampled data systems and embedded architecture; key concepts in common embedded system applications; signal processing and control; embedded microprocessor and device interface; time-critical I/O handling; data communications; real-time operating systems and techniques for the development and analysis of embedded real-time software; hands-on laboratory projects. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391.

CS 433 Computer System Organization credit: 3 or 4 Hours.
Computer system analysis and design. Organizational dependence on computations to be performed; speed and cost of parts and overall machines; instruction set design; pipeline and vector machines; memory hierarchy design. Same as CSE 422. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 233.

CS 436 Computer Networking Laboratory credit: 3 or 4 Hours.
Same as ECE 435. See ECE 435.

CS 438 Communication Networks credit: 3 or 4 Hours.
Layered architectures and the OSI Reference Model; design issues and protocols in the transport, network, and data link layers; architectures and control algorithms of local-area, point-to-point, and satellite networks; standards in networks access protocols; models of network interconnection; overview of networking and communication software. Same as ECE 438. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391; one of ECE 313, MATH 461, MATH 463.

CS 439 Wireless Networks credit: 3 or 4 Hours.
Same as ECE 439. See ECE 439.

CS 440 Artificial Intelligence credit: 3 or 4 Hours.
Major topics in and directions of research in artificial intelligence: AI languages (LISP and PROLOG), basic problem solving techniques, knowledge representation and computer inference, machine learning, natural language understanding, computer vision, robotics, and societal impacts. Same as ECE 448. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225 or ECE 391.

CS 445 Computational Photography credit: 3 or 4 Hours.
Computer vision techniques to enhance, manipulate, and create media from photo collections, such as panoramic stitching, face morphing, texture synthesis, blending, and 3D reconstruction. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225, MATH 225, and MATH 231.

CS 446 Machine Learning credit: 3 or 4 Hours.
Theory and basic techniques in machine learning. Major theoretical paradigms and key concepts developed in machine learning in the context of applications such as natural language and text processing, computer vision, data mining, adaptive computer systems and others. Review of several supervised and unsupervised learning approaches: methods for learning linear representations; on-line learning, Bayesian methods; decision-trees; features and kernels; clustering and dimensionality reduction. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 373 and CS 440.

CS 447 Natural Language Processing credit: 3 or 4 Hours.
Part-of-speech tagging, parsing, semantic analysis and machine translation. Relevant linguistics concepts from morphology (word formation) and lexical semantics (the meaning of words) to syntax (sentence structure) and compositional semantics (the meaning of sentences). 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both CS 447 and LING 406. Prerequisite: CS 374.

CS 450 Numerical Analysis credit: 3 Hours.
Linear system solvers, optimization techniques, interpolation and approximation of functions, solving systems of nonlinear equations, eigenvalue problems, least squares, and quadrature; numerical handling of ordinary and partial differential equations. Same as CSE 401, ECE 491, and MATH 450. 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both CS 450 and CS 457. Prerequisite: CS 101 or CS 125; CS 357 or MATH 415; MATH 285.

CS 457 Numerical Methods II credit: 3 Hours.
Continuation of CS 357. Orthogonalization methods for least squares, Krylov subspace methods, non-linear equations and optimization in multiple dimensions, initial and boundary value problems for ordinary and partial differential equations. 3 undergraduate hours. No graduate credit. Credit is not given for both CS 457 and CS 450. Prerequisite: CS 357.

CS 460 Security Laboratory credit: 3 Hours.
Operating systems security: access control, least privilege mechanism and malware techniques. Network security: firewalls, sniffing, tunnels, intrusion detection, AAA and worm structure. System security: forensics security architectures, and attack/defend exercises. Complements CS 461 via hands-on project. Same as ECE 419. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 461.

CS 461 Computer Security I credit: 4 Hours.
Fundamental principles of computer and communications security and information assurance: ethics, privacy, notions of threat, vulnerabilities, and risk in systems, information warfare, malicious software, data secrecy and integrity issues, network security, trusted computing, mandatory and discretionary access controls, certification and accreditation of systems against security standards. Security mechanisms: authentication, auditing, intrusion detection, access control, cryptography, security protocols, key distribution. Same as ECE 422. 4 undergraduate hours. 4 graduate hours. Prerequisite: CS 241 or ECE 391.
CS 463 Computer Security II credit: 3 or 4 Hours.
Program security, trusted base, privacy, anonymity, non-interference, information flow, confinement, advanced auditing, forensics, intrusion detection, key management and distribution, policy composition and analysis, formal approaches to specification and verification of secure systems and protocols, and topics in applied cryptography. Same as ECE 424. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225; CS 374 or MATH 414.

CS 465 User Interface Design credit: 3 Hours.
A project-focused course covering fundamental principles of user interface design, implementation, and evaluation. Small teams work on a term-long project that involves: analysis of the problem domain, user skills, and tasks; iterative prototyping of interfaces to address user needs; conducting several forms of evaluation such as cognitive walkthroughs and usability tests; implementation of the final prototype. Non-technical majors may enroll as non-programmers who participate in all aspects of the projects with the possible exception of implementation. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 466 Introduction to Bioinformatics credit: 3 or 4 Hours.
Algorithmic approaches in bioinformatics: (i) biological problems that can be solved computationally (e.g., discovering genes, and interactions among different genes and proteins); (ii) algorithmic techniques with wide applicability in solving these problems (e.g., dynamic programming and probabilistic methods); (iii) practical issues in translating the basic algorithmic ideas into accurate and efficient tools that biologists may use. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 467 Social Visualization credit: 3 or 4 Hours.
Visualizing social interaction in networked spaces: investigation of patterns in networked communications systems such as messaging (email, instant messaging), social networking sites and collaborative sites; social network theory and visualizations; exploration of how to move beyond existing visualization techniques; visualizing the network identity over compilations of online data. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225.

CS 468 Tech and Advertising Campaigns credit: 3 Hours.
Same as ADV 492. See ADV 492.

CS 473 Fundamental Algorithms credit: 3 Hours.
Fundamental techniques for algorithm design and analysis, including recursion, dynamic programming, randomization, dynamic data structures, fundamental graph algorithms, and NP-completeness. Intended for undergraduates in Computer Science and graduate students in other departments. Same as CSE 414 and MATH 473. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 373.

CS 475 Formal Models of Computation credit: 3 or 4 Hours.
Finite automata and regular languages; pushdown automata and context-free languages; Turing machines and recursively enumerable sets; linear-bounded automata and context-sensitive languages; computability and the halting problem; undecidable problems; recursive functions; Chomsky hierarchy; computational complexity. Same as MATH 475. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 373.

CS 476 Program Verification credit: 3 or 4 Hours.
Formal methods for demonstrating correctness and other properties of programs. Invariant assertions; Hoare axiomatics; well-founded orderings for proving termination; structural induction; computational induction; data structures; parallel programs; overview of predicate calculus. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225; CS 374 or MATH 414.

CS 477 Formal Software Devel Methods credit: 3 or 4 Hours.
Mathematical models, languages, and methods for software specification, development, and verification. Same as ECE 478. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 225; CS 373 or MATH 414.

CS 481 Stochastic Processes & Applic credit: 3 or 4 Hours.
Same as IE 410. See IE 410.

CS 482 Simulation credit: 3 Hours.
Same as IE 413. See IE 413.

CS 483 Applied Parallel Programming credit: 4 Hours.
Same as CSE 408 and ECE 408. See ECE 408.

CS 484 Parallel Programming credit: 3 or 4 Hours.
Techniques for the programming of all classes of parallel computers and devices including shared memory and distributed memory multiprocessors, SIMD processors and co-processors, and special purpose devices. Key concepts in parallel programming such as reactive and transformational programming, speculation, speedup, isoefficiency, and load balancing. Synchronization primitives, libraries and languages for parallel programming such as OpenMP and MPI, performance monitoring, program tuning, analysis and programming of numerical and symbolic parallel algorithms. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241.

CS 491 Seminar credit: 0 to 4 Hours.
Seminar on topics of current interest as announced in the Class Schedule. 0 to 4 undergraduate hours. 0 to 4 graduate hours. Approved for S/U grading only. May be repeated in the same or separate terms if topics vary to a maximum of 4 hours. Prerequisite: As specified for each topic offering, see Class Schedule or departmental course description.

CS 492 Senior Project I credit: 3 Hours.
First part of a project course in computer science. Students work in teams to solve typical commercial or industrial problems. Work involves planning, design, and implementation. Extensive oral and written work is required both on-campus and possibly off-campus at sponsors' locations. CS 492 must be taken as a sequence with either CS 493 or CS 494. 3 undergraduate hours. No graduate credit. Credit is not given for both CS 492 and a project course in another engineering department for the same project. Prerequisite: For Computer Science majors with senior standing.

CS 493 Senior Project II, ACP credit: 3 Hours.
Continuation of CS 492. Identical to CS 494 except for an additional writing component. See CS 494. 3 undergraduate hours. No graduate credit. Credit is not given for both CS 493 and a project course in another engineering department for the same project. Prerequisite: CS 492. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

CS 494 Senior Project II credit: 3 Hours.
Continuation of CS 492. 3 undergraduate hours. No graduate credit. Credit is not given for both CS 494 and a project course in another engineering department for the same project. Prerequisite: CS 492.

CS 497 CS Team Project credit: 1 to 3 Hours.
Student teams work with CS faculty to complete a significant project requiring advanced knowledge of CS principles. Project topics vary. 1 to 3 undergraduate hours. No graduate credit. May be repeated in the same term up to 6 hours, if topics vary; may be repeated in separate terms. Prerequisite: For majors only, junior or senior standing required.
For the Degree of Bachelor of Science in Electrical Engineering

Electrical engineering is a multifaceted discipline that over the last century has produced an astounding progression of technological innovations that have shaped virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing, communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all of the important areas of modern electrical engineering. These range from power and energy systems to electronic, opto-electronic, and photonic devices; integrated circuits; telecommunications and remote sensing; control systems; robotics; signal processing; and bio-medical instrumentation and sensing.

- Major in Computer Engineering (p. 178)
- Major in Electrical Engineering (p. 180)

ECE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ECE)

Courses

ECE 101 Exploring Digital Info Technol  credit: 3 Hours.
Principles and processes for the development of information technologies: digital music, digital images, digital logic, data compression, error correction, information security, and communication networks. Laboratory for design of hardware and software, and experiments in audio and image processing. Intended for students outside the College of Engineering. Credit is not given to Computer or Electrical Engineering majors.

This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

ECE 110 Introduction to Electronics  credit: 1 to 3 Hours.
Introduction to selected fundamental concepts and principles in electrical engineering. Emphasis on measurement, modeling, and analysis of circuits and electronics while introducing numerous applications. Includes sub-discipline topics of electrical and computer engineering, for example, electromagnetics, control, signal processing, microelectronics, communications, and scientific computing basics. Lab work incorporates sensors and motors into an autonomous moving vehicle, designed and constructed to perform tasks jointly determined by the instructors and students.
ECE 120  Introduction to Computing  credit: 4 Hours.
Introduction to digital logic, computer systems, and computer languages. Topics include representation of information, combinational and sequential logic analysis and design, finite state machines, the von Neumann model, basic computer organization, and machine language programming. Laboratory assignments provide hands-on experience with design, simulation, implementation, and programming of digital systems. Prerequisite: Restricted to Computer Engineering or Electrical Engineering majors or transfer students with ECE Department consent.

ECE 198  Special Topics  credit: 1 to 4 Hours.
Lectures and discussions relating to new areas of interest. May be repeated in the same or separate terms for unlimited hours if topics vary. See class schedule for topics and prerequisites.

ECE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for both letter and S/U grading. May be repeated. For Computer Engineering and Electrical Engineering majors only.

ECE 200  Seminar  credit: 0 Hours.
Discussions of educational programs, career opportunities, and other topics in electrical and computer engineering. Approved for Letter and S/U grading. May be repeated. For Computer Engineering and Electrical Engineering majors only.

ECE 205  Elec & Electronic Circuits  credit: 3 Hours.
Basic principles of circuit analysis; transient analysis; AC steady-state analysis; introduction to semiconductor devices and fabrication; digital logic circuits; op-amps; A/D and D/A conversion. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: PHYS 212.

ECE 206  Elec & Electronic Circuits Lab  credit: 1 Hour.
Laboratory instruments and basic measurement techniques; electric circuits; CMOS logic circuits; DTL and TTL circuits; op-amps. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: PHYS 212; concurrent registration in ECE 205.

ECE 210  Analog Signal Processing  credit: 4 Hours.
Analog signal processing, with an emphasis on underlying concepts from circuit and system analysis: linear systems; review of elementary circuit analysis; differential equation models of linear circuits and systems; Laplace transform; convolution; stability; phasors; frequency response; Fourier series; Fourier transform; active filters; AM radio. Credit is not given for both ECE 210 and ECE 211. Prerequisite: ECE 110 and PHYS 212; credit or concurrent registration in MATH 285 or MATH 286.

ECE 211  Analog Circuits & Systems  credit: 4 Hours.
Concepts from circuit and system analysis: linear systems; review of elementary circuit analysis; op amps; transient analysis; differential equation models of linear circuits and systems; Laplace transform. Credit is not given for both ECE 211 and ECE 210. Prerequisite: ECE 110 and PHYS 212; credit or concurrent registration in MATH 285 or MATH 286.

ECE 220  Computer Systems & Programming  credit: 4 Hours.
Advanced use of LC-3 assembly language for I/O and function calling convention. C programming, covering basic programming concepts, functions, arrays, pointers, I/O, recursion, simple data structures, linked lists, dynamic memory management, and basic algorithms. Information hiding and object-oriented design as commonly implemented in modern software and computer systems programming. Prerequisite: ECE 120. Restricted to Computer Engineering or Electrical Engineering majors or transfer students with ECE Department consent.

ECE 297  Individual Study  credit: 1 Hour.
Individual projects. Approved written application to department as specified by department or instructors is required. Approved for both letter and S/U grading. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Consent of instructor.

ECE 298  Special Topics  credit: 1 to 4 Hours.
Lectures and discussions relating to new areas of interest. May be repeated in the same or separate terms for unlimited hours if topics vary. See class schedule for topics and prerequisites.

ECE 304  Photonic Devices  credit: 3 Hours.
Introduction to active and passive photonic devices and applications; optical processes in semiconductor and dielectric materials including electrical junctions, light emission and absorption, and waveguide confinement; photonic components such as light emitting diodes, lasers, photodetectors, solar cells, liquid crystals, and optical fiber; optical information distribution networks and display applications. Prerequisite: PHYS 214.

ECE 307  Techniques for Engrg Decisions  credit: 3 Hours.
Modeling of decisions in engineering work and the analysis of models to develop a systematic approach to making decisions. Fundamental concepts in linear and dynamic programming; probability theory; and statistics. Resource allocation; logistics; scheduling; sequential decision making; siting of facilities; investment decisions; application of financial derivatives; other problems for decision making under uncertainty. Case studies from actual industrial applications illustrate real-world decisions. Prerequisite: ECE 210; credit or concurrent registration in ECE 313.

ECE 310  Digital Signal Processing  credit: 3 Hours.
Introduction to discrete-time systems and discrete-time signal processing with an emphasis on causal systems; discrete-time linear systems, difference equations, z-transforms, discrete convolution, stability, discrete-time Fourier transforms, analog-to-digital and digital-to-analog conversion, digital filter design, discrete Fourier transforms, fast Fourier transforms, spectral analysis, and applications of digital signal processing. Prerequisite: ECE 210.

ECE 311  Digital Signal Processing Lab  credit: 1 Hour.
Companion laboratory for ECE 310. Prerequisite: Credit or concurrent registration in ECE 310.

ECE 313  Probability with Engrg Applic  credit: 3 Hours.
Probability theory with applications to engineering problems such as the reliability of circuits and systems to statistical methods for hypothesis testing, decision making under uncertainty, and parameter estimation. Same as MATH 362. Credit is not given for both ECE 313 and MATH 461. Prerequisite: MATH 286 or MATH 415.

ECE 314  Probability in Engineering Lab  credit: 1 Hour.
Designed to be taken concurrently with ECE 313, Probability in Engineering Systems, to strengthen the students' understanding of the concepts in ECE 313 and their applications, through computer simulation and computation using the Python programming language. Topics include sequential hypothesis testing, parameter estimation, confidence intervals, Bloom filters, min hashing, load balancing, inference for Markov chains, PageRank algorithm, vector Gaussian distribution, contagion in networks, principle component method and linear regression for data analysis, investment portfolio analysis. Prerequisite: Concurrent enrollment in ECE 313 or one of: ECE 313, IE 300, STAT 410.

ECE 316  Ethics and Engineering  credit: 3 Hours.
Ethical issues in the practice of engineering: safety and liability, professional responsibility to clients and employers, whistle-blowing, codes of ethics, career choice, and legal obligations. Philosophical analysis of normative ethical theories. Case studies. Same as PHIL 316. Credit is not given for both ECE 316 and CS 210. Junior standing is required. Prerequisite: RHET 105.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: HistPhilosoph Perspekt

Information listed in this catalog is current as of 03/2017
ECE 317  
ECE Technology & Management  
credit: 3 Hours. 
Basic understanding of electrical and computer engineering concepts applicable to technology management. Circuit components; dc fundamentals; ac fundamentals; semiconductors; operational amplifiers; device fabrication; power distribution; digital devices; computer architecture (including microprocessors). Intended for the Business Majors in the Technology and Management program. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ECE 329  
Fields and Waves I  
credit: 3 Hours. 
Electromagnetic fields and waves fundamentals and their engineering applications: static electric and magnetic fields; energy storage; Maxwell's equations for time-varying fields; wave solutions in free space, dielectrics and conducting media, transmission line systems; time- and frequency-domain analysis of transmission line circuits and Smith chart applications. Prerequisite: ECE 210.

ECE 330  
Power Ckts & Electromechanics  
credit: 3 Hours. 
Network equivalents; power and energy fundamentals, resonance, mutual inductance; three-phase power concepts, forces and torques of electric origin in electromagnetic and electrostatic systems; energy conversion cycles; principles of electric machines; transducers; relays; laboratory demonstration. Prerequisite: ECE 210.

ECE 333  
Green Electric Energy  
credit: 3 Hours. 
Electric power grid structure and policy; analysis of wind, solar, and fuels as raw resources; wind turbines and parks; solar cells, modules, arrays and systems; fuel cell power plants; energy and financial performance of green energy projects; integration of green energy into power grid; energy project report and presentation. Prerequisite: ECE 205 or ECE 210.

ECE 340  
Semiconductor Electronics  
credit: 3 Hours. 
Modern device electronics: semiconductor fundamentals including crystals and energy bands, charge carriers (electrons and holes), doping, and transport, (drift and diffusion); unipolar devices with the MOS field effect transistor as a logic device and circuit considerations; basic concepts of generation-recombination and the P-N junction as capacitors and current rectifier with applications in photonics; bipolar transistors as amplifiers and switching three-terminal devices. Prerequisite: ECE 210; PHYS 214; credit or concurrent registration in ECE 329.

ECE 342  
Electronic Circuits  
credit: 3 Hours. 
Analysis and design of analog and digital electronic circuits using MOS field effect transistors and bipolar junction transistors, with emphasis on amplifiers in integrated circuits. Credit is not given for both ECE 342 and PHYS 404. Prerequisite: ECE 210.

ECE 343  
Electronic Circuits Laboratory  
credit: 1 Hour. 
Companion laboratory for ECE 342. Credit is not given for both ECE 343 and PHYS 404. Prerequisite: Credit or concurrent registration in ECE 342.

ECE 350  
Fields and Waves II  
credit: 3 Hours. 
Continuation of ECE 329: radiation theory; antennas, radiation fields, radiation resistance and gain; transmitting arrays; plane-wave approximation of radiation fields; plane-wave propagation, reflection, and transmission; Doppler effect, evanescent waves and tunneling, dispersion, phase and group velocities; waveguides and resonant cavities; antenna reception and link budgets. Prerequisite: ECE 329.

ECE 361  
Digital Communications  
credit: 3 Hours. 
Reliable communication of one bit of information over three types of channels: additive Gaussian noise, wireline, and wireless. Emphasis on the impact of bandwidth and power on the data rate and reliability, using discrete-time models. Technological examples used as case studies. Prerequisite: ECE 210 and ECE 313.

ECE 374  
Introduction to Algorithms & Models of Computation  
credit: 4 Hours. 
Same as CS 374. See CS 374.

ECE 380  
Biomedical Imaging  
credit: 3 Hours. 
Physics and engineering principles associated with x-ray, computed tomography, nuclear, ultrasound, magnetic resonance, and optical imaging, including human visualization and perception of image data. Same as BIOE 380. Prerequisite: MATH 285 or MATH 286.

ECE 385  
Digital Systems Laboratory  
credit: 3 Hours. 
Design, build, and test digital systems using transistor-transistor logic (TTL), SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output and display, timing analysis, design tradeoffs, synchronous and asynchronous design methods, datapath and controller, microprocessor design, software/hardware co-design, and system-on-a-chip. Prerequisite: ECE 110 and ECE 220.

ECE 391  
Computer Systems Engineering  
credit: 4 Hours. 
Concepts and abstractions central to the development of modern computing systems, with an emphasis on the systems software that controls interaction between devices and other hardware and application programs. Input-output semantics; synchronization; interrupts; multitasking; virtualization of abstractions. Term-based projects. Credit is not given for both ECE 391 and CS 241. Prerequisite: ECE 220 or CS 233.

ECE 395  
Advanced Digital Projects Lab  
credit: 2 or 3 Hours. 
Planning, designing, executing, and documenting a microcomputer-based project. Emphasis on hardware but special projects may require an equal emphasis on software. Prerequisite: ECE 385.

ECE 396  
Honors Project  
credit: 1 to 4 Hours. 
Special project or reading course for James Scholars in engineering. May be repeated. Prerequisite: Consent of instructor.

ECE 397  
Individual Study in ECE  
credit: 0 to 4 Hours. 
Individual Projects. Approved for both letter and S/U grading. May be repeated. Prerequisite: Consent of instructor. Approved written application to department as specified by department or instructor is required.

ECE 398  
Special Topics in ECE  
credit: 0 to 4 Hours. 
Subject offerings of new and developing areas of knowledge in electrical and computer engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. Approved for both letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ECE 399  
Honors Seminar  
credit: 1 to 4 Hours. 
Special lecture sequences or discussion groups arranged each term to bring James Scholars in engineering into direct contact with the various aspects of engineering practices and philosophy. For Computer Engineering and Electrical Engineering majors with senior standing. Prerequisite: Consent of instructor.

ECE 401  
Signal and Image Analysis  
credit: 4 Hours. 
An introduction to signal analysis and processing methods for advanced undergraduates or graduate students in the biological, physical, social, engineering and computer sciences. Signal analysis methods and their capabilities, weaknesses, and artifacts with an emphasis on their practical application. Significant hands-on processing and interpretation of real data using MATLAB. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ECE 310 and ECE 401. Prerequisite: MATH 220.

Information listed in this catalog is current as of 03/2017
ECE 402  Electronic Music Synthesis  credit: 3 Hours.
Historical survey of electronic and computer music technology; parameters of musical expression and their codification; analysis and synthesis of fixed sound spectra; time-variant spectrum analysis/synthesis of musical sounds; algorithms for dynamic sound synthesis. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 310.

ECE 403  Audio Engineering  credit: 3 Hours.
Resonance and wave phenomena; Acoustics of rooms and transmission lines (e.g., horns); How loudspeakers work: A lab component has been added to measure and model real loudspeakers and enclosures; Topics in digital audio, including AD and DA (Sigma-Delta) audio converters. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 210 and ECE 310.

ECE 408  Applied Parallel Programming  credit: 4 Hours.
Parallel programming with emphasis on developing applications for processors with many computation cores. Computational thinking, forms of parallelism, programming models, mapping computations to parallel hardware, efficient data structures, paradigms for efficient parallel algorithms, and application case studies. Same as CS 483 and CSE 408. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 220.

ECE 411  Computer Organization & Design  credit: 4 Hours.
Basic computer organization and design: integer and floating-point computer arithmetic; control unit design; pipelining; system interconnect; memory organization; I/O design; reliability and performance evaluation. Laboratory for computer design implementation, simulation, and layout. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 391 or CS 241.

ECE 412  Microcomputer Laboratory  credit: 3 Hours.
Design, construction, and use of a small general-purpose computer with a micro-processor CPU; MSI and LSI circuits used extensively; control panel, peripheral controllers, control logic, central processor, and programming experiments. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 385; ECE 391 or CS 233. Recommended: Credit or concurrent registration in ECE 411.

ECE 414  Biomedical Instrumentation  credit: 3 Hours.
Same as BIOE 414. See BIOE 414.

ECE 415  Biomedical Instrumentation Lab  credit: 2 Hours.
Same as BIOE 415. See BIOE 415.

ECE 416  Biosensors  credit: 3 Hours.
Underlying engineering principles used to detect small molecules, DNA, proteins, and cells in the context of applications in diagnostic testing, pharmacetical research, and environmental monitoring. Biosensor approaches including electrochemistry, fluorescence, acoustics, and optics; aspects of selective surface chemistry including methods for biomolecule attachment to transducer surfaces; characterization of biosensor performance; blood glucose detection; fluorescent DNA microarrays; label-free biochips; bead-based assay methods. Case studies and analysis of commercial biosensor. Same as BIOE 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329.

ECE 417  Multimedia Signal Processing  credit: 4 Hours.
Characteristics of speech and image signals; important analysis and synthesis tools for multimedia signal processing including subspace methods, Bayesian networks, hidden Markov models, and factor graphs; applications to biometrics (person identification), human-computer interaction (face and gesture recognition and synthesis), and audio-visual databases (indexing and retrieval). Emphasis on a set of MATLAB machine problems providing hands-on experience. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310 and ECE 313.

ECE 418  Image & Video Processing  credit: 4 Hours.
Concepts and applications in image and video processing; introduction to multidimensional signal processing: sampling, Fourier transform, filtering, interpolation, and decimation; human visual perception; scanning and display of images and video; image enhancement, restoration and segmentation; digital image and video compression; image analysis. Laboratory exercises promote experience with topics and development of C and MATLAB programs. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310; credit or concurrent registration in one of ECE 313, STAT 400, IE 300, MATH 461; MATH 415; experience with C programming language.

ECE 419  Security Laboratory  credit: 3 Hours.
Same as CS 460. See CS 460.

ECE 420  Embedded DSP Laboratory  credit: 2 Hours.
Development of real-time digital signal processing (DSP) systems using a DSP microprocessor; several structured laboratory exercises, such as sampling and digital filtering; followed by an extensive DSP project of the student's choice. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 310.

ECE 422  Computer Security I  credit: 4 Hours.
Same as CS 461. See CS 461.

ECE 424  Computer Security II  credit: 3 or 4 Hours.
Same as CS 463. See CS 463.

ECE 425  Intro to VLSI System Design  credit: 3 Hours.
Complementary Metal-Oxide Semiconductor (CMOS) technology and theory; CMOS circuit and logic design; layout rules and techniques; circuit characterization and performance estimation; CMOS subsystem design; Very-Large-Scale Integrated (VLSI) systems design methods; VLSI Computer Aided Design (CAD) tools; workstation-based custom VLSI chip design using concepts of cell hierarchy; final project involving specification, design, and evaluation of a VLSI chip or VLSI CAD program; written report and oral presentation on the final project. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 385 and ECE 411; or CS 233.

ECE 428  Distributed Systems  credit: 3 or 4 Hours.
Same as CS 425. See CS 425.

ECE 431  Electric Machinery  credit: 4 Hours.
Theory and laboratory experimentation with three-phase power, power-factor correction, single- and three-phase transformers, induction machines, DC machines, and synchronous machines; project work on energy control systems; digital simulation of machine dynamics. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 330.

ECE 432  Advanced Electric Machinery  credit: 3 Hours.
Advanced rotating machine theory and practice: dynamic analysis of machines using reference frame transformations; tests for parameter determination; reduced order modeling of machines; mechanical subsystems including governors, prime movers and excitation systems; digital simulation of inter-connected machines. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 431.

ECE 435  Computer Networking Laboratory  credit: 3 or 4 Hours.
Design, application, analysis, and evaluation of communication network protocols under both Linux and Windows NT operating systems. Emphasis on identifying problems, proposing alternative solutions, implementing prototypes using available network protocols and evaluating results. Multiple programming team projects. Same as CS 436. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 438.
ECE 437  Sensors and Instrumentation  credit: 3 Hours.
Hands-on exposure to fundamental technology and practical application of sensors. Capacitive, inductive, optical, electromagnetic, and other sensing methods are examined. Instrumentation techniques incorporating computer control, sampling, and data collection and analysis are reviewed in the context of real-world scenarios. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 349. Same as CS 440. See CS 439.

ECE 438  Communication Networks  credit: 3 or 4 Hours.
Same as CS 438. See CS 438.

ECE 439  Wireless Networks  credit: 3 or 4 Hours.
Overview of wireless network architectures including cellular networks, local area networks, multi-hop wireless networks such as ad hoc networks, mesh networks, and sensor networks; capacity of wireless networks; medium access control, routing protocols, and transport protocols for wireless networks; mechanisms to improve performance and security in wireless networks; energy-efficient protocols for sensor networks. Same as CS 439. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391; one of MATH 461, MATH 463, ECE 313.

ECE 441  Physics & Modeling Semicond Dev  credit: 3 Hours.
Advanced concepts including generation-recombination, hot electron effects, and breakdown mechanisms; essential features of small ac characteristics, switching and transient behavior of p-n junctions, and bipolar and MOS transistors; fundamental issues for device modeling; perspective and limitations of Si-devices. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 440.

ECE 444  IC Device Theory & Fabrication  credit: 4 Hours.
Fabrication lab emphasizing physical theory and design of devices suitable for integrated circuitry; electrical properties of semiconductors and techniques (epitaxial growth, oxidation, photolithography diffusion, ion implantation, metallization, and characterization) for fabricating integrated circuit devices such as p-n junction diodes, bipolar transistors, and field effect transistors. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 340.

ECE 445  Senior Design Project Lab  credit: 4 Hours.
Individual design projects in various areas of electrical and computer engineering; projects are chosen by students with approval of instructor. A professionally kept lab notebook, a written report, prepared to journal publication standards, and an oral presentation required. 4 undergraduate hours. No graduate credit.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition

ECE 446  Principles of Experimental Research in Electrical Engineering  credit: 4 Hours.
Interdisciplinary approach to learning principles of experimental research. Focuses on: 1) experimental design 2) prevalent experimental techniques 3) data organization, analysis, and presentation and 4) scientific computing. Presentation methods explored include poster session, conference talk, and journal paper. Open-ended labs and a project reinforce concepts discussed in class. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310, ECE 313, ECE 329, and MATH 415.

ECE 447  Active Microwave Ckt Design  credit: 3 Hours.
Microwave circuit design of amplifiers, oscillators, and mixers. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350 and ECE 453.

ECE 448  Artificial Intelligence  credit: 3 or 4 Hours.
Same as CS 440. See CS 440.

ECE 451  Adv Microwave Measurements  credit: 3 Hours.
Manual- and computer-controlled laboratory analysis of circuits at microwave frequencies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 452  Electromagnetic Fields  credit: 3 Hours.
Plane waves at oblique incidence; wave polarization; anisotropic media; radiation; space communications; waveguides. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 453  Wireless Communication Systems  credit: 4 Hours.
Design of a radio system for transmission of information; modulation, receivers, impedance matching, oscillators, two-port network analysis, receiver and antenna noise, nonlinear effects, mixers, phase-locked loops. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329, credit or concurrent registration in ECE 342.

ECE 454  Antennas  credit: 3 Hours.
Antenna parameters; polarization of electromagnetic waves; basic antenna types; antenna arrays; broadband antenna design; antenna measurements. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 455  Optical Electronics  credit: 3 or 4 Hours.
Optical beams and cavities; semiclassical theory of gain; characteristics of typical lasers (gas, solid state, and semiconductor); application of optical devices. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECE 350 or PHYS 436.

ECE 456  Global Nav Satellite Systems  credit: 4 Hours.
Engineering aspects of space-based navigation systems, such as the Global Positioning System (GPS). Engineering and physical principles on which GPS operates, including orbital dynamics, electromagnetic wave propagation in a plasma, signal encoding, receiver design, error analysis, and numerical methods for obtaining a navigation solution. GPS as a case study for performing an end-to-end analysis of a complex engineering system. Laboratory exercises focus on understanding receiver design and developing a MATLAB-based GPS receiver. Same as AE 456. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329 and ECE 310 or AE 352 and AE 353.

ECE 457  Microwave Devices & Circuits  credit: 3 Hours.
Electromagnetic wave propagation, microwave transmission systems, passive components, microwave tubes, solid state microwave devices, microwave integrated circuits, S-parameter analysis, and microstrip transmission lines. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340 and ECE 350.

ECE 458  Applic of Radio Wave Propag  credit: 3 Hours.
Terrestrial atmosphere, radio wave propagation, and applications to radio sensing and radio communication. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 459  Communications Systems  credit: 3 Hours.
Analog underpinning of analog and digital communication systems; representation of signals and systems in the time and frequency domains; analog modulation schemes; random processes; prediction and noise analysis using random processes; noise sensitivity and bandwidth requirements of modulation schemes. Brief introduction to digital communications. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 313.
ECE 460 Optical Imaging credit: 4 Hours.
Scalar fields, geometrical optics, wave optics, Gaussian beams, Fourier optics, spatial and temporal coherence, microscopy, interference chromatic and geometric aberrations, Jones matrices, waveplates, electromagnetic fields, and electro-optic and acousto-optic effects. Laboratory covers numerical signal processing, spectroscopy, ray optics, diffraction, Fourier optics, microscopy, spatial coherence, temporal coherence, polarimetry, fiber optics, electro-optic modulation and acousto-optic modulation. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329; credit or concurrent registration in ECE 313.

ECE 462 Logic Synthesis credit: 3 Hours.
Unate function theory, unate recursive paradigm, synthesis of two-level logic, synthesis of incompletely specified combinational logic, multi-level logic synthesis, binary decision diagrams, finite state machine synthesis, automatic test pattern generation and design for test, equivalence checking and reachability analysis of finite machines, and technology mapping. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329 or CS 233.

ECE 463 Digital Communications Lab credit: 2 Hours.
Hands-on experience in the configuration and performance evaluation of digital communication systems employing both radio and optical signals. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 361 or ECE 459.

ECE 464 Power Electronics credit: 3 Hours.
Switching functions and methods of control such as pulse-width modulation, phase control, and phase modulation; dc-dc, ac-dc, dc-ac, and ac-ac power converters; power components, including magnetic components and power semiconductor switching devices. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.

ECE 465 Optical Communications Systems credit: 3 Hours.
Fundamentals of lightwave systems: characterization of lightwave channels, optical transmitters, receivers, and amplifiers; quantum and thermal noise processes; design of optical receivers; multimode and single-mode link analysis. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 313 and ECE 350. Recommended: credit or concurrent registration in ECE 459 and ECE 466.

ECE 466 Optical Communications Lab credit: 1 Hour.
Fiber components and measurements, transmitters and detectors, fiber amplifiers, multimode fiber links, and wavelength division multiplexing. 1 undergraduate hour. 1 graduate hour. Prerequisite: Credit or concurrent registration in ECE 465.

ECE 467 Biophotonics credit: 3 Hours.
Overview of the field of biophotonics, in three segments: (1) fundamental principles of light, optics, lasers, biology, and medicine; (2) diagnostic biophotonics including imaging, spectroscopy, and optical biosensors; (3) therapeutic applications of biophotonics including laser ablation and photodynamic therapies. Reviews and presentations of current scientific literature by students. Tours of microscopy facilities. Same as BIOME 467. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of ECE 455, ECE 460, PHYS 402.

ECE 468 Optical Remote Sensing credit: 3 Hours.
Optical sensors including single element and area arrays (CCDs); optical systems including imagers, spectrometers, interferometers, and lidar; optical principles and light gathering power; electromagnetics of atomic and molecular emission and scattering with applications to the atmosphere the prime example; applications to ground and spacecraft platforms. Four laboratory sessions (4.5 hours each) arranged during term in lieu of four lectures. Same as AE 468. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329, ECE 313.

ECE 469 Power Electronics Laboratory credit: 2 Hours.
Circuits and devices used for switching power converters, solid-state motor drives, and power controllers; dc-dc, ac-dc, and dc-ac converters and applications; high-power transistors and magnetic components; design considerations including heat transfer. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 343; credit or concurrent registration in ECE 464.

ECE 470 Introduction to Robotics credit: 4 Hours.
Fundamentals of robotics including rigid motions; homogeneous transformations; forward and inverse kinematics; velocity kinematics; motion planning; trajectory generation; sensing, vision, control. Same as AE 482 and ME 445. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of MATH 225, MATH 286, MATH 415, MATH 418.

ECE 472 Biomedical Ultrasound Imaging credit: 3 Hours.
Theoretical and engineering foundations of ultrasonic imaging for medical diagnostics. Conventional, Doppler, and advanced ultrasonic imaging techniques; medical applications of different ultrasonic imaging techniques; engineering problems related to characterization of ultrasonic sources and arrays, image production, image quality, the role of contrast agents in ultrasonic imaging, and system design. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329.

ECE 473 Fund of Engrg Acoustics credit: 3 or 4 Hours.
Development of the basic theoretical concepts of acoustical systems; mechanical vibration, plane and spherical wave phenomena in fluid media, lumped and distributed resonant systems, and absorption phenomena and hearing. Same as TAM 413. 3 or 4 undergraduate hours. Prerequisite: MATH 285 or MATH 286.

ECE 476 Power System Analysis credit: 3 Hours.
Development of power system equivalents by phase network analysis, load flow, symmetrical components, sequence networks, fault analysis, and digital simulation. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 330.

ECE 478 Formal Software Devel Methods credit: 3 or 4 Hours.
Same as CS 477. See CS 477.

ECE 480 Magnetic Resonance Imaging credit: 3 or 4 Hours.
Fundamental physical, mathematical, and computational principles governing the data acquisition and image reconstruction of magnetic resonance imaging. Same as BIOME 480. 3 or 4 graduate hours. Prerequisite: Recommended. ECE 310.

ECE 481 Nanotechnology credit: 4 Hours.
Fundamental physical properties of nanoscale systems. Nanofabrication techniques, semiconductor nanotechnology, molecular and biomolecular nanotechnology, carbon nanotechnology (nanotubes and graphene), nanowires, and nanoscale architectures and systems. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of CHEM 442, CHBE 457, CHEM 485, MSE 401, PHYS 460.

ECE 482 Digital IC Design credit: 3 Hours.
Bipolar and MOS field effect transistor characteristics; VLSI fabrication techniques for MOS and bipolar circuits; calculation of circuit parameters from the process parameters; design of VLSI circuits such as logic, memories, charge-coupled devices, and A/D and D/A converters. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.

ECE 483 Analog IC Design credit: 3 Hours.
Basic linear integrated circuit design techniques using bi-polar, JFET, and MOS technologies; operational amplifiers; wide-band feedback amplifiers; sinusoidal and relaxation oscillators; electric circuit noise; application of linear integrated circuits. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.
ECE 484  Prin Adv Microelec Processing  credit: 3 Hours.
Principles of advanced methods of pattern delineation, pattern transfer, and modern material growth; how these are applied to produce novel and high performance devices and circuits in various electronic materials with special emphasis on semiconductors. Computer simulation of processes and the manufacturing of devices and circuits. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 444.

ECE 485  MEMS Devices & Systems  credit: 3 Hours.
Introduction to principles, fabrication techniques, and applications of microelectromechanical systems (MEMS). In-depth analysis of sensors, actuator principles, and integrated microfabrication techniques for MEMS. Comprehensive investigation of state-of-the-art MEMS devices and systems. Same as ME 485. 3 undergraduate hours. 3 graduate hours.

ECE 486  Control Systems  credit: 4 Hours.
Analysis and design of control systems with emphasis on modeling, state variable representation, computer solutions, modern design principles, and laboratory techniques. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 210.

ECE 487  Intro Quantum Electr for EEs  credit: 3 Hours.
Application of quantum mechanical concepts to electronics problems; detailed analysis of a calculable two-state laser system; incidental quantum ideas bearing on electronics. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 485.

ECE 488  Compound Semicond & Devices  credit: 3 Hours.
Advanced semiconductor materials and devices; elementary band theory; heterostructures; transport issues; three-terminal devices; two-terminal devices; including lasers and light modulators. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 440 and ECE 350.

ECE 489  Robot Dynamics and Control  credit: 4 Hours.
Same as ME 446 and SE 422. See SE 422.

ECE 490  Introduction to Optimization  credit: 3 or 4 Hours.
Basic theory and methods for the solution of optimization problems; iterative techniques for unconstrained minimization; linear and nonlinear programming with engineering applications. Same as CSE 441. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECE 220 and MATH 415.

ECE 491  Numerical Analysis  credit: 3 Hours.
Same as CS 450, CSE 401 and MATH 450. See CS 450.

ECE 492  Parallel Progrmg: Sci & Engr  credit: 3 or 4 Hours.
Same as CS 420 and CSE 402. See CS 420.

ECE 493  Advanced Engineering Math  credit: 3 or 4 Hours.
Same as MATH 487. See MATH 487.

ECE 494  Photonic Device Laboratory  credit: 3 Hours.
Active photonic devices and lightwave technology. Hands-on experience with several classes of lasers (HeNe laser, semiconductor edge emitting lasers, vertical cavity surface emitting lasers), photodetectors, and photonic systems. Familiarization with experimental optical characterization techniques and equipment. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 487 recommended.

ECE 495  Photonic Device Laboratory  credit: 3 Hours.
Active photonic devices and lightwave technology. Hands-on experience with several classes of lasers (HeNe laser, semiconductor edge emitting lasers, vertical cavity surface emitting lasers), photodetectors, and photonic systems. Familiarization with experimental optical characterization techniques and equipment. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 444.

ECE 496  Senior Research Project  credit: 2 Hours.
Individual research project under the guidance of a faculty member: for example, mathematical analysis, laboratory experiments, computer simulations, software development, circuit design, or device fabrication. Preparation of a written research proposal, including preliminary results. 2 undergraduate hours. No graduate credit. May be repeated. ECE 496 and ECE 499 taken in sequence fulfill the Advanced Composition Requirement. Prerequisite: RHET 105; consent of instructor. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

ECE 498  Special Topics in ECE  credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in electrical and computer engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 0 to 4 undergraduate hours. 0 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

ECE 499  Senior Thesis  credit: 2 Hours.
Completion of the research project begun under ECE 496. Preparation and oral presentation of a written thesis that reports the results of the project. 2 undergraduate hours. No graduate credit. To fulfill the Advanced Composition Requirement, credit must be earned for both ECE 496 and ECE 499. Prerequisite: ECE 496 and consent of instructor. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

Computer Engineering
Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100  Engineering Orientation 1  credit: 0
Total Hours 0

1  External transfer students take ENG 300 instead.

Foundational Mathematics and Science
These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102  General Chemistry I  credit: 3
CHEM 103  General Chemistry Lab I  credit: 1
MATH 221  Calculus I  credit: 4
MATH 231  Calculus II  credit: 3
MATH 241  Calculus III  credit: 4
MATH 286  Intro to Differential Eq Plus  credit: 4
PHYS 211  University Physics: Mechanics  credit: 4
PHYS 212  University Physics: Elec & Mag  4
PHYS 213  Univ Physics: Thermal Physics  2
PHYS 214  Univ Physics: Quantum Physics  2

Total Hours  31

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Computer Engineering Technical Core
These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of computer engineering.

Total Hours  36

1 Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour.

2 MATH 213 may be substituted.

3 STAT 410 may be substituted.

Technical Electives
These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of computer engineering.

27 hours to be selected from departmentally approved List of Technical Electives

One course from departmentally approved list of EE Foundations Courses

Three courses from departmentally approved list of Advanced Computing Electives

One of: ECE 411, ECE 445, or both ECE 496 AND ECE 499

1 List of Technical Electives (http://www.ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06.asp).

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal%5B+Education%5D%2B%5B+Electives%5D) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours  18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105  Writing and Research  4

Advanced Composition. May be satisfied by completing ECE 445 or ECE 496 AND ECE 499 or a course within either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours  4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free%5B+Electives%5D), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. At least seven hours must be taken for a grade.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

2. STAT 410 may be substituted.

3. ECE 496 AND ECE 499 may be substituted.

**Technical Electives**

This elective requirement gives each student freedom to define a technical course of study in electrical engineering of considerable breadth and focus. The Advanced Core ECE Electives are introductory to major subdisciplines of electrical engineering (http://www.ece.illinois.edu/academics/ugrad/subdisciplines).

32 hours, to include:  
- Non-ECE courses  
- ECE Courses to include:
  - Select three from the following list of Advanced Core ECE electives:
    - ECE 391 Computer Systems Engineering  
    - ECE 310 Digital Signal Processing  
    - ECE 330 Power Ckts & Electromechanics  
    - ECE 342 Electronic Circuits  
    - ECE 350 Fields and Waves II  
  - Select three ECE labs identified in the List of Technical Electives

**Liberal Education**

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+EElectives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

### Industrial and Enterprise Systems Engineering

Undergraduate Program Office: 104 Transportation Building  
Fax: (217) 244-5705

Part of a nationally top-ranked engineering college on a premier Big Ten university campus, the Department of Industrial & Enterprise Systems Engineering offers students a blend of intellectual challenge, excitement, and energy that is transformational—this is a campus where you can learn from a world-renowned faculty, study in the most technologically advanced engineering library in the nation, and contribute to research that has real impact. The University attracts the best students from across the country and around the world. You can choose from about 4,000 courses as well as a variety of sports, the arts, and student activities—you’ll never lack amazing things to do.

You can explore your personal interests and goals in more than 50 professional and honor engineering societies, or the more than 1,000 other organizations across campus. These student-run groups offer opportunities to develop leadership skills, test technical competence, and serve society through volunteer projects.

Many students choose a study-abroad experience to gain a better understanding of other cultures, while also developing skills that make them more marketable in the global workplace. The Office of International Programs in Engineering coordinates travel and fellowships to countries all over the world. Engineering at Illinois is the only U.S. institution to offer an international minor in engineering as part of a regular degree program.

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. Freshmen take ECE 110 for 3 credit hours. Lab only version of ECE 110 taken by transfer students (with special permission) is 1 credit hour.

3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4. STAT 410 may be substituted

5. A minimum of 32 hours chosen from the departmentally approved list of Technical Electives (http://www.ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06.asp). Of these, at least three courses are to be chosen from the ECE advanced core electives and three courses from the list of ECE laboratory electives; 20 hours must be ECE course work, six hours non-ECE course work, and the remaining hours may be chosen from the entire List.

6. Advanced Composition. May be satisfied by completing ECE 445 or ECE 496 AND ECE 499 or a course within either the liberal education or free elective categories which has the Advanced Composition designation.
• Major in Industrial Engineering (p. 184)

GE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GE)

IE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IE)

Industrial Engineering Courses

IE 199 Undergraduate Open Seminar  credit: 1 to 5 Hours. May be repeated.

IE 297 Independent Study  credit: 1 to 4 Hours. Individual investigations of any phase of Industrial Engineering. May be repeated in separate terms. Prerequisite: Consent of instructor.

IE 300 Analysis of Data  credit: 3 Hours. Nature of probabilistic models for observed data; discrete and continuous distribution function models; inferences on universe parameters based on sample values; control charts, acceptance sampling, and measurement theory. Credit is not given for both IE 300 and CEE 202. Prerequisite: MATH 241.

IE 310 Operations Research  credit: 3 Hours. Deterministic and stochastic models in operations research. Linear programming, integer programming, network models and nonlinear programming, review of basic probability, Bernoulli processes, Markov chains, Markov processes, and queuing theory. Credit is not given for both IE 310 and CEE 201. Prerequisite: Credit or concurrent registration in MATH 415.

IE 311 Operations Research Lab  credit: 1 Hour. Applications of OR models with the use of software tools. Prerequisite: Concurrent registration in IE 310.

IE 330 Industrial Quality Control  credit: 3 Hours. Contemporary concepts and methods for quality and productivity design and improvement; philosophies of Deming, Taguchi, and others leading the quality management and engineering movement; Shewhart's methods for statistical process control; process capability analysis; statistical methods for tolerance assessment; process control methods employing attribute data; design of experiments, concepts, and methods. Prerequisite: IE 300.

IE 340 Human Factors  credit: 4 Hours. Introduction to human factors, ergonomics, engineering psychology, history of ergonomics, human-machine relations, displays and controls, human-computer interaction, industrial and aviation systems, physiology of work and anthropometrics, cognitive ergonomics, human reliability, human as manual controller, human-machine systems design, prototyping, professional practice and ethics, laboratory exercises. Same as PSYC 358. Prerequisite: PSYC 100, PSYC 103, or consent of instructor.

IE 360 Facilities Planning and Design  credit: 3 Hours. Facility planning, plant layout design, and materials handling analysis; determination of facilities requirements, site selection, materials flow, use of analytical and computerized techniques including simulation, and applications to areas such as manufacturing, warehousing, and office planning. Prerequisite: IE 310.

IE 361 Production Planning & Control  credit: 3 Hours. Scope of production systems and activities involved in their design, establishment, management, operation, and maintenance; mathematical and computer models for planning and control of facilities, human resources, projects, products, material, and information in production systems. Prerequisite: IE 310.

IE 397 Independent Study  credit: 1 to 4 Hours. Individual investigations or studies of any phase of Industrial Engineering. May be repeated in separate terms. Prerequisite: Consent of instructor.

IE 398 Special Topics  credit: 1 to 4 Hours. Subject offerings of new and developing areas of knowledge in industrial engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

IE 400 Design & Analysis of Experiments  credit: 3 or 4 Hours. Concepts and methods of design of experiments for quality design, improvement and control. Simple comparative experiments, including concepts of randomization and blocking, and analysis of variance techniques; factorial and fractional factorial designs; Taguchi's concepts and methods; second-order designs; response surface methodology. Engineering applications and case studies. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 300.

IE 410 Stochastic Processes & Applications  credit: 3 or 4 Hours. Modeling and analysis of stochastic processes. Transient and steady-state behavior of continuous-time Markov chains; renewal processes; models of queuing systems (birth-and-death models, embedded-Markov-chain models, queueing networks); reliability models; inventory models. Familiarity with discrete-time Markov chains, Poisson processes, and birth-and-death processes is assumed. Same as CS 481. 3 undergraduate hours. 4 graduate hours. Prerequisite: IE 310.

IE 411 Optimization of Large Systems  credit: 3 or 4 Hours. Practical methods of optimization of large-scale linear systems including extreme point algorithms, duality theory, parametric linear programming, generalized upper bounding technique, price-directive and resource-directive decomposition techniques, Lagrangian duality, Karmarkar's algorithm, applications in engineering systems, and use of state-of-the-art computer codes. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 310 and MATH 415.

IE 412 OR Models for Mfg Systems  credit: 3 or 4 Hours. Operations research techniques applied to problems in manufacturing and distribution. Single and multi-stage lot sizing problems, scheduling and sequencing problems, and performance evaluation of manufacturing systems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 310.

IE 413 Simulation  credit: 3 Hours. Use of discrete-event simulation in modeling and analysis of complex systems. Data structures and event-list management; verification and validation of simulation models; input modeling, including selection of probability distributions and random variate generation; statistical analysis of output data. Same as CS 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: CS 101 and IE 310.

IE 420 Financial Engineering  credit: 3 or 4 Hours. Introduction to the theory and practice of financial engineering: basics of derivative securities and risk management; Markowitz portfolio theory and capital asset pricing model; interest rate and bonds; forward and futures contracts; hedging using futures contracts; option contracts and arbitrage relationship; binomial model, no-arbitrage pricing, risk-neutral pricing, and American options pricing; Brownian motion, Black-Scholes-Merton model, delta hedging, Greek letters, implied volatility, and volatility smile. 3 undergraduate hours. 4 graduate hours. Prerequisite: IE 300.

Information listed in this catalog is current as of 03/2017
IE 430  Economic Found of Quality Syst  credit: 3 or 4 Hours.
Total quality systems for planning, developing, and manufacturing world-
class products. Economic foundations of total quality. Product value,
cost, pricing, environmental quality, activity-based costing, design for
assembly, organization structure, lead time, innovation, Taguchi methods,
simulation-based significance testing, Strategic Quality Deployment,
statistical process control, and conjoint analysis. 3 undergraduate hours.
3 or 4 graduate hours. Prerequisite: IE 300.

IE 431  Design for Six Sigma  credit: 3 Hours.
Quality Engineering principles and the Six Sigma Define-Measure-
Analyze-Improve-Control (DMAIC) process. Application of concepts
and methods of statistical process control, designed experiments, and
measurement systems analysis to cases of quality and productivity
improvement; application of the fundamentals of quality engineering
and the Six Sigma to areas of produce development, service enterprise,
and manufacturing processes. 3 undergraduate hours. 3 graduate hours.
Prerequisite: IE 300.

IE 445  Human Performance and Cognition in Context  credit: 3 or 4
Hours.
Same as EPSY 456 and PSYC 456. See EPSY 456.

IE 497  Independent Study  credit: 1 to 4 Hours.
Independent study of advanced problems related to industrial
engineering. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be
repeated. Prerequisite: Consent of instructor.

IE 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in
industrial engineering intended to augment the existing curriculum.
See Class Schedule or departmental course information for topics and
prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be
repeated in the same or separate terms if topics vary to a maximum of 9
hours.

Industrial Engineering

For the Degree of Bachelor of Science in Industrial Engineering

Industrial engineering is a discipline that encompasses the analysis,
development, improvement, implementation, and evaluation of integrated
systems and their components, including materials, information, energy,
person, money, time, equipment, and associated processes. Industrial
engineering draws upon a variety of disciplines, from mathematics
to psychology, from communications to computer science, and from
production management to process control. Industrial engineers design
efficient, productive systems in a wide range of business, industrial, and
governmental settings.

The technical portion of the industrial engineering curriculum is designed
as a sequence of increasingly specialized experiences. The entering
student’s first year is spent mastering the basics of science: math,
chemistry, and physics. Second-year students begin to take fundamental
engineering courses such as statics, dynamics, statistics, and strength
of materials. Third-year students take a core of industrial engineering
courses and begin their chosen area of specialization in one of five
tracks, including: Operations Research; Quality Engineering; Supply
Chain, Manufacturing, and Logistics; Economics and Finance; and
Industrial Engineering Fundamentals. During their senior year, students
broaden and deepen their knowledge with additional technical elective
courses. Finally, all students participate in the practice of engineering
through the capstone senior design course in which they work in teams
to solve problems submitted by industry partnering companies, and
present their solutions in reports and presentations supported by
complete economic analyses. Engineering design, communication,
teamwork, and laboratory experiences are integrated throughout all four
years of the curriculum.

A combined B.S.-M.S. Industrial Engineering degree program is available.
Its admission and course requirements are described in the College of
Engineering program information section (http://catalog.illinois.edu/
undergraduate/engineer).

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and
advanced-level course registration apply to students in this curriculum.
These rules are summarized at the College of Engineering’s
Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/
display/ugadvise/Technical+GPA+Requirements?src=search).

Note: the TGPA rules for this curriculum are under review and if changed,
will be reflected at the Web site indicated.

Orientation and Professional Development

These courses introduce the opportunities and resources your college,
department, and curriculum can offer you as you work to achieve
your career goals. They also provide the skills to work effectively and
successfully in the engineering profession.

Track Option Electives
These courses enable the student to tailor his or her studies to one’s interests and career goals in the major subdisciplines of industrial engineering.

Track option electives. Courses selected from departmentally approved lists of Track Option Electives or by petition to the department. The current Track options include:

- Industrial Engineering Fundamentals (IEF)
- Operations Research (OR)
- Quality Engineering (QE)
- Supply Chain, Manufacturing and Logistics (SC&L)
- Economics and Finance (E&F)

Technical Electives
These courses augment and strengthen the rigorous analysis and design principles practiced in the major subdisciplines of industrial engineering.

Computer science elective selected from the departmentally approved list of Computer Science Electives.

IE technical electives selected from the departmentally approved list of IE Technical Electives.

Engineering Science technical elective chosen from the departmentally approved list of Engineering Science Electives.

Total Hours 15

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105    Writing and Research                    | 4     |

Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the Industrial Engineering Technical Core)

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Semester Hours 17-15

Total Hours: 128

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, highly recommended before the fourth semester. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4. Selected from the departmentally approved lists of Track Option Electives (http://ise.illinois.edu/undergraduate-programs/industrial-engineering-degree/industrial-engineering-track-options) or by petition to the department.
5. Selected from the departmentally approved list of Computer Science Electives (http://ise.illinois.edu/sites/default/files/documents/ISE%20Electives%202012%202013.pdf).
7. SE 494 and SE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a liberal education elective.
8. Combination satisfies the General Education Advanced Composition requirement.
Systems Engineering and Design
For the Degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)

Systems Engineering and Design (SED) is a comprehensive, interdisciplinary program emphasizing interactions between parts of a whole. It brings together basic sciences, engineering analysis, and engineering design. The curriculum offers flexibility through a Secondary Field Option, while providing a broad background in engineering as a whole and decision-making that supports overall design. Systems Engineers understand how to coordinate interacting parts of a whole and to evaluate engineering within economic and physical constraints.

Design experience and project management are emphasized and integrated across the core with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Secondary Field Option Electives
These courses enable the student to tailor the studies to one’s interests and career goals in both technical and nontechnical areas.

Secondary field option electives selected from departmentally approved lists or by petition to the department. See the Secondary Field Options section below.

Technical Electives
The design elective augments a student’s knowledge in one or more subdisciplines of mechanics and structures, control systems, and decision-making that support a systems approach to engineering. The engineering science elective extends the knowledge of that area.

Design elective selected from the departmentally approved list of Design Electives.
Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102 Microeconomic Principles 3
or ECON 103 Macroeconomic Principles

Electives from the campus General Education Social and Behavioral Sciences list.

Electives from the campus General Education Humanities and the Arts list.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4
Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the Systems Engineering and Design Technical Core)

Total Hours 4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Secondary Field Options
Secondary field options are of two types: preapproved and customized. Preapproved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by pre-approved fields. To do this, a suitable title and all the courses must be petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student’s goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

Preapproved Secondary Fields
Preapproved secondary fields are listed below. Approved courses for each are specified at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:

- CEE 202, IE 300, STAT 400
- CEE 201, IE 310
- MSE 406, CEE 300
- ECE 486, SE 320, ME 340

Students may petition to the department for inclusion of a course in the secondary fields listed below. The most likely classes to be accepted are non-permanent and experimental offerings relevant to the various fields. A current list of these may be found at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option).

- Automotive Engineering
- Bioengineering
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer Science
- Construction
- Control Systems
- Digital Prototyping
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Manufacturing Engineering
- Nondestructive Testing and Evaluation
- Operations Research
- Quality Control
- Rehabilitation Engineering
- Robotics
- Theoretical and Applied Mechanics

Students fulfilling the corresponding Campus Minor may simultaneously complete the requirements of this Systems Engineering and Design secondary field option.

Customized Secondary Fields
Customized secondary fields differ from preapproved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

Information listed in this catalog is current as of 03/2017.
The following list contains examples of over fifty titles of customized secondary field options which have been approved. The complete list may be found at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). Additional titles beyond those listed may be proposed.

- A foreign language (several)
- An engineering discipline (several)
- Audio Engineering
- Economics
- Entrepreneurship
- Finance
- Fluid Dynamics
- International Business
- Mathematics
- Pre-Law
- Pre-Med
- Renewable Energy

**Suggested Sequence**

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

$^1$ RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101.
Materials Science and Engineering

For the Degree of Bachelor of Science in Materials Science and Engineering

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change the materials we use every day behave as they do. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. Seniors focus on application areas of MatSE (e.g., biomaterials, ceramics, metals, polymers, and electronic materials), which provide them with the detailed knowledge to be immediately useful to corporations or to provide an introduction to graduate study.

A combined B.S.-M.S. Materials Science and Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 127).

Areas of Concentration

The MatSE program provides five standard areas of concentration as well as the option to design a custom concentration of interest to the student. Students are encouraged to take technical electives outside of the department in related disciplines of interest to them and of relevance to their career goals. The five standard areas of concentration are:

- **Biomaterials**: A relatively new focus area teaching the science and engineering of materials for use in biological applications, particularly in the human body. This concentration is based on basic and intermediate chemistry along with basic and intermediate biology concepts, with relatively less use of physics topics. This focus area includes a subset of the standard junior year courses and requires additional chemistry and biology in the junior year.
- **Ceramics**: Studies the science and engineering of ceramic materials, including alloy design, composites, synthesis, and processing methods. This concentration makes significant use of concepts from both basic physics and basic chemistry.
- **Electronic Materials**: Describes the design and engineering of materials primarily for the microelectronics industries. Topics span the ceramics, metals, and polymers areas. Concepts from basic and intermediate physics are used along with basic chemistry.
- **Metals**: Introduces the design and processing of metals and alloys to achieve desired properties. This concentration primarily uses concepts from basic and intermediate physics with relatively less emphasis on chemical concepts.
- **Polymers**: Teaches the methods for molecular design to achieve desired properties in polymer molecules and polymer blends as well as processing methods. This concentration primarily uses concepts from basic and intermediate chemistry with relatively less emphasis on physics concepts.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

**Orientation and Professional Development**

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100  Engineering Orientation 1 0
### Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

1. Area specialty courses from a different area.

### Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list.

**Credits**: 6

Electives from the campus General Education Humanities and the Arts list.

**Credits**: 6

Information listed in this catalog is current as of 03/2017
Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

**Total Hours** 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

**Composition**
These courses teach fundamentals of expository writing.

- RHET 105 Writing and Research 4
- Advanced Composition (satisfied by completing the sequence MSE 307 + MSE 308 in the Materials Science and Engineering Technical Core) 6

**Free Electives**
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvice/FreeElectives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 1

1 College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvice/FreeElectives?src=search)

**Area Specialty Courses**
The courses listed below have been approved by the department to satisfy the 11-15 credit hour requirements in each of the five areas of technical concentration.

**Biomaterials Concentration**
- MSE 470 Design and Use of Biomaterials 3
- MSE 472 Biomaterials Laboratory 3
- Two area technical electives 1 6

**Ceramics Concentration**
- MSE 420 Ceramic Materials & Properties 3
- MSE 421 Ceramic Processing 3
- MSE 422 Electrical Ceramics 3
- MSE 423 Ceramic Processing Laboratory 3
- Area technical elective 3

**Electronic Materials Concentration**
- ECE 340 Semiconductor Electronics 3
- MSE 460 Electronic Materials I 3
- MSE 461 Electronic Materials II 3
- MSE 462 Electronic Materials Lab 3

Area technical elective 3

**Metals Concentration**
- MSE 440 Mechanical Behavior of Metals 3
- MSE 441 Metals Processing 3
- MSE 442 Metals Laboratory 3
- MSE 443 Design of Engineering Alloys 3
- Area technical elective 3

**Polymers Concentration**
- MSE 450 Polymer Science & Engineering 3
- MSE 452 Polymer Laboratory 3
- MSE 453 Plastics Engineering 3
- Two area technical electives 6

1 Selected from the departmental list of approved area technical electives (http://www.matse.illinois.edu/academics/undergraduate/specializations.html#approved) for areas of concentration.

**Summary of Topics Courses for Standard Areas of Concentration**
Each area of concentration requires at least one course covering each of the topics processing, design, and characterization (senior lab). For the five standard areas of concentration in the MatSE curriculum outlined above, the relevant courses are categorized in the following table.

<table>
<thead>
<tr>
<th>Area of Concentration</th>
<th>Processing</th>
<th>Design</th>
<th>Characterization (Senior Lab)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biomaterials</td>
<td>MSE 470*</td>
<td>MSE 470*</td>
<td>MSE 472</td>
</tr>
<tr>
<td>Ceramics</td>
<td>MSE 421</td>
<td>MSE 422</td>
<td>MSE 423</td>
</tr>
<tr>
<td>Electronic Materials</td>
<td>MSE 460</td>
<td>MSE 461</td>
<td>MSE 462</td>
</tr>
<tr>
<td>Metals</td>
<td>MSE 441</td>
<td>MSE 443</td>
<td>MSE 442</td>
</tr>
<tr>
<td>Polymers</td>
<td>MSE 453*</td>
<td>MSE 453*</td>
<td>MSE 452</td>
</tr>
</tbody>
</table>

* same course counts as both topics

**Customized Concentration**
Students wishing to pursue an area of concentration other than the ones described above should consult with the chief advisor of the MatSE department. A Customized Concentration (e.g., composites, bio-based materials, materials for renewable energy or sustainability, etc) must include a total of 24 credit hours: 15 hours of appropriate “area specialty courses”, 3 hours from a different specialty area; and 6 hours of electives selected from the list of approved technical electives (http://www.matse.illinois.edu/academics/undergraduate/curriculum/technical.html) established by the department. In the 15 hours of “area specialty courses” there must be a course identified for each of the topic categories in the table immediately above. The other courses may be suitable electives pertaining to the area of study. Customized Concentrations require the approval of the department and will be identified only as Customized Concentration on the transcript.

**Suggested Sequence**
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first two years of the Suggested Sequence is the same for all MatSE students.
The third and fourth years vary with the Area of Concentration chosen. Refer to the appropriate third and fourth year sequence.

Courses

MSE 101  Materials in Today's World  credit: 3 Hours.
Introduction to the field of materials science. Examination and demonstration of materials and their properties in the context of their use in everyday objects. Survey of the role materials have played and will continue to play in shaping society. Intended for non-engineering majors. Technical elective credit is not given to College of Engineering majors. This course satisfies the General Education Criteria for: UIUC: Physical Sciences

MSE 182  Introduction to MatSE  credit: 2 Hours.
Overview of MatSE as a basis for understanding how structure, property, and processing relationships are developed and used for different types of materials. Case studies of advances in new materials and processes illustrating the role of materials in modern society. Laboratory-discussion demonstrations and experiments. Design-team analysis or synthesis of objects that use materials creatively.

MSE 183  Freshman Materials Laboratory  credit: 1 Hour.
Team-based laboratory developing concepts introduced in MSE 182. Practical descriptions of materials concepts, literature research, experimental design, concept validation, teamwork, and presentation of results. Prerequisite: MSE 182.

MSE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 5 hours. May be repeated in the same term.

MSE 201  Phases and Phase Relations  credit: 3 Hours.
Understanding microstructure. Quantitative examination of phases (crystalline and non-crystalline structures) and the relationships between phases (phase diagrams). Commercial practices for producing desired microscopic phase configurations and macroscopic shapes (processing). Credit is not given for both MSE 201 and MSE 280. Prerequisite: MSE 182; credit or concurrent enrollment in CHEM 104, MATH 231 and PHYS 211.

MSE 206  Mechanics for MatSE  credit: 4 Hours.
Statics, mechanics of materials, and fluid mechanics concepts pertinent to the fields of materials science and engineering: force resultants; stresses and strains produced in elastic bodies; microscopic effects of different loading states (tension, compression, torsion, and bending) on deformable bodies; beam stresses and deflections; three-dimensional stresses and strains; stress and strain-rate relationships for Newtonian and non-Newtonian fluids; conservation equations (control volume analysis) for fluid flow; Reynolds number; slow inertial and turbulent flows. Credit is not given for both MSE 206 and either TAM 251 or TAM 335. Prerequisite: MATH 225, MATH 241 and PHYS 211; credit or concurrent enrollment in CS 101 and MSE 201.

MSE 280  Engineering Materials  credit: 3 Hours.
Materials science and engineering of ceramics, electronic materials, metals and polymers. Bonding; crystallography; imperfections; processing and properties of semiconductors, polymers, metals, ceramics and composites; phase diagrams. Case studies. Credit is not given for both MSE 280 and any of CEE 300, ME 330, MSE 201. Prerequisite: CHEM 102 and PHYS 211.

MSE 304  Electronic Properties of Matls  credit: 3 Hours.
Electronic structure and bonding of materials, electrical conduction in metals and semiconductors, and dielectric and magnetic properties of solids. Credit is not given for both MSE 304 and PHYS 460. Prerequisite: PHYS 214.
MSE 307  Materials Laboratory I  credit: 3 Hours.
Experiments using optical and scanning electron microscopy and various thermal and thermodynamic measuring techniques. Familiarization with laboratory test instruments. MSE 307 and MSE 308 are approved for General Education credit only as a sequence. Both courses must be completed to receive Advanced Composition credit. Prerequisite: Credit or concurrent registration in MSE 401 and either MSE 201 or MSE 280. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

MSE 308  Materials Laboratory II  credit: 3 Hours.
Experiments characterizing mechanical, transport, and magnetic-electric properties of materials and the use optical and scanning electron microscopy and infrared spectroscopy. MSE 307 and MSE 308 are approved for General Education credit only as a sequence. Both courses must be completed to receive Advanced Composition credit. Prerequisite: MSE 307; credit or concurrent registration in MSE 304 and MSE 405. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

MSE 395  Materials Design  credit: 3 Hours.
Design of various engineering devices, objects, or systems. Team-based and faculty-guided projects directed toward the development of materials-based solutions to problems originating from student, faculty, and industrial suggestions. Solutions are based on the knowledge, skills, and design experience acquired in earlier course work and incorporate engineering standards and realistic constraints such as economic, environmental, sustainability, manufacturability, ethical, health and safety, social, and political concerns. Prerequisite: This course is available to engineering majors with senior standing only.

MSE 396  Introduction to Research  credit: 1 to 3 Hours.
Fundamental tenets of research including an introduction to laboratory safety, constructing a hypothesis, and the design of experiments to test the hypothesis. Basics of mathematical modeling and statistical analysis of data, including the analysis of research data. Emphasis on exposure to the basic procedures comprising engineering communication and the importance of verbal and written communication. Approved for Letter and S/U grading. May be repeated in separate terms.

MSE 397  Independent Study  credit: 1 to 4 Hours.
Individual study of any topic in materials science and engineering selected by the student and conducted under the supervision of a member of the faculty. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MSE 398  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in materials science and engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

MSE 401  Thermodynamics of Materials  credit: 3 Hours.
Basic thermodynamic principles including energy, entropy, and free energy; macroscopic properties of hard and soft materials systems, such as equilibrium states, phases, and phase transitions. Application of phase diagrams. Statistical interpretation of thermodynamics on the atomistic level. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 401 and CHEM 444 or PHYS 427. Prerequisite: MSE 201 or MSE 280; credit or concurrent registration in MATH 285.

MSE 402  Kinetic Processes in Materials  credit: 3 Hours.
Kinetics of chemical reactions; rate equations, reaction mechanisms; transport processes; diffusion equations, atomic and molecular diffusion; phase transformations; nucleation, crystalization, displacive, spinodal decomposition; surface and interface phenomena; sintering, grain growth, recovery, and recystallization. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 201 and MSE 401.

MSE 403  Synthesis of Materials  credit: 3 Hours.
Fundamentals of the synthesis of materials. Principles of synthesis; processes, approaches, synthetic methodology and probes; methodologies in materials synthesis; polymerization, sol-gel processes, liquid and vapor phase synthesis, materials coupling reactions, and precursor-derived, radiation-induced and asymmetric synthesis. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 201; credit or concurrent registration in MSE 401.

MSE 404  Laboratory Studies in Materials Science and Engineering  credit: 1.5 Hours.
Experiments include direct hands-on investigations or are performed through computational approaches. Laboratory experiences include both fundamental studies as well as investigations on more applied topics. 1.5 undergraduate hours. 1.5 graduate hours. May be repeated if topics vary. Prerequisite: MSE 307 and MSE 308 or permission of instructor. Senior standing.

MSE 405  Microstructure Determination  credit: 3 Hours.
Fundamentals and applications of various forms of microscopy and diffraction for characterization of physical microstructure of materials and of various forms of spectroscopy for characterization of chemical microstructure. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 214, CHEM 104, MSE 201, and MSE 307.

MSE 406  Thermal-Mech Behavior of Matls  credit: 3 Hours.
Fundamentals of elastic, viscoelastic and plastic deformation of materials, elementary theory of statics and dynamics of dislocations; strengthening mechanisms; behavior of composites; fracture and fatigue behavior; fundamentals of thermal behavior: heat capacity, thermal expansion and conductivity; effects of thermal stress. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 406 and either ME 430 or TAM 424. Prerequisite: MSE 206; credit or concurrent registration in MSE 401.

MSE 420  Ceramic Materials & Properties  credit: 3 Hours.
Ceramic material fundamentals, emphasizing structure-property relations. Development, use, and control of the properties of a wide variety of ceramic materials from a physico-chemical point of view. 3 undergraduate hours. 3 graduate hours.

MSE 421  Ceramic Processing  credit: 3 or 4 Hours.
Microstructure development and processing of ceramic materials, with an emphasis on structure-property-processing relationships. Processing methodologies and their effects on microstructural development. Illustration and examination of several ceramic components within this context. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 420.

MSE 422  Electrical Ceramics  credit: 3 Hours.
Electrical ceramics, from insulators to conductors, and magnetic and optical materials; the role of the processing cycle and microstructure development on the design and performance of electrical components; capacitors, resistors, and inductors; structure-property relations for pyro-, piezo-, and ferroelectric materials; perovskite and spinel based structures; varistors, thermistors, transducers, actuators, memory elements, multilayered components, and their applications. Design project. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 420.

Information listed in this catalog is current as of 03/2017
MSE 423 Ceramic Processing Laboratory credit: 3 Hours.
Experiments and demonstrations involving a wide range of modern ceramic processing methods will be conducted to develop fundamental understanding of the relationships between raw materials, processing methods, microstructural development, and physical properties. Lab emphasis on the underlying physics and chemistry of processing and design of processing routes to achieve desired material properties. Technical reports. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 421.

MSE 440 Mechanical Behavior of Metals credit: 3 Hours.
Mechanical behavior of solids: crystal plasticity, dislocations, point defects and grain boundaries, creep and fatigue behavior, and fracture. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 406.

MSE 441 Metals Processing credit: 3 Hours.
Melt, mechanical, thermal, powder, and surface processing of metals. Extraction of metals, joining of metals, metal composites, and metal recycling. Relationships between the processing of metals, the microstructures that are produced, and the behavior of metal components. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 406.

MSE 442 Metals Laboratory credit: 3 Hours.
Advanced metallurgy laboratory. Effects of heat treatment; mechanical testing; oxidation and corrosion; metallography of selected alloys. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 308, MSE 440, and MSE 441.

MSE 443 Design of Engineering Alloys credit: 3 Hours.
Application of science and engineering principles to the design, selection, and performance of engineering alloys. Alloy classes, design, effect of alloying elements, relation to processing variables, and structure-property relationships; design project. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 401 and MSE 402.

MSE 445 Corrosion of Metals credit: 3 or 4 Hours.
Electrochemistry, thermodynamics, and kinetics of corrosion; behavior of ferrous and nonferrous metals; corrosion rates; corrosion control; cathodic and anodic protection; high-temperature corrosion; corrosion testing; electrolytic machining methods. 3 undergraduate hours. 3 or 4 graduate hours.

MSE 450 Polymer Science & Engineering credit: 3 or 4 Hours.
Polymer solution properties, conformation, and molecular weight characterization. Rheological and viscoelastic behavior: relaxations and transitions, rubber elasticity. Crystallinity, morphology, and deformation of crystalline polymers. Blends and composites. Methods of fabrication. 3 undergraduate hours. 3 or 4 graduate hours.

MSE 452 Polymer Laboratory credit: 3 Hours.
Experimental investigations of polymer synthesis, characterization (molecular, thermal, structural and electronic), processing and device fabrication. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 453 Plastics Engineering credit: 3 Hours.
Engineering characteristics of plastics; viscoelasticity, viscosity, yield, and fracture; reinforced polymers; processing; environmental considerations; applicability of technical data sheets; design (project); current advances. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 454 Mechanics of Polymers credit: 3 Hours.
Same as AE 427 and TAM 427. See TAM 427.

MSE 455 Macromolecular Solids credit: 3 Hours.
Mechanical behavior of amorphous and semi-crystalline polymers; overview of polymer structure and characterization; polymer morphology; orientation effects, rubber elasticity, polymer linear viscoelasticity using Boltzmann superposition and mechanical models; measurement of viscoelastic properties; relaxation and transitions; polymeric yield phenomena and plastic flow; deformation mechanisms; fracture and craze formation; impact and fatigue. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 456 Mechanics of Composites credit: 3 Hours.
Behavior of composite materials and their use in engineering structures: behavior and properties of the constituent fibers and matrices, micromechanical predictions of composite properties, anisotropic elasticity, behavior of composite laminae, and classical lamination theory; fracture mechanisms, failure theories; behavior of composite plates and beams. Same as AE 428 and TAM 428. 3 undergraduate hours. 3 graduate hours. Prerequisite: AE 321, CEE 300, ME 330, or MSE 406.

MSE 457 Polymer Chemistry credit: 3 or 4 Hours.
Methods used to synthesize macromolecules. Descriptive and mechanistic organic chemistry as they relate to polymer synthesis. Same as CHEM 480. 3 undergraduate hours. 3 or 4 graduate hours.

MSE 458 Polymer Physics credit: 3 or 4 Hours.
Physics of polymer systems. Equilibrium conformation, structure, properties and phase transitions of polymer solutions, dense melts, liquid crystals, mixtures, block copolymers, surfaces and interfaces, gels and rubbers, biopolymers, and electronic polymers. Same as CHEM 482. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401.

MSE 460 Electronic Materials I credit: 3 Hours.
Materials science, engineering, and processing of semiconductors. Semiconductor structure and chemistry relationships to electronic and optical properties. Control of processing to achieve desired properties; design and production of novel materials. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ECE 340; MSE 304 or PHYS 460.

MSE 461 Electronic Materials II credit: 3 Hours.
Materials science, engineering, and processing of microlithographic materials, conductors, and dielectrics for electronic applications. Performance related to materials properties and processing. Processing commonly used in microelectronic circuit manufacture for metallization, dielectric formation, and lithography. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340.

MSE 462 Electronic Materials Lab credit: 3 Hours.
Fabrication, analysis, and properties of thin film materials. Principles and practice of (i) deposition of thin film materials by vacuum evaporation, sputtering and plasma assisted processes; (ii) modification of properties by thermal reaction, surface treatment, etc.; (iii) characterization of key properties including electrical conductivity, optical properties, and stress. Methods to optimize the film microstructure and engineering properties via growth techniques. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340.

MSE 466 Materials in Electrochem Syst credit: 3 Hours.
Materials issues in electrochemical systems including fundamental thermodynamics, kinetics and electrode processes in electrochemical systems and materials specific issues in the materials design, materials in energy storage and conversion systems, and electrochemical corrosion. Emphasis placed on issues of materials selection, microstructure, systems design, materials limitations, and data analysis. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 466 and CHEM 524.
MSE 470  Design and Use of Biomaterials  credit: 3 Hours.
Characterization and use of biomaterials in medical applications. Concepts of biocompatibility in terms of structure and properties of materials and interactions between materials and proteins, cells, and tissue. Issues related to the design of biomaterials. Design of biomaterials to meet specific medical needs. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or concurrent registration in both MCB 252 and either CHEM 232 or MSE 403.

MSE 472  Biomaterials Laboratory  credit: 3 Hours.
Experiments involving the chemistry and physics of biomaterials, biocompatibility of materials, tissue regeneration, rheology of biomaterials and tissues, structural studies of biomaterials, and controlled release of small molecules and drugs. Laboratory techniques for protein purification, cytotoxicity testing, tissue culture, mechanical testing, microscopy, and X-ray diffraction. Same as BIOE 473. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 470.

MSE 473  Biomolecular Materials Science  credit: 3 Hours.
Fundamental and unifying principles in biomolecular materials science. Nucleic acids, proteins, lipids, and sugars. Specific and non-specific interactions which govern biomolecular behavior in a wide range of contexts (e.g., self-assembly, cell adhesion). Present knowledge and empirical evidence integrated with discussions of experimental characterization and manipulation techniques in biotechnology. Application of course content and expository research into current literature via a case study term project. 3 undergraduate hours. 3 graduate hours.

MSE 474  Biomaterials and Nanomedicine  credit: 3 Hours.
Design and synthesis of polymeric biomaterials and nanobiomaterials for their applications in drug and gene delivery. Part (1) fundamental biopolymer synthesis: functional group protection and de-protection; bioconjugation; protein pegylation and design and synthesis of natural and synthetic non-degradable and degradable polymers, hydrogels, bio-inspired materials, and stimuli responsive biomaterials. Part (2) preparation of nanomedicines for drug and gene delivery: nanofabrication of micelles, nanoparticles, protein conjugates, drug conjugates, nanoencapsulates, and polymeric vesicles; in-vitro and in-vivo small-molecule, gene, and protein delivery. Impact of the chemical structures of biopolymers on the stability, biocompatibility, toxicity, and in-vitro and in-vivo efficacy; clinical translation of the resulting nanomedicines in drug delivery. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 236 or MSE 457; MCB 450.

MSE 480  Surfaces and Colloids  credit: 3 or 4 Hours.
Chemistry and physics of surfaces and interfaces, with emphasis on behavior in liquid media. Surface composition; surface and interfacial forces; colloidal stability and flocculation; amphiphilic molecules. Same as CHEM 488. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401.

MSE 481  Electron Microscopy  credit: 3 or 4 Hours.
Theory and application of transmission electron microscopy and diffraction with emphasis on thin crystals; electron optics, interference phenomena, interpretation of images and diffraction patterns, specimen preparation. 3 undergraduate hours. 4 graduate hours. Prerequisite: MSE 405.

MSE 484  Composite Materials  credit: 3 or 4 Hours.
Metal, ceramic, and polymer matrix composites. Interrelationships between processing, microstructure, and properties. Selecting composite materials for different engineering applications. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 201 and MSE 206.

MSE 485  Atomic Scale Simulations  credit: 3 or 4 Hours.
Application of Monte Carlo and Molecular Dynamics techniques in primarily classical simulations to understand and predict properties of microscopic systems in materials science, physics, biology, and chemistry. Numerical algorithms, connections between simulation results and real properties of materials (structural or thermodynamic), and statistical and systematic error estimation using real simulation programs. Simulation project comprised of scientific research, algorithm development, and presentation. Same as CSE 485 and PHYS 466. 3 undergraduate hours. 4 graduate hours. Prerequisite: MSE 401; one of C, C++, or Fortran programming experience.

MSE 487  Materials for Nanotechnology  credit: 3 or 4 Hours.
Survey of the synthesis, processing, structure properties and technological applications of materials with nanometer dimensions. Semiconductor nanocrystals and size-dependent optical properties; metal nanostructures and plasmonics; nanowires and nanotubes; electronics and optoelectronics; nanoscale heterostructures; assembly and fabrication. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401 and PHYS 214.

MSE 488  Optical Materials  credit: 3 or 4 Hours.
Optical properties of materials of current and potential technological importance and application to devices. Applicable optics fundamentals based on Maxwell's equations. Liquid crystals for displays; photopolymers for holographic data storage; electro-optic materials for high speed light modulators; electroluminescent materials for light emitting diodes. Application of optics, materials and chemistry in design of practical devices. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401 and PHYS 214.

MSE 498  Matl Select for Sustainability  credit: 3 or 4 Hours.
Quantitative methods to optimize the selection of materials including traditional (minimize mass or volume, maximize performance) and sustainability (minimize energy consumption and CO2 emission during synthesis, maximize recyclability) goals. Tradeoff methods to optimize both via engineering design and materials selection for product lifetime, economic oulay and return, time dynamics and materials consumption, recycling, and disposal. Application of commercial software to optimize selections. For engineering and science majors only. 3 undergraduate hours. 4 graduate hours.

MSE 492  Lab Safety Fundamentals  credit: 1 Hour.
Key aspects of laboratory setups, operating procedures, and emergency preparedness measures necessary for the experimentalist. Same as CHEM 494. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only.

MSE 497  Independent Study  credit: 1 to 4 Hours.
Individual study of any topic in materials science and engineering under the supervision of a member of the faculty. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MSE 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in materials science and engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.
MSE 499  Senior Thesis  credit: 1 to 5 Hours.  
Individual research in an area of materials science and engineering under the supervision of members of the staff. 1 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Grade point average of 3.0 and consent of instructor.

Mechanical Science and Engineering

- Bachelor of Science in Engineering Mechanics (p. 202)

ME Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/ME)

Mechanical Engineering Courses

ME 170  Computer-Aided Design  credit: 3 Hours.  
Geometry and topology of engineered components: creation of engineering models and their presentation in standard 2D blueprint form and as 3D wire-frame and shaded solids; meshed topologies for engineering analysis and tool-path generation for component manufacture; ISO and ANSI standards for coordinate dimensioning and tolerancing; geometric dimensioning and tolerancing. Use of solid-modeling software for creating associative models at the component and assembly levels with automatic blueprint creation, interference checking, and linked bill of materials. Credit is not given for both ME 170 and GE 101.

ME 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.  
May be repeated.

ME 270  Design for Manufacturability  credit: 3 Hours.  
Introduction to DFM methodologies and tools; material selection (new and traditional materials); designing for primary manufacturing processes (cutting fundamentals, casting, forming, and shaping); designing with plastics (snap-fits, integral hinges, etc.); design for assembly (DFA); geometric dimensioning and tolerancing (GD&T). Prerequisite: ME 170. ME and EM majors only.

ME 297  Introductory Independent Study  credit: 1 to 3 Hours.  
Independent study and/or individual projects related to mechanical engineering. Approved for Letter and S/U grading. May be repeated to a maximum of 6 credit hours for letter grade; no limit for S/U grade mode. Prerequisite: Consent of Instructor.

ME 300  Thermodynamics  credit: 3 Hours.  
Classical thermodynamics through the second law; system and control-volume analyses of thermodynamic processes; irreversibility and availability; relations for ideal gas mixtures. Prerequisite: MATH 241.

ME 310  Fundamentals of Fluid Dynamics  credit: 4 Hours.  
Fundamentals of fluid mechanics with coverage of theory and applications of incompressible viscous and inviscid flows, and compressible high speed flows. Credit is not given for both ME 310 and TAM 335. Prerequisite: MATH 285; credit or concurrent registration in ME 300.

ME 320  Heat Transfer  credit: 4 Hours.  
Principles and application of heat transfer by conduction, convection, and thermal radiation. Prerequisite: ME 310 or TAM 335.

ME 330  Engineering Materials  credit: 4 Hours.  
Structures of polymers, metals, and ceramics as the basis for their mechanical behavior. Manipulation of structure through such processes as heat treatment and solidification. Mechanisms of material failure in service (yielding, fracture, fatigue, creep, corrosion, and wear) and simple design techniques to avoid these failures. Strategies for materials selection in design. Credit is not given for both ME 330 and either CEE 300 or MSE 280. Prerequisite: CHEM 102 and TAM 251.

ME 340  Dynamics of Mechanical Systems  credit: 3.5 Hours.  
Dynamic modeling of mechanical components and systems; time-domain and frequency-domain analyses of linear time-invariant systems; multi-degree-of-freedom systems; linearization of nonlinear systems. Credit is not given for both ME 340 and either GE 320 or AE 353. Prerequisite: MATH 285 and TAM 212; credit or concurrent registration in ECE 205, ECE 206, and MATH 415.

ME 351  Analysis of Mfg Processes  credit: 3 Hours.  
Mechanistic and empirical modeling of manufacturing processes including metal cutting theory, casting analysis, forging analysis, sheet metal forming, plastics molding, welding and mechanical joining assembly analysis. Also, hands-on exposure to manufacturing processes, CAD/CAM software (MasterCam), 5 axis machining (ShopBot), Wire EDM machining, statistical process control (SPC), and geometric dimensioning and tolerancing (GD&T) metrology principles using CMM. Prerequisite: ME 270.

ME 360  Signal Processing  credit: 3.5 Hours.  
Basic electromechanical techniques used in modern instrumentation and control systems. Use of transducers and actuators. Signal conditioning, grounding, and shielding. Analog and digital signal processing and feedback control methods with emphasis on frequency domain techniques. Frequency response of continuous and discrete systems. Credit is not given for both ME 360 and ABE 425. Prerequisite: ME 340.

ME 370  Mechanical Design I  credit: 3 Hours.  
Kinematics and dynamics of machinery, including analytical kinematics, force analysis, cam design and balancing. Application of elementary mechanics of solids to analyze and size machine components for stress and deflection. Finite-element analysis with emphasis on beam and plate models. Prerequisite: ME 170, TAM 212, and TAM 251.

ME 371  Mechanical Design II  credit: 3 Hours.  
Design and analysis of machinery for load-bearing and power transmission. Consideration of material failure modes, including yielding, fracture, fatigue, and creep. Design and selection of machine elements: bolts, springs, rolling-element bearings, fluid-film lubrication, and power transmissions, including gears and friction drives. Prerequisite: ME 330 and ME 370.

ME 390  Seminar  credit: 0 Hours.  
Lectures by faculty and invited authorities, concerning the ethics and practices of mechanical engineering/engineering mechanics, as well as its relationship to other fields of engineering, to economics, and to society. Offered fall term only. Approved for S/U grading only.

ME 400  Energy Conversion Systems  credit: 3 or 4 Hours.  
Processes and systems for energy conversion, including power and refrigeration cycles, air conditioning, thermoelectrics and fuel cells; ideal-gas mixtures and psychrometrics. 3 undergraduate hours. 4 graduate hours. Prerequisite: ME 300.
ME 401 Refrigeration and Cryogenics  credit: 3 or 4 Hours.
Theory of operation and design of equipment for production of
low temperatures, from below ambient to near absolute zero;
industrial, consumer, aerospace, medical, and research applications.
3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 300,
ME 310, and ME 320.

ME 402 Design of Thermal Systems  credit: 3 or 4 Hours.
Selection of components in fluid- and energy-processing systems
to meet system-performance requirements; computer-aided design;
system simulation; optimization techniques; investment economics and
statistical combinations of operating conditions. 3 undergraduate hours.
3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in
ME 320.

ME 403 Internal Combustion Engines  credit: 3 Hours.
Theory and analysis of reciprocating internal-combustion engines; fuels,
carburetion, combustion, exhaust emissions, detonation, fuel injection,
and factors affecting performance; laboratory work on variables that
affect performance. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: Credit or concurrent registration in ME 400 or ABE 466.

ME 404 Intermediate Thermodynamics  credit: 4 Hours.
Classical thermodynamics, including the TsD equations and the Maxwell
relations; development of thermodynamic property relations, behavior
of real gases, thermodynamics of mixtures, phase equilibrium and
chemical reactions and equilibrium with an emphasis on combustion
reactions; statistical thermodynamics including the effect of molecular
and atomic structure, statistical concepts and distributions, calculation
of thermodynamic properties of gas-phase atoms and molecules,
kinetic theory of gases, and vibrations in crystals and the electron gas in
metals; selected applications. 4 undergraduate hours. 4 graduate hours.
Credit is not given for both ME 404 and any of PHYS 427, CHEM 442, or
CHEM 444. Prerequisite: ME 300.

ME 410 Intermediate Gas Dynamics  credit: 4 Hours.
Solution of internal compressible-flow problems by one-dimensional
techniques, both steady and unsteady; flows with smooth and abrupt
area change, with friction, with heat addition, and with mass addition;
flows with weak and strong waves, multiple confined streams, and shock
waves. 4 undergraduate hours. 4 graduate hours. Prerequisite: ME 300
and ME 310; or one of AE 311, TAM 335.

ME 411 Viscous Flow & Heat Transfer  credit: 4 Hours.
Same as AE 412. See AE 412.

ME 412 Numerical Thermo-Fluid Mechs  credit: 2 to 4 Hours.
Numerical techniques for solving the equations governing conduction
and convective heat transfer in steady and unsteady fluid flows:
finite-difference and finite-volume techniques, basic algorithms, and
applications to real-world fluid-flow and heat-transfer problems. Same as
CSE 412. 2 or 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite:
ME 310 and ME 320.

ME 420 Intermediate Heat Transfer  credit: 4 Hours.
Conduction heat transfer, radiation heat transfer, mass transfer, phase
change, heat exchangers; numerical methods. 4 undergraduate hours.
4 graduate hours. Prerequisite: ME 310 and ME 320.

ME 430 Failure of Engrg Materials  credit: 3 or 4 Hours.
Material anisotropy and elasto-plastic properties at the crystal level;
microstructural basis for fatigue, fracture, and creep in metals, polymers,
and ceramics; failure mechanisms and toughening in composites;
structure and behavior of metal-matrix composites, ceramic-matrix
composites, and polymer composites. 3 undergraduate hours. 3 or 4
graduate hours. Prerequisite: ME 330.

ME 431 Mechanical Component Failure  credit: 3 or 4 Hours.
Relationship of materials and mechanics concepts to the design of
structures and components: elasticity, plasticity, thermal loading, creep,
fatigue, fracture, and residual-life assessments as they relate to materials
selection and design. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: ME 330 and ME 371; Recommended: ME 430.

ME 440 Kinem & Dynamics of Mech Syst  credit: 3 or 4 Hours.
Kinematics and dynamics of constrained rigid-body mechanical
systems; use of modern computer-based analysis software packages. 3
undergraduate hours. 4 graduate hours. Prerequisite: ME 370.

ME 445 Introduction to Robotics  credit: 4 Hours.
Same as AE 482 and ECE 470. See ECE 470.

ME 446 Robot Dynamics and Control  credit: 4 Hours.
Same as ECE 489 and SE 422. See SE 422.

ME 450 Modeling Materials Processing  credit: 3 Hours.
Manufacturing processes for metals and polymers; creation of
process models based on momentum, heat, and mass transfer; model
simulation by estimation and scaling; applications to casting,
microstructure evolution, polymer molding and extrusion, and welding.
3 undergraduate hours. 3 graduate hours. Prerequisite: ME 320 and
ME 330.

ME 451 Computer-Aided Mfg Systems  credit: 3 or 4 Hours.
The application of computer technology and operations research to
manufacturing systems. Use of microprocessors for direct numeric
control of machine tools, adaptive control and optimization, and
integrated manufacturing systems. Applications of industrial robots. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 350.

ME 452 Num Control of Mfg Processes  credit: 3 Hours.
Numerical control systems, manufacturing processes, principles and
practices basic to numerical control, and programming methodology
for numerical control. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: CS 101 and ME 350.

ME 455 Micromanufacturing Process & Automation  credit: 3 or 4
Hours.
Scaling laws in miniaturization, Micro-machine tools design and
characterization, Micromanufacturing process modeling, simulation
and automation, Micro-metrology and Micro-assembly systems.
3 undergraduate hours. 4 graduate hours. Prerequisite: ME 270 or
equivalent or consent of instructor.

ME 460 Industrial Control Systems  credit: 4 Hours.
Industrial control techniques; case studies of industrial systems; design,
selection, and maintenance of industrial control systems, including
electromechanical, pneumatic, thermal, and hydraulic systems. 4
undergraduate hours. 4 graduate hours. Credit is not given for both
ME 460 and ECE 486. Prerequisite: ME 340 and ME 360.

ME 461 Computer Cntrl of Mech Systems  credit: 3 Hours.
Microcomputer control of thermal and mechanical systems: sensors and
transducers, signal transmission and conversion, and regulator actuation.
3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 360 or
ABE 425.
ME 470 Senior Design Project credit: 3 Hours.
Solution of a real-world design problem: development, evaluation, and recommendation of alternative solutions subject to realistic constraints that include most of the following considerations: economics, environment, sustainability, manufacturability, ethics, health and safety, society, and politics. 3 undergraduate hours. No graduate credit. Departmental approval required. Prerequisite: Concurrent enrollment in no more than two required ME courses; completion of all required courses.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

ME 471 Finite Element Analysis credit: 3 or 4 Hours.
The finite element method and its application to engineering problems: truss and frame structures; heat conduction, and linear elasticity; use of application software; overview of advanced topics such as structural dynamics, fluid flow, and nonlinear structural analysis. Same as AE 420 and CSE 451. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both ME 471 and CEE 470. Prerequisite: CS 101 and ME 370.

ME 472 Introduction to Tribology credit: 3 or 4 Hours.
Friction, wear, and lubrication; engineering surfaces; surface properties and surface topography; Hertzian contacts and contact of rough surfaces; friction of surfaces in contact; wear and surface failures; boundary lubrication; fluid properties; hydrodynamic lubrication; elastohydrodynamic lubrication; bearing selection; introductory micro- and nanotribology. 3 undergraduate hours. 3 or 4 graduate hours.

ME 481 Whole-Body Musculoskel Biomech credit: 3 or 4 Hours.
Exploration of the human musculoskeletal system with an emphasis on the whole-body or organism level; modeling and analysis techniques for examining human movement, such as rigid-body modeling techniques, forward and inverse dynamics, and Lagrangian mechanics; examination of current topics, such as orthopedic biomechanics, prosthetics and orthotics, postural control, and locomotion; use of computerized motion-capture equipment and software to examine, simulate, and analyze human movement. Same as BIOE 481. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: TAM 212 and TAM 251.

ME 482 Musculoskel Tissue Mechanics credit: 3 Hours.
Composition-structure-function relationships for musculoskeletal tissues, including bone, tendon, ligament, cartilage, and muscle; hierarchical structure of tissues from the macro- to nano-scales; relation of composition to mechanical properties of health and diseased tissue; experimental methods used to obtain mechanical properties. Same as BIOE 482. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: TAM 212 and TAM 251.

ME 483 Mechanobiology credit: 4 Hours.
Integrative approach to mechanobiology; mechanics of cell adhesion; cytoskeletal structure and mechanics; mechanotransduction; mechanics of cell proliferation, apoptosis, cancer cells, and stem cells; aging; critical issues facing the mechanobiological sciences. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 103 and TAM 251.

ME 485 MEMS Devices & Systems credit: 3 Hours.
Same as ECE 485. See ECE 485.

ME 487 MEMS-NEMS Theory & Fabrication credit: 4 Hours.
Physical and chemical theory, design, and hands-on fabrication of micro- and nano-electromechanical systems (MEMS and NEMS); cleanroom fabrication theory, including general cleanroom safety, lithography, additive and subtractive processes, bulk and surface micromachining, deep reactive ion etching (DRIE), lithographic Galvanoformung Abformung (LIGA), packaging, scaling, actuators, and micro-nanofluids; fabrication of two take-home devices, such as piezoresistive sensors and microfluidic logic chips, that demonstrate advanced fabrication processing. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 212.

ME 496 Honors Project credit: 1 to 4 Hours.
Special project or reading course for James Scholars in engineering. 1 to 4 undergraduate hours. No graduate credit. May be repeated. Prerequisite: Consent of instructor.

ME 497 Independent Study credit: 1 to 4 Hours.
Independent study of advanced problems related to mechanical engineering. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

ME 498 Special Topics credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in mechanical engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 0 to 4 undergraduate hours. 0 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 hours.

TAM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/TAM)

Theoretical and Appl Mechanics Courses
TAM 195 Mechanics in the Modern World credit: 1 Hour.
Freshman introduction to engineering mechanics and its role in modern engineering analysis and design. Project activity.

TAM 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

TAM 201 Mechanics for Technol & Mgmt credit: 3 Hours.
Engineering mechanics (statics, dynamics, solid mechanics, and fluid mechanics) and the role that mechanics plays in engineering analysis and design. For Technology and Management majors only.

TAM 210 Introduction to Statics credit: 2 Hours.
Forces, moments, couples; resultants of force systems; equilibrium analysis and free-body diagrams; analysis of forces acting on members of trusses, frames, etc.; shear-force and bending-moment distributions; Coulomb friction; centroids and center of mass; applications of statics in design. Credit is not given for both TAM 210 and TAM 211. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.

TAM 211 Statics credit: 3 Hours.
Forces, moments, and couples; resultants of force systems; equilibrium analysis and free-body diagrams; analysis of forces acting on members of trusses, frames, etc.; shear-force and bending-moment distributions; Coulomb friction; centroids, center of mass, moment of inertia, polar moment of inertia, and product of inertia; virtual work; hydrostatic pressure; applications of statics in design. Credit is not given for both TAM 211 and TAM 210. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.
TAM 212  Introductory Dynamics  credit: 3 Hours.
Kinematics and dynamics of the three-dimensional motion of particles; kinematics and dynamics of the plane motion of rigid bodies; methods of work energy and impulse momentum; moving reference frames. Prerequisite: TAM 210 or TAM 211.

TAM 251  Introductory Solid Mechanics  credit: 3 Hours.
Relationship between internal stresses and deformations produced by external forces acting on deformable bodies, and design principles based on mechanics of solids: normal stresses, shear stresses, and deformations produced by tensile, compressive, torsional, and bending loading of members; beam deflections; elastic energy and impact; multi-dimensional stress states; buckling of columns. Prerequisite: TAM 210 or TAM 211.

TAM 252  Solid Mechanics Design  credit: 1 Hour.
Design problems and projects intended to accompany TAM 251. Prerequisite: Credit or concurrent registration in TAM 251.

TAM 297  Introductory Independent Study  credit: 1 to 3 Hours.
Independent study and/or individual projects related to engineering mechanics. Approved for Letter and S/U grading. May be repeated to a maximum of 6 credit hours for letter grade; no limit for S/U grade mode. Prerequisite: Consent of Instructor.

TAM 302  Engineering Design Principles  credit: 3 Hours.
Examples of mechanical design problems that occur in engineering practice and the procedures and issues involved in solving them; technical aspects and societal ramifications of the design process; intellectual property, ethics, and contemporary issues; probability and statistics; computational mechanics; case studies; student discussion of design-related issues at different levels; design project reports and presentations; student teams.

TAM 324  Behavior of Materials  credit: 4 Hours.
Same as CEE 300. See CEE 300.

TAM 335  Introductory Fluid Mechanics  credit: 4 Hours.
Fluid statics; continuity, momentum, and energy principles via control volumes; ideal and real fluid flow; introduction to the Navier-Stokes equation; similitude; laminar and turbulent boundary layers; closed-conduit flow, open-channel flow, and turbomachinery. Prerequisite: TAM 212.

TAM 412  Intermediate Dynamics  credit: 4 Hours.
Lagrangian mechanics of dynamical systems with an emphasis on vibrations; constraints and generalized coordinates; motion in accelerating frames; conservation laws and invariance of the Lagrangian; particle motion in one dimension, the two-body problem, and central-force motion; free and forced vibration of linearized single-degree-of-freedom and multi-degree-of-freedom discrete systems; weakly nonlinear vibrations; parametric resonance; introduction to Hamiltonian dynamics; rigid-body motions. 4 undergraduate hours. 4 graduate hours. Credit is not given for both TAM 412 and AE 352. Prerequisite: MATH 225 or MATH 415; MATH 285; TAM 212.

TAM 413  Fund of Engg Acoustics  credit: 3 or 4 Hours.
Same as ECE 473. See ECE 473.

TAM 416  Intro to Nonlinear Dyn & Vib  credit: 4 Hours.
Single- and multi-degree-of-freedom oscillators; asymptotic methods; forced, internal and combination resonances; time-discrete dynamical systems (maps); complex dynamics; parametric vibrations and resonances; introduction to nonlinear localization and nonlinear targeted energy transfer; nonlinear vibrations of elastic continua; application in mechanics and engineering. 4 undergraduate hours. 4 graduate hours. Prerequisites: MATH 285 OR MATH 441; MATH 415; TAM 212.

TAM 424  Mechanics of Structural Metals  credit: 3 Hours.
Micromechanisms at the atomic, single-crystal, and polycrystal levels and their use in explaining the deformation and failure characteristics of metals; elastic deformation, dislocation mechanics, plastic deformation and strengthening mechanisms, fracture mechanics and fracture mechanisms, fatigue, and creep; design criteria; special topics. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 301 or TAM 210.

TAM 427  Mechanics of Polymers  credit: 3 Hours.
Mechanical behavior of amorphous and semi-crystalline polymers; overview of polymer structure, properties, and processing; polymer linear viscoelasticity using Boltzmann superposition and mechanical models; measurement of viscoelastic properties; polymeric yield phenomena; fracture and craze formation; impact and fatigue. Same as AE 427 and MSE 454. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 300 or ME 330.

TAM 428  Mechanics of Composites  credit: 3 Hours.
Same as AE 428 and MSE 456. See MSE 456.

TAM 435  Intermediate Fluid Mechanics  credit: 4 Hours.
Analytical solution methods for problems involving ideal and real fluids: potential flow theory, boundary-layer theory; surface waves, vortex dynamics, and compressible flows. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of AE 312, ME 310, TAM 335.

TAM 445  Continuum Mechanics  credit: 4 Hours.
Tensor algebra and analysis; kinematics of continua; mass, force, stress, and the general balance laws of continuum mechanics; introduction to constitutive equations. 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.

TAM 451  Intermediate Solid Mechanics  credit: 4 Hours.
Analysis of stress and strain (definitions, transformation of axes, equilibrium equations, and symmetry of the stress tensor); linear materials, Hooke’s law; strain energy, potential energy, energy principles and methods; two-dimensional problems in elasticity (torsion, axisymmetric problems); the finite-element method for two- and three-dimensional boundary-value problems in linear elasticity; plasticity (introduction, yield criteria, elastic-plastic behavior, and limit-load calculations); linear-elastic fracture mechanics (introduction, Griffith’s approach, stress intensity factor, and energy release rate). 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.

TAM 456  Experimental Stress Analysis  credit: 3 Hours.
Basic theories for measuring stresses and deformations in load-carrying engineering components; use of optical, electrical, and mechanical instrumentation; laboratory sessions on brittle coatings, electrical resistance strain gages, photoelasticity, and moire interferometry. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 251.

TAM 461  Cellular Biomechanics  credit: 4 Hours.
Mechanics of biological cells and tissues: cell structure; mechanics of biomembranes; the cytoskeleton and cortex; dynamic cell processes; cell motility and control of cell shape and proliferation; experimental approaches and theoretical models. Same as BIOE 461. 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.

TAM 470  Computational Mechanics  credit: 3 or 4 Hours.
Modemcomputational mechanics: mappings and iterative methods; stability; convergence; consistency; numerical and symbolic solutions of ordinary and partial differential equations; finite-difference methods; the finite-element method; spectral methods. Applications to problems in solid mechanics, fluid mechanics, and dynamics. Same as CSE 450. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 101 and MATH 285.
Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum.

These rules are summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Secondary Field Option Electives
This component of the curriculum enables the student to specialize further by electing a secondary field, a coherent group of technical courses in mechanics and closely related subjects. The current secondary fields are:

- Biomechanics
- Computational Mechanics
- Engineering Science and Applied Mathematics
- Experimental Mechanics
- Fluid Mechanics
- Mechanics of Materials
- Solid Mechanics

Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for them are indicated on the Engineering Mechanics Secondary Field Webpage (http://mechanical.illinois.edu/undergraduate/engineering-mechanics/em-secondary-fields). To add flexibility to the program and to accommodate particular interests, the student may petition to substitute appropriate courses, including 500-level courses if the student has the adequate preparation, for any of the secondary field elective courses. Without petition, a student may select any one course listed as required in one of the secondary field options to satisfy elective course credits in a chosen secondary field.

Secondary field electives selected from departmentally approved courses for Secondary Field Options.

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives?src=search) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list.
Electives from the campus General Education Humanities and the Arts list.
Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours

Composition
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research
Advanced Composition (satisfied by completing TAM 324 in the Engineering Mechanics Technical Core)

Total Hours

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering Advising Website, so that there are at least 128 credit hours earned toward the degree.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

For the Degree of Bachelor of Science in Mechanical Engineering

Mechanical engineering may be the most diverse of the engineering fields, embracing many subfields and affecting all aspects of our lives. Mechanical engineers work on new machines, products, and processes that hold the promise of better lives for all of us. They are concerned with both technological and economic aspects in the design, development, and use of their products. Today, one of the challenges is to design efficient, low-cost machines and processes that use the fewest possible natural resources to improve the lives of people throughout the world.

The technical portion of the mechanical engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student's first year is spent mastering the basics of science: math, chemistry, and physics. Building on this base, in the second year students begin to take fundamental engineering courses such as statics, dynamics, basic circuits and electronics, thermodynamics, and strength of materials. By the third year, students are taking specialized courses in areas such as computational mechanics, behavior of materials, thermodynamics, heat transfer, dynamic systems and controls, materials, mechanical design, and manufacturing. Finally, during the senior year, students have the opportunity to both broaden and deepen their knowledge of the field through technical elective courses. At the end of the curriculum, students take the capstone senior design course in which the knowledge and skills they have learned are applied to projects submitted to the department by industrial firms or by faculty members. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout the curriculum from the first year to the last year.

A combined B.S.-M.S. Mechanical Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 127).

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is ME 170.
Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100  Engineering Orientation 1 0
ME 390  Seminar 0

ME 330  Engineering Materials 4
ME 340  Dynamics of Mechanical Systems 3.5
ME 360  Signal Processing 3.5
ME 370  Mechanical Design I 3
ME 371  Mechanical Design II 3
ME 470  Senior Design Project 3
TAM 210  Introduction to Statics 2
TAM 212  Introductory Dynamics 3
TAM 251  Introductory Solid Mechanics 3
Total Hours 52

Technical Electives

The science electives augment the foundational science courses in an area of interest and preparation for later courses. The MechSE, statistics, and additional technical courses stress the rigorous analysis, design, and statistics principles practiced in mechanical engineering.

Science elective(s), chosen from one of the following: 4
CHEM 104  General Chemistry II
& CHEM 105 and General Chemistry Lab II
MCB 150  Molec & Cellular Basis of Life
PHYS 213  Univ Physics: Thermal Physics & PHYS 214and Univ Physics: Quantum Physics
MechSE electives chosen from a departmentally approved list. 1 6
Statistics elective, one course chosen from: 3
IE 300  Analysis of Data
STAT 400  Statistics and Probability I
Technical electives chosen from a departmentally approved list. 2 6
Total Hours 19

1 MechSE electives departmentally approved list (http://mechanical.illinois.edu/undergraduate/mechanical-engineering/mech-electives).
2 Technical electives departmentally approved list (http://mechanical.illinois.edu/undergraduate/mechanical-engineering/mech-electives).

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives?src=search) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102  Microeconomic Principles 3
or ECON 103  Macroeconomic Principles
Electives from the campus General Education Social and Behavioral Sciences list. 3
Electives from the campus General Education Humanities and the Arts list. 6
Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6
Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that...
simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Information listed in this catalog is current as of 03/2017
The use of radiation sources in such areas as materials, biological systems, development of fusion reactors for electric power generation; and the thermal sources; plasma processing applications and the longer term reliable application of fission reactors as central electric power plant and industrial uses. Areas of interest include the continued safe and production, in materials processing and science, and for biomedical and radiation sources for a wide variety of applications in energy that is concerned with the development and use of nuclear energy.

Nuclear, plasma, and radiological engineering is a branch of engineering upon which the engineering discipline is based. These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to digital computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in bioengineering. To complete this concentration area, students should take certain chemistry and biology courses in the first two years of the curriculum.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

1. External transfer students take ENG 300 instead.

Foundational Mathematics and Science
These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Total Hours: 46

1. Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

2. Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

Professional Concentration Area Electives

The NPRE Professional Concentration Area requirement is fulfilled by taking certain required technical and some elective technical courses stressing the rigorous analysis and design principles practiced in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

Professional Concentration Area electives. See the Professional Concentration Areas section below.

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal%3dEducation%3dElectives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation. Alternatively, NPRE 481 should be considered, which may also be applied to the Professional Concentration elective hours.

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free%3dElectives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Professional Concentration Areas

Students are expected to develop a solid background in one of the various subfields within a Professional Concentration Area which are defined below.

Power, Safety, and the Environment

<table>

Technical electives broken down as follows: 16

A minimum of 6 hours of departmentally approved NPRE Electives.

Information listed in this catalog is current as of 03/2017
Technical electives selected from departmentally approved Power, Safety, and the Environment elective course work in one of the following subfields: Thermal Sciences; Power and Control Systems; Solid, Fluid and Continuum Mechanics; Computational Sciences and Engineering; Environmental Engineering and Science. The student’s academic advisor must approve the chosen course set to insure that a strong program is achieved. ¹

Total Hours 25

¹ Power, Safety, and the Environment elective course work.

Technical electives selected from departmentally approved Radiological, Medical and Instrumentation Applications elective course work in one of the following subfields: Biomolecular Engineering, Biomedical Engineering, and Radiation Detection and Analysis. The student’s academic advisor must approve the chosen course set to ensure that a strong program is achieved. ¹

Total Hours 20

¹ Radiological, Medical and Instrumentation Applications elective course work

### Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Semester Hours 14

Total Hours: 128

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a free elective.
³ Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
⁴ Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.
⁵ Consideration should be given to NPRE 101 as a free elective in the spring semester of the freshman or sophomore year. Alternatively, free elective hours provide a means to fulfill requirements for campus minors such as Bioengineering, Computer Science, International Minor in Engineering, Mathematics, or Physics, without excessive additional hours beyond the normal degree requirements.
⁶ Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. This facilitates the minor in Physics. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.
⁷ A student must fulfill the NPRE Professional Concentration Area requirement (http://npre.illinois.edu/academics/undergraduate-program/technical-electives) by taking the required technical courses and technical elective courses in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.
⁸ Students in the Power, Safety, and the Environment and in the Plasma and Fusion Science Engineering Professional Concentration Areas must take a fluid mechanics course (TAM 335 or ME 310) and NPRE 421. Students in the Radiological, Medical, and Instrumentation Applications Concentration are not required to take these courses. They may instead use the hours otherwise filled with these courses to take electives in the Radiological, Medical and Instrumentation Applications Areas.

NPRE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/NPRE)

Courses
NPRE 100 Orientation to NPRE credit: 1 Hour.
Introduction to nuclear, plasma, and radiological engineering. Demonstrations and discussion of nuclear phenomena (reactor operation, plasma behavior, and others). Experiments on radioactive decay and radiation shielding with formal laboratory report and a student project.

NPRE 101 Introduction to Energy Sources credit: 3 Hours.
Explanation of energy technologies using an elementary approach presupposing no prior scientific or technical background. Coverage of all energy sources including fossil fueled, solar, hydro, and nuclear power. Integral demonstrations and a tour of the University’s power plant. Discussion of energy related incidents with emphasis on environmental, economic, and social impact. Same as ENVS 101.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

NPRE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated in separate terms to a maximum of 2 times.

NPRE 201 Energy Systems credit: 2 or 3 Hours.
Patterns of energy production and utilization and technical aspects of renewable energy resources, advanced fossil fuel systems, and advanced nuclear systems. Same as GLBL 201. Prerequisite: MATH 220 or MATH 221; one of PHYS 101, PHYS 211, CHEM 104, CHEM 204, ME 300.

NPRE 241 Intro to Radiation Protection credit: 2 Hours.
Elements of radiation protection and health physics, emphasizing practical applications. Prerequisite: MATH 220 or MATH 221; one of CHEM 102, IB 150, MCB 150, PHYS 211.
NPRE 247 Modeling Nuclear Energy System  credit: 3 Hours. 

NPRE 397 Independent Study  credit: 1 to 4 Hours. 
Individual investigations or studies of any phase of nuclear engineering selected by the student and approved by the department. May be repeated. Prerequisite: Consent of instructor.

NPRE 398 Special Topics  credit: 1 to 4 Hours. 
Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

NPRE 402 Nuclear Power Engineering  credit: 3 or 4 Hours. 
Principles of utilization of fission energy in nuclear power engineering; includes such topics as fission processes and controlled chain reactions; nuclear reactor types, design principles, and operational characteristics; power reactor design criteria; radiation hazards and radioactive waste treatment; economics; other applications such as propulsion and research reactors. 3 undergraduate hours. 4 graduate hours. Credit is not given for both NPRE 402 and NPRE 247.

NPRE 412 Nuclear Power Econ & Fuel Mgmt  credit: 3 or 4 Hours. 
Quantitative analysis of the impact of the nuclear power industry; nuclear fuel cycle and capital costs for thermal and fast reactors; optimization of the use of nuclear fuels to provide the lowest energy costs and highest system performance; comparison between fossil fuel systems, fission systems, and controlled thermonuclear fusion systems. 3 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 402 or NPRE 247. Junior standing is required.

NPRE 421 Plasma and Fusion Science  credit: 3 Hours. 
Physics of plasmas, including particle and fluid descriptions, waves, collisions, stability, and confinement, with applications to controlled thermonuclear fusion reactors, problems in fusion engineering, and astrophysics. 3 undergraduate hours. 3 graduate hours. Prerequisite: For engineering or physical science majors with junior standing.

NPRE 423 Plasma Laboratory  credit: 2 Hours. 
Experiments relating to plasma engineering and fusion energy. Topics in ultra-high vacuum technology rf and dc electric plasma probes, measurements of dc and pulsed magnetic fields, dynamics of a theta pinch, and laser interferometry to measure plasma density. 2 undergraduate hours. 2 graduate hours. Prerequisite: NPRE 421 and NPRE 451.

NPRE 429 Plasma Engineering  credit: 3 Hours. 
Basic principles and examples for adapting and applying the plasma state to solve a number of modern engineering problems. Plasma processing of materials for microelectronics and other uses, lighting, plasma displays, and other technologies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329 or PHYS 435.

NPRE 431 Materials in Nuclear Engrg  credit: 3 Hours. 
Development of a materials engineering background in the context of nuclear systems and radiation applications; relation of structure of materials to their physical and mechanical properties; development of phase formation and reaction kinetics from basic thermodynamics principles; charged particle interactions with surfaces; transport concepts of neutral and charged particles in matter; materials performance in nuclear and radiation applications, including radiation damage and effects. 3 undergraduate hours. 3 graduate hours.

NPRE 432 Nuclear Engrg Materials Lab  credit: 2 Hours. 
Experiments relating to materials applications in nuclear engineering and energy systems. Examination of topics in room and elevated temperature mechanical properties of structural materials, corrosion, physical properties, radiation damage and effects, and materials selection in design. 2 undergraduate hours. 2 graduate hours. Prerequisite: Credit or concurrent registration in NPRE 431.

NPRE 435 Radiological Imaging  credit: 3 Hours. 
Physical, mathematical and experimental foundations of radiological imaging techniques, such as typical sources of ionizing radiation, the interactions of radiation with matter, image formation techniques, linear systems theory applied to radiological imaging, and the techniques for tomographic image reconstruction. Includes diagnostic radiological imaging modalities, such as X-ray computed tomography (CT), single photon computed emission tomography (SPECT), positron emission tomography (PET), as well as modern X-ray imaging techniques, such as phase contrast imaging and diffraction-enhanced X-ray imaging. Provides a solid foundation for understanding of modern radiological imaging techniques, and in-depth discussions on the strengths and limitations of various modalities in application to medical, physical, security and environmental imaging. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 441 Radiation Protection  credit: 4 Hours. 
Sources of nuclear radiation; ionization and energy deposition in matter with an emphasis on biological systems; principles of dosimetry; determination of exposure and limits for internal and external emitters; basic shielding calculations. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 446.

NPRE 442 Radioactive Waste Management  credit: 3 Hours. 
Radiation and radiological concepts and measurement, the fuel cycle and waste classification, Part 61, state and federal regulations and regulatory agencies, radiochemistry and the environmental fate of radionuclides, uranium-related wastes, low-level wastes, high-level wastes, used fuel reprocessing, private fuel storage, waste package stability, risk assessment, geologic repositories, transporting radioactive wastes, decommissioning wastes, transmutation, an international perspective on radioactive waste management, and the global nuclear energy partnership. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 231; PHYS 102 or PHYS 212.

NPRE 444 Nuclear Analytical Methods Lab  credit: 2 or 3 Hours. 
Experiments relating to nuclear analytical methods and techniques. Emphasis on neutron activation analysis, energy dispersive x-ray fluorescence and particle spectroscopy. Use of radiation for medical and materials imaging. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Credit of 2 hours is given if NPRE 451 or equivalent has been taken. Prerequisite: CHEM 102 and NPRE 446.
NPRE 446 Radiation Interact w/Matter I credit: 3 Hours.
Experimental and theoretical foundations of interaction of neutrons, photons, and charged particles with matter. Emphasis on topics that underlie the following applications: radiation detection, biological effects and radiation dosimetry, radiation damage and nuclear materials, neutron activation analysis, and fission and fusion energy systems. Classical theory of charged particle cross sections. Introductory quantum mechanics. Exact and numerical solutions of the Schroedinger equation. Quantum theory of cross sections. Photon interactions with atomic electrons and nuclei. Radioactive-series decay. Computer assignments illustrate fundamental concepts. 3 undergraduate hours. 3 graduate hours. Credit is not given to NPRE majors for graduate hours. Prerequisite: MATH 285 and ME 300.

NPRE 447 Radiation Interact w/Matter II credit: 3 Hours.
Continuation of NPRE 446. Quantum theory of ionization of matter by charged particles. Nuclear models and structure. Alpha decay, fission and fusion reactions. Beta and gamma decay. Nuclear reactions. Radiation damage effects. Special topics. Computer assignments to illustrate fundamental concepts. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 448 Nuclear Syst Engrg & Design credit: 4 Hours.
Engineering principles underlying nuclear systems designed with emphasis on nuclear power reactors. Materials for nuclear systems. Energy generation and removal in single- and two-phase flows. Reactor and component control systems and nuclear fuel reloading patterns. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 285, ME 300, and NPRE 455.

NPRE 451 NPRE Laboratory credit: 3 Hours.
Radiation detection and instrumentation; radiation dosimetry and shielding; basic measurements in nuclear engineering; engineering applications; micro computer data acquisition and experimental control. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 455 Neutron Diffusion & Transport credit: 4 Hours.
Neutron migration, neutron slowing down and thermalization; neutron continuity equation, multigroup diffusion theory, homogeneous and heterogeneous medium, thermal and fast assemblies; numerical methods for multigroup diffusion equations; reactor dynamics perturbation theory; reactivity coefficients; introductory transport theory. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 247.

NPRE 457 Safety Anlys Nucl Reactor Syst credit: 3 or 4 Hours.
Basic safety philosophy in nuclear reactor systems; brief review of nuclear reactor systems; regulatory processes; siting considerations; safety problems related to reactor dynamics; evaluation of postulated accidents; risks associated with nuclear fuel cycle; methods of systems safety analysis. 3 or 4 graduate hours. Prerequisite: NPRE 402 or NPRE 247.

NPRE 458 Design in NPRE credit: 4 Hours.
Design in nuclear, plasma, and radiological engineering systems; basic principles of definition, organization, constraints, modeling and optimization of system design; case studies; class design projects applying these basic principles. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 448.

NPRE 461 Probabilistic Risk Assessment credit: 3 or 4 Hours.
Multidisciplinary theories and techniques of risk, safety, and reliability of complex systems and state-of-the-art Probabilistic Risk Assessment (PRA), which provides input for risk-informed decision-making for design, operation, and regulatory oversight in diverse high-consequence industries such as nuclear power, aviation, space, chemical processes, oil and gas, and healthcare. Topics include: Systematic Risk Scenario Modeling, Consequence Analysis, Bayesian Updating, Bayesian Belief Network, Binary Decision Diagram, Uncertainty Propagation, Hardware Reliability, Human Error Modeling, Failure Causal Modeling, Maintenance and Repair Modeling, Risk Importance Ranking, and Data Analytics. PRA and Reliability Engineering software codes will be utilized for assignments. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, Senior or Graduate Standing in any Engineering Department.

NPRE 470 Fuel Cells & Hydrogen Sources credit: 3 Hours.
The role of hydrogen as a global energy form, hydrogen production by nuclear, fossil and renewable energy sources; hydrogen handling, safety; transportation and storage methods including high-pressure, cryogenic, metal hydrides and chemical hydrides; basic science and technology of fuel cells, including electrochemical processes; fuel cell thermodynamics; low- and high-temperature fuel cells; applications including portable electronics, automotive vehicles, distributed and back-up power, and space power. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 102, MATH 285, and PHYS 212.

NPRE 475 Wind Power Systems credit: 3 or 4 Hours.
Overview of wind energy systems; historical development, safety aspect, environmental considerations, wind properties and measurement, site selection, and wind turbine design; transmission systems considerations; mechanical, electrical, control aerodynamic and environmental engineering of modern wind turbines; fatigue failure; annual power production; economics and environmental aspects and accident prevention and mitigation; computational fluid dynamics (CFD) analysis of wind flow and blade interactions; energy storage options; hydrogen production; electrical power transmission issues; licensing issues; alternative wind energy systems; design project involving a wind farm or the construction of a specific type of wind turbine based on a wind park site visit. 3 or 4 undergraduate hours. 4 graduate hours. Prerequisite: CS 101, MATH 241; one of CHBE 421, ECE 110, ECE 205, ME 310, TAM 335.

NPRE 480 Energy and Security credit: 3 Hours.
Security and supplies of energy, mineral resources, and water. Evolution of the importance of various fuels in conflicts (including coal, oil, uranium, and natural gas) starting with the Franco-Prussian Wars. Theories of international conflict and examination of the role of individual leaders versus institutional factors in the precipitation and outcome of pivotal wars. Econometric analyses relevant to past and projected future energy use. Same as GLBL 480 and PS 480. 3 or 4 undergraduate hours. 3 graduate hours. Prerequisite: Composition I and Quantitative Reasoning I.

NPRE 481 Writing on Technol & Security credit: 3 Hours.
Development of writing skills in standard computer, desktop publishing, and electronic publishing formats. on themes such as, global and regional security environments, arms control, nuclear energy, and climate change. For graduate credit, writing projects include documentation of computational work using software appropriate for typesetting of mathematical formulas. Same as GLBL 481. 3 undergraduate hours. 3 graduate hours. This course satisfies the General Education Criteria for: UIUC: Advanced Composition
NPRE 483  Seminar on Security  credit: 1 Hour.
Preparation of reports on a set of introductory lectures and student choices from various on-campus seminar series relevant to technology of domestic and international security and the regional and international contexts that influence the nature of security problems. Same as GLBL 483. 1 undergraduate hour. 1 graduate hour. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Composition I.

NPRE 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

For the Degree of Bachelor of Science in Engineering Physics
The Engineering Physics curriculum is a flexible program that combines a firm foundation in physics and mathematics with the freedom to choose from a diverse range of technical options. The curriculum is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.
A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

1  External transfer students take ENG 300 instead.

Foundational Mathematics and Science
These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

1  MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

NPRE 485 may be replaced by MATH 441 followed by MATH 442.

Engineering Physics Technical Core
These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of engineering physics.

1  If PHYS 486 is chosen, take prerequisite MATH 415, which may be used to meet free elective requirements.

Flexible Physics Core Electives
These courses complement the Engineering Physics Technical Core, extending the intellectual understanding of engineering physics.

Flexible physics core electives. Choose three courses from a departmentally approved list with at least one being a lab course, PHYS 401, PHYS 402, PHYS 403, PHYS 404, or PHYS 406. The number of hours varies depending upon the courses chosen. 1

1  Departmentally Approved List

Mathematics Elective
Mathematics elective, chosen from a departmentally approved list of Mathematics Electives. 1

1  Approved list of Mathematics Electives

Technical/Professional Option Electives
Students may select from a list of preapproved options or design a custom option, subject to departmental approval. The current preapproved options, requiring 12-22 credit hours of course work, are:
• Acoustical Physics
• Astrophysics
• Atmospheric Science
• Biophysics
• Business
• Computational Physics
• Computer Engineering
• Energy/Sustainability
• Materials Science
• Nuclear Physics
• Optical Physics
• Law
• Professional Physics
• Solid State Electronics
• Pre-Med
• Pre-Law

The course work is selected in consultation with the student's advisor to address an intellectually coherent body of knowledge.

Technical/professional option electives for the option selected, chosen from a departmentally approved list of Technical/Professional Option Electives (or a list designed for a departmentally approved custom option). The number of hours varies depending upon the option chosen. ¹

¹ List of Technical/Professional Option Electives

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education Social and Behavioral Sciences list. 6

Electives from the campus General Education Humanities and the Arts list. 6

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

RHET 105 Writing and Research 4

Advanced Composition. May be satisfied by completing a course with the Advanced Composition designation in either the social sciences and humanities or the free elective categories.

Total Hours 4

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering Advising Website, so that there are at least 128 credit hours earned toward the degree. The number of hours varies depending upon the total hours earned in both the Flexible Physics Core and the Technical/Professional Option and whether or not MATH 415 and PHYS 486 are taken in place of PHYS 485.

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Semester Hours: 16-15

Total Hours: 128

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. Students with proficiency or advanced placement (AP or IB) credit in MATH 221 are strongly encouraged to enroll in MATH 231 and PHYS 211 for the first semester.
3. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a social sciences or humanities elective.
4. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
5. MATH 285 may be replaced by MATH 441 followed by MATH 442.
6. To be chosen from a departmentally approved list of Technical/Professional Option Electives (http://physics.illinois.edu/current/undergrad/ep_options.asp), in consultation with the student's advisor, for the option elected (or a list fashioned for a departmentally approved custom option). The number of credit hours varies 12-22 depending upon the option chosen.
7. The flexible physics core requirement consists of three courses chosen from a departmentally approved list of Flexible Physics Core Electives with at least one of them being a lab course, PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of credit hours varies 9-15 depending upon the courses chosen.
8. For courses chosen with more than 3 hours credit, the surplus hours may be used to meet free elective requirements.
9. To be chosen from a departmentally approved list of Mathematics Electives (http://physics.illinois.edu/undergrad/math-options.asp). Any course satisfying the Mathematics Elective cannot be used to satisfy any other requirement.
10. If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.
11. Taken if needed to complete a technical/professional option requiring more than 12 hours of credit.

PHYS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PHYS)

## Courses

### PHYS 100 Thinking About Physics credit: 1 or 2 Hours.
Conceptual and problem solving skills in preparation for PHYS 211. Part I (first eight weeks, 1 credit hour): analysis and mathematical descriptions of physical situations; understanding the meaning of the solutions. Part II (remainder of term, 2 credit hours for full term): development of problem solving skills and content from Part I. Approval of the department is required to register. Prerequisite: Credit or concurrent registration in MATH 220 or MATH 221.

### PHYS 101 College Physics: Mech & Heat credit: 5 Hours.
Newton's Laws, work and energy, rotational motion, fluids, thermodynamics, and waves. A noncalculus-based approach for majors in the life sciences, preprofessional health programs, agriculture, and veterinary medicine. Credit is not given for both PHYS 101 and either PHYS 211 or PHYS 213. Prerequisite: Trigonometry. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

Information listed in this catalog is current as of 03/2017
PHYS 102 College Physics: E&M & Modern credit: 5 Hours.
Electric forces and fields, electric potential, electric circuits, magnetic forces and fields, geometrical optics, relativity, and modern physics. A noncalculus-based approach for majors in the life sciences, preprofessional health programs, agriculture, and veterinary medicine. Credit is not given for both PHYS 102 and either PHYS 212 or PHYS 214. Prerequisite: PHYS 101.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 110 Physics Careers credit: 0 Hours.
Exploration of careers founded on physics undergraduate training. Introduction to the Physics Department, faculty, research and curricula. Outside speaker presentations. Approved for S/U grading only.

PHYS 123 Physics Made Easy credit: 3 Hours.
Inquiry-based, nonmathematical, hands-on study of physics for elementary school teachers. Coverage of most of the National Science Education K-4 Content Standards. Additional fees may apply. See Class Schedule.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

PHYS 140 How Things Work credit: 3 Hours.
Nonmathematical approach underscoring the generality and ubiquity of basic physical laws in understanding commonplace phenomena: musical instruments, photography, electric and electronic circuits, television, motors, engines, etc. Credit is not given to engineering majors.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 150 Physics of Societal Issues credit: 3 Hours.
Physics topics and applications relevant in the modern world: energy, quantum mechanics, electricity and magnetism, nuclear physics, waves, light, and outer space. Application to satellites, alternative energy, medical imaging, radiation, nuclear weapons, climate change, and electronics. Emphasis on analytical thinking and the applicability to modern societal issues.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 192 Science and Pseudoscience credit: 1 Hour.
Extra-sensory perception, alien abduction, and psychic crime-solving from the standpoint of scientific inquiry and exploration; the scientific method, how science progresses, and the types of argumentative fallacies that pervade the pseudoscientific community; examples of good science and how the scientific method is self-correcting.

PHYS 193 Physics of Music credit: 2 Hours.
Physics of music and musical instruments; acoustical physics, propagation of sound waves, the biological physics of human hearing, and the acoustical physics associated with all types of musical instruments.

PHYS 194 Behavior of Complex Systems credit: 1 Hour.
Exploration of systems with simple rules that nevertheless exhibit complex behavior. Lecture demonstrations on fractal growth, chaos, catastrophes, self-assembly, lightning, turbulence, explosions, and human rhythms. Simple computer models which exhibit regular, irregular, symmetric, and self-similar patterns and dynamics. Dynamics of isolated and coupled complex systems and mathematical tools for quantifying complex behavior.

PHYS 199 Undergraduate Open Seminar credit: 0 to 5 Hours.
Approved for letter and S/U grading. May be repeated.

PHYS 211 University Physics: Mechanics credit: 4 Hours.
Newton’s Laws, work and energy, static properties and fluids, oscillations, transverse waves, systems of particles, and rotations. A calculus-based approach for majors in engineering, mathematics, physics and chemistry. Credit is not given for both PHYS 211 and PHYS 101. Prerequisite: Credit or concurrent registration in MATH 231.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 212 University Physics: Elec & Mag credit: 4 Hours.
Coulomb’s Law, electric fields, Gauss’ Law, electric potential, capacitance, circuits, magnetic forces and fields, Ampere’s law, induction, electromagnetic waves, polarization, and geometrical optics. A calculus-based approach for majors in engineering, mathematics, physics, and chemistry. Credit is not given for both PHYS 212 and PHYS 102. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 213 Univ Physics: Thermal Physics credit: 2 Hours.
First and second laws of thermodynamics including kinetic theory of gases, heat capacity, heat engines, introduction to entropy and statistical mechanics, and introduction to application of free energy and Boltzmann factor. A calculus-based approach for majors in engineering, mathematics, physics and chemistry. Credit is not given for both PHYS 213 and PHYS 101. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 214 Univ Physics: Quantum Physics credit: 2 Hours.
Interference and diffraction, photons and matter waves, the Bohr atom, uncertainty principle, and wave mechanics. A calculus-based course for majors in engineering, mathematics, physics, and chemistry. Credit is not given for both PHYS 214 and PHYS 102. Prerequisite: PHYS 212.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

PHYS 221 Enrichment Mechanics credit: 1 Hour.
Supplement to PHYS 211 with a collaborative group learning approach to improving conceptual understanding and problem solving in introductory calculus-based mechanics. Prerequisite: PHYS 100; concurrent registration in PHYS 211.

PHYS 222 Enrichment E & M credit: 1 Hour.
Supplement to PHYS 212 with a collaborative group learning approach to improving conceptual understanding and problem solving in introductory calculus-based electricity & magnetism. Prerequisite: PHYS 100; concurrent registration in PHYS 212.

PHYS 225 Relativity & Math Applications credit: 2 Hours.
Theory of Special Relativity, with applications to kinematics and dynamics. Key mathematical methods as they apply to aspects of electromagnetic theory and classical mechanics, including vector analysis, series expansions, matrices, Fourier analysis, partial differentiation, three-dimensional calculus, and simple differential equations. Prerequisite: Credit or concurrent registration in PHYS 212.
PHYS 280  Nuclear Weapons & Arms Control  credit: 3 Hours.  
Nontechnical analysis of the physics of nuclear weapons, nuclear weapon effects, delivery systems, and defenses against nuclear attack; presentation of current issues; basis for making informed judgments about nuclear armaments and arms control.  Same as GLBL 280.  
This course satisfies the General Education Criteria for:  
UIUC: Advanced Composition  
PHYS 298  Freshmen/Sophomore Special Topics in Physics  credit: 0 to 4 Hours.  
Topical offerings of technical interest, skills, and knowledge in physics, and its practice, intended to augment the existing curriculum at the introductory level. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 credit hours if topics vary. Prerequisite: See Class Schedule or departmental course information for topics and prerequisites. For students with freshman or sophomore standing.  
PHYS 325  Classical Mechanics I  credit: 3 Hours.  
Kinematics and dynamics of classical systems, including a review of Newtonian kinematics and dynamics. Three dimensional motion, variable mass, and conservation laws; damped and periodically driven oscillations; gravitational potential of extended objects and motion in rotating frames of reference; Lagrangian and Hamiltonian mechanics. Prerequisite: PHYS 225; credit or concurrent registration in MATH 285.  
PHYS 326  Classical Mechanics II  credit: 3 Hours.  
Continuation of PHYS 325. Central force motion, collisions and scattering, rotational motion, coupled oscillations, continuous media, and fluid dynamics. Prerequisite: PHYS 325.  
PHYS 329  Atmospheric Dynamics I  credit: 3 Hours.  
Same as ATMS 302. See ATMS 302.  
PHYS 330  Atmospheric Dynamics II  credit: 3 Hours.  
Same as ATMS 312. See ATMS 312.  
PHYS 398  Sophomore/Junior Special Topics in Physics  credit: 1 to 4 Hours.  
Topical offerings of technical interest, skills, and knowledge in physics, and its practice, intended to augment the existing curriculum at the intermediate level. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 hours if topics vary. Prerequisite: See Class Schedule or departmental course information for topics and prerequisites. For students with sophomore or junior standing.  
PHYS 401  Classical Physics Lab  credit: 3 Hours.  
Experiments and techniques in classical mechanics and electromagnetism. Dynamics of electrical and mechanical oscillators in the linear domain. Fourier analysis of system response. Measurements of electrostatic fields, transmission lines, waves, and radiation. Electromagnetic phenomena in dielectrics, conductors, and magnetic materials. Instruction in data analysis and report writing. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or concurrent enrollment in PHYS 325.  
PHYS 402  Light  credit: 4 Hours.  
Wave kinematics; geometrical optics: basic concepts, ray-tracing and matrix formalism, Gaussian imaging by thick lenses, stops, apertures, and intensity relations; interference; interference spectroscopy and coherence; diffraction: Fresnel-Kirchhoff formulation, Fraunhofer case, Fresnel case, and holography; polarized light. 4 undergraduate hours. 3 or 4 graduate hours. (3 hours without lab). Prerequisite: MATH 285; PHYS 102 or PHYS 214.  
PHYS 403  Modern Experimental Physics  credit: 4 or 5 Hours.  
Techniques and experiments in the physics of atoms, atomic nuclei, molecules, the solid state, and other areas of modern physical research. 5 undergraduate hours. 4 graduate hours. Prerequisite: Credit or concurrent registration in PHYS 486.  
PHYS 404  Electronic Circuits  credit: 5 Hours.  
Physics of semiconductor devices; theory and application of discrete and integrated devices in linear circuits; use of operational amplifiers and feedback; regulation, oscillators, and modulation; emphasizes practical experience. 5 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 325.  
PHYS 406  Acoustical Physics of Music  credit: 4 Hours.  
Acoustical physics associated with music and musical instruments, propagation of sound waves in and from musical instruments, and the biological physics of human hearing. Investigation of topics via advanced laboratory and data acquisition techniques. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 213 and PHYS 214.  
PHYS 419  Space, Time, and Matter-ACP  credit: 3 or 4 Hours.  
Identical to PHYS 420 except for the additional writing component including a final term paper. Same as PHIL 419. 3 undergraduate hours. 4 graduate hours. Credit is not given for both PHYS 419 and PHYS 420. Prerequisite: PHIL 101; PHYS 101 or PHYS 211.  
This course satisfies the General Education Criteria for:  
UIUC: Advanced Composition  
PHYS 420  Space, Time, and Matter  credit: 2 Hours.  
Philosophical examination of some fundamental concepts and theories of the physical world, such as time, matter, space, and geometry; interpretation of quantum theory. Same as PHIL 420. 2 undergraduate hours. 2 graduate hours. Credit is not given for both PHYS 420 and PHYS 419. Prerequisite: PHIL 101; PHYS 101 or PHYS 211.  
PHYS 427  Thermal & Statistical Physics  credit: 4 Hours.  
Equilibrium thermodynamics, statistical mechanics, and kinetic theory of gases. A unified treatment is used in that the principles of heat and thermodynamics are discussed along with statistical postulates and the microscopic approach of introductory quantum mechanics. 4 undergraduate hours. 4 graduate hours. Credit is not given for both PHYS 427 and any of ME 404, CHEM 444, MSE 500. Prerequisite: PHYS 213, PHYS 214, and PHYS 325.  
PHYS 435  Electromagnetic Fields I  credit: 3 Hours.  
Static electric and magnetic fields, their interactions with electric charge and current, and their transformation properties; the effect of special relativity is incorporated. Macroscopic fields in material media are described. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 285; credit or concurrent enrollment in PHYS 325.  
PHYS 436  Electromagnetic Fields II  credit: 3 Hours.  
Time-dependent fields. Electromagnetic induction, Maxwell's equations, electromagnetic wave propagation in various media and structures, and electromagnetic radiation from charge and current distributions. Relativistic covariance of Maxwell's equations. Course Information:3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 435.  
PHYS 460  Condensed Matter Physics  credit: 4 Hours.  
Bonding and structure of crystals; energy bands in insulators, semiconductors, and metals; electrical conductivity; optical properties; lattice vibrations; elasticity; point defects; dislocations. 4 undergraduate hours. 4 graduate hours. Credit is not given for both PHYS 460 and MSE 304. Prerequisite: PHYS 435; PHYS 485 or PHYS 486.  
PHYS 466  Atomic Scale Simulations  credit: 3 or 4 Hours.  
Same as CSE 485 and MSE 485. See MSE 485.
PHYS 470  Subatomic Physics  credit: 4 Hours.
The nature and properties of nuclei and elementary particles, symmetries, interactions, nuclear models, tools and techniques of experimental subatomic physics, and applications to power generation, astrophysics, chemistry, medicine, and biology. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 485 or PHYS 486.

PHYS 475  Introduction to Biophysics  credit: 3 or 4 Hours.
Major concepts of physics inherent to biological systems. Basics of biology, including protein and DNA structure and their organization into cells with a focus on single molecule biophysics. Major experimental techniques including x-ray diffraction, optical and magnetic traps, and fluorescence microscopy, including new super-resolution techniques. Applications to cytoplasmic and nuclear molecular motors, bacterial motion, nerves, and vision. Same as BIOP 401. 3 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 213 and PHYS 214.

PHYS 485  Atomic Phys & Quantum Theory  credit: 3 Hours.
Basic concepts of quantum theory which underlie modern theories of the properties of materials; elements of atomic and nuclear theory; kinetic theory and statistical mechanics; quantum theory and simple applications; atomic spectra and atomic structure; molecular structure and chemical binding. 3 undergraduate hours. 3 graduate hours. Credit is not given for both PHYS 485 and CHEM 442. Prerequisite: MATH 285 and PHYS 214.

PHYS 486  Quantum Physics I  credit: 4 Hours.
Atomic phenomena integrated with an introduction to quantum theory; evidence for the atomic nature of matter and the properties of the Schrodinger equation, single particle solutions in one dimension, the hydrogen atom, perturbation theory, external fields, and atomic spectroscopy of outer electrons. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 285; PHYS 214; credit or concurrent registration in MATH 415.

PHYS 487  Quantum Physics II  credit: 4 Hours.
Continuation of PHYS 486. Identical particles, spectral hyperfine structure, magnetic properties of matter, atomic spectroscopy of inner electrons, high-energy photon effects, molecular binding and spectra, emission and absorption of light, and symmetry principles. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 486.

PHYS 496  Intro to Physics Research  credit: 3 Hours.
Examination of current research topics through extensive reading, writing, and oral-presentation activities. 3 undergraduate hours. No graduate credit. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

PHYS 497  Individual Study  credit: 1 to 4 Hours.
Individual study at an advanced level in a subject not covered by course offerings. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

PHYS 498  Special Topics in Physics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in physics intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

PHYS 499  Senior Thesis  credit: 3 Hours.
Faculty-guided writing of a senior thesis involving independent research. Oral presentations of research and outside journal articles, proposal writing and reviewing, poster presentation, preparation of graduate school applications, and discussion of physics frontiers with outside experts. 3 undergraduate hours. No graduate credit. Prerequisite: PHYS 496.

This course satisfies the General Education Criteria for: UIUC: Advanced Composition

Minor in Bioengineering

http://bioengineering.illinois.edu

Bioengineering is a broad, interdisciplinary field that brings together engineering, biology, and medicine to create new techniques, devices, and understanding of living systems to improve the quality of human life. Its practice ranges from the fundamental study of the behavior of biological materials at the molecular level to the design of medical devices to help the disabled.

Any of the existing engineering programs can provide a good foundation for work in bioengineering. However, the engineering undergraduate needs additional education in the biologically oriented sciences to obtain a strong background for bioengineering. With such a background, the student should be able to progress rapidly on the graduate level in any branch of bioengineering. In industry, the graduate will be competent to handle engineering tasks related to biology.

For students pursuing the Bioengineering Minor from non-engineering backgrounds, please note that upper level electives may have engineering courses as prerequisites and these, and any subsequent prerequisite courses, are required for anyone taking the course.

Students may fulfill the requirements for a minor in bioengineering by completing the following course sequence. Engineering students who are proficient in biology may waive MCB 150 as a prerequisite for courses in this minor.

BIOE 120  Introduction to Bioengineering 1
BIOE 414  Biomedical Instrumentation 3
or CHBE 472  Techniques in Biomolecular Eng 3
CHEM 232  Elementary Organic Chemistry I 3
MCB 244  Human Anatomy & Physiology I 3
MCB 246  Human Anatomy & Physiology II 3
or MCB 250  Molecular Genetics
MCB 252  Cells, Tissues & Development 3
MCB 253  Exp Techniqs in Cellular Biol 2
Bioengineering Related Technical Elective 1 3
Total Hours 21

1 Courses to be selected from a list of departmentally approved list of 300- and 400-level Bioengineering Related Technical Electives (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students/related%20courses).

For more information regarding the Bioengineering minor, visit the Bioengineering minor Web site (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students), contact the Bioengineering
Department Office (1270 Digital Computer Laboratory, 217-333-1867, bioengineering@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Minor in Computer Science**

This minor is offered by the Department of Computer Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except Computer Science and Computer Engineering majors.

The foundation upper-level courses in computer programming and software and in theory of computation are required. Three elective 200- and 300-level courses provide some specialization and depth and breadth of study. Specific requirements are listed below. Note that some courses have other prerequisites.

<table>

</tbody>
</table>

1. The following substitutions are routinely allowed: CS 220 for CS 125; MATH 213 for CS 173; and ECE 391 for CS 241.
2. Departmentally approved list (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor).

For more information regarding the CS minor, visit the CS minor Web site (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor), contact the Computer Science Academic Office (1210 Siebel Center, 217-333-4428, undergrad@cs.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Minor in Electrical and Computer Engineering**

Electrical and computer engineering transforms our day-to-day lives through a multitude of innovative technologies and products. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

**Circuits Requirement:**

Select one of the following: 3

- ECE 110 Introduction to Electronics
- ECE 205 Elec & Electronic Circuits

**Programming Requirement:** 1

Select one of the following (with no particular preference): 3-4

- CS 101 Intro Computing: Engrg & Sci
- CS 125 Intro to Computer Science

2

For more information regarding the Electrical and Computer Engineering minor, visit the Electrical and Computer Engineering minor Web site (http://www.ece.illinois.edu/academics/ugrad/ece-minor.asp), contact the Electrical and Computer Engineering Undergraduate Programs Office (2120 ECE Building, 217-333-0716, ece-advisor@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**International Minor in Engineering**

Many College of Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation. The requirements are:

- Completion of all degree requirements in the student’s selected engineering discipline. Courses for the International Minor can be combined with degree requirements.
- Completion of foreign language studies in a language of the student’s choice of geographical area (proficiency level will vary with the geographical area selected) if applicable. Students completing a minor in Great Britain or Australian studies will NOT have to have completed a foreign language.

Information listed in this catalog is current as of 03/2017
• Completion of a minimum of 21 hours of cultural and language studies related to the geographical area of concentration; 9 hours must be other than language credit and include at least one 300- or 400-level course. These courses can be used as campus and college general education requirements. Courses taken on campus for the minor must be taken for grade. Students completing the Great Britain or Australian minor will complete their 21 hours of related coursework in the “other” non-language area.

• Completion of a minimum five-week approved residence in the chosen country or geographic area, whether it be for work or study.

The student will be expected to select a specific geographical area for concentration, which will be identified in the designation of the minor; for example International Minor-Latin American studies. Course work selected for the minor must be approved by the International Programs in Engineering Office; a list of suggested courses is available.

International Programs in Engineering sponsors academic year, semester, and summer programs that include language and cultural courses and satisfy the residency requirement. With sufficient foreign language background before entering engineering, a student will normally be able to complete the degree and minor in four years. Those not having this background, or taking a year of study at a foreign institution, may take four and one-half to five years to complete their degrees.

For more information regarding the International Minor (IM), visit the International Minor website (http://engineering.illinois.edu/ipeng/opportunities/international-minor-in-engineering.html), contact the Engineering Study Abroad Office (210 Engineering Hall, (217)244-0054, ipeng@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, International Programs in Engineering Office, 210 Engineering Hall. To sign up for the minor students should follow the directions at the IM website.

Minor in Materials Science and Engineering

Materials are the basis for all engineering and also are the basis for much of the research in various areas of science. The Minor in Materials Science and Engineering is designed to give students in other areas of engineering and science both a broad view of all materials as well as several courses in a particular area of materials, knowledge that will be of value whether the student pursues a career in industry, government, or academia.

The courses, listed below, have been selected to give an undergraduate student both a strong background in all types of materials as well as more detailed knowledge of a particular area of materials (e.g., ceramics, metals, polymers, electronic materials or biomaterials)

The following six courses are required:

Core Course Work

<table>

</tbody>
</table>

Advanced Area course chosen from one of several approved lists. 3

Total Hours 18

1 Other thermodynamics courses may be substituted upon petition.
2 Approved List of Core Courses.
3 Approved List for Area Introductory Courses, Senior Lab Courses, and Advanced Area Courses.

For more information regarding the Materials Science and Engineering minor, visit the Materials Science and Engineering minor Web site (http://matse.illinois.edu/academics/matse_minor.html), contact the MatSE Department Office (201 MSEB, 217-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Physics Minor

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

<table>

</tbody>
</table>

Any two PHYS courses at the 300 or 400 level except PHYS 419 and PHYS 420 6-10

Total Hours 21-25

For more information regarding the Physics minor, visit the Physics minor website, (http://physics.illinois.edu/undergrad/minor.asp) contact the Physics Undergraduate Programs Office (233 Loomis Laboratory of Physics, 217-333-4361, undergrad@physics.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Polymer Science and Engineering Minor

Polymer science and engineering is a broad, interdisciplinary field that brings together various aspects of chemistry, physics, and engineering for the understanding, development, and application of the materials science of polymers. Many of the existing engineering programs provide a good foundation for work in polymer science and engineering. However, the undergraduate student needs additional courses specifically dealing with the science and engineering of large molecules. With such a background, the student should be able to progress rapidly in industry or at the graduate level. In addition to those students specifically desiring a career in polymers, this minor also can be valuable to students interested in the development, design, and application of materials in general.

The courses listed below have been selected specifically to give an undergraduate student a strong background in polymer science and
engineer. A minimum of eight courses is required, including 3 Core courses, one course each in thermodynamics, mechanical properties, and chemistry and two additional polymer-related courses, as listed below. Several of these the student would normally take to satisfy the requirements of the basic degree. The student should consult the Department of Materials Science and Engineering when formulating a plan of course work.

The following courses are required. Credit hours will exceed 25 if a Thermodynamics course-pair option is chosen.

<table>
<thead>
<tr>
<th>Core Course Work</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>MSE 450      Polymer Science &amp; Engineering</td>
<td>3-4</td>

2 Polymer approved list

For more information, visit the Polymer Science and Engineering minor website ([http://www.matse.illinois.edu/academics/undergraduate/curriculum/polymer.html](http://www.matse.illinois.edu/academics/undergraduate/curriculum/polymer.html)), contact the MatSE Department Office (201 MSEB, (217)-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

## Minor in Technology and Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

**Required Courses Taken by Engineering Students Only (in order taken)**

<table>

Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, John Deere, and Motorola Solutions.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for example, professional branding, improvisation training, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student’s academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website ([http://www.techmgmt.uiuc.edu](http://www.techmgmt.uiuc.edu)) or contact the Technology & Management Program Office (470K Wohlers Hall, (217) 244-5752, techmgmt@illinois.edu).

Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE)

The Technology Entrepreneur Center offers studies leading to the Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE). The BS in ILEE degree is intended for College of Engineering students to better understand the innovative processes involved in identifying problems and creating, developing, and leading efforts to provide their engineering solutions. The curriculum is based on a sound disciplinary engineering technical core with additional aspects of problem identification and innovation, and complex multidisciplinary engineering project management and leadership.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

TE 461  Technology Entrepreneurship  3  
SE 462  Leading Sustainable Change  3  
TE 466  High-Tech Venture Marketing  2  
COE Department of Concentration Approved Technical core  14  

Total Hours  44  

Technical Electives  
This elective requirement gives each student freedom to define a technical course of study in innovation and leadership of considerable breadth and focus.  

Technical electives to be chosen from ILEE approved list  19  
Technical electives to be chosen from COE Department of Concentration approved list  8  

Liberal Education  
The liberal education courses develop student's understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.  

Electives from the campus General Education social & behavioral sciences list.  6  
Electives from the campus General Education humanities & the arts list.  6  
Electives either from a list approved by the college or from the campus General Education lists for social & behavioral sciences or humanities & the arts.  6  

Total Hours  18  

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.  

Composition  
These courses teach fundamentals of expository writing.  
RHET 105  Writing and Research  4  
Advanced Composition may be satisfied by taking any course in either the liberal education or free elective categories which has the Advanced Composition designation.  

Total Hours  4  

Free Electives  
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Website, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.  

Free electives not counted above additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising website. At least 128 credit hours must be earned to graduate.  

Suggested Sequence  
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.  

First Year  
First Semester  
Hours  
CHEM 102  General Chemistry I  3  
CHEM 103  General Chemistry Lab I  1  
COE Dept of Concentration introduction course  0  
TE 298  Special Topics I  1  

Semester Hours  14-15  
Second Semester

Fine and Applied Arts, College of
Kathleen Harleman, Interim Dean
Office of the Dean
110 Architecture Building
608 East Lorado Taft Drive
Champaign, IL 61820
PH: (217) 333-1661
http://www.faa.illinois.edu

The College of Fine and Applied Arts prepares men and women for professional work in architecture, art and design, dance, landscape architecture, music, theatre, and urban and regional planning. Freshmen and transfer students may apply for admission. In each curriculum specific basic courses, professional courses, and general education requirements must be completed in order to qualify for the specific baccalaureate degree offered.

Graduate degrees are offered in all areas of study through the Graduate College.

The College of Fine and Applied Arts offers introductory courses designed to increase aesthetic appreciation and development, and to portray the role of the arts in civilization for all students who are attending the University of Illinois at Urbana-Champaign. Participation in the many bands, choruses, and orchestras on campus, as well as private instruction on most instruments and in voice, is available to students in all colleges by audition.

To serve the total academic community and all citizens in the state of Illinois, the college features the arts in exhibitions, concerts, lectures, performances, demonstrations, and conferences. Many outstanding professionals and works in these fields are brought to the University campus. All departments in the College of Fine and Applied Arts reserve the right to retain, exhibit, and reproduce the works submitted by students for credit in any course.

In addition to the teaching divisions, the College of Fine and Applied Arts includes the Krannert Center for the Performing Arts, the Krannert Art Museum and Kinkead Pavilion, Japan House, the Smart Energy Design Assistance Center, and the Visual Resources Center.

Special Facilities
Career Services Office
The Career Services Office (https://faa.illinois.edu/current-students/career-services) in the College of Fine and Applied Arts recognizes
the unique career needs of students in the visual and performing arts. The office provides presentations and individual appointments to help students explore all of their options. The office also serves as a resource for concerned parents.

**Krannert Art Museum and Kinkead Pavilion**

Krannert Art Museum ([http://www.kam.uic.edu](http://www.kam.uic.edu)) is an accredited general art museum with eight permanent galleries, four temporary exhibition galleries, and an open virtual-reality lab. Its outstanding permanent collection places it among the top tier of university art museums in the nation. But the space is used as more than an art museum by students at the University of Illinois. Here they can gather to hear improvised music played by international artists, watch films, and participate in an open mic. Hip-hop cafe. Come and experience a space that allows for simultaneous interplay between more than one artistic form.

**Krannert Center for the Performing Arts**

The Krannert Center for the Performing Arts ([http://www.krannertcenter.illinois.edu](http://www.krannertcenter.illinois.edu)) is a remarkable four-theatre performing arts complex with spaces for instruction, rehearsal, and performance in theatre, opera, dance, and music. The Foellinger Great Hall, seating 2,200, is designed for large-scale musical events. The Tryon Festival Theatre, with 1,000 seats, is for opera, dance, and other musical stage productions. The Colwell Playhouse seats 700 and is the home of the Department of Theatre. The Studio Theatre, seating 150, is for experimental productions. An outdoor amphitheater, rehearsal rooms, offices, dressing rooms, technical shops, and underground parking on two levels for 650 cars complete this monumental facility.

**Japan House**

The study of Japanese culture began at the University of Illinois in 1900, with the arrival of the first Japanese student. Throughout the last century, the University’s role as a leader in Japanese studies began to take form. A major theme of Japan House ([http://japanhouse.art.illinois.edu/en](http://japanhouse.art.illinois.edu/en)) is peace. The focus of Japan House is its three tea rooms. The grounds also feature a Japanese tea garden, strolling garden, and Zen-style rock garden.

**SEDAC – Smart Energy Design Assistance Center**

The Smart Energy Design Assistance Center ([http://smartenergy.illinois.edu/about-us.html](http://smartenergy.illinois.edu/about-us.html)) provides advice and analyses enabling private and public facilities in the State of Illinois to increase their economic viability through the efficient use of energy resources.

**University Music Performance Organizations**

The School of Music offers credit for all students enrolled in its many performance organizations. These organizations include ensembles in the nationally recognized Band Division: a Wind Symphony, two Symphonic Bands, three Concert Bands, Basketball Band, Brass Band, Clarinet Choir, and the world-famous Marching Illini. The Choral Division offers singers the opportunity to perform in the Oratorio Society, Black Chorus, Women’s Chorus, University Chorus, Men’s and Women’s Glee Clubs, Concert Choir, and UI Chorale. The University Symphony and Illini Symphony, three jazz bands, gamelans and other ethnomusicology performance ensembles, and ensembles specializing in contemporary music, chamber music, and early music, among others, satisfy student interest both as performers and concertgoers.

A student in any college wishing to enroll in a performance organization should contact the Office of Academic Affairs, Room 3076 Music Building (phone: 217-244-2670) or the appropriate ensemble director to receive further information and arrange for an audition.

**Visual Resources Center**

The Visual Resources Center facilitates access to images and other visual formats, provides instruction on using a variety of educational software, works with users on image related research projects, and provides consultation related to digitization best practices. The digital collection is available via ARTstor. 35mm and lantern slide collections are available during business hours.

**Libraries**

Students in the college have at their disposal outstanding library resources. In addition to the University Library, one of this country’s great university collections, there are specialized libraries serving the needs of specific fields. The Ricker Library of Architecture and Art contains more than 49,000 books (with almost 50,000 additional publications in the same fields located in the main University Library), 33,000 photographs, and 9,400 clippings.

The City Planning and Landscape Architecture Library houses about 20,000 volumes of current interest, while more than 110,000 additional related volumes in the Funk Library.

The Music and Performing Arts Library, located in the Music Building, contains more than 765,000 items. These include introductory, instructive, research, and reference materials including books, editions of music, recordings, manuscripts, microfilm, and other materials.

[library.illinois.edu](http://library.illinois.edu)

**Departments, Schools, and Curricula**

The College of Fine and Applied Arts consists of the Departments of Dance, Landscape Architecture, Theatre, and Urban and Regional Planning; the Schools of Architecture, Art and Design, and Music. The specific functions of each department or school and the undergraduate curricula are described on the following pages. Consult the Undergraduate Handbook available on the college website for specific academic policies and procedures for students and faculty in the college.

**Special Programs**

**Study Abroad**

International study can be a life transforming experience. The college provides the opportunity for students to obtain campus credit for foreign study and/or travel for a summer session, one semester, or an academic year. Students in FAA have a range of opportunities for study abroad. They can pick from programs developed specifically for students in their major (e.g., senior year abroad in Barcelona for Architecture students) or from the many programs available through the Study Abroad Office ([http://www.studyabroad.illinois.edu](http://www.studyabroad.illinois.edu)) which serves the entire university population.

Prior to departure students are required to submit a study plan for review by their advisor and the college. Students with approved study plans retain their status as UI students and may continue their student health insurance while abroad. Participation in an approved UI program also counts as time in residence at the University.

The Study Abroad Office also provides information on financial aid specifically for study away from campus. The office is located in the International Studies Building, 910 S. Fifth St., Champaign, IL.
Graduation Honors
The College honors superior students honors at graduation. To be eligible, students must have completed a minimum of four semesters of work and 65 hours of credit in residence at the Urbana-Champaign campus. More information on specifics may be found on the College website.

Dean’s List
Each semester students are recognized by the College for academic excellence through the Dean’s List. Eligible students must successfully complete at least 14 academic hours, taken for a letter grade (A through F), and earn a grade-point average that places them in the top 20 percent (approximately) of the College. Students with grades that are excused or deferred are not considered for the Dean’s List until letter grades have been submitted for those courses. The GPA level necessary to be placed on the Dean’s List is revised annually and is posted on the College Website.

James Scholar Honors Program
The James Scholars Program in the College of Fine and Applied Arts focuses on developing Socially Engaged Artists by offering a series of required courses that provide progressive experiences in community engagement. James Scholars have opportunities to develop research projects within the local communities, to apply for funding to support their research, and to participate in symposia presenting their research to the campus and the general public. Detailed information on admission and requirements are available on the College website.

Requirements
Admission
All incoming students hoping to enroll in the College of Fine and Applied Arts as undergraduates must first complete the application for admission available from the university’s Office of Undergraduate Admissions. Several programs within the college (majors in Art, Dance, Music and Theatre) require a portfolio, audition and/or interview as part of the admissions process. All application materials must be received before an admission decision can be made.

Graduation
Students who meet the general University requirements with reference to registration, residence, scholarship, fees, and general education requirements, and who maintain the minimum grade-point average required in their degree program, receive degrees appropriate to the curriculum completed. Refer to the specific unit and curricular requirements listed in the following sections. In addition, students must complete the required senior courses in their major field of study in residence at the Urbana-Champaign campus.

General Education
The Campus Senate, the faculty General Education Board, and the colleges have developed campus wide common general education requirements. Students are advised that some general education requirements may be fulfilled by courses required in the major. All FAA curricula require students to meet the minimum campus general education requirements for graduation. Some programs require additional general education courses. See the individual programs of study for each curriculum.

http://arch.illinois.edu

At Illinois, we are an internationally recognized leader in educating future professionals and scholars in architecture and allied fields. We provide a robust technical and conceptual program that enables students to create and innovate. The depth and breadth of our curriculum enables students to become leaders in a range of disciplinary specialties. Our comprehensive programs prepare students to design and research in a rapidly changing global context from the macro to the micro scale through our bachelors, masters, and doctoral degrees.

Degree Programs in Architecture

Information listed in this catalog is current as of 03/2017
The School of Architecture offers a four-year preprofessional curriculum leading to the Bachelor of Science in Architectural Studies (BSAS) degree as well as a minor in Architectural Studies. The BS in Architectural Studies degree provides an undergraduate academic education in architecture that can serve as a foundation for advanced professional education. The undergraduate curriculum offers an appropriate balance of basic professional studies in architectural design, architectural history, practice and technology, structures, and studies in the arts and sciences.

The following statement is from the National Architectural Accrediting Board (NAAB):

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree."

The University of Illinois at Urbana-Champaign, College of Fine and Applied Arts, School of Architecture offers the following NAAB-accredited degree programs:

Master of Architecture (Pre-professional undergraduate degrees + 62 graduate credits)
Master of Architecture (Undergraduate degree + 65 prerequisite credit hours + 54 graduate credits)

Next accreditation visit for all programs: 2023

The NAAB Conditions for Accreditation (including Student Performance Criteria) may be found on the NAAB Web site (http://www.naab.org).

Since 1967, the School of Architecture operates a full academic-year study abroad program in Barcelona, Spain, which is open to qualified students on a priority basis. Course offerings parallel those available to students on the Urbana-Champaign campus but stress the European context.

For the Degree of Bachelor of Science in Architectural Studies

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted. For the Bachelor of Science in Architectural Studies degree, a total of 120 semester hours are required.

Minor in Architectural Studies

The minor in Architectural Studies allows non-architecture undergraduate students to gain an overview of architecture by taking a series of required courses in architecture. This is the only undergraduate minor offered by the School of Architecture.

Course Requirements

The architecture minor requires the successful completion of a minimum of 20 hours of architecture courses. Students entering the program with advanced credit for required courses must take courses from the Additional Courses list to attain the total hours needed for completion of the minor. All students in the minor must have at least 6 hours of 300- or 400-level courses.

Total Hours: 104

Prerequisites

Students must comply with the prerequisite requirements of courses to be taken under this program. Some of these requirements may be satisfied while in the program.

Admission

Admission to the minor will be processed by the School of Architecture Undergraduate Programs Office. Students may enter the Minor in Architectural Studies from sophomore year until such time that allows the completion of the minor before graduating in their major area of study.

Advising

Advising of students in the minor will be conducted by the advisors in the Undergraduate Programs Office of the School of Architecture.

Certification of Successful Completion

The Associate Dean for Undergraduate Academic Affairs in the College of Fine and Applied Arts (FAA) will certify successful completion of the minor.

Students must declare their intentions and be admitted to the program to pursue the Minor in Architectural Studies.

An introduction to architecture, architectural education and the profession with emphasis on issues that influence architecture and the people and processes involved.

Information listed in this catalog is current as of 03/2017
ARCH 164 Architecture as a 2nd Language credit: 3 Hours.
Unique to architects is the combination of thinking tools in a conceptual toolbox, a resource to which they have access at any time and in all situations. These tools can be thought of as a second language. Architecture as a Second Language is a hands-on, experiential online course in which students are immersed in challenging activities similar to those architects face. The course helps develop new perspectives, capabilities, and insights that can be applied to any calling or discipline.

ARCH 172 Drawing and Modeling credit: 3 Hours.
Introduction to the architectural graphic communication skills that architects use to visualize, analyze, and record creative thoughts: freehand sketching, architectural delineation, and digital applications. Prerequisite: ARCH 171 or consent of instructor. Concurrent enrollment in ARCH 231 or consent of instructor.

ARCH 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

ARCH 210 Intro to the Hist of Arch credit: 3 Hours.
Visual and cultural analysis of selected buildings, urban spaces, and cities, from ancient Greece to modern times; emphasizes the architectural traditions of Western Civilization, especially as they affect the built environment of America and the Middle West. Prerequisite: Sophomore standing or consent of instructor.

ARCH 222 Islamic Gardens & Architecture credit: 3 Hours.
Same as LA 222. See LA 222.
This course satisfies the General Education Criteria for:
UIUC: HistPhilos Perspect
UIUC: Non-Western Cultures

ARCH 231 Anatomy of Buildings credit: 4 Hours.
A holistic approach to the introduction of architectural technology. Enabling students to integrate technical material with design, this lecture/lab course addresses building codes, zoning, construction documentation and delivery, digital fabrication, and the impact of energy, sustainability, and environmental forces on building construction, comparing general principles of light frame and heavy construction materials, components, and systems. Students learn how to build virtually and physically, understanding the roles design and construction professionals play on integrated teams.

ARCH 232 Structural Fundamentals credit: 4 Hours.
The study of forces, their distribution, and their impact on building structure. Topics include: equilibrium of rigid bodies in two and three dimensions; trusses; shear and bending moments in beams; arches and frames; stresses, strains, and deformations in axially loaded members; direct shear and bearing stresses; torsion; beam stresses and deflections; introduction to the design of structural members; and architectural applications. Prerequisite: MATH 220 or MATH 221, and MATH 231 or PHYS 101.

ARCH 271 Graphics for Architects credit: 4 Hours.
Introduction to architectural graphic communication skills that architects use to visualize, analyze, and record creative thoughts: 1) freehand sketching; 2) architectural delineation; and 3) digital applications. Prerequisite: ARCH 101 and concurrent enrollment in ARCH 231.

ARCH 273 Representation credit: 3 Hours.
Develops understanding of the representation of ideas, values, and meaning in the built environment. Focuses on three topic areas: analysis, technical communication, and modeling. Exposure to multiple software tools and mastery of basic skills in each. Prerequisite: ARCH 172 or consent of instructor.

ARCH 274 Strategies of Architectural Design credit: 3 Hours.
Focuses on understanding architecture as holistic synthesis of principles, technology and form. Content is arranged in six areas: Research and Analysis, Typology Analysis, Street Analysis, Block Analysis, Neighborhood Analysis, and Development and Presentation. Students work both on individual assignments and in teams on design projects. Emphasis on combining graphic and modeling skills with analytical skills. Exercises require demonstration of skills and concepts introduced in earlier design and technology courses. Prerequisite: ARCH 273 or consent of instructor.

ARCH 300 Ind Studies in Urban Design credit: 3 Hours.
The individual study of selected topics involving the history, design, and function of significant European cities. Prerequisite: One year of history of architecture or Art History; consent of instructor.

ARCH 314 History of World Landscapes credit: 4 Hours.
Same as LA 314. See LA 314.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: HistPhilos Perspect
UIUC: Western Comp Art Cult

ARCH 321 Environment, Architecture, and Global Health credit: 3 Hours.
This course surveys current research at the intersection of the built environment, health, and well-being. It emphasizes relationships among people and multiple scales of the environments they inhabit and the health and well-being consequences of these relationships. It comparatively examines these relationships within a broad range of Western and Non-Western cultures and contexts by introducing significant historical and contemporary theories, data of relevance, research processes, and applications in environmental design and planning processes. To improve person-environment fit, the roles of social groups, institutions, and organizations in the person-environment-health/well-being nexus within various cultural and geographic contexts are examined and compared.

ARCH 341 Environment Tech HVAC credit: 4 Hours.
Study of the control of thermal environment, mechanical and related building sub-systems, and their integration into the overall building design. The specific topics include: thermal comfort and behavioral implications; fundamentals of thermal behavior of buildings; the principles of heat and moisture in buildings; indoor air quality and "Sick Building Syndrome"; energy and sustainability implications of building design; and mechanical systems including HVAC and plumbing systems. Prerequisite: ARCH 233.

ARCH 342 Environment Tech Lght & Acoust credit: 4 Hours.
Study of the control of luminous and sonic environments, the supporting building systems, and their integration into the overall building design. Specific topics include: lighting fundamentals; light sources; effects of lighting on comfort and performance; lighting calculations and design; energy economy and sustainability; acoustic fundamentals; room acoustics; noise control; and basic electrical and sound systems. Prerequisite: ARCH 233.

ARCH 351 Statics & Dynamics credit: 4 Hours.
Study of equilibrium of rigid bodies in two and three dimensions; trusses; shear and bending moments in beams; arches and frames; cables; friction; introduction to dynamics; architectural applications. Prerequisite: MATH 220 or MATH 221; and MATH 231 or PHYS 101.

Information listed in this catalog is current as of 03/2017
ARCH 352  Mech of Mat & Design Appl  credit: 4 Hours.
Study of stresses, strains, and deformations in axially loaded members; direct shear and bearing stresses; torsion; beam stresses and deflections; stresses under combined loading; column buckling; design of structural members; introduction to statically indeterminate structures; architectural applications. Prerequisite: ARCH 351.

ARCH 373  Arch Design and the Landscape  credit: 5 Hours.
Building design in a landscape setting; creation of place; schematic building design and site planning issues, universal design and accessibility; principles of energy efficient building design; human-environment relationship issues; and architectural design and presentation methods; required field trips. Prerequisite: ARCH 272.

ARCH 374  Arch Design and the City  credit: 5 Hours.
Building design in the community setting; creation of place; introductory urban design and site planning issues, including universal design and accessibility; human-built environment relationship issues; architectural design and presentation methods; required field trips. Prerequisite: ARCH 373.

ARCH 399  Study in Versailles, France  credit: 0 to 18 Hours.
Study in the University of Illinois Architectural Program at Versailles, France. Approved for S/U grading only. Prerequisite: Concurrent registration in the Versailles, France Study Abroad Program.

ARCH 400  Senior Honors in Architecture  credit: 1 to 4 Hours.
For candidates for honors in Architecture. Independent guided study and research in a selected area of architecture. 1 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours with consent of Director of School. Prerequisite: Senior standing in architecture, a University grade-point average of 3.0 or, in special cases, consent of Director of School.

ARCH 401  Independent Study  credit: 0 to 4 Hours.
Independent guided study and investigation in a selected area of architecture. 0 to 4 undergraduate hours. 0 to 4 graduate hours. Approved for both letter and S/U grading. May be repeated. Prerequisite: Junior standing in architecture, written proposal approved by a sponsoring faculty member and the approval of the Director of the School.

ARCH 402  Intro to Hist of Arch Theory  credit: 3 Hours.
Architectural theory, criticism, and historiography from antiquity to the present. Based on close readings of texts from antiquity to the present day. 3 undergraduate hours. 3 graduate hours. Prerequisite: Sophomore standing.

ARCH 403  Spec Topics in Arch History  credit: 3 Hours.
Special topics in Architectural History courses. Topics and subject matter to be published in course listings. 3 undergraduate hours. 3 graduate hours. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: ARCH 210 and sophomore standing.

ARCH 407  Rome: The Eternal City  credit: 3 Hours.
Considers the architecture and urbanism of the city of Rome across time. Special focus will be placed on critical strategies for understanding urban sites. 3 undergraduate hours. 3 graduate hours. Prerequisite: Sophomore standing.

ARCH 409  Special Topics in Spanish Arch  credit: 3 Hours.
Explores aspects of the architecture and urban design of Spain from antiquity until the present. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: ARCH 210.

ARCH 410  Ancient Egyptian & Greek Arch  credit: 3 Hours.
Architecture and urban form in Egypt and the Greek world through the Hellenistic period. Same as CLCV 410. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 111 or CLCV 131.

ARCH 411  Ancient Roman Architecture  credit: 3 Hours.
Architecture and urban form in the ancient Roman world from the Etruscans through the Late Antiquity. Connections between Roman Late Antique, Early Christian, and Byzantine Architecture will be considered. Same as CLCV 411. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210; ARTH 111, CLCV 131, or CLCV 132.

ARCH 412  Medieval Architecture  credit: 3 Hours.
Explores aspects of the architecture and urban design of medieval Europe from late antiquity to the late Middle Ages (approximately 300-1400). Same as MDVL 412. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 111.

ARCH 413  Renaissance Architecture  credit: 3 Hours.
Developments in architecture, urban design, and garden art in Italy and northern Europe in the fifteenth through the sixteenth centuries. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 112, or consent of instructor.

ARCH 414  Baroque & Rococo Arch  credit: 3 Hours.
Developments in architecture, urban design, and garden art in Italy, France, Germany, and England in the seventeenth and eighteenth centuries. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 112, or consent of instructor.

ARCH 415  Neoclass & Nineteen Cent Arch  credit: 3 Hours.
Evolution of Continental and British architecture and urban planning from 1750 to World War I; includes some reference to American architecture of the same period. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 112, or consent of instructor.

ARCH 416  Modern American Architecture  credit: 3 Hours.
Development of American architecture and urban planning from the seventeenth century to the present. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 112, or consent of instructor.

ARCH 417  Twentieth-Century Architecture  credit: 3 Hours.
Developments in Western architecture and urban design from 1900 to the present; examines the rise of modernism in Europe and after World War II; includes work in the United States, India, Japan, and Australia. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 112, or consent of instructor.

ARCH 418  Hist of the Urban Environment  credit: 3 Hours.
Examines the evolution of town planning and urban design in Western civilization from prehistory to the present; studies cultural and technical advancements affecting the form of the urban environment. 3 undergraduate hours. 3 graduate hours.

ARCH 419  Historic Building Preservation  credit: 3 Hours.
Introduces historic preservation: legal, financial, and administrative assistance, graphic examination of restored buildings and sites, and application of conservation technology. 3 undergraduate hours. 3 graduate hours.

ARCH 423  Soc/Beh Factors for Design  credit: 3 Hours.
Research-oriented introduction to existing social and behavioral knowledge, methods, and tools for relating man to his physical and social environment, with implications for theories and a philosophy of architectural design. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.
ARCH 424  Gender & Race in Contemp Arch  credit: 3 Hours.
Analyzes how the built environment reflects social attitudes towards
gender and race. Identifies the work of women and people of color in
architecture and related disciplines as consumers, critics, and creators
of the environment. Provides links with valuable professional networks
in Chicago and elsewhere. Same as GWS 424. 3 undergraduate hours. 3
graduate hours. Prerequisite: Consent of instructor.

ARCH 433  Design of Steel and Reinforced Concrete Structures  credit:
4 Hours.
Loads and load combinations; design methods/structural safety; steel
as a structural material; design of structural steel members subject to
tension, compression, bending, shear, and combined forces as well as
bolted and welded joints. Reinforced concrete as a structural material;
transformed sections; design for bending, shear, and serviceability;
design of one-way slabs and columns. 4 undergraduate hours. 4 graduate
hours. Credit is not given for both ARCH 433 and ARCH 451; credit is not
given for both ARCH 433 and ARCH 452. Prerequisite: ARCH 232.

ARCH 434  Environmental Control Systems I  credit: 5 Hours.
Study of the control of thermal, luminous, and sonic environments with
an emphasis on passive means of controls. Specific topics include:
thermal comfort and behavioral implications; fundamentals of thermal
behavior of buildings; the principles of heat and moisture in buildings;
lighting fundamentals; light sources; effects of lighting on comfort and
performance; energy economy and sustainability; acoustic fundamentals;
room acoustics; noise control; basic electrical, plumbing, vertical
transportation, and life safety systems. 5 undergraduate hours. 5
graduate hours. Prerequisite: Concurrent enrollment in ARCH 374 or
consent of instructor.

ARCH 435  Structural Systems and Construction Methods  credit: 4
Hours.
Presents a unified approach to architectural structures and construction
technology to enable students to integrate design, engineering, and
construction, while providing an understanding of how material/
component/system decisions impact the work of architects, engineers,
and constructors. Using a series of case-studies and project-based
assignments, students learn about the various structural systems and
construction methods used in the design of buildings. The evolution and
state-of-the-art in structure and construction strategies will be discussed
to provide requisite breadth and depth. Topics covered include: structural
and building codes; structural systems and their layout planning;
foundation systems; construction methods and technologies in wood,
steel, concrete, and masonry; sustainability considerations; detailing; and
digital modeling. 4 undergraduate hours. 4 graduate hours. Prerequisite:
ARCH 231 and ARCH 232.

ARCH 441  Heat and Moisture in Buildings  credit: 3 Hours.
Provides information and skills necessary for the designer to deliver dry,
durable and healthful buildings. First half covers theory, including heat
transfer, psychrometrics, steady-state diffusion and conduction analysis,
and transient analysis. Second half covers building applications: roofs,
walls, windows, foundations, and mechanical systems. 3 undergraduate
hours. 3 graduate hours. Prerequisite: ARCH 341 or equivalent.

ARCH 451  Theory & Design Steel & Timber  credit: 4 Hours.
Analysis and design of steel and timber structures for buildings. Steel
columns, beams, trusses, connections, roof and floor framing systems;
timber beams, columns, roof and floor framing systems. 4 undergraduate
hours. 4 graduate hours. Prerequisite: ARCH 352.

ARCH 452  Theory of Reinforced Concrete  credit: 4 Hours.
Concrete materials; behavior of reinforced concrete construction;
behavior and design of structural elements, one-way slabs, beams, and
girders; columns; ACI code requirements; and introduction to continuity
in reinforced concrete structures. Course Information:4 undergraduate
hours. 4 graduate hours. Prerequisite: ARCH 352.

ARCH 460  International Architecture  credit: 4 Hours.
Interdisciplinary opportunity to focus on, study, and record the design
and planning of cities and rural settlements in other cultures. Through
directed study and participation in the intellectual environment of a
foreign university, students analyze unfamiliar settings, developing
insights to enrich their professional development. 4 undergraduate hours.
4 graduate hours. May be repeated in separate terms to a maximum of
8 hours. Prerequisite: Junior standing or higher in the School of
Architecture, Department of Landscape Architecture, or the Department
of Urban and Regional Planning.

ARCH 461  Critical Travel Documentation  credit: 4 Hours.
Modern and historic city forms and rural practices are analyzed while
experiencing the realities of daily life traveling in another culture.
Journals include drawings and writings that record buildings, environs,
and landscapes. 4 undergraduate hours. 4 graduate hours. May be
repeated in separate terms to a maximum of 8 hours. Prerequisite:
Junior standing or higher in the School of Architecture, the Department
of Landscape Architecture, or the Department of Urban and Regional
Planning.

ARCH 468  Overseas Architectural Studies  credit: 3 Hours.
This course is designed to enrich the professional development of
students in a study abroad location. Students participate in thematic
workshops, seminars, lectures and field trips focused on understanding
and analyzing architectural and urbanistic landmarks and settings on site
through both directed and independent assignments. 3 undergraduate
hours. No graduate credit. May be repeated in separate terms up to 6
hours. Prerequisite: Senior standing in the School of Architecture.

ARCH 471  Fundamentals of Arch Design  credit: 6 Hours.
Basic architectural design methods, fundamentals, principles and
concepts including creative problem solving in two- and three-
dimensions. 6 undergraduate hours. 6 graduate hours. Prerequisite:
Limited graduate standing in Architecture and concurrent enrollment in
ARCH 231.

ARCH 472  Arch Des in Landscape & Cities  credit: 6 Hours.
Intermediate architectural design methods, fundamentals, principles
and concepts focusing on buildings in landscape and urban contexts.
6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 471 and
concurrent enrollment in ARCH 233.

ARCH 473  Architectural Design and Performance  credit: 6 Hours.
Schematic design and development of a small-scale public building
emphasizing the integration of the basic elements of building: materials,
details, structure, technology, program, life safety, and universal design.
6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 371 and
ARCH 372.

ARCH 474  Architectural Design and Making  credit: 6 Hours.
Building design that emphasizes the creative process of making,
experimentation, and theories of contemporary methods and materials.
Projects focus on translating design ideas at multiple scales into reality
through computation, representation, or production, utilizing fabrication
processes. Outcomes foreground entrepreneurial design thinking
and team-based learning. 6 undergraduate hours. 6 graduate hours.
Prerequisite: ARCH 473.

Information listed in this catalog is current as of 03/2017
ARCH 475  Arch Design & Development  credit: 6 Hours.
Schematic design and development of a small-scale public building emphasizing the integration of the basic elements of building; materials, details, structure, technology, program, life safety, and universal design.
6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 374 or ARCH 472.

ARCH 476  Arch Design & Exploration  credit: 6 Hours.
Exploration of boundaries of architecture and the built environment.
Focused exploration into specific design topics, such as issue-oriented building problems, urban design theory, intermediate building design and site planning theory, human-environment relationship theory, interdisciplinary design, and architectural design and presentation methods.
4 undergraduate hours. 4 graduate hours. Prerequisite: ARCH 475.

ARCH 490  Special Topics in Contemporary Architecture  credit: 1 to 4 Hours.
Selected topics in and applications of contemporary architecture; see Class Schedule or department office for current topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in separate terms up to 12 undergraduate hours or 8 graduate hours, if topics vary.
Prerequisite: Consent of instructor. For majors only.

ARCH 491  Arch Professional Internship  credit: 0 Hours.
Full-time or part-time professionally supervised field experience in design intended to introduce students to the practice of architecture in a commercial firm or agency of government. Students work in the school-approved firm or agency of their choice. Written work reports and reflective experiential learning reports are required. 0 undergraduate hours. 0 graduate hours. Approved for S/U grading only. May be repeated in separate terms a maximum of 3 times.
Prerequisite: Graduate standing or upper-level undergraduate standing, or consent of instructor. For students enrolled in the BSAS and M.Arch. programs of study only.

ARCH 498  Directed Research in Arch  credit: 1 to 4 Hours.
Participation in on-going research projects which may include energy management, environmental perception, facilities development, building science, and other topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 hours. Prerequisite: Approval of written proposal by instructor and Director of School.

ARCH 499  Off-Campus Study  credit: 0 to 12 Hours.
Provides opportunity for approved off-campus study. Detailed proposal for study off campus must be submitted for approval to the appropriate committee in the School prior to such study. Final determination of credit and its application toward the degree is made after a review of the student's off-campus work by the above committee and the Director of School. 0 to 12 undergraduate hours. 0 to 12 graduate hours. Approved for both letter and S/U grading. Prerequisite: Approval of program prior to registration.

Art and Design, School of

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. All major's first-year experience will include courses in drawing, 2D, 3D, and 4D practices. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission.

- Art and Design · Foundation Year (p. 248)
- Art Crafts (p. 246)
- Art Education (p. 247)
- Art History (p. 248)
- Graphic Design (p. 249)
- Industrial Design (p. 249)
- New Media (p. 251)
- Painting (p. 251)
- Photography (p. 252)
- Sculpture (p. 253)
- Minor in Art + Design (p. 250)
- Minor in Art History (p. 301)
- Minor in Community Based Art Education (p. 250)

ART Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ART)

Art Courses

ART 100  Understanding Visual Culture  credit: 3 Hours.
Interdisciplinary methods in recognizing and understanding meaning of a wide range of visual messages in the arts, design, and culture, with emphasis on critical thinking and analysis. Topics include: visual perception, visual persuasion, the visual interpretation of time and space, humor. Contemporary art and design are explored through the use of semiotics and historical, cultural and ethical aesthetic and technical perspectives.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ART 102  Drawing for Non-Majors  credit: 3 Hours.
Students will work with a wide variety of drawing materials, methods and strategies in a studio art context. Students will explore drawing concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate as well as those who may have significant knowledge and experience. Not open to students majoring in art and design. Additional fees may apply. See Class Schedule.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ART 103  Painting for Non-Majors  credit: 3 Hours.
Students will work with a wide variety of painting materials, methods and strategies in a studio art context. Students will explore painting concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate along with those who have significant knowledge and experience. Additional fees may apply. See Class Schedule.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
ART 104  Sculpture for Non-Majors  credit: 3 Hours.
Students will work with a wide variety of sculptural materials, methods and strategies in a studio art context. Students will explore sculpture concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate along with those who may have significant knowledge and experience. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

ART 105  Visual Design for Non-Majors  credit: 3 Hours.
This course utilizes lectures, exercises, and projects to help students heighten their visual literacy, improve their ability to communicate in an increasingly visually oriented world, and gain a better understanding of the processes and methodologies that designers use. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

ART 140  Introduction to Art  credit: 3 Hours.
A creative and expressive exploration of multiple art media, including but not limited to drawing, painting and design elements. This course is an introduction to the art making process with weekly interactive lectures and hands on studio sections. Additional fees may apply. See Class Schedule. Not open to students in art and design and architecture. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

ART 150  Introduction to Drawing  credit: 2 Hours.
This is an introductory drawing course with an emphasis on heightening visual awareness and utilizing basic elements of technique and concept. Media such as pencil and charcoal will be used through a variety of technical and conceptual exercises. This course is designed for students who have little to no prior experience with drawing. Approved for Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Enrollment is restricted to students of Living Learning Communities and minors in Art + Design.

ART 151  Black & White Film Photography  credit: 3 Hours.
Course offers a foundation in black & white film photography. Camera use, film exposure & processing, and printing processes will be explained and demonstrated. Provides a technical & conceptual understanding of photography as a visual medium for expression and communication of ideas. Approved for Letter and S/U grading. May be repeated in separate terms up to 6 hours. Prerequisite: Enrollment is restricted to students in Living Learning Communities and minors in Art + Design.

ART 152  Experimental Photography  credit: 3 Hours.
Introduces students to a variety of alternative photographic media and image making practices, including: photograms, pinhole cameras and paper negatives, Diana medium format cameras, orthochromatic film, cyanotype and VanDyke brown printing, solarizing/specialty print developers and print toners. Approved for both Letter and S/U grading. May be repeated in separate terms up to 6 hours. Prerequisite: Enrollment is restricted to students of Living Learning Communities and minors in Art + Design.

ART 153  Digital Photography Seminar  credit: 2 Hours.
Course offers a foundation in digital photography. Camera use and digital editing will be explained and demonstrated. Elements of visual composition for effective photographs will also be included. Course is taught as a service-learning project with the Champaign County Humane Society. Weekly field trips to photograph at CCHS are a component of the class schedule. Approved for both Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Enrollment is restricted to students of Living Learning Communities and minors in Art + Design.

ART 154  Digital Video  credit: 2 Hours.
This is an introductory course for those who have little or no experience working in digital video formats. Students will explore the tools and techniques of moving image production through individual and team projects, as well as view and discuss existing films and videos. Students will learn basic camera functions and the use of professional editing programs for video and sound. Projects will focus on the creation of time-based media with an emphasis on technique, documentation, narrative, and context. Approved for both Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Enrollment is restricted to students of Living Learning Communities and minors in Art + Design.

ART 155  Introduction to Graphic Design - Unit One  credit: 3 Hours.
This course introduces non-graphic design majors to visual literacy, composition, and the creative process. Students will solve real world visual communication problems in a hands-on studio environment using Adobe Creative Suite (Illustrator, Photoshop, and InDesign). Students will receive instruction in the elements of visual grammar and establish a foundation for visual literacy based on design principles. Using hands-on exercises and problem-solving projects, students will work through the creative process and learn industry standards necessary to function in today's commercial art field. Approved for Letter and S/U grading. Prerequisite: Enrollment is restricted to students of Living-Learning communities and minors in Art + Design.

ART 191  Unit One Studio/Seminar  credit: 1 to 3 Hours.
Topics vary; consult Unit One office. Approved for both letter and S/U grading. May be repeated if topics vary.

ART 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated.

ART 201  Art in Early Childhood  credit: 2 Hours.
Philosophical and practical foundations for teaching art in early childhood settings. Lectures, discussions and class activities focus on the value of art in the curriculum, artistic development and instruction, observation and guided teaching practice. Additional fees may apply. See Class Schedule. Prerequisite: Not open to students majoring in art and design.

ART 202  Art in the Elementary Grades  credit: 2 Hours.
Introductory laboratory experiences with the elements of design in the visual arts and with processes, materials, and activities appropriate for the elementary grades. Additional fees may apply. See Class Schedule. Prerequisite: Not open to students majoring in art and design.
ART 205  Experience & Meaning in Design  credit: 3 Hours.
Introduces students to the cultural impact of graphic design by connecting graphic design theory to the everyday experience of meaningful design. Graphic design will be studied as a mediating factor between culture and cognitive processing. The course utilizes a weekly pattern of assigned readings, online presentations, design assignments delivered online, and peer review. The reading and presentations will connect the students to major concepts. The assignments will allow students to demonstrate understanding of those concepts. This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences
UIUC: Western Compartv Cult

ART 206  Mining the University/Community  credit: 3 Hours.
Mining the University/Community is an hybrid/online course allowing students to assemble their own intellectual experience by finding and attending creatively-stimulating public events outside of their majors. Students are charged to find challenging events each week (lectures, performances, screenings, discussions of intellectual value), contribute these 'finds' to a class calendar full of possibilities, attend one of those events and then post a written evaluation of their chosen event each week to the class blog on Compass. Each student creates a collection of 14 different intellectual experiences with observations and responses shared with all class members as well as a final class post to summarize the evolution of the collection.

ART 208  Waste Not! Environmental Impact  credit: 3 Hours.
The course will explore the social and environmental impacts of art-making practices that rely heavily on computer and Internet technologies. We will examine the wide range of artistic practices that employ computer and internet technologies and will introduce students to artists and artistic practices that criticize computer and Internet technologies and their impacts. Students will research the source of materials and labor used to manufacture computer and Internet related technologies, the facilities that support the infrastructure of the Internet and the social, political and economic systems that impact end of life management of electronic waste. From this base of research, students will employ digital or Internet technologies to produce a final project that explores how they understand the impact of their use of these technologies in scholarly pursuits including research, writing and making art. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ART 210  Special Topics for Non-Majors  credit: 3 Hours.
Allows students to explore a revolving series of genres, specializations, and/or interdisciplinary practices. Possible subjects include, but are not limited to, site-specific public art, recycled and sustainable materials, performance, sound, or emerging technology. Topics and subject matter to be published in course listings. May be repeated to a maximum of 6 hours in separate terms.

ART 221  Visual Culture of Fandoms  credit: 3 Hours.
The course will involve writing and art making as two modes of interpretation and response to mediated imagery. We will consider the idea that students may become so closely entwined with their own fandoms that it affects their sense of self, personal/societal relationships, and memory. We will also focus on the importance of imagination in creating/sustaining fandoms and fan art. The framework of this course will be supported by academic literature on fandoms as well as visual methodologies. Students will briefly learn about elements and principles of design, the codes and conventions that structure the image; the viewers and how they interpret or experience the image; and the contexts in which an image is exhibited and viewed.

ART 240  Learning Through Contemporary Art  credit: 3 Hours.
By looking at how contemporary artists research, strategize, and make, students in this class will learn about arts-based approaches to research, study, and learning. Students will respond to the work examined through their own video production instead of traditional writing.

ART 280  Exploring Visual Culture  credit: 3 Hours.
Introduces key concepts for understanding the wide range of imagery that has come to characterize contemporary everyday life in the 21st century. Explores concepts drawn from the literature of visual culture studies. Analyzes images from popular culture, fine arts, and vernacular arts, with contemporary mass media, such as music videos and television dramas, being considered alongside historical paintings and sculpture. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: Western Compartv Cult

ART 299  Special Topics in Art  credit: 1 to 3 Hours.
Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. May be repeated in the same term to a maximum of 6 hours. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Sophomore standing.

ART 310  Design Thinking  credit: 3 Hours.
Introduces design literacy and promotes an understanding of the field of contemporary design. Explores design thinking as a common thread that connects all disciplines concerned with the making of things, the solving of problems, and the organization of information. Through a series of lectures, case studies, and simple design projects, this course offers an extensible framework of tools and strategies that can be applied across multiple disciplinary boundaries. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ART 350  Writing with Video  credit: 3 Hours.
Students will engage in a comprehensive exploration of creative inquiry, self-reflection, social engagement, and media production. They will adapt the basic, traditional principles of critical writing and analysis, to communicate effectively using image production and post-production. Directed writings in concert with video production projects will allow students to experience an integrated process of thinking, creating, and problem-solving. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: Western Compartv Cult

ART 375  Capstone Studio for Non-Majors  credit: 3 Hours.
Non-majors with prior studio experience will identify and pursue project-based creative work, either individually or as part of a collaborative team. Students work closely with the instructor to identify individual interests and formulate a suitable semester-long project. Prerequisite: Two prior studio courses.

ART 499  Special Topics in Art  credit: 1 to 4 Hours.
Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. 1 to 3 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same term to a maximum of 6 undergraduate hours or 6 graduate hours. May be repeated in separate terms to a maximum of 9 undergraduate hours or 12 graduate hours. Prerequisite: Senior standing or consent of instructor.

ARTD Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARTD)
**Art--Design Courses**

**ARTD 101** *Introduction to Industrial Design*  
**credit:** 3 Hours.  
Introduction to problem-finding and problem-solving processes in the design of products. This course teaches foundational industrial design skills, methods, philosophies, and design thinking. Creation of 3-dimensional products begins with a simplified design process, adding steps until a final project is completed that incorporates all components of the design process. This course satisfies the 3D requirement for the new Art + Design Foundation curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For Art+Design majors only.

**ARTD 151** *Introduction to Graphic Design*  
**credit:** 3 Hours.  
An introductory course for students considering graphic design as their major. This course teaches design as a critical thinking and problem solving process that will be applied to class projects. Topics will include principles of visual perception, visual communication theory, precedents in design history, and technical skills common to the practice of graphic design and which relate to image making, surface design, typography, layout, design systems and their applications. This course satisfies the 2D requirement for the new Art + Design Foundation curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.

**ARTD 160** *The Image World*  
**credit:** 3 Hours.  
Explores photography and video as the most powerful media in today's image-saturated world. Students will look at, think about, discuss, and write about a diverse array of photography and video. They will study examples of historical and contemporary art, design, journalism and advertising, in various and numerous contexts. Students will make their own images, create their own videos, conduct visual research, and produce media-based projects. Students will also build their own individual social media sites for sharing their work with both their classmates and the world. This course satisfies the 2D requirement in the new Art+Design curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For Art+Design majors only.

**ARTD 201** *Industrial Design I*  
**credit:** 4 Hours.  
Introduction to the creative process and methods involved in industrial design; research, modeling, form giving, prototyping and communication with emphasis on user centered design. Projects of escalating scale and complexity complemented by lectures and demonstrations. Additional fees may apply. See Class Schedule. Prerequisite: Concurrent registration in ARTD 224 or ARTD 225.

**ARTD 202** *Industrial Design II*  
**credit:** 4 Hours.  
Studio design problems of increasing complexity involving structures and mechanisms. Lectures and discussions to explore design issues affecting contemporary culture and aesthetics perceptions. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 201. Concurrent registration in ARTD 224 or ARTD 225. Sophomore standing in Industrial Design major.

**ARTD 209** *Chado (The Way of Tea)*  
**credit:** 3 Hours.  
Explores the Japanese Tea Ceremony and its relevance to everyday life. Students will acquire a better understanding of Japanese culture and a new appreciation of their own cultures through the study of the Tea Ceremony and the Zen worldview that informs it. Additional fees may apply. See Class Schedule.  
This course satisfies the General Education Criteria for:  
UIUC: Non-Western Cultures

**ARTD 215** *Introduction to Typography*  
**credit:** 3 Hours.  
This introductory studio functions as a survey of media-based affordances on typography. Students relate typographic form to reading conventions and reader expectations, as well as human cognitive and perceptual limitations. Internal consistency is established as a primary criterion for quality in design solutions. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing in graphic design curriculum or consent of instructor.

**ARTD 216** *Introduction to Image Making*  
**credit:** 3 Hours.  
This introductory studio functions as a survey of representational strategies through image reproduction technology. Discussions center around the reader’s construction of meaning through still and moving images. Students develop an authorial voice in visual practice. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing in graphic design curriculum and consent of instructor.

**ARTD 217** *Graphic Design for Non-Majors*  
**credit:** 3 Hours.  
Introduces students to the field of graphic design in theory and practice. Examines what graphic designers make and the methods that are employed in contemporary design practice. Emphasis is placed on the organization and visual presentation of relevant content across media and their effect within systems. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing in graphic design and ARTD 215.

**ARTD 218** *Intro to Web Technologies*  
**credit:** 2 Hours.  
This half semester, fully online course introduces students to the standards-based languages of the web (HTML, CSS, and JavaScript) through directed study, quizzes, and technically oriented design exercises.

**ARTD 222** *Typographic Practice*  
**credit:** 3 Hours.  
This introductory studio functions as a survey of typographic practice across media platforms. Students relate typographic form to reading conventions and reproduction technologies. Additional fees may apply. See Class Schedule.

**ARTD 225** *Design Drawing*  
**credit:** 3 Hours.  
Introduction to rapid drawing methods and tools used by designers. Focuses on theory and application of orthographic and perspective drawing for communication of design ideas. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Concurrent registration in ARTD 201 or ARTD 202.

**ARTD 228** *Computer Applications*  
**credit:** 3 Hours.  
Concepts, methods and applications of computer-aided industrial design to the design of products for mass manufacture. Rendering and lighting techniques to communicate product forms. Additional fees may apply. See Class Schedule. Prerequisite: Industrial Design major, sophomore standing or consent of instructor. Concurrent registration in ARTD 201 or ARTD 202.

**ARTD 230** *Design Thinking/Need-Finding*  
**credit:** 3 Hours.  
Design thinking, a term with origins in industrial design practice, describes a human-centered approach to design and innovation in products and services, addressing the tripartite requirements of feasibility, desirability and viability. With this focus on determining user needs, a variety of processes, including observation, empathy, ideation, prototyping and modeling, are used to discover people’s needs and opportunities for design thinking, along with the communication of design outcomes by diagrammatic and narrative means. Design thinking is best done in teams, hence the project team basis for this course. This course concentrates on need-finding rather than the full resolution of design proposals. Same as TE 230. Additional fees may apply. See Class Schedule. Prerequisite: For Art+Design or Engineering majors only.

*Information listed in this catalog is current as of 03/2017*
ARTD 240  eWaste: Sustainable Design  credit: 3 Hours.
Examines the topics of electronic waste, or eWaste, within the context of sustainable design. Students will learn about sustainable and "green" electronic product design practices and develop the ability to assess a variety of products according to these criteria. Case studies will be supplemented by assigned readings, directed writing, and group discussion. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

ARTD 251  Graphic Design Toolbox  credit: 2 Hours.
This studio introduces students to the field of graphic design in theory and practice. The course examines what graphic designers make and the methods that are employed in contemporary design practice. Emphasis is placed on the organization and visual presentation of relevant content across media and their effect within systems.

ARTD 260  Basic Photography  credit: 3 Hours.
Investigates basic image making and meaning. Student works with digital camera, exposure meter and learns digital printing. Student must furnish camera. Additional fees may apply. See Class Schedule. Prerequisite: Freshman standing in Art and Design or in Art History major or minor; or consent of instructor.

ARTD 261  Photography II  credit: 3 Hours.
Uses digital process to express content with emphasis on the development of a personal aesthetic. Student must furnish camera. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 260. For Art majors only.

ARTD 262  View Camera  credit: 3 Hours.
Includes work with camera movements, exposure, black and white film development and basic wet process silver printing as tools of creative expression. Most equipment furnished. Additional fees may apply. See Class Schedule. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: ARTD 261 or consent of instructor.

ARTD 263  Digital Photographic Output  credit: 3 Hours.
Explores the potential of color printing and output in digital media as a form for creative expression. Student must furnish camera. Additional fees may apply. See Class Schedule. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: ARTD 260.

ARTD 270  Design Methods  credit: 3 Hours.
A hybrid studio and seminar that introduces students to the principles and process of human-centered design through a focus on research and observation outside of the studio. This approach will allow students to address the social and cultural contexts in which designers intervene. Through a series of exercises and projects, students will begin to develop competencies in conduction research in specific environments in order to inform and inspire the direction of their design projects. Students will also learn how to iterate design solutions and prototypes based on expert input, testing and user feedback. Students will better understand and articulate the tools and methodologies shared by all design disciplines as it relates to a variety of actions and outcomes: visual communication and the design objects, services, interactions and experiences. Additional fees may apply. See Class Schedule.

ARTD 299  Spec Topics in Design Courses  credit: 1 to 5 Hours.
Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours in a semester, to a maximum of 12 total hours. Prerequisite: Sophomore standing in Art and Design.

ARTD 301  Industrial Design III  credit: 4 Hours.
Design of user centered products for mass production; experience in the iterative problem solving processes and methods. Addresses practical constraints such as sustainability, environmental factors/ergonomics, manufacturing and materials, social and political and economic. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 202.

ARTD 302  Industrial Design IV  credit: 4 Hours.
Industrial design problems of increasing complexity, scope and size. Continuation of ARTD 301. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 301.

ARTD 310  Intermediate Graphic Design I  credit: 3 Hours.
This intermediate studio expands student knowledge of contemporary research methodologies that focus on user experience, collaboration, sustainability, and social responsibility. Projects are designed to provide students with the basic knowledge to become agents of positive social and commercial change. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing in graphic design curriculum and ARTD 215, ARTD 216, and ARTD 217.

ARTD 311  Intermediate Graphic Design II  credit: 3 Hours.
This intermediate studio tasks student teams analyze a system of designed products or services and propose/manage an intervention strategy. Students develop inclusive practices with stakeholders, who are addressed with empathy as co-creators. This topic studio changes in content with each semester. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing in graphic design curriculum and ARTD 310.

ARTD 318  Digital Interaction  credit: 3 Hours.
This studio explores the construction of compelling user experiences that incorporate the use of digital media. Students investigate both the theoretical and practical aspects of interaction through exercises involving information architecture, interface design, and creative code. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing in graphic design or consent of instructor.

ARTD 326  Sustainability & Manufacturing  credit: 3 Hours.
Exploration of environmental origins, theory and practice of sustainable product design. Environmentally-responsive design methodologies and topics such as industrial ecology, dematerialization, design for disassembly, design for recycling and life-cycle assessment. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing in graphic design curriculum and consent of instructor.

ARTD 328  Human-Centered Product Design  credit: 3 Hours.
Principles of human-centered design and usability applied to products, product systems, and product environments to enhance the user experience; strategies to enhance independent learning for professional development, to further research, and to acquire new skills. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing in Art and Design or consent of instructor.

ARTD 333  Type & Image  credit: 3 Hours.
This studio extends typographic study with representational strategies for image reproduction technology. Students engage in practices for incorporating existing and created imagery into typographic systems. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 222.
ARTD 351  Graphic Design Inquiry  credit: 1 to 4 Hours.
A series of topical studios that touch upon the myriad practices of graphic design. Students produce and analyze form and content according to each individual topic. Media engagement varies across sections. Additional fees may apply. See Class Schedule. May be repeated up to 8 hours.

ARTD 360  Photography III  credit: 3 Hours.
Explores creative expression through various media but primarily photography. Students select format based on prior experience; group critiques held weekly; initial opportunity to experiment in personally selected directions and assignments which will be refined and amplified in ARTD 460. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing in Photography or consent of instructor.

ARTD 362  Photography Workshop  credit: 3 Hours.
Advanced course on a special topic: see Class Schedule section note for description. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 12 hours. Prerequisite: Junior or senior standing in art and design; or consent of instructor based upon announced criterion that varies with topic.

ARTD 363  RAW Photography  credit: 3 Hours.
An advanced Photoshop course for the student interested in a digital approach to Fine Art Photography. Students will explore the use and conversion methods of the RAW digital process, and learn how to extract, control, and enhance digital image files. Over the course of the semester, an effective and personal workflow within the Photoshop environment will be developed. Access to a digital SLR camera is required. Additional fees may apply. See Class Schedule. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Junior or above standing in Art and Design, or consent of the instructor. ARTD 260 and ARTD 261 are suggested.

ARTD 371  Graphic Design Practicum  credit: 2 Hours.
This analytical studio prepares students for entry into the field of graphic design. Professional practice is parsed into areas of opportunity, to which students ultimately align themselves and by which they structure their preparatory endeavors. Additional fees may apply. See Class Schedule. Prerequisite: ARTD 207 and ARTD 333. For majors only.

ARTD 391  Special Problems in Design  credit: 1 to 4 Hours.
Directed independent creative activity or research. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in Art and Design; and consent of instructor, advisor, and associate director of the School. A contract must be completed & approved by the instructor & advisor. Must be Junior. 3.3 GPA, & only 6 hours total Ind. Study.

ARTD 393  Contemporary Art and Ideas  credit: 3 Hours.
Advanced study of photographic issues and the creative process. Discusses creativity, aesthetics, criticism, and current imagery, as well as photography's relationship to other media. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in Photography or consent of instructor.

ARTD 399  Internship in Design  credit: 1 to 4 Hours.
Internships to be pre-approved for variable credit. Students will be required to document work completed during the internship with verification of supervisor. Supervisor will also be required to fill out a questionnaire either by mail or on-line. Faculty members will assess work and questionnaires to assign a grade. Approved for S/U grading only. Prerequisite: Junior standing in School of Art and Design.

ARTD 401  Industrial Design V  credit: 4 Hours.
Advanced design projects in the context of the business environment in which product design and development takes place; marketing, branding, merchandizing, entrepreneurship within the context of globalized marketing and manufacturing. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARTD 302.

ARTD 402  Industrial Design VI  credit: 4 Hours.
Capstone project integrating all aspects of the design process from concept through final design, documentation and presentation; reconciliation of user centered constraints such as socio-economic, environmental-sustainability, manufacturability, health and safety and ethical. Standard approach that of an entry level industrial design professional. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARTD 401.

ARTD 410  Advanced Graphic Design I  credit: 4 Hours.
This advanced studio challenges students to seek and define problems within a shared topic. Emphasis is placed on the articulation of self-initiated narratives and consequent development of appropriate design strategies. This studio promotes a deeper understanding of design as a change agent within societal and economic systems that will lead to a comprehensive plan for the capstone project undertaken in ARTD 411. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARTD 311 and senior standing in graphic design; for graduate credit - consent of graphic design program chair.

ARTD 411  Advanced Graphic Design II  credit: 4 Hours.
This capstone studio continues design investigations in the interest of understanding and confidently articulating individual interests and abilities. This studio also focuses on the refinement of a comprehensive portfolio; self, peer, faculty, and outside review of student work; and an enhanced study of the field in preparation for professional practice. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARTD 410 and senior standing in graphic design; for graduate credit - consent of graphic design program chair.

ARTD 415  Ninth Letter  credit: 3 or 4 Hours.
Students develop, design, and produce issues of the national literary and arts journal, Ninth Letter. Also involves students in curating and designing content for the companion website, ninthletter.com. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours and 8 graduate hours. Prerequisite: Consent of instructor.

ARTD 418  Digital Interaction Sandbox  credit: 2 Hours.
This advanced studio immerses students in design investigations that stimulate awareness of emergent digital interaction paradigms. Potential areas of exploration include design and development for both mobile devices and interactive environments. Additional fees may apply. See Class Schedule. 2 undergraduate hours. 2 graduate hours. Prerequisite: ARTD 318. Junior standing.

ARTD 420  Disability Design  credit: 3 Hours.
Focuses on user-oriented, collaborative approaches to designing new products and services, with special emphasis on designing for people with disabilities. Students gain an understanding of the product development process by exploring empathic design research approaches, while working directly with prospective clients. Course work centers on designing products for mass production, and on recognizing opportunities to re-engineer existing products. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing.
ARTD 426  Product Innovation  credit: 3 Hours.
Presents an overview of the product development process from concept generation to design for manufacturing and project management. Emphasis on product definition, innovation, the early phases of development and the role of designer in new product development. 3 undergraduate hours. 3 graduate hours.

ARTD 444  Typographic Systems  credit: 3 or 4 Hours.
Students engage with complex typographic systems across varied media in a studio setting. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. Prerequisite: ARTD 318 and ARTD 333. Junior standing required.

ARTD 445  Seminar in Design  credit: 3 or 4 Hours.
Investigation of special problems and current topics in industrial and/or graphic design. Students will conduct original research which will be shared through papers, presentations, and discussions. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms to a maximum of 12 undergraduate hours or 16 graduate hours. Prerequisite: Junior standing in Art and Design or consent of instructor.

ARTD 448  Professional Design Practice  credit: 3 Hours.
Concentrates on developing presentation and communication skills that form the basis of a successful design career. Students will engage in portfolio reviews, plan and install exhibitions, prepare client presentations, and rehearse job interviews. Written work will include CV preparation. Emphasis will be placed on familiarizing students with professional practices and contexts. 3 undergraduate hours. No graduate credit.

ARTD 451  Graphic Design Problems  credit: 1 to 4 Hours.
A series of topical studios that present complex problems of graphic design practice. Individual sections address professional, theoretical, or exploratory problems. Media engagement varies across sections. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated up to 8 hours in the same term and 12 hours in separate terms. Prerequisite: ARTD 333.

ARTD 452  Interaction Design Problems  credit: 1 to 4 Hours.
This series of topical studios presents complex problems of user experience through interactive media. Individual sections address professional, theoretical, or exploratory problems. Technological engagement varies across sections. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Prerequisite: ARTD 222 and ARTD 318.

ARTD 460  Advanced Photography  credit: 3 Hours.
Concentrated use of photographic processes for creative expression with emphasis on professionalism and the production of a photographic portfolio. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing in Photography, or consent of instructor.

ARTD 471  Graphic Design Capstone  credit: 3 Hours.
Students in this advanced studio articulate individual interests and conduct corresponding investigations to develop specialized expertise. The coursework represents the student’s final preparation for practice in graphic design. Additional fees may apply. See Class Schedule. 3 undergraduate hours. No graduate credit. Prerequisite: ARTD 444 and ARTD 451. For majors only.

ARTD 490  Senior Honors  credit: 2 to 5 Hours.
Independent creative activity, guided study, or research for honors. 2 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 5 hours. Prerequisite: Senior standing in Industrial Design, a cumulative grade point average of 3.0; and consent of instructor and department.

ARTD 499  Special Topics in Design  credit: 1 to 4 Hours.
Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. 1 to 3 undergraduate hours. 1 to 4 graduate hours. May be repeated as topics vary to a maximum of 9 undergraduate hours or 12 graduate hours. Prerequisite: Senior standing or consent of instructor.

ARTE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARTE)

Art--Education Courses

ARTE 201  Art, Design, and Society  credit: 2 Hours.
This course provides an introductory forum for beginning artists, designers, art historians, and art educators to think through the motivation(s) behind their/our creative work(s), research, and practices. Through topical examinations of contemporary art, craft, design, art history scholarship, art education scholarship, and interdisciplinary projects, developing artists will sift through pertinent issues around sustainability, ethics, ecologies, pedagogies, and civic engagement in order to inform our own burgeoning motivations and creative practices. Additional fees may apply. See Class Schedule. Prerequisite: For Art +Design majors only.

ARTE 202  Methods of Teaching Art  credit: 3 Hours.
Provides students with philosophical foundations for teaching art including in public schools. The primary emphasis will be on understanding recent and contemporary orientations through readings and practical activities. Particular emphasis will be placed on emerging trends in Art Education, especially the use of technology and the value of visual culture in student lives. It is envisaged that this course will provide the primary theoretical foundation for further practical and pre-service teaching courses in Art Education. Additional fees may apply. See Class Schedule.

ARTE 203  Everyday Arts Lab  credit: 3 Hours.
This class examines community-based art projects that partner undergraduates with youth (K-12) in non-university settings including community centers and schools. Through this course, students will design and teach arts and public engagement projects. They will explore their identities as artists, educators, and citizens. Students will learn how to assess impact of their projects and teaching. The course welcomes all students; no prior teaching or community-based education experience necessary. Additional fees may apply. See Class Schedule.
ARTE 204  Practicum Teaching Experience  credit: 4 Hours.
Provides undergraduate and graduates seeking certification in Art Education structured and supervised teaching experience in the Saturday Art School program, held 10 Saturday mornings during the semester. Professional development in personal communication skills, lesson plan delivery, organizational abilities, use of technology in instruction, and art classroom management will comprise the goals of the course. Must be taken in conjunction with ARTE 203. Additional fees may apply. See Class Schedule. Prerequisite: ARTE 202.

ARTE 260  Museums in Action  credit: 3 Hours.
Considers how scholarly discourse in museum interpretation and educational program development are translated into practices that engage culturally diverse audiences. Readings, research, and professional activities provide students with opportunities for examination of museum interpretive practices, programming decisions, and public engagement activities, along with analysis of Krannert Art Museum's presence on the university campus, in the larger community, and on the World Wide Web.

ARTE 299  Spec Topics in Art Education  credit: 3 Hours.
Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours in a semester or, to a maximum of 12 total hours. Prerequisite: Sophomore standing in Art and Design.

ARTE 301  Early Field Art Teaching  credit: 3 Hours.
Early field experience in local elementary schools one half day weekly; includes identification, instruction, methods, and practicum on the psychology of the exceptional child. Additional fees may apply. See Class Schedule. Prerequisite: ARTE 203 and ARTE 204; Art education majors only.

ARTE 302  Public School Art Programs  credit: 3 Hours.
The selection and arrangement of content for different educational levels; study and evaluation of curricula, equipment, and supplies; and program supervision. Additional fees may apply. See Class Schedule. Prerequisite: ARTE 301 or junior standing in art, or consent of instructor.

ARTE 350  Creative Dance for Children  credit: 3 Hours.
Same as DANC 350 and HDFS 361. See DANC 350.

ARTE 391  Independent Study  credit: 1 to 4 Hours.
Directed independent research or creative activity. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in art and design; and consent of instructor, advisor, and associate director of the School.

ARTE 401  Teaching Seminar  credit: 4 Hours.
Examines responsibilities, methods, and techniques specific to teaching art in elementary and secondary schools; includes the psychology of the exceptional child in conjunction with methods of instruction and student teaching experience. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARTE 302; concurrent registration in EDPR 438 and EDPR 442, art education sections only.

ARTE 402  Artistic Development  credit: 3 or 4 Hours.
Historical and contemporary perspectives on children's artistic development, emphasizing relationships between general intellectual growth and the ability to create and respond to works of art. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing, and PSYC 100 and EPSY 201.

ARTE 475  Art Exhibition Practices  credit: 3 or 4 Hours.
Explores issues pertaining to the preparation, installation and conservation of visual art. Students will learn how to organize, design, spot and install an exhibition; develop exhibition graphics; address conservation issues; handle works of art; and learn the business of art. Field trips and guest lectures by conservators, preparators, curators and exhibition designers will add further depth to the class. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Junior standing in Art and Design.

ARTE 480  Popular Visual Culture  credit: 3 or 4 Hours.
Focuses primarily on contemporary popular culture, but also draws upon fine art, folk art, and indigenous art from both the past and the present. Considers the often troubled relationships between the pleasures of visual culture and its ideologies. Students examine the literature of visual culture studies and develop research skills by examining a specific site of visual culture of their own choosing in terms of aesthetic pleasures and ideology including but not limited to sexism, class, ethnicity, religion, homophobia, and xenophobia. Theories of the body, consumerism, and globalization, among others will be considered. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms to a maximum of 6 undergraduate hours or 8 graduate hours.

ARTE 490  Senior Honors  credit: 2 to 5 Hours.
Independent guided research and study for honors. Additional fees may apply. See Class Schedule. 2 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 5 hours. Prerequisite: Senior standing in art education, a cumulative grade point average of 3.0; and consent of instructor, advisor, and associate director of the School.

ARTF Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARTF)

Art--Foundation Courses

ARTF 101  Contemporary Issues in Art  credit: 2 Hours.
Exposes the first year student in an interactive lecture/discussion format to contemporary issues and disciplines in the visual arts. Course requirements include attendance of course lectures, field trips, visiting artist presentations, keeping of a journal and the writing of a paper. Additional fees may apply. See Class Schedule.

ARTF 102  Observational Drawing  credit: 3 Hours.
Theory and practice in observational drawing with emphasis on fundamental principles such as mark/line, shape/form, space/composition, linear/perspective, scale/proportion, value/tonal range, and pattern/texture. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.

ARTF 103  Design I  credit: 3 Hours.
Theory and practice in the elements, processes and principles of design. Course content is organized under three headings: COLOR, a study of the visual, material and psychological nature of color; COMMUNICATION, an introduction to the fundamentals of visual communication using primarily digital media; and 3D CRAFT, a survey of fabrication techniques using three-dimensional media. Additional fees may apply. See Class Schedule. Prerequisite: This course is open to Art and Design Majors only.

ARTF 104  Expressive Drawing  credit: 3 Hours.
One of a suite of three drawing courses, this class includes the following drawing concepts: narrative, conceptual, applied, non-objective, format, process, seriality and collage. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.
ARTF 105 Design II credit: 3 Hours.
Theory and practice in the elements, processes and principles of design. Course content is organized under three headings: RESEARCH, an introduction to methods used in research-driven project; TIME, an examination of the formal and technical aspects of temporal media such as sound, video or animation; and 3D EXPLORATION, a process-driven exploration of three-dimensional space and form. Additional fees may apply. See Class Schedule. Prerequisite: ARTF 103.

ARTF 106 Visualization Drawing credit: 3 Hours.
This studio course introduces students to the graphic representation techniques of visualization utilized within the fields of design and arts, as well as teaches drawing as a tool for thinking. Lectures and studio projects examine the language of three-dimensional form and deal with a wide range of analysis and representation of form, including mechanical drawing, freehand sketching and various means of rendering. Additional fees may apply. See Class Schedule. Prerequisite: For Art+Design majors only.

ARTF 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Additional fees may apply. See Class Schedule.

ARTF 201 Issues in Visual Communication credit: 2 Hours.
Survey ideas and movements that have had important impact on visual culture over the last century. Readings, discussions, presentations, and research projects, will introduce significant modern and contemporary theories, and the artists and designers who have exemplified and furthered those ideas. Students will gain an understanding of issues that have influenced visual art and design in recent history, improve their ability to analyze images, expand their concepts of how meaning gets attached to images and objects, and increase their ability to engage in debate and discussion about art and design practices.

ARTF 301 Art + Design Matters credit: 3 Hours.
Students attend a weekly lecture series featuring well-known artists, designers, art historians, and art educators. Provides an opportunity to hear leading contemporary practitioners talk about the ideas, concepts, and agendas behind their work. Lectures are supplemented by weekly online directed writing assignments that further explore issues and ideas raised in the lectures. As a final project, students research and write about a contemporary artist or designer of their choosing. Prerequisite: Junior standing.

ARTH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARTH)

Art--History Courses

ARTH 110 Introduction to the History of Art and Visual Culture credit: 3 Hours.
This course introduces participants to foundational questions that shape the disciplines of art history and visual studies. It is not a comprehensive survey. Rather, it provides students critical frames for examining the visual world from various temporal, geographic, and methodological perspectives. Students will investigate the history, interpretation, and criticism of selected cultural objects, images, places, and spaces across time and around the globe.

ARTH 111 Ancient to Medieval Art credit: 4 Hours.
Development of the visual arts in Western Europe and the Near East in their cultural contexts from prehistoric times until the early fifteenth century; includes Egyptian, Greek, Roman, and medieval art and architecture. Same as MDVL 111.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ARTH 112 Renaissance to Modern Art credit: 4 Hours.
Development of the visual arts in Western Europe and the United States in their cultural contexts from the early fifteenth century to the present. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ARTH 113 Introduction to African Art credit: 4 Hours.
An introduction to the arts of Africa. Sculpture, textiles, architecture, body adornment, and performance will be examined on the basis of aesthetic, religious, political, and social contexts. The main emphasis will be on traditional art, although the course will address many changes and continuities within African art as evidenced in the late 20th century. The course will proceed geographically from western through central to eastern and southern Africa. Videos, music, and museum visits will complement the lectures.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ARTH 114 Introduction to East Asian Art credit: 4 Hours.
Thematic introduction to the visual arts of China and Japan, including calligraphy and painting, woodblock prints, sculpture, gardens and architecture. Same as EALC 114.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ARTH 115 Art in a Global Context credit: 4 Hours.
Introduces students to basic concepts necessary for understanding the visual arts. It orients students to the visual arts in a variety of international contexts, and in particular in our current globalizing world. This course can be used to fulfill either Western or Nonwestern general education categories, but not both.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: Non-Western Cultures
UIUC: Western Comparxt Cult

ARTH 211 Design History Survey credit: 3 Hours.
The historical, social and cultural context of design concentrating on manufactured products, communication, media and design from the Industrial Revolution to the present. Lectures, seminars and individual research projects.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts

ARTH 215 Greek Art credit: 3 Hours.
Survey of architecture, sculpture, and painting of the Greek world from the geometric period to the beginning of the Christian era. Same as CLCV 217.

ARTH 217 Development of Ancient Cities credit: 3 Hours.
Same as CLCV 231. See CLCV 231.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Western Comparxt Cult

ARTH 218 Ancient Greek Sanctuaries credit: 3 Hours.
Same as CLCV 232 and REL 232. See CLCV 232.

ARTH 222 Medieval Art credit: 3 Hours.
The arts of Byzantium and Western Europe from the early Christian era to the Renaissance. Same as MDVL 222.

ARTH 230 Italian Renaissance Art credit: 3 Hours.
Architecture, painting, and sculpture of Italy during the Renaissance.

ARTH 231 Northern Renaissance Art credit: 3 Hours.
Architecture, painting, sculpture, and minor arts of Europe outside Italy in the fifteenth and sixteenth centuries. Same as MDVL 231.
ARTh 235  Baroque Art  credit: 3 Hours.
Studies European painting, sculpture, and graphic work during the period 1580 to 1700.

ARTh 240  Art of the Nineteenth Century  credit: 3 Hours.
Architecture, painting, sculpture, and minor arts of France, Germany, Spain, and England in the nineteenth century.

ARTh 241  Modern Art, 1880-1940  credit: 3 Hours.
This course examines the ways in which artists reconceived how art should look and function in response to the many changes -- social, political, and technological -- that accompanied the modernization of Europe from 1880 to 1940. Topics to be covered include the avant-garde, modernism's relationship to "primitivism," pure abstraction, art's responses to the political upheavals of World War I and the Russian Revolution, the advent of design, and the politics of realism and representation. Although primarily focused in Europe, the course also touches on related modern movements globally. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

ARTh 242  Art Since 1940  credit: 3 Hours.
The scope of this course begins amidst the devastation and geopolitical shifts that followed World War II and ends with the effects of globalization in the 1990s and 2000s. We will ask the same questions that faced artists and critics in between: Should art focus on its own material processes or open its borders to historical flux? Is it art's job to create the cultural myths that bind society together, or to deconstruct them? Who participates in modern and contemporary art, and who doesn't? What kinds of production should be considered art? How are specific formal strategies informed by the perspectives of different subject positions? What politics underwrite them? We will consider, and reconsider, the existing narratives about art during this period with a dual aim: first, to better understand the historical positions of the artists in question, and, second, to piece together a prehistory of the moment in which we currently find ourselves.

ARTh 249  American Visual Humor  credit: 3 Hours.
Investigates the mechanics of visual humor in nineteenth-century American visual and material culture, including graphic satire, painting, sculpture, comics, and early film. Considers this material in the context of social and political attitudes, styles of communication, consumer culture, literary comedic strategies, aesthetic theory, and humor theory more generally. Incorporates in-class screenings of contemporary comedians, visits to the Rare Book Room at the University Library, and visits to the Krannert Art Museum.

ARTh 250  American Art  credit: 3 Hours.
Surveys American art and architecture from the colonial period to the present.

ARTh 257  History of Photography  credit: 3 Hours.
Examines a history of photography from its origin to the present, including both documentary and artistic approaches; considers relationships with other arts.

ARTh 260  Graffiti and Murals  credit: 3 Hours.
From Bronx walls to the Berlin Wall, from ancient palatial decorations to spray-can art, murals and graffiti have been revolutionary political tools, objects of aesthetic contemplation, and vehicles for identity formation. Primarily a lecture course that examines ancient and early modern cases from different cultures, as well as focusing on modern examples from Latin America and the USA. Same as LLS 260. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts
UIUC: Western Compartv Cult

ARTh 299  Spec Topics in Art History  credit: 3 Hours.
Special topics in Art History Courses. Topics and subject matter to be published in course listings. May be repeated up to 6 hours in a semester, to a maximum of 12 total hours. Prerequisite: Sophomore standing in Art and Design.

ARTh 310  African Art and Society I  credit: 3 Hours.
Introduces the arts of Black Africa, i.e., dance, drama, songs, and poetry, as expressed in a multi-media framework and a social-religious context; surveys the art styles of the Dogon, Senufo, Mende, and Ashanti peoples.

ARTh 312  Central African Art  credit: 3 Hours.
A one-semester introduction to the arts of central Africa. Sculpture, pottery, architecture, body adornment, contemporary art, and performance will be examined and discussed on the basis of aesthetic, religious, political, and social contexts. Discusses many changes and continuities within African artistic traditions as evidenced in late twentieth-century urban, popular, and political arts of central Africa. We shall also investigate some central African artistic influences found in African American arts. Same as AFST 312.

ARTh 313  Modern and Contemp African Art  credit: 3 Hours.
Examines how multiple "modernisms" emerged from African independence movements, and thereby influenced the development of African and African-American art from the 1960s to the present. Same as AFST 313.

ARTh 342  Arts of Colonial Latin America  credit: 3 Hours.
Introduction to the major art historical, stylistic and iconographic developments of several Latin American countries of the late sixteenth through eighteenth centuries. Themes to be investigate include: the pictorial representation of race; indigenous workshops, traditions, and the birth of European art academies; the constructions of gender; as well as the translation of styles. The course includes field trips to local museums and libraries. Previous introductory level art history or Latin American history course recommended. Same as LAST 342.

ARTh 343  Arts of Modern Latin America  credit: 3 Hours.
This course is an introduction to the major visual materials, monuments, and critical debates of the arts of Latin America, from the 19th to the early 20th century. It studies a wide range of the arts, including drawings, paintings, popular prints, performance, photography, film, murals, architecture, and urban planning, especially as they pertain to definitions of "Latin America". The course pays particular attention to constructions of race and gender in representing the modern nation. Same as LAST 343.

ARTh 344  Spanish Modern Art  credit: 3 Hours.
Introduction to the rich visual cultures of Spain beginning with the Bourbon dynasty in the eighteenth century through the early decades of the twentieth century. The course examines a variety of themes: from the mythologized loves of Goya, to the grandeur of canvases recreating Spain's history; from Spanish Romanticism to the rise of vanguard movements and the advent of Pablo Picasso. 3 undergraduate hours. Prerequisite: Previous introductory level art history course recommended, but not required.

ARTh 345  Realism to Postimpressionism  credit: 3 Hours.
Studies European art from 1850 to 1900, with emphasis on French painting.

ARTh 350  American Art 1750-1900  credit: 3 Hours.
Studies the two major directions of art in the United States from independence to the centennial, with focus on major figures and the scientific and philosophical movements which influenced them. Prerequisite: One year of art history or consent of instructor.
ARTH 351  Early American Modernism  credit: 3 Hours.
Examines American art, particularly painting and sculpture, 1876-1940, against its cultural background and the relation of the American artist to Europe in an attempt to isolate the roots of Modernism in the United States. Prerequisite: One year of art history or consent of instructor.

ARTH 360  Women and the Visual Arts  credit: 3 Hours.
Explores the complex interconnections of women with the visual arts in Europe and North America from the classical era to the present, including the modes of artistic production and the representation of women in western society. Same as GWS 360.

ARTH 391  Individual Art History Topics  credit: 1 to 4 Hours.
Directed independent research or creative activity. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in art and design; and consent of instructor, advisor, and associate director of the School.

ARTH 395  Junior Seminar in Art History  credit: 3 Hours.
Offers Art History majors grounding in the discipline's historiography and exposure to diverse historical methods. Provides students with experience in a range of research techniques as preparation for their Senior Seminar. Prerequisite: Junior standing in Art History curriculum or in Art History minor.

ARTH 402  Ways of Seeing in Edo Japan  credit: 3 or 4 Hours.
Focuses on modes of seeing and technologies of vision manifest in the visual arts of Edo Japan, 1615-1868. At the time, imported European instruments of seeing, such as the microscope, made possible unusual visual experiences; revivals of classical Japanese painting manipulated different ways of recreating and visualizing the past. A variety of themes, organized chronologically, will demonstrate the importance of seeing in painting and calligraphy, ceramics, woodblock prints, and architecture. Same as EALC 402. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ARTH 114, or equivalent background in Japanese history or literature. Junior standing or consent of instructor.

ARTH 403  Word and Image in Chinese Art  credit: 3 or 4 Hours.
Study of the diverse correlations between verbal texts and visual images in Chinese art and art theory from the twelfth through seventeenth centuries. Same as EALC 403. 3 undergraduate hours. 3 or 4 graduate hours.

ARTH 410  West African Art and Ideas  credit: 3 or 4 Hours.
Study of West African art styles in chronological and cultural perspectives with a special interest in the use of interdisciplinary source materials. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 413  Sacred African Diaspora Arts  credit: 3 or 4 Hours.
Explores African diaspora arts grounded in the diverse aesthetic, philosophical, historical, political, and religious consciousnesses of peoples of African descent living in the Caribbean and the Americas. Focuses on the preservation and ongoing transformations of African visual and religious cultures surviving in African diaspora communities from the period of the trans-Atlantic slave trade to the present. Same as AFST 421. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 415  The Archaeology of Greece  credit: 3 Hours.
Same as CLCV 443. See CLCV 443.

ARTH 416  The Archaeology of Italy  credit: 3 Hours.
Same as CLCV 444. See CLCV 444.

ARTH 423  Romanesque Art  credit: 3 or 4 Hours.
Art and architecture of the Romanesque period. Same as MDVL 423. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 424  Gothic Art  credit: 3 or 4 Hours.
Arts of western Europe from the end of the Romanesque period until the Renaissance. Same as MDVL 424. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 430  Topics: Italian Art 1300-1500  credit: 3 or 4 Hours.
Special topics in the history of painting, sculpture, and architecture of Italy during the Renaissance selected for intensive study. 3 undergraduate hours. 3 or 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 431  Topics: Northern Art 1300-1500  credit: 3 or 4 Hours.
Special topics in the history of painting, sculpture, and minor arts of France, Germany, Spain, and England during the Renaissance selected for intensive study. Same as MDVL 431. 3 undergraduate hours. 3 or 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 432  Sixteenth-Century Italian Art  credit: 3 or 4 Hours.
Painting, sculpture, and architecture in Italy from 1500 to 1580. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 433  Fifteenth-Century Italian Art  credit: 3 or 4 Hours.
Study of Italian painting, sculpture and architecture from circa 1300 to 1500. Same as MDVL 433. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 435  Italian Baroque Art  credit: 3 or 4 Hours.
Italian painting and sculpture during the period 1580-1700, with particular emphasis on art in Rome. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 436  17th Century Dutch Painting  credit: 3 or 4 Hours.
Seventeenth-century art in the Netherlands with extensive treatment of the careers of Rubens and Rembrandt. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 439  18th Century European Art  credit: 3 or 4 Hours.
Critical survey of the major developments in European painting of the eighteenth century. Emphasis is placed on French artists, but major figures in England, Spain, and Italy are also considered. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 440  Romantic Art  credit: 3 or 4 Hours.
Studies English, French, and German art from the end of the eighteenth century through 1840; focuses on revivalist movements, historicism, landscape art, and changing conceptions of art and artist during the period. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 441  Realism to Post-Impressionism  credit: 3 or 4 Hours.
Studies European art from 1850 to 1900, with emphasis on French painting. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 445  European Art Between the Wars  credit: 3 or 4 Hours.
Study of the leading personalities and movements in European painting, sculpture, and architecture, with emphasis on painting. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.
ARTH 447  France and Its Others credit: 3 or 4 Hours.
Examines the relationship between art and colonialism in nineteenth-century France. Topics include orientalism, primitivism, and exoticism; the central figures include Delacroix, Flaubert, Gerome, and Gauguin. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 460  Museum Management credit: 3 or 4 Hours.
This course is concerned with advanced theoretical issues of art museum work, taught by the professional staff of a museum. Topics covered include collections, curatorial issues, educational program planning, trustee relations, public outreach, fundraising, budgeting, and staff organization. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

ARTH 489  Senior Art-History Honors-BA credit: 2 to 5 Hours.
Independent guided research and study in a selected area of art history for candidates for the Bachelor of Arts in Art History with departmental distinction. 2 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 5 hours. (Counts for advanced hours in LAS). Prerequisite: Senior standing in the art history curriculum; a cumulative grade point average of 3.25; an art history grade point average of 3.5; and consent of instructor, department advisor, and associate director of the School.

ARTH 490  Senior Art-History Honors-BFA credit: 2 to 5 Hours.
Directed independent research and study for honors. 2 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 5 hours. Prerequisite: Senior standing in Fine and Applied Arts art history, a cumulative grade point average of 3.0, and consent of instructor, advisor, and associate director of the School.

ARTH 491  Topics in Art History credit: 1 to 4 Hours.
Variable content; consult the Class Schedule for current topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Junior standing or consent of instructor.

ARTH 495  Senior Seminar in Art History credit: 3 Hours.
Required seminar for undergraduate majors that offers students practical experience in research techniques. Focuses on a specialized theme of the professor's choice, and will incorporate extensive reading in a specific field of Art History and the completion of a substantial research paper. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 undergraduate hours. Prerequisite: ARTH 395.

ARTS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARTS)

Art--Studio Courses

ARTS 200  Introduction to Book Arts credit: 3 Hours.
Creative expression and communication through the production of a variety of unique and limited edition books. Students will learn the tools and techniques of binding books by hand while studying the physical and narrative properties of books. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing in Art and Design, in an Art History major, or in the Art History minor.

ARTS 201  Crafts Design credit: 3 Hours.
This course will provide students the opportunity to 1) explore craft practice as a medium of personal aesthetic expression 2) develop skills and a technical competency in working with a variety of craft materials to include glass, metal, paper, clay, enamel, wood 3) design objects of utility 4) experience creative and technical experimentation 5) establish an awareness of historical and contemporary movements in craft practice. This course includes field trips to the studios of practicing craft artist and visits to Krannert Art Museum and local art galleries. Patience, determination, fine motor skills, critical thinking, and problem solving skills will be developed and exercised in the course. This course satisfies the 3D requirement in the new Art + Design Foundations curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.

ARTS 205  Introduction to Printmaking credit: 3 Hours.
Introduction to the materials and techniques of printmaking, including intaglio, relief, lithography, and screenprint. Over the course of several projects, students will develop a familiarity with print processes while learning about the unique history and conceptual concerns of print media. Composition and technique are emphasized, and projects that relate to work developed in other studio and design areas are encouraged. Additional fees may apply. See Class Schedule.

ARTS 210  Ceramics Sculpture I credit: 3 Hours.
This studio course familiarizes students with basic oil painting materials, color theory, historical painting techniques, illusionistic space, and paint handling and application. Exploration and discussion of the ways in which paintings make meaning. This course satisfies the 2D requirement in the Art Foundations curriculum. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing or consent of instructor. For Art majors only.

ARTS 230  Jewelry/Metals I credit: 3 Hours.
Design and execution of jewelry and related objects through fabrication, focusing on surface embellishment, joining, and finishing processes; exploring metal as a medium of personal aesthetic expression. Additional fees may apply. See Class Schedule. Prerequisite: Sophomore standing or consent of instructor. For Art majors only.

ARTS 231  Jewelry/Metals II credit: 3 Hours.
Additional experience and experimentation in designing and executing jewelry and related objects through fabrication, refinement of surface embellishment, joining, and finishing skills; further exploration of metal as a medium of personal aesthetic expression. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 230.

ARTS 250  Life Drawing credit: 3 Hours.
Representational and interpretive drawing from life explored through close observation and structural analysis of the human figure and other subject matter. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: ARTF 102 and ARTF 104. For Art majors only.

ARTS 251  Beginning Painting credit: 3 Hours.
This studio course familiarizes students with basic oil painting materials, techniques, and concepts. Topics to be addressed include composition, color theory, historical painting techniques, illusionistic space, and paint handling and application. Exploration and discussion of the ways in which paintings make meaning. This course satisfies the 2D requirement in the Art Foundations curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.
ARTS 252 Making and Meaning credit: 3 Hours.
Introduction to the relationship of material, method, and process to meaning in art practice. Through research, critique, and application of concepts in material studio processes, students will explore a diverse range of methods of achieving meaning in an artwork. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 102 and ARTS 104.

ARTS 254 Painting II credit: 3 Hours.
Continuation of ARTS 251. Further develops the materials, skills, and issues introduced in that course; also considers additional painting media; explores and examines traditional and contemporary issues in painting. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 251.

ARTS 280 Beginning Sculpture credit: 3 Hours.
Introduction to basic concepts, processes, and materials in sculpture, with an emphasis on the relationship among these three aspects of producing works of art. Materials including wood, plaster, and clay will be used additively to fabricate, model and cast forms. Subtractive methods utilizing carving, and the making of meaning via materials, methods and context are also discussed. This course satisfies the 3D requirement in the Art Foundations curriculum. Additional fees may apply. See Class Schedule. Prerequisite: For art and design majors only.

ARTS 281 Sculpture II credit: 3 Hours.
Continuation of ARTS 280. Explores the relationship of sculptural materials and media to meaning; research into the historical, contemporary, and contextual semiotics of materials in order to generate meaning. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 280.

ARTS 299 Spec Topics in Studio Art credit: 3 Hours.
Special topics in Studio Art Courses. Topics and subject matter to be published in course listings. Additional fees may apply. See Class Schedule. May be repeated up to 6 hours in a semester, to a maximum of 12 total hours. Prerequisite: Sophomore standing in Art and Design.

ARTS 310 Ceramics Sculpture II credit: 3 Hours.
Students will develop more sophisticated techniques and processes necessary to develop their personal voice and take more responsibility for concept, process and material in their work. Emphasis will stress processes related to creating ceramic sculpture such as hand construction techniques, kiln firing, clay and glaze experimentation. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 210.

ARTS 330 Jewelry Metals III credit: 3 Hours.
The design and production of jewelry and related objects with additional experience in manipulative techniques such as casting, electroforming, surface decoration, enamelling, complex construction and forming. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 231 and enrollment in the crafts curriculum. For Art majors only.

ARTS 331 Jewelry Metals IV credit: 3 Hours.
Expands the general techniques of ARTS 330 with emphasis on experimentation and development of personal style through advanced techniques of hollowware, complex construction, enamelling, electroforming and plating, forging and the use of varied materials. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 330. For Art majors only.

ARTS 332 Metal Technology credit: 2 Hours.
Understanding of the working properties of nonferrous metals. Experimentation with little known processes of metalwork to be subjects of individual research. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 4 hours. Prerequisite: ARTS 330 and junior standing in crafts, or consent of instructor. For Metals majors only.

ARTS 333 Enamelling credit: 3 Hours.
Exploration and experimentation in image development and color through traditional enamelling processes; emphasis on cloisonne, champleve, bassetaile, plique-a-jour, limoges, and grisaille; exploration of enamel and metal as a medium of personal aesthetic expression. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 9 hours. Prerequisite: ARTS 230 or consent of instructor.

ARTS 334 Metalsmithing credit: 3 Hours.
Experience and experimentation in designing and executing hollowware through traditional forming processes; emphasis on sinking, angle raising, crimping, stretching, seamsng and snarling, cold forging, tube and spiculum forming, planishing, surface embellishment, and patination; exploration of metal as a medium of personal aesthetic expression. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 12 hours. Prerequisite: ARTS 230 or consent of instructor.

ARTS 340 The Art of 3D Imaging credit: 3 Hours.
Investigation of the three-dimensional modeling capabilities of 3D Studio Max software through a series of original tutorials, class projects and individual problems. The emphasis will be on quality of form and content rather than technical expertise. The end result will culminate in the understanding and production of limited edition digital prints. Additional fees may apply. See Class Schedule. This course may not be repeated for credit.

ARTS 341 Image Practice credit: 3 Hours.
Looks at the production and reception of images through a combination of historical, theoretical and practical perspectives. A variety of contexts from contemporary art, design and popular culture will be explored through research and visual projects. Special consideration will be given to current forms of reproduction, with students learning and utilizing common methods for rendering and realizing still images, including both print and screen-based output. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing.

ARTS 343 Time Arts I credit: 3 Hours.
Explores the potential of time-based media for creative expression and communications within the context of visual art and design. Classroom discussion will focus on historical and contemporary examples of time arts, written materials, and student work. Hands-on projects will introduce tools, issues and strategies particular to creating and analyzing work based in time. Additional fees may apply. See Class Schedule.

ARTS 344 Interaction I credit: 3 Hours.
Introduction to the conceptualization and construction of interactive experience for art and design. Interaction will be examined as technical, structural, social, and historical. Work will include practice, research, discussion, and lecture. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing.

ARTS 350 Intermediate Studio I credit: 4 Hours.
Combined painting, sculpture and new media studio. Self-directed arts practice. Individual and group critique; includes seminars, discussions, demonstrations, visiting artists and critics, and field trips. Interaction and collaboration among students in painting, sculpture and new media. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 254 or ARTS 281 or ARTS 240. For Art majors only.
ARTS 351  Intermediate Studio II  credit: 4 Hours.
Continuation of ARTS 350. Combined painting, sculpture and new media. Self-directed arts practice. Individual and group critique; includes seminars, discussions, demonstrations, visiting artists and critics, and field trips. Interaction and collaboration among students in painting, sculpture and new media. Additional fees may apply. See Class Schedule. Prerequisite: ARTS 350. For Art majors only.

ARTS 391  Independent Study  credit: 1 to 4 Hours.
Directed independent creative activity or research. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in Art and Design; and consent of instructor, advisor, and associate director of the School. For Art majors only.

ARTS 392  Current Art Issues Seminar  credit: 3 Hours.
Seminar with readings, lectures, discussions on ideas and issues affecting contemporary art. Attendance is required at visiting artists' and scholars' lectures and field trips. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing in Fine and Applied Arts or consent of instructor.

ARTS 399  Internship in Studio Arts  credit: 1 to 4 Hours.
Internships to be pre-approved for variable credit. Students will be required to document work completed during the internship with verification of supervisor. Supervisor will also be required to fill out a questionnaire either by mail or on-line. Faculty members will access work and questionnaires to assign a grade. Approved for S/U grading only. Prerequisite: Junior standing in School of Art and Design.

ARTS 400  Advanced Book Arts  credit: 3 or 4 Hours.
Advanced study of the history and techniques of hand bookbinding. Variations on binding structures and emphasis on creative expression through mixed media, collage, painting, photography, and writing. Field trips to book collections. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. Prerequisite: ARTS 200, and junior standing in Art and Design or consent of instructor.

ARTS 410  Advanced Ceramics Sculpture  credit: 3 or 4 Hours.
Students will develop more sophisticated techniques and processes necessary to develop their personal ideas. Emphasis will be placed on processes related to creating ceramic sculpture such as kiln firing, clay and glaze experimentation. At this level, the student begins to take more responsibility for concept, process and material in their work. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated up to 15 undergraduate hours or 20 graduate hours. Prerequisite: ARTS 210 and ARTS 310.

ARTS 412  Ceramics  credit: 2 to 4 Hours.
Ceramic design with emphasis on the development of professional style and personal expression. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor.

ARTS 430  Jewelry Metals V  credit: 5 Hours.
Expands the general techniques of ARTS 331 with emphasis on experimentation and development of personal style. Additional fees may apply. See Class Schedule. 5 undergraduate hours. No graduate credit. Prerequisite: ARTS 331.

ARTS 431  Jewelry Metals VI  credit: 5 Hours.
Continuation of ARTS 430; emphasis on experimentation and development of personal style, a portfolio, and a senior exhibition. Additional fees may apply. See Class Schedule. 5 undergraduate hours. No graduate credit. Prerequisite: ARTS 430. For Art majors only.

ARTS 443  Time Arts II  credit: 3 or 4 Hours.
Provides semester-long, in-depth explorations of single time arts topics. Using the ideas and basic tools from Time Arts I, students will study the advanced concepts and techniques particular to individual time arts genres while producing their own work. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 343 or consent of instructor.

ARTS 444  Interaction II  credit: 3 or 4 Hours.
Further exploration of interaction, with an increased emphasis on realization and application of designed interactive experience, and depth of exposure to particular technical platforms. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate or 8 graduate hours. Prerequisite: ARTS 344 and consent of instructor.

ARTS 445  Special Topics in New Media  credit: 3 or 4 Hours.
Course will explore one specialization within the field of New Media. Topics will rotate through each semester; possible subjects include Performance, Sound, Radio, Public Art, and Social Media. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or subsequent terms to a maximum of 12 undergraduate hours or 16 graduate hours as topics vary. Prerequisite: Junior standing.

ARTS 449  Advanced Seminar in New Media  credit: 3 Hours.
Students will explore current issues in New Media with the goal of understanding their own artwork in a disciplinary context. Through reading, writing, research and discussions, students will be exposed to significant work in their field. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 undergraduate hours. Prerequisite: Open to New Media majors or consent of instructor.

ARTS 450  Advanced Studio I  credit: 4 Hours.
First of two capstone courses in studio arts practice, individualized study for painting, sculpture, and new media majors. Explores and develops conceptual and aesthetic interests, topics, and projects; expands and refines material knowledge and expertise; develops research strategies and methodologies. Includes individual and group critiques, dynamic interaction with faculty and peers. Additional fees may apply. See Class Schedule. 4 undergraduate hours. No graduate credit. Prerequisite: ARTS 351 Intermediate Studio II. For Art majors only.

ARTS 451  Advanced Studio II  credit: 4 Hours.
Continuation of ARTS 450. Second of two capstone courses in studio arts practice, providing individualized study for painting, sculpture, and new media majors. Explores and develops conceptual and aesthetic interests, topics, and projects; expands and refines material knowledge and expertise; develops research strategies and methodologies. Includes individual and group critiques, dynamic interaction with faculty and peers. Additional fees may apply. See Class Schedule. 4 undergraduate hours. No graduate credit. Prerequisite: ARTS 450. For Art majors only.
ARTS 454  Advanced Drawing  credit: 3 Hours.
An advanced studio course that considers a variety of activities defined traditionally, historically and contemporarily as drawing. Students will investigate the questions of what drawing is and how it communicates meaning. They will use and experiment with a wide variety of materials and concepts as they work on in-class projects and outside assignments, investigate the work of contemporary artists to see how the practice of drawing is being redefined, and consider the influence drawing has had on design and visual culture. Students will be encouraged to experiment, innovate, and develop new visual vocabularies. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: Two prior courses in drawing; junior standing.

ARTS 455  Advanced Painting  credit: 3 Hours.
An advanced studio course focusing intensively on the practice of painting. Students will research contemporary painting and its recent history, discuss its relevance and place in contemporary art, and investigate and articulate their own conceptual motivations in using painting media. Topics will include the relationship of the history of painting to how its use generates meaning in a contemporary context. Students will engage in self-generated studio practice; this work will be the basis of group and individual discussion and critique. 3 undergraduate hours. No graduate credit. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 251 and ARTS 254; junior standing.

ARTS 456  Advanced Sculpture  credit: 3 Hours.
Advanced studio course designed to integrate basic sculpture and other 3-D studio skills with advanced knowledge of contemporary sculptural practices and materials, along with an understanding of concepts and theories influencing contemporary sculptural art. Studies will investigate topics including site specificity, context, and criticality as they develop research and studio production methods that allow them to generate work that is relevant to current and future discourse in the field. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: ARTS 280 and ARTS 281; junior standing.

ARTS 457  Art in Context  credit: 3 Hours.
Focuses on the relationship between artworks and their historical, institutional, spatial, geographic, architectural or other contexts for the purpose of engaging in a critical analysis of artworks, as well as developing informed, intentional studio production. Students will encounter topics related to a critical and ethical understanding of context including site-specificity, phenomenology, public art, Situationism, relational aesthetics, and the production of space through social and political process such as building and mapping. The goal is to investigate and understand the dynamic relationship between art and its context. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing.

ARTS 490  Senior Honors  credit: 2 to 5 Hours.
Independent creative activity, guided study, or research for honors. 2 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 5 hours. Prerequisite: Senior standing in Art & Design, a cumulative grade point average of 3.0; and consent of instructor, advisor, and associate director of the School. For Art majors only.

ARTS 499  Special Topics in Studio Art  credit: 1 to 3 Hours.
Special topics in studio arts. Topics and subject matter to be published in course listings. Additional course materials fees may apply. See Class Schedule. 1 to 3 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 9 undergraduate hours or 12 graduate hours if topics vary. Prerequisite: Senior standing or consent of instructor.

### Art Crafts

Alan Mette
143 Art and Design Building, 408 East Peabody
PH: (217) 333-0855
http://art.illinois.edu

**For the Degree of Bachelor of Fine Arts in Crafts**

The curriculum in Crafts consists of a concentration in Metal. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

**For the Degree Bachelor of Fine Arts in Art Education**

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/ programs).

Illinois law and Council on Teacher Education policy require that all candidates for a teacher education program pass the Illinois Certification Testing System Test of Basic Skills prior to admission. In order to be recommended for certification, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Foundation Year for All Art and Design Curricula

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. All major’s first-year experience will include courses in drawing, 2D, 3D, and 4D practices. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission to the School of Art and Design.

¹ ARTH 111, ARTH 112, ARTH 113, ARTH 114, and ARTH 115 all meet a general education requirement. See www.courses.illinois.edu (http://www.courses.illinois.edu). Credit will not be given for both ARTH 112 and ARTH 115.

² Students are assigned to a Composition I course for either fall or spring semester. Students will take a general education elective during the semester they are not taking their Composition I course.

Art History

Alan Mette  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://art.illinois.edu

For the Degree Bachelor of Fine Arts in the History of Art

The curriculum in the history of art requires 122 credit hours and offers a broad cultural education that unites academic and studio training. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

To be eligible for distinction, a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The Student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for further details.

Contact: Mark Avery  
Coordinator of Undergraduate Academic Affairs  
School Office: 140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

Students must complete a fourth-level college foreign language course or its equivalent for graduation with a B.F.A. in Art History.

Graphic Design
Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

For the Degree Bachelor of Fine Arts in Graphic Design
The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, advanced interaction design, and the design of Ninth Letter (http://www.ninthletter.com), a nationally-distributed and award-winning literary arts journal.

Industrial Design
Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

For the Degree Bachelor of Fine Arts in Industrial Design
The curriculum in industrial design requires 122 credit hours and provides education in the design of products for mass production to meet the needs of people and their environment. Emphasis is placed on the
awareness of the market demand for design, experience in the problem solving process and methods and materials of production and their relative costs, creation of designs that are in visual harmony with their environment and that are satisfying to the consumer, and responsiveness to the changes in technology and cultural patterns.

Art + Design courses (art and design courses not in industrial design requirements or used as industrial design electives)

Open electives as needed to total a minimum of 122 hours.

**Minor in Art and Design**

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The Art and Design Minor provides students with the opportunity to integrate creative art and design practices with other academic or research pursuits. Students selecting the Art and Design Minor do not necessarily wish to pursue a career as a practicing artist or designer, but do want the chance to work creatively in the visual arts and design, and develop related skills. Students can choose to focus on one particular art form (e.g., photography) or a variety of different media (e.g., photography, typography, and ceramics).

Applicants for admission to the Minor in Art+Design should submit a personal essay explaining their interest in art and design to the Minor Advisor. A minimum cumulative GPA of 2.00 is required.

Contact: Guen Montgomery
Art and Design Minor Advisor
129 Art and Design Building, 333-0855, montgo@illinois.edu

**Course Requirements**

Students must meet the following course requirements for a total of 18 hours.

Students will be required to have passed one of the approved courses for non-majors (ART 102-105, 140) for entry into the Minor.

**Distribution of Courses**

A minimum of 2 courses from the academic course menu.

Academic courses include: ART 100, ART 140, ARTE 260, ARTE 475, ARTE 480, and any 100, 200, 300, or 400 level ARTH course.  

A minimum of 3 courses from the studio course menu. Studio courses include: ART (except 100, 140), ARTD, ARTE (except 260, 475, 480), ARTF, and ARTS courses.

At least 1 additional course in either an academic or studio course menu.

A minimum of six hours must be completed at the 300 or 400 level.

**Total Hours**: 18

1 At least one of these courses must be chosen from the following: ARTH 111, ARTH 112, ARTH 113, ARTH 114, ARTH 115, or ART 100.

2 High demand Industrial Design and Graphic Design courses are typically not available to minors.

**Minor in Community-Based Art Education**

Alan Mette
The Community-Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings. In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

Contact: Jennifer O'Connor
Community-Based Art Education Minor Advisor
129 Art and Design Building, Champaign, 244-7467, bergmar1@illinois.edu

New Media

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

For the Degree of Bachelor of Fine Arts in New Media

The curriculum in New Media requires 122 credit hours. Students are trained in the production and critique of works for art or design that explore forms and technologies identified as new or emerging. Students receive instruction in technical execution, formal composition, historical precedents and theoretical framing. Advanced course work produces both assigned and self-directed projects that utilize time-based, interactive, physically networked and performative media, and address emerging practices in art and design.

Painting

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu
For the Degree of Bachelor of Fine Arts in Painting

The curriculum in painting requires 122 credit hours and provides extensive training in preparation for professional practice as an artist.

The first year is devoted primarily to the study of design, composition, and the acquisition of both representational and abstract drawing skills. The second year concentrates on introducing the student to beginning painting skills and techniques with further studies in drawing and composition. The last two years are devoted to the development of individual creative expression in painting and other media.

When followed by a program leading to a degree of Master of Fine Arts in Painting, this curriculum is recommended as preparation for a career as an artist and as a teacher of painting and drawing and related subjects at the college level.

Photography

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

For the Degree of Bachelor of Fine Arts in Photography

The curriculum in photography requires 122 credit hours; its purpose is to encourage the study of photographic media for personal expression, to explore the social implications of pictures, and to develop the skills needed for careers in photography. General art requirements and electives provide a broad foundation in the visual arts, and photography courses provide a strong background in the history, theory, and practice of photography as art.

Dance, Department of
Jan Erkert
9071/2 W. Nevada Street
Urbana, IL 61801
PH: (217) 333-1010
http://www.dance.illinois.edu
dance@illinois.edu

The Department of Dance, a unit in the College of Fine and Applied Arts, offers a small, personalized program within the context of a large university setting. The resident faculty of eleven full-time members is augmented by part-time faculty and artists-in-residence. The teaching staff includes ten graduate teaching assistants who teach dance in the general education program. The department is an accredited institutional member of the National Association of Schools of Dance.

Program focus in the MFA and the BFA is on the professional preparation of performers, choreographers, and teachers with a breadth of understanding in the discipline. The choreographic and performance emphasis is in contemporary dance; ballet is included as an integral component of training. Classes in yoga, jazz, tap, and world dance forms are offered in the major curriculum. The field of dance science is addressed through courses in Bartenieff movement fundamentals, Laban movement analysis, dance kinesiology, and the Alexander Technique. Additional courses are taught in dance for the camera, dance technology, and other topics of current import. The BA in Dance has a broader, more interdisciplinary scope and is geared toward students who wish to explore careers related to dance and/or create interdisciplinary performance works.

The performance component of the department is housed in the Krannert Center for the Performing Arts, utilizing the exceptional performing, production, and teaching resources of this world-class facility. Additional studio and classroom facilities and the faculty and administrative offices are housed in two adjacent buildings in close proximity to the Krannert Center. Four department concerts per year are produced in the theatres of the Krannert Center, including two concerts of student choreography. The resident lecture-demonstration company performs in community schools, and additional performing opportunities are provided in concerts presented in the dance studio/theatre, in operas and music performances, in University and community musicals, and in regional and national college dance festivals.

Bachelor of Arts in Dance
The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study three core areas in Dance: Technique, Creative Process, and Dance Academics. Students will identify at least one other key area of interest such as Theater, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Minor, Major or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will create a BA Capstone Project in their senior year as a synthesis of the studies within dance and another area of study.

Students pursuing a Dance degree at the University of Illinois must be admitted to the BFA in Dance (audition required). Once admitted, those desiring a broader education may choose to apply for admittance into the BA in Dance, rather than continuing in the BFA.

A total of 120 hours is required for this degree.

- Bachelor of Arts in Dance (p. 260)

Bachelor of Fine Arts in Dance
The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screendance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required. Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

- Bachelor of Fine Arts in Dance (p. 260)

Common Requirements
In addition to the degree-specific requirements listed above, students in either the BA or the BFA in Dance are required to complete the courses in the table below.

Information listed in this catalog is current as of 03/2017
DANC 100  Intro to Contemporary Dance  credit: 3 Hours.
Overview of major works, figures, and trends responsible for shaping dance as an evolving contemporary art form. The course will have lecture, viewing, discussion and experiential (studio participation) components. For non-dance majors.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: Western Comparvt Cult

DANC 101  Modern Dance I  credit: 2 Hours.
Introduction to basic dance technique and movement improvisation; the study of motion as an art, group relationships in improvisation, and discussion of choreographic ideas. For non-dance majors. May be repeated to a maximum of 8 hours.

DANC 102  Modern Dance II  credit: 2 Hours.
Intermediate dance technique and improvisation. For non-dance majors. May be repeated to a maximum of 8 hours. Prerequisite: DANC 101 or consent of instructor.

DANC 103  Contact Improvisation  credit: 2 Hours.
Introduction to basic elements of Contact Improvisation through learning skills such as weight sharing, falling, rolling, responding to touch, momentum, gravity and disorientations. Course work will include dancing, dance making, viewing dance, in-class discussions and short writing assignments. Concert attendance is required. May be repeated to a maximum of 8 hours. Prerequisite: For Non-dance majors.

DANC 104  Making Dances  credit: 2 Hours.
Introduction to basic choreographic elements. Course work will include dancing, dance making, viewing dance, in-class discussions and short writing assignments. Concert attendance is required. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 105  Jazz Dance I  credit: 2 Hours.
Introduction to basic dance technique and stylistic work in the jazz idiom. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 106  Jazz Dance II  credit: 2 Hours.
Progressive development of the concepts and skills in DANC 105. May be repeated to a maximum of 8 hours. Prerequisite: DANC 105 or equivalent; or consent of instructor. For non-dance majors.

DANC 107  Ballet I  credit: 2 Hours.
Introduction to ballet for nondance majors. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 108  Ballet II  credit: 2 Hours.
Progressive development of the concepts and skills in DANC 107; for the non-dance major. May be repeated to a maximum of 8 hours. Prerequisite: Two semesters of DANC 107 or equivalent or consent of instructor. For non-dance majors.

DANC 109  Ballet III  credit: 2 Hours.
Intermediate level of Ballet technique for non-dance majors. Course is a continuation and development of the skills in DANC 108. May be repeated to a maximum of 8 hours. Prerequisite: Two semesters of DANC 108 or equivalent or consent of instructor. For non-dance majors.

DANC 111  Cultural Dance Forms  credit: 2 Hours.
Provides students with the physical study of various world dance forms. Topics reflect specializations of faculty, such as Capoeira, African dance, Balinese dance, and Chinese forms. May be repeated to a maximum of 4 hours in the same term and 8 hours in separate terms.

DANC 112  Hip Hop  credit: 2 Hours.
Hip-Hop dance technique will consist of the study and practice of Urban dance forms grounded in hip-hop culture. Students will explore the multiple dimensions of hip-hop dance as they train in the fundamentals of each form, learn its respective historical context, and access ways of incorporating individual ideas and lived experiences into their dancing. May be repeated in separate terms up to 8 hours.

DANC 120  Tap Dance I  credit: 2 Hours.
Introduction to basic tap technique for non-dance majors. Emphasis is on a conceptual understanding of tap style and the development of the specific skills needed for performance. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 121  Tap Dance II  credit: 2 Hours.
Intermediate level of tap dance technique for non-dance majors. Course is a continuation of DANC 120, emphasizing a progression in movement vocabulary, style, rhythm, and performance quality. May be repeated to a maximum of 8 hours. Prerequisite: DANC 120 or equivalent, or consent of instructor.

DANC 131  Production Practicum I  credit: 1 or 2 Hours.
Practical experience in the production of dance concerts mounted in the Krannert Center for the Performing Arts. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term).

DANC 150  Orientation to Dance  credit: 2 Hours.
Survey of the field including dance as a theatre art, careers, injury prevention and nutrition. Also serves to orient incoming students to the faculty, programs, and policies of the Department of Dance, and the production and performing resources in the Krannert Center for the Performing Arts. Prerequisite: Major standing in Dance or consent of instructor.

DANC 160  Beg Contemp Modern Tech Core  credit: 1 to 3 Hours.
Elementary technique for majors with emphasis on a conceptual understanding of movement principles and the development of technical skill and performance sensitivity. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor.
DANC 166  Beginning Ballet Tech Core  credit: 1 or 2 Hours.
Elementary ballet for dance majors; emphasizes placement, refinement of adagio, pirouette, jumps, and connecting steps. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 167  Beginning Ballet Tech Elect  credit: 1 or 2 Hours.
Elementary ballet for dance majors; emphasizes placement, refinement of adagio, pirouette, jumps, and connecting steps. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 9 hours.

DANC 200  Explore Music through Dance  credit: 3 Hours.
In-depth study of musical form, history, culture, and styles, taught from a physical learning, i.e., dance, perspective. Musical and dance forms will be studied across cultures and time periods, from both a technical and a cross-cultural perspective. Content will be delivered as a series of video lectures and performances, and online readings. Students will create movement studies that mirror the musical forms being analyzed, produce video documentation of these works, engage in peer review of other students' performance work, and complete exams that cover the cultural and historical aspects of the examples studied. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

DANC 209  Lyric Theatre Dance  credit: 2 Hours.
Designed for Lyric Theatre Students, this course will introduce a broad variety of movement techniques used in the collaborative singing-acting industry. Through integrative cognitive and physical instruction, students will learn to optimize kinesthetic awareness, expressiveness, breath control, and governance of the singing actors' physical instrument. Classes will include: physical exercises and improvisations, group collaborations, and analysis of movement choices in theatrical performances. Dance styles ranging from Baroque opera and ballroom dance forms to contemporary musical theatre will be covered within this course. May be repeated once in separate semesters. Prerequisite: For Dance or Lyric Theater majors only or by consent of the instructor.

DANC 210  Int Jazz Technique  credit: 1 Hour.
Introduction to basic dance techniques and stylistic work in the jazz idiom for experienced dancers. Emphasis on a conceptual understanding of jazz style (as related to America's own cultural diversity) and the development of the specific skills necessary for performance and teaching. May be repeated to a maximum of 2 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 211  Int Hip Hop Technique  credit: 1 Hour.
Hip-Hop dance technique will consist of the study and practice of Urban dance forms grounded in hip-hop culture. Students will explore the multiple dimensions of hip-hop dance as they train in the fundamentals of each form, learn its respective historical context, and access ways of incorporating individual ideas and lived experiences into their dancing. May be repeated in separate terms for a maximum of 8 hours. Prerequisite: For majors only.

DANC 212  Musical Theater Dance  credit: 1 Hour.
Introduction to basic dance techniques and stylistic work in the Musical Theater idiom for experienced dancers. Emphasis is on a physical and conceptual understanding of a variety of Musical Theater styles as related to America's own cultural diversity and the development of the specific skills necessary for performance and teaching. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Audition required. Primarily for Dance and Music Majors with a Concentration in Lyric Theater. Students with sufficient skills from other majors may be accepted with approval from instructor.

DANC 215  Int Tap Dance Technique  credit: 1 Hour.
Introduction to basic tap technique for experienced dancers. Emphasis on a conceptual understanding of tap style and the development of the specific skills necessary for performance and teaching. May be repeated to a maximum of 2 hours. Prerequisite: Major standing in Dance, or consent of instructor.

DANC 220  Perf Pract Student Works I  credit: .5 to 2 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision. Approved for S/U grading only. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 221  Performance in Grad Thesis I  credit: .5 to 3 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision performed in MFA Thesis concert. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 222  Perf Pract November I  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in November Dance. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 223  Perf Pract February I  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in February Dance. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 231  Production Practicum II  credit: 1 or 2 Hours.
Practical experience in the production of dance concerts mounted in the Krannert Center for the Performing Arts. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term).

DANC 232  Repertory Company  credit: 2 Hours.
Provides dance majors with diverse performing experiences in the community. Venues will include area schools, nursing homes, and special populations. Students will participate in the creation of lecture-demonstrations which may include improvisation and choreography. Participation in all performances is a requirement. May be repeated to a maximum of 6 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 240  Dance History  credit: 3 Hours.
Introduction to major artistic movements in dance history from ancient Greece through the 20th century. Goal of the course is to gain a broad understanding of dance in relation to socio-political ideologies of gender, race, sexuality, and national identities. Prerequisite: Major standing in Dance or consent of instructor.
DANC 245  Introduction to Somatics  credit: 1 Hour.
Introduction to the basic concepts and principles of somatic practices, or body-mind disciplines, as related to dance. Through reading, writing, and experiential work, students will learn basic tenets of a number of somatic practices such as Ideokinesis and Imagery, Body-Mind Centering, The Alexander Technique, Bartenieff Fundamentals, and the Feldenkrais Method. Exploration of the ways in which somatics has helped to shape current dance training practices by looking at common themes and distinguishing features of these modalities.

DANC 259  Contact Improv for Act/Mus/Dan  credit: 1 Hour.
In this interdisciplinary course, performing arts students learn physical skills necessary for the practice of the contact improvisation (CI) partnering dance form as well as improvisational and performance skills. Encourages contemplation of the broader philosophical implications inherent in the form: community building and accepting difference. Content includes visits to lectures and events outside the Dance Department. May be repeated in separate terms to a maximum of 4 hours.

DANC 260  Int Contemp Modern Tech Core  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 160 and DANC 161, with emphasis on the qualitative and definitive performance of a variety of technical styles. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 160; or consent of instructor.

DANC 261  Int Contemp Modern Tech Elect  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 160 and DANC 161, with emphasis on the qualitative and definitive performance of a variety of technical styles. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 160; or consent of instructor.

DANC 262  Choreographic Process I  credit: 2 Hours.
Theory and practice in principles of dance composition; emphasis on solo creative work using various approaches to composition. Prerequisite: DANC 259 or consent of instructor. Limited to dance majors.

DANC 266  Intermediate Ballet Tech Core  credit: 1 or 2 Hours.
Intermediate ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 166 and DANC 167, with emphasis on technical development and extended movement combinations. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 166 or DANC 167; or consent of instructor.

DANC 267  Intermediate Ballet Tech Elect  credit: 1 or 2 Hours.
Intermediate ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 166 and DANC 167, with emphasis on technical development and extended movement combinations. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 166 or DANC 167; or consent of instructor.

DANC 268  Music Theory for Dancers  credit: 3 Hours.
Introduction to basic music theory with a concentration on rhythm. The first half of the term will concentrate on 1) learning, understanding, and being conversant in basic music parameters; 2) analytical listening; 3) notation; 4) transcripts; 5) reading notation/following a score; 6) performance of simple rhythm patterns. The second half will deal with form and formal analysis as it relates to choreography, as well as more advanced parameters of music theory. Prerequisite: Major standing in Dance or consent of instructor.

DANC 301  Yoga Practicum for Dancers  credit: 1 Hour.
Introduces basic yoga asanas (postures) and brief overview of the 8-limb system of yoga. Focus will be on understanding correct alignment and developing inner awareness. Weekly home practice, journal, and discussions about yoga philosophy are required. May be repeated in separate terms to a maximum of 8 hours.

DANC 310  World Dance Forms  credit: 1 Hour.
Provides students with the physical study of various world dance forms. Topics reflect specializations of faculty, such as Capoeira, African dance, Balinese dance, and Chinese forms. May be repeated in the same term to a maximum of 2 hours. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.

DANC 330  Dance Documentation  credit: 1 Hour.
This is a hands-on course for students interested in exploring the relationship between dance and camera and the fundamentals of dance documentation. Using critical and experiential approach, we will explore the technical and artistic capabilities of mini-DV cameras and film-editing software to create dance performance documentation. Students will learn to execute clear and effective camerawork in relationship to dance performance, and to utilize editing software to most clearly display the artistic intent of the choreographers and directors. May be repeated up to 8 hours in separate terms. Prerequisite: For majors only, or by instructor approval.

DANC 331  Production Practicum III  credit: 1 or 2 Hours.
Practical experience in all aspects of the production of dance concerts mounted in the Krannert Center for the Performing Arts and within the Department of Dance. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term). Prerequisite: DANC 131, DANC 231 or equivalent, and consent of instructor.

DANC 340  Dancing Black Popular Culture  credit: 3 Hours.
Introduces students to black dance aesthetics and its interconnectedness with American popular culture. By exploring its cultural, political and historical roots, coupled with theoretical concepts of "the popular" and ties to the vernacular, the course will be organized around significant markers that have shaped black dance's development. Same as AFRO 340.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

DANC 345  Dance Anatomy and Kinesiology  credit: 3 Hours.
The study of the human and anatomy and kinesiology, specifically as applied to dance. The human musculoskeletal system, movement analysis, and conditioning principles are covered both theoretically and practically. This course satisfies the General Education Criteria for:
UIUC: Life Sciences

DANC 350  Creative Dance for Children  credit: 3 Hours.
Through lecture, discussion and practice, students develop skills to teach elements and concepts of dance to children ages 4-10. Course includes strategies for behavior and time management, spatial transitions, and how to organize and communicate creative concepts clearly and effectively. Students will observe master teaching and apply teaching techniques, acquire lesson plans that form the basis for a creative dance curriculum and the skills to implement them, and participate in all phases of a creative dance curriculum, including informal performance. Same as ARTE 350 and HDFS 361. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor.
DANC 360  Int/Adv Contemp Mod Tech Core credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 260 and DANC 261, with emphasis on virtuosity and versatility. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor; departmental placement.

DANC 361  Int/Adv Contemp Mod Tech Elect credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 260 and DANC 261, with emphasis on virtuosity and versatility. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor; departmental placement.

DANC 362  Choreographic Process II credit: 2 Hours.
Choreography for the experienced student; includes performance of at least one original work. May be repeated in separate terms to a maximum of 10 hours. Prerequisite: DANC 262 or consent of instructor.

DANC 363  Advanced Improvisation credit: 1 Hour.
Exploration of the physical skills and philosophical concepts at the base of improvisation practice. Students will develop individual and collective approaches to improvisatory structures, systems and performance contexts as well as look at the historical ways that improvisation has been used in contemporary performance. The course will culminate in performance in various public and private contexts. May be repeated in separate terms to a maximum of 4 credit hours.

DANC 366  Int/Adv Ballet Tech Core credit: 1 or 2 Hours.
Intermediate/Advanced ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 266 and DANC 267. For dancers of advanced technical level with the ability to execute the ballet vocabulary. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in dance or consent of instructor; or Departmental placement.

DANC 367  Int/Adv Ballet Tech Elect credit: 1 or 2 Hours.
Intermediate/Advanced ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 266 and DANC 267. For dancers of advanced technical level with the ability to execute the ballet vocabulary. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in dance or consent of instructor; or Departmental placement.

DANC 375  Production in Dance credit: 1 Hour.
Examines the theoretical and practical aspects of dance production. Includes lighting, costumes, scenery, props, audio, make-up, and management. Commitment outside of scheduled class includes participation in the production of the annual Senior Concert.

DANC 400  Viewing Dance credit: 1 Hour.
Overview of contemporary dance from the United States, Canada, and Europe focusing on the current works of significant emerging and established choreographers working in the field today. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only. May be repeated to a maximum of 4 hours.

DANC 401  Alexander Tech for Dancers credit: 1 Hour.
Introduces the Alexander Technique: a practical method for changing habitual movement patterns which interfere with coordination, ease, and efficiency of movement. The course focuses on learning the principles through hands-on work, readings, discussions, and application to dance. 1-3 individual lessons outside of class required per term. 1 undergraduate hour. 1 graduate hour. Prerequisite: Major standing in Dance or consent of instructor.

DANC 402  Alexander Technique Practicum credit: 1 or 3 Hours.
Facilitates conscious and reasoned control of the human organism as a psychophysical whole. Helps students recognize habits that constitute their daily activities and discard, through conscious control, those that impede open-minded enquiry and self-reliance. Through one-on-one work with certified teachers and trainees, students will learn to change habitual patterns of coordination. 1 undergraduate hour. 3 graduate hours. May be repeated in separate terms to a maximum of 8 undergraduate hours or 6 graduate hours.

DANC 410  Advanced Jazz Technique credit: 1 Hour.
Continuation of DANC 110, emphasizing the conceptual understanding of the jazz style and development of specific skills necessary for this idiom. No undergraduate credit. 1 graduate hour. May be repeated to a maximum of 4 hours. Prerequisite: Major standing in Dance or DANC 110 or equivalent and consent of instructor.

DANC 411  Adv Hip Hop Technique credit: 1 Hour.
Advanced Level Hip Hop Class. Hip-Hop dance technique will consist of the study and practice of Urban dance forms grounded in hip-hop culture. Students will explore the multiple dimensions of hip-hop dance as they train in the fundamentals of each form, learn its respective historical context, and access ways of incorporating individual ideas and lived experiences into their dancing. No undergraduate credit. 1 graduate credit. May be repeated in separate terms up to 8 hours. Prerequisite: For majors only.

DANC 420  Perf Pract Student Works II credit: .5 to 2 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision. .5 to 2 undergraduate hours. .5 to 2 graduate hours. Approved for S/U grading only. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 421  Performance in Grad Thesis II credit: .5 to 3 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision performed in MFA Thesis concert. .5 to 3 undergraduate hours. .5 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 422  Perf Pract November II credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in November Dance. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 423  Perf Pract February II credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in February Dance. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 424  Collaborative Performance credit: 1 or 2 Hours.
COLAB is an interdisciplinary class fusing improvisation, composition and collaborative projects for students in the departments of Music, Dance and Engineering. The class will be run along the lines of a professional performance company. Work in class will include sharing and adapting the principles and elements from each of these disciplines with a focus on producing material that will be presented in numerous public performances throughout the semester. 1 undergraduate hour. 2 graduate hours. May be repeated to a maximum of 3 undergraduate hours or 6 graduate hours in separate terms. Prerequisite: DANC 162 or DANC 259 or consent of instructor.
DANC 425  Dance Internship  credit: 1 to 4 Hours.
Supervised field experience in community and/or professional organizations in a variety of danced-related areas. Provides students with work experience and exposure to professional situations. Written and/or video documentation and department presentation of internship activities required. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for S/U grading only. May be repeated to a maximum of 6 hours. Prerequisite: Major standing in Dance and consent of instructor.

DANC 431  Production Practicum IV  credit: 1 or 2 Hours.
Practical experience in all aspects of the production of dance concerts mounted in the Krannert Center for the Performing Arts and within the Department of Dance. 1 or 2 undergraduate hours. 1 or 2 graduate hours. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term). Prerequisite: DANC 231, or equivalent and consent of instructor.

DANC 441  Dance History Seminar  credit: 3 Hours.
Survey of critical approaches in dance studies including feminist theory, poststructuralist, and postcolonial theory, historiography, and ethnographic research methods. Course topics will cover a variety of theatrical, popular, and social dance practices. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours and 9 graduate hours. Prerequisite: DANC 240 or consent of instructor. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

DANC 445  Dance Kinesiology and Somatics  credit: 4 Hours.
Introduction to human anatomy and kinesiology, specifically as applied to dance; introduction to the field of Somatics; approaches to improving the use of the body; exploration of the connections between the body, the mind, and movement. 4 undergraduate hours. 4 graduate hours. Prerequisite: Major standing in dance or consent of instructor.

DANC 450  Teaching Workshop  credit: 3 Hours.
Methods and approaches to the teaching of dance technique in the modern, ballet, and jazz idioms. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing in Dance or consent of the instructor.

DANC 451  Ind Study and Special Topics  credit: 1 to 4 Hours.
Special projects in research or creative investigation taught on an individual or class basis. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 hours. Prerequisite: Junior standing in Dance and consent of instructor.

DANC 455  Supervised Teaching  credit: 1 to 4 Hours.
Practical teaching experience under the supervision of a faculty member; weekly conference devoted to evaluation and planning. Teaching areas include major and non-major university courses and classes for community adults and children. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 hours with approval.

DANC 459  Contact Improv Act/Mus/Dan II  credit: 1 or 2 Hours.
An interdisciplinary course in which performing arts students learn physical skills necessary for the practice of the contact improvisation (CI) partnering dance form as well as improvisational and performance skills. Encourages contemplation of the broader philosophical implications inherent in the form: community building and accepting difference. Content includes visits to lectures and events outside the dance department. 1 or 2 undergraduate hours. 1 or 2 graduate hours. May be repeated in separate terms to a maximum of 4 undergraduate hours or 6 graduate hours if topics vary.

DANC 460  Adv Contemp Modern Tech Core  credit: 1 to 3 Hours.
Modern technique for advanced graduate students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor; or departmental placement.

DANC 461  Adv Contemp Modern Tech Elect  credit: 1 to 3 Hours.
Modern technique for advanced graduate students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor; or departmental placement.

DANC 462  Composition Workshop  credit: 2 Hours.
Structured creative utilization of formal choreographic elements in the creation, rehearsal, staging, and performance of original dance works. 2 undergraduate hours. 2 graduate hours. Approved for S/U grading only. Prerequisite: Graduate standing in dance or consent of instructor.

DANC 464  Composer-Chor Workshop  credit: 2 Hours.
For experienced composers and choreographers; explores the many relationships between musical composition and choreography. Same as MUS 471. 2 undergraduate hours. 2 graduate hours. Prerequisite: For dance majors, DANC 263 or consent of instructor; for music majors, MUS 106 or equivalent, other compositional experience, and consent of instructor.

DANC 465  Screendance  credit: 3 Hours.
Provides a comprehensive approach, from camera use to editing techniques, leading to a practical ability to develop and produce video projects on a basic level. Course focuses on developing choreographic projects designed specifically for the video/film format. 3 undergraduate hours. 3 graduate hours. Prerequisite: DANC 330. Non-dance majors admitted by audition on a space-available basis.

DANC 466  Advanced Ballet Tech Core  credit: 1 to 3 Hours.
Ballet for advanced students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor or departmental placement.

DANC 467  Advanced Ballet Tech Elect  credit: 1 to 3 Hours.
Ballet for advanced students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor or departmental placement.

DANC 495  Senior Career Seminar  credit: 1 Hour.
Addresses survival strategies and the transition from academic to the profession. Course content includes research and discussion of career possibilities in performance, choreography, teaching, community dance work, therapy, and the dance-related fields of health/fitness/recreation. Students will research individualized projects in an area of interest. 1 undergraduate hour. No graduate credit. Prerequisite: Senior standing in Dance.

DANC 497  BA Capstone Project  credit: 3 Hours.
The BA Capstone Project is a synthesis of dance studies with the student's selected focused area of study (focused electives, dual major, or minor), which results in a culminating presentation, performance, and/or written project. 3 undergraduate hours. No graduate credit. Approved for S/U grading only. Prerequisite: BA in Dance majors only, senior standing required.
DANC 498  Senior Thesis Production  credit: 1 or 2 Hours.
The planning, design, and production of the Senior Capstone Project (DANC 499) for public performance. Students will work as a team to plan the Senior Concerts including designing and producing promotional materials and managing technical rehearsals and performances. 1 or 2 undergraduate hours. No graduate credit. May be repeated in separate terms. Prerequisites: DANC 375. Concurrent enrollment in DANC 499 is required.

DANC 499  Senior Thesis Project  credit: 1 to 2 Hours.
The creation of a culminating choreographic/performance project. 1 to 2 undergraduate hours. No graduate credit. Approved for S/U grading only. May be repeated to a maximum of 2 hours. Prerequisite: DANC 362 and senior standing in Dance. Concurrent enrollment in DANC 498 is required.

Bachelor of Arts in Dance

Students in the BA in Dance must complete the Common Requirements (p. 254) and the courses listed below; a minimum of 120 hours is required for this degree.

### Electives as needed to reach a minimum of 130 hours

- A maximum of 16 hours may be accumulated toward degree requirements in DANC 220, DANC 221, DANC 222, DANC 223, DANC 420, DANC 421, DANC 422, DANC 423.
- A minimum of 6 - 9 hours must be taken in the area of professional electives, to bring total of Dance courses to 84 hours. It is strongly recommended that dance majors consider taking theatre/arts courses outside of the Department of Dance offerings.

### Landscape Architecture, Department of

William C. Sullivan, Head of Department
101 Temple Hoyne Buell Hall, 611 East Lorado Taft Drive, Champaign
PH: (217) 333-0176
http://landarch.illinois.edu

Email: landdept@illinois.edu (LANDept@illinois.edu)
101 Temple Hoyne Buell Hall
611 East Lorado Taft Drive
The Department of Landscape Architecture offers a four-plus-year undergraduate curriculum, leading to the professional degree of Bachelor of Landscape Architecture as well as a minor in Landscape Studies. The degree is accredited by the Landscape Architecture Accreditation Board (LAAB).

The curriculum is a balanced program of technical, design, and general education courses that prepare the student with the necessary skills for entry-level professional practice in private offices or public agencies. Program requirements include design studio courses and classes in construction, plants, history, and design communication. Following the third year, students complete a professional internship to further advance their knowledge of built landscapes and the practice of landscape architecture. The curriculum also includes a minimum of 12 hours of credit in supporting electives that are taken in related art and science courses. A total of 124 semester hours of credit is required for graduation.

Bachelor of Landscape Architecture
A student must have and maintain a minimum 2.00 cumulative grade point average.

University of Illinois transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.0 (A = 4.0). Transfer students from other institutions must have earned a GPA of at least 2.5 (A = 4.0). Prerequisite credits in composition and pre-calculus are required. Courses in physical geography and plant or environmental biology are highly recommended.

The department’s administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The sophomore studio is located in Mumford Hall.

Information listed in this catalog is current as of 03/2017

1. IB 103 or IB 105 and GEOG/100, GEOL 103 fulfill the natural sciences and technology general education requirements for this curriculum.
Landscape Studies Minor

The Minor in Landscape Studies enables students to gain considerable knowledge of the ecological, social, cultural and historical factors that have shaped landscapes of the western and non-western world. Students interested in integrative studies of the natural, cultural and built environment, and those concerned with landscape as context for art and design, will develop a comprehensive theoretical framework for work in their major field of study.

Course Requirements

A minimum of 17 credit hours from the following three categories is required for completion of the minor. A minimum of 6 hours at the 300-level is required.

Studies of the Professions Engaged in Landscape Inquiry

LA 101 Introduction to Landscape Arch credit: 2 Hours.

Studies of the Professions Engaged in Landscape Inquiry

Select a minimum of 6 hours from the following:

LA 212 Water and Society
LA 250 Environmental Site Analysis
LA 270 Behavioral Factors in Design
LA 370 Environmental Sustainability

Study of Historical and Cultural Landscapes

Select a minimum of 9 hours from the following:

LA 218 S Asian Cultural Landscapes
LA 220 Exploring African Cities
LA 221 History of the Prison
LA 222 Islamic Gardens & Architecture
LA 242 Nature and American Culture
LA 314 History of World Landscapes
LA 315 History of Modern Landscape Arch
LA 390 Independent Study
LA 427 Amer Vernacular Cultural Land
LA 470 Social/Cultural Design Issues

Students are permitted to substitute one Landscape Architecture course from category 3 for one of the courses in category 2 upon the approval of the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Admission

University of Illinois students with a minimum GPA of 2.0 and completion of the campus Composition I and Quantitative Reasoning I requirements are eligible for admission. Applicants from other institutions must have a minimum GPA of 2.5. Students must declare their intentions and be admitted to the program by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Prerequisites

Students must comply with any prerequisite requirements of courses to be taken under this program.

Advising

Advising of students in the minor will be conducted by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Certification of Successful Completion

Completion of the Minor in Landscape Studies will be certified by the student’s home college office.

Courses

LA 101 Introduction to Landscape Arch credit: 2 Hours.

LA 199 Undergraduate Open Seminar credit: 1 to 5 Hours.

LA 212 Water and Society credit: 3 Hours.

LA 218 S Asian Cultural Landscapes credit: 3 Hours.

LA 220 Exploring African Cities credit: 3 Hours.

LA 221 History of the Prison credit: 3 Hours.

LA 250 Environmental Site Analysis credit: 3 Hours.

LA 270 Behavioral Factors in Design credit: 3 Hours.

LA 314 History of World Landscapes credit: 3 Hours.

LA 315 History of Modern Landscape Arch credit: 3 Hours.

LA 390 Independent Study credit: 3 Hours.

LA 427 Amer Vernacular Cultural Land credit: 3 Hours.

LA 470 Social/Cultural Design Issues credit: 3 Hours.
LA 221 History of the Prison credit: 3 Hours.
History of prison architecture, landscapes, and carceral regimes from ancient times until the present. Topics include: philosophy of punishment, the invention of the modern prison, the advent of mass incarceration, and 21st century geographies of incarceration. The course focuses on the western experience, but also includes international examples, e.g. from China, East Africa, and Japan. Interdisciplinary approach includes readings in architectural history, urban planning, sociology, philosophy, psychology, history, and landscape studies. Same as AFRO 221 and HIST 219.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Western Compartv Cult

LA 222 Islamic Gardens & Architecture credit: 3 Hours.
Study of the formation, history, and meaning of the landscape and architecture of the Islamic world. Same as ARCH 222.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Non-Western Cultures

LA 233 Foundation Design Studio credit: 5 Hours.
Introduction to the fundamentals of design, including studies in two- and three-dimensional abstract and applied problems, basic elements and procedures of design, and principles of landscape composition. Additional fees may apply. See Class Schedule. Open to Landscape Architecture majors only. Prerequisite: Credit or concurrent registration in LA 280 or consent of instructor.

LA 234 Site Design Studio credit: 5 Hours.
Site as the fundamental unit of landscape design. Involves ecological, cultural and experiential understanding of sites, and the creation of place-specific designs. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: LA 233 or consent of instructor.

LA 241 Landform Design & Construction credit: 3 Hours.
Introduction to landform design, drainage, stormwater management, surveying, and materials. Prerequisite: MATH 014 or 016.

LA 242 Nature and American Culture credit: 3 Hours.
Same as HIST 282, RST 242, and NRES 242. See RST 242. This course satisfies the General Education Criteria for:
UIUC: Western Compartv Cult

LA 250 Environmental Site Analysis credit: 3 Hours.
Principles and practices of identifying, analyzing, and recording landscape resources. Field trip required. Prerequisite: GEOL 100, 101, 103 or GEOG 103 or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

LA 270 Behavioral Factors in Design credit: 3 Hours.
Introduces the impacts of cultural and social factors, such as age, gender, physical ability, economic status, ethnicity and how people interact with the environment. Reading assignments, short exercises, field trips, and evaluation of space will enable students to evaluate and potentially design more socially and ecologically responsive environments.

LA 280 Design Communications I credit: 3 Hours.
Fundamentals of visual communication in the design process and presentation for landscape architecture. Includes freehand and constructed drawing, color, media, and models. Open to Landscape Architecture majors only. Prerequisite: Concurrent registration in LA 233.

LA 281 Design Communications II credit: 3 Hours.
Advanced principles and techniques of visual communication in landscape architectural rendering, emphasizing computer-based techniques. Open to Landscape Architecture majors only. Prerequisite: Concurrent registration in LA 234; completion of LA 280 and completion of campus Composition I general education requirement or consent of instructor.

LA 301 Senior Honors credit: 1 to 6 Hours.
Independent guided study and research in a selected area of landscape architecture; for candidates for honors in landscape architecture. May be repeated to a maximum of 9 hours. Prerequisite: Senior standing in landscape architecture, a university grade-point average of 3.0, and consent of head of department.

LA 314 History of World Landscapes credit: 4 Hours.
Analysis of the development of landscape architecture as a result of environmental and cultural influences. Same as ARCH 314. This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: HistPhilosoph Perspect
UIUC: Western Compartv Cult

LA 315 History of Modern Landscape Arch credit: 3 Hours.
A selected overview of developments in landscape architecture in the western world from 1900 to the present. Prerequisite: LA 314.

LA 335 Community & Open Space Studio credit: 5 Hours.
Development of design solutions at site and master plan scale relative to community, urban and open space problems; emphasizes development of analysis and design techniques to integrate physical context of place with social context. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: LA 234 or consent of instructor.

LA 336 Design Workshop Studio I credit: 5 Hours.
Project design at various scales utilizing problems of a wide range of complexity and subject matter; rural, community, and urban problems, housing, recreation, and natural areas; emphasizes problem analysis and generation of innovative design alternatives. Students select from several sections depending on specific interests. Additional fees may apply. See Class Schedule. Prerequisite: LA 335 or consent of instructor.

LA 342 Site Engineering credit: 4 Hours.
Principles of site engineering including landform design, stormwater management, site surveying, circulation systems and site utility planning. Prerequisite: LA 241 and college trigonometry, or consent of instructor.

LA 343 Landscape Construction credit: 4 Hours.
Construction methods, materials, and procedures related to the design of landscape structures; development of design details and cost estimating. Prerequisite: LA 342 or consent of instructor.

LA 345 Professional Internship credit: 0 to 10 Hours.
Professionally supervised field experience in design offices and public agencies intended to introduce students to practice. Students work in the department-approved firm or agency of their choice. Seventy five hours of employment is required for each one hour of course credit. Approved for S/U grading only. May be repeated to a maximum of 10 hours. Prerequisite: Upper division undergraduate standing or consent of instructor.

LA 346 Professional Practice credit: 2 Hours.
Study of the profession of landscape architecture including an introduction to modes of practice, career evolution, organizational theory, office procedures, project management and professional ethics. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing or consent of instructor.
LA 370  Environmental Sustainability  credit: 3 Hours.
Explores the challenges of creating a sustainable world. Examines: a) trends and conditions of the earth’s major ecosystems, b) ways in which our economic system has created levels of consumption that threaten sustainability, c) the extent to which equity and justice contribute to sustainable systems, and d) evidence demonstrating how human creativity and innovation can create a more sustainable world. Same as ENSU 300 and NRES 370.

LA 390  Independent Study  credit: 1 to 6 Hours.
Supervised independent study, research, or special project in a selected area related to landscape architecture. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; consent of instructor and head of department prior to advance enrollment and registration.

LA 399  Off-Campus Study  credit: 0 to 15 Hours.
Provides campus credit for off-campus study. Approved for letter and S/U grading. (Summer session, 0 to 6 undergraduate hours). Final determination of appropriate credit is made by a faculty review committee upon completion of the student’s work. Maximum credit, 15 hours (summer session, 6 hours), all of which must be earned within one term. Prerequisite: Junior standing; prior review and approval of the student’s written proposal by a faculty committee and the department head.

LA 427  Amer Vernacular Cultural Land  credit: 4 Hours.
Focuses on vernacular structures in the cultural landscape, especially common houses, barns, and commercial and industrial structures; examines origin and geographical diffusion of vernacular architecture in the United States. 4 undergraduate hours. 4 graduate hours.

LA 430  Children and Nature  credit: 2 Hours.
Same as HORT 430. See HORT 430.

LA 437  Regional Design Studio  credit: 5 Hours.
Ecological design and planning studio emphasizing team approaches to design development and evaluation using current human and environmental research results. Projects require field work, analysis, problem-solving, and advanced design and presentation products. 5 undergraduate hours. 5 graduate hours. Prerequisite: LA 336 or consent of instructor.

LA 438  Design Workshop Studio II  credit: 3 to 6 Hours.
Project design at various scales utilizing problems of a wide range of complexity and subject matter; rural, community, and urban problems, housing, recreation, and natural areas; and emphasizes problem analysis and generation of innovative design alternatives. The student selects from several sections depending on specific interests. Additional fees may apply. See Class Schedule. 5 undergraduate hours. 3 to 6 graduate hours. May be repeated. Prerequisite: LA 336 or consent of instructor.

LA 441  Land Resource Evaluation  credit: 4 Hours.
Examines concepts for the value of land, land resource problems and policy responses, methods for evaluating land resource development and policy alternatives, and case studies of land resource evaluation. Same as UP 441. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate standing or consent of instructor.

LA 450  Ecology for Land Restoration  credit: 4 Hours.
Ecological implications of alternative land use patterns; equipment, field techniques, and nomenclature in current use by environmental consultants; and elements of a baseline ecosystem study. 4 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

LA 452  Natural Precedent in Planting  credit: 3 Hours.
Biogeography; identification of native species, uses of native plants in the landscape; and restoration and planting design projects. Field trips required. 3 graduate hours. Prerequisite: Consent of instructor.

LA 453  Cultural Precedent in Planting  credit: 3 Hours.
Planting design issues; historic precedent and contemporary comprehensive design projects; management practices; technical documents; and plant use and identification. Field trips required. 3 graduate hours. Prerequisite: LA 452.

LA 454  Landscape Archaeology  credit: 3 or 4 Hours.
Same as ANTH 453. See ANTH 453.

LA 460  Heritage Management  credit: 3 or 4 Hours.
Same as ANTH 460 and RST 459. See ANTH 460.

LA 466  Energy, Plng & Blt Environment  credit: 4 Hours.
Same as UP 466. See UP 466.

LA 470  Social/Cultural Design Issues  credit: 3 Hours.
Critical discussion of notions and theories pertaining to the reciprocal effects of landscape architectural design and human behavior. 3 undergraduate hours. 3 graduate hours.

LA 472  Museum Theory and Practice  credit: 3 or 4 Hours.
Same as ANTH 462 and ARTH 462. See ANTH 462.

LA 480  Sustainable Design Principles  credit: 2 Hours.
Introduction to key concepts for the sustainable design of buildings and landscapes, including concepts that form the core of the U.S Green Building Council rating system (LEED). Introduction to LEED accreditation. Same as UP 480. 2 undergraduate hours. 2 graduate hours.

Music, School of

Professor Jeffrey Magee
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 244-2676
http://www.music.illinois.edu

2040 Music Building
1114 West Nevada Street
Urbana, IL 61801
(217) 333-2620

The School of Music occupies the Music Building, Smith Memorial Hall, Harding Band Building, Music Annex, and space in the Krannert Center for the Performing Arts. These facilities include faculty studios, classrooms, and practice and rehearsal rooms; experimental electronic music, computer music, digital piano, two computer-assisted music instruction laboratories, and jazz multimedia practice rooms; and musical instruments, audio equipment, and several auditoriums used for concert, recital, opera, and musical theatre performances. The Music and Performing Arts Library boasts comprehensive holdings in Theatre and Dance, as well as one of the largest collections of music items in America.

The faculty and students of the school present more than 1,000 concerts, recitals, and stage performances throughout the year, both on and off campus. In addition, visiting artists and scholars from throughout the world present master classes and lectures that complement the concert and academic offerings provided on the Urbana-Champaign campus.
The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

The School offers two professional undergraduate degrees: the Bachelor of Music and the Bachelor of Music Education. Undergraduate students whose musical interests are in the broad historical, cultural, and theoretical aspects of music (rather than professional training) pursue the Bachelor of Arts in Music degree, also offered by the School of Music. Graduate degrees are offered in a variety of fields of study in music at the master’s and doctoral levels. The School also offers a post-Master’s Artist Diploma degree.

Bands, choral ensembles, orchestras, jazz bands, new music ensembles, world music ensembles, lyric theatre (opera and musical theatre), and many other musical organizations are open by audition to music and non-music majors and members of the university and civic communities. Private lessons and courses in music history, world music, jazz history, theory, and music appreciation are open to all qualified students in the University. A minor in music for non-music majors is also available.

Admission to all School of Music degree programs is based on a composite review of both School of Music and University applications. For those degrees which require an audition, on-campus auditions are preferred, but taped auditions are acceptable under certain circumstances. In addition, applicants for music composition, music technology, and musicology majors must submit original scores or other pertinent writings or projects to substantiate their ability to pursue work in these areas. Applicants in music education, composition, musicology, open studies, and the Bachelor of Arts in Music must also complete an interview with faculty in those respective areas.

For complete information concerning audition schedules, special admission requirements, and curricula (including a minor in music), prospective students should visit the School’s web site (http://www.music.illinois.edu) or contact the Music Admissions Office, School of Music, 1114 West Nevada Street, Room 2014, Urbana IL 61801. Phone: (217) 244-7899 | Email: musicadmissions@illinois.edu.

Bachelor of Arts with a Major in Music (p. 281)

Bachelor of Music Education (p. 283)

Bachelor of Music Specific Majors:
- Instrumental Performance Music (p. 282)
- Music Composition-Theory (p. 283)
- Musicology (p. 286)
- Vocal Performance (p. 287)
- Jazz Performance (p. 282)
- Open Studies (p. 286)

Curricula

For the Degree of Bachelor of Music

This degree requires 130 semester hours of credit for graduation.

Public performance is an integral part of the training in applied music, and all students, when sufficiently prepared, are required to participate in student recitals.

All students pursuing this degree are required to successfully complete at least one course in conducting (normally MUS 242) and must demonstrate keyboard competency by examination at the outset of their matriculation, or by enrolling in MUS 172 and/or MUS 173; keyboard performance majors must demonstrate competency by successfully completing MUS 454.

Foreign language study may be required according to the major chosen, experience in or study of languages prior to matriculation, and/or the results of language placement tests at the University.

For a semester-by-semester sequential listing of classes a student might take during a four-year course of study, please consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate).

Students majoring in music should meet with their adviser at least once per semester and consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate), for clarification and explanations concerning the Bachelor of Music majors.

Common Requirements for all Bachelor of Music Degrees

Students in the School of Music must complete the Campus General Education requirements. Some Music courses apply toward the General Education requirements.

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2. Woodwind and percussion majors complete 32 hours; string majors complete 26 hours; brass and voice majors complete 24 hours; jazz, musicology, and composition-theory majors complete 16 hours; and open studies majors complete a minimum of 12 hours.

3. Students majoring in instrumental or vocal performance are required to study a minor instrument or voice for a minimum of eight semester hours. Piano majors are required to complete only six hours of minor applied music.

4. All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. Jazz Performance majors must enroll in MUS 266.

5. Music Majors must demonstrate keyboard competency by examination at the outset of their matriculation or by enrolling in MUS 172 and MUS 173. Keyboard performance majors demonstrate keyboard competency by successfully completing MUS 454.

Minor in Music

The School of Music offers non-music majors an exposure to music through courses in musicology and ethnomusicology, music theory, music composition, music technology, jazz history and studies, and performance studies (through applied lessons and ensemble). The Music Minor is intended for student musicians with previously established, fundamental musical experiences - individuals who wish to expand upon already obtained musical skills and related study - and is not intended to be an introduction to music.

Admission to the Music Minor

Prospective Music Minors must apply for acceptance into the program. For more information, please see https://my.faa.illinois.edu/gradstat/login.asp, or contact the Music Admissions Office (musicadmissions@illinois.edu) (in Music Building Room 2018) for general instructions on how to apply for the minor.

Course Requirements

The Music Minor requires the successful completion of 21 semester hours of courses in music according to the following distribution:

1. Six to eight (6-8) credit hours in music core coursework, including either four (4) credits in Music Theory and Practice I and II (MUS 101 and MUS 102) or six (6) credits in Rudiments of Music Theory I and II (MUS 103 and MUS 104), plus two (2) credits in Introduction to Art Music (MUS 110);
2. At least six credit hours must derive from upper division or advanced music courses. This includes MUS 313 and MUS 314 (which also serve as General Education courses), or any other MUS 300-or 400-level music course with instructor approval;
3. Additional music elective credit hours may include private lessons (applied lessons) pending successful completion of an audition with the appropriate music professor and availability of teaching staff;
4. Up to three (3) credit hours of ensembles may be used for electives and can be selected from MUS 250, MUS 252-MUS 257, MUS 260-MUS 272;
5. Topics offered under MUS 199 or MUS 499 must be approved for credit toward by the music minor advisor.

1. MUS 101 and MUS 102 are two (2) credits each. MUS 103 and MUS 104 are three (3) credits each. You cannot mix and match courses: MUS 101 and MUS 102 are paired together; MUS 103 and MUS 104 are paired together.
2. 300-level courses open to Music Minors include MUS 313, MUS 314, MUS 317, MUS 339, and MUS 360-369.
3. MUS 400 and MUS 408 will be open only to Music Minors who have taken and passed MUS 201 and MUS 202.
4. Courses in the MUS 410-421 series will be open only to Music Minors who have taken and passed either MUS 313 or MUS 314; courses will be selected in consultation with the Music Minor advisor in accordance with their interests. Music Minors must obtain instructor permission to register for any course in the 410-421 series.
5. This includes both MUS 462-463 (Jazz Listening Seminar I and II) and MUS 464-465 (Jazz History I and II).
6. Students must audition, be accepted into a studio, and pay a nominal fee for applied lessons.

MUS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/MUS)

Courses

MUS 090 Seminar in Music Education credit: 0 Hours.
Seminar for students preparing to enter student teaching. Students should enroll in the semester prior to student teaching. Approved for letter and S/U grading. Prerequisite: Music education majors or consent of instructor.

MUS 101 Music Theory and Practice I credit: 2 Hours.
Fundamental theory including terminology and notation; visual analysis of music elements, procedures, and forms; written applications in short projects. Credit is not given for both MUS 101 and MUS 103. Prerequisite: Placement by examination.
MUS 102  Music Theory and Practice II  credit: 2 Hours.
Continuation of MUS 101. Credit is not given for both MUS 102 and MUS 104. Prerequisite: MUS 101 or placement by examination.

MUS 103  Rudiments of Music Theory I  credit: 3 Hours.
Introduces non-music majors to basic terminology, technology, notation and concepts of music, with a co-emphasis on digital audio. Credit is not given for both MUS 103 and MUS 101.

MUS 104  Rudiments of Music Theory II  credit: 3 Hours.
Continuation of MUS 103. Includes study of modulation, harmonic analysis and practice. To be taken with MUS 181. Prerequisite: Freshman year standing in music or consent of instructor.

MUS 105  Computation and Music I  credit: 2 Hours.
Applies foundational concepts in computer science to the composition and analysis of symbolic music information. Course proceeds in parallel with CS 125 (Introduction to Computer Science) and MUS 101 (Music Theory and Practice I) to integrate key CS techniques with music concepts. Course is run as a workshop presenting eight large programming projects in which students design and implement software systems that analyze and compose musical scores in different formats. Prerequisite: Concurrent enrollment with CS 125 and MUS 101. Restricted to entering CS+Music students and Music Technology students with strong programming experience, or consent of the instructor.

MUS 106  Beginning Composition  credit: 2 Hours.
Class instruction in contemporary compositional practice at the beginning stages. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor on the basis of a student portfolio of composition submitted to the composition-theory faculty and accepted after evaluation.

MUS 107  Aural Skills I  credit: 2 Hours.
Beginning aural skills training in the areas of intervals, scales, chords, rhythm, melody, and harmony.

MUS 108  Aural Skills II  credit: 2 Hours.
Continuation of aural skills training from MUS 107. Development of perception, notational, and listening skills in the areas of rhythm, melody, harmony, counterpoint, and formal aspects of musical structure; emphasizes tonal pitch structures. Prerequisite: MUS 101 and MUS 107, or placement by examination.

MUS 110  Intro Art Mus: Int'l Perspect  credit: 2 Hours.
Surveys the history of European and American art music in an international context; examines major artistic styles, representative composers and works, and their relationship to pertinent non-western musical traditions and philosophies; reviews fundamental music concepts; strengthens aural analytical skills; familiarizes students with the music library, and research and writing techniques. Prerequisite: First year standing in music or consent of instructor.

MUS 120  English Diction  credit: 1 Hour.
Phonetics applied to English song literature; individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Freshman standing in voice or consent of instructor.

MUS 121  Italian Diction  credit: 1 Hour.
Phonetics applied to Italian song literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Freshman standing in voice or consent of instructor.

MUS 122  German Diction  credit: 1 Hour.
German pronunciation applied to German vocal literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Sophomore standing in voice or consent of instructor.

MUS 123  French Diction  credit: 1 Hour.
French pronunciation applied to French vocal literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: At least one semester of French or equivalent required, sophomore standing in voice, or consent of instructor.

MUS 125  English Diction and Dialects  credit: 1 Hour.
English Diction and Dialects introduces students to the variety of sounds of spoken English throughout the world. Coursework will include study of recorded resources, IPA (International Phonetic Alphabet) transcription, and performance of monologues, scenes, and musical numbers in a variety of dialects. Transcription will consist of both written IPA and imitative listening and speaking. Coursework will consist of in-class presentations, quizzes, transcriptions, and assessments of video and audio resources. Prerequisite: Restricted to students majoring in Music, or by consent of instructor.

MUS 130  Intro to the Art of Music  credit: 3 Hours.
Provides non-music majors with basic listening skills, the ability to discuss music intelligently, and an acquaintance with many types of music. Prerequisite: For non-music majors only. This course satisfies the General Education Criteria for: UIUC: Literature and the Arts
UIUC: Western Compartv Cult

MUS 132  Popular Music Studies  credit: 3 Hours.
Courses within this rubric provide an analytical and historical introduction to genres of popular music from the United States and around the world. Iterations of the course may focus on a specific genre, such as Rock, Reggae, or Afropop, or may deal with broader subjects, such as the continua of styles including R&B, Soul, Funk, and Hip Hop, or the pan-generic, international phenomenon of pop music globalization in the twentieth century.
This course satisfies the General Education Criteria for: UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

MUS 133  Introduction to World Music  credit: 3 Hours.
A survey of various musical traditions from different regions and peoples of the world.
This course satisfies the General Education Criteria for: UIUC: Literature and the Arts
UIUC: Non-Western Cultures

MUS 134  History of Musical Events  credit: 3 Hours.
Focuses on seminal performances of musical works such as, but not limited to, premiere performances and/or recordings. Prerequisite: For non-music majors only.
This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

MUS 140  String Instrument Class  credit: 2 Hours.
Class instruction to enable students to demonstrate proper technique and a characteristic sound on two bowed string instruments (violin or viola, and cello or double bass) in order to teach, via demonstration, beginning string students toward their maximum technical and musical development. May be repeated to a maximum of 4 hours. Prerequisite: For music education majors only, with two semesters required for music education string majors.
MUS 144  Supp WW Inst: Clarinet  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the clarinet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for woodwind majors in the BME instrumental concentration.

MUS 145  Supp WW Inst: Clar non-WW Maj  credit: 2 Hours.
Class instruction in the fundamentals of playing and teaching the clarinet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for non-woodwind majors in the BME instrumental concentration.

MUS 146  Supp WW Inst: Flute  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the flute. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 147  Supp WW Inst: Oboe  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the oboe. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Oriented for music majors in the BME instrumental concentration.

MUS 148  Supp WW Inst: Saxophone  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the saxophone. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Oriented for music majors in the BME instrumental concentration.

MUS 149  Supp WW Inst: Bassoon  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the bassoon. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Oriented for music majors in the BME instrumental concentration.

MUS 151  Supp Brass Inst: Trumpet  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the trumpet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for brass majors in the BME instrumental concentration.

MUS 152  Supp Br Inst: Tpt non-Br Maj  credit: 2 Hours.
Class instruction in the fundamentals of playing and teaching the trumpet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for non-brass majors in the BME instrumental concentration.

MUS 153  Supp Brass Inst: Horn  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the horn. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 154  Supp Brass Inst: Trombone  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the trombone. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 155  Supp Brass Inst: Euph/Tuba  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the euphonium and tuba. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 158  Supp Percussion Instruments  credit: 2 Hours.
Class instruction in the fundamentals of playing and teaching percussion instruments. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 160  Jazz Piano Improvisation I  credit: 2 Hours.
Study of jazz theory, harmony, and improvisational techniques at the piano; includes experience in solo and ensemble situations, and a historical survey of jazz development from about 1910. Prerequisite: Completion of MUS 174 or equivalent; MUS 202 and MUS 208 or equivalent; consent of instructor.

MUS 161  Jazz Piano Improvisation II  credit: 2 Hours.
Continuation of MUS 160. Study of jazz theory, harmony, and improvisational techniques at the piano; includes experience in solo and ensemble situations, and a historical survey of jazz development from about 1910. Prerequisite: MUS 160 or consent of instructor.

MUS 162  Jazz Keyboard Studies I  credit: 2 Hours.
Prepares the student (through class participation) to perform one jazz standard on a functional level. Includes basic technique, chord voicing, comping, and lead sheet realization with functional fluency in all keys. Furnishes the student with class instruction on piano, focusing on jazz and improvisational idioms. An in-depth study of overall instrument technique, eminent styles, and other performance practices relevant to jazz piano and improvisation. Prerequisite: MUS 172 and MUS 173, or consent of the instructor.

MUS 163  Jazz Keyboard Studies II  credit: 2 Hours.
Continuation of materials presented in MUS 162, focusing on improvisational idioms of jazz piano. Prepares the student (through class participation) to perform three jazz standards on a functional level. Emphasizes the blues form, minor II-V-I chord progressions with both hands, and introduces all major modes. Includes technique, chord voicing concepts, comping, and lead sheet realization with mid-level fluency in all keys. A continuing in-depth study of overall instrument technique, eminent styles, and other performance practices relevant to jazz piano and improvisation. Prerequisite: MUS 163, or placement exam, or consent of the instructor.

MUS 165  Applied Jazz Instruction  credit: 2 to 4 Hours.
Instruction at the undergraduate level in voice or instruments normally associated with the jazz idiom. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Successful performance audition for the jazz faculty.

MUS 166  Class Jazz Improvisation I  credit: 2 Hours.
Examines the dynamics of group improvisation at a fundamental level. Techniques of individual melodic development, group melodic development, and group contouring will be discussed and practiced. Requires preparation of group improvisations using the blues, a 32-bar song form, and a modal form, as well as class presentations and group demonstrations of basic group improvisational techniques.

MUS 167  Class Jazz Improvisation II  credit: 2 Hours.
Continues to examine the dynamics of group improvisation as presented in MUS 166. Discussion and practical application of techniques of individual melodic development, group melodic development, and group contouring. Requires preparation of group improvisations using blues, 32-bar song form, and free group improvising forms, as well as class presentations and group demonstrations of more advanced improvisational techniques. Prerequisite: MUS 166.

Information listed in this catalog is current as of 03/2017
MUS 169  Unit One Sem Instruct in Music  credit: 0 to 2 Hours.
Experimental seminar courses to introduce non-music majors to contemporary ideas in music. Approved for letter and S/U grading. May be repeated to a maximum of 4 hours. Prerequisite: For non-music majors only.

MUS 170  Grp Instr Pno NonMus Maj I  credit: 2 Hours.
Beginning piano for non-music majors. Includes fundamentals of reading, technique, and creative activities; study and performance of simple solo and ensemble repertoire.

MUS 171  Grp Instr Pno NonMus Maj II  credit: 2 Hours.
Continuation of basic skills presented in MUS 170. Elementary piano for non-music majors. Includes reading, technique, creative activities; simple solo and ensemble repertoire. Prerequisite: MUS 170 or equivalent.

MUS 172  Grp Instr Pno for Mus Major I  credit: 2 Hours.
Group instruction in beginning piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Study of simple piano literature, development of skills in technique, sight reading, harmonization, transposition, improvisation, and analysis. This is the first of two courses that addresses the keyboard competency policy for non-piano majors.

MUS 173  Grp Instr Pno for Mus Maj II  credit: 2 Hours.
Continuation of skills introduced in MUS 172. Group instruction in elementary piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Sight-reading, harmonization, transposition, and improvisation. Easy solos from the main historical periods with appropriate technical development; introduction to piano ensemble literature. This is the second of two courses that addresses the keyboard competency policy for non-piano majors. Prerequisite: MUS 101 and MUS 107; MUS 172 or equivalent; or consent of instructor.

MUS 174  Grp Instr Pno for Mus Maj III  credit: 2 Hours.
Continuation of skills introduced in MUS 173. Group instruction in intermediate piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Study of intermediate level solos and ensemble compositions, harmonization with chromatic chords, sight reading, transposition of four-voice works, improvisation, and learning of patriotic songs. Prerequisite: MUS 102 and MUS 108; MUS 173 or equivalent; or consent of instructor.

MUS 175  Grp Instr Pno for Mus Maj IV  credit: 2 Hours.
Continuation of skills introduced in MUS 174. Group instruction in moderately advanced piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Emphasis on solos, ensemble compositions, technical development, and more advanced work in sight reading, harmonization, improvisation, transposition, and aural skills. Prerequisite: MUS 201 and MUS 207; MUS 174 or equivalent; or consent of instructor.

MUS 178  Guitar  credit: 2 to 4 Hours.
Instruction in guitar at the undergraduate level, predominantly classical. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 179  Harpsichord  credit: 2 to 4 Hours.
Instruction in harpsichord at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 180  Piano  credit: 2 to 4 Hours.
Instruction in piano at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 181  Voice  credit: 2 to 3 Hours.
Instruction in voice at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 182  Organ  credit: 2 to 4 Hours.
Instruction in organ at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 183  Violin  credit: 2 to 4 Hours.
Instruction in violin at the undergraduate level. Music majors must register concurrently in MUS 250. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 184  Viola  credit: 2 to 4 Hours.
Instruction in viola at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course. Music majors must register concurrently in MUS 250.

MUS 185  Cello  credit: 2 to 4 Hours.
Instruction in cello at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course. Music majors must register concurrently in MUS 250.

MUS 186  Double Bass  credit: 2 to 4 Hours.
Instruction in double bass at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course. Music majors must register concurrently in MUS 250.

MUS 187  Harp  credit: 2 to 4 Hours.
Instruction in harp at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 188  Flute  credit: 2 to 4 Hours.
Instruction in flute at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 189  Clarinet  credit: 2 to 4 Hours.
Instruction in clarinet at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.
MUS 190  Oboe  credit: 2 to 4 Hours.
Instruction in oboe at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 191  Bassoon  credit: 2 to 4 Hours.
Instruction in bassoon at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 192  Saxophone  credit: 2 to 4 Hours.
Instruction in saxophone at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 193  Trumpet  credit: 2 to 4 Hours.
Instruction in trumpet at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 194  Horn  credit: 2 to 4 Hours.
Instruction in horn at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 195  Trombone  credit: 2 to 4 Hours.
Instruction in trombone at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 196  Euphonium  credit: 2 to 4 Hours.
Instruction in euphonium at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 197  Tuba  credit: 2 to 4 Hours.
Instruction in tuba at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 198  Percussion  credit: 2 to 4 Hours.
Instruction in percussion at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 12 hours.

MUS 201  Music Theory and Practice III  credit: 2 Hours.
Continuation of MUS 102. Gradually increased emphasis on contrapuntal techniques, dissonance in tonal music, and musical form. Prerequisite: MUS 102 and MUS 108, or placement by examination.

MUS 202  Music Theory and Practice IV  credit: 2 Hours.
Continuation of MUS 201. Study of twentieth century compositional methods. Prerequisite: MUS 201 and MUS 207, or placement by examination.

MUS 205  Computation and Music II  credit: 2 Hours.
A follow-up course to Computation and Music I that introduces students to programming music applications with special emphasis on issues related to real-time audio system design. The class will begin by introducing students to the fundamentals of real-time audio synthesis using a graphical audio language such as Max/MSP, and then turn to hands-on design of real-time audio systems using an industry standard language such as C++. The course content reinforces materials presented in CS 126 (Software Design), including GUI frameworks, prototyping, user interface design, code refactoring and debugging. Prerequisite: CS 125, CS 126, and MUS 101, or consent of instructor. Restricted to CS+Music students and Music Technology students with strong programming experience, or by consent of the instructor.

MUS 206  Intermediate Composition  credit: 2 Hours.
Class instruction in contemporary compositional practice at the secondary stages. May be repeated to a maximum of 6 hours. Prerequisite: MUS 106 and consent of composition-theory faculty.

MUS 207  Aural Skills III  credit: 2 Hours.
Continuation of MUS 108. Emphasis on extensions of tonality by means of changing tonal centers and altered chords. Prerequisite: MUS 102 and MUS 108, or placement by examination.

MUS 208  Aural Skills IV  credit: 1 Hour.
Continuation of MUS 207. Emphasis on atonal pitch structures and complex rhythmic organization. Prerequisite: MUS 201 and MUS 207, or placement by examination.

MUS 209  Music, Sound, Technology  credit: 3 Hours.
This course examines the role modern digital technology plays in musical performance, composition, listening, and analysis. The course is divided into three large subject areas each lasting approximately five weeks: (1) sound, sound fields, and digital recording, (2) digital technology in composition and performance, and (3) psychoacoustics and digitized music analysis. Within each subject area, students are first introduced to relevant acoustic and musical principles, then learn about their implementation in the digital domain, and lastly gain practical experience with the subject matter through hands-on projects involving the capture, creation, editing and analysis of musical sound using standard hardware and computer applications. Prerequisite: Restricted to Music Technology students, or by consent of instructor.

MUS 240  Orientation Mus Tchg Lrng K-HS  credit: 1 Hour.
Provides guided practice in observing music teaching and learning in large ensemble and classroom settings. Develops professional perspective and vocabulary for analyzing effective teaching, diverse learning styles, and patterns of music instruction in a variety of contexts. Includes 16 hours of early field experience. Must complete criminal background check prior to observing in schools. Prerequisite: Music education majors accepted into Teacher Certification Track.

MUS 241  Music for Elementary Teachers  credit: 2 Hours.
Introduces elementary education pre-service teachers to approaches for integrating music learning activities in kindergarten through grade six. Includes active engagement in music repertoire in various grades along with teaching suggestions, demonstration of instructional approaches used for teaching elementary general music, and strategies for integrating music into the K-6 curriculum. Students will attend at least one campus concert to extend their understanding and appreciation of music. Prerequisite: For non-music majors; music and music education majors may not receive credit for this course.

Information listed in this catalog is current as of 03/2017
MUS 242 Elements of Conducting  credit: 2 Hours.
Fundamental elements of conducting, score analysis and preparation, transcription and transposition for choral and instrumental ensembles. Focused on development of conducting skills appropriate for use in public school teaching. A special section is offered for music majors not majoring in music education. Prerequisite: Music majors or consent of instructor.

MUS 243 Introductory Music Ed Tech  credit: 2 Hours.
Overview and exploration of the ways that technology benefits music education. Opportunities for practical development of skills, work, and play with a variety of software and hardware, and group projects that tie multiple technologies together in larger curricular units. Recent research readings. Consideration of the appropriateness for technology with special learners, as well as in ensemble and early childhood settings. Prerequisite: Music education majors or consent of instructor.

MUS 244 Social Foundations of Music Ed  credit: 3 Hours.
Explores the social and cultural contexts of music teaching and learning from multiple perspectives. Examines contemporary and historical American music education philosophy, practice, and policy as well as music education's place within broader systems of education. Special emphasis will be placed on issues of cultural diversity and social justice and problematizing dominant narratives and potential assumptions relevant to music education. Employs scholarship within and beyond music education concerned with critical theories, history, philosophy, and sociology. Prerequisite: MUS 240 and completion of campus Composition I general education requirement. For music education majors only.

This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

MUS 250 University Orchestra  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 252 Ethnomusicology Perf Ensembles  credit: 1 Hour.
Instruction and experience in the performance of various non-Western and vernacular music traditions such as African mbira, Andean panpipes, North American string band, European traditional music, etc. Topics vary according to available instructors. May be repeated in the same or subsequent terms. Prerequisite: Consent of instructor.

MUS 253 Collegium Musicum  credit: 1 Hour.
Performs medieval, renaissance, and baroque music; various small groups formed for the performance of sonatas and cantatas of Bach and Handel, wind serenades of Mozart, etc. Interested students may play on lute, harpsichord, and other instruments from the University's collection. May be repeated. Prerequisite: Consent of instructor.

MUS 254 String Ensemble  credit: 1 Hour.
Participation in trios, quartets, quintets, etc., for the study of chamber music literature. May be repeated. Prerequisite: Consent of instructor.

MUS 255 Woodwind Ensemble  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 256 Brass Ensemble  credit: 1 Hour.
Ensembles of mixed brasses in both small and large forms. May be repeated. Prerequisite: Consent of instructor.

MUS 257 Percussion Ensemble  credit: 1 Hour.
May be repeated in the same term. Prerequisite: Consent of instructor.

MUS 258 Piano Ensemble  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 259 Wind Orchestra  credit: 1 Hour.
Maintains a complete symphonic band instrumentation for the study and performance of all types of band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the ensemble. May be repeated. Prerequisite: Consent of instructor.

MUS 260 Oratorio Society  credit: 1 Hour.
An advanced mixed-voice chorus open to students, faculty, and members of the community. Performance of oratorios and other major choral works in cooperation with the University Symphony Orchestra or Wind Symphony. May be repeated. Prerequisite: Consent of instructor.

MUS 261 Choral Ensemble  credit: 1 Hour.
A mixed-voice chorus for average and beginning singers open to students, faculty, and members of the community. Performance of cantatas and other choral works. May be repeated. Prerequisite: Consent of instructor.

MUS 262 Women's Glee Club  credit: 1 Hour.
Practical experience in the rehearsal and public performance of choral music of various periods and styles. Open to all women students. May be repeated. Prerequisite: Consent of instructor.

MUS 263 Men's Glee Club  credit: 1 Hour.
Practical experience in the rehearsal and public performance of choral music of various periods and styles. Open to all men students. May be repeated. Prerequisite: Consent of instructor.

MUS 264 Concert Choir  credit: 1 Hour.
A highly advanced group of competent student singers. Practical experience in mixed-voice singing of accompanied and unaccompanied music of various periods and styles. May be repeated. Prerequisite: Consent of instructor.

MUS 265 Opera  credit: 1 Hour.
Preparation and public performance of grand or light opera. Includes only singing and acting (students desiring experience in costuming, stage management, scenery, publicity, etc., should apply to the University Theatre Department, which cooperates in the opera productions). May be repeated. Prerequisite: Consent of instructor.

MUS 266 Jazz Ensemble  credit: 1 Hour.
Ensembles of various sizes designed to acquaint proficient instrumentalists with jazz compositions, arrangements, and improvisational procedures, and to promote a high degree of stylistic and technical competence in performance. May be repeated. Prerequisite: Consent of instructor.

MUS 267 Chamber Music  credit: 1 Hour.
Students will be assigned to chamber groups that will be coached on a weekly basis by members of the faculty. One public performance per term may be required. May be repeated. Prerequisite: Music majors or consent of instructor.

MUS 268 Wind Symphony  credit: 1 Hour.
Maintains a complete large wind ensemble instrumentation for the study and performance of band/wind ensemble/chamber wind literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the ensemble. May be repeated. Prerequisite: Consent of instructor.
MUS 270  Harding Symphonic Band  credit: 1 Hour.
Maintains a complete symphonic band instrumentation for the study and performance of all types of band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 271  Hindsley Symphonic Band  credit: 1 Hour.
Maintains the instrumentation of the standard band, and serves as a training organization for the Symphonic Bands. The literature studied and performed is of the highest caliber and technical difficulty. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 272  Concert Band  credit: 1 Hour.
Training for the Symphonic Bands and the First Concert Band. The high quality band literature is technically less difficult than that of MUS 269, MUS 270 and MUS 271. Promotion contingent upon improvement and chair vacancies. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 273  Marching Illini  credit: 1 to 3 Hours.
Prepares and performs music of the highest available quality in at least six shows per football season. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 274  Basketball Band  credit: 1 Hour.
Performs for home basketball games. May be repeated. Credit is given for spring term only. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. Prerequisite: Band Division audition during early October, or consent of instructor.

MUS 275  Brass Band  credit: 1 Hour.
Maintains a complete British Brass Band instrumentation for the study and performance of all types and styles of brass band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the bands. May be repeated. Prerequisite: Concurrent registration in MUS 268, MUS 269, MUS 270, MUS 271, or MUS 272, and consent of instructor.

MUS 276  Summer Band  credit: 1 Hour.
Maintains the instrumentation of the standard band for the study and performance of all types of band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 279  Thesis/Adv UG Honors in Music  credit: 1 or 2 Hours.
Special individual research projects. Required of seniors in the history of music and music theory curricula; open also to advanced undergraduates, including James Scholars, who have achieved university or college honors and who desire to do research in specialized areas of music, including performance. May be repeated to a maximum of 4 hours. Counts for advanced hours in LAS. Prerequisite: Senior standing in the history of music or music theory curricula, or consent of instructor.

MUS 313  The History of Music I  credit: 3 Hours.
Survey of music and its development in Western civilization to about 1750. Emphasis on an acquaintance with representative musical works and style, and on understanding musical concepts in the light of their historical and general cultural context. Prerequisite: MUS 110 or consent of instructor.
This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

MUS 314  The History of Music II  credit: 3 Hours.
Survey of the development of music as an art in Western civilization from about 1750 to the present. Emphasizes an acquaintance with formal and stylistic problems through the study of representative works and on understanding specific musical concepts in the light of their historical and general cultural context. Prerequisite: MUS 313 or consent of instructor.
This course satisfies the General Education Criteria for: UIUC: Literature and the Arts

MUS 317  Intro to Piano Literature  credit: 3 Hours.
Overview of representative works for the piano, from Scarlatti to the present. Prerequisite: MUS 314.

MUS 320  Pre-Student Tchng Experience  credit: 1 or 2 Hours.
Early Field Experiences in music teacher education. Includes supervised practicum work in observation, co-teaching, and individual teaching in local public schools. Twenty-seven (27) clock hours of EFE required for each hour of credit. May be repeated to a maximum of 4 hours, but only 2 hours may be applied toward the degree. Prerequisite: Music education majors or consent of instructor.

MUS 326  Practicum in Piano Teaching  credit: 2 Hours.
Coordinates lesson planning for teaching pre-college piano pupils with extensive teaching experience; gives close examination to beginning and intermediate teaching literature.

MUS 330  Advanced Choral Conducting I  credit: 2 Hours.
Laboratory/practicum course for review and development of choral conducting skills and their integration into the student's full complement of teaching skills and knowledge. Score analysis and preparation lead to the application of teaching and rehearsal skills. Prerequisite: Music education majors; MUS 242; concurrent registration in MUS 348 is required.

MUS 331  Advanced Choral Conducting II  credit: 2 Hours.
Practicum course emphasizing teaching and rehearsal techniques, score preparation, and interpretation. Focuses on the integration of aural, vocal, keyboard, and conducting skills for the choral teacher/conductor. Prerequisite: MUS 330; music education majors, or consent of instructor.
MUS 332 Advanced Wind Band Conducting and Rehearsal Strategies credit: 3 Hours.
Develops skills in rehearsal techniques and aural skills. Application of teaching strategies and learning theory. Refinement of fundamental concepts of gesture; development of advanced conducting skills and score reading skills; development of score analysis techniques. Prerequisite: MUS 242; instrumental music education majors, or consent of instructor.

MUS 333 Cond/Teach Strings-Grp Setting credit: 3 Hours.
Survey of concert and training literature for school orchestras; refinement of fundamental concepts of gesture; development of advanced skills in conducting, score reading, and score analysis. Prerequisite: MUS 242; music education majors, or consent of instructor.

MUS 335 Elem and Mid Sch Instrum Music credit: 2 Hours.
Examines pedagogical and organizational techniques for teaching elementary and middle school instrumental music. Must be taken concurrently with MUS 320 WP or MUS 320 S, an Early Field Experience. Prerequisite: May only be taken one or two semesters prior to student teaching, music education majors, or consent of instructor.

MUS 336 Service Learning in Music Education credit: 3 Hours.
Service Learning and participatory action research in music education. Students facilitate music learning in cooperation with community partners in Champaign-Urbana, Illinois and surrounding communities. Collaborative planning, learning through inquiry, engaged scholarship, and democratic teaching practices. Student teams develop or work on ongoing projects with community teachers, musicians, or organizations. May be repeated in separate terms.

MUS 339 Principals and Techqs in Mus Ed credit: 3 Hours.
Overview of music education in K-12 settings, emphasizing philosophy and history of music education, jazz education, methodologies commonly utilized in school curricula, music in special education, and classroom/rehearsal management. Five weeks are devoted to content exploring basic statistical techniques and procedures. Prerequisite: Senior standing in music education, or consent of instructor, plus 80 hours of early field experiences in the teaching of music; completion of the Quantitative Reasoning I requirement. This course satisfies the General Education Criteria for: UIUC: Quant Reasoning II

MUS 342 Music in Childhood credit: 3 Hours.
Provides a model of comprehensive musicianship in general music K-5. Considers musical and conceptual development of learners at various ages. Includes lesson planning and assessment strategies for classroom music instruction including listening, performing, and composing experiences. Prerequisite: MUS 240.

MUS 343 Music in Adolescence credit: 3 Hours.
Detailed consideration of the general music program in both middle school and high school. Emphasis on adolescent characteristics and alternative methods of instruction. Prerequisite: Restricted to Music Education majors or consent of instructor.

MUS 344 Wind Band Methods for Secondary Ensembles credit: 2 Hours.
Surveys concert and training literature for the high school band; develops administrative skills for organizing a school music program; increases skills in rehearsal techniques and addresses current issues in music education. Prerequisite: MUS 332; junior standing in instrumental music education; completion of campus Composition I general education requirement; approval of instructor.

MUS 345 Mus Methods in Early Childhood credit: 2 Hours.
Approaches for teaching music to children ages 2 through 8 in preschool and early elementary school settings. Focuses on understanding the role of music in early childhood, developing musical concepts, and organizing appropriate learning experiences.

MUS 346 Choral Methods for Secondary Ensembles credit: 2 Hours.
Lecture/discussion methods course that addresses curriculum development, organization/administration, repertoire, vocal pedagogy and the changing voice, diction, and additional topics typical of secondary school choral music program. Prerequisite: Music education majors or consent of instructor. Concurrent enrollment in MUS 348 required.

MUS 348 Choral Literature credit: 1 Hour.
Exploration of choral literature appropriate for middle and high school music programs. Students carry out lesson plans through peer teaching/rehearsal sequences, culminating in public performance. May be repeated to a maximum of 2 hours. Prerequisite: MUS 242. Restricted to Music Education majors, or consent of instructor.

MUS 350 Music Teaching in Ens Settings credit: 5 Hours.
Emphasizing the collaborative nature of teaching and learning, this team-taught, comprehensive course engages students in teaching music through school ensembles of all kinds. Topics include comprehensive musicianship, creativity and composition, instructional planning, management structures and routines, and inclusive practices in music education. Prerequisite: MUS 240 and MUS 242. Music education majors only. Junior standing required.

MUS 352 Tchg Strings in Grp Settings credit: 3 Hours.
Organize and teach sequential string playing technique to students in a group setting to develop their aural skills and left hand and right hand technique; refresh and improve the string performance skills gained in MUS 140; survey materials for string classes; develop awareness of personal teaching delivery skills. Offered only in spring semesters. Prerequisite: Music Education major, completion of MUS 320S, or consent of instructor.

MUS 360 Jazz Improv:Theory and Prac I credit: 2 Hours.
Fundamentals of jazz improvisation, with an emphasis on aural recognition of jazz chord voicings, harmonic progressions, and scales. Includes interactive software related to jazz improvisation ear-training. Application of melodic, harmonic, and rhythmic materials with regard to improvisation. Prerequisite: MUS 102 and MUS 108; MUS 167; or placement by exam with consent of instructor.

MUS 361 Jazz Improv:Theory and Prac II credit: 2 Hours.
Continuation of MUS 360. Exploration of advanced harmonic procedures with an emphasis on aural recognition of advanced forms of jazz harmonic structures, scales, chord qualities, and chord progressions. Additional emphasis on scales, chord/scale relationships, and standard jazz harmonic forms such as blues, standard jazz tunes, and modal tunes. Prerequisite: MUS 360, or placement by exam with consent of instructor.

MUS 362 Jazz Arranging I credit: 3 Hours.
Fundamentals of jazz arranging with an introduction to techniques such as schematic design, score layout, analysis, voicing, section writing, and orchestration. Emphasis on arranging for rhythm section, along with part layout and forms, voicing techniques, and basic harmonic concepts. Three major written projects are required. Prerequisite: MUS 166, or placement by exam/portfolio with consent of instructor.

Information listed in this catalog is current as of 03/2017
MUS 363  Jazz Arranging II  credit: 3 Hours.
Advanced melodic, harmonic, and rhythmic arranging techniques as applied to jazz instrumentation. Emphasis on practice in analysis, voicing and orchestration techniques such as 4-way closed position double lead, 4-way closed-position drop-2 double lead, 4-way closed position drop-2, and 4 and 5-way closed position. Three major written projects are required. Prerequisite: MUS 362, or placement by exam/portfolio with consent of instructor.

MUS 364  Jazz Composition I  credit: 2 Hours.
Examines the basic elements of jazz composition from melodic, harmonic, rhythmic, and tone color perspectives focusing on distinctive styles of jazz. Promotes a better understanding of various jazz compositional styles, jazz composers, creative elements and abilities, melody writing, harmonic systems, rhythmic compositional devices, and jazz reharmonization techniques. Prerequisite: MUS 363.

MUS 365  Jazz Composition II  credit: 2 Hours.
Examines advanced elements of jazz composition such as melody construction, harmonic devices, and rhythmic devices used in modern jazz compositions as a continuation and expansion of materials presented in MUS 364. Melodic and harmonic contouring, asymmetrical forms, advanced chromatic-modal construction, and creative practices will be discussed and practiced through written assignments and projects. Prerequisite: MUS 364, or consent of instructor upon approval of a portfolio of jazz compositions.

MUS 368  Jazz Improvisation Styles I  credit: 2 Hours.
Survey of improvisational/jazz artists. Students write and present four papers over the course of the semester, accompanied by four transcriptions of four major improvisational/jazz artists representing four distinct improvisational/jazz styles. All presentations will be done in class. Prerequisite: Consent of instructor.

MUS 369  Jazz Improvisation Styles II  credit: 2 Hours.
A continuation of the survey of improvisational/jazz artists at an advanced level. Students write and present four papers and associated recording transcriptions of four advanced improvisational/jazz artists representing four distinct advanced improvisational/jazz styles. All presentations will be done in class. Prerequisite: MUS 368 or consent of instructor.

MUS 400  Counterpoint and Fugue  credit: 3 Hours.
Study of contrapuntal writing, including fugue, with emphasis on the works of J.S. Bach. Includes analysis of contrapuntal writing. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208, or consent of instructor.

MUS 402  Musical Acoustics  credit: 3 Hours.
Theory and application of simple resonators, wave motion, resonances of strings and pipes; perception of loudness, pitch, and timbre; musical scales; and acoustics of rooms and musical instruments; tuning systems; computer analysis of sounds; psychoacoustics; and digital representation of sound. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 012 and MUS 101 or equivalent.

MUS 404  Contemp Compos Techniques  credit: 2 Hours.
Studies in specialized areas of composition for advanced undergraduates and graduates majoring in composition-theory. May be elected by others with consent of instructor. 2 undergraduate hours. 2 graduate hours. May be repeated. Prerequisite: MUS 106, MUS 202 and MUS 208, or consent of instructor.

MUS 405  Analytical Systems 20thC Mus  credit: 3 Hours.
Study of various analytical techniques developed for music written in the twentieth century based on compositional procedures other than those derived from the common practice period. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208, or consent of instructor.

MUS 406  Advanced Composition  credit: 3 Hours.
Individual instruction in contemporary musical practice. Students submit scores of their compositions to the composition faculty in order to obtain consent to register; consent is granted on the basis of the quality of the music the student has composed and the level of skill demonstrated in the work submitted. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: For undergraduates, MUS 206 and consent of composition faculty; for graduate students, consent of composition faculty.

MUS 407  Elect Music Techniques I  credit: 3 Hours.
Introduces electroacoustic music, including historical background, music literature, techniques of notation and realization, sound synthesis, analog and digital recording, mixing and processing, and compositional application in the areas of musique concrete, electronic music, and Musical Instrument Digital Interface (MIDI) technology as applied to electroacoustic concert art music. Weekly lab times assigned. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing in music, or consent of instructor.

MUS 408  Analysis of Musical Form  credit: 3 Hours.
Extensive study of the formal structure of representative musical compositions from various historical periods: (a) Renaissance and Baroque; (b) Viennese classical; (c) nineteenth century; (d) first half of twentieth century; and (e) since World War II. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 9 hours. Prerequisite: MUS 202 and MUS 208.

MUS 409  Elect Music Techniques II  credit: 2 Hours.
Intermediate level study of Musical Instrument Digital Interface (MIDI) technology, sound design, digital audio engineering techniques, multi-track digital editing and audio processing in music composition, and the study of compositional, technical, and performance considerations as applied to electroacoustic concert art music. Weekly lab times are assigned. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 407 or placement by examination.

MUS 410  Period Studies in Musicology  credit: 3 Hours.
Intensive study of the music of a specific historical period. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: MUS 313 and MUS 314, junior standing in music or consent of instructor.

MUS 411  Genre Studies in Musicology  credit: 3 Hours.
Examination of one or more aspects of musical genre defined by composer(s), historical era, region, performance issues, philosophy, etc. Can include the study of the relationship between genre and performance, genre and pedagogy, genre and the creative process, genre and reception, etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314, junior standing; or consent of instructor.

MUS 412  Composer Studies in Musicology  credit: 3 Hours.
Intensive study of the music of a specific composer. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours if topic varies. Prerequisite: MUS 313 and MUS 314, junior standing in music or consent of instructor.
MUS 413  Music and Performance  credit: 3 Hours.
Examination of one or more aspects of musical performance defined by historical era, genre, region, philosophy, etc. Can include the study of the relationship between performance, improvisation and creative process; performance and publication; performance practices of a specific genre, period, or community; etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314, junior standing; or consent of instructor.

MUS 414  Music and Society  credit: 3 Hours.
Examination of the social context, function and meaning of music/music-making in one or more communities, from one or more areas of the world, in one or more time periods. May address music in relation to such social issues as gender, ethnicity, politics, etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours if topic varies. Prerequisite: MUS 313 and MUS 314, and junior standing in music; or consent of instructor.

MUS 415  Music and Media  credit: 3 Hours.
Intensive study of the impact of various media such as recordings, radio, film, television and/or computer technology on the creation, performance, dissemination and/or patronage of a given repertoire. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314; junior standing; or consent of instructor.

MUS 416  Anthropology of Music  credit: 3 Hours.
Introduction to the anthropological study of music, including the role of music in the world’s societies and non-Western musical systems and cultures. Same as ANTH 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANTH 103 or consent of instructor.

MUS 418  Regional Studies in Musicology  credit: 3 or 4 Hours.
Seminar devoted to intensive study in the music of specific peoples, states, or geographic regions from around the world. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 12 undergraduate hours or 16 graduate hours. Prerequisite: MUS 313 and MUS 314; junior standing; MUS 528A (for DMA or MM performance or composition students); or consent of instructor.

MUS 419  Sr Seminar in Musicology  credit: 3 Hours.
Intensive capstone seminar for musicology majors directed at graduate school preparation, senior thesis or project development, professional portfolio design, and the cultivation of scholarly writing skills. Introduces advanced research methods and analytical paradigms. Addresses special topics or issues tailored to student interests and faculty expertise, as well as contemporary developments in the discipline or current musical events, from diverse perspectives. 3 undergraduate hours. No graduate credit. Prerequisite: For senior musicology majors (BA or BM) with senior standing, or consent of instructor.

MUS 420  The History of Opera  credit: 3 Hours.
Surveys opera and related forms from the end of the 16th century to the present; studies representative works in some detail. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 314 or consent of instructor.

MUS 421  The Music of America  credit: 3 Hours.
Study of chamber, choral, and orchestral music written by American composers from about 1850 to the present; jazz and its offshoots; folk and popular music; and experimental music in America. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing in music or consent of instructor.

MUS 422  Musical Theatre Repertoire  credit: 2 Hours.
Musical Theatre Repertoire is a high-contact class, conducted in a studio setting. Methods of instruction include vocal exercises, studying and singing Musical Theatre repertoire, song memorization, studying and evaluating performances, and utilizing both class and individual evaluations. Vocal health and wellness are stressed as students become familiar with styles of singing in both classical and contemporary Musical Theatre. 2 undergraduate hours. 2 graduate hours. May be repeated in separate terms to a maximum of 8 undergraduate hours or 4 graduate hours. Prerequisite: Students must have two years of applied voice lessons (MUS 181) in order to register for this course. For Music majors, or by consent of instructor.

MUS 423  Intro to Piano Technology  credit: 2 Hours.
Introduction to the mechanism and operation of the modern piano, including the historical development of keyboard instruments. Introduction to tuning and regulation, theory, and practice. No previous experience tuning or regulating pianos is necessary. 2 undergraduate hours. 2 graduate hours.

MUS 424  Musical Informatics  credit: 3 Hours.
A 21st century approach to music theory: fundamental elements of music illustrated through logical and mathematical concepts, unencumbered by stylistic considerations. Defines the internal structure of sounds and presents a few general methods of organizing them into complex compositions. Intended for musicians having limited familiarity with mathematics, as well as scientifically inclined students with little musical background. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

MUS 425  Post-Tonal Pitch Organization  credit: 3 Hours.
Compositional pitch organization techniques applied after the Common Practice/tonal Period, including an in-depth study of set theory, serialism, and other important contributions. Requires analytical work and the writing of musical compositions. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208.

MUS 426  Orchestration  credit: 3 Hours.
A thorough study of writing for all of the orchestral instruments in combinations ranging from solo to varying sizes of chamber ensembles and full orchestra. Includes analysis of musical examples and composing short works for various instrumental ensembles. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208.

MUS 430  Applied Music Pedagogy  credit: 2 Hours.
Survey of techniques, practices, and materials; presentation of group and individual instruction; an approach to teaching problems, tone production, musical styles, and interpretation for various age levels; actual teaching experience under faculty supervision. Required of performance majors in voice. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing in music or consent of instructor.

MUS 431  Piano Pedagogy I  credit: 2 Hours.
Objectives, techniques, literature, and materials for teaching piano to children from about ages five through ten (elementary level); observation of lessons and supervised student teaching experience. 2 undergraduate hours. 2 graduate hours. Required of piano performance majors. Prerequisite: Senior standing in music or music education, or consent of instructor.
MUS 432  Piano Pedagogy II  credit: 2 Hours.
Objectives, techniques, literature, and materials for teaching the young pianist from about ages 11 through 18 (middle school to pre-college level); teaching the adult beginner; observation of lessons and supervised student teaching experience. 2 undergraduate hours. 2 graduate hours. Required of piano performance majors. Prerequisite: Senior standing in music or music education, or consent of instructor.

MUS 433  Music Interdisciplinary Curriculum  credit: 2 or 4 Hours.
This course focuses on the principles and processes of an interdisciplinary curriculum, with primary emphasis on music's relationship to other areas of study. The organizing framework for the course is grounded on the premise that music influences, and in turn is influenced by, complementary realms of human experience. The purpose is to enable music educators and other interested persons to create sound educative experiences in music built upon strong relationships among persons, ideas, artistic practices, and disciplines. 2 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Undergraduate music students with junior or senior standing. Graduate music students, or consent of instructor.

MUS 434  Assessment/Eval in Music Ed  credit: 3 or 4 Hours.
Overview of assessment and evaluation techniques in music education, emphasizing the design of performance assessments, how to collect quality data in the music classroom, and how to use data to alter instruction. Five weeks devoted to context exploring basic statistical techniques, including how to interpret data. 3 undergraduate hours. 4 graduate hours. Prerequisite: Completion of Quantitative Reasoning I requirement. For Music Ed majors with Junior or Senior standing, graduate Music Ed students, or consent of instructor.

MUS 435  Jazz Aural Skills I  credit: 2 Hours.
Jazz Aural Skills I is the first of two courses designed to equip students for the rigorous demands of a professional jazz musician. The course is designed to strengthen the student's ability to recognize chord progressions, scales, chord alterations, and common forms in order to react and integrate them into solo improvisation and group playing. Students learn how to strengthen their own relative pitch recognition through singing/and or playing their instrument(s), including piano. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 107, 108, 172 and 173, or by consent of instructor. This course is open to jazz majors, music majors, and interested students.

MUS 436  Jazz Aural Skills II  credit: 2 Hours.
Jazz Aural Skills II is a continuation of ear training for the jazz musician and composer. The ability to hear all parts of a tune - chord changes, rhythmic patterns, and the harmonic implications of the chord extensions is considered a fundamental essential skill of the professional jazz and commercial musician. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 107, 108, 172, 173 and 435, or by consent of instructor.

MUS 437  Popular Music Pedagogy  credit: 2 or 4 Hours.
Exploring music traditions in America and the world, with emphasis on the potential application and inclusion of these musical traditions within school music settings. 2 undergraduate hours. 2 or 4 graduate hours. Prerequisite: MUS 342 or 343, or graduate standing in music education.

MUS 438  Designing Musical Experiences  credit: 2 Hours.
Students design creative curriculum units for the promotion of healthy musical and lifestyle habits and choices, as well as enhancement as a performer and teacher through knowledge of all aspects of their musical selves - physical, psychological, and spiritual. The course will focus on general self-care but will also cover the four target areas identified by the Health Promotion in Schools of Music Conference as crucial for musicians: musculoskeletal issues, hearing conservation, voice care, and psychological issues. 2 undergraduate hours. 3 graduate hours. Prerequisite: MUS 240 and MUS 342.

MUS 439  Differentiating Music Instruction  credit: 3 Hours.
Practicum for students teaching music with disabilities in general, choral, and instrumental music classes. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 342.

MUS 440  Marching Band Procedures  credit: 2 Hours.
Emphasis on individual and sectional parts of orchestral masterworks. 1 undergraduate hour. 2 graduate hours. Prerequisite: Undergraduate music students with junior or senior standing, graduate music students, or consent of instructor.

MUS 441  Orchestral Repertory  credit: 2 Hours.
Laboratory class designed for brass, woodwind, and percussion performance majors who wish to become more familiar with orchestral literature and a variety of interpretational orchestral techniques. Emphasis on individual and sectional parts of orchestral masterworks. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor in consultation with the appropriate studio teacher.

MUS 442  Band Arranging  credit: 2 Hours.
Detailed consideration of principles and procedures for preparing a marching band to participate in parades, ceremonies, and shows for sports events. 2 undergraduate hours. 2 graduate hours. Prerequisite: Junior standing in instrumental music education.

MUS 443  Health Promotion in Schools of Music  credit: 2 Hours.
Research-based investigation of concepts and principles of school band programs including repertoire and curriculum, score study and teaching strategies, and leadership and advocacy. 2 undergraduate hours. 2 graduate hours. Prerequisite: Completion of student teaching, or consent of instructor.

MUS 444  Fundamentals of Ear Training  credit: 2 Hours.
Practicum for students teaching music with disabilities in general, choral, and instrumental music classes. 2 undergraduate hours. Prerequisite: MUS 240 and MUS 342.

MUS 445  Songwriting  credit: 2 Hours.
Students will write, record, and perform original songs for class, provide constructive feedback for their peers, reflect personally on their experiences through journaling, and will engage with readings and recordings relevant to class activities. Students should be comfortable singing and creating/performing on an accompanying instrument (e.g. guitar, piano, self-composed digital backing tracks). 2 undergraduate hours. 2 graduate hours.
MUS 447  Advanced Music Ed Technology  credit: 2 or 4 Hours.
A deepening of ideas and skills presented in MUS 243. Provides advanced exploration and construction of digital learning environments, as well as exploring the computer as a musical instrument. Students will work alone and in teams to create curricular materials grounded by historical, philosophical, and research in technology and education. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: MUS 243, graduate standing, or consent of instructor.

MUS 448  Computer Music  credit: 3 Hours.
Introduction to the multiple ways computers are used in music, with an emphasis on digital sounds synthesis and composition. Elements of acoustics, psychoacoustics, and programming are introduced in order to allow students to use and modify the existing software DJSSCO/Sound Maker developed at UIUC. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

MUS 449  Music in Early Childhood  credit: 2 Hours.
Provides pre-service music educators with a framework for designing and implementing developmentally appropriate music learning experiences for young children. Includes a survey of recent developments in the fields of early childhood and music education research and pedagogy that emphasize: assessing musical growth, integrating music into the curriculum, and accommodating individual differences in diverse learning settings. Early field experiences at the UIUC Child Development Laboratory are included in the course work. 2 undergraduate hours. 2 graduate hours. Prerequisite: Senior or graduate standing in music, or consent of instructor.

MUS 450  Advanced Ensemble Music  credit: 1 Hour.
Selected projects in the study and performance of ensemble literature, including the areas of operatic, instrumental, vocal-choral, and accompanying. 1 undergraduate hour. 1 graduate hour. May be repeated. Prerequisite: Consent of instructor.

MUS 451  Basso Continuo  credit: 2 Hours.
Introduction to figured bass realization. Techniques of accompanying singers and instrumentalists from a figured bass. 2 undergraduate hours. 2 graduate hours. May be repeated. Prerequisite: Advanced standing in music as a piano, organ, harpsichord, or accompanying major, or consent of instructor.

MUS 452  Special Topics in Harpsichord  credit: 2 Hours.
Practical and theoretical studies in historical tuning and temperament; early fingerings, harpsichord tutors (treatises), styles of figured bass improvisation, harpsichord literature, and other topics related to harpsichord performance. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MUS 453  Special Topics in Organ  credit: 2 Hours.
Development of practical keyboard skills related primarily to the work of the church organist: transposition, score-reading, harmonization, modulation, hymn-playing, and solo and anthem accompaniment. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MUS 454  Advanced Keyboard Skills I  credit: 2 Hours.
Comprehensive keyboard musicianship course for advanced pianists emphasizing the development of the following skills: sight reading, harmonization, transposition, improvisation, playing by ear, and vocal and instrumental score reading. Ensemble piano music is performed. This course addresses the keyboard competency policy for undergraduate piano performance majors. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 180 (12 hours completed) or MUS 175, and MUS 202 and MUS 208 or equivalent; and consent of instructor.

MUS 455  Advanced Keyboard Skills II  credit: 2 Hours.
Continuation of the topics introduced in MUS 454. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 180 (12 hours completed) or MUS 175; MUS 202 and MUS 208 or equivalent; MUS 454 or equivalent; and consent of instructor.

MUS 456  Adv Jazz Piano Improvisation  credit: 2 Hours.
Study of solo jazz piano improvisation on an advanced level. Includes practical experience in traditional, modern, and abstract solo performance, as well as theoretical, stylistic, and historical background. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: MUS 161 or equivalent.

MUS 457  Organ History and Design  credit: 2 Hours.
Survey of the important national and historical styles of organ building and their relation to musical composition, performance practice, and modern organ design. Includes visits to regional organ installations chosen for their pertinent design features. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor.

MUS 458  Organ Literature  credit: 2 Hours.
Study of organ literature chosen for their pertinent design features. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor.

MUS 459  Professional Internship  credit: 0 to 12 Hours.
Professional work with an approved musical organization that is external to the School of Music, in an area related to the student's academic program; exposure to and participation in professional music-related activities. Full documentation and approval of internship activities required. The default credit will always be 0 credits unless a student, with the faculty advisor's support, petitions the appropriate academic committee (UG or Grad) with a detailed proposal outlining the academic nature, content, and scope of the internship. 0 to 12 undergraduate hours. 0 to 12 graduate hours. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours if topics vary.

MUS 460  Jazz Listening Seminar I  credit: 2 Hours.
Examines the fundamental aural elements of improvisation in a jazz idiom. A chronological survey of jazz artists presented via recordings. Topics will vary with the introduction of each new artist or group. 2 undergraduate hours. 2 graduate hours. Prerequisite: Jazz majors or consent of instructor.

MUS 461  Jazz Listening Seminar II  credit: 2 Hours.
A continuation in greater depth of material presented in MUS 460. Further examines the aural elements of improvisation in a jazz idiom. A chronological survey of jazz artists presented via recordings. Topics will vary with the introduction of each new artist or group. 2 undergraduate hours. 2 graduate hours. Prerequisite: Jazz majors or consent of instructor.

MUS 462  Jazz History I  credit: 3 or 4 Hours.
Presents jazz music history chronologically while providing historical background information drawn from other disciplines to illuminate the many ways that jazz has influenced, and been influenced by, American and global societies. Explores the many ways that jazz has encountered other art forms. Unpacks the many issues deeply associated with jazz music’s history – issues of race, class, mass media, gender, critical reception, etc. 3 undergraduate hours. 4 graduate hours. Prerequisite: Prior musical knowledge and training preferred but not required. Consent of instructor.

Information listed in this catalog is current as of 03/2017
MUS 465  Jazz History II  credit: 3 or 4 Hours.
A continuation of the materials presented in MUS 464. Allows the students to look both forward and backward to explore jazz music’s unfolding in the twentieth century, beginning roughly in 1945 and continuing to the present. Looks at music and its creators using recorded music, film transcription, theory, and various other analytical and media techniques. 3 undergraduate hours. 4 graduate hours. Prerequisite: Prior musical knowledge and training preferred but not required. Consent of instructor.

MUS 466  Applied Jazz Instruction  credit: 2 to 4 Hours.
Instruction at the advanced undergraduate or graduate level in voice in instruments normally associated with the jazz idiom. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 undergraduate hours or 20 graduate hours. Prerequisite: Successful performance audition for the jazz faculty.

MUS 467  Lyric Theatre Voice  credit: 2 Hours.
This is an individualized voice class setting where the student and teacher work exclusively with the technical, musical, and communicative aspects of Lyric Theatre repertoire in a one-on-one setting. Students receive a great deal of feedback from the instructor during each weekly lesson. 2 undergraduate hours. 2 graduate hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course. For Music majors only, or by consent of instructor.

MUS 468  Opera Studio  credit: 2 Hours.
Acquaints the student with a variety of opera, operetta, and musical theatre literature in contrasting styles and historical periods, culminating in a public performance of numerous opera scenes each semester. Develops skills as both a solo and ensemble performer. Introduces skills related to the field of operatic performance, including but not limited to stage movement, mind-body awareness, diction, acting, and improvisational techniques. Forms and integrates a performing operatic ensemble to serve as an outreach group that may perform in selected K-12 schools. Intended for vocal performance, vocal music education and vocal accompanying/coaching majors; others by consent of instructor. Audition required for admission. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 12 undergraduate hours or 8 graduate hours. (Summer session, 1 hour of credit). Prerequisite: Consent of instructor.

MUS 469  Opera Production I  credit: 2 or 3 Hours.
Studies the problems of the lyric stage. Investigation of and practice with casting methods, program selection, production procedures, stage direction, coaching methods, and opera dramatics. 3 undergraduate hours. 2 graduate hours. May be repeated up to a maximum of 6 undergraduate hours or 4 graduate hours. Prerequisite: MUS 265 and MUS 481; consent of instructor.

MUS 470  Opera Production II  credit: 2 or 3 Hours.
Continuation of topics introduced in MUS 469. 3 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 4 graduate hours. Prerequisite: MUS 469.

MUS 471  Composer-Chor Workshop  credit: 2 Hours.
Same as DANC 464. See DANC 464.

MUS 472  Senior Project Showcase  credit: 1 Hour.
Senior Project Showcase will be a sequenced, two semester course, culminating in a final performance(s) in the spring semester. Students will use class time for individual and team writing during the fall semester, presenting their work for faculty approval at the end of the first semester. Students will meet weekly in large and small groups, as well as frequent individual sessions with their advisors, receiving and providing feedback, working on staging, choreography and arrangements, and, later, assisting in the production design as well. Improvisation will play a central role in the development of concept and specific songs from character driven work. 1 undergraduate hour. No graduate credit. May be repeated to a maximum of 2 hours in separate terms. Prerequisite: Musical Theatre Repertoire (MUS 422). For BMA in Lyric Theatre majors only.

MUS 474  Vocal Repertoire I  credit: 1 Hour.
Study of the standard solo literature including solo excerpts from larger works, i.e., cantata, oratorio, and opera. Supplements the student’s knowledge of the literature in his/her major field. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing in voice, or consent of instructor and concurrent registration in MUS 481.

MUS 475  Vocal Repertoire II  credit: 1 Hour.
Continuation of the study of the standard solo literature including solo excerpts from larger works, i.e., cantata, oratorio, and opera. Supplements the student’s knowledge of the literature in his/her major field. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing in voice, or consent of instructor and concurrent registration in MUS 481.

MUS 477  Principles of Accompanying  credit: 2 or 4 Hours.
Principles of accompanying singers and instrumentalists. Practical experience in accompanying and facility in sight reading for keyboard performers. 2 or 4 undergraduate hours. 2 or 4 graduate hours. May be repeated. (Summer session, 2 undergraduate or graduate hours). Prerequisite: Advanced undergraduate or graduate standing in music or music education, and consent of instructor.

MUS 478  Guitar  credit: 2 to 4 Hours.
Instruction in guitar at the advanced undergraduate and graduate levels, predominantly classical. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing or above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 479  Harpsichord  credit: 2 to 4 Hours.
Instruction in harpsichord at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors, junior standing or above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 480  Piano  credit: 2 to 4 Hours.
Instruction in piano at the advanced undergraduate and graduate levels. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: For students in the Bachelor of Music program. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

Information listed in this catalog is current as of 03/2017
MUS 481  Voice  credit: 2 to 4 Hours.
Instruction in voice at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Primarily for music majors, junior standing and above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 482  Organ  credit: 2 to 4 Hours.
Instruction in organ at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 483  Violin  credit: 2 to 4 Hours.
Instruction in violin at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 484  Viola  credit: 2 to 4 Hours.
Instruction in viola at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 485  Cello  credit: 2 to 4 Hours.
Instruction in cello at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 486  Double Bass  credit: 2 to 4 Hours.
Instruction in double bass at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 487  Harp  credit: 2 to 4 Hours.
Instruction in harp at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 488  Flute  credit: 2 to 4 Hours.
Instruction in flute at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 489  Clarinet  credit: 2 to 4 Hours.
Instruction in clarinet at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 490  Oboe  credit: 2 to 4 Hours.
Instruction in oboe at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 491  Bassoon  credit: 2 to 4 Hours.
Instruction in bassoon at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 492  Saxophone  credit: 2 to 4 Hours.
Instruction in saxophone at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 493  Trumpet  credit: 2 to 4 Hours.
Instruction in cornet and trumpet at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 494  Horn  credit: 2 to 4 Hours.
Instruction in horn at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.
MUS 495 Trombone credit: 2 to 4 Hours. Instruction in trombone at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 496 Euphonium credit: 2 to 4 Hours. Instruction in euphonium at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 497 Tuba credit: 2 to 4 Hours. Instruction in tuba at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 498 Percussion credit: 2 to 4 Hours. Instruction in percussion at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 499 Proseminar in Music credit: .5 to 4 Hours. Special preparation in specialized fields of musicology, composition-theory, performance, and music education. 0.5 to 4 undergraduate hours. 0.5 to 4 graduate hours. May be repeated to a maximum of 8 hours; undergraduate students in open studies may repeat the course unlimited times with approval of the open studies advisor. Prerequisite: Senior or graduate standing in music or music education; consent of instructor.

Bachelor of Arts with a Major in Music

http://music.illinois.edu/

The Bachelor of Arts with a Major in Music is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students to select a specific area of study, called an option. Current options include music technology, music theory, composition, and various branches of musicology; or students may work with an advisor to explore alternate options not listed here (music +). BA students work with their BA advisor to design supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study (option) during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students must designate their option by no later than the start of the spring semester of sophomore year.

For admission requirements for the BA, please see the School of Music’s Admissions website (http://www.music.illinois.edu/prospective-students) or contact the Music Admissions Office:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801
Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

Minimum required major and supporting course work normally equates to 48-50 hours excluding the keyboard skills (MUS 172 and MUS 173) requirement, and includes 37-41 hours in music courses, 29-31 hours in core courses. Students who wish to study voice or an instrument for credit, in addition to satisfying the Performance Studies requirement of MUS 172 and MUS 173, are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music; credits earned in applied music beyond the keyboard requirement stated above are generally considered elective.

Minimum hours required for graduation: 120 hours

Students must complete the following core music courses and and select an area of study, called an "option." An option consists of 8-9 hours of advanced music courses and 11-12 hours of supporting (non-Music) coursework. The coursework is determined in consultation with the student’s advisor.

Total Hours 52-54

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2. Advanced music courses and supporting coursework outside the School of Music are selected in consultation with an advisor.

For All Options:

- Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus.

Information listed in this catalog is current as of 03/2017
• A Major Plan of Study Form must be completed and submitted to the School of Music Undergraduate Academic Advisor (Music Building 2058) before the end of the fifth semester (60-75 hours). Please see your BA Music advisor, or the Undergraduate Academic Advisor, for assistance in completing the form.

Instrumental Performance Major

http://www.music.illinois.edu

Students may major in piano, organ, harpsichord, violin, viola, violoncello, double bass, harp, flute, oboe, clarinet, saxophone, bassoon, trumpet, horn, euphonium, baritone, trombone, tuba, or percussion.

A student enrolled in this major normally takes two applied subjects, one a major (24-32 semester hours in the same applied area) and the other a minor (8 semester hours in the same applied area). Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Instrumental Performance Major within the Bachelor of Music degree.

Electives as needed to total 130 hours

1 Concurrent registration in MUS 250 is required for all students who register for any of MUS 183-MUS 186 and MUS 483-MUS 486.

2 String majors will register for four semester hours of applied music in the first year; thereafter, string majors will register for three semester hours of applied music and one semester hour of MUS 267 in the second, third, and fourth years. Brass majors will register for three semesters hours of applied music and one semester hour of MUS 267 each semester for all four years.

3 Piano majors are required to complete only 6 hours of minor applied music.

4 For piano majors only. Other majors may choose four semester hours of electives.

Jazz Performance Major

http://www.music.illinois.edu

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, or guitar as the major instrument. Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242.

Electives as needed to total 130 hours

1 Of the eight semesters of applied music, two semesters (4 hours) must be in classical applied study.

2 For students with no keyboard skills, MUS 172 and MUS 173 taken in the first year, followed by Jazz Keyboard I and II in the second year will satisfy the secondary applied instrument requirement. For students whose principal instrument is piano, a secondary instrument or jazz voice may be chosen as a substitute for MUS 172, MUS 173 and Jazz Keyboard I and II, in consultation with the advisor.
Music Composition-Theory Major

http://www.music.illinois.edu

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

MUS 425  Post-Tonal Pitch Organization  3
MUS 426  Orchestration  3
Music Theory  8
French, German, or Italian  8
Electives as needed to total 130 hours

1 Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2 All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree.
3 The music theory electives for the third and fourth years are to be chosen from, MUS 404 (may be repeated to a maximum of six semester hours), MUS 405, MUS 407, MUS 408 (may be repeated to a maximum of six semester hours in addition to MUS 408, sections D or E), MUS 409, and MUS 499 (may be repeated to a maximum of four semester hours; senior standing in music required). If the curricular emphasis is in music theory, the following will apply: juniors will substitute an additional three semester hours of MUS 408 for MUS 406; seniors will take MUS 299 (two semesters), MUS 405, and substitute an additional 400-level music history course for MUS 406.
4 Students who completed 2 years of French, German, or Italian in high school have met this requirement. Other languages may be chosen with permission of the composition-theory adviser. Completion of this requirement does not complete the General Education language requirement.

Music Education

Professor Jeffrey Magee
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 333-2620
http://www.music.illinois.edu

For the Degree of Bachelor of Music Education

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education. Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) gpa of 2.75, and professional education course gpa of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

The Council on Teacher Education policy requires that all candidates for teacher education programs pass the Illinois Licensure Testing System Test of Academic Proficiency (TAP), or submit a composite ACT+Writing score of 22 (plus a combined English/Writing score of at least 19 for tests prior to September 2015; or ACT writing score of at least 16 for tests taken September 2015 or after), or a composite SAT (mathematics and critical reading) score of 1030 (SAT Writing score of at least 450) for tests taken prior to March 5, 2016; or a combined score (evidence-based reading and writing plus mathematics) of at least 1110 and a minimum score of 26 on writing and language tests for tests taken on or after March 5, 2016 before admission. All music education students must earn a grade of C or better in all music and professional education courses required for licensure.

General Education/FAA

FAA 101  Arts at Illinois  2
Composition I  4
Natural Sciences and Technology  6
Cultural Studies: Western Comparative Culture(s)  3
Social and Behavioral Sciences - fulfilled by PSYC 100 and EPSY 201 1
Quantitative Reasoning I 2
3
General Education Requirements met by courses required within the BME:
Advanced Composition - fulfilled by MUS 244 3
Humanities and the Arts - fulfilled by MUS 313 and MUS 314 6
Cultural Studies: Non-Western Culture(s) - fulfilled by MUS 133
Foreign Language 0-12
Quantitative Reasoning II - fulfilled by MUS 434 3
Total Hours 3 40-52
1 PSYC 100 is prerequisite to EPSY 201, required in all teacher education programs.
2 Quantitative Reasoning I is satisfied by students in the Technology concentration selecting CS 105 as a Technique course or elective.
3 25-37 of the general education hours are not met by course requirements within the BME; 15 hours of general education requirements are met by courses required by the BME.

EDPR 438 Educational Practice in Special Fields 1 4
EDPR 442 Educational Practice in Secondary Education 1 4

1 Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school licensure is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student’s applied major, music theory, or music history.

**Electives as needed to total 130 hours**

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2. All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree.
3. Students enroll in applied music in the same instrument or in voice each semester. It is strongly recommended that students in this major acquire a thorough practical knowledge of the piano beyond basic keyboard competency as part of the applied music study.
4. Students must complete the equivalent of a fourth-level college foreign language course or demonstrate fourth-level proficiency for graduation. French, German, or Italian are strongly encouraged.
5. May not be used to satisfy general education requirements.

**Open Studies**

Open Studies allows students to focus on diverse fields such as music of other cultures, piano pedagogy, or other areas not included in the majors above. Open Studies requires completion of the common requirements...
for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the associate dean of the College of Fine and Applied Arts. Additional information may be obtained from the:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014

Vocal Performance Major

http://www.music.illinois.edu

The primary applied subject in this major includes both private lessons in voice and classes in vocal diction.

At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

Theatre, Department of

Jeffrey Eric Jenkins
4-122 Krannert Center for the Performing Arts, 500 South Goodwin,
Urbana
PH: (217) 244-6189
FX: Fax (217) 244-1861
http://theatre.illinois.edu

The curricular concentrations in the Department of Theatre provide intensive and extensive preparation for the rigorous demands of a professional career in the theatre. A strong commitment to work in the theatre and a realistic understanding of its intellectual, aesthetic, and physical demands are therefore necessary in students who enter the department.

Before acceptance into theatre, applicants must participate in auditions or interviews, which take place at the Krannert Center for the Performing Arts five or more weekends each year, and at selected regional locations (normally Chicago and New York). In these auditions, applicants who plan to pursue the concentration in acting should present a three-minute audition, comprising two contrasting works from dramatic literature. Applicants wishing to pursue one of the concentrations in design, technology, and management should present a portfolio of previous theatre work. Applicants who intend to pursue the theatre studies concentration should also bring evidence of their previous theatre work and a 500-word essay addressing the aspects of the theatre studies program that interest them most and why they want to pursue those aspects. Information on these auditions and interviews will be sent to applicants once they have applied to the University and their eligibility has been determined by the Office of Admissions and Records.

Concentrations in theatre are in Acting, Costume Design and Technology, Lighting Design, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. Students are initially accepted as theatre majors and then formally admitted to one of these concentrations after an evaluation by the faculty during the student’s first or second year. The concentrations in acting and design, technology, and management are intended for students who, in the judgement of the faculty, are ready to concentrate in these specialties in an intensive undergraduate professional training curriculum. The theatre studies concentration is intended for students who plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As one of the resident producing organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year and three each summer. The theatres and workshops of the Krannert Center serve as laboratories.

Information listed in this catalog is current as of 03/2017
for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists, preparing performances in theatre, opera, and dance. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100-Practicum I. Acting and theatre studies students cast in Krannert Center productions or assigned to assist in Krannert Center productions must also take THEA 400-Practicum, II. Design, technology, and management students are required to work on Krannert Center productions as assigned for THEA 400-Practicum, II, credit. Students seeking credit for practical theatre work outside the Krannert Center must secure the approval and supervision of theatre faculty in the form of an Individual Project (THEA 391 or THEA 392) or as a Professional Internship (THEA 490) or Creative Project (THEA 595).

Curricula in Theatre
For the Degree of Bachelor of Fine Arts in Theatre
A minimum of 128 hours of credit is required for the degree.

1 First year theatre foundations courses.

Acting Program
The acting program provides intensive training in a wide variety of performing media. In the first and second years, students take introductory courses in movement, voice, and acting. In their second year of study in the department, students must audition for acceptance into the studio in acting. In addition to successful completion of all classes in their first and second years, acceptance will be based on an evaluation of each student’s potential for professional-caliber performance, commitment to theatre, and the necessary discipline for intensive study. Third- and fourth-year students meet in daily four-hour sessions, each of which includes sections in dynamics, voice and speech, movement, and acting. Semester-long acting sections include advanced scene study, musical theatre, Shakespeare, and acting for the camera. Students in the professional studio in acting must audition for department productions and perform as cast.

Division of Design, Technology, and Management

Students planning careers in costume design and construction, lighting design, scenic design, scenic technology, sound design and technology, and stage management are selected for the options in this division by a process of faculty evaluation at the end of their first year of study in the department. Criteria for acceptance and continuance in these options include satisfactory completion of all course work in the first and second years, potential for professional-caliber work, commitment to theatre, and the necessary discipline for intensive study and practice. Students in these options are assigned to teams that design, mount, and manage more than fifteen productions annually in the Krannert Center for the Performing Arts.

### Theatre Studies Program

The theatre studies program focuses on the practical application of theatre scholarship and explores theatrical production as a collaborative art form that is grounded in theory, criticism, history, research, and writing.

The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing.
Minor in Theatre

The Minor in Theatre offers students a comprehensive overview of the study of theatre, including both academic (history and criticism) and production (acting, design and technology) courses. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses, totaling ten hours. They then take a minimum of ten hours of electives in two general areas (History/Criticism and Production/Performance) with at least one course from each area.

The Minor in Theatre requires a core of required courses totaling ten hours. Students must complete the following:

- **THEA 100** Practicum I 4 hours
- **THEA 208** Dramatic Analysis 3 hours
- **THEA 211** Introduction to Playwriting 3 hours
- **THEA 212** Introduction to Directing 3 hours
- **THEA 218** Intro to Social Issues Theatre 3 hours
- **THEA 262** Literature of Modern Theatre 3 hours
- **THEA 220** Survey of Theatrical Design 3 hours
- **THEA 391** Individual Topics 2 hours
- **THEA 392** Individual Topics 2 hours
- **THEA 400** Practicum II 2 hours
- **THEA 490** Professional Internship 6 hours

Advanced Theatre courses: any 300 or 400 level Theatre course 12 hours

Supporting Professional Electives: any theatre, dance or music course 12 hours

Total Hours 58

Contact the Department of Theatre for admission information.

THEA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/THEA)
THEA 175  
Fundamentals of Acting II  
credit: 3 Hours. 
Exploration and communication of experience through speech and action on the stage. Prerequisite: THEA 170.

THEA 199  
Undergraduate Open Seminar  
credit: 0 to 5 Hours. 
Approved for letter and S/U grading. May be repeated to a maximum of 12 hours.

THEA 203  
Theatre of Black Experience  
credit: 3 Hours. 
Surveys the history and literature, and studies dramatic works focused on the black experience through the rehearsal and performance of representative works of black dramatists. May be repeated to a maximum of 9 hours.

THEA 208  
Dramatic Analysis  
credit: 3 Hours. 
Introduction to the study of plays for theatre practitioners employing analytical methods and plays from modern theatre. Requires paper or project assignments for each play. Prerequisite: Consent of instructor required for non-theatre majors.

THEA 210  
The Tragic Spirit  
credit: 3 Hours. 
Same as CLCV 222 and CWL 264. See CLCV 222. 
This course satisfies the General Education Criteria for: 
UIUC: Literature and the Arts 
UIUC: Western Compartv Cult

THEA 211  
Introduction to Playwriting  
credit: 3 Hours. 
Practical course in writing for the stage, including a study of basic dramatic construction and the analysis of weekly writing assignments, focusing on structure, style, and imagination, and culminating in a final term project of a one-act play. Prerequisite: THEA 208 or consent of instructor.

THEA 212  
Introduction to Directing  
credit: 3 Hours. 
Practical course in directing for the stage, focusing on script analysis, script preparation, casting, staging techniques, and design strategies, culminating in a directorial concept presentation of a contemporary play. Prerequisite: THEA 208.

THEA 218  
Intro to Social Issues Theatre  
credit: 3 Hours. 
An introductory exploration/survey of the rich histories, theories, and practices of community-based and social issues theatre. Through discussion, participation, lecture, and performance, representative works, movement, and artists will be explored. Lively connections will be made to an array of social issues in today's world. Same as GWS 218.

THEA 220  
Survey of Theatrical Design  
credit: 3 Hours. 
Survey of design elements in theatrical production including the function of scenery, costuming, lighting, and sound in conveying directorial concepts, style, and dramatic meaning. Intended for students not concentrating on theatrical design, this course requires both theoretical and practical projects. Prerequisite: THEA 102, THEA 208, or consent of instructor.

THEA 221  
Introduction to Scenic Design  
credit: 3 Hours. 
Projects and lectures addressing basic technical and aesthetic skills of scene design. Enrollment limited to Theatre majors. Prerequisite: THEA 125.

THEA 223  
Intro to Technical Direction  
credit: 4 Hours. 
Studies in the basic principles of technical direction and practical laboratory training in the materials, techniques, and processes for scenic construction and associated technologies. Prerequisite: Enrollment limited to Theater majors only.

THEA 231  
Intro to Lighting Design  
credit: 3 Hours. 
Develop an understanding of the basic aspects of lighting design and stage electrics for live performance.

THEA 260  
Intro Asian American Theatre  
credit: 3 Hours. 
Introduction to Asian American theatre, with emphasis on theatre companies, actors, playwrights, and audiences, through the reading of major dramatic works, examining production histories, and viewing Asian American performances and film. Same as AAS 260. 
This course satisfies the General Education Criteria for: 
UIUC: US Minority Culture(s)

THEA 262  
Literature of Modern Theatre  
credit: 3 Hours. 
Introduction to the principal modes of dramatic expression from around 1870 to the present day. Prerequisite: Completion of campus Composition I general education requirement and THEA 208; or consent of instructor. 
This course satisfies the General Education Criteria for: 
UIUC: Advanced Composition 
UIUC: Literature and the Arts

THEA 263  
Intro African American Theat  
credit: 3 Hours. 
Focuses on theatre artists, theatre companies, and the role of Historically Black Colleges and Universities (HBCUs). Students will read plays, view productions, screen documentaries, and examine various primary sources. Same as AFRO 212. 
This course satisfies the General Education Criteria for: 
UIUC: US Minority Culture(s)

THEA 270  
Relationships in Acting I  
credit: 3 Hours. 
Behavior in stage performance explored on the basis of the actor's relationship with self, with objects, and with other players; emphasizes analysis of playtext to discover action, environment, and relationships. Prerequisite: THEA 175 or consent of instructor.

THEA 271  
Voice and Movement I  
credit: 2 Hours. 
Fundamental development of vocal production as connected to body awareness and movement for the actor. Various exercised, conditioning, and training methods are used. Prerequisite: THEA 175 or consent of instructor.

THEA 275  
Relationships in Acting II  
credit: 3 Hours. 
Beginning scene work with special emphasis on analysis of plays, roles, characterization, and application of skills learned through improvisation and relationships in acting. Prerequisite: THEA 270 or consent of instructor.

THEA 276  
Voice and Movement II  
credit: 2 Hours. 
Further development of the interconnected vocal production and movement processes for the actor. Various exercised, conditioning, and training methods are used. Prerequisite: Enrollment limited to Theatre majors only.

THEA 323  
The Comic Imagination  
credit: 3 Hours. 
Same as CLCV 323 and CWL 322. See CLCV 323. 
This course satisfies the General Education Criteria for: 
UIUC: Literature and the Arts

THEA 360  
History of Theatre I  
credit: 4 Hours. 
History of the drama and theatre of ancient Greece and Rome, the Middle Ages, and the Italian and English Renaissance. Prerequisite: Junior standing or consent of instructor.

THEA 361  
History of Theatre II  
credit: 4 Hours. 
History of the drama and theatre of the Spanish Renaissance, seventeenth-century France, the English Restoration, the eighteenth and nineteenth centuries in Europe and America, and Asia. Prerequisite: THEA 360 or consent of instructor.
THEA 362 Chekhov credit: 3 Hours.
Same as RUSS 325 and CWL 325. See RUSS 325.

THEA 371 Acting Studio I: Dynamics credit: 1 Hour.
Development of movement and voice skills for actors. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 372, THEA 373, and THEA 374.

THEA 372 Acting Studio I: Voice credit: 2 Hours.
Concentrated training in standard speech for the stage and the International Phonetic Alphabet. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 373, and THEA 374.

THEA 373 Acting Studio I: Movement credit: 2 Hours.
Concentrated training in movement skills and mask characterization. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 372, and THEA 374.

THEA 374 Acting Studio I: Acting credit: 3 Hours.
Acting in realistic and naturalistic plays. A performance is given at the end of the term. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 372, and THEA 373.

THEA 375 Acting Studio II: Dynamics credit: 1 Hour.
Continuing development of movement and voice skills for actors. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373 and THEA 374, and concurrent registration in THEA 376, THEA 377 and THEA 378.

THEA 376 Acting Studio II: Voice credit: 2 Hours.
Continued training in standard speech for the stage and the International Phonetic Alphabet. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373, and THEA 374, and concurrent registration in THEA 375, THEA 377 and THEA 378.

THEA 377 Acting Studio II: Movement credit: 2 Hours.
Concentrated training in movement for the stage, body alignment and awareness. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373 and THEA 374; and concurrent registration in THEA 375, THEA 376 and THEA 378.

THEA 378 Acting Studio II: Acting credit: 3 Hours.
Development of acting skills for musical theatre including dance, singing, and the analysis of British and American musical theatre materials. A performance is given at the end of the term. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373, and THEA 374; and concurrent registration in THEA 375, THEA 376 and THEA 378.

THEA 391 Individual Topics credit: 2 Hours.
Individual projects and problems. Prerequisite: Consent of instructor.

THEA 392 Individual Topics credit: 2 Hours.
Individual projects and problems. Prerequisite: Consent of instructor.

THEA 399 Undergraduate Group Seminar credit: 1 to 4 Hours.
Group exploration of specialized topics. May be repeated in the same term to a maximum of 8 hours. May be repeated in subsequent terms to a maximum of 12 hours.

THEA 400 Practicum II credit: 1 to 3 Hours.
Advanced practical work in acting; theatre management; dramaturgy and directing; and the design, construction, and handling of scenery, lighting, sound, properties, costumes, and makeup for public performance. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Enrollment limited to Theatre majors.

THEA 408 AEA Union Stage Management credit: 3 or 4 Hours.
Exploration of the Actors’ Equity Association LORT contract: practices and concerns. Emphasis on practical use and application of union contracts with particular focus on workplace rules and regulations. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 451.

THEA 409 Stage Management Workshop credit: 3 or 4 Hours.
Explores advanced topics in stage management focusing on practical applications of principles learned in earlier courses. Possible topics include: Touring Stage Management, Stage Managing Opera and Dance, and Production Management. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or separate terms to a maximum of 6 undergraduate hours or 8 graduate hours as topics vary. Prerequisite: THEA 445 and THEA 446.

THEA 410 Dramaturgs Workshop credit: 3 or 4 Hours.
Seminar course focusing on the role of the dramaturg in the collaborative process. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours and 12 graduate hours, if topics vary.

THEA 411 Playwrights Workshop credit: 3 Hours.
Seminar course focusing on the role of the playwright in the collaborative process. Course may be repeated as topics will vary. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 9 graduate hours. Prerequisite: THEA 211.

THEA 412 Directors Workshop credit: 3 Hours.
Seminar course exploring the role of the director in the collaborative process. Course may be repeated as topics will vary. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 9 graduate hours. Prerequisite: THEA 212.

THEA 415 Scenic Design I credit: 4 Hours.
Advanced problems in scene design for period and style plays and development of professional portfolio. 4 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 hours if topics vary. Cannot repeat a section already taken. Prerequisite: THEA 222 or consent of instructor.

THEA 417 Leading Post-Perform Dialog credit: 4 Hours.
Study of the history, processes, and methods of leading discussions with social issues theatre audiences. Emphasis on the skills and techniques of facilitators/peer educators; artistic considerations; function and application of the dramaturg; and practical experience through facilitation of social issues theatre dialog. Same as GWS 417. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above or consent of instructor.

THEA 418 Devising Social Issues Theatre credit: 3 or 4 Hours.
Focuses on the role of the artist as 'cultural worker' through devising theatre in a community-based context that is explicitly concerned with social and/or health-related issues. While there is substantial research, reading and critique involved, the overall experience will be that of rigorously composing theatrical work vital to the community. Same as GWS 418. 3 undergraduate hours. 4 graduate hours.

THEA 419 CAD Drafting for the Stage credit: 3 Hours.
Study and application of computer-aided design techniques for scenery construction and design, focusing on the use of AutoCAD to create technical drawings for theatre. 3 undergraduate hours. 3 graduate hours. May not be repeated for credit. Prerequisite: THEA 425; enrollment limited to Theatre majors or by consent of instructor.

THEA 423 Advanced Lighting Design credit: 3 Hours.
Lighting design for the proscenium, arena, and thrust stage. Enrollment limited to Theatre majors. 3 undergraduate hours. No graduate credit. Prerequisite: THEA 231.
THEA 225 Stage Drafting credit: 3 Hours.
Traditional and digital drafting techniques for scenic and lighting design and for technical production. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 125. Theatre Majors only.

THEA 226 History of Decor credit: 3 Hours.
Historical and comparative survey of designs, motifs, and forms of decor in the West. Emphasis on the relation between research and design for the stage. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. May be repeated in separate terms to a max of 6 hours if topics vary.

THEA 227 Scene Painting credit: 2 Hours.
Techniques and practice of scene painting; lab time required. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor.

THEA 330 Technical Direction credit: 3 Hours.
Advanced studies in technical direction and theatre production organization. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 223 or consent of instructor.

THEA 331 Convergence Design I credit: 3 Hours.
Elements: The convergence of theatre, architecture, and media are the common foundational experiences covered in this course. The fundamental elements of story, light, space, time, and human perception are explored through theoretical and practical projects with a strong emphasis on live performance. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 231, THEA 423, or graduate standing.

THEA 332 Lighting for Non-Theatrical Spaces and Styles credit: 3 or 4 Hours.
A strong focus on lighting for architecture, landscape architecture, special events, theme parks, museums, concerts and site-specific venues. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231, THEA 423, THEA 431.

THEA 333 Business of Lighting Design credit: 3 or 4 Hours.
Practical approaches to working as a professional lighting designer. Material covered includes: unions, contracts, negotiations, agents, assistants vs. associates, city survival, promotional websites, touring, residencies, etc. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231, THEA 423, THEA 431, THEA 432.

THEA 334 Advanced Lighting Seminar credit: 1 Hour.
An open discussion of current shows and trends in the lighting industry including Skype interviews with business professionals. 1 undergraduate hour. 1 graduate hour. Prerequisite: Theatre Majors Only.

THEA 335 Professional Lighting Systems credit: 2 Hours.
Practical study of state-of-the-art lighting technology for the theatre, using the facilities of the Krannert Center for the Performing Arts. In-depth study of lighting control systems and programming, instrument maintenance, special effects, and the role of the master electrician in production. 2 undergraduate hours. 2 graduate hours. May not be repeated for credit.

THEA 337 Software for Lighting Design credit: 2 Hours.
Practical study of lighting design software currently used in the professional theatre and the entertainment industry. As technology evolves and new software developed, software programs will be added. Accommodating upgrades may necessitate offering the course every other year. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: THEA 231 and THEA 425.

THEA 339 Stage Mechanics II credit: 3 Hours.
Examines newly accepted and developing techniques and materials used in constructing and rigging stage scenery with emphasis on metalworking. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours.

THEA 440 Stage Mechanics III credit: 3 Hours.
Study in advanced scenery methods and materials, including advanced woodworking, plastic-craft, and rigging. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 126.

THEA 442 Costume Patternmaking credit: 3 or 4 Hours.
Methods of drafting and drafting patterns for period theatrical costumes. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

THEA 444 Costume Draping credit: 4 Hours.
Development of patterns for theatrical costumes through advanced draping techniques. Extensive lab work culminating in draping and constructing. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 442.

THEA 445 Costume History and Design I credit: 2 or 4 Hours.
Surveys theatrical costume and fashion of major periods; emphasizes relationships to styles of art and dramaturgy, social milieu, and production design. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Consent of instructor.

THEA 446 Costume History and Design II credit: 2 or 4 Hours.
Continuation of THEA 445. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: THEA 445 or equivalent.

THEA 447 Costume Rendering credit: 3 or 4 Hours.
Studio course in costume rendering techniques: analysis of costume figure, rendering of fabrics, exploration of various rendering media. Enrollment limited to Theatre majors. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

THEA 448 Advanced Costume Crafts credit: 3 or 4 Hours.
The research, rendering, and execution of armor, millinery, jewelry, and masks; dyeing with natural substances and with chemical dyes and the art of distressing clothing to achieve an aged, worn, tired or tattered look. Student is responsible for providing all materials used to complete the various projects. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 445 and THEA 446.

THEA 449 Costume Fabrication credit: 4 Hours.
Explores, through design projects, the appropriateness of various fabrics for specific costumes determined by historical accuracy, style, and constructability. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 445 and THEA 446. Costume Majors or consent of instructor.

THEA 450 Management Seminar credit: 1 Hour.
Addresses production and management issues surrounding Theater Department and KCPA productions. Guest speakers provide professional points of view on various management topics. 1 undergraduate hour. 1 graduate hour. May be repeated in separate terms to a maximum of 6 undergraduate or 6 graduate hours.

THEA 451 Principles of Stage Management credit: 3 or 4 Hours.
Studies in the principles and the craft of stage management. Enrollment limited to Theatre majors. 3 undergraduate hours. 4 graduate hours. Prerequisite: Minimum of sophomore standing in a Theatre curriculum.
THEA 452 Principles of Arts Management credit: 3 or 4 Hours. Introduction to the basic practices of theatre and arts management with emphasis on facilities management, arts marketing, and financial planning in the performing arts. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior or graduate standing.

THEA 453 Theatre Sound Technology credit: 3 Hours. Exploration of audio production techniques and equipment, as related to theatre sound. Related topics include acoustics, electronics, and music. 3 undergraduate hours. 3 graduate hours. Prerequisite: Enrollment limited to junior, senior or graduate theatre majors.

THEA 454 Sound Design I credit: 3 Hours. Introduction to sound reproduction, recording, and basic systems design as applied to the modern theatre. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 453, THEA 455 and THEA 459.

THEA 455 Audio Production credit: 2 Hours. Project-based study of professional techniques in audio recording, mixing, and editing for music, theatre, and film production, utilizing current digital technology. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: THEA 453.

THEA 456 Properties Design credit: 3 Hours. Principles of stage property design, planning and management. 3 undergraduate hours. 3 graduate hours.

THEA 457 Model Making for the Stage credit: 2 Hours. Familiarizes students with diverse techniques, materials, and tools available to model makers, especially in theatre design. Focuses work on traditional craftsmanship of 1/4" scale and 1/2" scale models including sculpting, casting, and soldering. Also address issues of scale, texture, color, and specialty finishes. Open to all designers, artists, and technicians, including students in Museum Studies. Prior knowledge of studio art helpful but not required. 2 undergraduate hours. 2 graduate hours. Prerequisite: Contact instructor for approval.

THEA 458 Rendering for Live Performance credit: 2 Hours. Develops students’ ability to visualize their design ideas through drawings and renderings. Students will deal with perspective problems and study shadow and light. Focuses on painting techniques with various media on different surfaces and explorations of different materials used by known designers in the field. Students will be given opportunities to render specific design projects for their personal portfolios. Course consists of lectures, demonstrations, and in-class exercised. Open to all designers, artists, and technicians. 2 undergraduate hours. 2 graduate hours. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor required.

THEA 459 Sound Systems credit: 2 Hours. Project-based study of professional techniques in sound system applications and design for sound reinforcement in music, theatre, and architectural applications. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: THEA 453.

THEA 460 Multi-Ethnic Theatre credit: 4 Hours. Focuses on the history and aesthetics of African, Asian, African American, Asian American, Latino/Latina, and Native American plays and productions. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 102.

THEA 463 American Theatre History I credit: 3 or 4 Hours. Survey of the development of American theatre as a cultural, social, political, and economic institution from the colonial era to 1900. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior, or graduate standing.

THEA 464 American Theatre History II credit: 3 or 4 Hours. Survey of the development of American theatre as a cultural, social, political, and economic institution from the late nineteenth century to the present. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior or graduate standing.

THEA 465 Musical Theatre History credit: 4 Hours. History of the American musical in the twentieth century, studied through the contributions of major composers, lyricists, directors, and choreographers. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above, or consent of instructor.

THEA 467 Contemporary Theatrical Forms credit: 3 or 4 Hours. Study of post-World War I theatre, including the New Stagecraft, expressionism, Brecht and epic theatre, theatre of the absurd, and later developments. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 208, and junior, senior or graduate standing.

THEA 471 Acting Studio III: Dynamics credit: 1 Hour. Continuing development of movement and voice skills for actors. Enrollment limited to Theatre majors. 1 undergraduate hour. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 472, THEA 473 and THEA 474.

THEA 472 Acting Studio III: Voice credit: 2 Hours. Advanced training in voice and speech for the stage with emphasis on classic texts. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 471, THEA 473 and THEA 474.

THEA 473 Acting Studio III: Movement credit: 2 Hours. Training in stage combat, sword, and rapier. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 471, THEA 472 and THEA 474.

THEA 474 Acting Studio III: Acting credit: 3 Hours. Acting in Shakespearean and other Elizabethan, Jacobean, and Caroline drama. A performance is given at the end of the term. Enrollment limited to Theatre majors. 3 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent enrollment in THEA 471, THEA 472 and THEA 473.

THEA 475 Acting Studio IV: Dynamics credit: 1 Hour. Continuing development of movement and voice skills for actors. Enrollment limited to Theatre majors. 1 undergraduate hour. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 476, THEA 477 and THEA 478.

THEA 476 Acting Studio IV: Voice credit: 2 Hours. Advanced training in voice and speech for the stage with emphasis on dialects. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 477 and THEA 478.

THEA 477 Acting Studio IV: Movement credit: 2 Hours. Advanced training in unarmed stage combat and quarterstaff. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 476 and THEA 478.
THEA 478  Acting Studio IV: Acting  credit: 3 Hours.
Studies in the techniques of acting for the camera and cold readings; analysis of distinguished film acting. Scenes are recorded in the television studio. Enrollment limited to Theatre majors. 3 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 476 and THEA 477.

THEA 479  Preparation for Auditions  credit: 2 Hours.
Each actor, through extensive research, prepares a portfolio of audition pieces for the opportunities imminent before and after graduation for resident companies, commercial productions, and film, or professional graduate schools. Enrollment limited to Theatre majors. 2 undergraduate hours. 2 graduate hours. Prerequisite: THEA 375, THEA 376, THEA 377, THEA 378.

THEA 483  Modern Scandinavian Drama  credit: 3 or 4 Hours.
Same as CWL 463 and SCAN 463. See SCAN 463.

THEA 488  Premodern Chinese Drama  credit: 3 or 4 Hours.
Same as CWL 416 and EALC 413. See EALC 413.

THEA 490  Professional Internship  credit: 0 to 14 Hours.
Professional work with an approved host theatre or institution in an area related to the student’s academic program; exposure to and participation in professional theatre. Full documentation and approval of internship activities required. 0 to 14 undergraduate hours. 0 to 12 graduate hours. Approved for S/U grading only. May be repeated in the same or subsequent terms, if topics vary. Prerequisite: Junior, senior, or graduate standing in Theatre; consent of Internship Coordinator.

THEA 492  Digital Rendering for Lighting  credit: 3 or 4 Hours.
An exploration of 3-D rendering techniques for live performance using software specific to the lighting industry. Teach skills necessary to create an artistic representation of a design and to imagine a production. 3 undergraduate hours. 4 graduate hours.

THEA 493  Lighting Opera & Musicals  credit: 3 or 4 Hours.
An advanced study of techniques used for lighting musicals and operas through paper projects and various lectures. 3 undergraduate hours. 4 graduate hours.

Urban and Regional Planning, Department of

Rob Olshansky
111 Temple Hoyne Buell Hall
611 East Lorado Taft Drive
Champaign, IL 61820
PH: (217) 333-3890
http://www.urban.illinois.edu

BAUSP Director: Alice Novak, Assistant Head

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

The Department also offers a minor in Urban Studies and Planning. The minor provides students with the opportunity to apply disciplinary knowledge from a variety of fields (such as economics, politics, environmental science, informatics, sociology, architecture, landscape architecture) toward understanding urban phenomena and planning for orderly, efficient, functional, environmentally friendly, and aesthetically pleasing urban development. The minor introduces students to a) cities as arenas with challenges such as housing affordability, population segregation, neighborhood disinvestment and decline, environmental pollution, and traffic congestion; and b) professional planning practice, which devises actions to address such issues and improve the quality of life in urban areas. Urban issues are explored on a range of scales from the neighborhood to the mega city.

The Department’s administrative and faculty offices, classrooms, and computer laboratory space are located in Temple Hoyne Buell Hall. Students may go to Room 111 for information.

The Department of Urban and Regional Planning also offers a program of graduate studies leading to the Master of Urban Planning degree, joint degree programs with the Master of Architecture, Master of Landscape Architecture and the Juris Doctor degrees, and the Doctor of Philosophy in Regional Planning.

Curriculum in Urban and Regional Planning

For the Degree of Bachelor of Arts in Urban Studies & Planning (BAUSP)

A minimum of 120 hours is required for this degree.

Current University of Illinois General Education requirements include courses in humanities, composition, social sciences, natural sciences and technology, cultural studies, quantitative reasoning, and foreign language. See the General Education Web site (http://www.courses.illinois.edu/gened) for information on courses that meet these requirements.

UP 316  Urban Informatics II
Concentration Electives
UP 301  Capstone Preparation

4th Year
Concentration Workshop (UP 447, UP 455, UP 456, UP 457, or UP 478)
Capstone Experience (UP 390 or UP 397)
UP 401  Undergraduate Capstone Seminar
Plus 15 hours of UP electives, GE not met by UP foundation & Core, and open electives.

Foundation Courses
RHET 105  Writing and Research (or equivalent)  4
3-4 hours selected from:
  AAS 100  Intro Asian American Studies
  AFRO 100  Intro to African American St
  AIS 102  Contemp Issues in Ind Country
  GEOG 101  Global Development&Environment
  GEOG 104  Social and Cultural Geography
  LLS 100  Intro Latina/Latino Studies
  SOC 100  Introduction to Sociology
  ECON 102  Microeconomic Principles  3
  or ACE 100  Agr Cons and Resource Econ
  UP 116  Urban Informatics I (or equivalent)  3
  or STAT 100  Statistics
Total Hours  10

Urban Studies and Planning Core
UP 101  Introduction to City Planning  3
UP 201  Planning in Action  3
UP 203  Cities: Planning & Urban Life  3
UP 312  Communication for Planners  4

Sustainability Concentration
UP 205  Ecology & Environmental Sustainability (Gateway)  3
Select 2 courses from:  6-8
  UP 136  Urban Sustainability
  UP 405  Watershed Ecology and Planning
  UP 420  Plng for Historic Preservation
  UP 446  Sustainable Planning Seminar
  UP 460  Transportation/Land Use Policy
  UP 466  Energy, Plng & Blt Environment
  UP 480  Sustainable Design Principles
  UP 456  Sustainable Planning Workshop (Workshop)  4

Policy and Planning Concentration
UP 211  Local Planning, Gov’t and Law (Used to be UP 311. This is the Gateway course for Policy and Planning.)  3
Select 2 courses from:  6-8
  UP 330  The Modern American City
  UP 340  Planning for Healthy Cities

Select 1 Workshop Course from:
UP 447  Land Use Planning Workshop
UP 455  Economic Development Workshop
UP 457  Small Town/Rural Planning Workshop

Social Justice Concentration
UP 260  Social Inequality and Planning (Gateway)  3
Select 2 courses from:  6-8
  UP 335  Cities and Immigrants
  UP 340  Planning for Healthy Cities
  UP 423  Community Development in the Global South
  UP 473  Housing & Urban Policy
  UP 478  Community Development Workshop (Workshop)

Global Cities Concentration
UP 185  Cities in a Global Perspective (Gateway)  3
Select 2 courses from:  6-8
  UP 335  Cities and Immigrants
  UP 423  Community Development in the Global South
Workshop: Study Abroad  4

Capstone
Required Courses:  Required Hours
Capstone Preparation: During the 3rd year, students enroll in UP 301, Capstone Preparation. Students meet individually with their capstone advisor to develop a plan to meet the capstone requirement. To pass this course students must turn in a proposal at the end of the semester.

Information listed in this catalog is current as of 03/2017
Capstone Experience: Students engage in a semester or summer-long applied activity outside of the classroom. The Capstone Experience is intended to engage the students in the real world and prepare them for the job market. Students typically complete this requirement during their junior year, but have the option to complete it during the summer between their 3rd and 4th year. Examples include a paid or unpaid internship, volunteer work, consulting project with a client, summer research and more. Students enroll in UP 390, Planning Internship, and/or UP 397, Undergraduate Capstone, to receive credit.

Capstone Seminar: During the 4th year, students enroll in UP 401 for 2 semesters. Students will participate in monthly activities to discuss and reflect on the Capstone Experience. In addition, students will present a poster summarizing their capstone experience in a public setting; for example at a public engagement conference, public meeting or community meeting, McNair Scholars conference, James Scholars event, Illinois American Planning Association meeting, undergraduate research symposium, or other venue. The seminar sessions also include career development such as resume writing, interviewing and networking with professionals through the Wetmore Lecture Series.

Total Hours: 20

Admission criteria: 2.75 GPA, as space is available. For admission criteria and process, see www.urban.illinois.edu (http://www.urban.illinois.edu) or contact the BAUSP Director, Alice Novak, at novak2@illinois.edu.

UP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/UP)

Courses

**UP 101** Introduction to City Planning credit: 3 Hours. Provides an introduction to urban and regional planning by examining the history of American urbanization, the evolution of American planning thought and practice, and contemporary issues and planning approaches.

**UP 116** Urban Informatics I credit: 3 Hours. Introduces students to basic analytical techniques used to better understand how cities work. Topics include the foundational statistical concepts of data, variation, and inference. Students formulate a research question about an urban studies or planning issue, collect data, use statistical software to analyze data, and communicate the findings. This course satisfies the General Education Criteria for: UIUC: Quant Reasoning I

**UP 136** Urban Sustainability credit: 3 Hours. Provides students with a basic understanding of how to make cities more sustainable by connecting how and where we live to environmental issues. Emphasis on green infrastructure and urban systems, vulnerability and resilience, green design and construction methods, energy production and consumption, and water conservation.

**UP 185** Cities in a Global Perspective credit: 3 Hours. Introduction to the process of urbanization from a global perspective by exploring the social, political, cultural and economic forces that shape urban life. Students will learn to analyze urban development in a range of cities including those in the Middle East and South Asia, Latin America and Africa.

This course satisfies the General Education Criteria for: UIUC: Social Sciences UIUC: Western Comparv Cult

**UP 199** Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

**UP 201** Planning in Action credit: 3 Hours. Introduces students to different career paths open to urban studies and planning majors. Students interact with professionals and take part in hands-on activities related to different concentration areas: sustainability, policy & planning, social justice and global cities.

**UP 203** Cities: Planning & Urban Life credit: 3 Hours. Provides a broad introduction to social science theories and analysis methods to examine how people, communities, and governments plan a city. Draws upon theories and methods of several social science disciplines including economics, geography, political science, anthropology and sociology. Includes hands-on application of fundamental analysis techniques. Credit is not given for both UP 203 and UP 204. Prerequisite: UP 101.

**UP 204** Chicago: Planning & Urban Life credit: 3 Hours. Provides a broad introduction to social science theories and analysis methods, and uses the City of Chicago as a semester-long case study to examine how people, communities, and governments plan a city. Draws upon theories and methods of several social science disciplines including economics, geography, political science, anthropology, and sociology. Balances themes and concepts from the assigned readings with discussion of Chicago-specific case studies and hands-on application of fundamental analysis techniques. Credit is not given for both UP 204 and UP 203. Prerequisite: UP 101.
UP 205  Ecology & Environmental Sustainability  credit: 3 Hours.
Basic ecological principles underlying environmental sustainability. Examination of problems that arise from inadequate consideration of structure and function of ecological systems, and approaches to ecological restoration and environmentally sound planning. Applications of principles to case studies drawn from urban planning, natural resource management and sustainable development. This course satisfies the General Education Criteria for: UIUC: Life Sciences

UP 210  Environmental Economics  credit: 3 Hours.
Same as ACE 210, ECON 210, ENVS 210, and NRES 210. See ACE 210. This course satisfies the General Education Criteria for: UIUC: Social Sciences

UP 211  Local Planning, Gov't and Law  credit: 3 Hours.
Provides students with a basic understanding of the governmental structure, legal aspects, and practice of local municipal planning, with special emphasis on case law, constitutional principles, zoning, subdivision regulations and comprehensive planning. Gives an introduction for students interested in pursuing more advanced studies in land use law and local government planning.

UP 260  Social Inequality and Planning  credit: 3 Hours.
How are inequalities produced and contested in an urban environment? This course examines this question by analyzing how the urban landscape shapes and is shaped by race, class, and gender inequalities. Uses comparative cases to explore successful intervention, both from formal and informal, across multiple scales from the local to the global. This course satisfies the General Education Criteria for: UIUC: Social Sciences

UP 301  Capstone Preparation  credit: 1 Hour.
Students work with capstone advisor to develop a plan to meet the capstone experience requirement. Students submit a proposal at the end of the semester. Approved for S/U grading only. Prerequisite: Junior standing.

UP 312  Communication for Planners  credit: 4 Hours.
Integrates written, verbal, and graphic communication techniques into planning and analysis. Activities simulate professional situations where students develop skills and pieces of broader arguments and synthesize them into final products. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

UP 316  Urban Informatics II  credit: 3 Hours.
Provides an introduction to formal methods for collecting and analyzing data required in various planning processes. Methods include survey research, regional demographic and economic analysis, forecasting techniques, benefit-cost analysis, and decision analysis. Prerequisite: UP 116 or an introductory statistics course. This course satisfies the General Education Criteria for: UIUC: Quant Reasoning II

UP 330  The Modern American City  credit: 3 Hours.
Explore the transformation of the American city in its journey from abandonment to renewed growth. Cities today are sites of rapid change and experimentation with new ideas for how people can and should live. This course examines the resurgence of American cities, the challenges they face, and their transformation in the 21st century. Each week, class will focus on a different aspect of the modern American city—work, housing, globalization, high finance—and explore its promises, challenges, and implications for the future.

UP 335  Cities and Immigrants  credit: 3 Hours.
Focuses on the experiences of United States cities and towns undergoing rapid demographic economic, social, and cultural changes and the local responses to those changes, including local policy making, land-use regulations, community controversy, and grassroots activism. Same as SOCW 335.

UP 340  Planning for Healthy Cities  credit: 3 Hours.
Explores the evolving role of health in urban planning. Historical and current theories on the relationship between public health and the built environment are highlighted, as are prescriptions for healthy urban design. Community health planning, health disparities, and the needs of special populations in the city are also examined, along with some of the major policy issues affecting urban health care today.

UP 345  Economic Development Planning  credit: 3 Hours.
Public-private-partnerships in urban economic development, including study of potentials, problems, and projects; financing urban economic development through federal grant programs, tax increment financing, and other means.

UP 347  Junior Planning Workshop  credit: 6 Hours.
Introduction to planning practice, with an emphasis on physical planning skills. Includes field observation, spatial data analysis, professional communication, and design. Prerequisite: UP 205, UP 312, UP 260 and UP 316.

UP 357  The Land Development Process  credit: 3 Hours.
The planning practice requires an understanding of the land development process. In this course students will learn about the decision process used for land development and the technical skills required for reading site plans. The course provides the essential skills necessary in the field of public-sector planning. Developers are required to make key determinations in the decision process for developing land. Planners are required to understand these decisions and they must possess the ability to interpret proposed site plans for development. This includes an understanding of existing conditions of land proposed for development and the impact of new development on the site and surrounding areas. This course contains three primary components in teaching an understanding of the land development process. They are: Understanding Market Decision for Developing Land; Reading Site Plans; and Assembling a Development Plan. Credit is not given for UP 357 if credit for UP 347 has already been given. Prerequisite: UP 312-Communication for Planners is highly recommended or basic familiarity with InDesign, Illustrator, and SketchUp.

UP 390  Planning Internship  credit: 0 to 4 Hours.
Professionally supervised field experience in public and private planning or development agencies. Designed to introduce students to professional employment and actual planning practice. Students work in an agency of their own choice, subject to departmental approval, either during the summer session or part-time during a regular term. At least two weeks of full-time employment or its equivalent is required for each term hour of credit to a maximum of 4 hours. Summary reports are submitted by both employer and student. Approved for S/U grading only. May be repeated. Counts toward the Capstone Experience Requirement. Prerequisite: Upper division undergraduate standing in urban planning.

UP 397  Undergraduate Project  credit: 1 to 3 Hours.
Special projects and applied research related to real world urban problems and professional practice. One credit hour requires approximately 80 hours of work. May be repeated up to 3 hours. Counts toward the Capstone Experience Requirement. Prerequisite: Upper division standing in Urban Planning and consent of Capstone advisor.

Information listed in this catalog is current as of 03/2017
UP 401 Undergraduate Capstone Seminar credit: 1 Hour.
Seminar for peer discussion about the capstone experience and required capstone experience presentation. Students will attend lectures and workshops about career opportunities, resume writing, interviewing, and networking. Meets on a monthly basis. 1 undergraduate hour. No graduate credit. Approved for S/U grading only. May be repeated in separate terms up to 2 hours. Prerequisite: Senior standing.

UP 405 Watershed Ecology and Planning credit: 4 Hours.
Uses the watershed as the basic organizing concept in environmental planning and management; methods for assessing watershed boundaries, soils, land use, and groundwater system processes and developing plans for watershed protection. Emphasizes ecological implications of patterns of land use on functional and qualitative aspects of watershed systems. All-day field trip required. 4 undergraduate hours. 4 graduate hours. Prerequisite: Should have a previous course in environmental science.

UP 406 Urban Ecology credit: 4 Hours.
Examines cities as natural systems, combining ecological analyses with historical, anthropological, and sociological studies of urban nature. Addresses ecological sustainability, growth management, biodiversity, restoration, and environmental justice. Required field trip. Same as ENVS 406. 4 undergraduate hours. 4 graduate hours.

UP 407 State and Local Public Finance credit: 4 Hours.
Provides students with an understanding of the fundamental concepts of fiscal planning at the state and local levels of government. Addresses both the theory and methods of state and local finance, focused on state and local fiscal policy. Addresses emerging policy issues involving land use and taxation, spending and budgeting, intergovernmental cooperation, debt financing, financing for economic development, and privatization. 4 undergraduate hours. 4 graduate hours.

UP 418 GIS for Planners credit: 4 Hours.
Detailed introduction to the design and use of computerized geographic information systems, focusing on their significance for planning. Emphasizes GIS within an institutional setting, covering not only fundamental technical concepts, but also organizational, management, and legal issues. Students will be introduced to GIS applications and products through readings, videos, demonstrations, and exercises. Computer laboratory work is included. 4 undergraduate hours. 4 graduate hours. Prerequisite: Upper division undergraduate or graduate standing.

UP 420 Planning for Historic Preservation credit: 4 Hours.
Historic preservation in the context of urban planning, including legal issues and ordinances, economic incentives, comprehensive plans and preservation plans, public participation, media relations, and more. Students will conduct a building survey including research and architectural descriptions for an on-going project in Urbana. Tours of local preservation projects. 4 undergraduate hours. 4 graduate hours. Prerequisite: At least junior standing.

UP 423 Community Development in the Global South credit: 4 Hours.
Introduces students to the main theoretical frameworks and conceptual building blocks of urban and community development in the Global South. It helps students to develop critical grassroots focused understanding of the approaches to development planning, the notion of community participation and empowerment, and the role of various actors including the non-government organizations and the community-based groups. 4 undergraduate hours. 4 graduate hours.

UP 426 Urban Design and Planning credit: 4 Hours.
Concepts and techniques of urban analysis, plan making, and implementation essential for effective interdisciplinary work in urban design. 4 undergraduate hours. 4 graduate hours. Prerequisite: Senior standing.

UP 428 International Planning Studio credit: 3 to 6 Hours.
Involves multidisciplinary student teams developing design or policy proposals for urban development of sites in international contexts. The studio combines seminar and studio/workshop formats to apply critical analysis, define planning problems, and propose solutions that integrate the social, economic, physical, and cultural aspects of site development. 3 to 6 undergraduate hours. 3 to 6 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

UP 430 Urban Transportation Planning credit: 4 Hours.
Role of transportation in urban development and planning; characteristics of urban-person transportation systems and methods of analysis and forecasting of urban-person transportation demand; transportation systems management and capital improvement programming; and emphasis on the needs and activities of metropolitan planning organizations. Same as CEE 417. 4 undergraduate hours. 4 graduate hours.

UP 436 Urban Design Workshop credit: 4 Hours.
Examines urban design theory and principles, and evaluates the built environment in a lab-based setting. Working in teams, students become immersed in real work examples and propose design interventions for specific places, including socially diverse neighborhoods in small cities and major metropolitan urban centers. Normally includes active engagement with community residents. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 426, senior or graduate standing, or consent of instructor.

UP 438 Disasters and Urban Planning credit: 4 Hours.
Introduction to the role of urban planners in preparing for and rebuilding after disasters. Emphasizes U.S. planning practice, with particular attention to the role of local government. Includes basic U.S. emergency management laws and framework, local mitigation planning, and post-disaster recovery planning. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate standing, senior in Urban Planning, or consent of instructor.

UP 441 Land Resource Evaluation credit: 4 Hours.
Same as LA 441. See LA 441.
UP 443  Scenarios, Plans & Future Cities  credit: 3 Hours.
This course teaches theories and tools of scenario analysis, a set of techniques useful for making plans and creating more sustainable future cities. Scenario analysis can be used to think about multiple facets of a problem simultaneously and for addressing the uncertain future in light of the limited cognitive and computational capacity of individuals and organizations. Urban planners and policymakers are adopting and extending scenario approaches to envision the future, analyze decisions, and identify robust strategies in situations as varied as comparing projected outcomes of alternative routes for highway investment, to making decisions in situations when formal regulatory mechanisms may be lacking. The need for knowledge and skills in this area is reflected in (1) the growing use of scenario analysis as a required method in many government-funded planning initiative in the United States and around the world, (2) new courses and workshops offered by urban planning programs and professional trainers, such as the American Planning Association and Planetizen, and (3) the sprouting of scenario planning support tools, such as Envision Tomorrow and Index PlanBuilder. 3 undergraduate hours. 3 graduate hours. Prerequisite: A completion of an urban planning class would be useful. Junior standing is required.

UP 446  Sustainable Planning Seminar  credit: 4 Hours.
Examines sustainability issues of concern to planners, such as resource conservation, urban growth, environmental justice, industrial development, social equity, sustainable agriculture, and economic development. Presents holistic approaches ranging from theoretical concepts to detailed case studies that combine urban and regional land use, physical design, and policymaking. Same as GEOG 446 and NRES 446. 4 undergraduate hours. 4 graduate hours.

UP 447  Land Use Planning Workshop  credit: 4 Hours.
Small group field work applying principles and techniques to specific land use problems in selected jurisdictions. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 211, senior or graduate standing, or consent of instructor.

UP 455  Economic Development Workshop  credit: 4 Hours.
Small group field work applying principles and techniques of economic development planning and policy analysis to specific problems in selected cities, regions, or states. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 345 or consent of instructor.

UP 456  Sustainable Planning Workshop  credit: 4 Hours.
Focuses on applying sustainable planning principles in a real world setting. Readings and research into indices of sustainable development, sustainable urbanism, and related literature help establish parameters for resolving a local planning project. Course is a hybrid workshop with portions of the semester spent on reading, research, and application working with a local planning agency. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 136 and UP 205, senior or graduate standing, or consent of instructor.

UP 457  Small Town/Rural Planning Workshop  credit: 4 Hours.
What is rural and why does it matter? This workshop focuses on small towns and rural communities using Central Illinois communities in local case studies. Students will apply concepts and skills from prior courses and work extensively in teams to compile, synthesize, and communicate information that furthers planning and placemaking efforts. Archival research techniques; analysis of demographic, social, and economic trends; qualitative interviewing; and documentary film production are examples of the kinds of skills students will develop and refine. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 211, senior or graduate standing, or consent of instructor.

UP 460  Transportation/Land Use Policy  credit: 4 Hours.
Provides an integrated perspective and analytical framework for understanding urban transportation and land use policies. Emphasizes the interplay between the built environment and transportation by focusing on: fundamental travel demand theories; performance measures of urban transportation systems; impacts of transportation on land use and urban form; impacts of land use and urban form on travel patterns; congestion pricing; public transportation and active transportation; and transit oriented development (TOD). 4 undergraduate hours. 4 graduate hours.

UP 466  Energy, Plng & Blt Environment  credit: 4 Hours.
Focuses on the study of buildings, including their past and present uses, their place in the environment, and most importantly, how they can become more sustainable. Teaches students to think about and plan physical space from an energy-and climate-centric perspective. Uses climate mitigation and building energy systems-modeling techniques to analyze potential energy systems reductions and approaches to affect a building’s carbon footprint. Same as LA 466. 4 undergraduate hours. 4 graduate hours.

UP 470  Shrinking Cities  credit: 4 Hours.
This seminar examines urban shrinkage—a phenomenon typically associated with population loss, but also characterized by obsolescence, disinvestment, and abandonment. While some cities thrive and struggle to house the global urban majority, other cities face the stark reality of shrinkage and decline. What should we do to envision and enact a viable future for our shrinking cities? This course will be taught as a seminar, using readings, student facilitated discussions, and lectures as a means for creating a shared understanding around urban shrinkage. Literature from Planning, Economics, Sociology, and other areas will contribute to discussions of the meaning of urban decline as a set of social, economic, and spatial phenomena. Some seminar sessions will be "lab" sessions, focused on developing your analytical skillset via qualitative and quantitative methods. 4 undergraduate hours. 4 graduate hours. Credit is not given for UP 470 if credit for UP 494-AG has been given. Prerequisite: Students must have at least a junior standing.

UP 473  Housing & Urban Policy  credit: 4 Hours.
The role of housing in American social policy planning: the history of public and private intervention in housing, regulation of supply and demand within housing markets and market imperfections; analysis of public policies for housing as they affect special populations (for example, the poor, the elderly, the disabled, homeless, and minorities). 4 undergraduate hours. 4 graduate hours.

UP 474  Neighborhood Revitalization  credit: 4 Hours.
Examines rationale and techniques for planning at the neighborhood level; the major social, political, and economic issues that confound public and private sector efforts to revitalize distressed neighborhoods. 4 undergraduate hours. 4 graduate hours.

Information listed in this catalog is current as of 03/2017
UP 475  Real Estate Development Fundamentals  credit: 4 Hours.
This course will provide an introduction to the fundamental concepts and techniques applied in the real estate development process. In addition, this course will examine both the broader economic and social context in which real estate development is situated as well as how various professions interact within this context. Course assessments will include several case study assignments and a group project using an actual development site that will provide students with the chance to apply the concepts and techniques learned in the course, culminating in a final report and presentation. The overall objective of the course is to provide students with a useful framework for understanding the real estate development process, allowing them to identify viable development opportunities and analyze real estate development projects, while weighing the economic, social, and environmental costs and benefits for a community. 4 undergraduate hours. 4 graduate hours. Credit is not given for UP 475 if credit was already given for UP 494-RE. Prerequisite: This course has no prerequisites, however, having had at least an introductory urban planning class would be helpful. Upper-level or graduate standing is recommended.

UP 478  Community Development Workshop  credit: 4 Hours.
Application of community development principles and techniques to the solution of environmental, economic and social problems facing low income urban communities. Involves small group projects and off-campus field work in collaboration with community leaders. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 260, senior or graduate standing, or consent of instructor.

UP 480  Sustainable Design Principles  credit: 2 Hours.
Same as LA 480. See LA 480.

UP 481  Urban Communities & Public Pol  credit: 3 or 4 Hours.
Same as AFRO 481 and SOC 472. See AFRO 481.

UP 493  Democracy and Environment  credit: 3 or 4 Hours.
Same as GEOG 493, NRES 494, SOC 493. See GEOG 493.

UP 494  Special Topics in Planning  credit: 1 to 6 Hours.
Seminar on topics of current interest, as announced in the Schedule. 1 to 6 undergraduate hours. 1 to 6 graduate hours. May be repeated to a maximum of 16 hours.

Minor in Art History
The minor in art history is designed for students who seek to study art history in depth as a complement to their major area of study. The minor provides students with an education in art history that is balanced and diverse culturally, temporally, and geographically. It allows students to choose from a variety of introductory courses that cover a variety of regions, cultures, and periods.

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
140 Art and Design Building, Champaign, 333-6632, mervazy@illinois.edu

Course Requirements
Students must meet the following course requirements for a total of 20 hours:

Select two of the following (one of which must be ARTH 113 or ARTH 114):

- ARTH 111  Ancient to Medieval Art
- ARTH 112  Renaissance to Modern Art
- ARTH 113  Introduction to African Art

- ARTH 114  Introduction to East Asian Art
- ARTH 115  Art in a Global Context
- ARTH 395  Junior Seminar in Art History  3
- ARTH courses at the 200, 300, or 400 level  3
- ARTH courses at the 300 or 400 level  6

1 A maximum of one course from either the History of Architecture or the History of Landscape Architecture will count toward the requirements of the Art History Minor.
2 At least one course must be primarily concerned with a subject outside of Europe and the Modern Americas. A maximum of one course from other universities will satisfy the requirements for upper-level Art History courses.

General Studies, Division of
Daniel J. Turner, Ph.D., Director
Kristi Kuntz, Associate Provost
Campus Center for Advising and Academic Services (CCAS)
Illini Union Bookstore Building.
Fifth Floor
807 S. Wright Street
Champaign, IL 61820
(217) 333-4710
http://dgs.illinois.edu
genstudies@illinois.edu

The Division of General Studies (DGS) assists undeclared students with the process of exploring and declaring majors at the University of Illinois by providing holistic, developmental academic advising. DGS offers students the ability to connect with academic advisors who are committed to their success.

The Division of General Studies helps students:

- Clarify their academic, personal, and career goals;
- Identify their strengths, skills, interests, and values;
- Understand the process of exploring majors at Illinois;
- Identify the programs of study available at Illinois;
- Understand specific programmatic and degree requirements;
- Understand the Intercollegiate Transfer (ICT) process at Illinois;
- Recognize the significance of and their responsibility in the academic advising relationship;
- Learn about and connect with appropriate campus resources and services;
- Learn about the educational opportunities available at the University of Illinois including undergraduate research, study abroad, tutoring, leadership development, involvement in student organizations, volunteer experiences, and connections with faculty.

DGS provides students with opportunities to participate in academic achievement programs, the James Scholar Honors program, and short-term study abroad experiences. In addition, all DGS students enroll in an introduction to the university course, General Studies 101 (GS 101), to assist with their transition to college life and provide insight into the major exploration process at Illinois. Students may be enrolled in the Division of General Studies for up to four semesters before being required
to declare a major in one of the undergraduate colleges at the University of Illinois.

Liberal Arts and Sciences, College of

2002 Lincoln Hall
702 South Wright Street
Urbana, IL 61801
(217) 333-1705
http://las.illinois.edu

The College of Liberal Arts and Sciences (LAS) has four missions: scholarly inquiry and the generation of knowledge, preparation of individuals for an array of careers and professions, service to the public, and the provision of the intellectual core of the University. The college shares the first three missions with professional schools and other colleges on this campus, but the last mission is uniquely the responsibility of the College of Liberal Arts and Sciences. By fulfilling this responsibility, the college helps develop broadly educated individuals who are committed to or characterized by open inquiry, critical thinking, effective communication, and responsiveness to the needs of individuals and society.

Students in the college are expected to understand the content of and to develop skills in areas that reflect the overall purpose of the college: fluency and facility in English; literacy in at least one additional language; broad exposure to a number of different disciplines; and intensive study in one discipline (or an interdisciplinary program). The student has a wide choice of courses to satisfy these requirements; however, ultimately he or she must plan a diverse and intensive program of study, prepare for an occupational, professional and intellectual future, and develop that clarity and range of mind that is the goal of educated people.

Information for current students may be found here: http://www.las.illinois.edu/students/

Information for newly admitted students may be found here: http://www.las.illinois.edu/students/admission/

Information for prospective students may be found here: http://www.las.illinois.edu/prospective/

African American Studies

Ronald Bailey, Department Head
1201 West Nevada, Urbana
PH: (217) 333-7781
http://www.afro.illinois.edu

The Department of African American Studies undergraduate offerings include an undergraduate major and minor.

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AAS students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, computer and statistical skills. Students majoring in AAS will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society, and to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares
students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

**For the Degree of Bachelor of Arts in Liberal Arts and Sciences**

**Major in Sciences and Letters Curriculum**

E-mail: loturner@illinois.edu (loturner@uiuc.edu)

Minimum required major and supporting coursework equates to 48 hours.

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level African American Studies courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction:

To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

**I. Core course requirements**

**II. Theory and Methods Requirement**

At least one theory and one methods course beyond the core. The courses must be selected from a list maintained in the Department’s advising office.

**III. Thematic Areas**

Students must take at least one course each from the following five areas. At least 6 of the remaining hours must be taken from only one of any of the five areas. A list of courses is maintained in the Department's advising office.

A. Comparative Race, Racialized Communities and Identities
B. Cultural Production and Cultural Movements
C. Political Economy, Public Policy and Contemporary Issues
D. Global Interconnections: Black Transnationalism and the African Diaspora
E. Black Women, Gender and Sexuality Studies

**IV. Cognate or Supporting Coursework**

Students must complete 9 hours of supporting coursework. Supporting coursework courses consists of a set of courses which are logically grouped, and which reflect or support a student’s interests outside of the African American Studies major. Supporting coursework courses must be approved by the Department’s undergraduate advisor.

**Total Hours**

48

**Interdisciplinary Minor in African-American Studies**

The Department of African American Studies offers a campus-wide interdisciplinary minor in African American Studies. The minor is premised on the following principles: Interdisciplinarity, the centrality of Black women and gender, the use of the Global Africa/African Diaspora as a contextualizing framework and an emphasis on black agency or self-determining activity of African peoples. A minimum grade point average of 2.33 is required for completion of courses taken in the program. The Department of African American Studies must approve a student’s minor course plan.

**II. Areas of Concentration**

A. Comparative Race, Racialized Communities & Identities.

Students must take at least one course in this area. Students may choose courses from a list in the Department office.

B. Cultural Production & Cultural Movements.

Students must take at least one course in this area. Students may choose courses from a list in the Department office.

C. Political Economy, Public Policy & Contemporary Issues.

Students must take at least one course in this area. Students may choose courses from a list in the Department office.

Elective in any of the above areas

Students must take at least one course focusing on Black Women, Gender, and Sexuality Studies chosen from a list in the Department office. Students may count this course toward any of the required areas above.

**Total Hours**

21

Students must not take more than 6 hours of 100-level courses. A minimum of 6 hours of 300- and 400-level courses is required.

AFRO Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AFRO)

**Courses**

**AFRO 100** Intro to African American St credit: 3 Hours.

Interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African American studies; surveys the major approaches to the study of African Americans across several academic disciplines including economics, education, psychology, literature, political science, sociology and others.

This course satisfies the General Education Criteria for:

UIUC: Social Sciences

UIUC: US Minority Culture(s)

Information listed in this catalog is current as of 03/2017
AFRO 101  Black America, 1619-Present  credit: 3 Hours.
Sociohistorical survey of African American experiences from the West
African background to North America, from the 17th century to the
present. Same as HIST 174.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)
AFRO 102  Researching the African Am Exp  credit: 3 Hours.
Introduction to research and documentation of the African American
experience. Approved for both letter and S/U grading.
AFRO 103  Black Women in the Diaspora  credit: 3 Hours.
Explores the historical, social, economic, cultural and political realities
of black women in the African diaspora with an emphasis on the U.S.,
Canada, Britain, Africa and the English speaking Caribbean. How macro
structures such as slavery, imperialism, colonialism, capitalism, and
globalization shaped and continue to circumscribe the lives of black
women across various geographic regions. Discussion of the multiple
strategies/efforts that black women employ both in the past and present
to ensure the survival of the self and the community. Same as AFST 103
and GWS 103.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)
AFRO 105  Black Literature in America  credit: 3 Hours.
Survey of the literary work of Black Americans from 1746 to the present.
Exploration of the social, cultural, and political contexts that have shaped
the Black American literary tradition by analyzing not only poetry, drama,
autobiographical narratives, short stories, and novels, but also folktales,
spirituals, and contemporary music. Same as ENGL 150.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)
AFRO 106  Hist Arch Americas  credit: 3 Hours.
Same as ANTH 106. See ANTH 106.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)
AFRO 132  African American Music  credit: 3 Hours.
Survey of African American music, from its origins to the present with
a focus on understanding details of musical performance and the ways
in which music interacts with its social and political context. Examines
genres such as spirituals, the blues, jazz, R&B, soul, and hip-hop. No
previous musical background is necessary.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)
AFRO 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.
AFRO 201  US Racial & Ethnic Politics  credit: 3 Hours.
Same as AAS 201, LLS 201, and PS 201. See PS 201.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)
AFRO 211  Intro to African-American Film  credit: 3 Hours.
Same as MACS 211. See MACS 211.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)
AFRO 259 Afro-American Literature I credit: 3 Hours.
Same as CWL 259 and ENGL 259. See ENGL 259.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AFRO 260 Afro-American Literature II credit: 3 Hours.
Same as CWL 260 and ENGL 260. See ENGL 260.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AFRO 261 Intro to the African Diaspora credit: 3 Hours.
Introduction to the origin, development, and maturation of the African diaspora in the Americas and the Caribbean, beginning with the transatlantic slave trade and up to the end of the 20th century. Same as ANTH 261.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AFRO 272 Minority Images in Amer Film credit: 3 Hours.
Same as ENGL 272. See ENGL 272.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

AFRO 275 Afro-American History to 1877 credit: 3 Hours.
Same as HIST 275. See HIST 275.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AFRO 276 Afro-American Hist Since 1877 credit: 3 Hours.
Same as HIST 276. See HIST 276.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AFRO 281 Constructing Race in America credit: 3 Hours.
Same as HIST 281, HIST 281, and LLS 281. See HIST 281.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AFRO 287 African-American Women credit: 3 Hours.
Same as GWS 287 and HIST 287. See HIST 287.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AFRO 290 Af Am Urban Hist Since 1917 credit: 3 Hours.
Examination of the changing interaction among black urban communities, the broader urban citizenry, municipal government, the local and national urban-industrial economy, and federal policy over time, giving particular attention to discourses about the black "ghetto" as both a physical space and set of social conditions. Same as HIST 284.
Prerequisite: AFRO 101, HIST 276, HIST 172, SOC, 225, or PS 201.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AFRO 298 Spec Topics African-Am Studies credit: 3 Hours.
Seminar on selected topics with particular emphasis on current research trends. May be repeated to a maximum of 6 hours. Prerequisite: AFRO 100 or AFRO 101, or consent of instructor.

AFRO 300 Race and Cultural Diversity credit: 4 Hours.
Same as AAS 310, EPS 310, and LLS 310. See EPS 310.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: US Minority Culture(s)

AFRO 310 Race and Cultural Diversity credit: 4 Hours.
Same as AAS 310, EPS 310, and LLS 310. See EPS 310.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: US Minority Culture(s)

AFRO 312 Psychology of Race & Ethnicity credit: 3 Hours.
Same as PSYC 312. See PSYC 312.

AFRO 315 African American Politics credit: 3 Hours.
Same as PS 315. See PS 315.

AFRO 340 Dancing Black Popular Culture credit: 3 Hours.
Same as DANC 340. See DANC 340.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AFRO 341 Gov & Pol in Africa credit: 3 Hours.
Same as PS 341. See PS 341.

AFRO 342 Black Men and Masculinities credit: 3 Hours.
The sociological study of African American men in the contemporary U.S. Specifically, black manhood and masculinities and the experiences of this demographic group as it relates to the economy, state, policy, and institutions such as family, criminal justice system, and education. Same as SOC 325. Prerequisite: Introductory social science course.

AFRO 372 Class Politics & Blk Community credit: 3 Hours.
Exploration of the complex history of class relations among African Americans during the twentieth century, examining both the internal and external shapers of class stratification. Considers the historical development of contemporary black "underclass", and the parallel expansion of the black middle class today. Same as HIST 384.
Prerequisite: AFRO 101, HIST 276, or SOC 225 or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

AFRO 373 AfAm Cult Politic Mid20C credit: 3 Hours.
Focusing on African American culture and history from World War II until the early 1960's, topics include citizenship, migration, urban life, the African Diaspora, Civil Rights Movement, and art forms. Approved for both letter and S/U grading. Prerequisite: AFRO 100 and AFRO 101, AFRO 261, ENGL 260 or HIST 276.

AFRO 378 Race and Revolutions credit: 3 Hours.
Focus on the relationship between race and slavery during the revolutions in American and Haiti, respectively. We will seek to understand how the themes of slavery, revolution and race affected blacks, whites and indigenous Americans. We will learn about life during the Revolutionary era by reading the biographies, political pamphlets and personal letters of former slaves, Revolutionaries and everyday men and women as well as historical scholarship. Same as HIST 389. Prerequisite: One African American Studies or History course at either the 100- or 200-level or the consent of instructor.

AFRO 380 Black Women Hist & Cultures credit: 3 Hours.
Same as GWS 380. See GWS 380.

AFRO 381 Black Women and Film credit: 3 Hours.
An examination of the contribution of Black women film directors to cinema. The study of documentary, experimental, animated, fictional shorts, and feature films will reveal their unique approach to constructions of the intersection of race and gender. Starting from the 1920's up to the present, the course considers themes, aesthetics, historical contexts, and ideological discourses presented in the films. Same as MACS 381. Prerequisite: College level film course or consent of instructor.
AFRO 382 African Amer Families in Film credit: 3 Hours. Uses film as case studies to examine the diverse structures, social classes, and internal dynamics among African American families. Critical family processes such as family formation patterns, dating mate selection, parenting, male-female/gender relations, child adolescent, and adult development, family routines and practices, family communication, and family stress and coping will be examined. Also considers how families interact within larger contexts, such as the local neighborhood and key institutions (school, workplace, social service agencies). Films will be supplemented with readings drawn from diverse disciplines (African American Studies, Anthropology, Family Studies, History, Psychology, and Sociology) that allow us to examine key substantive, theoretical, methodological, and policy issues in the study of African American families. Same as HDF 324.

AFRO 383 Hist of Blk Women's Activism credit: 3 Hours. Examination of the history of twentieth century black women's activism, specifically concerned with how African American female activists have been critical to building, sustaining and leading black freedom movements. Same as GWS 383 and HIST 383. Prerequisite: AFRO 100 or AFRO 101 or AFRO 103 or consent of instructor.

AFRO 398 Spec Topics Afro-Am Studies credit: 3 Hours. Advanced seminar on selected topics with particular emphasis on current research trends. May be repeated to a maximum of 6 hours. Prerequisite: Junior status and one of the following: AFRO 224, or HIST 275 or HIST 276, or ENGL 259 or ENGL 260.

AFRO 400 African Diasporic Lit Americas credit: 3 or 4 Hours. Critical examination of the contributions of writers of African descent from the Caribbean (English, French, Spanish) and the United States. Major works of fiction, poetry, drama and essays from Cuba, Guadeloupe, Guyana, Haiti, St. Lucia, the United States and other countries are analyzed within a post-colonial theoretical framework. Same as CWL 400. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 224 or AFRO 259 or AFRO 260 or consent of instructor. This course satisfies the General Education Criteria for: UIUC: US Minority Culture(s)

AFRO 407 Slavery & Race in Latin Am credit: 2 to 4 Hours. Same as HIST 407. See HIST 407.

AFRO 410 Hate Crimes credit: 3 Hours. Hate crimes represent the manifestation of intergroup bias and aggression. Examples of these crimes will be examined while analyzing longstanding theories in social psychology. Same as PSYC 410. 3 undergraduate hours. 3 graduate hours. Prerequisite: PSYC 201 or consent of instructor.

AFRO 411 African American Psychology credit: 3 or 4 Hours. Introduction to the research, theories, and paradigms developed to understand the attitudes, behaviors, and psychological and educational realities of African Americans. Same as PSYC 416. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or one psychology course.

AFRO 415 Africana Feminisms credit: 3 or 4 Hours. Explores readings and research from the perspective of feminists throughout the African diaspora, with a focus on Black feminist thought emanating from the United States. Same as AFST 420 and GWS 415. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 103 and an additional 300 or 400-level African American Studies course or consent of the instructor.

AFRO 421 Racial and Ethnic Families credit: 2 to 4 Hours. Same as EPS 421, HDF 424, and SOC 421. See EPS 421.

AFRO 435 Commoditying Difference credit: 3 or 4 Hours. Same as AAS 435, GWS 435, LLS 435 and MACS 432. See LLS 435.

AFRO 453 Plantation Soc in Americas credit: 3 or 4 Hours. Comparative and interdisciplinary approach to study of the development of New World societies with focus on plantation agriculture from the 15th to 19th centuries. Course considers Portuguese, Spanish, British, French, and Dutch colonization. Students will study the relative importance of culture versus economy and demography in determining social structure. Same as HIST 470. 3 undergraduate hours. 4 graduate hours. Prerequisite: A survey course in early United States history and/or western civilization; junior status, or consent of the instructor.

AFRO 460 Slavery in the United States credit: 3 or 4 Hours. Examination of slavery in the U.S. using primary sources (slave narratives, songs and tales, plantation records, laws and newspapers) from the 18th century through emancipation. Same as HIST 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or AFRO 101 and one 300-level AFRO course. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AFRO 465 Race, Sex, and Deviance credit: 3 or 4 Hours. Same as AAS 465, GWS 465, and LLS 465. See LLS 465.

AFRO 466 Race, Science, and Medicine credit: 3 or 4 Hours. Examines the development of race in medical and scientific thought; how public health and medical institutions deploy the concept; and the process by which race emerged as a valid though controversial topic of scientific and biomedical inquiry. Also addressed is the relationship between slavery and nineteenth-century medicine, the birth of the eugenics movement, legacies of medical exploitation and mistrust, trends in genetic medicine, and contemporary disparities in health outcomes and health care delivery. Same as HIST 483. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or AFRO 101 and one 300-level AFRO course.

AFRO 474 Black Freed Move, 1955-Present credit: 3 or 4 Hours. Presents the struggle of African Americans for self-definition, self-development, and self-determination from the inception of the civil rights movement to the contemporary period. Same as HIST 478. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 101, HIST 276, or consent of instructor. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AFRO 481 Urban Communities & Public Pol credit: 3 or 4 Hours. Examination of how public policy has shaped urban communities and the life chances (i.e., the social, economic, mental and physical well-being) of families of color. Emphasizes the theoretical, political, and economic context of public policy making and specifically address urban issues of housing, communities and families, employment, welfare, and poverty. This course will draw on scholarship by sociologists, historians, policy analysts, race theorists, and economists. Same as SOC 472 and UP 481. 3 undergraduate hours. 4 graduate hours.

AFRO 482 Immersion Journalism credit: 3 or 4 Hours. Same as JOUR 482. See JOUR 482.

AFRO 490 Theory in African American St credit: 3 or 4 Hours. Introduction to various theories and methodologies rising out of the study of the Black world based on African American intellectual traditions. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 and one additional 400-level AFRO course, or consent of instructor.
AFRO 491  Methodology in African Amer St  credit: 3 or 4 Hours.
Introduction to various methodologies to be employed in the interdisciplinary field of African American/Africana studies. Access to personal computer SPSS software is required. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 and AFRO 220 and an additional 300 or 400-level African American Studies course or consent of instructor.

AFRO 495  Senior Thesis Seminar  credit: 3 Hours.
3 undergraduate hours. No graduate credit. Prerequisite: AFRO 100 and AFRO 220 or AFRO 490.

AFRO 498  Spec Topics African Am Studies  credit: 3 or 4 Hours.
Seminar on selected topics with particular emphasis on current research trends. 3 undergraduate hours. 4 graduate hours. May be repeated up to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Upper level AFRO course (300 or above) or consent of instructor.

Interdisciplinary Minor in African Studies
The Center for African Studies offers an interdisciplinary minor as a complement to any major. The 20 hours selected by students for the African studies minor should form a coherent program of study. This program must be approved by the Center for African Studies. The Dean of the College of Liberal Arts and Sciences will verify that the student has completed the program on the recommendation of the Director of the Center for African Studies and on completion of the requirements below.

E-mail:african@illinois.edu

Requirements
Study of an indigenous African Language. Acceptable languages include but are not limited to Arabic, Bamana, Lingala, Swahili, Wolof, and Zulu.

African Studies core courses. These courses contain a minimum of 50 percent African content and are defined according to a list maintained and regularly updated by the Center for African Studies. Courses completed to satisfy the core must come from at least 3 separate departments and must include the following three components:

Course-work surveying the continent. Choose one of the following: 3
- AFST 210 Intro to Mod African Lit
- AFST 222 Introduction to Modern Africa
- AFST 254 Economic Systems in Africa
- HIST 110 History of Africa
- SOC 122 Africa in World Perspective

Additional core courses at any level. African language courses may be used to satisfy this requirement if they are at the advanced level (fifth semester or higher). Only 3 hours of AFST 199 may be used to satisfy the requirements of the minor. 6

Total Hours 20

AFST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AFST)

Courses
AFST 103  Black Women in the Diaspora  credit: 3 Hours.
Same as AFRO 103 and GWS 103. See AFRO 103. This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AFST 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

AFST 201  Elementary Bamana I  credit: 5 Hours.
Same as BMNA 201. See BMNA 201.

AFST 202  Elementary Bamana II  credit: 5 Hours.
Same as BMNA 202. See BMNA 202.

AFST 209  Constr Afr and Carib Identity  credit: 3 Hours.
Same as CWL 225, FR 240, and LAST 240. See FR 240. This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

AFST 210  Intro to Mod African Lit  credit: 3 Hours.
Significant contemporary African writings depicting the history and cultural traditions of African peoples. Same as CWL 210 and ENGL 211. This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: Non-Western Cultures

AFST 211  Elementary Lingala I  credit: 5 Hours.
Same as LGLA 201. See LGLA 201.

AFST 212  Elementary Lingala II  credit: 5 Hours.
Same as LGLA 202. See LGLA 202.

AFST 213  African Muslim Cultures  credit: 3 Hours.
Same as HIST 213. See HIST 213. This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Non-Western Cultures

AFST 222  Introduction to Modern Africa  credit: 3 Hours.
Interdisciplinary introduction to Africa dealing with basic themes and problems in the politics, economics, sociology, anthropology, and history of Africa. Same as ANTH 222, PS 242, and SOC 222. This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

AFST 231  Elementary Swahili I  credit: 5 Hours.
Same as SWAH 201. See SWAH 201.

AFST 232  Elementary Swahili II  credit: 5 Hours.
Same as SWAH 202. See SWAH 202.

AFST 241  Elementary Wolof I  credit: 5 Hours.
Same as WLOF 201. See WLOF 201.

AFST 242  Elementary Wolof II  credit: 5 Hours.
Same as WLOF 202. See WLOF 202.
AFST 243  Pan Africanism  credit: 3 Hours.
Same as AFRO 243, PS 243, and SOC 267. See PS 243.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences

AFST 251  Elementary Zulu I  credit: 5 Hours.
Same as ZULU 201. See ZULU 201.

AFST 252  Elementary Zulu II  credit: 5 Hours.
Same as ZULU 202. See ZULU 202.

AFST 254  Economic Systems in Africa  credit: 3 Hours.
Same as ACE 254. See ACE 254.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences

AFST 266  African Film and Society  credit: 3 Hours.
Same as ANTH 266. See ANTH 266.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

AFST 267  Memoirs of Africa  credit: 3 Hours.
Same as ANTH 267. See ANTH 267.
This course satisfies the General Education Criteria for:
UIUC: Advanced Composition
UIUC: Non-Western Cultures

AFST 312  Central African Art  credit: 3 Hours.
Same as ARTH 312. See ARTH 312.

AFST 313  Modern and Contemp African Art  credit: 3 Hours.
Same as ARTH 313. See ARTH 313.

AFST 325  Social Media and Global Change  credit: 3 Hours.
Same as EPS 325, ASST 325, EURO 325, INFO 325, LAST 325, REES 325,
and SAME 325. See EPS 325.

AFST 403  Intermediate Bamana I  credit: 4 Hours.
Same as BMNA 403. See BMNA 403.

AFST 404  Intermediate Bamana II  credit: 4 Hours.
Same as BMNA 404. See BMNA 404.

AFST 405  Topics Swahili Lang & Lit I  credit: 3 Hours.
Same as SWAH 407. See SWAH 407.

AFST 406  Topics Swahili Lang & Lit II  credit: 3 Hours.
Same as SWAH 408. See SWAH 408.

AFST 407  Adv Topics Swahili Lang&Lit I  credit: 3 or 4 Hours.
Same as SWAH 409. See SWAH 409.

AFST 408  Adv Topics Swahili Lang&Lit II  credit: 3 or 4 Hours.
Same as SWAH 410. See SWAH 410.

AFST 410  Modern African Fiction  credit: 3 or 4 Hours.
Examines selected major African novels along thematic and formal lines;
literary responses to colonialism and political independence and the
cri ses that accompanied both in Africa; and study of critical approaches
to the African novel and African characteristics of and contribution to the
novel as a genre. Readings in English. Same as CWL 410, ENGL 470, and
FR 410. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFST 210
or AFST 222, or junior standing.

AFST 412  Lang in African Culture & Soc  credit: 3 or 4 Hours.
Same as LING 412. See LING 412.

AFST 413  Intermediate Lingala I  credit: 4 Hours.
Same as LGLA 403. See LGLA 403.
AFST 468  Religions of Africa  credit: 3 or 4 Hours.
Same as ANTH 468 and REL 468. See ANTH 468.
AFST 469  Structure of Semitic Languages  credit: 3 or 4 Hours.
Same as LING 469. See LING 469.
AFST 478  African Immigrants in Europe  credit: 3 or 4 Hours.
Same as ANTH 478 and EURO 478. See ANTH 478.
AFST 484  African Urbanization  credit: 3 or 4 Hours.
Same as SOC 484. See SOC 484.
AFST 490  Independent Study  credit: 1 to 4 Hours.
Supervised readings and research in selected fields in consultation with
the instructor. 1 to 3 undergraduate hours. 1 to 4 graduate hours. May be
repeated in separate terms up to 9 undergraduate hours or 12 graduate
hours, if topics vary. Prerequisite: Consent of the Center for African
Studies.

American Indian Studies, Program in

Adrian Burgos Jr., Interim Director
1204 W. Nevada, Urbana
PH: (217) 265-9870
http://ais.illinois.edu

American Indian Studies (AIS) prepares students in a range of
methodologies, theories, technologies, and teaching approaches that
compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students
in preparing for graduate school or for careers in a variety of pursuits
including public and business administration, education, public relations,
marketing, politics, and government, especially as they relate to American
Indian and Native American constituencies. Career opportunities also
exist in agencies such as Indian Health Services, the Bureau of Indian
Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual
foundation for success in an increasingly challenging world.

Minor in American Indian Studies

American Indian Studies (AIS) is an interdisciplinary program with four
subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The courses chosen must form a coherent program of study and be
approved by an AIS advisor.

Foundation Courses

Only three courses (9 hours total) at the 100-level may be counted toward
the minor. Students also are required to complete two courses (6 hours)
at the 300- or 400-level. These advanced course credits must be distinct
from credit earned for the student's major or another minor

AIS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AIS)

Courses

AIS 101  Intro to Amer Indian Studies  credit: 3 Hours.
Interdisciplinary introduction surveys the stories, histories, and lands of
tribal peoples who became known as "American Indians". This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AIS 102  Contemp Issues in Ind Country  credit: 3 Hours.
Surveys a variety of topics in contemporary American Indian life. Focusing on
the modern experience, topics may include law and politics; lands and environment; education; visual arts; languages and
literatures; health; social justice; business; treaties; the sacred; gender;
sports; decolonization; comparative tribal, Indian and global indigenous
concerns. This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AIS 140  Native Religious Traditions  credit: 3 Hours.
An interdisciplinary survey of native religious traditions, exploring the
breadth and depth of spiritual expression among native people in North
America. Assigned readings and class discussions cover a variety of
important themes including sacred landscapes, mythic narratives, oral
histories, communal identities, tribal values, elder teachings, visionary
experiences, ceremonial practices, prayer traditions, and trickster
wisdom. Students also consider historic encounters with missionary
colonialism and contemporary strategies for religious self-determination.
Class discussions are supplemented by audiovisual materials and guest
speakers. Same as REL 140. This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

Information listed in this catalog is current as of 03/2017
AIS 165  Lang & Culture Native North Am  credit: 3 Hours.
Same as ANTH 165. See ANTH 165.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

AIS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 6 hours.

AIS 265  Intro to American Indian Lit  credit: 3 Hours.
Introduces students to the study of American Indian literature by focusing on texts by contemporary American Indian novelists, poets, and playwrights. Over the course of the semester, students will consider how indigenous aesthetics shape narrative in addition to examining how American Indian authors engage the legacies of colonization and the histories of their tribal communities through their stories. Same as ENGL 265.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

AIS 275  Am Indian and Indigenous Film  credit: 3 Hours.
Introduction to representations of American Indians and Indigenous peoples in film. Reconstructions of American Indians within the Western genre and more recent reconstructions by Native filmmakers will be considered. Other topics may include the development of an indigenous aesthetic; the role of documentaries and nonfiction films in the history of Native and Indigenous film; the role of commerce in the production of Native films. Same as ENGL 275 and MACS 275.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

AIS 277  Encounters in Native America  credit: 3 Hours.
Same as HIST 277. See HIST 277.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AIS 278  Native American History  credit: 3 Hours.
Same as HIST 278. See HIST 278.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AIS 280  Intro to Federal Indian Policy  credit: 3 Hours.
Traces the evolution of U.S. federal law as it pertains to American Indian nations. From the doctrine of discovery, through which European nations asserted control over the lands they claimed, to the processes of reorganization and recognition that have shaped contemporary rights and struggles native nations currently face, this class will interrogate how American Indian nations were transformed into “domestic dependent nations”.

AIS 285  Indigenous Thinkers  credit: 3 Hours.
An introduction to the English-language traditions of indigenous intellectuals. Specific topics vary. May be repeated in the same term to a maximum of 6 hours. May be repeated in subsequent terms to a maximum of 9 hours.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Non-Western Cultures

AIS 288  American Indians of Illinois  credit: 3 Hours.
Same as ANTH 288 and HIST 288. See ANTH 288.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AIS 291  Independent Study  credit: 1 to 6 Hours.
Supervised reading and research in American Indian Studies chosen by the student with instructor approval. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 6 hours. Prerequisite: One course in American Indian Studies and consent of instructor.

AIS 295  US Citizenship Comparatively  credit: 3 Hours.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AIS 405  Politics in Children's Lit  credit: 3 or 4 Hours.
Students will revisit classic and popular children's books, applying critical theoretical perspectives to texts with the purpose of examining ideologies behind their creation, publication, review, distribution, and consumption. An emphasis will be placed on texts by and about American Indians. 3 undergraduate hours. 4 graduate hours. Prerequisite: Fulfillment of the Advanced Composition requirement; junior standing or above; or consent of instructor.

AIS 451  Politics in Children's Lit  credit: 3 or 4 Hours.
Concerned with interdisciplinary frameworks that allow us to ‘read’ popular culture as well as with its actual forms and specific artifacts, this course seeks, first, to grasp how popular culture has legitimized the colonization of American Indian peoples and second, to reflect on the ways in which Indians engage popular culture to assert an anti-oppression politics. Same as MACS 461. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

AIS 459  Topics in American Indian Lit  credit: 3 or 4 Hours.
Interdisciplinary seminar on special and advanced topics in American Indian and Indigenous Literatures. Same as ENGL 459. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or subsequent terms to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Any 100 or 200-level American Indian Studies course or consent of instructor.

AIS 461  Politics of Popular Culture  credit: 3 or 4 Hours.
Students will study various efforts to "civilize" American Indians through US government initiatives and religious churches, as well as educational models developed by tribal entities following passage of the Indian Self-Determination and Education Assistance Act of 1975. Same as EPS 481. 3 undergraduate hours. 4 graduate hours.
Anthropology

Lyle Konigsberg
109 Davenport Hall, 607 South Mathews, Urbana
PH: (217) 333-3616
http://www.anthro.illinois.edu/

The Department of Anthropology offers four major concentrations and a minor. In addition, students may pursue Anthropology as part of the LAS Major in Computer Science and Anthropology (p. 560).

Anthropology combines scientific and humanistic interests in human biology and diverse cultures (both past and present) to provide in-depth knowledge and broad perspectives on the human condition. The anthropology major develops research, writing and analytical skills that enable graduates to confront problems, issues and situations that require understanding of cultural differences and human biological variation. College graduates with a background in anthropology thrive in a broad range of jobs and professions including global/international relations, social work, education, law, medicine and health professions, bioscience and technology, government, NGOs and business, as well as further graduate study in anthropology.

Professional anthropologists work as research scientists and teachers in museums, universities, and archaeological surveys; as staff members in government agencies, social service programs, and business firms in which international understanding of human and social concerns is important; or as independent consultants to such agencies, programs, and firms.

The Archaeology Concentration offers students a program to explore the human past through its material remains to understand cultural and societal change through time, and the role of heritage in the present. We offer many opportunities for students to conduct research with faculty in our archaeology labs, field schools, and in our extensive research collections.

The General Anthropology Concentration includes all four fields of anthropology:

- biological anthropology (biological diversity and evolutionary history of human and nonhuman primates),
- archaeology (human prehistory and the organization and growth of technology and society),
- sociocultural anthropology (daily life at home and abroad; identity and power in social contexts),
- linguistic anthropology (language and communication in cultural contexts).

Although the student should strive for a topical and geographical balance, an undergraduate may specialize in one of these four branches and may also study a world cultural area intensively through an area studies program.

The Human Evolutionary Biology Concentration offers students a program to examine the interconnections between genetics, environment and culture to address issues from human origins and morphology to forensics and modern health.

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in these closely related fields. Sociocultural anthropologists study the daily lives of people around the world, both at home and abroad. They conduct field research to get a hands-on feel for people's lives and passions and examine everything from beauty pageants to political protest marches, from Disney films to the lab practices of nuclear scientists. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a crucial window on the largest processes and problems of our time, from globalization to race relations and violence.

Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the "English Only" movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom, on social media, or at the United Nations, as well as how the way we talk creates our sense of self and reality.

Because the field of anthropology presents a wide range of disciplinary perspectives on the human condition, students electing this major concentration are encouraged to select from among relevant course offerings in archaeology or biological anthropology to fulfill General Education requirements.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Students must select one of the following concentrations in consultation with an advisor:

- Archaeology Concentration (p. 323)
- General Anthropology Concentration (p. 324)
- Human Evolutionary Biology Concentration (p. 325)
- Sociocultural and Linguistics Anthropology Concentration (p. 326)

Minor in Anthropology

The minor in anthropology may be tailored to each student's individual needs, thus accommodating students with interests as diverse as premedicine, prelaw, geography, and art history.

E-mail: anthro@illinois.edu

Web address for department: http://www.anthro.illinois.edu

Select at least two of the following:

- ANTH 220 Introduction to Archaeology
- ANTH 230 Sociocultural Anthropology
- ANTH 240 Biological Anthropology
- ANTH 270 Language in Culture

Information listed in this catalog is current as of 03/2017
Minimum of six hours of 300- or 400-level courses. Only 3 hours of ANTH 499 may be used to fulfill this requirement. Anthropology courses at any level 6

Total Hours 18

ANTH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ANTH)

Anthropology Courses

ANTH 101 Introduction to Anthropology  credit: 3 Hours.
Anthropology was first envisioned as a holistic discipline, combining insights from the study of human anatomy and evolution, research on material remains of human settlements, and the analysis of social interaction in language and other cultural practices. Following this tradition, this course explores the questions about where humans came from, how societies live and communicate, and why human cultural groups vary. This course can be used to fulfill either Western or non-Western general education categories, but not both. This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences
UIUC: Western Compartv Cult

ANTH 102 Human Origins and Culture  credit: 4 Hours.
Introduction to human evolutionary biology focusing on the biological processes responsible for our evolution. Draws on a diverse range of disciplines- evolutionary biology, population genetics, comparative anatomy, primatology, archaeology, geology and paleoecology to provide context for interpreting the fossil and archaeological evidence for humans' biological origin and evolution and early cultural change. This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 103 Anthro in a Changing World  credit: 3 Hours.
Presents the fundamental areas of anthropological analysis through a series of comparative cases that emphasize social and cultural relations in global contexts. Directs attention to the anthropological history of global empires and colonial states, their cultural exchanges, and contemporary studies of culture, society, and globalization. This course can be used to fulfill either Western or non-Western general education categories, but not both. This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences
UIUC: Western Compartv Cult

ANTH 104 Talking Culture  credit: 3 Hours.
Introduction to linguistic anthropology, focusing on the role of language in the creation and maintenance of society and culture and on a person's concept of within that culture. Demonstrates how language use within a community can serve as the foundation for the analysis of cultural practices. Same as LING 104. This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 105 World Archaeology  credit: 3 Hours.
Using archaeological data, traces our prehistoric heritage and the processes which led to the evolution of agriculture, settled villages, and civilization in many areas of the world. Lectures range from the earliest Homo sapiens to Sumeria, Egypt, Mexico, Peru, and the United States. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect

ANTH 106 Hist Arch Americas  credit: 3 Hours.
Explores recent theoretical, methodological, and thematic developments in historical archaeology in North America and the Caribbean. The temporal coverage is 1500-1900 AD. Examines how historical archaeologists use artifactual, documentary and oral history evidence in interpreting the past, and how historical archaeology can contribute to our understanding of the ways by which material culture can be used to study race, class, gender, and ethnic identities. Same as AFRO 106. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect
UIUC: US Minority Culture(s)

ANTH 108 Religion & Society in West I  credit: 3 Hours.
Same as JS 108, PHIL 108, REL 108, and SOC 108. See REL 108. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect
UIUC: Western Compartv Cult

ANTH 109 Religion & Society in West II  credit: 3 Hours.
Same as PHIL 109, REL 109, and SOC 109. See REL 109. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect
UIUC: Western Compartv Cult

ANTH 130 History of South Asia  credit: 3 Hours.
Same as HIST 130. See HIST 130. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect
UIUC: Non-Western Cultures

ANTH 143 Biology of Human Behavior  credit: 3 Hours.
Critical consideration of data and information bearing on current controversies and ideas concerning selected aspects of human behavior. Topics to be discussed include communication; social organization; and parental, sexual, and aggressive behavior. Same as HDFS 143. This course satisfies the General Education Criteria for:
UIUC: Life Sciences

ANTH 157 The Archaeology of Illinois  credit: 3 Hours.
Traces the prehistory of Illinois from the first entry of people into the region more than 113,000 years ago until the 17th century and the beginning of historical records; examines subsequent cultural changes up to the 19th century and statehood from an archaeological and ethnohistorical perspective. This course satisfies the General Education Criteria for:
UIUC: HistPhilosophy Perspect

ANTH 160 Contemporary Social Issues  credit: 3 Hours.
Course considers how anthropological theory and methods enhance our understanding of contemporary social and political issues, including immigration, education, affirmative action, and welfare. It examines the relationship between social policy and social science as well as the strengths and limits of anthropological methods for social and political issues. This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

ANTH 165 Lang & Culture Native North Am  credit: 3 Hours.
Develops understanding of the rich diversity of languages and cultures found among Native North American peoples from the perspectives of sociocultural and linguistic anthropology. Same as AIS 165. This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
ANTH 171  Evolution of Human Comm  credit: 3 Hours.
Same as SHS 171. See SHS 171.
This course satisfies the General Education Criteria for:
UIUC: Behavioral Sciences

ANTH 175  Archaeology and Pop Culture  credit: 3 Hours.
Examines the ways in which the ancient past has been interpreted,
appropriated, represented, used, and misused for a variety of reasons by
political parties, national governments, and religious and ethnic groups
living in the present.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect

ANTH 180  The Archaeology of Death  credit: 3 Hours.
Cross-cultural introduction to the celebration of death across time and
space. Examines the anthropological and archaeological literature on
death, particularly in terms of death ritual and burial practices. Students
study popular films on death in different cultures, and carry out a field
project at a local cemetery.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: Western Compartv Cult

ANTH 182  Latin American Cultures  credit: 4 Hours.
Latin America considered as a theater of conflict and cultural
experimentation among Native American, African, and Iberian peoples;
their survival and transformation as reported in selected ethnographies
and eyewitness sources; and some modern theories and controversies
about their experience.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences

ANTH 184  Asian American Cultures  credit: 3 Hours.
Surveys the heterogeneity of contemporary Asian American
communities. Explores the core concepts of "culture" and "social
organization" through the variety of experiences in the family, churches,
business establishments, schools, and other public institutions. Same as
AAS 184 and SOC 124.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

ANTH 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

ANTH 209  Food, Culture, and Society  credit: 3 Hours.
Introduces basic anthropological and sociological methods, concepts
and approaches to the study of the food. Explores issues including
gender roles, religious influences, family relationships, community
sharing, nationalist rituals, and global processes in the production,
distribution and consumption of food. Film, ethnographies, and other
social science studies will be examined. Same as SOC 269.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 210  Families in Global Perspective  credit: 3 Hours.
Same as HDFS 220. See HDFS 220.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures
UIUC: Social Sciences

ANTH 220  Introduction to Archaeology  credit: 3 Hours.
Introduction to the problems of studying past cultures; special attention
given to the ranges of techniques available and the adequacy of various
methodologies as bases for sound inference about the structure of
extinct cultures. Prerequisite: ANTH 102 or consent of instructor.

ANTH 222  Introduction to Modern Africa  credit: 3 Hours.
Same as AFST 222, PS 242, and SOC 222. See AFST 222.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ANTH 223  Exploring African Cities  credit: 3 Hours.
Same as LA 220. See LA 220.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: Non-Western Cultures

ANTH 224  Tourist Cities and Sites  credit: 3 Hours.
Examination of tourism's social, political, economic, cultural, and physical
dimensions from an anthropological perspective.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 225  Women in Prehistory  credit: 3 Hours.
Course identifies the presence of women in the archaeological record
and seeks to reconstruct women's lives and roles in a range of ancient
societies. It also considers the intellectual history of gender studies in
archaeology and anthropology. Same as GWS 225.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 230  Sociocultural Anthropology  credit: 3 Hours.
Introduction to the anthropological study of contemporary human
societies; emphasis on the comparative study of social organization,
interpersonal relations, cultural ecology, and processes of sociocultural
change, but also includes some consideration of the method and theory
of ethnographic field research.

ANTH 240  Biological Anthropology  credit: 3 Hours.
Past and present evolution of the human species and population and
individual biological variation; topics include genetic principles relevant
to human evolution, primate phylogeny and behavior, fossil evidence for
human evolution, and the origin and significance of biological diversity in
modern humans. Prerequisite: ANTH 102 or ANTH 143; or an introductory
life sciences course; or consent of instructor.

ANTH 241  Human Variation and Race  credit: 3 Hours.
Examines the biological concept of race as applied and misapplied to
Homo sapiens by anthropologists and others from the 18th century to
the present and of the origin, nature, and significance of so-called racial
variation.
This course satisfies the General Education Criteria for:
UIUC: Life Sciences

ANTH 242  History of Human Evolution  credit: 3 Hours.
Reviews the history of evolution and its controversies from the pre-
Darwinians to contemporary debates. Examines disciplinary and wider
societal debates and how they affect each other.
ANTH 243  Sociality of the Great Apes  credit: 3 Hours.
Examines the social organization, mating patterns, and group structure of free-ranging chimpanzees, gorillas, and orangutans. Presents historical perspective focusing on misconceptions that have colored our understanding of ape social behavior; addresses questions concerned with learning potential, food sharing, social cooperation, aggressive behavior, self-awareness, and the appropriateness of the apes as models for understanding human behavior. Prerequisite: ANTH 102, ANTH 143, or an equivalent course in animal behavior; or consent of instructor.

ANTH 246  Forensic Science  credit: 4 Hours.
History and theory underlying methods used in forensic science. Topics include the courtroom, the units of a crime laboratory, methods of securing and investigating a crime scene, and the analysis of evidence collected from a crime scene such as blood, fibers, hair and fingerprints. This course satisfies the General Education Criteria for: UIUC: Life Sciences

ANTH 247  Forensic Science DNA Lab  credit: 3 Hours.
Forensic science is the application of science to the law and encompasses a wide variety of scientific disciplines. This course introduces students to general laboratory practice, molecular biology and DNA analysis skill that are commonly used by forensic DNA scientists. Students will learn using a ?hands-on? and interactive approach with many of the same tools used by professional forensic DNA scientists. Prerequisite: ANTH 246.

ANTH 249  Evolution and Human Disease  credit: 3 Hours.
Principles of modern evolutionary theory are applied to medical problems. Topics include: transmission, pathogen strategies, symptoms and spectrum of disease, evolution of virulence, concept of cause, antimicrobial resistance, emerging diseases, stress and adaptation, nutrition, diachronic overview of changing patterns of human disease, and ecological factors. This course satisfies the General Education Criteria for: UIUC: Life Sciences

ANTH 250  The World Through Museums  credit: 3 Hours.
Same as MUSE 250. See MUSE 250.
This course satisfies the General Education Criteria for: UIUC: Social Sciences
UIUC: Western Compartv Cult

ANTH 258  Sex in Nature and Culture  credit: 3 Hours.
A simultaneous exploration of human sexuality from a biological and cultural perspective. Same as GWS 258.

ANTH 259  Latina/o Cultures  credit: 3 Hours.
Introduction to the Spanish-speaking population of the United States, including demography, history, economics, and culture; emphasis on Mexican-Americans and Puerto Ricans, although other Spanish-speaking groups are also considered. Same as LLS 259. Prerequisite: ANTH 103 or consent of instructor.

ANTH 261  Intro to the African Diaspora  credit: 3 Hours.
Same as AFRO 261. See AFRO 261.
This course satisfies the General Education Criteria for: UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

ANTH 262  Women's Lives  credit: 3 Hours.
Perceptions of women, their perceptions of themselves, and their varying roles and statuses in several contemporary societies in diverse countries; supervised ethnographic observation of women's behavior. Same as GWS 262.
This course satisfies the General Education Criteria for: UIUC: Social Sciences

ANTH 266  African Film and Society  credit: 3 Hours.
Introduction to African cinema as a contemporary art form and as a window on the social and cultural realities of Africa. The course includes discussion of modern African culture, the African film industry, and African cinema as an art form and as popular entertainment. Same as AFST 266.
This course satisfies the General Education Criteria for: UIUC: Non-Western Cultures

ANTH 267  Memoirs of Africa  credit: 3 Hours.
Course introduces Africa to students who have read little or nothing about the continent, the course provides a "user-friendly" approach by offering engagingly written narratives of actual lives lived. The texts may be a combination of memoirs written by Africans (about their childhood experiences growing up in various regions of Africa) and by non-African scholars and other authors (including but not limited to anthropologists) who have spent significant amounts of time on the continent. Same as AFST 267. Prerequisite: Completion of Campus Composition I general requirement.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition
UIUC: Non-Western Cultures

ANTH 268  Images of the Other  credit: 3 Hours.
Do all peoples view neighboring or distant populations as radically different "Others," or can humans create mutual images based on a notion of shared humanity? Course compares and analyzes the range of images of ethnic, "racial," gender, class, and bodily differences that have been enacted historically and cross-culturally in both Western and non-Western populations. Prerequisite: A previous course in history and/or one of the social sciences suggested.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition
UIUC: HistPhilosoph Perspect
UIUC: Western Compartv Cult

ANTH 270  Language in Culture  credit: 3 Hours.
Examines the intersections of culture and language. Topics include the definition of language; the cultural shaping of narrative; how different linguistic systems guide speakers to think differently about the world; and how ideologies about language relate to beliefs about the nation, modernity, race, and gender. Credit is not given for both ANTH 270 and ANTH 271.

ANTH 271  Language in Culture-ACP  credit: 3 Hours.
Course is identical to ANTH 270 except for the additional writing component. Credit is not given for both ANTH 271 and ANTH 270.
Prerequisite: Completion of campus Composition I general education requirement.
This course satisfies the General Education Criteria for: UIUC: Advanced Composition
ANTH 277  Ancient Cities, Sacred Land  credit: 3 Hours.
Examines urban development from its origins to the present day. Among
the concepts covered are urbanism, urbanization, ceremonial centers
and ceremonial cities, the city as a system, the spatial and economic
organization of cities, and the built environment (sacred landscapes,
vernacular architecture, places of power). Small field project is conducted
in Champaign-Urbana.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 278  Climate Change & Civilization  credit: 3 Hours.
Examination of how climate change impacts society. With the increasing
need to understand how climate changes and society intersect at
present, it is becoming important that we address critical questions
about how lessons from the past inform present needs. Case studies
from around the world are discussed.

ANTH 284  Adv Topics in Asian America  credit: 3 Hours.
Considers a number of theoretical and methodological topics in
sociocultural anthropology through ethnographic writings on Asian
America. Theoretical topics include transnationalism, colonialism,
resistance, culture, race, and identity. Methodological topics include
fieldwork, ethnographic writing (including the blurring of genres)
and ethics. Same as AAS 284. Prerequisite: ANTH 184 or consent of
instructor.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences

ANTH 285  Intro to Korea Through Film  credit: 3 Hours.
Same as EALC 285. See EALC 285.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ANTH 286  Southeast Asian Civilizations  credit: 3 Hours.
Overviews the cultural and institutional history of the Indianized states
and Vietnam, with attention to dominant commercial, political, religious,
artistic, and social traditions of Southeast Asia. Same as ASST 286 and
HIST 225.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect

ANTH 287  Contemporary East Asia  credit: 3 Hours.
Same as EALC 288. See EALC 288.

ANTH 288  American Indians of Illinois  credit: 3 Hours.
An interdisciplinary survey of the Native American experience in the
Illinois region from pre-Columbian times to the present. Introduces
theories, concepts and methods in archaeology, history, and sociocultural
anthropology. Includes archaeological field site and museum visits, plus
guest lectures by American Indian scholars and community members.
Same as AIS 288 and HIST 288.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect

ANTH 290  Jewish Cultures of the World  credit: 3 Hours.
Survey of the world’s Jewish cultures with a particular focus on the non-
Western world. Addresses the relations between Judaism and other
religious systems and the nature of Jewish life in such locales as North
America, Sub-Saharan Africa, India, China, and South America.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ANTH 341  Native People and Christianity  credit: 3 Hours.
Same as REL 341. See REL 341.

ANTH 342  Animal Behavior  credit: 3 Hours.
Same as ANSC 366 and IB 329. See IB 329.

ANTH 343  Behavior and Biology of Women  credit: 3 Hours.
Exploration of female biology and behavior in a broad evolutionary
context. Explores development from pre-puberty through menopause,
reproductive processes such as pregnancy, birth and lactation, cognitive
and behavioral sex differences, and male and female reproductive
strategies in a variety of cultural settings. Examples are drawn primarily
from traditional and modern human societies as well as field and
experimental data from other species, particularly non-human primates.
Prerequisite: ANTH 143 or consent of instructor.

ANTH 346  Forensic Anthropology  credit: 3 Hours.
Analysis of human skeletal remains of the medico-legal profession.
Topics include the development of the field of forensic anthropology,
biological profile and skeletal trauma analysis, interval since death
estimation. Additional topics include investigation of crime scenes, the
legal role of the biological anthropologist as an expert witness and case
report preparation. Attention will also be drawn to the incorporation
of anthropological and ethical approaches to dealing with death and using
human remains for research. Prerequisite: ANTH 240 and ANTH 246.

ANTH 347  Human Osteology  credit: 3 Hours.
Comprehensive knowledge of the human skeleton is central to
reconstructing the anatomy, demography, health and evolution of past
populations because most of our evidence is derived from preserved
skeletal and dental remains. The primary goal of this course is the
identification of isolated and fragmentary skeletal remains given
that this is a prerequisite to all subsequent analysis. In addition to
identifying the bones and landmarks of the human skeleton, students
will learn about the structure and function of bone, understand the
growth and development of the human skeleton and be introduced to
analytical techniques used in human osteology including paleopathology,
paleodemography and forensics. Prerequisite: ANTH 240.

ANTH 358  People of the Ice Age  credit: 3 Hours.
Explores a vast period of human prehistory - 2 million to 10,000 years ago
- before the first cities arose and before people domesticated plants and
animals in the Old World; uses archaeological and paleoanthropological
data to understand past life ways as well as reasons for change through
time in human adaptation. Prerequisite: ANTH 102.

ANTH 360  Evolution and Human Health  credit: 3 Hours.
Same as IB 360. See IB 360.

ANTH 361  Ecology and Human Health  credit: 3 Hours.
Same as ANSC 366 and IB 329. See IB 329.

ANTH 362  Body, Personhood, and Culture  credit: 3 Hours.
Examines basic cultural assumptions about the human body and what it
means to be a “person” in Western and non-Western societies. Addresses
key themes in cultural anthropology and the social sciences concerning
the relationship of the individual and society and of nature and culture.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
ANTH 363  Anth of Dance/Movement  credit: 3 Hours.
Anthropological study of dance and other human movement systems in cultural contexts. Designed especially for students with little or no background in socio-cultural anthropology or the social sciences. Includes reading the works of major figures in the field, and learning how to study dances, signed languages and ritual events from an anthropological perspective. Students will also learn about socio-cultural theory and observation, doing fieldwork, movement literacy, problems of subjectivity and objectivity, and personal anthropology.

ANTH 364  Performing *America  credit: 3 Hours.
Introduction to theories of performance and performativity or enactment, and applies these to an understanding of public events like political rallies, music, the arts, protests, and everyday life in the U.S. Emphasis on how these practices of production and consumption help articulate social identity, including gendered, sexual, racial/ethnic, religious, class, and generational affiliations. Focus on the contemporary U.S. with comparative case studies drawn from other parts of the world and some historical materials. Draws on anthropological studies, as well as scholarly literatures from communication studies, literature, the arts, and social history. Prerequisite: At least one course in anthropology or the social sciences.

ANTH 368  'America in the World  credit: 3 Hours.
Study of the lure and rejection of the U.S. around the world, by drawing on long-standing anthropological approaches to the histories of peoplehood, selfhood, and otherness. Examines the historical, political, cultural, economic, and social context of both anti- and pro-Americanism, in various parts of the globe. Prerequisite: Any previous course in cultural anthropology.

ANTH 370  Latina/o Ethnography  credit: 3 Hours.
Same as LLS 370. See LLS 370.

ANTH 372  Topics in Lang & Culture  credit: 3 Hours.
Advanced topics in language and culture. May be repeated in separate terms. Prerequisite: ANTH 104, ANTH 270, or consent of instructor.

ANTH 373  Culture & Psychology  credit: 3 Hours.
Same as PSYC 373. See PSYC 373.

ANTH 374  Anth of Science and Technology  credit: 3 Hours.
Examination of science as a cultural system. Utilizing ethnographic methods and social theories, the course will locate scientific knowledge, institutions and practices within enduring anthropological questions around rationality and truth, meaning, personhood, sociality, power inequalities, social transformations, and social justice. Prerequisite: Junior standing.

ANTH 375  The Culture of Nature  credit: 3 Hours.
Examines how the natural and the cultural are mutually-constitutive concepts, and investigates contemporary and historical constructions of notions of a natural world. We will see how these concepts have varied over time and among different social groups, with a special emphasis on the contemporary United States. Topics will include the idea of landscape and of nature as a resource to be used, appreciated, represented, controlled, or enjoyed. In addition, the course will feature a special unit on sustainability, and one devoted to analyzing our relationships to animals. Prerequisite: At least one anthropology course or a course in another social science.

ANTH 376  Aztec Civilization  credit: 3 Hours.
Detailed description and analysis of Aztec culture, society, and empire at c. 1500 AD, based primarily on ethnohistorical documentation. Topics covered include life cycle, family and society, political and economic organization, warfare, religion, and intellectual and aesthetic traditions. External relationships with neighboring peoples and the indigenous view of the Spanish conquest are considered. Prerequisite: ANTH 102, ANTH 103, or ANTH 105.
This course satisfies the General Education Criteria for:
UIUC: Non-Western Cultures

ANTH 377  Medical Anthropology  credit: 3 Hours.
Introduction to concepts and social aspects of health, illness, and curing in different cultures. Considers concepts of interaction between folk and modern medicine in developing nations and delivery of health care as an international social problem. Prerequisite: ANTH 230 or ANTH 260, or consent of instructor.

ANTH 380  Ethnography of the University  credit: 3 Hours.
Introduces students to ethnographic research methods through research on the University of Illinois. Emphasizes qualitative research methods and institutional analysis. Student work builds on research done by prior students and student research is web archived. Reflection on and reconfiguration of research questions and hypotheses is encouraged as research projects proceed. Prerequisite: Any 100-level or 200-level sociocultural anthropology course: ANTH 103, ANTH 104, ANTH 230 etc.

ANTH 390  Individual Study  credit: 2 to 4 Hours.
Supervised reading and research on anthropological topics chosen by the student with staff approval. Especially (but not exclusively) for students who are preparing for a summer field-work project, or who have some justifiable reason for doing independent study, but who do not qualify for the honors (departmental distinction) courses. Prerequisite: Junior or senior standing; 12 hours in anthropology; consent of instructor. May not be taken concurrently with ANTH 391 or ANTH 495.

ANTH 393  The World of Jewish Sepharad  credit: 3 Hours.
Study of the cultural legacy and history of the Sephardic Jews, mostly focusing on the Mediterranean and the thriving communities they established in countries of Muslim governance and in the Balkans, and more recently in America. The Judeo-Spanish language, which has been preserved until the end of the twentieth century, the press, literature and music are components of this course. Same as HIST 393 and REL 393. This course can be used to fulfill either Western or non-Western general education categories, but not both. This course satisfies the General Education Criteria for:
UIUC: HistPhilos Persp
UIUC: Non-Western Cults
UIUC: Western Comparativ

ANTH 399  Special Topics  credit: 1 to 3 Hours.
Topics are given on a one-time only, experimental basis. Faculty offer special topics in their areas of expertise that provide an opportunity for undergraduates to be exposed to some of the most current developments in faculty research. May be repeated.

ANTH 402  Transnational Islam, Europe-US  credit: 3 or 4 Hours.
Anthropological approach to transnational Islam, focusing on its various expressions in Europe and the United States, particularly since World War II. Same as ASST 402 and REL 409. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 230 or consent of instructor.

ANTH 403  Women in Muslim Societies  credit: 3 or 4 Hours.
Same as GLBL 403, GWS 403, HIST 434, REL 403, and SAME 403. See REL 403.
ANTH 404  Disability, Culture & Society  credit: 3 or 4 Hours.
Same as CHLH 407, KIN 407, and REHB 407. See CHLH 407.

ANTH 405  Contemporary Central America  credit: 3 or 4 Hours.
Explores cultural, political and historical processes in 20th- and 21st-century Central America—focusing on Costa Rica, Nicaragua, Honduras, El Salvador, and Guatemala—through an anthropological lens. Grapples with a core set of questions arising from changes in the global relations, including the rise of global neoliberalism, the crises and renovations of political projects, the transformations of spatial relations through transnational migration, and the proliferation of various pan-hemispheric as well as local identity-based movements. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103 or ANTH 182 or ANTH 230 or a course in Latin American history or consent of instructor.

ANTH 408  Human Evolutionary Anatomy  credit: 3 or 4 Hours.
Comprehensive, comparative study of musculoskeletal anatomy in primates, focusing on functional and adaptive changes that have occurred in the masticatory apparatus, facial skeleton, and locomotor systems of New World monkeys, Old World monkeys, apes, and humans. Relationships between morphology, ecology, and behavior are discussed, applied to the fossil record, and used to address current issues in human evolution. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 443 or ANTH 440 or ANTH 456 or a course in human or comparative vertebrate anatomy.

ANTH 409  Human Evolutionary Anatomy Lab  credit: 3 or 4 Hours.
Comparative detailed dissections of craniofacial, locomotor, neural, and alimentary systems in nonhuman primates, to understand the anatomical bases of human evolution. 3 undergraduate hours. 4 graduate hours. Prerequisite: Credit or concurrent registration in ANTH 408.

ANTH 411  Research Methods in Socio-Cultural Anthropology  credit: 3 or 4 Hours.
Exploration of qualitative forms of research used by sociocultural anthropologists when conducting field research. Emphasis is on formulating research questions, research design, and application of these ethnographic methods to a substantial research project. 3 undergraduate hours. 4 graduate hours.

ANTH 414  Writing Ethnography  credit: 3 or 4 Hours.
Addresses issues of the theoretical divide between the humanities and the social sciences, the unique authority of the scholar/author, and the invisibility of the reader in producing scholarly texts. Focusing on the ways in which scholars are also authors, we explore current debates by reading a selection of contemporary anthropological texts (and some prescient precursors) that boldly experiment with how ethnography is written. Students will experiment with several ethnographic writing styles. This course is designed for advanced undergraduate anthropology students and graduate students in cultural anthropology, writing studies, and education. 3 undergraduate hours. 4 graduate hours. Prerequisite: Undergraduate students should have already taken at least one 300-level course in cultural anthropology, and graduate students in cultural anthropology, writing studies, and education. Other students should contact the instructor. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

ANTH 416  Anthropology of Music  credit: 3 Hours.
Same as MUS 416. See MUS 416.

ANTH 420  Case Studies Global Heritage  credit: 3 or 4 Hours.
Cultural heritage encompasses major domains of social, economic, political, religious and environmental practice and policy-making under today’s conditions of globalization. Students will critically examine cultural heritage case studies from around the world. 3 undergraduate hours. 4 graduate hours.

ANTH 421  Social Organization  credit: 3 or 4 Hours.
Introduction to anthropological concepts of social organization and structure; considers kinship theory, descent and alliance systems, social stratification, nonkin association, social networks, group identification and boundaries, structural-functional interpretations of society, and the meaning of social or cultural structure. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 230 or consent of instructor.

ANTH 423  Economic Anthropology  credit: 3 or 4 Hours.
Covers the emergence of economic anthropology as a subdiscipline; considers various definitions of economics with their implications for the study of human society; emphasizes the relationship between social organization and economic life from the perspectives of classical studies in anthropology and their contemporary interpretations. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 230.

ANTH 425  Anthropology of Education  credit: 2 or 4 Hours.
Same as EPS 425 and EPSY 466. See EPS 425.

ANTH 428  Sociolinguistics of Gender  credit: 3 or 4 Hours.
Same as LING 428 and GWS 428. See LING 428.

ANTH 430  The History of Anthropology  credit: 4 Hours.
Provides a selective overview of the history and historiography of anthropology in the 19th and 20th centuries. The class moves chronologically and topically, paying particular attention to the social, institutional, and historical contexts of paradigmatic shifts, the interconnections between various national traditions, and the negotiations of the discipline’s boundaries. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate or senior standing in anthropology, or consent of instructor.

ANTH 432  Genes and Behavior  credit: 3 Hours.
Same as IB 432, NEUR 432, and PSYC 432. See IB 432.

ANTH 434  Comparative Vertebrate Anatomy  credit: 5 Hours.
Same as IB 433. See IB 433.

ANTH 435  The Neandertal Debate  credit: 3 or 4 Hours.
A detailed investigation of the origin and biological adaptations of late archaic humans and the emergence of modern humans. Explores the practice and validity to using skeletal anatomy to interpret the behavior of past populations using evolutionary and comparative approaches. This course will interpret Neandertal biology and anatomy with particular emphasis on its relevance for theories about the origin and evolution of our species. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 240.

ANTH 436  Biogeography  credit: 3 Hours.
Same as ESE 439, GEOG 436, IB 439 and NRES 441. See IB 439.

Information listed in this catalog is current as of 03/2017
ANTH 437  Primate Behav Endocrinology  credit: 3 or 4 Hours.
Introduction to behavioral endocrinology, focusing on primate, especially human behaviors. Examines the relationship between hormones and behavior using an evolutionary and comparative approach, considering both how hormones influences behavior and how behavioral interactions regulate endocrine physiology. The course covers basic endocrine system physiology and function, hormonal influences on primate social behaviors such as male and female reproductive behaviors, courtship, parental care, bonding and attachment, as well as aggression and territoriality. Other topics include stress, hormones, and health. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 102, ANTH 143, or an equivalent course in behavioral ecology, primate behavior, physiology or psychology; or consent of instructor.

ANTH 438  Primate Life History Evolution  credit: 3 or 4 Hours.
Life history seeks to explain why differences exist in the pathways that organisms follow from conception to death. Examination of the diversity in the evolution of primates (including human) life histories. Topics may include the timing of birth; infant care; the role of temperature; critical periods; and the role of maternal, paternal, and sibling care. 3 or 4 undergraduate hours. Prerequisite: ANTH 240 or equivalent; consent of instructor.

ANTH 440  Human Paleontology  credit: 3 or 4 Hours.
Principles of evolution and a survey of human evolution from the early primates through the Pleistocene epoch; emphasis on evolutionary theory as applied to humans and interpretation of the fossil record. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 240 or equivalent.

ANTH 441  Human Genetics  credit: 3 or 4 Hours.
Principles of human genetics; anthropological aspects of race and race formation; and hereditary and environmental factors in the biological variation of modern humans. Same as ANSC 441. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 102 or equivalent.

ANTH 443  Primate Form and Behavior  credit: 3 or 4 Hours.
Survey of primate social behavior and the classification, morphology, and distribution of living and extinct species; emphasis on interrelationships among behavior, biology, and ecology. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 240 or consent of instructor.

ANTH 444  Methods in Bioanthropology  credit: 3 or 4 Hours.
Supervised participation in biological anthropology research projects; techniques, methods, and procedures discussed and practiced under actual field or laboratory working conditions. Normally taken concurrently with ANTH 445. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: ANTH 240 or equivalent; consent of instructor.

ANTH 445  Research in Bioanthropology  credit: 3 or 4 Hours.
Analysis, interpretation, evaluation, and organization of field and laboratory data in biological anthropology; preparation of written reports on research. May be taken concurrently with ANTH 444 or subsequently. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: ANTH 240 or equivalent; consent of instructor.

ANTH 446  Behavioral Inference & Fossils  credit: 3 or 4 Hours.
Theories and methods for interpreting behaviors inferred from the human and primate fossil record. Topics include discussions of adaptation, methods of inference in historical sciences, and practical experimental approaches to understanding aspects of diet, locomotor behavior and social organization in species known only from the fossil record. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 240.

ANTH 447  Advanced Skeletal Biology  credit: 3 Hours.
Human skeletal and dental remains form the basis for research in both bioarchaeology and forensic anthropology. We will examine the bases for making inferences about individual skeletons and past populations, with particular emphasis placed on paleodemography, reconstruction of diet, paleopathology, and biological distance analysis. 3 undergraduate hours. Prerequisite: ANTH 347.

ANTH 448  The Prehistory of Africa  credit: 3 or 4 Hours.
The study of cultural development in Africa from the appearance of hominids to the time of European domination. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 449  North American Archaeology  credit: 3 or 4 Hours.
Methods, techniques, and results of archaeology in North America; focuses on divergent approaches to the regional archaeology of North America; and surveys and synthesizes the archaeology of the subcontinent. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 451  Archaeological Surveying  credit: 3 or 4 Hours.
The study of cultural development in Africa from the appearance of hominids to the time of European domination. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 452  Stone Tool Technology Analysis  credit: 3 or 4 Hours.
Lecture and laboratory on the principles and techniques of stone and bone artifact manufacture, identification, classification, metrical analysis, interpretation, and integration with other classes of archaeological evidence. Emphasis on the use of lithics to test human behavioral models. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220.

ANTH 453  Landscape Archaeology  credit: 3 or 4 Hours.
The use of archaeological, documentary, and oral history evidence to study and interpret the ways past peoples shaped their landscapes through the deployment of cultural and social practices, and the ways, in turn, that such people were influenced, motivated, or constrained by their natural surroundings. Same as LA 454. 3 undergraduate hours. 4 graduate hours. Prerequisite: Introductory archaeology course, such as ANTH 220, or introductory landscape architecture course, such as LA 215, and a 300 level course in socio-cultural anthropology or archaeology, or equivalent with instructor’s permission.

ANTH 454  Archaeological Field School  credit: 3 or 4 Hours.
Participation in archaeological excavations; techniques, methods, and procedures discussed and practiced under actual working conditions. Normally taken concurrently with ANTH 455. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: Consent of instructor.

ANTH 455  Lab Analysis in Archaeology  credit: 3 or 4 Hours.
Laboratory work including processing, classifying, dating, interpretation, and preparation of written reports of archaeological research. May be taken concurrently with ANTH 454 or subsequently. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Prerequisite: ANTH 102 or consent of instructor.
ANTH 459 The Ancient Maya  credit: 3 Hours.
Introduction to the Ancient Maya of Mexico, Guatemala, Belize, and Honduras. Evaluates theories that account for the rise and fall of Classic (c. A.D. 250-950) Maya rulership. Excavation data, iconography, and inscriptions are used to reconstruct political and social organization, ideology, subsistence activities, and inter-regional interactions. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANTH 103 and ANTH 230 or graduate and compared through ethnographic studies. 4 undergraduate hours.

ANTH 460 Heritage Management  credit: 3 or 4 Hours.
Detailed examination of the theoretical and practical issues of archaeological heritage management. Focusing on the legal, environmental, ethical, social, political, educational, and touristic aspects of the management of ancient sites for their continued sustainability. Same as LA 460 and RST 459. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 and at least one ANTH 300- or 400-level archaeological area course.

ANTH 461 Hist of Archaeological Theory  credit: 3 or 4 Hours.
Examines the prominent theories in archaeology from its inception to the present day and does so within the context of general developments in anthropological thought. Provides a foundation for graduate students and a capstone for major emphasizing archaeology. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduates: ANTH 220; anthropology major with focus on archaeology; senior standing or consent of the instructor. For graduate students: enrollment in ANTH 430 during the same term advised.

ANTH 462 Museum Theory and Practice  credit: 3 or 4 Hours.
A foundational introduction to museology consisting of a critical examination of the history and social life of museums and how museums have been studied by scholars in a range of academic disciplines. Includes visits to campus and local museums. Same as ARTH 462 and LA 472. 3 undergraduate hours. 4 graduate hours.

ANTH 463 Religion and Society  credit: 4 Hours.
Course focuses on theoretical issues raised by religion. Does religion address itself essentially to intellectual, emotional or pragmatic issues? Is religion created by rulers, clerics or worshippers? How does the individual experience religion, and (how) can s/he reshape it? In exploring these and related issues, we will read the writings of German, French, and British social scientists of the past 150 years as well as work by contemporary anthropologists. Theoretical perspectives covered include symbolic, processual, materialist, structural-functionalist, structuralist, and postmodernist approaches. Same as REL 463. 4 undergraduate hours. 4 graduate hours. Prerequisite: A 200-level course in cultural anthropology or consent of instructor; or graduate standing.

ANTH 465 Oceania's Peoples and Cultures  credit: 3 or 4 Hours.
Survey of the Pacific Islands; regional geography, human ecology, culture history, and ethnography of Melanesia, New Guinea, Polynesia, New Zealand, Micronesia, and Australia; and some consideration of Pacific ethnohistory and the role of Oceania in the modern world. Same as ASST 465. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 102 and ANTH 103, or consent of instructor.

ANTH 466 Class, Culture and Society  credit: 4 Hours.
Social hierarchies in a variety of cultural contexts; industrial societies and the process of industrialization; looks at other social forms for the purposes of comparison. A variety of social theories will be discussed and compared through ethnographic studies. 4 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103 and ANTH 230 or graduate standing.

ANTH 467 Cultures of Africa  credit: 3 or 4 Hours.
Culture and social organization in traditional African societies with emphasis on the politics, kinship, and religion of a small sample of societies illustrating the main cultural variations found in sub-Saharan Africa; some discussion of ecological factors and ethnic group relations in precolonial times. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 230 or consent of instructor.

ANTH 468 Religions of Africa  credit: 3 or 4 Hours.
Explores a variety of religious traditions and experiences in sub-Saharan Africa from an anthropological perspective. Local, indigenous traditions are emphasized, but African experiences of Islam and Christianity are also covered. Same as AFST 468 and REL 468. 3 undergraduate hours. 4 graduate hours. Prerequisite: A 200-level course in cultural anthropology or consent of instructor; or graduate standing.

ANTH 469 Kinship-Culture-Power-Africa  credit: 2 or 4 Hours.
To present the classic approaches to kinship in anthropology that were developed for Africa; to explore the variety of kinship arrangements and strategies that exist in Africa; and to expose students to the panoply of contemporary critiques of classic works on kinship in Africa, and contemporary alternatives to them. Same as AFST 467. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For students outside anthropology or African Studies, at least one previous course in cultural anthropology is strongly recommended.

ANTH 471 Ethnography through Language  credit: 3 or 4 Hours.
Overview of theoretical perspectives and methodologies in linguistic anthropology, including sociolinguistics, ethnography of communication, performance and poetics, discursive practices, and structural analyses. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 230 or ANTH 270 and preferably both.

ANTH 472 Border Latina, Latino Cultures  credit: 3 or 4 Hours.
Explores and examines the production of U. S. Latina/Latino identities as instances of international, cultural, historical, and social border crossings. In both regional and global contexts, we will analyze the ways in which Mexican American, Cuban American and Puerto Rican identities have been shaped by colonial relations vis-a-vis Spain and by postcolonial conditions vis-a-vis the United States. Same as LLS 472. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103, and ANTH 259 or ANTH 359.

ANTH 473 Museums and Communities  credit: 3 or 4 Hours.
Examination of museums and members of ethnographic source communities, and the development of new curatorial practices that incorporate source community needs and views. 3 or 4 undergraduate hours. 4 graduate hours.

ANTH 477 Pottery Analysis  credit: 3 or 4 Hours.
Introduction to the theories and techniques of pottery analysis for archaeologists. In addition to presentation and discussion of the major literature, there is hands-on practice making, drawing, breaking and analyzing pottery. 3 or 4 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 478 African Immigrants in Europe  credit: 3 or 4 Hours.
Examines the pressing issues facing the new European Union as the realities of multicultural continent shape the daily lives of all. Begins with EU policy and theoretical models of immigration, but most readings emphasize perspectives of Africans’ own experiences as immigrants and refugees in Europe. Same as AFST 478 and EURO 478. 3 or 4 undergraduate hours. 4 graduate hours. Prerequisite: One prior 300-level anthropology or related social science course, or consent of instructor.
ANTH 479  Race, Medicine, and Society  credit: 3 or 4 Hours.
Same as AAS 479 and LLS 479. See LLS 479.

ANTH 481  Andean Ethnography  credit: 3 or 4 Hours.
Survey of Andean cultures at the time of the Spanish conquest, of
their subsequent history, and of modern Indian culture in the Andean
countries. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite:
ANTH 182, ANTH 230 or consent of instructor.

ANTH 484  Asian Diasporas  credit: 3 or 4 Hours.
Comparative study of Asian diasporic communities in various world
regions through ethnography. Introduces concepts of transnationalism,
globalization, and modernity in relation to Asian migration in
contemporary times. Same as AAS 484. 3 undergraduate hours. 4
graduate hours. Prerequisite: ANTH 184 or ANTH 284 or consent of
instructor.

ANTH 486  Peoples of Mainland SE Asia  credit: 3 or 4 Hours.
Culture, cultural history, and social systems of mainland Southeast
Asia: Burma, Thailand, Cambodia, Vietnam, Laos, Assam Hills, upland
southwestern China, and Malay; emphasis on the interaction of
complementary ethnic types in the context of local ecology and the
Hindu-Buddhist systems of religion and politics of the lowland states.
Same as ASST 486. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: ANTH 220 or ANTH 230, or consent of instructor.

ANTH 488  Modern Europe  credit: 4 Hours.
Historical studies which deploy anthropological methods in the study of
early modern and modern Europe; looks at processes of twentieth
century modernization through ethnographic studies. Western, Central
and Eastern Europe will all receive attention, but the study of Western
Europe will predominate. 4 undergraduate hours. 4 graduate hours.
Prerequisite: ANTH 103 and ANTH 230 or three history courses or
graduate standing.

ANTH 489  The Ethnography of Korea  credit: 3 or 4 Hours.
Same as EALC 469. See EALC 469.

ANTH 494  Honors Senior Thesis I  credit: 2 to 4 Hours.
The first of a two-term individual study and research project for
those students who are candidates for departmental distinction
in anthropology. 2 to 4 undergraduate hours. No graduate credit.
Prerequisite: Senior standing; 3.25 GPA in anthropology; and consent of
instructor. May not be taken concurrently with ANTH 390.

ANTH 495  Honors Senior Thesis II  credit: 2 to 4 Hours.
The second of a two-term individual study and research project for
those students who are candidates for departmental distinction in
anthropology. 2 to 4 undergraduate hours. No graduate credit.
Prerequisite: Senior standing; 3.25 GPA in anthropology; and consent of
instructor. May not be taken concurrently with ANTH 390.

ANTH 496  Individual Field Research  credit: 3 or 4 Hours.
Supervised participation in field research in ethnography, ethnology,
linguistics, or social anthropology; techniques, methods, and
procedures discussed and practiced under actual working conditions. 3
undergraduate hours. 4 graduate hours. May be repeated if topics vary.
Usually offered in the summer session only. Prerequisite: ANTH 230;
some knowledge of the language of the area concerned; consent of
instructor. Normally taken concurrently with ANTH 497.

ANTH 497  Individual Field Data Analysis  credit: 3 or 4 Hours.
Analysis, interpretation, evaluation, and organization of field data in
cultural anthropology; preparation of written reports on research in
ethnography, ethnology, linguistics, or social anthropology. May be taken
concurrently with ANTH 496 or subsequently. 3 undergraduate hours. 4
graduate hours. May be repeated if topics vary. Prerequisite: ANTH 230;
some knowledge of the language of the area concerned; consent of
instructor.

ANTH 498  Senior Capstone Seminar  credit: 3 Hours.
A guided independent research seminar for Anthropology majors
normally taken during the Fall of the senior year. Students may select
to conduct significant and original research in any of the four sub-fields
of anthropology or combine interdisciplinary interests. Working closely
with the course instructors and with additional guidance from a chosen
anthropology faculty advisor, student will develop a research topic of
their choice, identify significant research questions, before collecting and
analyzing their field data. 3 undergraduate hours. No graduate credit.

ANTH 499  Topics in Anthropology  credit: 4 Hours.
Research seminar on specialized topics in anthropology. 4 undergraduate
hours. 4 graduate hours. May be repeated. Prerequisite: Consent of
instructor.

MUSE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/MUSE)

Museum Studies Courses

MUSE 200  Introduction to Museums  credit: 3 Hours.
A broad introduction to the museum world, focusing on what a museum
is, what differentiates various types of museums, and how museums
function. Examines museums in terms of education, curation, exhibition,
public relations, research, administration, ethical and legal obligations,
funding and knowledge. Prerequisite: One year of college coursework.

MUSE 250  The World Through Museums  credit: 3 Hours.
Examination of contemporary museums around the world, evaluating
their roles as social institutions and communicators of heritage in
increasingly global contexts. The first half of the course develops a
framework for museum literacy (how to read museums) that incorporates
anthropological, globalization, media and critical theories. The second
half of the course is a virtual tour and evaluates museums using this
analytical skill set. Same as ANTH 250.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: Western Compartment Cult

MUSE 330  Learning in Museums  credit: 3 Hours.
An applied course in the multiple responsibilities of professionals in the
field of Museum Education. Examines how people, ideas and objects
connect in museums; trends in interpretation and museum ethics;
best practice and current learning theories; and exemplary programs
involving highly varied audiences, community collaboration and advanced
technology. Provides practical experience in program development,
facilitation, documentation and assessment. Requires some in-museum
work outside of regularly scheduled class hours. Includes field trips to
local museums. Prerequisite: MUSE 200.

MUSE 389  Seminar in Museum Studies  credit: 3 Hours.
Study of special themes, selected topics or current issues in museum
studies for undergraduate students with backgrounds in museology.
Course may be in seminar or lecture format. May be repeated in separate
terms to a maximum of 6 hours. Prerequisite: MUSE 200 and ANTH 462.
MUSE 390  Museum Internship  credit: 3 Hours.
Supervised field experience in museums, both on and off-campus, designed to introduce students to professional practice. Builds on museum studies coursework, and provides opportunities for applying academic knowledge and analyzing personal development. Students work part-time (150 hours) in a program-approved museum under the guidance of an instructional team. Requires an internship contract before the term, regular reporting and documentation during the term, and compilation of a project portfolio at the end of the term. May be repeated in same and separate terms to a maximum of six hours. Prerequisite: Three courses (nine hours) within the undergraduate minor in Museum Studies. Requires approval of the Museum Studies program advisor.

MUSE 420  Collections Management  credit: 3 or 4 Hours.
An applied course in the preservation, documentation, and maintenance of the physical integrity of museum collections. Examines agents of deterioration and how to mitigate damage to collections; the chemical and physical properties of inorganic, organic, composite and textile materials; collections packing, shipping and storage methods; and collections hazards, safety and emergency planning. Provides practical experience and encourages skills development in collections management. Requires some in-museum work outside of regularly scheduled class hours. 3 undergraduate hours. 4 graduate hours. Prerequisite: MUSE 200 or MUSE 500.

MUSE 440  Museum Registration  credit: 3 Hours.
An applied course in the management and care of museum collections through registration and records. Examines legal and ethical issues of collections stewardship, and current professional practices and standards. Provides practical experience and encourages skills development in museum registration. Requires some in-museum work outside of regularly scheduled class hours. Includes a field trip to a local museum. 3 undergraduate hours. 4 graduate hours. Prerequisite: MUSE 200 or MUSE 500.

Archaeology Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60–75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements.

Anthropology Core Courses

Choose 3 of the following core courses. Students may make one substitution for 1 of the 3 required courses, choosing from the option listed.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 220</td>
<td>Introduction to Archaeology</td>

Information listed in this catalog is current as of 03/2017
Additional Archaeology Anthropology coursework (9 hours distributed as follows):

One course in Biological Anthropology 3
Two courses related to the student's area of emphasis and approved by the departmental advisor 6

Research and Service Learning Coursework

ANTH 454  Archaeological Field School 3
ANTH 455  Lab Analysis in Archaeology 3

Senior Capstone Project 3-6

Choose one option below (Honors Thesis or Senior Capstone Seminar or Research) in consultation with the departmental advisor:

Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis

ANTH 494  Honors Senior Thesis I
ANTH 495  Honors Senior Thesis II

Senior Capstone Seminar (Independent Research)- 3 hours

ANTH 498  Senior Capstone Seminar

Research and/or Additional Field School- 3-6 hours. Further data analysis and a research report associated with ANTH 455 or an additional approved ANTH 454-Archaeology Field School and ANTH 455- Lab Analysis in Archaeology

Total Hours 45

General Anthropology Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of anthropology courses and supporting course work with a departmental adviser.

When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements.

Information listed in this catalog is current as of 03/2017
Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis
  ANTH 494 Honors Senior Thesis I
  ANTH 495 Honors Senior Thesis II
Senior Capstone Seminar (Independent Research)- 3 hours
  ANTH 498 Senior Capstone Seminar
Internship- 3 hours. A portfolio and report associated with an approved departmental internship
  ANTH 390 Individual Study
Study Abroad- 3 hours. A portfolio and report associated with an approved Study Abroad experience
  ANTH 390 Individual Study
Research and/or Field School- 3-6 hours. Data analysis and a research report associated with one of the following:
  ANTH 454 Archaeological Field School & ANTH 455 Lab Analysis in Archaeology
  ANTH 444 Methods in Bioanthropology & ANTH 445 Research in Bioanthropology

Total Hours 45

Human Evolutionary Biology Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum
E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60–75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements. Twelve hours of 300 or 400-level courses in your major must be taken on this campus.

Anthropology Core Courses 9

Choose 3 of the following core courses. Students may make one substitution for 1 of the 3 required courses, choosing from the option listed.
  ANTH 220 Introduction to Archaeology or ANTH 10 World Archaeology
  ANTH 230 Sociocultural Anthropology or ANTH 10 Anthro in a Changing World
  ANTH 240 Biological Anthropology or ANTH 10 Human Origins and Culture
  ANTH Language in Culture 270/271
or ANTH 10 Talking Culture

Human Evolutionary Biology Courses 18

Students take courses from 4 different categories: 2 courses from each of 2 categories, plus 1 course in each of the 2 remaining categories.

Evolution and Genetics
  ANTH 241 Human Variation and Race
  ANTH 242 History of Human Evolution
  ANTH 249 Evolution and Human Disease
  ANTH 408 Human Evolutionary Anatomy
  ANTH 435 The Neandertal Debate
  ANTH 438 Primate Life History Evolution
  ANTH 440 Human Paleontology
  ANTH 441 Human Genetics

Health
  ANTH 258 Sex in Nature and Culture
  ANTH 343 Behavior and Biology of Women
  ANTH 347 Human Osteology
  ANTH 437 Primate Behav Endocrinology
  ANTH 438 Primate Life History Evolution
  ANTH 447 Advanced Skeletal Biology

Behavior
  ANTH 243 Sociality of the Great Apes
  ANTH 258 Sex in Nature and Culture
  ANTH 343 Behavior and Biology of Women
  ANTH 347 Human Osteology
  ANTH 435 The Neandertal Debate
  ANTH 437 Primate Behav Endocrinology
  ANTH 438 Primate Life History Evolution
  ANTH 440 Human Paleontology
  ANTH 443 Primate Form and Behavior
  ANTH 446 Behavioral Inference & Fossils
  ANTH 447 Advanced Skeletal Biology

Comparative Anatomy
  ANTH 243 Sociality of the Great Apes
  ANTH 346 Forensic Anthropology
  ANTH 347 Human Osteology
  ANTH 408 Human Evolutionary Anatomy
  ANTH 435 The Neandertal Debate
  ANTH 443 Primate Form and Behavior
  ANTH 446 Behavioral Inference & Fossils
  ANTH 447 Advanced Skeletal Biology
3 additional courses from any of the 4 elective categories, or another field of anthropology, or a related field such as statistics, psychology, chemistry, etc. Course selection should complement the student’s Human Evolutionary Biology focus. Meet with the departmental advisor to discuss course selection.

**Research and Service Learning Coursework**  
3  
Choose one of the following:  
- ANTH 444 Methods in Bioanthropology  
- ANTH 445 Research in Bioanthropology

**Senior Capstone Project**  
3-6  
Choose one option below (Honors Thesis, Senior Seminar, Internship, or Research) in consultation with the departmental advisor:  
- Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis  
  - ANTH 494 Honors Senior Thesis I  
  - ANTH 495 Honors Senior Thesis II  
- Senior Capstone Seminar (Independent Research)- 3 hours  
  - ANTH 498 Senior Capstone Seminar  
- Internship- 3 hours. A portfolio and report associated with an approved departmental internship  
  - ANTH 390 Individual Study  
- Research and/or Additional Field School- 3-6 hours. If not taken to meet the Research and Service Learning Coursework requirement above choose one of the following:  
  - ANTH 444 Methods in Bioanthropology  
  - ANTH 445 Research in Bioanthropology  
- Further data analysis- ANTH 445 or an additional approved biological anthropology research project- ANTH 444.

**Total Hours** 42

---

**Sociocultural and Linguistic Anthropology Concentration**

**For the Degree of Bachelor of Arts in Liberal Arts and Sciences**

**Major in Sciences and Letters Curriculum**

E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements.

**Anthropology Core Courses**  
9  
Choose 3 of the following core courses. Students may make one substitution for 1 of the 3 required courses, choosing from the option listed.  
- ANTH 220 Introduction to Archaeology  
- ANTH 230 Sociocultural Anthropology  
- ANTH 101 Anthropology in a Changing World  
- ANTH 240 Biological Anthropology  
- ANTH 210 Human Origins and Culture  
- ANTH 390 Individual Study  
- ANTH 270/271 Language in Culture  
- ANTH 244 Methods in Bioanthropology  
- ANTH 445 Research in Bioanthropology

**Additional Courses**

7 courses selected from the list maintained in the advisor’s office. Students select 3 courses from locations across at least 2 regions of the world and 4 courses from theoretical or topical areas course offerings in socio-cultural and linguistic anthropology chosen in consultation with the departmental advisor. Four courses must be at the 300- or 400-level.

Additional socio-cultural and linguistic anthropology courses or courses in related fields such as Sociology, Linguistics, Psychology, Education, History, Gender and Women’s Studies, African American Studies, Latina/Latino Studies, Asian American Studies, African Studies, Jewish Studies that complement the student’s sociocultural/linguistic focus. Meet with the departmental advisor to discuss the selection of courses.

**Research and Service Learning Coursework**  
3  
Choose one of the following:  
- Research Methods in Cultural Anthropology - ANTH 411  
- Methods of Cultural Anth  
- Research Methods in Linguistic Anthropology - ANTH 499  

**Senior Capstone Project**  
3-6  
Choose one option below (Honors Thesis, Senior Seminar, Internship, or Study Abroad) in consultation with the departmental advisor:  
- Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis  
  - ANTH 494 Honors Senior Thesis I  
  - ANTH 495 Honors Senior Thesis II  
- Senior Capstone Seminar (Independent Research)- 3 hours  
  - ANTH 498 Senior Capstone Seminar  
- Internship- 3 hours. A portfolio and report associated with an approved departmental internship  
  - ANTH 390 Individual Study

Information listed in this catalog is current as of 03/2017
Asian American Studies

Martin Manalansan
Head
1208 West Nevada, Urbana
PH: (217) 244-9530
http://aasp.illinois.edu

The Asian American Studies Department offers an undergraduate major and interdisciplinary minor.

The major in Asian American Studies explores Asian Americans across disciplines and cultures. The program provides both a broad and a deep approach to theory, research, and multidisciplinary study. The major will prepare students with the research skills that may lead to graduate study in the humanities or social sciences, or career fields including health and medicine, education, law, business, social work, digital and media industries, policy advocacy, politics, academic administration, and other fields that address Asian American issues.

This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of race and diversity in the United States and transnationally. It is relevant to curricula such as letters and sciences, business, economics, education, health studies, pre-law, social work, or urban and regional planning.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: aas@illinois.edu

http://www.asianam.illinois.edu/

Minimum required courses: 33 hours.

General Education: The LAS General Education requirements will fulfill the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

12 hours of 300- or 400-level courses in your major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Advising: The Department of Asian American Studies provides advising for students. Students must officially declare their major by registering with the Associate Head of Asian American Studies. Students will work with their advisor to choose appropriate courses from the Additional Coursework List and the Approved Elective List to help plan a coherent program of study. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

AAS 100 Intro Asian American Studies 3

AAS 200 U.S. Race and Empire 3
AAS 215 US Citizenship Comparatively 3
AAS 300 Theories of Race, Gender, and Sexuality 3

Additional Coursework 15

Complete at least 15 additional hours of substantive coursework offered by Department of Asian American Studies listed on the Approved Additional Coursework List.

Electives 6

Choose 6 hours from the Approved Elective Course List.

Total Hours 33

Approved Additional Coursework List and Approved Elective List are maintained in the department office and with the AAS advisor.

Interdisciplinary Minor in Asian American Studies

The Asian American Studies Department offers a campus-wide Interdisciplinary Minor. This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of race and diversity in the United States and transnationally. It is relevant to curricula such as letters and sciences, business, economics, education, health studies, pre-law, social work, or urban and regional planning.

AAS 100 Intro Asian American Studies 3

Asian American Studies Core Coursework

AAS 200 U.S. Race and Empire 3
AAS 215 US Citizenship Comparatively 3
AAS 300 Theories of Race, Gender, and Sexuality 3

Approved Electives 6

Students complete 6 hours of AAS coursework (a minimum of 3 hours must be at the 300- or 400-level)

Total Hours 18

AAS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AAS)

Courses

AAS 100 Intro Asian American Studies credit: 3 Hours.
Interdisciplinary introduction to the basic concepts and approaches in Asian American Studies. Surveys the various dimensions of Asian American experiences including history, social organization, literature, arts, and politics. This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 120 Intro to Asian Am Pop Culture credit: 3 Hours.
Introductory understanding of the way U.S. popular culture has affected Asian Americans and the contributions Asian Americans have made to U.S. media and popular culture since the mid 1880’s. This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)
AAS 184  Asian American Cultures  credit: 3 Hours.
Same as ANTH 184 and SOC 124. See ANTH 184.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 6 hours.

AAS 200  U.S. Race and Empire  credit: 3 Hours.
Invites students to examine histories and narratives of U.S. imperialism and racism, drawing upon multiple theoretical and methodological works in Asian American studies and related fields. Same as LLS 200.

AAS 201  US Racial & Ethnic Politics  credit: 3 Hours.
Same as AFRO 201, LLS 201, and PS 201. See PS 201.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 211  Asian Americans and the Arts  credit: 3 Hours.
Examination of Asian American artistic expressions in the visual and performing arts providing historical, theoretical, and conceptual foundations of understanding the history of various art genres in Asian American communities. Prerequisite: AAS 100 or AAS 120, or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

AAS 215  US Citizenship Comparatively  credit: 3 Hours.
Examines the racial, gendered, and sexualized aspects of US citizenship historically and comparatively. Interdisciplinary course taught from a humanities perspective. Readings draw from critical legal studies, history, literature, literary criticism, and ethnography. Same as AFRO 215, AIS 295, GWS 215, and LLS 215. Prerequisite: One of: AAS 100, AAS 120, AFRO 100 AIS 101, GWS 250, LLS 100.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AAS 224  Asian Am Historical Sociology  credit: 3 Hours.
Explores concepts of colonization, international labor migration, race, nation, assimilation, and class formation through socio-historical examinations of diverse groups categorized as Asian Americans. Same as SOC 224. Prerequisite: AAS 100.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AAS 246  Asian American Youth in Film  credit: 3 Hours.
Examines both mainstream and independent films and documentaries representing and/or produced by Asian American youth. Explores the role of multiculturalism and diversity issues in informing young people's experiences.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 250  Asian American Ethnic Groups  credit: 3 Hours.
Intensive interdisciplinary study of a particular Asian American Ethnic group (specific ethnic group focus will change every semester). May be repeated in the same or separate terms to a maximum of 9 hours. Prerequisite: Any AAS course at the 100- or 200-level or consent of instructor.

AAS 258  Muslims in America  credit: 3 Hours.
Introduction to the study of Muslims in the United States and broadly the history of Islam in the Americas. Using a comparative approach, we study how the historical narrative of African American and Latino Muslims relates to newer immigrant populations, primarily Arab American and South Asian American Muslim communities. Same as LLS 258 and REL 258.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 260  Intro Asian American Theatre  credit: 3 Hours.
Same as THEA 260. See THEA 260.
This course satisfies the General Education Criteria for:
UIUC: US Minority Culture(s)

AAS 265  Politics of Hip Hop  credit: 3 Hours.
Same as LLS 265. See LLS 265.

AAS 281  Constructing Race in America  credit: 3 Hours.
Same as AFRO 281, HIST 281, and LLS 281. See HIST 281.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AAS 283  Asian American History  credit: 3 Hours.
Same as HIST 283. See HIST 283.
This course satisfies the General Education Criteria for:
UIUC: HistPhilosoph Perspect
UIUC: US Minority Culture(s)

AAS 284  Adv Topics in Asian America  credit: 3 Hours.
Same as ANTH 284. See ANTH 284.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 286  Asian American Literature  credit: 3 Hours.
Same as ENGL 286. See ENGL 286.
This course satisfies the General Education Criteria for:
UIUC: Literature and the Arts
UIUC: US Minority Culture(s)

AAS 287  Food and Asian Americans  credit: 3 Hours.
Introduction to the interdisciplinary study of food to better understand the historical, social, and cultural aspects of Asian American food preparation, distribution and consumption. Students will investigate the politics and poetics of Asian American foodways by examining social habits, and rituals around food in restaurants, ethnic cookbooks, fictional works, memoirs, magazines, and television shows. Prerequisite: AAS 100 or AAS 120, or consent of instructor.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)

AAS 290  Individual Study  credit: 2 to 3 Hours.
Supervised reading and research in Asian American Studies chosen by the student with instructor approval. May be repeated to a maximum of 6 hours. Prerequisite: AAS 100.

AAS 291  Hinduism in the United States  credit: 3 Hours.
Same as REL 291. See REL 291.

AAS 297  Asian Families in America  credit: 3 Hours.
Same as HDFS 221 and SOCW 297. See SOCW 297.
This course satisfies the General Education Criteria for:
UIUC: Social Sciences
UIUC: US Minority Culture(s)
AAS 299 Begin Topics Asian Am Studies  credit: 3 Hours.
May be repeated in the same or subsequent terms to a maximum of 6 hours.

AAS 300 Theories of Race, Gender, and Sexuality  credit: 3 Hours.
Explores theories for performing interdisciplinary, intersectional and comparative studies within the field of Asian American studies. Follows multiple genealogies of critical work in ethnic and American studies. Same as GWS 305 and LLS 305. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AAS 310 Race and Cultural Diversity  credit: 4 Hours.
Same as AFRO 310, EPS 310, and LLS 310. See EPS 310. This course satisfies the General Education Criteria for: UIUC: Advanced Composition UIUC: US Minority Culture(s)

AAS 315 War, Memory, and Cinema  credit: 3 Hours.
Interdisciplinary examination of the ways that memories of war, trauma, and immigration are produced through the medium of film. Because war has been key to discourses and practices of imperialism and globalization, some questions addressed will include how these wars have impacted the nation and the global order, as well as how images about these wars produced important constructions of race, gender, and sexuality for national and cultural identities. Also examines the aftereffects of war by analyzing connections between war's trauma, race, immigration, and incarceration. Students will read critical texts, film theory, screenplays, and view films. Same as GWS 315. Prerequisite: AAS 100 or AAS 120, or consent of the instructor.

AAS 317 Asian American Politics  credit: 3 Hours.
Same as PS 317. See PS 317.

AAS 328 Asian Americans & Inequalities  credit: 3 Hours.
Same as SOC 328. See SOC 328.

AAS 346 Asian American Youth  credit: 3 Hours.
Explores cultural production of second-generation Asian American youth as a historical and social formation. Course examines how youth are actively shaping the U.S. landscape in terms of identity formation, youth, culture, education, juvenile justice, politics, adolescent activism, and community formations. These experiences are examined in the backdrop of larger historical, economic, racial, social and political forces in the United States. Same as HDFS 341.

AAS 355 Race and Mixed Race  credit: 3 Hours.
Same as LLS 355 and SOC 355. See LLS 355.

AAS 365 Asian American Media and Film  credit: 3 Hours.
An examination of media generally and films and videos more specifically (experimental, documentary, independent, and Hollywood features) by, for, and about Asian Americans. Same as MACS 365. Prerequisite: Any AAS course at the 100- or 200-level, or consent of instructor.

AAS 370 Immigration, Law, and Rights  credit: 3 Hours.
Exploration of the histories, cultures, and experiences of immigration to the United States by examining cultural production (literary and visual narratives and texts) alongside legal discourses (legislation, federal court cases). Same as LLS 372.

AAS 375 Prisons, Race, and Terror  credit: 3 Hours.
Examination of the U.S. prison regime, focusing on three dimensions of U.S. imprisonment—criminal justice, immigrant detention, and martial imprisonment, particularly under the War on Terror. Same as LLS 377.

AAS 390 Intermed Topics Asian Am St  credit: 3 Hours.
May be repeated in the same or subsequent terms to a maximum of 6 hours.

AAS 395 Adv Asian Am Undergrad Reading  credit: 2 or 3 Hours.
Supervised reading and research in upper level Asian American Studies topics chosen by the student with instructor approval. May be repeated to a maximum of 6 hours. Prerequisite: AAS 100.

AAS 400 Critical Ethnic Studies  credit: 3 or 4 Hours.
Examines the formation of the field of Critical Ethnic Studies and elaborates its key concepts, such as settler colonialism, indigeneity, heteropatriarchy, decolonization, and liberation. Same as LLS 460. 3 undergraduate hours. 4 graduate hours.

AAS 402 Asian American Education  credit: 4 Hours.
Same as EPS 402. See EPS 402. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

AAS 435 Commoditying Difference  credit: 3 or 4 Hours.
Same as AFRO 435, GWS 435, LLS 435, and MACS 432. See LLS 435.

AAS 465 Race, Sex, and Deviance  credit: 3 or 4 Hours.
Same as AFRO 465, GWS 465, and LLS 465. See LLS 465.

AAS 479 Race, Medicine, and Society  credit: 3 or 4 Hours.
Same as ANTH 479 and LLS 479. See LLS 479.

AAS 484 Asian Diasporas  credit: 3 or 4 Hours.
Same as ANTH 484. See ANTH 484.

AAS 485 The Politics of Fashion  credit: 3 or 4 Hours.
Same as GWS 485. See GWS 485.

AAS 490 Adv Topics in Asian Am Studies  credit: 3 or 4 Hours.
Research seminar on specialized topics in Asian American Studies. 3 or 4 undergraduate hours. 3 or 4 graduate hours. May be repeated if topics vary. Students may register in more than one section per term if topics vary. Prerequisite: AAS 100 or any Asian American Studies course, or consent of instructor.

Astronomy

Brian Fields
103 Astronomy Building, 1002 West Green, Urbana
PH: (217) 333-3090
http://www.astro.illinois.edu

The Department of Astronomy offers a major and a minor in astronomy. In addition, students may pursue astronomy as part of the LAS Major in Computer Science and Astronomy (p. 561).

The major in astronomy, administered by the Department of Astronomy, is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education. It may be chosen by students who wish to have an astronomy research career or an astronomy background for use in related fields, such as working in national laboratories, observatories, planetariums, NASA, aerospace industry, many computer-related fields, journalism, or science writing to name a few. Astronomy courses can also be customized to satisfy a secondary field for the undergraduate curriculum in General Engineering.

Astronomy students are also encouraged to double major or minor in a second field such as chemistry, computer science, geology, mathematics or physics. Specific programs of study in other areas such as biology,
economics, English, history, or journalism for individual students can be designed and periodically updated through mutual discussions between the students and their academic advisers.

The Department of Astronomy also sponsors the Minor in Astronomy.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: astronomy@illinois.edu

Minimum required major and supporting course work normally equates to 47-48 hours.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level Astronomy/Physics courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction. A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at UIUC. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

1. Students without a background in physics or astronomy are encouraged to take ASTR 121 and ASTR 122 during their freshman year.

2. Other 300- or 400-level technical classes, e.g. chemistry, computer science engineering, or statistics can be substituted with academic adviser approval.

3. A maximum of 4 hours of credit in ASTR 390 (or equivalent “Independent Study” course, such as PHYS 497) can be counted towards this requirement.

4. MATH 220 may be substituted for MATH 221. MATH 220 is appropriate for students with no background in calculus.

Minor in Astronomy

The minor in astronomy is designed to broaden the student’s knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

Advanced Astronomy

300- or 400-level courses taught by the Department of Astronomy 9

Courses at any level taught by the Department of Astronomy 3-6

Minimum total hours 18

1. Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.

2. No more than 4 hours of ASTR 390 will be counted towards the minor.

ASTR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ASTR)

Courses

ASTR 100 Introduction to Astronomy 3 Hours.

Introduces the student to the basic concepts of modern astronomy. Covers topics including the night sky; the solar system and its origin; the nature and evolution of stars; stellar remnants, including white dwarfs, neutron stars, and black holes; extrasolar planetary systems; galaxies and quasars; dark matter and dark energy; the Big Bang and the fate of the universe; and life in the universe. Credit is not given for ASTR 100 if credit in any of ASTR 121, ASTR 122, ASTR 210, or equivalent has been earned. Students with credit in PHYS 211 are encouraged to take ASTR 210.

This course satisfies the General Education Criteria for: UIUC: Physical Sciences
ASTR 121 Solar System and Worlds Beyond credit: 3 Hours.
Introductory survey of the Solar System; structure and motions of the Earth and Moon; planetary motions; natures and characteristics of the planets and smaller solar system bodies; planetary moons and rings; meteors, meteoroids, and meteorites; properties of the Sun; origin and evolution of the Solar System; discovery of extrasolar planetary systems; architecture of extrasolar planetary systems and comparison to our solar system; habitable extrasolar planets. Emphasis will be placed on problem-solving and scientific methods. Credit is not given for ASTR 121 if credit in either ASTR 100 or ASTR 210 has been earned. Students with credit in PHYS 211 are encouraged to take ASTR 210. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

ASTR 122 Stars and Galaxies credit: 3 Hours.
Introduction to celestial objects and phenomena beyond the Solar System, and their governing basic physical principles; galaxies, quasars, and structure of the universe; dark matter and dark energy; the Big Bang and the fate of the universe; the Milky Way; the interstellar medium and the birth of stars; stellar distances, motions, radiation, structure, evolution, and remnants, including neutron stars and black holes. Emphasis will be placed on problem-solving and scientific methods. Credit is not given for ASTR 122 if credit in either ASTR 100 or ASTR 210 has been earned. Students with credit in PHYS 211 are encouraged to take ASTR 210. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

ASTR 131 The Solar System Lab credit: 1 Hour.
Laboratory studies which complement the lecture course, ASTR 121. Laboratory exercises will include properties of telescopes, observations of the Moon and planets using telescopes at the Campus Observatory, and computer-based activities that illustrate modern astronomical techniques using digital data. Prerequisite: Credit in ASTR 100 or ASTR 121, or concurrent registration in ASTR 121.

ASTR 132 Stars and Galaxies Lab credit: 1 Hour.
Laboratory studies which complement the lecture course, ASTR 122. Laboratory exercises will include properties of telescopes, observations of star clusters, nebulae and galaxies using telescopes at the Campus Observatory, and computer-based activities that illustrate modern astronomical techniques using digital data. Prerequisite: Credit in ASTR 100 or ASTR 122, or concurrent registration in ASTR 122.

ASTR 150 Killer Skies: Astro-Disasters credit: 3 Hours.
Exploration of the most dangerous topics in the Universe, such as meteors, supernovae, gamma-ray bursts, magnetars, rogue black holes, colliding galaxies, quasars, and the end of the Universe, to name just a few. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

ASTR 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

ASTR 210 Introduction to Astrophysics credit: 3 Hours.
Survey of modern astronomy for students with background in physics. Topics include: the solar system; nature and evolution of stars; white dwarfs, neutron stars, and black holes; galaxies, quasars and dark matter; large scale structure of the universe; the Big Bang; and Inflation. Emphasis will be on the physical principles underlying the astronomical phenomena. Prerequisite: PHYS 211. This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

ASTR 330 Extraterrestrial Life credit: 3 Hours.
Scientific discussion of the search for extraterrestrial life. Topics include: cosmic evolution (protons to heavy elements to molecules); terrestrial evolution (chemical, biological, and cultural); high technology searches for extraterrestrial life in the solar system (Mars, Venus, outer planets); and beyond the solar system (Drake equation and current SETI projects).

ASTR 350 Introduction to Cosmology credit: 3 Hours.
Descriptive course on modern cosmological theories. Topics include aspects of special and general relativity; curved spacetime; the Big Bang; inflation; primordial element synthesis; the cosmic microwave background; the formation of galaxies and large scale structure. Credit is not given for ASTR 350 if credit in ASTR 406 has been earned. Prerequisite: ASTR 100, or ASTR 121, or ASTR 122, or ASTR 210, or consent of instructor.

ASTR 390 Individual Study credit: 0 to 4 Hours.
Individual study at an advanced undergraduate level. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Consent of advisor and of faculty member who supervises the work.

ASTR 401 Scientific Writing for Astronomy credit: 2 Hours.
Development of journal-style writing skills. Papers written in accordance with the Astrophysical Journal Manual of Style on topics approved by the instructor. Emphasis on developing adequate and critical coverage of the topic, brevity compatible with clarity, and effective presentation. Proper referencing, footnotes, and bibliography are covered. 2 undergraduate hours. No graduate credit. Prerequisite: Completion of campus Composition I general education requirement. Concurrent enrollment in a designated 400-level astronomy course. Not intended for graduate students. This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

ASTR 404 Stellar Astrophysics credit: 3 Hours.
Introduction to astrophysical problems, with emphasis on underlying physical principles; includes the nature of stars, equations of state, stellar energy generation, stellar structure and evolution, astrophysical neutrinos, binary stars, white dwarfs, neutron stars and pulsars, and novae and supernovae. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 212; or consent of instructor. Recommended: ASTR 210, PHYS 213, PHYS 214.

ASTR 405 Planetary Systems credit: 3 Hours.
This course traces, from a physical perspective, the evolution of planetary systems from star formation in molecular clouds to the emergence of habitable worlds. Topics include the properties of HII regions and molecular clouds, gravitational collapse and disk formation, formation of planetesimals and planets, dynamics of the solar system, physics of planetary atmospheres, properties of individual planets and their rings and satellites, detection and characterization of extra-solar planets, and searches for life in the Solar System and beyond. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 212 or consent of instructor. Recommended: ASTR 210, PHYS 213.
Atmospheric Sciences

Robert Rauber
101 Atmospheric Sciences Building, 105 South Gregory Street, Urbana
PH: (217) 333-2046
https://www.atmos.illinois.edu

The Science and Letters Curriculum in Atmospheric Sciences prepares students for careers in a wide range of disciplines within the atmospheric sciences including meteorology, environmental science, climate, remote sensing, atmospheric chemistry, computational science and other areas. The curriculum is tailored to achieve the student's long term educational goals, their career aspirations in atmospheric sciences and their general interests in the field. All students receive a firm foundation in mathematics, physics and chemistry and develop data analysis and computational skills that can be used in a wide range of applications within and beyond the atmospheric sciences. Students can emphasize specific areas of interest in their elective choices. Students majoring in Atmospheric Sciences will have opportunities for employment within agencies of government (e.g. the National Weather Service/NOAA, NASA, EPA, DOD, DOE), many private firms and in colleges and universities for those who continue with graduate education. All students can take part in independent study, internship or research projects as a capstone experience in their senior year. Students interested in a research career in atmospheric sciences are encouraged to undertake research projects in the capstone experience.

The undergraduate curriculum in atmospheric sciences is modeled on the recently published recommendations of the American Meteorological Society. The American Meteorological Society is the professional society for atmospheric scientists and meteorologists in the United States. Their "recommended attributes" for undergraduate degree programs in the atmospheric sciences are guidelines for graduates to be successful in finding employment or in seeking admission to graduate programs. Therefore, we have closely adhered to these recommended attributes in designing our program.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Email: atmos-sci@illinois.edu

Minimum required major and supporting course work normally equates to 58-59 hours including at least 32 hours in Atmospheric Sciences.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in Atmospheric Sciences can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

For distinction: A minimum cumulative grade point average of 3.2 in all of their Atmospheric Sciences courses, and completing three Atmospheric Sciences Elective courses.

For high distinction: A minimum cumulative grade point average of 3.4 in all of their Atmospheric Sciences courses, and completing four Atmospheric Sciences Elective courses.

For highest distinction: A minimum cumulative grade point average of 3.6 in all of their Atmospheric Sciences courses, and completing five Atmospheric Sciences Elective courses.

Minor in Atmospheric Sciences

The minor in Atmospheric Sciences is designed for students who desire a significant background in Atmospheric Sciences to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture; or scientific pursuits such as chemistry, physics, biology, and scientific writing.

300- and 400-level courses from the approved course list. 12-18

Please see the Atmospheric Sciences advisor for a current list.

Total Hours 18

ATMS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ATMS)

Courses

ATMS 100  Introduction to Meteorology  credit: 3 Hours.
Introduces the student to the basic concepts and principles of meteorology via the interpretation of weather maps and charts; uses current weather information to illustrate key concepts, emphasizes the physical atmospheric processes responsible for weather. By the end of the class students will be able to interpret and make basic weather forecasts as well as be able to explain basic atmospheric phenomena. Same as GEOG 100.

This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

ATMS 120  Severe and Hazardous Weather  credit: 3 Hours.
Most extreme manifestations of weather and climate are analyzed in terms of their physical basis and their historical, economic and human consequences. Emphasis is placed on the interplay between technological advances, the evolution of meteorology as a science, and the impacts of extreme weather (winter storms, floods, severe thunderstorms, hurricanes, El Nino). Technological advances include satellites, weather radars and profilers, and computer models used for weather prediction. Same as ESE 120.

This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
UIUC: Quant Reasoning II

ATMS 140  Climate and Global Change  credit: 3 Hours.
Introduces climate change and its interactions with the global environment; surveys the physical, chemical, biological and social factors contributing to global change; includes topics such as greenhouse warming, acid rain, ozone depletion, distinguishes anthropogenic influences and natural variability of the earth system; addresses societal impacts, mitigation strategies, policy options and other human responses to global change. Same as ESE 140.

This course satisfies the General Education Criteria for:
UIUC: Physical Sciences

ATMS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Special topics each term. May be repeated.

ATMS 201  General Physical Meteorology  credit: 3 Hours.
Introduction to physical processes in the atmosphere, focusing on those relevant to weather and storms. Emphasizes quantitative problem solving. Topics include atmospheric structure, atmospheric thermodynamics, clouds, synoptic meteorology, weather forecasting, and storms. For students in atmospheric sciences, physics, mathematics, engineering, and other physical and natural sciences. Prerequisite: MATH 220 or MATH 221; credit or concurrent registration in MATH 231 and PHYS 211.

ATMS 205  Introduction to Computational Geosciences  credit: 3 Hours.
Enables students to use computers to solve real-world problems in the geosciences. Students will: Develop a fundamental level of programming knowledge, including Linux computing; Learn to use MATLAB and Python on local and remote computing systems to address geosciences problems; Understand the structure and use of geosciences datasets; Use computers for data representation, presentation and visualization; and Understand introductory methods for geosciences data reduction and statistical analysis. No programming background is required.

ATMS 301  Atmospheric Thermodynamics  credit: 3 Hours.
Introduction to fundamental thermodynamic processes that occur in Earth's atmosphere. Defines, describes, and derives various thermodynamic concepts including (1) the conservation of energy, (2) laws of thermodynamics, (3) kinetic theory, (4) phase transitions of water, and (5) thermodynamic processes of the atmosphere. Applies thermodynamic concepts to atmospheric structure and stability, water phase transformations, and energy and mass transport within the atmosphere. Prerequisite: ATMS 201, MATH 241, and PHYS 211.
ATMS 302 Atmospheric Dynamics I credit: 3 Hours.
Introduction to fundamental dynamical processes in the atmosphere through a descriptive and quantitative analysis of dynamical meteorology at the synoptic and global scale. Covers basic laws of fluid mechanics as applied to the atmospheric sciences, vorticity and circulation in 2-D and 3-D flows, boundary layer dynamics and friction, basic concepts of geophysical waves, and baroclinic instability. These topics will be covered both descriptively and mathematically with emphasis on computer representation of the fundamental processes governing atmospheric motion and application of theory to real-world examples. Same as PHYS 329. Prerequisite: ATMS 201, MATH 241 and PHYS 211.

ATMS 303 Synoptic-Dynamic Wea Analysis credit: 4 Hours.
Conceptualizes the structure and dynamics of the atmosphere through interpretation and analysis of weather charts, time and cross sections, soundings, and forecast products. Students develop case studies of weather system structure, and participate in discussions of weather processes as depicted by weather maps. Depiction of atmospheric kinematic and dynamic processes on weather charts is emphasized. Students learn conceptual models of the structure of mid-latitude cyclones and convective weather systems, including cyclogenesis, frontogenesis, the process of storm intensification, occlusion and frontolysis. Prerequisite: ATMS 201 and credit or concurrent registration in MATH 241.

ATMS 304 Radiative Transfer-Remote Sens credit: 3 Hours.
Introduction to the laws governing the propagation of electromagnetic radiation in the Earth's atmosphere. Topics include absorption, emission, and scattering of radiation, absorption and scattering properties of atmospheric constituents, the Sun as a source of radiation, the radiative transfer equation, and simple radiative balance models. Emphasis will be placed on the role of radiation in weather and climate, the description of atmospheric optical phenomena, and the application to remote sensing. Prerequisite: MATH 241 and PHYS 212.

ATMS 305 Computing and Data Analysis credit: 3 Hours.
Introduction to the statistical treatment and graphical representation of atmospheric sciences data, both in the space and time domain. Emphasis is placed on applications and real-world examples. Discusses relevant statistics, methods of interpolation and least squares, and linear and nonlinear correlations. Students gain experience using PYTHON for data analysis, develop theoretical skills for analyzing and modeling data, and perform virtual experiments and analyze real-world publicly available data sets. Prerequisite: MATH 241 or consent of instructor.

ATMS 306 Cloud Physics credit: 3 Hours.
Develops an understanding of microphysical processes occurring within clouds through use of in-situ observations, modeling, and theoretical studies; topics covered include nucleation, diffusion, growth of water and ice particles, the warm rain process, the cold rain process (including riming, aggregation, graupel and hail), weather modification, and an introduction to radar meteorology. Prerequisite: ATMS 301.

ATMS 307 Climate Processes credit: 3 Hours.
Introduces students to Earth's climates and the processes that determine them. Examines factors that control natural climate change over long and short time scales, processes by which humans impact climate and climate change, methods to predict climate change, and climate change response by policymakers. Prerequisite: ATMS 201.

ATMS 311 Environmental Issues Today credit: 3 Hours.
Same as ESE 311. See ESE 311.

ATMS 312 Atmospheric Dynamics II credit: 3 Hours.
Rigorous examination of the dynamical nature of various manifestations of the atmospheric circulation. Topics include the intrinsic effects of earth's rotation and stratification, vorticity and potential vorticity dynamics, various forms of boundary layer, wave dynamics (gravity waves and Rossby waves), geostrophic adjustment, cyclogenesis, frontogenesis and a potpourri of instability theories. Same as PHYS 330. Prerequisite: ATMS 301, ATMS 302.

ATMS 313 Synoptic Weather Forecasting credit: 4 Hours.
Examines the tools and techniques of weather forecasting, with heavy emphasis on actual forecasting. Numerical models used to forecast weather are reviewed and compared. Forecasting using numerical, statistical and probabilistic forecasting techniques is studied. Forecasts of significant winter weather, convection, floods and other weather hazards are emphasized. Students learn the process behind Severe Weather Watches and Warnings, Quantitative Precipitation Forecasts, precipitation type forecasts, flood forecasts and forecasts of other significant weather. Prerequisite: ATMS 302, ATMS 303 or consent of instructor.

ATMS 314 Mesoscale Dynamics credit: 3 Hours.
Examination of the structure and dynamics of weather systems that occur on the mesoscale. The course first reviews what is meant by "mesoscale". Examines the structure and dynamics of both free and forced mesoscale circulations. Free circulations are those internal to the atmosphere, such as thunderstorms, mesoscale convective systems, squall lines, hurricanes, jet streaks, and fronts. Forced circulations are those tied to features external to the atmosphere, such as shorelines (the sea breeze), lakes (lake effect storms), and mountains. Prerequisite: ATMS 301, ATMS 302, ATMS 303, or consent of instructor.

ATMS 315 Meteorological Instrumentation credit: 3 Hours.
Introduction to the instruments and meteorology of measuring weather variables. The focus is to explore modern methods of weather observation while training each student to gather, assess and interpret weather data. This class will also focus on research applications, and industrial applications in addition to routine weather observation. Prerequisite: ATMS 201.

ATMS 322 Soc Impacts Weather & Climate credit: 3 Hours.
Examines the interconnectedness of weather, climate and society. Focus is on the complex relationship between weather, climate and society from both a physical and social perspective with an examination of the role of sustainability in both impacts and future mitigation. Discussions focused on the physical principles driving the weather and climate and how they interact with all aspects of society. Same as ENSU 301. This course satisfies the General Education Criteria for: UIUC: Social Sciences

ATMS 323 Air Pollution to Global Change credit: 3 Hours.
Develops the science of air pollution across spatial scales with an Earth-systems approach. Considers how fossil fuel combustion, agriculture development, waste generation, synthetic chemicals production, biomass burning, and changes in land use are significantly altering levels of radiatively and chemically active gases and aerosols in the atmosphere, and how these pollutants interact at local, regional, and global scales. The systems nature of the processes through which air pollution is linked to global change will be examined via integrated science assessment modeling that includes feedbacks from societal policies, industrial practices, and human populations. Same as ENSU 302.

Information listed in this catalog is current as of 03/2017
ATMS 324  Field Studies of Convection  credit: 2 Hours.  
Students learn to recognize the structural features characteristic of supercellular convection, organized mesoscale convective systems, frontal squall lines, and ordinary thunderstorms, and to relate these structures to theory and conceptual models. Students forecast atmospheric convection, providing daily meteorological forecast discussions and analysis of current and future weather conditions. This course includes a mandatory 12-14 day field trip. Additional fees may apply. See Class Schedule. Approved for S/U grading only. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: ATMS 201. ATMS Majors or Minors only with consent of instructor.

ATMS 391  Topics in Atmospheric Sciences  credit: 1 to 3 Hours.  
Special topics in atmospheric sciences at the undergraduate level. See Class Schedule for topics and prerequisites. Additional fees may apply. See Class Schedule. May be repeated in the same or separate terms to a maximum of 12 hours if topics vary.

ATMS 401  Applied Meteorology  credit: 3 Hours.  
Examines how providers of meteorological information work with stakeholders who value that information to develop decision support systems in fields such as aviation, hydrometeorology, energy, health, national security, transportation, agriculture, emergency management, air quality, and climate sustainability. 3 undergraduate hours. 3 graduate hours.

ATMS 404  Risk Analysis in Earth Science  credit: 3 or 4 Hours.  
Introduction to concepts and methods of quantitative risk analysis in the Earth system. Key concepts will include probability, impacts, risk, uncertainty, statistical estimation, and decision making. Students will use simple risk analysis methods to apply these concepts to example problems related to drought, flooding, weather extremes, and anthropogenic climate change. The students will learn the R programming language for statistical computing, which will be used to integrate concepts and methods using observational data sets and model output. Same as GEOL 485. 3 undergraduate hours. 4 graduate hours. Prerequisite: MATH 241 or consent of instructor.

ATMS 405  Boundary Layer Processes  credit: 4 Hours.  
Course will qualitatively and quantitatively describe atmospheric boundary layer characteristics and processes. The course will focus on the turbulent structure of the boundary layer and the factors that influence this structure over a variety of surfaces (e.g., soil, vegetation, marine) and under a variety of atmospheric conditions (e.g., stability, diurnal/nocturnal). This atmospheric layer is important to our daily lives because it is where humans live and it connects the small-scale fluxes of energy and mass to the large-scale atmospheric circulation. 4 undergraduate hours. 4 graduate hours. Prerequisite: ATMS 301, ATMS 302, and ATMS 304; MATH 285; or consent of instructor.

ATMS 406  Tropical Meteorology  credit: 4 Hours.  
Covers the mesoscale, synoptic scale and planetary scale motions in the tropical circulation. Emphasis will be on delineating the unique characteristics of tropical dynamics. Topics include Hadley circulation, Walker circulation, Madden-Julian oscillation, monsoons, easterly waves, equatorial waves, hurricanes, the quasi-biennial oscillation, El Nino and the Southern Oscillation. 4 undergraduate hours. 4 graduate hours. Prerequisite: ATMS 301 and ATMS 302 and MATH 285; or consent of instructor.

ATMS 410  Radar Remote Sensing  credit: 4 Hours.  
Basic principles of radar and references to other ground based remote sensing systems, with emphasis on radar. Discusses principles of conventional and Doppler radar, data processing, and use of Doppler radar in meteorology. Emphasizes radar observations of meteorological phenomena, such as severe thunderstorms and wind shear. Students analyze data from national radar facilities. 4 undergraduate hours. 4 graduate hours. Prerequisite: ATMS 201 and MATH 231 and credit or concurrent registration in MATH 241; or consent of instructor.

ATMS 411  Satellite Remote Sensing  credit: 4 Hours.  
Review of the basic techniques used in satellite remote sensing of the Earth’s surface and atmosphere, as well as other planets in our solar system. Topics include radiative transfer, scattering and absorption processes, the Sun, mathematics of inversion, atmospheric properties and constituents, surface properties, precipitation, radiation budgets, image classification, satellite technology and orbital configurations. Laboratory work on radiative transfer modeling and satellite data analysis emphasized. All students participate in a team project that has novel and practical applications. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 285 and PHYS 212.

ATMS 420  Atmospheric Chemistry  credit: 4 Hours.  
Biochemical cycles of atmospheric trace gases, their interactions on global and regional scales, and their significance for the chemistry in the atmosphere. Important fundamental concepts central to understanding air pollutants, e.g., the formation of aerosols and the transformation and removal of species in the atmosphere. Same as CEE 447. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 102; ATMS 201 or CEE 330.

ATMS 421  Earth Systems Modeling  credit: 4 Hours.  
Introduction to systems modeling with applications to the earth and environmental sciences. Basic systems concepts and systems thinking in the contexts of hydrological, climatic, geochemical, and other environmentally relevant systems. Students identify key processes and relationships in systems, represent these elements quantitatively in models, test the models, use them to predict system behavior, and assess the validity of the predictions. No special mathematical or computing background is required. Same as ESE 421, GEOG 421, GEOL 481, and NRES 422. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior, or graduate standing in a natural science, geography, natural resources and environmental studies, or engineering.

ATMS 422  Environmental Stable Isotopes  credit: 3 Hours.  
Same as GEOL 488, IB 488, and NRES 478. See IB 488.

ATMS 425  Air Quality Modeling  credit: 4 Hours.  
Same as CEE 445. See CEE 445.

ATMS 446  Climate & Social Vulnerability  credit: 3 or 4 Hours.  
Same as GEOG 496 and SOC 451. See GEOG 496.

ATMS 447  Climate Change Assessment  credit: 3 Hours.  
Provides students with first-hand experience with computer models used to study climate change and permits them to test hypotheses, develop scenarios, learn about the implications of various structures of the modeled system, and evaluate the climatic impacts of anthropogenic emissions. Students perform calculations and produce model scenarios using a web interface to our Integrated Science Assessment Model (ISAM). 3 undergraduate hours. 3 graduate hours.

Information listed in this catalog is current as of 03/2017
Chemical and Biomolecular Engineering

Paul Kenis
99 Roger Adams Laboratory, 600 South Mathews, Urbana
PH: (217) 333-3640
http://chbe.illinois.edu

Chemical engineering is the study and practice of transforming substances on a large scale to produce products or energy for the improvement of society. Such processes are the fundamental core of the chemical, petroleum, pharmaceutical, and electronics industries. Chemical Engineers work in a variety of segments within these industries, including processing, manufacturing, research and development, management, environmental compliance, and business. Chemical Engineering differs from Chemistry in that Chemical Engineers produce products on a large scale, so that they are affordable and available to as many consumers as possible. In this way, Chemical Engineering emphasizes fundamentals required to design, optimize, and operate chemical processes as safely and efficiently as possible.

For the Degree of Bachelor of Science in Chemical Engineering

Major in Specialized Curriculum in Chemical Engineering

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two concentrations: Chemical Engineering and Biomolecular Engineering. Each concentration is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration’s technical electives focus more on bio-applied processing and technology.

Areas of Concentration

- Chemical Engineering: The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, personal care, fiber and materials industries.
- Biomolecular Engineering: The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

Overview of Curricular Requirements

The curriculum requires 129 hours for graduation and is organized as shown below.

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

1. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

3. MATH 441 may be substituted for MATH 285. MATH 286 (4 hours) may be substituted for MATH 285 (3 hours).

**Chemical and Biomolecular Engineering Technical Core**

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of chemical engineering and chemical science.

**For Both Concentrations**

**Technical Electives**

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of chemical engineering embodied in the chemical engineering and biomolecular engineering concentrations.

**For the Concentration in Chemical Engineering**

Selected from the departmentally approved List of Approved Chemical Engineering Technical Electives, satisfying these distribution requirements:

1. 400-level ChBE courses, with not more than 3 hours being CHBE 497 or CHBE 499
2. Any 400-level course from List 1
3. Any courses from List 1
4. Any 400-level course from List 2

Total Hours: 19

2. A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit.

**For the Concentration in Biomolecular Engineering**

Selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories A and B, satisfying these distribution requirements:

1. Any courses from Category A
2. Any courses from Category B
3. Any 400-level course from List

Total Hours: 19

2. A maximum of 3 hours from this Category may be undergraduate research credit.

3. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

**Social Sciences and Humanities**

The social sciences and humanities courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

Electives in social sciences and humanities satisfying the campus general education requirements for social sciences and humanities, including cultural studies western and non-western components.

**Composition**

These courses teach fundamentals of expository writing.

16

Information listed in this catalog is current as of 03/2017
Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eights semesters vary with the Concentration chosen. Refer to the appropriate sequence continuation below.

First Year
First Semester
CHEM 202 1
CHEM 203 Accelerated Chemistry Lab I
ENG 100 2 Engineering Orientation
MATH 221 Calculus I
RHET 105 Writing and Research
Elective in Social Sciences or Humanities
Semester Hours 16

Second Semester
CHBE 121 CHBE Profession
CHEM 204 Accelerated Chemistry II
CHEM 205 Accelerated Chemistry Lab II
CS 101 Intro Computing: Engrg Sci
MATH 231 Calculus II
PHYS 211 University Physics: Mechanics
Semester Hours 16

Second Year
First Semester
CHBE 221 Principles of CHE
CHEM 236 Fundamental Organic Chem I
CHEM 237 Structure and Synthesis
MATH 231 Calculus II
PHYS 211 University Physics: Mechanics
Semester Hours 16

Second Semester
CHBE 321 Thermodynamics
CHEM 436 Fundamental Organic Chem II
or MCB 450
MATH 285 Intro Differential Equations
MATH 415 Applied Linear Algebra
PHYS 214 University Physics: Quantum Physics
Elective
Semester Hours 18

Third Year
First Semester
CHBE 421 Momentum and Heat Transfer
CHEM 315 Instrumental Chem Systems Lab
CHEM 420 Instrumental Characterization
CHEM 442 Physical Chemistry I
Elective in Social Sciences or Humanities or Technical
Elective
Semester Hours 15

Second Semester
CHBE 422 Mass Transfer Operations
CHBE 424 Chemical Reaction Engineering
IE 300 Analysis of Data
Elective in Social Sciences or Humanities or Technical
Elective
Semester Hours 17

Fourth Year
First Semester
CHBE 430 Unit Operations Laboratory
CHBE 440 Process Control and Dynamics
Elective in Social Sciences or Humanities or Technical
Elective
Semester Hours 16

Second Semester
CHBE 431 Process Design
Elective in Social Sciences or Humanities or Technical
Elective
Semester Hours 14

Total Hours: 49

Concentration in Biomolecular Engineering
For the Concentration in Biomolecular Engineering, see below (http://illinois.dev6.leepfrog.com/migration/Undergraduate/LAS-undergrad/chem_bio_engin.html#Skip2)

Second Year
First Semester
Second Year First Semester course information is above in the Suggested Sequence that is common for all students
Semester Hours 17

Second Semester
CHBE 321 Thermodynamics
MCB 450 Introductory Biochemistry
MATH 285 Intro Differential Equations
MATH 415 Applied Linear Algebra
PHYS 214 University Physics: Quantum Physics

Semester Hours 18

Third Year
First Semester
CHBE 421 Momentum and Heat Transfer
CHEM 315 Instrumental Chem Systems Lab
Semester Hours 17

Concentration in Chemical Engineering
Information listed in this catalog is current as of 03/2017
Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 221, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.

MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 441.

At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.

b) 3 hours any 400-level course from List 1.

c) 6 hours any courses from List 1.

d) 4 hours any 400-level courses from List 2.

A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in 209 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising)

At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 9 hours must be from Category A

b) 6 hours must be from Category B

c) 4 hours must be 400-level courses from List 2.

A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 209 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising)

Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.

Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.

The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

Minor in Biomolecular Engineering

Biomolecular Engineering is a broad, interdisciplinary field with its main goal of engineering value-added biomolecules and biomolecular systems for applications in medical, chemical, agricultural and food industries. Its practice ranges from fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare non-chemical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in chemical engineering. Those students should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For further information, please contact the Department of Chemical and Biomolecular Engineering.

- MCB 450 Introductory Biochemistry 3
- CHBE 221 Principles of CHE 3
- CHEM 232 Elementary Organic Chemistry I 3

Information listed in this catalog is current as of 03/2017
For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@scs.illinois.edu.

For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@scs.illinois.edu.

CHBE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CHBE)

Courses

CHBE 101  Hidden World of Engineering  credit: 3 Hours.
Tells the stories of everyday objects: bathtubs, pop cans and screws. These simple objects shape our lives, yet are engineering masterpieces. To unveil this hidden world the course uses a humanistic approach. Designed to appeal to all majors, it uses human stories - filled with failures and triumphs - to reveal the methods of engineers. The course enchants with tales of ancient steel making, today's pop cans, huge stone monuments, and salt. The course will change how a student looks at his or her world. Several sessions focus on women engineers and the environment.
This course satisfies the General Education Criteria for: UIUC: Physical Sciences

CHBE 121  CHBE Profession  credit: 1 Hour.
Lectures and problems on the history and scope of chemical engineering endeavors; decisions and criteria for process development and plant design. Approved for S/U grading only. Prerequisite: CHEM 102 or CHEM 202.

CHBE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated.

CHBE 202  Cooperative Education Practice  credit: 0 Hours.
Same as CHEM 293. See CHEM 293.

CHBE 210  CHBE Internship  credit: 0 Hours.
Full-time practice of chemical science in an off-campus industrial setting or research laboratory environment. Summary report required. Approved for S/U grading. May be repeated. Prerequisite: Completion of freshman year or equivalent, or consent of Director of Cooperative Education in Chemical and Biomolecular Engineering.

CHBE 221  Principles of CHE  credit: 3 Hours.
Lectures and problems on material and energy balances. Prerequisite: CHEM 104 or CHEM 204; credit or concurrent registration in CS 101.

CHBE 297  Individual Study Sophomores  credit: 1 to 3 Hours.
Individual study of problems related to Chemical and Biomolecular Engineering. May be repeated to a maximum of 6 hours. Prerequisite: Sophomore standing and consent of instructor.

CHBE 321  Thermodynamics  credit: 4 Hours.
Fundamental concepts and the laws of thermodynamics; the first and second law applications to phase equilibrium and chemical equilibrium and other applications in the Chemical and Biomolecular Engineering profession. Prerequisite: CHBE 221.

CHBE 397  Individual Study for Juniors  credit: 1 to 3 Hours.
Individual study of problems related to Chemical and Biomolecular Engineering. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing and consent of instructor.

CHBE 421  Momentum and Heat Transfer  credit: 4 Hours.
Introduction to fluid statics and dynamics; dimensional analysis; design of flow systems; introduction to heat transfer; conduction, convection, and radiation. 4 undergraduate hours. 4 graduate hours. Credit is not given for both CHBE 421 AND ABE 341. Prerequisite: CHBE 221.

CHBE 422  Mass Transfer Operations  credit: 4 Hours.
Introduction to mass transfer processes and design methods for separation equipment. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHBE 421.

CHBE 424  Chemical Reaction Engineering  credit: 3 Hours.
Chemical kinetics; chemical reactor design; the interrelationship between transport, thermodynamics, and chemical reaction in open and closed systems. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or registration in CHBE 422.

CHBE 430  Unit Operations Laboratory  credit: 4 Hours.
Experiments and computation in fluid mechanics, heat transfer, mass transfer, and chemical reaction engineering. Exercises in effective Chemical and Biomolecular Engineering communications. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHBE 422; credit or concurrent registration in CHBE 424; senior standing in Chemical and Biomolecular Engineering. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

CHBE 431  Process Design  credit: 4 Hours.
Capstone design course where students apply principles from previous courses to the design of complete chemical process systems. Topics include: techniques used in the synthesis and analysis of chemical processes, process simulation and optimization, effective communication in a chemical process engineering environment. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHBE 422; credit or concurrent registration in CHBE 424. This course satisfies the General Education Criteria for: UIUC: Advanced Composition

CHBE 440  Process Control and Dynamics  credit: 3 Hours.
Techniques used in the analysis of process dynamics and in the design of process control systems. Laplace transforms, stability analysis, and frequency response methods. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHBE 421 and senior standing in Chemical and Biomolecular Engineering; MATH 285; CS 101.

CHBE 451  Transport Phenomena  credit: 3 Hours.
Unifying treatment of physical rate processes with particular emphasis on the formulation and solution of typical boundary value problems associated with heat, mass, and momentum transport. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHBE 421; MATH 285.

CHBE 452  Chemical Kinetics & Catalysis  credit: 3 Hours.
Problems in chemical kinetics; techniques for the prediction and measurement of rates of reactions; homogeneous and heterogeneous catalysis chain reactions. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 442 or CHBE 321.

Information listed in this catalog is current as of 03/2017
CHBE 453  Electrochemical Engineering  credit: 2 or 3 Hours.
Fundamentals of analysis, design, and optimization of electrochemical systems. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Prerequisite: Senior standing in chemical or biomolecular engineering.

CHBE 454  CHBE Projects  credit: 2 Hours.
Laboratory; development of an individual project. 2 undergraduate hours. 2 graduate hours. Prerequisite: Senior standing in chemical and biomolecular engineering.

CHBE 456  Polymer Science & Engineering  credit: 3 Hours.
Fundamentals of polymer science and engineering; polymerization mechanisms, kinetics, and processes; physical chemistry and characterization of polymers; polymer rheology, mechanical properties, and processing. 3 undergraduate hours. 3 graduate hours. Credit is not given for both CHBE 456 and MSE 450. Prerequisite: CHBE 321; credit or concurrent registration in CHBE 421; CHEM 444.

CHBE 457  Microelectronics Processing  credit: 3 Hours.
Introductory survey of chemical processing principles applied to microelectronic fabrication. Key concepts originate from chemical kinetics; thermodynamics; mass and energy balances; transport of mass, momentum and heat; and process synthesis and integration. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior or senior standing in chemical and biomolecular engineering, electrical and computer engineering, or materials science and computer engineering.

CHBE 471  Biochemical Engineering  credit: 3 or 4 Hours.
Applications of chemical engineering principles to biological processes. Topics include enzyme mechanisms and kinetics, bioreactor design, cellular growth and metabolism, fermentation, and bioseparations. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior, or graduate standing, or consent of instructor.

CHBE 472  Techniques in Biomolecular Eng  credit: 3 or 4 Hours.
Engineering principles that underlie many of the powerful tools in biotechnology and how scientific discoveries and engineering approaches are used in current industrial applications. Physical principles that govern self-organization and repair in biological systems; tools developed to characterize, manipulate, and quantify biomolecules; use of analytical tools and genetic manipulation in modern bioengineering and biotechnology applications. 3 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 202, CHEM 203, CHEM 204 or equivalent; MATH 220 or MATH 221; PHYS 211, PHYS 214 or equivalent; MCB 450.

CHBE 473  Biomolecular Engineering  credit: 3 or 4 Hours.
Fundamental principles of biomolecular engineering and its applications in pharmaceutical, agriculture, chemical and food industries. Topics include gene discovery, rational design, directed evolution, pathway engineering, and functional genomics and proteomics. 3 undergraduate hours. 4 graduate hours.

CHBE 474  Metabolic Engineering  credit: 3 or 4 Hours.
Introduction to the principles and methodology of metabolic engineering. Experimental and mathematical techniques for the quantitative description, modeling, control, and design of metabolic pathways. Same as BIOE 474. 3 undergraduate hours. 4 graduate hours. Prerequisite: MATH 225 and MATH 285.

CHBE 475  Tissue Engineering  credit: 3 Hours.
Principles and practices of chemical engineering will be applied to the topic of tissue engineering. Topics include: methods for employing selected cells, biomaterial scaffolds, soluble regulators or their genes, and mechanical loading and culture conditions for regenerative repair of tissues and organs in vitro and in vivo; understanding intrinsic wound healing processes; quantifying cell behaviors/phenotypes; regulatory compliance and clinical translation. 3 undergraduate hours. 3 graduate hours. Prerequisites: CHBE 421 and CHBE 422, or consent of instructor.

CHBE 476  Biotransport  credit: 3 Hours.
Investigates the critical roles the transports of mass, energy and momentum play in the function of living systems at varied levels (e.g., cells, tissues, and organs) and time scales. Transport phenomena are also central to the design and operation of devices for biological research, imaging, biochemical processes, and therapeutic interventions including drug delivery, gene therapy and tissue engineering. Students will explore conservation laws of mass, energy, and momentum to mathematically describe cell and molecular biology, immunology, physiology and biomedical engineering systems. 3 undergraduate hours. No graduate credit. Prerequisites: CHBE 421 and CHBE 422 or consent of instructor.

CHBE 478  Bioenergy Technology  credit: 3 Hours.
Introduction to emerging bioenergy technologies including: world energy consumption and greenhouse gas concerns; fundamental biochemistry of biomass conversion; structural chemistry of lignocellulosic; pretreatment of biomass; enzymatic deconstruction; bioethanol production and fermentation; metabolic engineering for improved biofuels production; feedstock development; industrial fermentation and fermentor design; economics of bioethanol; alternative biofuels, including biodiesel, syngas, Fischer-Tropsch diesel, butanol, ABE fermentation and biogas; anaerobic microbiology; and the biorefinery concept. 3 undergraduate hours. No graduate credit. Prerequisites: CHBE 321; MCB 450.

CHBE 494  Special Topics  credit: 1 to 3 Hours.
Study of topics in chemical engineering; content varies from term to term. Typical topics include optimization, chemical kinetics, phase equilibrium, biochemical engineering, kinetic theory, and transport properties. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated. Prerequisite: Senior standing in chemical and biomolecular engineering or consent of instructor.

CHBE 496  Undergraduate Research Abroad  credit: 1 to 3 Hours.
Study assist in research under faculty supervision at a location outside of the United States. Topic and type of assistance vary. 1 to 3 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. Research credit hours in the course are included under department limits for maximum hours of research/independent study credit allowed toward degree requirements. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work (who will have examined the proposed research plan); and approval of the department. Not available to freshman.

CHBE 497  Individual Study for Seniors  credit: 1 to 3 Hours.
Individual study of problems related to chemical and biomolecular engineering. 1 to 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing and consent of instructor.
CHBE 499  Senior Thesis  credit: 1 to 6 Hours.
Limited in general to seniors in the curriculum in chemical and biomolecular engineering. Any others must have the consent of the head of the department. Each student taking the course must register in a minimum of 5 hours either in one term or divided over two terms. A maximum registration of 10 hours in two terms is permitted. 1 to 6 undergraduate hours. No graduate credit. In order to receive credit, a thesis must be presented by each student registered in CHBE 499.

Chemistry
Martin Gruebele
107 Noyes Laboratory, 505 South Mathews, Urbana
PH: (217) 333-0711
http://chemistry.illinois.edu

Students may pursue chemistry by following either the specialized curriculum in chemistry (p. 348) (leading to the Bachelor of Science in Chemistry), or one of two concentrations (Chemistry Concentration (p. 346) or Chemistry Teaching Concentration (p. 346)) in the Sciences and Letters Curriculum (leading to the Bachelor of Science in Liberal Arts and Sciences). Students within the specialized curriculum in Chemistry may choose the Environmental Chemistry concentration (p. 347). In addition, students may pursue chemistry as part of the LAS Major in Computer Science and Chemistry (p. 562). The department also sponsors a minor in chemistry (p. 342). These programs of study are administered by the Department of Chemistry.

The specialized curriculum in chemistry (p. 348) is a rigorous, specialized program suitable for those planning careers in chemistry. It meets standards prescribed by the American Chemical Society. The chemistry concentration (p. 346) in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

Cooperative Education Program: Students accepted into the School of Chemical Sciences Cooperative Education Program spend alternate periods of attendance at the University with periods of employment in industry or government. Transcript recognition is given as well as a certificate of participation at graduation. Additional information and applications are available in the School of Chemical Sciences Placement and Student Services office.

Chemistry Advising Information:

For the Chemistry Majors and Minor, contact  SCS Academic Advising (http://publish.illinois.edu/scsadvising).

110 AB&C Noyes Lab
pcs-advising@illinois.edu

To schedule an appointment, please call 217-333-1051

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Sciences and Letters Curriculum
Students must select one concentration:
• Chemistry Concentration (p. 346)
• Chemistry Teaching Concentration (p. 346)

Minor in Chemistry
For advising see the Chemistry Overview Section (p. 342).

Total Hours 19-24

¹ The following courses may not be used to complete the minor: CHEM 315, CHEM 397, CHEM 420, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and CHEM 499.

CHEM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CHEM)

Courses
CHEM 101  Introductory Chemistry  credit: 3 Hours.
Introduction to the basic concepts and language of chemistry; lectures, discussions, and lab. Preparatory chemistry course for students who require additional background before enrolling in CHEM 102. This course has been approved for graduation credit for all students in the College of LAS. Students in other colleges should check with their college office. Additional fees may apply. See Class Schedule. Prerequisite: 2.5 years of high school mathematics, or credit or concurrent registration in MATH 012.
This course satisfies the General Education Criteria for:
UIUC: Physical Sciences
CHEM 102  General Chemistry I  credit: 3 Hours.
For students who have some prior knowledge of chemistry. Principles governing atomic structure, bonding, states of matter, stoichiometry, and chemical equilibrium. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 102 and CHEM 202. CHEM 102 and CHEM 103 are approved for General Education credit only as a sequence. Both courses must be completed to receive Natural Science and Technology credit. Prerequisite: Credit or exemption from MATH 012; one year of high school chemistry or equivalent. All students enrolled in CHEM 102 should also enroll in CHEM 103. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 103  General Chemistry Lab I  credit: 1 Hour.
Laboratory studies to accompany CHEM 102. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 103 and CHEM 203. CHEM 102 and CHEM 103 are approved for General Education credit only as a sequence. Both courses must be completed to receive Natural Science and Technology credit. Prerequisite: Credit or concurrent registration in CHEM 102 is required. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 104  General Chemistry II  credit: 3 Hours.
Lecture and discussions. Chemistry of materials, including organic and biological substances, chemical energetics and equilibrium, chemical kinetics, and electrochemistry. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 104 and CHEM 204. Prerequisite: CHEM 102 or CHEM 202 or advanced placement credit for one semester of college-level chemistry. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 105  General Chemistry Lab II  credit: 1 Hour.
Laboratory studies to accompany CHEM 104. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 105 and CHEM 205. Prerequisite: CHEM 102 and CHEM 103; credit or concurrent registration in CHEM 104 is required. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 108  Chemistry, Everyday Phenomena  credit: 3 Hours.
Laboratory-based work in which students will evaluate products (such as antacids), synthesize materials (such as soap), and gain a better understanding of forensic chemistry. Additional fees may apply. See Class Schedule. Credit in CHEM 108 does not count toward Chemistry requirements for students in the Specialized Curriculum in Chemistry, the Science and Letters Chemistry major, the Chemistry Teaching Option, or the Chemistry minor; however the course may be taken by students in any of these groups for general education hours. Prerequisite: Credit or concurrent registration in MATH 012 or MATH 016. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 123  Teaching Elementary & Middle School Chemistry  credit: 3 Hours.
Inquiry-based, hands-on study of chemistry for prospective elementary and middle school teachers. Next Generation Science Standards are emphasized. Credit is not given toward the hours of chemistry required for chemistry and related majors. Prerequisite: Preference given to students in Elementary Education.

CHEM 123  Teaching Elementary & Middle School Chemistry  credit: 3 Hours.
Inquiry-based, hands-on study of chemistry for prospective elementary and middle school teachers. Next Generation Science Standards are emphasized. Credit is not given toward the hours of chemistry required for chemistry and related majors. Prerequisite: Preference given to students in Elementary Education.

CHEM 131  General Chemistry Lab I  credit: 1 Hour.
Laboratory studies to accompany CHEM 131. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 131 and CHEM 231. CHEM 131 and CHEM 132 are approved for General Education credit only as a sequence. Both courses must be completed to receive Natural Science and Technology credit. Prerequisite: Credit or concurrent registration in CHEM 131 is required. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 147  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Individual study of problems related to chemistry or research not necessarily leading to a senior thesis. May be repeated in separate terms to a maximum of 4 hours. A maximum of 2 hours may be used toward the major. A maximum of 18 hours of CHEM 197, CHEM 297, CHEM 397, CHEM 497 and/or CHEM 499 may be used toward the degree. Prerequisite: Chemistry faculty approval required to register.  
CHEM 147  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Individual study of problems related to chemistry or research not necessarily leading to a senior thesis. May be repeated in separate terms to a maximum of 4 hours. A maximum of 2 hours may be used toward the major. A maximum of 18 hours of CHEM 197, CHEM 297, CHEM 397, CHEM 497 and/or CHEM 499 may be used toward the degree. Prerequisite: Chemistry faculty approval required to register.  
CHEM 197  Individual Study Freshman  credit: 1 to 2 Hours.
This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 202  Accelerated Chemistry I  credit: 3 Hours.
Lectures and discussions. Beginning chemistry course for students in the chemical sciences and others with strong high school chemistry and mathematics preparation. Chemical calculations, structure, bonding and equilibrium. Credit is not given for both CHEM 202 and CHEM 102. Prerequisite: Credit or concurrent registration in MATH 220 or MATH 221; concurrent registration in CHEM 203. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 203  Accelerated Chemistry Lab I  credit: 2 Hours.
Companion laboratory course to CHEM 202. Comprehensive skills-oriented approach to learning laboratory technique and safety. Additional fees may apply. See Class Schedule. Students may receive no more than two credit hours for both this course and CHEM 103. Prerequisite: Concurrent registration or credit in CHEM 202 or consent of instructor.  
CHEM 203  Accelerated Chemistry Lab I  credit: 2 Hours.
Companion laboratory course to CHEM 202. Comprehensive skills-oriented approach to learning laboratory technique and safety. Additional fees may apply. See Class Schedule. Students may receive no more than two credit hours for both this course and CHEM 103. Prerequisite: Concurrent registration or credit in CHEM 202 or consent of instructor.  
CHEM 204  Accelerated Chemistry II  credit: 3 Hours.
Continuation of CHEM 202. Lectures and discussions. Emphasizes chemical thermodynamics, equilibrium, chemical kinetics, and coordination chemistry. Additional fees may apply. See Class Schedule. Prerequisite: CHEM 202 and/or CHEM 203 and concurrent registration in CHEM 205, or consent of instructor. This course satisfies the General Education Criteria for:  
UIUC: Physical Sciences

CHEM 205  Accelerated Chemistry Lab II  credit: 2 Hours.
Laboratory and discussion. Includes experiments in qualitative analysis, inorganic synthesis, and kinetics as well as an individual project. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 205 and CHEM 223. Prerequisite: Concurrent registration in CHEM 204 or consent of department.  
CHEM 205  Accelerated Chemistry Lab II  credit: 2 Hours.
Laboratory and discussion. Includes experiments in qualitative analysis, inorganic synthesis, and kinetics as well as an individual project. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 205 and CHEM 223. Prerequisite: Concurrent registration in CHEM 204 or consent of department.  
CHEM 222  Quantitative Analysis Lecture  credit: 2 Hours.
Fundamentals of quantitative analysis, chemical equilibrium and kinetics. This lecture course is intended to accompany CHEM 223. Students with credit in CHEM 222 can receive credit for CHEM 203. Prerequisite: CHEM 104 and CHEM 105 or equivalent.  
CHEM 222  Quantitative Analysis Lecture  credit: 2 Hours.
Fundamentals of quantitative analysis, chemical equilibrium and kinetics. This lecture course is intended to accompany CHEM 223. Students with credit in CHEM 222 can receive credit for CHEM 203. Prerequisite: CHEM 104 and CHEM 105 or equivalent.  
CHEM 223  Quantitative Analysis Lab  credit: 2 Hours.
Laboratory course covers the fundamentals of quantitative analysis, equilibrium and kinetics. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 223 and CHEM 205. Prerequisite: Credit or concurrent registration in CHEM 222.  
CHEM 223  Quantitative Analysis Lab  credit: 2 Hours.
Laboratory course covers the fundamentals of quantitative analysis, equilibrium and kinetics. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 223 and CHEM 205. Prerequisite: Credit or concurrent registration in CHEM 222.  
CHEM 232  Elementary Organic Chemistry I  credit: 3 or 4 Hours.
Examines structure and mechanistic chemistry with emphasis on applications of this material to closely related areas. For students in agricultural, nutritional and biological sciences, as well as premedical, preprofessional, and veterinary programs. One-term survey course; may be followed by CHEM 332. Additional fees may apply. See Class Schedule. Prerequisite: CHEM 123 and CHEM 124. 3 hours of credit is an option for those not registered in a discussion-recitation section. 4 hours of credit requires registration in a discussion-recitation section and an online section. Prerequisite: CHEM 104 and CHEM 105, or CHEM 204.
CHEM 223 Elementary Organic Chem Lab I  credit: 2 Hours.
Basic laboratory techniques in organic chemistry are presented with emphasis on the separation, isolation, and purification of organic compounds. For students in agricultural science, dairy technology, food technology, nutrition, dietetics, premed, premedical, preprofessional programs. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 233 and CHEM 237. Prerequisite: Credit or concurrent registration in CHEM 232.

CHEM 236 Fundamental Organic Chem I  credit: 4 Hours.
Fundamental structural, synthetic, and mechanistic organic chemistry is presented. For students whose major is chemistry or for those in the specialized curricula in chemistry or chemical engineering. The first term of a two-term integrated sequence (to be followed by CHEM 436). This lecture course is intended to accompany CHEM 237. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 236 and CHEM 232. Prerequisite: CHEM 204 or CHEM 222 through CHEM 223.

CHEM 237 Structure and Synthesis  credit: 2 Hours.
Laboratory course introduces synthesis and the basic techniques for the separation, isolation and purification of organic and inorganic compounds. Additional fees may apply. See Class Schedule. Credit is not given for both CHEM 237 and CHEM 233. Prerequisite: Credit or concurrent registration in CHEM 236.

CHEM 293 Cooperative Education Practice  credit: 0 Hours.
Off-campus cooperative practice of chemistry or chemical engineering in industrial or governmental facilities. Each chemistry or chemical engineering student participating in cooperative education must register for CHEM 293 for each off-campus term. Same as CHBE 202. Approved for S/U grading only. Prerequisite: Acceptance into the School of Chemical Sciences Cooperative Education Program.

CHEM 295 Chemistry Internship  credit: 0 Hours.
Full-time practice of chemical science in an off-campus industrial setting or research laboratory environment. Summary report required. Approved for S/U grading only. May be repeated. Prerequisite: Completion of freshman year or equivalent, or consent of Director of Cooperative Education in Chemistry.

CHEM 297 Individual Study Sophomore  credit: 1 to 3 Hours.
Individual study of problems related to chemistry or research not necessarily leading to a senior thesis. May be repeated in separate terms. A maximum of 6 hours may be used toward the major. A maximum of 18 hours of CHEM 197, CHEM 297, CHEM 397, CHEM 497 and/or CHEM 499 may be used toward the degree. Prerequisite: Chemistry faculty approval required to register.

CHEM 317 Inorganic Chemistry Lab  credit: 3 Hours.
Emphasizes modern techniques for the synthesis, purification, and characterization of inorganic and organometallic compounds. There are three components to the course: lectures on laboratory methodology and reporting, laboratory experiments, and report writing. The final third of the course is dedicated to special individualized projects. Additional fees may apply. See Class Schedule. Prerequisite: CHEM 312; completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

CHEM 332 Elementary Organic Chem II  credit: 4 Hours.
Continuation of CHEM 232 focuses on organic chemistry and its applications to biochemistry, enzyme mechanisms and the life sciences. Credit is not given for both CHEM 332 and CHEM 436. This course should not be taken by students who have completed CHEM 236. Prerequisite: CHEM 232 and CHEM 233.

CHEM 360 Chemistry of the Environment  credit: 3 Hours.
Study of the chemistry of the atmosphere, the chemistry of soil and minerals in the Earth’s crust, chemistry of natural waters, agricultural chemicals and organic pollutants, and topics related to energy use. Prerequisite: One year of general chemistry (CHEM 102-105 or CHEM 202-205) and one semester of organic chemistry (CHEM 232 or CHEM 236). The organic chemistry class may be taken concurrently with CHEM 360.

CHEM 397 Individual Study Junior  credit: 1 to 3 Hours.
Individual study of problems related to chemistry or research not necessarily leading to a senior thesis. May be repeated in separate terms. A maximum of 6 hours may be used toward the major. A maximum of 18 hours of CHEM 197, CHEM 297, CHEM 397, CHEM 497 and/or CHEM 499 may be used toward the degree. Prerequisite: Chemistry faculty approval required to register.

CHEM 420 Instrumental Characterization  credit: 2 Hours.
Lecture course covers the fundamentals of instrumental characterization including: nuclear magnetic resonance spectroscopy, potentiometry, voltammetry, atomic and molecular spectroscopy, mass spectrometry, and gas and liquid chromatography. 2 undergraduate hours. 2 graduate hours. Prerequisite: CHEM 440; or credit or concurrent registration in CHEM 442; or consent of the instructor.

CHEM 436 Fundamental Organic Chem II  credit: 3 Hours.
Course is the second term of a two-term integrated sequence and should be taken the term following enrollment in CHEM 236. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Credit is not given for both CHEM 436 and CHEM 332. Prerequisite: CHEM 236 and CHEM 237; or CHEM 232 and CHEM 233 with consent of instructor.

CHEM 437 Organic Chemistry Lab  credit: 3 Hours.
Laboratory experiments in organic chemistry with emphasis on synthesis, purification and spectroscopic identification of organic compounds. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 233 or CHEM 237 and credit or concurrent registration in CHEM 332 or CHEM 436. This course satisfies the General Education Criteria for:
UIUC: Advanced Composition

CHEM 438 Advanced Organic Chemistry  credit: 3 Hours.
Advanced topics in structure, synthesis and reactions of organic chemistry. Lecture only course. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 332 or CHEM 436.
CHEM 440  Physical Chemistry Principles  credit: 4 Hours.
One-term course in physical chemistry emphasizing topics most
important to students in the biological and agricultural sciences. Not
open to students in the specialized curricula in chemistry and chemical
engineering. Laboratory experience in this area provided by CHEM 315 to
be taken preferably after CHEM 440. Same as BIOL 440. 4 undergraduate
hours. 4 graduate hours. Prerequisite: CHEM 222 and CHEM 232, or
equivalent; PHYS 102; and MATH 241 or equivalent calculus including
partial derivatives.

CHEM 442  Physical Chemistry I  credit: 4 Hours.
Lectures and problems focusing on microscopic properties. CHEM 442
and CHEM 444 constitute a year-long study of chemical principles.
CHEM 442 focuses on quantum chemistry, atomic and molecular
structure, spectroscopy and dynamics. 4 undergraduate hours. 4
graduate hours. Credit is not given for both CHEM 442 and PHYS 485.
Prerequisite: CHEM 204 or CHEM 222; MATH 225 or MATH 415, and
a minimal knowledge of differential equations, or equivalent; and
PHYS 211, PHYS 212, and PHYS 214 or equivalent.

CHEM 444  Physical Chemistry II  credit: 4 Hours.
Continuation of CHEM 442, focusing on thermodynamics, statistical
mechanics and kinetics from single molecules to the bulk, in gases
and in the condensed phase. 4 undergraduate hours. 4 graduate hours.
Credit is not given for CHEM 444 and MSE 401 or PHYS 427. Prerequisite:
CHEM 442.

CHEM 445  Physical Principles Lab I  credit: 2 Hours.
Laboratory course features experiments concerning the fundamental
physical nature of chemical phenomena. Experiments include infrared
spectroscopy, protein folding, x-ray diffraction and laser induced
fluorescence. 2 undergraduate hours. 2 graduate hours. Prerequisite:
CHEM 315, and credit or concurrent registration in CHEM 444; or consent
of instructor.

CHEM 447  Physical Principles Lab II  credit: 2 Hours.
Laboratory course features advanced experiments concerning the
fundamental physical nature of chemical phenomena. This course is
a continuation of CHEM 445. Experiments include low-energy electron
diffraction from surfaces, raman spectroscopy and ion cyclotron
resonance mass spectroscopy. 2 undergraduate hours. 2 graduate hours.
Prerequisite: CHEM 445 or consent of instructor.

CHEM 450  Astrochemistry  credit: 4 Hours.
Covers the foundations of astrochemistry, a young field at the
intersection between chemistry and astronomy. Topics to be discussed
include the interstellar medium, atomic and molecular physics,
interstellar chemistry, molecular astronomy, and unresolved enigmas
in the field. Same as ASTR 450. 4 undergraduate hours. 4 graduate hours.
Prerequisite: CHEM 442 and CHEM 444, or PHYS 427 and PHYS 486,
or equivalent experience in quantum mechanics, thermodynamics, and
statistical mechanics.

CHEM 451  Astrochemistry Laboratory  credit: 3 or 4 Hours.
An active, hands-on introduction to observational astrochemistry,
laboratory astrochemistry and theoretical astrochemistry. Activities
will include astronomical observations of interstellar molecules
at the Observatory, spectroscopy of molecules in the laboratory,
quantum chemical calculations and simulations of molecular spectra,
and modeling of interstellar chemistry. Same as ASTR 451. 3 or 4
undergraduate hours. 3 or 4 graduate hours. Prerequisite: CHEM 450.

CHEM 456  Green Chemistry  credit: 3 or 4 Hours.
This course seeks to reduce the environmental consequences of the
chemical industry. It includes modifying engineering practices, the
development of new catalytic processes, modification of existing
chemical processes, and bioremediation. 3 undergraduate hours. 4
graduate hours. Prerequisite: CHEM 312, CHEM 332, CHEM 360, or
consent of instructor.

CHEM 472  Physical Biochemistry  credit: 3 Hours.
Same as MCB 446 and BIOL 446. See BIOL 446.

CHEM 474  Drug Discovery & Development  credit: 3 Hours.
Lecture course on fundamentals of drug discovery and development.
Topics include case studies of top-selling, mechanistically diverse drugs,
chemistry of drug contraindications, structural biology of drug targets,
mechanisms of drug resistance, and drug metabolism and toxicity.
3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 332 or
CHEM 436; and MCB 354 or MCB 450, or consent of instructor.

CHEM 480  Polymer Chemistry  credit: 3 or 4 Hours.
Same as MSE 457. See MSE 457.

CHEM 482  Polymer Physics  credit: 3 or 4 Hours.
Same as MSE 458. See MSE 458.

CHEM 483  Solid State Structural Analy  credit: 4 Hours.
Lectures and laboratory on various aspects of X-ray diffraction studies
of solids; topics include the properties of crystals, symmetry, diffraction
techniques, data collection methods, and the determination and
refinement of crystal structures. 4 undergraduate hours. 4 graduate
hours. Prerequisite: CHEM 442 or consent of instructor.

CHEM 488  Surfaces and Colloids  credit: 3 or 4 Hours.
Same as MSE 480. See MSE 480.

CHEM 492  Special Topics in Chemistry  credit: 1 to 3 Hours.
Open to advanced undergraduates and graduate students. Deals with
subjects not ordinarily covered by regularly scheduled courses. 1 to 3
undergraduate hours. 1 to 3 graduate hours. Approved for letter and S/
U grading. Prerequisite: Credit or concurrent registration in any 400-level
course in chemistry.

CHEM 494  Lab Safety Fundamentals  credit: 1 Hour.
Same as MSE 492. See MSE 492.

CHEM 495  Teaching Secondary Chemistry  credit: 4 Hours.
Intended for undergraduates working toward certification to teach high
school chemistry and graduate students working towards a Master’s
degree in the Teaching of Chemistry. Course aims to provide future
teachers with hands-on experience in conducting laboratory experiments,
demonstrations, and teaching strategies. 4 undergraduate hours. 4
graduate hours. Course does not count toward the eleven advanced
hours in chemistry required in the specialized curriculum, nor does it
apply to coursework required for the Ph.D. in Chemistry. Prerequisite:
Undergraduate background in general chemistry and credit or concurrent
enrollment in CI 403.

CHEM 496  Undergraduate Research Abroad  credit: 1 to 4 Hours.
Students assist in research under faculty supervision at a location
outside of the United States. Topics and type of assistance vary. 1 to 4
undergraduate hours. No graduate credit. May be repeated in separate
terms up to 6 hours. Prerequisite: Evidence of adequate preparation
for such study; consent of faculty member supervising the work (who
will have examined the proposed research plan); and approval of the
department. Not available to freshman.
Information listed in this catalog is current as of 03/2017

Chemistry Concentration

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising)

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in Chemistry and/or Biochemistry must be taken on this campus.

NOTE: Transfer credit in chemistry must be approved by an adviser in chemistry in order to be included in the 30 hours.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Chemistry and biochemistry courses including: 1,2 22-26

| CHEM 440 | Physical Chemistry Principles or CHEM 44|Physical Chemistry I | 4-8 |
| Two other 300- or 400-level courses, at least one of which must be outside physical chemistry. | 4-8 |
| MATH 220 | Calculus | 4-5 |
| or MATH 221 | Calculus I | 4-5 |

CHEM 497 Individual Study Senior credit: 1 to 3 Hours.

Individual study of problems related to chemistry or research not necessarily leading to a senior thesis. Course Information: 1 to 3 undergraduate hours. No graduate credit. May be repeated in separate terms. A maximum of 6 hours may be used toward the major. A maximum of 18 hours of CHEM 197, CHEM 297, CHEM 397, CHEM 497 and/or CHEM 499 may be used toward the degree. Prerequisite: Chemistry faculty approval required to register.

CHEM 499 Senior Thesis credit: 2 to 6 Hours.

Research with thesis, under the direction of a senior staff member in chemistry. Normally the student takes two terms of CHEM 499 in the senior year. 2 to 6 undergraduate hours. No graduate credit. May be repeated up to 10 hours in separate terms. CHEM 499 is recommended for all those who plan to do research and graduate study and it is a prerequisite for graduation with distinction in chemistry. In the term preceding their initial enrollment, those interested in taking the course should consult with their advisers and with the graduate adviser for the area of interest in which they plan to work. A maximum of 10 hours may be counted toward graduation and a thesis must be presented for credit to be received.

Chemistry Teaching Concentration

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising).

Degree title: Bachelor of Science in Liberal Arts and Sciences

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in Chemistry must be taken on this campus.

Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school (grades 9-12) chemistry through the AP/honors level and biology, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 126).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have an major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Students in the Chemistry Teaching Concentration may submit their final teaching portfolio for evaluation in lieu of taking
CHEM 499 and submitting a senior thesis. Final decisions on awarding Distinction honors will be made by the Head or designee.

**Foundation Courses**

The following courses must be completed or in progress when students apply to the Secondary Education minor.

Select one group of courses (Accelerated or General Chemistry):

<table>
<thead>
<tr>
<th>Group</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accelerated</td>
<td>CHEM 202 Accelerated Chemistry I &amp; CHEM 203:and Accelerated Chemistry Lab I &amp; CHEM 204:and Accelerated Chemistry II &amp; CHEM 205:and Accelerated Chemistry Lab II</td>
</tr>
<tr>
<td>General</td>
<td>CHEM 102 General Chemistry I &amp; CHEM 103:and General Chemistry II &amp; CHEM 104:and General Chemistry Lab II &amp; CHEM 222:and Quantitative Analysis Lecture &amp; CHEM 223:and Quantitative Analysis Lab</td>
</tr>
</tbody>
</table>

Select one of the following Organic Chemistry course groups:

<table>
<thead>
<tr>
<th>Group</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>10-12</td>
<td>CHEM 236 Fundamental Organic Chem I &amp; CHEM 237:and Structure and Synthesis</td>
</tr>
</tbody>
</table>

**Additional Required Coursework**

Teacher Education Minor in Secondary School Teaching (p. 126)

CHEM 495 Teaching Secondary Chemistry

CHEM 440 Physical Chemistry Principles

or CHEM 442 Physical Chemistry I

At least four additional hours of 300- or 400-level chemistry and/or biochemistry course work.

ASTR 100 Introduction to Astronomy

GEOL 107 Physical Geology

IB 100 Biology in Today's World

MATH 220 Calculus I

or MATH 221 Calculus II

MATH 231 Calculus II

MATH 241 Calculus III

PHYS 211 University Physics: Mechanics

PHYS 212 University Physics: Elec & Mag

PHYS 214 Univ Physics: Quantum Physics

**Environmental Chemistry Concentration**

For advising see the Chemistry Overview Section (p. 342)

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas. These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

**Required Courses for the Specialized Curriculum in Chemistry**
