CI 591  Field Study & Thesis Seminar  credit: 4 to 8 Hours.
Assists doctoral candidates in planning field studies and thesis problems. Students are expected to present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze critically all presentations. Prerequisite: Admission to doctoral study.

CI 592  Ed.D. Proseminar  credit: 2 Hours.
Course covers various topics related to research in practice and critical reading of research in the field of curriculum and instruction. May be repeated to a maximum of 6 hours in separate terms. Prerequisite: Ed.D. students.

CI 595  Independent Study  credit: 2 or 4 Hours.
Offers opportunity and challenge of self-directive, independent study; develops the individual's ability as an independent student, and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given term. May be repeated to a maximum of 8 hours with approval. Prerequisite: Approval of study outline by adviser and the department chairperson prior to enrollment.

CI 599  Thesis Research  credit: 0 to 16 Hours.
Individual direction of research and thesis writing. Approved for S/U grading only. May be repeated.

Czech (CZCH)

Czech Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CZCH)

Courses

CZCH 101  Elementary Czech I  credit: 4 Hours.
Develops basic proficiency in Czech in listening, speaking, reading, and writing.

CZCH 102  Elementary Czech II  credit: 4 Hours.
Continuation of CZCH 101. Prerequisite: CZCH 101.

CZCH 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

CZCH 201  Second-year Czech I  credit: 4 Hours.
Develops intermediate-level proficiency in Czech in listening, speaking, reading, and writing. Prerequisite: CZCH 102 or equivalent.

CZCH 202  Second-year Czech II  credit: 4 Hours.
Continuation of CZCH 201. Prerequisite: CZCH 201 or equivalent.

CZCH 484  Readings in Czech  credit: 3 or 4 Hours.
Reading and analysis of selected texts. 3 undergraduate hours. 4 graduate hours. Prerequisite: CZCH 202 or consent of instructor.

Dance (DANC)

DANC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/DANC)

Courses

DANC 100  Intro to Contemporary Dance  credit: 3 Hours.
Overview of major works, figures, and trends responsible for shaping dance as an evolving contemporary art form. The course will have lecture, viewing, discussion and experiential (studio participation) components. For non-dance majors.

DANC 101  Modern Dance I  credit: 2 Hours.
Introduction to basic dance technique and movement improvisation; the study of motion as an art, group relationships in improvisation, and discussion of choreographic ideas. For non-dance majors. May be repeated to a maximum of 8 hours.

DANC 102  Modern Dance II  credit: 2 Hours.
Intermediate dance technique and improvisation. For non-dance majors. May be repeated to a maximum of 8 hours. Prerequisite: DANC 101 or consent of instructor.

DANC 103  Contact Improvisation  credit: 2 Hours.
Introduction to basic elements of Contact Improvisation through learning skills such as weight sharing, falling, rolling, responding to touch, momentum, gravity and disorientations. Course work will include dancing, dance making, viewing dance, in-class discussions and short writing assignments. Concert attendance is required. May be repeated to a maximum of 8 hours. Prerequisite: For Non-dance majors.

DANC 104  Making Dances  credit: 2 Hours.
Introduction to basic choreographic elements. Course work will include dancing, dance making, viewing dance, in-class discussions and short writing assignments. Concert attendance is required. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.
DANC 105 Jazz Dance I credit: 2 Hours.
Introduction to basic dance technique and stylistic work in the jazz idiom. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 106 Jazz Dance II credit: 2 Hours.
Progressive development of the concepts and skills in DANC 105. May be repeated to a maximum of 8 hours. Prerequisite: DANC 105 or equivalent; or consent of instructor. For non-dance majors.

DANC 107 Ballet I credit: 2 Hours.
Introduction to ballet for nondance majors. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 108 Ballet II credit: 2 Hours.
Progressive development of the concepts and skills in DANC 107; for the non-dance major. May be repeated to a maximum of 8 hours. Prerequisite: Two semesters of DANC 107 or equivalent or consent of instructor. For non-dance majors.

DANC 109 Ballet III credit: 2 Hours.
Intermediate level of Ballet technique for non-dance majors. Course is a continuation and development of the skills in DANC 108. May be repeated to a maximum of 8 hours. Prerequisite: Two semesters of DANC 108 or equivalent or consent of instructor. For non-dance majors.

DANC 110 Cultural Dance Forms credit: 2 Hours.
Provides students with the physical study of various world dance forms. Topics reflect specializations of faculty, such as Capoeira, African dance, Balinese dance, and Chinese forms. May be repeated to a maximum of 4 hours in the same term and 8 hours in separate terms.

DANC 111 Hip Hop credit: 2 Hours.
Hip-Hop dance technique will consist of the study and practice of Urban dance forms grounded in hip-hop culture. Students will explore the multiple dimensions of hip-hop dance as they train in the fundamentals of each form, learn its respective historical context, and access ways of incorporating individual ideas and lived experiences into their dancing. May be repeated in separate terms up to 8 hours.

DANC 120 Tap Dance I credit: 2 Hours.
Introduction to basic tap technique for non-dance majors. Emphasis is on a conceptual understanding of tap style and the development of the specific skills needed for performance. May be repeated to a maximum of 8 hours. Prerequisite: For non-dance majors.

DANC 121 Tap Dance II credit: 2 Hours.
Intermediate level of tap dance technique for non-dance majors. Course is a continuation of DANC 120, emphasizing a progression in movement vocabulary, style, rhythm, and performance quality. May be repeated to a maximum of 8 hours. Prerequisite: DANC 120 or equivalent, or consent of instructor.

DANC 130 Production Practicum I credit: 1 or 2 Hours.
Practical experience in the production of dance concerts mounted in the Kranert Center for the Performing. Arts. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term).

DANC 150 Orientation to Dance credit: 2 Hours.
Survey of the field including dance as a theatre art, careers, injury prevention and nutrition. Also serves to orient incoming students to the faculty, programs, and policies of the Department of Dance, and the production and performing resources in the Kranert Center for the Performing Arts. Prerequisite: Major standing in Dance or consent of instructor.

DANC 160 Beg Contemp Modern Tech Core credit: 1 to 3 Hours.
Elementary technique for majors with emphasis on a conceptual understanding of movement principles and the development of technical skill and performance sensitivity. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 166 Beginning Ballet Tech Core credit: 1 or 2 Hours.
Elementary ballet for dance majors; emphasizes placement, refinement of adagio, pirouette, jumps, and connecting steps. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 167 Beginning Ballet Tech Elect credit: 1 or 2 Hours.
Elementary ballet for dance majors; emphasizes placement, refinement of adagio, pirouette, jumps, and connecting steps. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated to a maximum of 9 hours.

DANC 200 Explore Music through Dance credit: 3 Hours.
In-depth study of musical form, history, culture, and styles, taught from a physical learning, i.e., dance, perspective. Musical and dance forms will be studied across cultures and time periods, from both a technical and a cross-cultural perspective. Content will be delivered as a series of video lectures and performances, and online readings. Students will create movement studies that mirror the musical forms being analyzed, produce video documentation of these works, engage in peer review of other students’ performance work, and complete exams that cover the cultural and historical aspects of the examples studied. This course satisfies the General Education Criteria for: Humanities - Lit Arts

DANC 209 Lyric Theatre Dance credit: 2 Hours.
Designed for Lyric Theatre Students, this course will introduce a broad variety of movement techniques used in the collaborative singing-acting industry. Through integrative cognitive and physical instruction, students will learn to optimize kinesthetic awareness, expressiveness, breath control, and governance of the singing actors’ physical instrument. Classes will include: physical exercises and improvisations, group collaborations, and analysis of movement choices in theatrical performances. Dance styles ranging from Baroque opera and ballroom dance forms to contemporary musical theatre will be covered within this course. May be repeated once in separate semesters. Prerequisite: For Dance or Lyric Theater majors only or by consent of the instructor.

DANC 210 Int Jazz Technique credit: 1 Hour.
Introduction to basic dance techniques and stylistic work in the jazz idiom for experienced dancers. Emphasis on a conceptual understanding of jazz style (as related to America’s own cultural diversity) and the development of the specific skills necessary for performance and teaching. May be repeated to a maximum of 2 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 211 Int Hip Hop Technique credit: 1 Hour.
Hip-Hop dance technique will consist of the study and practice of Urban dance forms grounded in hip-hop culture. Students will explore the multiple dimensions of hip-hop dance as they train in the fundamentals of each form, learn its respective historical context, and access ways of incorporating individual ideas and lived experiences into their dancing. May be repeated in separate terms for a maximum of 8 hours. Prerequisite: For majors only.
DANC 212  Musical Theater Dance  credit: 1 Hour.
Introduction to basic dance techniques and stylistic work in the Musical Theater idiom for experienced dancers. Emphasis is on a physical and conceptual understanding of a variety of Musical Theater styles as related to America's own cultural diversity and the development of the specific skills necessary for performance and teaching. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Audition required. Primarily for Dance and Music Majors with a Concentration in Lyric Theater. Students with sufficient skills from other majors may be accepted with approval from instructor.

DANC 215  Int Tap Dance Technique  credit: 1 Hour.
Introduction to basic tap technique for experienced dancers. Emphasis on a conceptual understanding of tap style and the development of the specific skills necessary for performance and teaching. May be repeated to a maximum of 2 hours. Prerequisite: Major standing in Dance, or consent of instructor.

DANC 220  Perf Pract Student Works I  credit: .5 to 2 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision. Approved for S/U grading only. May be repeated to a maximum of 16 hours, in separate terms. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 221  Performance in Grad Thesis I  credit: .5 to 3 Hours.
Performance laboratory involving the rehearsal and performance of student works under faculty supervision performed in MFA Thesis concert. May be repeated to a maximum of 16 hours, in separate terms. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 222  Perf Pract November I  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in November Dance. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 223  Perf Pract February I  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of works by faculty and visiting artists performed in February Dance. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor. A maximum of 16 hours of performance credit may be counted toward degree requirements.

DANC 231  Production Practicum II  credit: 1 or 2 Hours.
Practical experience in the production of dance concerts mounted in the Krannert Center for the Performing Arts. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term).

DANC 232  Repertory Company  credit: 2 Hours.
Provides dance majors with diverse performing experiences in the community. Venues will include area schools, nursing homes, and special populations. Students will participate in the creation of lecture-demonstrations which may include improvisation and choreography. Participation in all performances is a requirement. May be repeated to a maximum of 6 hours. Prerequisite: Major standing in Dance or consent of instructor.

DANC 240  Dance History  credit: 3 Hours.
Introduction to major artistic movements in dance history from ancient Greece through the 20th century. Goal of the course is to gain a broad understanding of dance in relation to socio-political ideologies of gender, race, sexuality, and national identities. Prerequisite: Major standing in Dance or consent of instructor.

DANC 245  Introduction to Somatics  credit: 1 Hour.
Introduction to the basic concepts and principles of somatic practices, or body-mind disciplines, as related to dance. Through reading, writing, and experiential work, students will learn basic tenets of a number of somatic practices such as Ideokinesis and Imagery, Body-Mind Centering, The Alexander Technique, Bartenieff Fundamentals, and the Feldenkrais Method. Exploration of the ways in which somatics has helped to shape current dance training practices by looking at common themes and distinguishing features of these modalities.

DANC 259  Contact Improv for Act/Mus/Dan  credit: 1 Hour.
In this interdisciplinary course, performing arts students learn physical skills necessary for the practice of the contact improvisation (CI) partnering dance form as well as improvisational and performance skills. Encourages contemplation of the broader philosophical implications inherent in the form: community building and accepting difference. Content includes visits to lectures and events outside the Dance Department. May be repeated in separate terms to a maximum of 4 hours.

DANC 260  Int Contemp Modern Tech Core  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 160 and DANC 161, with emphasis on the qualitative and definitive performance of a variety of technical styles. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 160; or consent of instructor.

DANC 261  Int Contemp Modern Tech Elect  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 160 and DANC 161, with emphasis on the qualitative and definitive performance of a variety of technical styles. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 160; or consent of instructor.

DANC 262  Choreographic Process I  credit: 2 Hours.
Theory and practice in principles of dance composition; emphasis on solo creative work using various approaches to composition. Prerequisite: DANC 259 or consent of instructor. Limited to dance majors.

DANC 266  Intermediate Ballet Tech Core  credit: 1 or 2 Hours.
Intermediate ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 166 and DANC 167, with emphasis on technical development and extended movement combinations. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 166 or DANC 167; or consent of instructor.

DANC 267  Intermediate Ballet Tech Elect  credit: 1 or 2 Hours.
Intermediate ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 166 and DANC 167, with emphasis on technical development and extended movement combinations. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in Dance and successful completion of two semesters of DANC 166 or DANC 167; or consent of instructor.

DANC 268  Music Theory for Dancers  credit: 3 Hours.
Introduction to basic music theory with a concentration on rhythm. The first half of the term will concentrate on 1) learning, understanding, and being conversant in basic music parameters; 2) analytical listening; 3) notation; 4) transcriptions; 5) reading notation/following a score; 6) performance of simple rhythm patterns. The second half will deal with form and formal analysis as it relates to choreography, as well as more advanced parameters of music theory. Prerequisite: Major standing in Dance or consent of instructor.
DANC 301  Yoga Practicum for Dancers  credit: 1 Hour.
Introduces basic yoga asanas (postures) and brief overview of the 8-limb system of yoga. Focus will be on understanding correct alignment and developing inner awareness. Weekly home practice, journal, and discussions about yoga philosophy are required. May be repeated in separate terms to a maximum of 8 hours.

DANC 310  World Dance Forms  credit: 1 Hour.
Provides students with the physical study of various world dance forms. Topics reflect specializations of faculty, such as Capoeira, African dance, Balinese dance, and Chinese forms. May be repeated in the same term to a maximum of 2 hours. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.

DANC 311  Creative Dance for Children  credit: 1 Hour.
This is a hands-on course for students interested in exploring the relationship between dance and camera and the fundamentals of dance documentation. Using critical and experiential approach, we will explore the technical and artistic capabilities of mini-DV cameras and film-editing software to create dance performance documentation. Students will learn to execute clear and effective camerawork in relationship to dance performance, and to utilize editing software to most clearly display the artistic intent of the choreographers and directors. May be repeated up to 8 hours in separate terms. Prerequisite: For majors only, or by instructor approval.

DANC 330  Dance Documentation  credit: 1 or 2 Hours.
Practical experience in all aspects of the production of dance concerts mounted in the Krannert Center for the Performing Arts and within the Department of Dance. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term). Prerequisite: DANC 131, DANC 231 or equivalent, and consent of instructor.

DANC 331  Production Practicum III  credit: 1 or 2 Hours.
Practical experience in all aspects of the production of dance concerts mounted in the Krannert Center for the Performing Arts and within the Department of Dance. May be repeated to a maximum of 6 hours. (1 hour credit per concert up to 2 hours per term). Prerequisite: DANC 131, DANC 231 or equivalent, and consent of instructor.

DANC 340  Dancing Black Popular Culture  credit: 3 Hours.
Introduces students to black dance aesthetics and its interconnectedness with American popular culture. By exploring its cultural, political and historical roots, coupled with theoretical concepts of "the popular" and ties to the vernacular, the course will be organized around significant markers that have shaped black dance's development. Same as AFRO 340.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

DANC 345  Dance Anatomy and Kinesiology  credit: 3 Hours.
The study of human and anatomy and kinesiology, specifically as applied to dance. The human musculoskeletal system, movement analysis, and conditioning principles are covered both theoretically and practically.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

DANC 350  Creative Dance for Children  credit: 3 Hours.
Through lecture, discussion and practice, students develop skills to teach elements and concepts of dance to children ages 4-10. Course includes strategies for behavior and time management, spatial transitions, and how to organize and communicate creative concepts clearly and effectively. Students will observe master teaching and apply teaching techniques, acquire lesson plans that form the basis for a creative dance curriculum and the skills to implement them, and participate in all phases of a creative dance curriculum, including informal performance. Same as ARTE 350 and HDFS 361. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor.

DANC 360  Int/Adv Contemp Mod Tech Core  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 260 and DANC 261, with emphasis on virtuosity and versatility. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor; departmental placement.

DANC 361  Int/Adv Contemp Mod Tech Elect  credit: 1 to 3 Hours.
Progressive development of the concepts in DANC 260 and DANC 261, with emphasis on virtuosity and versatility. May be repeated to a maximum of 18 hours. Prerequisite: Major standing in Dance or consent of instructor; departmental placement.

DANC 362  Choreographic Process II  credit: 2 Hours.
Choreography for the experienced student; includes performance of at least one original work. May be repeated in separate terms to a maximum of 10 hours. Prerequisite: DANC 262 or consent of instructor.

DANC 363  Advanced Improvisation  credit: 1 Hour.
Exploration of the physical skills and philosophical concepts at the base of improvisation practice. Students will develop individual and collective approaches to improvisatory structures, systems and performance contexts as well as look at the historical ways that improvisation has been used in contemporary performance. The course will culminate in performance in various public and private contexts. May be repeated in separate terms to a maximum of 4 credit hours.

DANC 366  Int/Adv Ballet Tech Core  credit: 1 or 2 Hours.
Intermediate/Advanced ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 266 and DANC 267. For dancers of advanced technical level with the ability to execute the ballet vocabulary. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in dance or consent of instructor; or Departmental placement.

DANC 367  Int/Adv Ballet Tech Elect  credit: 1 or 2 Hours.
Intermediate/Advanced ballet for dance majors; a progressive development of movement concepts and vocabulary in DANC 266 and DANC 267. For dancers of advanced technical level with the ability to execute the ballet vocabulary. May be repeated to a maximum of 8 hours. Prerequisite: Major standing in dance or consent of instructor; or Departmental placement.

DANC 375  Production in Dance  credit: 1 Hour.
Examines the theoretical and practical aspects of dance production. Includes lighting, costumes, scenery, props, audio, make-up, and management. Commitment outside of scheduled class includes participation in the production of the annual Senior Concert.

DANC 400  Viewing Dance  credit: 1 Hour.
Overview of contemporary dance from the United States, Canada, and Europe focusing on the current works of significant emerging and established choreographers working in the field today. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only. May be repeated to a maximum of 4 hours.

DANC 401  Alexander Tech for Dancers  credit: 1 Hour.
Introduces the Alexander Technique: a practical method for changing habitual movement patterns which interfere with coordination, ease, and efficiency of movement. The course focuses on learning the principles through hands-on work, readings, discussions, and application to dance. 1-3 individual lessons outside of class required per term. 1 undergraduate hour. 1 graduate hour. Prerequisite: Major standing in Dance or consent of instructor.
DANC 402  Alexander Technique Practicum  credit: 1 or 3 Hours.
Facilitates conscious and reasoned control of the human organism as a
psychophysical whole. Helps students recognize habits that constitute
daily activities and discard, through conscious control, those
that impede open-minded enquiry and self-reliance. Through one-on-
one work with certified teachers and trainees, students will learn to
change habitual patterns of coordination. 1 undergraduate hour. 3
graduate hours. May be repeated in separate terms to a maximum of 8
undergraduate hours or 6 graduate hours.

DANC 410  Advanced Jazz Technique  credit: 1 Hour.
Continuation of DANC 110, emphasizing the conceptual understanding
of the jazz style and development of specific skills necessary for this
idiom. No undergraduate credit. 1 graduate hour. May be repeated to a
maximum of 4 hours. Prerequisite: Major standing in Dance or DANC 110
or equivalent and consent of instructor.

DANC 411  Adv Hip Hop Technique  credit: 1 Hour.
Advanced Level Hip Hop Class. Hip-Hop dance technique will consist of
the study and practice of Urban dance forms grounded in hip-hop culture.
Students will explore the multiple dimensions of hip-hop dance as they
train in the fundamentals of each form, learn its respective historical
context, and access ways of incorporating individual ideas and lived
experiences into their dancing. No undergraduate credit. 1 graduate
credit. May be repeated in separate terms up to 8 hours. Prerequisite: For
majors only.

DANC 420  Perf Pract Student Works II  credit: .5 to 2 Hours.
Performance laboratory involving the rehearsal and performance of
student works under faculty supervision. 0.5 to 2 undergraduate hours.
0.5 to 2 graduate hours. Approved for S/U grading only. May be repeated to
a maximum of 16 hours in separate terms.

DANC 421  Performance in Grad Thesis II  credit: .5 to 3 Hours.
Performance laboratory involving the rehearsal and performance of
student works under faculty supervision performed in MFA Thesis
concert. 0.5 to 3 undergraduate hours. 0.5 to 3 graduate hours. May be
repeated to a maximum of 16 hours.

DANC 422  Perf Pract November II  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of
works by faculty and visiting artists performed in November Dance. 1
to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a
maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 423  Perf Pract February II  credit: 1 to 3 Hours.
Performance laboratory involving the rehearsal and performance of
works by faculty and visiting artists performed in February Dance. 1
to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a
maximum of 16 hours. Prerequisite: Consent of instructor.

DANC 424  Collaborative Performance  credit: 1 or 2 Hours.
COLAB is an interdisciplinary class fusing improvisation, composition
and collaborative projects for students in the departments of Music,
Dance and Engineering. The class will be run along the lines of a
professional performance company. Work in class will include sharing
and adapting the principles and elements from each of these disciplines
with a focus on producing material that will be presented in numerous
public performances throughout the semester. 1 undergraduate hour.
2 graduate hours. May be repeated to a maximum of 3 undergraduate
hours or 6 graduate hours in separate terms. Prerequisite: DANC 162 or
DANC 259 or consent of instructor.

DANC 425  Dance Internship  credit: 1 to 4 Hours.
Supervised field experience in community and/or professional
organizations in a variety of danced-related areas. Provides students
with work experience and exposure to professional situations. Written
and/or video documentation and department presentation of internship
activities required. 1 to 4 undergraduate hours. 1 to 4 graduate hours.
Approved for S/U grading only. May be repeated to a maximum of 6
hours. Prerequisite: Major standing in Dance and consent of instructor.

DANC 431  Production Practicum IV  credit: 1 or 2 Hours.
Practical experience in all aspects of the production of dance concerts
mounted in the Krannert Center for the Performing Arts and within the
Department of Dance. 1 or 2 undergraduate hours. 1 or 2 graduate hours.
May be repeated to a maximum of 6 hours. (1 hour credit per concert up
to 2 hours per term). Prerequisite: DANC 131 or DANC 231, or equivalent
and consent of instructor.

DANC 441  Dance History Seminar  credit: 3 Hours.
Survey of critical approaches in dance studies including feminist theory,
poststructural, and postcolonial theory, historiography, and ethnographic
research methods. Course topics will cover a variety of theatrical,
popular, and social dance practices. 3 undergraduate hours. 3 graduate
hours. May be repeated to a maximum of 6 undergraduate hours and 9
graduate hours. Prerequisite: DANC 240 or consent of instructor.
This course satisfies the General Education Criteria for:
Advanced Composition

DANC 445  Dance Kinesiology and Somatics  credit: 4 Hours.
Introduction to human anatomy and kinesiology, specifically as applied
to dance; introduction to the field of Somatics; approaches to improving
the use of the body; exploration of the connections between the body,
the mind, and movement. 4 undergraduate hours. 4 graduate hours.
Prerequisite: Major standing in dance or consent of instructor.

DANC 450  Teaching Workshop  credit: 3 Hours.
Methods and approaches to the teaching of dance technique in the
modern, ballet, and jazz idioms. 3 undergraduate hours. 3 graduate hours.
Prerequisite: Junior standing in Dance or consent of the instructor.

DANC 451  Ind Study and Special Topics  credit: 1 to 4 Hours.
Special projects in research or creative investigation taught on an
individual or class basis. 1 to 4 undergraduate hours. 1 to 4 graduate
hours. May be repeated to a maximum of 8 hours. Prerequisite: Junior
standing in Dance and consent of instructor.

DANC 455  Supervised Teaching  credit: 1 to 4 Hours.
Practical teaching experience under the supervision of a faculty member;
weekly conference devoted to evaluation and planning. Teaching
areas include major and non-major university courses and classes for
community adults and children. 1 to 4 undergraduate hours. 1 to 4
graduate hours. May be repeated to a maximum of 8 hours with approval.

DANC 459  Contact Improv Act/Mus/Dan II  credit: 1 or 2 Hours.
An interdisciplinary course in which performing arts students learn
physical skills necessary for the practice of the contact improvisation (CI)
partnering dance form as well as improvisational and performance skills.
Encourages contemplation of the broader philosophical implications
inherent in the form: community building and accepting difference.
Content includes visits to lectures and events outside the dance
department. 1 or 2 undergraduate hours. 1 or 2 graduate hours. May be
repeated in separate terms to a maximum of 4 undergraduate hours or 6
graduate hours if topics vary.
DANC 460  Adv Contemp Modern Tech Core  credit: 1 to 3 Hours.
Modern technique for advanced graduate students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor; or departmental placement.

DANC 461  Adv Contemp Modern Tech Elect  credit: 1 to 3 Hours.
Modern technique for advanced graduate students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor; or departmental placement.

DANC 462  Composition Workshop  credit: 2 Hours.
Structured creative utilization of formal choreographic elements in the creation, rehearsal, staging, and performance of original dance works. 2 undergraduate hours. 2 graduate hours. Approved for S/U grading only. Prerequisite: Graduate standing in dance or consent of instructor.

DANC 464  Composer-Chor Workshop  credit: 2 Hours.
For experienced composers and choreographers; explores the many relationships between musical composition and choreography. Same as MUS 471. 2 undergraduate hours. 2 graduate hours. Prerequisite: For dance majors, DANC 263 or consent of instructor; for music majors, MUS 106 or equivalent, other compositional experience, and consent of instructor.

DANC 465  Screendance  credit: 3 Hours.
Provides a comprehensive approach, from camera use to editing techniques, leading to a practical ability to develop and produce video projects on a basic level. Course focuses on developing choreographic projects designed specifically for the video/film format. 3 undergraduate hours. 3 graduate hours. Prerequisite: DANC 330. Non-dance majors admitted by audition on a space-available basis.

DANC 466  Advanced Ballet Tech Core  credit: 1 to 3 Hours.
Ballet for advanced students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor or departmental placement.

DANC 467  Advanced Ballet Tech Elect  credit: 1 to 3 Hours.
Ballet for advanced students. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Major standing in dance or consent of instructor or departmental placement.

DANC 495  Senior Career Seminar  credit: 1 Hour.
Addresses survival strategies and the transition from academe to the profession. Course content includes research and discussion of career possibilities in performance, choreography, teaching, community dance work, therapy, and the dance-related fields of health/fitness/recreation. Students will research individualized projects in an area of interest. 1 undergraduate hour. No graduate credit. Prerequisite: Senior standing in Dance.

DANC 497  BA Capstone Project  credit: 3 Hours.
The BA Capstone Project is a synthesis of dance studies with the student's selected focused area of study (focused electives, dual major, or minor), which results in a culminating presentation, performance, and/or written project. 3 undergraduate hours. No graduate credit. Approved for S/U grading only. Prerequisite: BA in Dance majors only, senior standing required.

DANC 498  Senior Thesis Production  credit: 1 or 2 Hours.
The planning, design, and production of the Senior Capstone Project (DANC 499) for public performance. Students will work as a team to plan the Senior Concerts including designing and producing promotional materials and managing technical rehearsals and performances. 1 or 2 undergraduate hours. No graduate credit. May be repeated in separate terms. Prerequisites: DANC 375. Concurrent enrollment in DANC 499 is required.

DANC 499  Senior Thesis Project  credit: 1 to 2 Hours.
The creation of a culminating choreographic/performance project. 1 to 2 undergraduate hours. No graduate credit. Approved for S/U grading only. May be repeated to a maximum of 2 hours. Prerequisite: DANC 362 and senior standing in Dance. Concurrent enrollment in DANC 498 is required.

DANC 510  Grad Seminar/Special Topics  credit: 4 Hours.
Survey of professional organizations, publications, scholarly resources and trends culminating in student presentation of projects examining current issues in the field. May be repeated to a maximum of 12 hours. Prerequisite: Graduate standing in Dance.

DANC 520  Synthesis Laboratory  credit: 4 Hours.
Required laboratory course focused on the practice of synthesizing expertise in choreography, physical practice, teaching, written and oral communication, and creative career planning. Critical theory and inquiry will be intertwined with rigorous examination of performance and construction of dance-making. Issues of sustaining practice, testing and conveying one's mission and vision, and elaborating on one's individual research in relationship to the field will be emphasized. May be repeated up to 8 hours in separate terms. Spring and Fall terms, even years. Prerequisite: Graduate standing in Dance required.

DANC 530  Somatics in Dance Training  credit: 3 Hours.
Addresses current issues in the teaching of dance technique, with a focus on the incorporation of dance science and somatics into dance training. Course includes reading, writing, discussion, teaching observation, and experiential work. Prerequisite: Completion of DANC 445 and DANC 450, or consent of instructor.

DANC 531  MFA Prof Practice Seminar  credit: 1 Hour.
A course examining current field practices and trends including curatorial practices, and interdisciplinary practices. Includes preparation of practical materials for career presentation and examination of resources. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Graduate standing in dance.

DANC 532  Digital Media for Dancers  credit: 2 Hours.
Survey of the manipulation of digital images, video, and audio, with an emphasis on how these technologies are valuable to the dancer as both creative and marketing tools. Prerequisite: Graduate standing in Dance or consent of instructor.

DANC 541  Contemporary Directions I  credit: 2 Hours.
A critical approach to 20th century dance with emphasis on the evolution of ideas that have influenced and shaped the dance of today. Prerequisite: Graduate standing in dance or consent of instructor.

DANC 542  Contemporary Directions II  credit: 2 Hours.
Continuation of Dance 541 Contemporary Directions I emphasizing viewing, discussing, analyzing, and writing about the work of current significant contemporary choreographers worldwide with special attention toward contextualizing student research. May be repeated in separate terms up to 4 hours. Prerequisite: DANC 541 or consent of instructor. For graduate students only except by permission of instructor.
DANC 550  Advanced Research in Dance  credit: 1 to 4 Hours.
Advanced Independent Research in an opportunity for exceptional returning level professional MFA candidates in Dance to design and implement an in-depth examination of a creative, historical, contemporary, philosophical, technological, or educational facet of dance under the guidance of a faculty advisor. May be repeated for a maximum of 12 graduate hours. Prerequisite: Consent of instructor, advisor, and graduate program director.

DANC 560  Advanced Physical Practice  credit: 1 to 4 Hours.
MFA candidates are required to maintain a demonstrated level of technical proficiency through a consistent graduate level physical practice. The physical practice of each candidate is determined through advisement and may include ballet technique, modern technique, Alexander Technique, yoga, or additional somatic practices offered in the department. Approved for S/U grading only. May be repeated to a maximum of 24 hours. Prerequisite: MFA candidate in dance.

DANC 562  Graduate Composition II  credit: 2 Hours.
Includes reading, writing, and discussion. Students will examine the creative process, the conventions that form choreographers’ works, and the historical situations from which specific dance works spring. Students will produce works in specific contexts outside the standard theatre setting. They will be responsible for all promotional and production aspects of a project that will be presented to the public. Prerequisite: Dance 462.

DANC 581  Aesthetics and Curriculum  credit: 4 Hours.
Same as CI 581. See CI 581.

DANC 598  Creative Thesis Project  credit: 4 Hours.
The design, implementation, and completion of a culminating creative project in choreography and/or performance. Approved for S/U grading only. May be repeated to a maximum of 8 hours. Prerequisite: 28 hours of graduate work in dance, including 4 hours in choreography.

E. Asian Languages & Cultures (EALC)

EALC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EALC)

Courses

EALC 114  Introduction to East Asian Art  credit: 4 Hours.
Same as ARTH 114. See ARTH 114. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

EALC 120  East Asian Civilizations  credit: 3 Hours.
Same as HIST 120. See HIST 120. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 122  History East Asian Religions  credit: 3 Hours.
Introduction to East Asian religious traditions; emphasizes the ideas of Confucianism, Taoism, and Buddhism in China and their historical interactions. Same as REL 122. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 130  The Chinese Language  credit: 3 Hours.
An introduction to the scientific study of the Chinese language. We will explore where the Chinese language came from, its similarities to and differences from Japanese and Korean, and how the Chinese character writing system was invented, plus what is it like now. We will explore differences among Chinese dialects (e.g., Cantonese, Mandarin, Taiwanese and Shanghai) and learn where in China these are spoken, and also explore how the Chinese language operates in the brain. Finally, we will investigate how children in China learn to speak, read, and write, how adults learn to speak Chinese as a foreign language, and how Chinese can be used by different social groups in different settings in order to influence social power and distance. Approved for Letter and S/U grading. This course does not fulfill the campus foreign language requirement.
This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

EALC 132  Zen  credit: 3 Hours.
Same as REL 132. See REL 132. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

EALC 220  Traditional China  credit: 3 Hours.
Same as HIST 220. See HIST 220. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 221  Modern China  credit: 3 Hours.
Same as HIST 221. See HIST 221. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

EALC 222  Chinese Thght Confucius to Mao  credit: 3 Hours.
Examination of China’s principal philosophical, religious, and political schools of thought - such as Confucianism, Taoism, Zen Buddhism, and Maoism - as ways of understanding one of the world’s major civilizations; the period of the classical philosophers, the glory years of empire, and the troubled era of Western contact receive approximately equal attention. Same as HIST 222 and REL 224. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 226  Premodern Japanese History  credit: 3 Hours.
Same as HIST 226. See HIST 226. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

EALC 227  Modern Japanese History  credit: 3 Hours.
Same as HIST 227. See HIST 227. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

Information listed in this catalog is current as of 04/2018
EALC 240  Chinese Civilization  credit: 3 Hours.
Introduction to the historical development of Chinese civilization. Emphasis will be on broad themes and the connections among cultural values, social institutions, political structures, and contacts with outsiders. Visual and literary evidence will be stressed. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

EALC 250  Intro to Japanese Culture  credit: 3 Hours.
Topical introduction to Japanese cultural and aesthetic life with attention to cultural and aesthetic patterns as they are reflected in literature, language, and the arts. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

EALC 275  Masterpieces of East Asian Lit  credit: 3 Hours.
Study of major works in the literary traditions of China and Japan, including haiku, noh, Tale of Genji, kabuki, Tang poetry, Ming theater, and the colloquial tale. Same as CWL 275. No knowledge of Chinese or Japanese language required. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 276  Asian Film Genres  credit: 3 Hours.
Same as CWL 276 and ENGL 276. See ENGL 276. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 285  Intro to Korea Through Film  credit: 3 Hours.
Course uses film, literary, and ethnographic works to explore the impact of Post-Colonial (1945-present) socioeconomic and cultural transformation on the personal and collective South Korean experience. Same as ANTH 285. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

EALC 287  Introduction to Buddhism  credit: 3 Hours.
Same as REL 287. See REL 287. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

EALC 288  Contemporary East Asia  credit: 3 Hours.
Introduction to aspects of daily life in East Asia in relation to local and extra-local political and economic structures and transformations. Same as ANTH 287.

EALC 305  Japan Lit in Translation I  credit: 3 Hours.
Survey of Japanese literature from earliest times to 1600; readings in prose, poetry, and drama in English translation. Same as CWL 311. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 306  Japan Lit in Translation II  credit: 3 Hours.
Survey of Japanese literature from 1600 to recent times; readings in prose, poetry, and drama in English translation; and lectures and papers. Same as CWL 312. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 307  Classical Chinese Lit  credit: 3 Hours.
Surveys Chinese literary works from the classical tradition (history, philosophy, poetry, literary criticism) with attention to intellectual and artistic values. Same as CWL 307. No knowledge of Chinese is required. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 308  Chinese Popular Lit  credit: 3 Hours.
Surveys Chinese popular literary works written in the vernacular language (short story, novel, and drama), with attention to cultural and artistic values. Same as CWL 308. No knowledge of Chinese is required. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

EALC 333  Language in Japanese Society  credit: 3 Hours.
Examines aspects of language use in contemporary Japanese society, including cross-cultural communication, social/regional variations, and problems surrounding linguistic/ethnic minorities in Japanese society. Prerequisite: Completion of JAPN 202 or equivalent.

EALC 343  Gov & Pol of China  credit: 3 Hours.
Same as PS 343. See PS 343.

EALC 361  Women in East Asia  credit: 3 Hours.
Interdisciplinary inquiry into the cultural and social patterns that have shaped women's lives in China, Japan, and Korea. Same as GWS 361. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

EALC 365  Contemporary Korean Society  credit: 3 Hours.
Introduces contemporary Korean society: the twentieth century struggle of Korea for an individual identity; the Korean road to modernization and its significance for the United States and the developing world. Same as SOC 365. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

EALC 367  History of Korea  credit: 3 Hours.
Historical examination of the Korean experience, from the earliest times to the present day: basic political, social, economic patterns; examination of the cultural and intellectual tradition; Korea's historical role in Asia; the Korean colonial experience; Korea in the modern world. Same as HIST 325. This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

EALC 390  Individual Study  credit: 2 to 4 Hours.
Directed readings in the languages and literatures of East Asia. The area selected depends on the student's interest. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

EALC 391  Honors Tutorial  credit: 2 to 4 Hours.
Tutorial in the civilizations of East Asia. The country and discipline depend on student interests. All students submit a substantial paper. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor.

EALC 398  Colloquium in EALC  credit: 3 Hours.
See online schedule for current topics. May be repeated in the same or separate terms to a maximum of 12 hours if topics vary. Prerequisite: Junior standing.
EALC 402  Ways of Seeing in Edo Japan  credit: 3 or 4 Hours.
Same as ARTH 402. See ARTH 402.

EALC 403  Word and Image in Chinese Art  credit: 3 or 4 Hours.
Same as ARTH 403. See ARTH 403.

EALC 411  The Chinese Novel  credit: 3 or 4 Hours.
Reading and analysis of representative pieces of Chinese fiction from the fourth century B.C. to 1900 with emphasis on the development of Chinese fiction, its place in the literary tradition, and its role in society. Same as CWL 411. 3 undergraduate hours. 4 graduate hours. No knowledge of Chinese is required.

EALC 412  Mod Chinese Lit in Translation  credit: 3 or 4 Hours.
Reading and analysis of representative selections from Chinese literature since the May 4 Movement (early 20th century), with special attention to the relationship between literature and ideology in twentieth-century China. Same as CWL 412. 3 undergraduate hours. 4 graduate hours. No knowledge of Chinese is required.

EALC 413  Premodern Chinese Drama  credit: 3 or 4 Hours.
Survey of Chinese drama from the 12th century through the early 20th century. Students will read major works of Chinese drama in English translation, as well as works on stagecraft, performance styles, the social functions of drama and the social role of actors. Videotaped contemporary performances of traditional drama will be viewed. Same as CWL 416 and THEA 488. 3 undergraduate hours. 4 graduate hours.

EALC 415  Mod Japan Lit in Translation  credit: 2 to 4 Hours.
Critical study of selected 20th century writers with an emphasis on cultural background, world view, human relationships, aesthetic theories, Japanese and Western traditions, and universal literary issues. Same as CWL 415. 3 undergraduate hours. 2 or 4 graduate hours. Requires no knowledge of Japanese; readings and films. Prerequisite: Junior standing or consent of instructor.

EALC 420  China Under the Qing Dynasty  credit: 2 to 4 Hours.
Same as HIST 420. See HIST 420.

EALC 421  Soc-Econ Hist Modern China  credit: 2 to 4 Hours.
Same as HIST 422. See HIST 422.

EALC 425  Chinese Poetry and Translation  credit: 3 Hours.
A critical introduction to major Chinese poetic genres and an in depth examination of various translation strategies used in the translation of Chinese poetry. The poetry component acquaints students with essential aspects of Chinese language and poetry and thus enables them to evaluate the translated texts from the perspectives of both an insider and outsider. The translation component entails both the evaluation of existing translations and practice by the students. Same as TRST 430. 3 undergraduate hours. 3 graduate hours.

EALC 426  Early Modern Japan  credit: 3 or 4 Hours.
Same as HIST 426. See HIST 426.

EALC 427  Twentieth-Century Japan  credit: 3 or 4 Hours.
Same as HIST 427. See HIST 427.

EALC 428  Japan at War and Peace  credit: 3 or 4 Hours.
Examination of the changing ways the Japanese have imagined war and peace in the twentieth century as documented in novels, memoirs, essays, plays, films, journalism, and other works. Same as CWL 428. 3 undergraduate hours. 3 or 4 graduate hours. Graduate students taking this course for 4 hours credit will be expected to write the same papers as undergraduates. In addition, graduate students will be expected to produce a term paper that will be due at the time of the final exam. Prerequisite: Junior standing or consent of instructor.

EALC 430  Intro to East Asian Ling  credit: 3 or 4 Hours.
Same as LING 430. See LING 430.

EALC 466  Japanese Cinema  credit: 3 or 4 Hours.
Same as MACS 466. See MACS 466.

EALC 469  The Ethnography of Korea  credit: 3 or 4 Hours.
Survey of the English-language anthropological study and representation of Korea, situating this literature topically, historically, theoretically, and methodologically. Same as ANTH 469. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103 or ANTH 230, or EALC 285 or EALC 365 or EALC 367, or consent of instructor.

EALC 475  Discourse&Grammar in EA Langs  credit: 3 or 4 Hours.
Examines how the regularities in language use that we think of as 'grammar' emerge from communicative needs in discourse. Focuses on analysis of grammatical phenomena in East Asian languages. Requires advanced knowledge of Chinese, Japanese, or Korean. 3 undergraduate hours. 4 graduate hours. Prerequisite: LING 430; junior standing or consent of instructor.

EALC 476  Classical Chinese Thought  credit: 3 or 4 Hours.
Inquiry into the major schools of Chinese thought in the Classical Period through the Han (206 B.C. - A.D. 220): Confucianism, Taoism and Legalism. Topics such as the concept of history, military thought and logic will be covered. Readings are in English. Same as CWL 478 and HIST 425. 3 undergraduate hours. 4 graduate hours. Prerequisite: One 200 or 300-level course on Chinese culture or consent of instructor.

EALC 484  Buddhist Meditation  credit: 3 Hours.
Same as REL 484. See REL 484.

EALC 488  History of Chinese Buddhism  credit: 3 or 4 Hours.
Survey of the history of Chinese Buddhism since its introduction; analysis of Budhhological trends and styles; and the sociocultural milieu of Chinese Buddhism and its place in the total history of ideas and lifestyles. Same as REL 488. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: REL 287 or consent of instructor.

EALC 490  Individual Study  credit: 2 to 12 Hours.
Supervised individualized study of a topic not covered by regular course offerings. The topic must be approved by the instructor. 3 to 12 undergraduate hours. 2 to 12 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

EALC 495  Topics in Asian Religions  credit: 3 or 4 Hours.
Same as REL 495. See REL 495.

EALC 500  Proseminar in EALC  credit: 4 Hours.
Interdisciplinary introduction for first-term East Asian Languages and Cultures graduate students to western-language writings on East Asia that have been important to modern scholarship on the region. The proseminar will cover the three cultures of the region in an interdisciplinary fashion, focusing on the methods of various disciplines in their treatment of East Asia. Method refers both to the kinds of materials studies, and the theory and tools used in research.

EALC 501  Seminar in Chinese Art  credit: 4 Hours.
Same as ARTH 501. See ARTH 501.

EALC 520  Problems in Chinese History  credit: 4 Hours.
Same as HIST 520. See HIST 520.
EALC 521  Seminar in Chinese Literature  credit: 4 Hours.
Examination of Chinese literature from a variety of genres and historical periods intended to prepare students for independent work in literary criticism and analysis. Readings include both primary texts and important works of secondary scholarship. Students will produce a term paper based on independent research. May be repeated to a maximum of 8 hours with approval.

EALC 522  Seminar in Chinese History  credit: 4 Hours.
Same as HIST 521. See HIST 521.

EALC 526  Problems in Japanese History  credit: 4 Hours.
Same as HIST 526. See HIST 526.

EALC 527  Seminar in Japanese History  credit: 4 Hours.
Same as HIST 527. See HIST 527.

EALC 531  Seminar in Japanese Lit  credit: 4 Hours.
Examination of Japanese literature from a variety of genres and historical periods designed to prepare advanced students for independent work in literary criticism and analysis. Texts in the vernacular are read and discussed from a variety of critical perspectives. Students produce a term paper based on current scholarship in the field of Japanese literary studies. May be repeated in same or subsequent terms as topics vary to a maximum of 12 hours. Prerequisite: A reading knowledge of Japanese.

EALC 550  Seminar in EALC  credit: 4 Hours.
Seminar on selected topics. Topic varies with instructor. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

EALC 560  East Asian Language Pedagogy  credit: 4 Hours.
Course is for teachers of Japan, Chinese, or Korean language who wish to improve their teaching skills and learn more about second and foreign language acquisition specific to the East Asian Language context. Besides reviewing research on language teaching methodology and curriculum development, students will observe each other conduct practice classes and analyze videotapes of class sessions. Undergraduates may enroll with consent of instructor and the Graduate College. Prerequisite: Native or near-native fluency in Japan, Chinese, or Korean.

EALC 567  Popular Religion in East Asia  credit: 4 Hours.
Same as REL 568. See REL 568.

EALC 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EPSY 563, FR 584, GER 584, ITAL 584, LING 584, PORT 584, and SPAN 584. See SPAN 584.

EALC 588  Sem Second Lang Learn  credit: 4 Hours.
Same as FR 588, GER 588, ITAL 588, LING 588, PORT 588, and SPAN 588. See SPAN 588.

EALC 590  Individual Study and Research  credit: 2 to 12 Hours.
Supervised individual investigation or study of a topic not covered by regular course offerings. The topic selected by the student and the proposed plan of study must be approved by the adviser and the instructor. May be repeated. Prerequisite: Consent of instructor.

EALC 599  Thesis Research  credit: 0 to 16 Hours.
Research and guidance in writing theses for advanced degrees. Approved for S/U grading only. May be repeated to a maximum of 16 hours. Prerequisite: Satisfactory completion of the preliminary examinations.

Earth, Society, & Environment (ESE)

ESE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ESE)

Courses

ESE 103  Earth's Physical Systems  credit: 4 Hours.
Same as GEOG 103. See GEOG 103.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 104  Geology of the National Parks  credit: 3 Hours.
Same as GEOL 104. See GEOL 104.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 106  Geographies of Globalization  credit: 3 Hours.
Same as GEOG 106. See GEOG 106.
This course satisfies the General Education Criteria for: Cultural Studies - Non-West

ESE 111  Emergence of Life  credit: 3 Hours.
Same as GEOL 111. See GEOL 111.
This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

ESE 117  The Oceans  credit: 3 Hours.
Same as GEOL 117. See GEOL 117.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 118  Natural Disasters  credit: 3 Hours.
Same as GEOL 118 and GLBL 118. See GEOL 118.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 120  Severe and Hazardous Weather  credit: 3 Hours.
Same as ATMS 120. See ATMS 120.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 140  Climate and Global Change  credit: 3 Hours.
Same as ATMS 140. See ATMS 140.
This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

ESE 143  History of Life  credit: 3 Hours.
Same as GEOL 143. See GEOL 143.
This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

ESE 170  Nature Religion  credit: 3 Hours.
Same as REL 170. See REL 170.

ESE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Special topics in Earth, Society, and the Environment; content is variable. May be repeated if topics vary.

ESE 200  Earth Systems  credit: 3 Hours.
Interdisciplinary lecture class intended to introduce Earth Systems studies, which focuses on integrating social and natural science approaches to studying the Earth and its environments.

ESE 202  American Environmental History  credit: 3 Hours.
This course satisfies the General Education Criteria for: Humanities - Hist Phil

Cultural Studies - Western

Information listed in this catalog is current as of 04/2018
ESE 208 History of the Earth System  credit: 4 Hours.  
Same as GEO 208. See GEOL 208. 
This course satisfies the General Education Criteria for: Nat Sc Tech - Phys Sciences

ESE 210 Social & Environmental Issues  credit: 3 Hours.  
Same as GEOG 210. See GEOG 210. 
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ESE 215 Resource Conflicts  credit: 3 Hours.  
Same as GEOG 215 and GLBL 215. See GEOG 215. 
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ESE 222 Big Rivers of the World  credit: 3 Hours.  
Same as GEOG 222. See GEOG 222.

ESE 254 American People, Places, & Environments  credit: 3 Hours.  
Same as GEOG 254. See GEOG 254.

ESE 287 Environment and Society  credit: 3 Hours.  
Same as GEOG 287, NRES 287 and PS 273. See NRES 287. 
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci Cultural Studies - Western

ESE 289 Environment & Sustainability Field Study  credit: 1 Hour.  
Group expedition to study environment and sustainability issues at a nearby field site. Includes in-class meetings, student-led presentation, and a field trip that may be short as part of a day or as long as several days. Field trip and field trip fee required. Additional fees may apply. See Class Schedule. Approved for letter and S/U grading. May be repeated in separate terms if topics vary. Prerequisite: For ESE majors, minors, and Sustainability Living Learning Community students. Non majors can apply to the waitlist.

ESE 293 The Anthropocene  credit: 3 Hours.  
Same as ENGL 293. See ENGL 293.

ESE 311 Environmental Issues Today  credit: 3 Hours.  
Seminar exposing students in the Environmental Fellows Program to different disciplinary perspectives on specific environmental issues, as revealed in the scholarly literature. Specific problems will vary from term to term. This seminar helps students make the transition from disciplinary to interdisciplinary thinking. Team-taught. Same as ATMS 311. Prerequisite: Admission to Environmental Fellows Program or consent of advisor.

ESE 320 Water Planet, Water Crisis  credit: 3 Hours.  
Study of the science of water on planet earth, the developing water crisis, and some possible solutions to it. Topics include water’s unique physical and chemical properties; how it profoundly shapes the earth/ocean/atmosphere system; dynamics of oceans, atmosphere, lakes, rivers, groundwater, and ice masses; current fresh water supplies and their distribution on earth relative to population; current and future water crises and the compounding effects of droughts, floods, and global change; and prospects for some technological and economic approaches to easing the crisis. Same as GEOG 370 and GEOL 370.

ESE 333 Earth Materials and the Environment  credit: 4 Hours.  
Same as GEOG 333. See GEOG 333.

ESE 350 Sustainability and the City  credit: 3 Hours.  
Same as GEOG 350. See GEOG 350.

ESE 360 Environmental Writing  credit: 3 Hours.  
Equips students to write about the environment for various audiences, with a focus on specific current efforts to promote sustainability on the Urbana-Champaign campus. We will practice effective techniques for each stage of the writing process—from defining topics, to gathering information, to crafting active, engaging prose. Readings will include models of effective environmental writing and “how to” pieces by experts. Research will include visits to campus sites and student-conducted interviews with subjects. Same as ENGL 360. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition

ESE 379 Intro to GIS Systems  credit: 4 Hours.  
Same as GEOG 379. See GEOG 379.

ESE 380 GIS II: Spatial Prob Solving  credit: 4 Hours.  
Same as GEOG 380. See GEOG 380. 
This course satisfies the General Education Criteria for: Quantitative Reasoning II

ESE 381 Environmental Perspectives  credit: 3 Hours.  
Same as GEOG 381. See GEOG 381.

ESE 386 Arctic Environment & Society  credit: 6 Hours.  
Same as GLBL 386 and SCAN 386. See GLBL 386.

ESE 389 Environment and Sustainability Field Expedition  credit: 3 Hours.  
Group expedition to study environment and sustainability issues at a field site. Includes in-class meetings, student-led presentation, and field trip; expeditions run during spring break, winter break, in mid-May or in intercession; dates depend on location. Field Trip and field trip fee required. Additional fees may apply. See Class Schedule. May be repeated up to 12 hours in separate terms if topics vary.

ESE 401 ESE Capstone  credit: 3 Hours.  
Capstone experience for majors in Earth, Society, and Environment Sustainability. 3 undergraduate hours. No graduate credit. Approved for Letter and S/U grading.

ESE 410 Green Development  credit: 4 Hours.  
Same as GEOG 410. See GEOG 410.

ESE 411 Geomorphology  credit: 4 Hours.  
Same as GEOG 411. See GEOG 411.

ESE 421 Earth Systems Modeling  credit: 4 Hours.  
Same as ATMS 421, GEOG 421, GEOL 481 and NRES 422. See ATMS 421.

ESE 439 Biogeography  credit: 3 Hours.  
Same as ANTH 436, GEOG 436, IB 439, and NRES 441. See IB 439.

ESE 445 Earth Resources Sustainability  credit: 3 Hours.  
Introduces the physical (energy, mineral, and soil) resources of the Earth, the environmental consequences of producing and using resources, the controls on resource supplies, and the alternatives to traditional supplies. Focuses on the geological origin and context of resources, the means of exploration and production, the history of production, and sustainability issues related to consumption and depletion. Provides an understanding of why resources can be scarce and expensive, why many are not renewable, and why their use impacts the Earth System. May include field trips. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ESE 445 and GEOL 380. Prerequisite: Junior standing or higher.

ESE 452 Ecosystem Ecology  credit: 3 Hours.  
Same as IB 452 and NRES 462. See IB 452.
ESE 462 Ecological Criticism credit: 3 or 4 Hours.
Same as CWL 460 and REL 462. See REL 462.

ESE 465 Transp and Sustainability credit: 3 or 4 Hours.
Same as GEOG 465. See GEOG 465.
This course satisfies the General Education Criteria for: Advanced Composition

ESE 466 Environmental Policy credit: 3 or 4 Hours.
Same as GEOG 466. See GEOG 466.

ESE 470 Introduction to Hydrogeology credit: 4 Hours.
Same as GEOL 470. See GEOL 470.

ESE 477 Advanced Environmental Writing credit: 3 Hours.
Same as ENGL 477. See ENGL 477.

ESE 481 Intl Environ Cooperation credit: 3 Hours.
Same as GEOG 481. See GEOG 481.

ESE 482 Challenges of Sustainability credit: 3 Hours.
An interdisciplinary approach to investigating the meaning and practice of sustainability in the contemporary Earth system. As a consequence, students explore the sustainability of crucial resources - water, soil, energy, mineral and the biota - in the context of the social and environmental systems in which these resources are used, including the moral, physical, ecological, political and economic. Same as GEOG 482 and GEOL 483. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior or senior standing, or consent of instructor.

ESE 497 Special Topics in ESE credit: 1 to 4 Hours.
Advanced topics course, consisting of seminar or lectures in subjects not covered by regular course offerings; for advanced undergraduates and graduate students. Possible field study in a prominent geological locality; includes in-class meetings, student-led presentations, and field trip; trips run during spring break, winter break, in mid-end May; dates depend on location. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for letter and S/U grading. May be repeated in the same or separate terms to a maximum of 12 undergraduate hours or 8 graduate hours. Prerequisite: Consent of instructor.

ESE 498 Environmental Writing for Publication credit: 3 Hours.
Provides students with both the experience of the real-world editorial process and with a research product (the published essay) that showcases their professional development as well-informed and persuasive writers on environmental issues. Same as ENGL 498. 3 undergraduate hours. No graduate credit. Prerequisite: Consent of instructor.

Econometrics (ECON)

ECON 101 Introduction to Economics credit: 4 Hours.
General survey of the operation of the economic system; emphasizes the determination of the level of national income, the pricing and allocation of products, and factors of production under existing conditions in the United States. This is an honors course limited to students currently enrolled in the Chancellor's Scholar Program. Credit is not given for ECON 101 if credit has been earned in both ECON 102 and ECON 103. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ECON 102 Microeconomic Principles credit: 3 Hours.
Introduction to the functions of individual decision-makers, both consumers and producers, within the larger economic system. Primary emphasis on the nature and functions of product markets, the theory of the firm under varying conditions of competition and monopoly, and the role of government in prompting efficiency in the economy. Credit is not given for ECON 102 and ACE 100.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ECON 103 Macroeconomic Principles credit: 3 Hours.
Introduction to the theory of determination of total or aggregate income, employment, output, price levels, and the role of money in the economy. Primary emphasis on monetary and fiscal policy, inflation, unemployment, economic growth, and international economics.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ECON 198 Economics at Illinois credit: 1 Hour.
An introductory course intended to help students explore the various fields of economics. Presents brief introductions to various faculty members within the Department of Economics at Illinois and an overview of their respective fields. Enrollment limited to undergraduate Economics majors only. Approved for S/U grading only.

ECON 199 Undergraduate Open Seminar credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

ECON 202 Economic Statistics I credit: 3 Hours.
Introduction of basic concepts in statistics including the presentation of data, descriptive statistics, probability theory, discrete and continuous distributions, sampling distributions, estimation, and hypothesis testing. The approach of the class includes both learning the concepts behind basic statistics and also how to apply these concepts in "real-life" situations. Utilizes a practical project format. To complete the Business Statistics sequence, students must also complete ECON 203. Credit is not given for ECON 202 if credit for a college-level introductory statistics course such as PSYC 235, SOC 280, or STAT 100 has been earned.
Prerequisite: Credit or registration in one of MATH 220, MATH 221, MATH 234.
This course satisfies the General Education Criteria for: Quantitative Reasoning I

ECON 203 Economic Statistics II credit: 3 Hours.
Continuation of ECON 202. Builds upon point and interval estimation as well as hypothesis testing skills first introduced in ECON 202. Utilizes a practical project format to extend the student skill set to include simple and multiple linear regression and time series techniques. Prerequisite: ECON 202, one of MATH 220, MATH 221, MATH 234.

ECON 210 Environmental Economics credit: 3 Hours.
Same as ACE 210, ENV 210, NRES 210, and UP 210. See ACE 210.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

ECON 220 Intl Economic Principles credit: 3 Hours.
Principles-level course in international economics for non-majors. The first half of course, international trade, covers such topics as comparative advantage, protectionism (tariff and nontariff), impact on income distribution, and industrial policies. The second half, international finance, covers topics such as balance of payments, exchange-rate determination, currency crises, dollarization, and macroeconomic policy in an open economy. Issues relating to globalization will be covered in both halves. Prerequisite: ECON 101; or ECON 102 (or ACE 100) and ECON 103. Credit in ECON 220 is not applicable toward graduation in the Economics Major.
ECON 302  Inter Microeconomic Theory  credit: 3 Hours.
Microeconomic analysis including value and distribution theory; analysis
of the pricing of the factors of production integrated in a micro-general
equilibrium context which builds towards explaining the resource
allocation process. Prerequisite: ECON 102 or equivalent. MATH 220,
MATH 221, MATH 234 or equivalent.

ECON 303  Inter Macroeconomic Theory  credit: 3 Hours.
The modern theory of the determination of the level and rate of growth
of income, employment, output, and the price level; discusses alternate
fiscal and monetary policies to facilitate full employment and economic
growth. Prerequisite: ECON 102, ECON 103. Recommended: MATH 125;
one of MATH 220, MATH 221, MATH 234.

ECON 397  Senior Research I  credit: 2 to 4 Hours.
Research and readings course for students majoring in economics;
may be taken by students in the college honors program in partial
fulfillment of the honors requirements. Prerequisite: Cumulative grade-
point average of 3.0 or honors in the junior year, or consent of instructor;
senior standing.

ECON 398  Senior Research II  credit: 2 to 4 Hours.
Research and readings course for students majoring in economics;
may be taken by students in the college honors program in partial
fulfillment of the honors requirements. Prerequisite: Cumulative grade-
point average of 3.0 or honors in the junior year; senior standing.

ECON 399  Undergraduate Open Seminar  credit: 0 to 9 Hours.
Independent study course covering topics not treated by regular
course offerings. This class does not satisfy departmental graduation
requirements. Approved for both letter and S/U grading. May be repeated.
Prerequisite: Junior or senior standing. ECON 101 or equivalent is
recommended. ECON 102 or equivalent is recommended.

ECON 411  Public Sector Economics  credit: 2 to 4 Hours.
Economic analysis of government tax and expenditure policies; topics
include public good and externality theory, public choice theory, income
distribution, cost-benefit analysis, principles of taxation, tax incidence,
economic effects and optimal structures of major taxes, and taxation in
developing economies. 3 undergraduate hours. 2 or 4 graduate hours.
Prerequisite: ECON 302 or consent of instructor.

ECON 414  Urban Economics  credit: 3 or 4 Hours.
Analyzes the urban economy. Topics include: economic reasons for the
existence of cities; the theory of urban spatial structure; the effects of
taxation on housing decisions; the economics of freeway congestion;
economics analysis of local public goods and services; economic
analysis of rent control, slum policies and land-use controls. Same as
FIN 414. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite:
ECON 302.

ECON 420  International Economics  credit: 2 to 4 Hours.
Introduction to the theory of international trade and finance with selected
application to current problems of trade policy; balance of payments
adjustment, the international monetary system, and globalization issues.
3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302 or
equivalent, or consent of instructor; ECON 303 is recommended.

ECON 440  Economics of Labor Markets  credit: 2 to 4 Hours.
Studies the microeconomic determinants of labor demand and supply,
economic effects of unions, and macroeconomic labor market problems.
Same as LER 440. 3 undergraduate hours. 2 or 4 graduate hours.
Prerequisite: ECON 302 or equivalent.

ECON 450  Development Economics  credit: 2 to 4 Hours.
Analyzes the economic problems associated with newly developing
nations; emphasizes their economic structures, their factor scarcities,
and their programs for development. Not open for graduate credit
to graduate candidates in economics. 3 undergraduate hours. 2 or 4
graduate hours. Graduate credit is not given for both ECON 450 and
ECON 550 or ECON 551. Prerequisite: ECON 102 and ECON 103 or
equivalent. ECON 302 strongly recommended.

ECON 451  Program Evaluation in Developing Economies  credit: 3 or 4
Hours.
Advanced economics course on microeconomic issues in developing
countries with particular attention to empirical analyses and
methodologies to address fundamental theoretical and policy relevant
questions. Focus is on topics within health and education, although
papers may cover other topics. An original empirical research paper is
required, applying ideas and concepts covered in class. Class alternates
between lectures (discussing new ideas or concepts and assigned
readings) and lab (applying concepts to actual data using Stata). 3
undergraduate hours. 4 graduate hours. Prerequisite: ECON 203 and
ECON 302 or equivalents; for undergraduate students only: Completion of
Campus Composition I general education requirement. Junior Standing
Required. Priority registration provided to Economics Majors.
This course satisfies the General Education Criteria for:
Advanced Composition

ECON 452  The Latin American Economies  credit: 2 to 4 Hours.
Focuses on the economic history of the region, the recent
industrialization process and its impact, the role of the state and foreign
capital, the impact of the recent privatization processes, inflation and
stabilization policies, and issues surrounding the distribution of income.
Same as ACE 452. 3 undergraduate hours. 2 or 4 graduate hours.
Prerequisite: ECON 102 or ECON 103. ECON 302 or ECON 303 strongly
recommended.

ECON 455  Mathematical Economics  credit: 2 to 4 Hours.
Introduction to game theory with applications to economics; emphasizes
the analysis of static and dynamic games with or without complete
information. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite:
One of MATH 125, MATH 225, MATH 415; MATH 241 or equivalent;
ECON 302.

ECON 462  Macroeconomic Policy  credit: 2 or 3 Hours.
Analyzes current macroeconomic policy issues, problems, and
techniques; discusses various policy techniques including monetary,
fiscal, incomes, and exchange rate policies, and their effectiveness for
treating inflation, unemployment, productivity, resource and exchange
rate problems. May emphasize current issues in developed economies or
in emerging market economies. 3 undergraduate hours. 2 or 3 graduate
hours. Prerequisite: ECON 303 or equivalent.

ECON 465  Mathematical Economics  credit: 2 to 4 Hours.
Exploration of economic decisions under uncertainty. Includes expected
utility theory and non-expected utility theory; applications to individual
decision problems in investment and insurance; general equilibrium in
markets under uncertainty, including problems generated by asymmetric
information; measurement of risk; the value of information obtained
before a decision. 3 or 4 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: ECON 302 or equivalent; one of MATH 220 or MATH 221 or
equivalent.
ECON 471  Intro to Applied Econometrics  credit: 2 to 4 Hours.
Introduction to specification, estimation, prediction and evaluation of econometric models, emphasizing the interplay between statistical theory and economic applications. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 203 or equivalent; ECON 302 or ECON 303.

ECON 480  Industrial Comp and Monopoly  credit: 2 to 4 Hours.
Analyzes the ways firms and markets are organized, how they interact, outcomes of various types of firm behavior and performance of markets, and causes and types of market failure. Particular emphasis on the contribution of game theory as the equilibrium concept in oligopoly settings. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302.

ECON 481  Govt Reg of Economic Activity  credit: 2 to 4 Hours.
Analysis of economic bases, policies, and consequences of government regulation of economic activity. Reasons for government intervention in market behavior, methods of government intervention, and outcomes are studied. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ECON 482  Health Economics  credit: 3 or 4 Hours.
Economic analysis of the health care industry to explain the demand for and supply of medical care. Includes analysis of behavior of consumers, producers, and insurers; and public policies to regulate the industry and to provide services for the poor and elderly. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 302 is recommended.

ECON 483  Econ of Innovation and Tech  credit: 2 to 4 Hours.
Examines the economic factors shaping innovation and technical change since the industrial revolution with emphasis on the economic relationship between science and technology and the role of government in technical change. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 102 or equivalent; ECON 302 or consent of instructor.

ECON 484  Law and Economics  credit: 2 to 4 Hours.
Applications of economic theory to problems and issues in both civil and criminal law and the effect of legal rules on the allocation of resources; includes property rights, liability and negligence assignment, the use of administrative and common law to mitigate market failure, and the logic of private versus public law enforcement. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302 or equivalent.

ECON 490  Topics in Economics  credit: 3 or 4 Hours.
Treatment of special topics in economics. 3 undergraduate hours. 4 graduate hours. May be repeated in the same term to a maximum of 6 undergraduate hours or 8 graduate hours. May be repeated in separate terms to a maximum of 9 undergraduate hours or 8 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ECON 500  Microeconomics  credit: 4 Hours.
Emphasizes microeconomic theory; principal topics include a review of value and distribution theory, the theory of choice by households and firms, general microeconomic theory, and theoretical developments of current interest. Credit is not given for both ECON 500 and ECON 528. Graduate credit for both ECON 302 and ECON 500 is given only upon recommendation of the student's adviser and approval by the Department of Economics. Prerequisite: ECON 102 or equivalent. MSPE Graduate Student Standing.

ECON 501  Macroeconomics  credit: 4 Hours.
Emphasis on macroeconomic theory; principal topics include a review of Keynesian macroeconomic theory, formal growth theory, and selected business cycle theory. Credit is not given for both ECON 501 and ECON 529. Graduate credit for both ECON 303 and ECON 501 is given only upon recommendation of the student's adviser and approval by the Department of Economics. Prerequisite: ECON 102 and ECON 103 or equivalent. MSPE Graduate Student Standing.

ECON 502  Economic Statistics  credit: 4 Hours.
Classical statistics and regression analysis; descriptive statistics, probability and point and interval estimation; decision theory; variance analysis; and linear regression and least-squares estimates. Prerequisite: A course in statistics or consent of instructor. MSPE Graduate Student Standing.

ECON 503  Ecometrics  credit: 4 Hours.
Develops a general methodological basis for searching for quantitative economic knowledge; integrates and gives operational content to the topics of economic, statistical, and econometric theory. Prerequisite: ECON 502, or equivalent. MSPE Graduate Student Standing.

ECON 504  Time Series Analysis in Econ  credit: 4 Hours.
Modern time series analysis techniques for handling economic data which arises in a happenstance fashion through time and their application to specific economic problems. Prerequisite: ECON 503 or STAT 578, or equivalent. MSPE Graduate Student Standing.

ECON 505  Introduction to Game Theory  credit: 4 Hours.
Applications of game theory. Introduction to basic static games and dynamic games with particular attention to applying these games to real world situations. Prerequisite: MATH 415; ECON 500 and ECON 501, or equivalent. MSPE Graduate Student Standing.

ECON 507  Computable G E Modeling  credit: 4 Hours.
Discusses problems and methods of building social accounting matrices and computable general equilibrium (CGE) models; provides hands-on experience with CGE models with a series of PC-based exercises. The exercises demonstrate a number of techniques for constructing CGE models and show applications of these models to a variety of economic policy problems in developing countries such as food subsidies, international trade restrictions, foreign debt, and sectoral investment priorities. Prerequisite: ECON 500 and ECON 501 or equivalent; MATH 220 or MATH 221, or equivalent. MSPE Graduate Student Standing.

ECON 510  Economics of Taxation  credit: 4 Hours.
Theoretical and empirical analysis of the impact of taxation on the economic system; topics include tax equity and excess burden, incentive effects of taxation, tax incidence, structure of major types of taxes (income, consumption, and wealth), normative tax analysis, and taxation in developing economies. Prerequisite: ECON 302 or equivalent. MSPE Graduate Student Standing.

ECON 511  Public Goods Theory  credit: 4 Hours.
In-depth analysis of the theory of public goods; includes public goods and externality theory, public choice, theory of cost-benefit analysis, optimal income redistribution, and fiscal federalism. Prerequisite: ECON 302 or equivalent. MSPE Graduate Student Standing.

ECON 513  International Trade  credit: 4 Hours.
The pure theory of international trade, general equilibrium income and welfare, tariffs, the theory of policy ranking, strategic trade policy, customs unions, international trade law and the WTO. Prerequisite: ECON 302 and ECON 303, or equivalent. MSPE Graduate Student Standing.
ECON 514 International Financial  credit: 4 Hours.
Examines the balance of payments, exchange rate, capital flows and international monetary system; fiscal and monetary policy in open economies. Prerequisite: ECON 302 and ECON 303, or equivalent. MSPE Graduate Student Standing.

ECON 516 Monetary Theory  credit: 4 Hours.
Micro- and macroeconomic theories of the supply of and demand for money; money substitutes and their significance; review of current empirical research; money in closed economy, macroeconomic, and static general equilibrium models; and analysis of inflation and unemployment. Prerequisite: Consent of instructor. MSPE Graduate Student Standing.

ECON 517 Monetary Policy  credit: 4 Hours.
Theories of money; money in dynamic models; money in open economy macroeconomic models; stabilization policy; and international aspects of monetary theory. Prerequisite: Consent of instructor. MSPE Graduate Student Standing.

ECON 519 Development and Growth Policy  credit: 4 Hours.
Review and analysis of the theories and patterns of growth in developed and underdeveloped economies; the process and impact of import substitution industrialization; trade and economic development; the role of the state and privatization in the development process; agricultural stagnation and modernization. Prerequisite: ECON 500 and ECON 501 or consent of instructor. MSPE Graduate Student Standing.

ECON 527 Business International Econ  credit: 4 Hours.
Provides the business student with a working knowledge of the principles of international economics, issues in the current international business environment, U. S. and international trade law, and current policy issues and debates. Considers the basic causes and consequences of international trade, the foreign exchange market and theory of exchange rate determination, the U. S. trade deficit, the international monetary system, and antidumping and countervailing duty law, copyright and patent infringement law, the General Agreement on Tariffs and Trade, the rudiments of strategic trade theory, and selected policy issues varying by year. Prerequisite: Familiarity with intermediate microeconomics at the level of ECON 302.

ECON 528 Microeconomics for Business  credit: 4 Hours.
Microeconomics for professional business students. Shows relevance of value and distribution theories for business managers. Includes demand and supply theory, consumer choice, production and cost theory, industrial structure, and wage and capital theory. Intended for students in the Master of Business Administration program. Credit is not given for both ECON 528 and either ECON 302 or ECON 500. Prerequisite: Enrollment is often restricted to students in specialized programs.

ECON 529 Macroeconomics for Business  credit: 4 Hours.
Development of short run macroeconomic models. Analysis of private sector behavior functions, and government policy alternatives. Extensions for open economy models and growth models. Intended for students in the Master of Business Administration program. Credit is not given for both ECON 529 and either ECON 303 or ECON 501. Prerequisite: Enrollment is often restricted to students in specialized programs.

ECON 530 Microeconomic Theory I  credit: 4 Hours.
Emphasizes microeconomic theory particularly theory of the consumer, theory of the firm, general equilibrium analysis and welfare analysis. Also, covers uncertainty in general equilibrium and informational economics. Prerequisite: ECON 302 and ECON 303 or equivalent.

ECON 531 Macroeconomic Theory I  credit: 4 Hours.
Introduces students to a variety of dynamic general equilibrium models that currently dominate the study of growth and economic fluctuations. These models include: neoclassical growth models, overlapping generations models, CAPM models, search models, and endogenous growth models. In covering these models, the course also seeks to develop a set of techniques for students to use. These techniques include discrete time optimization, continuous time optimization, dynamic programming and model calibration. Prerequisite: ECON 302 and ECON 303, or equivalent; calculus.

ECON 532 Econometric Analysis I  credit: 4 Hours.
Theoretical treatment of economic statistics. Covers probability theory, set theory, asymptotic theory, estimation and hypothesis testing. Prerequisite: A course in statistics or consent of instructor.

ECON 533 Microeconomic Theory II  credit: 4 Hours.
Focuses on information and incentives in economic problems. Topics include non-cooperative games, dynamic games, mechanism design, auctions, matching and networks. Prerequisite: ECON 503, or equivalent; calculus.

ECON 534 Macroeconomic Theory II  credit: 4 Hours.
Development of modern macroeconomic theory, including disequilibrium theory, optimal short-term stabilization measures, and monetary, fiscal, incomes, and exchange rate policies; large-scale econometric models; linear and neoclassical growth models; aggregate distribution theory; money, capital movements, trade, and growth; optimal growth models; and exhaustible resources and growth. Prerequisite: ECON 531.

ECON 535 Econometric Analysis II  credit: 4 Hours.
Part 1: The construction of econometric models; characteristics of models and choice of estimating methods; and estimates of parameters by various methods. Part 2: Bayesian statistics and decision theory. Prerequisite: ECON 532 or equivalent.

ECON 536 Applied Econometrics  credit: 4 Hours.
Focus on specification, estimation, prediction and evaluation of econometric models. Covers instrumental variable estimation, simultaneous equation models, non-linear models, discrete choice models and quantile regression methods. Prerequisite: ECON 532 and ECON 535.

ECON 540 Labor Economics I  credit: 4 Hours.
Survey of recent trends in the labor force, of real and money earnings, and of the distribution of national income used as the basis for a critical economic analysis of contemporary English and American wage theory. Same as LER 540. Prerequisite: ECON 302 and ECON 303.

ECON 541 Labor Economics II  credit: 4 Hours.
Economic issues and implications involved in hours of work, employment and unemployment, and trade union institutionalism (the impact of the trade union upon the basic institution of a free enterprise economy); emphasis in all cases on the development of appropriate public policy. Same as LER 541. Prerequisite: ECON 302 and ECON 303.

ECON 542 Collective Bargaining  credit: 4 Hours.
Same as LER 542. See LER 542.

ECON 543 Workplace Dispute Resolution  credit: 3 or 4 Hours.
Same as LAW 665 and LER 543. See LER 543.

ECON 545 Econ of Ed, Hlth & Hum Capital  credit: 4 Hours.
Same as EOL 518. See EOL 518.

ECON 546 Gen Equ Env Tax Policy  credit: 4 Hours.
Same as FIN 519. See FIN 519.
ECON 530 or equivalent, or instructor's consent.

ECON 572 Political Economy credit: 4 Hours.
ECON 572 Political Economy covers advanced topics in political economy, including economic theory, capital theory, welfare economics, inflation theory, income distribution theory, and other topics. May be repeated. Prerequisite: ECON 533 and capital theory, welfare economics, inflation theory, income distribution theory of central planning, investment theory, consumer behavior theory, capital theory, welfare economics, inflation theory, income distribution theory, or other topics. May be repeated. Prerequisite: ECON 302 or consent of instructor.

ECON 548 Advanced Natural Resource Economics credit: 4 Hours.
ECON 548 Advanced Natural Resource Economics examines the microeconomic theory of urban land-use and spatial structure (static and dynamic models); analyzes externalities caused by traffic congestion; normative and positive analysis of the provision of local public goods; and public policy issues (i.e., slums and urban decline, pollution). Prerequisite: ECON 530 and ECON 533.

ECON 549 Environmental Economics credit: 4 Hours.
ECON 549 Environmental Economics examines both theory and policy applications in the environmental area; selectively reviews the literature to provide a framework for understanding the relevant economic relationships and the criteria appropriate for policy assessment; emphasizes the characteristics of major environmental problems and policy choices; and considers the valuation of environmental amenities and the conflict between environmental quality and growth. Same as ACE 510, ENVS 510, and NRES 510. See ACE 510.

ECON 550 Econ of Development and Growth credit: 4 Hours.
ECON 550 Econ of Development and Growth focuses on theories of economic development and growth. Covers the role of agriculture, trade, manufacturing, human capital, genetics, geography and culture in growth. Prerequisite: ECON 533 and ECON 534, or equivalent.

ECON 551 Topics in Development Econ credit: 4 Hours.
ECON 551 Topics in Development Econ analyzes the newly developing economies, with emphasis on institutional factors affecting development and economic policy relating to development. Prerequisite: ECON 535 or equivalent.

ECON 553 Demand/Supply/Firms/Households credit: 4 Hours.
ECON 553 Demand/Supply/Firms/Households examines the microeconomic theory of urban land-use and spatial structure (static and dynamic models); analyzes externalities caused by traffic congestion; normative and positive analysis of the provision of local public goods; and public policy issues (i.e., slums and urban decline, pollution). Prerequisite: ECON 530 and ECON 533.

ECON 555 Topics in Microeconomics I credit: 4 Hours.
ECON 555 Topics in Microeconomics I studies quantitative techniques useful in economic analysis and decision making; single and systems of difference and differential equations, dynamic programming; Pontryagin maximum principle; interaction of multiplier and accelerator; von Neumann model; Turnpike theorem; growth models; and control systems. Prerequisite: MATH 415; ECON 533 and ECON 534, or equivalent.

ECON 556 Topics in Microeconomics II credit: 4 Hours.
ECON 556 Topics in Microeconomics II analyzes the newly developing economies, with emphasis on institutional factors affecting development and economic policy relating to development. Prerequisite: ECON 535 or equivalent.

ECON 557 Topics in Microeconomics III credit: 4 Hours.
ECON 557 Topics in Microeconomics III studies bounded rationality and learning in economics. Topics include evolutionary learning in models. Prerequisite: MATH 415, ECON 533 and ECON 534 or equivalent.

ECON 562 Topics in Macroeconomics I credit: 4 Hours.
ECON 562 Topics in Macroeconomics I studies quantitative techniques useful in economic analysis and decision making; single and systems of difference and differential equations, dynamic programming; Pontryagin maximum principle; interaction of multiplier and accelerator; von Neumann model; Turnpike theorem; growth models; and control systems. Prerequisite: MATH 415; ECON 533 and ECON 534, or equivalent.

ECON 572 Political Economy credit: 4 Hours.
ECON 572 Political Economy focuses on microeconomic analysis of political decision making processes. Includes social choice, models of political competition, game-theoretic analysis of political institutions and lobbying. Same as PS 548. Prerequisite: ECON 530 or equivalent, or instructor's consent.

ECON 574 Econometrics I credit: 4 Hours.
ECON 574 Econometrics I estimation of parameters for single-equation models; tests of hypotheses and confidence regions for regression models; large-sample theory in single-equation models; and Bayesian statistics in regression models. Prerequisite: MATH 415 and STAT 400.

ECON 575 Econometrics II credit: 4 Hours.
ECON 575 Econometrics II considers the specification of models with systems of simultaneous equations, identification problem, distributed lag models, K-class estimators, maximum likelihood estimators, three-stage least-squares, and effects of specification errors. Prerequisite: ECON 574.

ECON 576 Time Series credit: 4 Hours.
ECON 576 Time Series models and techniques used in the analysis of time series data. Covers univariate and multivariate time series, non-stationary time series, cointegration and error correction, structural breaks and non-linear time series models. Prerequisite: ECON 535 or STAT 578, or equivalent.

ECON 577 Topics in Econometrics credit: 4 Hours.
ECON 577 Topics in Econometrics examines some standard econometric problems from the Bayesian perspective and compares Bayesian and classical inference. Prerequisite: ECON 574.

ECON 578 Large Sample Theory credit: 4 Hours.
ECON 578 Large Sample Theory same as ACE 510, ENVS 510, and NRES 510. See ACE 510.

ECON 580 Industrial Organization credit: 4 Hours.
ECON 580 Industrial Organization theory of the organization of markets and firms, behavior of firms, functioning of competitive systems, and performance of markets.

ECON 581 Govt Regulation of Industry credit: 4 Hours.
ECON 581 Govt Regulation of Industry microeconomic and econometric analyses of market failure and government response in selected industries; topics include economic effect of regulation, bureaucratic behavior, optimal policy, and strategies for regulatory reform. Prerequisite: ECON 530; ECON 580; or consent of Instructor.

ECON 582 Empirical Ind Organization credit: 4 Hours.
ECON 582 Empirical Ind Organization empirical methods in Industrial Organization. Topics include: detection of anticompetitive behavior; estimation techniques that allow for product differentiation, endogenous entry and intertemporal decision-making; estimation and testing of auctions and other asymmetric information models.

ECON 585 Topics in International Econ credit: 4 Hours.
ECON 585 Topics in International Econ frontier advanced topics in international economics; subject matter varies. May not be repeated for credit. Prerequisite: ECON 533 and ECON 534, or consent of instructor.

ECON 590 Individual Study and Research credit: 0 to 4 Hours.
ECON 590 Individual Study and Research directed reading and research. Approved for both letter and S/U grading. May be repeated.

ECON 598 Workshop and Research Seminar credit: 2 Hours.
ECON 598 Workshop and Research Seminar workshops are offered in all areas of specialization in which graduate students are writing Ph.D. dissertations. The specific format varies, but in general workshop sessions include presentations by graduate students of thesis research, by faculty members of their current research, and by occasional outside speakers. Approved for S/U grading only. May be repeated. A minimum of 4 hours of ECON 598 is required of all students in the Ph.D. program. Prerequisite: Admission to the Department of Economics Ph.D. program.

ECON 599 Thesis Research credit: 0 to 16 Hours.
ECON 599 Thesis Research preparation of thesis required of all students writing master's or doctoral theses in economics. Approved for S/U grading only. May be repeated.
EDPOL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EPOL)

Courses

EPOL 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Various special topics. See class schedule for offerings. Approved for Letter and S/U grading. May be repeated in the same or separate terms as topics vary.

EPOL 350 Social Learning and Knowledge credit: 3 Hours.
This course explores how we access and generate knowledge. In formal education, the legacy classroom is also being augmented with technology or replaced entirely with online learning. Across a wide range of domains of knowledge, the traditional separations between knowledge producers (experts or teachers) and knowledge consumers (everyday citizens or students) are undergoing transformation. In this course you will be exposed to the changing landscape of knowledge and learning through a hands-on experience of collaborative knowledge production and learning. Issues and concepts to be addressed include Web 2.0, participatory media, peer-to-peer knowledge networks, 'the commons', informal online learning, and the dynamics of formal e-learning ecologies. This course satisfies the General Education Criteria for:

- Advanced Composition
- Social Beh Sci - Soc Sci

EPOL 550 Methods of Educational Inquiry credit: 4 Hours.
Same as CI 550, EPSY 573, and SPED 550. See CI 550.

EPOL 585 Ethnographic Methods in Educ credit: 4 Hours.
This course focuses on goals, nature, and methodological means of ethnographic research in educational settings broadly defined. Such research aims to describe and, moreover, to understand the ways of living of teachers, students, administrators, parents, and other participants in relevant social spaces. The class will be grounded in the disciplinary perspectives of cultural anthropology, linguistic anthropology, and cultural studies. We will have an ongoing discussion of how one conducts ethnographic research, and all members of the class will conduct their own mini-study. 4 graduate hours. No professional credit.

EPOL 591 Thesis Seminar credit: 4 Hours.
Designed to take students through the entire process of proposal development, this course is intended for masters or doctoral students who are ready to prepare a thesis or dissertation proposal. Students will learn to use a systematic and comprehensive approach to develop the research proposal and how each step in the research process is related. 4 graduate hours. No professional credit.

EPOL 595 Independent Study credit: 1 to 4 Hours.
Offers opportunity and challenge of self-directive, independent study; develops the individual's ability as an independent student and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given term. 1 to 4 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated with approval.

EPOL 599 Thesis Research credit: 0 to 16 Hours.
Individual direction of research and thesis writing. 0 to 16 graduate hours. No professional credit. Approved for S/U grading only. May be repeated with approval.

EDOL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EDOL)

Courses

EDOL 440 Prof Issues for Teachers credit: 1 or 3 Hours.
Provides the basic common understanding of schools as social organizations and the professional role of teachers in public schools; analyzes selected legal issues relating to student rights, employment and teacher rights, and collective bargaining in schools; and serves as an introduction to instructional supervision, teacher evaluation, and continuing professional development of teachers. 3 undergraduate hours. 1 graduate hour. Prerequisite: Admission into a teacher preparation program. 1 hour section requires concurrent enrollment in EDPR 432 or EDPR 442.

EDOL 518 Econ of Ed, Hlth & Hum Capital credit: 4 Hours.
Basic economic analysis of human capital and the value of human time, with applications to the economics of education and health; theory and analysis of consumer investment in human and physical capital over the life cycle; the returns to education and health, and their effects on growth; the theory of nonmarket time; public finance of education and health; and implications for the analysis of the distribution of income. Same as ECON 545. Prerequisite: A course in microeconomic theory and a course in statistics, or consent of instructor.

EDOL 540 Intro to Educational Leadership credit: 4 Hours.
Multiple perspectives for understanding theory and practice in the governance and operation of complex organizations in P-12 school systems. Focuses on leadership development and the changing role of the school leader in leading learning-focused schools dedicated to significant and continuous growth for every student. Prerequisite: Graduate standing in the College of Education or consent of instructor.

EDOL 541 Supervision of Learning Envir credit: 4 Hours.
Methods, theories, and research applying to the supervision and evaluation of classroom practices in learning-centered schools; includes analysis and application of research in effective teaching practices, formative assessment and summative evaluation, data collection techniques, and professional development. Prerequisite: EDOL 540 or consent of instructor.

EDOL 542 Leading Learning-Centrd Schls credit: 4 Hours.
Provides an overview and analysis of the administrative, supervisory, and leadership functions of building-level administrators; emphasizes the design and implementation of effective educational programs on a school-wide basis; analyzes administrative tasks and processes that focus on learning-centered schools. Prerequisite: EDOL 540 or consent of instructor.

EDOL 543 Leading School Improvement credit: 4 Hours.
Study of major ideas on school improvement, past and present, and of emerging research on the condition of public education in the United States. In-depth examination of reform proposals for changing the organization of schools, the instructional program, and the roles of students, teachers, and school administrators. Prerequisite: Graduate standing in the College of Education or consent of instructor.

Information listed in this catalog is current as of 04/2018
EOL 544 Leading Improvement and Innovation credit: 4 Hours.
In-depth examination of leadership competencies and skills required for the public school superintendent to successfully lead, innovate, and manage complex educational organizations. Analysis of research and evidenced-based practices that focus on learning, building organizational capacity, strategic design, and ensuring equity and excellence for all learners. Emphasis placed on preparing individuals to effectively lead socially just organizations that ensure high quality learning. 4 graduate hours. No professional credit. Prerequisite: Students must be admitted to the EOL Superintendent Endorsement program or consent of instructor.

EOL 546 Public School Finance credit: 4 Hours.
Study of financing public education systems in the United States; focuses on the social, economic, political, legal, and technical dimensions of developing school finance policy for federal, state, and local governments; relates theory and research in public school finance to administrative practice in budgeting and financial administration. Prerequisite: Graduate standing in the College of Education or consent of instructor.

EOL 547 Education Law credit: 4 Hours.
Examines the range of federal and state constitutional and statutory sources that apply to the constituents (pupils, parents, teachers, administrators, and board members) engaged in public schools. Emphasizes development of legal analytical skills. Prerequisite: Graduate standing in the College of Education or consent of instructor.

EOL 548 Poli & Cultural Context of Ed credit: 4 Hours.
The political and social environment of public education in the United States; analysis of the power structure and its influence on educational policy making at the district level; examination of the evolving roles of state and federal agencies, the courts, private organizations, and interest groups in school governance. Studies the tension between the ideal of a democratically controlled public school system and the growing power of educational experts. Prerequisite: Graduate standing in the College of Education or consent of instructor.

EOL 549 Organizational Theory for Educational Leaders credit: 4 Hours.
Study of theoretical perspectives and empirical research drawn from the social sciences relating to educational organizations and administrative leadership with an emphasis on application of theory to practice. Prerequisite: Student must be admitted to the EOL Superintendent Endorsement program or consent of instructor.

EOL 550 Ed Ldrshp & Prof Development credit: 4 Hours.
Study of major issues on educational leadership and professional development. Examination of research, theories, and practices pertaining to: professional development purposes, context, content, policies, and processes; fostering and sustaining quality professional development; and the roles of teachers, school administrators and policy analysts. Prerequisite: EOL 540 or consent of instructor.

EOL 560 Clinical Experience Admin credit: 0 to 12 Hours.
Direct experience in the study of educational problems of concern to administrators; features an action component whereby the student is provided with opportunities for assuming responsibility for decision making in a live or simulated setting; each student works under the supervision of a professor, and where possible and appropriate, a practicing administrator. Approved for S/U grading only. May be repeated to a maximum of 12 hours, no more than 4 hours earned at the master's level. Prerequisite: Students must be admitted to the EOL General Administrative or Superintendent Endorsement program and must have completed at least four EOL required courses, or consent of instructor.

EOL 561 Ed Politics and Policies credit: 4 Hours.
Examines the legislative and political processes in the formulation of current federal and state educational policies, together with the evaluation of policy and the formulation of policy alternatives. Prerequisite: EOL 548 or consent of instructor.

EOL 562 Law and School District Leader credit: 4 Hours.
Advanced study of public school law, addressing legal and fiscal policy issues related to effective management of public school districts. In-depth analysis of federal and state statutes, with an emphasis on recent court decisions and legal trends; emphasizes development of legal analytical skills. 4 graduate hours. No professional credit. Prerequisite: EOL 547 or consent of instructor.

EOL 563 The School Superintendent credit: 4 Hours.
Course examines the legal and fiscal responsibilities of school superintendents, the relationship of superintendents with school boards and employee groups, the importance of public relations and partnerships with community stakeholders, the process for selecting superintendents, and the effect of the position on individuals. Prerequisite: Students must be admitted to the EOL Superintendent Endorsement program or consent of instructor.

EOL 564 District Change for Equity and Social Justice credit: 4 Hours.
Critical examination of democratic principles of education, especially as it pertains to equity and social justice. Addresses the fundamental question of "Who gets access to the fundamental right of education and how?" Application of theories and concepts to the role of district leaders in implementing socially just educational settings. 4 graduate hours. No professional credit. Prerequisite: EOL 548 or consent of instructor.

EOL 565 Human Resource Management credit: 4 Hours.
Principles, problems, and trends in the administration of professional public school personnel; organization of personnel; the legal framework of the personnel function; selection, evaluation and development of staff; collective bargaining, contract administration and personnel policy; and the personnel administrator's role as a catalyst for school improvement. Prerequisite: EOL 547 or consent of instructor.

EOL 566 School District Financial Management credit: 4 Hours.
Analysis of how public schools are managed, including the theory and managerial practices necessary to oversee the functioning of a school district; study of the integration of managerial issues with attendant conditions of school board functioning, priority and educational goal-setting, taxation, capital outlay, debt management, and contractual implementation. Emphasis placed on principles and practices relating to public school financial management, including budgeting and accounting systems. 4 graduate hours. No professional credit. Prerequisite: EOL 546 or consent of instructor.

EOL 567 Program Planning & Evaluation credit: 4 Hours.
Prerequisite: EOL 540 or equivalent or consent of instructor. Open only to persons who have been admitted to doctoral study in the Department of Educational Organization and Leadership.

EOL 568 Diversity, Leadership & Policy credit: 4 Hours.
This course is intended to provide students with an opportunity to study both historical and contemporary perspectives on leadership and policy in diverse contexts and to prompt reflection on their own practice. As students read, discuss, reflect on, and critique a variety of perspectives and topics such as race, class, power, cultural leadership, policy, change, diversity, and building community, they will consider how the literature informs the development of a personal philosophy of education leadership, takes into consideration moral and ethical issues, the implementation of educational policy, the purposes and nature of the task, and the complexity and diversity of educational contexts.
EOL 570 Organization of Higher Ed  credit: 4 Hours.
Examination of American higher education both as a system and as a field of study. Includes consideration of organizational patterns, stakeholders, governance, and the purposes of higher education.

EOL 571 Foundation of Higher Edu  credit: 4 Hours.
Examination of the development of American higher education, including the evolution of its forms, purposes, practices, leadership, and constituents.

EOL 572 The College Student  credit: 4 Hours.
Study of the characteristics and development of college students, the institutional contexts in which they operate, and the interaction of students with the college environment.

EOL 573 The Community College  credit: 4 Hours.
Community and technical colleges; their purposes, function, and objectives; social forces related to their development and evaluation; characteristics and needs of students; educational programs and teaching strategies; and organization, control, and financing. Same as HRD 501.

EOL 574 Diversity in Higher Education  credit: 4 Hours.
Explores critical topics and issues related to diversity in higher education, including race/ethnicity, class, and gender. Covers current research that explores diversity in higher education, institutional diversity policies and organizational behaviors, campus constituents, and the role of external groups. The course consists of reading, in-class discussion, group exercise, and completing a research project that is of interest to the student.

EOL 576 Higher Education Finance  credit: 4 Hours.
Explores the foundations of higher education finance by analyzing key theories, structures, and challenges of college and university financing. Students will examine readings, present papers and actively participate in class discussions, so as to better comprehend the financial complexities dictating current institutional policies and practices. Prerequisite: EOL 571.

EOL 577 Public Policy in Higher Ed  credit: 4 Hours.
Intended primarily for doctoral students in higher education, this course will enable students to analyze contemporary public policy issues confronting American higher education. Selected policy issues will be probed in depth, drawing upon scholarly sources and public reports. Students will comprehend the interaction and tension among higher education leaders, and local, state, and federal policymakers. Prerequisite: EOL 571 or consent of instructor.

EOL 578 Higher Education Law  credit: 4 Hours.
Provides graduate students with core knowledge of the law affecting the administration of colleges and universities. Students become versed in legal issues to enhance administrative effectiveness and to address legal issues that confront the administrator in the operation of an institution of higher education. Importantly, the course does not aspire to invest the student with legal knowledge sufficient to operate without advice of professional legal counsel. Prerequisite: EOL 571.

EOL 579 Access to Higher Education  credit: 4 Hours.
Same as EPS 579. See EPS 579.

EOL 580 Critical Issues in Higher Ed  credit: 4 Hours.
The examination of critical trends that impact higher education from various perspectives, including legal, organizational, and political. May be repeated to a maximum of 8 hours.

EOL 582 College Student Development  credit: 4 Hours.
Provides students with an understanding of theories and research involving the cognitive, intrapersonal and interpersonal development of college students. Special attention is paid to the application of student development research in educational settings and the intentional creation of educational environments along developmental principles. Prerequisite: EOL 572 or consent of instructor.

EOL 583 Student Affairs Admin  credit: 4 Hours.
Theory, research, and practice of student affairs administration, including philosophical foundations, management, professional development and organizational issues.

EOL 584 Administration in Higher Ed  credit: 4 Hours.
Designed for students to gain a greater understanding of administrative leadership in higher education. Provides current and future administrators an opportunity to explore foundational theories of academic organization and leadership; investigate contemporary leadership issues within various contexts; and develop analytical skills which connect theoretical frameworks to leadership practice and research.

EOL 585 College Teaching  credit: 4 Hours.
Scholarly approach to curriculum and pedagogy at the college level: instructional methods, active and cooperative learning, technology-enhanced teaching, evaluation and assessment, faculty roles and responsibilities. 4 graduate hours. No professional credit.

EOL 586 Changing College Curriculum  credit: 4 Hours.
Examines the historical roots, contemporary controversies, current trends, and possible futures of the curriculum in American postsecondary education. It is a graduate seminar built on small group discussions and conversations about important literature on the changing college curriculum. Increases student understanding of historical and contemporary curricular issues in higher education with the additional goal of fostering the consideration of the possibilities of challenges to enacting curricular change. Prerequisite: EOL 571 or consent of instructor.

EOL 587 Quality Process Improvement  credit: 4 Hours.
Same as HRD 531. See HRD 531.

EOL 588 Capstone Experience I & II  credit: 2 Hours.
Part I is the design of a research study (capstone project) that integrates literature covered in the degree program leading to a research question to be explored empirically. It includes literature review, problem statement, research design, methodology, identifying participants, IRB review and a final proposal paper. Students are expected to collect data for their study (project) between Parts I and II. Part II topics include data analysis, interpretation, discussion, implications, dissemination of findings, and future research. Leads to a final research (capstone) paper that synthesizes work from Part I and adds to it through data analysis, discussion of findings, implications, and ways to disseminate findings to relevant audiences. Approved for both letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours.

EOL 589 Internship in Higher Ed  credit: 2 or 4 Hours.
Supervised direct experience in the administration of higher education. With the aid of the faculty, students select the internship relevant to their career goals. 2 or 4 graduate hours. No professional credit. Approved for S/U grading only. May be repeated to a maximum of 8 hours; no more than 8 hours may be earned toward an advanced degree. Prerequisite: Consent of instructor.
EOL 590 Advanced Seminar  credit: 0 to 8 Hours.
Open only to persons who have been admitted for doctoral study in the Department of Educational Organization and Leadership. Prerequisite: Consent of instructor.

EOL 598 Thesis Seminar  credit: 4 to 8 Hours.
Assists doctoral candidates in planning field studies and thesis problems; students are expected to present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze all presentations critically. Approved for S/U grading only. Prerequisite: Consent of instructor.

Education (EDUC)
EDUC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EDUC)

Courses
EDUC 101 Education Orientation Seminar  credit: 1 Hour.
Informational orientation seminar for Education majors to enhance their understanding of college life and the field of education as a profession.

EDUC 102 Freshman Honors Seminar  credit: 1 Hour.
Provides an introduction to critical issues in education with focus on selected contemporary issues in the field; emphasis is on critical analysis and reflection on relationships between teachers, schools, and society.

EDUC 201 Identity and Difference in Edu  credit: 3 Hours.
Focuses on the role of identity in schooling and the way in which identity is socially constructed. Examine how power and privilege impact equity and opportunities based on socially constructed identities such as race, social class, gender, sexual identity, language, (dis)ability, and nationalism. Explore asset-based frameworks that are identity affirming and counter deficit-based perspectives. This course is designed for students interested in reflecting on their own experiences as learners by critically examining their socially constructed identities and "ways of knowing" and the societal implications of these experiences. It is also for those considering careers in teaching, and anyone interested in reflecting on how issues of inclusion, exclusion, power, and privilege play out in education. (Graduate candidates may take this course or approved graduate-level College of Education Educational Policy Studies Foundations Requirement course; undergraduates may take this or program-approved equivalent coursework).
This course satisfies the General Education Criteria for: Cultural Studies - US Minority

EDUC 202 Social Justice Sch & Society  credit: 3 Hours.
Examines the nature of justice and the dynamics of a pluralistic society to derive a conception of social justice. Working with this conception, it asks how schools function to perpetuate and/or remediate social injustice. The course will consider the history and nature of schooling, issues of access and tracking, and notions of the public and the common. The course is designed for students interested in reflecting on their own educational histories, for those considering careers in teaching, and for all future parents and citizens needing to be able to reflect critically on justice, school, and society. (Graduate candidates may take this course or approved graduate-level College of Education Educational Policy Studies Foundation Requirement course; undergraduates may take this or program-approved equivalent coursework).
This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil

EDUC 499 Education Abroad  credit: 0 to 4 Hours.
This course will serve as a foundation for your education abroad experience. The class will center on the experience of travel as it relates to education - your own education, the education systems and policies you encounter, as well as your prospective role as a future educator. This course will introduce comparative education inquiry and provide space to consider the cultural, political, and ethical implications of engaging in education travel and research in cross-cultural, global contexts. 0 to 3 undergraduate hours. 0 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated if topics vary.

Educational Policy Studies (EPS)
EPS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EPS)

Courses
EPS 201 Foundations of Education  credit: 3 Hours.
Studies some of the problems of formulating and justifying aims and policies in American education, of designing and systematizing the curriculum, of organization and social context of the public school system, and of the teaching-learning process; examined in terms of perspectives provided by social philosophy, history, sociology, and philosophy of education.

EPS 202 Foundations of Education-ACP  credit: 4 Hours.
Course is identical to EPS 201 except for the additional writing component. Credit is not given for both EPS 202 and EPS 201. Prerequisite: Completion of campus Composition I general education requirement.
This course satisfies the General Education Criteria for: Advanced Composition

EPS 310 Race and Cultural Diversity  credit: 4 Hours.
Study of race and cultural diversity from Colonial era to present; the evolution of racial ideology in an ethnically heterogeneous society; the impact of race on the structures and operations of fundamental social institutions; the role of race in contemporary politics and popular culture. Same as AAS 310, AFRO 310, and LLS 310. Prerequisite: Completion of campus Composition I general education requirement.
This course satisfies the General Education Criteria for: Advanced Composition Cultural Studies - US Minority

EPS 325 Social Media and Global Change  credit: 3 Hours.
Social media is a new frontier of politics, religion, commerce, courtship, and education. It has altered an array of social relations from statecraft to sex. The course draws on case studies from across the globe to explore the wide-ranging transformation taking place, from how people organize mass uprisings, to ways the mange the most intimate details of their lives. Examples will be taken from the Middle East, East Asia, Africa, Latin America, the US and Europe. Same as AFST 325, ASST 325, EURO 325, INFO 325, LAST 325, REES 325, and SAME 325.

EPS 380 Education and Social Justice  credit: 3 Hours.
This class will introduce students to key definitions, theories, and practices of justice in education. Using a combination of philosophical and political theory-based analyses of the features of justice: fairness, equity, representation, responsibility, and difference, among others, readings invite students to consider how education and schooling can help to nurture democratic ties and equity. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - US Minority
EPS 390  Undergraduate Advanced Seminar  credit: 0 to 9 Hours.
Advanced undergraduate seminar that builds upon introductory work in EPS 410 and includes historical, philosophical, legal, and social science perspectives on education. Requests for activation of this course may come from students or faculty. Approved for letter and S/U grading. May be repeated.

EPS 391  Thesis  credit: 2 Hours.
Prerequisite: Senior standing.

EPS 395  Independent Study  credit: 2 Hours.
Designed for students who wish to do advanced readings and research in greater depth and to investigate further ideas and themes that have been explored in EPS 199 and EPS 201. Prerequisite: EPS 201; and consent of adviser and staff member who supervises the work.

EPS 399  Education and Social Justice  credit: 3 Hours.
This class will introduce student to key definitions, theories, and practices of justice in education. Using a combination of philosophical and political theory-based analyses of the features of justice: fairness, equity, representation, responsibility, and difference, among others, readings invite students to consider how education and schooling can help to nurture democratic ties and equity.

EPS 400  History of American Education  credit: 2 to 4 Hours.
Development of American education in relation to political, social, and cultural developments; attention to the influence of movements in the cultural environment upon evolving conceptions of educational theory and practice. 3 undergraduate hours. 2 or 4 graduate hours.

EPS 401  History of Educational Ideas  credit: 2 to 4 Hours.
Studies selected educational theorists and intellectual movements; provides familiarity with the major educational ideas of the past and historical perspectives on current issues and problems in education; and critical readings of such authors as Aristotle, Plato, Quintilian, St. Augustine, Loyola, Comenius, Rousseau, Pestalozzi, Froebel, Herbart, and Dewey. 3 undergraduate hours. 2 or 4 graduate hours.

EPS 402  Asian American Education  credit: 4 Hours.
Examination and analysis of Asian American education from the late 1800’s to the present. Same as AAS 402. 4 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

EPS 403  European Education to 1600  credit: 2 to 4 Hours.
Cultural history of western European educational practice with special focus on Classical Greece, the Hellenistic world, Rome, early Christianity, the middle ages, the twelfth century renaissance, scholasticism and the fourteenth century renaissance. Same as HIST 444 and MDVL 403. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

EPS 404  European Education since 1600  credit: 2 to 4 Hours.
Cultural history of western European educational practice with special focus on the fifteenth century renaissance, the Reformation and Counter-reformation, Enlightenment, and 19th century national schooling systems in Germany, France, and England. Same as HIST 457. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

EPS 405  Historical & Social Barriers  credit: 3 or 4 Hours.
Examines the relationship between ability, race, class, and gender to citizenship and schooling. Particular emphasis is placed on how the construction of “citizenship” has been used as a tool to further deny equal participation in the public sphere such as schools. To that end, an application of historical understanding of social barriers to educational access is analyzed from the Colonial period to the present. 3 undergraduate hours. 4 graduate hours. May be repeated for 4 graduate hours.

EPS 410  Professional Ethics in Education  credit: 3 or 4 Hours.
Philosophical examination of selected educational issues; conveys a grasp of the complexities of the issues and some philosophical methods for dealing with them. 3 undergraduate hours. 4 graduate hours.

EPS 411  School and Society  credit: 2 to 4 Hours.
Analyzes normative and conceptual aspects of the interrelationship of school and society, and of reciprocal influences between schools and major social trends and forces. 2 to 4 undergraduate hours. 2 to 4 graduate hours. 3 credit hour section is approved for B.S. in Learning and Education Studies.

EPS 412  Critical Thinking for Teachers  credit: 2 to 4 Hours.
Examination of critical thinking dispositions and abilities as an approach to the foundations of knowledge and structure of thinking in subject-matter areas. 2 to 4 undergraduate hours. 2 to 4 graduate hours.

EPS 413  Aesthetic Education  credit: 3 or 4 Hours.
Theoretical introduction to the problems involved in teaching critical appreciation of the arts; examines materials from aesthetics, art history, and criticism for their relevance to the problems of aims, curriculum, organization, and teaching-learning. 3 undergraduate hours. 4 graduate hours.

EPS 415  Technology & Educational Reform  credit: 3 or 4 Hours.
Examines the normative and policy issues raised by the use of new information and communication technologies in education. The course is interdisciplinary, drawing from social and historical as well as philosophical perspectives on these issues. 3 undergraduate hours. 4 graduate hours.

EPS 420  Sociology of Education  credit: 2 to 4 Hours.
Education as a social process in various cultures and historical periods, emphasizing current systems in Westernized countries. Same as SOC 420. 3 undergraduate hours. 2 or 4 graduate hours. Differential credit will be based on additional assignments and requirements as specified by instructor. Prerequisite: SOC 100; or six hours of anthropology, social geography, political science, or sociology.
EPS 421  Racial and Ethnic Families  credit: 2 to 4 Hours.
Graduate-level sociological examination of how gender, race, ethnicity, cultural diversity and class function in the development of diverse American families, which are important foundations of education. Primary attention will be given to African American and Hispanic families. Secondary attention will be given to Asian American, Native American and other racial and ethnic family groups. Same as AFRO 421, HDFS 424, and SOC 421. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: SOC 100, a 200-level SOC course, or consent of instructor.

EPS 422  Race, Educational Policy, and Sociology  credit: 3 or 4 Hours.
Same as SOC 426. See SOC 426.

EPS 423  Politics of Education  credit: 3 or 4 Hours.
Overview of the political structure and processes through which many of the major issues in education are treated; analyzes nature of the policymaking process in education and discusses the roles of principal participants in the process of educational decision making, but focuses on fundamental recurring issues in education and the ways these issues have been resolved or not resolved by the overall system. Particular attention to the role that both the federal and state judiciary as well as legislative authority have had in shaping educational policy. 3 undergraduate hours. 4 graduate hours.

EPS 424  Economics of Education  credit: 2 to 4 Hours.
Introduction to economic concepts and their application to education, including investment and consumption theories of education and the role of human capital in economic growth and development; cost-benefit analyses in education, education and the distribution of income, and manpower and educational planning. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Consent of instructor.

EPS 425  Anthropology of Education  credit: 2 or 4 Hours.
This seminar considers how sociocultural anthropology has approached the study of education. Readings include ethnographies of schooling as well as works which consider how schooling is implicated in modernist projects of social improvement, the politics of cultural pluralism in nation states, and the spread of neoliberalism. Same as ANTH 425 and EPSY 466. 2 or 4 undergraduate hours. 2 or 4 graduate hours.

EPS 426  Comparative Education  credit: 2 to 4 Hours.
Introduction to the cross-cultural, cross-national study of educational institutions and their relationship to society. Topics may vary. 3 undergraduate hours. 2 or 4 graduate hours.

EPS 427  Philosophy of Middle School  credit: 2 Hours.
This course is intended as an introduction to the philosophical, social, and cultural foundations of middle level education. 2 undergraduate hours. 2 graduate hours.

EPS 431  New Learning  credit: 3 or 4 Hours.
Education is in a state of flux - transitioning from traditional architectures and practices to new ecologies of teaching and learning influenced by the tremendous social and technological change of our times. What changes are afoot today in workplaces, civic life and everyday community life? What are their implications for education? What are the possible impacts of contemporary social transformations on teaching and learning - including in the areas of technology, media, globalization, diversity, changing forms of work in the "knowledge society", and, in these contexts, changing learner needs and sensibilities? This course explores three pedagogical paradigms: "didactic", "authentic" and "transformative" learning. It takes a historical perspective in order to define the contemporary dimensions of what we term "new learning". It prepares participants to make purposeful choices and link particular theories/instructional approaches to individual and group learning goals. 3 undergraduate hours. 4 graduate hours. Prerequisite: For graduate credit only, acceptance into the Master of Education with an emphasis on New Learning and New Literacies program is required.

EPS 481  History of Amer Indian Educ  credit: 3 or 4 Hours.
Same as AIS 481. See AIS 481.

EPS 500  Topics in Educational Policy  credit: 2 to 4 Hours.
Seminar on topics not treated by regularly scheduled courses; requests for initiation may be made by students or faculty members. May be repeated to a maximum of 8 hours.

EPS 501  History of U.S. Ed Thought  credit: 4 Hours.
Studies the evolution of educational theories and philosophies since the eighteenth century; particular reference to their impact upon educational developments in the United States; a broad view of the general growth of American educational thought; and attention to selected major educational theorists, or schools of thought, exploration of their fundamental ideas, and the relation of these ideas to significant intellectual currents in American culture. Prerequisite: Consent of instructor.

EPS 502  Education in the 20th Century  credit: 4 Hours.
Historical study of significant educational trends during the past sixty years, with special reference to their influence on American education; an analytical examination of the principal transition movements in the last decade of the nineteenth century and of efforts to solve the problems since 1900.

EPS 503  Seminar in the History of Ed  credit: 4 Hours.
Intensive group study of a small number of selected problems to assist individual students to develop an understanding of and the ability to use the techniques of historical research in furthering such study; problems studied are selected in the light of the interests and previous training of the group of students enrolled. Prerequisite: Two courses in the history of education or consent of instructor.

EPS 506  Ubiquitous Learning  credit: 4 Hours.
This course explores the dynamics of learning using mobile computing devices, broadly defined to range from mobile phones, tablets and laptops to interesting new possibilities raised by emerging technologies such as wearable devices and a potentially pervasive "internet of things". Our journey will take us through museums, galleries and parks - real and virtual. We will visit new media and gaming spaces in which either incidental or explicit learning is taking place. We will look at sites of informal as well as formal learning - extraordinary classrooms offering blended learning opportunities, as well as new forms and modes of out-of-school and self-directed learning. 4 graduate hours. No professional credit.
EPS 508 Uses/Abuses of Educ Research credit: 4 Hours.
This course aims at comprehensive research literacy by considering educational research in historical, philosophical, policy and political context. Through close reading and quantitative, qualitative, and humanistic studies, the discussion of interdisciplinary perspectives on the research process, students learn to engage intelligently with multiple modes of research and deal critically with policies claiming an evidentiary warrant. Specific topics include: the relationship between research, policy, and practice; the nature of theory and method, argument and evidence in the humanities and social sciences; the tensions between advocacy and research.

EPS 510 Traditions in Philosophy of Ed credit: 4 Hours.
Analyzes major trends and primary sources in philosophy of education, drawing mainly from the 20th century. Movements covered will include pragmatism, concept analysis, phenomenology, feminism, and Marxism/Critical theory. This course is required of all Philosophy of Education graduate students. Prerequisite: An appropriate 300- and 400-level coursework in philosophy, philosophy of education, or consent of the instructor.

EPS 511 Contemporary Philosophy of Ed credit: 4 Hours.
Examines exemplary current work in the field, covering a range of contrasting philosophical issues and approaches. The course goal is to provide familiarity with notable contemporary authors from a variety of perspectives. Prerequisite: Coursework in philosophy or philosophy of education, or consent of instructor.

EPS 512 Advanced Topics in Philosophy of Education credit: 4 Hours.
Reading and group discussion of a limited number of the most important writings in educational philosophy which have had a profound influence on the progress of educational thought and practice. 4 graduate hours. No professional credit. Prerequisite: EPS 401 or equivalent; consent of instructor.

EPS 515 Philosophy and Ed Research credit: 4 Hours.
Examines some crucial assumptions and concepts of contemporary research in education from the point of view both of the consumer and the practitioner of educational research. Topics include paradigm conflicts, causal attributions in social science, assessment, ethical problems in the conduct of research, and the assumptions of quantitative research. Prerequisite: Coursework in philosophy or philosophy of education, or consent of instructor.

EPS 516 Social Theories and Education credit: 4 Hours.
Examines philosophical issues in social and political theory as they pertain to educational problems. The course includes topics such as autonomy, democratic education, educational reform, and social change. Prerequisite: Coursework in philosophy or philosophy of education, or consent of instructor.

EPS 517 Case Studies Professional Ethics & Education credit: 4 Hours.
Examines issues in moral philosophy as they pertain to education. Topics include current theories of moral education, ethical problems in teaching, or topics of moral dispute in educational policy. 4 graduate hours. No professional credit. Prerequisite: Coursework in philosophy or philosophy of education, or consent of instructor.

EPS 518 Philosophical Issues in Technology and Education credit: 4 Hours.
Examines philosophical issues in the construction, justification and transmission of knowledge, as they pertain to educational processes. 4 graduate hours. No professional credit. Prerequisite: Coursework in philosophy or philosophy of education, or consent of instructor.

EPS 520 Foundations of Aesthetic Ed credit: 4 Hours.
Philosophical approach to the problems of teaching for appreciation in formal education; appraisal of the status of aesthetic education, its nature and function, and its relation to other types of education. Prerequisite: EPS 413 or equivalent.

EPS 522 Ethical Dimensions in Educational Leadership credit: 4 Hours.
Designed to prepare students to analyze ethical issues involved in educational policy making, policy administration, and policy evaluation; includes topics such as educational equity, privacy, due process, and compliance; draws upon multiple disciplines to analyze issues developed out of practice. 4 graduate hours. No professional credit. Prerequisite: Open to students who have fulfilled their social foundations requirements and other students with consent of instructor.

EPS 525 Pedagogy and Equity credit: 4 Hours.
This course examines the link between equity and pedagogies, analyzing intersectional pedagogies, such as feminist, critical, multicultural, race, and queer approaches, and their implications for practices of learning, teaching, community, understanding, and other key concepts. In addition to engagement with theories aimed at education equity, this course involves practical examination of pedagogical techniques and strategies. Students will develop pedagogical projects using the insights from theory and collaborate in critiques of those projects. 4 graduate hours. No professional credit. Prerequisite: For majors only.

EPS 529 Education and Human Rights credit: 4 Hours.
Introduces students to varieties of definitions of citizenship - ranging from nation-specific practices and obligations to human rights-based global citizenship - and their relationship to globalized education and public problem solving. Readings include canonical texts on political organization and responsibilities as well as contemporary theories discussing transnational, local, and cosmopolitan citizenship. Also covers the challenges and promises of diversity, statelessness and non-citizenship participation, particularly in educational concerns but also more broadly. 4 graduate hours. No professional credit.

EPS 530 Education and Globalization credit: 4 Hours.
Analyzes of the role and functions of education in social, political, and economic development, with particular reference to the new and the developing countries. Prerequisite: Consent of instructor.

EPS 531 Critical Race Theory & Educ credit: 4 Hours.
Focuses on critical race theory as a critique of racism and the law in U.S. society and discusses its current applications to education policy and research in K-12 schooling and higher education. Also looks at how critical race theory can be used as a methodological lens for policy analysis and educational research.

EPS 532 Knowledge, Learning & Pedagogy credit: 4 Hours.
Investigates a variety of pedagogical paradigms, including didactic, authentic and transformative pedagogies. Develops the concept of a pedagogical repertoire, as a way of interpreting the ways in which learners engage in a variety of 'knowledge processes" or task types. The course introduces major philosophies or theories of knowledge. As a counterpoint, it also reflects on the practicalities of learning knowledge-making in informal as well as consciously designed learning environments. Prerequisite: Acceptance into the Master of Education with an emphasis on New Learning and New Literacies program.
EPS 533  Global Youth & Citizenship  credit: 4 Hours.
Discussess youth and citizenship in a global context. Covers the social construction of children and youth, the sociology of global generations, education and social media, and new youth movements in the digital age. Draws on a diversity of case studies from North America, the Middle East and North Africa, sub-Saharan Africa, Europe and Latin America.

EPS 534  Ed. & Power in Middle East  credit: 4 Hours.
Survey of education in Middle East and North Africa from the nineteenth century to the present. Course deals with education in relation to colonialism, nationalism, economic development, imperialism, war and geopolitics, youth politics, Islam, and Arab uprisings. Takes a multidisciplinary perspective that draws on social history, anthropology, sociology, political economy, gender studies and international development.

EPS 535  Assessment for Learning  credit: 4 Hours.
For several decades now, assessment has become an increasingly pressing education priority. Teacher and school accountability systems have come to be based on analysis of large-scale, standardized summative assessments. As a consequence, assessment now dominates most conversations about reform, particularly as a measure of teacher and school accountability for learner performance. Behind the often heated and at times ideologically gridlocked debates is a genuine challenge to address gaps in achievement between different demographically identifiable groups of students. There is an urgent need to lift whole communities and cohorts of students out of cycles of underachievement. For better or for worse, testing and public reporting of achievement is seen to be one of the few tools capable of clearly informing public policy makers and communities alike about how their resources are being used to expand the life opportunities for their children. This course is an overview of current debates about testing, and analyzes the strengths and weaknesses of a variety of approaches to assessment. 5 graduate hours. No professional credit.

EPS 536  Race, Gender & Sexuality Issu  credit: 4 Hours.
Examines contemporary theories of race, gender, class, and sexuality, as well as analyzing how their dynamics play out in U.S. public schooling and history. In an attempt to discuss a range of disciplinary and theoretical approaches to diversity, we will shift among historical, sociological, political, theoretical and pedagogical issues. Traces the place of diversity in forming notions of citizenship, community, identity, and political affiliation/alliance. While two extended examples will focus on the interplay of race, class, and gender in the school-based issues of drop out rates and gendered interactions in the classroom and playground, we will also consider contemporary theories of diversity in local and global contexts. Prerequisite: Acceptance into the Master of Education with an emphasis on Diversity and Equity in Education Program or instructor approval.

EPS 537  Globalizing Educational Policy  credit: 4 Hours.
Dynamics associated with globalization are now fully articulated to modern schooling and the social and cultural environments in which both school youth and educators operate. This course will reconsider the boundaries of educational policy and practice beyond the mainstream emphasis on subject matter specialization, as educators more fully engage with the complex range of experiences, images, and practices that now compel modern school youth and affect their articulation of needs, interests and desires. Prerequisite: For majors only.

EPS 538  Globalization of Higher Ed  credit: 4 Hours.
This course will focus on the rapid changes happening in the Higher Education around the world. Using case studies, we will examine a variety of issues that have come about as the Higher Education system responds to rapid changes in the global economy. These include issues of access and equity; accountability; finance; privatization and for-profit institutions; curricular responses to the changing realities of knowledge and knowledge production; and issues of internationalization within these changing contexts. We will also look at future trends in higher education within the US and internationally.

EPS 539  Youth, Culture and Society  credit: 4 Hours.
Same as AAS 539 and HDFS 539. See HDFS 539.

EPS 540  Intersectional Pedagogies  credit: 4 Hours.
Same as GWS 540. See GWS 540.

EPS 545  Sexualities and Education  credit: 4 Hours.
Examines policy, curricula, and research on sexuality in education, including the resurgence of virginity and chastity, HIV/AIDS education, education for pregnant teens, sexual orientation and gender identity-related non-discrimination policies and speech codes in public schools, queer youth, and the relationship among sexuality, race, class, disability, and gender. Considers the term "education" broadly, examining school policies, public health education, and the educational projects of political and social movements. Readings concentrate on a U.S. context, though AIDS and sex education information from international sources will also be included. Same as EPSY 550. 4 graduate hours. No professional credit. Prerequisite: For majors only.

EPS 550  Global Issues in Learning  credit: 4 Hours.
Investigates how culture has been taken up in theories that try to explain differences in educational outcomes between nations, within classrooms, and across schools. Through readings drawn from cultural psychology, but also including sociology, anthropology, and education, students will examine how globalization has shaped the discourse about the relationships between culture, learning, and academic achievement. Same as EPSY 550. 4 graduate hours. No professional credit. Prerequisite: For majors only.

EPS 554  New Media and Literacies  credit: 4 Hours.
This course is designed to address issues of language and literacy, not only for language arts teachers, but all educators in all disciplines and at all levels, where students are required to represent their knowledge in writing as well as other media. It will introduce the 'Multiliteracies' theory of literacy learning which recognizes that the contemporary communications environment is increasingly multimodal. Written language today is more closely connected with oral, visual, gestural, tactile and spatial modes. To remain relevant, effective pedagogy needs to connect with the new communications media, and to explore their underlying processes. The course will focus on current trends in literacy instruction, not only in language arts or composition classes, but academic literacies across all curriculum areas. The course will also investigate the implications of new media of language and literacy and explore the implications of developments in the contemporary media, particularly the new, digital media. 4 graduate hours. No professional credit.
EDPR 570  Postcolonial Theory & Methodology  credit: 4 Hours.
Since the 1990s, scholarship focusing on center-periphery relations has grown considerably. This scholarship is often identified with postcolonial theories of education and society. The purpose of this course is to acquaint students with this body of literature that addresses the way in which post-independent states are currently engaged in massive institutional transformations in light of globalization. Ultimately, we will explore the theoretical and methodological traditions foregrounded in postcolonial research and their implications for educational policy. 4 graduate hours. No professional credit.

EDPR 575  Cultural Studies and Critical Interpretation  credit: 4 Hours.
Explores the history, applications and limitations of various theoretical and methodological approaches to the study of contemporary culture and popular media. Examines debates and issues within cultural studies and with other schools of thought. The impact of cultural studies across the disciplines. Same as MDIA 575. 4 graduate hours. No professional credit. Prerequisite: Consent of instructor.

EPSY 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for S/U grading only. May be repeated.

EDPR 250  School & Community Experiences  credit: 0 to 4 Hours.
Early field experiences in teacher education, including observation and laboratory experiences in public schools: designed to provide opportunities for career exploration, professional orientation, the development of insight into the interrelationship of theory and practice, and the place of the student in the educational process. Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

EDPR 420  Ed Prac Students with Sp Needs  credit: 2 to 12 Hours.
Course in practice teaching which provides teaching experience with exceptional children. 2 to 12 undergraduate hours. 2 to 12 graduate hours. Approved for S/U grading only. May be repeated for 18 hours, 12 of which may be taken in the same term. Prerequisite: Satisfactory completion of all requirements of the Council on Teacher Education Undergraduate or Graduate Common Assessment Plan for Initial Certification (http://www.cote.uiuc.edu/).

EDPR 432  Ed Prac in EC & ELED  credit: 2 to 12 Hours.
Course in practice teaching to meet licensure requirements for teaching in the elementary school. 2 to 12 undergraduate hours. 2 to 12 graduate hours. Approved for S/U grading only. Prerequisite: CI 420 or CI 406 as required by the student's curriculum; Satisfactory completion of all requirements of the Council on Teacher Education Undergraduate or Graduate Common Assessment Plan for Initial Certification (http://cote.illinois.edu/).

EDPR 438  Educational Practice in Special Fields  credit: 2 to 12 Hours.
Course in student teaching to meet requirements for licensure in special fields. 2 to 12 undergraduate hours. 2 to 12 graduate hours. Approved for S/U grading only. Prerequisite: All professional education coursework, except those requiring concurrent enrollment with student teaching, must be completed prior to student teaching. Satisfactory completion of all requirements of the Council on Teacher Education Undergraduate or Graduate Common Assessment Plan for Initial Licensure (www.cote.illinois.edu).

EDPR 442  Educational Practice in Secondary Education  credit: 2 to 12 Hours.
Course in practice teaching to meet licensure requirements for teaching in the secondary schools. 2 to 12 undergraduate hours. 2 to 12 graduate hours. Approved for S/U grading only. Prerequisite: All professional education coursework, except those requiring concurrent enrollment with student teaching, must be completed prior to student teaching. Satisfactory completion of all requirements of the Council on Teacher Education Undergraduate or Graduate Common Assessment Plan for Initial Licensure (www.cote.illinois.edu).

EDPR 550  School and Community Experience  credit: 0 to 4 Hours.
Early field experiences in teacher education, including observation and laboratory experiences in schools: Designed to provide opportunities for career exploration, professional orientation, the development of insight into the relationships of theory and practice, and the place of the student in the educational process. 0 to 4 graduate hours. No professional credit. Approved for S/U grading only. May be repeated. Prerequisite: Must be admitted to an educator preparation program.
EPSY 200  Honors Symposium in Education  credit: 1 Hour.
Course affords students an opportunity to consider important topics impacting current educational practices. Students select six scholarly presentations from an approved list. The presentations are delivered by outstanding visiting and resident scholars in education and related disciplines. Three times during the term, students gather to consider the issues raised by the presentations. Course expectations include: attending six presentations, attending the three course discussion meetings, reading the course text and selected publications, and developing written reflections based on presentations attended. May be repeated to a maximum of 8 hours.

EPSY 201  Educational Psychology  credit: 3 Hours.
Explores fundamental issues of development, learning, instruction, and assessment. This course articulates how people learn, how they are influenced by cultural and social contexts, how to assess learning and its outcomes, and how best to teach and motivate people to achieve. Educational psychologists improve learning in a broad range of settings: homes, classrooms, work environments, and communities. Prerequisite: PSYC 100.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

EPSY 202  Exploring Cultural Diversity  credit: 3 Hours.
Introduction to cultural diversity and social justice issues through interdisciplinary readings, discussion, and experiential activities. The course involves a 1-hour lecture and 2-hour lab/discussion section each week. The lecture focus is on raising awareness of key issues, concerns and concepts, providing accurate information on diverse groups, and relating theories and models to critical incidents of social oppression in everyday life. The lab/discussion sections follow a group dialogue and experiential activity format, and focus on relating the readings and lecture material to personal experiences and active learning activities.
This course satisfies the General Education Criteria for: Cultural Studies - US Minority

EPSY 203  Social Issues Group Dialogues  credit: 1 Hour.
Provides students with opportunities to converse on specific diversity and social justice topic areas offered as separate sections under the course heading. Each section uses a structured dialogue format to explore intergroup and intragroup differences and similarities within historical and contemporary contexts. Specific focus will be on participants sharing their experiences and perspectives related to the specific dialogue topic. The dialogue format uses active learning exercises in addition to weekly readings, journal assignments, and topic based dialogues. May be repeated in the same term to a maximum of 2 hours. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of the instructor.

EPSY 204  Learning in a Digital World  credit: 3 Hours.
Addresses the fundamental use of information and information technology in knowledge creation and learning, with a specific focus on the use of computers, new media, and related digital technologies within formal and informal learning environments. The paramount goal is the reconceptualization of learning practices and environments and how these will impact students, teachers, schools, and society at large. Major areas of interest covered include new learning theories, educational informatics, ubiquitous learning, collective intelligence and social networking, creativity, and universal design for knowledge creation. Applicable to any student interested in the principles of learning, knowledge, and education. Students will need access to a laptop computer.

EPSY 220  Career Theory and Practice  credit: 3 Hours.
Various behavioral science theories will be covered (e.g., person-environment interaction, decision-making, group dynamics, stereotype threat, personality traits). Discussions of research findings to applied career practices will also be included. Students will develop a working-knowledge of these theories through interactive lectures, guided class discussions, case-based readings, and group activities that require them to think critically and flexibly about theory in order to generate solutions for real-world problems. Additional fees may apply. See Class Schedule.
On request, students will be required to participate in a total of 6 hours of experiments outside of class.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

EPSY 222  Language & Culture of Deaf Communities  credit: 3 Hours.
Same as SHS 222. See SHS 222.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci
Cultural Studies - US Minority

EPSY 236  Child Dev in Education  credit: 3 Hours.
Study of child growth and development designed particularly for those preparing to teach in the elementary school; special emphasis on the significance of the developmental process for educational programs and procedures; and systematic experience in studying and evaluating children's behavior and in supporting their learning and development. Includes limited voluntary participation as a subject in experiments. Credit is not given for both EPSY 236 and PSYC 216. Prerequisite: PSYC 100.

EPSY 280  Elements of Statistics  credit: 4 Hours.
Course content includes descriptive statistics, correlation, regression, the normal curve, statistical interference, and the presentation of statistics. The course does not require calculus, and makes use of examples drawn from education, medicine, social science, business, and the popular media. Designed for professional training of students whose major interests are not in math or science. Credit is not given for both EPSY 280 and any of ACE 261, CPSC 440, ECON 202, ECON 203, EPSY 480, PSYC 235, SOC 280, STAT 100. Prerequisite: MATH 112.
This course satisfies the General Education Criteria for: Quantitative Reasoning I

EPSY 330  Development and Relationships  credit: 3 Hours.
Same as PSYC 326. See PSYC 326.

EPSY 395  Independent Study  credit: 1 to 4 Hours.
Study of problems not considered in other courses; designed for students who excel in self-direction and intellectual curiosity. May be repeated. Prerequisite: Minimum GPA of 3.5; demonstrated writing and research potential as evaluated by advisor, and consent of advisor and consent of staff member who supervises the work.

EPSY 398  Thesis  credit: 2 or 3 Hours.
Prerequisite: Senior standing.

EPSY 399  Thesis  credit: 2 Hours.
Prerequisite: Senior standing.

EPSY 400  Psyc of Learning in Education  credit: 2 to 4 Hours.
Study of the psychology of human learning as it applies to instruction, educational issues, and educational problems. 3 undergraduate hours. 2 or 4 graduate hours. Taking 4 credit hours requires consent of the instructor and the completion of a substantive scholarly project. Undergraduate and graduate work load will be commensurate with the requirements. 2 hours for Latin and Spanish Certification, Elementary Edm Music and GSLIS. Prerequisite: EPSY 201 or equivalent.
EPSY 401  Child Language and Education  credit: 2 to 4 Hours.
Provides an overview of current knowledge about children's acquisition of linguistic and communicative competence together with a consideration of the educational import of this developmental process. 3 undergraduate hours. 2 or 4 graduate hours. Taking 4 hours of credit requires consent of the instructor and completion of a substantive scholarly project. Undergraduate and graduate work load will be commensurate with the requirements. 3 hours of ECE Undergraduate certification and 2 hours for ECE graduate certification, Elementary Ed, Music certification and GSLIS. Prerequisite: EPSY 201 or EPSY 236; or equivalent.

EPSY 402  Sociocultural Infl on Learning  credit: 2 to 4 Hours.
Provides a general overview of the relationship of language, culture, and society to the teaching-learning process; gives broad exposure to research and theory concerned with the effects of sociocultural factors on cognition, perception, and motivation; also considers the effects of such factors on classroom interaction. 3 undergraduate hours. 2 or 4 graduate hours. Taking 4 hours of credit requires consent of the instructor and the completion of a substantive scholarly project. 2 hours for Elementary Education and Music certification. Prerequisite: EPSY 201 or EPSY 236; or equivalent.

EPSY 403  Res Methods in Learning Scienc  credit: 3 or 4 Hours.
This course is an introduction to conducting research in the learning sciences, including how to use theory as a guide to conducting literature reviews and formulating research questions. The course introduces quantitative and qualitative research design, data collection and analysis, and other aspects of research relevant to learning, teaching, and other topics relevant to education. A secondary goal is to better understand research reported in the primary literature as well as in the news media. Assignments will include evaluating research papers and writing a research proposal. 3 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 280 or EPSY 480 or PSYC 235 or PSYC 301.

EPSY 404  Adjustment in School Settings  credit: 3 or 4 Hours.
Examines theories of adjustment, factors that influence adjustment, and common adjustment problems of children and adolescents in school context. 3 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 201 or equivalent.

EPSY 405  Personality and Soc Dev  credit: 3 or 4 Hours.
Same as PSYC 465. See PSYC 465.

EPSY 406  Psyc of Classroom Management  credit: 2 to 4 Hours.
General overview of theories related to analyzing student behaviors in the classroom; the incidence and etiology of conduct problems and behavior disorders in the classroom, with emphasis upon preventive strategies and guiding principles for maintaining classroom discipline. 3 undergraduate hours. 2 or 4 graduate hours. Taking 4 hours of credit requires consent of the instructor and the completion of a substantive scholarly project. Undergraduate and Graduate work load will be commensurate with the requirements. 2 hours for Elementary Education and Music certification and GSLIS. Prerequisite: EPSY 201 or EPSY 236, or equivalent.

EPSY 407  Adult Learning and Development  credit: 3 or 4 Hours.
Theory of and research on adult learning and development; includes societal context, performance, physiology and health, personality, and learning; and considers stability and change during young adulthood, middle age, and old age. Meets both foundational requirements for EPSY. 3 undergraduate hours. 4 graduate hours. Assignments and work load will commensurate with credit. Prerequisite: EPSY 201, or equivalent, or consent of instructor.

EPSY 408  Learning & Hum Dev w/ EdTech  credit: 3 or 4 Hours.
Sets out to provide an understanding of theories of learning and development and how these theories relate to educational technology. It has two components. The first is theoretical, in which we attempt to develop an overall frame of reference, locating approaches to the psychology of learning in terms of large paradigm shifts, from 'behaviorism' to 'brain developmentalism' to 'social cognitivism'. The second component is practical, in which we will use these theoretical concepts to 'parse' a technology-mediated learning environment for its underlying presuppositions. 3 undergraduate hours. 4 graduate hours.

EPSY 413  Intelligence Assess and Theory  credit: 3 or 4 Hours.
Study of fundamental concepts relevant to the general problem of the individual testing of learning aptitude; acquisition of psychometric competence in the use of the Binet and the Wechsler tests; acquaintance and limited practice in the administration, scoring, and interpretation of results obtained by performance scales and other devices appropriate for use with individuals having sensory, associative, and/or motor impairments. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor and 6 hours of psychology courses, including SPED 424 or PSYC 490.

EPSY 419  Counseling Pre-Practicum  credit: 2 to 4 Hours.
Study of basic helping skills and professional ethics in professional psychology. The course links theory with practice, as students engage in the exploration of new helping skills and learn to analyze their developing counseling style and performance; includes an examination of relevant ethical standards and counseling theories, and their application in a multicultural context. Discussion and experiential activities are supplemented by films, videotapes, and case studies. Primarily for counseling psychology graduate students, though other students in programs with a mental health focus may be admitted with the consent of the instructor if space is available. Same as REHB 419. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 8 hours. Prerequisite: Junior standing.

EPSY 420  Theories of Psychotherapy  credit: 4 Hours.
Study of counseling and psychotherapeutic processes and theories. Coverage of major models and theories as well as current trends and a review of counseling skills will be included. Same as PSYC 420. 4 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 238 or equivalent.

EPSY 421  Sex Role Theory in Counseling  credit: 4 Hours.
Reviews research on sex role socialization related to career, family, and personal roles for both sexes; discusses counseling strategies aimed at freeing persons from attitudes and behaviors that limit their freedom to choose; and reviews strategies for change at policy, agency and individual levels. Same as GWS 421. 4 undergraduate hours. 4 graduate hours.

EPSY 427  Learning from Text  credit: 2 to 4 Hours.
This course will survey the range of topics related to how we learn from text, i.e., from reading. The course will focus on reading in education settings and approaches to improving reading comprehension. Students will read secondary and primary literature and have opportunities to critique, discuss, and present the findings of this research. Topics discussed will include: eye movements during reading, grammatical structures and discourse conventions of texts that support comprehension, and how comprehension and memory for text can be measured. Assignments will include written reviews of texts and topics. Students taking the course for 4 graduate hours will also plan and present a proposed empirical study related to some topic within the course. 3 undergraduate hours. 2 or 4 graduate hours. Credit is not given for EPSY 427 if credit has been received for either PSYC 425 or LING 425.
EPSY 430  Early Adolescent Development  credit: 3 or 4 Hours.  Examines early adolescent development, covering biological, cognitive, and social transitions. Topics include identity, autonomy, peer and family relationships and the role of schooling and the media. 3 undergraduate hours. 3 or 4 graduate hours.

EPSY 431  Cognitive Dev in Educ Context  credit: 3 or 4 Hours.  The purpose of this course is to cover basic issues in cognitive development, review relevant research findings, and to situate these and understand these in educational contexts. Most of our attention will focus on child and adolescent development. We will address questions such as: How do children learn new concepts? How do changes in children's thinking occur? How can we use what we know to produce positive impacts on children's learning and well-being? 3 undergraduate hours. 4 graduate hours.

EPSY 456  Human Performance and Cognition in Context  credit: 3 or 4 Hours.  Theories and findings from cognitive science and related disciplines concerning human information processing mechanisms and capacities are covered, with an emphasis on how understanding people's perceptual and cognitive strengths and limitations can inform decisions about teaching/training strategies and designing technological environments to suit people's needs and abilities. Same as IE 445 and PSYC 456. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 100 or consent of instructor.

EPSY 457  Teachers and Tech Integration  credit: 3 or 4 Hours.  Designed to help enhance the understanding of computers in the schools. This course looks at computers in the broadest sense and considers a variety of aspects of technologies and digital media that impact pedagogy, curriculum, and student learning. The course considers the context of computing by exploring the history of computing, what is currently occurring in the schools, and how technologies and student expectations are encouraging teachers to redefine the classroom experience. The main goal of this course is to enable students to develop a flexible and working knowledge of computers as educational resources in order to better reach students - students of the 21st century. 3 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 480 or equivalent, or consent of instructor.

EPSY 466  Anthropology of Education  credit: 2 or 4 Hours.  Same as ANTH 425 and EPS 425. See EPS 425.

EPSY 470  Intro to Evaluation Theory  credit: 4 Hours.  Introduction to the major conceptual constructs and theories of evaluation; emphasis on the critical defining components of evaluation, particularly its role in program and policy development, and on critical distinctions among evaluation theories; provides grounding for further study of both evaluation theory and methods. 4 undergraduate hours. 4 graduate hours.

EPSY 471  Intro to Evaluation Methods  credit: 4 Hours.  Introduces the methodology of educational and social program evaluation, including the design of an evaluation, the data collection and analysis, and reporting; emphasis on negotiating the unique facets of evaluative practice, notably evaluator role, working with clients and other stakeholders, the political dynamics of evaluation contexts, and utilization of evaluative results. Students collectively conduct a field-based evaluation project. 4 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 480.

EPSY 474  Evaluating Learning Technology  credit: 4 Hours.  In this course, students will learn to conduct a variety of evaluations related to learning technologies including needs assessments, consumer-driven evaluations, outcome or impact assessments, comparative or quasi-experimental studies and case studies. As one means of measuring need, growth, or impact, students will also create assessment instruments and strategies related to particular learning technologies. These might include electronic portfolios, web-based surveys, computer adapted tests or performance rubrics. Course requirements include a final evaluation project in which students (individuals or pre-approved small groups) plan and conduct actual evaluations of learning technologies. The course includes both face-to-face and asynchronous and synchronous on-line meetings. Same as HRD 474. 4 undergraduate hours. 4 graduate hours.

EPSY 480  Educational Statistics  credit: 4 Hours.  Designed for terminal value for professional training of students not intending to pursue advanced graduate work, and for introductory value for students continuing graduate study in education; descriptive statistics, introduction to correlation and regression, the normal curve, statistical inference, and the presentation and interpretation of statistical data in educational literature. 4 undergraduate hours. 4 graduate hours.

EPSY 485  Assessing Student Performance  credit: 3 or 4 Hours.  Designed especially for secondary education students, this course introduces basic concepts and practices of assessment, measurement, and evaluation as they are used in school settings. The course covers current trends and issues in assessment including large scale standardized testing practices and cultural issues in assessment. Students become familiar with using assessment and evaluation data to inform instructional decisions. Same as CI 485. 3 undergraduate hours. 4 graduate hours. Prerequisite: Students should be concurrently enrolled in CI 403. Admission to the secondary teacher education program.

EPSY 486  Principles of Measurement  credit: 3 or 4 Hours.  Study of the selection, preparation, administration, and interpretation of psychological and educational tests and diagnostic devices; emphasis on theory at a beginning level, with application to hypothetical school situations as a teaching device; and consideration of the sources of standard tests, criteria for their evaluation, methods of scoring, interpretation, and general and special areas. 3 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 201 or EPSY 236.

EPSY 487  Principles of Language Testing  credit: 3 or 4 Hours.  Same as EIL 460, FR 460, GER 460, ITAL 460, PORT 460, SLS 460, and SPAN 460. See EIL 460.

EPSY 490  Developments in Educ Psyc  credit: 2 to 4 Hours.  Foundational theories and practices of educational psychology, including learning and development. 2 or 3 undergraduate hours. 2 or 4 graduate hours. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours. Undergraduate and graduate work load will be commensurate with the requirements.

EPSY 491  Educ Psyc Field Instruction  credit: 4 to 16 Hours.  Individual instruction designed to help the advanced student apply basic principles of education or psychology in institutional settings. Each student is assigned to a school, community agency, or other applied settings for a supervised field experience in some aspect of educational psychology. 4 to 16 undergraduate hours. 4 to 16 graduate hours. Approved for letter and S/U grading. May be repeated to a maximum of 16 hours if topics vary; no more than 8 hours may be taken in any given term. Prerequisite: Master's degree in educational psychology or equivalent, and consent of instructor.
EPSY 492  History and Systems of Psych  credit: 4 Hours.
A seminar on the history of psychology within a social and cultural context and its theoretical systems, and their relations to contemporary psychology. An awareness of the roots and context of one’s own views as well as understanding and appreciation of others’ views will be fostered. There will be some focus on encouraging self-study of the history of one’s own theoretical orientation. 4 undergraduate hours. 4 graduate hours. Prerequisite: EPSY 420, or equivalent.

EPSY 501  Evaluation in Society  credit: 4 Hours.
Examines evaluation as a social practice, explains various approaches to evaluation both nationally and internationally, and explores how evaluation is linked to policy and decision making. Students will read about and discuss both foundational and contemporary issues in evaluation practice and theory as they relate to the use of evaluation in improving both practice and policy decisions. For graduate students in education, public policy, social work, community health, and other related fields.

EPSY 505  Data, Evidence, & Decisions  credit: 4 Hours.
Examines how practitioners and policy makers come to interpret sources of evidence; how the use of data, information, and evidence are shaped by organizational structures, routines, and cultures; how technical infrastructures have emerged to enable the collection, distribution, consolidation, and use of data, information, and evidence; the political economy of generated and using evidence (e.g., university research, think tanks, advocacy organizations, etc.). This multidisciplinary course is situated against the broad backdrop of the social science literature on social scientific knowledge production and use, and the relationship between science and society.

EPSY 507  Econ Analysis & Ed Policy  credit: 4 Hours.
Introduces key economic principles and applies them to the analysis of current education policy issues. Concepts covered include supply and demand, competitive markets, human capital acquisition, efficiency, equity and the role of government intervention, among others. Focuses on applications within the context of policy making in education. Designed for students without prior coursework in economics, but with a working basic knowledge of statistics (e.g., regression). Prerequisite: EPSY 480.

EPSY 508  Display/Interpretation of Data  credit: 4 Hours.
Provides instruction in representing and communicating data accurately and clearly using visual displays (e.g., graphs, tables and figures). Examines the most appropriate ways to visually display the results of data analyses so that they are clear, accurate and unambiguous. Drawing on both contemporary techniques and publication standards, it will address topics including audience, context, precision, visual metaphor, data display tools and best practices.

EPSY 510  Counseling Psych/Ethics ProSem  credit: 4 Hours.
Introduction to and critical examination of applied issues within the discipline of counseling psychology. A review of (a) the historical development of counseling psychology, (b) psychologists’ professional code of ethics, and (c) major psychotherapy theories and interventions. Issues of race, class, gender, and diversity more broadly are integrated throughout the course.

EPSY 511  Voc Psych Theories and Assess  credit: 2 or 4 Hours.
Study of vocational psychology theories, assessment, decision-making, and the job search process; includes an historical overview of the development field. The course links theory with practice, as students engage in the interpretation of vocational assessments, examine relevant ethical standards, and discuss their application. 2 hours credit is for work on either the vocational theories or vocational assessment parts of the course (this must be negotiated). For 4 hours credit, a student must do both aspects. Prerequisite: Admission to the graduate program in counseling psychology or consent of instructor.

EPSY 513  Resrch Meth in Coun Psych II  credit: 4 Hours.
This course is the second course sequence for Counseling Psychology graduate students. This course builds on the previous course (EPSY 512) in that students continue work on refining their thesis proposal in the area of Counseling Psychology. They also explore advanced research designs as applied to Counseling Psychology literature. This course may not be repeated for credit. Prerequisite: EPSY 512 or consent of instructor.

EPSY 515  Multicultural Counseling  credit: 4 Hours.
Overview of multicultural counseling theory, empirical research, and practice; includes didactic as well as experiential learning components. The goal of the course is to enhance students’ multicultural counseling competencies, with regard to developing: (a) appropriate knowledge of specific cultural groups and sociopolitical issues, (b) cultural self-awareness, and (c) multiculturally relevant intervention skills. May not be repeated for credit.

EPSY 520  Counseling Psych Practicum  credit: 2 to 8 Hours.
Intensive supervised experiences in applied educational psychology; use of a wide variety of diagnostic and observational techniques and treatment. Students may take more than one section. Approved for letter and S/U grading. Prerequisite: Master's degree in educational psychology or equivalent; consent of instructor.

EPSY 521  Group Counseling  credit: 4 Hours.
Study of the principles of group process and their application in institutional and other settings; includes a review of the historical development of group processes and study of pertinent research; discussion and experiential activities are supplemented by films, videotapes, and case studies. Prerequisite: EPSY 510 or consent of instructor.

EPSY 530  Social Development  credit: 4 Hours.
This seminar is an advanced, doctoral-level survey of social development from infancy to adolescence. The range of topics includes attachment, temperament, genes and developmental process, social contexts of cognitive development gender development, moral reasoning and prosocial behavior, aggressive behavior, and the development of ethnic identity and discrimination. Family, peer, community, and cultural ecologies of children and adolescents receive extensive consideration. Developmental theory, methodology, and relations to social policy and intervention are continuing concerns. Same as PSYC 540.

EPSY 531  Cognitive Dev and Socialization  credit: 4 Hours.
Addresses basic issues in cognitive development, with special attention to how social interactions impact cognitive development. Two major foci: theories, especially in terms of the role that socialization plays in these theories; and effects of domains of socialization (e.g., peers, school) on cognitive development. Primary age span: preschool thru adolescence. Prerequisite: Consent of instructor.
EPSY 540  Networks for Learning  credit: 4 Hours.
In this course students engage in hands on activities through which they come to understand the intricacies of building substantial and sustainable networks for learning environments, in particular network planning for school districts. Studies read and discuss literature that relates to the building of network systems. Students will explore various tools and techniques that best serve the network environment. Students will complete a major project in which they design (or modify) their own network and discuss the means by which they come to understand critical factors associated with maintaining and growing such an environment. Prerequisite: Enrollment in the Educational Technology for Teaching, Learning, and Leadership concentration in the Educational Psychology on-line CTER Program.

EPSY 546  Human Factors in HCES  credit: 4 Hours.
Provides an overview of research that applies theories and methods from human factors and cognitive science to analyze the sources of these problems and to develop and evaluate design and training interventions to help providers and patients successfully navigate health care systems. An introduction to problems and accidents in health care related to human factors is followed by an overview of concepts and methods from the fields of human factors and cognitive science. Same as IE 546. 4 graduate hours. No professional credit. Prerequisite: Priority will be given to students enrolled in the Healthcare Engineering Systems Concentration of M.Eng. degree program.

EPSY 550  Global Issues in Learning  credit: 4 Hours.
Same as EPS 550. See EPS 550.

EPSY 551  Seminar in Cognitive Science  credit: 2 or 4 Hours.
Same as PSYC 514, ANTH 514, CS 549, LING 570, and PHIL 514. See PSYC 514.

EPSY 552  Classroom Learning  credit: 4 Hours.
Provides a broad picture of the nature and conditions of classroom learning. Considers analysis of knowledge; institutional constraints on teachers; characteristics of instruction and instructional materials for reading, social studies, and science; social context of learning; motivation and interest; questioning and discussion; and learning strategies and study skills. Intended for doctoral students with a special interest in research leading to the improvement of classroom teaching and learning. Same as PSY 554. Prerequisite: Consent of instructor required.

EPSY 554  Virtual Worlds in Education  credit: 4 Hours.
Examines the history, theory, and practice of pedagogy in virtual environments. Students will read research literature, participate in online discussions through the Moodle course management system, and engage in real-time activities in several types of virtual worlds. The project component requires students to develop educational artifacts in virtual worlds and perform peer review of artifacts developed by other students. Projects will support some aspect of learning or teaching in the students' own workplace, and will incorporate multimedia, web, and other network-based resources. Students are expected to have access to computers that meet the hardware and networking requirements. Same as CI 545. Prerequisite: Students must be enrolled in the Educational Technology for Teaching, Learning, and Leadership concentration in the Educational Psychology on-line CTER Program.

EPSY 556  Analysis of Educational Tech  credit: 4 Hours.
This course will analyze currently available technologies for learning. Areas addressed include: learning management systems, intelligent tutors, computer adaptive testing, gamification, simulations, learning in and through social media and peer interaction, universal design for learning, differentiated instruction systems, big data and learning analytics, attention monitoring, and affect-aware systems. Participants will explore the processes for selection and implementation of suitable technologies, the design of electronic learning resources, design and application of digital media in teaching and learning, familiarization with web usually and accessibility, and critical analysis of the benefits of technologies in education. 4 graduate hours. No professional credit.

EPSY 559  Advanced Learning Technologies  credit: 4 Hours.
In this course students identify, select, and justify the implementation of advanced learning technologies in the overall learning environment. Students will consider how advanced technologies influence the design process and how the design process may be enhanced through the use of advanced learning technologies. The goal of this course is to have students create a vision in which instructional system design models, existing advanced learning technologies, and the learning environment create a synergy by which individuals are able to solve organizational problems. Prerequisite: Enrollment in the Educational Technology for Teaching, Learning, and Leadership concentration in the Educational Psychology on-line CTER Program.

EPSY 560  Tech & Educational Change  credit: 4 Hours.
An in-depth look at research on educational reform and its links to technology in the United States. Major topics include reforming the organization of schools and the instructional program, and the roles students, teachers, and school administrators play when integrating technology and school improvement. Prerequisite: Enrollment in the Educational Technology for Teaching, Learning, and Leadership concentration in the Educational Psychology on-line CTER Program.

EPSY 563  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, FR 584, GER 584, ITAL 584, LING 584, PORT 584, and SPAN 584. See SPAN 584.

EPSY 566  Adv Psycholinguistics  credit: 2 or 4 Hours.
Same as PSYC 526. See PSYC 526.

EPSY 567  Personality Assessment  credit: 4 Hours.
Same as EPSY 567. See EPSY 567.

EPSY 570  Adv Theories of Ed Evaluation  credit: 4 Hours.
This topical seminar is designed for advanced graduate students with a significant interest in the evaluation of educational and social policies and programs. The seminar will engage in some depth an issue of contemporary currency and controversy in evaluation theory and practice. Readings, discussions, guest speakers, and the occasional field trip will frame the seminar. Each student in this seminar will be expected to develop a scholarly paper for conference presentation and/or publication. Prerequisite: EPSY 470, EPSY 471, and coursework in research methods.

EPSY 572  Evaluation of Edu Programs  credit: 4 Hours.
Same as CI 518. See CI 518.

EPSY 573  Methods of Educational Inquiry  credit: 4 Hours.
Same as CI 550, EPOL 550, and SPED 550. See CI 550.

Information listed in this catalog is current as of 04/2018
EPSY 574  Quasi-Experimental Design  
Intermediate course for graduate students in education and related fields. Goal is to prepare students to design and conduct quasi-experimental studies and critique the work of others in an informed, systematic way. Students will read and discuss foundational and contemporary issues in design, validity, sampling and loss, regression artifacts, analysis and causal inferences. Prerequisite: EPSY 580 or equivalent.

EPSY 575  Mixed Method Inquiry  
This advanced course addresses the theory and practice of mixing inquiry methodologies in program evaluation and applied research. Topics include selected roots of mixed inquiry, various stances on mixing philosophical traditions while mixing methods, conceptualizations of mixed method design and analysis, and challenges of mixed method practice. Students should have basic familiarity with experimental or survey (quantitative) with and constructivist or interpretivist (qualitative) social science. Familiarity with other social science frameworks (e.g., critical theory, feminism, action science) is also highly desirable. Approved for letter and S/U grading. Prerequisite: EPSY 574 or EPSY 580; EPSY 577 or EPSY 578; or equivalents; or consent of instructor.

EPSY 577  Foundations of Qual Methods  
Introduction to epistemological, methodological, ethical, and political issues characterizing the broad field of qualitative inquiry. Topics covered include an overview of logical positivism and logical empiricism, the Continental philosophers’ critique of science and the emergence of hermeneutics; sociological theories of Verstehen; interpretive anthropology; feminist qualitative inquiry; social constructionism; contemporary crises of ethics, representation, and justification.

EPSY 578  Qualitative Inquiry Methods  
Introductory course addressing the practice of qualitative inquiry. Topics include developing inquiry questions appropriate for qualitative studies; designing qualitative studies; generating data via interviews, observations, document analyses; analyzing and interpreting qualitative data; judging the quality of inquiry; representing and reporting qualitative inquiry; addressing ethical and political issues in the conduct of qualitative inquiry.

EPSY 580  Statistical Inference in Educ  
Intermediate statistical methods in education; includes probability theory, distribution theory, interval estimation, hypothesis testing, regression and correlational analysis, and analysis of variance. Prerequisite: EPSY 480 or equivalent.

EPSY 581  Applied Regression Analysis  
Emphasis on educational research applications of regression with special emphasis placed on application and interpretation of techniques. Topics covered include rudimentary linear algebra, the general linear model, different coding schemes, regression diagnostics, and extensions to binary data and nested data structures. Same as PSYC 581. Prerequisite: EPSY 580 or equivalent; consent of instructor.

EPSY 582  Advanced Statistical Methods  
Advanced topics in analyses of variance and covariance, and principles of experimental design; brief introduction to multivariate analysis, including rudiments of matrix algebra. Prerequisite: EPSY 580, PSYC 407, or equivalent.

EPSY 583  Single Case Experimental Design  
Same as SPED 583. See SPED 583.

EPSY 584  Multivar Anly in Psych and Ed  
Same as PSYC 594 and SOC 584. See PSYC 594.

EPSY 585  Theories of Measurement I  
Provides a conceptual framework of classical test theory (e.g., true scores, error of measurement, composite measures) and alternatives to the classical model (e.g., generalizability theory, latent trait theory). Students will learn the techniques and theory of classical test theory and apply the methods to educational and psychological assessments. Topics covered include reliability, validity, generalizability, dichotomous Item Response Theory (IRT), test construction and design, item bias and fairness, Differential Item Functioning (DIF), scaling, linking, and equating. Same as PSYC 595. Prerequisite: EPSY 581 and EPSY 582; PSYC 406 and PSYC 407; or equivalents.

EPSY 586  Theories of Measurement II  
Provides a conceptual framework of Item Response Theory (IRT) and its applications. Students will learn the techniques and theory of IRT and apply the methods to educational and psychological assessments. Topics covered include both dichotomous and polytomous IRT modelling, item structure and latent traits estimation, modeling and detecting Differential Item Functioning, linking and equating, computer adaptive testing, dimensionality testing, and cognitive diagnosis. Same as PSYC 596. Prerequisite: EPSY 585 or PSYC 490.

EPSY 587  Hierarchical Linear Models  
This course provides an overview of the use of multilevel models. Students will learn the techniques and theory of hierarchical linear models and apply the methods to data from studies in education, psychology and social sciences. Topics covered include multilevel analyses, random intercept and slope models, 2- and 3-level models, hypothesis testing, model assessment, longitudinal (repeated measures) data, and generalized hierarchical models for categorical variables. Same as PSYC 587 and STAT 587. Approved for letter and S/U grading. Prerequisite: EPSY 581 and EPSY 582, or PSYC 406 and PSYC 407.

EPSY 588  Covar Struct and Factor Models  
Same as PSYC 588, SOC 588, and STAT 588. See PSYC 588.

EPSY 589  Categorical Data in Ed/Psyc  
Concepts and methods for analyzing categorical data with an emphasis placed on building and applying models in education, sociology and psychology. Generalized linear models covered including logistic and Poisson regression models, loglinear, logit, and probit models, and models for ordinal data. Same as PSYC 589 and SOC 579. Approved for letter and S/U grading. Credit is not given for EPSY 589 and STAT 426. Prerequisite: EPSY 581 or PSYC 507.

EPSY 590  Advanced Seminar in Educ Psych  
Seminar in educational psychology; topics relate to the areas of specialization represented by the various divisions within the department. Approved for both letter and S/U grading. May be repeated. Prerequisite: Consent of instructor required.

EPSY 591  Field Study and Thesis Seminar  
Assists doctoral candidates in planning field studies and thesis problems. Students are expected to present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze critically all presentations. Prerequisite: Limited to students who have been admitted for doctoral study.
**EPSY 595  Independent Study  credit: 0 to 4 Hours.**
Offers opportunity and challenge of self-directive, independent study; develops the individual's ability as an independent student; and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given term. Approved for both letter and S/U grading. May be repeated with approval. Prerequisite: Approval of study outline by adviser and the department chairperson prior to enrollment.

**EPSY 599  Thesis Research  credit: 0 to 16 Hours.**
Individual direction of research and thesis writing. Approved for S/U grading only. May be repeated.

**Electrical and Computer Engr (ECE)**

ECE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ECE)

**Courses**

**ECE 101  Exploring Digital Info Technol  credit: 3 Hours.**
Principles and processes for the development of information technologies: digital music, digital images, digital logic, data compression, error correction, information security, and communication networks. Laboratory for design of hardware and software, and experiments in audio and image processing. Intended for students outside the College of Engineering. Credit is not given to Computer or Electrical Engineering majors.

This course satisfies the General Education Criteria for:
- Nat Sci Tech - Phys Sciences
- Quantitative Reasoning II

**ECE 110  Introduction to Electronics  credit: 1 to 3 Hours.**
Introduction to selected fundamental concepts and principles in electrical engineering. Emphasis on measurement, modeling, and analysis of circuits and electronics while introducing numerous applications. Includes sub-discipline topics of electrical and computer engineering, for example, electromagnetics, control, signal processing, microelectronics, communications, and scientific computing basics. Lab work incorporates sensors and motors into an autonomous moving vehicle, designed and constructed to perform tasks jointly determined by the instructors and students.

**ECE 120  Introduction to Computing  credit: 4 Hours.**
Introduction to digital logic, computer systems, and computer languages. Topics include representation of information, combinational and sequential logic analysis and design, finite state machines, the von Neumann model, basic computer organization, and machine language programming. Laboratory assignments provide hands-on experience with design, simulation, implementation, and programming of digital systems. Prerequisite: Restricted to Computer Engineering or Electrical Engineering majors or transfer students with ECE Department consent.

**ECE 198  Special Topics  credit: 1 to 4 Hours.**
Lectures and discussions relating to new areas of interest. May be repeated in the same or separate terms for unlimited hours if topics vary. See class schedule for topics and prerequisites.

**ECE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.**
Approved for both letter and S/U grading. May be repeated.

**ECE 200  Seminar  credit: 0 Hours.**
Discussions of educational programs, career opportunities, and other topics in electrical and computer engineering. Approved for Letter and S/U grading. May be repeated. For Computer Engineering and Electrical Engineering majors only.

**ECE 205  Elec & Electronic Circuits  credit: 3 Hours.**
Basic principles of circuit analysis; transient analysis; AC steady-state analysis; introduction to semiconductor devices and fabrication; digital logic circuits; op-amps; A/D and D/A conversion. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: PHYS 212.

**ECE 206  Elec & Electronic Circuits Lab  credit: 1 Hour.**
Laboratory instruments and basic measurement techniques; electric circuits; CMOS logic circuits; DTL and TTL circuits; op-amps. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: PHYS 212; concurrent registration in ECE 205.

**ECE 210  Analog Signal Processing  credit: 4 Hours.**
Analog signal processing, with an emphasis on underlying concepts from circuit and system analysis: linear systems; review of elementary circuit analysis; differential equation models of linear circuits and systems; Laplace transform; convolution; stability; phasors; frequency response; Fourier series; Fourier transform; active filters; AM radio. Credit is not given for both ECE 210 and ECE 211. Prerequisite: ECE 110 and PHYS 212; credit or concurrent registration in MATH 285 or MATH 286.

**ECE 211  Analog Circuits & Systems  credit: 2 Hours.**
Concepts from circuit and system analysis: linear systems; review of elementary circuit analysis; op amps; transient analysis; differential equation models of linear circuits and systems; Laplace transform. Credit is not given for both ECE 211 and ECE 210. Prerequisite: ECE 110 and PHYS 212; credit or concurrent registration in MATH 285 or MATH 286.

**ECE 220  Computer Systems & Programming  credit: 4 Hours.**
Advanced use of LC-3 assembly language for I/O and function calling convention. C programming, covering basic programming concepts, functions, arrays, pointers, I/O, recursion, simple data structures, linked lists, dynamic memory management, and basic algorithms. Information hiding and object-oriented design as commonly implemented in modern software and computer systems programming. Prerequisite: ECE 120. Restricted to Computer Engineering or Electrical Engineering majors or transfer students with ECE Department consent.

**ECE 297  Individual Study  credit: 1 Hour.**
Individual projects. Approved written application to department as specified by department or instructors is required. Approved for both letter and S/U grading. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Consent of instructor.

**ECE 298  Special Topics  credit: 1 to 4 Hours.**
Lectures and discussions relating to new areas of interest. May be repeated in the same or separate terms for unlimited hours if topics vary. See class schedule for topics and prerequisites.

**ECE 304  Photonic Devices  credit: 3 Hours.**
Introduction to active and passive photonic devices and applications; optical processes in semiconductor and dielectric materials including electrical junctions, light emission and absorption, and waveguide confinement; photonic components such as light emitting diodes, lasers, photodetectors, solar cells, liquid crystals, and optical fiber; optical information distribution networks and display applications. Prerequisite: PHYS 214.
ECE 307 Techniques for Engrg Decisions credit: 3 Hours.
Modeling of decisions in engineering work and the analysis of models to develop a systematic approach to making decisions. Fundamental concepts in linear and dynamic programming; probability theory; and statistics. Resource allocation; logistics; scheduling; sequential decision making; siting of facilities; investment decisions; application of financial derivatives; other problems for decision making under uncertainty. Case studies from actual industrial applications illustrate real-world decisions. Prerequisite: ECE 210; credit or concurrent registration in ECE 313.

ECE 310 Digital Signal Processing credit: 3 Hours.
Introduction to discrete-time systems and discrete-time signal processing with an emphasis on causal systems; discrete-time linear systems, difference equations, z-transforms, discrete convolution, stability, discrete-time Fourier transforms, analog-to-digital and digital-to-analog conversion, digital filter design, discrete Fourier transforms, fast Fourier transforms, spectral analysis, and applications of digital signal processing. Prerequisite: ECE 210.

ECE 311 Digital Signal Processing Lab credit: 1 Hour.
Companion laboratory for ECE 310. Prerequisite: Credit or concurrent registration in ECE 310.

ECE 313 Probability with Engrg Applc credit: 3 Hours.
Probability theory with applications to engineering problems such as the reliability of circuits and systems to statistical methods for hypothesis testing, decision making under uncertainty, and parameter estimation. Same as MATH 362. Credit is not given for both ECE 313 and MATH 461. Prerequisite: MATH 286 or MATH 415.

ECE 314 Probability in Engineering Lab credit: 1 Hour.
Designed to be taken concurrently with ECE 313, Probability in Engineering Systems, to strengthen the students' understanding of the concepts in ECE 313 and their applications, through computer simulation and computation using the Python programming language. Topics include sequential hypothesis testing, parameter estimation, confidence intervals, Bloom filters, min hashing, load balancing, inference for Markov chains, PageRank algorithm, vector Gaussian distribution, contagion in networks, principle component method and linear regression for data analysis, investment portfolio analysis. Prerequisite: Concurrent enrollment in ECE 313 or one of: ECE 313, JE 300, STAT 410.

ECE 316 Ethics and Engineering credit: 3 Hours.
Ethical issues in the practice of engineering: safety and liability, professional responsibility to clients and employers, whistle-blowing, codes of ethics, career choice, and legal obligations. Philosophical analysis of normative ethical theories. Case studies. Same as PHIL 316. Credit is not given for both ECE 316 and CS 210. Junior standing is required. Prerequisite: RHET 105. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil

ECE 317 ECE Technology & Management credit: 3 Hours.
Basic understanding of electrical and computer engineering concepts applicable to technology management. Circuit components; dc fundamentals; ac fundamentals; semiconductors; operational amplifiers; device fabrication; power distribution; digital devices; computer architecture (including microprocessors). Intended for the Business Majors in the Technology and Management program. Credit is not given to Computer or Electrical Engineering majors. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ECE 329 Fields and Waves I credit: 3 Hours.
Electromagnetic fields and waves fundamentals and their engineering applications: static electric and magnetic fields; energy storage; Maxwell's equations for time-varying fields; wave solutions in free space, dielectrics and conducting media, transmission line systems; time- and frequency-domain analysis of transmission line circuits and Smith chart applications. Prerequisite: ECE 210.

ECE 330 Power Ckts & Electromechanics credit: 3 Hours.
Network equivalents; power and energy fundamentals, resonance, mutual inductance; three-phase power concepts, forces and torques of electric origin in electromagnetic and electrostatic systems; energy conversion cycles; principles of electric machines; transducers; relays; laboratory demonstration. Prerequisite: ECE 210.

ECE 333 Green Electric Energy credit: 3 Hours.
Electric power grid structure and policy; analysis of wind, solar, and fuels as raw resources; wind turbines and parks; solar cells, modules, arrays and systems; fuel cell power plants; energy and financial performance of green energy projects; integration of green energy into power grid; energy project report and presentation. Prerequisite: ECE 205 or ECE 210.

ECE 340 Semiconductor Electronics credit: 3 Hours.
Modern device electronics: semiconductor fundamentals including crystals and energy bands, charge carriers (electrons and holes), doping, and transport, (drift and diffusion); unipolar devices with the MOS field effect transistor as a logic device and circuit considerations; basic concepts of generation-recombination and the P-N junction as capacitors and current rectifier with applications in photonics; bipolar transistors as amplifiers and switching three-terminal devices. Prerequisite: ECE 210; PHYS 214; credit or concurrent registration in ECE 329.

ECE 342 Electronic Circuits credit: 3 Hours.
Analysis and design of analog and digital electronic circuits using MOS field effect transistors and bipolar junction transistors, with emphasis on amplifiers in integrated circuits. Credit is not given for both ECE 342 and PHYS 404. Prerequisite: ECE 210.

ECE 343 Electronic Circuits Laboratory credit: 1 Hour.
Companion laboratory for ECE 342. Credit is not given for both ECE 343 and PHYS 404. Prerequisite: Credit or concurrent registration in ECE 342.

ECE 345 Design and Innovation credit: 2 Hours.
Students identify a suitable project, build a team, and explore the feasibility and potential solution space for the selected project area. The intellectual structure of the engineering design process is studied in detail in order to encapsulate the ideation and problem identification aspects of engineering senior design and facilitate student innovation. Same as TE 345. May be repeated in separate terms to a maximum of 4 hours.

ECE 350 Fields and Waves II credit: 3 Hours.
Continuation of ECE 329: radiation theory; antennas, radiation fields, radiation resistance and gain; transmitting arrays; plane-wave approximation of radiation fields; plane-wave propagation, reflection, and transmission; Doppler effect, evanescent waves and tunneling, dispersion, phase and group velocities; waveguides and resonant cavities; antenna reception and link budgets. Prerequisite: ECE 329.

ECE 361 Digital Communications credit: 3 Hours.
Reliable communication of one bit of information over three types of channels: additive Gaussian noise, wireline, and wireless. Emphasis on the impact of bandwidth and power on the data rate and reliability, using discrete-time models. Technological examples used as case studies. Prerequisite: ECE 210 and ECE 313.
ECE 374  Introduction to Algorithms & Models of Computation  credit: 4 Hours.
Same as CS 374. See CS 374.

ECE 380  Biomedical Imaging  credit: 3 Hours.
Physics and engineering principles associated with x-ray, computed tomography, nuclear, ultrasound, magnetic resonance, and optical imaging, including human visualization and perception of image data. Same as BIOE 380. Prerequisite: MATH 285 or MATH 286.

ECE 385  Digital Systems Laboratory  credit: 3 Hours.
Design, build, and test digital systems using transistor-transistor logic (TTL), SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output and display, timing analysis, design tradeoffs, synchronous and asynchronous design methods, datapath and controller, microprocessor design, software/hardware co-design, and system-on-a-chip. Prerequisite: ECE 110 and ECE 220.

ECE 391  Computer Systems Engineering  credit: 4 Hours.
Concepts and abstractions central to the development of modern computing systems, with an emphasis on the systems software that controls interaction between devices and other hardware and application programs. Input-output semantics; synchronization; interrupts; multitasking; virtualization of abstractions. Term-based projects. Credit is not given for both ECE 391 and CS 241. Prerequisite: ECE 220 or CS 233.

ECE 395  Advanced Digital Projects Lab  credit: 2 or 3 Hours.
Planning, designing, executing, and documenting a microcomputer-based project. Emphasis on hardware but special projects may require an equal emphasis on software. Prerequisite: ECE 385.

ECE 396  Honors Project  credit: 1 to 4 Hours.
Special project or reading course for James Scholars in engineering. May be repeated. Prerequisite: Consent of instructor.

ECE 397  Individual Study in ECE  credit: 0 to 4 Hours.
Individual Projects. Approved for both letter and S/U grading. May be repeated. Prerequisite: Consent of instructor. Approved written application to department as specified by department or instructor is required.

ECE 398  Special Topics in ECE  credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in electrical and computer engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. Approved for both letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ECE 399  Honors Seminar  credit: 1 to 4 Hours.
Special lecture sequences or discussion groups arranged each term to bring James Scholars in engineering into direct contact with the various aspects of engineering practices and philosophy. For Computer Engineering and Electrical Engineering majors with senior standing. Prerequisite: Consent of instructor.

ECE 401  Signal and Image Analysis  credit: 4 Hours.
An introduction to signal analysis and processing methods for advanced undergraduates or graduate students in the biological, physical, social, engineering and computer sciences. Signal analysis methods and their capabilities, weaknesses, and artifacts with an emphasis on their practical application. Significant hands-on processing and interpretation of real data using MATLAB. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ECE 310 and ECE 401. Prerequisite: MATH 220.

ECE 402  Electronic Music Synthesis  credit: 3 Hours.
Historical survey of electronic and computer music technology; parameters of musical expression and their codification; analysis and synthesis of fixed sound spectra; time-variant spectrum analysis/synthesis of musical sounds; algorithms for dynamic sound synthesis. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 310.

ECE 403  Audio Engineering  credit: 3 Hours.
Resonance and wave phenomena; Acoustics of rooms and transmission lines (e.g., horns): How loudspeakers work: A lab component has been added to measure and model real loudspeakers and enclosures; Topics in digital audio, including AD and DA (Sigma-Delta) audio converters. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 210 and ECE 310.

ECE 408  Applied Parallel Programming  credit: 4 Hours.
Parallel programming with emphasis on developing applications for processors with many computation cores. Computational thinking, forms of parallelism, programming models, mapping computations to parallel hardware, efficient data structures, paradigms for efficient parallel algorithms, and application case studies. Same as CS 483 and CSE 408. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 220.

ECE 411  Computer Organization & Design  credit: 4 Hours.
Basic computer organization and design: integer and floating-point computer arithmetic; control unit design; pipelining; system interconnect; memory organization; I/O design; reliability and performance evaluation. Laboratory for computer design implementation, simulation, and layout. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 391 or CS 241.

ECE 412  Microcomputer Laboratory  credit: 3 Hours.
Design, construction, and use of a small general-purpose computer with a micro-processor CPU; MSI and LSI circuits used extensively; control panel, peripheral controllers, control logic, central processor, and programming experiments. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 385; ECE 391 or CS 233. Recommended: Credit or concurrent registration in ECE 411.

ECE 414  Biomedical Instrumentation  credit: 3 Hours.
Same as BIOE 414. See BIOE 414.

ECE 415  Biomedical Instrumentation Lab  credit: 2 Hours.
Same as BIOE 415. See BIOE 415.

ECE 416  Biosensors  credit: 3 Hours.
Underlying engineering principles used to detect small molecules, DNA, proteins, and cells in the context of applications in diagnostic testing, pharmaceutical research, and environmental monitoring. Biosensor approaches including electrochemistry, fluorescence, acoustics, and optics; aspects of selective surface chemistry including methods for biomolecule attachment to transducer surfaces; characterization of biosensor performance; blood glucose detection; fluorescent DNA microarrays; label-free biochips; bead-based assay methods. Case studies and analysis of commercial biosensor. Same as BIOE 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329.

ECE 417  Multimedia Signal Processing  credit: 4 Hours.
Characteristics of speech and image signals; important analysis and synthesis tools for multimedia signal processing including subspace methods, Bayesian networks, hidden Markov models, and factor graphs; applications to biometrics (person identification), human-computer interaction (face and gesture recognition and synthesis), and audio-visual databases (indexing and retrieval). Emphasis on a set of MATLAB machine problems providing hands-on experience. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310 and ECE 313.

Information listed in this catalog is current as of 04/2018

University of Illinois at Urbana-Champaign
1119
ECE 418 Image & Video Processing credit: 4 Hours.
Concepts and applications in image and video processing; introduction to multidimensional signal processing: sampling, Fourier transform, filtering, interpolation, and decimation; human visual perception; scanning and display of images and video; image enhancement, restoration and segmentation; digital image and video compression; image analysis. Laboratory exercises promote experience with topics and development of C and MATLAB programs. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310; credit or concurrent registration in one of ECE 313, STAT 400, IE 300, MATH 461; MATH 415; experience with C programming language.

ECE 419 Security Laboratory credit: 3 or 4 Hours.
Same as CS 460. See CS 460.

ECE 420 Embedded DSP Laboratory credit: 2 Hours.
Development of real-time digital signal processing (DSP) systems using a DSP microprocessor; several structured laboratory exercises, such as sampling and digital filtering; followed by an extensive DSP project of the student's choice. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 310.

ECE 422 Computer Security I credit: 4 Hours.
Same as CS 461. See CS 461.

ECE 424 Computer Security II credit: 3 or 4 Hours.
Same as ECE 463. See CS 463.

ECE 425 Intro to VLSI System Design credit: 3 Hours.
Complementary Metal-Oxide Semiconductor (CMOS) technology and theory; CMOS circuit and logic design; layout rules and techniques; circuit characterization and performance estimation; CMOS subsystem design; Very-Large-Scale Integrated (VLSI) systems design methods; VLSI Computer Aided Design (CAD) tools; workstation-based custom VLSI chip design using concepts of cell hierarchy; final project involving specification, design, and evaluation of a VLSI chip or VLSI CAD program; written report and oral presentation on the final project. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 385 and ECE 411; or CS 233.

ECE 428 Distributed Systems credit: 3 or 4 Hours.
Same as ECE 425. See CS 425.

ECE 431 Electric Machinery credit: 4 Hours.
Theory and laboratory experimentation with three-phase power, power-factor correction, single- and three-phase transformers, induction machines, DC machines, and synchronous machines; project work on energy control systems; digital simulation of machine dynamics. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 330.

ECE 432 Advanced Electric Machinery credit: 3 Hours.
Advanced rotating machine theory and practice: dynamic analysis of machines using reference frame transformations; tests for parameter determination; reduced order modeling of machines; mechanical subsystems including governors, prime movers and excitation systems; digital simulation of inter-connected machines. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 431.

ECE 435 Computer Networking Laboratory credit: 3 or 4 Hours.
Design, application, analysis, and evaluation of communication network protocols under both Linux and Windows NT operating systems. Emphasis on identifying problems, proposing alternative solutions, implementing prototypes using available network protocols and evaluating results. Multiple programming team projects. Same as CS 436. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 438.

ECE 437 Sensors and Instrumentation credit: 3 Hours.
Hands-on exposure to fundamental technology and practical application of sensors. Capacitive, inductive, optical, electromagnetic, and other sensing methods are examined. Instrumentation techniques incorporating computer control, sampling, and data collection and analysis are reviewed in the context of real-world scenarios. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329.

ECE 438 Communication Networks credit: 3 or 4 Hours.
Same as CS 438. See CS 438.

ECE 439 Wireless Networks credit: 3 or 4 Hours.
Overview of wireless network architectures including cellular networks, local area networks, multi-hop wireless networks such as ad hoc networks, mesh networks, and sensor networks; capacity of wireless networks; medium access control, routing protocols, and transport protocols for wireless networks; mechanisms to improve performance and security in wireless networks; energy-efficient protocols for sensor networks. Same as CS 439. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 241 or ECE 391; one of MATH 461, MATH 463, ECE 313.

ECE 441 Physics & Modeling Semicond Dev credit: 3 Hours.
Advanced concepts including generation-recombination, hot electron effects, and breakdown mechanisms; essential features of small ac characteristics, switching and transient behavior of p-n junctions, and bipolar and MOS transistors; fundamental issues for device modeling; perspective and limitations of Si-devices. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340.

ECE 444 IC Device Theory & Fabrication credit: 4 Hours.
Fabrication lab emphasizing physical theory and design of devices suitable for integrated circuitry; electrical properties of semiconductors and techniques (epitaxial growth, oxidation, photolithography diffusion, ion implantation, metallization, and characterization) for fabricating integrated circuit devices such as p-n junction diodes, bipolar transistors, and field effect transistors. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 340.

ECE 445 Senior Design Project Lab credit: 4 Hours.
Individual design projects in various areas of electrical and computer engineering; projects are chosen by students with approval of instructor. A professionally kept lab notebook, a written report, prepared to journal publication standards, and an oral presentation required. 4 undergraduate hours. No graduate credit.

This course satisfies the General Education Criteria for:
Advanced Composition

ECE 446 Principles of Experimental Research in Electrical Engineering credit: 4 Hours.
Interdisciplinary approach to learning principles of experimental research. Focuses on: 1) experimental design 2) prevalent experimental techniques 3) data organization, analysis, and presentation and 4) scientific computing. Presentation methods explored include poster session, conference talk, and journal paper. Open-ended labs and a project reinforce concepts discussed in class. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 310, ECE 313, ECE 329, and MATH 415.

ECE 447 Active Microwave Ckt Design credit: 3 Hours.
Microwave circuit design of amplifiers, oscillators, and mixers. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350 and ECE 453.

ECE 448 Artificial Intelligence credit: 3 or 4 Hours.
Same as CS 440. See CS 440.
ECE 451  Adv Microwave Measurements  credit: 3 Hours.
Manual- and computer-controlled laboratory analysis of circuits at microwave frequencies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 452  Electromagnetic Fields  credit: 3 Hours.
Plane waves at oblique incidence; wave polarization; anisotropic media; radiation; space communications; waveguides. 3 graduate hours. Prerequisite: ECE 350.

ECE 453  Wireless Communication Systems  credit: 4 Hours.
Design of a radio system for transmission of information; modulation, receivers, impedance matching, oscillators, two-port network analysis, receiver and antenna noise, nonlinear effects, mixers, phase-locked loops. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329, credit or concurrent registration in ECE 342.

ECE 454  Antennas  credit: 3 Hours.
Antenna parameters; polarization of electromagnetic waves; basic antenna types; antenna arrays; broadband antenna design; antenna measurements. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 455  Optical Electronics  credit: 3 or 4 Hours.
Optical beams and cavities; semiclassical theory of gain; characteristics of typical lasers (gas, solid state, and semiconductor); application of optical devices. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECE 350 or PHYS 436.

ECE 456  Global Nav Satellite Systems  credit: 4 Hours.
Engineering aspects of space-based navigation systems, such as the Global Positioning System (GPS). Engineering and physical principles on which GPS operates, including orbital dynamics, electromagnetic wave propagation in a plasma, signal encoding, receiver design, error analysis, and numerical methods for obtaining a navigation solution. GPS as a case study for performing an end-to-end analysis of a complex engineering system. Laboratory exercises focus on understanding receiver design and developing a MATLAB-based GPS receiver. Same as AE 456. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329 and ECE 310 or AE 352 and AE 353.

ECE 457  Microwave Devices & Circuits  credit: 3 Hours.
Electromagnetic wave propagation, microwave transmission systems, passive components, microwave tubes, solid state microwave devices, microwave integrated circuits, S-parameter analysis, and microstrip transmission lines. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340 and ECE 350.

ECE 458  Applic of Radio Wave Propag  credit: 3 Hours.
Terrestrial atmosphere, radio wave propagation, and applications to radio sensing and radio communication. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 350.

ECE 459  Communications Systems  credit: 3 Hours.
Analog underpinning of analog and digital communication systems: representation of signals and systems in the time and frequency domains; analog modulation schemes; random processes; prediction and noise analysis using random processes; noise sensitivity and bandwidth requirements of modulation schemes. Brief introduction to digital communications. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 313.

ECE 460  Optical Imaging  credit: 4 Hours.
Scalar fields, geometrical optics, wave optics, Gaussian beams, Fourier optics, spatial and temporal coherence, microscopy, interference chromatic and geometric aberrations, Jones matrices, waveplates, electromagnetic fields, and electro-optic and acousto-optic effects. Laboratory covers numerical signal processing, spectroscopy, ray optics, diffraction, Fourier optics, microscopy, spatial coherence, temporal coherence, polarimetry, fiber optics, electro-optic modulation and acousto-optic modulation. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 329; credit or concurrent registration in ECE 313.

ECE 461  Digital Communications  credit: 3 Hours.
Reliable communication of one bit of information over three types of channels: additive Gaussian noise, wireline, and wireless. Emphasis on the impact of bandwidth and power on the data rate and reliability, using discrete-time models. Technological examples used as case studies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 210 and ECE 313.

ECE 462  Logic Synthesis  credit: 3 Hours.
Unate function theory, unate recursive paradigm, synthesis of two-level logic, synthesis of incompletely specified combinational logic, multi-level logic synthesis, binary decision diagrams, finite state machine synthesis, automatic test pattern generation and design for test, equivalence checking and reachability analysis of finite machines, and technology mapping. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 220 or CS 233.

ECE 463  Digital Communications Lab  credit: 2 Hours.
Hands-on experience in the configuration and performance evaluation of digital communication systems employing both radio and optical signals. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 361 or ECE 459.

ECE 464  Power Electronics  credit: 3 Hours.
Switching functions and methods of control such as pulse-width modulation, phase control, and phase modulation; dc-dc, ac-dc, dc-ac, and ac-ac power converters; power components, including magnetic components and power semiconductor switching devices. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.

ECE 465  Optical Communications Systems  credit: 3 Hours.
Fundamentals of lightwave systems: characterization of lightwave channels, optical transmitters, receivers, and amplifiers; quantum and thermal noise processes; design of optical receivers; multimode and single-mode link analysis. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 313 and ECE 350. Recommended: credit or concurrent registration in ECE 459 and ECE 466.

ECE 466  Optical Communications Lab  credit: 1 Hour.
Fiber components and measurements, transmitters and detectors, fiber amplifiers, multimode fiber links, and wavelength division multiplexing. 1 undergraduate hour. 1 graduate hour. Prerequisite: Credit or concurrent registration in ECE 465.

ECE 467  Biophotonics  credit: 3 Hours.
Overview of the field of biophotonics, in three segments: (1) fundamental principles of light, optics, lasers, biology, and medicine; (2) diagnostic biophotonics including imaging, spectroscopy, and optical biosensors; (3) therapeutic applications of biophotonics including laser ablation and photodynamic therapies. Reviews and presentations of current scientific literature by students. Tours of microscopy facilities. Same as BIOE 467. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of ECE 455, ECE 460, PHYS 402.
ECE 468 Optical Remote Sensing  credit: 3 Hours.
Optical sensors including single element and area arrays (CCDs); optical systems including imagers, spectrometers, interferometers, and lidar; optical principles and light gathering power; electromagnetics of atomic and molecular emission and scattering with applications to the atmosphere the prime example; applications to ground and spacecraft platforms. Four laboratory sessions (4.5 hours each) arranged during term in lieu of four lectures. Same as AE 468. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329, ECE 313.

ECE 469 Power Electronics Laboratory  credit: 2 Hours.
Circuits and devices used for switching power converters, solid-state motor drives, and power controllers; dc-dc, ac-dc, and dc-ac converters and applications; high-power transistors and magnetic components; design considerations including heat transfer. 2 undergraduate hours. 2 graduate hours. Prerequisite: ECE 343; credit or concurrent registration in ECE 464.

ECE 470 Introduction to Robotics  credit: 4 Hours.
Fundamentals of robotics including rigid motions; homogeneous transformations; forward and inverse kinematics; velocity kinematics; motion planning; trajectory generation; sensing, vision, control. Same as AE 482 and ME 445. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of MATH 225, MATH 286, MATH 415, MATH 418.

ECE 472 Biomedical Ultrasound Imaging  credit: 3 Hours.
Theoretical and engineering foundations of ultrasonic imaging for medical diagnostics. Conventional, Doppler, and advanced ultrasonic imaging techniques; medical applications of different ultrasonic imaging techniques; engineering problems related to characterization of ultrasonic sources and arrays, image production, image quality, the role of contrast agents in ultrasonic imaging, and system design. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329.

ECE 473 Fund of Engr Acoustics  credit: 3 or 4 Hours.
Development of the basic theoretical concepts of acoustical systems; mechanical vibration, plane and spherical wave phenomena in fluid media, lumped and distributed resonant systems, and absorption phenomena and hearing. Same as TAM 413. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MATH 285 or MATH 286.

ECE 476 Power System Analysis  credit: 3 Hours.
Development of power system equivalents by phase network analysis, load flow, symmetrical components, sequence networks, fault analysis, and digital simulation. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 330.

ECE 478 Formal Software Devel Methods  credit: 3 or 4 Hours.
Same as CS 477. See CS 477.

ECE 480 Magnetic Resonance Imaging  credit: 3 or 4 Hours.
Fundamental physical, mathematical, and computational principles governing the data acquisition and image reconstruction of magnetic resonance imaging. Same as BIOE 480. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Recommended: ECE 310.

ECE 481 Nanotechnology  credit: 4 Hours.
Fundamental physical properties of nanoscale systems. Nanofabrication techniques, semiconductor nanotechnology, molecular and biomolecular nanotechnology, carbon nanotechnology (nanotubes and graphene), nanowires, and nanoscale architectures and systems. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of CHEM 442, CHBE 457, ME 485, MSE 401, PHYS 460.

ECE 482 Digital IC Design  credit: 3 Hours.
Bipolar and MOS field effect transistor characteristics; VLSI fabrication techniques for MOS and bipolar circuits; calculation of circuit parameters from the process parameters; design of VLSI circuits such as logic, memories, charge-coupled devices, and A/D and D/A converters. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.

ECE 483 Analog IC Design  credit: 3 Hours.
Basic linear integrated circuit design techniques using bi-polar, JFET, and MOS technologies; operational amplifiers; wide-band feedback amplifiers; sinusoidal and relaxation oscillators; electric circuit noise; application of linear integrated circuits. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 342.

ECE 484 Prin Adv Microelec Processing  credit: 3 Hours.
Principles of advanced methods of pattern delineation, pattern transfer, and modern material growth; how these are applied to produce novel and high performance devices and circuits in various electronic materials with special emphasis on semiconductors. Computer simulation of processes and the manufacturing of devices and circuits. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 444.

ECE 485 MEMS Devices & Systems  credit: 3 Hours.
Introduction to principles, fabrication techniques, and applications of microelectromechanical systems (MEMS). In-depth analysis of sensors, actuator principles, and integrated microfabrication techniques for MEMS. Comprehensive investigation of state-of-the-art MEMS devices and systems. Same as ME 485. 3 undergraduate hours. 3 graduate hours.

ECE 486 Control Systems  credit: 4 Hours.
Analysis and design of control systems with emphasis on modeling, state variable representation, computer solutions, modern design principles, and laboratory techniques. 4 undergraduate hours. 4 graduate hours. Prerequisite: ECE 210.

ECE 487 Intro Quantum Electr for EEs  credit: 3 Hours.
Application of quantum mechanical concepts to electronics problems; detailed analysis of a calculable two-state laser system; incidental quantum ideas bearing on electronics. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 485.

ECE 488 Compound Semicond & Devices  credit: 3 Hours.
Advanced semiconductor materials and devices; elementary band theory; heterostructures; transport issues; three-terminal devices; two-terminal devices; including lasers and light modulators. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340 and ECE 350.

ECE 489 Robot Dynamics and Control  credit: 4 Hours.
Same as ME 446 and SE 422. See SE 422.

ECE 490 Introduction to Optimization  credit: 3 or 4 Hours.
Basic theory and methods for the solution of optimization problems; iterative techniques for unconstrained minimization; linear and nonlinear programming with engineering applications. Same as CSE 441. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECE 220 and MATH 415.

ECE 491 Numerical Analysis  credit: 3 or 4 Hours.
Same as CS 450, CSE 401 and MATH 450. See CS 450.

ECE 492 Parallel Progrmg: Sci & Engr  credit: 3 or 4 Hours.
Same as CS 420 and CSE 402. See CS 420.

ECE 493 Advanced Engineering Math  credit: 3 or 4 Hours.
Same as MATH 487. See MATH 487.
ECE 495 Photonic Device Laboratory credit: 3 Hours.
Active photonic devices and lightwave technology. Hands-on experience with several classes of lasers (HeNe laser, semiconductor edge emitting lasers, vertical cavity surface emitting lasers), photodetectors, and photonic systems. Familiarization with experimental optical characterization techniques and equipment. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 487 recommended.

ECE 496 Senior Research Project credit: 2 Hours.
Individual research project under the guidance of a faculty member: for example, mathematical analysis, laboratory experiments, computer simulations, software development, circuit design, or device fabrication. Preparation of a written research proposal, including preliminary results. 2 undergraduate hours. No graduate credit. May be repeated. ECE 496 and ECE 499 taken in sequence fulfill the Advanced Composition Requirement. Prerequisite: RHET 105; consent of instructor. This course satisfies the General Education Criteria for: Advanced Composition

ECE 498 Special Topics in ECE credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in electrical and computer engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 0 to 4 undergraduate hours. 0 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

ECE 499 Senior Thesis credit: 2 Hours.
Completion of the research project begun under ECE 496. Preparation and oral presentation of a written thesis that reports the results of the project. 2 undergraduate hours. No graduate credit. To fulfill the Advanced Composition Requirement, credit must be earned for both ECE 496 and ECE 499. Prerequisite: ECE 496 and consent of instructor. This course satisfies the General Education Criteria for: Advanced Composition

ECE 500 ECE Colloquium credit: 0 Hours.
Required of all graduate students. Approved for S/U grading only.

ECE 508 Manycore Parallel Algorithms credit: 4 Hours.
Algorithm techniques for enhancing the scalability of parallel software: scatter vs. gather, problem decomposition, spatial sorting and binning, privatization for reduced conflicts, tiling for data locality, regularization for improved load balance, compaction to conserve memory bandwidth, double-buffering to overlap latencies, and data layout for improved efficiency of DRAM accesses. Same as CS 508. 4 graduate hours. No professional credit. Prerequisite: ECE 408 or CS 420.

ECE 510 Micro and Nanolithography credit: 4 Hours.
Comprehensive foundation in the broad field of micro and nanolithography; the science of optical imaging, photochemistry, and materials issues; technological developments including state-of-the-art commercial lithography systems. Applications of micro and nanolithography to diverse fields including: semiconductor devices, displays, flexible electronics, microelectromechanical systems, and biotechnology. Prerequisite: One of ECE 444, ECE 460, MSE 462, NPRE 429, PHYS 402.

ECE 511 Computer Architecture credit: 4 Hours.
Advanced concepts in computer architecture: design, management, and modeling of memory hierarchies; stack-oriented processors; associative processors; pipelined computers; and multiple processor systems. Emphasis on hardware alternatives in detail and their relation to system performance and cost. Same as CSE 521. Prerequisite: ECE 411 or CS 433.

ECE 512 Computer Microarchitecture credit: 4 Hours.
Design of high performance computer systems; instruction level concurrency; memory system implementation; pipelining, superscalar, and vector processing; compiler back-end code optimization; profile assisted code transformations; code generation and machine dependent code optimization; cache memory design for multiprocessors; synchronization implementation in multiprocessors; compatibility issues; technology factors; state-of-the-art commercial systems. Prerequisite: ECE 511 and CS 426.

ECE 513 Vector Space Signal Processing credit: 4 Hours.
Mathematical tools in a vector space framework, including: finite and infinite dimensional vector spaces, Hilbert spaces, orthogonal projections, subspace techniques, least-squares methods, matrix decomposition, conditioning and regularizations, bases and frames, the Hilbert space of random variables, random processes, iterative methods; applications in signal processing, including inverse problems, filter design, sampling, interpolation, sensor array processing, and signal and spectral estimation. Prerequisite: ECE 310, ECE 313, and MATH 415.

ECE 515 Control System Theory & Design credit: 4 Hours.
Feedback control systems emphasizing state space techniques. Basic principles, modeling, analysis, stability, structural properties, optimization, and design to meet specifications. Same as ME 540. Prerequisite: ECE 486.

ECE 517 Nonlinear & Adaptive Control credit: 4 Hours.
Design of nonlinear control systems based on stability considerations; Lyapunov and hyperstability approaches to analysis and design of model reference adaptive systems; identifiers, observers, and controllers for unknown plants. Prerequisite: ECE 515.

ECE 518 Adv Semiconductor Nanotech credit: 4 Hours.
Semiconductor nanotechnology from the formation and characterization of low-dimensional structures to device applications. Compound semiconductors, epitaxial growth, quantum dots, nanowires, membranes, strain effects, quantum confinement, surface states, 3D transistors, nanolasers, multijunction tandem solar cells, and nanowire thermoelectrics. Handouts are supplemented with papers from the research literature. Critical literature review assignments, research proposals in National Science Foundation format, and oral presentations are required. Prerequisites: ECE 340, ECE 444, and ECE 481.

ECE 519 Hardware Verification credit: 4 Hours.
This course teaches algorithms for verification that are applied to very large scale hardware in the chip design industry. The course teaches symbolic model checking, Binary decision diagrams (BDDs), satisfiability (SAT) based algorithms, symbolic simulation, coverage metrics for simulation, automatic assertion generation, analog circuit verification and post silicon validation algorithms. The course teaches scalable search algorithms that can be applied to discrete and continuous space models. Same as CS 585. 4 graduate hours. No professional credit.

ECE 520 EM Waves & Radiating Systems credit: 4 Hours.
Fundamental electromagnetic theory with applications to plane waves, waveguides, cavities, antennas, and scattering; electromagnetic principles and theorems; and solution of electromagnetic boundary-value problems.

ECE 523 Gaseous Electronics & Plasmas credit: 4 Hours.
Basic concepts and techniques, both theoretical and experimental, applicable to gaseous electronics, gas and solid plasmas, controlled fusion, aeronomy, gas lasers, and magnetohydrodynamics. Prerequisite: ECE 452 or PHYS 485.
ECE 524 Advanced Computer Security credit: 4 Hours.
Same as CS 563. See CS 563.

ECE 526 Distributed Algorithms credit: 4 Hours.
Theoretical aspects of distributed algorithms, with an emphasis on formal proofs of correctness and theoretical performance analysis. Algorithms for consensus, clock synchronization, mutual exclusion, debugging of parallel programs, peer-to-peer networks, and distributed function computation; fault-tolerant distributed algorithms; distributed algorithms for wireless networks. Same as CS 539; 4 graduate hours. No professional credit. Prerequisite: One of CS 473, ECE 428, ECE 438.

ECE 527 System-On-Chip Design credit: 4 Hours.
System-on-chip (SOC) design methodology and IP (intellectual property) reuse, system modeling and analysis, hardware/software co-design, behavioral synthesis, embedded software, reconfigurable computing, design verification and test, and design space exploration. Class projects focusing on current SOC design and research. Platform FPGA boards and digital cameras are provided to prototype, test, and evaluate SOC designs. Prerequisite: ECE 391 and ECE 425.

ECE 528 Analysis of Nonlinear Systems credit: 4 Hours.
Nonlinear dynamics, vector fields and flows, Lyapunov stability theory, regular and singular perturbations, averaging, integral manifolds, input-output and input-to-state stability, and various design applications in control systems and robotics. Same as ME 546 and SE 520; 4 graduate hours. No professional credit. Prerequisite: ECE 515 and MATH 444 or MATH 447.

ECE 530 Large-Scale System Analysis credit: 4 Hours.
Fundamental techniques for the analysis of large-scale electrical systems, including methods for nonlinear and switched systems. Emphasis on the importance of the structural characteristics of such systems. Key aspects of static and dynamic analysis methods. Prerequisite: ECE 464 and ECE 476.

ECE 531 Theory of Guided Waves credit: 4 Hours.
Propagation of electromagnetic waves in general cylindrical waveguides; stationary principles; non-uniform inhomogeneously filled waveguides; mode and power orthogonality; losses in waveguides; analytical and numerical techniques; microwave integrated circuits waveguides; optical waveguides. Prerequisite: ECE 520. Recommended: MATH 556.

ECE 532 Compnd Semicond & Diode Lasers credit: 4 Hours.
Compound semiconductor materials and their optical properties. Diode lasers including quantum well heterostructure lasers, strained layer lasers, and quantum wire and quantum dot lasers. Current topics in diode laser development. Prerequisite: ECE 340 and PHYS 486. Recommended: ECE 455; credit or concurrent registration in ECE 536.

ECE 534 Random Processes credit: 4 Hours.
Basic concepts of random processes; linear systems with random inputs; Markov processes; spectral analysis; Wiener and Kalman filtering; applications to systems engineering. Prerequisite: One of ECE 313, MATH 461, STAT 400.

ECE 535 Theory of Semicond & Devices credit: 4 Hours.
Introductory quantum mechanics of semiconductors; energy bands; dynamics of Block electrons in static and high-frequency electric and magnetic fields; equilibrium statistics; transport theory, diffusion, drift, and thermoelectric effects; characteristics of p-n junctions, heterojunctions, and transistor devices. Same as PHYS 565. Prerequisite: Senior-level course in quantum mechanics or atomic physics.

ECE 536 Integ Optics & Optoelectronics credit: 4 Hours.
Integrated optical and optoelectronic devices; theory of optical devices including laser sources, waveguides, photodetectors, and modulations of these devices. Prerequisite: One of ECE 455, ECE 487, PHYS 486. Recommended: ECE 488.

ECE 537 Speech Processing Fundamentals credit: 4 Hours.
Development of an intuitive understanding of speech processing by the auditory system, in three parts. I): The theory of acoustics of speech production, introductory acoustic phonetics, inhomogeneous transmission line theory (and reflectance), room acoustics, the short-time Fourier Transform (and its inverse), and signal processing of speech (LPC, CELP, VQ). II): Psychoacoustics of speech perception, critical bands, masking (JNDS), and the physiology of the auditory pathway (cochlear modeling). III): Information theory entropy, channel capacity, the confusion matrix, state models, EM algorithms, and Bayesian networks. Presentation of classic papers on speech processing and speech perception by student groups. MATLAB (or equivalent) programming in majority of assignments. Prerequisite: ECE 310.

ECE 539 Adv Theory Semicond & Devices credit: 4 Hours.
Advanced topics of current interest in the physics of semiconductors and solid-state devices. Prerequisite: ECE 535.

ECE 540 Computational Electromagnetics credit: 4 Hours.
Basic computational techniques for numerical analysis of electromagnetics problems, including the finite difference, finite element, and moment methods. Emphasis on the formulation of physical problems into mathematical boundary-value problems, numerical discretization of continuous problems into discrete problems, and development of rudimentary computer codes for simulation of electromagnetic fields in engineering problems using each of these techniques. Same as CSE 530. Prerequisite: CS 357; credit or concurrent registration in ECE 520.

ECE 541 Computer Systems Analysis credit: 4 Hours.
Development of analytical models of computer systems and application of such models to performance evaluation: scheduling policies, paging algorithms, multiprogrammed resource management, and queuing theory. Same as CS 541. Prerequisite: One of ECE 313, MATH 461, MATH 463.

ECE 542 Fault-Tolerant Dig Syst Design credit: 4 Hours.
Advanced concepts in hardware and software fault tolerance: fault models, coding in computer systems, module and system level fault detection mechanism, reconfiguration techniques in multiprocessor systems and VLSI processor arrays, and software fault tolerance techniques such as recovery blocks, N-version programming, checkpointing, and recovery; survey of practical fault-tolerant systems. Same as CS 536. Prerequisite: ECE 411.

ECE 543 Statistical Learning Theory credit: 4 Hours.
Advanced graduate course on modern probabilistic theory of adaptive and learning systems. The following topics will be covered; basics of statistical decision theory; concentration inequalities; supervised and unsupervised learning; empirical risk minimization; complexity-regularized estimation; generalization bounds for learning algorithms; VC dimension and Rademacher complexities; minimax lower bounds; online learning and optimization. Along with the general theory, the course will discuss applications of statistical learning theory to signal processing, information theory, and adaptive control. Basic prerequisites include probability and random processes, calculus, and linear algebra. Other necessary material and background will be introduced as needed. 4 graduate hours. No professional credit. Prerequisite: ECE 534 or equivalent.
Information listed in this catalog is current as of 04/2018
ECE 562 **Advanced Digital Communication** credit: 4 Hours.
Digital communication systems modulation, demodulation, signal space methods, channel models, bit error rate, spectral occupancy, synchronization, equalization, trellis-coded modulation, wireless channels, multiantenna systems, spread spectrum, and orthogonal frequency modulation. Prerequisite: ECE 361 or ECE 459.

ECE 563 **Information Theory** credit: 4 Hours.
Mathematical models for channels and sources; entropy, information, data compression, channel capacity, Shannon's theorems, and rate-distortion theory. Prerequisite: One of ECE 534, MATH 464, MATH 564.

ECE 564 **Modern Light Microscopy** credit: 4 Hours.
Current research topics in modern light microscopy: optics principles (statistical optics, Gaussian optics, elastic light scattering, dynamic light scattering); traditional microscopy (bright field, dark field, DIC, phase contract, confocal, epi-fluorescence, confocal fluorescence); current research topics (multiphoton, CARS, STED, FRET, FIONA, STORM, PALM, quantitative phase). Prerequisite: One of ECE 460, MSE 405, PHYS 402.

ECE 565 **Energy Dissipation Electronics** credit: 4 Hours.
Power dissipation in modern electronics, from fundamentals to system-level issues. Energy transfer through electrons and phonons, mobility and thermal conductivity, power dissipation in modern devices (CMOS, memory, nanowires, nanotubes), circuit leakage, thermal breakdown, interconnects, thermometry, heat sinks. Handouts are supplemented with papers from the research literature, Wikipedia assignments, a final conference-type group paper, and oral presentations required. Prerequisite: ECE 441.

ECE 566 **Computational Inference and Learning** credit: 4 Hours.
Computational inference and machine learning have seen a surge of interest in the last 15 years, motivated by applications as diverse as computer vision, speech recognition, analysis of networks and distributed systems, big-data analytics, large-scale computer simulations, and indexing and searching of very large databases. This course introduces the mathematical and computational methods that enable such applications. Topics include computational methods for statistical inference, sparsity analysis, approximate inference and search, and fast optimization. 4 graduate hours. No professional credit. Prerequisite: ECE 490, ECE 534.

ECE 567 **Communication Network Analysis** credit: 4 Hours.
Performance analysis and design of multiple-user communication systems; emphasis on rigorous formulation and analytical and computational methods; includes queuing networks, decentralized minimum delay routing, and dynamic network flow control. Prerequisite: CS 438; one of ECE 534, MATH 464, MATH 564.

ECE 568 **Model & Cntrl Electromech Syst** credit: 4 Hours.
Fundamental electrical and mechanical laws for derivation of machine models; simplifying transformations of variables in electrical machines; power electronics for motor control; time-scale separation; feedback linearization and nonlinear control as applied to electrical machines. Typical electromechanical applications in actuators, robotics, and variable speed drives. Prerequisite: ECE 431 and ECE 515.

ECE 569 **Inverse Problems in Optics** credit: 4 Hours.
Physical optics, solution of linear inverse problems, and computed imaging. Forward problems in diffraction, asymptotics, ray propagation, x-ray projections, scattering, sources, optical coherence tomography, and near-field optics. Solution of associated inverse problems including back-propagation, back-projection, Radon transforms (x-ray CT), inverse scattering, source localization, interferometric synthetic aperture microscopy, and near-field tomography. Special topics as time permits. Prerequisite: ECE 460.

ECE 570 **Nonlinear Optics** credit: 4 Hours.
Light propagation in anisotropic crystals; second- and third-order nonlinear susceptibility and electro-optic effect; discussion of the relationship of these effects along with such applications as light modulation, harmonic generation, and optical parametric amplification and oscillation. Prerequisite: ECE 520.

ECE 571 **EM Waves in Inhomogen Media** credit: 4 Hours.
Electromagnetic waves in layered media; plane wave expansion of electromagnetic point source field; Sommerfeld integrals; transient response; WKB method with asymptotic matching; scattering by junction discontinuity; surface integral equation; volume integral equation; inverse problems. Prerequisite: MATH 446, ECE 520 or PHYS 505.

ECE 572 **Quantum Opto-Electronics** credit: 4 Hours.
Theoretical approach to quantum mechanics and atomic physics, with many applications in spin resonance and modern maser theory. Prerequisite: PHYS 485 recommended.

ECE 573 **Power System Control** credit: 4 Hours.
Energy control center functions, state estimation and steady state security assessment techniques, economic dispatch, optimal power flow, automatic generation control, and dynamic equivalents. Prerequisite: ECE 476; credit or concurrent registration in ECE 530.

ECE 574 **Nanophotonics** credit: 4 Hours.
Nanoscale interaction between light and semiconductors, metals, or composites; plasmonics, cavity electrodymanics, polariton cavity condensation, sub-wavelength structures, metamaterials, and applications. Prerequisite: ECE 455 or ECE 572; ECE 487 or PHYS 486.

ECE 576 **Power System Dynm & Stability** credit: 4 Hours.
Detailed modeling of the synchronous machine and its controls, such as excitation system and turbine-governor dynamics; time-scales and reduced order models; non-linear and linear multi-machine models; stability analysis using energy functions; power system stabilizers. Prerequisite: ECE 476; credit or concurrent registration in ECE 530.

ECE 577 **Advanced Antenna Theory** credit: 4 Hours.
Selected topics from recent engineering literature on antennas supplemented by advanced topics in electromagnetic theory needed for comprehension; current techniques for analysis of wire, slot, horn, frequency independent, quasi-optical, and array antennas. Prerequisite: ECE 520.

ECE 579 **Computational Complexity** credit: 4 Hours.
Same as CS 579. See CS 579.

ECE 580 **Optimiz by Vector Space Methods** credit: 4 Hours.
Normed, Banach, and Hilbert spaces; applications of the projection theorem and the Hahn-Banach Theorem to problems of minimum norm, least squares estimation, mathematical programming, and optimal control; the Kuhn-Tucker Theorem and Pontryagin's maximum principle; iterative methods. Prerequisite: MATH 415 or MATH 482; MATH 447.

ECE 581 **Advanced Analog IC Design** credit: 4 Hours.
Advanced topics in modern analog IC design. Emphasis on CMOS building blocks and circuit techniques as a result of fabrication technology advancement. Noise in linear analog circuits; linear feedback theory and stability; harmonic distortion in weakly nonlinear circuits; switched-capacitor circuit technique and realization; Nyquist-rate and oversampled data converters. Extensive computer simulations required in both homework and final project. Prerequisite: ECE 310 and ECE 483.
ECE 582 Physical VLSI Design  credit: 4 Hours.
Basic physical design requirements for VLSI; performance-oriented formulation and optimization of chip partitioning, module placement and interconnection; optimized design and layout of on-chip modules; circuit extraction; high-speed VLSI circuits; yield and reliability analysis; advanced VLSI packaging and parametric testing. Prerequisite: ECE 425 or ECE 482.

ECE 584 Embedded System Verification  credit: 4 Hours.
Examines formal analysis an synthesis approaches for discrete, continuous, and hybrid models of computing systems and their physical environment. Introduces timed and hybrid automata models. Analysis techniques including model checking, Hoare-style deduction, and abstractions for safety and stability, and controller synthesis strategies with applications in distributed robotics, automobile system, traffic control, and real-time systems. Same as CS 584. 4 graduate hours. No professional credit. Prerequisite: CS 476 or CS 477.

ECE 585 MOS Device Modeling & Design  credit: 4 Hours.
Techniques for characterizing gate oxide and interface properties and reliability, I-V models for circuit simulation, design for control of short channel effects, silicon-on-insulator, and new device structures. Prerequisite: ECE 441.

ECE 586 Topics in Decision and Control  credit: 4 Hours.
Lectures and discussions related to advanced topics and new areas of interest in decision and control theory; hybrid, sampled-data, and fault tolerant systems; control over networks; vision-based control; system estimation and identification; dynamic games. May be repeated up to 12 hours within a term, and up to 20 hours total for the course. Credit towards a degree from multiple offerings of this course is not given if those offerings have significant overlap, as determined by the ECE department. Prerequisite: As specified each term. It is expected that each offering will have a 500-level course as prerequisite or corequisite.

ECE 588 Electricity Resource Planning  credit: 4 Hours.
Techniques in electricity resource planning including methodologies for reliability evaluation and assessment, production costing, marginal costing, supply-side and demand-side planning, integrated planning, and planning under competition. Prerequisite: MATH 415, ECE 313, and ECE 476.

ECE 590 Grad Sem in Special Topics  credit: 0 to 2 Hours.
Lectures and discussions on current research and literature on advanced topics in electrical engineering. Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

ECE 594 Math Models of Language  credit: 3 or 4 Hours.
Mathematical models of linguistic structure and their implementation in computational algorithms used in automatic speech understanding and speech synthesis. Statistical and automata-theoretic techniques are studied allowing a quantitative description of acoustic-phonetics, phonology, phonotactics, lexicons, syntax, and semantics. The methods are used to build components of a speech understanding system. For 4 hours credit, an extended project is required. Prerequisite: ECE 537.

ECE 596 Master’s Project  credit: 1 to 8 Hours.
Individual or team projects in electrical and computer engineering emphasizing advanced engineering analysis and design. May be repeated to a maximum of 16 hours.

ECE 597 Individual Study in ECE  credit: 1 to 8 Hours.
Individual projects. Approved written application to department as specified by department or instructor is required. May be repeated. Prerequisite: Consent of instructor.

ECE 598 Special Topics in ECE  credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in electrical and computer engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

ECE 599 Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Engineering (ENG)

ENG Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ENG)

Courses

ENG 100 Engineering Orientation  credit: 0 Hours.
Orientation required of new freshmen in the College of Engineering. Approved for S/U grading only.

ENG 101 Engineering at Illinois  credit: 1 Hour.
Introduction to undergraduate programs of study available in the College of Engineering and the potential careers of graduates of those programs. Intended for Division of General Studies students who may be interested in becoming an Engineering major or other students who wish to explore engineering careers. Approved for S/U grading only.

ENG 191 International Dimens of Engrg  credit: 1 Hour.
Global views of the engineering profession presented by guest speakers. Key factors for success in global engineering practice, including industrial values, economics, politics, language, cultural values, and social trends. Development of individual plans to engage in international education to enhance career preparation.

ENG 198 Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in engineering intended to augment the existing curriculum. See Class Schedule or college course information for topics and prerequisites. Approved for both letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ENG 199 Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

ENG 201 Cooperative Engrg Seminar  credit: 0 Hours.
Discussion seminar addressing insights students have gained during co-op experiences. Presentations by co-op participants and discussion of presentation skills. Approved for S/U grading only. For on-campus Cooperative Education students only.

ENG 202 Cooperative Engrg Practice  credit: 0 Hours.
Full-time practice of engineering in an off-campus government, industrial or research laboratory environment. Written work report, on-line Experiential Learning Report, and on-line ABET report required. Approved for S/U grading only. May be repeated. Approval of the Director of College of Engineering Experiential Learning Programs required to enroll. For Cooperative Education students only.

ENG 210 Engineering Apprenticeship  credit: 0 Hours.
Part-time practice of engineering science in an on-campus research laboratory environment; summary report required. Approved for both letter and S/U grading. May be repeated.

ENG 261 Technology & Mgmt Seminar  credit: 1 Hour.
Same as BADM 261. See BADM 261.
ENG 298  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in engineering intended to augment the existing curriculum. See Class Schedule or college course information for topics and prerequisites. Approved for both letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ENG 299  Engineering Study Abroad  credit: 0 to 18 Hours.
Illinois credit placeholder for foreign study and mechanism to maintain continuous Illinois enrollment while studying abroad. A detailed proposal must be submitted by the student for approval by the student’s department and the college office prior to such study abroad. Final determination of credit and its application toward the degree is made by the college office after a review of the student’s work abroad. (Summer Session, 0 to 6 hours).

ENG 300  Engrg Transfer Orientation  credit: 0 Hours.
Orientation required of off-campus transfer students in the College of Engineering. Approved for S/U grading only.

ENG 310  Engineering Internship  credit: 0 Hours.
Full-time or part-time practice of engineering in an off-campus government, industrial, or research laboratory environment. Written work report, on-line Experiential Learning report and on-line ABET report required. Approved for S/U grading only. May be repeated.

ENG 315  Learning in Community  credit: 3 Hours.
Service-learning dedicated to benefiting nonprofit organizations. Learning through inquiry, acquisition of skills and knowledge to address projects, and development of project and team skills. Student teams work on a project of importance proposed by and in partnership with each organization. Projects vary by term. See Class Schedule. May be repeated in the same term to a maximum of 6 hours. May be repeated in separate terms to a maximum of 12 hours.

ENG 397  Undergraduate Research Abroad  credit: 1 to 4 Hours.
Research completed under faculty supervision at a location outside of the United States. Topics and type of assistance vary. No graduate credit. May be repeated in separate terms up to 6 hours. Prerequisite: Consent of instructor; Department and college approval of research plan submitted prior to enrollment. Not available to freshmen.

ENG 398  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in engineering intended to augment the existing curriculum. See Class Schedule or college course information for topics and prerequisites. Approved for both letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ENG 440  International Water Project I  credit: 3 Hours.
First of two courses that assists an international rural community in establishing a sustainable water system. Serve a developing community effectively by working closely with alumni mentors and professional advisors on conceptual design development. Have the opportunity to travel to Honduras during Winter Break. Open to students in all majors. Same as LAST 440. 3 undergraduate hours. No graduate credit.

ENG 441  Honduras Water Project II  credit: 3 Hours.
Second of two courses that assists an international rural community in establishing a holistic water system. Complete final engineering designs, project funding documents and governance guidance by working closely with alumni mentors and professional advisors. Open to students in all majors. Same as LAST 441. 3 undergraduate hours. No graduate credit. Prerequisite: ENG 440 or instructor approval.

ENG 451  Success in the Workplace  credit: 2 Hours.
Guided experiential learning that facilitates the development of professional skills for students participating in career-related internships. Basic business skills such as reading a financial statement and annual report, understanding contracts, and understanding corporate strategy. Interpersonal skills necessary to succeed in industry such as networking, leadership, and communication. 2 undergraduate hours. No graduate credit.

ENG 471  Seminar Energy & Sustain Engrg  credit: 1 Hour.
Challenges of developing energy systems and civil infrastructure that are sustainable in terms of resource availability, security, and environmental impact. Guest lecturers focus on: (i) global challenges – future energy demand, geologic sources of energy, climate change, energy-water nexus, energy and security; (ii) markets, policies and systems – economic incentives, policy and law, life cycle analyses; (iii) opportunities for change – CO2 sequestration, renewable power, bioenergy feedstocks, biofuels for transportation, energy use in buildings, advanced power conversion, the smart grid. 1 undergraduate hour. 1 graduate hour. Prerequisite: MATH 220 or MATH 221; one of CHEM 104, CHEM 204, PHYS 101, PHYS 211. Recommended: NPRE 201.

ENG 491  Interdisciplinary Design Proj  credit: 1 to 4 Hours.
Disciplined, multi-department, team-structured project design experience with an overall (or major phase) end-of-term completion date. Projects involve design specification through a proposal, analyses of cost and other tradeoffs among alternative designs, design review, fabrication and assembly, functional and environmental testing, and demonstrations (as applicable). Reports and presentations at the end of each term. Individual engineering activities as well as team responsibilities. 1 to 4 undergraduate hours. No graduate credit. Senior standing required. May be repeated. Credit toward the degree is determined by the student’s major department. Prerequisite: Consent of instructor.

ENG 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in engineering intended to augment the existing curriculum. See Class Schedule or college course information for topics and prerequisites. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated in the same or separate terms if topics vary.

ENG 510  Engineering Practice  credit: 0 Hours.
Engineering Practice is for engineering graduate students who are completing curricular practical training, either full-time or part-time, that is related to their major field of study and an integral or important part of their program of study. 0 graduate hours. No professional credit. Approved for S/U grading only. May be repeated.

ENG 571  Theory Energy & Sustain Engrg  credit: 3 or 4 Hours.
Mathematical, scientific, engineering, and economic bases needed to analyze sustainable energy systems and civil infrastructure. Evaluation of current practice and future development of (i) energy extraction and conversion processes from geological, biological, and non-biological resources; (ii) energy usage for transportation, in residential and commercial buildings, and by industry. 3 or 4 graduate hours. No professional credit. Prerequisite: Credit or concurrent registration in ENG 471.
ENGL 102 Intro to Drama credit: 3 Hours.  
Explores such topics as the history of dramatic form, the major dramatic genres, the dramatic traditions of various cultures, and key terms used in the analysis of dramatic works. Reading plays from the ancient Greeks to the contemporary theatre, students will be taught skills in close reading and literary interpretation. Students will consider the importance of performance, considering how meanings might be represented through visual and aural means.  
This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 103 Intro to Fiction credit: 3 Hours.  
An introduction to the study of literature and literary history at the university level. Explores such topics as: the historical role and place of fictional narratives, the idea of genre, relationships between context and meaning in fictional works. Student will develop a critical vocabulary for interpreting and analyzing narrative strategies. Credit is not given for both ENGL 103 and ENGL 109.  
This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 104 Intro to Film credit: 3 Hours.  
Thoughtful viewing of diverse films (in required weekly screenings), along with ample discussion and critical reading and writing, to gain understanding of cinematic expression and of film's capacity to entertain and to exert artistic and social influence. Same as MACS 104.  
This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 106 Literature and Experience credit: 3 Hours.  
Understanding of the relationship between literature and human experience through the study of significant, recurrent themes. May be repeated one time if topics vary.

ENGL 109 Intro to Fiction-ACP credit: 3 Hours.  
Introduction to critical analysis of prose fiction. Explores a wide range of short and long fiction across historical periods; examines narrative strategies such as plot, character, and point of view. Special emphasis placed on good literary critical writing. Course is similar to ENGL 103 except for the additional writing component. Credit is not given for both ENGL 109 and ENGL 103. Prerequisite: Completion of campus Composition I general education requirement.  
This course satisfies the General Education Criteria for: Advanced Composition Humanities - Lit Arts

ENGL 110 Intro Lit Study for Non-Majors credit: 3 Hours.  
Introduction to literary genres and literary interpretation, with an emphasis on close reading. For non-majors only.  
This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 112 Literature of Global Culture credit: 3 Hours.  
Through literature and films, studies the impact of historical change on individuals and on cultures, the breakdown of borders, the building of new hierarchies of domination and exploitation, the contact and collision between the local and the global, and the transnational and problematic processes of cultural globalization. Same as CWL 112.

ENGL 114 Bible as Literature credit: 3 Hours.  
Same as CWL 111 and REL 101. See REL 101.  
This course satisfies the General Education Criteria for: Humanities - Lit Arts
ENGL 115  Intro to British Literature  credit: 3 Hours.
Acquaints students with the rich diversity of British prose, poetry, and drama. As a basic introduction to English literature, the course explores a series of literary texts, often thematically related, which appeal to modern readers and at the same time provide interesting insights into the cultural attitudes and values of the periods which produced them. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

ENGL 116  Intro to American Literature  credit: 3 Hours.
Explores a sampling of literature written by American authors, including some combination of essays, narratives, drama, fiction, and poems from various periods in American literary history. Texts for reading and discussion will include literature representing a variety of gender and ethnic perspectives. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

ENGL 117  Shakespeare on Film  credit: 3 Hours.
Explores the ongoing reinterpretation and appropriation of Shakespeare plays in twentieth- and twenty-first century film. Expect to read around five plays and analyze two productions of each play, and to consider how Shakespeare can be transformed to meet different cultural and contextual demands of the screen. Lecture and discussion. Same as MACS 117.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ENGL 119  Literature of Fantasy  credit: 3 Hours.
Introduction to the rich traditions of fantasy writing in world literature. While the commercial category of fantasy post-Tolkien will often be the focal point, individual instructors may choose to focus on alternate definitions of the genre: literatures of the fantastic, the uncanny, and the weird; fantasy before the Enlightenment and the advent of realism; fantasy for young adult or child readers; and so on. Same as CWL 119.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ENGL 120  Science Fiction  credit: 3 Hours.
Introduction to the study of science fiction, the genre that has both contributed to scientific knowledge and attempted to make sense of the changes that have taken place in the world since the Enlightenment, the onset of industrialization, and the acceleration of technology. Texts are taken from a variety of literary and pop culture sources: pulps and magazines, novels and films, comics and TV shows.

ENGL 121  Introduction to Comics  credit: 3 Hours.
Introduction to graphic narratives—comic books, comic strips, graphic novels, manga, webcomics, and so on—from a diverse panoply of cultural, formal, and historical traditions.

ENGL 122  Swords, Sorcery & Sex: The Middle Ages in Popular Culture  credit: 3 Hours.
Explores the use of medievalism in contemporary popular culture. Instructors may draw from film, television, music, fiction, graphic novels, gaming, and other sources, and they approach the material from a variety of cultural, historical, and aesthetic traditions. The goal of the course will be to understand how the medieval periods of world cultures have been reinvented in modern times, and how modernity has been constructed in relation and in opposition to the medieval imaginary. Same as MDVL 122.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ENGL 150  Black Literature in America  credit: 3 Hours.
Same as AFRO 105. See AFRO 105. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 191  Freshman Honors Tutorial  credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars. May be repeated one time.
Prerequisite: Consent of honors advisor.

ENGL 198  Freshman Honors Seminar  credit: 4 Hours.
Introduction to the study of literature, with emphasis on individual work in fundamental problems of literary analysis; works studied are usually a combination either of short poems and short stories or of novels and plays. May be repeated one time if topics vary. Prerequisite: James Scholar standing or other designation as a superior student.

ENGL 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Topics course that varies each semester and by section. The topics offered each semester will be listed in the Class Schedule. Approved for letter and S/U grading. May be repeated.

ENGL 200  Intro to the Study of Lit  credit: 3 Hours.
Introduction to the study of literature, with an emphasis on interpretive theories and methods as well as the formal distinctions between the major literary genres. For majors only. This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ENGL 202  Medieval Lit and Culture  credit: 3 Hours.
Introduction to the diverse literatures and cultures of the global Middle Ages (Approx. 500-1500 CE). Students will read works by medieval authors in Modern English translation, with particular attention to placing works in their historical and material contexts. Same as CWL 253 and MDVL 201. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

ENGL 204  Renaissance Lit and Culture  credit: 3 Hours.
Readings in English and continental literary masterpieces with attention to significant cultural influences. Same as CWL 255. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

ENGL 206  Enlightenment Lit and Culture  credit: 3 Hours.
Study in Anglophone and global texts from the period 1600 to 1800, with attention to cultural and historical contexts. Same as CWL 257. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

ENGL 207  Romantic Lit and Culture  credit: 3 Hours.
Study of literature, philosophy, visual arts, and social criticism of the British Romantic period, with attention to broader cultural issues. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

Information listed in this catalog is current as of 04/2018
ENGL 208 Victorian Lit and Culture  credit: 3 Hours.
Study of literature, philosophy, visual arts, and social criticism of the British Victorian period, with attention to broader cultural issues. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 209 British Lit to 1800  credit: 3 Hours.
Historical and critical study of selected works of British literature to 1800 in chronological sequence. For majors only. Prerequisite: Completion of the Composition I requirement and ENGL 200. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 210 British Lit 1800 to Present  credit: 3 Hours.
Historical and critical study of selected works of British literature after 1800 in chronological sequence. For majors only. Prerequisite: Completion of the Composition I requirement and ENGL 200. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 211 Intro to Mod African Lit  credit: 3 Hours.
Same as AFST 210 and CWL 210. See AFST 210. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Non-West

ENGL 213 Modernist Lit and Culture  credit: 3 Hours.
Study of literature, philosophy, visual and performing arts, social criticism, and popular sciences of the Anglo-American Modern period (1880-1920), with attention to broad cultural issues. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Non-West

ENGL 216 Legends of King Arthur  credit: 3 Hours.
Arthurian myth and legend is one of the most enduring literary traditions of Western Europe, and the characters of Arthur, Merlin, Guinevere, Lancelot, Gawain and Mordred were as popular in the Middle Ages as they are today. Originating in early medieval Wales, the legends traveled through England to France and Germany and throughout the modern world. Students will study the development of the Arthurian tradition in chronicles, poetry, romances, tales, and fabliaux, comparing variations across cultural and historical boundaries. Same as CWL 216 and MDVL 216. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 218 Introduction to Shakespeare  credit: 3 Hours.
Representative readings of Shakespeare's drama and poetry in the context of his age, with emphasis on major plays; selections vary from scene to section. Does not fulfill Shakespeare requirement for the English major. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 220 Literature and Science  credit: 3 Hours.
Explores the mutual influences of science and literature in some key literary and non-literary texts. Covers scientific texts, literary works, and cultural theory to explore how and why scientific knowledge is intimately linked to literature. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 222 Jewish American Literature  credit: 3 Hours.
Same as CWL 209 and JS 209. See JS 209.

ENGL 223 Jewish Storytelling  credit: 3 Hours.
Same as CWL 221, JS 220, REL 220, and YDSH 220. See YDSH 220. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 224 Latina/o Popular Culture  credit: 3 Hours.
Same as LLS 240 and SPAN 240. See LLS 240.

ENGL 225 Intro to Latina/o Literature  credit: 3 Hours.
Same as LLS 242 and SPAN 242. See LLS 242. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 241 Beginnings of Modern Poetry  credit: 3 Hours.
An inquiry into some of the more complex and innovative poetry written in English. Students will read poets such as Frost, Robinson, Sandburg, Lindsay, Hardy, Hopkins, Housman, Yeats, Lawrence, the Imagists, and the early Pound and Eliot. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Cultural Studies - Western

ENGL 242 Poetry Since 1940  credit: 3 Hours.
An exploration of English-language poetry written since World War II. Students study some or all of the following major poetic movements of the period: the Beats, the New York School, the Black Mountain poets, the Confessional school, the Deep Image poets, the British "movement" and post-"Movement" poets, the Black Arts movement, Feminist poets, Post-colonial poetry, Language poets, and the current multifarious poetry scene. Prerequisite: Completion of the Composition I requirement.

ENGL 243 Modern Drama I  credit: 3 Hours.
Ibsen to O'Neill. Same as CWL 265. Prerequisite: Completion of the Composition I requirement.

ENGL 244 Modern Drama II  credit: 3 Hours.
Pirandello to the present. Same as CWL 266. Prerequisite: Completion of the Composition I requirement.

ENGL 245 The Short Story  credit: 3 Hours.
Historical and critical study of the short story (American and European) from the early nineteenth century to the present. Same as CWL 267. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
ENGL 247  The British Novel  credit: 3 Hours.
A study of some of the more noteworthy and influential writers of the last two hundred and fifty years. The course traces the development of the novel as a genre that both celebrated and critiqued Britain and British nationalism. Examines how the novel has been important culturally over time. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 248  Brit, Amer & Contin Fiction  credit: 3 Hours.
Examination of important thematic and structural relationships - influences, parallels, and variations - among selected major works of the nineteenth and twentieth centuries; readings chosen from works of Bronte, Hardy, Lawrence, Woolf, James, Faulkner, Bellow, Oates, Dostoevsky, Tolstoy, Stendhal, Flaubert, Camus, Kafka, Mann, Hesse, Moravia, and Pavese. All works read in English. Same as CWL 269. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 250  The American Novel to 1914  credit: 3 Hours.
Critical study of selected American novels from the late eighteenth century to 1914. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 251  The American Novel Since 1914  credit: 3 Hours.
Critical study of selected American novels from 1914 to the present. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 253  Topics in Lit and New Media  credit: 3 Hours.
Introduction to the role technological invention has played in history of print media and how literary aesthetics are changing with the advent of new media, such as software, video games, and graphic novels. We will consider material formats, genres, and modes of production along with the cultural, political, and societal implications of different forms and formats. May be repeated in separate terms up to 6 hours. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 255  Survey of American Lit I  credit: 3 Hours.
American literature and its cultural backgrounds to 1870. For majors only. Prerequisite: Completion of the Composition I requirement and ENGL 200. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 256  Survey of American Lit II  credit: 3 Hours.
American literature and its cultural backgrounds after 1870. Prerequisite: Completion of the Composition I requirement and ENGL 200. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 259  Afro-American Literature I  credit: 3 Hours.
Historical and critical study of Afro-American literature in its social and cultural context from the beginning to 1915. Same as AFRO 259 and CWL 259. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Cultural Studies - US Minority

ENGL 260  Afro-American Literature II  credit: 3 Hours.
Historical and critical study of Afro-American literature in its social and cultural context since 1915. Same as AFRO 260 and CWL 260. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Cultural Studies - US Minority

ENGL 261  Topics in Lit and Culture  credit: 3 Hours.
Introductory study of variety of topics in literature and culture, including those that bridge traditional historical periods, focus on themes or movements, and cross disciplinary boundaries. May be repeated up to 6 hours in same or separate terms if topics vary. Prerequisite: Completion of the Composition I requirement.

ENGL 265  Intro to American Indian Lit  credit: 3 Hours.
Same as AIS 265. See AIS 265. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 266  Grimm's Fairy Tales in Context  credit: 3 Hours.
Same as CWL 254 and GER 251. See GER 251. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 267  Grimms' Fairy Tales - ACP  credit: 3 Hours.
Same as CWL 250 and GER 250. See GER 250. This course satisfies the General Education Criteria for: Advanced Composition
Humanities - Lit Arts
Cultural Studies - Western

ENGL 268  The Holocaust in Context - ACP  credit: 3 Hours.
Same as CWL 271 and GER 260. See GER 260. This course satisfies the General Education Criteria for: Advanced Composition
Humanities - Lit Arts
Cultural Studies - Western

ENGL 269  The Holocaust in Context  credit: 3 Hours.
Same as CWL 273 and GER 261. See GER 261. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 270  American Film Genres  credit: 3 Hours.
Introduction to the study of the dominant genres or types U.S. cinema. Examines the elements that constitute genres (such as visual and narrative patterns), the formation and reshaping of genres by filmmakers and the entertainment industry, the social and cultural factors that influence the genre cycles and subgenres, and the landmark works of each genre. The course treats several genres in historical perspective or focus on a single genre. May be repeated in separate terms up to 6 hours if topics vary. This course satisfies the General Education Criteria for: Humanities - Lit Arts
ENGL 272  Minority Images in Amer Film  credit: 3 Hours.
Addresses how a range of films made in the United States have represented diverse ethnicities and cultures in relation to each other and to dominant American media conventions and social ideas. A comparative, case study approach examines racial and gender stereotyping, historical and economic factors, and reactions of various audiences to the films. Same as AFRO 272. Prerequisite: Fulfillment of the Composition I English requirement; sophomore standing or above. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 273  American Cinema Since 1950  credit: 3 Hours.
Explores key issues in American cinema from 1950 to the present, structured around central problems of film studies (such as authorship, genre, narratology, film style, gender analysis, and the spectacle of violence), contextualizing them within moments of major transition in the American film industry. Viewing and discussion of a major film each week. Same as MACS 273. Prerequisite: Completion of the Composition I requirement.

ENGL 274  Literature and Society  credit: 3 Hours.
Major literary works presented within the context of social issues of their time. May be repeated with the permission of English advising office to a maximum of 6 hours if topics vary. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 275  Am Indian and Indigenous Film  credit: 3 Hours.
Same as AIS 275 and MACS 275. See AIS 275.
This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 276  Asian Film Genres  credit: 3 Hours.
Studies a variable selection of popular film genres produced and circulated in Asia (e.g., martial arts, horror, musicals, anime, melodramas, science fiction, monster movies, comedy) that “write back” to dominant European representations of power, identity, gender and the Other. Postcolonial writers, critics and filmmakers studied may include Franz Fanon, Edward Said, Aime Cesaire, Ousmane Sembene, Chinua Achebe, Michelle Cliff, Mahesweta Devi, Buchi Emecheta, Derek Walcott and Marlene Nourbese-Philip. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Non-West

ENGL 278  Women Writers  credit: 3 Hours.
Study of British and American women authors. Same as GWS 280. May be repeated with permission of English advising office to a maximum of 6 hours if topics vary. Prerequisite: Completion of the Composition I requirement.

ENGL 281  Women in the Lit Imagination  credit: 3 Hours.
Study of the way various writers, both male and female, have portrayed women’s image, social role, and psychologies in British, American, or Anglophone literature. Same as GWS 281. May be repeated with permission of English advising office to a maximum of 6 hours if topics vary. Prerequisite: Completion of the Composition I requirement.

ENGL 283  Jewish Sacred Literature  credit: 3 Hours.
Same as CWL 283 and REL 283. See REL 283.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 284  Modern Jewish Literature  credit: 3 Hours.
Surveys imaginative literature by Jewish authors from the Enlightenment to the present, including fiction, poetry, drama, and autobiography written in English or translated from other languages. Same as CWL 284 and REL 284. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ENGL 285  Postcolonial Lit in English  credit: 3 Hours.
Examination of selected postcolonial literature, theory, and film as texts that “write back” to dominant European representations of power, identity, gender and the Other. Postcolonial writers, critics and filmmakers studied may include Franz Fanon, Edward Said, Aime Cesaire, Ousmane Sembene, Chinua Achebe, Michelle Cliff, Mahesweta Devi, Buchi Emecheta, Derek Walcott and Marlene Nourbese-Philip. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Non-West

ENGL 286  Asian American Literature  credit: 3 Hours.
Introduction to Asian American literary studies and culture through the reading of major works of literature selected from but not limited to the following American ethnic subgroups: Chinese, Filipino, Japanese, Korean, Indian, Pakistani, and Vietnamese. Same as AAS 286. Prerequisite: Completion of the Composition I requirement. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 290  Individual Study  credit: 0 to 3 Hours.
Study of selected topics. Approved for both letter and S/U grading. May be repeated to a maximum of 6 hours. Students may register in more than one section per term. Prerequisite: Consent of instructor.

ENGL 293  The Anthropocene  credit: 3 Hours.
Focuses on the current historical period of humans’ relative dominance over major Earth systems. Introduces students to debates surrounding the scientific basis for the Anthropocene, followed by a survey of its major historical periodizations, from the so-called “Pleistocene” of human agriculture, to industrialization, to the post-1950 “Great Acceleration” in economic development and resource consumption whose consequences we now face in crisis phenomena such as climate change, water scarcity, resource wars, and environmental refugees. Same as ESE 293.

ENGL 300  Writing About Lit Text&Culture  credit: 3 Hours.
Writing-intensive, variable topic course designed to improve English majors’ ability to write clear, well-organized, analytically sound and persuasively argued essays relevant to literary studies. Introduces students to some strategies of literary criticism and research through examination of critical texts appropriate to course topic. For majors only. Prerequisite: Completion of the Composition I requirement; one year of college literature or consent of instructor.
This course satisfies the General Education Criteria for: Advanced Composition

ENGL 301  CriticalApproaches to Lit&Text  credit: 3 Hours.
Introduction to influential critical methods and to the multiple frameworks for interpretation as illustrated by the intensive analysis of selected texts. For majors only. Prerequisite: Completion of the Composition I requirement and ENGL 200.
ENGL 310  Introduction to the Study of the English Language  credit: 3 Hours.
Topics in the study of the English language, with emphasis on one or more of the following: the social, political, historical, technological, legal, and economic aspects of language use. Credit is not given for both ENGL 401 and ENGL 310.

ENGL 311  History of the English Language  credit: 3 Hours.
Language variation and change from the earliest forms of English to the present day, with emphasis on the rise of Standard English and the social, geographic, and cultural aspects of linguistic change in English. Credit is not given for both ENGL 403 and ENGL 311.

ENGL 322  Dostoevsky  credit: 3 Hours.
Same as CWL 324 and RUSS 322. See RUSS 322.

ENGL 323  Tolstoy  credit: 3 Hours.
Same as CWL 323 and RUSS 323. See RUSS 323.

ENGL 325  Topics in LGBT Lit & Film  credit: 3 Hours.
Explores topics on representations of non-heteronormative sexuality in canonical and recovered historical texts and in contemporary literature, on literature by LGBT authors, and on theories of sexuality that pertain to systems of textual and cultural meaning. May be repeated in separate terms to a maximum of 6 hours.

ENGL 330  Slavery and Identity  credit: 3 Hours.
Explores slavery in the Americas through its representation in literature over time. Using a variety of disciplinary approaches, we will look at the enslaved, the enslavers, and the middle merchants who facilitated the slave trade, and will examine the experience of slavery and the economic, political, religious, and scientific justifications used to maintain it. We will also examine the African cultural traditions from which the slaves emerged and the aspects of it that lent to creation of the new U.S. culture.
This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - US Minority

ENGL 333  Memoir & Autobiography  credit: 3 Hours.
Same as GWS 333. See GWS 333.

ENGL 359  Lit Responses to the Holocaust  credit: 3 Hours.
Same as CWL 320, JS 320, REL 320, and YDSH 320. See YDSH 320.
This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

ENGL 360  Environmental Writing  credit: 3 Hours.
Same as ESE 360. See ESE 360.
This course satisfies the General Education Criteria for: Advanced Composition

ENGL 373  Special Topics in Film Studies  credit: 3 Hours.
Extended investigation of major subjects and issues in cinema and other media; topics vary and typically include studies of author/directors, genres, historical movements, critical approaches, and themes. Same as MACS 373. May be repeated with permission of English advising office to a maximum of 6 hours if topics vary. Prerequisite: One college-level course in film studies or literature.

ENGL 374  World Cinema in English  credit: 3 Hours.
Course systematically addresses cinema movements and films of different periods, genres, themes and styles produced in one or two Anglophone countries other than the U.S. (e.g., Great Britain, Ireland, Australia, New Zealand, Canada, South Africa, and regions with Anglophone film movements or strands like South Asia and the Caribbean). Topics could include cinema in relation to relevant distinctive national and cultural histories, local audiences and production circumstances, and the challenges of international distribution in light of Hollywood’s global dominance. Meets for 110 minutes twice a week, with some class time devoted to film screenings (not always on same day) and some longer feature films scheduled in required out-of-class screenings announced well in advance. May be repeated to a maximum of 6 credit hours in separate terms if topics vary.

ENGL 378  Fairy Tales & Gender Formation  credit: 3 Hours.
Same as GWS 378. See GWS 378.

ENGL 380  Topics in Writing Studies  credit: 3 Hours.
Advanced-level work in the field of Writing Studies. Building upon a traditional disciplinary understanding of writing as rhetoric, this course invites students to call upon sociological, anthropological, and/or ideological approaches to the study of writing in order to understand the myriad ways that writing makes meaning(s). See Class Schedule for topics. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Completion of the Composition I requirement.

ENGL 390  Advanced Individual Study  credit: 3 Hours.
Advanced study of selected topics. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor.

ENGL 391  Honors Individual Study  credit: 3 Hours.
Study of selected topics. Restricted to English and English education majors with a 3.33 average who are working towards the degree with distinction in English or in English education. May be repeated to a maximum of 6 hours. Prerequisite: Enroll in undergraduate advising office.

ENGL 396  Honors Seminar I  credit: 3 Hours.
Themes, movements, and forms in British, American, and Anglophone literature. May be repeated. Prerequisite: A 3.33 grade-point average or consent of the English Department’s Director of Undergraduate Studies. Restricted to English and Rhetoric majors.

ENGL 397  Honors Seminar II  credit: 3 Hours.
Periods in British, American, and Anglophone literature. May be repeated. Prerequisite: A 3.33 grade-point average or consent of the English Department’s Director of Undergraduate Studies. Restricted to English and Rhetoric majors.

ENGL 398  Honors Seminar III  credit: 3 Hours.
Major British, American, and Anglophone authors. Each seminar considers one or two major authors. May be repeated. Prerequisite: A 3.33 grade-point average or consent of the English Department’s Director of Undergraduate Studies. Restricted to English and Rhetoric majors.

ENGL 402  Descriptive English Grammar  credit: 3 or 4 Hours.
An introduction to English linguistics with emphasis on the phonetic, syntactic, and semantic structures of English; language variation, standardization, and change; language legislation and linguistic rights; English as a world language; and the study of language in American schools. Same as BTW 402. 3 undergraduate hours. 4 graduate hours.

ENGL 404  Engl Grammar for ESL Teachers  credit: 3 or 4 Hours.
Same as EIL 422. See EIL 422.
ENGL 407  Introduction to Old English  credit: 3 or 4 Hours.
Introduction to the form of English spoken and written prior to about AD 1100. Exploring concepts of cultural, historical, and linguistic change, students will learn to read Old English texts in the original. Readings include examples from the prose tradition (e.g., Bede’s story of the poet Caedmon and the Anglo-Saxon Chronicle) as well as poetic texts (e.g., The Dream of the Rood and The Wanderer). Same as MDVL 407. 3 undergraduate hours. 4 graduate hours.

ENGL 411  Chaucer  credit: 3 or 4 Hours.
A selection of Chaucer’s major works read in Middle English. Instructors will usually emphasize either the Canterbury Tales and Troilus and Criseyde and the dream visions, but alternate combinations of texts are possible. Students will also be introduced to Chaucer’s fourteenth-century context. Same as MDVL 411. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 412  Topics in Medieval Brit Lit  credit: 3 or 4 Hours.
Advanced topics course exploring the literatures of medieval Britain, especially Old and/or Middle English but with some attention to Celtic, French, Latin, and Norse texts in translation. Same as CWL 417 and MDVL 410. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 416  Topics in Brit Drama to 1660  credit: 3 or 4 Hours.
Advanced topics course devoted to dramatic practice in the medieval and/or early modern British Isles. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary; Graduate students may repeat if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 418  Shakespeare  credit: 3 or 4 Hours.
Survey of the plays and poems of William Shakespeare. Reading assignments will reflect the generic diversity and historical breadth of Shakespeare’s work. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 421  Later Renaiss Poetry & Prose  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 423  Milton  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 426  Early 18th Century Literature  credit: 3 or 4 Hours.
British Literature between 1600—the restoration of Charles II to the throne—and 1740. Focus on the plays, poems, and fiction by male and female authors with particular attention to issues of gender relations, colonialism and imperial expansion, and class tensions. Writers covered may include Aphra Behn, Alexander Pope, Eliza Haywood, Jonathan Swift, John Dryden, the Earl of Rochester, Daniel Defoe, and others. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 427  Later 18th Century Literature  credit: 3 or 4 Hours.
Focused study of texts produced in Great Britain and its empire between roughly 1740 and 1790. Writers may include Laurence Sterne, Mary Leapor, Thomas Warton, and others. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 428  British Drama 1660–1800  credit: 3 or 4 Hours.
Focused study of the major male and female playwrights who wrote between 1660 (the reopening of the theaters after the Interregnum) and roughly 1800. Particular attention will be devoted to the social, cultural, political, and economic contexts of theatrical performance, and to the major issues dealt with on the London stage: sexual morality, the role of women in a patrilineal society, and the problems of empire, trade, and colonialism. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 429  18th Century Fiction  credit: 3 or 4 Hours.
Focused study of British and Anglophone fiction in the eighteenth century. Authors may include Defoe, Swift, Haywood, Fielding, Richardson, Sterne, Burney, Walpole, Radcliffe, and others. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 430  Topics in British Romantic Lit  credit: 3 or 4 Hours.
Focused study of British literature between roughly 1785 and 1832. Authors may include Wollstonecraft, Wordsworth, Coleridge, Keats, Byron, Austen and others. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 431  Topics in British Romantic Lit  credit: 3 or 4 Hours.
Focused study of British literature between roughly 1785 and 1832. Authors may include Wollstonecraft, Wordsworth, Coleridge, Keats, Byron, Austen and others. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 433  Victorian Poetry & Prose  credit: 3 or 4 Hours.
Study of such major poets as Tennyson, Browning, Arnold, and Hardy; and of prose writers including Carlyle, Mill, Arnold, Pater, and Huxley. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 435  19th Century British Fiction  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 441  British Lit 1900–1930  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 442  British Lit Since 1930  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 449  American Lit 1820–1865  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 450  American Lit 1865–1914  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 451  American Lit 1914–1945  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 452  American Lit 1945–Present  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 455  Major Authors  credit: 3 or 4 Hours.
Intensive study of the work of one or two major authors. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 458  Latina/o Performance  credit: 3 or 4 Hours.
Same as LLS 458. See LLS 458.

ENGL 459  Topics in American Indian Lit  credit: 3 or 4 Hours.
Same as AIS 459. See AIS 459.

Information listed in this catalog is current as of 04/2018
ENGL 460  Lit of American Minorities  credit: 3 or 4 Hours.
Advanced topics seminar exploring literary expressions of minority experience in America. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours. Graduate students may repeat as topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 461  Topics in Literature  credit: 3 or 4 Hours.
Advanced seminar on any of a variety of literary topics. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 462  Topics in Modern Fiction  credit: 3 or 4 Hours.
Advanced seminar devoted to topics in British, American, and Anglophone fiction from approximately 1800 to the present day. Continental fiction in English translation may occasionally be considered. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 465  Topics in Drama  credit: 3 or 4 Hours.
Seminar covering advanced topics (such as genre, performance context, period, or theme) in drama studies. Same as CWL 465. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 470  Modern African Fiction  credit: 3 or 4 Hours.
Same as AFST 410, CWL 410, and FR 410. See AFST 410.

ENGL 475  Lit and Other Disciplines  credit: 3 or 4 Hours.
Advanced topics seminar exploring the intersection of literary study and other scholarly disciplines. The disciplines students study vary each term, but past courses have examined connections between literature and psychology, forensic science, environmental studies, and the law. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 476  Topics in Lit & Environment  credit: 3 or 4 Hours.
From the developing field of "ecocriticism" to new historical examinations of canonical writers such as Thomson, Thoreau, or the "nature poets", to the new field of Science Studies, this advanced seminar examines a range of specialized topics related to literature and the environment. 3 undergraduate hours. 4 graduate hours. May be repeated with permission of English advising office to a maximum of 6 undergraduate hours if topics vary. May be repeated for graduate credit if topics vary. Prerequisite: One year of college literature or consent of instructor.

ENGL 477  Advanced Environmental Writing  credit: 3 Hours.
Introduces students to the challenges of "turning data into narrative." With a focus on students' professional development as writers, this course emphasizes the research and rhetorical skills required to communicate current scientific research in earth and environmental science through non-fiction narrative forms—the investigative essay, long-form journalism, personal memoir, and op-ed—aimed at a general audience. Same as ESE 477. 3 undergraduate hours. No graduate credit.

ENGL 478  History of Translation  credit: 3 or 4 Hours.
Reviews theory and research on the social and historical development of writing systems, including consideration of the relationship between oral and written language, writing and other graphic representation systems, alternative technologies, the evolution of writing systems, and the social functions of literacy. Same as CI 563. Prerequisite: Admission to the graduate programs of a unit offering the graduate specialization in Writing Studies, or consent of instructor.

ENGL 479  Environmental Writing for Publication  credit: 3 Hours.
Same as CLCV 430, CWL 430, GER 405, SLAV 430, SPAN 436, and TRST 431. See SLAV 430.

ENGL 481  Comp Theory and Practice  credit: 3 or 4 Hours.
Study of the history and theory of written composition. This course explores basic rhetorical principles, various theoretical perspectives in the field of composition/rhetoric, and helps students form practical approaches to the guidance of, response to, and structuring of student writing. 3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 482  Writing Technologies  credit: 3 or 4 Hours.
Examines the relationship of computer technology to the larger field of writing studies. Topics include a historical overview of computers and other writing technologies; current instructional practices and their relation to various writing theories; research on word processing, computer-mediated communication, and hypermedia; and the computer as a research tool. Same as IS 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing and consent of instructor. Students must have a basic knowledge of word processing.

ENGL 485  Literature for the High School  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Prerequisite: One year of college literature or consent of instructor.

ENGL 486  History of Translation  credit: 3 or 4 Hours.
Same as CLCV 430, CWL 430, GER 405, SLAV 430, SPAN 436, and TRST 431. See SLAV 430.

ENGL 498  Environmental Writing for Publication  credit: 3 Hours.
Same as ESE 498. See ESE 498.

ENGL 500  Intro to Criticism & Research  credit: 4 Hours.
Introductory course in methods and techniques in research and literary criticism.

ENGL 503  Historiography of Cinema  credit: 4 Hours.
Same as CWL 503 and MACS 503. See MACS 503.

ENGL 504  Theories of Cinema  credit: 4 Hours.
Same as CWL 504 and MACS 504. See MACS 504.

ENGL 505  Writing Studies  credit: 4 Hours.
Reviews theory and research on the social and historical development of writing systems, including consideration of the relationship between oral and written language, writing and other graphic representation systems, alternative technologies, the evolution of writing systems, and the social functions of literacy. Same as CI 563. Prerequisite: Admission to the graduate programs of a unit offering the graduate specialization in Writing Studies, or consent of instructor.

ENGL 508  Beowulf  credit: 4 Hours.
Reading and intensive study of Beowulf in the original language. Students will read the entire poem in Old English, with close attention to language, style, historical contexts, and medieval sources and analogues as well as modern editorial, interpretive, and theoretical approaches. Same as MDVL 508. Prerequisite: ENGL 407 or consent of instructor.

ENGL 511  Chaucer  credit: 4 Hours.
Intensive study for graduate students on Chaucer's major works and related scholarship. Instructors will usually emphasize either the Canterbury Tales or Troilus and Criseyde and the dream visions, but alternate combinations of texts are possible. Same as MDVL 511. May be repeated to a maximum of 8 hours if topics vary.

Information listed in this catalog is current as of 04/2018
ENGL 514  Seminar in Medieval Literature  credit: 4 Hours.
Intensive study of selected texts, genres, themes, or theoretical issues in medieval British literature (usually focusing on either Old English or Middle English texts), or of scholarly methods in medieval studies (such as editing, paleography, or bibliography and methods of historical research). Same as MDVL 514. May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of medieval studies or consent of instructor.

ENGL 519  Seminar in Shakespeare  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of Shakespeare's work or consent of instructor.

ENGL 520  Seminar 16th C Literature  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of Renaissance studies or consent of instructor.

ENGL 524  Seminar in 17th C Literature  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of seventeenth-century studies or consent of instructor.

ENGL 527  Seminar in 18th C Literature  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of eighteenth-century studies or consent of instructor.

ENGL 533  Seminar Romantic Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of Romantic studies or consent of instructor.

ENGL 537  Seminar Victorian Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to an aspect of Victorian studies or consent of instructor.

ENGL 543  Seminar Mod British Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One college course devoted entirely to an aspect of modern British studies or consent of instructor.

ENGL 547  Seminar Earlier American Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One college course devoted entirely to an aspect of American studies or consent of instructor.

ENGL 553  Seminar Later American Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One college course devoted entirely to an aspect of American studies or consent of instructor.

ENGL 559  Seminar Afro-American Lit  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One college course devoted entirely to an aspect of American literature or consent of instructor.

ENGL 563  Seminar Themes and Movements  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One year of graduate study of literature or consent of instructor.

ENGL 564  Seminar Lit Modes and Genres  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One year of graduate study of literature or consent of instructor.

ENGL 578  Seminar Lit & Other Disciplines  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: One year of graduate study of literature or consent of instructor.

ENGL 581  Seminar Literary Theory  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: A college course devoted entirely to criticism or consent of instructor.

ENGL 582  Topics Research and Writing  credit: 4 Hours.
Focuses on the diverse research paradigms that are often employed in the study of writing processes. Topics will vary each term. Examines past and current writing research in the topic area with an emphasis on the critical examination of research designs and the influence of epistemologies on the interpretation of data. Same as CI 565. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in writing studies or consent of instructor.

ENGL 583  Topics Writ Pedagogy & Design  credit: 4 Hours.
Examines the relationships among writing studies, theories of pedagogy, and the practice of the writing teacher and administrator. Also focuses on particular problems or particular schools of thought. Typical topics include Writing Program Design and Administration; Writing, Thinking, and Problem Solving; The Classroom as a Research Site; Collaborative Learning; and Writing Across the Curriculum and Discourse Communities. Requirements will vary with instructors and topics. Same as CI 566. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in writing studies or consent of instructor.

ENGL 584  Topics Discourse and Writing  credit: 4 Hours.
Focuses on the modes of inquiry central to writing research. The course topic will vary each term and may address such issues as cognitive research and writing, ethnographic research and writing, and discourse analysis and writing. Same as CI 569. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in writing studies or consent of instructor.

ENGL 586  Topics in Digital Studies  credit: 4 Hours.
Inquiry into theory and research in one or more areas of digital scholarship, including new media studies, digital humanities, social media studies, and/or critical code studies. Same as CI 586. 4 graduate hours. No professional credit. May be repeated in separate terms up to 8 hours, if topics vary.

ENGL 591  Research in Special Topics  credit: 1 to 4 Hours.
Independent study under the guidance of a member of the graduate faculty. May be repeated to a maximum of 8 hours.

ENGL 592  Masters Exam Tutorial  credit: 6 or 12 Hours.
Reading for the Master's Area Examination under the guidance of the candidate's graduate advisor. May be repeated once for 12 hours or twice for 6 hours each. Credit may not be used toward a graduate degree.

ENGL 593  Prof Seminar College Tchg  credit: 0 to 4 Hours.
Approved for both letter and S/U grading. May be repeated by Ph.D. candidates as topics vary, but without credit, after 8 hours have been earned in this course. Students needing the proseminar for their programs will be given priority enrollment. Prerequisite: Graduate standing in the Department of English or consent of instructor.

ENGL 599  Thesis Research  credit: 0 to 16 Hours.
Guidance in writing theses for doctoral degrees. Approved for S/U grading only. May be repeated up to a maximum of 16 hours. Prerequisite: Doctoral candidate standing.

English as a Second Language (ESL)
ESL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ESL)
Courses

ESL 110 English Pronunciation & Oracy Fluency credit: 0 Hours.
Designed to improve the international student's ability to speak and understand English at normal conversational speed and to give the student the ability to continue improving pronunciation and oral fluency skills after the course is completed. Focus on the rhythm, stress, intonation, and sounds of natural speech and on fluency building strategies. Approved for S/U grading only. May be repeated in separate terms.

ESL 111 Intro to Academic Writing I credit: 3 Hours.
Introduction to the process of writing: fundamentals of paragraph development: analysis of rhetorical patterns: development of oral skills. This course is the first term of a two-term sequence (ESL 111-ESL 112) that fulfills the campus Composition I general education requirement. Credit is not given for both ESL 111 and ESL 115. Prerequisites: 111 placement result on the English Placement Test. This course satisfies the General Education Criteria for: Composition I

ESL 112 Intro to Academic Writing II credit: 3 Hours.
Continued instruction of the fundamentals of the multi-paragraph essay and introduction to research writing; instruction on basics of library research, synthesizing sources, and elements of style. This is the second term of a two-term sequence (ESL 111-ESL 112) that fulfills the campus Composition I general education requirement. Credit is not given for both ESL 112 and ESL 115. Prerequisite: Completion of ESL 111. This course satisfies the General Education Criteria for: Composition I

ESL 115 Principles of Academic Writing credit: 4 Hours.
Introduction to the research paper, including the writing process: pre-research, academic style and organization, and a variety of writing and skill-building tasks; development of peer and self-editing skills. ESL 115 fulfills the campus Composition I requirement for non-native speakers of English. Credit is not given for both ESL 115 and any other Comp I courses: RHET 101, RHET 102, RHET 103, RHET 104, RHET 105, CMN 111, CMN 112, ESL 111, ESL 112. Prerequisite: 115 placement result on the English Placement Test. This course satisfies the General Education Criteria for: Composition I

ESL 506 Oral Communication for ITAs credit: 0 Hours.
Focuses on use of English at the discourse level, with videotaping and critique of student presentation and development of teaching strategies related to university classroom and laboratory contexts. Approved S/U grading only. Prerequisite: Consent of instructor.

ESL 507 Adv Academic writing MATSEL credit: 0 Hours.
Focus on advanced academic writing in the field of Teaching English as a Second Language at the graduate level. Introduces rhetorical modes of writing in TESL, critical reading in the field and includes source-based writing, including critical reviews, proposals, and research reports. Approved for S/U grading only. Credit is not given for both ESL 507 and any of ESL 500, ESL 501, and ESL 502. Credit is not given toward a graduate degree.

ESL 508 Seminar for Intl TAs credit: 0 Hours.
Provides students with knowledge, resources and strategies to guide their ongoing development as international teaching assistants. Students analyze model teaching, receive feedback about their own strengths and weaknesses as a teaching assistant, and address key language or pedagogical concerns through a focused and customized term project. Approved for S/U grading only.

ESL 509 Academic Conversation Skills for International Students credit: 0 Hours.
Introduction for international students to improve academic English speaking skills in class discussions and informal conversations with colleagues and instructors. Topics include participating in small group discussions, advising sessions, and small talk with colleagues. We will discuss and practice American English norms for agreeing and disagreeing, making requests and suggestions, apologizing, complaining, and complimenting within an academic setting. Approved for S/U grading only. May be repeated in separate terms.

ESL 510 English Pronunciation & Oral Fluency credit: 0 Hours.
Designed to improve the international student's ability to speak and understand English at normal conversational speed and to give the student the ability to continue improving pronunciation and oral fluency skills after the course is finished. Focus on the rhythm, stress, intonation, and sounds of natural speech and on fluency building strategies. Approved for S/U grading only. May be repeated in separate terms. Credit is not given toward an undergraduate degree. Prerequisite: Placement based on the speaking section score on the TOEFL or Placement based on English as a Second Language Placement Test (EPT) for undergraduate students without TOEFL or IELTS scores.

ESL 511 English Pronunciation & Oral Fluency for ITAs credit: 0 Hours.
Focus on pronunciation of English vocabulary in students' own academic disciplines. Approved for S/U grading. Prerequisite: Placement based on SPEAK.

ESL 512 Introduction to Academic Writing credit: 0 Hours.
Instruction in writing secondary and primary research papers; skills covered include developing research questions and design, evaluating and synthesizing scholarly sources, producing well-reasoned and substantiated arguments, and writing research/project proposal. This course is the second term of a two-term course sequence (ESL 511-ESL 512). 0 graduate hours. No professional credit. Approved for S/U grading only. Credit is not given toward a graduate degree. Prerequisite: ESL 511. ESL students only.

ESL 513 Written and Oral Communication credit: 0 Hours.
Instruction in foundational skills for academic communication; skills covered include summarizing and synthesizing sources, reading and evaluating scholarly articles, and delivering oral presentations for an academic audience. This course is the first term of a two-term sequence (ESL 511-ESL 512). 0 graduate hours. No professional credit. Approved for S/U grading only. May be repeated in separate terms. Credit is not given toward a graduate degree. Prerequisite: Placement based on English as a Second Language Placement Test (EPT) or the speaking section score on TOEFL or IELTS.

ESL 514 Written and Oral Communication credit: 0 Hours.
Instruction in foundational skills for academic communication; skills covered include summarizing and synthesizing sources, reading and evaluating scholarly articles, and delivering oral presentations for an academic audience. This course is the first term of a two-term sequence (ESL 511-ESL 512). 0 graduate hours. No professional credit. Approved for S/U grading only. Credit is not given toward a graduate degree. Prerequisite: Placement based on English as a Second Language Placement Test (EPT) or the speaking section score on TOEFL or IELTS.

ESL 515 Speaking and Listening Skills for ITAs credit: 0 Hours.
Focuses on oral communication in the context of the classroom, including oral presentation and development of teaching strategies. Approved S/U grading only. Credit is not given toward a graduate degree. Prerequisite: Placement based on the TOEFL, Placement based on English as a Second Language Placement Test (EPT) for undergraduate students without TOEFL or IELTS.
EIL 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

English as an Intl Language (EIL)

Courses

EIL 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

EIL 214 TESL in the Elementary School credit: 3 Hours.
On-site practical experience in an elementary school, involving at least
100 hours of classroom observations, consultations, teaching, tutoring,
and assisting, to acquaint students with the many facets of ESL/bilingual
education in a public school setting. Hours to be arranged with the
cooperating teacher. Satisfies one requirement for those who wish to
obtain an Illinois ESL endorsement on an Illinois teaching certificate.

EIL 215 TESL in the Secondary School credit: 3 Hours.
On-site practical experience in a secondary school, involving at least 100
hours of classroom observations, consultations, teaching, tutoring, and
assisting, to acquaint students with the many facets of ESL/bilingual
education in a public school setting. Hours to be arranged with the
cooperating teacher. Satisfies one requirement for those who wish to
obtain an Illinois ESL endorsement on an Illinois teaching certificate.

EIL 411 Intro to TESL Methodology credit: 3 or 4 Hours.
Introduction to TESL/TEFL, including the concept of "communicative
capability" and its components; teaching contexts; current research on
teaching second language skills; syllabus, lesson, and materials design;
and classroom techniques. 3 undergraduate hours. 4 graduate hours.

EIL 422 Engl Grammar for ESL Teachers credit: 3 or 4 Hours.
Adaptation of modern English grammar to meet the needs of the ESL/EFL
teacher, with special emphasis on the development of knowledge and
skills that can be used in the analysis of the syntax, lexis and pragmatics
of English. Same as ENGL 404. 3 undergraduate hours. 4 graduate hours.

EIL 445 Second Lang Reading & Writing credit: 3 or 4 Hours.
Introduces students to second language reading and writing, including
theory, research, and practical application. 3 undergraduate hours. 4
graduate hours. May be taken concurrently with EIL 489 with consent of
instructor. Prerequisite: Consent of instructor.

EIL 456 Lang and Social Interaction I credit: 3 or 4 Hours.
The course goals are to develop an understanding of the characteristics
of naturally-occurring talk; several methodologies for collecting and
studying it; the relationship of talk to human conduct, society and culture,
including cross-cultural (mis)understanding; and to relate these insights
to language learning, language teaching methodologies, and materials
design. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of
instructor.

EIL 460 Principles of Language Testing credit: 3 or 4 Hours.
Studies theoretical and practical aspects of language testing. Examines
purposes and types of language tests in relation to theories of language
use and language teaching goals; discusses testing practices and
procedures related to language teaching and language research;
and includes the planning, writing, and administration of tests, basic
descriptive statistics, and test analysis. A project is required. Same as
EPSY 487, FR 460, GER 460, ITAL 460, PORT 460, SLS 460, and SPAN 460.
3 undergraduate hours. 4 graduate hours. Prerequisite: EIL 489 or
consent of instructor.

EIL 486 Ling for Language Teachers credit: 3 or 4 Hours.
Introduction to linguistics for language teachers. Examines history
and scope of linguistics, and introduces key elements of linguistic
analysis with accompanying theoretical analyses of syntax, morphology,
phonology, the lexicon, and pragmatics. Also covers the role of non-
linguistic factors in communication and prioritizes the application of
linguistics to instructed language learning settings. 3 undergraduate
hours. 4 graduate hours.

Information listed in this catalog is current as of 04/2018
EIL 487  Topics in Second Lang Studies  credit: 2 or 4 Hours.
Topics on practical applications of second language studies for
classroom practice. 2 or 4 undergraduate hours. 2 or 4 graduate hours.
May be repeated to a maximum of 8 hours if topics vary. Prerequisite:
Consent of instructor.

EIL 488  English Phon & Morph for TESL  credit: 3 or 4 Hours.
Applications of linguistics to language learning with special emphasis
on learning the sound system of English. The course involves face-to-
face and online instruction. 3 undergraduate hours. 4 graduate hours.
Prerequisite: Consent of instructor.

EIL 511  Task Based Language Teaching  credit: 4 Hours.
Introduces students to current issues in the theory and practice
of communicative language teaching. Discusses the notion that
communication is a social event from three perspectives: theoretical
linguistics; applied linguistics; and classroom teaching. Specific
questions addressed range from a consideration of the nature of applied
linguistics to issues related to student autonomy. Prerequisite: EIL 411
and consent of instructor.

EIL 512  Practicum in Teaching ESL  credit: 4 Hours.
Practical guided experience teaching ESL. Students will recruit, test, and
and teach an ESL class of adults from the community, developing their own
lessons and materials based on principles of communicative language
teaching. Students will also observe their peer student teachers and
provide them with feedback. Prerequisite: EIL 411 and permission of
instructor.

EIL 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as FR 580, GER 580, ITAL 580, PORT 580, SLS 580, and SPAN 580.
See SPAN 580.

EIL 587  Seminar in Second Lang Studies  credit: 2 or 4 Hours.
May be repeated if topics vary. Prerequisite: Consent of instructor.

EIL 588  Generative Phon in Engl Tchg  credit: 4 Hours.
Generative phonological analyses of English and the teaching of English
pronunciation: reevaluation of teaching goals, content, presentation, and
methodology; required projects involve research into English phonology
leading to the development and evaluation of lesson materials for ESL
classes. Prerequisite: EIL 411 and EIL 488.

EIL 591  Research in Special Topics  credit: 1 to 4 Hours.
Independent study under guidance of a member of the graduate faculty.
May be repeated to a maximum of 8 hours. Prerequisite: Consent of
instructor.

EIL 599  Thesis Research  credit: 0 to 8 Hours.
Individual direction of research and thesis writing. Approved for S/U
grading only. May be repeated to a maximum of 8 hours. Prerequisite:
Consent of thesis supervisor.

Entomology (ENT)

ENT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/ENT)

Courses

ENT 599  Thesis Research  credit: 0 to 16 Hours.
Work may be taken in the following subjects: insect genetics; insect
behavior; applied entomology; systematic entomology; biology and
ecology of insects; and insect physiology. Approved for S/U grading only.
May be repeated.

Environmental Studies (ENVS)

ENVS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/ENVS)

Courses

ENVS 101  Introduction to Energy Sources  credit: 3 Hours.
Same as NPRE 101. See NPRE 101.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Phys Sciences
Quantitative Reasoning II

ENVS 210  Environmental Economics  credit: 3 Hours.
Same as ACE 210, ECON 210, NRES 210, and UP 210. See ACE 210.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ENVS 220  Communicating Agriculture  credit: 3 Hours.
Same as AGCM 220 and NRES 220. See AGCM 220.
This course satisfies the General Education Criteria for:
Advanced Composition

ENVS 299  Ind Studies of Env. Topics  credit: 0 to 4 Hours.
Approved for letter and S/U grading. Prerequisite: Consent of instructor.

ENVS 301  Tools for Sustainability  credit: 3 Hours.
Develops systems-thinking skills needed to make connections between
different disciplines to better understand problems and trade-offs related
to sustainability. Students will gain competence in conducting cost-
benefit and life-cycle analyses and learn about sustainability metrics
while improving their ability to communicate about the integrated
dimensions of sustainability within an interdisciplinary setting.
Prerequisite: For students enrolled in the Sustainability, Energy and
Environment Fellows Program.

ENVS 310  Natural Resource Economics  credit: 3 Hours.
Same as ACE 310, and NRES 310. See ACE 310.

ENVS 330  Environmental Communications  credit: 3 Hours.
Same as AGCM 330 and NRES 330. See AGCM 330.

ENVS 336  Tomorrow's Environment  credit: 3 Hours.
Same as CHLH 336 and CPSC 336. See CPSC 336.

ENVS 380  Environmental Geology  credit: 4 Hours.
Same as GEOL 380. See GEOL 380.

ENVS 406  Urban Ecology  credit: 4 Hours.
Same as UP 406. See UP 406.

ENVS 420  Conservation Biology  credit: 4 Hours.
Same as CPSC 436 and IB 451. See IB 451.

ENVS 430  Comm in Env Social Movements  credit: 3 Hours.
Same as AGCM 430, NRES 430, and SOC 464. See AGCM 430.

ENVS 431  Environ Toxicology & Health  credit: 3 Hours.
Same as CHLH 461 and IB 485. See IB 485.

ENVS 433  Pesticide Toxicology  credit: 3 or 4 Hours.
Same as CB 434 and IB 486. See IB 486.

ENVS 447  Environmental Sociology  credit: 3 or 4 Hours.
Same as RSOC 447 and SOC 447. See SOC 447.

ENVS 469  Environmental Health  credit: 3 or 4 Hours.
Same as CHLH 469. See CHLH 469.

ENVS 474  Principles of Epidemiology  credit: 4 Hours.
Same as CHLH 474 and PATH 474. See CHLH 474.
ENVS 480 Basic Toxicology credit: 3 Hours.
Same as CB 449, CPSC 433 and FSHN 480. See FSHN 480.

ENVS 491 Sustainability Experience credit: 1 to 4 Hours.
Students will work with faculty, staff, and/or the Student Sustainability Committee to advance campus sustainability goals and the Illinois Climate Action Plan. This course is designed to enable students to apply their disciplinary knowledge to tackle inherently interdisciplinary problems, while also developing and enhancing their critical analysis, leadership, organizational, and project management/evaluation skills and preparing them for addressing sustainability issues in their careers. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for letter and S/U grading. May be repeated, if topics vary. Prerequisite: Consent of instructor.

ENVS 492 Sustainability, Energy and Environment Capstone credit: 4 Hours.
Problem-focused learning and a holistic and interdisciplinary perspective to address critical sustainability-related challenges facing society. Students will gain critical thinking skills to examine the sustainability of various decisions, analyze the trade-offs between the economic, environmental and social dimensions of sustainability of alternative solutions, learn techniques to operationalize the concept of sustainability and develop practical skills in sustainability assessment. Team projects will develop team building skills, communication skills and project management skills. 4 undergraduate hours. No graduate credit. Prerequisite: ENVS 301. For students enrolled in the Sustainability, Energy and Environment Fellows Program.

ENVS 510 Adv Natural Resource Economics credit: 4 Hours.
Same as ACE 510, ECON 548, and NRES 510. See ACE 510.

ENVS 514 Neurotoxicology credit: 3 Hours.
Same as CB 514 and PSYC 515. See CB 514.

ENVS 516 Reprod & Dev Toxicology credit: 3 Hours.
Same as CB 516. See CB 516.

ENVS 527 Statistics in Epidemiology credit: 4 Hours.
Same as CHLH 527 and PATH 525. See CHLH 527.

ENVS 596 Interdisciplinary Tox Sem credit: 1 Hour.
Same as PATH 596 and CB 596. See CB 596.

Environmental Sustainability (ENSU)

ENVS 300 Environmental Sustainability credit: 3 Hours.
Same as LA 370 and NRES 370. See LA 370.

ENVS 301 Soc Impacts Weather & Climate credit: 3 Hours.
Same as ATMS 322. See ATMS 322.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ENVS 302 Air Pollution to Global Change credit: 3 Hours.
Same as ATMS 323. See ATMS 323.

ENVS 303 Sustainable Business I credit: 4 Hours.
At the dawn of the 21st century, business and society is confronted with a confluence of factors, including environmental degradation, widespread poverty, and the need for renewable sources of energy. The diverse sources of information that point to an uncertain future suggests that a 'business as usual' approach has to be replaced with more proactive alternatives that address the needs of the environment, consumer welfare and community development. This course on sustainable marketing management begins to address these issues and engender an appreciation among our students for the challenges that lie ahead for businesses. Looks at the relationship between sustainable business practices, societal welfare, and ecological systems. Student projects will apply marketing and business concepts to create a sustainable business plan for organizations.

ENVS 310 Renewable & Alternative Energy credit: 4 Hours.
Fossil fuel supplies are finite and growing energy demands of an ever increasing population will quickly deplete these reservoirs. Focuses on the use and availability of renewable and alternative energy sources such as wind, solar, bio-fuels, ethanol, geothermal and nuclear power as well as the impacts of using these alternative energy sources on climate, society and the global economy. Students will develop the student's perspective on human energy consumption at all scales through a complete scale analysis of energy production and consumption? from the individual to the national government to the world economy.

ENVS 410 Sustainable Organizations credit: 4 Hours.
Explores the notion of sustainability as a core business tenant, and how entrepreneurs and their companies are working to create and capture financial, social, and environmental value. The focus is on large, for profit companies, but lessons will extend to smaller, non-profit, and governmental organizations. The aim is to prepare participants for the green challenge of adopting and implementing socially responsible practices in the workplace. 4 undergraduate hours. 4 graduate hours.

European Union Studies (EURO)

EURO Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/EURO)

Courses

EURO 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 3 hours.

EURO 240 Arctic Narratives credit: 3 Hours.
Same as CWL 282, SCAN 240. See SCAN 240.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

EURO 325 Social Media and Global Change credit: 3 Hours.
Same as EPS 325, ASST 325, AFST 325, INFO 325, LAST 325, REES 325, and SAME 325. See EPS 325.

EURO 376 Children and Youth Literature credit: 3 Hours.
Same as CWL 376, GWS 376, and SCAN 376. See SCAN 376.

EURO 385 Politics of the European Union credit: 3 Hours.
Same as FR 385, GER 385, and PS 385. See PS 385.

EURO 410 Labor and the European Union credit: 4 Hours.
Same as LER 410 and SOC 410. See LER 410.
EURO 415 Europe and the Mediterranean credit: 3 or 4 Hours.
Examines the governments, societies, and cultures on the shores of the Mediterranean. Examines ideas associated with the Mediterranean and practices followed by its people and governments from the perspectives of a variety of disciplines, paying special attention to the region's relationship with the European Union. Same as ITAL 415 and PS 415. 3 undergraduate hours. 4 graduate hours. Prerequisite: Minimum of junior standing, or consent of instructor.

EURO 470 Imagining the Welfare State credit: 3 or 4 Hours.
Same as CWL 470 and SCAN 470. See SCAN 470.

EURO 478 African Immigrants in Europe credit: 3 or 4 Hours.
Same as AFST 478 and ANTH 478. See ANTH 478.

EURO 489 Green Screen: Film and Nature credit: 3 or 4 Hours.
Same as MACS 490 and SCAN 490. See SCAN 490.

EURO 490 Special Topics in EU Studies credit: 1 to 4 Hours.
Selected reading and research in European Studies. See schedule for current topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours in same or separate terms if topics vary. Prerequisite: Junior or senior standing, or consent of the instructor.

EURO 500 Dialogue on Europe credit: 1 Hour.
Exploration of a variety of subjects about the European Union and EU-US relations and comparative perspectives. This transatlantic relationship will be studied via a series of expert lectures offered by University of Illinois faculty and visiting scholars. Approved for letter and S/U grading. May be repeated in separate terms if topics vary.

EURO 501 EU Institutions and Governance credit: 4 Hours.
A graduate-level introduction to the European Union, its history, decision-making processes, legal framework and economic effects.

EURO 502 The EU in a Global Context credit: 4 Hours.
Introduces students to the role of the EU in international affairs. May be repeated in separate terms to a maximum of 8 hours.

EURO 576 Children and Youth Literature credit: 4 Hours.
Same as CWL 586, GWS 576, and SCAN 576. See SCAN 576.

EURO 580 Research Design & Techniques credit: 1 Hour.
Introduction for students in the master's in European Union Studies degree program to the processes involved in developing and completing an MA thesis project. Topics covered may include departmental and Graduate College thesis requirements; research methodologies; conducting effective field research; resources for thesis writing; and practical advice on managing a thesis project. Approved for S/U grading only.

EURO 590 Directed Ind Study credit: 1 to 6 Hours.
May be repeated in the same term to a maximum of 6 hours. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Consent of instructor.

EURO 596 Special Topics in EU Studies credit: 1 to 4 Hours.
Instruction on topics of current interest about the European Union. May be repeated in the same or separate terms if topics vary. See Class Schedule for current topics.

EURO 599 Thesis Research credit: 0 to 8 Hours.
To carry out work on the MA in European Union Studies. Approved for S/U grading only. May be repeated in separate terms to a maximum of 8 graduate hours. Prerequisite: EURO 501 and EURO 502.

Finance (FIN)

FIN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/FIN)

Courses

FIN 199 Undergraduate Open Seminar credit: 0 to 5 Hours.
Approved for letter and S/U grading. Course may be repeated for credit.

FIN 221 Corporate Finance credit: 3 Hours.
Introductory study of corporate financial management, in particular how the financial manager's choices add value to shareholder wealth through investment financing and operating decisions. Prerequisite: Completion of ECON 102 or ECON 103.

FIN 230 Introduction to Insurance credit: 3 Hours.
Introductory course on the role of insurance in society; covers insurance terminology, common personal insurance policies (auto, health, life and homeowners) and current issues.

FIN 232 Intro to Wealth Management credit: 3 Hours.
Creating a sound personal financial plan and issues related to becoming a financial planner. Course enrollment is limited to non-College of Business students and College of Business students with freshman or sophomore standing. Credit will not satisfy Finance major requirements. Credit is not given for both FIN 232 and ACE 240.

FIN 241 Fundamentals of Real Estate credit: 3 Hours.
A survey of real estate finance, appraisal, investment, law, brokerage, management, development and economics. Special attention is given to the analysis of aggregate real estate and mortgage markets, to the individual transactions within these markets, and to the legal and institutional factors which affect these markets. Prerequisite: ECON 102.

FIN 300 Financial Markets credit: 3 Hours.
Theory and applications associated with the functioning of financial markets to include the conceptual foundations of portfolio theory, risk management, and asset valuation. The stock, money, bond, mortgage, and futures and options markets are examined. Prerequisite: FIN 221.

FIN 321 Advanced Corporate Finance credit: 3 Hours.
Theories of firms' investment and financing decisions are covered. Topics include dividend policy, capital budgeting, capital structure, bankruptcy, long-term debt and leasing decisions. Prerequisite: FIN 300.

FIN 370 Financial Markets credit: 3 Hours.
Theory and applications associated with the functioning of financial markets to include the conceptual foundations of portfolio theory, risk management, and asset valuation. The stock, money, bond, mortgage, and futures and options markets are examined. Prerequisite: ECON 102.

FIN 380 Advanced Corporate Finance credit: 3 Hours.
Theories of firms' investment and financing decisions are covered. Topics include dividend policy, capital budgeting, capital structure, bankruptcy, long-term debt and leasing decisions. Prerequisite: FIN 300.

FIN 390 Finance Academy credit: 1 Hour.
The Finance Academy is an enrichment program for outstanding undergraduate Finance majors. A select program that focuses on developing future business leaders via enhanced academic and career opportunities. Students are normally invited to participate by the faculty during their junior year, when they are enrolled in FIN 300. If inducted, students participate throughout their junior and senior years. Approved for letter and S/U grading. May be repeated in separate terms. Course will not satisfy Finance major requirements. Prerequisite: Induction into the Finance Academy.

FIN 391 Investment Banking Academy credit: 1 Hour.
A diversified curriculum designed to prepare students for a successful career in investment banking; course incorporates peer mentorship, guest lectures (from bankers, accountants, private equity associates and hedge fund analysts), a case competition and a field trip. Course will not satisfy Finance major requirements. May be repeated for a maximum of 6 hours in separate terms. Prerequisite: Admission by application only.
FIN 392  Investment Management Academy  credit: 1 Hour.  
Overview of security analysis with the objective of how to value an investment proposition for inclusion in a portfolio of securities managed by students in the class. Focus will be in areas of fundamental securities analysis with the emphasis on equity valuation. Course will not satisfy Finance major requirements. May be repeated to a maximum of 6 hours in separate terms. Prerequisite: Admission by application only. Primarily for Finance majors with sophomore standing or above who show interest in pursuing their CFA credential.

FIN 411  Investment & Portfolio Mngt  credit: 3 Hours.  
Current theories of portfolio management are covered in considerable detail to provide a conceptual framework for the evaluation of investment strategies. Applications and implementation are covered in depth, including performance evaluation and international diversification. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300.

FIN 412  Options and Futures Markets  credit: 3 Hours.  
Introduction of options and futures markets for financial assets; examination of institutional aspects of the markets; theories of pricing; discussion of simple as well as complicated trading strategies (arbitrage, hedging and spread); applications for asset and risk management. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 413  Financial Engineering  credit: 3 Hours.  
This course will present and analyze modern tools for identification, measurement, and management of financial risk faced by corporations and institutional investors; in particular as related to the application of futures, forwards, options, swaps, and other derivatives. The focus will be evenly split between theoretical models and practical applications, and will include careful consideration of parameter estimation and numerical implementation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 414  Urban Economics  credit: 3 or 4 Hours.  
Same as ECON 414. See ECON 414.

FIN 415  Fixed Income Portfolios  credit: 3 Hours.  
Conceptual foundations and implementation of strategies for the selection, evaluation, and revision of portfolios of fixed-income financial assets (bonds). 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 418  Financial Modeling  credit: 3 Hours.  
The objective is to learn the fundamentals and practice building financial models using Microsoft Excel. By the end of the term, each student should be able to develop an understanding of any financial relationship and build that financial relationship into a model using the built-in functions of Excel. Financial modeling, by definition, requires significant work outside of the classroom. Models are introduced, demonstrated, and reviewed in class, but each student is expected to research and collect data, and to construct the models, prior to each week's class meeting. 3 undergraduate hours. 3 graduate hours. Prerequisite: FIN 300 and FIN 321, or consent of instructor.

FIN 419  Real Client Managed Portfolios  credit: 3 Hours.  
Applies academic topics on financial markets, security analysis/valuation and portfolio management to hands-on investment management. Students will form and review objectives, constraints, and investment policy as it relates to the client's money under management. They will purchase securities, monitor performance of the portfolio, and make recommendations for any adjustments to the holdings. They will be fully educated and responsible to the fiduciary and ethical standards of professional money management as guided by the CFA Institute. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 9 hours. Prerequisite: FIN 321 or consent of instructor.

FIN 422  Cases in Corporate Finance  credit: 3 Hours.  
Course totally devoted to the study of financial management cases, provides students a hands-on learning experience. The case work helps students to develop their analytical and interpretative skills in solving unstructured real world problems. The theoretical concepts and tools learned in the introductory finance courses provide the foundation for the case studies. Topics discussed include financial forecasting and working capital management; capital budgeting and cost of capital; and capital structure, dividend policy, corporate financing, financial restructuring, financial distress, mergers, acquisitions and firm valuation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 and FIN 321.

FIN 423  Financing Emerging Businesses  credit: 3 or 4 Hours.  
The study of the business environment, alternative methods of organization and financing, use of financial statements as a management tool, valuation methods and approaches to ethical dilemmas from the perspective of an owner-manager. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 300 or consent of instructor.

FIN 424  Mergers and Acquisition  credit: 3 Hours.  
Focuses on identifying ways to increase firm value through mergers and acquisitions (M&A) and corporate restructurings. Surveys the drivers of success (failure) in M&A transactions and develop your skills in the design and evaluation of transactions. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 425  Private Equity/Venture Capital  credit: 3 Hours.  
Provides students with an understanding of the nature of the private equity market, the principal participants in this market, and how they function. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 321.

FIN 431  Property-Liability Insurance  credit: 3 or 4 Hours.  
Examines in detail the functions of property-liability insurers, including marketing, underwriting, claims, ratemaking and administration, and the major current issues facing this industry. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 230.

FIN 432  Managing Fin Risk for Insurers  credit: 3 or 4 Hours.  
Introduces basic concepts in financial economics used in the analysis and management of financial risks, with an emphasis on the applications by insurers and pension plans; topics include decision making under uncertainty, economic statistics, deterministic and stochastic interest rate models, derivative securities, valuation, binomial models and option pricing models. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 300; either FIN 230 or FIN 435.

FIN 433  Corporate Risk Management  credit: 3 or 4 Hours.  
Case study course examining how corporations deal with pure risk. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: FIN 221, FIN 431, and FIN 434.
FIN 434 Employee Benefit Plans  credit: 3 Hours.
Studies the purpose, structure, and financial aspects of employee benefit plans, including pensions, health insurance, life insurance, and disability plans. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 435 Personal Wealth Management  credit: 3 Hours.
Studies personal wealth management techniques with an emphasis on life insurance products; covers life insurance policies, annuities, trusts, buy-sell arrangements, investing in stocks, bonds and mutual funds, banking and borrowing, purchasing residential and commercial real estate, income and estate taxation and management of personal financial portfolio. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300.

FIN 433 Legal Issues in Real Estate  credit: 3 or 4 Hours.
Overview of legal concepts, issues, and principles involving real estate. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

FIN 444 Urban Real Estate Valuation  credit: 3 Hours.
The terminology, theory and techniques of real estate valuation (appraisal); a modern view of the three approaches to estimating value - sales comparison, cost and income. Special requirements include local field trips to appraise at least one single-family property and one income property. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of the instructor, FIN 241 is recommended but not required.

FIN 445 Real Estate Investment  credit: 3 Hours.
An approach to the evaluation of real estate investment opportunities. Begins with the identification of the investor's goals and ends with an investment decision. Considers legal, physical, locational, and financial constraint, aggregate real estate and financial markets, tax considerations and investment criteria. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of the instructor, FIN 241 is recommended but not required.

FIN 446 Real Estate Financial Markets  credit: 3 Hours.
Discusses real estate financing techniques and the secondary market for real estate financial assets including residential and commercial mortgage-backed securities (RMBS and CMBS). 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor, FIN 241 is recommended but not required.

FIN 447 Real Estate Development  credit: 3 or 4 Hours.
Provides students with an exposure to the real world of real estate through a series of lectures by real estate professionals focused primarily on retail real estate development. A side benefit of the class will be to provide graduating seniors some insights into different career paths to help improve the career choices that they make. 3 undergraduate hours. 4 graduate hours. Prerequisite: FIN 221 or FIN 241.

FIN 451 Intl Financial Markets  credit: 3 Hours.
This course covers the three major international financial markets; the foreign exchange market, the eurocurrency market, and the international equity and bond market. The course looks at international financial decisions including operations, structure and valuation. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 and FIN 321.

FIN 461 Financial Intermediation  credit: 3 Hours.
Financial intermediaries survey of the structure, functions, regulation, and risk management activities of financial intermediaries; central banking and monetary policy effects on financial intermediaries. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 or consent of instructor.

FIN 463 Investment Banking  credit: 3 Hours.
The mechanics of financial statement analysis and ratio analysis; development of investment banking/corporate finance valuation models (including DCF, leveraged buyout and merger models) in order to determine the intrinsic value of companies and price investment banking deals. 3 undergraduate hours. No graduate credit. Prerequisite: FIN 300 (FIN 300 is waived if student is admitted to FIN 391 IBA). Priority to finance majors.

FIN 464 Investment Management  credit: 3 or 4 Hours.
Students learn the fundamental equity research process including valuation and market and industry analysis. Students then select their own multi-asset portfolios using an online trading simulation software program. The course pays special attention to risk management. Ultimately, students implement hedging strategies based on real returns over the course of the semester. 3 undergraduate hours. 4 graduate hours. Prerequisite: FIN 300. Priority given to finance majors.

FIN 490 Special Topics in Finance  credit: 1 to 3 Hours.
1 to 3 undergraduate hours. No graduate credit. May be repeated in the same term to a maximum of 6 hours. May be repeated in subsequent terms to a maximum of 9 hours. Course will not satisfy Finance major requirements. Prerequisite: FIN 300 or consent of instructor.

FIN 494 Senior Research  credit: 2 to 4 Hours.
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 3.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated as topics vary. Prerequisite: Senior standing.

FIN 495 Senior Research  credit: 2 to 4 Hours.
Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing; and cumulative grade-point average of 3.0 or better, Honors Day recognition in the junior year, or consent of instructor.

FIN 500 Introduction to Finance  credit: 2 or 4 Hours.
Introduction to financial management and decision making. A customized course, designed to provide a survey of finance for graduate students who do not necessarily have previous training in the disciplines. Different sections of the course will cover different sets of topics. Prerequisite: Graduate standing or consent of department.

FIN 501 Financial Economics  credit: 2 or 4 Hours.
Theory and logic of microeconomics, taught with applications to financial markets. First half of course covers the way in which efficient markets work to allocate resources; second half covers the way in which markets fail. Also includes selected topics in macroeconomics. Approved for letter and S/U grading. May be repeated in the same or separate terms to a maximum of 4 hours if topic varies.

FIN 502 Quantitative Finance  credit: 2 or 4 Hours.
Quantitative methods used for financial decision making. Topics include elements of statistics, mathematics, and specific analytical tools used in the study and practice of finance. Approved for letter or S/U grading. May be repeated in the same or separate terms to a maximum of 4 hours. Material may be split into two 8-week 2-hour modules, either across semesters or within the same semester, if so, credit is not given for taking the same half twice. Prerequisite: Graduate standing.
FIN 511 Investments credit: 2 or 4 Hours.
Introduction to investment analysis, including the theory and implementation of portfolio theory; empirical evidence on the performance of financial assets; evaluation of portfolio investment strategies; and the extension of diversification to international markets. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 512 Financial Derivatives credit: 4 Hours.
Introduction to options, futures, swaps and other derivative securities; examination of institutional aspects of the markets; theories of pricing; discussion of simple as well as complicated trading strategies (arbitrage, hedging, and spread); applications for asset and risk management. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 513 Financial Engineering I credit: 4 Hours.
Provides an introduction to modern techniques for pricing options, swaps, and related financial instruments; the use of such instruments in managing financial risk; and the measurement and management of their risks. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 514 Financial Engineering II credit: 4 Hours.
Presents the main ideas and techniques of modern option pricing theory, including: the Black-Scholes-Merton analysis; risk-neutral probabilities and the probabilistic solution; numerical techniques for computing option prices; an introduction to term structure modeling; and perhaps other topics, at the discretion of the instructor. Prerequisite: Prior or concurrent registration in FIN 513 or consent of instructor.

FIN 515 Fixed Income Portfolios credit: 2 or 4 Hours.
Conceptual foundations and implementation of strategies for the selection, evaluation, and revision of portfolios of fixed-income financial assets (bonds); examination of related research. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 516 Term Structure Models credit: 4 Hours.
Extensive coverage of several models of the term structure of interest rates, including their implementation, calibration, and use in valuing interest rate derivatives. Will include applications of both Monte Carlo methods and finite-difference or “tree” methods. Approved for letter and S/U grading. Prerequisite: FIN 500 and FIN 512, or equivalents.

FIN 517 Adv Topic in Fin Engineering credit: 4 Hours.
Discussion of advanced topics of current interest, based on evolving conditions and in the marketplace. Topics may include new valuation models and/or financial instruments, issues in risk management, trading strategies of current interest, and regulatory and public policy issues. Approved for letter and S/U grading. Prerequisite: FIN 500 and FIN 512, or equivalents.

FIN 518 Financial Modeling credit: 4 Hours.
The objective is to learn the fundamentals and practice building financial models using Microsoft Excel. By the end of the term, each student should be able to develop an understanding of any financial relationship and build that financial relationship into a model using the built-in function of Excel. Financial modeling, by definition, requires significant work outside of the classroom. Models are introduced, demonstrated, and reviewed in class, but each student is expected to research and collect data, and to construct the models, prior to each week’s class meeting. Prerequisite: MSF students only.

FIN 519 Gen Equ Env Tax Policy credit: 4 Hours.
Focuses on how to build and use analytical general equilibrium models to do research. Students will replicate and extend existing G.E. models with general production and demand functions that are differentiated to find closed-form solutions for the incidence of the tax, including changes in all factor prices, input quantities, outputs, prices, and welfare of each group. The primary examples are drawn from environmental tax policy, but the method is equally useful for analysis of non-tax policies and other economic problems. Same as ECON 546. Prerequisite: Microeconomics and Econometrics at graduate level.

FIN 520 Financial Management credit: 4 Hours.
Introduction to financial management and decision making. Topics include risk-return relationships for financial securities; financial statement analysis and forecasting; working capital management; capital budgeting and the resource allocation process; capital structure and the cost of capital; dividend policy. Prerequisite: Enrollment in the Executive MBA, MSBA, or MS program.

FIN 521 Advanced Corporate Finance credit: 4 Hours.
Addresses both the theoretical and applied aspects of firms’ financing decisions; topics include capital structure and cost of capital theories; mergers, acquisitions and leveraged buyouts; options, warrants, and convertibles; venture capital and initial public offerings; and pensions. Prerequisite: FIN 520, plus either ECON 506 or BADM 572 or concurrent registration in either course; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 522 Cases in Financial Strategy credit: 4 Hours.
Course focuses on financial management cases. Provides students with an active learning experience. Case work is based on concepts learned in introductory corporate finance. Topics discussed include measuring and interpreting cash flow performance, financial forecasting and turnaround management; capital investment and cost of capital; and capital structure, dividend policy; and firm valuation. Prerequisite: FIN 520, plus either ECON 506 or BADM 572 or concurrent registration in either course; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 524 Mergers and Acquisitions credit: 4 Hours.
The primary objective of this course is to give students experience in valuing firms. While the primary focus of the course is on mergers and acquisitions, the course will also cover topics such as initial public offerings, leveraged buyouts, spin-offs, and divestitures. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 526 Enterprise Risk Management credit: 4 Hours.
The application of basic risk management principles to all risks facing the organization. Integrates hazard, financial, strategic and operational risks under a single framework. Provides a conceptual framework for making risk management decisions to increase business value. The course will includes a review of the legal and regulatory environment that sets the stage for Enterprise Risk Management, cover the tools used for risk analysis, examine data integration processes and show how risk measurement relates to strategic and tactical business decisions.
FIN 527  Mergers & Acquisitions Topics  credit: 2 Hours.
This course focuses on identifying ways to increase firm value through mergers and acquisitions (M&A) and corporate restructurings. We will develop your skills in the design and evaluation of transactions. Specific topics addressed in the course are the valuation of companies, structuring of transactions, deal tactics and strategy, valuation of leveraged buyouts, and spin-offs/carve-outs. We will also delve into issues of law, accounting and taxation and how they affect the structuring and outcome of merger transactions. Knowledge about M&A is an important component of any corporate finance professional and is the foundation for effective work in a wide range of fields including corporate development, investment banking, consulting, and advising senior management. 2 graduate hours. No professional credit. Prerequisite: MSF and MBA students only.

FIN 530  Foundations in Risk Management  credit: 2 Hours.
This course introduces risk management including basic concepts and techniques of pure risk and financial risk management. Corporate hazard risk management including insurance and securitization of pure risks will be covered in detail. Insurer risk management will be examined including reinsurance, loss reserving, underwriting of risks, and catastrophic risk management. Students will also be introduced to Enterprise Risk Management (ERM). 2 graduate hours. No professional credit. Prerequisite: MSF students only.

FIN 536  Government Insurance Programs  credit: 2 Hours.
Government insurance programs -- including Social Security, Medicare and Medicaid, unemployment and disability insurance, terrorism insurance, and disaster relief -- currently account for more than half of U.S. federal spending. These programs, which for decades have collectively been growing more quickly than the U.S. economy, represent a significant share of an employer’s compensation expenses and significantly impact household budgets. This course will examine how the design of these programs affects economic efficiency, growth, business competitiveness, and social well-being. An important theme of the course will be the role of imperfect information and aggregate or long-term risks of insurance market failures, and conditions under which the government can or cannot remedy these failures. Prerequisite: MAS BPP Concentration.

FIN 541  Real Estate Fundamentals  credit: 4 Hours.
Discusses the theory and practice of real estate and urban land economics; emphasizes real estate market analysis, finance, appraisal, and investment. 4 graduate hours. No professional credit. Prerequisite: FIN 520, plus ECON 302, ECON 500, or equivalent; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 544  Urban Real Estate Valuation  credit: 4 Hours.
The terminology, theory and techniques of real estate valuation (appraisal); a modern view of the three approaches to estimating value - sales comparison, cost and income. Special requirements include local field trips to appraise at least one single-family property and one income property. 4 graduate hours. No professional credit. Prerequisite: FIN 541 is recommended but not required.

FIN 545  Real Estate Investment  credit: 4 Hours.
Real estate accounts for one-third of the world's capital assets. This course provides students with a comprehensive understanding of real estate valuation, cycles, markets, investments, and decision-making. The bulk of the course covers income-producing commercial property, although we will also discuss residential housing. This course provides a unified finance based framework to answer real estate investment decision making problems in the real world. 4 graduate hours. No professional credit. Prerequisite: FIN 541 is recommended but not required. Graduate students only.

FIN 546  Real Estate Financial Markets  credit: 4 Hours.
This is an applied course in real estate investment that focuses on the U.S. mortgage and asset-backed securities markets. The course will review the multi-trillion dollar mortgage and asset-backed bond markets. We will discuss the fundamentals of securitization, and strategies to structure deals. We will also consider real estate investment trusts (REITs), collateralized debt obligations (CDOs) and credit default swaps (CDS). The course will develop analytical skills in deal structuring and pricing, and offer all students an opportunity to develop their business skills through case discussions. 4 graduate hours. No professional credit. Prerequisite: FIN 541 recommended but not required. Graduate students only.

FIN 551  International Finance  credit: 4 Hours.
Explores the characteristics of the international financial market and examines various aspects of corporate financial management. Topics may include international parity conditions, exchange rate risk management, country risk, cross-border investment analysis, multi national firm budgeting, hedging in foreign currency markets, accessing international financial markets for financing, and competitive strategy in a global marketplace. Prerequisite: FIN 520; or MBA 505 - Section G ( Finance II); or consent of instructor.

FIN 556  Financial Intermediation credit: 4 Hours.
Studies financial intermediation emphasizing analysis of problems faced by commercial bank managers. The three main areas covered are: the role of financial intermediation and its relation to the macro-economy, information technology, and government regulation; examination of the problems of pricing and evaluating the risk of bank financial services such as loans, loan commitments, and swaps; and consideration of bank portfolio risk management. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 561  Financial Intermediation credit: 4 Hours.
Overview of the workings of the financial sector of the macro economy; includes the roles of financial institutions, financial markets, macroeconomic policies, interest rates, and the flows of funds. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 562  Macrofinance credit: 4 Hours.
Overview of the workings of the financial sector of the macro economy; includes the roles of financial institutions, financial markets, macroeconomic policies, interest rates, and the flows of funds. Prerequisite: FIN 520; or MBA 505 - Section G (Finance II); or consent of instructor.

FIN 563  Investment Banking credit: 4 Hours.
This course will provide key building blocks necessary for a career in investment banking, valuation and other related fields. It is designed to provide a practical application of financial statement analysis, modeling, valuation, and presentation skills commonly performed by industry professionals. The course has three major parts. The first focuses on the mechanics of financial statement analysis, ratio analysis, and financial model building. The second applies the financial statements and forecasts within the context of company valuation, utilizing common industry techniques. In the third part of the course, we will employ these valuation techniques in common investment-banking deliverables such as pitch books and fairness opinions. 4 graduate hours. No professional credit. Prerequisite: Previous introductory accounting and finance coursework recommended. Graduate students only.
FIN 566 Algorithmic Market Microstructure  credit: 4 Hours.
This course introduces the modern theoretical, empirical and institutional foundations of market microstructure and trading activity, with an emphasis on applications to algorithmic and high-frequency trading. The first part of the course addresses market microstructure and the algorithmic implementation of traditional microstructure-inspired tasks such as minimizing execution costs. The second part of the course proceeds to examine actual algorithmic strategies, and ultimately high-frequency trading. Recurrent themes throughout the course will be the use of economic theory to simplify computationally challenging problems, and the use of theory-driven structural models to construct more robust trading algorithms. 4 graduate hours. No professional credit. Prerequisite: Restricted to students in the MS in Financial Engineering program.

FIN 567 Financial Risk Management  credit: 4 Hours.
This course covers selected topics in financial risk management. The focus is on statistical techniques used in financial risk management rather than risk management practice, cases, or valuation issues. The course will cover the value-at-risk (VaR) measure and expected shortfall, statistical techniques useful to model financial market returns, and techniques used to model the joint distribution of defaults on fixed income instruments. The course will also cover additional topics such as retail credit risk, risk budgeting, and economic capital modelling. 4 graduate hours. No professional credit. Prerequisite: FIN 500 or 511; IE 522 or FIN 502; FIN 512 (concurrent enrollment allowed); or consent of instructor.

FIN 568 Behavioral Finance  credit: 2 Hours.
There is increasing evidence that the financial decisions of at least some investors are affected by various behavioral biases that do not follow from traditional portfolio choice models. This course will highlight and analyze key findings from this research and consider implications of this observed behavior for individual investors and money managers. The results are also of interest for managers of firms and human resource departments. 2 graduate hours. No professional credit. Prerequisite: FIN 500 or 511; IE 522 or FIN 502; FIN 512 (concurrent enrollment allowed); or consent of instructor.

FIN 570 Business and Public Policy  credit: 4 Hours.
The role of government and its effects on business in a market economy; critical examination of tax rules, public spending and insurance programs, social security, health policy, environmental policy, and other regulations on businesses.

FIN 571 Retirement Policy  credit: 2 Hours.
The retirement landscape in the US - including public policy, retirement plan design, and individual behavior - is constantly changing and evolving. This course will examine the economic, financial, legal, regulatory, political, and human resource issues involved with designing and implementing both public and private retirement plans, including Social Security, pensions and retirement savings plans. Credit is not given for both FIN 434 and FIN 571. Prerequisite: MAS BPP Concentration.

FIN 572 Health Care Policy  credit: 2 Hours.
Costly advances in health technology, together with an aging population, are making health care an increasingly important issue for individuals, firms, and governments. This course examines the economic, legal, and regulatory issues involved with implementing both public and private health plans, including Medicare, Medicaid, and employer-sponsored plans. Credit is not given for both FIN 434 and FIN 572. Prerequisite: MAS BPP Concentration.

FIN 573 Competition Policy  credit: 2 Hours.
While perfect competition is a useful model, it often fails to capture much of what is observed in the real world. This course examines interaction of firms and consumers in markets that are not perfectly competitive and reviews policies that aim to increase efficiency in these markets. Topics covered will include oligopoly, anti-competitive practices, price discrimination, and antitrust regulation. Prerequisite: MAS BPP Concentration.

FIN 574 Individual Tax Policy  credit: 2 Hours.
Contentious public debate surrounds how to tax individuals fairly and efficiently. This course will provide the tools to design and evaluate tax policies. Topics will include measuring how taxes affect individual behavior including labor supply, savings, and portfolio decisions; the efficiency cost of taxation; understanding who bears the true economic burden of taxes; measuring the progressivity of a tax system; and the pros and cons of alternative approaches to taxation. Prerequisite: MAS BPP Concentration.

FIN 575 Business Tax Policy  credit: 2 Hours.
Government needs revenue and taxes people, but why also tax business? We review the pros and cons of a separate corporate taxes system, the interaction of corporate and personal taxes, the inefficiencies of capital misallocations, and economic incidence (who really bears the burden of a corporate income tax). We also review pros and cons of other taxes on capital income such as interest, dividends, capital gains, rental income, and foreign source-income. Prerequisite: MAS BPP Concentration.

FIN 576 Domestic Environmental Policy  credit: 2 Hours.
Environmental regulation has become ubiquitous; Modern business leaders need to be aware of how it affects their businesses and how to operate within its constraints. The focus of this course is the design and critique of domestic environmental policies such as liability law, taxation, command-and-control regulations, and permit markets. We compare their effectiveness and distributional impacts, including effects on regulated firms, and discuss the differential effects these policies can have on technological process. Prerequisite: MAS BPP Concentration.

FIN 577 International Environmental Policy  credit: 2 Hours.
As the business landscape becomes more and more global, international environmental policy is increasingly more relevant for the success of modern firms. In this course, we demonstrate how one country's policies can affect other countries and firms in those countries, the typical difficulties that arise in negotiating international environmental agreements and how these can be ameliorated, and the interaction between trade and the environment. Prerequisite: MAS BPP Concentration.

FIN 578 Govt Market Economy  credit: 2 Hours.
Given the presumed efficiency of competitive markets, when might it be appropriate for government to intervene? This course reviews possible ? market failures? like externalities, public goods, taxes, monopoly power, adverse selection, and moral hazard. We show how each can reduce efficiency of private markets. We then discuss whether, when and how government can improve economic welfare using well-designed tax policy, social insurance, environmental regulation, or health policy. Prerequisite: MAS BPP Concentration.
FIN 579  Applied Portfolio Management  credit: 4 Hours.
Applies academic topics on financial markets, security analysis/valuation and portfolio management to hands-on investment management.
Students will form and review objectives, constraints, and investment policy as it relates to the client's money under management. They will purchase securities, monitor performance of the portfolio, and make recommendations for any adjustments to the holdings. They will be fully educated and responsible for the fiduciary and ethical standards of professional money management as guided by the CFA Institute. May be repeated to a maximum of 8 hours. Prerequisite: Credit or concurrent enrollment in FIN 511.

FIN 580  Special Topics in Finance  credit: 0 to 4 Hours.
Approved for letter and S/U grading. May be repeated to a maximum of 18 hours in a semester; may be repeated to a maximum of 32 hours in subsequent semesters. Prerequisite: Varies by section.

FIN 590  Individual Study and Research  credit: 0 to 4 Hours.

FIN 591  Theory of Finance  credit: 4 Hours.
Examines theoretical frameworks for financial decision making under uncertainty and risk; as well as perfect and imperfect capital markets; discusses state preference, mean-variance, and continuous time models; emphasizes the structure of individual utility functions. Prerequisite: ECON 502; STAT 400; and admission to doctoral program or consent of instructor.

FIN 592  Empirical Analysis in Finance  credit: 2 or 4 Hours.
Designed to train the student in the conduct of empirical work in Finance. Covers the major tools and databases needed to replicate the results of published academic papers and to conduct original research. Prerequisite: Enrollment in the doctoral program in Finance or consent of instructor.

FIN 593  Seminar in Investments  credit: 4 Hours.
Investigates portfolio theory, CAPM, OPM, and arbitrage pricing theory theoretically and empirically; uses both mathematical statistics and modern econometric models to empirically analyze investment decisions and portfolio management. Prerequisite: FIN 591 and ECON 507.

FIN 594  Seminar in Corporate Finance  credit: 4 Hours.
Theories, paradigms, and models of nonfinancial corporations; investigates the theoretical foundations and empirical evidence regarding corporate resource allocation, capital structure decisions, and dividend policies; covers in detail contingent claim analysis, signaling theory, and agency theory. Prerequisite: FIN 591 and ECON 507.

FIN 599  Thesis Research credit: 0 to 16 Hours.
Required for those writing master’s and doctoral theses in finance. Approved for S/U grading only. May be repeated to a maximum of 16 hours.

**Fine and Applied Arts (FAA)**

FAA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/FAA)

**Courses**

**FAA 101  Arts at Illinois  credit: 1 Hour.**
Common Arts experience for FAA freshmen that explores contemporary issues in the arts, cross-disciplinary ingenuity navigating a comprehensive research intensive university, professional practices and exposures to FAA faculty and guest artists through lectures, discussion groups, and online components.

**FAA 110  Exploring Arts and Creativity  credit: 3 Hours.**
High and street art, tradition and experimentation, the familiar and unfamiliar, international and American creativity provide this course's foundation. Students will attend performances and exhibitions, interact with artists, and examine core issues associated with the creative process in our increasingly complex global society. Faculty from the arts, sciences, humanities, and other domains will lead students through visual arts, music, dance, and theatre experiences at Krannert Center and Krannert Art Museum to spark investigation and dialogue. This course satisfies the General Education Criteria for: Humanities - Lit Arts

**FAA 199  Undergraduate Open Seminar  credit: 0 to 3 Hours.**
Various special topics in Fine and Applied Arts. See class schedule for offerings. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated in the same or separate semesters to a maximum of 6 hours if topics vary; some restrictions may apply.

**FAA 202  Artsful Teaching through Integ  credit: 3 Hours.**
Designed to provide elementary education majors with a philosophical and practical basis for integrating the arts (including visual art, music, & dance) in public schools. Lecture, discussion, arts practices and class activities will focus on the ever-expanding role of the arts in children's lives and the role of the teacher in nurturing artistic expressions through the development of skills, processes, and the various knowledge of the multi-modalities of the arts. Additional fees may apply. See Class Schedule. Prerequisite: Completion of applicable Teacher Licensure Gateway requirements. Contact College of Education for further information. Admission to the Elementary Teacher Education Program.

**FAA 220  Introduction to Fashion  credit: 3 Hours.**
Introduction to Fashion will be an overview of the many diverse areas of interest and employment available to someone with and interest in fashion. This course will focus on the development of an individual apparel design process. Other topics include basic garment construction concepts, properties of textiles, fashion illustration, 20th century dress history, manufacturing, trend forecasting, merchandising, and social psychology of dress. May be repeated up to 6 hours in separate terms. This course satisfies the General Education Criteria for: Humanities - Lit Arts

**FAA 291  Civic Engagement Seminar  credit: 1 Hour.**
Designed to introduce students to community development practices and the participatory approach followed by Action Research.Illinois. Detailed information about the course is available at www.actionresearch.illinois.edu. Enrollment in this class requires attendance in two in-class sessions (one lecture, one discussion) and a two-day outreach event in Central Illinois, dates to be determined. Outreach event begins at 9 am Friday and ends by 9 pm Saturday. Lecture, discussion and outreach event will be offered with the one-week course period to be determined. Approved for S/U grading only. May be repeated in separate terms to a maximum of 2 hours.

**FAA 299  FAA Study Abroad  credit: 0 to 18 Hours.**
Provides campus credit for foreign study and/or travel. A detailed proposal for study abroad must be submitted for approval by the appropriate committee of the department in which the student is studying and the college dean's office prior to such study abroad. Final determination of credit and its application toward the degree is made after a review of the student’s work abroad by the above committee and college office. Approved for letter and S/U grading. May be repeated to a maximum of 36 hours. (summer session, 0 to 6 undergraduate hours). Prerequisite: Approval of the student's proposal by the departmental committee and the college office.

*Information listed in this catalog is current as of 04/2018*
FAA 310 FAA Professional Development credit: 2 Hours.
Focusing on tailoring written, verbal, and online presentations to targeted audiences. Students will develop an application package including resume, letter, LinkedIn profile, elevator pitch, interview skills, and website. Course information: Prerequisite: Sophomore, junior or senior standing in FAA is required.

FAA 391 Action Research Seminar credit: 3 Hours.
Introduction to applied action research within the social sciences and humanities with the subject of research selected from partner organizations in Champaign-Urbana, Illinois, and surrounding communities. Students establish a research question, conduct fieldwork using qualitative and/or quantitative methods, and complete a project of sufficient quality for publication or presentation. May be repeated to a maximum of 12 hours in subsequent terms. Prerequisite: Junior standing or consent of instructor.

FAA 499 Special Topics credit: 0 to 4 Hours.
Special topics in subject areas within the College of Fine and Applied Arts intended to augment the existing curriculum. 0 to 4 undergraduate hours. 0 to 4 graduate hours. Approved for letter and S/U grading. May be repeated for a maximum of 8 credit hours in separate terms if topics vary.

Food Science & Human Nutrition (FSHN)

FSHN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/FSHN)

Courses

FSHN 101 Intro Food Science & Nutrition credit: 3 Hours.
Discusses the evolution of the food system to meet the needs and desires of a complex, heterogeneous society. Provides an overview of food in relation to nutrition and health, composition and chemistry, microbiology, safety, processing, preservation, laws and regulations, quality, and the consumer. This course satisfies the General Education Criteria for: Nat Sci Tech · Phys Sciences

FSHN 120 Contemporary Nutrition credit: 3 Hours.
Fundamental principles of human nutrition and their application to the selection of an adequate diet for health and wellness; current nutrition topics of importance. Credit is not given for FSHN 120 if credit has been given for FSHN 220. Prerequisite: CHEM 101 or equivalent. This course satisfies the General Education Criteria for: Nat Sci Tech · Life Sciences

FSHN 125 Intro to Human Nutrition credit: 1 Hour.
Introductory course for students in Human Nutrition. Explore department, college and campus resources. Learn about current issues, opportunities, and careers in the nutrition field. Prerequisite: FSHN major with a concentration in Human Nutrition only.

FSHN 130 Introduction to Food Science credit: 1 Hour.
Introductory course for students in Food Science (FS) focused on student learning and success, current issues, and opportunities and careers in the field of food science. In addition, students will learn about how to enhance their learning strategies. Approved for S/U grading only. Prerequisite: For freshman majoring in FSHN with a concentration in Food Science only.

FSHN 140 Introduction to Hospitality credit: 3 Hours.
Overview of the hospitality industry with emphasis on organizational and operational structures of the major segments of the industry and career opportunities within each. Field trips required.

FSHN 145 Intro Hospitality Management credit: 3 Hours.
Explore the foodservice aspect of the hospitality industry by assisting Hospitality Management seniors taking FSHN 443 in the operation of the Spice Box. Course covers the planning, production, and service of meals in specialized settings. Additional fees may apply. See Class Schedule.

FSHN 150 Introduction to Dietetics credit: 1 Hour.
Introductory course for students in dietetics. Addresses current issues, opportunities and careers in the dietetics profession. Freshmen or transfer student into dietetics given priority.

FSHN 195 Intro to Undergrad Research credit: 1 Hour.
Learn about research opportunities available to undergraduate students in the FSHN department, and find a laboratory that fits a student’s interests and education goals. Guest faculty members present research opportunities in their laboratory, and then give a laboratory tour for students to learn more about the research activities there. Approved for S/U grading only. Prerequisite: For FSHN majors only.

FSHN 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Experimental course on a special topic in food science and human nutrition. Topic may not be repeated except in accordance with the Code. Approved for letter and S/U grading. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.

FSHN 220 Principles of Nutrition credit: 4 Hours.
Course focuses on the nutritive value of foods and metabolism of essential nutrients, as well as the application of principles of nutrition to the requirements of normal individuals throughout the life cycle. Prerequisite: CHEM 102; MCB 244 and 246.

FSHN 230 Food Science Professional Issues credit: 1 Hour.
Discussion of current topics in food science and professional issues, including ethics, undergraduate research, study abroad, graduate school options and internships. Approved for S/U grading only. Prerequisite: Sophomore and Junior transfer students with a Food Science concentration only.

FSHN 232 Science of Food Preparation credit: 3 Hours.
Application of food preparation principles and techniques in the preparation of standard food products; principles of food management and their application in the planning and preparation of meals. Additional course fees may apply. See Class Schedule. Prerequisite: FSHN 101 or concurrent registration.

FSHN 260 Raw Materials for Processing credit: 4 Hours.
Problems involved with procurement, harvesting, handling, and storage of fruits, vegetables, cereal grains, dairy products, red meat, poultry, fish, and eggs for the food-processing industry. Field trips to specialized operations. Additional fees may apply. See Class Schedule. Prerequisite: One high school course in biological science and FSHN 101.

FSHN 274 NonMajors Food Microbiology credit: 1 Hour.
Introduction to food microbiology and the role of microorganisms in foodborne illness and food manufacture. Credit is not given for both FSHN 274 and FSHN 101. Prerequisite: Sophomore standing or higher.

FSHN 293 Off Campus Internship credit: 2 to 4 Hours.
Supervised, off-campus experience in a field directly pertaining to the subject matter. Approved for letter and S/U grading. May be repeated to a maximum of 10 hours.

Information listed in this catalog is current as of 04/2018
FSHN 294  On Campus Internship  credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for both letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 10 hours. Prerequisite: Sophomore standing, 2.0 GPA, consent of the advisor, and consent of the Department Teaching Coordinator.

FSHN 295  UG Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. Approved for letter and S/U grading. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisites: Cumulative GPA of 2.5 or above at the time the activity is arranged and consent of instructor.

FSHN 302  Sensory Evaluation of Foods  credit: 3 Hours.
This course is devoted to learning the 1) physiological and psychological basis of human subjects, 2) chemistry of aroma and taste, 3) basic sensory methodologies in food evaluation, and 4) analysis and interpretation of sensory data. Additional fees may apply. See Class Schedule. Prerequisite: Recommended to students in junior and senior levels. Recommended to have taken foundational statistics course, i.e., STAT 100, STAT 200 or FSHN 440.

FSHN 312  Applied Microbiology Methods  credit: 2 Hours.
Consideration, through experimentation, of properties of bacteria, yeasts, molds, and actinomycetes important to industrial processes; exploration of methods of control of microbial processes in industry and sanitation. Prerequisite: MCB 100 and MCB 101 or consent of instructor.

FSHN 322  Nutrition and the Life Cycle  credit: 3 Hours.
Examines physiological changes that occur during gestation, postnatal growth, and aging and the influence of these changes on nutritional requirements. Prerequisite: FSHN 220 or consent of instructor.

FSHN 329  Communication in Nutrition  credit: 3 Hours.
Application and integration of the principles of nutrition and their transmission to groups and individuals. Students will learn individual counseling techniques as well as how to present nutrition information to groups. Open to Dietetics and Human Nutrition juniors and seniors only. Prerequisite: RHET 105, CMN 101, and FSHN 220 or equivalents.

FSHN 340  Food Production and Service  credit: 4 Hours.
Introduction to the management of commercial and noncommercial foodservice systems through the operation of Bevier Cafe. Students experience managing the procurement, production and service of food, as well as the sanitation and maintenance of equipment and facilities. Prerequisite: FSHN 332, credit or concurrent registration in FSHN 349 and FSHN 345.

FSHN 343  Foundations in Beverage Management: Introduction to Wine, Beer and Spirits  credit: 2 Hours.
The course will focus on the application of principles and practices related to preparation and service of alcohol and specialty beverages in the hospitality industry. The course includes a study of management principles, study of bar operations, human resources and liability protection. Intrinsic to excellent service is having an understanding of proper tasting skills and knowledge to be able to verbalize nuances within the wine or spirit. Structured tastings will be utilized to discover, identify and describe attributes of the beverage. Successful completion of Alcohol handler training required to maintain course enrollment. Additional fees may apply. See Class Schedule. Prerequisite: All registrants must be 21 years of age or older.

FSHN 344  Business Etiquette  credit: 1 Hour.
The fundamentals of business etiquette as they are applied to the modern multicultural and global business environments. Content includes the importance of the first impression, polite conversation, personal appearance, office politics, diplomacy, telephone and cell phone etiquette, high-tech etiquette, proper oral and written communication, and the protocol of meetings both in the United States and abroad. Students will also participate in a formal dining experience. Offered every other year. Prerequisite: Junior standing.

FSHN 345  Strategic Operations Management  credit: 3 Hours.
This course is intended to promote an understanding of the managerial aspects of strategic operations. Strategic operations management examines facilities, capacity, process/work-force planning, organization, people, systems integration, and coordination between operations. An introduction to the principles and procedures for the purchasing, selection and procurement of food and non-food items in the hospitality industry is also included. This course provides students with the management information needed to make operational decisions based on sound criteria. Prerequisite: FSHN 232.

FSHN 349  Food Service Sanitation  credit: 1 Hour.
Examines the dangers, costs and prevention of foodborne illness as well as the training and motivation of food service employees in sanitary food handling and quality assurance practices. Upon completion of this course, student will be eligible to apply for the food service sanitation certificate issued by the State of Illinois. Prerequisite: FSHN 101 and FSHN 232, or consent of instructor; MCB 100 and MCB 101 recommended. Course should be taken concurrently with or prior to FSHN 340.

FSHN 396  UG Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward the degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

FSHN 398  Undergraduate Seminar  credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in food science and human nutrition. Approved for Letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 12 hours. Prerequisite: Sophomore standing.

FSHN 414  Food Chemistry  credit: 3 Hours.
Examines the chemical aspects of major food components: water, carbohydrates, proteins, and lipids; properties of pigments, salts, and food dispersions. Undergraduate Food Science majors must enroll concurrently in FSHN 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 232 and CHEM 233.

FSHN 416  Food Chemistry Laboratory  credit: 2 Hours.
Chemical and physical properties of water, proteins, lipids, carbohydrates, and other food components/additives are discovered in the context of their interactions and functional roles in foods. 2 undergraduate hours. 2 graduate hours. Prerequisite: CHEM 232 and CHEM 233 and concurrent enrollment in FSHN 414.

FSHN 417  Neuroscience of Eating & Drinking  credit: 3 or 4 Hours.
Same as NEUR 417 and PSYC 417. PSYC 417.
FSHN 418 Food Analysis  credit: 4 Hours.
Principles and application of the chemical, physical, and instrumental methods used to determine the constituents of foods; special considerations applicable to the analysis of certain foods. Lecture and lab. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 232; FSHN 414; FSHN 416 or consent of instructor.

FSHN 419 Food Ingredient Technology  credit: 2 Hours.
Explores the research, science and technology of the production of safe, high quality food ingredients through the application of food chemistry, food microbiology, and food processing principles. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 414 or consent of the instructor. FSHN majors only, junior standing required.

FSHN 420 Nutritional Aspects of Disease  credit: 3 Hours.
Examines nutritional, biochemical, and physiological aspects of disease processes and studies the role of nutrition in prevention, management, and treatment of disease. Same as NUTR 420. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220 or comparable course with a physiology prerequisite; MCB 450 or equivalent.

FSHN 421 Pediatric Clinical Nutrition  credit: 3 Hours.
Examines physiological, biochemical and nutritional aspects of disease processes relevant to infants, children and adolescents. Topics covered include prematurity, developmental disabilities, inborn errors of metabolism, food allergy, obesity and eating disorders. The role of nutrition in prevention, management and treatment of disease is also covered. Offered every other year. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 420; FSHN 322 is highly recommended.

FSHN 423 Advances in Foods & Nutrition  credit: 2 Hours.
New developments in foods and nutrition; readings, lectures, and discussions. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 220 and FSHN 332, or equivalent.

FSHN 425 Food Marketing  credit: 3 Hours.
Same as ACE 430. See ACE 430.

FSHN 426 Biochemical Nutrition I  credit: 3 Hours.
The dietary and hormonal regulation of carbohydrate, lipid and amino acid metabolism. Emphasizes the regulation of enzyme activity and the different roles the major organs have in whole animal energy balance. Same as NUTR 426. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220, or FSHN 120 and FSHN 414, and MCB 450 or concurrent enrollment.

FSHN 427 Biochemical Nutrition II  credit: 3 Hours.
Biochemistry and metabolism of the water and fat soluble vitamins and minerals. Emphasizes the digestion, transport, metabolism and intercellular functions of these nutrients and how diet/food intake and physiological states affect these processes. Same as NUTR 427. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220, or FSHN 120 and FSHN 414, and MCB 450 or concurrent enrollment.

FSHN 428 Community Nutrition  credit: 3 Hours.
Application of nutrition principles to needs assessments, program planning, delivery and evaluation in local, national, and international settings using behavioral theory frameworks. Same as NUTR 428. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 220 or equivalent, one introductory statistics course, and one course in the social or behavioral sciences.

FSHN 429 Nutrition Assessment & Therapy  credit: 3 Hours.
Problem-based learning application (via cases) of the nutrition care process with emphasis on nutrition assessment, diagnosis, intervention, monitoring and evaluation, as related to the management and treatment of disease states. This course is the clinical capstone course for the dietetics curriculum. 3 undergraduate hours. 3 graduate hours. Prerequisite: FSHN 420, or concurrent enrollment required.

FSHN 440 Applied Statistical Methods I  credit: 4 Hours.
Same as ABE 440, ANSC 440, CPSC 440, and NRES 440. See CPSC 440.

FSHN 442 Hospitality Management & Leadership Skills  credit: 3 Hours.
Application of behavioral science and management techniques, methods and strategies to the hospitality industry. Applied management techniques will focus on those managerial behaviors needed to develop and maintain positive and productive relationships with subordinates, peers, supervisors and individuals external to the hospitality organization. 3 undergraduate hours. No graduate credit. Prerequisite: FSHN 340 or consent of instructor.

FSHN 443 Management of Fine Dining  credit: 4 Hours.
Advanced application of food production and management principles to specific food service demands; emphasis on artistry in preparation, serving, and merchandising high quality food in quantity. 4 undergraduate hours. No graduate credit. Prerequisite: FSHN 340 and credit or concurrent registration in FSHN 442.

FSHN 450 Dietetics: Professional Issues  credit: 2 Hours.
Discussion of current topics in dietetics, professional issues (ethics, outcomes research, marketing, legislation, registered dietitian exam) and preparing for dietetic internships. Required of all dietetics students. 2 undergraduate hours. 2 graduate hours. Prerequisite: Senior standing in dietetics.

FSHN 453 Nutrition for Performance  credit: 3 or 4 Hours.
Same as KIN 453. See KIN 453.

FSHN 460 Food Processing Engineering  credit: 3 Hours.
Examines application of process engineering principles to the conversion of raw agricultural materials into finished food products. Topics include basics of engineering analysis, units and dimensions, materials balances, energy balances, thermodynamics, heat transfer, psychrometry, refrigeration and mechanical separations. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 101 and MATH 220; or consent of instructor.

FSHN 461 Food Processing I  credit: 4 Hours.
Principles, unit operations, and applications of food preservation and processing by high temperature, refrigeration, and freezing processes; includes heat transfer, kinetics, chemical and microbial changes in food as a result of processing. Also, principles and applications of food processing unit operations based upon the combination of heat and/or mass transfer, including such unit operations as evaporation, freeze-concentration, membrane separation, dehydration, centrifugation, extrusion, as well as water activity control. Lecture-based course. 4 undergraduate hours. 4 graduate hours. Prerequisite: FSHN 414 or equivalent; FSHN 460 or equivalent, and FSHN 418. FSHN 260 is recommended.

FSHN 462 Food Processing II  credit: 2 Hours.
Laboratory course for FSHN 461. Includes labs on blanching, pasteurization, sterilization, freezing, freeze drying, dehydration (tray drying, drum drying and spray drying), evaporation, and extrusion; discussion and labs. Additional fees may apply. See Class Schedule. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 461.
FSHN 464  Beverage Science & Technology  credit: 2 Hours.
Explores the research, science and technology of the production of safe, high quality beverages through the application of food chemistry, food microbiology, and food processing principles. 2 undergraduate hours. 2 graduate hours. Prerequisite: FSHN 414 or FSHN 332 or consent of instructor. FSHN majors only, junior or senior standing required.

FSHN 465  Principles of Food Technology  credit: 3 Hours.
Overview of processing techniques in the food industry, including thermal/non-thermal processing, refrigeration, freezing, moisture removal, and separation. Presentations cover basic principles of each technology with examples of processing equipment. The changes of food components and nutrients caused by processing is also discussed. Lecture and field trips. 3 undergraduate hours. 3 graduate hours. Credit is not given for both FSHN 465 and the FSHN 461 - FSHN 462 sequence. Undergraduate food science majors or graduate students specializing in food processing/engineering may not enroll in FSHN 465. Recommended: FSHN 332 or food chemistry equivalent.

FSHN 466  Food Product Development  credit: 3 Hours.
Principles of food product development: target market evaluation, concept development and presentation, formulation, manufacturing, packaging, product costs, pricing, safety, and marketing. May include a product in accordance with Institute of Food Technologists national competition guidelines. Products will be unveiled and presented for faculty evaluation. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours in separate terms if topics vary. Prerequisite: FSHN 332 or FSHN 414; FSHN 471 or FSHN 472; concurrent registration or completion of FSHN 461 and FSHN 462, or FSHN 465. This capstone course is limited to seniors in the Food Science or Foods Industry and Business options in FSHN. Graduate students will be allowed to register pending sufficient space in the class.

FSHN 469  Package Engineering  credit: 3 Hours.
Cross-disciplinary study of the materials, machinery, research, design, techniques, environmental considerations, ethics and economics used in the global packaging industry with emphasis on the implementation of improved technologies for the problems unique to food packaging. An emphasis on the broad, systems-based nature of packaging will be maintained throughout the course. Same as ABE 482. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 220; one each of 100-level Chemistry and Physics courses or their equivalent; junior-senior standing or higher, or consent of instructor.

FSHN 471  Food & Industrial Microbiology  credit: 3 Hours.
Relationship of microorganisms to food manufacture and preservation, to food and industrial fermentation and processing, and to foodborne illness. Same as MCB 434. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 101 or MCB 301 or equivalent.

FSHN 480  Basic Toxicology  credit: 3 Hours.
Emphasizes basic toxicology principles and the pharmacokinetics, absorption, distribution, metabolism and excretion of drugs, non-nutrient dietary supplements and other compounds foreign to the body. Toxic effects on major target organ systems are discussed, including an introduction to how foreign compounds can initiate, enhance or prevent the carcinogenic process. Briefly surveys diverse areas of toxicology such as eco-, nano-, forensic, genetic, nutritional, clinical and reproductive toxicology; review the federal regulatory aspects of safety assessment and consumer protection. Same as CB 449, CPSC 433, and ENVS 480. 3 undergraduate hours. 3 graduate hours. Prerequisite: Biochemistry - MCB 450 or equivalent, or consent of instructor.

FSHN 499  Cur Topics in FS & Human Nutr  credit: 1 to 3 Hours.
Group discussion or an experimental course on a special topic in food science and human nutrition. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated in the same or subsequent terms to a maximum of 12 hours as topics vary.

FSHN 502  Advanced Sensory Science  credit: 3 Hours.
In-depth and current topics in sensory science beyond the scope of undergraduate sensory course, FSHN 302. The main course objectives are to 1) discuss the physiological and psychological basis for sensory evaluation, 2) discuss Thurstonian Modeling in Difference Tests, 3) utilize multivariate statistical methods in sensory studies, 4) critique current research papers and articles in the sensory science discipline, and 5) develop a proposal for research utilizing sensory methods. Prerequisite: Undergraduate sensory science course, such as FSHN 302. Graduate students only.

FSHN 510  Topics in Nutrition Research  credit: 1 Hour.
Same as ANSC 525 and NUTR 510. See NUTR 510.

FSHN 511  Regulation of Metabolism  credit: 4 Hours.
Same as ANSC 521 and NUTR 511. See NUTR 511.

FSHN 514  Advanced Food Chemistry  credit: 3 Hours.
Emerging issues related to the chemistry of water, carbohydrates, lipids and proteins, as well as postharvest physiology and impact of processing on chemical reactions in foods. Prerequisite: Organic CHEM 232, or equivalent.

FSHN 517  Fermented & Distilled Beverages  credit: 2 Hours.
The production technology, microbiology and chemistry (including the compositional chemistry, flavor chemistry, and chemistry of aging) of fermented and distilled beverages. Additional fees may apply. See Class Schedule. Prerequisite: Graduate student status, or a food microbiology course and a food chemistry or biochemistry course.

FSHN 518  Chemistry of Lipids in Foods  credit: 3 Hours.
Detailed examination of the chemical and physical properties of lipids in foods. Offered every other year. Prerequisite: A food chemistry or biochemistry course is highly recommended.

FSHN 519  Flavor Chemistry and Analysis  credit: 4 Hours.
Provides graduate students with the tools and understanding necessary for the study of complex food flavor systems. Students will learn: 1) modern techniques of analysis used in the chemical evaluation of food flavor systems; 2) accepted techniques for the sensory evaluation of food flavor, 3) approaches for combined sensory-analytical evaluation of food flavor and 4) principles of food flavor chemistry with emphasis placed on some well-understood flavor systems. Offered every other year. Prerequisite: FSHN 414 and FSHN 418 or equivalent.

FSHN 520  Advanced Clinical Nutrition  credit: 2 Hours.
Same as NUTR 561. See NUTR 561.

FSHN 530  Childhood Obesity I  credit: 3 Hours.
Same as CHLH 530, HDFS 551, KIN 530, NUTR 530, SOCW 570. See NUTR 530.

FSHN 531  Childhood Obesity II  credit: 4 Hours.
Same as CHLH 531, HDFS 552, KIN 531, NUTR 531, SOCW 571. See NUTR 531.

FSHN 550  Grantsmanship and Ethics  credit: 3 Hours.
Same as NUTR 550. See NUTR 550.
**FSHN 563  Food Materials Science  credit: 2 Hours.**
Study of the structure of foods that confer attributes such as soft, crunchy, juicy, creamy, and many others. Foods will be probed at the micro and nano scales. The goal is to better understand, predict, and design food properties and functionalities. 2 graduate hours. No professional credit. Prerequisite: FSHN 414 (Food Chemistry) or equivalent.

**FSHN 573  Advanced Food Microbiology  credit: 3 Hours.**
Detailed examination of food microbiology topics including food-borne pathogens, food fermentation and microbial spoilage. Prerequisite: Graduate student standing or consent of instructor.

**FSHN 574  Value Added Biotransformation  credit: 3 Hours.**
Crop residues, renewable biomass, and agricultural wastes as sustainable and inexpensive substrates for producing value added products through enzymatic and microbial conversion processes. Concepts and applications of metabolic engineering. 3 graduate hours. No professional credit. Prerequisite: FSHN 471.

**FSHN 575  Issues in Food Safety  credit: 3 Hours.**
Current issues affecting the safety of the food supply including emerging pathogens, food additives and pesticides, genetically modified organisms and new technologies will be evaluated in the context of current scientific knowledge, United States food law, and consumer opinions. Offered every other year. Prerequisite: Graduate standing.

**FSHN 579  Advanced Special Problems  credit: 1 to 8 Hours.**
Supervised individual study on advanced special problems in food science and human nutrition. Approved for letter and S/U grading. May be repeated in the same or subsequent semesters. (Summer session: 1 to 4 graduate hours). Prerequisite: Written consent of instructor must be obtained prior to enrollment.

**FSHN 599  Thesis Research  credit: 0 to 16 Hours.**
Original research designed and conducted under graduate faculty supervision. Approved for S/U grading only. May be repeated.

### Foreign Language Teacher Education (FLTE)

**Courses**

**FLTE 471  Introduction to Second Language Teaching  credit: 4 Hours.**
Introduction to contemporary approaches to language teaching, teaching as a profession, and second language acquisition theory. Includes two teaching components and 45 hours of early field experience. 4 undergraduate hours. No graduate credit. Credit is not given for FLTE 471 and any of the following courses: CHIN 471, FR 471, GER 469, JAPN 471, HUM 471, LAT 471, RUSS 471, SPAN 471. Prerequisite: Admission to a qualifying teacher education curriculum. Early field experiences require Illinois State criminal background check and other training.

**FLTE 475  Learning to Teach World Language  credit: 4 Hours.**
Introduction to contemporary approaches to language teaching, teaching as a profession, and second language acquisition theory. Includes two teaching components and 45 hours of early field experience. 4 undergraduate hours. No graduate credit. Credit is not given for FLTE 471 and any of the following courses: CHIN 471, GER 475, JAPN 471, FR 475, LAT 475, RUSS 475, SPAN 475. Prerequisite: Successful completion of FLTE 471.

**FLTE 478  Secondary World Language Teaching  credit: 1 or 3 Hours.**
Course focuses on practical aspects of high school teaching and learning in the 21st century. Emphasis on teaching world languages at the secondary level. Major topics include teaching with technology, unit planning, instructional methods, assessment development and classroom management. 1 or 3 undergraduate hours. No graduate credit. May be repeated in separate semesters to a maximum of 4 hours. Credit is not given for FLTE 478 and any of the following courses: CHIN 478, FR 478, GER 478, JAPN 478, LAT 478, RUSS 478, SPAN 478. Prerequisite: Successful completion of FLTE 471.

Information listed in this catalog is current as of 04/2018
French (FR)

Courses

FR 101 Elementary French I  credit: 4 Hours.
Four-skill course leading toward elementary proficiency in oral expression, listing comprehension, reading, writing, and cultural understanding. Online language laboratory and internet assignments required.

FR 102 Elementary French II  credit: 4 Hours.
Continuation of FR 101. Introduces cultural and supplementary enrichment materials; requires online laboratory sessions as in FR 101. Prerequisite: FR 101 or one year of high school French.

FR 103 Intermediate French I  credit: 4 Hours.
Continuation of FR 102. Introduces students to a full range of structures to complete their initial study of the grammatical system; emphasizes the development of all four skills and cultural understanding through readings and audiovisual enrichment materials. Online language laboratory and internet assignments required. Students planning to major or minor in French should take FR 133 in lieu of FR 103. Prerequisite: FR 102 or equivalent, or a placement score showing high school achievement equivalent to FR 102.

FR 104 Intermediate French II  credit: 4 Hours.
Continuation of FR 103. Comprehensive grammar review with emphasis on oral expression and the continued development of reading and written skills. Completion satisfies graduation requirement in the College of Liberal Arts and Sciences. Students planning to take advanced French courses should take FR 134 in lieu of FR 104. Prerequisite: FR 103 or equivalent, or a placement score showing high school achievement equivalent to FR 103.

FR 133 Accel Intermediate French I  credit: 4 Hours.
Similar to FR 103, but accelerated for those interested in pursuing French in advanced courses; includes comprehensive grammar review and readings in literature and culture. Prerequisite: FR 102, or two semesters of college French, or a placement score showing high school achievement equivalent to FR 102. Normally for students with a "B" average in French or with consent of instructor.

FR 134 Accel Intermediate French II  credit: 4 Hours.
Continuation of FR 133. Comprehensive grammar review and readings in French literature and culture preparatory for continued work at the advanced level; emphasizes all four skills and culture. Prerequisite: FR 133, or FR 103 with department approval, or three semesters of college French, or a placement score showing high school achievement equivalent to FR 103.

FR 156 Exploring Paris  credit: 3 Hours.
Examines the role of Paris in French culture through literature, art, and film. We will consider the city of Paris from its earliest beginnings to the modern era, as a physical, social, and symbolic reality. Through literature, art, and film we will explore the ways in which Paris is at the center of French political and intellectual life. Additionally, close attention will be paid to historical and political developments and their representation. All readings are in English and the course is conducted in English.

This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

FR 179 Migration & Fr Nat ID  credit: 3 Hours.
Studies books and films that emphasize cultural difference and the complexities of the post-colonial world, focusing on the impact of migration and cultural interaction on contemporary France. Stresses themes of immigration and exile, tensions between relations of domination and exploitation and between colonizing and colonized peoples, and the cultural pluralities of community and nation.

FR 191 Freshman Honors Tutorial  credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars and Associates. May be repeated one time. Prerequisite: Consent of departmental honors advisor.

FR 195 French Intellectual Tradition  credit: 3 Hours.
Close reading and in-depth discussion of texts by major French intellectuals from the sixteenth to the mid-twentieth century. Aims to explore the centrality of epistemology (How can we know? Can we know that which we know is true? How can we reason in the face of evil?) in selected texts that will be discussed within their historical contexts, investigating why these issues were raised then and how their contemporaries might have responded to them, as well as their relationship to issues still debated in the twenty-first century. Taught in English.

This course satisfies the General Education Criteria for:
Humanities - Hist Phil

FR 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
Credit: 1 to 5 hours. May be repeated.

FR 205 Oral French  credit: 2 Hours.
Developing oral facility and aural comprehension, focusing on everyday events. Prerequisite: FR 104 or FR 134 or equivalent.

FR 207 Writing and Grammar Workshop  credit: 3 Hours.
Practice-intensive grammar review and vocabulary-building, with an emphasis on strategies to improve accuracy of, and expressivity in, speaking and writing in French. Grammar textbook supplemented with readings and materials from French and Francophone culture (articles, social media, literary works, films). Prerequisite: Four years of high school French or equivalent, or FR 134 or, with departmental approval, FR 104.

FR 208 Critical Writing and Reading  credit: 3 Hours.
Intensive practice of writing and reading skills in French, emphasizing vocabulary and critical concepts important to analyzing literary and cultural texts. Prerequisite: FR 207 or equivalent must be taken prior to this course.

FR 211 Introduction to Literary Studies  credit: 3 Hours.
Introduction to concepts of modernity and questions of representation, through French texts from the nineteenth through the twenty-first centuries. Analysis of diverse literary forms (poems, plays, narratives), and use of resources for literary, historical and cultural research. Strengthening of reading, writing and speaking skills in French through research projects, writing assignments and revisions, and oral presentations. Prerequisite: FR 207 or equivalent.

FR 212 Introduction to Cultural Analysis: French Identities  credit: 3 Hours.
Introduction to concepts of and debates on French national identity. Materials are drawn from a multiplicity of media and from many spheres of modern life in France: political, artistic, the everyday, etc. Identification of major resources for the study of culture and analysis of diverse cultural texts. Strengthening of reading, writing and speaking skills in French through a wide range of exercises and projects. Prerequisite: FR 207.
FR 213 French Phonetics credit: 2 Hours.
Practical introduction to French phonetics, stressing pronunciation. Prerequisite: FR 104 or FR 134 or equivalent.

FR 240 Constr Afr and Carib Identity credit: 3 Hours.
Introduces students to cultural pluralism by comparing and contrasting African and Caribbean identities, as they are represented in literature and film. Taught in English. Same as AFST 209, CWL 225, and LAST 240. Credit is not given towards the major or minor in French. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

FR 299 Study Abroad credit: 0 to 18 Hours.
Lectures, seminars, and practical work in French language, literature, civilization, and in other academic areas appropriate to the student's course of study. Approved for both letter and S/U grading. May be repeated in the same term to a maximum of 18 hours; may be repeated in separate terms to a maximum of 36 hours; may be repeated in a summer session to a maximum of 8 hours. Maximum of 34 hours per academic year. Prerequisite: FR 209 and two of the following: FR 205, or 207; 2.75 overall average; 3.0 average in French courses.

FR 301 Medieval and Early Modern Literature credit: 3 Hours.
Overview of French literature from the Middle Ages to the Revolution in its historical context. Taught in French. Credit is not given for FR 209 and FR 301. Prerequisite: FR 211 and FR 212.

FR 309 Poetry credit: 3 Hours.
The study of major movements and figures in French poetry. Traditions and innovations. Poetic genres. Introduction to versification and metrics. Close readings of individual poems. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 311 Narrative Literature credit: 3 Hours.
Reading and interpretation of selected French novels and short narratives from all periods. History and analysis of narrative literature as a genre. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 312 Theater and Performance credit: 3 Hours.
Reading and interpretation of plays and other performative genres, with attention to historical development and critical analysis. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 314 Advanced Grammar in Context credit: 3 Hours.
Advanced practical study of present-day French, with an emphasis on grammar, free composition and a consideration of various cultural contexts of language use. Credit is not given for FR 314 and FR 414. Prerequisite: FR 207.

FR 319 Introduction to Francophone Literature credit: 3 Hours.
Examination of selected major novels from the French-speaking world outside France along thematic and formal lines; literary responses to colonialism, political independence and departmentalization in a variety of former (and current) French territories; study of critical approaches to narrative and related issues of individual and communal identity and culture. Same as CWL 317. May be repeated to a maximum of 6 hours if topics vary. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 322 Movements and Perspectives credit: 3 Hours.
Focused study and discussion of a major literary movement or critical perspective. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 323 Major Literary Figures credit: 3 Hours.
Presents the works of one or several major figures of French or francophone literary traditions in their cultural contexts. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 324 Literature and the Other Arts credit: 3 Hours.
Explores relationships between French literature and such fields as art, architecture, and music. Topics will vary. May be repeated to a maximum of 6 hours. Prerequisite: FR 207, FR 211, and FR 212; or equivalents.

FR 335 French Cultural History to 1789 credit: 3 Hours.
Survey of French cultural history from the Middle Ages to the French Revolution. Taught in French. Credit is not given for FR 335 and FR 435. Prerequisite: FR 211 and FR 212.

FR 336 French Cultural History 1789-1968 credit: 3 Hours.
Survey of French cultural history from the French Revolution to 1968. Taught in French. Credit is not given for FR 336 and FR 436. Prerequisite: FR 211 and FR 212.

FR 337 Contemporary France credit: 3 Hours.
Overview of major cultural, social, and political issues and debates in late 20th- and 21st-century France. Topics may include: political life; definitions of the French Republic; the government and social policies; evolving views on sexuality, gender and the family; France and the European Union; professional life and labor laws; immigration; the cultural identity of France; new media. Some readings in English. Class discussion and written work in French. Prerequisite: FR 207, FR 211, FR 212.

FR 385 Politics of the European Union credit: 3 Hours.
Same as EURO 385, GER 385, and PS 385. See PS 385.

FR 387 French & Comparative Cinema I credit: 3 Hours.
The art, techniques, sociology, politics of French cinema in the context of French culture, world history, and general film development from 1895 to approximately 1950. Selected trends studied through films from several countries with stress on major French filmmakers including Lumiere, Melies, Gance, Clair, Vigo, Renoir, Carne, Cocteau, Prevert, Clouzot. Knowledge of French not required. Same as CWL 387, HUM 387, and MACS 382. Credit is not given for both FR 387 and FR 488.

FR 389 French & Comparative Cinema II credit: 3 Hours.
The art, techniques, sociology, politics of French cinema in the context of French culture, world history, and general film development from approximately 1950 to the present. Selected trends studied through films from several countries with stress on major French filmmakers such as Clouzot, Bresson, Chabrol, Resnais, Godard, Truffaut, Varda, Marker, Rohmer, Beineix, Kassovitz, and Assayas. Knowledge of French not required. Same as CWL 389, HUM 389, and MACS 383. Credit is not given for both FR 389 and FR 489. Prerequisite: One college-level Media or Media and Cinema Studies course or consent of instructor.

FR 390 Indiv Study Major Tutorial credit: 1 to 12 Hours.
Tutorial taken by students during two of their last four terms of undergraduate study. Students read the works on a departmental reading list with the guidance of a tutor. Approved for letter and S/U grading. May be repeated to a maximum of 12 hours. Prerequisite: FR 205, FR 207, FR 209, and FR 210, or equivalent; a declared major in French; junior standing.

FR 410 Modern African Fiction credit: 3 or 4 Hours.
Same as AFST 410, CWL 410, and ENGL 470. See AFST 410.
FR 413 French Phonetics and Phonology  credit: 3 Hours.  
Introduction to theoretical aspects of French phonetics and phonology, 
research methods, and pronunciation exercises on speaking styles in 
French. 3 undergraduate hours. 3 graduate hours. Prerequisite: FR 213 or 
equivalent.

FR 416 Structure of French Language  credit: 3 Hours.  
General survey of the linguistic structure of modern standard French, 
including phonology, morphology, and syntax; emphasis on the 
differences between its spoken and written forms. Same as LING 416. 
3 undergraduate hours. 3 graduate hours. Prerequisite: FR 413 or 
equivalent training in phonetics.

FR 417 History of the French Language  credit: 3 or 4 Hours.  
Introduction to the historical development of the French language, 
from its Latin origins to the present. Analysis of texts from a variety of 
genres across the written history of the language, and an examination 
of the social role of the language in the definition of France. Same as 
MDVL 417. 3 undergraduate hours. 4 graduate hours. Prerequisite: 
FR 314.

FR 418 Language & Minorities in Europe  credit: 3 or 4 Hours.  
Introduction to political, judicial, linguistic, and cultural issues concerning 
indigenous and migrant/immigrant languages in the countries of the 
European Union. Focuses on political and judicial issues, such as legal 
 aspects of bilingual education and minority language use, as well as 
linguistic and cultural aspects, such as assimilation, language-mixing, 
and language change. Taught in English. Same as GER 418, ITAL 418, 
LING 418, PS 418, SLAV 418, and SPAN 418. 3 undergraduate hours. 4 
graduate hours. Prerequisite: FR 314 or consent of instructor.

FR 419 Techniques in Translation I  credit: 2 or 3 Hours.  
Practical course in the techniques of translating technical, commercial, 
scientific, and literary texts from English into French and vice versa. 3 
undergraduate hours. 2 graduate hours. Prerequisite: FR 413 or consent 
of instructor.

FR 421 Techniques in Translation II  credit: 2 or 3 Hours.  
Continuation of FR 419. Practical exercises in translating from French 
 to English and vice versa in a variety of texts, along with an introduction 
to theoretical aspects of translation. 3 undergraduate hours. 2 graduate 
hours. Prerequisite: FR 419 or consent of instructor.

FR 443 Studies in French  credit: 3 to 4 Hours.  
See Schedule for current topics. 3 undergraduate hours. 3 to 4 graduate 
hours. May be repeated in the same or separate terms to a maximum 
of 12 undergraduate hours or 16 graduate hours. Prerequisite: Junior 
standing.

FR 460 Principles of Language Testing  credit: 3 or 4 Hours.  
Same as EIL 460, EPSY 487, GER 460, ITAL 460, PORT 460, SLS 460, 
and SPAN 460. See EIL 460.

FR 462 Introduction to Romance Linguistics  credit: 3 or 4 Hours.  
Same as ITAL 435, LING 462, PORT 435, RMLG 435, and SPAN 435. See 
SPAN 435.

FR 479 Studies in Francophonie  credit: 3 or 4 Hours.  
Study of various topics in French language, literature, and culture outside 
of France. Regions may include francophone Africa, the Americas, 
Europe, and the Middle East. Same as CWL 434. 3 undergraduate hours. 3 
or 4 graduate hours. May be repeated to a maximum of 12 undergraduate 
hours or 16 graduate hours if topics vary.

FR 481 Theoretical Foundations of SLA  credit: 3 or 4 Hours.  
Same as GER 489, ITAL 489, LING 489, PORT 489, and SPAN 489. See 
LING 489.

FR 485 Commercial & Econ French I  credit: 2 or 3 Hours.  
Studies French business practices: company structures, selling and 
buying techniques, banking, import/export and other commercial 
negotiations, employment, formalities, and conventions of letter-writing; 
involves both theory and practice. 3 undergraduate hours. 2 graduate 
hours. Prerequisite: FR 314 or equivalent, or consent of instructor.

FR 486 Commercial & Econ French II  credit: 2 or 3 Hours.  
Emphasizes business correspondence and simulation of business 
practices in the areas introduced in FR 485; also focuses on geographic 
and economic topics pertaining to France within the European 
community and Europe in general. 3 undergraduate hours. 2 graduate 
hours. Prerequisite: FR 485 or equivalent, or consent of instructor.

FR 492 Senior Thesis  credit: 2 Hours.  
For candidates for honors in French and for other seniors. 3 
undergraduate hours. No graduate credit. May be repeated to a maximum 
of 4 hours. Prerequisite: Senior standing.

FR 498 Senior Seminar  credit: 3 Hours.  
Studies in authors, genres, themes, and movements in French literature; 
conducted entirely in French. 3 undergraduate hours. No graduate credit. 
May be repeated. Prerequisite: Senior standing.

FR 500 Beginning French Grads  credit: 4 Hours.  
Basic grammar, vocabulary, and reading practice; designed for graduate 
students desiring help in preparing for the French reading requirements 
for the Ph.D. Credit is not given toward a graduate degree.

FR 501 Reading French Grads  credit: 4 Hours.  
Grammar, vocabulary, and general and special reading; designed for 
braduate students desiring help in preparing for the French reading 
requirements for the Ph.D. Credit is not given toward a graduate degree. 
Prerequisite: FR 500, or FR 101 and FR 102, or equivalent.

FR 503 The Study of Culture I  credit: 4 Hours.  
Study of major artistic, historical, political, and literary aspects of France 
up to the French Revolution with emphasis on the relationship between 
literature and other aspects of French culture.

FR 504 The Study of Culture II  credit: 4 Hours.  
Study of major artistic, historical, political, and literary aspects of 
France from the French Revolution to the present with emphasis on the 
relationship between literature and other aspects of French culture.

FR 505 Teaching College and Secondary Foreign Language  credit: 4 
Hours.  
Examination and discussion of classroom goals, procedures and 
techniques in teaching a foreign language (French, Italian) at the 
college and secondary level, associated with a demonstration class and 
supervision of teaching practice. Required of new teaching assistants 
in the Department of French and Italian. Same as ITAL 505. 4 graduate 
hours. No professional credit.

FR 529 Studies in French Linguistics  credit: 4 Hours.  
Variable topics course dealing with both synchronic and diachronic 
 aspects of the French language. May be repeated if topics vary.

FR 530 Introduction to Research and Text Criticism  credit: 4 Hours.  
Proseminar in literary studies: research and methods; approaches to 
the literary text. Required of all M.A. and Ph.D. candidates. Same as 
ITAL 530. 4 graduate hours. No professional credit.

FR 543 French Studies  credit: 4 Hours.  
Flexible course limited only by the concentration of its material in French; 
may be activated by faculty proposal. May be repeated to a maximum of 
16 hours if topics vary.
FR 552  Studies French & Comp Cinema  credit: 4 Hours.
Historical, aesthetic, social, and technical studies of the French cinema; its development and relation to world cinema and to literature. Same as CWL 552. May be repeated to a maximum of 12 hours.

FR 559  Sem Romance Ling  credit: 4 Hours.
Same as ITAL 559, LING 559, PORT 559, RMLG 559, and SPAN 557. See SPAN 557.

FR 570  Seminar Old French Literature  credit: 4 Hours.
Discussion and research on a specialized topic in Old French literature. See Schedule for current topic. Same as MDVL 570. May be repeated. Prerequisite: FR 531 or consent of instructor.

FR 571  Seminar 16thc French Lit  credit: 4 Hours.
Discussion and research on a specialized topic in sixteenth-century French literature. See Schedule for current topic. May be repeated.

FR 572  Seminar 17thc French Lit  credit: 4 Hours.
Discussion and research on a specialized topic in seventeenth-century French literature. See Schedule for current topic. May be repeated.

FR 573  Seminar 18thc French Lit  credit: 4 Hours.
Discussion and research on a specialized topic in eighteenth-century French literature. See Schedule for current topic. May be repeated.

FR 574  Seminar 19thc French Lit  credit: 4 Hours.
Discussion and research on a specialized topic in nineteenth-century French literature. See Schedule for current topic. May be repeated.

FR 576  Seminar in Francophonie  credit: 4 Hours.
Discussion and research on a specialized topic in literature in French outside of France. See Schedule for current topic. 4 graduate hours. No professional credit. May be repeated in separate terms if topics vary.

FR 578  Seminar 20thc French Lit  credit: 4 Hours.
Discussion and research on a specialized topic in twentieth-century French literature. See Schedule for current topic. Same as CWL 578. May be repeated.

FR 579  Seminar in French Literature  credit: 4 Hours.
Discussion and research on a specialized area in French literature. See Schedule for current topic. May be repeated.

FR 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as EIL 580, GER 580, ITAL 580, PORT 580, SLS 580, and SPAN 580. See SPAN 580.

FR 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, EPSY 563, GER 584, ITAL 584, LING 584, PORT 584, and SPAN 584. See SPAN 584.

FR 588  Sem Second Lang Learn  credit: 4 Hours.
Same as EALC 588, GER 588, ITAL 588, LING 588, PORT 588, and SPAN 588. See SPAN 588.

FR 591  Individual Topics  credit: 1 to 8 Hours.
Prerequisite: Graduate standing with a major or minor in French.

FR 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Gender and Women's Studies (GWS)

GWS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GWS)

Courses

GWS 100  Intro Gender & Women's Studies  credit: 3 Hours.
Interdisciplinary introduction to the study of gender, women, and sexuality. Addresses issues such as social experience, representation and popular culture, femininities and masculinities, family structure, education, employment, economics, literature and the arts, religion, history, and technology. Explores interrelationships of race, ethnicity, sexuality, gender, ability, and age from a transnational perspective. Same as HDFS 140 and SOC 130. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

GWS 103  Black Women in the Diaspora  credit: 3 Hours.
Same as AFRO 103 and AFST 103. See AFRO 103. This course satisfies the General Education Criteria for: Cultural Studies - US Minority

GWS 150  Contemp Women's Issues  credit: 3 Hours.
Explores the most recent debate and research related to contemporary issues which affect primarily women. Reviews issues related to sexual and domestic violence, gender socialization, feminization of poverty, women's health, sexual harassment, work and family, politics, and media influences from a multi-discipline and multi-cultural perspective.

GWS 199  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for letter and S/U grading. May be repeated.

GWS 201  Race, Gender & Power  credit: 3 Hours.
Presents multiple windows into perceptions and perspectives upon gender, sexuality, power, identity and culture, and their multiple intersections. The concept of race in its many manifestations is used to examine relationships of self to society, state institutions and cultures. By paying greater attention to race and power, nuanced understandings of the way the gender systems are maintained, patrolled and formed will be examined. Topics may include: film, media, technology, culture, religion, identities, sexualities. Same as SOC 201. This course satisfies the General Education Criteria for: Cultural Studies - Western

GWS 202  Sexualities  credit: 3 Hours.
Surveys sexualities from multiple perspectives, standpoints, disciplines, and theories. How have different cultures, different people, and different viewpoints understood, shaped, and interpreted sex, sexualities and genders? Course places the concept of sexuality at its core to examine citizenship, education, reproduction, science, tourism, urban/rural space, and politics. Topics may include: gender, race, identities, power, transformation, reproduction. Same as SOC 202. This course satisfies the General Education Criteria for: Cultural Studies - Western

GWS 215  US Citizenship Comparatively  credit: 3 Hours.
Same as AAS 215, AIS 295, AFRO 215, and LLS 215. See AAS 215. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - US Minority

GWS 218  Intro to Social Issues Theatre  credit: 3 Hours.
Same as THEA 218. See THEA 218.

GWS 225  Women in Prehistory  credit: 3 Hours.
Same as ANTH 225. See ANTH 225. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

GWS 226  Black Women Contemp US Society  credit: 3 Hours.
Same as AFRO 226 and SOC 223. See AFRO 226.
GWS 230  Latina/o Genders & Sexualities  credit: 3 Hours.
Same as LLS 230. See LLS 230.

GWS 240  Sex & Gender in Antiquity  credit: 3 Hours.
Same as CLCV 240 and CWL 262. See CLCV 240.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

GWS 245  Women & Gender Pre-Mod Europe  credit: 3 Hours.
Same as HIST 245 and MDVL 245. See HIST 245.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

GWS 250  Gender and Representation  credit: 3 Hours.
Focusing primarily on gender, race, sexuality, and their intersections, this
introductory course analyzes the politics of representation drawn from
popular culture, painting, television and film, literature, music, religion,
and new media.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GWS 255  Queer Lives, Queer Politics  credit: 3 Hours.
Investigates queer lives in relation to dominant ideas about "deviance" and "equal rights." Drawing on case studies, the course investigates
questions related to nation, race, economy, bodies, drugs, health,
identities, agency and action as they intersect with contemporary queer
politics. Students will learn conceptual and qualitative methods to
investigate issues related to queer lives. Same as SOC 255.

GWS 258  Sex in Nature and Culture  credit: 3 Hours.
Same as ANTH 258. See ANTH 258.

GWS 261  Gender in a Transnational Perspective  credit: 3 Hours.
Same as SOC 261. See SOC 261.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GWS 262  Women's Lives  credit: 3 Hours.
Same as ANTH 262. See ANTH 262.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GWS 263  US History of Medicine  credit: 3 Hours.
Same as HIST 263. See HIST 263.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

GWS 270  Sexuality and Literature  credit: 3 Hours.
Same as GER 270 and CWL 272. See CWL 272.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

GWS 272  Women and Politics  credit: 3 Hours.
Same as PS 272. See PS 272.

GWS 280  Women Writers  credit: 3 Hours.
Same as ENGL 280. See ENGL 280.

GWS 281  Women in the Lit Imagination  credit: 3 Hours.
Same as ENGL 281. See ENGL 281.

GWS 285  US Gender History to 1877  credit: 3 Hours.
Same as HIST 285. See HIST 285.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

GWS 286  US Gender History Since 1877  credit: 3 Hours.
Same as HIST 286. See HIST 286.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

GWS 287  African-American Women  credit: 3 Hours.
Same as AFRO 287 and HIST 287. See HIST 287.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

GWS 295  Beginning Topics GWS  credit: 3 Hours.
Approved for letter and S/U grading. May be repeated in the same term to
a maximum of 9 hours; may be repeated in separate terms to a maximum
of 12 hours.

GWS 305  Theories of Race, Gender, and Sexuality  credit: 3 Hours.
Same as AAS 300 and LLS 305. See AAS 300.
This course satisfies the General Education Criteria for:
Advanced Composition

GWS 315  War, Memory, and Cinema  credit: 3 Hours.
Same as AAS 315. See AAS 315.

GWS 320  Gender & Latina/o Migration  credit: 3 Hours.
Same as LLS 320 and SOC 321. See LLS 320.

GWS 325  Lesbian/Queer Media Cultures  credit: 3 Hours.
Discusses how various LGBT/Q communities were consolidated
or drawn together by print and invented in the very acts of writing,
distributing, purchasing, and reading print artifacts. Students examine
early homophile publications, the rise of presses dedicated to LGBT/
Q literature, independent bookstores and distribution networks, as well
as the contemporary world of zines, blogs, chatrooms, fanfiction, and
online journals, to see the intersection of sexuality, community, identity,
and the print sphere. Students will learn how to historicize the rise of
various LGBT/Q subcultures through a long history of print and how to
navigate and understand the gregarious contemporary world of online
publishing and social networking. Prerequisite: Previous course in GWS
recommended.

GWS 330  Bodies & Tech in Pop Culture  credit: 3 Hours.
Examines gender, race, sexuality and nation as embodied in visions of
science and technologies in popular culture. Topics include medicine,
work, leisure, domesticity, games, films, fiction, geopolitics, and the body.
Prerequisite: GWS 100 or GWS 250 or GWS 350 or consent of instructor.

GWS 333  Memoir & Autobiography  credit: 3 Hours.
Explores the phenomenon of autobiography in the contemporary world.
Students will read theories of autobiography, and ask questions about
how writing about the self is gendered, and how representations of the
self fare in the outside world. An important aspect of the course will be
examinations of how changing media such as film, television talk shows
and the Internet shape these representations. Students will be assigned
to read and make a presentation on one of the supplementary texts of
autobiographies chosen from authors in the First and Third worlds. Same
as ENGL 333.

GWS 334  Brazilian Women's Lit Trans  credit: 3 Hours.
Same as PORT 334. See PORT 334.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western
GWS 335  Film, TV, and Gender  credit: 3 Hours.
Examines the history and theory of film, television, and their interrelationship through one or more specific case studies. Topics may include: film and feminist movements; girl films; queer TV; gender, sport and TV. Focuses attention on gender and related issues such as race, ethnicity, sexuality, age, ability and disability, class, and nationality. Addresses issues of representation, narrative, genre, industry, audience, exhibition, media convergence, new and mobile media, and social space. Same as MACS 335.

GWS 337  Interrogating Masculinities  credit: 3 Hours.
Explores the social construction of gender as it pertains to masculinities in conjunction with analyses of race, class, gender, ability, and sexuality. Masculinities, in its various forms, shapes and lives of both women and men and this course will examine the construction, reproduction, and impact of masculinities on the institutions of politics, education, work, religion, sports, family, media, and the military to name a few. Paying careful attention to the conjunctions between masculinity and culture, this course will interrogate how masculinities shape individual lives, groups, nationalisms, organizations, and institutions and will analyze the ways in which power functions within local transnational contexts. Above all, this course offers a road map for forging new, progressive models of masculinity.

GWS 340  Gender, Relationships & Society  credit: 3 Hours.
Same as HDFS 340 and SOC 322. See HDFS 340.

GWS 345  Digital & Gender Cultures  credit: 3 Hours.
This interdisciplinary course uses the lens of gender critique and pairs it with social activism to provide students analytical tools to engage with, reshape, and create digital cultures. Examines recent research and public policies related to the gendered, raced, and classes dimensions of digital cultures and inequality; the broad range of labor issues embedded in the growing income disparity related to digital cultures; the various ways that digital inequality has been defined by public policy, sociologists, and activists, and real examples of collective activism and social change related to emerging technologies. Same as INFO 345, MACS 345, and SOC 345.

GWS 350  Feminist & Gender Theory  credit: 3 Hours.
Interdisciplinary survey of feminist and gender theory. Traces developments in feminist theory and LGBT/Q approaches and explores contemporary debates.

GWS 355  Beauty and Culture  credit: 3 Hours.
Examines beauty and culture, in particular how tropes, ideologies, and politics bolster the construction of beauty as an aesthetic value. Looks at the ways in which beauty is imagined, visualized, narrated, naturalized, reproduced, privileged, and contested through various venues such as art, performance, philosophy, media, history, and popular culture. Attention will be given to race, class, gender, sexuality, and the implications thereof.

GWS 356  Sex & Gender in Popular Media  credit: 3 Hours.
Same as MACS 356. See MACS 356. This course satisfies the General Education Criteria for: Cultural Studies - Western

GWS 360  Women and the Visual Arts  credit: 3 Hours.
Same as ARTH 360. See ARTH 360.

GWS 361  Women in East Asia  credit: 3 Hours.
Same as EALC 361. See EALC 361. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

GWS 363  Gender, Health & Pop Culture  credit: 3 Hours.
Aspects of popular culture, including television, magazines, newspapers, social networking sites, and internet sources to name a few, are ways that health information is disseminated. Students will examine how we define health and understand disease as related to popular culture. Discusses how people resist or reinforce these messages about health, well being, fitness, and diet. Also discusses how understandings of race, sexuality and class affect the ways that we think about sickness, health and constructions of gender.

GWS 366  Feminist Disability Studies  credit: 3 Hours.
Explores the complex relationship between gender and disability. Approaching disability as a social and political category rather than a strictly medical one, we will ask: how is the language of disability used to produce and police a variety of gender, sexual, and racial identities as non-normative? How might debates over medicine, technology, and the concept of "natural" pit gender and disability against one another? How have feminist, queer, and transgender scholarship and activism engaged disability? Prerequisite: One of the following: GWS 100, GWS 201, GWS 202.

GWS 370  Queer Theory  credit: 3 Hours.
Traces the development of queer theory as a mode for understanding queer studies methodologies and the changing intellectual landscape of key issues in the field. As part of the course, students will review key concepts and theoretical schools of thought, navigating important debates guiding the field. Theories will engage questions of the social and cultural through topics including race, gender, nation, family, history, identity formation, sexology, the state, and capital. Same as SOC 320. Prerequisite: GWS 100, GWS 201, GWS 202, or consent of instructor.

GWS 376  Children and Youth Literature  credit: 3 Hours.
Same as CWL 376, EURO 376, and SCAN 376. See SCAN 376.

GWS 378  Fairy Tales & Gender Formation  credit: 3 Hours.
Discusses how femininity and gender formation are related through fairy tales. As children grow they are taught the difference between male and female roles. One of the main ways this instruction takes place is through the pleasurable media of fairy tales in books, poems, and more recently, films. Sleeping Beauty, Snow White, Beauty and the Best, and the Little Mermaid, among others, will be examined to understand how sexual identity is constructed differently in different cultures, and how issues such as rape and incest are addressed within the narratives. The readings explore the ways that fairy tales work to express psychological reactions to maturation while conditioning both characters and readers to adopt specific social roles in adulthood. Same as ENGL 378.

GWS 380  Black Women Hist & Cultures  credit: 3 Hours.
Interdisciplinary study of black women's multiple histories and varied cultures including black women from North America, Africa, and the Caribbean. Same as AFRO 380. Prerequisite: AFRO 100 or GWS 100 or GWS 250 or consent of instructor. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

GWS 382  Black Women & Popular Culture  credit: 3 Hours.
Explores how Black women have been are currently portrayed in popular media, such as television, internet, movies, and popular mediums such as magazines, popular fiction, newspapers, and other cultural phenomenon. Examines what these portrayals reveal about Black women's role in society and how black women as consumer and participants respond to these stereotypes, and create alternative oppositional images. This course satisfies the General Education Criteria for: Cultural Studies - US Minority
GWS 383  Hist of Blk Women's Activism  credit: 3 Hours.
Same as AFRO 383 and HIST 383. See AFRO 383.

GWS 385  Transnational Sexualities  credit: 3 Hours.
Investigates the ways in which sexual identities change as national contexts change, as borders are imagined, valued, and crossed, and as definitions of race, gender, and religion shift. Interrogates how national and transnational identities (at home and abroad), modernites, histories, and colonial and global narratives are built on ideas of racialized sexualities, and as such, is particularly interested in the study of queer diaspora. Importantly, this course utilizes transnational feminist frameworks for re-thinking issues related to sexuality, immigration, nation-building, race and gender. Areas of inquiry include imperialism, immigration, war, tourism and globalization. Same as HIST 385. Prerequisite: GWS 100, GWS 201 or GWS 202 or consent of instructor.

GWS 387  History of Sexuality in U.S.  credit: 3 Hours.
Explores a wide variety of sources to understand how notions of sexuality have emerged and been contested at key moments in U.S. history. Our guiding questions include: How have "official" or governing discourses of sexuality (in law, medicine, religions, science) been formulated? In turn, how have "ordinary" people understood and practiced their sexuality? How has the meaning of particular sexual practices changed over time? How have ideas about race, gender, and/or class been embedded within the discourse of sexuality at different moments in U.S. history? What methods of reading and interpretation are most useful for the historical study of sexuality? Also emphasizes skills such as critically analyzing primary sources within their historical context; interpreting different types of primary sources; locating, understanding, and evaluating scholarly secondary sources; and presenting historical arguments, based on both primary and secondary sources. Same as HIST 387.

GWS 390  Individual Study  credit: 0 to 3 Hours.
Special topics not treated in regularly scheduled classes. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours if topics vary. Prerequisite: One course in Gender and Women's Studies; consent of instructor.

GWS 392  Chicanas&Latinas: Self&Society  credit: 3 Hours.
Same as LLS 392 and SOC 392. See LLS 392. This course satisfies the General Education Criteria for: Advanced Composition

GWS 395  Intermediate Topics GWS  credit: 3 Hours.
Approved for letter and S/U grading. May be repeated in the same term to a maximum of 9 hours; may be repeated in separate terms to a maximum of 12 hours.

GWS 397  Sexuality in Modern Europe  credit: 3 Hours.
Course Information: Same as HIST 397. See HIST 397.

GWS 403  Women in Muslim Societies  credit: 3 or 4 Hours.
Same as ANTH 403, GLBL 403, HIST 434, REL 403 and SAME 403. See REL 403.

GWS 409  Women’s Health  credit: 3 Hours.
Same as CHLH 409. See CHLH 409.

GWS 415  Africana Feminisms  credit: 3 or 4 Hours.
Same as AFRO 415 and AFST 420. See AFRO 415.

GWS 417  Leading Post-Perform Dialog  credit: 4 Hours.
Same as THEA 417. See THEA 417.

GWS 418  Devising Social Issues Theatre  credit: 3 or 4 Hours.
Same as THEA 418. See THEA 418.

GWS 421  Sex Role Theory in Counseling  credit: 4 Hours.
Same as EPSY 421. See EPSY 421.

GWS 424  Gender & Race in Contemp Arch  credit: 3 Hours.
Same as ARCH 424. See ARCH 424.

GWS 432  Gender and Language  credit: 3 or 4 Hours.
Same as CMN 432 and LING 432. See CMN 432.

GWS 435  Commoditying Difference  credit: 3 or 4 Hours.
Same as AAS 435, AFRO 435, LLS 435, and MACS 432. See LLS 435.

GWS 442  Body, Culture & Society  credit: 3 or 4 Hours.
Same as KIN 442. See KIN 442.

GWS 450  Topics in Bodies and Genders  credit: 3 Hours.
Same as CWL 450. See CWL 450.

GWS 454  Social Work with Women  credit: 3 or 4 Hours.
Same as SOCW 454. See SOCW 454.

GWS 459  Gender, Sex, & Postcoloniality  credit: 3 or 4 Hours.
Explores the relationship of imperialism, sexuality, and race through the lens of postcolonial theory. Same as HIST 459. 3 undergraduate hours. 4 graduate hours. Prerequisite: GWS 100 or GWS 250 and GWS 350 or GWS 370; or consent of instructor.

GWS 462  Hip Hop Feminism  credit: 3 or 4 Hours.
Explores how hip hop has shaped the culture, aesthetics, experiences, and perspectives of an emergent generation of artists, scholars, and writers with several aims: 1) To challenge systemic social inequalities. 2) To articulate new visions of justice that depend on the power young people possess. To better understand how and why the relationship between hip hop and feminism is coherent, meaningful, and compelling, students will become familiar with artists working within and beyond various elements of hip hop (rap, graffiti, emceeing, deejaying, etc.), social critics concerned with documenting hip hop's cultural practices, and critical educator (broadly defined). 3 undergraduate hours. 4 graduate hours.

GWS 465  Race, Sex, and Deviance  credit: 3 or 4 Hours.
Same as AAS 465, AFRO 465, and LLS 465. See LLS 465.

GWS 467  Locating Queer Culture  credit: 3 Hours.
Our goal is to learn different methods for researching "queer culture," with a special focus on the local context. Explores two research methods in depth: history and ethnography. Students will produce their own original research based on genuine gaps in existing knowledge. Provides an opportunity to learn both received knowledge about queer culture, as well as that which we do not yet know. By the end of this course, the class will collectively produce new knowledge about queer culture using local stories. Same as HIST 468. 3 undergraduate hours. No graduate credit.

GWS 470  Transgender Studies  credit: 3 or 4 Hours.
What are the issues and politics related to transgender and transsexual identities? Students will examine and critically evaluate historical and contemporary debates that contest normative male/female binaries and traditional categorizations of sexuality. The course moves beyond these initial inquiries into gender theory to consider the effects of institutional discourses produced through stage and civil society. Taught with particular attention given to questions of race, national formations, medical, and legal discourses. Areas of inquiry may include gender theory, transnational identities, gendered and racial performances, medical and psychological diagnoses, violence, the law, and the Prison Industrial Complex. Through these topics, students will be asked to consider important questions over political and legal representation, autonomy, the rights of citizenship, and the practice of everyday life. 3 undergraduate hours. 4 graduate hours. Prerequisite: One course in Gender and Women’s Studies at the 200- or 300-level, or consent of instructor.

Information listed in this catalog is current as of 04/2018
GWS 478  Sex, Power and Politics  credit: 3 or 4 Hours.
Examines representations of the relationship between sex, power, and
subjectivity and how they have shaped feminism. Explores critical
approaches to feminist analyses of women's oppression and debates
about sexuality, including issues such as consent, rape and prostitution.
Same as PS 413. 3 undergraduate hours. 4 graduate hours. Prerequisite:
One course in Gender and Women's Studies at the 200- and 300-level or
consent of instructor.

GWS 485  The Politics of Fashion  credit: 3 or 4 Hours.
Interdisciplinary and transnational study of the historical and cultural
development of fashion. Examines the social and political tensions
embodied in fashion, the fashion industry, and sartorial practices in
relation to gender, race, nation, and sexuality. Same as AAS 485. 3
undergraduate hours. 4 graduate hours. Prerequisite: One course in
Gender and Women's Studies at the 200 or 300 level, or consent of
instructor.

GWS 490  Individual Study  credit: 2 to 4 Hours.
Supervised reading and research in Gender and Women's Studies chosen
by the student with instructor approval. 2 to 4 undergraduate hours.
2 to 4 graduate hours. May be repeated to a maximum of 6 hours.
Prerequisite: Two courses in Gender and Women's Studies at the 200-400
levels; or junior standing; or consent of instructor.

GWS 495  Advanced Topics GWS  credit: 3 or 4 Hours.
3 undergraduate hours. 4 graduate hours. Approved for letter and
S/U grading. May be repeated in the same term to a maximum of 9
undergraduate hours or 12 graduate hours; may be repeated in separate
terms to a maximum of 12 undergraduate or 12 graduate hours.

GWS 498  Senior Seminar  credit: 3 Hours.
Considers the relationship between theory and research in Women's
Studies. Reviews and examines the key issues of feminist scholarship.
Provides students with the methodological knowledge and opportunity to
carry out a research project. 3 undergraduate hours. No graduate credit.
Prerequisite: Senior standing and enrollment as a major in Gender and
Women's Studies, or consent of instructor.

This course satisfies the General Education Criteria for:
Advanced Composition

GWS 501  Prob in Comp Women's Hist  credit: 4 Hours.
Same as HIST 503. See HIST 503.

GWS 508  Feminism, Gender and Sexuality  credit: 4 Hours.
Same as ANTH 508. See ANTH 508.

GWS 512  Gender Relations & Intl Dev  credit: 4 Hours.
Same as SOCW 581 and WGGP 581. See WGGP 581.

GWS 540  Intersectional Pedagogies  credit: 4 Hours.
Examines the link between political movements and pedagogies,
including feminist, critical, critical multicultural, critical race, and queer
pedagogies. Students will analyze pedagogical theories and implement
practical techniques and strategies. Same as EPS 540. Prerequisite:
Graduate standing and previous coursework in Gender and Women's
Studies; or consent of instructor.

GWS 545  Sexuality and Education  credit: 4 Hours.
Same as EPS 545. See EPS 545.

GWS 550  Feminist Theories & Methods  credit: 4 Hours.
Interdisciplinary study in diverse feminist theories and methods produced
in and across various disciplines. Contemporary philosophical and
theoretical developments in the study of gender to specific histories of
class, race, ethnicity, nation and sexuality. Prerequisite: At least one
graduate-level humanities course or consent of instructor.

GWS 560  Feminist Media Studies  credit: 4 Hours.
Same as MDIA 560. See MDIA 560.

GWS 561  Race and Cultural Critique  credit: 4 Hours.
Same as AAS 561, AFRO 531, ANTH 565, and LLS 561. See AAS 561.

GWS 575  Transnational Feminisms  credit: 4 Hours.
Study of the terms, methodologies and theoretical interventions of
transnational feminist studies. Transnational is a term that calls attention
to circuits of political, economic, and social phenomena across the
boundaries of nation-states. Emerging as a response to the shortcomings
of overarching, economic theorizations of globalization as well as
Western versions of "global feminism," transnational feminist studies
is an interdisciplinary critical field that draws from the vocabularies of
postcolonial studies, poststructuralism, Third World feminisms, race
and ethnic studies feminism in self-reflexive and context-specific ways.
Examines recent reconceptualizations of relations between woman and
nation; gender and globalization; feminist theory and practice.

GWS 576  Children and Youth Literature  credit: 4 Hours.
Same as CWL 586, EURO 576, and SCAN 576. See SCAN 576.

GWS 580  Queer Theories & Methods  credit: 4 Hours.
Interdisciplinary study in queer theories and methods produced in and
across various disciplines. Contemporary philosophical and theoretical
developments in queer studies specific to histories of class, race,
ethnicity, nation and sexuality. Prerequisite: Graduate standing.

GWS 581  Topics in Queer Studies  credit: 4 Hours.
Interdisciplinary graduate seminar on a current topic in the field of queer
studies. May be repeated in separate terms to a maximum of 8 hours if
topics vary. Prerequisite: Graduate standing and previous coursework in
women's or gender studies, or consent of instructor. GWS 580 or previous
coursework in queer studies is recommended.

GWS 585  Doctoral Training & Beyond  credit: 2 Hours.
Explores the unique challenges and structures of interdisciplinary
programs and departments and what it means to hold a joint
appointment. Special attention will be paid to strategies to manage
research, teaching, and service for interdisciplinary fields and joint
appointments. Leveraging the PhD for non-academic jobs also
addressed. Provides students with advanced standing skills to explore
and pursue pathways of employment from multiple experienced mentors.
This course is intended to supplement existing graduate training. Same
as AAS 585 and LLS 585. 2 graduate hours. No professional credit.
Approved for S/U grading only. Credit is not given for both GWS 585 and
GC 550. Prerequisite: Graduate standing.

GWS 590  Topics in GWS  credit: 4 Hours.
May be repeated. Prerequisite: Graduate standing and previous
coursework in women's or gender studies, or consent of instructor.

General Engineering (GE) -- Changed

General to Systems Engineering and Design (SE)

General Studies (GS)

GS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GS)

Information listed in this catalog is current as of 04/2018
Courses

GS 101  Exploring General Studies  credit: 1 or 2 Hours.
An introduction to the opportunities and resources available to the "undeclared" students enrolled in the Division of General Studies at Illinois. Introduces students to the breadth of diverse fields of study available, prepares DGS students for myriad potential careers, and helps foster a sense of collaboration and engagement through campus orientation, study, and project-based assignments. May not be repeated.

GS 102  Prep for 21st Cent Challenges  credit: 1 Hour.
In this honors seminar, DGS James Scholar freshmen will learn to develop their strengths, interests, and transferrable skills while investigating current and evolving societal challenges. Through class discussion, readings, and a semester-long project, students will explore a variety of topics, including leadership, creativity, research and service. Students will also learn how to craft their own honors experience by understanding the many opportunities available at Illinois.

GS 198  DGS Honors Seminar  credit: 0 to 3 Hours.
Approved for both letter and S/U grading.

GS 199  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated for a maximum of 6 hours if topics vary.

GS 299  DGS Study Abroad  credit: 0 to 18 Hours.
Provides credit toward the undergraduate degree for study at accredited foreign institutions or approved for overseas programs. Final determination of credit is made upon the student's completion of the work. (Summer session, 0 to 8 hours) Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 44 hours, all of which must be earned within one calendar year. Prerequisite: One year of residence at UIUC, good academic standing, and prior approval of the Division of General Studies.

GS 399  DGS Honors Seminar  credit: 0 to 3 Hours.
Approved for both letter and S/U grading.

GS 399  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated for a maximum of 6 hours if topics vary.

GEOG Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GEOG)

Courses

GEOG 100  Introduction to Meteorology  credit: 3 Hours.
Same as ATMS 100. See ATMS 100. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOG 101  Global Development&Environment  credit: 3 Hours.
Introduces geographical perspectives on environment and development studies with case studies drawn from Africa, Asia, and Latin America. Investigates the origins of the global South in relation to the global North, especially the historical and contemporary processes driving environmental, economic, and cultural change. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

GEOG 103  Earth's Physical Systems  credit: 4 Hours.
A basic introduction to the environmental systems of the Earth's surface, including landforms, soils, and ecosystems and how these systems are affected by global change. Emphasizes the importance of human-Earth relations and a holistic view of environmental systems. Same as ESE 103. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOG 104  Social and Cultural Geography  credit: 4 Hours.
Introduces the basic concepts of social and cultural geography, and the application of these concepts to a variety of topics; mental maps, territoriality, cultural regions, cultural elements and their diffusion, population movement and migration, settlement patterns, environmental hazards, and spatial patterns of social problems. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

GEOG 105  The Digital Earth  credit: 3 Hours.
Geospatial technologies such as global positioning systems (GPS) and geographic information systems (GIS) are becoming increasingly important tools in research and policy arenas and in everyday life. This course will provide an introduction to these emerging technologies and to the principles of mapping science that underpin them. At the same time, the course will explore how these innovative technologies are changing the spaces and places around us, including how we interact with the environment and each other. Lab exercises provide hands-on experience in collecting and mapping geospatial information, interpreting digital imagery and the Earth's environments, and critically thinking about the social implications of the digital Earth. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

GEOG 106  Geographies of Globalization  credit: 3 Hours.
A survey of major world regions by systematically considering five themes: environment, population and settlement patterns, cultural coherence and diversity, geopolitical fragmentation and unity, and economic and social development. While examining the persistence of unique regions, the course will both scale up to global linkages and scale down to place-specific impacts of globalization processes. Same as ESE 106. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

GEOG 198  Freshman Honors Seminar  credit: 3 Hours.
Through discussions and research projects, the seminar is designed to provide an in-depth understanding of topics in the field of systematic or regional geography which are selected for group study. Appropriate geographic methodology is emphasized. Prerequisite: James Scholar standing or other designation as a superior student.

GEOG 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

GEOG 204  Cities of the World  credit: 3 Hours.
In-depth exploration of global urbanization. Using a comparative regional approach, discuss the recent history of global urbanization, dissect its problems, and offer possible solutions. Approximately ten major regions of the world will be examined, exploring the significant urban patterns and processes, built and natural environments, and social, economic, and cultural landscapes of each. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci Cultural Studies - Western

GEOG 205  Business Location Decisions  credit: 3 Hours.
Analyzes location decision-making emphasizing industrial and commercial location patterns; identifies important institutional factors and their changing roles over the recent past; and focuses on plant closings, economic disruptions, and problems of structural change. Same as BADM 205. Prerequisite: ECON 102 or ECON 103, or equivalent.
GEOG 210 Social & Environmental Issues credit: 3 Hours.
Introduction to the complex relationship between people and the natural environment from a social science perspective. Explores different approaches to environmental issues, and examines the role of population change, political economy, technologies, environmental policymaking, and social institutions in causing and resolving contemporary social and environmental global issues. Same as ESE 210.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GEOG 215 Resource Conflicts credit: 3 Hours.
Geographic concepts of place, scale, region, and territoriality are used to explore the causes and consequences of competition for the control of natural resources. Situations that lead to violent conflict are discussed as well as mechanisms for the peaceful resolution of resource conflicts. Resources discussed include oil, water, access to land, and the impact of climate change. Same as ESE 215 and GLBL 215.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GEOG 221 Geographies of Global Conflict credit: 3 Hours.
Focuses on contemporary cultural conflicts, competition among nations for economic and mineral resources; treats territorial disputes from a cultural and geographic perspective. Case studies vary to illustrate types of contemporary conflicts. Same as GLBL 221. Credit is not given for GEOG 221 and GEOG 110.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GEOG 222 Big Rivers of the World credit: 3 Hours.
An interdisciplinary approach to the study of big rivers, encompassing geomorphology, engineering, ecology, risk assessment and planning. Commencing with an assessment of the nature of big rivers; their hydrology and geomorphic setting; hazards associated with large rivers, and issues of river impoundment and management, then proceed to examine the geography, geomorphology, and ecology and management of a range of the World’s greatest rivers, focusing on how a geomorphological understanding of such large rivers can aid study of riverine ecohabitats and inform decisions regarding water usage and engineering management. If the weather permits, a one day field-trip will be organized in the second half of the course to view aspects of a local river in Illinois/Indiana. Same as ESE 222.

GEOG 224 Geog Patterns of Illinois credit: 3 Hours.
Systematic analysis of the environmental and human processes that have shaped the regional landscapes of rural and urban Illinois. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GEOG 254 American People, Places, & Environments credit: 3 Hours.
Regional geography survey of the U.S., including physical settings, cultural and economic patterns, and human-environment relationships. Topics include spatial patterns of settlement and migration, uneven vulnerability to natural hazards, and cultural diversity as seen in the landscape, with an overall focus on how human and physical geography together shape the American environment across different regions. Same as ESE 254.

GEOG 280 Intro to Social Statistics credit: 4 Hours.
Same as SOC 280. See SOC 280.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

GEOG 287 Environment and Society credit: 3 Hours.
Same as ESE 287, NRES 287 and PS 273. See NRES 287.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

GEOG 310 Political Geography credit: 3 Hours.
Problems and issues surrounding the geographic distribution of political actions and outcomes in the context of globalization. Topics include war and peace, access to natural resources, nationalism, democratization, terrorism, and the politics of identity. Prerequisite: Junior standing or consent of instructor.

GEOG 350 Sustainability and the City credit: 3 Hours.
Examination of sustainable development in the region of South Asia (India, Nepal, Pakistan, Afghanistan, Bangladesh, Sri Lanka). Geographic analysis of development processes since the colonial period, with particular emphasis on the interrelated processes of environment, society, and politics as related to sustainability. Prerequisite: Sophomore standing or consent of instructor.

GEOG 370 Water Planet, Water Crisis credit: 3 Hours.
Same as ESE 320 and GEOL 370. See ESE 320.

GEOG 371 Spatial Analysis credit: 4 Hours.
Overview of the spatial analysis (nomothetic) approach to geographic research, both physical and human; includes discussion of the scientific method, with explanations and uses of analytic geographic concepts in studying real world problems. Prerequisite: A course in geography. This course satisfies the General Education Criteria for:
Quantitative Reasoning II

GEOG 373 Geography Field Course credit: 1 to 4 Hours.
Field observation and mapping of human and/or physical phenomena using basic geographic field techniques, including pre- and post-trip meetings. Required field trip. May be repeated if topics vary. Prerequisite: Major or minor in Geography & GIS, or consent of instructor.

GEOG 379 Intro to GIS Systems credit: 4 Hours.
Investigates the fundamentals of geographic information science as well as the basic skills in the execution of that theoretical knowledge with industry standard software packages. Student will learn the basics of projections and coordinate systems, how geographic information is stored and manipulated, and the theory and practice behind the production of thematic maps. Includes lecture and hands-on laboratory components. Same as ESE 379.
GEOG 380 GIS II: Spatial Prob Solving  credit: 4 Hours.
Study of the analytical capabilities of geographic information systems with an emphasis on learning to solve spatial problems in both the vector and raster data formats. Students will develop the skills necessary to answer questions or solve problems in their areas of interest, with particular emphasis on problems and questions that require multiple steps to resolve. Students will learn the fundamental theory behind spatial problem solving, but also learn to execute these procedures with industry-standard software packages. Thus, this class contains both lecture/discussion elements and hands-on laboratory work. Same as ESE 380. Prerequisite: GEOG 379
This course satisfies the General Education Criteria for: Quantitative Reasoning II

GEOG 381 Environmental Perspectives  credit: 3 Hours.
Focus on the major ideas in contemporary environmentalism, especially on how humans do and should interact with the environment. Same as ESE 381. Prerequisite: Junior or senior undergraduate standing.

GEOG 384 Population Geography  credit: 3 Hours.
Problems and issues surrounding the geographic distribution of populations at the world, regional, and local levels; emphasizes problems associated with population growth and decline, recent population redistribution, births and deaths, and elderly and minority populations.

GEOG 390 Individual Study  credit: 2 to 4 Hours.
Supervised independent study of special topics or regions. May be repeated once. Prerequisite: Junior standing; at least one formal course in the topic or region of interest; consent of instructor.

GEOG 391 Honors Individual Study  credit: 2 to 4 Hours.
Individual study and research projects for students who are working toward the degree with distinction in geography. May be repeated to a maximum of 8 hours. Prerequisite: Junior standing; consent of honors adviser.

GEOG 392 Geography & GIS Internship  credit: 0 to 3 Hours.
Supervised, off-campus experience in a field directly pertaining to Geography and/or GIS. A written report is required at the end of the internship relating work accomplishments to the student’s program of study. Approved for Letter and S/U grading. May be repeated in separate terms up to 6 hours. Prerequisite: Consent of faculty sponsor and Director of Undergraduate Studies; at least two courses taken within Geography & GIS.

GEOG 394 Special Topics Social Geog  credit: 4 Hours.
Introduction to current research in social geography; includes such topics as access to public facilities, geography of crime, innovation diffusion, geography of communications, spatial assimilation of minorities, and geography of social well-being. See Schedule for current topics. May be repeated.

GEOG 401 Watershed Hydrology  credit: 3 Hours.
Same as NRES 401. See NRES 401.

GEOG 405 Geography Field Course  credit: 1 to 4 Hours.
Field observation and mapping of human and/or physical phenomena using basic geographic field techniques, including pre- and post-trip meetings. Required field trip. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Major or minor in Geography & GIS, or consent of instructor.

GEOG 406 Fluvial Geomorphology  credit: 4 Hours.
Systematic overview of the forms and processes associated with rivers and drainage basins; topics include basin hydrology, drainage networks, river hydraulics, sediment transport processes, channel morphology, channel change, and human impacts on fluvial systems. Same as GEOL 406, and NRES 406. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 101, and GEOG 103 or GEOL 107, or consent of instructor.

GEOG 408 Humans and River Systems  credit: 4 Hours.
Systematic analysis of the biophysical processes operating in rivers and watersheds and the interaction of humans on these processes. The course will emphasize the importance of biophysical processes and human interaction with these processes in river and watershed management. Class discussion and a class project will focus on analysis of practical river and watershed problems. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 103 or an introductory course in earth or environmental science.

GEOG 410 Green Development  credit: 4 Hours.
Theory and practice of sustainable development. Course materials draw upon theoretical and case study material from the social and natural sciences to analyze environment and development relations with emphasis on the Global South. Same as ESE 410. 4 undergraduate hours. 4 graduate hours.

GEOG 412 Geospatial Tech & Society  credit: 3 Hours.
Examines the use of geographic information systems (GIS), geographical positioning systems (GPS), and other geospatial technologies in everyday life with emphasis on their implications for social, economic, and environmental change. Topics include critical cartography, GIS, and social theory, crime and health, environmental justice, feminism, economic development and environmental change. 3 undergraduate hours. 3 graduate hours. Prerequisite: GEOG 105 or consent of instructor.

GEOG 421 Earth Systems Modeling  credit: 4 Hours.
Same as ATMS 421, ESE 421, GEOL 481 and NRES 422. See ATMS 421.

GEOG 423 Politics of International Conservation and Development  credit: 3 Hours.
Same as NRES 423. See NRES 423.

GEOG 436 Biogeography  credit: 3 Hours.
Same as ANTH 436, ESE 439, IB 439 and NRES 441. See IB 439.

GEOG 438 Geography of Health Care  credit: 3 or 4 Hours.
Methods and perspectives of health care. Emphasizing the spatial analysis of health and health care. The organization, provision and competition of health care will be highlighted. Same as SOC 478. 3 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 384 or SOC 274 or consent of instructor.

GEOG 439 Health Applications of GIS  credit: 3 Hours.
Same as CHLH 439 and PATH 439. See PATH 439.

GEOG 440 Business Applications of GIS  credit: 3 or 4 Hours.
Design and implementation of GIS for business and strategic planning applications. Course goals include: (1) provide students with an understanding of Geographic Information Systems; (2) provide students with an understanding of how GIS can be applied in various business applications; (3) familiarize students with GIS and modeling techniques; (4) provide students with opportunities to work with various data sources through a project related to their own interest in business. Same as BADM 440. 3 undergraduate hours. 4 graduate hours.

GEOG 446 Sustainable Planning Seminar  credit: 4 Hours.
Same as LA 446, NRES 446, and UP 446. See LA 446.
GEOG 455  Geog of Sub-Saharan Africa  credit: 3 Hours.
Regional geography of Africa south of the Sahara. Geographic analysis of Africa which includes topics in both physical and human geography and provides a general overview of the processes and interactions between human and environmental factors that shape Africa's physical and human geography. 3 undergraduate hours. 3 graduate hours.

GEOG 459  Ecohydraulics  credit: 4 Hours.
Interactions between hydraulic, ecological, and geomorphic processes in river environments at a wide range of both spatial and temporal scales. Draws upon and synthesize fundamental concepts from biology, ecology, fluid mechanics and morphodynamics, to apply them to truly interdisciplinary problems. Such an approach, coupled with hands-on experience involving planning, conducting and analyzing hands-on experiments at the Yen Ta Chow Hydro systems Laboratory and field surveys on local natural waters will provide the students with a broad perspective on the interconnections between physical and ecological systems. Students will apply their knowledge of fundamental processes to address complex problems involving monitoring, management, conservation and restoration of ecosystems. 4 undergraduate hours. 4 graduate hours.

GEOG 460  Aerial Photo Analysis  credit: 3 or 4 Hours.
Review of methods for extracting quantitative and qualitative information from aerial photographs using computer-based techniques and visual interpretation. The first part of the course will cover basic photogrammetry and mapping. The second part will focus on interpretation of physical, biological, and cultural features. Same as NRES 460. 3 undergraduate hours. 4 graduate hours. Prerequisite: Knowledge of trigonometry (MATH 014 or equivalent) and basic physical geography (GEOG 103 or equivalent).

GEOG 465  Transp and Sustainability  credit: 3 or 4 Hours.
Describes of transportation systems; transportation as an industrial activity and public good; and transportation and spatial development, including the role of transportation in urban and regional development. Emphasis on the economic, environmental, and social aspects of sustainability as they apply to transportation systems and the activities they enable at local, regional, national and global levels. Field trip required. Same as ESE 465. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. This course satisfies the General Education Criteria for: Advanced Composition

GEOG 466  Environmental Policy  credit: 3 or 4 Hours.
Examination of the geographical and political aspects of human-environmental relations; focusing on how environmental problems are defined, negotiated, and addressed through policy formulation. Specific approaches to environmental policy will be considered at different geographical scales. Same as ESE 466. 3 undergraduate hours. 4 graduate hours. Prerequisite: One course in Geography or Political Science or consent of instructor.

GEOG 468  Biological Modeling  credit: 3 or 4 Hours.
Interdisciplinary modeling course for students interested in dynamic system modeling of living processes; each student will build a model by the end of the course. No special mathematical background required. Same as ANSC 449, CPSC 448, and IB 491. 3 undergraduate hours. 4 graduate hours. Prerequisite: IB 444 or equivalent, depending on curriculum.

GEOG 471  Recent Trends in Geog Thought  credit: 4 Hours.
Examination of recent trends in human and physical geography. Themes include empiricism, logical positivism, regionalism, Marxism, realism, phenomenology, and post-modernism as applied to geographic research. Emerging geographic literature is explored to identify the latest conceptual developments. 4 undergraduate hours. 4 graduate hours.

GEOG 473  Digital Cartography & Map Design  credit: 4 Hours.
Instruction and practice in the basic techniques of map making followed by a consideration of problems involved in the construction of maps for presentation in a reproduced form (i.e., printed, photographed); the selection of proper source materials for the base and body of the map, the compilation and correlation of these materials, and methods of mechanical and photographic reproduction. 4 undergraduate hours. 4 graduate hours.

GEOG 476  Applied GIS to Environ Studies  credit: 3 Hours.
Demonstrates how geographic information systems (GIS) have become a major technology ubiquitously applied to solve important problems encountered in geospatial and environmental applications. 3 undergraduate hours. 3 graduate hours. Prerequisite: GEOG 103 or GEOG 104, consent of instructor.

GEOG 477  Introduction to Remote Sensing  credit: 3 Hours.
Fundamentals of energy-matter interaction mechanisms, and the manifestation of reflected and emitted radiation on photographs and images; introduces characteristics of aerial films and filters, electro-optical scanners, and digital processing; and emphasizes applications in environmental problems. Same as NRES 477. 3 undergraduate hours. 3 graduate hours. Prerequisite: GEOG 280 (beginning statistics) or equivalent, or consent of instructor.

GEOG 478  Techniques of Remote Sensing  credit: 4 Hours.
Optical and digital information processing of imagery acquired from aircraft and satellite remote sensing platforms; includes systems design, mensuration theory, photographic enhancement techniques, and automatic digital classification for all of the standard sensor systems; and laboratory focusing on the design and implementation of information processing techniques with application limited to a survey of uses. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 477 or equivalent.

GEOG 479  Advanced Topics in GIS  credit: 3 Hours.
Introduces advanced concepts in Geographic Information Science. Course topics may vary. 3 undergraduate hours. 3 graduate hours. May be repeated, if topics vary, in separate terms to a maximum of 9 hours, but not more than 6 hours in any one term. Prerequisite: GEOG 379 or equivalent.

GEOG 480  Principles of GIS  credit: 3 Hours.
Focuses on Geographic Information Science (GIScience) principles that underlie the development of Geographic Information Systems (GIS) software and its intelligent use. Helps students adapt to rapidly changing geospatial technologies. Knowledge gained in this course will be general and, thus, not be limited to any specific software product that may be revised in the future. 3 undergraduate hours. 3 graduate hours. Prerequisite: GEOG 379 and GEOG 380 or equivalent, or consent of instructor.
GEOG 481  
**Intl Environ Cooperation**  
Credit: 3 Hours. 
Examines the problems, politics and policies related to environmental issues that require international cooperation to address effectively. Transboundary, regional, and global environmental issues will be analyzed, spanning the atmosphere (acid rain, protection of the ozone layer, and climate change), the oceans (pelagic fisheries), and biodiversity (whaling, trade in endangered species). Discusses methods for increasing international environmental cooperation, such as unilateral actions, trade sanctions, financial aid, non-governmental monitoring and innovations in institutional design. Same as ESE 481. 3 undergraduate hours. 3 graduate hours. Prerequisite: One course in Geography or Political Science or consent of instructor.

GEOG 482  
**Challenges of Sustainability**  
Credit: 3 Hours. 
Same as ESE 482 and GEOL 483. See ESE 482.

GEOG 483  
**Urban Geography**  
Credit: 3 Hours. 
Broad background of theories, concepts, and methods of research for understanding how and why our cities have reached their current status. Focus on examining the internal structure of the North American city, including analysis of the commercial, industrial, and residential sectors of the urban environment. Particular emphasis is placed on the range of urban theories developed to explain both urban structure and contemporary urban ills. 3 undergraduate hours. 3 graduate hours.

GEOG 484  
**Cities, Crime, and Space**  
Credit: 3 or 4 Hours. 
Focusing on US cities, this theory-intensive course surveys traditional and critical perspectives on relations between crime, space, and place. We will explore this interplay within broader contexts of industrial and post-industrial urbanization, concentrating on dynamics including governances, economic processes, and social transformations. Emphasis will be placed on the extent to which these interwoven processes generate, classify, organize, and react to crime across cityscapes. 3 undergraduate hours. 4 graduate hours.

GEOG 489  
**Programming for GIS**  
Credit: 4 Hours. 
Introduction to programming to customize and extend the capabilities of geographic information systems. Topics include the principles of programming, advanced function and tools coding, visualization, fundamental spatial data structures, and spatial algorithms. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 379 and GEOG 380 or equivalents, or consent of instructor.

GEOG 491  
**Research in Geography**  
Credit: 2 Hours. 
Detailed examination and discussion of the methods of initiating and executing research projects in human or physical geography (taught in separate sections); requires students to write a research proposal of a quality suitable for a graduate thesis. 2 undergraduate hours. 2 graduate hours. Prerequisite: GEOG 471; either graduate standing in geography or senior standing as a geography major and consent of department.

GEOG 493  
**Democracy and Environment**  
Credit: 3 or 4 Hours. 
Explores the effects of local democracy on natural resource management and the ways natural resource management can leverage the establishment and consolidation of local democracy. Investigates theoretical foundations of localism and decentralization, and analyzes the policy process by which theory is inscribed in law and project documents and translated into practice. Cases of global environmental policy, such as climate adaptation, UN Reduced Emissions from Deforestation and Degradation of the World Banks’ Community Driven Development policies will be used for theoretical and empirical analysis. Draws case examples from developing countries. Same as NRES 494, SOC 493 and UP 493. 3 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 210, course work in social science, or consent of instructor.

GEOG 495  
**Advanced Topics in Geography**  
Credit: 3 or 4 Hours. 
Explores special topics not covered in regularly scheduled Geography courses. 3 or 4 undergraduate hours. 3 or 4 graduate hours. May be repeated if topics vary in the same term to a maximum of 9 undergraduate hours or 12 graduate hours or in separate terms to a maximum of 12 undergraduate hours or 12 graduate hours.

GEOG 496  
**Climate & Social Vulnerability**  
Credit: 3 or 4 Hours. 
Existing climate variability and likely climate change call for policies to protect vulnerable people who make their livelihoods in a changing environment. Students will explore: 1) causes of climate related stress and disaster; 2) theories of vulnerability and adaptation; 3) practices and policies designed to reduce economic loss, hunger, famine and dislocation in the face of climate trends and events. Focus on multiple policy scales affecting poor and marginal populations, who are disproportionately vulnerable when facing climate stress, drawing on case examples primarily from the developing world. Same as ATMS 446 and SOC 451. 3 undergraduate hours. 4 graduate hours. Prerequisite: GEOG 410, GEOG 466, GEOG 471, GEOG 520, or consent of instructor.

GEOG 520  
**Political Ecology**  
Credit: 4 Hours. 
Political ecology integrates social and biophysical processes in the study of nature-society relations. Examination of the conceptual origins of the field of political ecology and identification of influential bodies of research and promising research directions. Readings focus on recent advances, debates, and the ongoing evolution of political ecology as an integrative approach to Geography and environment-development studies. 4 graduate hours. No professional credit. Prerequisite: One of the following courses, or consent of the instructor: GEOG 410, GEOG 466, SOC 447, HIST 460, or equivalent.

GEOG 556  
**Regional Science Methods**  
Credit: 4 Hours. 
Examines models of regional growth and development, including export base, input-output and econometric, cohort component and spatial interaction; emphasizes socioeconomic impact analysis and forecasting subnational economic and demographic change. Same as UP 556. Prerequisite: Consent of instructor.

GEOG 557  
**Seminar in Regional Science**  
Credit: 4 Hours. 
Discusses advanced topics in regional science; prepares students for dissertation and thesis research, applied study for public agency, or other student research. Same as UP 557. Prerequisite: GEOG 556 or consent of instructor.

GEOG 560  
**Spatial Epidemiology**  
Credit: 4 Hours. 
Same as PATH 560. See PATH 560.

GEOG 561  
**Landscapes and Human Health**  
Credit: 3 Hours. 
Same as CHLH 580 and LA 570. See LA 570.

GEOG 570  
**Advanced Spatial Analysis**  
Credit: 4 Hours. 
Advanced techniques of spatial analysis, including spatial autocorrelation, trend surface analysis, grouping and regionalization procedures, and point pattern analysis.

GEOG 575  
**Alluvial Boundary Layer Dynam**  
Credit: 3 Hours. 
Examination of the structure of turbulent boundary layers in rivers and how turbulent flow, sediment transport and channel forms interact over a wide range of spatial and temporal scales. Explores these interactions through critical analysis of contemporary research in fluvial geomorphology, fluid mechanics, hydraulics and sedimentology. Same as GEOL 575. Prerequisite: Consent of instructor.

GEOG 587  
**Qualitative Research Methods**  
Credit: 4 Hours. 
Same as UP 587. See UP 587.
GEOL 594 Seminar in Social Geography credit: 4 Hours. Advanced study of a current research topic in social geography. Topic varies from term to term; prepares students for dissertation and thesis research through study of advanced literature and the completion of a research paper. Prerequisite: GEOG 471 or equivalent; graduate coursework in social geography or in one of the social sciences.

GEOL 595 Advanced Studies in Geography credit: 0 to 8 Hours. Seminar and directed individual investigation of selected problems or regions; designed to develop ability to conduct independent investigation. Scheduled seminars are detailed in each term’s Class Schedule. Approved for both letter and S/U grading. May be repeated.

GEOL 599 Thesis Research credit: 0 to 16 Hours. Approved for S/U grading only. May be repeated.

Geology (GEOL)

GEOL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GEOL)

Courses

GEOL 100 Planet Earth credit: 3 Hours. Introduces non-science majors to physical aspects (earthquakes, volcanoes, floods, tsunamis, mountains, plate tectonics) and historical aspects (formation of earth and life, dinosaurs, ice age, evolution of climate) in earth science. Presents information on earth resources, natural hazards, and development of natural landscapes. Focuses on humanistic issues; provides context for understanding environmental change. Optional lab demonstrations and field trips with co-registration in GEOL 110. Credit is not given for both GEOL 100 and GEOL 101, GEOL 103 or GEOL 107.

This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

GEOL 103 Planet Earth QRII credit: 3 Hours. Topics covered are very similar to those of GEOL 101. Emphasizes application of quantitative methods in deriving geological knowledge. A weekly computer laboratory is an essential component of the course. Credit is not given for both GEOL 103 and GEOL 100, GEOL 101 or GEOL 107.

This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

Quantitative Reasoning II

GEOL 104 Geology of the National Parks credit: 3 Hours. Develops geologic background, concepts, and principles through study of selected national parks and monuments. Examines the geologic framework and history, modern geologic processes, and factors influencing the present day landscape for each park area. Same as ESE 104.

This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOL 107 Physical Geology credit: 4 Hours. Introduces Earth phenomena and processes. Includes minerals and rocks, continental drift, plate tectonics, rock deformation, igneous and sedimentary processes, geologic time, landscape evolution, internal structure and composition of the earth, groundwater, seismology and earthquakes, and formation of natural resources. Emphasizes the chemical and physical aspects of the Earth, and the basis for geological inference. Field trip required. Additional fees may apply. See Class Schedule. Credit is not given for both GEOL 107 and GEOL 100, GEOL 101 or GEOL 103. Prerequisite: Intended for science and science-oriented students.

This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOL 110 Exploring Geology in the Field credit: 1 Hour. Introduces practical techniques for identification of rocks, minerals, and fossils; interpretation of geologic maps and cross-sections; appreciation of Midwestern geologic history and geologic features and landforms in the field. Additional fees may apply. See Class Schedule.

GEOL 111 Emergence of Life credit: 3 Hours. Examines important theoretical and practical questions regarding the origin and evolution of life, as well as the search for life elsewhere in the universe. Uses the pioneering work of Carl Woese, whose "Tree of Life" revolutionized our understanding of the fundamental structure and evolutionary relatedness of all living entities on Earth. Same as ESE 111. Additional fees may apply. See Class Schedule.

This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

GEOL 117 The Oceans credit: 3 Hours. Integrated introduction to oceanography and marine geology and geophysics. Topics include ocean-basin formation and evolution (in the context of plate tectonics), ocean ecology, the hydrologic cycle, water chemistry, currents and waves, the interaction of oceans with climate, coastal hazards, resources, pollution, and the Law of the Sea. Course is oriented toward students not majoring in science. Same as ESE 117.

This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOL 118 Natural Disasters credit: 3 Hours. Introduces the nature, causes, risks, effects, and prediction of natural disasters including earthquakes, volcanoes, landslides, subsidence, global climate change, severe weather, coastal erosion, floods, mass extinctions, and meteorite impacts; covers scientific principles and case histories of natural disasters as well as human responses (societal impact, mitigation strategies, and public policy). Same as ESE 118 and GLBL 118.

This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOL 143 History of Life credit: 3 Hours. Evolution of life from its beginning, illustrating changing faunas and floras through time; the invasion of land and of the skies; the effects of a changing atmosphere, changing climates, and continental drift. Emphasis on dinosaur evolution, ecology, and extinction; also other vertebrates, including mammal-like reptiles, mammals, and the emergence of humans, as well as plants and invertebrates. Same as ESE 143.

This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

GEOL 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.
GEOL 201 History of Geology credit: 3 Hours.
Traces the development of key ideas in the science, beginning with musings of the ancient Greek and Roman philosophers and early observations of the Earth by European and Arab scholars. Considers advances in mapmaking that span thousands of years and examines the origins of the Geologic Time Scale, including determination of the ages of rocks. Looks at early geologists from around the world, in the US, in Illinois, and at the U of I. Reads some classic papers establishing the grand unifying theory of geology: plate tectonics. Prerequisite: A 100-level geology course (excluding GEOL 110 and GEOL 143). Intended for both non-science students and geology majors. This course satisfies the General Education Criteria for: Advanced Composition

GEOL 208 History of the Earth System credit: 4 Hours.
Presents systematic analysis of formation and evolution of the Earth and its dynamic systems (lithosphere, hydrosphere, atmosphere, and biosphere). Also introduces methods of reconstructing Earth’s history through use of geochronology, paleontology, and the stratigraphic records. Introduces the geological history of life evolution, mountain belts and continents, geochemical systems, climate, sea level, and the Earth’s interior. Field trip required. Same as ESE 208. Additional fees may apply. See Class Schedule. Prerequisite: One of GEOL 100, GEOL 101, GEOL 103, GEOL 104 or GEOL 107; or consent of instructor. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

GEOL 333 Earth Materials and the Env credit: 4 Hours.
Studies the origin, identification, and environmental significance of earth materials (minerals, rocks, and soil). Environmental topics include: mineral resources; acid mine drainage; volcanic hazards; swelling soils; engineering strength, porosity/ permeability, and architectural uses of earth materials; and asbestos. One day field trip is required. Same as ESE 333. Additional fees may apply. See Class Schedule. Credit is not given for both GEOL 333 and GEOL 432. Prerequisite: CHEM 102 and CHEM 103; GEOL 100 and GEOL 110, or one of GEOL 101, GEOL 103, GEOL 104 or GEOL 107; or consent of instructor.

GEOL 350 Volcanoes credit: 3 Hours.
Explores volcanoes from a hazards standpoint by investigating case studies of volcanic disaster, evaluating important controls of volcanism such as magma viscosity and behavior of bubbles, and introducing the monitoring of active volcanoes with cutting edge methods such as seismicity, gravity, and remote sensing. Understanding the interactions among these complex parameters plays a critical role in assessing the evolution of shallow magma systems and investigating their potential for remaining stable or developing into hazardous eruptive systems, which can threaten nearby populations. Prerequisite: Any 100-level Geology course (excluding GEOL 106, GEOL 111, and GEOL 143).

GEOL 370 Water Planet, Water Crisis credit: 3 Hours.
Same as ESE 320 and GEG 370. See ESE 320.

GEOL 380 Environmental Geology credit: 4 Hours.
Increases student understanding of environmental issues of water supply and pollution, waste disposal, energy, environmental health, global change, and land evaluation and use by emphasizing the role of geology and its relationships to human activities. Course requires a one-day field trip. Same as ENV 380. Additional fees may apply. See Class Schedule. Credit is not given for both GEOL 380 and ESE 445. Prerequisite: CHEM 102 and CHEM 103; and GEOL 100 and GEOL 110, or one of GEOL 101, GEOL 103, GEOL 104 or GEOL 107; or consent of instructor.

GEOL 390 Individual Study credit: 1 to 4 Hours.
Research and individual study in geology. May be repeated. A maximum of 8 hours of GEOL 390 plus GEOL 391 may be counted toward graduation. Prerequisite: GEOL 208 or equivalent; consent of supervising faculty member; advance approval by Department of Geology.

GEOL 391 Individual Honors Study credit: 1 to 4 Hours.
Research and individual study in geology for honors credit. May be repeated. A maximum of 8 hours of GEOL 390 plus GEOL 391 may be counted toward graduation. Prerequisite: GEOL 208 or equivalent; consent of supervising faculty member and of departmental honors advisor; advance approval by Department of Geology.

GEOL 401 Geomorphology credit: 4 Hours.
History, origin, and characteristics of land forms produced by weathering, fluvial, glacial, wind, and wave processes or by a combination of these acting upon the major kinds of geologic materials and structures. Lectures, laboratory, and field trips. Same as ESE 411. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOL 208 or consent of instructor.

GEOL 406 Fluvial Geomorphology credit: 4 Hours.
Same as GEG 406 and NRES 406. See GEG 406.

GEOL 411 Structural Geol and Tectonics credit: 4 Hours.
Introduction to principles of rock deformation, stress, and strain; description and interpretation of geologic structures; study of methods for structural analysis; outline of geotectonic processes; three hours of lecture and a three-hour lab per week. Required four-day field trip. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOL 107 or consent of instructor.

GEOL 415 Field Geology credit: 2 to 8 Hours.
Group field study in a prominent geologic locality; includes in-class meetings, student-led presentation, and field trip; trips run during spring break, winter break, in mid-end May or intercession; dates depend on location. Additional fees may apply. See Class Schedule. 2 to 8 undergraduate hours. 2 to 8 graduate hours. May be repeated. Prerequisite: Consent of instructor.

GEOL 417 Geol Field Methods, Western US credit: 6 Hours.
Field course based in the mountains of the western United States. Provides intensive practical experience in geologic mapping, as well as instruction in field structural, stratigraphic, geomorphologic, and petrologic analysis. Offered during summer session only. Additional fees may apply. See Class Schedule. 6 undergraduate hours. 6 graduate hours. Prerequisite: Eight hours of 400-level credit in geology, or consent of instructor; GEOL 411, GEOL 432, and GEOL 440 are recommended.

GEOL 432 Mineralogy and Mineral Optics credit: 4 Hours.
Introduction to: crystallography; crystal optics; structure, composition, properties, stability and geological occurrences of minerals; and mineral identification. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Credit is not given for both GEOL 333 and GEOL 432. Prerequisite: GEOL 208 and CHEM 104 and CHEM 105.

GEOL 436 Petrology and Petrography credit: 4 Hours.
Study of the minerals, compositions, textures, structures, classifications, and origins of igneous and metamorphic rocks; lectures emphasize rock forming processes (petrology), and laboratories emphasize use of the petrographic microscope (petrography). Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOL 432.
GEOL 440 Sedimentology and Stratigraphy credit: 4 Hours. Introduces dynamics of sedimentation, geology of sedimentary basins, the distribution of geologic processes through time, definition and correlation of stratigraphic units, principles of paleogeography, stratigraphy and tectonics. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: GEOL 208 or consent of instructor.

GEOL 450 Probing the Earth's Interior credit: 3 Hours. Overview of how seismology, magnetics, gravity, geodesy, and surface geology can help us understand the Earth from its surface to its core as well as its temporal evolution. Topics include the internal composition and dynamics of Earth, generation of Earth’s gravitational and geomagnetic fields, driving mechanisms for tectonic plate motion, continental deformation, and surface topography. Students wanting a more quantitative treatment of geophysics should enroll in GEOL 452. 3 undergraduate hours. 3 graduate hours. Credit is not given for both GEOL 450 and GEOL 452. Prerequisite: PHYS 102 or 212, GEOL 107 or 101, or consent of instructor.

GEOL 451 Env and Exploration Geophysics credit: 4 Hours. Discusses geophysical methods to reveal subsurface structures. Topics include seismic methods, gravity, magnetics, electrical methods, ground penetrating radar, borehole geophysics, and their applications to hydrocarbon and mineral exploration as well as engineering and environmental investigations. 4 undergraduate hours. 4 graduate hours. Several required local trips for field experiments. Prerequisite: MATH 241 and PHYS 212; or consent of instructor.

GEOL 452 Introduction to Geophysics credit: 4 Hours. Provides a broad overview of basic concepts and fundamental knowledge of the physics of the Earth. Topics include seismology, gravity, geomagnetism, Earth’s thermal state, and geodynamics. Intended for undergraduates in the geophysics concentration and other students who want a more quantitative treatment of the subject than GEOL 450. 4 undergraduate hours. 4 graduate hours. Credit is not given for both GEOL 452 and GEOL 450. Prerequisite: MATH 241 and PHYS 211; or consent of instructor.

GEOL 454 Introduction to Seismology credit: 3 or 4 Hours. Introducing the basic theory of seismic wave generation and propagation and its application to Earth structure and earthquakes, including body waves, surface waves, inference of Earth structure, seismic prospecting, earthquake mechanisms, and strong ground motions. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Students participating in optional class projects receive an additional hour of credit. Prerequisite: MATH 285 or consent of instructor.

GEOL 460 Geochemistry credit: 3 Hours. Fundamental chemical and physical concepts applied to geological processes; topics include: origin, distribution, and geochemical behavior of elements; chemical evolution of the Earth; geochemistry of natural waters and sedimentary rocks; isotope geochemistry, crystal chemistry, trace element geochemistry and organic geochemistry. 3 undergraduate hours. 3 graduate hours. Prerequisite: GEOL 101 or GEOL 107; CHEM 104; CHEM 105; MATH 220 or MATH 221; or consent of instructor.

GEOL 470 Introduction to Hydrogeology credit: 4 Hours. Introduction to environmental and economic aspects of the occurrence and movement of groundwater through the earth's crust; topics include the hydrologic cycle, groundwater contamination, petroleum migration, formation of mineral resources, and groundwater chemistry. Same as ESE 470. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 220 or MATH 221; senior standing is recommended; or consent of instructor.

GEOL 481 Earth Systems Modeling credit: 4 Hours. Same as ATMS 421, ESE 421, GEOG 421 and NRES 422. See ATMS 421.

GEOL 483 Challenges of Sustainability credit: 3 Hours. Same as ESE 482 and GEOG 482. See ESE 482.

GEOL 484 Paleoclimatology credit: 4 Hours. Survey of Earth’s past climate variability, ranging from million-year to interannual time scales. Introduction to paleoclimate proxies including tree rings, marine and lake sediment cores, ice cores, corals, and speleothems. Focus on the drivers of climate change, major modes of climate variability, and how paleoclimate data can inform projections of future climate change. Same as IB 484. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing required.

GEOL 485 Risk Analysis in Earth Science credit: 3 or 4 Hours. Same as ATMS 404. See ATMS 404.

GEOL 488 Environmental Stable Isotopes credit: 3 Hours. Same as ATMS 422, NRES 478, and IB 488. See IB 488.

GEOL 490 Undergraduate Research credit: 1 to 3 Hours. Students will conduct research under the direct supervision of a geology faculty member. Research topics will vary, and either a summary paper or a poster presentation at a regional or national science conference is required. 1 to 3 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated up to six hours. A maximum of 6 credit hours of GEOL 490 and GEOL 491 may be counted toward graduation. Prerequisite: GEOL 208 or equivalent; Consent of supervising faculty member; advance approval by Department of Geology. Intended primarily for sophomores and juniors; not available to freshman students.

GEOL 491 Honors Undergraduate Research credit: 1 to 3 Hours. Students will conduct research for honors credit under the direct supervision of a geology faculty member. Research topics will vary, and either a summary paper or a poster presentation at a regional or national science conference is required. 1 to 3 undergraduate hours. No graduate credit. May be repeated up to 6 hours. A maximum of 6 credit hours of GEOL 490 and GEOL 491 may be counted toward graduation. Prerequisite: GEOL 208 or equivalent; Consent of supervising faculty member and of departmental honors advisor; advance approval by Dept. of Geology. Intended primarily for sophomores and juniors who are James Scholars or Chancellor's Scholars; not available to freshman students.

GEOL 492 Senior Thesis credit: 2 to 8 Hours. Research in geology, with thesis; a thesis must be submitted for credit to be received. 2 to 8 undergraduate hours. No graduate credit. May be repeated. A maximum of 10 hours of GEOL 492 plus GEOL 493 may be counted toward graduation. Prerequisite: Consent of supervising faculty member.

GEOL 493 Honors Senior Thesis credit: 2 to 8 Hours. Research in geology with honors thesis; a thesis must be submitted for credit to be received. 2 to 8 undergraduate hours. No graduate credit. May be repeated. A maximum of 10 hours of GEOL 492 plus GEOL 493 may be counted toward graduation. Prerequisite: Consent of supervising faculty member and of departmental honors advisor.

GEOL 497 Special Topics in Geology credit: 1 to 4 Hours. Seminar or lectures in subjects not covered by regular course offerings; for advanced undergraduates and graduate students. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Consent of instructor.
GEOL 510  Integrated Graduate Geology  credit: 3 Hours.
Study of broad range of disciplines in geology including geochemistry, geophysics, and geobiology relating to the deep Earth, the crust/lithosphere and hydrosphere through readings of classic papers and presentations by current department faculty. Prerequisite: Consent of Instructor.

GEOL 511  Advanced Structural Geology  credit: 4 Hours.
Study of selected topics concerning rock deformation processes and products. Introduces current research literature and methods, and the techniques of structural analysis. May include an optional field trip. Additional fees may apply. See Class Schedule. Prerequisite: GEOL 411 or equivalent; consent of instructor.

GEOL 512  Geotectonics  credit: 4 Hours.
Discussion of plate tectonics theory, and nature and distribution of regional-scale earth structures, such as mountain belts; includes study of geological and geophysical evidence that led to modern interpretations of evolution of earth's lithosphere. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: GEOL 411 or consent of instructor.

GEOL 515  Advanced Field Geology  credit: 2 to 4 Hours.
Group field study in a prominent geologic locality; includes in-class meetings, student-led presentation, and field trip; trips run during spring break, winter break, mid-end May or intercession; dates depend on location. Additional fees may apply. See Class Schedule. May be repeated. Prerequisite: Consent of instructor.

GEOL 521  Topics in Paleontology  credit: 4 Hours.
Selected topics in macro- and micropaleontology. Intensive study of a selected invertebrate or algal group; special problems in the taxonomy, evolution, skeletal diagenesis, ecology, biogeography, and biostratigraphy of selected fossil organisms. May be repeated. Prerequisite: Consent of instructor.

GEOL 531  Structural Mineralogy  credit: 4 Hours.
Structure and crystal chemistry of minerals and survey of current knowledge of the properties and behavior of selected minerals and mineral groups. Prerequisite: GEOL 432 or consent of instructor.

GEOL 540  Petroleum Geology  credit: 4 Hours.
Application of geoscience to understanding the nature and occurrence of hydrocarbon resources. Emphasizes: source-rock geology and geochemistry, process of petroleum migration, nature of reservoirs and traps, exploration and drilling procedures, interpretation of seismic-reflection profiles, cross-section and sub-surface map construction, classification and tectonics of petroleum-bearing sedimentary basins, application of sequence stratigraphy to exploration, and petroleum-related environmental issues. Prerequisite: GEOL 411 and GEOL 440, or equivalent.

GEOL 552  Geodynamics  credit: 4 Hours.
Explores dynamic characteristics of the solid earth. Covers physical and mathematical theories of deformation occurring on the surface and within the lithosphere and mantle. Discusses observations that can help us understand past and ongoing earth dynamics; these observation include topography, gravity, heat flow, geology, mineral physics, and seismic and magnetotelluric images, as well as plate tectonics theory. Includes regular lectures and tutorials on geodynamic modeling. Prerequisite: MATH 285, PHYS 211, GEOL 452, or consent of instructor.

GEOL 553  Chemistry of Earth's Interior  credit: 4 Hours.
The state of Earth's interior, emphasizing its chemical composition and mineralogy. Focuses on the interpretation of geochemical, petrologic, and laboratory geophysical data related to deep Earth composition, thermal state, structure, and evolution. Prerequisite: GEOL 450, GEOL 452, or consent of instructor.

GEOL 560  Aqueous Geochemistry  credit: 4 Hours.
Introduction to geochemical processes occurring in natural waters, with emphasis on the thermodynamic and kinetic controls governing chemical speciation, surface complexation, redox cycling and mineral formation and stability. Applications to a variety of soil and groundwater systems will be presented. 4 graduate hours. No professional credit. Prerequisite: CHEM 104; CHEM 105; MATH 220 or 221; GEOL 460; or equivalents; or consent of instructor.

GEOL 561  Geomicrobiology & Geochemistry  credit: 4 Hours.
Covers geomicrobiology as it relates to geochemistry with a primary focus on groundwater environments. Topics include energetics of microbial metabolism, influence of microorganisms on geochemistry, geochemical influences on microbial ecology, biogeochemical cycles and molecular biology tools in groundwater. Prerequisite: One year of college-level chemistry or consent of instructor required; one semester of college level biology recommended.

GEOL 562  Isotope Geology  credit: 4 Hours.
Introduction to the theoretical basis for isotopic fractionation in nature; survey of isotopic variations in natural materials; and application of isotopic variations to problems of geological and environmental significance. Prerequisite: Consent of instructor.

GEOL 563  Analytical Geochemistry  credit: 4 Hours.
Introduces principles and applications of chemical and isotopic analysis of geological materials, including x-ray spectroscopy, mass spectrometry and atomic spectroscopy. Lectures cover theory of analysis while practical laboratory based exercises focus on how instruments work and instrument operation. Individually tailored analysis project constitutes a major part of assessment. Prerequisite: Consent of instructor.

GEOL 571  Contaminant Fate and Transport  credit: 4 Hours.
Quantitative study of the chemical, physical, and microbiological processes controlling the mobility, reaction, and transformation of pollutants in flowing groundwater. Prerequisite: GEOL 460 or GEOL 560 or CEE 443 or CEE 534; and GEOL 470 or GEOL 570 or CEE 457 or CEE 557; or consent of instructor.

GEOL 573  River Morphodynamics  credit: 4 Hours.
Same as CEG 573. See CEG 553.

GEOL 575  Alluvial Boundary Layer Dynam  credit: 3 Hours.
Same as CEG 575. See CEG 575.

GEOL 579  Isotope Hydrogeology  credit: 4 Hours.
Application of isotope measurements in hydrogeology. Groundwater age dating, stable isotope ratios and anthropogenic radionucleides will be considered in the context of studying a broad range of hydrologic problems, from siting of nuclear waste disposal to understanding the migration of groundwater in sedimentary basins. Prerequisite: GEOL 470 or GEOL 562; CEE 457; or consent of instructor.

GEOL 591  Current Research in Geoscience  credit: 1 Hour.
Brings students up-to-date with current research over a broad spectrum of geoscience; improves students' oral presentation skills by practice and example. Required for all graduate students in Geology. Approved for S/U grading only. May be repeated to a maximum of 12 hours. Prerequisite: Graduate standing in Department of Geology or consent of instructor.
GER 205 Germany and Europe credit: 3 Hours.
Introduction into major issues in contemporary German society with a special focus on Germany’s functioning within Europe and the European Union through novels, films, essays, interviews etc. Course taught in English.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

GER 211 Conversation and Writing I credit: 3 Hours.
Prerequisite: GER 104 or equivalent, or consent of instructor.

GER 212 Conversation and Writing II credit: 3 Hours.
Continuation of GER 211. Prerequisite: GER 211 or equivalent, or consent of instructor.

GER 250 Grimm’s Fairy Tales - ACP credit: 3 Hours.
Special attention is paid to the Grimm’s tales in terms of traditional narrative genres, elements of life in early modern Europe, and versions from Italy and France as well as Germany. Course is conducted in English. Same as CWL 250 and ENGL 267. Credit is not given for both GER 250 and GER 251. Prerequisite: Completion of the Campus Composition I requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Lit Arts
Cultural Studies - Western

GER 251 Grimm’s Fairy Tales in Context credit: 3 Hours.
Special attention is paid to the Grimm’s tales in terms of traditional narrative genres, elements of life in early modern Europe, and versions from Italy and France as well as Germany. Course is conducted in English. Same as CWL 254 and ENGL 266. Credit is not given for both GER 251 and GER 250. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

GER 260 The Holocaust in Context - ACP credit: 3 Hours.
Jewish contributions to German Literature from 1200 to the present day. Includes trips to the University Library’s Rare Book Room. Same as CWL 271 and ENGL 268. Credit is not given for both GER 260 and GER 251. Prerequisite: Completion of the Campus Composition I general education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Lit Arts
Cultural Studies - Western

GER 261 The Holocaust in Context credit: 3 Hours.
Examines cultural representations of the Holocaust in literature, film, and critical essays. Same as CWL 273 and ENGL 269. Credit is not given for both GER 261 and GER 260. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

GER 270 Sexuality and Literature credit: 3 Hours.
Examination of the historical contexts in which sexuality has been debated during the past three centuries, and to what extent sexuality is perceived differently in diverse cultures. Part one will look at the Western tradition, especially Germany. Part two will shift focus to the non-Western world, especially to the colonial history of Indonesia. Same as CWL 272 and GWS 270. This course satisfies the General Education Criteria for:
Humanities - Lit Arts

GER 593 Advanced Studies in Geology credit: 1 to 8 Hours.
Work may be taken in the following fields: (a) general geology; Field trip fee may be required for this section. (b) engineering geology; (c) geomorphology and glacial geology; (d) clay mineralogy; (e) ground-water geology; (f) geomicrobiology; (g) geological fluid dynamics; (h) mineralogy and crystallography; (i) paleontology; (j) geochemistry; (k) geophysics; (l) petrography and petrology; (m) sedimentology; (n) stratigraphy; (o) oceanography; (p) submarine geology; (q) structural geology and geotectonics; (r) mathematical geology; (s) sedimentary petrography; (t) petroleum geology; (u) coal geology; (v) isotope geology and geochronology; (w) electron probe microanalysis; (x) volcanology; (y) environmental geology; and (z) planetology. Additional fees may apply. See Class Schedule. Approved for both letter and S/U grading. May be repeated.

GER 599 Thesis Research credit: 0 to 16 Hours.
Individual research under supervision of members of the faculty in their respective fields. Approved for S/U grading only. May be repeated.
GER 299 Study Abroad credit: 0 to 18 Hours.
Lectures, seminars, and practical work in German language, literature, civilization, and in other academic areas appropriate to the student's course of study. Approved for letter and S/U grading. May be repeated in the same term to a maximum of 18 hours; may be repeated in separate terms to a maximum of 36 hours. Prerequisite: GER 104 or equivalent; 2.75 overall average; 3.0 average in German courses.

GER 320 German for Business credit: 3 Hours.
Introduces German business language as used in basic operations in retail/wholesale, export/import, banking transactions. Prerequisite: GER 211 or consent of instructor.

GER 321 German for Economics credit: 3 Hours.
German language as used in professional contexts involving economic matters: texts and documents relating to forms of enterprises and their financing, to macroeconomic structures of domestic and foreign trade, and to reports on the economies of German-speaking countries. Prerequisite: GER 320 or consent of instructor.

GER 331 Intro to German Literature credit: 3 Hours.
Introductory study of representative works (prose, drama, lyric) by outstanding German, Austrian, and Swiss writers of the modern period. Prerequisite: Two years of college German or equivalent. This course satisfies the General Education Criteria for: Humanities - Lit Arts

GER 332 German Literature and Culture credit: 3 Hours.
In German. Seminar in the literature and culture of German-speaking countries since 1750. Topic varies. Format: lecture; discussion; film screenings. Prerequisite: GER 331 or equivalent.

GER 385 Politics of the European Union credit: 3 Hours.
Same as EURO 385, FR 385, and PS 385. See PS 385.

GER 396 Special Topics German Studies credit: 3 Hours.
Introductory study in such topics as individual authors, selected literary movements or periods, modes of inquiry in literary study, minor genres, subgenres, extraliterary influences, etc. Same as CWL 328. May be repeated to a maximum of 6 hours if topics vary. Prerequisite: Reading fluency in German beyond the fourth-semester college level.

GER 401 Global Issues in German credit: 3 Hours.
Introduction to global issues in German media. Taught in German. 3 undergraduate hours. 3 graduate hours. Prerequisite: GER 212 or equivalent.

GER 403 German-English Translation: Theory & Practice credit: 3 Hours.
Theory and practice of translating technical, commercial, scientific, and literary texts from German into English and vice versa. Same as TRST 403. 3 undergraduate hours. 3 graduate hours. Prerequisite: GER 401 or consent of instructor.

GER 405 History of Translation credit: 3 or 4 Hours.
Same as CLCV 430, CWL 430, ENGL 486, SLAV 430, SPAN 436, and TRST 431. See SLAV 430.

GER 418 Language&Minorities in Europe credit: 3 or 4 Hours.
Same as FR 418, ITAL 418, LING 418, PS 418, SLAV 418, and SPAN 418. See FR 418.

GER 420 German Cultural History credit: 4 Hours.
A general introduction to German culture from the pre-Christian period to the twenty-first century, focusing on the tension between forces of history and modernization in German culture. Course materials include literary and philosophical texts, film, painting, and music. Particular attention will be paid to the role of art in society. 4 undergraduate hours. 4 graduate hours. Prerequisite: One 200-level German course and GER 331; or consent of instructor.

GER 460 Principles of Language Testing credit: 3 or 4 Hours.
Same as EIL 460, EPSY 487, FR 460, ITAL 460, PORT 460, SLS 460, and SPAN 460. See EIL 460.

GER 465 Linguistic Foundations of German credit: 3 Hours.
Survey of the linguistic structures of German in historical, geographic, and social context. 3 undergraduate hours. 3 graduate hours. Prerequisite: Three years of college German or equivalent.

GER 470 Middle Ages to Baroque credit: 3 Hours.
Literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 750-1720. Same as MDVL 470. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 6 graduate hours if topic varies. Prerequisite: GER 332 or equivalent.

GER 471 Enlightenment to Romanticism credit: 3 Hours.
Literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 1720 to 1830. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 6 graduate hours if topic varies. Prerequisite: GER 332 or equivalent.

GER 472 Realism to Expressionism credit: 3 Hours.
Literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 1830 to 1920. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 6 graduate hours if topic varies. Prerequisite: GER 332 or equivalent.

GER 473 1920s to Today credit: 3 Hours.
Literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 1920 to the present. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 6 graduate hours if topic varies. Prerequisite: GER 332 or equivalent.

GER 489 Theoretical Foundations of SLA credit: 3 or 4 Hours.
Same as FR 481, ITAL 489, LING 489, PORT 489, and SPAN 489. See LING 489.

GER 491 Honors Senior Thesis credit: 1 to 4 Hours.
Intended primarily for candidates for honors in German, but open to other seniors. 1 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing; consent of instructor.

GER 493 German Cinema I credit: 3 Hours.
Focus on the rise of German film from its earliest beginnings until 1945. Same as MACS 493. 3 undergraduate hours. 3 graduate hours.

GER 494 German Cinema II credit: 3 Hours.
Study of German film from 1945 until the present. Same as MACS 494. 3 undergraduate hours. 3 graduate hours.
GER 496  Special Topics German Studies  credit: 3 Hours.
Intensive study of restricted topics in German language, literature, and
culture. 3 undergraduate hours. 3 graduate hours. May be repeated as
topics vary to a maximum of 9 undergraduate hours or 8 graduate hours.
Prerequisite: Three years of college German or equivalent.

GER 500  Readings in German Grads I  credit: 4 Hours.
Introduction to the reading of German texts in the sciences and the
humanities. Credit is not given towards a graduate degree.

GER 501  Readings in German Grads II  credit: 4 Hours.
Designed for graduate students preparing for the German reading
requirements for the Ph.D. Credit is not given towards a graduate degree.
Prerequisite: GER 500 or equivalent.

GER 510  Introduction to Graduate Study  credit: 4 Hours.
Bibliography and methodology of the study of the Germanic languages
and literatures, with particular regard to German literature and Germanic
linguistics; introduction to scholarship in general and the German
profession in particular, including the modes and methods of scholarly
endeavor.

GER 515  Middle High German  credit: 4 Hours.
Same as MDVL 515.

GER 520  History of the German Language  credit: 4 Hours.
Internal and external history of German from prehistoric times to the
present. Prerequisite: GER 465 or equivalent.

GER 530  Old High German  credit: 4 Hours.
Grammar and interpretation of the oldest literary documents. Same as
MDVL 530. Prerequisite: GER 465.

GER 533  Professional/Academic Writing  credit: 4 Hours.
Same as ITAL 573, PORT 573, and SPAN 573. See SPAN 573.

GER 570  Studies in Critical Theory  credit: 4 Hours.
Critical introduction to the enterprise of reading, accompanied by an
overview of this century's most important theories of literature and
criticism. Same as CWL 570. May be repeated to a maximum of 12 hours
if topics vary. Prerequisite: GER 510 or equivalent, and reading knowledge
of German, English, and one other modern European language.

GER 571  Medieval German Studies  credit: 4 Hours.
Seminar in selected genres, themes, or authors of the Middle Ages.
Epic, lyric, and didactic works in prose and verse are read in the original
language. Same as MDVL 571. May be repeated to a maximum of 12
hours if topics vary. Prerequisite: GER 510 and GER 515 or equivalent, or
consent of instructor.

GER 572  Early Modern German Studies  credit: 4 Hours.
Seminar in selected genres, themes, or authors of the early modern period
(1500-1700). May be repeated to a maximum of 12 hours if topics vary.
Prerequisite: GER 470.

GER 573  18thC German Studies  credit: 4 Hours.
Seminar in selected genres, themes, or authors of the eighteenth century.
May be repeated to a maximum of 12 hours if topics vary. Prerequisite:
GER 420 or GER 471.

GER 574  19thC German Studies  credit: 4 Hours.
Seminar in selected genres, themes, or authors of the nineteenth century.
May be repeated to a maximum of 12 hours if topics vary. Prerequisite:
Two 400-level courses in German literature or equivalent.

GER 575  20thC German Studies  credit: 4 Hours.
Seminar in selected genres, themes, or authors of the twentieth century.
May be repeated to a maximum of 12 hours if topics vary. Prerequisite:
Two 400-level courses in German literature or equivalent.

GER 576  Open Seminar in German Studies  credit: 4 Hours.
Seminar in literary phenomena (such as movements, genres and forms,
relations, themes and types, interdisciplinary studies, women's studies)
that go beyond the confines of a particular century. May be repeated to a
maximum of 12 hours if topics vary. Prerequisite: GER 510.

GER 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as EIL 580, FR 580, ITAL 580, PORT 580, SLS 580, and SPAN 580.
See SPAN 580.

GER 582  Theories of German Lang Tchg  credit: 4 Hours.
In-depth exploration of fundamental concepts and problems of teaching
German in college; designed for Teaching Assistants; topics include
teaching approaches, lesson planning, reading, listening, speaking,
writing, language testing, and instructional technology. Students are
required to submit a research paper on a topic appropriate to the course
content.

GER 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, EPSY 563, FR 584, ITAL 584, LING 584,
PORT 584, and SPAN 584. See SPAN 584.

GER 588  Sem Second Lang Learn  credit: 4 Hours.
Same as EALC 588, FR 588, ITAL 588, LING 588, PORT 588, and
SPAN 588. See SPAN 588.

GER 593  Research in Special Topics  credit: 1 to 8 Hours.
May be repeated to a maximum of 8 hours.

GER 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Germanic (GMC)

GMC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GMC)

Courses

GMC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

GMC 562  Germanic Linguistics  credit: 4 to 8 Hours.
Varying topics dealing with problems in diachronic and synchronic
Germanic linguistics. May be repeated if topics vary. Prerequisite:
Consent of instructor.

Global Studies (GLBL)

GLBL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GLBL)

Courses

GLBL 100  Intro to Global Studies  credit: 3 Hours.
Foundation course for understanding a range of contemporary issues
and learning to analyze them from multiple disciplinary perspectives.
Students consider globalizing trends within themes of wealth and
poverty, population, cultures, and human rights; environment and
sustainability; and governance, conflict, and cooperation. Course
objectives are to enhance knowledge of human cultures, their
interactions and impacts on the world; develop skills for successfully
negotiating realities of contemporary societies; and promote values for
global learning, diversity, and sustainable futures.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western
GLBL 118 Natural Disasters credit: 3 Hours.
Same as ESE 118 and GEOL 118. See GEOL 118.
This course satisfies the General Education Criteria for:
   Nat Sci Tech - Phys Sciences

GLBL 199 Undergraduate Open Seminar credit: 0 to 6 Hours.
See Class Schedule for topics. Approved for Letter and S/U grading. May
be repeated in the same or separate terms to a maximum of 6 hours.

GLBL 200 Foundations of Research credit: 3 Hours.
Introduction to the foundations of interdisciplinary, social science
research. Topic include understanding the purpose for research,
identifying researchable issues, finding evaluating and using sources
effectively, recognizing methods associated with different types of data
and disciplines, and writing a literature review. Prepares students for
course-based research papers and advanced research methods courses.
Guest faculty present their Global Studies-relevant research as students
(b)log their own research interests.

GLBL 201 Energy Systems credit: 2 or 3 Hours.
Same as NPRE 201. See NPRE 201.

GLBL 215 Resource Conflicts credit: 3 Hours.
Same as ESE 215 and GEG 215. See GEG 215.
This course satisfies the General Education Criteria for:
   Social Beh Sci - Soc Sci

GLBL 220 Governance credit: 3 Hours.
Gateway course into the Governance thematic area for Global Studies
majors providing an introduction to important themes, problems
and approaches to global governance in a series of issue areas,
including security, economics, migration, and the environment. Covers
the historical development of the international system as well as
contemporary controversies. Case studies are used to explore the
strength and weaknesses of current governance approaches, and
students will conduct independent research into existing structures.
Prerequisite: GLBL 100.

GLBL 221 Geographies of Global Conflict credit: 3 Hours.
Same as GEG 221. See GEG 221.
This course satisfies the General Education Criteria for:
   Social Beh Sci - Soc Sci

GLBL 225 Career Development: Internships credit: 1 Hour.
Teaches students with global studies academic interests how to identify
internships and service-learning learning opportunities relevant to their
major. Students prepare application materials, conduct informational
interviews, participate in mock job interviews, explore networking
strategies, and create a career narrative that represents their academic
interests and skills. Prepares students on what to expect from their
internships and how to develop and apply leadership skills.

GLBL 228 Terrorism, Past and Present credit: 3 Hours.
Same as HIST 257. See HIST 257.
This course satisfies the General Education Criteria for:
   Humanities - Hist Phil

GLBL 240 Global Health credit: 3 Hours.
Introduction to issues and problems in global health. As the world
becomes more and more interconnected it is important for students to
be aware of health issues from a global perspective. We will consider
a variety of issues that influence the health of different population and
countries. The topics to be discussed include: the environment, nutrition,
education, the medical system, culture, and agency involvement in health.
Case studies will be used to demonstrate some successes at addressing
these issues and problems that were encountered.

GLBL 250 Development credit: 3 Hours.
An interdisciplinary introduction to the theory and practice of
developmental international development. Topics include: defining development, how
ideas have changed over time, and the interventions used in development
work and their impacts.
This course satisfies the General Education Criteria for:
   Cultural Studies - Non-West

GLBL 251 Warfare Milit Insts & Soc credit: 3 Hours.
Same as HIST 251. See HIST 251.

GLBL 260 Global Human Rights credit: 3 Hours.
Examines how ideas about human rights are defined and how they are
differentially deployed. Looks at human rights claims and crises, and
examines how governmental and non-governmental individuals and
organizations have sought to deal with human rights violations in order
in order to address problems of justice, retribution, and reconciliation at personal,
national, and international levels.

GLBL 270 Introduction to Global Markets and Society credit: 3 Hours.
Introduction to global markets and economic systems and their evolving
relationship with societies in the global North and South. Presents
interdisciplinary perspectives on business structures and conduct with
emphasis on (1) the philosophical foundations of economic systems;
(2) international business networks and technological innovation; (3)
business environments in non-Western settings; (4) global workforce
composition and divisions of labor; (5) the relationships between
business, development and the environment; and (6) international
organizations that support the spread of global business.

GLBL 280 Nuclear Weapons & Arms Control credit: 3 Hours.
Same as PHYS 280. See PHYS 280.
This course satisfies the General Education Criteria for:
   Advanced Composition

GLBL 283 Intro to Intl Security credit: 3 Hours.
Same as PS 283. See PS 283.

GLBL 296 Global St Foundation Seminar credit: 1 Hour.
Examination of current controversies and larger ethical issues in today’s
global society. Topics could include: immigration, global environmental
debates, and population issues. May be repeated in the same or separate
terms to a maximum of 3 hours if topics vary.

GLBL 298 Global Studies Seminar Abroad credit: 3 or 6 Hours.
Seminars introduce students to aspects of globalization through a case
study of a particular location abroad. On campus, students explore
historical and contemporary aspects of the location abroad to prepare
for their field visit. Abroad, students engage with local resources and
people to better understand how the local site contributes to and is
impacted by relevant global processes under focus. Course activities
will include a field site visit abroad, discussions, lectures, short essays,
student presentation, and final projects. Topics vary according to site
location and instructor expertise. May be repeated in separate terms to a
maximum of 6 hours.

GLBL 328 First Person Global credit: 1 Hour.
A writing workshop for students who have studied abroad and want
to deepen their understanding of globalization and improve their
nonfiction prose by writing about their own experiences. Writing in the
first person raises fundamental questions about identity, power, cultural
understanding, and representation. Students will read and discuss
first person literary nonfiction by contemporary writers and chronicle
their own global encounters in ethical, insightful, and creative ways.
Prerequisite: A study abroad experience.
GLBL 340  Global Health: Policy & Governance  credit: 3 Hours.
Identifies central and emerging global health issues and analyzes them through the lenses of governance, policy and gender. Focuses on structural, policy, and institutional perspectives on global health, with emphasis on how decisions are influenced and made. Prerequisite: GLBL 240.

GLBL 350  Poverty in a Global Context  credit: 3 Hours.
Examines global poverty in the context of international development debates as an practice. Despite global commitments (for example, the Millennium Development Goals), decades of research, and new and innovative policies, the “solution” to widespread and lasting poverty alleviation remains elusive. Class will define poverty and how it is measured, considered who is poor and why some people are more vulnerable to the negative effects of poverty than others, and examine what causes some countries to remain poor. Prerequisite: GLBL 250 or consent of instructor.

GLBL 356  Comparative Political Economy  credit: 3 Hours.
Same as PS 356. See PS 356.

GLBL 357  Ethnic Conflict  credit: 3 Hours.
Same as PS 357. See PS 357.
This course satisfies the General Education Criteria for: Advanced Composition

GLBL 386  Arctic Environment & Society  credit: 6 Hours.
Interdisciplinary study of the European Arctic for science and non-science students, providing an historical survey of the relationship between its environment and societies with the goal of understanding current and possible future conditions, in light of climate change. The course takes place in Scandinavia and includes a field site component in the Arctic.

GLBL 392  Int Diplomacy and Negotiation  credit: 3 Hours.
Examines the complexities of international diplomacy and negotiations among states and other actors. Focuses on three main subject areas: negotiation analysis, applied negotiation, and the interaction of practical considerations that affect negotiations. Utilizes theoretical, case-based, and active-learning approaches during the semester as topics are explored in detail. Issues and topics include security, public health, economic development, human rights, and the environment. This course satisfies the General Education Criteria for: Advanced Composition

GLBL 403  Women in Muslim Societies  credit: 3 or 4 Hours.
Same as ANTH 403, GWS 403, HIST 434, REL 403, and SAME 403. See REL 403.

GLBL 440  Global Health: Interventions & Evaluations  credit: 3 Hours.
Focuses on the process of crafting a solution and evaluation plan related to a specific global health problem identified by students. Requires students to work in teams to integrate content learning on global health with applied project design skills developed in this course. 3 undergraduate hours. No graduate credit. Prerequisite: GLBL 340. Junior standing or higher required.

GLBL 450  Poverty Interventions and Evaluation  credit: 3 Hours.
Over the last few decades a wide range of strategies and initiatives have been applied to alleviate poverty in developing countries. The record of these initiatives is mixed. While millions of people may have moved out of poverty, over a billion remain persistently impoverished. We will examine a range of anti-poverty approaches that have been implemented and evaluates their effectiveness. Students will gain a familiarity with the interventions and an understanding of the techniques used to evaluate them. 3 undergraduate hours. No graduate credit. Prerequisite: GLBL 250 and 350 or consent of instructor.

GLBL 480  Energy and Security  credit: 3 Hours.
Same as NPRE 480 and PS 480. See NPRE 480.

GLBL 481  Writing on Technol & Security  credit: 3 or 4 Hours.
Same as NPRE 481. See NPRE 481.
This course satisfies the General Education Criteria for: Advanced Composition

GLBL 483  Seminar on Security  credit: 1 Hour.
Same as NPRE 483. See NPRE 483.

GLBL 492  UG Research Assistance  credit: 0 to 3 Hours.
Assist Global Studies and program-affiliated faculty in ongoing research. Topics and nature of assistance vary. Capstone paper required. 0 to 3 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. No more than 6 hours may be counted toward completion of the Global Studies major from any combination of GLBL 492 and other independent study, internship, or research assistance coursework. This includes coursework from other departments on campus or during study abroad. Prerequisite: GLBL 200; evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of Global Studies program. Global Studies majors only. Not available to freshman. Instructor approval required.

GLBL 494  Research Methods I  credit: 3 Hours.
Optional Capstone experience for Global Studies students. Students will develop research, communication and presentation skills and develop a proposal for an independent research project, goals and timeline. The proposal will include a literature review and methods section for their final project. Topics include: research approaches, design and implementation, as well as methods, analysis and ethics of data collection. 3 undergraduate hours. No graduate credit. Prerequisite: GLBL 200.

GLBL 495  Research Methods II  credit: 1 Hour.
Second semester of the optional Capstone experience for International/Global Studies students. Designed to guide the interpretation of the data, development of conclusions and implications. In addition to the final project, students will learn how to write a paper abstract and conference proposal, as well as acquire presentation skills. 1 undergraduate hour. No graduate credit. Prerequisite: GLBL 494.

GLBL 499  Special Topics  credit: 1 to 4 Hours.
Selected reading and research in Global Studies. See schedule for current topics. 3 undergraduate hours. 1 to 4 graduate hours. May be repeated, if topics vary, in the same or separate terms to a maximum of 6 undergraduate or 8 graduate hours. Prerequisite: GLBL 100 or six hours of global studies, anthropology, social geography, political science, sociology, or economics; consent of instructor.

GLBL 500  Global Society  credit: 4 Hours.
Students will examine three propositions: (1) the existence of a global society; (2) the flaws of its principal, global institutions ? the state, markets, and democracy; and (3) absent their reform, whether the global society is at risk. Prerequisite: Instructor Approval Required.

GLBL 501  Perspectives on Global Studies  credit: 4 Hours.
Provides graduate students in a variety of fields with an understanding of key global concepts and methods, and introduces them to different perspectives on globalization and transnational social relations. 4 graduate hours. No professional credit. Prerequisite: Graduate Standing.
Graduate College (GC)

GC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GC)

Courses
GC 295 URAP Research Apprenticeship  credit: 3 Hours.
The Office of Undergraduate Research and the Graduate College offer the opportunity for freshmen, sophomores, and transfer students with little to no research experience to assist advanced graduate students with their research projects. Through an application, selection, and matching process, undergraduate students are provided a research experience with their graduate student mentor. In addition, regular class meetings will offer a comprehensive introduction to research methods and practices. Approved for S/U grading only. Prerequisite: Consent of instructor. Freshmen, Sophomores, and first-year transfer students by application only.

GC 498 Graduate Domestic Study Away  credit: 0 to 12 Hours.
Provides campus credit for study at accredited domestic institutions outside the CIC. 0 to 12 graduate hours. Approved for both letter and S/U grading. May be repeated to a maximum of 12 graduate hours in separate terms. Credit received will depend on transfer approved from visited institution. Prerequisite: Registration will be controlled by Graduate Records.

GC 499 Graduate College Study Abroad  credit: 0 to 18 Hours.
Provides campus credit for study at accredited foreign institutions or approved overseas programs. Final determination of credit granted is made after the student’s successful completion of work. Credit will not count toward residence requirements. 0 to 18 graduate hours. Approved for both letter and S/U grading. 0 to 18 hours fall and spring semesters. 0 to 12 hours summer term. Prerequisite: Full academic standing in the Graduate College and consent of major department and Graduate College.

GC 500 URAP Graduate Mentor Practicum  credit: 0 Hours.
The Office of Undergraduate Research (OUR) and the Graduate College offer the opportunity for first and second-year undergraduate students to assist advanced graduate students with their research projects. Through a one-on-one research experience with their graduate student mentor, undergraduate students will have the opportunity to learn what it means to do research, create knowledge, and produce scholarship. This course will serve as a formal record of the graduate mentoring side of the apprenticeship (i.e., "practicum"). 0 graduate hours. No professional credit. Approved for S/U grading only. May be repeated.

GC 599 Thesis Research  credit: 0 Hours.
For doctoral students who have a guaranteed student loan that needs deferral, have completed the credit requirements for the doctorate, have passed the preliminary examination, do not have any financial assistance that would cover tuition and fees, and are eligible to register for 599 in their own academic units. Approved for S/U grading only. May be repeated.

Grand Challenge Learning (GCL)

GCL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GCL)

Courses
GCL 101 Introduction to Energy Sources  credit: 3 Hours.
Explanation of energy technologies using an elementary approach presupposing no prior scientific or technical background. Coverage of all energy sources including fossil fueled, solar, hydro, and nuclear power. Integral demonstrations and a tour of the University's power plant. Discussion of energy related incidents with emphasis on environmental, economic, and social impact. Credit is not given for both GCL 101 and NPRE 101.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Nat Sci Tech - Phys Sciences
Quantitative Reasoning II

GCL 124 Sustainable Earth  credit: 3 Hours.
Provides an introduction to sustainability that explores how today's human societies can endure in the face of global change, ecosystem degradation, and limited resources. Emphasizes the fundamentals of the physical sciences and the scientific method while also exploring the special impact of sustainability challenges on minority cultures in the U.S.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Nat Sci Tech - Phys Sciences

GCL 125 Health and Wellness in Life Sciences  credit: 3 Hours.
Grand Challenge Learning course in the Health & Wellness pathway. Introduces students to the fundamentals of life sciences with an emphasis on health & wellness and experiential learning through projects, design-based thinking, community-engaged scholarship, or field trips. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Health/Well
Nat Sci Tech - Life Sciences

GCL 126 Sustainability and Social Science  credit: 3 Hours.
Grand Challenge Learning course in the Sustainability, Energy & the Environment pathway. Introduction to the fundamentals of social science with an emphasis on environmental sustainability and experiential learning through projects, design-based thinking, community-engaged scholarship, or field trips. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Social Beh Sci - Soc Sci

GCL 127 History and Philosophy of Sustainable Design  credit: 3 Hours.
Grand Challenge Learning course in the Sustainability, Energy & the Environment pathway. Introduction the history of sustainable design practices that prepares students to think about, act upon and share their growing knowledge Focuses on environmental philosophy, and "systems thinking", with an on active, engaged participation in a variety of learning activities, design challenges, and field experiences. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Humanities - Hist Phil
GCL 128 Sustainability in Fiction  credit: 3 Hours.
Grand Challenge Learning course in the Sustainability, Energy & the Environment Pathway. Exploration of how narrative fiction focused on sustainability -- such as "cli-fi" (dystopian fiction about climate change) -- shapes our relation to the natural world. Includes experiential learning projects. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Humanities - Lit Arts

GCL 129 Sustainable Design  credit: 3 Hours.
Interdisciplinary Grand Challenge Learning pilot course in the Sustainability, Energy & the Environment pathway. Provides an introduction to sustainable art forms, media, and/or the social function of art as it relates to sustainability. Topics vary by section. Each section emphasizes experiential learning through design-based thinking and practice supplemented by field trips and community-engaged scholarship in comparative contexts.
This course satisfies the General Education Criteria for:
Grand Challenge-Sustainability
Humanities - Lit Arts
Cultural Studies - Non-West

GCL 137 Documenting Inequality  credit: 3 Hours.
Exploration of how economic and social inequality affects the lives of children and minors in the U.S. --especially in minority communities-- through the study of documentary film, photography and other kinds of socially conscious art. Students will watch and critique documentaries made by artists and filmmakers in the areas of Education, Housing, and Law Enforcement; go behind the scenes at the Krannert Art Museum to investigate the museum's documentary holdings; and make their own documentary projects. Final projects will be exhibited in the Krannert Art Museum at the end of the semester. Part of the Grand Challenge Learning Inequality & Cultural Understanding pathway.
This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Humanities - Lit Arts
Cultural Studies - US Minority

GCL 143 Mapping Inequalities  credit: 3 Hours.
Grand Challenge Learning course in Inequality & Cultural Understanding. Immerses students in the history of Inequality in the United States through mapping the geographic, historical, and/or social movement of minority cultures using quantitative and social science methods. Topics vary by section, but each section emphasizes experiential learning through community-engaged scholarship, field-trips, or computer programming projects. No previous computer programming experience is required. No previous computer programming experience is required.
This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Quantitative Reasoning II
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

GCL 144 Stereotypes, Prejudice & Discrimination  credit: 3 Hours.
Grand Challenge Learning course in Inequality & Cultural Understanding provides an interdisciplinary introduction to questions related to societal inequality. Each section emphasizes experiential learning through, for example, field trips or hands-on, community-based research projects.
This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci
Grand Challenge-Inequality
Cultural Studies - US Minority

GCL 145 Social Justice and the Arts  credit: 3 Hours.
Interdisciplinary Grand Challenge Learning course in the Inequality & Cultural Understanding pathway. Provides an introduction to the social dimensions of art and its use in social justice movements. Each section emphasizes experiential learning through projects, design-based thinking, community-engaged scholarship, or field trips. This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Humanities - Lit Arts
Cultural Studies - US Minority

GCL 146 Fundamental Causes of Disease: The HIV/AIDS Pandemic  credit: 3 Hours.
Examination of the HIV/AIDS pandemic globally and locally. Introduces students to the fundamentals of the socio-demographic tradition, including risk behaviors and contexts and data skills associated with epidemiology. Upon completing the course, students will be better informed about the HIV/AIDS pandemic, familiar with core social science theories, and able to develop and assess public health measures and models in addition to enhanced core academic skills (critical reading skills, note taking, data analysis, and writing). Prerequisite: This course is intended for first and second year students.
This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Social Beh Sci - Soc Sci

GCL 147 Social Justice in the Social Sciences  credit: 3 Hours.
Interdisciplinary Grand Challenge Learning course in the Inequality and Cultural Understanding Pathway. Exploration of causes and solutions to inequality from a variety of viewpoints, such as sociology, economics, political science, and journalism. Includes experiential learning projects. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

GCL 148 Historical Perspectives on Social Justice  credit: 3 Hours.
Grand Challenge Learning course in the Inequality & Cultural Understanding pathway. Focuses on the historical dimensions of Inequality & Cultural Understanding from an interdisciplinary perspective and emphasizes experiential learning through projects, community-engaged scholarship, video conferences with experts and other collaborative classroom activities. Topics vary by section.
This course satisfies the General Education Criteria for:
Grand Challenge-Inequality
Humanities - Hist Phil

GCL 185 Health, Wellness, and the Black Experience  credit: 3 Hours.
Exploration of issues relating to health in African American communities such as environment, lifestyle, chronic disease, intervention, research, policy, social justice and cultural experience. Includes experiential learning projects as part of the Grand Challenge Learning Initiative. This course satisfies the General Education Criteria for:
Grand Challenge-Health/Well
Social Beh Sci - Soc Sci
Cultural Studies - US Minority
GCL 180 Health and Society credit: 3 Hours.
Grand Challenge Learning course in Health & Wellness. Engages the social dimensions of Health & Wellness from an interdisciplinary perspective and emphasizes experiential learning through projects, design-based thinking, community-engaged scholarship or field-trips. Topics vary by section.
This course satisfies the General Education Criteria for: Grand Challenge-Health/Well
Humanities - Hist Phil

GCL 182 Frameworks for Health & Wellness: Building Healthy Communities credit: 3 Hours.
Different disciplines approach issues of health and wellness in distinct ways. This course presents an interdisciplinary introduction to the study of social inequality. Co-taught by faculty from the arts, humanities, and social sciences, it addresses how inequality related to work, race and ethnicity, gender, urban space, incarceration, global debt and migration relate to one another and across disciplinary boundaries. Presentations by visiting activists will expose students to contemporary social justice efforts to address inequalities. Meets twice per week: on Tuesdays all students meet together, and on Thursdays the class breaks into small seminars, each led by one of the course's main instructors. Credit is not given for both GCL 200 and GCL 201.
This course satisfies the General Education Criteria for: Grand Challenge-Health/Well
Humanities - Hist Phil
Cultural Studies - US Minority

GCL 185 Morality, Methods, and Medicine: Formal and Philosophical Approaches to Health in Society credit: 3 Hours.
Interdisciplinary, experiential Grand Challenge Learning course in Health & Wellness. Exploration of the ways methodological and moral principles interact to inform policy choices related to health and society; consideration of topics of ethical and public policy concern (e.g., abortion, animal experimentation, drug and trials, organ donation, vaccination, and provision of healthcare), with an emphasis on relevant formal, quantitative tools (e.g., probability, statistics, decision theory, modal logic, and graphical causal modeling).
This course satisfies the General Education Criteria for: Grand Challenge-Health/Well
Humanities - Hist Phil
Quantitative Reasoning II

GCL 187 Health and Wellness in Literature credit: 3 Hours.
Grand Challenge Learning course in the Health & Wellness pathway. Exploration of creative, literary responses to the issue of Health & Wellness from an interdisciplinary perspective with an emphasis on experiential learning. Topics vary by section.
This course satisfies the General Education Criteria for: Grand Challenge-Health/Well
Humanities - Lit Arts

GCL 195 Fictions of Equality credit: 3 Hours.
Grand Challenge Learning course in the Inequality & Cultural Understanding pathway. Introduces students to how fiction on the topic of inequality shapes social and cultural understanding of the topic. Topics vary by section but each emphasizes experiential learning through, for example, projects, community engaged scholarship, field trips, archival work, or experimental writing.
This course satisfies the General Education Criteria for: Grand Challenge-Inequality
Humanities - Lit Arts
Cultural Studies - Western

GCL 200 Frameworks for Inequality credit: 3 Hours.
Different disciplines approach issues of inequality in distinct ways. This course presents an interdisciplinary introduction to the study of social inequality. Co-taught by faculty from the arts, humanities, and social sciences, it addresses how inequality related to work, race and ethnicity, gender, urban space, incarceration, global debt and migration relate to one another and across disciplinary boundaries. Presentations by visiting activists will expose students to contemporary social justice efforts to address inequalities. Meets twice per week: on Tuesdays all students meet together, and on Thursdays the class breaks into small seminars, each led by one of the course's main instructors. Credit is not given for both GCL 200 and GCL 201.
This course satisfies the General Education Criteria for: Grand Challenge-Inequality
Humanities - Hist Phil
Cultural Studies - US Minority

GCL 201 Frameworks for Inequality & Cultural Understanding - ACP credit: 3 Hours.
Frameworks for Inequality & Cultural Understanding introduces students to one of the most urgent social issues of our era: economic and racial inequality. As an innovative course in Grand Challenge Learning, GCL 201 gathers expert faculty from across campus—all renowned for excellent teaching and research. Students will explore inequality across the arts, natural sciences, humanities, and social sciences while earning General Education credit in US Minority Cultures and Humanities & the Arts.
GCL 201 meets twice per week: on Tuesday for a lecture that gathers all students and faculty, and Thursdays in seminars of up to 20 students. Through this unique structure, students benefit from the expertise of seven different faculty while joining a seminar with one professor and a small network of peers. Registration for GCL 201 includes the lecture as well as enrollment in one of the participating professor's seminars (for a total of 3 credit hours). Credit is not given for both GCL 201 and GCL 200.
Prerequisite: Completion of campus Composition I requirement.
This course satisfies the General Education Criteria for: Advanced Composition
Grand Challenge-Inequality
Humanities - Hist Phil
Cultural Studies - US Minority

GCL 210 Frameworks for Sustainability, Energy, & the Environment credit: 3 Hours.
Different disciplines approach issues of sustainability in different ways. This course presents an interdisciplinary introduction to the study of sustainability, energy and the environment. Co-taught by faculty from the humanities, social sciences, natural sciences, business, and engineering, it addresses how environmental and energy sustainability challenges are not only technical problems but are also social, political and economic ones. Students will be able to evaluate various problems and solutions to enhance energy and environmental sustainability. Meets twice per week: first for a lecture that includes all students and faculty, and next in individual faculty-led seminars. Through this structure, students benefit from the expertise of multiple faculty while participating in a seminar with one professor and a small network of peers.
This course satisfies the General Education Criteria for: Grand Challenge-Sustainability
Humanities - Hist Phil
Cultural Studies - Western

Information listed in this catalog is current as of 04/2018
GCL 299 Interdisciplinary Research Experience credit: 3 Hours. Introduces students to interdisciplinary research and the skills needed to become an effective researcher. Enables students to conduct authentic research in one of the campus's interdisciplinary research centers under the supervision and mentorship of faculty. Approved for S/U grading only. May be repeated in separate terms up to 6 credit hours if topics vary. Prerequisite: Registration by permission of instructor.

Greek (GRK)

GRK Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GRK)

Courses

GRK 101 Elementary Greek I credit: 4 Hours. Introduces ancient Greek (both classical and koine), including the reading of simple prose. Same as REL 200. Prerequisite: GRK 101.

GRK 102 Elementary Greek II credit: 4 Hours. Continuation of GRK 101. Grammar and reading in classical and koine Greek. Same as REL 112. Prerequisite: GRK 101.

GRK 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

GRK 201 Classical & Koine Greek I credit: 4 Hours. Readings in classical Greek prose, and narrative and epistolary New Testament texts. Same as REL 204. Prerequisite: GRK 201 or equivalent.

GRK 202 Classical & Koine Greek II credit: 4 Hours. Continuation of GRK 201. Further readings in classical Greek prose, and narrative and epistolary New Testament texts. Same as REL 204. Prerequisite: GRK 201 or equivalent.

GRK 251 Elementary Modern Greek I credit: 5 Hours. Same as GRKM 201. See GRKM 201.

GRK 252 Elementary Modern Greek II credit: 5 Hours. Same as GRKM 202. See GRKM 202.

GRK 401 Homeric Greek credit: 2 or 3 Hours. Introduction to Epic Greek; readings of Homer. 3 undergraduate hours. 2 graduate hours. Prerequisite: GRK 202 or equivalent.

GRK 403 Intermediate Modern Greek I credit: 4 Hours. Same as GRKM 403. See GRKM 403.

GRK 404 Intermediate Modern Greek II credit: 4 Hours. Same as GRKM 404. See GRKM 404.

GRK 411 Greek Prose Composition credit: 3 Hours. Practice in the writing of Greek prose. 3 undergraduate hours. 3 graduate hours. Prerequisite: GRK 201 or equivalent.

GRK 491 Readings in Greek Literature credit: 3 to 4 Hours. Readings in authors or special topics chosen by the instructor from the entire extant literature in Greek. 3 or 4 graduate hours. May be repeated. Prerequisite: GRK 401 or equivalent.

GRK 492 Senior Thesis credit: 2 to 4 Hours. Thesis and honors. Open to candidates for distinction in Greek. 2 to 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing and consent of Classics Honors Program.

GRK 493 Independent Reading credit: 1 to 4 Hours. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 undergraduate hours or 12 graduate hours. Prerequisite: GRK 401 and consent of instructor.

GRK 498 Senior Survey credit: 2 or 4 Hours. For candidates for honors in Greek and for other seniors. 2 or 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing and consent of Classics Honors Program.

GRK 511 Advanced Composition credit: 1 Hour. Practice in writing continuous Greek prose, with special attention to stylistic problems.

GRK 520 Proseminar credit: 4 Hours. Alternating poetry and prose, concentrates on a major author from one of the following areas: epic, history, lyric poetry, oratory, drama, or philosophy. Areas normally follow this sequence in successive years. May be repeated to a maximum of 20 hours if topics vary. Prerequisite: GRK 491 or equivalent.

GRK 531 Special Disciplines credit: 4 Hours. Variable content course concentrating on an area such as comparative grammar, epigraphy, metrics, palaeography, or papyrology. Same as LAT 531. May be repeated if topics vary. Prerequisite: GRK 491 and LAT 491, or equivalent.

GRK 580 Greek Seminar credit: 4 Hours. Research on special problems of Greek literature; required of all majors in classical philology. May be repeated if topics vary. Prerequisite: A Greek prosem. 

GRK 595 Intro to Classical Studies credit: 4 Hours. Introductory survey for graduate students in classics; prepares students for work at the graduate level and surveys basic bibliography and methodology. Same as LAT 595. Prerequisite: Graduate standing in classics.

GRK 599 Thesis Research credit: 0 to 16 Hours. Guidance in writing theses for advanced degrees. Approved for S/U grading only. May be repeated.

Hebrew, Modern and Classical (HEBR)

HEBR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HEBR)

Courses

HEBR 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

HEBR 201 Elementary Modern Hebrew I credit: 5 Hours. Acquaints students with the fundamental principles of the Hebrew language. Develops all four language skills: reading, writing, listening and speaking. Grammar and comprehension are exercised through the textbook, the audio-visual materials and the computer. Easy stories will be used during the term to strengthen reading comprehension. Participation in the language laboratory is required.

HEBR 202 Elementary Modern Hebrew II credit: 5 Hours. Continuation of HEBR 201, with introduction of more advanced grammar, and with emphasis on more fluency in speaking and reading. Participation in the language laboratory is required. Prerequisite: HEBR 201 or equivalent.

HEBR 205 Intensive Biblical Hebrew credit: 5 Hours. Same as REL 205. See REL 205.
HEBR 403  Intermediate Modern Hebrew I  credit: 4 or 5 Hours.
Advanced examination of the fundamental principles of the Hebrew language. Develops all four language skills: reading, writing, listening and speaking. Grammar and comprehension are exercised through the textbooks, the audio-visual materials and the computer. Examples of Hebrew fiction, largely easy stories, will be used during the term to strengthen reading comprehension. Participation in the language laboratory is required. 5 undergraduate hours. 4 graduate hours. Prerequisite: HEBR 202 or equivalent.

HEBR 404  Intermediate Modern Hebrew II  credit: 4 or 5 Hours.
Continuation of HEBR 403. Concentration on ability to engage in reasonable fluent discourse in Hebrew, comprehensive knowledge of formal grammar, and an ability to read easy Hebrew texts. Israeli television programs and movies are used to develop communicative skills and cultural knowledge. Participation in the language laboratory is required. 5 undergraduate hours. 4 graduate hours. Prerequisite: HEBR 204 or equivalent.

HEBR 405  Advanced Modern Hebrew I  credit: 3 Hours.
For students who have mastered the fundamental principles of the Hebrew language. Develops competence through reading Hebrew fiction and studying Israeli newspapers and television programs. Communication skills are exercised by means of class discussions, oral presentations, compositions and written reports on stories. 3 undergraduate hours. 3 graduate hours. Prerequisite: HEBR 404 or equivalent.

HEBR 406  Advanced Modern Hebrew II  credit: 3 Hours.
Course for advanced knowledge of spoken and written standard Modern Hebrew with emphasis on Modern Hebrew literature and language, Israeli newspapers and Israeli television programs. Communication skills are exercised by means of class discussions, oral presentations, compositions and written reports on stories. 3 undergraduate hours. 3 graduate hours. Prerequisite: HEBR 405 or equivalent.

HEBR 407  Topics Hebrew Lang & Lit I  credit: 3 Hours.
Study of advanced topics in the Hebrew language, based on a selection of Hebrew literature from either the Bible or the modern period. Historical and cultural background of the material will be stressed, together with literary analysis. In certain years, the course will be offered as a course using English translation of texts, with separate discussion section for students who want to read texts in the original. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 9 hours. Prerequisite: HEBR 205 or HEBR 406 or consent of instructor.

HEBR 408  Topics Hebrew Lang & Lit II  credit: 3 Hours.
Study of advanced topics in the Hebrew language, based on a selection of Hebrew literature from either the Bible or the modern period. Historical and cultural background of the material will be stressed, together with literary analysis. In certain years, the course will be offered as a course using English translation of texts, with separate discussion section for students who want to read texts in the original. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 9 hours. Prerequisite: HEBR 205 or HEBR 406 or consent of instructor.

HEBR 414  Advanced Biblical Hebrew  credit: 3 or 4 Hours.
Same as REL 414. See REL 414.

Hindi (HNDI)

HNDI Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HNDI)

Courses

HNDI 115  Language and Culture in India  credit: 3 Hours.
Same as LING 115 and REL 115. See REL 115.
This course satisfies the General Education Criteria for: Cultural Studies - Non-West

HNDI 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

HNDI 201  Elementary Hindi-Urdu I  credit: 5 Hours.
Introduction to the Hindi/Urdu language; includes conversation with a native Hindi/Urdu-speaking tutor under the direction of a linguist instructor, and a minimum of formal grammar and Devanagari writing; introduction to Arabic-Persian script by arrangement. Participation in the language laboratory is required.

HNDI 202  Elementary Hindi-Urdu II  credit: 5 Hours.
Second term of spoken Hindi/Urdu; includes conversation with a native Hindi/Urdu-speaking tutor under the direction of a linguist instructor, formal grammar based on conversational materials, and work on written Hindi; concentration on written Urdu by arrangement. Participation in the language laboratory is required.

HNDI 403  Intermediate Hindi I  credit: 4 Hours.
First term of second year of the Hindi language, including drill for more advanced conversational fluency; introduction to a greater variety of styles and levels of discourse and usage; and increasing study of the written language and more formal grammar. 4 undergraduate hours. 4 graduate hours. Prerequisite: HNDI 202 or equivalent.

HNDI 404  Intermediate Hindi II  credit: 4 Hours.
Concentration on ability to engage in reasonably fluent discourse in Hindi, on comprehensive knowledge of formal grammar, and on ability to read ordinary texts in Hindi. 4 undergraduate hours. 4 graduate hours. Prerequisite: HNDI 403 or equivalent.

HNDI 405  Advanced Hindi I  credit: 3 Hours.
Course for advanced knowledge of spoken and written Hindi. Participation in the language laboratory is required. 3 undergraduate hours. 3 graduate hours. Prerequisite: HNDI 404 or consent of instructor.

HNDI 406  Advanced Hindi II  credit: 3 Hours.
Course for advanced knowledge of spoken and written Hindi with emphasis on modern Hindi literature and language. Participation in the language laboratory is required. 3 undergraduate hours. 3 graduate hours. Prerequisite: HNDI 405 or consent of instructor.

HNDI 408  Intro to South Asian Lit  credit: 3 Hours.
Introduces selected literatures of South Asia in a cross-cultural and comparative perspective: emphasizes relating literary texts and trends to the historical, sociocultural, political, and literary contexts of the subcontinent. Texts for South Asian languages are offered in English translation; in addition, there will be texts by South Asian authors written in English. Knowledge of a South Asian language not required. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of course coordinator.

HNDI 412  Business Hindi  credit: 3 Hours.
Study and analysis of Business Hindi in a wide variety of contexts and settings (from Metropolitan to rural). 3 undergraduate hours. 3 graduate hours. Prerequisite: HNDI 403 or higher or consent of instructor.

History (HIST)

HIST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HIST)
Courses

HIST 100  Global History  credit: 3 Hours.
Broad introduction to global history, by exploring the global structures and transnational forces that have shaped human history, from the emergence of agriculture and urban centers to our contemporary global village. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 101  History Now!  credit: 3 Hours.
Teaches students how to apply historical thinking to present day problems. Each version starts with contemporary headlines about a current issue, moves to an investigation of its historical roots and legacies, and pivots back to the present to assess the impact of past history on present reality and to capture those relationships in a collaborative student project. It aims to show, in short, how and why history matters NOW. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 104  Black Music  credit: 3 Hours.
What is black music, and how do we know what we think we know about it? Together, we will examine musical creations pioneered by Africans and individuals of African descent over several centuries and across hemispheres. Doing so will allow us to consider the unity of the African Diaspora and its music, and also examine internal differences and diversity. Special focus is given to Latin America and the U.S., but, depending on the semester, we will also read about, listen to, and talk about music and musicians in Asia, Africa, and Europe. Most course assignments are multi-media and interactive. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 105  Latin America to Independence  credit: 3 Hours.
Survey of Latin American history from the discovery of America to 1824. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 106  Modern Latin America  credit: 3 Hours.
History of the Latin American republics from their independence to the present; emphasis on Argentina, Brazil, Chile, Colombia, Cuba, and Mexico. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 110  History of Africa  credit: 3 Hours.
Survey of the early history of the continent, nineteenth century developments, and the period of colonial occupation and independence, with particular focus on case studies from East Africa, South Africa and West Africa at the conclusion of the term. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 120  East Asian Civilizations  credit: 3 Hours.
Surveys the three major East Asian civilizations from ancient and classical times, through the period of Western influence, political revolution, and modernization, to the contemporary age and the emergence of East Asian superpowers. Same as EALC 120. Credit is not given for both HIST 120 and EALC 135. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 130  History of South Asia  credit: 3 Hours.
Multidisciplinary introduction to the history of modern South Asia from the consolidation of early modern state formations, the negotiation of religious, cultural and linguistic formations, European colonial interactions, and the rise of the modern nation states of Bangladesh, India, Pakistan and Sri Lanka. Same as ANTH 130. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 135  History of Islamic Middle East  credit: 3 Hours.
Introduction to fourteen centuries of Middle East history from the rise of Islam to modern times. Examines the development of Islamic thought, and of religious, social, and political institutions; as well as the transformations of the 19th and 20th centuries in the area consisting of Egypt, the Fertile Crescent, Arabia, Turkey, and Iran. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 140  Western Civ to 1660-ACP  credit: 4 Hours.
Course is identical to HIST 141 except for the additional writing component. See HIST 141. Credit is not given for both HIST 140 and HIST 141. Prerequisite: Completion of campus Composition I General Education requirement. This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

HIST 141  Western Civ to 1660  credit: 3 Hours.
Fundamental developments in the history of Western societies from antiquity to early modern Europe; includes the Greek and Roman worlds, the influence of Christianity and Islam, the emergence of medieval monarchies, the rise of cities, the commercial and intellectual revolutions of the Middle Ages, the birth of the university, the conquest and colonization of the Atlantic world, the Renaissance and Reformation, the political and religious upheavals of the sixteenth and seventeenth centuries. Credit is not given for both HIST 141 and HIST 140. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 142  Western Civ Since 1660  credit: 3 Hours.
Fundamental developments - social, economic, cultural, intellectual, and political - in the history of mankind and Western society since 1660; includes the rise of modern science, the French and Industrial revolutions, the Romantic movement, the growth of nationalism and socialism, imperialism, urbanization, the Russian Revolution, Nazi Germany, the world wars, and the West and the developing world. Credit is not given for both HIST 142 and HIST 143. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

Information listed in this catalog is current as of 04/2018
HIST 143 Western Civ Since 1660-ACP credit: 4 Hours.
Course is identical to HIST 142 except for the additional writing component. Credit is not given for both HIST 143 and HIST 142. Prerequisite: Completion of campus Composition I General Education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

HIST 164 The Automobile credit: 3 Hours.
Interdisciplinary examination of the automobile industry, its production systems, its marketing strategies, and the way automobiles reflect the changing landscapes of consumer tastes and value over time.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

HIST 168 A History of Judaism credit: 3 Hours.
Same as REL 120. See REL 120.
This course satisfies the General Education Criteria for:
Advanced Composition

HIST 170 US Hist to 1877-ACP credit: 4 Hours.
Course is identical to HIST 171 except for the additional writing component. Credit is not given for both HIST 170 and HIST 171. Prerequisite: Completion of campus Composition I General Education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

HIST 171 US Hist to 1877 credit: 3 Hours.
Colonial foundations, movement for independence, and early years of the Republic. Credit is not given for both HIST 171 and HIST 170.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 172 US Hist Since 1877 credit: 3 Hours.
Evolution of an industrial, urbanized, and pluralistic society, grappling with domestic and global problems. Credit is not given for both HIST 172 and HIST 173.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 173 US Hist Since 1877-ACP credit: 4 Hours.
Course is identical to HIST 172 except for the additional writing component. Credit is not given for both HIST 173 and HIST 172. Prerequisite: Completion of campus Composition I General Education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

HIST 174 Black America, 1619-Present credit: 3 Hours.
Same as AFRO 101. See AFRO 101.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 191 Freshman Honors Tutorial credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars and Associates. May be repeated once. Prerequisite: Consent of departmental honors advisor.

HIST 198 Freshman Seminar credit: 3 to 4 Hours.
Through research, reports, and discussion in a selected field of historical study, the seminar provides a thorough understanding of the problems of that field and of the methods of history as a discipline. May be repeated to a maximum of 6 hours. Prerequisite: James Scholar standing or other designation as a superior student; consent of instructor.

HIST 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

HIST 200 Intro Hist Interpretation credit: 3 Hours.
Through the careful examination of a specific topic or theme, this course provides a thorough introduction to historical interpretation. Particular attention will be devoted to research strategies, writing practices, handling primary and secondary sources, and the analysis of historiography. May be repeated to a maximum of 6 hours with permission of the Director of Undergraduate Studies.

HIST 202 American Environmental History credit: 3 Hours.
Introduction to the historical study of Americans' relationship with the natural world. Examination of the ways that "natural" forces have helped to shape American history; the ways that human beings have shaped, altered, and interacted with nature over time; and the ways that cultural, philosophical, scientific, and political attitudes toward the environment have changed from pre-history to the present. Same as ESE 202 and NRES 202.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 203 Reacting to the Past credit: 3 Hours.
An introduction to history through participation in role-playing games set in the past. Topics will vary each time the course is taught. Students will take on the roles of historical figures (famous or obscure) engaged in difficult and complicated situations, and will be obliged to adhere to the beliefs and circumstances of those figures while attempting to pursue a course of action that will help them win the game -- and possibly alter the course of history.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 205 LatAm Hist: Primary Accounts credit: 3 Hours.
Examining the history through the primary texts written by Latin Americans, this course introduces students to theories, contents and methods of historical inquiry, as well as the nuances and the complexities of Latin American history. Reading primary texts written by all strata of society, students will look through the eyes of the diverse populations in Latin America. Students will analyze the traditional narrative of Latin America and gain insight into the lived experience of Latin Americans. Together we will advance our individual and collective understanding of Latin America's rich and complex past.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West
HIST 207  Publishing the Past  credit: 3 Hours.
Introduction to the craft of publishing historical materials, with a special focus on how to publish the past in the digital age. Assignments will include historical and methodological readings, as well as hands-on instruction in digital publishing techniques. Skills taught include historical research, content development, project management, and copyright analysis.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

HIST 211  History of Southern Africa  credit: 3 Hours.
Survey of major themes and events in Southern African history, with emphasis on the period after World War II: the inception and development of apartheid in South Africa, the growth of contests over African nationalism in the subcontinent, wars of liberation and the demise of white domination.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 212  History of Eastern Africa  credit: 3 Hours.
Introduction to the history of Eastern Africa from the nineteenth century to the present. Attention to the region's pre-colonial history and institutions is stressed, in order to understand both the transformations brought by European colonialism as well as its limits. The final weeks of the course will examine the differing political, economic, and religious trajectories of the new nation-states since independence in the 1960s.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 213  African Muslim Cultures  credit: 3 Hours.
Focuses on the history and historiography of Muslim societies in Africa. Investigates the dynamics of the spread of Islam in Africa, and explores differences in Islam in Africa from other areas of the Islamic world, with attention to the image in Western scholarship of Islam in Africa. Provides students with the knowledge and skills they need to understand this central phenomenon in modern world history. Same as AFST 213 and REL 215.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 219  History of the Prison  credit: 3 Hours.
Same as AFRO 221 and LA 221. See LA 221.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 220  Traditional China  credit: 3 Hours.
Historical background to the modern age, tracing the Chinese state and empire from the earliest times until 1644 A.D. Basic political, social, and economic patterns; cultural, intellectual, and technological achievements; and China's impact on Asia and the world. Same as EALC 220.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 221  Modern China  credit: 3 Hours.
General introduction to the major themes of the Chinese Revolution from 1840 to the present, emphasizing the interplay between politics, ideas, and culture. Themes include the tension between cultural integrity and Western ideologies, between democratic participation and the tradition of centralized control, and the representation of cultural identity in high and mass cultures. Same as EALC 222.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

HIST 222  Chinese Thought Confucius to Mao  credit: 3 Hours.
Same as EALC 222 and REL 224. See EALC 222.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 225  Southeast Asian Civilizations  credit: 3 Hours.
Same as ANTH 286 and ASST 286. See ANTH 286.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 226  Premodern Japanese History  credit: 3 Hours.
Introduction to the history of the Japanese people, their social and cultural systems, politics, and economy, from the earliest times to the sixteenth century. Same as EALC 226.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 227  Modern Japanese History  credit: 3 Hours.
Introduction to the history of the Japanese people, their social and cultural systems, politics, and economy, from the mid-sixteenth century to the mid-twentieth century. Same as EALC 227.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

HIST 240  Ancient Greek Civilization  credit: 3 Hours.
The history of ancient Greece and neighboring civilizations from the Archaic Period to the conquests of Alexander.

HIST 241  History of Ancient Rome  credit: 3 Hours.
Survey of the political, social, economic, military, institutional, religious and cultural development of Rome from 753 BCE until 480 CE.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 245  Women & Gender Pre-Mod Europe  credit: 3 Hours.
Examines the history of women and the evolution of concepts of gender in western Europe from roughly 400 to 1700. Topics include the interactions of class and ethnicity with women's experiences, the social construction of sexuality and gender, the misogynist tradition, and women's self-images. Same as GWS 245 and MDVL 245.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western
HIST 247  Medieval Europe  credit: 3 Hours.
From the fragmentation of the Roman Empire to the formation of territorial monarchies, this course surveys the events, innovations, crises, and movements that shaped western Europe in a pivotal era known as "the Middle Ages." Topics will include the spread of Christianity, the migration of peoples, fundamental changes in economic and social structures, the development of political institutions, the role of women, and the cultural achievements of different communities (the monastery, the town, the court). Same as MDVL 247.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 251  Warfare Milit Insts & Soc  credit: 3 Hours.
History of warfare and its relationship to changing technologies, tactics, and political structures, with an emphasis on the ways that military institutions are integrated with society as a whole. Same as GLBL 251.

HIST 252  The Holocaust  credit: 3 Hours.
Exploration of the Holocaust in historical perspective by examining European anti-Semitism, political developments in Germany, the rise to power of the Nazis, and the origins of the Holocaust with first-hand accounts, films, and historical texts, concluding with the legacy of the Holocaust in the contemporary world. Same as JS 252.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 253  Enlightenment to Existentialism  credit: 3 Hours.
Survey of the major authors, ideas, events, and styles in the cultural and intellectual history of Europe from the seventeenth to the mid-twentieth centuries, focusing on the intellectual traditions of France, Germany, and Great Britain.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 254  Vikings to Volvos: Scandinavia  credit: 3 Hours.
Same as SCAN 225. See SCAN 225.
This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

HIST 255  British Isles to 1688  credit: 3 Hours.
Survey of the political, social and economic, religious, and cultural history of the British people from the "prehistoric" era through the revolution of 1688. Same as MDVL 255.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 256  Britain and World Since 1688  credit: 3 Hours.
Historical survey of the British Isles and the British Empire since the late seventeenth century.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 257  Terrorism, Past and Present  credit: 3 Hours.
Explores the history of terrorism, its goals and practices. We recognize that it is not specific to any one ideology, religion, or people. Terrorism is political violence, psychological warfare meant to manipulate a large target audience. Same as GLBL 228.
This course satisfies the General Education Criteria for: Humanities - Hist Phil

HIST 258  20thC World to Midcentury  credit: 3 Hours.
Economic, social, political, and cultural developments in twentieth-century world history from late nineteenth-century to Second World War era.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 259  20thC World from Midcentury  credit: 3 Hours.
Economic, social, political, and cultural developments in twentieth-century world history from Second World War era to the present.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 260  History of Russia  credit: 3 Hours.
Main themes and problems of Russian history from earliest times to the present.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 261  Intro Russian-Jewish Culture  credit: 3 Hours.
Same as RUSS 261. See RUSS 261.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 262  US History of Medicine  credit: 3 Hours.
Medicine and public health from the colonial period through the twentieth century; health care providers, patients, and public policy; incorporates issues of race and sex. Same as GWS 263.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 264  Technology in Western Society  credit: 3 Hours.
Explores the role of technology as a transforming social force; examines innovations from the stirrup and heavy plow to the airplane and computer, that restructured economic and political life and realigned values; examines cultural representations of technology.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 265  Science in Western Civ  credit: 3 Hours.
Topics in the intellectual and social history of science in the West.
This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

HIST 266  The Darwinian Revolution  credit: 3 Hours.
The ideas of Charles Darwin initiated one of the most profound and provocative transformation in human thought, science, and culture. This course examines the intellectual origins, scientific content, and social, cultural, and religious impacts of Darwinian evolutionary theory in the 19th and 20th centuries, provides students with a historical case study in the development and diffusion of radical scientific ideas, and explores the origins of the most successful and comprehensive theory in the modern life sciences.
Cultural Studies - US Minority
Humanities - Hist Phil
This course satisfies the General Education Criteria for:
AFRO 275. Slavery, and the Afro-American in the Civil War and Reconstruction. Same as REL 269.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

HIST 270 United States History to 1815 credit: 3 Hours.
Social, economic, and political survey of the region and its relation to the evolving Atlantic community.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 271 Nineteenth Century America credit: 3 Hours.
History of the United States from 1815 to 1900.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 272 Twentieth Century America credit: 3 Hours.
One major emphasis on foreign policy, including the emergence of the United States as a great power after 1898; a second emphasis on the Progressive movement and recurrent attempts at the reform of American society; and racial and urban problems and the conservation of natural resources included.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 273 Illinois History credit: 3 Hours.
History of Chicago and Illinois from prehistoric times to the present, illustrating the jarring conflicts and great achievements of peoples from all over the world. Politics, economics, popular and high culture, education, mass media, racial problems, and ethnic diversity are especially featured. There is an emphasis on the relation of city, state, and region to one another.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 274 US & World Since 1917 credit: 3 Hours.
Over the course of the twentieth century the United States rose to superpower status, in the process profoundly shaping world affairs. Students will study the connections between U.S. and global history in this pivotal period. Explores the impact of the United States on world affairs from roughly 1917 through the end of the Cold War. Attention given to the perspectives of people affected by U.S. policies and the limits of U.S. power in the face of developments such as anticolonial nationalism and great power rivalries.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

HIST 275 Afro-American History to 1877 credit: 3 Hours.
History of Africans in the Americas, surveying the African slave trade, slavery in the European colonies of the Americas, early United States slavery, and the Afro-American in the Civil War and Reconstruction. Same as AFRO 275.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 276 Afro-American Hist Since 1877 credit: 3 Hours.
History of Afro-Americans in the age of white supremacy; the rise of modern protest organizations; the era of integration; and the black power movement. Same as AFRO 276.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 277 Encounters in Native America credit: 3 Hours.
An examination of pivotal events in the history of Native peoples in North America. Students will explore the complexity of encounters between American Indians and others through a focus on key moments. These will include religious encounters, military confrontations, and legal struggles as well as social and artistic interactions. Same as AIS 277.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 278 Native American History credit: 3 Hours.
A survey of the Native American experience in North America from the time of first contact to the present. The course will examine the dynamics and consequences of Native dispossession as well as the continuities in American Indian life and culture. Course materials will include writing and testimony by Native people as well as historical narratives, court decisions and government documents. Same as AIS 278.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 279 Mexican-American History credit: 3 Hours.
Same as LLS 279. See LLS 279.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 280 Caribbean Latina/o Migration credit: 3 Hours.
Study of the economic, political, and social forces which shaped migration, settlement, and community formation of Puerto Ricans, Cubans, and Dominicans living in the United States. Same as LLS 280.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 281 Constructing Race in America credit: 3 Hours.
Interdisciplinary examination of the historical, cultural, and social dimensions of race and ethnicity in the United States. Explores the complex and intricate pursuit of multiracial and multicultural democracy. Same as AAS 281, AFRO 281, and LLS 281.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 282 Nature and American Culture credit: 3 Hours.
Same as LA 242, NRES 242, and RST 242. See RST 242.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

HIST 283 Asian American History credit: 3 Hours.
Exploration of the migrations of peoples from the Asian continent into the United States, their attempts to build family and community, and their subsequent impact on American history. Same as AAS 283.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority
HIST 284  Af Am Urban Hist Since 1917  credit: 3 Hours.
Same as AFRO 290. See AFRO 290.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 285  US Gender History to 1877  credit: 3 Hours.
Traces the experiences of North American women and men from the earliest encounters between Europeans and Native Americans; examines gender systems in the colonies, under slavery, during industrialization and westward expansion; assesses impact of the Civil War and Reconstruction on gender roles; considers gendered division of labor in factories and domestic environments and construction of gender ideologies. Same as GWS 285.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

HIST 286  US Gender History Since 1877  credit: 3 Hours.
Examines the experiences of women and men in modern America, focusing on variations according to class, race, ethnicity, religion, region, and sexual preference; considers the impact of social movements on gender politics; gender and the wars of the 20th century; gender, reform, and social welfare policy; and the place of popular culture in the production of gender ideologies. Same as GWS 286.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

HIST 287  African-American Women  credit: 3 Hours.
Examines the history of African American women, beginning with the West African background during the transatlantic slave trading era, emphasizing the experiences of black women in the United States during slavery and their political, civic, community and reform activities from slavery to the present, analyzed within the context of racism, sexism, and economic deprivation. African women in the diaspora, and the impact of feminism/womanism, Afrocentrism, and multicultural diversity on the African American woman are considered. Same as AFRO 287 and GWS 287.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

HIST 288  American Indians of Illinois  credit: 3 Hours.
Same as ANTH 288 and AIS 288. See ANTH 288.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

HIST 289  History of Religion in America  credit: 3 Hours.
Same as REL 235. See REL 235.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

HIST 290  Religion, Violence & America  credit: 3 Hours.
Same as REL 236. See REL 236.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

HIST 291  History of the Bible  credit: 3 Hours.
Same as REL 203. See REL 203.

HIST 292  Latina/o Social Movements  credit: 3 Hours.
Same as LLS 238. See LLS 238.

HIST 295  Honors Colloquium  credit: 3 Hours.
Topics will vary. May be repeated. Prerequisite: Chancellor's Scholar or consent of department and director of Campus Honors Program.

HIST 300  Topics in Film and History  credit: 3 Hours.
Examines films as a significant medium of commentary on society and history. Explores the motives and careers of moviemakers, the ways in which films are influenced by their audiences, and how audiences' perception of historical processes are affected by films. Topics will vary. Same as MACS 300. May be repeated to a maximum of 6 hours if topics vary. Students may register in more than one section per term. May be repeated to a maximum of 6 hours.

HIST 305  Andean Countries of S America  credit: 3 Hours.
The history of Colombia, Ecuador, Peru, Bolivia, and Chile; emphasizes common problems and diverse responses, from European conquest in the sixteenth century to the struggles for development in the twentieth.

HIST 306  History of Central America  credit: 3 Hours.
Major themes of Central American history since conquest: the colonial regimes, ethnic diversity, the independence movement, fragmentation in the nineteenth century, export economies and imperialism, 1880-1932, social movements and populism in the twentieth century, revolution and intervention since the 1950s.

HIST 310  Global Capitalism in History  credit: 3 Hours.
Explores the historical relations between multinational corporations and host countries focusing on political and economic issues.

HIST 311  Global History of Intelligence  credit: 3 Hours.
Examines the role of both diplomatic and military intelligence in the political history of major global events and developments from the nineteenth century to the present day. Studies the histories of several major intelligence organizations, as well as the roles played by smaller and non-institutional actors in the global production of intelligence. Focuses on the interplay between intelligence, state policy, and information environments to understand not only the role intelligence played in major events, but also how intelligence practices shaped and reflected political cultures across the world.

HIST 314  Material Culture  credit: 3 Hours.
Historical and theoretical investigation of everyday objects, artifacts, structures, landscapes, built environments. Students will learn to question existing perceptions of material phenomena, will engage in the work of historicizing and contextualizing them, and will arrive at a more informed understanding of the ways that they influence, shape, and reflect human history.

HIST 315  Discovery, Tourism and Travel  credit: 3 Hours.
History of discovery, travel and tourism in Western history from classical antiquity to the present. Focus on two themes: first is the history of discovery, Greek adventures in the Mediterranean, European missionary trips to China, or modern European expansion into the Americas and the Pacific; second is the psychological and spiritual transformations that may accompany travel to foreign places. Pays special attention to how people from different cultures are able to communicate with each other and how travel writings document globalization in the nineteenth and twentieth century. Readings include original source material by travelers, fictional travel accounts, and narratives by recent historians. Also makes use of visual materials, cultural artifacts, and music as sources with much to teach us about travel encounters between cultures. Same as RST 312.

HIST 325  History of Korea  credit: 3 Hours.
Same as EALC 367. See EALC 367.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West
HIST 334  Modem Palestinian History credit: 3 Hours.
Examines the main themes of Palestinian history since 1800. The Israeli-Palestinian conflict frames the latter part of this history, but it is not the central issue. The focus of the course is Palestinian political, social, and cultural history.

HIST 335  Middle East 1566-1914 credit: 3 Hours.
Political, social, cultural, and ideological developments in Egypt, Arabia, the Fertile Crescent, Iran and Turkey from the mid 16th century to the eve of World War I. Premodern society and institutions, the question of "decline" and "awakening", encounters with Europe and self-strengthening reforms, relations between Muslims, Christians, and Jews, the role of women and the family, class formation, and religion and nationalism. Same as JS 335.

HIST 337  Middle East Since World War I credit: 3 Hours.
Political-economic, social and ideological developments in Egypt, Arabia, and Fertile Crescent (including Israel), Iran and Turkey since 1918 to the present, including U.S. involvement.

HIST 339  The Early Russian Empire credit: 3 Hours.
Introduction to one of the most transformative events in early modern world history: the creation of the Russian Empire. We will study how Moscow, a modest medieval kingdom, suddenly expanded into the world's largest state, fated to play an outsized role in world politics and culture. Chronologically, the course extends from 1500-1750, and considers topics ranging from religion and rebellion to material culture and everyday life.

HIST 342  Cultural Hist of Technoscience credit: 3 Hours.
Addresses the myriad ways American culture interacts with scientific and technological artifacts, practices, and knowledge. Some of the issues addressed are: how science and technology are deployed and used for cultural ends; how cultural beliefs and ideologies are "built" into science and technology; how the interaction of cultural experience, science, and technology shapes the built environment; how science and technology privilege certain cultural communities in America. Course requirements include participation, leadership in class discussions, as well as a research project.

HIST 343  Technology & Sport credit: 3 Hours.
Traditionally sport has been a competition between humans or humans and nature. Recent technological developments have altered this arrangement. Now technology is a continued component of sport and has changed modes of play. Examines the history of the evolving relationships between contemporary sport, emerging technology, and cultural experience. The fundamental question this course will address is: how has technology, in its multiple forms, reshaped sport? Same as RST 357.

HIST 345  Medieval Civilization credit: 3 Hours.
The architectural, artistic, philosophical, political, and religious components of medieval culture, thought, and patterns of behavior; includes monasticism and society and the individual. Same as MDVL 345 and REL 345.

HIST 346  The Age of the Renaissance credit: 3 Hours.
An introduction to the cultural history of Europe in the fifteenth and sixteenth centuries, embracing the Renaissance movements in Italy and in Northern Europe. Same as MDVL 346 and REL 346.

HIST 347  Protestant & Catholic Refs credit: 3 Hours.
New sources of secular power and spiritual authority define the age of the Protestant and Catholic Reformations. In this advanced European history course students expand their knowledge of the people, events, and ideas of the fifteenth and sixteenth centuries while deepening their understanding of a wide range of primary sources created by theologians and peasants, nuns and monarchs, and artists and rebels. Key works by Luther, Calvin, and Loyola are placed in their intellectual and social contexts. Same as REL 347.

HIST 348  Early Euro Absolut & Expansion credit: 3 Hours.
In the seventeenth and eighteenth centuries Europeans transformed political relations within Europe and their economic relationships with the wider world. This course examines continuities and change from 1600 to 1789, following the themes of authority and power. Topics include the rise of "absolute monarchy" and its alternatives in countries like, England and the Netherlands, as well as European trade and consumption, popular culture, the family, food, clothing, sexuality, and labor.

HIST 349  Age of Revolution, 1775-1815 credit: 3 Hours.
Comparative survey of domestic upheavals in the North Atlantic world: America, Haiti, England, Prussia, and France; the rise of Napoleon and the response of Europe; and the fate of innovation and reform in the immediate aftermath.

HIST 350  19thC Romanticism & Politics credit: 3 Hours.
Among the topics of this course will be Romanticism, which is still the basic form of modern culture today, with its emphasis on feeling, imagination, and self-expression; the nation-state, a new form of political organization; and the creation of a globalized world for the first time in human history.

HIST 352  Europe in the World credit: 3 Hours.
Colonial encounters between Europe and today's Third World viewed in comparative historical perspective. Equal emphasis placed on (colonizing) Europe and colonial experience of Asia, Africa, and South America.

HIST 353  European History 1918 to 1939 credit: 3 Hours.
Survey of European society from 1918 to 1939, with emphasis on the impact of World War I, the Russian Revolution, fascism, and the intellectual trends of the twenties and thirties.

HIST 354  Twentieth Century Europe credit: 3 Hours.
Cultural history of Europe in an age of global warfare and political, social, and economic upheaval.

HIST 355  Soviet Jewish History credit: 3 Hours.
An examination of how Jewish life and culture contributed to the creation of the world's first socialist society. Makes use of primary sources, scholarly essays and monographs, archival documents, literature, memoirs, film, and visual culture as a way of introducing students to Soviet Jewish History, from the reign of the last tsar, Nicholas II, to the dissolution of the Soviet Union in 1991. Special topics to be examined include: the breakup of the Pale of Settlement during the Great War; the role of Jews in revolution and revolutionary culture; Soviet nationality policy; shtetl culture; antisemitism; everyday life; the purges of the 1930s; the Jewish experience in World War II; the Holocaust; and mass emigration.

HIST 357  Modern France credit: 3 Hours.
The development of modern France, with special attention to social and cultural phenomena.
HIST 360  European Culture in a Global Context  credit: 3 Hours.
Railways, steamships, telegraph, quinine, machine guns: these were
some of the European innovations that created a unified world between
1850 and 1914. The transforming force of new technologies, global
commerce and Western imperialism also had a profound impact on
the arts. We will study this globalization of culture in world spectacles, the
visual arts, music, and literature.

HIST 361  Euro Thght & Soc Since 1789  credit: 3 Hours.
Examines the reciprocal relationship between thought and society in
western Europe from the French Revolution to the present.

HIST 362  Spain and Portugal to 1808  credit: 3 Hours.
Introduction to the history of the Iberian peninsula to 1808. After a brief
overview of Roman and Visigoth Iberia, the course will study the cultural,
technological, and intellectual accomplishments of Moorish Iberia and
the imperial expansion of Christian Spain and Portugal in the early
modern period.

HIST 365  Fict & Historical Imagination  credit: 3 Hours.
Explores the relationship between history and fiction by focusing on
specific cultural locations.

HIST 367  History of Western Medicine  credit: 3 Hours.
Rise and development of medicine in the West since the sixteenth
century; interrelations of physiology, pathology, and social demands
with the theory and practice of medicine; pattern of professionalization;
social role of the physician; conflict among ideas of medicine as an art,
a science, and a social service; and problems of mental illness, medical
ethics, and nontraditional forms of practice.

HIST 369  Spain and Portugal from 1808  credit: 3 Hours.
A modern history of Spain and Portugal.

HIST 370  Colonial America  credit: 3 Hours.
An interpretive survey of American colonial history from 1492 through
1763. Themes include encounters between Natives and Europeans
in the New World, contests for colonization, settler societies and the
development of various colonial social patterns in North America and
the Caribbean, the beginnings of slavery, and the gradual emergence
of distinctive provincial cultures in the North American colonies of the
British Empire. Throughout all of this, there is an examination of colonial
American history as part of the larger Atlantic World, understanding early
American history as a process of exchange and interaction which included
Europe, Africa, the Caribbean, and North America.

HIST 371  The American Revolution  credit: 3 Hours.
Examines the momentous founding age of United States history.
Explores the growing estrangement of the American colonies from
Great Britain and the culmination of this process in the Declaration
of Independence. It then examines the controversial process of creating a
new nation, and the government of the United States. Intense focus on
primary source materials from the period.

HIST 372  America's Republic, 1780-1880  credit: 3 Hours.
A study of political life in the U.S. during the century following the
Revolution. The course covers the appearance and evolution of
republican government, the Constitution, the expansion of voting rights,
the rise and fall of political parties, and the relationship of all these things
to the development of economic and social relationships.

HIST 373  Origins of the Civil War  credit: 3 Hours.
Examination of changes in economic, social, cultural, and political life in
the United States that ultimately plunged the national into the bloodiest
and most important war in its history. Particular attention is paid to
the way in which diverse segments of the country's population - North and
South, urban and rural, rich and poor, slave and free, black and white,
male and female - affected and were affected by these changes.

HIST 374  Civil War and Reconstruction  credit: 3 Hours.
The United States' civil war (1861-1865) and the years of postwar
"reconstruction" (conventionally dated as 1865-1877). During this period
as a whole, the nation underwent its second revolution -- a revolution
more radical in its impact than the one that freed it from the British
Empire. Much about U.S. history for the next century and more was
decided during these critical years.

HIST 375  Soc History Indus Am to 1918  credit: 3 Hours.
The impact of industrialization, immigration, and urbanization on
American society to the end of World War I.

HIST 376  Soc History Indus Am from 1918  credit: 3 Hours.
Study of the impact of industrial technology, business enterprise,
immigration, and urbanization on American society.

HIST 377  United States since 1932  credit: 3 Hours.
Discusses the New Deal, the Cold War, Franklin D. Roosevelt and
subsequent presidents, the structure of American imperialism, and
America's role in world politics.

HIST 379  Latina/os and the City  credit: 3 Hours.
Same as LLS 379. See LLS 379.

HIST 380  US in an Age of Empire  credit: 3 Hours.
Study of the imperial dimensions of U.S. history from about 1877 to 1920.
This was an era marked by an imperial world system, unprecedented
levels of international trade and investments, massive labor migrations,
significant missionary endeavors, and consolidation of U.S. power over
Native Americans, and growing U.S. political and military assertion in
the international arena. Considers how the United States and its peoples
positioned themselves in an international context by investigating not
only government policies but also commercial endeavors and cultural
practices.

HIST 381  Urban History  credit: 3 Hours.
Examines the history of urban centers, paying special attention to
the relationship between the city and its surrounding territory, the
impact of migration and immigration, the delineation of space and
the transformation of the built environment, and the role of a city's
inhabitants in creating social networks, political structures, and cultural
institutions. May be repeated in separate terms to a maximum of 6 hours
if topics vary.

HIST 382  Race and Migration in Chicago  credit: 3 Hours.
Same as LLS 382. See LLS 382.

HIST 383  Hist of Blk Women's Activism  credit: 3 Hours.
Same as AFRO 383 and GWS 383. See AFRO 383.

HIST 384  Class Politics & Blk Community  credit: 3 Hours.
Same as AFRO 372. See AFRO 372.
This course satisfies the General Education Criteria for:
Advanced Composition

HIST 385  Transnational Sexualities  credit: 3 Hours.
Same as GWS 385. See GWS 385.
**HIST 386** Public History  
Credit: 3 Hours.  
An examination of major genres historians have employed to present history in the public arena, including documentary films, public memorials, legal testimony and museum exhibits. Students will explore both the social dynamics of public commemoration and the techniques historians employ when communicating complex ideas and events to a general audience.

**HIST 387** History of Sexuality in U.S.  
Credit: 3 Hours.  
Same as GWS 387. See GWS 387.

**HIST 389** Race and Revolutions  
Credit: 3 Hours.  
Same as AFRO 378. See AFRO 378.

**HIST 390** Sport and Society  
Credit: 3 Hours.  
In various societies, organized sport has operated as site of nation-building, the struggle for inclusion, and indicator of societal advancement. Examines the history of the roles that sport has played in society through a series of topical foci, as selected by the professor each semester. Course readings revisit popular and scholarly debates about sport and discuss the different actors and social forces that shaped those discussions. Same as KIN 345. May be repeated in separate terms to a maximum of 6 hours if topics vary.

**HIST 391** Oral History Methods  
Credit: 3 Hours.  
Introduces students to the ethical discourses and practical methods in oral history. Its primary purpose is to prepare students with oral and archival research skills that are crucial for the examination of the history and memory of communities. Among the questions that the class will consider are: what is the connection between the historical record and the remembered past? How reliable are these memories and does reliability matter? How do people mobilize and manipulate accounts of the past for purposes of community building, historic preservation, and political development? Same as LLS 391.

**HIST 392** The 1960s in the U.S.  
Credit: 3 Hours.  
A study of the history of the 1960s, a tumultuous decade in the social and political history of the United States. The class has two main goals: 1) Provide a solid knowledge of the history of this period and its social and economic developments. 2) Develop skills as an analytic reader and writer in U.S. history.

**HIST 393** The World of Jewish Sepharad  
Credit: 3 Hours.  
Same as ANTH 393 and REL 393. See ANTH 393.  
This course satisfies the General Education Criteria for: Humanities - Hist Phil  
Cultural Studies - Western

**HIST 395** Topics in Law and Society  
Credit: 3 Hours.  
Topics and problems in the history of laws, legal institutions, jurisprudence, concepts of justice, and their role(s) in shaping societies over time. Specific readings and foci will vary. May be repeated in the same or separate terms for a maximum of 6 hours if topics vary.

**HIST 396** Special Topics  
Credit: 3 Hours.  
Topics are given on an experimental one-time-only basis. May be repeated if topics vary.

**HIST 397** Sexuality in Modern Europe  
Credit: 3 Hours.  
What is sexuality? How is it practiced, policed, represented, liberated and controlled? How do religion, the state, the law and the media influence sexual identities and practices? Focusing on modern Europe, we will examine the history of sexuality from the late eighteenth century to the present in order to explore how historians have answered these questions. We will investigate topics from pornography, prostitution, sex and totalitarianism, queer sexualities, sex and colonialism, and masturbation, to sex education, sexual surveys, and AIDS. Same as GWS 397.

**HIST 398** Internship in Public History  
Credit: 1 to 3 Hours.  
With a faculty sponsor, a qualified students will develop a program of study or research related to an internship or other relevant employment opportunity. Consult departmental undergraduate advisor or Director of Undergraduate Studies. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of faculty sponsor and Director of Undergraduate Studies required.

**HIST 399** Independent Study  
Credit: 1 to 3 Hours.  
Readings in selected fields in consultation with the instructor resulting in a 20-30 page paper. May be repeated with permission of the Director of Undergraduate Studies. Prerequisite: Junior or senior standing pursuing a History major; written consent of instructor and History undergraduate advisor required.

**HIST 400** War, Soc, Politics, & Culture  
Credit: 2 to 4 Hours.  
Topics will be listed in the department's course guide at http://www.history.illinois.edu.  
3 undergraduate hours. 2 to 4 graduate hours.  
May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours in the same or subsequent terms if topics vary.

**HIST 401** History of Terrorism  
Credit: 3 or 4 Hours.  
Historical examination of strategies of terror, their relationship to conventional warfare, and their political, social, cultural, and religious contexts. 3 undergraduate hours. 4 graduate hours.

**HIST 405** History of Mexico from 1519  
Credit: 2 to 4 Hours.  
Problems of a neocolonial society; themes include family structure, slavery, imperialism, modernization, and the crisis of traditional institutions. 3 undergraduate hours. 2 or 4 graduate hours.

**HIST 406** History of Mexico from 1808  
Credit: 2 to 4 Hours.  
Development of Mexico from the conquest to the postrevolutionary present. 3 undergraduate hours. 2 or 4 graduate hours.

**HIST 407** Slavery & Race in Latin Am  
Credit: 2 to 4 Hours.  
Selected topics on Indians and Spaniards, whites and blacks, emphasizing Mexico, the Caribbean, and Brazil. Same as AFRO 407. 3 undergraduate hours. 2 or 4 graduate hours.

**HIST 410** Decolonization in Africa  
Credit: 3 or 4 Hours.  
Almost all African countries fell under European colonial rule by the beginning of the 20th century, but formal colonialism did not last the century. Surveys the crucial ideological, political, social, and military strategies enlisted by African people and movements to shed colonial rule. Also examines the paradox of the coupling of "flag independence" with continuing economic dependence on Europe. 3 undergraduate hours. 4 graduate hours.

<td>Examination of the political, social, economic, military, institutional, religious and cultural development of the early Byzantine Empire from the reign of Diocletian (AD 284-305) through the Heraclean Dynasty (AD 610-717). Same as MDVL 443. 3 undergraduate hours. 4 graduate hours.</td>
</tr>
<tr>
<td>HIST 444</td>
<td>European Education to 1600</td>
<td>2 to 4 Hours</td>
<td>Same as EPS 403 and MDVL 403. See EPS 403. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil Cultural Studies - Western</td>
</tr>
<tr>
<td>HIST 445</td>
<td>Medieval England</td>
<td>2 to 4 Hours</td>
<td>Key sources and topics of English history, from the end of Roman rule in Britain (c. 410) to the fifteenth century. Recurrent themes include the development of law, the role of women, the status of commons, intellectual trends, and the importance of public media for the dissemination of ideas (writing, performance). Same as MDVL 444. 3 undergraduate hours. 2 or 4 graduate hours.</td>
</tr>
<tr>
<td>HIST 446</td>
<td>Early Modern British Isles</td>
<td>2 to 4 Hours</td>
<td>Social, economic, cultural and political history of the &quot;four Kingdoms&quot; of England, Scotland, Wales, and Ireland between 1450 and 1800. Covers the Tudor and Stuart dynasties, Shakespeare, the English Civil War, the development of British colonial holdings across the globe, and the effects of empire at home. 3 undergraduate hours. 2 or 4 graduate hours.</td>
</tr>
</tbody>
</table>
HIST 448  Modern Britain  credit: 2 to 4 Hours.
History of modern Britain's social, economic, cultural and political life with a special emphasis on the role of empire in shaping its career as a global power and its "domestic" national culture at home. 3 undergraduate hours. 2 or 4 graduate hours.

HIST 449  British Imperialism  credit: 2 to 4 Hours.
Thematic approach to Britain's role as an imperial power, its impact on global issues and affairs, and the effect of colonies and colonial peoples on the history of its development as a Western "nation". 3 undergraduate hours. 2 or 4 graduate hours.

HIST 450  European Working Class History  credit: 2 to 4 Hours.
Comparative study of the rise of the working class in European countries; formation, culture, and daily life; stratification within the working class; workers in organized labor and revolutionary movements. Same as LER 450 and SOC 422. 3 undergraduate hours. 2 or 4 graduate hours.

HIST 456  Twentieth-Century Germany  credit: 3 or 4 Hours.
Political upheavals of twentieth-century Germany; topics include the First World War's impact on German society, the war's revolutionary aftermath, the political struggles and cultural achievements of the Weimar Republic, the rise of Hitler, the Third Reich, the Holocaust, the Second World War, and the divided postwar Germanies; novels and films complement readings. 3 undergraduate hours. 4 graduate hours.

HIST 457  European Education since 1600  credit: 2 to 4 Hours.
Same as EPS 404. See EPS 404. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil Cultural Studies - Western

HIST 458  Christians and Jews 1099-1789  credit: 3 or 4 Hours.
Same as REL 458. See REL 458.

HIST 459  Postcolonial/Queer  credit: 3 or 4 Hours.
Same as GWS 459. See GWS 459.

HIST 461  Russia- Peter the Great to Rev  credit: 2 to 4 Hours.
Culture, society, and politics in Imperial Russia, focusing on power and resistance, the lives and culture of ordinary Russians, and competing ideas about the state, the individual, community, nation, religion, and morality. 3 undergraduate hours. 2 or 4 graduate hours. For higher credit, graduate students will be required to do more reading and to write an additional paper.

HIST 462  Soviet Union Since 1917  credit: 2 to 4 Hours.
Political, social, and economic development of the USSR since the 1917 revolutions that brought the Bolsheviks to power; social change and social engineering; political struggles among Stalin and his rivals; the “Stalin revolution” from above and economic modernization; the USSR's emergence through World War II and the Cold War as a world power; “developed socialist” society. 3 undergraduate hours. 2 or 4 graduate hours. Graduate students will write an additional substantial paper and engage in special discussion sections.

HIST 463  The Modern Balkans through Literature and Film  credit: 3 or 4 Hours.
History of the creation and development of the independent Balkan states during the 19th and 20th centuries. Special attention is given to Balkan nationalism, its roots, evolution and various manifestations. Other topics cover the modernization of the rural societies, ethnic conflict and/or accommodation, inter-Balkan relations, and the role of the great powers. Finally, a close look will be taken on contemporary developments in the Balkans, especially the Yugoslav crisis, the fall of communism and post-communist development. By discussing fictional work and films by Balkan authors, students will be introduced to the intellectual production of the region. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior or Senior standing, or consent of instructor.

HIST 466  The Balkans  credit: 3 or 4 Hours.
The political, economic, and cultural history of this region's peoples, including the Rumanians, South Slavs, Greeks, and Albanians; the impact of Ottoman rule; the rise of nationalism and the formation of national states; and the Orthodox Church. 3 undergraduate hours. 4 graduate hours.

HIST 467  Eastern Europe  credit: 3 or 4 Hours.
The political, economic, and cultural history of Poland, Czechoslovakia, Hungary, Rumania, Yugoslavia, Bulgaria, Greece, and Albania; particular emphasis upon the post-World War II era. 3 undergraduate hours. 4 graduate hours.

HIST 468  Locating Queer Culture  credit: 3 Hours.
Same as GWS 467. See GWS 467.

HIST 470  Plantation Soc in Americas  credit: 3 or 4 Hours.
Same as AFRO 453. See AFRO 453.

HIST 472  Immigrant America  credit: 3 or 4 Hours.
History of immigration and immigrant groups in the United States from 1830 to 1980. Covers major waves of immigration and focuses on the diverse cultural heritage, social structure, and political activism of immigrants from Europe, the Americas, and Asia. 3 undergraduate hours. 4 graduate hours.

HIST 473  Crises of Political Tolerance  credit: 2 to 4 Hours.
Investigates the character of American political tolerance and freedom in times of crisis, through a series of case studies: images of the American "enemy"; the Red Scare after World War I; the internment of Japanese-Americans in World War II; McCarthyism; and the resentments generated by protest movements in the late 1960's. 3 undergraduate hours. 2 or 4 graduate hours.

HIST 475  Formation of US Public Health  credit: 3 or 4 Hours.
Introduction to the history of American public health and health policy. Emergence of modern public-health institutions in America; relation of public health to conceptions of disease, social order, and the role of government; emergence and development of public policy issues in public health and medical care, of the environment for the formulation of policy, and the relation of policy to broader issues of social development, incidence of disease, and assumptions about the proper distribution of public and private responsibility. 3 undergraduate hours. 4 graduate hours.

HIST 476  History of the American West  credit: 3 or 4 Hours.
Examines the changing image of the American West by focusing on the process of conquest and resistance present within the region's history. Same as LLS 475. 3 undergraduate hours. 4 graduate hours.
HIST 478  Black Freed Move, 1955-Present  credit: 3 or 4 Hours.
Same as AFRO 474. See AFRO 474.
This course satisfies the General Education Criteria for:
Advanced Composition

HIST 479  19thC US Intel & Cultr Hist  credit: 2 to 4 Hours.
Examines diverse strains of cultural and intellectual life in the US from
the early Republic through the 1890s. Emphasizes popular culture,
religious revivalism, educational institutions, reform movements, art,
science, and literature and the roles of cultural elites, women, working-
classes, African Americans, Native Americans and immigrants in shaping
national, regional and local cultures. Same as REL 478. 3 undergraduate
hours. 2 or 4 graduate hours.

HIST 480  US Work Class Hist Since 1780  credit: 2 to 4 Hours.
Focuses on working class formation, culture, ideas, and organization;
examines daily experience of work and community life; special emphasis
on race, ethnicity, and gender in the process of class formation; labor
relations and the changing patterns of working class protest and
accommodation. Same as LER 480. 3 undergraduate hours. 2 or 4
graduate hours.

HIST 481  20th Century US Culture Wars  credit: 2 to 4 Hours.
What ideas does "American Culture" include? How does it incorporate
diverse religious traditions as well as new scientific perspectives? How
are ethnicity, gender and race important? Topics of current "cultural
wars", these and other questions about cultural conflict in the US have
been hotly debated for over a century. This course explores such culture
wars in the 20th century US and helps students evaluate contested
cultural concepts they have produced, including pragmatism, pluralism,
religious diversity, scientific objectivity, economic equality, as well as
"popular," "high" and "democratic" culture. Same as REL 479. 3
undergraduate hours. 2 or 4 graduate hours.

HIST 482  Slavery in the United States  credit: 3 or 4 Hours.
Same as AFRO 460. See AFRO 460.
This course satisfies the General Education Criteria for:
Advanced Composition

HIST 483  Race, Science, and Medicine  credit: 3 or 4 Hours.
Same as AFRO 466. See AFRO 466.

HIST 486  Revivalism and Evangelicalism  credit: 3 or 4 Hours.
Same as REL 435. See REL 435.

HIST 487  Great Books in History  credit: 3 or 4 Hours.
An approach to History through a selection of prize-winning, influential,
and lasting books, the point being to consider the role of the book
in History and its relation to other forms of historical interpretation,
including essays, web sites, films, lectures, and exhibits. It will hone
students' composition abilities through careful attention to writing, craft,
and genre. Each iteration of this course will focus on a particular theme.
3 undergraduate hours. 4 graduate hours. May be repeated as topics vary
to a maximum of 6 undergraduate hours or 8 graduate hours.

HIST 490  Honors Independent Study  credit: 3 Hours.
Independent reading, research, and writing under the supervision of an
individual instructor. Seniors in the History Honors Program taking this
course in place of the Honors Senior Thesis must complete a substantive
research paper (25-30 pages). No graduate credit. May be repeated to a
maximum of 6 hours. Each 3-hour class must be taken with a different
instructor. Prerequisite: Admission to the History Honors Program; or
junior or senior of high standing with the consent of the Director of
Undergraduate Studies.

HIST 491  Directed Research in Digital History  credit: 1 to 4 Hours.
Advanced projects in Digital History undertaken with a faculty supervisor.
1 to 3 undergraduate hours. 1 to 4 graduate hours. Approved for Letter
and S/U grading. May be repeated in separate terms to a maximum of
6 undergraduate hours or 4 graduate hours. Prerequisite: Consent of
sponsoring faculty supervisor and Director of Undergraduate Studies or
Director of Graduate Studies required for all students.

HIST 492  Historiography and Methodology  credit: 3 Hours.
A seminar for all students in the History Honors Program, to be taken
no later than the spring of the Junior year. Students will study the
development of the historian's craft and will be exposed to new research
methods and techniques. The course will culminate in the preparation
of a research proposal for the Honors Senior Thesis, developed in
consultation with an individual faculty advisor. The instructor of HIST 492
and the Director of Undergraduate Studies will assist students in the
selection of an appropriate mentor. Even those students who may not be
planning to write the Honors Senior Thesis must enroll in this course and
prepare a research proposal. 3 undergraduate hours. No graduate credit.
Prerequisite: Admission to the History Honors Program or consent of the
Director of Undergraduate Studies.

This course satisfies the General Education Criteria for:
Advanced Composition

HIST 493  Honors Senior Thesis  credit: 3 Hours.
Two-term independent research and writing project under the supervision
of a faculty advisor. Students enrolled in this course must submit a
completed Honors Senior Thesis at the end of the second term, for
evaluation by the faculty advisor and a second reader. 3 undergraduate
hours. No graduate credit. Must be repeated for a total of 6 hours.
Students will receive separate grades for each semester's work.
Prerequisite: Admission to the History Honors Program and consent of
supervising professor; HIST 492 and HIST 495; concurrent enrollment in
HIST 499 is required.

HIST 495  Honors Research & Writing Sem  credit: 3 Hours.
A topic-specific course required of all students in the History Honors
Program, and meeting with HIST 498. Each student's work will be
evaluated and graded by the instructor of the HIST 498. In addition,
students will complete a self-assessment exercise supervised by the
Director of Undergraduate Studies. 3 undergraduate hours. No graduate
credit. May be repeated to a maximum of 6 hours. Prerequisite: HIST 200
and admission to the History Honors Program.

This course satisfies the General Education Criteria for:
Advanced Composition

HIST 497  History of Historiography  credit: 2 to 4 Hours.
An exploration of the different approaches to the conceptualization and
narration of history in various times and places, with special emphasis on
the social, cultural, and political role(s) of the historian. 3 undergraduate
hours. 2 or 4 graduate hours.

HIST 498  Research and Writing Seminar  credit: 3 Hours.
Capstone course required of all majors. Students will make history by
researching and writing a work of original scholarship. Several of these
seminars are offered each term and each focuses on a special topic,
thus allowing students with similar interests to work through the process
of gathering, interpreting, and organizing historical evidence under the
direction of an expert in the field. The topics on offer each semester
will be listed in the Class Schedule and described in the department's
course guide at http://www.history.illinois.edu. 3 undergraduate hours.
No graduate credit. May be repeated to a maximum of 6 hours.

This course satisfies the General Education Criteria for:
Advanced Composition
HIST 499  Thesis Seminar  credit: 1 to 2 Hours.
A required seminar for all seniors writing Honor Theses in history, this
course will meet throughout the year and will supplement individual
students' meetings with their primary advisors. Provides an intellectually
supportive environment in which students work together on common
methodological problems, share the results of their research, and critique
developing projects. 1 to 2 undergraduate hours. 1 to 2 graduate hours.
Approved for S/U grading only. May be repeated in separate terms to
a maximum of 3 hours. Prerequisite: Admission to the History Honors
Program; HIST 492; and HIST 495. Concurrent enrollment in HIST 493 is
required.

HIST 502  Prob in Comparative History  credit: 4 Hours.
Intensive comparative examinations of particular issues in the histories
of multiple countries, cultures or periods; emphasizes methodology,
the discipline of comparative history, and the nature of historiography
in a cross-cultural and interdisciplinary context. May be repeated to a
maximum of 12 hours.

HIST 503  Prob in Comp Women's Hist  credit: 4 Hours.
Examines major works in global women's history from about 1700 to
1950. Introduces students to major themes in women's history as well as
major historiographical debates. Topics will be listed in the department's
course guide at http://www.history.illinois.edu. Same as GWS 501. May
be repeated to a maximum of 12 hours if topics vary.

HIST 504  Seminar in History of Science  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 505  Seminar in History of Medicine  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 507  Prob in Latin American Hist  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 508  Seminar in Latin American Hist  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 510  Problems in African History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. Same as AFST 510. May be repeated to a
maximum of 12 hours if topics vary.

HIST 511  Seminar in African History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. Same as AFST 511. May be repeated to a
maximum of 12 hours if topics vary. Prerequisite: One upper-level African
history course.

HIST 519  Colonialism & Postcolonialism  credit: 4 Hours.
Same as ANTH 504. See ANTH 504.

HIST 520  Problems in Chinese History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. Same as EALC 520. May be repeated to a
maximum of 12 hours if topics vary.

HIST 521  Seminar in Chinese History  credit: 4 Hours.
Research seminar in Chinese history designed to provide training to
graduate students in research skills with an emphasis on the use of
source materials in Chinese language. Same as EALC 522. May be
repeated to a maximum of 8 graduate hours. Prerequisite: Proficiency in
written Classical or Modern Chinese, EALC 500 for EALC graduate
students, and HIST 520 for History graduate students, or the consent of
instructor.

HIST 526  Problems in Japanese History  credit: 4 Hours.
Period covered will alternate between the Early Modern (1550 - 1850) and
Modern (1850 - present) eras. Same as EALC 526. May be repeated to a
maximum of 8 hours.

HIST 527  Seminar in Japanese History  credit: 4 Hours.
Period covered will alternate between the Early Modern (1550 - 1850)
and Modern (1850 - present) eras. Same as EALC 527. May be repeated
to a maximum of 8 hours if topics vary. Prerequisite: Graduate standing
in HIST, EALC, or other related discipline and reading knowledge of
Japanese, or consent of instructor.

HIST 535  Prob Middle Eastern History  credit: 4 Hours.
Covers, in depth, major problems of specific periods and areas and the
relevant literature of Near and Middle Eastern History, which will vary
from term to term. May be repeated to a maximum of 8 hours if topics vary.

HIST 536  Seminar in Middle Eastern Hist  credit: 4 Hours.
Investigates research topics in Near and Middle Eastern history in
accordance with students' needs. Topics may vary from term to term.
Students will prepare oral and written reports. May be repeated to a
maximum of 8 hours.

HIST 542  Problems in Medieval History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. Same as MDVL 542. May be repeated to a
maximum of 12 hours if topics vary.

HIST 543  Seminar in Medieval History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. Same as MDVL 543. May be repeated to a
maximum of 12 hours if topics vary.

HIST 545  Seminar in Early Modern Europe  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 546  Prob English Hist Since 1688  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 549  Sem Eng & Brit Emp Since 1688  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 550  Prob Early Mod European Hist  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
www.history.illinois.edu. May be repeated to a maximum of 12 hours if
topics vary.

HIST 551  Prob European Hist Since 1789  credit: 4 Hours.
Topics will be listed in the department's course guide at http://
history.illinois.edu. May be repeated in the same or subsequent terms as
topics vary.
HIST 552  European Seminar Since 1789  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 560  Problems in Russian History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 561  Seminar in Russian History  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 570  Prob in American Hist to 1830  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 571  Seminar in Amer Hist to 1789  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 572  Prob in US Hist Since 1815  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated in the same or subsequent terms as topics vary.

HIST 573  Seminar Amer Hist Since 1789  credit: 4 Hours.
Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 574  Historiography of Religion in America  credit: 4 Hours.
Same as REL 535. See REL 535.

HIST 575  Problems African American Hist  credit: 4 Hours.
Covers in depth, major problems in the African American experience and in the historiography of that experience, including historical periods, themes and paradigms. Same as AFRO 501. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours.

HIST 591  History and Social Theory  credit: 4 Hours.
Introduces recent historical work drawing upon theories and concepts from the social sciences; considers fields of inquiry which include family history, demographic history, labor history, prosopographical and entrepreneurial studies, local and regional studies, and others.

HIST 593  Approaches to History  credit: 4 Hours.
Required course for entering history graduate students offering in initial foray into historiography, methods, and conceptual approaches for students in all fields. Provides experience dealing with three challenges that face all practitioners of the discipline: identifying the historical problem to be tackled, deciding what methodologies are best suited to that problem, and locating and then making use of the primary sources necessary for analyzing the subject at hand. Assigned materials, class discussions, and assignments will prepare students for the second semester required research seminar. Restricted to first-year graduate students in history.

HIST 594  Intro Historical Writing  credit: 4 Hours.
Seminar for first-year graduate students and is the second half of the introductory graduate sequence. Focuses on the process of writing an original piece of historical scholarship. Topics to be discussed include: developing an argument, exploring sources, arriving at a research strategy, planning and structuring an article, presenting complex data, and producing scholarship that is a coherent representation of an author's perspective on the past. Over the course of the semester, each seminar participant will develop and write an original, article length research paper. Students will work with the assistance of the instructors and an advisor from her or his own research field. Prerequisite: HIST 593.

HIST 596  Individual Research Project  credit: 4 Hours.
Directed research in special fields; may be taken in lieu of seminars in fields in which seminars are seldom offered. Topics will be listed in the department's course guide at http://www.history.illinois.edu. May be repeated to a maximum of 12 hours if topics vary.

HIST 597  Reading Course  credit: 0 to 4 Hours.
Directed readings in special fields. Primarily, but not exclusively, for students with a master's degree or equivalent, who are preparing for the preliminary examination in history and who need instruction in areas not provided by current course offerings. Approved for letter and S/U grading. May be repeated in the same or subsequent terms as topics vary. Prerequisite: Consent of instructor.

HIST 598  Teaching of College History  credit: 2 Hours.
Approved for S/U grading only. May be repeated. Prerequisite: Candidate for Ph.D. degree in history.

HIST 599  Thesis Research  credit: 0 to 16 Hours.
Individual direction in research and guidance in writing theses for advanced degrees. Approved for S/U grading only. May be repeated.

Horticulture (HORT)

HORT Class Schedule (https://courses.illinois.edu/schedule(DEFAULT/DEFAULT/HORT)

Courses

HORT 100  Introduction to Horticulture  credit: 3 Hours.
Basic principles of plant growth and development as they apply to the production, marketing, and utilization of fruits, vegetables, and ornamental plants.

HORT 105  Vegetable Gardening  credit: 3 Hours.
The science and art of growing vegetables and the connection between gardening and food. Topics include nutrient and pest management, history, folklore, growing requirements, and quality characteristics of vegetables. Lecture and laboratory. Additional fees may apply. See Class Schedule. Credit is not given to horticulture majors.

HORT 106  The Sustainable Home Garden  credit: 3 Hours.
Create inviting and sustainable indoor and outdoor living spaces with plants, whether your landscape is several acres or a few containers on an urban balcony. This blended-format class meets 1 hour per week for lecture and discussion with additional instruction presented through independent learning activities including virtual field trips, on-line lectures, and instructional videos. Learn the fundamentals of environmentally sound resource use when designing with and maintaining flowering, fruit and vegetable plants, lawns, trees and shrubs around your home. Become a savvy horticultural consumer and develop a healthy lifestyle that supports positive physical and mental well-being by including greenspace activities in your daily life. Prerequisite: Not open to students in the Horticulture curriculum.
HORT 107 Introduction to Floral Design credit: 2 Hours.
Introduces the art of arranging flowers, foliages, and accessories according to the principles of design. Additional fees may apply. See Class Schedule.

HORT 180 Medicinal Plants and Herbology credit: 3 Hours.
The use of cultivated and wild plants in medicines and health products according to Eastern and Western medical traditions. Consideration of herbal medicine use from ancient times to the present, important medicinal chemicals produced by plants, and the evaluation of plant chemical products as potential human medicines. Same as CPSC 180.

HORT 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Experimental course on a special topic in horticulture. Topic may not be repeated except in accordance with the Code. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.

HORT 205 Local Food Networks credit: 3 Hours.
Prepares students to be leaders and facilitators in local food networks. The focus is on providing the knowledge and skills to initiate and manage community food gardens, school gardens and curricula, institutional buying programs, farmers markets, community supported agriculture, and urban farm networks. Requires a group food network project and an experience with a local food organization. Prerequisite: An introductory course in HORT or CPSC or consent of instructor.

HORT 226 Introduction to Weed Science credit: 3 Hours.
Same as CPSC 226. See CPSC 226.

HORT 240 Plant Propagation credit: 3 Hours.
Examines theories and methods employed in propagation of plants, emphasizing anatomical, physiological, and ecological principles involved in sexual propagation (seeds) and asexual propagation (division, cuttings, budding, grafting, tissue culture, etc.) Prerequisite: IB 103.

HORT 246 Floral Design I credit: 3 Hours.
Applies principles of design to the composition and decorative use of flowers, foliages, and accessories. Additional fees may apply. See Class Schedule. Prerequisite: Enrollment in Horticulture, Human and Community Development, or Hospitality Management.

HORT 255 Multifunctional Landscapes credit: 3 Hours.
Introduction to research and technology in sustainable and multifunctional landscapes, within the context of plant science. Topics covered include: site inventory/analysis, plant biodiversity, stormwater management, green roofs, sustainable construction materials, and urban agriculture. This is a project-based course; students will develop sustainable solutions to landscape problems using multimedia applications, graphic design, written text, and video presentation.

HORT 261 Biotechnology in Agriculture credit: 3 Hours.
Same as CPSC 261. See CPSC 261.
This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

HORT 293 Professional Internship credit: 1 to 4 Hours.
Off-campus experience in a field directly pertaining to a subject matter in horticulture. Approved for S/U grading only. May be repeated to a maximum of 4 hours.

HORT 294 Resident Internship credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated to a maximum of 4 hours. For registration in this course, students should contact the Department Teaching Coordinator.

HORT 295 Undergrad Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

HORT 298 Undergraduate Seminar credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in horticulture. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing.

HORT 301 Woody Landscape Plants I credit: 4 Hours.
Systematic approach to the identification, ornamental characters, culture, and use of woody landscape deciduous trees and shrubs with special emphasis on cultivated varieties. Prerequisite: IB 103.

HORT 316 Landscaping with Native Plants credit: 4 Hours.
Herbaceous native plants suitable for home and commercial landscapes. Emphasis on native plant identification, landscape use, and culture. Prerequisite: HORT 100 or IB 103.

HORT 341 Greenhouse Mgmt and Production credit: 4 Hours.
The course focuses on how controlled environments can be managed to obtain optimal plant growth. Lectures cover greenhouse operations, management, and production, including: greenhouse design, location, glazing, heating, cooling, environmental control, irrigation systems, light control, root media, fertilization, watering, integrated pest management, and automation. The course also has a large laboratory component, in which students conduct experiments in the greenhouse. A required all-day field trip to nearby greenhouse operations rounds out the course experience. Additional fees may apply. See Class Schedule. Prerequisite: NRES 201 and HORT 100.

HORT 343 Herbaceous Plants I credit: 3 Hours.
Course includes identification, culture, and landscape use of herbaceous, frost-tender ornamental plants. Emphasis on flowering annuals, tropical foliage plants used for outdoor displays, and foliage plants used for interiorscaping. Elements of design will be addressed; design projects will integrate concepts. Prerequisite: IB 103.

HORT 344 Planting for Biodiversity and Aesthetics credit: 3 Hours.
As the demand for food increases, plants in ornamental landscapes will need to provide not only beauty but also species biodiversity critical for supporting sustainable food production. Course emphasizes species identification (predominantly herbaceous perennials), management, and planting design principles. Designing for multiple contexts, such as residential and community gardens, and large scale production sites, to provide multiple ecosystem services, especially supporting human aesthetic preferences, and habitat for pollinators. Prerequisite: IB 103.

HORT 355 Landscape Graphics & Design credit: 4 Hours.
Focuses on the development of graphic skills to represent the landscape, using both hand-drawn (pencil and color rendering) and introductory digital methods (e.g., AutoCAD and Photoshop). Students will learn basic principles for organizing space and designing for function, using plant materials that are appropriate for site conditions. A variety of drafting tools and access to specific design software programs are required. AutoCAD and Photoshop will be available for students to use in the classroom.
HORT 360  Vegetable Crop Production  credit: 3 Hours.
Instruction on the commercial production of vegetable crops. The first part of the class focuses on broad issues important to all crops including methods of vegetable production, basic soil and nutritional management, irrigation, and weed, insect, and disease management. Both organic and conventional production are discussed with a focus on sustainability. Basic farm and business management topics, including postharvest handling, food safety, crop and farm budgets, business structures, marketing, insurance, and regulations are also discussed. The second part of the class focuses on specific crops, emphasizing their origin, production, growth and development, insects, and diseases as well as harvesting and postharvest handling. Prerequisite: HORT 100 or equivalent.

HORT 361  Small Fruit Production  credit: 2 Hours.
Technological application of biological principles to the culture of strawberry, grape, blueberry, raspberry, blackberry, currant, gooseberry, and miscellaneous small fruits. Prerequisite: HORT 100 or IB 103.

HORT 362  Tree Fruit Production  credit: 2 Hours.
Examines biological principles and cultural practices involved in the growth and production of apple, pear, peach, cherry, plum, apricot, almond, and miscellaneous citrus and nut crops. Offered every fall semester. Prerequisite: HORT 100 or IB 103.

HORT 363  Postharvest Handling Hort Crop  credit: 2 Hours.
Provides theoretical and practical experience in the principles and practices of postharvest handling of cut flowers, ornamentals, fruits, and vegetables, emphasizing factors that impact quality, shelf-life, and safety. Requires two field trips, one to a local produce warehouse and the other to local supermarkets. Offered every fall semester. Prerequisite: HORT 100 or IB 103.

HORT 396  Ug Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

HORT 421  Horticultural Physiology  credit: 4 Hours.
Horticultural crop growth is examined in relation to plant structure, environment, and cultural practices. Emphasizes environmental control of whole plant growth as influenced by the supply of the raw materials required for growth: water, carbon dioxide, radiant energy, including the influence of temperature and photoperiod on plant growth and development. The shoot and root interactions with the environment are characterized relative to cultural practices. 4 undergraduate hours. 4 graduate hours. Prerequisite: HORT 100 or IB 103 and junior standing.

HORT 430  Children and Nature  credit: 2 Hours.
Study of research theory and evidence suggesting the importance of children's contact with natural environments including, designed urban greenspaces, managed sustainable landscapes, and wilderness, for healthy child development, ecological literacy, and pro-environmental behavior as adults. Discussion of research implications and applications for redesigning our communities' outdoor spaces, societal values, public policies and education systems to foster children's access to, and bonding with, nature. Same as LA 430. 2 undergraduate hours. 2 graduate hours.

HORT 434  Designing Urban Agriculture  credit: 2 Hours.
Emphasizes the design process and principles related to food production in urban environments. Lecture topics will include assessing, planning, and transforming the landscape at multiple scales from regional to neighborhood to specific site. In group discussions students will critically review readings from peer-reviewed and popular literature. Students will engage in analysis and design of an existing site to integrate multiple functions, emphasizing the permanent infrastructure and perennial vegetation. Access to a computer that can be loaded with appropriate software (Sketchup) is necessary for mapping and design projects. Online lecture/discussion course. 2 undergraduate hours. 2 graduate hours. HORT 100 or CPSC 112 or equivalent introductory course in plant science, one course in Humanities & the Arts, and one course in Social & Behavioral Sciences. Prerequisite: Junior standing required.

HORT 435  Urban Food Production  credit: 3 Hours.
Explore opportunities and challenges for maximizing the productivity and sustainability of urban food production systems, considering agricultural, environmental, energy, social, and economic issues. Students will examine the science and practice of urban agriculture through scientific and popular literature, case studies, online discussion, and service-learning opportunities. Production systems covered will include both outdoor (e.g., vacant lot urban farms) and controlled environment (e.g., hydroponics and aquaponics) agriculture. 3 undergraduate hours. 3 graduate hours. Prerequisite: HORT 100 or CPSC 112 or equivalent introductory course in plant science.

HORT 441  Floral & Nursery Crops Pductn  credit: 4 Hours.
An intensive study of specific production technologies used to commercially grow landscape and floricultural crops. Emphasis will be on the growth and development of major floral and nursery crops as influences by the environmental and cultural techniques. Field trip required. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: HORT 240 and HORT 341.

HORT 442  Plant Nutrition  credit: 4 Hours.
Mechanisms and factors affecting the absorption, transport, distribution, and functions of the essential elements required by higher plants. 4 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: NRES 201 and IB 420.

HORT 447  Horticultural Plant Breeding  credit: 3 Hours.
Methodology, objectives, and constraints of breeding for improved cultivars of flowers, woody ornamentals, turfgrasses, fruits, and vegetables. Emphasis on breeding objectives unique to horticultural commodities such as color, appearance, flavor, shelf-life, nutritional value, and other characteristics that determine product quality. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: CPSC 352.

HORT 453  Principles of Plant Breeding  credit: 4 Hours.
Same as CPSC 453. See CPSC 453.

HORT 456  Sustainable Landscape Design  credit: 4 Hours.
This course will allow students from different disciplines to work together developing design alternatives for a multifunctional landscape. Students will learn to work at multiple scales, considering the surrounding context, the site itself, and detailed features within the large site. For some projects, students will work in teams, since most ‘real-world’ projects require participation among multiple experts. Instructor- and student-led discussions will focus on scientific and popular literature in horticulture, urban agriculture, ecological design, and landscape ecology, and students are encouraged to synthesize and translate the material into design solutions. 4 undergraduate hours. 4 graduate hours. Prerequisite: Introductory courses in Horticulture and Design.
HORT 464  International Hort Products  credit: 3 Hours.
Survey of the international trade in and production of horticultural foods, beverages, herbs, spices, floricultural crops, interior plants, and landscape plants. Important export and import crops will be discussed. Legal and environmental issues are explored. Term project required. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: CPSC 112, or HORT 100 or IB 103.

HORT 466  Growth and Dev of Hort Crops  credit: 4 Hours.
Factors affecting growth, development, and quality of horticultural crops, such as photoperiodism, growth regulators, and carbon dioxide levels. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 104; HORT 421 or IB 420.

HORT 475  Permaculture & Agroforestry  credit: 3 Hours.
Lecture/discussion course covering the scientific basis and design of permaculture (permanent agriculture) and temperate agroforestry systems. Lecture topics will include: permaculture principles, site assessment, soil remediation, water management, agroforestry case studies, urban food forests, and integration of livestock, among others. Education resources will be provided from peer-reviewed literature and popular sources. Students will work on projects to critically review the principles of permaculture and to design a multifunctional agroforestry system for a temperate site. 3 undergraduate hours. 3 graduate hours. Prerequisite: HORT 100 or CPSC 112 or equivalent introduction course in plant science and one course in ecology, environmental sciences, or natural resources. Junior standing required.

HORT 482  Plant Tissue Culture  credit: 4 Hours.
Survey, description, and applications of cell and tissue culture strategies for plant research and production. Topics include culture environment, media composition, tissue manipulation, organogenesis, embryogenesis, somatic hybridization, bioreactors and use of these techniques for plant propagation and physiological and biochemical research. Independent research project is conducted by each student. Same as CPSC 482. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 232 and IB 103.

HORT 499  Special Topics  credit: 1 to 4 Hours.
Experimental course on a special topic in Horticulture. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 12 hours as topics vary.

HORT 566  Plant Gene Regulation  credit: 4 Hours.
Same as CPSC 566. See CPSC 566.

HORT 588  Plant Biochemistry  credit: 4 Hours.
Same as CPSC 588 and IB 524. See CPSC 588.

HORT 598  Experimental Graduate Courses  credit: 1 to 4 Hours.
Experimental course on a special topic in Horticulture. May be repeated in the same or separate terms to a maximum of 12 hours as topics vary.

Human Dev and Family Studies (HDFS)

HDFS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HDFS)

Courses

HDFS 101  Issues & Careers in HDFS  credit: 1 Hour.
Introduction to career opportunities related to human development and family studies, academic and other preparation for different fields, and emerging issues for practitioners and researchers.

HDFS 105  Intro to Human Development  credit: 3 Hours.
Systematic overview of the psychological, biological, familial, and cultural factors related to human growth and development across the life span. This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

HDFS 120  Intro to Family Studies  credit: 3 Hours.
Overview of current concepts, theories, and substantive issues in family studies from an interdisciplinary perspective. Gives attention to variation in family form and function across different social/cultural contexts and how family experience is structured by gender. Examines issues of family development (marriage, parenting, divorce, remarriage, aging family) and explores the links between families and other social institutions. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

HDFS 140  Intro Gender & Women's Studies  credit: 3 Hours.
Same as GWS 100 and SOC 130. See GWS 100. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

HDFS 143  Biology of Human Behavior  credit: 3 Hours.
Same as ANTH 143. See ANTH 143. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

HDFS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in human development and family studies. Approved for both letter and S/U grading. May be repeated in the same or subsequent terms as topics vary.

HDFS 206  Early Childhood Curriculum Dev  credit: 4 Hours.
Introduces development of curriculum for children from birth to age five; integrates child development theory and principles with programming for young children in preschool and childcare setting. Prerequisite: HDFS 105.

HDFS 208  Child Fam with Special Needs  credit: 3 Hours.
Multi-disciplinary approach to the study of issues related to exceptional children and their families. Explores social, emotional, and economic aspects of exceptionality for both children and families; examines processes of identification, intervention, and integration of children who deviate significantly from developmental norms. Designed for students studying child development, early childhood education, special education, social work, nursing and other disciplines involved with children who have special needs and their families. Recommended for students preparing for internships and careers as Child Life Specialists. Prerequisite: HDFS 105.

HDFS 220  Families in Global Perspective  credit: 3 Hours.
Explores economic, political, cultural and social factors affecting families in different countries; examines variations among families in developed and developing nations and their historical, political and cultural contexts. Same as ANTH 210. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

HDFS 221  Asian Families in America  credit: 3 Hours.
Same as AAS 297 and SOCW 297. See SOCW 297. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci Cultural Studies - US Minority
HDFS 225 Close Relationships  
Initiation, development, and dissolution of committed relationships with same- or opposite-sex partners within familial, cultural, and societal contexts. Prerequisite: Sophomore standing. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

HDFS 259 Motor Development and Control  
Same as KIN 259. See KIN 259. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

HDFS 261 Self-Help Group Dev & Process  
 Defines nature and use of self-help groups in different contexts. Includes role of professionals in group formation and maintenance and develops group planning and management skills. Includes practice in group formation and visits to working groups in the community.

HDFS 262 Motor Develop, Growth & Form  
Same as KIN 262. See KIN 262. This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci

HDFS 263 Diversity in Recreation, Sport, and Tourism  
Same as KIN 230 and RST 230. See RST 230. This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

HDFS 290 Intro to Research Methods  
Introduction to quantitative and qualitative research methods used to study human development and families. Provides experience conducting observations and survey interviews, evaluating research results, and writing research reports. Prerequisite: HDFS 105. This course satisfies the General Education Criteria for:
Advanced Composition

HDFS 291 HDFS Career Planning & Preparation  
Overview of job opportunities, graduate, and professional school programs that prepare students for careers in health care, counseling, social work, higher education, policymaking and other fields related to Human Development and Family Studies. Examines types of jobs, graduate and professional opportunities and the preparation they require. Students develop personal job, graduate/professional school preparation plans. Approved for S/U grading only.

HDFS 293 Off-Campus Internship  
Supervised, off-campus experience in a field directly pertaining to subject matter in Human Development and Family Studies. Intended primarily for students seeking supervised internship experience needed for certification as a Child Life Specialist. Approved for letter and S/U grading. May be repeated to a maximum of 4 hours. Prerequisite: Prior or concurrent enrollment in HDFS 408 and consent of instructor.

HDFS 294 Research Internship  
Students work one-on-one or in a small group with a faculty member engaged in research. Students must arrange this research experience with a professor prior to registering for the course. A list of possible research projects can be found at: http://hdfs.illinois.edu/undergraduate/research-opportunities. Once you have found a project that interests you, email the professor and ask to participate in his or her research opportunity. Approved for Letter and S/U grading. May be repeated in the same or separate terms to a maximum of 10 hours. Prerequisite: Consent of instructor; not open to students on probation.

HDFS 295 Independent Study or Research  
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms.

HDFS 301 Infancy & Early Childhood  
Reviews development during the first five years of life, including cognitive, social, and biological aspects of early development; includes first-hand observation of young children to supplement and extend lecture material. Prerequisite: HDFS 105 or PSYC 216.

HDFS 305 Middle Childhood  
Systematic overview of the normative changes that occur in the physical, cognitive, social, emotional, and moral domains during the middle childhood period as well as current social issues that confront many of today's children (such as school violence or poverty). Prerequisite: HDFS 105.

HDFS 310 Adult Development  
Focuses on adult development as a means for understanding the quality of family relationships and community functioning. Uses current theoretical approaches to understand adult development and evaluate each approach's usefulness for adults in the contexts of family, health, work, leisure and challenges over the life course. Prerequisite: HDFS 105 or equivalent.

HDFS 314 Introduction to Aging  
Same as CHLH 314, RST 314, PSYC 314, and REHB 314. See CHLH 314.

HDFS 322 US Latina and Latino Families  
Explores a variety of topics and provides a basic overview of issues relevant to the understanding of Latina/Latino families and children in the United States. Examines recent demographic changes in the U.S. population and their implications for the socialization and education of Latina/Latino children and their families. Course content looks at such areas as who are Latina/Latino families; how are those families different from others; what are the similarities and differences within Latinas/Latinos; how does acculturation and language fit into our understanding of these families; and what are the implications for the education success of current and future Latina/Latino children. Same as LLS 322.

This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

HDFS 324 African Amer Families in Film  
Same as AFRO 382. See AFRO 382.

HDFS 340 Gender, Relationships & Society  
Explores the production of gender through social interaction within families and other specific interpersonal and institutional relationships that change over time. Gender is also linked to race, class, ability, and sexuality. Same as GWS 340 and SOC 322. Prerequisite: HDFS 105 or SOC 100.

HDFS 341 Asian American Youth  
Same as AAS 346. See AAS 346.

HDFS 361 Creative Dance for Children  
Same as ARTE 350 and DANC 350. See DANC 350.

HDFS 379 HDFS Study Abroad Experience  
International experience in areas related to human development and family studies involving foreign travel and study without enrollment in another institution. Experience must be planned and approved in advance via consultation with an HDFS faculty member. May be repeated in the same or separate terms to a maximum of 8 hours as topics vary.
HDFS 396  Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design
work under the direction of the Honors advisor. May be repeated in
the same or subsequent terms. Prerequisite: Junior standing, admission to
the ACES Honors Program.

HDFS 398  Undergraduate Seminar  credit: 1 to 3 Hours.
Special topics in a field of study directly pertaining to subject matter in
human development and family studies. May be repeated in the same or
subsequent terms to a maximum of 12 hours as topics vary. Prerequisite:
Junior standing.

HDFS 401  Socialization and Development  credit: 4 Hours.
Presents and uses theories of socialization to evaluate and analyze
current issues and socialization practices; delineates historical and
philosophical trends in socialization, and discusses the implications
of these trends for generating social policy affecting the developing
individual. 4 undergraduate hours. 4 graduate hours. Prerequisite:
HDFS 301 and HDFS 290.

HDFS 404  Gerontology  credit: 3 or 4 Hours.
Same as CHLH 404. See CHLH 404.

HDFS 405  Adolescent Development  credit: 3 Hours.
Examines paths of experience and individual development within the
family, the peer group, and other domains through this socially-defined
stage of life. 3 undergraduate hours. 3 graduate hours. Prerequisite:
HDFS 105 and PSYC 100.

HDFS 406  Child Dev Class Supervision  credit: 5 Hours.
Examines the relationships between child development theories and
developmentally appropriate and individualized instruction techniques,
discipline and guidance strategies, and the role of the family in child
development programs. Emphasizes program supervision. Includes
direct experience with children and families in a laboratory setting.
5 undergraduate hours. 5 graduate hours. Prerequisite: HDFS 206,
HDFS 220, and junior standing.

HDFS 408  Hospitalized Children  credit: 3 or 4 Hours.
Examines the developmental needs and stress reactions of children and
families in a hospital/medical setting; examines responses of family
and staff facing terminal illness and the death of a family member;
familiarizes students with general hospital procedures, medical terms,
and illnesses; introduces the role of Child Life programs and the Child
Life Specialist. 3 undergraduate hours. 4 graduate hours. Prerequisite:
HDFS 105 or consent of instructor.

HDFS 420  Inequality, Public Policy, and U.S. Families  credit: 3 or 4
Hours.
Examines influence of economic, demographic and social changes
on families in the U.S. and on the opportunities of individual family
members. Explores interactions of social class, poverty, race and gender
and their effects on family life and on child and adolescent development.
Includes critical analysis of health care, employment, immigration, family
leave, welfare and other social policy options that affect family life
and well-being. 3 undergraduate hours. 4 graduate hours. Prerequisite:
HDFS 120.

HDFS 424  Racial and Ethnic Families  credit: 2 to 4 Hours.
Same as AFRO 421, EPS 421, and SOC 421. See EPS 421.

HDFS 425  Critical Family Transitions  credit: 4 Hours.
Life-span development approach to the study of normative changes
and non-normative events and their impact on marriage and family
relationships; attention to variations in the socio-economic contexts of
family transitions, and to methods for reducing the negative effects of
such transitions. 4 undergraduate hours. 4 graduate hours. Prerequisite:
HDFS 120 and HDFS 290.

HDFS 426  Family Conflict Management  credit: 3 or 4 Hours.
Examines processes of conflict management in family and community
disputes; emphasizes negotiation and mediation as modes of dispute
settlement. 3 undergraduate hours. 4 graduate hours. Prerequisite:
HDFS 120.

HDFS 427  Family Adaptation & Resilience  credit: 3 Hours.
Examines complex factors, including culture, economy, and values
conflicts, that challenge families and the range of adaptive strategies that
families deploy amid various challenges and stressors. Activities include
developing a research or action proposal related to developing family
resiliency. 3 undergraduate hours. 3 graduate hours. Credit is not given
for both HDFS 427 and HDFS 527. Prerequisite: HDFS 425 or consent of
instructor.

HDFS 444  LGBT Indiv, Fam & Community  credit: 3 or 4 Hours.
Examines contemporary sexual and gender minority experiences in
the context of societal inequality. Of particular interest to students
pursuing educational, human service, legal, and/or health profession
careers. Same as CHLH 444, 3 undergraduate hours. 4 graduate hours.
Prerequisite: SOC 100 or an introductory course on gender issues.

HDFS 450  Practicum in HDFS  credit: 1 to 12 Hours.
Supervised on- or off-campus learning experience related to human
development or family studies, supervised in cooperation with an
appropriate agency or institution. Not available to students on probation.
1 to 12 undergraduate hours. 1 to 12 graduate hours. Only 6 hours of
the course may be applied to the total required for a graduate degree in
Human and Community Development or a bachelor's degree in Human
Development and Family Studies. Prerequisite: Human Development and
Family Studies major; junior standing.

HDFS 459  Physical Activity & Aging  credit: 3 or 4 Hours.
Same as KIN 459. See KIN 459.

HDFS 461  Family Life Education  credit: 3 Hours.
Examines the theory and practice of designing family life education
programs for children, youth, and/or families. Introduces strategies for
translating science-based information into learning experiences. Family
life education topics such as parenting (including managing difficult
children and children with special needs), relationships (dating, marriage),
family transitions (becoming new parents, divorce, & stepfamilies), and
health and well-being (obesity, stress) will be reviewed. Principles of
effective program design will be explored along with online program
delivery skills. 3 undergraduate hours. No graduate credit. Credit is
not given for both HDFS 461 and HDFS 561. Prerequisite: HDFS 120 or
consent of instructor.

HDFS 494  Applied Research Methods  credit: 1 to 4 Hours.
Participation in faculty-supervised research as a member of a
transdisciplinary team investigating questions related to the health and
well-being of children and families. Students propose their own research
questions and present findings developed from data gathered by the
team. 1 to 4 undergraduate hours. No graduate credit. May be repeated
in the same term to a maximum of 6 hours. May be repeated in separate
terms to a maximum of 8 hours. Prerequisite: Consent of instructor.
HDFS 499  Seminar  credit: 1 to 4 Hours.
Special topics in human development, family studies, or community
development. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be
repeated in the same or subsequent terms to a maximum of 12 hours as
topics vary.

HDFS 500  Professional Development  credit: 1 Hour.
Overview of issues in professional development in the field of human
development and family studies; focuses on both academic and applied
career paths. Approved for S/U grading only. May be repeated to a
maximum of 4 hours.

HDFS 501  Human Development Theories  credit: 4 Hours.
Overview of basic theories and theoretical perspectives on human
development; focuses on major concepts, issues, and questions in the
field.

HDFS 503  Social-Emotional Development  credit: 2 Hours.
Theory and research related to social and emotional development
from infancy through middle childhood. Key topics include emotional
regulation and social-emotional understanding, with special attention to
the interpersonal contexts of social-emotional development, including
parent-child, sibling and peer relationships. Prerequisite: HDFS 501.

HDFS 505  Advanced Adolescence  credit: 2 Hours.
Advanced interdisciplinary examination of current research on
adolescence as a life course stage and developmental period; focuses on
principal contexts of adolescents? lives, such as family, peers and
school, and examines how experience in these contexts relates to
preparation for adulthood. Designed for students with prior course work
on adolescence or related topics who plan to do research, teaching, or
policy work pertinent to this age period. Prerequisite: Prior course work in
human development, developmental psychology or life course sociology.

HDFS 521  Family Theories  credit: 4 Hours.
Contemporary family theories and their application in family research.

HDFS 523  Ethnic Families  credit: 4 Hours.
Historical, social, economic, contextual (neighborhood), and subcultural
factors that influence the organization and dynamics of ethnic-
racial family life in the United States: family and group immigration
and migration histories, acculturation, identity development, family
organization, gender roles, parent-child relations, family rituals,
neighborhood influences on family life and child-adolescent development,
and the relationship between social class and ethnicity-race. Particular
emphasis is given to qualitative studies that detail the first-hand
experiences of families.

HDFS 525  Family Interaction  credit: 4 Hours.
Observation and qualitative analysis of the family as a system; how
family organization emerges, is maintained, and changes through social
interaction.

HDFS 526  Intimate Partner Violence  credit: 2 Hours.
Extent, nature, causes, and consequences of intimate partner violence
in the United States. Examines the complexities of intimate partner
violence, including individual, societal, and historical factors that
contribute to violence, the implications of making distinctions in types
of violence and perpetrators, and the relationship between institutional
responses and individual decision-making. Also examines theoretical
methodological and ethical issues related to violence research.

HDFS 527  Family Resiliency  credit: 4 Hours.
Examines complex factors, including culture, economy, and values
conflicts, that challenge families and the range of adaptive strategies
that families deploy amid various challenges and stressors. Activities
include developing a research or action proposal related to developing
family resiliency. Credit is not given for both HDFS 527 and HDFS 427.
Prerequisite: HDFS 521 or HDFS 525 or equivalent.

HDFS 528  Parenting  credit: 2 Hours.
Explores how parenthood has been conceptualized and investigated
in human development, family studies, and related disciplines. Major
theoretical perspectives and emerging line of research will be reviewed
including parental style, beliefs and cognition, identity, fathering and
diverse parenting contexts. Prerequisite: HDFS 501 or HDFS 521.

HDFS 529  Youth and Family Acculturation  credit: 2 Hours.
Examines acculturation in youth and families related to immigration and
globalization (e.g., via media, trade). Covers theory regarding individual
acculturation styles such as assimilation or integration/biculturalism,
and explores societal influences. Also examines how youth and families
adapt, including psychological and social adjustment, parent-child
acculturation gaps, and risk/protective factors for family resilience.
Films and discussions cover different types of acculturating individuals
(e.g., immigrants, refugees, non-migrants) and span several world
regions. Prerequisite: Prior coursework in family studies, child/adolescent
development or related topics, or consent of instructor.

HDFS 532  Community In American Society  credit: 4 Hours.
Classic U. S. community studies are paired with current journal articles
to examine how people in rural, suburban, and urban places go about
making, maintaining or losing "community" in the context of societal
change. The community studies provide a window on change at the local
level including: urbanization, suburbanization, ethnic group interactions,
inner-city poverty concentration, household structure variation, economic
restructuring, and environmental impacts. Community studies are also
critically evaluated both theoretically and as a research strategy. Same
as SOC 572 and UP 533. 4 graduate hours. No professional credit.

HDFS 533  Neighborhoods and Human Dev  credit: 4 Hours.
Theories, methodological issues, and current empirical research on the
impact of neighborhoods on human development and family welfare
across the life course including how neighborhoods characteristics, e.g.,
poverty, racial and ethnic composition, and geographic space, influence
child and adolescent development, health, and employment opportunities
and success in adulthood. Key mechanisms include: family conditions,
local environment, social networks, and spatial mismatch. 4 graduate
hours. No professional credit.

HDFS 539  Youth, Culture and Society  credit: 4 Hours.
Examines youth as a historically and culturally specific social formation;
examines discourse and material positioning of youth within broader
intersecting racial, cultural, socio-economic, gender and political contexts
to situate youth and youth cultural practices within global and local
processes. Specific topics include youth cultures, juvenile justice,
education, labor, consumerism, politics, sexuality and activism, as well as
methodological considerations of conducting research on youth. Same
as AAS 539 and EPS 539. 4 graduate hours. No professional credit.

HDFS 540  Gender & Sexuality  credit: 2 Hours.
Highlights key approaches to gender and sexuality within the
multidisciplinary field of family studies; examines how gender and
sexuality organize the accomplishment of family life through both
social structure and social performance, and their attendant historical,
economic and political contexts.
HDFS 541 Social Ent in Diverse Society  credit: 4 Hours.
Same as LLS 554 and SOCW 554. See SOCW 554.

HDFS 543 Ethnography Urban Communities  credit: 4 Hours.
Same as AFRO 552, SOC 578, and UP 578. See AFRO 552.

HDFS 550 Advanced Practicum in HDFS  credit: 4 Hours.
Practicum providing graduate students with supervised experience in the design, implementation, and/or evaluation of outreach programs, policy development, or consultation models designed to meet the needs of children, families and/or communities. Prerequisite: HDFS 450.

HDFS 551 Childhood Obesity I  credit: 3 Hours.
Same as CHLH 530, FSHN 530, KIN 530, NUTR 530, SOCW 570. See NUTR 530.

HDFS 552 Childhood Obesity II  credit: 4 Hours.
Same as CHLH 531, FSHN 531, KIN 531, NUTR 531, SOCW 571. See NUTR 531.

HDFS 561 Child and Family Program Dev  credit: 4 Hours.
Theoretical and practical aspects of planned efforts to influence the development of children, youth, and families in the context of communities, particularly efforts to promote competence and well-being of children and youth, positive parenting, and well-being and adjustment of adults. Examines literature from four approaches: family life education, youth development, prevention/applied developmental science, as well as health promotion and community health.

HDFS 562 Child & Family Program Eval  credit: 4 Hours.
Introduces practical skills for evaluating service, intervention, and educational programs, including needs assessment, program monitoring and impact assessment, with emphasis on outcome measure selection, randomized and quasi-experimental designs, statistical power analysis, and ethical issues.

HDFS 590 Advanced Research Methods  credit: 4 Hours.
Overview of positivist, interpretive, and critical research paradigms and their quantitative and qualitative methodologies; critical evaluation of current social science literature; students develop their own research proposals. 4 graduate hours. No professional credit.

HDFS 591 Qualitative Methods  credit: 4 Hours.
Qualitative methods in the social sciences: epistemological context; data collection and relationships with participants; data management, analysis and evaluation; writing strategies. Specific content emphasis alternates annually between field research and grounded theory. 4 graduate hours. No professional credit. May be repeated to a maximum of 8 hours.

HDFS 592 Advanced Statistical Analysis  credit: 4 Hours.
Introduction to the conceptual bases and uses of advanced statistical techniques in human development and family research, including factor analysis, cluster analysis, multilevel modeling, and logistic regression. Special attention given to the longitudinal and dyadic analyses and techniques for handling missing data. Students use common statistical packages and their own data set to produce a journal-style manuscript. 4 graduate hours. No professional credit. Prerequisite: HDFS 594 or a graduate-level course in multivariate statistical analysis.

HDFS 594 Intermed Statistical Analysis  credit: 4 Hours.
Overview of common quantitative research methods and statistical analyses used in human development, family, and community research; covers sampling, data management, bivariate analyses, multivariate regression. Students frame a research question and use a common data set and statistical analysis software to prepare methods and results sections of a manuscript suitable for publication. 4 graduate hours. No professional credit. Prerequisite: HDFS 590 or equivalent.

HDFS 595 Seminar  credit: 1 to 4 Hours.
Discussion and evaluation of current literature on selected topics in human and community development. 1 to 4 graduate hours. No professional credit. May be repeated in the same or subsequent terms.

HDFS 596 Advanced Studies in HDFS  credit: 1 to 4 Hours.
Library or experimental research on specific problems of limited scope. May be taken in addition to 32 hours required for a master's degree by students who do not write a thesis. For non-thesis students only. May be repeated to a maximum of 4 hours.

HDFS 598 Special Problems in HDFS  credit: 1 to 4 Hours.
Research or independent study on a special problem that is not part of thesis work. 1 to 4 graduate hours. No professional credit. May be repeated in the same or separate terms to a maximum of 8 hours.

HDFS 599 Thesis Research  credit: 0 to 16 Hours.
Individual thesis research under supervision of faculty in specialized fields of human and community development. 0 to 16 graduate hours. No professional credit. Approved for S/U grading only. May be repeated.

Human Dimensions of Env Sys (HDES)

HDES Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HDES)

Courses

HDES 410 Neighborhoods and Politics  credit: 3 or 4 Hours.
Same as PS 410. See PS 410.

HDES 595 Res Sem Human Enviro  credit: 2 Hours.
Trains students to propose, conduct, communicate, and evaluate research in the human dimensions of environmental systems. Participants present and receive feedback on work in progress in formal seminars and in small multidisciplinary groups. May be repeated to a maximum of 20 hours. Prerequisite: HDES Scholar status or consent of instructor.

HDES 598 Special Topics in HDES  credit: 1 to 4 Hours.
Special topics in the human dimensions of environmental systems (HDES), with a focus on contemporary environmental and sustainability issues. An introduction course for graduate students who wish to explore the interdisciplinary studies offered through the Program in HDES. Approved for both letter and S/U grading. May be repeated in the same term to a maximum of 8 hours as topics vary. May be repeated in separate terms to a maximum of 12 hours as topics vary.

Human Resource Development (HRD)

HRD Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HRD)

Courses

HRD 400 Principles of HRE  credit: 3 or 4 Hours.
Study of the basic concepts and practices of education for and about work: its philosophical foundations and historical development, mission and goals, structure and function, curricular areas of emphasis, learner audiences served and settings in which programs are conducted, and issues and trends affecting program change. 3 undergraduate hours. 4 graduate hours.
HRD 401 Training in Business/Industry credit: 3 or 4 Hours.
Study of the status of education, training and development within business and industry; includes an overview of the systemic process for planning, delivery, and evaluation of training programs; and explores major problems, trends, and issues associated with the field. 3 undergraduate hours. 4 graduate hours.

HRD 402 Business Principles for HRD credit: 3 or 4 Hours.
Study of essential business understandings, knowledge, and skills required for HRD professionals to interact effectively with others in the business community. 3 undergraduate hours. 4 graduate hours.

HRD 411 Training System Design credit: 3 or 4 Hours.
Provides instruction and practice in the selection, organization, and preparation of content for instructional programs in business and technical settings. Provides students with a theoretical orientation to instructional design as well as the opportunity to experience the instructional design process as it applies to business and technical settings through the development of instructional materials. 3 undergraduate hours. 4 graduate hours.

HRD 412 Instructional Techniques credit: 3 or 4 Hours.
Provides a research-based exploration of effective teaching techniques for instructors of business, industry, and community college technical programs. Equips students with a conceptual framework for instruction and provides guidance and experience in the planning, delivery, and evaluation of instruction. 3 undergraduate hours. 4 graduate hours.

HRD 414 Facilitation Skills credit: 3 or 4 Hours.
Provides an in-depth examination into the body of research of effectively facilitating groups, including the nature of groups, the dynamics of individuals within groups, effective planning, role clarification, identification of intervention points in groups, and effective use of tools and techniques. The theoretical foundations for the course reside in theories of human values, group dynamics, decision-making, communication, managing conflicts, and effective group intervention. Course emphasis is on experiential learning, with students practicing self-reflection and self-directed facilitations. 3 undergraduate hours. 4 graduate hours.

HRD 415 Diversity in the Workplace credit: 3 or 4 Hours.
Assists educators, as well as trainers and managers in business and industry, to effectively recognize and understand diversity in school and work settings. Activities focus on understanding the nature of diverse populations, their unique learning needs, and potential collaborative efforts between educators and work place personnel. 3 undergraduate hours. 4 graduate hours.

HRD 440 Work Analysis credit: 3 or 4 Hours.
The ability to analyze work is a fundamental skill for individuals interested in human resource development. Work analysis is necessary for identifying job standards, designing training programs, performance support systems, evaluating work performance, and perhaps most importantly improving performance. This course will provide students with the opportunity to learn and use range of work analysis techniques and to apply this information in service to an organization. 3 undergraduate hours. 4 graduate hours. Prerequisite: HRD 400 or consent of instructor.

HRD 470 Designing and Evaluating E-Learning Systems credit: 3 or 4 Hours.
This course surveys and examines models and theories for designing e-learning systems across disciplines and organizations. Particular emphasis is given to topics on designing instructor-led and/or autonomous learning systems for individual learners and for organizations in contemporary technology-enabled environments. In addition, this course covers introductory methodologies for evaluating the efficacy of various e-learning system. The guiding philosophy of the course is that intended learning outcomes by any e-learning system should be achieved through systematic and pedagogically grounded design and evaluation processes while considering various individuals' and organizations' needs. 3 undergraduate hours. 4 graduate hours.

HRD 472 Learning Technologies credit: 3 or 4 Hours.
The course addresses two important needs of educators. First, educators should be aware of recent developments in the area of instructional technology. Second, educators must be able to select, develop, and effectively use appropriate instructional technologies to enhance learning and communication. To meet these needs, this course covers a wide range of instructional technologies that are used for instructional and administrative purposes. Traditional instructional media are considered in the course although significant emphasis is placed on more recent developments that involve the use of the computer and its applications in education. Instructional technologies such as computer-based instruction, computer-based testing, distance learning, interactive video, and intelligent instructional technologies are covered. Through course readings, discussions, and projects, students in the course are expected to gain skills in choosing appropriate instructional technologies, designing effective presentations that rely on those technologies, and properly using instructional technologies to enhance communication with an audience. Same as CI 484. 3 undergraduate hours. 4 graduate hours. Prerequisite: HRD 411 or equivalent course in instructional design.

HRD 474 Evaluating Learning Technology credit: 4 Hours.
Same as EPSY 474. See EPSY 474.

HRD 475 Project Management for Human Resource Development credit: 3 or 4 Hours.
Effective project management skills are essential for successful professional development. This course, in particular, studies the basic principles, techniques, and best practices related to managing personnel, time, and resources in education and training projects. Through a variety of learning activities, including case study review and project simulation, students will apply project management concepts and tools in various training and education-related project development. 3 undergraduate hours. 4 graduate hours.

HRD 480 Introduction to eLearning credit: 3 or 4 Hours.
The course seeks to build foundational knowledge in areas associated with online teaching and learning and distance education in both higher education and workplace learning settings. Major areas of interest include the overview of online teaching and learning strategies, digital learning system design, digital media for learning, and evaluation online teaching and learning. 3 undergraduate hours. 4 graduate hours. Prerequisite: Open to all graduate students.

HRD 490 Issues and Developments in HRD credit: 3 or 4 Hours.
Special course for experimentation or for seminar on topics not treated by regularly scheduled courses. Topics vary; consult Class Schedule for specific section offerings. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 hours.

Information listed in this catalog is current as of 04/2018
HRD 491  Professional Skill Development  credit: 3 or 4 Hours.  
Designed to teach practitioner-oriented skills in specialized areas of human resource education. Topics vary; consult Class Schedule for specific section offerings. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 hours.

HRD 492  Supervised Internship in HRE  credit: 2 or 4 Hours.  
While employed in approved cooperating organizations, students observe the relationship between HRE and organizational performance. 2 or 4 undergraduate hours. 2 or 4 graduate hours.

HRD 495  Special Study & Investigation  credit: 2 or 4 Hours.  
Offers opportunity for an individual to study, on or off campus, selected problems, trends, and new developments or to conduct specialized investigations for the improvement of instructional programs in areas related to education and training. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours.

HRD 501  The Community College  credit: 4 Hours.  
Same as EOL 573. See EOL 573.

HRD 509  Advanced Theories in HRD  credit: 4 Hours.  
Provides a reading of advanced texts related to Human Resource Development from a variety of applied social science disciplines. Targeted towards doctoral students in the later stage of their course work who are interested in HRE theory and social science foundations. Prerequisite: HRD 400, HRD 411, HRD 530.

HRD 517  Community College Program Dev  credit: 4 Hours.  
Synthesizes selected sociological, psychological, and epistemological foundations for curriculum development in education and training; application of theories from fundamental disciplines to practice in existing and emerging curricula involving perceptual and psychomotor learning.

HRD 530  Organization Development  credit: 4 Hours.  
Addresses the history, concepts, theories, and techniques of Organization Development as applied in Human Resource Education; emphasis on creating, managing, and sustaining system-wide change in public and private organizations; organized around diagnosis, implementation, and evaluation of individual, team, and organization-wide interventions.

HRD 531  Quality Process Improvement  credit: 4 Hours.  
Examines quality and process improvement philosophies, theories, and strategies as they apply to the practice of professionals in human resource education. Based on a critical analysis of the historical antecedents, theoretical foundations, and empirical research results of Total Quality Management (TQM) and Continuous Process Improvement (CPI), students will be able to apply improvement strategies and evaluate the merits and limitations in public and private settings. Same as EOL 587.

HRD 532  Strategic HRD  credit: 2 or 4 Hours.  
Study of the theories, research, and applications of strategic human resource development in a variety of organizational settings.

HRD 533  Management of HRD  credit: 4 Hours.  
Study of management fundamentals related to planning, organizing, staffing, leading, and controlling the HRD function in organizations.

HRD 534  Economics of Human Resources  credit: 4 Hours.  
Same as LER 545. See LER 545.

HRD 535  Consulting in HRD  credit: 4 Hours.  
Analysis of key elements of consulting in the human resource development profession. Emphasis is placed on subject matter expertise, consulting skills, marketing, organization, business management, communication, and life/work balance. The course examines both the internal and external consulting practices. Issues of education and training of consultants for work in industry, business, government, and non-profit sectors are covered in detail.

HRD 536  International HRD  credit: 4 Hours.  
Course is designed to provide insights into international HRD at macro and micro levels. Course will cover: cross-cultural issues in international HRD; design and delivery of international HRD programs; HRD practices and programs in different regions of the world; national HRD programs; expatriate training and training in multinational corporations.

HRD 540  Learning on the Job  credit: 4 Hours.  
Research and practice suggest that individuals learn most of what they know and can do while on-the-job, not in a corporate classroom or some other formal learning setting. This seminar will provide opportunity to examine the literature on this topic and consider how they also might contribute to the literature through their own research. The seminar will also provide the opportunity to experience how to design a workplace learning system, such as structured on-the-job training. Prerequisite: HRD 400 and HRD 411 or consent of instructor.

HRD 550  Adult & Professional Education  credit: 4 Hours.  
This course takes a broad look at the philosophy, theory, research, and practice of adult education, along with additional considerations for the development of professionals. The broad perspective includes the social, cultural, and political factors that affect the research, planning, development, and implementation of adult education. You may explore the major adult learning theories, the practice of adult education, and the aims and challenges of professional education that match you scholarly and practical interests.

HRD 572  e-Learning Ecologies  credit: 4 Hours.  
An examination of emerging environments of e-learning, some setting out to emulate the heritage social relationships and discourses of the classroom, others attempting to create new forms of learning. Aims to push the imaginative boundaries of what might be possible in e-learning environments. Explores the ways in which assessments can be constructed and implemented which are integral to the learning process, with the assistance of today’s new media, ‘big data’ and other information technologies. 4 graduate hours. No professional credit.

HRD 575  Innovation in E-Learning  credit: 4 Hours.  
Designed to provide an in-depth look at ongoing innovations in Web-based electronic technologies that can be used to deliver e-Learning content and to enhance learning experiences in e-Learning environments. Students will acquire and synthesize advanced content knowledge and critically review research on ongoing innovations that are integrated with targeted content in today’s eCommunication and e-Learning environments. Prerequisite: Open to all graduate students.

HRD 580  Disciplined Inquiry in Educa  credit: 4 Hours.  
Provides an analysis and synthesis of disciplined inquiry in human resource education including an historical perspective, formulation of the research process, and the utilization and communication of research.

HRD 585  Program Evaluation  credit: 4 Hours.  
Theory and techniques of evaluation in cognitive, affective, and psychomotor domains at different educational levels and settings; development and analysis of activities and instruments for students and program evaluation, follow-up studies, and interpretation of results for self-evaluation and for administrative decision making.

Information listed in this catalog is current as of 04/2018
HRD 590  Seminar for Advanced Students  credit: 0 to 8 Hours.
Seminar open to persons who have been admitted for doctoral study in human resource education. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours.

HRD 592  Special Topics in HRE  credit: 4 Hours.
Introduction to significant problems, points of view, and trends in the field; explores significant research relating to organization, content, and techniques. Topics vary; consult Class Schedule for specific section offerings. May be repeated with approval.

Humanities Courses (HUM)

HUM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/HUM)

Courses

HUM 191  Freshman Honors Tutorial  credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars. May be repeated one time. Prerequisite: Consent of departmental honors adviser.

HUM 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

HUM 387  French & Comparative Cinema I  credit: 3 Hours.
Same as CWL 387, FR 387, and MACS 382. See FR 387.

HUM 389  French & Comparative Cinema II  credit: 3 Hours.
Same as CWL 389, FR 389, and MACS 383. See FR 389.

HUM 390  Individual Study  credit: 2 to 4 Hours.
Supervised reading and research on interdisciplinary humanities topics chosen by the student in consultation with a faculty member. May be repeated to a maximum of 8 hours. Prerequisite: Consent of humanities adviser (An approved Learning Agreement must be submitted to 2002 Lincoln Hall, 702 S. Wright Street, Urbana, not later than the second week of the semester or the first week of the summer session).

HUM 395  Special Topics  credit: 3 Hours.
Interdisciplinary topics in the humanities; topics vary, but are normally related to one of the options in the humanities major. May be repeated if topics vary. Students may register in more than one section per term.

HUM 397  Special Topics Junior  credit: 3 Hours.
Interdisciplinary seminar and tutorial in selected topics related to one of the options in the humanities major. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing and consent of humanities adviser (Tutorial students must submit an Approved Learning Agreement to 2002 Lincoln Hall, 702 S. Wright Street, Urbana, not later than the second week of the semester or the first week of the summer session).

HUM 492  Senior Thesis  credit: 2 to 4 Hours.
Individual research for majors in humanities leading to the completion of a thesis. 0 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 8 hours. Prerequisite: Senior standing, a declared option in humanities major, and consent of advisor.

HUM 495  Special Advanced Topics  credit: 3 or 4 Hours.
Offers interdisciplinary topics in the humanities; topics vary, but normally relate to the interdisciplinary areas of study within the humanities major or to the special humanities facilities (e.g., the Language Learning Laboratory). 3 undergraduate hours. 4 graduate hours. May be repeated as topics vary to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Will vary according to topic. See Class Schedule.

HUM 498  Special Topics Senior  credit: 3 Hours.
Interdisciplinary seminar and tutorial in selected topics related to one of the options in the humanities major. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing and consent of humanities adviser (Tutorial students must submit an approved Learning Agreement to 2002 Lincoln Hall, 702 S. Wright Street, Urbana, not later than the second week of the semester or the first week of the summer session).

I-Health (IHLT)

IHLT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IHLT)

Courses

IHLT 101  Introduction to i-Health  credit: 1 Hour.
Introduction to the interdisciplinary major in Health. The course is designed to familiarize students with the concepts of interdisciplinary health, campus resources, academic policies, and program requirements.

IHLT 102  Survey of Interdisc Health  credit: 1 Hour.
Introduction to topics in interdisciplinary health with particular emphasis on the five dimensions of health: physical, emotional, social, intellectual and spiritual. Students will explore their personal health beliefs and patterns and discuss the benefits of studying health within an interdisciplinary curriculum.

IHLT 230  Leadership in Health  credit: 3 Hours.
Develops a framework to understand practices of exemplary leadership. Topics include: 1) Modeling behavior, 2) Inspiring a shared vision, 3) Challenging processes, 4) Enabling others to act, and 5) Encouraging passionate leadership. Case studies of individuals who are recognized leaders in health and well-being are explored. Through various assignments, students identify their own leadership style and understand the important role they can play as leaders to address local and global health challenges.

This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

IHLT 232  Health Disparities in the U.S.  credit: 3 Hours.
Provides an overview of health disparities in the United States, including existence and magnitude of health disparities, theories that explain health disparities, strategies to address their complexity, and solution required to eliminate them. Disparities are examined related to groups of diverse racial/ethnic backgrounds, socio-economic status, gender, age, and ability level.

This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

IHLT 240  Aging and Health Policy  credit: 3 Hours.
Provides an understanding of the policies that affect service delivery to older adults including key historical and current policies such as the Older Americans Act, Medicare, Medicaid, and Social Security. Theories of public policy and involvement of older adults in the political process will be introduced. Challenges of issues such as chronic disease prevention, housing, transportation, nutrition, and elder abuse will also be explored.

This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci
IHLT 375  Interdis Collab in Health Serv  credit: 4 Hours.
Provides scholarly knowledge and field experiences for interdisciplinary collaboration in the health services. Topic include health service delivery systems, vulnerable populations, models of health and health promotion, communication, policy and ethics in health care. Emphasis on introducing students to the importance of working with individuals from a variety of health disciplines to best address issues of health in society.

IHLT 474  Pre-Field Experience in Health  credit: 1 Hour.
This is an independent study course that expands student’s knowledge of health professions and prepares them for field work in an applied setting with a variety of health professionals. 1 undergraduate hour. 1 graduate hour.

IHLT 475  Field Experience in i-Health  credit: 4 Hours.
Designed to emphasize field/research experiences that facilitate working with individuals from a variety of health disciplines. Field experience/research placements will be selected to best prepare students address issues of health within their concentrations areas. In class sessions will focus on interdisciplinary collaboration, professionalism and important global health issues. Serves as the capstone course for i-Health majors. 4 undergraduate hours. 4 graduate hours. Prerequisite: Restricted to senior i-Health majors.

IHLT 498  Interdisciplinary Health Study Abroad  credit: 1 to 6 Hours.
An advanced-level study abroad experience where students complete assigned scholarly readings; participate in facilitated discussions prior to, during, and/or after the trip; and write a final paper. The on-campus and abroad activities are supervised and facilitated by campus faculty. 1 to 6 undergraduate hours. No graduate credit. May be repeated in separate terms for a total of 12 undergraduate hours, if the countries differ between terms. Prerequisite: Social & Behavioral Sciences General Education requirement fulfilled, and sophomore or higher standing.

Industrial Engineering (IE)

IE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IE)

Courses

IE 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

IE 297  Independent Study  credit: 1 to 4 Hours.
Individual investigations of any phase of Industrial Engineering. May be repeated in separate terms. Prerequisite: Consent of instructor.

IE 300  Analysis of Data  credit: 3 Hours.
Nature of probabilistic models for observed data; discrete and continuous distribution function models; inferences on universe parameters based on sample values; control charts, acceptance sampling, and measurement theory. Credit is not given for both IE 300 and CEE 202. Prerequisite: MATH 241.

IE 310  Deterministic Models in Optimization  credit: 3 Hours.
Linear Optimization - Simplex method, duality, and sensitivity analysis, Transportation and Assignment Problems, Network Optimization Models, Dynamic Programming. Nonlinear optimization, and Discrete optimization. Credit is not given for both IE 310 and CEE 201. Prerequisite: Credit or concurrent registration in MATH 415.

IE 311  Operations Research Lab  credit: 1 Hour.
Applications of OR models with the use of software tools. Prerequisite: Concurrent registration in IE 310.

IE 330  Industrial Quality Control  credit: 3 Hours.
Contemporary concepts and methods for quality and productivity design and improvement; philosophies of Deming, Taguchi, and others leading the quality management and engineering movement; Shewhart’s methods for statistical process control; process capability analysis; statistical methods for tolerance assessment; process control methods employing attribute data; design of experiments, concepts, and methods. Prerequisite: IE 300.

IE 340  Human Factors  credit: 4 Hours.
Introduction to human factors, ergonomics, engineering psychology, history of ergonomics, human-machine relations, displays and controls, human-computer interaction, industrial and aviation systems, physiology of work and anthropometrics, cognitive ergonomics, human reliability, human as manual controller, human-machine systems design, prototyping, professional practice and ethics, laboratory exercises. Same as PSYC 358. Prerequisite: PSYC 100, PSYC 103, or consent of instructor.

IE 360  Facilities Planning and Design  credit: 3 Hours.
Facility planning, plant layout design, and materials handling analysis; determination of facilities requirements, site selection, materials flow, use of analytical and computerized techniques including simulation, and applications to areas such as manufacturing, warehousing, and office planning. Prerequisite: Credit or concurrent enrollment in IE 310.

IE 361  Production Planning & Control  credit: 3 Hours.
Scope of production systems and activities involved in their design, establishment, management, operation, and maintenance; mathematical and computer models for planning and control of facilities, human resources, projects, products, material, and information in production systems. Prerequisite: IE 310.

IE 370  Stochastic Processes and Applications  credit: 3 Hours.
Introduction to stochastic processes with applications in decision-making under uncertainty. Topics include news vendor problem, discrete-time Markov chain (including classification of states, stationary distribution, absorbing states), Poisson processes (including time-homogenous, time-nonhomogeneous, thinning Poisson), continuous-time Markov chain (including Markov property, generator matrix, stationary distribution), queuing theory (including M/M/k queue, open Jackson network), and Markov decision processes (including finite-horizon models, infinite-horizon models). Prerequisite: IE 300 and IE 310.

IE 397  Independent Study  credit: 1 to 4 Hours.
Individual investigations or studies of any phase of Industrial Engineering. May be repeated in separate terms. Prerequisite: Consent of instructor.

IE 398  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in industrial engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

IE 400  Design & Anlys of Experiments  credit: 3 or 4 Hours.
Concepts and methods of design of experiments for quality design, improvement and control. Simple comparative experiments, including concepts of randomization and blocking, and analysis of variance techniques; factorial and fractional factorial designs; Taguchi’s concepts and methods; second-order designs; response surface methodology. Engineering applications and case studies. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 300.

Information listed in this catalog is current as of 04/2018
IE 410  Stochastic Processes & Application  credit: 3 or 4 Hours.
Modeling and analysis of stochastic processes. Transient and steady-state behavior of continuous-time Markov chains; renewal processes; models of queuing systems (birth-and-death models, embedded-Markov-chain models, queuing networks); reliability models; inventory models. Familiarity with discrete-time Markov chains, Poisson processes, and birth-and-death processes is assumed. Same as CS 481. 3 undergraduate hours. 4 graduate hours. Prerequisite: IE 310.

IE 411  Optimization of Large Systems  credit: 3 or 4 Hours.
Practical methods of optimization of large-scale linear systems including extreme point algorithms, duality theory, parametric linear programming, generalized upper bounding technique, price-directive and resource-directive decomposition techniques, Lagrangian duality, Karmarkar's algorithm, applications in engineering systems, and use of state-of-the-art computer codes. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 310 and MATH 415.

IE 412  OR Models for Mfg Systems  credit: 3 or 4 Hours.
Operations research techniques applied to problems in manufacturing and distribution. Single and multi-stage lot sizing problems, scheduling and sequencing problems, and performance evaluation of manufacturing systems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 310.

IE 413  Simulation  credit: 3 or 4 Hours.
Use of discrete-event simulation in modeling and analysis of complex systems. Data structures and event-list management; verification and validation of simulation models; input modeling, including selection of probability distributions and random variate generation; statistical analysis of output data. Same as CS 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: CS 101 and IE 310.

IE 420  Financial Engineering  credit: 3 or 4 Hours.
Introduction to the theory and practice of financial engineering: basics of derivative securities and risk management; Markowitz portfolio theory and capital asset pricing model; interest rate and bonds; forward and futures contracts, hedging using futures contracts; option contracts and arbitrage relationship; binomial model, no-arbitrage pricing, risk-neutral pricing and American options pricing; Brownian motion, Black-Scholes-Merton model, delta hedging, Greek letters, implied volatility, and volatility smile. 3 undergraduate hours. 4 graduate hours. Prerequisite: IE 310.

IE 430  Economic Foundation of Quality Systems  credit: 3 or 4 Hours.
Total quality systems for planning, developing, and manufacturing world-class products. Economic foundations of total quality. Product value, cost, pricing, environmental quality, activity-based costing, design for assembly, organization structure, lead time, innovation, Taguchi methods, simulation-based significance testing, Strategic Quality Deployment, statistical process control, and conjoint analysis. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 300.

IE 431  Design for Six Sigma  credit: 3 Hours.
Quality Engineering principles and the Six Sigma Define-Measure-Analyze-Improve-Control (DMAIC) process. Application of concepts and methods of statistical process control, designed experiments, and measurement systems analysis to cases of quality and productivity improvement; application of the fundamentals of quality engineering and the Six Sigma tools to areas of product development, service enterprise, and manufacturing processes. 3 undergraduate hours. 3 graduate hours. Prerequisite: IE 300.

IE 445  Human Performance and Cognition in Context  credit: 3 or 4 Hours.
Same as EPSY 456 and PSYC 456. See EPSY 456.

IE 497  Independent Study  credit: 1 to 4 Hours.
Independent study of advanced problems related to industrial engineering. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

IE 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in industrial engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 hours.

IE 510  Applied Nonlinear Programming  credit: 4 Hours.
Optimization of nonlinear systems; survey of classical methods and concepts such as the Lagrangian method, the Jacobian method, and Kuhn-Tucker conditions; modern algorithms; numerical methods for digital computers; applications in engineering design; use of state-of-the-art computer codes. Prerequisite: IE 310.

IE 511  Integer Programming  credit: 4 Hours.
Optimization of linear systems over discrete decision domains. Topics to be covered include Modeling, Polyhedral theory, Integral Polyhedra, Totally Unimodular Matrices, Total Dual Integrality, Computational Complexity, Cutting plane method, Branch and Bound method, and Lagrangian Dual. Structured integer programs involving Matchings, Knapsack, Cuts and Matroids will be studied as applications. 4 graduate hours. No professional credit. Prerequisite: IE 411 or MATH 482.

IE 512  Network Analysis of Systems  credit: 4 Hours.
Basic concepts, theories, and techniques of systems analysis, including modeling of large scale systems, forecasting, planning, control, and information handling; modeling of systems with network techniques, including distance, flow, and project networks; advanced network topics such as out-of-kilter algorithm and project resource analysis. Prerequisite: IE 361 or CEE 201.

IE 513  Optimal System Design  credit: 4 Hours.
This course is designed to address the fundamental mathematical theories for complex engineering system (product) design optimization in multidisciplinary environment. The course starts with the basics of nonlinear programming (continuous optimization), then expands to the area of multidisciplinary design optimization (MDO) in depth. Analytical Target Cascading (ATC) - a well-established hierarchical optimization method - is covered in depth with assignments in written and programming forms. After a successful completion of the course, the students will be able to model and solve basic MDO problems and apply MDO in a research-based semester project. Prior experience in coding (in Matlab or similar) will be helpful but not required. 4 graduate hours. No professional credit. Prerequisite: IE 310.

IE 515  Stochastic Simulation  credit: 4 Hours.
Random variable generation; sample path generation; variance reduction; simulation optimization; introduction to Sequential Monte Carlo and MCMC; applications in finance. Prerequisite: IE 410 and STAT 410.

IE 520  Variational Inequalities  credit: 4 Hours.
Finite dimensional variational inequality and complementarity problems; characterization of solutions; nonsmooth Newton methods; interior-point methods; projected gradient schemes; applications of variational inequalities in game theory. Prerequisite: One of ECE 490, IE 510, IE 521, MATH 484.
IE 521 Convex Optimization credit: 4 Hours.
Finite dimensional convex optimization problems; characterization of optimal solutions; iterative algorithms for differentiable and nondifferentiable problems; distributed optimization algorithms; robust problems and solutions; applications of convex optimization models. Prerequisite: ECE 490 or IE 411; MATH 415; MATH 444.

IE 522 Statistical Methods in Finance credit: 4 Hours.
Methods of statistical modeling of signals and systems with an emphasis on finance applications. Review of linear algebra, probability theory, and spectral analysis; Linear Time Invariant (LTI) and ARX models; least-squares, maximum-likelihood, non-parametric, and frequency-domain methods; convergence, consistency and identifiability of linear models; asymptotic distribution of parameter estimates; techniques of model validation; Principle Component Analysis (PCA) for dimension reduction; ARCH and GARCH processes and their related models; implementation, application, and case-studies of recursive identification; Monte Carlo simulation. Credit is not given for both IE 522 and GE 524. Prerequisite: MATH 415.

IE 523 Financial Computing credit: 4 Hours.
Visual Basic (VB) types and loops, macros, arrays, and objects; C++ structures, classes, overloading, inheritance, and I/O; C++ standard libraries; financial computing case studies; illustrations of financial engineering topics using VB and illustrations of the same topics for financial markets using .NET. Prerequisite: CS 225.

IE 524 Optimization in Finance credit: 4 Hours.
Basic optimization models, theory and methods for financial engineering including linear, quadratic, nonlinear, dynamic integer, and stochastic programming; applications to portfolio selection, index fund tracking, asset management, arbitrage detection, option pricing and risk management; optimization software for classes of optimization problems. Projects requiring building optimization models based on financial market data and solutions using optimization solvers. Prerequisite: FIN 500 and MATH 415.

IE 525 Numerical Methods in Finance credit: 4 Hours.
Numerical methods of the pricing and risk management of financial derivatives: Monte Carlo simulation; variance reduction techniques; quasi-Monte Carlo methods; finite difference methods for partial differential equations; time discretization schemes; free boundary problems for American options. Prerequisite: FIN 500.

IE 526 Stochastic Calculus in Finance credit: 4 Hours.
Stochastic calculus approach to the pricing and risk management of derivative securities; no arbitrage pricing; Brownian motion; stochastic calculus; the Black-Scholes-Merton mode; risk neutral valuation; Feynman-Kac theorem; transform methods; exotic derivatives; change of numeraire; term structure interest rate mode; stochastic volatility and jump models. Prerequisite: IE 525.

IE 527 MSFE Professional Development credit: 1 Hour.
This course is required to encourage participation in professional development activities. Students will be required to be in attendance for at least 70% of the Practitioner Speaker Series in addition to other sanctioned MSFE Events. The Practitioner Speaker Series is an essential part of the MSFE curriculum. It allows firsthand interaction with Quantitative Practitioners. Exposure to insights on how the financial world is changing; regarding new products and needs, evolving data and information systems, and much more. Other events might include but are not limited to special seminars, workshops and conversation groups. 1 graduate hour. No professional credit. Approved for S/U grading only. May be repeated in separate terms up to 2 hours. Note that this course is for 1 credit hour during your first and second semester and will require a mandatory final paper. Prerequisite: Graduate MS: Financial Engineering Students only.

IE 528 Computing for Data Analytics credit: 4 Hours.
Hands-on programming course on select topics in data science and big data with major emphasis on a semester long project. Course will cover a variety of topics and tools in big data including Hadoop MapReduce Framework, HBase, and Storm; Machine Learning; and Optimization. 4 graduate hours. No professional credit. Prerequisite: CS 242, CS 446. All ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MSAA) are eligible to take the course.

IE 529 Stats of Big Data & Clustering credit: 4 Hours.
This course will cover various foundational topics in data science. Parametric and non-parametric methods. Hypothesis testing; Regression; Classification; Dimension reduction; and Regularization. Unsupervised and semi-supervised learning, along with a few case studies. 4 graduate hours. No professional credit. Prerequisite: MATH 415 and IE 300 or equivalent. All ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MSAA) are eligible to take the course.

IE 530 Optimization for Data Analytics credit: 4 Hours.
Basic optimization methods for data analytics, optimization modeling languages such as AMPL and GAMS, and optimization software including the NEOS server. Linear and integer, and their applications to compressed sensing, data mining, and pattern classification. 4 graduate hours. No professional credit. Prerequisite: IE 411. All ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MSAA) are eligible to take the course.

IE 531 Algorithms for Data Analytics credit: 4 Hours.
This course will introduce the student to a set of algorithms for data analytics which include: hashing, indexes, caching; algorithms for structured datasets; streaming data modes; PageRank algorithms for market-basket models; clustering algorithms; and case studies. 4 graduate hours. No professional credit. Prerequisite: IE 411, CS 225. ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MCAA) are eligible to take the course.

IE 532 Analysis of Network Data credit: 4 Hours.
This course will focus on statistical aspects analyzing network data. It will review illustrative problems relating to aggregation of information, decision-making, and inference tasks over various graphical models and networks. 4 graduate hours. No professional credit. Prerequisite: MATH 412. ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MCAA) are eligible to take the course.
IE 533  Big Graphs and Social Networks  credit: 4 Hours.
This course will cover the fundamentals of graph theory and network optimization. It will focus on algorithmic challenges associated with big graphs and intertwine the Hadoop Framework for solving example problems like shortest paths, link analysis, graph association and inexact graph matching. Applications in social network analysis will include study of network types, random graph models, exact and approximate computation of centrality measure, finding high value individuals, community detection, diffusion processes and cascading models, and influence maximization. 4 graduate hours. No professional credit. Prerequisite: MATH 213, IE 300, IE 411. ISE graduate students and students enrolled in the Master of Science in Advanced Analytics (MCAA) are eligible to take the course.

IE 534  Deep Learning  credit: 4 Hours.
This course provides an introduction to neural networks and recent advances in deep learning. Topics include training and implementation of neural networks, convolution neural networks, recurrent neural networks (LSTM and gated recurrent), residual networks, reinforcement learning, and Q-learning with neural networks. A part of the course will especially focus on recent work in deep reinforcement learning. The course will also cover deep learning libraries (e.g., Chainer, Tensorflow) and how to train neural networks using GPUs and GPU clusters. 4 graduate hours. No professional credit. Prerequisite: CS 446 or equivalent. Graduate students only.

IE 542  Cooperative Problem Solving  credit: 4 Hours.
Advanced graduate seminar on problem-solving models and taxonomies, models of coordination of activity and communication among multiple agents, design of human-machine cooperative problem-solving systems, adaptive automation, and intelligent decision support. Readings drawn from work in pragmatics, distributed artificial intelligence, cognitive engineering, and related areas. 4 graduate hours. No professional credit. Prerequisite: Credit or concurrent registration in either CS 440 or PSYC 527.

IE 546  Human Factors in HCES  credit: 4 Hours.
Same as EPSY 546. See EPSY 546.

IE 547  Healthcare Operations & Sys  credit: 4 Hours.
Delivers an introduction of healthcare systems and strategic issues in their operations, and a background of healthcare, health systems, hospitals and elements of care centers. The course blends quantitative and qualitative material, modeling and practical perspectives, and includes demand management, forecasting methods, workforce planning, inventory and materials planning, supply chain management in healthcare, process improvement and patient flow, facility design and planning, and operations scheduling. Financial performance and metrics, as well as case studies and project work will be included. 4 graduate hours. No professional credit. Prerequisite: The student should have a Bachelors Degree in Industrial Engineering, Operations Management, or closely related disciplines. Specifically, they should have: (1) Basic Calculus sequence (Calc I, II and III at UIUC these are MATH 220, MATH 231, and MATH 241; MATH 234 can also be used); (2) Elementary Probability and Statistics (IE 300 or STAT 400, MATH 463 or equivalent); (3) Notions or Linear Algebra (MATH 415) and preference for Linear Programming (IE 310/IE 311). Priority will be given to students enrolled in the Healthcare Engineering Systems Concentration of M.Eng. degree program.

IE 590  Seminar  credit: 0 Hours.
Presentation and discussion of significant developments in industrial engineering. Approved for S/U grading only. May be repeated.

IE 597  Independent Study  credit: 1 to 4 Hours.
Independent study of advanced problems related to industrial engineering. May be repeated in the same or separate terms if topics vary to a maximum of 12 hours. Prerequisite: Consent of instructor.

IE 598  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in industrial engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. Approved for letter and S/U grading. May be repeated in the same or separate terms if topics vary.

IE 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Informatics (INFO)

INFO Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/INFO)

Courses

INFO 102  Little Bits to Big Ideas  credit: 4 Hours.
Broad introduction to the nature, capabilities, and limitations of computing. Topics range from the way data is represented and stored, to the way today's computers work, to the general ideas of algorithms and computational efficiency, to the future of computing. Covers "Great Ideas" across various areas of the field, including, for example, cryptography and internet security, problem solving, modeling and simulation, and artificial intelligence. Same as CS 102. This course satisfies the General Education Criteria for: Quantitative Reasoning I

INFO 199  Undergraduate Open Seminar  credit: 1 to 3 Hours.
May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor.

INFO 202  Social Aspects Info Tech  credit: 3 Hours.
Explores the way in which information technologies have and are transforming society and how these affect a range of social, political and economic issues from the individual to societal levels. Same as IS 202 and MACS 202. Prerequisite: Sophomore standing. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

INFO 303  Writing Across Media  credit: 3 Hours.
The ability to communicate effectively in multiple types of media is a crucial part of literacy in our society. In this course, students will explore the intersections of various media: print, film, images, sound, etc. Students will consider the ways in which writing--as an object and as a practice--is shaped by multimodal interactions. Also integrates practical activities with broader theoretical issues in order to provide effective strategies for designing multimedia presentations, projects, and texts that integrate photography, video, and sound. Same as WRIT 303. This course satisfies the General Education Criteria for: Advanced Composition

INFO 310  Computing in the Humanities  credit: 3 Hours.
Same as IS 310. See IS 310.

INFO 325  Social Media and Global Change  credit: 3 Hours.
Same as EPS 325, AFST 325, ASST 325, EURO 325, LAST 325, REES 325, and SAME 325. See EPS 325.

INFO 326  New Media, Culture & Society  credit: 3 Hours.
Same as MACS 326. See MACS 326.
INFO 345  Digital & Gender Cultures  credit: 3 Hours.
Same as GWS 345, MACS 345, and SOC 345. See GWS 345.

INFO 390  Special Topics  credit: 1 to 3 Hours.
Explores a variety of informatics topics. Topics and prerequisites vary by section; see current Class Schedule for details. May be repeated up to 6 hours if topics vary.

INFO 399  Individual Study  credit: 0 to 3 Hours.
Individual study in a subject related to informatics not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor.

INFO 403  Game Design: Virtual Worlds  credit: 3 Hours.
Principles of game design, game theory, and current video game technologies. Topics include theory of game design (interaction, play, etc.), story crafting, game engines, graphics, physics simulations, AI simulation, world design, play testing, multi-player interaction models, and user interface design. Students will apply theoretical concepts taught during lectures to a semester-long video game design project of their choosing. All students must participate in the completion of a group design project. The project involves the design and creation of a multi-player, 3D video game using an existing platform/framework/engine. Students must work in groups (of 4-6 students) on the project. Groups will need to meet outside of class, as well as in class, to complete the project. Groups will present their game projects for workshops during the semester and at the end of the course. The class format is lecture, labs, individual and group activities, and discussion. Class participation is required. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

INFO 490  Special Topics  credit: 1 to 4 Hours.
Topics of current interest. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Consent of instructor. Other prerequisites as specified for each topic offering. See Class Schedule.

INFO 491  Ugrad Bioinformatics Seminar  credit: 0 to 2 Hours.
Introduces the field of bioinformatics and computational biology. Same as CPSC 491 and IS 483. 0 to 2 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated in separate terms to maximum of 2 undergraduate hours. Prerequisite: Consent of instructor.

INFO 500  Orientation Seminar  credit: 0 or 1 Hours.
A broad introduction to faculty research in each Informatics Area. Consists of weekly presentations by Informatics faculty highlighting their recent research, practice, and related concepts. Approved for S/U grading only. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Graduate standing in any field.

INFO 510  Research Practicum  credit: 4 Hours.
A one semester directed research project supervised by a member of the informatics faculty in the student's area of specialization or closely related area. These are intended to be practical research, not just literature surveys, and must have a definite output such as a paper or demonstration project. The research should be relevant to the thesis work or preparatory work to support the thesis. Informatics students must take two semesters, usually each semester should be under a different Informatics faculty member, but with the concurrence of their advising committee both may be taken under a single faculty member. Approved for S/U grading only. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Graduate standing in any Informatics.

INFO 590  Advanced Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in Informatics, intended to augment existing curriculum. See Class Schedule for specific topics and prerequisites. 1 to 4 graduate hours. No professional credit. May be repeated if topics vary. Prerequisite: Graduate Student Standing.

INFO 591  Grad Bioinformatics Seminar  credit: 1 to 2 Hours.
This seminar series focuses on research in the field of bioinformatics and computational biology. Same as CPSC 591 and IS 583. 1 to 2 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor.

INFO 597  Individual Study  credit: 2 to 4 Hours.
Individual study in a subject related to informatics not covered in normal course offerings. May be repeated in same term for a maximum of 8 hours or separate terms for a maximum of 16 hours if topics vary. Prerequisite: Consent of instructor.

INFO 599  Thesis Research  credit: 0 to 16 Hours.
Research for Ph.D. thesis. May be repeated in separate terms. Prerequisite: Instructor approval required.

Information Sciences (IS)

IS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IS)

Courses

IS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Undergraduate Open Seminar. May be repeated.

IS 202  Social Aspects Info Tech  credit: 3 Hours.
Same as INFO 202 and MACS 202. See INFO 202. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

IS 310  Computing in the Humanities  credit: 3 Hours.
Explores use and application of technology to scholarly activity in the humanities, including projects that put classic texts on the web or create multimedia application on humanities topics. Same as INFO 310. Prerequisite: Sophomore standing.

IS 351  The Design of Usable Information Interfaces  credit: 3 Hours.
Examines issues of Human Computer Interaction and the design of better computer interfaces. Prerequisite: Sophomore standing.

IS 390  Special Topics in Information Studies  credit: 1 to 3 Hours.
Directed and supervised investigation of selected topics in information studies that may include among others computers and culture; information policy; community information systems; production, retrieval and evaluation of scientific or social science knowledge; computer-mediated communication; and computer-supported cooperative work. May be repeated. Prerequisite: Sophomore standing.

IS 403  Literature and Resources for Children  credit: 2 to 4 Hours.
Evaluation, selection and use of books and other resources for children (ages 0-14) in public libraries and school media centers; explores standard selection criteria for print and nonprint materials in all formats and develops the ability to evaluate and promote materials according to their various uses (personal and curricular) and according to children's various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.
IS 404  Literature and Resources for Young Adults  credit: 2 to 4 Hours.
Evaluation, selection and use of books and other resources for young adults (ages 12-18) in public libraries and school media centers; explores standard selection criteria for print and nonprint materials in all formats and develops the ability to evaluate and promote materials according to their various uses (personal and curricular) and according to young adults' various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.

IS 409  Storytelling  credit: 2 to 4 Hours.
Fundamental principles of the art of storytelling including techniques of adaptation and presentation; content and sources of materials; methods of learning; practice in storytelling; planning the story hour for school and public libraries and other public information settings; and audio, video, and digital media. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.

IS 418  Community Engagement  credit: 3 or 4 Hours.
Community engagement refers to the multiple ways that information professionals in libraries and other settings learn about, collaborate with, and provide service and outreach to community members. Provides an introduction to, and overview of, community engagement theory and practice. A significant portion of coursework will take the form of service learning or community-based research via approved projects that match students' interests. 3 undergraduate hours. 4 graduate hours.

IS 445  Information Books and Resources for Youth  credit: 2 to 4 Hours.
Evaluation, selection and use of information books and other resources for young people (ages 0-18) in public libraries and school media centers; explores standard selection criteria for factual print and nonprint materials in all formats and develops the ability to evaluate and promote nonfiction books and resources according to their various uses (personal and curricular) and according to young people’s various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours.

IS 446  Fantasy Literature and Media for Youth  credit: 2 to 4 Hours.
The selection and evaluation of historical and contemporary fantasy literature and media for library collections aimed at children and young adults. Texts examined will include books, movies, and games. 3 undergraduate hours. 2 or 4 graduate hours.

IS 451  Introduction to Network Information Systems  credit: 4 Hours.
Hands-on introduction to technology systems for use in information environments. The course steps students through choosing, installing, and managing computer hardware and operating systems, as well as networking hardware and software. The course also explores alternatives for administering IT and how to assess emerging technologies and their applicability to library settings. While students are expected to have basic computer competencies per the School of Information Sciences admissions requirements, the goal of the course is to provide practical detailed knowledge of the technology for all levels of competency. The primary objective is to provide a conceptual understanding of the topics of the day through concrete hands-on examples of implementation. By learning the underlying concepts, students will be better prepared to help design networked systems that not only work well today, but also develop systems that can be easily adapted for the needs and technologies of tomorrow. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours.

IS 452  Foundations of Information Processing  credit: 2 or 4 Hours.
Covers common data, document processing, and programming constructs and concepts. Focuses on problem solving and abstraction with a programming language. By the end of the course students will be able to design, develop and test a moderately complex computer program to manage full text, bibliographic records or multimedia. The course prepares students for working with applications in data analytics, data science, digital libraries, text mining and knowledge management. No prior programming background is assumed. 4 undergraduate hours. 2 or 4 graduate hours.

IS 453  Systems Analysis and Management  credit: 3 or 4 Hours.
Covers how to evaluate, select and manage information systems that will be used in the daily operation of libraries and information centers. Includes the systems used by technical staff and the information consumers. Course will focus on information as a product. Attention is given to the operation of an organization as a whole and the impact of change on the integration of resources, work flow and usability. Formal methods for modeling systems, and industry practice techniques of analysis are used to address these problems and opportunities. 3 undergraduate hours. 4 graduate hours.

IS 456  Information Storage and Retrieval  credit: 3 or 4 Hours.
Introduces problems of document representation, information need specification, and query processing. Describes the theories, models, and current research aimed at solving those problems. Primary focus is on bibliographic, text, and multimedia records. 3 undergraduate hours. 4 graduate hours.

IS 457  Introduction to Data Science  credit: 4 Hours.
This course introduces students to data science approaches that have emerged from recent advances in programming and computing technology. They will learn to collect and use data from a variety of sources, including the web, in a modern statistical inference and visualization paradigm. The course will be based in the programming language R, but will also use HTML, regular expressions, basic unix tools, XML, and SQL. Supervised and unsupervised statistical learning techniques made possible by recent advances in computing power will also be covered. 4 undergraduate hours. 4 graduate hours.

IS 458  Instructional Strategies and Techniques for Information Professionals  credit: 2 to 4 Hours.
Provides an introduction to learning theories and instructional methods used in a variety of information settings, including libraries, archives, museums, online, and educational environments. Includes an overview of theoretical and applied research and discusses relevant issues and concepts. Students will have an opportunity to design and present an instructional program. 3 undergraduate hours. 2 or 4 graduate hours.

IS 461  Museum Informatics  credit: 4 Hours.
The course examines various ways that information technologies are and might be used in museums and other cultural heritage settings. Museum websites, visitor apps, interactive exhibits, and uses of digitized and federated collections are explored. Students gain an introduction to Design Thinking by working on a final project that involves the development of a novel computational resource. Students are encouraged to approach class topics from their individual backgrounds in the humanities, sciences, or social sciences. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior or senior standing and consent of instructor for undergraduates; consent of instructor for non-iSchool graduate students for on-campus sections.
IS 462 Information Assurance credit: 3 or 4 Hours.
The course provides an introduction to the concepts, technologies, practices and challenges of Information Assurance. It takes a broad view of Information Security and Privacy and covers the essential principles for the protection of information systems; the relevant technologies; organizational concerns; policies, human aspects; legal approaches; criminology; and ethical issues. Students will gain an appreciation for the difficulty of designing, developing, deploying and maintaining information systems, services and software products that are secure and comply with expectations of security and privacy. 3 undergraduate hours. 4 graduate hours.

IS 482 Writing Technologies credit: 3 or 4 Hours.
Same as ENGL 482. See ENGL 482.

IS 483 Ugrad Bioinformatics Seminar credit: 0 to 2 Hours.
Same as CPSC 491 and INFO 491. See INFO 491.

IS 490 Advanced Topics in Information Studies credit: 2 to 4 Hours.
Directed and supervised investigation of selected topics in information studies that may include among others the social, political, and historical contexts of information creation and dissemination; computers and culture; information policy; community information systems; production, retrieval and evaluation of knowledge; computer-mediated communication. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated. Prerequisite: For undergraduates, junior standing and IS 202, or consent of instructor.

IS 501 Information Organization and Access credit: 4 Hours.
Emphasizes information organization and access in settings and systems of different kinds. Traces the information transfer process from the generation of knowledge through its storage and use in both print and non-print formats. Consideration will be given to the creation of information systems: the principles and practice of selection and preservation, methods of organizing information for retrieval and display, the operation of organizations that provide information services, and the information service needs of various user communities. 4 graduate hours. No professional credit. Required M.S. in library and information science degree core course.

IS 502 Libraries, Information and Society credit: 2 or 4 Hours.
Explores major issues in the library and information science professions as they involve their communities of users and sponsors. Analyzes specific situations that reflect the professional agenda of these fields, including intellectual freedom, community service, professional ethics, social responsibilities, intellectual property, literacy, historical and international models, the socio-cultural role of libraries and information agencies and professionalism in general, focusing in particular on the interrelationships among these issues. 2 or 4 graduate hours. No professional credit. Prerequisite: Required M.S. in library and information science degree core course.

IS 503 Use and Users of Information credit: 4 Hours.
Explores information needs and uses at a general level, addressing formal and informal information channels, barriers to information, issues of value, and impacts of technology. Examines information seeking practices of particular communities and within various environments, introducing recent approaches to user-centered system design and digital library development. Provides an overview of methods that can be used to study information needs, information seeking behavior, and related phenomena. 4 graduate hours. No professional credit. Prerequisite: IS 501.

IS 504 Reference and Information Services credit: 4 Hours.
Explores reference and information services in a variety of settings, introduces widely used print and online sources, and develops question negotiation skills and search strategies. 4 graduate hours. No professional credit.

IS 505 Administration & Management of Libraries and Information Centers credit: 4 Hours.
Designed to explore the principles that govern how organizations and institutions work, this course provides a foundation for and introduction to the theories, practices and procedures involved in the management and administration of libraries and information centers. 4 graduate hours. No professional credit.

IS 506 Youth Services Librarianship credit: 4 Hours.
Theory and techniques in planning, implementing and evaluating library programs/services for youth (age 0-18) in public and school libraries/media centers; the knowledge base, skills, and competencies needed by the library media professional in the development of all aspects of young people's reading/viewing/listening and information literacy skills. 4 graduate hours. No professional credit.

IS 507 Introduction to Bibliographic Metadata credit: 4 Hours.
Introduction to basic principles and concepts of descriptive and subject cataloging in the context of information service needs for various user communities. Explores principles, structures, standards, technologies and practices relating to organizing and creating access to print and non-print media. Includes coverage of subject analysis and descriptive practices. Introduces controlled vocabularies. 4 graduate hours. No professional credit. Prerequisite: IS 501, or concurrent enrollment in IS 501 and IS 507.

IS 508 Collection Development credit: 4 Hours.
Examines issues affecting the development and management of collections for academic, public, special, and school libraries: collection development policies, collection assessment, the marketplace, publishing, legal issues, and budget allocation; document delivery; collaboration and cooperation. 4 graduate hours. No professional credit. Prerequisite: IS 501, or concurrent enrollment in IS 501 and IS 508.

IS 510 Adult Public Services credit: 4 Hours.
The literature, history, and problems of providing library service to the general adult user; investigation of user characteristics and needs, and the effectiveness of various types of adult services. 4 graduate hours. No professional credit.

IS 511 Bibliography credit: 2 or 4 Hours.
Covers enumerative bibliography, the practices of compiling lists; analytical bibliography, the design, production, and handling of books as physical objects; and historical bibliography, the history of books and other library materials, from the invention of printing to the present. 2 or 4 graduate hours. No professional credit. Prerequisite: Consent of instructor.

IS 512 History of Libraries credit: 2 or 4 Hours.
The origins, development, and evolution of libraries and related institutions, from antiquity to the twentieth century, as a reflection of literacy, recognition of archival responsibility, humanistic achievement, scientific information needs, and service to society. Same as MDIA 512. 2 or 4 graduate hours. No professional credit.

IS 514 History of Children's Lit credit: 2 or 4 Hours.
Interpretation of children's literature from the earliest times, including the impact of changing social and cultural patterns on books for children; attention to early printers and publishers of children's books and to magazines for children. 2 or 4 graduate hours. No professional credit.

Information listed in this catalog is current as of 04/2018
Information Sciences (IS)

IS 515 Media Literacy for Youth credit: 2 or 4 Hours.
Provides students with theoretical knowledge and practical methods useful to librarians and other professionals working with young people and media. Building on traditional understandings of literacy, media literacy explores the consumption and production of diverse types of texts including print, images, games, and music. Topics for this course may include the role of race in media, media literacy as a catalyst for social change, and intellectual property issues related to media education. 2 or 4 graduate hours. No professional credit.

IS 516 School Library Media Center credit: 2 or 4 Hours.
School Library Information Specialists serve children and young adults (ages 5-18) in K-12 school library media centers. Students will acquire specific knowledge, skills and competencies needed to design, develop, integrate and assess curriculum and instruction with an emphasis on the information needs of K-12 students. Readings and projects provide students with opportunities to apply the practical knowledge and skills they have learned about building reading literacy, teaching information literacy skills, collaborating with teachers and integrating resources into teaching and learning. 2 or 4 graduate hours. No professional credit.

IS 518 Community Informatics credit: 4 Hours.
Survey of an emerging field that studies how local, historical communities use information and communication technologies or otherwise access, create, organize, and share information. Covers key principles for working in libraries or the wider non-profit/public sectors as individuals, organizations, and communities harness new technologies and media. Prepares both professionals and researchers, whatever their technology background. Especially useful for those interested in public or community libraries, youth services, university public engagement, social work, education, and anyone interested in working with or studying underserved communities. 4 graduate hours. No professional credit.

IS 519 Soc Sc Research in LIS credit: 4 Hours.
Introduces students to the fundamentals of doing social science research in LIS. Students will learn how to frame a research problem, choose an appropriate research method, apply it, and write up the research for presentation and publication. 4 graduate hours. No professional credit.

IS 522 Information Sources and Services in the Sciences credit: 2 or 4 Hours.
Overview of the information needs and practices of researchers, practitioners, and the general public. Detailed consideration of disciplinary literatures and print and electronic reference materials. Advanced training in addressing reference questions and research problems in the sciences. 2 or 4 graduate hours. No professional credit. Prerequisite: IS 504 or consent of instructor.

IS 523 Information Sources and Services in the Social Sciences credit: 2 or 4 Hours.
Overview of the information needs and practices of researchers, practitioners, and the general public. Detailed consideration of disciplinary literatures and print and electronic reference materials. Advanced training in addressing reference questions and research problems in the social sciences. 2 or 4 graduate hours. No professional credit. Prerequisite: IS 504 or consent of instructor.

IS 524 Information Sources and Services in the Arts and Humanities credit: 2 or 4 Hours.
Overview of the information needs and practices of researchers, practitioners, and the general public. Detailed consideration of disciplinary literatures and print and electronic reference materials. Advanced training in addressing reference questions and research problems in the arts and humanities. 2 or 4 graduate hours. No professional credit. Prerequisite: IS 504 or consent of instructor.

IS 525 Government Information credit: 4 Hours.
Aims to acquaint students with government publications, their variety, interest, value, acquisition, and bibliographic control, and to develop proficiency in their reference and research use; considers publications of all types and all governments (local, national, international) with special emphasis on U. S., state and federal governments, and on the United Nations and its related specialized agencies. 4 graduate hours. No professional credit. Prerequisite: IS 504 or consent of instructor.

IS 526 Searching Online Information Systems credit: 2 or 4 Hours.
Explores the state-of-the-art in online information retrieval systems, with particular emphasis on their use as part of reference service in libraries; acquaints students with the characteristics of both bibliographic and nonbibliographic databases; and trains students in the use of at least one currently available online retrieval system. 2 or 4 graduate hours. No professional credit. Prerequisite: IS 504 or consent of instructor.

IS 527 Literacy, Reading, and Readers credit: 4 Hours.
Reading and literacy play a central role in all areas of LIS, as well as in education, communication, literature, and writing studies. This course considers reading as a physical, social, and educational activity that is historically and culturally situated. It provides a multidisciplinary investigation into different forms of literacy and how people acquire them. Drawing upon scholarship in LIS, education, literature, history, sociology, psychology, and anthropology, and with special consideration given to age, gender, class, religion, and culture, we will expand upon traditional notions of literacy and explore the range of scholarly approaches to the study of literacy, reading, and readers. For assignments, students choose between an experiential track, which offers practical experience through volunteer work in a literacy tutoring position, or a scholarship track, which features a research project without a volunteer component. All students have the same weekly readings and share knowledge gained from their volunteer placement and research. 4 graduate hours. No professional credit.

IS 528 Adult Popular Literature credit: 2 or 4 Hours.
A survey of genre fiction, readers’ advisory services, the promotion of fiction, narrative nonfiction & media collections in libraries, the social effects of reading, and publishing as a business. Course objectives include: understanding why adults read for pleasure; gaining familiarity with popular fiction genres and their authors; understanding principles and tools of readers’ advisory services; examining the issues of popular fiction publishing including the impact of technology in creating new formats; and the process of acquisition, maintenance, and marketing of popular fiction in libraries. 2 or 4 graduate hours. No professional credit.

IS 530 Information Needs of Particular Communities credit: 2 or 4 Hours.
Special topics sections for in-depth study of the characteristics and information needs of specialist users of libraries; goals and objectives, policies, and services; reference and bibliographical aids; and effective services that satisfy these special needs. 2 or 4 graduate hours. No professional credit. May be repeated. Prerequisite: IS 504 or consent of instructor.

Information listed in this catalog is current as of 04/2018
IS 531 Foundations of Data Curation credit: 4 Hours.
Data curation is the active and on-going management of data through its lifecycle of interest and usefulness to scholarship, science, and education; curation activities and policies enable data discovery and retrieval, maintain data quality and add value, and provide for re-use over time. This course provides an overview of a broad range of theoretical and practical problems in the emerging field, examining issues related to appraisal and selection, long-lived data collections, research lifecycles, workflows, metadata, and legal and intellectual property issues. 4 graduate hours. No professional credit.

IS 532 Theory & Practice of Data Cleaning credit: 4 Hours.
Data cleaning (also: cleansing) is the process of assessing and improving data quality for later analysis and use, and is a crucial part of data curation and analysis. This course identifies data quality issues throughout the data lifecycle, and reviews specific techniques and approaches for checking and improving data quality. Techniques are drawn primarily from the database community, using schema-level and instance-level information, and from different scientific communities, which are developing practical tools for data pre-processing and cleaning. Same as CS 513. 4 graduate hours. No professional credit.

IS 534 Data Policy Seminar credit: 4 Hours.
This course will survey recent policy changes and the literature regarding scientific data, including archiving, repositories, legal encumbrances and access, the lifecycle of data, and strategies for reporting data 4 graduate hours. No professional credit.

IS 537 Race, Gender, and Sexuality in the Information Professions credit: 2 Hours.
This course examines how issues of race, gender and sexuality are represented in information professions and will study how they affect, and are affected by, information technologies. Socially constructed (mis)representations (or lack of representations) of race, gender and sexual identity will be critically examined in different settings as they intersect, overlap, and impact the information use, technology practices, and the design of information resources and services in the library and information science and related fields. 2 graduate hours. No professional credit. Prerequisite: Restricted to LIS graduate students.

IS 538 Competitive Intelligence & Knowledge Management credit: 4 Hours.
This course examines two of the most popular practices of business research: Competitive Intelligence (CI) & Knowledge Management (KM). This course provides theoretical foundations and conceptual framework of CI & KM, as students acquire skills in translating research data into actionable intelligence and managing organizations’ intellectual capital systematically. This course will introduce concepts of strategic analyses of businesses, and students will also explore key KM technologies widely used in the industry. 4 graduate hours. No professional credit.

IS 539 Information Consulting credit: 4 Hours.
This course is designed to provide fundamental knowledge in providing research services and also introduce the latest trends and innovative approaches in research services. Information professionals are increasingly being challenged to provide not just data but insights and recommendations that are critical for strategic decision making. Using methodologies widely adopted by professional firms and researchers, this course will cover basics of research consulting including framing research problems, developing deliverables, and presenting professionally. 4 graduate hours. No professional credit.

IS 540 Applied Business Research credit: 4 Hours.
As an experiential learning class, this course covers advanced techniques of business research with an emphasis on managing real-world client projects. Students will be assigned to teams and work with clients to identify research requirements and construct recommendations. Students will acquire critical skills in creating professional deliverables through client engagements. Students will build professional research portfolios at the conclusion of their projects. 4 graduate hours. No professional credit. May be repeated in separate terms up to 8 hours if topics vary. Prerequisite: Instructor approval required.

IS 542 Data, Statistical Models and Information credit: 4 Hours.
An introduction to statistical and probabilistic models as they pertain to quantifying information, assessing information quality, and principled application of information to decision making, with focus on model selection and gauging model quality. The course reviews relevant results from probability theory, parametric and non-parametric predictive models, as well as extensions of these models for unsupervised learning. Applications of statistical and probabilistic models to tasks in information management (e.g. prediction, ranking, and data reduction) are emphasized. 4 graduate hours. No professional credit. Prerequisite: Graduate standing.

IS 543 Sociotechnical Information Systems credit: 4 Hours.
The character, success, and costs/benefits of information technologies are socio-technical matters. Because of this, best practice for IT design and integration relies on participants’ ability to understand and create for the totality of those settings, including social and technical dimensions. This course provides students with analytic tools for examining sociotechnical settings and experience in applying that knowledge in IT modeling, design and management. 4 graduate hours. No professional credit.

IS 545 Social Justice in the Information Professions credit: 2 Hours.
This course is intended to provide a historic and contemporary overview of social justice and advocacy work in librarianship. The course will be primarily focused on activities in the United States, though international movements and perspectives will be addressed. Topics include: desegregation of libraries and professional associations; recruitment and retention of library workers from traditionally underrepresented populations; library outreach; intellectual freedom; and emerging critical theories and issues in the field. 2 graduate hours. No professional credit. Prerequisite: IS 505 or consent of instructor.

IS 546 Intellectual Freedom and Censorship credit: 2 Hours.
Examines intellectual freedom issues throughout the United States and the world. Approaches intellectual freedom as an ethical issue based in interpretations of the First Amendment and the United Nations Declaration of Human Rights. The course encourages information professionals to view commitment to intellectual freedom as a core professional value and gives students the opportunity to develop skills and strategies needed to navigate censorship controversies in the workplace. 2 graduate hours. No professional credit. Prerequisite: IS 502 or consent of instructor.
IS 547  Information Services for Diverse Populations  credit: 2 or 4 Hours.
This course is designed to prepare future information professionals to develop and provide inclusive services to underrepresented populations, and to analyze and evaluate services to ensure equality of access to information in a range of institutional settings. Through readings, discussion, guest lectures, and site visits, students will explore diversity issues that impact information services and develop skills for planning, implementing, and evaluating programs and services for addressing these issues. Specific diversity issues include race and ethnicity; education; language; literacy; disability; gender and sexual orientation; social class; national origin; physical, psychological, and learning ability; and age. 2 or 4 graduate hours. No professional credit.

IS 548  Library Buildings  credit: 2 or 4 Hours.
Studies the library's physical plant in the light of changing concepts and patterns of library service; analyzes present-day library buildings (both new and remodeled), and their comparison with each other as well as with buildings of the past; examines the interrelationship of staff, collections, users, and physical plant; discussion supplemented by visits to new libraries and conference with their staffs. A two-day field trip is required. Additional fees may apply. See Class Schedule. 2 or 4 graduate hours. No professional credit.

IS 549  Economics of Information  credit: 4 Hours.
The various definitions of information in economic and social terms as discussed in library and information science as well as other literatures are related to government public policies and social policies. Issues such as information as a commodity and as a public good are explored. The impact of the economics of information and related public policies on libraries and information centers is discussed from a national and international perspective. 4 graduate hours. No professional credit.

IS 550  Usability Engineering  credit: 4 Hours.
The course provides an introduction to: issues in Human Computer Interaction; analysis of interfaces and their use; the interface design process as an engineering activity; designing usable interfaces under constraints; and the rapid prototyping and evaluation cycle. The course covers interface design in multiple contexts including websites, web-based applications, smartphone apps, regular computer apps and new contexts of interacting with computers. Elective course for the CAS in Digital Libraries concentration. 4 graduate hours. No professional credit.

IS 551  Information Modeling  credit: 4 Hours.
Combines theoretical examination of the design of metadata schema with their practical application in a variety of settings. Hands-on experience in the creation of descriptive, administrative, and structural metadata, along with their application in systems such as OAI harvesting, OpenURL resolution systems, metadata, and ontologies. The basic concepts underlying these methods are, respectively, relations, entities, grammars, and logic. Implementations include relational database design, ER/EER/UML diagrams, XML markup languages, and RDF/OWL semantic web languages. First order logic is emphasized throughout as the foundational framework for information modeling in general, and for contemporary web-based information management and delivery systems (including semantic web technologies) in particular. 4 graduate hours. No professional credit.

IS 552  Metadata in Theory & Practice  credit: 4 Hours.
Introduces the higher education environment in which academic librarians and other information professionals operate in order to prepare students for leadership roles both within academic libraries and in their parent institutions. This course explores academic librarianship through a variety of lenses including: history and organization of higher education; accreditation; characteristics of students; roles of faculty and other campus professionals; and current issues and challenges. 4 graduate hours. No professional credit.

IS 553  Library Buildings  credit: 2 or 4 Hours.
Studies the library's physical plant in the light of changing concepts and patterns of library service; analyzes present-day library buildings (both new and remodeled), and their comparison with each other as well as with buildings of the past; examines the interrelationship of staff, collections, users, and physical plant; discussion supplemented by visits to new libraries and conference with their staffs. A two-day field trip is required. Additional fees may apply. See Class Schedule. 2 or 4 graduate hours. No professional credit.

IS 554  Library Buildings  credit: 2 or 4 Hours.
Studies the library's physical plant in the light of changing concepts and patterns of library service; analyzes present-day library buildings (both new and remodeled), and their comparison with each other as well as with buildings of the past; examines the interrelationship of staff, collections, users, and physical plant; discussion supplemented by visits to new libraries and conference with their staffs. A two-day field trip is required. Additional fees may apply. See Class Schedule. 2 or 4 graduate hours. No professional credit.

IS 555  Usability Engineering  credit: 4 Hours.
The course provides an introduction to: issues in Human Computer Interaction; analysis of interfaces and their use; the interface design process as an engineering activity; designing usable interfaces under constraints; and the rapid prototyping and evaluation cycle. The course covers interface design in multiple contexts including websites, web-based applications, smartphone apps, regular computer apps and new contexts of interacting with computers. Elective course for the CAS in Digital Libraries concentration. 4 graduate hours. No professional credit.

IS 556  Implementation of Information Storage and Retrieval Systems  credit: 4 Hours.
Engages the design, deployment and evaluation of information retrieval systems in a variety of environments. Emphasis is twofold. First, students will study advance methods of query and document representation and related formalisms for performing retrieval. Second, students will work with a variety of data sets and several open-source information retrieval and information analysis software suites. The course is intended to extend students’ understanding of state-of-the art search and retrieval methods. 4 graduate hours. No professional credit. Prerequisite: IS 452 (either the 2 credit hours or the 4 credit hours are acceptable) and IS 456.

IS 559  Network Analysis  credit: 4 Hours.
Network Analysis has become a widely adopted method for studying the interactions between social agents, information and infrastructures. The strong demand for expertise in network analysis has been fueled by the widespread acknowledgement that everything is connected and the popularity of social networking services. This interdisciplinary course introduces students to fundamental theories, concepts, methods and applications of network analysis in a practical manner. Students learn and practice hands-on skills in collecting, analyzing and visualizing network data. 4 graduate hours. No professional credit.

IS 560  Digital Libraries  credit: 4 Hours.
A comprehensive examination of the history and state-of-the-art in digital library research and practice. Focuses upon the theoretical, technological, human factors and evaluative components of digital library research and practice. Course includes an intensive reading of the literature, review of existing technologies and proof-of-concepts implementation projects. Students should have access to a personal computer on which they can experiment on their own with downloaded software tools. Students must be competent in basic computing including the installation and configuration of software packages. 4 graduate hours. No professional credit. Prerequisite: IS 501 or consent of instructor; previous or concurrent enrollment in IS 452 (either the 2 credit hours or the 4 credit hours of IS 452 are acceptable), or proof of competency in programming.

IS 561  Information Modeling  credit: 4 Hours.
An introduction to the foundations of information modeling methods used in current digital library applications. The specific methods considered include relational database design, conceptual modeling, markup systems, and ontologies. The basic concepts underlying these methods are, respectively, relations, entities, grammars, and logic. Implementations include relational database design, ER/EER/UML diagrams, XML markup languages, and RDF/OWL semantic web languages. First order logic is emphasized throughout as the foundational framework for information modeling in general, and for contemporary web-based information management and delivery systems (including semantic web technologies) in particular. 4 graduate hours. No professional credit.

IS 562  Metadata in Theory & Practice  credit: 4 Hours.
Combines theoretical examination of the design of metadata schema with their practical application in a variety of settings. Hands-on experience in the creation of descriptive, administrative, and structural metadata, along with their application in systems such as OAI harvesting, OpenURL resolution systems, metasearch systems and digital repositories, will help students develop a thorough understanding of current metadata standards as well as such issues as crosswalking, metadata schema, metadata's use in information retrieval and data management applications, and the role of standards bodies in metadata schema development. 4 graduate hours. No professional credit. Prerequisite: IS 501 or consent of instructor.

IS 567  Academic Librarianship  credit: 4 Hours.
Introduces the higher education environment in which academic librarians and other information professionals operate in order to prepare students for leadership roles both within academic libraries and in their parent institutions. This course explores academic librarianship through a variety of lenses including: history and organization of higher education; accreditation; characteristics of students; roles of faculty and other campus professionals; and current issues and challenges. 4 graduate hours. No professional credit.
IS 568  Theological Librarianship  credit: 2 or 4 Hours.
Provides an overview of the contexts, materials, services, and issues characterizing theological librarianship. Students interact with a number of librarians currently working in the field. 2 or 4 graduate hours. No professional credit.

IS 569  Financial Management  credit: 4 Hours.
Designed to familiarize the student with the basic principles of library financial administration, including budgeting and planning within the mission and goals of the organization. Provides an orientation to the variety of financial management techniques appropriate for libraries and information centers, with an emphasis on sources for obtaining financial support, controlling expenditures, creating and controlling budgets, financial decision making and exploring specific financial and budgetary problems for the major operational areas of libraries - public services, technical services, information technology and facilities. 4 graduate hours. No professional credit.

IS 571  History of the Book  credit: 4 Hours.
Explores the role of the book in the production and transmission of knowledge through time. Major themes include the design, materiality, and performance of reading and writing technologies. Particular attention will be paid to the graphic representation and visualization of information across media. Students will examine different approaches to the study of books and documents, including those of palaeography, diplomacy, bibliography, art history, musicology, textual criticism, digital humanities, and new media studies. 4 graduate hours. No professional credit.

IS 572  Medieval Manuscripts and Early Modern Books  credit: 2 Hours.
This course explores a wide variety of medieval manuscripts from their creation in the Middle Ages to today and considers the following topics: production of manuscripts, use of books and their cultural significance, patronage and demand for books, translations, literacy, book collecting, libraries and reproduction in the modern age. The course will include visits to the Rare Book and Manuscript Library and hands-on experience with manuscripts. 2 graduate hours. No professional credit.

IS 577  Advanced Bibliographic Metadata  credit: 4 Hours.
Seminar on theoretical and applied approaches to cataloging, including the creation and management of complex descriptive and subject metadata. Topics include current developments in conceptual models for bibliographic materials; information processing and mapping; socio-cultural and critical warrant; and ethical foundations of information organization. Students will engage critically with principles and practices in the application of bibliographic standards in a variety of contexts. 4 graduate hours. No professional credit. Prerequisite: IS 507 or consent of instructor.

IS 578  Technical Services Functions  credit: 4 Hours.
Seminar on the principles, problems, trends, and issues of acquiring, identifying, recording, and conserving/preserving materials in all types of libraries and information centers; includes the special problems of serials management; emphasizes service aspects. 4 graduate hours. No professional credit.

IS 580  Rare Book and Special Collections Librarianship  credit: 2 Hours.
Designed as a practical introduction to Rare Book and Special Collections Librarianship, to cover for the neophyte as well as the experienced librarian the many issues of these departments’ responsibilities, including selection, acquisition, receiving, cataloging, processing, shelving, circulation, inter-library loan, reference, preservation and conservation, security, exhibition, publication, and so forth, including the uses of information technology. 2 graduate hours. No professional credit.

IS 581  Administration and Use of Archival Materials  credit: 4 Hours.
Administration of archives and manuscript collections in various types of institutions. Theoretical principles and archival practices of appraisal, acquisition, accessioning, arrangement, description, preservation, and reference services. Topics will include: records management programs, collecting archives programs/special collections, legal and ethical issues, public programming and advocacy, and the impact of new information technologies for preservation and access. Lectures, discussion, internet demonstration, and field trips to the Special Collections Department and University Archives. 4 graduate hours. No professional credit.

IS 582  Preserving Info Resources  credit: 4 Hours.
Covers the broad range of library preservation and conservation for book and nonbook materials relating these efforts to the total library environment; emphasizes how the preservation of collections affects collection management and development, technical services, access to materials and service to users. 4 graduate hours. No professional credit.

IS 583  Grad Bioinformatics Seminar  credit: 1 to 2 Hours.
Same as CPSC 591 and INFO 591. See INFO 591.

IS 584  Archival Arrangement and Description  credit: 2 Hours.
Provides seminar discussions and a hands-on processing experience that applies current theories and practices utilized to solve the most common problems that are encountered by today’s archivists and curators when arranging and describing historical records, archives, manuscripts, and artifacts. Issues of intellectual and physical arrangement, description, and access are addressed. 2 graduate hours. No professional credit.

IS 585  International Librarianship  credit: 4 Hours.
Focuses on international librarianship (how librarians communicate on international issues) and how that differs from comparative librarianship (the comparative study of library services in specific contexts). Examines how concepts such as "one-world" and "free flow of information" are valid in the international information arena; the importance of internationalizing library education; the role of international information agencies and the need for formulating information policies. Local and regional issues relating to library and information science are studied in the context of global issues. 4 graduate hours. No professional credit.

IS 586  Digital Preservation  credit: 4 Hours.
Examines current problems with and approaches to digital preservation that are fundamental to the long-term accessibility of digital materials. Examines the range of current research problems, along with emerging methods and tools, and assesses a variety of organizational scenarios to plan and implement a preservation plan. Topics include basic information theory, preservation of complex digital objects; standards and specifications; sustainability and risk assessment; authenticity, integrity, quality control, and certification; and management of preservation activities. 4 graduate hours. No professional credit.

IS 587  History and Foundations of Library and Information Science  credit: 4 Hours.
This required course for all first-semester library and information science (LIS) doctoral students introduces students to the historical foundations of LIS. Examinations of the interactions of socio-cultural, technological and professional factors underlying the emergence of LIS provide a basis for exploring more recent developments in theory and practice. 4 graduate hours. No professional credit. Prerequisite: LIS doctoral student in their first semester.
IS 588  Research Design in Library and Information Science  credit: 4 Hours.
Provides an introduction to the design of LIS research, beginning with an in-depth consideration of the philosophical and logical underpinnings of research. A brief survey of different methods used in LIS research is followed by an exploration of research design issues through comparative hands-on exercises. Throughout the course, the emphasis will be on research design choices, especially the connections between research questions and research methods. Required Ph.D. course. 4 graduate hours. No professional credit.

IS 590  Advanced Problems in Information Sciences  credit: 1 to 4 Hours.
Variety of newly developed and special topics courses on different aspects of the information sciences intended to augment the existing curriculum, offered as sections of IS 590. Additional fees may apply. See Class Schedule. 1 to 4 graduate hours. No professional credit. May be repeated.

IS 591  Practicum  credit: 2 Hours.
Supervised field experience of professional-level duties in an approved library or information center. 2 graduate hours. No professional credit. Approved for S/U grading only. A maximum of 2 hours may be applied toward a degree program. Prerequisite: Completion of 14 graduate hours of information sciences courses; submission of Practicum forms.

IS 592  Independent Study  credit: 2 to 4 Hours.
Permits the intermediate or advanced student opportunity to undertake the study of a topic not otherwise offered in the curriculum or to pursue a topic beyond or in greater depth than is possible within the context of a regular course. 2 to 4 graduate hours. No professional credit. May be repeated. Only eight hours will apply to the Certificate of Advanced Study program. Prerequisite: Submission of "Request to Enroll in IS 592" form.

IS 593  CAS Project  credit: 0 to 8 Hours.
Individual study of a problem in library and information science; forms the culmination of the Certificate of Advanced Study program. 0 to 8 graduate hours. No professional credit. Approved for S/U grading only. May be repeated. Only eight hours will apply to the Certificate of Advanced Study. Prerequisite: Admission to Certificate of Advanced Study program in library and information science; submission of "Request to Enroll in IS 593 - CAS Project" form.

IS 594  Information Sciences Practice  credit: 0 Hours.
Full-time or part-time practice of of any information sciences in an off-campus information science environment. 0 graduate hours. No professional credit. Approved for S/U grading only. May be repeated. Prerequisite: IS students only.

IS 599  Thesis Research  credit: 0 to 16 Hours.
Individual study and research. 0 to 16 graduate hours. No professional credit. Approved for S/U grading only. May be repeated. M.S. candidates, 0 to 8 hours. Doctoral candidates, 0 to 16 hours. Prerequisite: MS students must submit a "Request to Enroll in IS 599 - Master's Thesis" form.

Integrative Biology (IB)

IB Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IB)

Courses

IB 100  Biology in Today's World  credit: 3 Hours.
Introduction to biology for the non-major. In-depth focus on three contemporary problems-maintaining a livable environment, issues of human health, and evolution. Lecture and discussion. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 103  Introduction to Plant Biology  credit: 4 Hours.
Basic principles of growth and form, physiology, genetics, evolution, and ecology in plant biology. Lecture and laboratory. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 104  Animal Biology  credit: 4 Hours.
Introductory zoological concepts with emphasis on the diversity and comparative anatomy of animals and the fundamentals of physiology, genetics, evolution, and behavior. Lecture and laboratory. The laboratory includes vertebrate dissection.

IB 105  Environmental Biology  credit: 3 Hours.
Introduction to ecological principles in relation to understanding environmental problems; lecture and discussion emphasize impacts upon ecosystems by human activities such as air and water pollution, usage of pesticides and pest control measures, expansion of agriculture in tropics and arid regions, harvesting the oceans, and development of energy sources. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 108  The Biology of Dinosaurs  credit: 3 Hours.
The origin, diversity, and extinction of dinosaurs will serve as a conceptual framework to explore fundamental principles of biology. We will consider dinosaurs as animals, examining evidence for their physiology and behavior, and how evolution and speciation produced the diversity of dinosaurs. We will relate the influence of Earth's changing environments on dinosaurs to environmental change on human timescales. We will emphasize how scientists collect and evaluate fossil data through an understanding of living organisms. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 109  Insects and People  credit: 3 Hours.
Fundamentals of insect biology as reflected in human culture; insect physiology, ecology, and behavior discussed in the context of art, literature, movies, medicine, sports, law, and history. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 150  Organismal & Evolutionary Biol  credit: 4 Hours.
Introduction to physiology, genetics, and evolution of organisms, and their ecology and diversity. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 151  Organismal & Evol Biol Lab  credit: 1 Hour.
Topics follow lecture topics in IB 150 and include labs in ecology, plant and animal function, and genetics and evolution. Designed for non-majors needing a year of biology with lab. Credit is not given for IB 151 for Integrative Biology or Molecular and Cellular Biology majors. Prerequisite: Credit or concurrent registration in IB 150.

IB 199  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for both letter and S/U grading. May be repeated to a maximum of 5 hours.
IB 202 Physiology  credit: 3 or 4 Hours.
How animals function in acquiring, processing, and allocating resources in the face of environmental constraints. The inquiry-based laboratory emphasizes testing of hypotheses related to functioning of physiological components of the basic systems of animals. Lecture only, 3 hours; with laboratory, 4 hours. Students must complete the laboratory portion of the course to receive 4 hours of credit. The laboratory includes vertebrate dissection. Prerequisite: IB 150 and MCB 150.

IB 203 Ecology  credit: 4 Hours.
The links between evolution and ecology, population dynamics, community structure and function, and ecosystem function on local and global scales. Basic ecology needed to understand environmental problems and to conserve biodiversity. Investigations in both field and laboratory included. Prerequisite: IB 150 and MCB 150. This course satisfies the General Education Criteria for: Advanced Composition

IB 204 Genetics  credit: 3 or 4 Hours.
The fundamentals of inheritance, with an emphasis on eukaryotes. Major topics include transmission genetics, quantitative genetics, cytogenetics, genomics, genetics of development and behavior, and population genetics. Laboratory emphasizes an experimental, inquiry-based approach to modern and classical genetics. Lecture only, 3 hours; with laboratory, 4 hours. Students must complete the laboratory portion of the course to receive 4 hours of credit. Prerequisite: IB 150 and MCB 150.

IB 220 Applied Entomology  credit: 3 Hours.
Same as CPSC 270 and NRES 270. See CPSC 270. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

IB 270 Evolution of Molecules & Cells  credit: 5 Hours.
The major evolutionary transitions of biomolecules and cells including: energy acquisition and metabolism; information inheritance, system regulation, and genomes; the origin of life and of the prokaryotic cell, eukaryotic cell, and multicellularity. Lecture and laboratory. Credit is not given for both IB 270 and either MCB 250 or MCB 252. Prerequisite: Admission to the IB honors biology option; credit or concurrent registration in organic chemistry.

IB 271 Organismal Biology  credit: 5 Hours.
Integrated study of the diversity and structure and function of plants and animals in evolutionary and environmental contexts. Conceptual themes and techniques of molecular and cellular levels of biological organization will be integrated as well. Lecture and laboratory. The laboratory includes vertebrate dissection. Credit is not given for both IB 271 and IB 202. Prerequisite: IB 270; good standing in the honors biology option. This course satisfies the General Education Criteria for: Advanced Composition

IB 299 Undergraduate Special Course  credit: 0 to 5 Hours.
Approved for letter and S/U grading. May be repeated in the same term; may be repeated in separate terms to a maximum of 6 hours.

IB 302 Evolution  credit: 4 Hours.
Broad introduction to evolutionary biology, including natural selection and microevolution, phylogeny, speciation, molecular evolution, macroevolution and the fossil records. The laboratory emphasizes a survey of biodiversity and processes and patterns of evolution. Prerequisite: IB 204 or consent of instructor.

IB 303 Anatomy  credit: 4 Hours.
An overview of the body structure of vertebrate animals, with a special focus on mammals including humans. Body structure will be investigated from evolutionary, developmental, and human health perspectives through lectures, in-class activities, and required laboratory dissections. Through this course, students will develop a better understanding of anatomy vocabulary, the anatomical design of vertebrates, vertebrate development, and how vertebrate anatomy and development are related to each other, to organismal function, and to human health. Prerequisite: IB 150.

IB 329 Animal Behavior  credit: 3 Hours.
Introductory course emphasizing how patterns of behavior promote survival, change through evolution, and are modified by the environment. Same as ANSC 366 and ANTH 342. Credit is not given for both IB 329 and ANSC 363. Prerequisite: IB 150 and MCB 150; or consent of instructor.

IB 335 Systematics of Plants  credit: 4 Hours.
Introduces the principles and methods of the identification, naming, classification, systematics, and evolution of flowering plants; includes a survey of selected flowering plant families with information on their interrelationships. Prerequisite: One of the following: IB 100, IB 101, IB 102, IB 103, or IB 150; consent of the instructor.

IB 348 Fish and Wildlife Ecology  credit: 3 Hours.
Same as NRES 348. See NRES 348.

IB 360 Evolution and Human Health  credit: 3 Hours.
Our health is inseparably tied to our evolutionary history. As a result, evolution is an important underpinning discipline for health professionals. This course first provides an overview of evolutionary processes, molecular evolution, human evolution, life history theory, and evolutionary-developmental biology. Second, it illustrates the application of these principles to our understanding of nutrition and metabolism, reproduction, disease and stress, and behavior. Third, it shows in practical terms how the principles of evolutionary medicine can be applied in medical practice and public health. Same as ANTH 360. Prerequisite: IB 302 or MCB 250 or MCB 244, or consent of instructor.

IB 361 Ecology and Human Health  credit: 3 Hours.
Exploration of the emergence of infectious diseases and other human health issues from an ecological perspective, including vector-borne diseases, diseases spread from wildlife in terrestrial and aquatic ecosystems, and the role of pathogens and parasites in community and population ecology, food webs, and ecosystem functioning. Attention will be placed on how current and future global change and biodiversity loss will contribute to the increasing prevalence of human emerging diseases. Same as ANTH 361. Prerequisite: IB 203 or consent of instructor.

IB 364 Genomics and Human Health  credit: 3 Hours.
Highlights advances in understanding the human genome, by utilizing the latest techniques in bioinformatics, i.e. acquiring, analyzing, storing, and displaying the information from the entire genome and protein sequences. The course describes the theory and practices behind modern sequencing techniques and explores the genome with a particular emphasis on the use of extensive online databases and software. Students will analyze one human disorder using bioinformatics software and databases in order to update older published literature about the genomics underpinning the disorder. Prerequisite: IB 204 or consent of instructor.
IB 368  Vertebrate Natural History  credit: 4 Hours.
Introduction to the classification, life histories, adaptations, and ecology of fishes, amphibians, reptiles, birds, and mammals. Focus is on species of the Midwest region. Laboratory emphasizes identification and distribution of Illinois’ vertebrate fauna. Some Saturday field trips are required. Same as NRES 368. Prerequisite: IB 203 or NRES 219 or consent of instructor.

IB 372  Ecology and Evolution  credit: 5 Hours.
Integrated study of ecology, population genetics, and evolution. Conceptual themes and techniques from the molecular, cellular, and organismal levels of biology will be integrated as well. Lecture, laboratory, and field work. Credit is not given for both IB 372 and either IB 203 or IB 302. Prerequisite: IB 271; good standing in the IB honors biology option.

IB 390  Introductory Research  credit: 1 to 5 Hours.
Laboratory and/or field research and/or reading supervised by faculty members in the School of Integrative Biology. Approved for S/U grading only. May be repeated. Credit is not given for more than a combined maximum of 10 hours of IB 390 or IB 490 towards graduation for IB majors. Prerequisite: Consent of instructor.

IB 401  Introduction to Entomology  credit: 3 or 4 Hours.
Integrated studies of the principal morphological, physiological, ecological and behavioral relationships among insects. Lecture and laboratory. 3 or 4 undergraduate hours. 3 or 4 graduate hours. An insect collection will be required for 4 hours credit. Prerequisite: IB 150; or consent of instructor.

IB 405  Ecological Genetics  credit: 3 Hours.
Study of the genetics of natural populations, stressing empirical observations and experiments. Emphasis on recent theories of genotype/environmental interactions and their relationship to evolutionary processes. Offered in alternate years. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 204; or consent of instructor.

IB 411  Bioinspiration  credit: 3 Hours.
Focuses on how experts in biology and technological fields find inspiration in nature and use it as a model to make technological innovations and solve societal problems. In the future, our day-to-day living, health, and the environment will benefit from interdisciplinary teams using findings in basic biological research for technological innovation. Topics to be explored include human health, efficient architecture, cooperative control, robotics, swarm logic, and advanced biological materials. 3 undergraduate hours. 3 graduate hours.

IB 416  Population Genetics  credit: 3 or 4 Hours.
Same as ANSC 446. See ANSC 446.

IB 420  Plant Physiology  credit: 3 Hours.
General course concerned with plant functions, including water relations, mineral nutrition, metabolism, growth, and reproduction. Same as CPSC 484. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 103 or IB 150 and MCB 150; CHEM 232; or consent of instructor.

IB 421  Photosynthesis  credit: 3 Hours.
Comprehensive description of photosynthesis. Topics include: the photosynthetic membranes, light absorption, electron and proton transfer, photophosphorylation, water oxidation, RUBP carboxylase/oxygenase, photosensory, whole plant photosynthesis, gas exchange and atmospheric interactions, and impacts of global environmental change. Same as BIOP 432 and CPSC 489. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 420, MCB 354, MCB 450, BIOP 401, or equivalent; or consent of instructor.

IB 426  Env and Evol Physl of Animals  credit: 3 Hours.
Physiological adaptations of invertebrate and vertebrate animals to diverse aquatic and terrestrial environments and the extreme habitats embodied therein. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 150; IB 202; CHEM 232; or consent of instructor.

IB 427  Insect Physiology  credit: 4 Hours.
The principal physiological and biochemical functions of insects. Lecture and laboratory. Offered in alternate years. 4 undergraduate hours. 4 graduate hours. Prerequisite: IB 202 and IB 401; or consent of instructor.

IB 430  Animal Behavior Lab  credit: 3 Hours.
Inquiry-driven laboratory course in animal behavior. Students work in groups to generate hypotheses, design experiments, collect and analyze data, and write up their results. Experiments will be carried out in both the field and lab. Discussions emphasize the scientific process, including hypothesis testing, and experimental design and statistics. 3 undergraduate hours. No graduate credit. Prerequisite: IB 329. For majors only.

IB 431  Behavioral Ecology  credit: 3 Hours.
In-depth examination of areas of current interest at the interface of behavior, ecology, and evolution; focuses on communication, foraging, and social behavior. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: IB 329; or consent of instructor.

IB 432  Genes and Behavior  credit: 3 Hours.
Concepts, methods, and problems in the analysis of the relationship between genes and behavior, the complex neurobiological processes that mediate action on behavior, in appropriate ecological and evolutionary contexts. Same as ANTH 432, NEUR 432, and PSYC 432. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 150 and IB 204; or consent of instructor.

IB 434  Physical Principles in Biology  credit: 3 Hours.
Examines the interaction between biological processes and the fundamental laws of mechanics. Covers general topics, such as structural analyses of anatomy, kinematics of movement, the behavior of organisms in fluids, and the importance of scaling, as well as specific topics, such as bird flight, fluid flow in cardiovascular systems, and high speed predation. Lab culminates in student-designed, group projects to collect novel biomechanical data to answer questions about the organism of the students’ choice. 3 undergraduate hours. No graduate credit. Prerequisite: IB 202 or consent of instructor; Physics 101 is recommended.

IB 435  Critical Evaluation of Herbal Remedies  credit: 3 Hours.
One-third of Americans use health care products derived from natural sources, particularly plants, but also animals, and fungi. This course examines the biological activity of natural products with respect to their ecological functions and their therapeutic uses. Principles of evidence-based medicine will be reviewed and students will evaluate natural remedies through lectures, in-class activities, discussions, and analyses of scientific papers. Overall, students develop skills useful for evaluating alternative remedies and for communicating their conclusions to the general public. 3 undergraduate hours. No graduate credit. Prerequisite: IB 202 or IB 203 or consent of instructor.
IB 439  Biogeography  credit: 3 Hours.
Spatial and temporal patterns of biological diversity and the factors that
govern the distribution and abundance of taxa. This course addresses
two of its subfields: historical biogeography - the origin, dispersal, and
extinction of taxa and biotas; and ecological biogeography - the role
physical and biotic environments have played in determining taxonomic
distributions. Also explores the ecological, evolutionary, climatological,
and paleontological foundations for the distribution of species and
biological communities. Includes a review of many of the field's classical
papers, the current synthesis of biogeographic theory, and the relevance
of biogeography to modern conservation goals. Offered in alternate
years. Same as ANTH 436, ESE 439, GEOG 436, and NRES 441. 3
undergraduate hours. 3 graduate hours. Prerequisite: IB 150 or other
introductory biology course, or consent of instructor.

IB 440  Plants and Global Change  credit: 3 Hours.
Same as CPSC 431 and NRES 431. See CPSC 431.

IB 442  Evolution of Infectious Disease  credit: 3 Hours.
Same as MCB 435. See MCB 435.

IB 443  Evolutionary Ecology  credit: 3 Hours.
Emphasizes the evolution of life-history strategies in plants and animals
(reproductive rates, life cycles, sex ratios, breeding and mating systems)
and the coevolution of animals and plants (pollination, dispersal, and
herbivory). 3 undergraduate hours. 3 graduate hours. Offered in alternate
years. Prerequisite: IB 203 or equivalent; IB 302; or consent of instructor.

IB 444  Insect Ecology  credit: 3 or 4 Hours.
Discussion of the practical and theoretical aspects of ecology in relation
to insects as individuals, populations, and communities; emphasis on
the role of insects in the environment. 3 or 4 undergraduate hours. 3
or 4 graduate hours. Offered in alternate years. Lecture only, 3 hours;
with laboratory, 4 hours. Prerequisite: IB 150 and MCB 150 or consent
of instructor.

IB 447  Field Ecology  credit: 1 Hour.
Study of habitats in various sections of North America during spring
vacation or intersession. Outdoor cooking and camping; transportation
in University cars. Additional fees may apply. See Class Schedule. 1
undergraduate hour. 1 graduate hour. May be repeated to a maximum of
3 hours. Prerequisite: IB 203; or consent of instructor.

IB 449  Limnology  credit: 3 or 4 Hours.
Fresh water biology; study of the lake, pond, and river with emphasis on
the physical environment as well as on the plants and animals which live
in fresh water. Lectures, discussions, laboratory, and field work. Students
must complete the laboratory portion of the course to receive 4 hours
of credit. Offered in alternate years. 3 or 4 undergraduate hours. 3 or 4
graduate hours. Prerequisite: IB 203; or consent of instructor.

IB 450  Stream Ecology  credit: 3 or 4 Hours.
Same as CEE 432. See CEE 432.

IB 451  Conservation Biology  credit: 4 Hours.
Synthesis of conservation biology with an emphasis on the preservation
of biological diversity and its evolutionary potential. Laboratory
includes an introduction to the use of modern molecular techniques
in conservation biology, computer simulation modeling, and field
conservation problem solving. Same as CPSC 436 and ENVS 420. 4
undergraduate hours. 4 graduate hours. Offered in alternate years.
Prerequisite: IB 203 or consent of instructor.

IB 452  Ecosystem Ecology  credit: 3 Hours.
Distribution and structure of ecosystems on earth; integration of multiple
disciplines to gain a holistic view of ecosystem function; ecosystem
concepts as they apply to understand natural and anthropogenic
environmental change. Offered in alternate years. Same as ESE 452
and NRES 462. 3 undergraduate hours. 3 graduate hours. Prerequisite:
CHEM 102 and CHEM 104; or consent of instructor.

IB 453  Community Ecology  credit: 3 Hours.
The direct and indirect interactions among species that determine the
structure and composition of plant and animal communities. Emphasis
will be on the maintenance of species diversity and its consequences
at both local and regional scales. Offered in alternate years. Same as
NRES 452. 3 undergraduate hours. 3 graduate hours. Prerequisite: IB 203
or consent of instructor.

IB 455  Entomology  credit: 4 Hours.
Structure, function, ecology, behavior, and evolution of the birds of the
world; laboratory devoted to anatomy and identification; and field studies
devoted to identification and behavior of birds. Independent research
project and two optional weekend field trips. Same as NRES 461. 4
undergraduate hours. 4 graduate hours. Offered in alternate years.
Prerequisite: IB 202 and IB 203; or consent of instructor.

IB 456  Ichthyology  credit: 4 Hours.
Classification, anatomy, ecology, behavior, and evolution of fishes of the
world. Emphasis is on morphological, ecological,
and behavioral diversification of fishes in a phylogenetic context.
Laboratory devoted to anatomy and identification. Same as NRES 463.
4 undergraduate hours. 4 graduate hours. Offered in alternate years.
Prerequisite: IB 202 and IB 203; or consent of instructor.

IB 457  Principles of Systematics  credit: 4 Hours.
Comprehensive survey of the theory and methodology of systematics
as they are applied today to all groups of organisms, with a practical
experience in the acquisition and analysis of systematic data. 4
undergraduate hours. 4 graduate hours. Offered in alternate years.
Prerequisite: IB 302 and IB 335 or IB 468; or consent of instructor.

IB 458  Insect Classification and Evolution  credit: 4 Hours.
Analytical survey of the classification and evolution of the orders and
principal families of insects, with practical experience in the identification
of insects at these taxonomic levels; field trips required. Lecture and
laboratory. 4 undergraduate hours. 4 graduate hours. Offered in alternate
years. Prerequisite: IB 401 or consent of instructor.

IB 471  General Mycology  credit: 4 Hours.
Structure, classification, and identification of fungi, including those
of economic importance. Offered in alternate years. 4 undergraduate
hours. 4 graduate hours. Prerequisite: IB 150 and MCB 150; IB 302
recommended; or consent of instructor.
IB 472  Plant Molecular Biology  credit: 1 Hour.
The basic concepts and methodologies of measuring plant gene expression and gene product activity and constructing transgenic plants are presented and discussed. Serves as a gateway to specialized methodology approaches covered in IB 473, IB 474, and IB 475. Same as CPSC 462. 1 undergraduate hour. 1 graduate hour. Prerequisite: MCB 150 and IB 204; or consent of instructor.

IB 473  Plant Genomics  credit: 1 Hour.
Provides broad overview of structural and functional genomics, including genetic and physical mapping, whole genome sequencing, comparative genomics analysis, evolution of gene families and repetitive sequences, genome-wide expression analysis. Emphasis on structural and comparative genomics with brief introduction to functional genomics and bioinformatics. Same as CPSC 467. 1 undergraduate hour. 1 graduate hour. Prerequisite: MCB 250; IB 472; or consent of instructor.

IB 474  Plant Proteomics- Metabolomics  credit: 2 Hours.
Broad introduction to plant proteomics and metabolomics, including a survey of contemporary methods and their applications for protein and metabolite identifications. Proteomics will include the study of posttranslational modifications and protein-protein interactions. Metabolomics will introduce the complexities on pathway tracing and elucidation. The focus of the course is on the application of proteomic-metabolomic approaches to answer biological questions. Tours of proteomic and metabolomic facilities will occur. Same as CPSC 468. 2 undergraduate hours. 2 graduate hours. Prerequisite: MCB 354; IB 472; or consent of instructor.

IB 477  Genomics for Plant Improvement  credit: 2 Hours.
Same as CPSC 466. See CPSC 466.

IB 478  Advanced Plant Genetics  credit: 3 Hours.
Same as CPSC 452. See CPSC 452.

IB 481  Vector-borne Diseases  credit: 4 Hours.
Study of the major groups of arthropods and associated pathogens that affect the health and well-being of humans and other animals. Training will include ecology, evolutionary biology, and epidemiology of vector-borne diseases; taxonomy and identification of vector arthropods; practical skills in molecular and mathematical biology, spatial analysis and field research. Lecture will make use of technology-enhanced classroom for group-based active learning exercises to address critical challenges in vector-borne disease control. 4 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: IB 361 or IB 401 or consent of instructor.

IB 482  Insect Pest Management  credit: 3 Hours.
The principles underlying the control of important insect pests of agriculture and of human and animal health; emphasis on integrated pest management involving a systems approach which combines biological, cultural, and chemical suppressive factors into ecologically sound and socially and economically acceptable technology. Lecture and laboratory. Same as CPSC 479. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: IB 150 or equivalent; or consent of department.

IB 483  Insect Pathology  credit: 3 Hours.
The general principles of pathology as they apply to insects; includes non-infectious and infectious diseases caused by viruses, bacteria, fungi, protozoa, and nematodes. Studies the epizootiology of naturally occurring insect disease and the use of insect pathogens as microbial control agents. Same as CPSC 475. 3 undergraduate hours. 3 graduate hours. Lecture in alternate years. Prerequisite: IB 150 and MCB 150 or consent of instructor.

IB 484  Paleoclimatology  credit: 4 Hours.
Same as GEOL 484. See GEOL 484.

IB 485  Environ Toxicology & Health  credit: 3 Hours.
Explores toxicological, environmental, public health, occupational and ecological aspects of the use and release of toxic substances in the environment; features case histories of environmental contamination that illustrate ecological, health, and social aspects of pollution; emphasizes biochemical mechanisms and ecosystem consequences. Same as CHLH 461 and ENVS 431. 3 undergraduate hours. 3 graduate hours. Prerequisite: A college chemistry course and a college biology course; or consent of instructor.

IB 486  Pesticide Toxicology  credit: 3 or 4 Hours.
Examines the biological effects of major classes of insecticides and herbicides, and of selected individual fungicides, including: toxicity to nontarget organisms, persistence and fate in the environment, biotransformation, and ecological consequences. Current regulations on pesticide testing will also be presented. The mechanism of action on target species will be discussed only in relation to effects on nontarget organisms. Same as CB 434 and ENVS 433. 3 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: One year of college chemistry and one year of college biology; or consent of instructor.

IB 487  Math Modeling in Life Sciences  credit: 3 or 4 Hours.
Same as ANSC 448 and STAT 458. See ANSC 448.

IB 488  Environmental Stable Isotopes  credit: 3 Hours.
Stable isotopes are powerful tools for studying environmental processes, acting as tracers of resource origin, fate, and flux and integrators of system processes. The goal of this course is to provide a fundamental knowledge base and hands-on training for students to become practitioners of natural abundance and enriched stable isotope techniques. The course will focus on stable isotopes of biologically-relevant light elements (C, H, N, O, S). We will also review case studies demonstrating application of these techniques to disciplines including anthropology, animal, insect, and plant biology, biogeochemistry, biometeorology, ecosystem ecology, forensics, microbial ecology, paleoclimatology, and paleoecology. Offered in alternate years. Same as ATMS 422, GEOL 488, and NRES 478. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: CHEM 104 or equivalent; or consent of instructor.

IB 489  Undergraduate Research Abroad  credit: 1 to 4 Hours.
Students assist in research under University of Illinois faculty supervision at a location outside of the United States. Topics and type of assistance vary. 1 to 4 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of UI faculty member supervising the work (who will have examined the proposed research plan); and approval of the school. Not available to freshman.

IB 490  Independent Study  credit: 1 to 5 Hours.
Laboratory and/or field research supervised by faculty members in the School of Integrative Biology. A written report is required. 1 to 5 undergraduate hours. No graduate credit. May be repeated. Credit is not given for more than a combined maximum of 10 hours of IB 390 or IB 490 towards graduation for IB majors. Prerequisite: Consent of instructor.

IB 491  Biological Modeling  credit: 3 or 4 Hours.
Same as ANSC 449, CPSC 448, and GEOG 468. See GEOG 468.
IB 492  Science Communication Skills  credit: 2 Hours.
A successful career in scientific research, teaching and service requires tools and skills for communicating research. Students interested in going into science careers need to know how to write a competitive graduate school or job application, a thesis proposal for graduate research, a fellowship or grant proposal, and how to give a good scientific presentation. This course is designed to teach students these skills with targeted in and out of class exercises. 2 undergraduate hours. No graduate credit. Prerequisite: IB 203 or IB 271; AND one of the following: IB 299, IB 390, IB 490, or consent of instructor. Junior IB majors only.

IB 494  Theoretical Biology + Models  credit: 4 Hours.
Biologists are increasingly using mathematical and computer-based models to complement fieldwork and experimental data. These models provide a context in which to understand and answer existing questions, and also lead us to new questions and new insights. Students will encode biological mechanisms into mathematical models, develop the skills to find solutions to these models and relate them to biological data, and analyze and discuss relevant primary literature. Examples will be drawn largely from ecology and evolutionary biology. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 220 or MATH 221; Introductory courses in Ecology and Evolution.

IB 496  Special Courses  credit: 1 to 5 Hours.
Experimental and temporary courses. Additional fees may apply. See Class Schedule. 1 to 5 undergraduate hours. 1 to 4 graduate hours. Approved for letter and S/U grading. May be repeated as topics vary. Prerequisite: Consent of instructor.

IB 501  Programming for Genomics  credit: 4 Hours.
Students will learn to think algorithmically by constructing a biological hypothesis, and implementing code or deploying an existing code implementation, to test that hypothesis. Students will learn to use UNIX and to program in Python, using biological data sets from high-throughput sequencing projects. We will cover major genomics approaches and the algorithms that underlie them, including K-mer analysis, genome and transcriptome assembly, databases and SQL, and visualization techniques. Same as CPSC 501. 4 graduate hours.
No professional credit. Prerequisite: Courses in Ecology, Evolution, and Molecular Biology, or consent of instructor.

IB 502  Biological Networks  credit: 3 Hours.
This taxon-neutral course prepares students to organize, integrate and analyze complex, multi-scale data that describe biological systems. It provides training, collecting, and processing "omic"-scale data (genomics, transcriptomics, proteomics, metabolomics) into network models, and analyzing these models using current in silico tools to determine biological significance and function of the resulting network interactions. Students will be introduced to Gene Ontology and open source tools for data integration and visualization, including: Cytoscape, Multiple Experiment Viewer, Mapman, and KEGG. 3 graduate hours.
No professional credit. Prerequisite: Graduate student status or consent of instructor. At least one upper level undergraduate course in molecular biology or its equivalent.

IB 503  Methods/Application in Biotech  credit: 3 Hours.
Broad introduction to interdisciplinary methods in and their application to biotechnology research. Draws heavily on the expertise of biotechnology core facilities on campus. Includes tours, data analysis and manipulation, discussion of current literature, and exploration of industry applications. Topics will focus on DNA sequencing, gene expression, bioinformatics, transformation, and cellular imaging. Prerequisite: Courses in molecular genetics (e.g. MCB 250 or IB 204 or IB 472) and cell biology (e.g. MCB 252) or consent of instructor. MCB 450 or MCB 354 or equivalent background in biochemistry is recommended.

IB 504  Genomic Analysis of Insects  credit: 3 Hours.
Comprehensive and integrated presentation of insect genomic analysis from the molecular level to that of the population; concepts are applied to certain aspects of insect population regulation. Offered in alternate years. Prerequisite: IB 204 or consent of instructor.

IB 505  Bioinformatics & Systems Biol  credit: 4 Hours.
Same as CPSC 567. See CPSC 567.

IB 506  Applied Bioinformatics  credit: 4 Hours.
Same as ANSC 542 and CPSC 569. See ANSC 542.

IB 507  Statistical Genomics  credit: 3 or 4 Hours.
Same as ANSC 545 and CPSC 545. See ANSC 545.

IB 508  Multivariate Biostatistics  credit: 4 Hours.
Same as PATH 528. See PATH 528.

IB 510  Discussions in Plant Biology  credit: 0 to 2 Hours.
All graduate students in plant biology, except those with conflicting teaching assignments, are required to register in and attend the general seminar. Approved for both letter and S/U grading. No credit given except to those students presenting the results of their Ph.D. thesis research or industry research projects in the PSM program.

IB 513  Disc in Plant Physiology  credit: 1 Hour.
Approved for letter and S/U grading. May be repeated.

IB 516  Ecosystem Biogeochemistry  credit: 4 Hours.
Same as NRES 516. See NRES 516.

IB 524  Plant Biochemistry  credit: 4 Hours.
Same as CPSC 588 and HORT 588. See CPSC 588.

IB 526  Seminar in Entomology  credit: 0 to 1 Hours.
Discussions, reviews, and appraisals of special topics in the field of entomology. Approved for both letter and S/U grading. May be repeated to a maximum of 4 hours.

IB 531  Emerging Infectious Diseases  credit: 4 Hours.
Examines new human infectious diseases, such as Asian flu, West Nile virus, AIDS, and Lyme disease, that are a major threat to human health. Explores the historic links among human health, disease pathogens, and ecology, as well as the origin of each new disease and how it is regulated by specific environmental conditions. Also explores how global change and biodiversity loss will increase the possibility of future ecological epidemic and the steps needed to reduce their effects on human health. In this course, students also produce teaching materials for their classrooms.

IB 532  Sustainability & Global Change  credit: 4 Hours.
Examines how on-going global change affects sustainability. Explores climate change, global warming, alternative biofuels, future food security, and conservation of biodiversity, and their effects on society. Examines how to make better use of the Earth’s natural resources with little to no damage to the ecosystem, while taking into account ever mounting demands for energy resources and climate change. In this course, students also produce teaching materials for their classrooms.

IB 533  Human Genome & Bioinformatics  credit: 4 Hours.
Highlights advances in understanding the human genome, utilizing the latest techniques in bioinformatics, i.e. acquiring, analyzing, storing, and displaying the information from the entire genome and protein sequences. Explores the latest laboratory techniques, as well as the use of extensive online databases and software. Students explore the significance of sequencing the human genome, applying bioinformatics to the genome, and realizing its potential to understand human health, disease, and the place of humans in the large ecosystem. In this course, students also produce teaching materials for their classrooms.

Information listed in this catalog is current as of 04/2018
IB 534  Evolution and Medicine  credit: 4 Hours.
Explores how human health is inseparably tied to our evolutionary history. Principles that apply to human health include evolutionary processes, e.g. natural selections, as well as molecular evolution, human evolution, and evolutionary-developmental biology. Explores how these principles can be applied to understand human nutrition and metabolism, reproduction, disease and stress, and behavior. These principles assist physicians, researchers, and the general public in understanding how natural selection has acted on humans over time and left us vulnerable to disease and injury. In this course, students also produce teaching materials for their classrooms.

IB 535  Biology and Tech Innovation  credit: 4 Hours.
Focuses on how experts in biology and technological fields use bio-inspiration to create technology innovations to solve human problems. Classic examples, such as how the observation that seeds with barbs stick to animal fur led to Velcro, are explored. Students use and expand upon their current biological knowledge to explore new ways to create biologically-based sustainable innovations. Topics to be explored include nest building as inspiration for energy-efficient architecture, plant chemistry as inspiration for green manufacturing, animal locomotion and sensing as inspiration for robots, and the advances in understanding of biological nanostructures and nanoprocesses as inspiration for nanotechnology. In this course, students also produce teaching materials for their classrooms.

IB 536  Evolutionary Biology  credit: 4 Hours.
Examines fundamental topics for understanding evolution, the unifying principle for all of biology. Evidence for evolution is all around us, and learning how to view life through ‘evolutionary tinted’ lenses greatly changes our perspective. Emphasizes the creative ways that scientists are gaining insights into how and why life evolved as it is. Provides avenues to use in the classroom to provide scholarly evidence for the basis of evolution to refute non-academic arguments. Students will produce teaching materials for their classrooms. 4 graduate hours. No professional credit. Prerequisite: For graduate students in the Online Masters of Science Teaching Biology program (OMST).

IB 542  Environmental Plant Physiology  credit: 4 Hours.
The interaction of plants and environment at the level of the whole organism, extending to the cell and the community; emphasis on heat and mass transfer, plant and soil potentials, and effects of light on growth. Same as CPSC 538. Offered in alternate years. Prerequisite: IB 420; consent of instructor.

IB 545  Fish and Wildlife Ecol Seminar  credit: 2 Hours.
Modern ecological principles and concepts to specific problems in fisheries and wildlife. Approved for letter and S/U grading. Offered in alternate years.

IB 546  Topics in Ecology & Evolution  credit: 1 Hour.
Speaker seminar series featuring discussion, review and critical analysis of general concepts and specific problems in ecology and evolution. Approved for both letter and S/U grading. May be repeated.

IB 590  Individual Topics  credit: 2 to 12 Hours.
Individual topics in research conducted under the supervision of faculty members in the School of Integrative Biology. Designed for graduate students who would like to become more familiar with specialized fields of study prior to committing themselves to a specific area for their doctorate degree. Approved for S/U grading only. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

Italian (ITAL)

ITAL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ITAL)

Courses

ITAL 101  Elementary Italian I  credit: 4 Hours.
For students who have no credit in Italian.

ITAL 102  Elementary Italian II  credit: 4 Hours.
Continuation of ITAL 101. Prerequisite: ITAL 101 or one year of high school Italian.

ITAL 103  Intermediate Italian I  credit: 4 Hours.
Rapid reading, review of grammar, composition, and conversation. Prerequisite: ITAL 102 or two years of high school Italian.

ITAL 104  Intermediate Italian II  credit: 4 Hours.
Continuation of ITAL 103. Prerequisite: ITAL 103 or three years of high school Italian.

ITAL 191  Freshman Honors Tutorial  credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars and Associates. May be repeated one time to a maximum of 6 hours. Prerequisite: Consent of departmental honors adviser in Italian.

ITAL 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated to a maximum of 5 hours.

ITAL 200  Italian Studies in a Mediterranean Context  credit: 3 Hours.
Introduces students to the study of Italy and Italian culture, emphasizing Italy’s central position in Mediterranean networks of cultural, economic and linguistic exchange. Prerequisite: ITAL 104 or consent of instructor.

ITAL 210  Practical Review Italian  credit: 3 Hours.
Reviews major challenges in Italian grammar, with particular emphasis on the verb system (major tenses and moods, morphology, and aspect) and areas of contrast with English. Prerequisite: Credit or concurrent enrollment in ITAL 104 or equivalent.

ITAL 220  Contemporary Italian, Oral and Written  credit: 3 Hours.
Training in oral-aural skill and in writing.

ITAL 240  Italy Middle Ages & Renaiss  credit: 3 Hours.
The development of Medieval Italian civilization in a literary context from the Sicilian School of love poetry to the early Renaissance in Florence; lectures and readings are in English. Same as CWL 240 and MDVL 240. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ITAL 270  Introduction to Italian Cinema  credit: 3 Hours.
Introduction to major films, movements and directors in the Italian tradition, paying particular attention to questions of national identity, gender and political and social history. Knowledge of Italian not required. This course satisfies the General Education Criteria for: Humanities - Lit Arts

ITAL 310  Advanced Grammar  credit: 3 Hours.
Study of the structure of modern Italian in both its phonological and syntactic aspects for the student who already has a functional command of the language, with an emphasis on developing ability to analyze and interpret grammatical structures. Prerequisite: ITAL 210 or consent of instructor.

Information listed in this catalog is current as of 04/2018
ITAL 380  Ital Business & Profess  credit: 3 Hours.
Builds preexisting language skills through the study of Italian business practices: financial systems, transactions, banking, import/export and commercial correspondence. Prerequisite: ITAL 210 or equivalent.

ITAL 390  Spec Topics Italian Studies  credit: 2 to 4 Hours.
Selected substantive readings for independent study on a given special topic of Italian literature, culture, language, or linguistics. May be repeated. Prerequisite: ITAL 104 and consent of instructor.

ITAL 406  Italian Culture and Globalization  credit: 3 or 4 Hours.
Introduction to factors that have shaped present-day Italy, with particular attention to globalization; basic concepts contributing to understanding its present social and cultural development in a European and global context; taught in Italian. 3 undergraduate hours. 4 graduate hours. Prerequisite: ITAL 200 or ITAL 220, or consent of instructor.

ITAL 413  Dante  credit: 3 or 4 Hours.
Interpretation of Dante’s Divine Comedy with special attention to its position in the medieval world; a knowledge of Italian not required. Same as CWL 413 and MDVL 413. 3 undergraduate hours. 4 graduate hours.

ITAL 414  Petrarch & Boccaccio  credit: 3 or 4 Hours.
Studies in Petrarch and Boccaccio; nonmajors in Italian may read the works in translation; lectures are in English. Same as CWL 414 and MDVL 414. 3 undergraduate hours. 4 graduate hours. Prerequisite: Fulfillment of campus rhetoric requirement.

ITAL 415  Europe and the Mediterranean  credit: 3 or 4 Hours.
Same as EURO 415 and PS 415. See EURO 415.

ITAL 418  Language&Minorities in Europe  credit: 3 or 4 Hours.
Same as FR 418, GER 418, LING 418, PS 418, SLAV 418, and SPAN 418. See FR 418.

ITAL 420  Masterpieces Renaiss Lit  credit: 3 or 4 Hours.
Reading of masterpieces of the 1400 and 1500s and a study of their predecessors and influence; nonconcentrators in Italian may read the works in translation; lectures are in English. Content rotates. Same as CWL 420 and MDVL 420. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 hours with consent of instructor. Prerequisite: Fulfillment of campus rhetoric requirement.

ITAL 435  Introduction to Romance Linguistics  credit: 3 or 4 Hours.
Same as FR 462, LING 462, PORT 435, RMLG 435 and SPAN 435. See SPAN 435.

ITAL 440  Modern Italian Novel  credit: 3 or 4 Hours.
An in-depth examination of a particular writer, genre, form or period in modern Italian literature (such as Italo Calvino, Italian detective fiction, or the contemporary Italian novel). See online schedule for specific topic. 3 undergraduate hours. 4 graduate hours. Prerequisite: ITAL 200 or consent of instructor.

ITAL 450  Italian Syntax & Phonology  credit: 3 Hours.
Introduction to the essential syntactic and phonological structures of Modern Standard Italian in combination with appropriate discussion of corresponding linguistic concepts. 3 undergraduate hours. 3 graduate hours. Prerequisite: ITAL 310 or consent of instructor.

ITAL 460  Principles of Language Testing  credit: 3 or 4 Hours.
Same as EIL 460, EPSY 487, FR 460, GER 460, PORT 460, SLS 460, and SPAN 460. See EIL 460.

ITAL 470  Topics in Italian Cinema  credit: 3 or 4 Hours.
An in-depth examination of a particular director, genre or school from the Italian cinematic tradition (e.g., Fellini, Italian horror, or noorealism); topic will vary each semester. No knowledge of Italian is required. Same as MACS 470. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours.

ITAL 489  Theoretical Foundations of SLA  credit: 3 or 4 Hours.
Same as FR 481, GER 489, LING 489, PORT 489, and SPAN 489. See LING 489.

ITAL 490  Italian Critical Theory  credit: 3 or 4 Hours.
An advanced introduction to the critical theory of major Italian thinkers and philosophers (e.g., Gramsci, Negri, Agamben, Esposito). 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: At least two 200-level courses in Italian, or consent of instructor.

ITAL 491  Honors Senior Thesis  credit: 2 Hours.
For candidates for honors in Italian. No graduate credit. May be repeated.

ITAL 505  Teaching College and Secondary Foreign Language  credit: 4 Hours.
Same as FR 505. See FR 505.

ITAL 510  Seminar in Italian Studies  credit: 4 Hours.
Graduate seminar in Italian culture, literature, linguistics, or critical theory. Topics vary. May be repeated in the same semester to a maximum of 8 hours as topics vary. May be repeated in separate semesters to a maximum of 16 hours as topics vary.

ITAL 530  Introduction to Research and Text Criticism  credit: 4 Hours.
Same as FR 530. See FR 530.

ITAL 559  Sem Romance Ling  credit: 4 Hours.
Same as FR 559, LING 559, PORT 559, RMLG 559, and SPAN 557. See SPAN 557.

ITAL 573  Professional/Academic Writing  credit: 4 Hours.
Same as GER 553, PORT 573, and SPAN 573. See SPAN 573.

ITAL 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as EIL 580, FR 580, GER 580, PORT 580, SLS 580, and SPAN 580. See SPAN 580.

ITAL 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, EPSY 563, FR 584, GER 584, LING 584, PORT 584, and SPAN 584. See SPAN 584.

ITAL 588  Sem Second Lang Learn  credit: 4 Hours.
Same as EALC 588, FR 588, GER 588, LING 588, PORT 588, and SPAN 588. See SPAN 588.

ITAL 595  Spec Topics in Italian  credit: 1 to 4 Hours.
Independent study/research under the direction of a faculty member. May or may not fulfill requirements for a particular degree program in Spanish, Italian, and Portuguese. Consult graduate advisor. May be repeated in same or subsequent terms to a maximum of 8 hours.

ITAL 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Japanese (JAPN)

JAPN Class Schedule (https://courses.illinois.edu/schedule(DEFAULT/JAPN))

Courses

JAPN 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.
JAPN 201 Elementary Japanese I  credit: 5 Hours.
Introduction to Japanese, spoken language skills and the reading and writing of hirigana, katakana, and kanji.

JAPN 202 Elementary Japanese II  credit: 5 Hours.
Continuation of JAPN 201. Prerequisite: JAPN 201.

JAPN 203 Intermediate Japanese I  credit: 5 Hours.
Prerequisite: JAPN 202 or equivalent.

JAPN 204 Intermediate Japanese II  credit: 5 Hours.
Continuation of JAPN 203. Prerequisite: JAPN 203 or equivalent.

JAPN 305 Advanced Japanese I  credit: 5 Hours.
Readings in graded Japanese texts with oral practice designed to help students acquire the sophisticated vocabulary and grammatical structures of written Japanese. Prerequisite: JAPN 204 or placement test for students who have Japanese background or who have previously taken a course(s) in Japanese.

JAPN 306 Advanced Japanese II  credit: 5 Hours.
Continuation of JAPN 305. Prerequisite: JAPN 305 or be placement test.

JAPN 407 Intro to Classical Japanese  credit: 3 Hours.
Introduction to the grammar, morphology, vocabulary, and style of classical Japanese language as found in premodern Japanese literary and historial writings. 3 undergraduate hours. 3 graduate hours. Prerequisite: Three years of modern Japanese language or equivalent.

JAPN 408 Readings in Classical Japanese  credit: 3 Hours.
Readings in texts in classical Japanese selected from historical and literary sources of the premodern period. Attention is given to grammatical, morphological, and stylistic features and to problems in translation. Introduction to reading of classical syllabaries and manuscript texts. 3 undergraduate hours. 3 graduate hours. Prerequisite: JAPN 407 or equivalent.

JAPN 409 Social Science Rds Japanese  credit: 3 or 4 Hours.
Readings in Japanese social science materials, including articles from newspapers, periodicals, and learned journals. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 9 undergraduate hours or 12 graduate hours. Prerequisite: JAPN 306 or equivalent.

JAPN 440 Fourth Year Japanese I  credit: 3 or 4 Hours.
Further developments of skills in sophisticated Japanese language use, including readings in authentic materials in a wide variety of writing styles, writing for formal occasions, and speaking appropriately according to the situation while using precise vocabulary in correct level of speech. 3 undergraduate hours. 4 graduate hours. Prerequisite: JAPN 306 or equivalent.

JAPN 441 Fourth Year Japanese II  credit: 3 or 4 Hours.
Continuation of JAPN 440. 3 undergraduate hours. 4 graduate hours. Prerequisite: JAPN 440 or equivalent.

JAPN 460 Japanese as a 2nd Language I  credit: 3 or 4 Hours.
Introduction to basic theory of Japanese pedagogy; teaching methods, and theory and practice of teaching Japanese grammar. 3 undergraduate hours. 4 graduate hours.

JAPN 461 Japanese as a 2nd Language II  credit: 3 or 4 Hours.
Application of pedalinguistics of Japanese; theory and method of instructional exercise development for teaching Japanese in practice teaching of Japanese in the classroom. 3 undergraduate hours. 4 graduate hours. Prerequisite: JAPN 460 or equivalent.

JAPN 490 Readings in Japanese Lit  credit: 3 or 4 Hours.
Guided readings in Japanese literature in the vernacular with regular individual conferences and a paper. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Reading knowledge of Japanese and consent of instructor.

JAPN 499 Study Abroad  credit: 0 to 18 Hours.
Lectures, seminars, and practical work in the Japanese language, literature, and civilization, and in other academic areas appropriate to the student's course of study. No graduate credit. Approved for letter and S/U grading. Prerequisite: Junior standing and a GPA of 3.00.

Jewish Studies (JS)

JS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/JS)

Courses

JS 108 Religion & Society in West I  credit: 3 Hours.
Same as ANTH 108, PHIL 108, REL 108, and SOC 108. See REL 108. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

JS 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
Faculty offer seminars in a range of areas that provide an opportunity for undergraduates to be exposed to key dimensions of Jewish Studies. May be repeated in the same or separate terms to a maximum of 10 hours.

JS 201 History of Antisemitism  credit: 3 Hours.
Studies the negative representations of Judaism and Jews from antiquity to the modern world. Topics include: Greco-Roman concepts of the Jewish religion; medieval Christian symbolization of the demonic Jew; Jews and negative attitudes to capitalism; blood purity and blood libel; the rise of racial prejudice in the modern nation state; totalitarianism and genocide; antisemitism and anti-Zionism. Same as REL 212. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

JS 209 Jewish American Literature  credit: 3 Hours.
Using a combination of careful reading with historical contextualization we will discuss how the field of Jewish American literature emerged, and get a sense of where it might be heading. We will address topics such as what makes a literary work Jewish American other than the Jewishness of its author; in what ways the field of Jewish American literature has changed over time; and what might be the underlying trends/themes of this field of literature. Same as CWL 209 and ENGL 222.

JS 211 War & Peace in Israeli Lit  credit: 3 Hours.
Same as CWL 211 and SAME 211. See CWL 211.

JS 220 Jewish Storytelling  credit: 3 Hours.
Same as CWL 221, ENGL 223, REL 220, and YDSH 220. See YDSH 220. This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

JS 252 The Holocaust  credit: 3 Hours.
Same as HIST 252. See HIST 252. This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western
JS 300  Jewish Chicago  credit: 3 Hours.
The history of Jewish Chicago from 1820 to the present will be taught in Chicago during Summer I. The class includes excursions all over the city as well as class time at the Newberry Library. Topics of study include immigration, Jews in the labor movement, Jewish political activism, Jewish religious practice, Jewish art, literature, and Yiddish theater. The course will contextualize our study of Jewish Chicago in terms of American history, urban history, gender history, and labor history.

JS 320  Lit Responses to the Holocaust  credit: 3 Hours.
Same as CWL 320, ENGL 359, REL 320, and YDSH 320. See YDSH 320. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

JS 335  Middle East 1566-1914  credit: 3 Hours.
Same as HIST 335. See HIST 335.

JS 341  Love & Sex in Hebrew Lit  credit: 3 Hours.
Same as CWL 341, REL 340 and SAME 341. See CWL 341.

JS 399  Special Topics  credit: 3 Hours.
Faculty offer special topics in their areas of expertise that provide an opportunity for undergraduates to be exposed to some of the most current developments in faculty research. May be repeated in the same or separate term to a maximum of 9 hours.

JS 442  History of Early Judaism  credit: 3 Hours.
Same as HIST 432 and REL 442. See REL 442.

JS 454  Topics in Israeli Lit &Culture  credit: 3 or 4 Hours.
Same as CWL 454 and SAME 454. See CWL 454.

JS 495  Independent Study  credit: 2 to 4 Hours.
Readings in selected fields in consultation with the instructor along with the completion of a specified writing assignment. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated in the same term to a maximum of 4 undergraduate hours or 8 graduate hours. May be repeated in separate terms to a maximum of 8 undergraduate hours and 16 graduate hours. Prerequisite: Consent of instructor.

JS 496  Topics in History of Judaism  credit: 3 or 4 Hours.
Same as REL 496. See REL 496.

JS 501  Grad Intro to Jewish Culture  credit: 4 Hours.
Interdisciplinary graduate-level introduction to the study of Jewish culture and society. Focuses on the significations of Jewishness in modern history through a wide range of recent writings by historians, anthropologists, philosophers and cultural theorists. Key themes will include the relationship of Judaism to the other monotheistic religions, the varied pathways of Jewish modernization, the construction of Jewish Otherness in Europe and beyond, and responses to the Holocaust and the creation of the state of Israel.

JS 502  Holocaust Genocide Studies  credit: 4 Hours.
Interdisciplinary graduate-level introduction to Holocaust, Genocide, and Memory Studies, focusing on the origins and unfolding of genocidal violence and the legacies of genocide in collective memory, literature, and artistic representation. Key themes will include the relationship between perpetrators, victims, and bystanders; the problems of historical comparison; trauma and testimony; violence and representation.

JS 551  Seminar in Jewish Culture  credit: 4 Hours.
Analysis of selected topics of special interest in Jewish Studies. May be repeated in the same term to a maximum of 8 hours. May be repeated in separate terms to a maximum of 16 hours. Prerequisite: Consent of instructor.

JS 552  Seminar Holocaust & Genocide  credit: 4 Hours.
Analysis of selected topics of special interest in Holocaust, Genocide, Memory Studies. May be repeated in the same term to a maximum of 8 hours. May be repeated in separate terms to a maximum of 16 hours. Prerequisite: Consent of instructor.

Journalism (JOUR)

JOUR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/JOUR)

Courses

JOUR 199  Undergraduate Open Seminar  credit: 1 to 3 Hours.
A changing array of courses focusing on special topics in journalism. Approved for Letter and S/U grading. May be repeated to a maximum of 12 hours in separate semesters, if topics vary.

JOUR 200  Introduction to Journalism  credit: 3 Hours.
Discussion of the history, freedom, technologies, ethics, and functions of the news media. Training in clear, descriptive writing techniques, using journalistic models. Prerequisite: Completion of Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition

JOUR 205  History of American Journalism  credit: 3 Hours.
Surveys the history of the field of journalism since pre-colonial times. Includes the evolution of the media in the United States and the evolution of cultural concepts concerning the media, including rights granted under the First Amendment. Credit is not given for JOUR 205 if credit for JOUR 405 has been earned.

JOUR 210  Newsgathering Across Platforms  credit: 4 Hours.
Fundamentals of journalistic reporting and writing across print, broadcast and digital platforms. Credit is not given for JOUR 210 if credit for JOUR 400 has been earned. Prerequisite: JOUR 200.

JOUR 215  Multimedia Reporting  credit: 4 Hours.
Designed to acquaint students with the fundamentals of digital photography, video, audio and multimedia as it applies to journalism. Instruction will include conceptual frameworks and techniques to create multimedia journalism content; the conception, planning and creation of multimedia projects; coverage of events with audio, video and photographs; the technical and creative aspects of digital photography, video, and multimedia; delivery platforms for multimedia content including the Web and evolving communication technologies. Credit is not given for JOUR 215 if credit for JOUR 410 has been earned. Prerequisite: JOUR 210 or consent of Journalism Department.

JOUR 220  News Editing  credit: 4 Hours.
Editing and headline writing, news judgment, ethics and leadership. Credit is not given for JOUR 220 if credit for JOUR 320 has been given.

JOUR 250  Journalism Ethics & Diversity  credit: 3 Hours.
Focuses on media decision-making and news judgment, specifically ethics and diversity in newsgathering with regard to scope, privacy, bias, economic concerns, and accountability. Examines real-life news decisions and the thoughts of journalists who lived through famous and infamous ethics situations. Key provisions in the Society of Professional Journalists Code of Ethics regarding use of diverse voices will be discussed and applied in practical ways, and both students and the instructor will find current examples of ethics issues to present to the class. Diversity education is part of the required standard for achieving journalism accreditation from the discipline's national accrediting body.
JOUR 293  Digital Photography for Everyone  credit: 3 Hours.  
Foundations of digital photography, techniques to produce photographs; the sanction and planning of pictures; the pictorial coverage of locations, events and human interest situations; and the planning and execution of photos in print, on the web and other electronic media are the focus of this hands-on course. You will develop a practical understanding of the potentials and realities of photographic communication to better use them for full expression of your vision. Approved for Letter and S/U grading.

JOUR 311  Media Law  credit: 3 Hours.  
Detailed analysis of the theories of freedom of expression, the legal doctrines of greatest concern to mass communicators, and contemporary issues related to free speech and press, including libel, copyright, and news-gathering in a digital age. Credit is not given for JOUR 311 if credit for JOUR 411 has been earned.

JOUR 315  Adv Public Affairs Reporting  credit: 4 Hours.  
Study and extensive practice of in-depth public affairs reporting - its concepts, techniques, traditions, ethics, and social obligations. Credit is not given for JOUR 315 if credit for JOUR 415 has been earned. Prerequisite: JOUR 210.

JOUR 320  News Editing  credit: 4 Hours.  
Editing and headline writing, news judgment, ethics and leadership. Credit is not given for JOUR 320 if credit for JOUR 420 has been earned.

JOUR 335  Audio Journalism  credit: 4 Hours.  
Reporting and writing news for audio programs and websites. Credit is not given for JOUR 335 if credit for JOUR 435 has been earned. Prerequisite: JOUR 210.

JOUR 340  Video Reporting & Storytelling  credit: 4 Hours.  
Introduces news studio and field production and principles of field reporting and editing of news video; principles of planning, producing, and directing news and public affairs programs. Credit is not given for JOUR 340 if credit for JOUR 440 has been earned. Prerequisite: JOUR 210.

JOUR 360  The Media and You  credit: 3 Hours.  
The course will survey contemporary public relations to clarify several elements: publicity, advertising, branding, press agency, public affairs, issues management, lobbying, investor relations and development. Students will learn to work with the press and the ethical dimensions of the relationships that form. The course will employ real and hypothetical case studies. Teams will develop strategies to reach a PR goal. Each team will make presentations to be judged by real clients or the instructor and guest judges.

JOUR 361  Readings in Sports Journalism  credit: 3 Hours.  
Books about sports and sports personalities are perennial best-sellers. Students in this course will read, analyze and discuss long-form sports journalism. Some of the books and stories are considered classics of the form; others may be fairly recent and news-worthy publications. All will represent varied approaches to sports journalism in books, magazines and digital experiments and forms.

JOUR 421  Editing for Publication  credit: 3 Hours.  
Principles and practice of editing across disciplines. Content includes style, grammar, punctuation, word usage, clarity and brevity. Both print and digital environments are considered. Students will edit text and display copy such as headlines and photo captions. 3 undergraduate hours. 3 graduate hours. Credit is not given for both JOUR 421 and JOUR 320. Journalism majors should enroll in JOUR 320. Prerequisite: Advanced Composition.

JOUR 425  Multimedia Editing and Design  credit: 4 Hours.  
Principles of visual reporting and editing; seeks to instill application-level competency in a wide array of non-linear, non-narrative techniques of journalistic storytelling across various media. 4 undergraduate hours. 4 graduate hours. Prerequisite: JOUR 215.

JOUR 445  Video Storytelling 2-Producing  credit: 4 Hours.  
Advanced techniques for reporting, producing, writing, shooting, and editing video news stories and for producing and airing regularly scheduled news programs on deadline. 4 undergraduate hours. 4 graduate hours. Prerequisite: JOUR 340.

JOUR 450  Media and Public Opinion  credit: 3 Hours.  
Theory of public opinion and communications; relation of communication systems to public opinion, social systems, and the political order. 3 undergraduate hours. 3 graduate hours. Prerequisite: Completion of Quantitative Reasoning I.

JOUR 451  Research Methods in Journalism  credit: 3 Hours.  
Introduction to social science principles of measurement, sampling, statistical inferences and logic of research design in collection, analysis and interpretation of information used in journalism and mass media. 3 undergraduate hours. 3 graduate hours. Prerequisite: Completion of Quantitative Reasoning I requirement. JOUR 200 recommended, or graduate standing. This course satisfies the General Education Criteria for: Quantitative Reasoning II

JOUR 452  Great Books of Journalism  credit: 3 Hours.  
Books written by journalists have had great impact on U.S. public policy and understanding, covering such topics as corporate power, political corruption, rural poverty, the atomic bombing of Japan, Watergate, and a soldiers-eye view of war. From hard-edged investigations to nonfiction literature, the readings broaden and deepen understanding of the power and purpose of journalism beyond breaking news and celebrities. Readings from eight groundbreaking books, assessment of social and professional impact, ethical issues, reporting and writing approaches, and extensive class discussion. 3 undergraduate hours. 3 graduate hours. This course satisfies the General Education Criteria for: Humanities - Lit Arts

Cultural Studies - US Minority

JOUR 453  Crisis Communications  credit: 3 Hours.  
Students will take on the role of a public relations/public affairs officer to learn how to deal with the media when managing a crisis for a client, whether a multinational corporation or a professional athlete. Students will use case studies of actual events to examine how the media dealt with the crisis. Students will get a look at the inner workings of a major PR firm devoted to telling the truth while managing the message. 3 undergraduate hours. 3 graduate hours.

JOUR 454  Propaganda & the News Media  credit: 3 or 4 Hours.  
The course examines techniques and processes of propaganda in a democratic society. It draws from contemporary theories of influence and persuasion to identify propaganda in the context of modern journalism, to delinate differences between propaganda and information, and to assess the impact of propaganda on democratic decision making in the digital age. Particular attention is given to the news media practices and consumption patterns that unwittingly facilitate strategies of modern propagandists. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, Senior or Graduate standing.

JOUR 460  Special Topics  credit: 1 to 4 Hours.  
A changing array of special projects, research or reading in journalism. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or subsequent semesters if topics vary.

Information listed in this catalog is current as of 04/2018
JOUR 470  International Reporting  credit: 3 Hours.
Role of international news in daily lives. Examines those who report it and those who pioneered it. Students monitor how U.S. and international media cover selected countries and learn how to write international news. In selected semesters, students may research issues and life in different countries in preparation for an international reporting trip. 3 undergraduate hours. 3 graduate hours.

JOUR 471  Science Journalism  credit: 3 Hours.
Students will explore media coverage of science. They will examine the interconnections of scientific advances and public understanding. The seminar format will allow students to interview scientists and journalists, to discuss work, and to become science communicators. Subject matter of reporting projects will be determined by the background and interests of the students. Field trips and Illinois science will be featured. 3 undergraduate hours. 3 graduate hours.

JOUR 472  Business Reporting  credit: 3 Hours.
Learning to follow the money is a key part of covering corporate America, professional sports or Hollywood. No need to fear financial statements: This course shows you easy methods to pick them apart and turn them into smart stories. Students learn to report and write stories using the Wall Street Journal’s feature methods. 3 undergraduate hours. 3 graduate hours. Prerequisite: JOUR 210 or JOUR 400. Journalism or Agricultural Communications major(s). Restricted to students with Sophomore, Junior, Senior, or Graduate class standing.

JOUR 475  Magazine Writing  credit: 3 Hours.
Preparation of feature stories and articles; techniques of marketing, market analysis, and publishing articles written in the course. 3 undergraduate hours. 3 graduate hours. Prerequisite: JOUR 210.

JOUR 480  Advanced Reporting Topics  credit: 3 Hours.
Advanced reporting projects or techniques, with separate sections for a varying array of topics such as investigative reporting, immersion journalism, literary journalism, business and financial journalism, online publishing, radio news features, sports writing, broadcast documentary production, digital journalism, and photo journalism. 3 undergraduate hours. 3 graduate hours. May be repeated in the same or subsequent semesters if topics vary. Prerequisite: JOUR 210.

JOUR 481  Literary Feature Writing  credit: 3 Hours.
Course focuses on concept, reporting practice, and ethics of literary approaches to create evocative, story-like journalism articles. Students report and write a single in-depth story that will be re-reported and re-written three times. Includes extensive readings illustrating the finest literary journalism. The class includes extensive self, class and professor criticism and editing. Articles for this class have been published in the News-Gazette and other publications. An archive of published stories can be found at intimatejournalism.com. 3 undergraduate hours. 3 graduate hours. Prerequisite: JOUR 210. Journalism majors only.

JOUR 482  Immersion Journalism  credit: 3 or 4 Hours.
The interview methodology students learn is seen as the best way to provide the ethnographer/writer/reporter with insight into social phenomena. The methodology can be used to examine living conditions, family history and attitudes of ethnic groups at any class level -- wealthy, affluent, middle class, poor or underclass. Students with insatiable curiosity about behavior will be able to extract from participants surprising revelations about their needs, desires and motivations. Students will learn how personalities, circumstances, and choices made by participants’ parents and forebears affect the participant’s life today. Same as AFRO 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: Juniors, Seniors and Graduate students of any discipline.

JOUR 483  Investigative Journalism  credit: 3 Hours.
The investigative methodology students learn is seen as the best way to provide the producer/editor/reporter with insight into social issues, government and businesses practices and systems. The methodology can be used to examine and topics or issue. Students will use data, documents, interviews and field observation to collect information, do basic data analysis, test hypotheses, and produce stories in text, audio, or video or all. Students will learn how to do deep research, organize complex material, and produce presentations that are easy for the public to understand. 3 undergraduate hours. 3 graduate hours.

JOUR 490  Professional Project  credit: 3 Hours.
Individual and team-produced advanced enterprise projects in specialized fields. 3 undergraduate hours. 3 graduate hours. May be repeated in the same or subsequent semesters if topics vary.

JOUR 495  Internship Seminar  credit: 0 to 1 Hours.
Seminar based on internship experience. Offered for College of Media students who complete an approved professional, industry related internship. 0 to 1 undergraduate hours. 0 to 1 graduate hours. Approved for S/U grading only. May be repeated in the same term to a maximum of 2 undergraduate hours or 2 graduate hours. May be repeated in separate terms to a maximum of 3 undergraduate hours or 3 graduate hours. Prerequisite: Consent of instructor.

JOUR 500  Current Issues in Journalism  credit: 4 Hours.
Seminar on issues of contemporary importance in journalism in their historical, multicultural contexts. Emphasis on ethical, legal, social, professional aspects of those issues. Aimed at helping students to develop their own journalism philosophies and high standards of conduct. Prerequisite: Consent of department.

JOUR 501  Multimedia Storytelling  credit: 4 Hours.
The course is designed to equip graduate students who have little or no journalism experience to report in a multimedia environment. In the first part of the course, students learn where to find stories and how to develop story ideas, as well as basic research and interviewing techniques. Students will then be introduced to the various ways in which stories can be told using media platforms such as print, radio, television and the web. Prerequisite: Graduate students only.

JOUR 505  Journalism Proseminar  credit: 4 Hours.
Introduction to scholarship and research in journalism and mass communication examining theoretical approaches to the meanings, uses, and effects of mass media in society; discussion of media freedom and accountability; humanistic and social scientific contributions to understanding mass communication. Prerequisite: Consent of department.

JOUR 515  Master’s Project  credit: 4 Hours.
A professional journalism project demonstrating development of analytical and critical thinking abilities appropriate to the profession and effective application of journalism methodology. May be repeated up to 8 hours. Prerequisite: Consent of department.

JOUR 590  Advanced Topics in Journalism  credit: 2 to 4 Hours.
Advanced special projects, research or reading in journalism at the master’s and doctoral level. Approved for letter and S/U grading only. May be repeated in the same term to a maximum of 8 hours; may be repeated in separate terms to a maximum of 24 hours.

Kinesiology (KIN)

KIN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/KIN)
Courses

KIN 100 Development Activities  credit: 1 to 2 Hours. 
Skills and knowledge essential for leisure-time activities which are classified as developmental activities. Prerequisites and descriptions for each developmental activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 2 hours.

KIN 101 Dance Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as dance activities. May be repeated; more than one activity (Sections A through Z) may be taken in the same term. Prerequisite: See Class Schedule for prerequisites for each dance activity.

KIN 102 Individual and Dual Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as individual and dual activities. Prerequisites for each individual or dual activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

KIN 103 Indoor Court Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as indoor court activities. Prerequisites for each indoor court activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term.

KIN 104 Skating Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as skating activities. Prerequisites for each skating activity are provided in the Class Schedule. Additional Ice Skating Rink Facility charges are required and provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

KIN 107 Aquatic Sport Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as aquatic sport activities. Prerequisites for each aquatic sport activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term. Additional fees may apply. See Class Schedule.

KIN 109 Team Sport Activities  credit: 1 Hour. 
Skills and knowledge essential for leisure-time activities which are classified as team sport activities. Prerequisites for each team sport activity are provided in the Class Schedule. More than one activity (Sections A through Z) may be taken in the same term.

KIN 110 Intro to the Health Sciences  credit: 3 Hours. 
Same as CHLH 110. See CHLH 110.

KIN 111 Prescribed Exercise  credit: 1 Hour. 
Prescribed exercises adapted to individual needs, capacities, and interests; open to persons with paraplegia, permanently disabled, and individuals with significant temporary disabilities who will require long term rehabilitation. Students must be registered or eligible to register with DRES. May be repeated to a maximum of 4 hours. Prerequisite: Enrollment restricted to students with permanent disabilities or disabilities which are long-term in nature. Student should be registered or eligible to register with DRES.

KIN 120 Injuries in Sport  credit: 2 Hours. 
Emphasizes injury mechanisms, means of injury prevention, and emergency care applied to various types of sport injuries; laboratory sessions emphasize preventive and therapeutic taping and emergency first aid. Additional fees may apply. See Class Schedule.

KIN 121 Survey of Sports Medicine  credit: 3 Hours. 
Introduction to sports medicine for non-kinesiology majors; includes discussion of training, conditioning, preparation for sports, injury aspects of sports, and rehabilitation.

KIN 122 Physical Activity and Health  credit: 3 Hours. 
Provides the scientific evidence of physical activity in preventing disease and optimizing quality of life. Teaches behavioral change strategies to achieve an active lifestyle.

KIN 125 Orientation KIN & Comm Health  credit: 1 Hour. 
Serves as an introduction to the Kinesiology and Community Health Department and provides an overview of the Kinesiology and Community Health curricula, areas of study, and opportunities available for a career in the field. Enrollment required for Kinesiology freshmen and transfer students. Credit is not given for both KIN 125 and CHLH 125.

KIN 130 Analysis of Basic Movement  credit: 2 Hours. 
Introduction to human movement through development of skills and knowledge relative to structure and function of the human body in selected physical activities including: basic postural and locomotion patterns and fundamental throwing patterns; also studies developmental aspects of typical and atypical movement skills. Emphasizes performance and qualitative analysis of movement skills.

KIN 140 Social Sci of Human Movement  credit: 3 Hours. 
Introduction to the social scientific aspects of human movement including sport; particular emphasis on concepts derived from the social sciences (including psychology) that are appropriate to human movement. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

KIN 142 Contemporary Issues in Sport  credit: 3 Hours. 
Examines current issues in sport relative to competition, economics, race, sex, youth, educational institutions, deviant behavior, religion, psychology, and the media.

KIN 150 Bioscience of Human Movement  credit: 3 Hours. 
Integrates anatomical and physiological aspects of human movement; emphasizes how the body moves, physiological responses to exercise stress, physical conditioning and physical fitness. Additional fees may apply. See Class Schedule. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

KIN 160 Introduction to Kinesiology  credit: 3 Hours. 
Kinesiology is the interdisciplinary study of physical activity that includes a number of sub-disciplines. This course will examine these areas of study within Kinesiology from scientific, applied, and experiential perspectives. Students will study fundamental/introductory concepts associated with each area of Kinesiology, explore those concepts within research and applied contexts, and complete activities in which they experience various dimensions of those concepts.

KIN 199 Undergraduate Open Seminar  credit: 0 to 5 Hours. 
Additional fees may apply. See Class Schedule. Approved for letter and S/U grading. May be repeated.

KIN 201 Physical Activity Research Methods  credit: 3 Hours. 
This course provides an introduction of physical activity measurement and methods. The course will focus on (a) defining physical activity and associated terms and concepts; (b) providing detailed understanding of approaches and tools for measuring physical activity; and (c) facilitating understanding of scientific methods for physical activity research (e.g., experimental and non-experimental designs).
KIN 230 Diversity in Recreation, Sport, and Tourism credit: 3 Hours. Same as HDFS 263 and RST 230. See RST 230. This course satisfies the General Education Criteria for: Cultural Studies - US Minority

KIN 247 Intro to Sport Psychology credit: 3 Hours. Analysis of the competitive sport process, with study of how personality and situational variables affect motivation, anxiety, and aggression in sport. Attention is given to the psychological skills needed by coaches and athletes for successful and enjoyable sports participation.

KIN 249 Sport & Modern Society credit: 3 Hours. The sociological analysis of sport in modern societies with regard to social class, politics, community, education, and collective behavior. Same as SOC 249. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

KIN 257 Coordination, Control & Skill credit: 3 Hours. Introduction to the concepts and principles of the coordination and control of movement and the development of skilled action. The course will focus on such topics as fundamental movement activities; movement control processes; acquisition, retention and transfer of skill; and the role of constraints to action. These topics have implications for understanding skilled performance, motor development and human performance in general. Additional fees may apply. See Class Schedule. Prerequisite: KIN 140 and KIN 150 or consent of instructor.

KIN 259 Motor Development and Control credit: 3 Hours. This course provides students with an overview of motor development across the life span as well as an introduction to the discipline of motor behavior/control. Specifically, it focuses on the concepts and principles of coordination, the control of movement, and development of skilled action throughout the life span. The course focuses on such topics as the development of fundamental movement activities; movement control processes; acquisition, retention and transfer skill; and the role of constraints to action. Same as HDFS 259. Additional fees may apply. See Class Schedule. Credit is not given for both KIN 259 and KIN 257. This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

KIN 260 Teaching Activities I credit: 3 Hours. An activity-based course focusing on skills, knowledge, and teaching progressions related to territorial and net sports for school age students. Students will develop knowledge of the basic skills and teaching progressions related to the activities covered in the class. Prerequisite: KIN 130.

KIN 261 Teaching Activities II credit: 2 Hours. An activity-based course focusing on skills, knowledge, and teaching progressions related to target sports, rhythms, dance and fitness activities, and adventure education activities for school age students. Students will develop knowledge of the basic skills and teaching progressions related to the activities covered in the class. Prerequisite: Prerequisite: KIN 130.

KIN 262 Motor Develop, Growth & Form credit: 3 Hours. Examination of the concepts of motor development, physical growth, and body form throughout the lifespan. Major emphasis is on the period of birth through adolescence. Same as HDFS 262. This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

KIN 268 Children's Movement credit: 3 Hours. Introduction and overview of kinesiology principles and physical activity related to children. Laboratory portion of class focuses on the application of information to teaching physical activity to elementary school children. Prerequisite: For non-kinesiology majors.

KIN 340 Soc & Psych of Phys Activity credit: 3 Hours. Discusses how social and psychological processes and constraints affect human action in physical activity environments. Attention is given to socialization, personal dynamics, stratification, and ideological and economic constraints upon the manifestations of physical activity. Prerequisite: KIN 140 or PSYC 100 and completion of the Campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition

KIN 345 Sport and Society credit: 3 Hours. Same as HIST 390. See HIST 390.

KIN 346 Case Study: Endless Summer credit: 3 Hours. The 1966 classic film – The Endless Summer – and related films and literature are used as lenses for the historical-cultural study of human movement in the form of riding waves of water. Surf culture and films are global phenomena and by using such as unique cases, students gain mastery in cultural-interpretive theories, themes, and vocabulary, and in articulating perspectives on social roles, knowledge, and power. Same as RST 346 and MACS 346.

KIN 352 Bioenergetics of Movement credit: 3 Hours. Study of the nature of energy transfer during physical activity; mechanisms of metabolic control, force production, cardiorespiratory support and adaptation relative to physical activity. Additional fees may apply. See Class Schedule.

KIN 355 Biomechanics of Human Movement credit: 3 Hours. Studies the biological and mechanical principles of human motor performance; analyzes selected movement skills in depth. Additional fees may apply. See Class Schedule.

KIN 360 Adapted Physical Education credit: 3 Hours. Organization, administration, and conduct of physical education programs for the most prevalent types of medical conditions found in school settings; emphasis on analyzing motoric needs and prescribing programs of motor activity for special populations, including individuals with mental retardation and learning disabilities Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of instructor.

KIN 361 Curriculum in Grades K-6 credit: 3 Hours. Examines the theoretical and philosophic curricular principles necessary to the development of a sound, professionally grounded, and research-based curriculum for children in grades K-6. Requires planning a variety of developmentally appropriate learning activities that are taught to children during micro-teaching experiences in the field. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of instructor.

KIN 362 Curriculum in Grades 7-12 credit: 3 Hours. Provides students with theoretical knowledge and professional practice in secondary physical education curriculum and instruction. This research-based course emphasizes effective teaching, development of content, and analysis of curricular models in grades 7-12. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of instructor.
KIN 363 Instructional Strategies in PE  credit: 3 Hours.
Analyzes the teaching-learning process, emphasizing the identification of instructional strategies specific to the development of skilled performance in movement activities. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program.

KIN 364 Exper in the Common School  credit: 3 Hours.
Supervised practice in observing, assisting, and teaching children in elementary, junior high school, and senior high school. Emphasis is on understanding motor behavior, teacher-learner behavior, and interrelatedness with other aspects of the learning environment. May be repeated to a maximum of 6 hours. Prerequisite: Junior standing or above and enrollment in the Teacher Certification program or consent of the instructor.

KIN 365 Civic Engagement in Wellness  credit: 3 Hours.
Provides scholarly knowledge and practical experience related to environmental, intellectual, physical, psychological, spiritual, and social wellness. Students acquire leadership and real-world skills while working in teams to develop and implement projects that facilitate health and well-being in the population of adults living in the community. Projects emphasize integrative learning and are showcased in both written and oral formats. Same as AHS 365, CHLH 365, RST 365, and SHS 370.

KIN 369 Coaching Strategies  credit: 3 Hours.
Examination of philosophy, ethics, strategies, motivational techniques, performance analysis, program organization, contest administration, and equipment and facility management related to coaching.

KIN 375 Comm Partners & Health  credit: 3 Hours.
Same as AHS 375 and SHS 375. See SHS 375.

KIN 385 Exper in Kinesiology Research  credit: 3 Hours.
Supervised laboratory experiences in kinesiology research; individual work under the supervision of members of the faculty in their respective fields. The student assists with data collection, processing, and analysis for research in progress. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

KIN 386 Exercise Instruction & Elderly  credit: 3 Hours.
This course is designed to offer practical experience opportunities to undergraduate Kinesiology students aspiring to work in applied exercise fields with a diverse aged population. It will entail extensive "on the job" training through the Lifetime Fitness Program, an older adult service program of the Department of Kinesiology. Additionally, students will gain training in current program management practices. May be repeated to a maximum of 6 hours. Prerequisite: KIN 352 or consent of instructor is required. A current CPR is required at the beginning of the term and certification must remain current.

KIN 387 Exper in the Agency Setting  credit: 3 Hours.
Supervised practical experience in leadership roles in nonschool agency settings; emphasis on observing, planning, and conducting physical activity programs for children and/or adults in preschool, recreation, or other social agencies. May be repeated for a maximum of 6 hours.

KIN 390 Honors  credit: 2 Hours.
Course is restricted to James Scholars pursuing the Civic Commitment and Leadership Tracks. Designed to support completion of the James Scholar honors project. Same as CHLH 390 and RST 390. May be repeated to a maximum of 6 hours. Prerequisite: James Scholar standing.

KIN 391 Special Project-Problems  credit: 2 or 3 Hours.
Special projects in research and independent investigation in any phase of health, kinesiology, physical education, and related areas selected by the students. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; grade-point average of 2.5; consent of instructor.

KIN 393 Honors Thesis  credit: 3 Hours.
Planning, researching and writing of an honors thesis, under supervision of a faculty member, on a problem of appropriate scope and character. Paper will be presented at a suitable meeting and/or seminar. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing when enrolling; minimum grade point average (total, University and Kinesiology prefix courses) of 3.25; a minimum of one full year (2 semesters) remaining at the University of Illinois, Urbana-Champaign campus; and submission of a written proposal.

KIN 401 Measure & Eval in Kinesiology  credit: 3 or 4 Hours.
Examines the concepts of observation, measurement, and evaluation of human motor performance and functioning in physical activity contexts. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 140 and KIN 150, or graduate standing, or consent of instructor. This course satisfies the General Education Criteria for: Quantitative Reasoning II

KIN 407 Disability, Culture & Society  credit: 3 or 4 Hours.
Same as ANTH 404, CHLH 407, and REHB 407. See CHLH 407.

KIN 442 Body, Culture & Society  credit: 3 or 4 Hours.
Analysis of the significant social aspects of the human body including anthropological, historical, psychological and sociological perspectives. Places emphasis on cross-cultural and cross-national studies of bodily behavior with particular stress on exercise, health and sport practices. Same as GWS 442. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 249 or SOC 249, or graduate standing; or consent of instructor.

KIN 443 Psychophysiology in Ex & Sport  credit: 3 or 4 Hours.
Designed to give the student an understanding of the interaction between psychological processes and physiological parameters in exercise and sport. Examines psychophysiological exercise and sport research with particular attention to relevant models and theories. Same as PSYC 443. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior or senior standing, KIN 340, or graduate standing, or consent of instructor.

KIN 444 Physical Activity and Chronic Diseases  credit: 3 or 4 Hours.
Focuses on the scientific evidence regarding the health benefits of exercise, physical activity, and physical fitness in the prevention and management of chronic diseases. 3 undergraduate hours. 4 graduate hours.

KIN 447 Psych of Sport Performance  credit: 3 or 4 Hours.
Outlines the social psychological parameters which influence behavior and performance in sport; emphasizes the impact of social influences upon the individual within the sport context, including such factors as achievement motivation, competition, anxiety, aggression, and personality. Same as PSYC 447. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 140, KIN 247, or PSYC 201, or graduate standing, or consent of instructor.

KIN 448 Exercise & Health Psychology  credit: 3 or 4 Hours.
Examines the psychological determinants and consequences of exercise and physical activity as a health promoting behavioral process. Same as CHLH 448. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above, or graduate standing, or consent of instructor.
KIN 450 Biochemistry of Exercise  credit: 3 or 4 Hours.
Introduces the metabolic and biochemical adaptation of the body in response to acute and chronic physical activity. Primary focus is given to the subcellular and enzymatic regulation and integration during exercise. Substrate metabolism, bioenergetics, hormonal action and nutritional influences as related to exercise are emphasized. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352 or MCB 450; or consent of instructor.

KIN 451 Skeletal Muscle Physiology  credit: 3 or 4 Hours.
Offers basic information on skeletal muscle anatomy, physiology and function which will provide a basis for understanding changes in muscle structure and function during periods of increased or decreased use. Knowledge gained in this course can be used in areas such as design of training programs, physical therapy, or injury prevention. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352 or prior consent of the instructor.

KIN 452 Clin & Applied Ex Physiology  credit: 3 or 4 Hours.
Physical fitness appraisal and guidance in clinical and applied settings with emphasis on medical clearance, risk factor assessment, physical fitness assessment and exercise prescription. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352, or graduate standing, or consent of instructor.

KIN 453 Nutrition for Performance  credit: 3 or 4 Hours.
Nutrition for performance is the fusion of two disciplines, nutrition and exercise physiology, which provides the knowledge-base to support and optimize training, performance, and recovery. This course will provide information regarding the use of nutrition to increase performance in athletes training for strength or endurance. Same as FSHN 453. 3 undergraduate hours. 4 graduate hours.

KIN 457 Motor Learning & Control  credit: 3 or 4 Hours.
Discussion and analysis of scientific principles related to the learning and control of motor skills; review of related literature and research in motor learning and control. The focus of the course is on mechanisms for the control of movement and recent theories of how movements are acquired and performed. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 257 or graduate standing or consent of instructor.

KIN 458 Neurobio of Aging  credit: 0 to 4 Hours.
Same as PSYC 451 and NEUR 451. See PSYC 451.

KIN 459 Physical Activity & Aging  credit: 3 or 4 Hours.
Examines aging and age-related changes in the cells, tissues, organs, and systems of the human body; emphasizes the role of physical activity and other lifestyle choices in modifying the aging process and in influencing the onset and progression of the chronic diseases which accompany aging. Same as HDFS 459. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, Senior, or graduate standing or consent of instructor.

KIN 460 Technology & Pedagogical KINES  credit: 3 or 4 Hours.
Promotes mastery of technology skills and complex computer applications through the analysis of research and critical issues related to technology in Kinesiology. The completion of technology modules, requiring problem solving and the collection and analysis of assessment data, will culminate in an interactive, multimedia project. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing.

KIN 470 Exercise Endocrinology  credit: 3 or 4 Hours.
The objective of this course is to gain a better understanding of the endocrine system and its response to physical exercise. Therefore, this course will provide a basic review of 1) the major glands and tissues that secrete chemical messengers, 2) the ability of acute exercise and exercise training to regulate chemical messengers, and 3) the physiological consequences of endocrine adaptation to exercise. Clinical disorders associated with endocrine dysfunction will also be discussed when relevant. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 352.

KIN 473 Skill Acquisition Strategies  credit: 3 or 4 Hours.
Examines theory and practice related to structuring practice conditions to maximize the acquisition and performance of motor skills. The nature of skill, activities, and strategies for enhancing skill are discussed with particular emphasis placed on strategies that instructors, teachers, and/or coaches can use to enhance skill acquisition and performance. 3 undergraduate hours. 4 graduate hours. Prerequisite: KIN 257 or graduate standing or consent of instructor.

KIN 485 Clin Exper in Sports Medicine  credit: 2 to 8 Hours.
Clinical experiences in medical supervision of sports programs, in the areas of therapeutic exercises, fitness programming, and cardiac rehabilitation. 2 to 8 undergraduate hours. 2 to 8 graduate hours. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

KIN 494 Special Topics  credit: 1 to 4 Hours.
Lecture course on topics of current interest; specific topics announced in the Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated.

KIN 501 Kinesiology Research Methods  credit: 4 Hours.
Review and appraisal of common research procedures; application of statistical procedures, library methods, evaluation procedures, and experimental methods.

KIN 530 Childhood Obesity I  credit: 3 Hours.
Same as CHLH 530, FSHN 530, HDFS 551, NUTR 530, SOCW 570. See NUTR 530.

KIN 531 Childhood Obesity II  credit: 4 Hours.
Same as CHLH 531, FSHN 531, HDFS 552, NUTR 531, SOCW 571. See NUTR 531.

KIN 540 Health Behavior: Theory  credit: 4 Hours.
Same as CHLH 540. See CHLH 540.

KIN 543 Physical Activity & Cognition  credit: 4 Hours.
Examines the relationship between physical activity and fitness on brain and cognition across the lifespan. The psychobiology of physical activity effects on cognition is emphasized. Other areas of study include aging, development, and psychosocial factors. Methodological issues as well as human and animal models of research will be studied.

KIN 551 Sci Basis of Phys Performance  credit: 4 Hours.
Contemporary trends in the study of human performance and exercise stress; analysis of the research literature, experimental strategies, and research instrumentation. Lecture-discussion and laboratory.
KIN 552 Adv Skeletal Muscle Physiology credit: 4 Hours.
Course provides an in-depth understanding of skeletal muscle anatomy, cell biology, and physiology. Classroom discussions of primary literature and other activities will focus on muscle structure and function. Information will also be provided on the molecular and cellular basis for adaptations that occur with increased use, such as endurance or strength training, or periods of disuse, such as injury and disease.

KIN 553 Circulorespiratory Physiology credit: 4 Hours.
Aerobic performance responses to short-term, intermittent, and prolonged physical activity; special consideration given to endurance training methods and assessment techniques, ergogenic aids, and problems associated with growth, environmental influences, and competitive sport. Prerequisite: KIN 551 or consent of instructor.

KIN 557 Stress Immunology credit: 4 Hours.
This course will examine the role of stress in modulating immune function and the pathobiological mechanisms resulting in disease. An emphasis will be placed upon the reciprocal communication pathways that exist between the central nervous, endocrine and immune systems. Prerequisite: Consent of the instructor. It will be assumed that students will have introductory knowledge in biochemistry, endocrinology, and immunology.

KIN 560 Research on Teacher Education credit: 4 Hours.
Critically examines advanced theories, trends, problems, and implications of research on teacher education in Kinesiology. Students will complete a series of written assignments that are grounded in theory, illustrate critical thinking skills, and demonstrate extensive knowledge of the literature. Prerequisite: Graduate standing.

KIN 564 Qualitative Research Methods credit: 4 Hours.
Introduces students to qualitative methodology in the educational and health-related professions settings. Students will learn to interpret qualitative research, understand its theoretical underpinnings, acquire interviewing and observation skills, design and evaluate a community-based group research project, learn to collaborate with others, and critically assess the contributions to the project of self and peers.

KIN 565 Teaching in the Professoriate credit: 4 Hours.
Provides scholarly knowledge and practical experience necessary for effectively assuming the roles of teaching, mentoring, and presenting in the professoriate. Students will learn to teach an undergraduate course with an assigned faculty mentor, give a scholarly research presentation, and attend a series of theoretically grounded lectures focusing on instructional design, learner characteristics, and successfully conveying information to others. Same as CHLH 565, RST 560, and SHS 565. Prerequisite: Must be a PhD student in the College of Applied Health Sciences.

KIN 590 Independent Study credit: 2 or 4 Hours.
Independent research on special projects. May be repeated.

KIN 591 Seminar credit: 1 Hour.
Lectures, discussions, and critiques on kinesiology and community health related subjects by faculty members and visiting professional leaders; presentation and criticism of student research. Approved for S/U grading only. May be repeated in subsequent terms as topics vary.

KIN 594 Special Topics credit: 1 to 4 Hours.
Lecture course in topics of current interest; specific subject matter announced in the Schedule. May be repeated.

KIN 599 Thesis Research credit: 0 to 16 Hours.
Preparation of theses in kinesiology. Approved for S/U grading only. May be repeated.

Information listed in this catalog is current as of 04/2018
KOR 222 Korean Reading and Writing II  credit: 4 Hours.
Continuation of KOR 221 and second semester of spoken and written Korean for the students with background in Korean. Students learn basic grammar, vocabulary, and commonly used expressions, to achieve the beginning-intermediate level proficiency in reading and writing as well as in speaking of Korean. Credit is not given for KOR 222 if credit for KOR 202 has been earned; determination is based on the placement test. Prerequisite: KOR 221 or as determined by a placement test and an instructor. Students must have taken KOR 221 at this University. Otherwise, those with prior knowledge of Korean must take placement test in January. Sign up for the test in the office of the EALC Department (244-2725).

KOR 241 Korean Reading and Writing III  credit: 4 Hours.
Continuation of KOR 222 and first semester of the second year of spoken and written Korean. Students learn grammar and vocabulary to achieve intermediate-level speaking, listening, reading and writing in Korean. Credit is not given for KOR 241 if credit for KOR 204 has been earned; determination is based on the placement exam. Prerequisite: KOR 222 or as determined by a placement exam and an instructor. Students must have taken KOR 222 at this University. Otherwise, those with prior knowledge of Korean must take the placement exam in August. Sign up for the test in the office of the EALC Department (244-2725).

KOR 242 Korean Reading and Writing IV  credit: 4 Hours.
Continuation of KOR 241 and second semester of the second year of spoken and written Korean. Students are exposed to theme-related passages and dialogues, practicing speaking, listening, reading, and writing, in order to achieve advanced-intermediate level proficiency in Korean. Credit is not given for KOR 242 if credit for KOR 306 has been earned. Prerequisite: KOR 241 or as determined by a placement exam and an instructor. Students must have taken KOR 241 at this University. Otherwise, those with prior knowledge of Korean must take the placement test in January. Sign up for the test in the office of the EALC Department (244-2725).

KOR 305 Advanced Korean I  credit: 5 Hours.
Continuation of KOR 204 and first semester of third year Korean. Concentrates on enhancing the level of fluency in speaking, listening, reading and writing of Korean. Students learn more advanced-level vocabulary and expressions and read more authentic texts in Korean. Credit is not given for KOR 305 if credit for KOR 241 has been earned; determination is based on placement test. Prerequisite: KOR 204 or as determined by a placement exam and an instructor. Students must have taken KOR 204 at this University. Otherwise, they should take the placement test in August. Sign up for the test in the office of the EALC Department (244-2725).

KOR 306 Advanced Korean II  credit: 5 Hours.
Continuation of KOR 305 and second semester of third year Korean. Concentrates on enhancing the level of fluency in speaking, listening, reading and writing of Korean. Students will learn about more advanced-level vocabulary and everyday expressions and read texts in Korean where Korean culture is introduced and discussed. Credit is not given for KOR 306 if credit for KOR 242 has been earned. Prerequisite: KOR 305 or as determined by a placement test and an instructor. Students must have taken KOR 305 at this University. Otherwise, they should take the placement text in January. Sign up for the exam in the office of the EALC Department (244-2725).

KOR 440 Fourth Year Korean I  credit: 3 or 4 Hours.
Develop the ability to engage in fluent discourse, to understand authentic texts through the acquisition of advanced-level vocabulary and expressions, and to refine and improve their writing in Korean. Students are expected to engage in class discussions on various topics of Korean culture and society. 3 undergraduate hours. 4 graduate hours. Prerequisite: KOR 306 or KOR 242 or as determined by a placement test and an instructor. Students must have taken KOR 306 or KOR 242 at this University. Otherwise, those with prior knowledge of Korean should take the placement exam in August. Sign up for the test in the office of the EALC Department (244-2725).

KOR 441 Fourth Year Korean II  credit: 3 or 4 Hours.
Allows advanced students to further develop their reading comprehension of authentic texts through the acquisition of advanced-level vocabulary and expressions, and to discuss and write on various topics and issues related to contemporary Korea. 3 undergraduate hours. 4 graduate hours. Prerequisite: KOR 440 or as determined by a placement test and an instructor. Students must have taken KOR 440 at this University. Otherwise, those with prior knowledge of Korean should take the placement test in January. Sign up for the test in the office of the EALC Office (244-2725).

Labor and Employment Relations (LER)
LER Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/LER)

Courses
LER 100 Introduction to Labor Studies  credit: 3 Hours.
Provides an overview of workers and unions in American society. Looks at economic, political, and workplace issues facing working people, why and how workers join unions, how unions are structured and function, and how unions and management bargain a contract. Provides a historical overview of the American labor movement, and discusses the contemporary struggles workers and unions face in a rapidly changing global economy.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

LER 110 Labor and Social Movements  credit: 3 Hours.
Explores the role of labor unions in American society. Discusses the role of labor unions in initiating actions on social issues that impact the U.S. working class, the economy, public policy, and politics. Analyzes the labor movement’s interaction with the civil rights, women’s, student, global justice, and living wage movements.

LER 120 Contemporary Labor Problems  credit: 3 Hours.
Focuses on problems and challenges facing American workers and the U.S. labor movement. Topics include the deterioration of the labor-management “social contract” in recent decades; a review of labor and employment law; the health care crisis; globalization and cross-border union alliances; and union democracy.
LER 130 Intro Labr Wrkg Class History credit: 3 Hours.
Do working people have a history worth studying? What does the history of the U.S. look like when viewed from the point of view of those who built the country? Introduces U.S. labor and working class history.
Examines the conditions of life and work of the various groups of working people: enslaved, indentured, small farmers, but especially wage workers and their families from the Civil War to the present. Studies the main collective actions workers have taken to protect and improve their lives and the organizations and social movements they created to do this. Students who complete LER 130 and want a more in-depth look at the subject should enroll in HIST 480.

LER 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

LER 200 Globalization and Workers credit: 3 Hours.
Is globalization good for working people in the United States and around the world? Globalization is the driving force in the world economy but it is also provoking tremendous debate and popular resistance. Students will learn the basics about globalization and its institutions from the perspective of workers' right in the U.S. and the Third World. Analyzes the debate over free trade and sweatshops, trade agreements such as the North American Free Trade Agreement, and institutions such as the World Trade Organization and the International Monetary Fund. Closely examines working conditions in several Third World countries, and explores the role of the global justice movement.

LER 210 Images of Labor in Film credit: 3 Hours.
Uses feature-length film to take an in-depth look at key labor strikes and organizing drives from the 1910s through the 1980s. Students will view some of the most powerful films on worker and labor themes ever produced. Studies the work lives and labor unions of miners, railroad porters; packinghouse workers; textile workers; and farm workers. Discusses the meaning of the events depicted in the films by situating them in historical context with detailed readings; engage the debates raised in the films about labor organizing methods and strike strategies that are relevant to today's labor movement; reflect on issues of race, gender, class consciousness, working conditions, union goals, anti-communism, and labor-management relations raised in the films and readings; analyze how effectively the films, and Hollywood in general, portray workers and unions; and compare and contrast the films.

LER 220 The Media, Workers, and Unions credit: 3 Hours.
Workers, unions, and how the news media tells their stories. Looks at the past, the present and future. Analyzes how these stories are told in the mainstream and independent news media in the U.S., and examines the Internet's explosion and impact on these stories. Looks at how blogs, online videos, citizen journalism, and the fast changing world of Internet communication has given voice to workers and their issues. Compares the print and online media with the work done in documentaries and the cinema. Looks at the global telling of these stories. Lastly, examines the ways that unions can better tell their stories.

LER 240 China's Labor Relations credit: 3 Hours.
This course analyzes how China is reshaping the world economy, labor markets, unions, forms of worker resistance, and the lives of workers around the globe. We will examine China's transition from socialism to state capitalism; working conditions facing Chinese workers; evolving labor and employment relations; the role and function of the All-China Federation of Trade Unions; and worker protests and strikes demanding improved conditions.

LER 290 Introduction to Employment Law credit: 3 Hours.
Addresses and critiques the content, interpretation, and applications of the laws that govern employer-employee relations in the American workplace. Explores the historical sources, underlying ideology, and current content of anti-discrimination and civil rights laws, of laws that seek to guarantee a safe and healthy workplace for all Americans, of laws that guarantee minimum wages and overtime pay, of legal protections of privacy on the job, of unemployment insurance and workers' compensation laws, and of laws that guarantee workers the right to collective action and collective bargaining.

LER 300 Workers, Unions, and Politics credit: 3 Hours.
What is the meaning and impact of politics seen from the perspective of those at the bottom of the pyramid of political power rather than from the usual focus on the actions and perceptions of political elites? In what ways do workers become involved in politics? Under what circumstances are they likely to be successful in bringing about change? This course addresses these questions by exploring political power, political participation, and political change from a broad historical and cross-cultural perspective, but always focusing on a view of politics from the bottom up. The course analyzes the political economy of labor, and the labor movement's political influence in politics.

LER 320 Gender, Race, Class and Work credit: 3 Hours.
Provides a historical and contemporary overview of the impact and interplay of gender, race, class and other issues of identity in the workplace. Topics include: pay gap, occupational segregation, workplace harassment, low wage work, and employment discrimination laws. The response of labor unions to identity issues will also be examined. Prerequisite: LER 100, LER 110 or one course that covers race or gender issues is required.

LER 330 Comparative Labor Relations credit: 3 Hours.
Designed as an overview of comparative labor movements and labor relation systems. Develops a framework for understanding union formation and the development of industrial relations system in a variety of countries around the world. An emphasis will be placed on each country's interaction between unions and political organizations, national labor policies, the machinery for the resolution of workplace problems, the level of shop floor disturbances, bargaining coverage of employees, and the issues of workers' control. Also addresses how globalization has transformed the capacity of any nation's labor relations' system to respond to economic challenge and workplace conflicts. Examines the possibility of developing transnational union.

LER 410 Labor and the European Union credit: 4 Hours.
Addresses the formation of European Union (EU) labor policy; the role of trade unions in EU member nations; worker immigration in the EU; diversity issues in the EU labor market and a comparative analysis of industrial relations in Europe. Same as EURO 410 and SOC 410. 4 undergraduate hours. 4 graduate hours. Prerequisite: Consent of the instructor.

LER 440 Economics of Labor Markets credit: 2 to 4 Hours.
Same as ECON 440. See ECON 440.

LER 450 European Working Class History credit: 2 to 4 Hours.
Same as HIST 450 and SOC 422. See HIST 450.

LER 480 US Work Class Hist Since 1780 credit: 2 to 4 Hours.
Same as HIST 480. See HIST 480.
LER 522 Government Regulation  credit: 4 Hours.
Focuses on federal and state legislation, court and agency rulings, and executive orders that regulate a wide range of private and public employment practices including: Title VII and Affirmative Action Compliance; American with Disabilities Act; drug-, HIV-, and genetic testing; Fair Labor Standards Act; Civil Service procedures; Equal Pay Act, Family and Medical Leave Act, and employment-at-will; constitutional protection for employees, job-applicants, and others. Prerequisite: LER 547 or LER 591, or consent of instructor.

LER 523 Org Fundamentals for HR  credit: 4 Hours.
Increases students' effectiveness in analyzing and understanding organizations and the organizational context. It relies on the case method and focuses a number of important themes such as organization design; strategy; decision-making; and culture. In order to prepare students for the various transformations that they will experience in their careers, it examines many of these topics in the context of organizational change. Exposes students to basic ideas about key organizational topic - as well as a number of applications of these ideas - in order to give them a framework for organizing past experience. The topics covered do not offer a recipe for what to do in all situations, but rather give students a set of skills and different ways of thinking that can help them address novel problems they will face throughout their lives.

LER 530 Found of Ind Org Psych  credit: 4 Hours.
Same as PSYC 530. See PSYC 530.

LER 540 Labor Economics I  credit: 4 Hours.
Same as ECON 540. See ECON 540.

LER 541 Labor Economics II  credit: 4 Hours.
Same as ECON 541. See ECON 541.

LER 542 Collective Bargaining  credit: 4 Hours.
Examination of: social values and social science concepts to develop a framework for explaining the basis and shape of collective bargaining as it has been practiced in the United States; government and law, unions, and employers as part of the development of this framework; the environment of collective bargaining with respect to the role of economics and bargaining structure; the negotiating process as the interactive basis for union-management relations; conflict and conflict resolution as part of the negotiating process; wage and other effects of collective bargaining as bargaining outcomes; contemporary changes in union management relations. Case materials and exercises may be used to supplement course materials. Same as ECON 542. Prerequisite: Consent of instructor.

LER 543 Workplace Dispute Resolution  credit: 3 or 4 Hours.
Examination of the use of procedures to resolve employment disputes in both union and nonunion workplaces; comparative analysis of grievance arbitration, interest arbitration, mediation, fact-finding, and combinations of these procedures; special emphasis given to the role of third party intervention. Same as ECON 543 and LAW 665. 3 professional hours. 4 graduate hours.

LER 545 Economics of Human Resources  credit: 4 Hours.
Study of the economics of personnel with the modern corporation. Topics include hiring, promotion, evaluation, discrimination, raiding, job definition, pay schemes, benefits, and design of work. Same as HRD 534. Prerequisite: LER 593 or equivalent, or consent of instructor.

LER 547 Labor Law I  credit: 3 or 4 Hours.
Same as LAW 662. See LAW 662.

LER 548 Topics in Personnel Mgmt  credit: 4 Hours.
Same as BADM 511. See BADM 511.

LER 556 Industrial Relations Theory  credit: 4 Hours.
Integrated analysis of the principles of industrial relations through the study of the works of the major theorists and their critics. Prerequisite: Consent of instructor.

LER 557 Human Resources Theory  credit: 4 Hours.
Continuation of LER 556. Focuses on contemporary research in human resource management and related fields.

LER 558 Faculty-Student Workshop  credit: 0 to 4 Hours.
Training and experience for Ph.D. students in the application of social science and industrial relations theory and research methodology to contemporary industrial relations problems through presentation and discussion of faculty and student research. Ph.D. students are required to make presentations and to participate in workshop discussions during the entire period of their campus residency. Approved for letter and S/U grading.

LER 559 Micro Research Methods  credit: 4 Hours.
Provides doctoral students a foundation for conducting independent, scholarly micro research (i.e., individuals or small groups as the primary unit of analysis) by addressing the components of the research process. This foundation for conducting independent research is based on the research process as an open system of interconnected choices that unfold sequentially: (1) Choosing and framing a research question, (2) Choosing an hypothesis to address the research question, (3) Choosing a Strategy and Design, (4) Choosing modes for treating constructs, (5) Choosing Forms for Converting Data into Observations, (6) Choosing procedures to analyze data, and (7) Choosing conclusions for interpreting results. Prerequisite: Doctoral degree student in LER, Department of Psychology, Economics, College of Business, College of Education. Master's degree students who are considering a doctoral degree program subject to instructor approval.

LER 561 Compensation Systems  credit: 4 Hours.
Compensation theory and practice. Course addresses the theoretical and practical issues associated with the design of effective compensation systems. The design phases include establishing internal equity, external equity, and individual equity. Budgeting and administration are also addressed. Case analyses and computer simulations may be used to supplement course materials.

LER 562 HR Planning and Staffing  credit: 4 Hours.
Examines conceptual issues, policies, and practices relating to the attraction, selection, development, and planning for the most effective utilization of human resources.

LER 564 HR Training and Development  credit: 2 Hours.
Provides students a firm understanding of human resource training and development systems in today's business environment. A constant theme setting the back drop for this course will be on the various kinds of change facing organizations and how these changes relate to human resource training and development. Aspiring HR professionals will gain essential knowledge to effectively manage employee training and development systems in a variety of companies.

LER 565 HR Management and Strategy  credit: 4 Hours.
Designed to provide integration across the specific functional areas of the human resources management (HRM) field, while at the same time demonstrating the linkages horizontally within HRM and vertically with strategic management of the firm. This case-focused course places emphasis on human resources issues of strategic importance to the organization. Same as BADM 512. Prerequisite: One prior course from the Organizational Behavior and Personnel Management distribution subject area list (in the MHRIR degree requirements for the graduate degree in Labor and Employment Relations).

Information listed in this catalog is current as of 04/2018
LER 566  International HR Management  credit: 4 Hours.
Human resource management issues examined from the perspective of the multinational firm. Topics include globalization and human resource strategy, management and the structure of multinational firms, dealing with intercultural differences, selecting employees for foreign assignments, training and developing expatriate employees, evaluation and compensation of employees in international assignments. Individual and group projects. Prerequisite: Graduate standing.

LER 567  Negotiation in HR Decisions  credit: 2 Hours.
General survey course concerning the strategies and tactics of bargaining and negotiation, with special emphasis on applications in human resource management contexts. Topics covered include: the structure of negotiated outcomes; integrative bargaining tactics; distributive bargaining tactics; negotiation planning; power, persuasion and influence; communication; negotiating in teams and groups; negotiating using 3rd parties (arbitrators, mediators, agents); cross-cultural negotiations. Students will discuss negotiation issues and build negotiation skills through a series of experiential exercises and cases. Credit is not given for both LER 567 and MBA 505 (Sections W1 and W2: Managerial Negotiations). Prerequisite: Graduate standing. An introductory course in social psychology or organizational behavior is preferred but not required.

LER 568  Firm Performance and HR  credit: 4 Hours.
The purpose of this course is to enable students to understand some basic ideas about and measures of firm performance with heavy emphasis on the role of human resource managers. Students will gain an understanding of how human resource professionals fit into the organization, structure, and function of business firms. Many basic ideas from the field of finance will be studied. The course covers theoretical ideas and has many empirical, policy, and practitioner-relevant applications, all with the goal of providing human resource managers fundamental financial analysis tools to enable them to function effectively in their post-graduate corporate workplaces.

LER 569  Power & Influence in HRM  credit: 2 Hours.
Designed to help prospective human resource managers learn how to use power and influence as effective tools for understanding the surroundings in which they will be working with and managing people, and achieving the goals that they set for themselves. It provides frameworks and practical tools that allow students to make sense of on-the-job learning experiences and equip them with basic diagnostic and action-planning skills that they can use at different points in their careers - and to consider difficult ethical questions in the process. Prepares students to get things done in the real world, where personalities and office politics sometimes hinder rather than help them.

LER 570  Leadership for HR Managers  credit: 2 Hours.
In contemporary organizations, the HR function is often called on to serve a variety of leadership roles. Thus, HR managers will not only need to learn how to utilize and improve their leadership skills in different and changing contexts, but also how to help other employees become effective leaders. The goals of this course are (1) to analyze and discuss a number of key frameworks that will provide students with knowledge of leadership in different types of organizations, and (2) to provide students with practical tools to help them make sense of their own on-the-job experiences and equip them with basic action-planning skills that they can use on the job.

LER 580  Internship  credit: 0 Hours.
Full or part-time practice of human resources or employment relations in an off-campus government, corporate or not-for-profit environment. Approved for S/U grading only. May be repeated in separate terms. Prerequisite: Must be a student in the LER program.

LER 590  Individual Topics  credit: 0 to 8 Hours.
Students in labor and industrial relations may register for this unit with the consent of the curriculum adviser and the adviser under whom the student will perform individual study or research. Such individual work may include special study in a subject matter for which no course is available or an individual research project, including on-the-job research in industry, which is not being undertaken for a thesis. Approved for letter and S/U grading.

LER 591  Employment Relations Systems  credit: 4 Hours.
General framework for the analysis of employment relationships. Topics include industrial relations theory, the American system of collective bargaining, intercountry system differences, and human resource management strategies and practices. Prerequisite: Graduate standing.

LER 593  Quantitative Methods in LER  credit: 4 Hours.
Application of statistical methods to problems in human resources and industrial relations. Analysis and presentation of results using computer software. Covers statistical techniques through analysis of variance and multiple regression. Prerequisite: Any elementary statistics course.

LER 594  Tutorial Seminar  credit: 0 to 4 Hours.
Research experience for Master’s students in carrying out a problem solving project from formulation to written report in a chosen area of labor and industrial relations. Each student selects an individual topic with the approval and guidance of a faculty member and participates in a Tutorial Workshop. Approved for both letter and S/U grading. Prerequisite: Completion of no fewer than 24 graduate hours of LER course work.

LER 595  Managing Diversity Globally  credit: 4 Hours.
In a global economy workplace diversity is not a trend; it is a reality faced by corporate leaders, human resource professionals and management consultants. Within the US, immigration, migration, and gender and racial differences have been major trends shaping workplace composition. Globalization places additional pressures on managing workplace diversity effectively. In this setting, training managers and human resource professionals to manage differences and adapt to multiple national and cultural contexts is an imperative. Course provides an in-depth understanding of how managers and HR professionals can be effective in not only managing diversity in a global context, but also in leveraging global diversity as a competitive advantage. By the end of this course students will have a holistic appreciation of the tools necessary to implement effective diversity management practices for a globally inclusive workplace.

LER 597  Employee Motivation & Perfmcne  credit: 4 Hours.
Managing and motivating employees effectively is one of the most complex and challenging issues facing companies today. While business leaders acknowledge the need for implementing effective performance management systems, recent studies indicate that an overwhelming majority of performance management systems are unsuccessful. Takes a strategic approach to employee motivation and performance management starting with a firm level view to reviewing current approaches to employee motivation and performance management. Aims at providing students with practical and conceptual tools that will aid them in future endeavors to design and implement employee development and performance management systems. Format includes in-class discussions, case studies and individual assignments and papers.
LERA 101  Introduction to Landscape Architecture  credit: 2 Hours.
Introduction to primary concepts and methods of landscape inquiry as a means to understand experiential qualities of landscape and to guide landscape design and planning projects.

LA 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated.

LA 212  Water and Society  credit: 3 Hours.
A comparative investigation of built landscapes and hydraulic resources through history. Examines problems of water scarcity, abundance and changes in ecology, human social organization, economy, law, and cultural values related to natural water conditions and human management. Comparative case studies include the ancient Near East and modern Middle East, ancient and modern Egypt, the Roman empire, Peru, the Netherlands, South Asia, Illinois River basin, and the American West.

This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

LA 218  S Asian Cultural Landscapes  credit: 3 Hours.
Survey of Hindu, Buddhist, and Islamic landscapes of South Asia. Examines urban structures, building typologies, and open space types through history as influenced by concepts of the natural, sacred, political, and social. Same as ASST 218.

This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

LA 220  Exploring African Cities  credit: 3 Hours.
Examines the buildings, landscapes, and societies of pre-colonial, sub-Saharan African cities from the third century BCE until the nineteenth century CE. Same as ANTH 223.

This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

LA 221  History of the Prison  credit: 3 Hours.
History of prison architecture, landscapes, and carceral regimes from ancient times until the present. Topics include: philosophy of punishment, the invention of the modern prison, the advent of mass incarceration, and 21st century geographies of incarceration. The course focuses on the western experience, but also includes international examples, e.g. from China, East Africa, and Japan. Interdisciplinary approach includes readings in architectural history, urban planning, sociology, philosophy, psychology, history, and landscape studies. Same as AFRO 221 and HIST 219.

This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

LA 222  Islamic Gardens & Architecture  credit: 3 Hours.
Study of the formation, history, and meaning of the landscape and architecture of the Islamic world. Same as ARCH 222.

This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

LA 233  Foundation Design Studio  credit: 5 Hours.
Introduction to the fundamentals of design, including studies in two- and three-dimensional abstract and applied problems, basic elements and procedures of design, and principles of landscape composition. Additional fees may apply. See Class Schedule. Open to Landscape Architecture majors only. Prerequisite: Credit or concurrent registration in LA 280 or consent of instructor.

LA 234  Site Design Studio  credit: 5 Hours.
Site as the fundamental unit of landscape design. Involves ecological, cultural and experiential understanding of sites, and the creation of place-specific designs. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: LA 233 or consent of instructor.

LA 241  Landform Design & Construction  credit: 3 Hours.
Introduction to landform design, drainage, stormwater management, surveying, and materials. Prerequisite: MATH 014 or 016.

LA 242  Nature and American Culture  credit: 3 Hours.
Same as HIST 282, RST 242, and NRES 242. See RST 242.

This course satisfies the General Education Criteria for:
Cultural Studies - Western

LA 250  Environmental Site Analysis  credit: 3 Hours.
Principles and practices of identifying, analyzing, and recording landscape resources. Field trip required. Prerequisite: GEOL 100, 101, 103 or GEOG 103 or consent of instructor.

This course satisfies the General Education Criteria for:
Nat Sci Tech - Phys Sciences

LA 270  Behavioral Factors in Design  credit: 3 Hours.
Introduces the impacts of cultural and social factors, such as age, gender, physical ability, economic status, ethnicity and how people interact with the environment. Reading assignments, short exercises, field trips, and evaluation of space will enable students to evaluate and potentially design more socially and ecologically responsive environments.

LA 280  Design Communications I  credit: 3 Hours.
Fundamentals of visual communication in the design process and presentation for landscape architecture. Includes freehand and constructed drawing, color, media, and models. Open to Landscape Architecture majors only. Prerequisite: Concurrent registration in LA 233.
LA 281 Design Communications II credit: 3 Hours.
Advanced principles and techniques of visual communication in landscape architectural rendering, emphasizing computer-based techniques. Open to Landscape Architecture majors only. Prerequisite: Concurrent registration in LA 234; completion of LA 280 and completion of campus Composition I general education requirement or consent of instructor.

LA 301 Senior Honors credit: 1 to 6 Hours.
Independent guided study and research in a selected area of landscape architecture; for candidates for honors in landscape architecture. May be repeated to a maximum of 9 hours. Prerequisite: Senior standing in landscape architecture, a university grade-point average of 3.0, and consent of head of department.

LA 314 History of World Landscapes credit: 4 Hours.
Analysis of the development of landscape architecture as a result of environmental and cultural influences. Same as ARCH 314. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil Cultural Studies - Western

LA 315 History of Modern Landscape credit: 3 Hours.
A selected overview of developments in landscape architecture in the western world from 1900 to the present. Prerequisite: LA 314.

LA 335 Community & Open Space Studio credit: 5 Hours.
Development of design solutions at site and master plan scale relative to community, urban and open space problems; emphasizes development of analysis and design techniques to integrate physical context of place with social context. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: LA 234 or consent of instructor.

LA 336 Design Workshop Studio I credit: 5 Hours.
Project design at various scales utilizing problems of a wide range of complexity and subject matter; rural, community, and urban problems, housing, recreation, and natural areas; emphasizes problem analysis and generation of innovative design alternatives. Students select from several sections depending on specific interests. Additional fees may apply. See Class Schedule. Prerequisite: LA 335 or consent of instructor.

LA 342 Site Engineering credit: 4 Hours.
Principles of site engineering including landform design, stormwater management, site surveying, circulation systems and site utility planning. Prerequisite: LA 241 and college trigonometry, or consent of instructor.

LA 343 Landscape Construction credit: 4 Hours.
Construction methods, materials, and procedures related to the design of landscape structures; development of design details and cost estimating. Prerequisite: LA 342 or consent of instructor.

LA 345 Professional Internship credit: 0 to 10 Hours.
Professionally supervised field experience in design offices and public agencies intended to introduce students to practice. Students work in the department-approved firm or agency of their choice. Seventy-five hours of employment is required for each one hour of course credit. Approved for S/U grading only. May be repeated to a maximum of 10 hours. Prerequisite: Upper division undergraduate standing or consent of instructor.

LA 346 Professional Practice credit: 2 Hours.
Study of the profession of landscape architecture including an introduction to modes of practice, career evolution, organizational theory, office procedures, project management and professional ethics. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing or consent of instructor.

LA 370 Environmental Sustainability credit: 3 Hours.
Explores the challenges of creating a sustainable world. Examines: a) trends and conditions of the earth’s major ecosystems, b) ways in which our economic system has created levels of consumption that threaten sustainability, c) the extent to which equity and justice contribute to sustainable systems, and d) evidence demonstrating how human creativity and innovation can create a more sustainable world. Same as ENSU 300 and NRES 370.

LA 390 Independent Study credit: 1 to 6 Hours.
Supervised independent study, research, or special project in a selected area related to landscape architecture. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; consent of instructor and head of department prior to advance enrollment and registration.

LA 427 Amer Vernacular Cultural Land credit: 4 Hours.
Focuses on vernacular structures in the cultural landscape, especially common houses, barns, and commercial and industrial structures; examines origin and geographical diffusion of vernacular architecture in the United States. 4 undergraduate hours. 4 graduate hours.

LA 430 Children and Nature credit: 2 Hours.
Same as HORT 430. See HORT 430.

LA 437 Regional Design Studio credit: 5 Hours.
Ecological design and planning studio emphasizing team approaches to design development and evaluation using current human and environmental research results. Projects require field work, analysis, problem-solving, and advanced design and presentation products. 5 undergraduate hours. 5 graduate hours. Prerequisite: LA 336 or consent of instructor.

LA 441 Land Resource Evaluation credit: 4 Hours.
Examines concepts for the value of land, land resource problems and policy responses, methods for evaluating land resource development and policy alternatives, and case studies of land resource evaluation. Same as UP 441. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate standing or consent of instructor.
LA 446 Sustainable Planning Seminar credit: 4 Hours.
Examines sustainability issues of concern to planners, such as resource conservation, urban growth, environmental justice, industrial development, social equity, sustainable agriculture, and economic development. Presents holistic approaches ranging from theoretical concepts to detailed case studies that combine urban and regional land use, physical design, and policymaking. Same as GEOG 446, NRES 446, and UP 446. 4 undergraduate hours. 4 graduate hours.

LA 450 Ecology for Land Restoration credit: 4 Hours.
Ecological implications of alternative land use patterns; equipment, field techniques, and nomenclature in current use by environmental consultants; and elements of a baseline ecosystem study. 4 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

LA 452 Natural Precedent in Planting credit: 3 Hours.
Biogeography; identification of native species, uses of native plants in the landscape; and restoration and planting design projects. Field trips required. 3 undergraduate hours. 3 graduate hours. Additional fees may apply. See Class Schedule. Prerequisite: HORT 302 or consent of instructor.

LA 453 Cultural Precedent in Planting credit: 3 Hours.
Planting design issues; historic precedent and contemporary comprehensive design projects; management practices; technical documents; and plant use and identification. Field trips required. 3 undergraduate hours. 3 graduate hours. Prerequisite: LA 452.

LA 454 Landscape Archaeology credit: 3 or 4 Hours.
Same as ANTH 453. See ANTH 453.

LA 460 Heritage Management credit: 3 or 4 Hours.
Same as ANTH 460 and RST 459. See ANTH 460.

LA 466 Energy, Plng & Blt Environment credit: 4 Hours.
Same as UP 466. See UP 466.

LA 470 Social/Cultural Design Issues credit: 3 Hours.
Critical discussion of notions and theories pertaining to the reciprocal effects of landscape architectural design and human behavior. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

LA 472 Museum Theory and Practice credit: 3 or 4 Hours.
Same as ANTH 462 and ARTH 462. See ANTH 462.

LA 480 Sustainable Design Principles credit: 2 Hours.
Introduction to key concepts for the sustainable design of buildings and landscapes, including concepts that form the core of the U.S. Green Building Council rating system (LEED). Introduction to LEED accreditation. Same as UP 480. 2 undergraduate hours. 2 graduate hours.

LA 501 Landscape Arch Theory & Prac credit: 2 Hours.
Seminar to introduce the discipline, profession, and practice of landscape architecture. Emphasis is on understanding the skills and knowledge base of the profession including environmental, social, and historical factors in design.

LA 505 Methods in Arch & LA History credit: 2 to 4 Hours.
Seminar on the historiography of architectural and landscape history, including an introduction to the major concepts and figures in the discipline, past and present. Students will learn of approaches historians have used for analyzing the built environment from traditional methods to newer interpretive frameworks, and examine how contemporary values determine or inform the writing of history.

LA 506 Landscape and Vision credit: 4 Hours.
A study of the major 20th-century texts on vision, perception, and perspective as applied to architecture and landscape. Prerequisite: Doctoral students only; master's level students must receive permission from instructor.

LA 513 History of World Landscapes credit: 4 Hours.
Introduction to the landscape architectural heritage of the past in its social, environmental and historical context. Same as ARCH 510.

LA 515 Hist & Thry of Modrn Land Arch credit: 4 Hours.
A selected overview of developments in landscape architecture in the western world from 1900 to the present. Prerequisite: LA 513 or approval of instructor.

LA 535 Local Policy & Immigration credit: 4 Hours.
Same as UP 535 and SOCW 535. See UP 535.

LA 537 Landscape Plan & Design Studio credit: 5 Hours.
Ecological design and planning studio emphasizing design that reflects evaluation and integration of human and environmental research results. Detailed investigation of design options. Additional fees may apply. See Class Schedule. Prerequisite: LA 441 and LA 450, or consent of instructor.

LA 562 Social Construction of Space credit: 4 Hours.
Same as ANTH 557. See ANTH 557.

LA 563 Soc/Beh Research Designed Env credit: 4 Hours.
Same as ARCH 563. See ARCH 563.

LA 570 Landscapes and Human Health credit: 3 Hours.
We will explore the challenge of, and science behind, creating healthy, sustainable places. We will engage this topic by learning about four mechanisms through which places impact health. We will examine the empirical evidence in support of each of these mechanisms. Learning in this course grows from a series of readings, active participation in class discussion, and the development of a review paper or a research proposal. Same as CHLH 580 and GEOG 561. 3 graduate hours. No professional credit. Prerequisite: Graduate student standing.

LA 587 Graduate Seminar credit: 1 to 4 Hours.
Preparation, presentation, and discussion of research papers on current and future areas of landscape architectural application. May be repeated. Prerequisite: Consent of instructor.

LA 590 Directed Research credit: 1 to 8 Hours.
Nature and scope of projects to be determined by consultation between student and faculty adviser; open to landscape architecture majors as well as those from other disciplines who wish to engage in interdisciplinary work. Additional fees may apply. See Class Schedule. Approved for letter and S/U grading. May be repeated. Prerequisite: Consent of instructor.

LA 593 Islamic & S Asian Landscapes credit: 2 or 4 Hours.
Topics in Islamic and South Asian cultural landscape history, including historiography, methodology and recent scholarship. An advanced course that requires disciplinary familiarity with research on the built environment, material culture and visual culture. May be repeated to a maximum of 8 hours per semester; may be repeated to a maximum of 12 total hours.
LA 594 Cultural Heritage  credit: 2 or 4 Hours.
Topics in cultural landscape heritage, conservation planning and design. Investigates theories of landscape, heritage, and their intersections, with readings drawn from anthropology, geography, and landscape studies, as well as applied work on historical landscape conservation, preservation and management. Same as ANTH 594. May be repeated to a maximum of 10 hours per semester; may be repeated to a maximum of 16 total hours. Prerequisite: Concurrent enrollment in LA 438 may be required in the spring semester; check Class Schedule.

LA 597 Research Design & Methods  credit: 3 Hours.
This graduate-level course provides instruction and application of research and scholarly methods for landscape architecture and related fields. Students are introduced to the basic steps of inquiry and development of a thesis/research proposal. Course content includes: problem identification; choosing and articulating a research topic; synthesis of topical/theoretical background from literature; choice of research strategy; design of a plan for investigation; selection of data sources, methods and analysis; proof of concept; feasibility planning; and other necessary components of a successful research proposal. 3 graduate hours. No professional credit. Prerequisite: Second year or post-professional MLA students; graduate students in other majors may enroll with permission of instructor.

LA 598 Master's Project  credit: 0 to 8 Hours.
Major independent or small-group project synthesizing knowledge from previous coursework. Approved for letter and S/U grading. Prerequisite: Consent of instructor and program adviser.

LA 599 Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated. Prerequisite: Graduate standing in landscape architecture.

Latin (LAT)

LAT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/LAT)

Courses

LAT 101 Elementary Latin I  credit: 4 Hours.
Grammar and reading for students who have had no work in Latin.

LAT 102 Elementary Latin II  credit: 4 Hours.
Grammar and reading of easy prose. Prerequisite: LAT 101 or one year of high school Latin.

LAT 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

LAT 201 Intermediate Latin  credit: 4 Hours.
Review of grammar; reading of easy narrative prose. Prerequisite: LAT 102 or two years of high school Latin.

LAT 202 Intro to Latin Literature  credit: 4 Hours.
Continuation of LAT 201, with readings chiefly in Latin poetic literature.

LAT 401 Survey of Latin Literature  credit: 2 or 3 Hours.
Intermediate level readings in classical Latin literature. 3 undergraduate hours. 2 graduate hours. May be repeated for a total of 6 undergraduate hours or 4 graduate hours in separate semesters, if topics vary. Prerequisite: LAT 104 or four years of high school Latin.

LAT 411 Intermediate Prose Composition  credit: 3 Hours.
Practice in the writing of Latin prose. 3 undergraduate hours. 3 graduate hours. Prerequisite: LAT 104 or the equivalent.

LAT 460 Medieval Latin  credit: 3 or 4 Hours.
Literary and historical texts in prose and poetry will be read in the original; the course will also cover patristic writings. Same as MDVL 460. 3 undergraduate hours. 4 graduate hours. Prerequisite: Two years of college Latin or consent of instructor.

LAT 491 Readings in Latin Literature  credit: 3 or 4 Hours.
Readings in authors or special topics chosen by the instructor from the entire extant literature in Latin. 3 undergraduate hours. 3 or 4 graduate hours. May be repeated. Prerequisite: Three years of college Latin or equivalent; consent of instructor.

LAT 492 Senior Thesis  credit: 2 or 4 Hours.
Thesis and honors. For candidates for honors in Latin and for other seniors. 2 or 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing and consent of Classics Honors Program.

LAT 493 Independent Reading  credit: 1 to 4 Hours.
1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 undergraduate hours or 12 graduate hours. Prerequisite: LAT 302 and consent of instructor.

LAT 498 Senior Survey  credit: 2 or 4 Hours.
For candidates for honors in Latin and for other seniors. 2 or 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing and consent of Classics Honors Program.

LAT 511 Advanced Prose Composition  credit: 1 Hour.
Practice in writing Latin prose, with special attention to stylistic questions.

LAT 520 Proseminar  credit: 4 Hours.
Alternating poetry and prose, concentrates on a major author from one of the following areas: epic, oratory, lyric and elegiac poetry, history, drama, philosophy, satire, or epistolography. Areas normally follow this sequence in successive years. May be repeated to a maximum of 20 hours if topics vary. Prerequisite: LAT 491 or equivalent.

LAT 531 Special Disciplines  credit: 4 Hours.
Same as GRK 531. See GRK 531.

LAT 580 Latin Seminar  credit: 4 Hours.
Research on special problems of Latin literature; required of all majors in classical philology. May be repeated if topics vary. Prerequisite: A Latin proseminar.

LAT 595 Intro to Classical Studies  credit: 4 Hours.
Same as GRK 595. See GRK 595.

LAT 599 Thesis Research  credit: 0 to 16 Hours.
Guidance in writing theses for advanced degrees. Approved for S/U grading only. May be repeated.

Latin American & Caribbean St (LAST)

LAST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/LAST)
Courses

LAST 170  Introduction to Latin America  credit: 3 Hours.
Interdisciplinary introduction to the ways of life of Latin American peoples, their origins and current expressions; discusses social, economic issues, and domestic and international policies related to them in the context of other societies in developing countries. This course satisfies the General Education Criteria for: Cultural Studies - Non-West
Social Beh Sci - Soc Sci

LAST 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

LAST 240  Constr Afr and Carib Identity  credit: 3 Hours.
Same as AFST 209, CWL 225, and FR 240. See FR 240. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

LAST 325  Social Media and Global Change  credit: 3 Hours.
Same as EPS 325, AFST 325, ASST 325, EURO 325, INFO 325, REES 325, and SAME 325. See EPS 325.

LAST 342  Arts of Colonial Latin America  credit: 3 Hours.
Same as ARTH 342. See ARTH 342.

LAST 343  Arts of Modern Latin America  credit: 3 Hours.
Same as ARTH 343. See ARTH 343.

LAST 395  Special Topics  credit: 2 to 4 Hours.
Topical survey of cultural, social, economic, and political factors in Latin American life. Each term a particular topic is considered. Prerequisite: A basic course in a humanities or social science discipline.

LAST 440  Honduras Water Project I  credit: 3 Hours.
Same as ENG 440. See ENG 440.

LAST 441  Honduras Water Project II  credit: 3 Hours.
Same as ENG 441. See LAST 441.

LAST 445  Native Latin Amer Languages  credit: 2 to 4 Hours.
Upon the consent of the Director of the Center for Latin American and Caribbean Studies, tutorials are available in special native Latin American languages not regularly offered by the University (ie. Quechua, Kaychikel Mayan). Tutorials at the elementary, intermediate, and advanced levels may be arranged. Students registering for unit credit for the first two terms must first present satisfactory evidence of knowledge of the language at the elementary level, either in the form of credit earned at another institution or by passing a proficiency examination. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated in 6 terms successively, to a maximum of 16 hours. Graduate credit is given only for work beyond the elementary level. Prerequisite: Consent of instructor.

LAST 490  Individual Study  credit: 1 to 5 Hours.
Major tutorial normally taken in the senior year. Students read the works from list devised in consultation with a faculty tutor and write a term paper. 1 to 5 undergraduate hours. 1 to 5 graduate hours. May be repeated as topics vary to a maximum of 6 hours. Prerequisite: LAST 170; a declared major in Latin American and Caribbean Studies; consent of instructor.

LAST 550  Interdisc Seminar Latin Am St  credit: 4 Hours.
Examines the interconnections among research approaches and problems in the field of Latin American and Caribbean Studies. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: M.A. standing in Latin American and Caribbean Studies or consent of instructor.

LAST 597  M.A. Research  credit: 4 Hours.
Open to students who choose to complete their M.A. by submitting two departmental papers. May be repeated in the same or subsequent terms to a maximum of 8 hours. Prerequisite: M.A. standing in Latin American Studies and consent of instructor and advisor.

LAST 599  Thesis Research  credit: 4 Hours.
Preparation of M.A. thesis. Approved for S/U grading only. May be repeated to a maximum of 8 hours with approval. Students may register in more than one section per term. Prerequisite: M.A. standing in Latin American and Caribbean Studies and consent of instructor.

Latina/Latino Studies (LLS)

LLS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/LLS)

Courses

LLS 100  Intro Latina/Latino Studies  credit: 3 Hours.
Interdisciplinary introduction to the basis for a Latina/Latino ethnicity in the United States. Topics include immigration and acculturation experiences and their commonalities and differences, comparison of Latina/Latino experiences to those of other racial, ethnic and immigrant groups, and the potential for a pan-ethnic identity. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci
Cultural Studies - US Minority

LLS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

LLS 200  U.S. Race and Empire  credit: 3 Hours.
Same as AAS 200. See AAS 200.

LLS 201  US Racial & Ethnic Politics  credit: 3 Hours.
Same as AAS 201, AFRO 201, and PS 201. See PS 201. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci
Cultural Studies - US Minority

LLS 215  US Citizenship Comparatively  credit: 3 Hours.
Same as AAS 215, AFRO 215, AIS 295, and GWS 215. See AAS 215. This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - US Minority

LLS 220  Mexican & Latin Am Migration  credit: 3 Hours.
General overview of international migration to the United States, using Latin American migration to the U.S., especially the Midwest, as the focal point. Topics discussed include the history of international migration to the United States, the relationship between history and the contemporary context, the development of U.S. immigration policy, the incorporation of Latino immigrants in U.S. society, and immigrant and community responses to migration. Same as SOC 221.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

LLS 227  Latina/Latinos in the Contemporary United States  credit: 3 Hours.
Same as SOC 227. See SOC 227. This course satisfies the General Education Criteria for: Cultural Studies - US Minority
LLS 230  Latina/o Genders & Sexualities  credit: 3 Hours.
Survey of major theories and debates surrounding the gendered and
sexualized dimensions of the Latina/o experience in the United States.
The course is comprised of three major units: Gender, Sexuality, and Sex.
In these units, students will read about and discuss issues pertaining to
femininity/marianismo, masculinity/machismo, family/familism, desire,
sexual behavior, sex work, sexual and gendered violence, and gendered
and sexualized representations in pop culture. Same as GWS 230.

LLS 238  Latina/o Social Movements  credit: 3 Hours.
Focuses on the history and theory of Latina/o social movements.
Topics include immigrant mobilizations, transnational organizing,
agrarian and farm worker movements, political representation, feminisms
and reproductive rights, environmental justice, labor and educational
struggles, and urban social movements. Same as HIST 292.

LLS 240  Latina/o Popular Culture  credit: 3 Hours.
Provides an introduction to Latina/o popular culture in the United States.
Specific modes of popular culture might include mass media, music, film,
video, performance, and other expressive forms. Lecture and readings are
in English. Same as ENGL 224 and SPAN 240.

LLS 242  Intro to Latina/o Literature  credit: 3 Hours.
Survey of literature by and about people of Mexican, Puerto Rican, Cuban,
and other Latina/o descent in the United States. Taught in English. Same
as ENGL 225 and SPAN 242.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

Cultural Studies - US Minority

LLS 246  Gender & Sexuality in Latina/o Literature  credit: 3 Hours.
Same as SPAN 246. See SPAN 246.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

Cultural Studies - US Minority

LLS 250  Latina/os on the Bronze Screen  credit: 3 Hours.
Critical, historical, and theoretical exploration of Latina/o representations
in U.S. film from the 1900s to the present. Examination of cinematic
representations as well as the social, political, and cultural context in
which those representations are produced. The focus is on Mexican
American and Puerto Rican images, but Hollywood’s treatment of other
Latina/o communities and ethnic groups will be discussed. Students will
be required to attend weekly movie screenings. Same as MACS 250.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

Cultural Studies - US Minority

LLS 258  Muslims in America  credit: 3 Hours.
Same as AAS 258 and REL 258. See AAS 258.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

Cultural Studies - US Minority

LLS 259  Latina/o Cultures  credit: 3 Hours.
Same as ANTH 259. See ANTH 259.

LLS 260  Graffiti and Murals  credit: 3 Hours.
Same as ARTH 260. See ARTH 260.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

Cultural Studies - Western

LLS 265  Politics of Hip Hop  credit: 3 Hours.
Examines hip hop as politics, culture, and commodity. Emphasis given to
hip hop’s relation to urban spaces deeply impacted by state surveillance,
cuts in social welfare programs, immigration, and the global restructuring
of capital. Also considers the viability of a “politics of hip hop” in the
wake of the music’s rising value as a global commodity and analyzes hip
hop as a transnational site in which gendered and sexual identities are
created, contested, and rearticulated. Same as AAS 265.

LLS 278  Mapping Latina/o Inequalities  credit: 3 Hours.
Explores contemporary structural forces that contribute to the
concentration of Latinas/os in segregated neighborhoods, and the
detrimental effects of housing inequality on Latina/o communities.
Focuses on the influence of geographic context in creation and
maintenance of racial inequalities as they affect urban, suburban, and
town small locals. Further examines the role of space and place in the
development and persistence of community identities. Same as SOC 278.

LLS 279  Mexican-American History  credit: 3 Hours.
Examination of the history of Mexican Americans living within the United
States from the Spanish Conquest to the twentieth century. Explores the
process of migration, settlement, assimilation, and discrimination with
emphasis on continuity and change in Mexican cultural development.
Same as HIST 279.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

LLS 280  Caribbean Latina/o Migration  credit: 3 Hours.
Same as AAS 281, AFRO 281, and HIST 281. See HIST 281.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

LLS 281  Constructing Race in America  credit: 3 Hours.
Same as AAS 281, AFRO 281, and HIST 281. See HIST 281.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

LLS 296  Topics Latina/o Studies  credit: 3 Hours.
Course examines specific topics in Latina/Latino Studies not addressed
in regularly offered courses. Examples include theories of ethnic identity,
historical foundations, cultural expression, and relevant topics in public
policy studies of Latina/Latino communities. May be repeated in same or
separate terms to a maximum of 6 hours.

LLS 301  19thC US Latina/o Lit-ACP  credit: 4 Hours.
Focuses on the fiction (historical novels and poetry) as well as the
critical essays of the 1848 Mexican-American War and the 1898 Spanish-
American War, the two key 19th century events that determined the
status of the people of the Caribbean and Mexican descent in the United
States. Prerequisite: Completion of campus Composition I general
education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - US Minority

LLS 305  Theories of Race, Gender, and Sexuality  credit: 3 Hours.
Same as AAS 300 and GWS 305. See AAS 300.
This course satisfies the General Education Criteria for:
Advanced Composition

LLS 308  Spanish in the United States  credit: 3 Hours.
Same as SPAN 308. See SPAN 308.
LLS 310 Race and Cultural Diversity credit: 4 Hours.
Same as AAS 310, AFRO 310, and EPS 310. See EPS 310.
This course satisfies the General Education Criteria for: Advanced Composition
Cultural Studies - US Minority

LLS 316 Latina/Latino Politics credit: 3 Hours.
Same as PS 316. See PS 316.

LLS 320 Gender & Latina/o Migration credit: 3 Hours.
Study of the gendered social process of international migration, focusing on Latin American migration to the United States. Established theories of migration, the history of international immigration to the U.S., and historical and contemporary Mexico, Caribbean and Central American migration flows will be discussed in great detail. Primary focus on how gender shapes the migration experiences of immigrants and the gendered impact of migration on the economic, political, and social status of individuals. Same as SOC 321 and GWS 320. Prerequisite: LLS 100 or SOC 100.

LLS 322 US Latina and Latino Families credit: 3 Hours.
Same as HDFS 322. See HDFS 322.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

LLS 355 Race and Mixed Race credit: 3 Hours.
Explores the history of racial classification in the U.S. with special attention to the census and the role of the state more generally in defining race. Emphasis on how race-mixing has been understood in American culture, and on the current literature on "multiracials" and the future of "race" in the U.S. Readings are drawn from interdisciplinary sources, but examined from a sociological perspective. Same as AAS 355 and SOC 355. Prerequisite: Any lower division LLS or SOC or AAS course.

LLS 360 Contemporary US Latina/o Lit credit: 3 Hours.
Focuses on the major U.S. Latina/Latino writers and texts and their depictions of the events that have shaped 20th-and 21st-Century U.S. Latina/Latino cultures.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

LLS 368 Latinas/os & Public Policy credit: 3 Hours.
Examines the effectiveness of U.S. public policies in addressing the social, economic, and political problems affecting Latina/o individuals and communities. Specifically, it evaluates current policy in the areas of public assistance, fair housing, criminal justice, immigration enforcement, and reproductive health. Although this interdisciplinary course primarily focuses on national policies and programs, it also addresses, as necessary, the particulars of public policy in the state of Illinois.

LLS 370 Latina/o Ethnography credit: 3 Hours.
Addresses the theoretical, methodological, and ultimately political implications and questions generated by a range of ethnographic materials on Latina/os. Specifically explores culture and power (e.g., racism, sexism, and activism) through ethnographic methods and modes of representation, including literature. Fundamental to the course is the requirement that students engage in ethnographic practice, producing ethnographic research on Latina/os at the University of Illinois. Same as ANTH 370. Prerequisite: Any lower division course in LLS or ANTH.

LLS 372 Immigration, Law, and Rights credit: 3 Hours.
Same as AAS 370. See AAS 370.

LLS 375 Latina/o Media in the US credit: 3 Hours.
Same as MACS 375. See MACS 375.

LLS 377 Prisons, Race, and Terror credit: 3 Hours.
Same as AAS 375. See AAS 375.

LLS 379 Latina/os and the City credit: 3 Hours.
Examination of the migration and settlement of Latina/o populations (Mexicans, Puerto Ricans, Cubans, Dominicans, and Central and South Americans) in U.S. cities. Focus on the historic, economic, social and political factors that influenced these migrations and the choices migrants made to come to the United States and to urban areas in particular. Study of the regional variation among Latina/o groups, and coalition building and collaborative ventures between Latina/os and other communities of color in urban areas. Same as HIST 379.

LLS 382 Race and Migration in Chicago credit: 3 Hours.
As the “Second City” located in the heartland of America, Chicago is central to many debates on urban space, race, and nation. Specifically, it is an influential site in which Latina/os, African-Americans, Asian-Americans, and ethnic whites have come to understand meanings of race in a highly segregated setting. This course takes an interdisciplinary approach to the study of racial and ethnic groups in this city, examining issues of migration, gender, segregation, labor, and education from the late nineteenth century to the present. Same as HIST 382. Prerequisite: One course in either LLS or HIST.

LLS 385 Theory and Methods in LLS credit: 3 Hours.
Introduction to the interdisciplinary theories and methods of Latina/Latino Studies. Traditional approaches to the study of ethnicity and race will be interrogated through critical scholarship produced by Latina/Latino Studies scholars across a variety of approaches (anthropology, communications, literature, history, sociology, among others). By learning about a variety of methodological approaches, students will become proficient in conducting ethnic studies research projects about U.S. Latina/o populations. Prerequisite: LLS 100.
This course satisfies the General Education Criteria for:
Advanced Composition

LLS 387 Race, Gender and the Body credit: 3 Hours.
Focuses generally on the relation between power and the body. In western culture, the body is typically thought of as a natural, biological entity. However, as a number of social theorists have pointed out, the body can never be reduced to mere biology. It is also always a product of culture and therefore necessarily implicated in relations of dominance and subordination. Using this framework, the class is specifically concerned with how raced, gendered, and sexed bodies have been imagined in US culture (as abnormal, diseased, criminal, etc.) and with how such bodies have been rendered objects of surveillance, discipline, and regulation. Same as SOC 387. Prerequisite: LLS 100.

LLS 390 Independent Study credit: 0 to 3 Hours.
Special topics not treated in regularly scheduled courses; designed especially for advanced Undergraduates. Approved for letter and S/U grading. May be repeated in the same or subsequent terms as topics vary to a maximum of 6 hours. Prerequisite: One course in Latina/Latino Studies and consent of instructor.

LLS 391 Oral History Methods credit: 3 Hours.
Same as HIST 391. See HIST 391.

Information listed in this catalog is current as of 04/2018
Information listed in this catalog is current as of 04/2018
**LAW 201 Basic Constitutional Law & Individual Rights credit: 3 Hours.**

An introduction to the main themes of the American Constitution - with an emphasis on the First and Fourteenth Amendments - and to basic techniques of constitutional interpretation. Attention will be paid to the interplay of constitutional text, judicial doctrine, and constitutional decision-making outside the judiciary. No prerequisites.

**LAW 496 Seminar in Latina/o Studies credit: 3 or 4 Hours.**

3 undergraduate hours. 4 graduate hours. May be repeated up to a maximum of 6 undergraduate hours or 12 graduate hours.

**LAW 517 Bilingual and English as a Second Language Assessment credit: 4 Hours.**

Same as CI 517. See CI 517.

**LAW 554 Social Ent in Diverse Society credit: 4 Hours.**

Same as HDFS 541 and SOCW 554. See SOCW 554.

**LAW 561 Race and Cultural Critique credit: 4 Hours.**

Same as AAS 561, AFRO 531, ANTH 565, and GWS 561. See AAS 561.

**LAW 577 Perspectives in LLS credit: 4 Hours.**

Provides an overview of scholarly work and research in the field of Latina/o Studies. Prerequisite: One undergraduate or graduate course in Latina/Latino Studies or consent of instructor.

**LLS 496 Seminar in Latina/o Studies credit: 3 or 4 Hours.**

Guides the undergraduate student in an initial study of law and legal reasoning. Covers the nature and function of rules/law, the distinctiveness of legal reasoning, and the way in which law responds to social phenomena and contributes to the development of different social, business and economic institutions. Includes both criminal and civil proceedings. Serves as a general foundation course for those interested in applying to law school. Also of interest to students who are not interested in pursuing a more formal law education, but for whom general legal training will enhance their career aspirations. Develops skills that are transferable to virtually any career. This course satisfies the General Education Criteria for: Humanities - Hist Phil

**LLS 495 Senior Honors Thesis credit: 2 or 4 Hours.**

Research project leading to a thesis. 2 or 4 undergraduate hours. No graduate credit. May be repeated in separate terms to a maximum of 4 undergraduate hours. May be taken by honors students in partial fulfillment of department honors requirement. Prerequisite: Senior standing; enrollment as a major in Latina/Latino Studies; a cumulative grade point average of at least 3.25; a minimum 3.5 grade point average in the major; and consent of supervising professor.

**LAW 499 LAW Study Abroad credit: 0 to 8 Hours.**

Provides campus credit for study at accredited foreign institutions or approved overseas programs. Final determination of credit granted is made after the student’s successful completion of work. 0 to 8 undergraduate hours. 0 to 8 graduate hours. Approved for letter and S/U grading. Prerequisite: Full academic standing in the College of Law or Graduate College and consent of major department. Law students, successful completion of the year’s requirements.

**LAW 500 LLM Legal Writing and Research credit: 2 Hours.**

Designed and developed to equip incoming LLM students with the necessary background in U.S. constitutional law, legal research, analysis, and writing for effective classroom performance. Approved for S/U grading only. Prerequisite: Admission to the U.S. LLM program.

**LAW 501 Professional Responsibility credit: 3 or 4 Hours.**

This course concerns itself with the laws, regulations, and customs that govern the legal profession in the United States, and considers those matters in the context of an increasingly globalized legal profession. 3 or 4 graduate hours. No professional credit. Students will be expected to attend class, review the assigned reading before class, participate in class discussions and exercises, complete written assignments, and examinations.
LAW 598  Law Partner Scholar Notation  credit: 0 Hours.
Illinois Law Partner Scholars Program requirements provide designated students an opportunity to enhance their professional and personal competencies in four areas: cultural awareness, leadership and team-building, academic excellence, and community involvement. The activities and contributions of designated students will advance the development of global law practice skills within the College of Law: 1) by providing points of comparison and contrast to U.S. Law; and 2) by understanding the social and business context of law outside the U.S. 0 graduate hours. No professional credit. Approved for S/U grading only. Prerequisite: For students who are identified by Illinois Law Partner schools for admission into the Illinois LL.M. program.

LAW 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only.

LAW 600  Pro Bono Service  credit: 0 Hours.
Course carries no academic credit, but recognizes law students who provide at least sixty hours of pro bono legal service to the community. The sixty hours of service may be performed at any time during the student's three years of law school, and must be documented through reports to the Associate Dean for Academic Affairs. 0 graduate hours. 0 professional hours. Approved for S/U grading only. Students may enroll only with permission of the Associate Dean for Academic Affairs. Prerequisite: Enrollment in the J.D. or LL.M. program at the College of Law.

LAW 601  Contracts  credit: 4 Hours.
Enforceability of promises including unjust enrichment and reliance, offer and acceptance, mistake, unenforceability and overreaching, unconscionability, Statute of Frauds, interpretation of contract language, conditions, and third party beneficiaries. 4 graduate hours. 4 professional hours.

LAW 602  Property  credit: 4 Hours.
Basic first-year course in property law, required of all students. Provides an overview of law of the land, with incidental coverage of personal property; includes the concept of property, acquisition of private property, recognized property interests, and gratuitous transfer of property interests. 4 graduate hours. 4 professional hours.

LAW 603  Torts  credit: 4 Hours.
Basic course in civil wrongs, including intentional torts (such as assault and battery), negligence (duty, unreasonable risk analysis, actual and proximate cause), and strict liability. 4 graduate hours. 4 professional hours. Prerequisite: Law students only.

LAW 604  Criminal Law  credit: 4 Hours.
Sources and purposes of the criminal law; the meaning of criminal responsibility; and the characteristics of particular crimes. 4 graduate hours. 4 professional hours. Prerequisite: Law students only.

LAW 605  Criminal Proc: Investigation  credit: 3 or 4 Hours.
Problems in the administration of criminal justice with emphasis on right to counsel, arrest, search, interrogation, lineups, and the scope and administration of exclusionary rules. 4 graduate hours. 3 professional hours.

LAW 606  Constitutional Law I  credit: 4 Hours.
Basic first-year course provides an introduction to constitutional law, including the origins of judicial review, basic Article III limits on federal court jurisdiction, the nature and scope of federal legislative power, the Commerce Clause, and the relationship of the federal government to the states. 4 graduate hours. 4 professional hours.

LAW 607  Civil Procedure  credit: 4 Hours.
Role and importance of procedure in litigation, including jurisdiction, pleadings and parties, pretrial motions and discovery, trial practice (except evidence), relationship between judge and jury, the effect of a decision in one case on subsequent litigation between the same or different parties (res judicata), verdicts and judgements, and appellate review. 4 graduate hours. 4 professional hours.

LAW 609  Legal Writing & Analysis  credit: 2 or 3 Hours.
Emphasis on development and improvement of skills in legal writing, and training in legal bibliography. Assignments may include brief writing and preparation of legal memoraanda and opinions. 3 graduate hours. 2 professional hours.

LAW 610  Introduction to Advocacy  credit: 2 or 3 Hours.
Continuation of LAW 609. Introduction to Advocacy is required in the second semester of the first year for further development of legal research skills persuasive writing and oral advocacy. Each student will work on the preparation of a summary judgment motion and an appellate brief relating to their first semester assignment, then argue their assigned case before a panel of local attorneys and faculty. 2 graduate hours. 3 professional hours. Approved for Letter and S/U grading.

LAW 612  Constitutional Law III  credit: 3 or 4 Hours.
This elective for second- and third-year law students is an intensive study of the First Amendment to the Constitution and its application to the states through the Fourteenth Amendment. Examines decisions of the U.S. Supreme Court in areas concerning freedom of speech, religion, and the press. Specific topics include punishment of criminal advocacy; regulation of picketing and public demonstrations; obscenity; commercial speech; regulation of news media; and religious exemptions from government regulation. 4 graduate hours. 3 professional hours. Prerequisite: LAW 606.

LAW 615  Administrative Law  credit: 3 or 4 Hours.
Functions of administrative tribunals in federal, state, and municipal government; the procedure before such administrative tribunals; and judicial relief from administrative decisions. 4 graduate hours. 3 professional hours.

LAW 616  Environmental Law and Pol l  credit: 3 or 4 Hours.
Course is the basic introduction to Environment Law; it considers the principal legal approaches used to deal with environmental problems, including common-law, statutory, regulatory, and economic-incentive systems. 4 graduate hours. 3 professional hours.

LAW 618  Natural Resources  credit: 2 to 4 Hours.
Legal problems associated with the ownership and use of land, water, and mineral resources. 2 or 4 graduate hours. 3 professional hours.

LAW 619  Wildlife Law  credit: 3 or 4 Hours.
Covers a variety of legal issues relating to the status and treatment of wildlife and the management of natural areas for the conservation of biodiversity. 4 graduate hours. 3 professional hours.

LAW 620  Health Law Policy  credit: 3 or 4 Hours.
This course focuses on the profound legal and policy issues raised by changes in health law and the U.S. health care delivery system including: access to health law and the U.S. health care delivery system including: access to health services; the financing and organization of the health care system; development of legal standards to ensure quality of care; and issues of long-term care. In addition, we will focus on the process of making laws and polices; what entities, institutions, and individuals control decisions about the quality and cost of health care. We will also explore the need and basis for reform. 4 graduate hours. 3 professional hours.
LAW 622 Land Use Planning credit: 2 to 4 Hours.
Examination of the legal and administrative aspects of land development and regulation in an urban society, including the techniques and problems of planning; the tools of plan effectuation, such as zoning, subdivision regulation, renewal and redevelopment, and housing programs; and the allocation of decision-making among various levels of government. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 624 Real Estate Finance credit: 3 or 4 Hours.
Methods of financing land acquisition and residential and commercial development, including publicly owned and subsidized housing. 4 graduate hours. 3 professional hours.

LAW 625 State and Local Government credit: 3 or 4 Hours.
The law governing the structure, powers, and operation of local governments in urban and suburban areas with analysis of political, economic, and social implications. 4 graduate hours. 3 professional hours. Prerequisite: LAW 606.

LAW 627 Legal Research credit: 1 or 2 Hours.
Introduction to the basic tools and methodology used in conducting legal research and will develop the skills necessary to identify and locate relevant, complete and current legal information in both print and digital formats. Weekly problem-based research exercises will be assigned. 1 graduate hour. 1 or 2 professional hours. Approved for letter and S/U grading. Required in the first year, fall term.

LAW 629 Bankruptcy credit: 3 or 4 Hours.
Study of the regulation of the relationship between debtors and creditors under the federal Bankruptcy Code. 4 graduate hours. 3 or 4 professional hours.

LAW 631 Secured Transactions credit: 2 to 4 Hours.
Study of secured transactions under Article 9 of the Uniform Commercial Code. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 633 Business Associations I credit: 3 or 4 Hours.
Examines the basic legal consequences for individuals, organizations, and society of the formation, control, and financing of organizations. Surveys agency relationships, partnerships, and close and public corporations. 4 graduate hours. 3 or 4 professional hours.

LAW 634 Securities Regulation credit: 3 or 4 Hours.
Explores the federal securities laws governing issuance of securities in the primary markets. Emphasis on regulatory requirements governing corporate financing. 4 graduate hours. 3 professional hours. Prerequisite: LAW 633.

LAW 635 Securities Litigation credit: 3 or 4 Hours.
Focuses in detail on the substantive law and strategic considerations that are important in securities litigation, whether private suits by individuals, classes of individuals, or federal and state government enforcement proceedings. Topics include: 10(b) fraud suits under the 1934 Act, 11 and 12(a)(2) suits under the 1933 Act, insider trader liability, procedural issues in class actions, and litigation under federal proxy solicitation and tender offer regulations. 4 graduate hours. 3 professional hours. Prerequisite: LAW 633.

LAW 636 Business Associations II credit: 3 or 4 Hours.
The second course in the sequence. Covers derivative suits, corporate finance, introduction to securities regulation, insider trading and mergers and acquisitions. 4 graduate hours. 3 professional hours. Prerequisite: LAW 633.

LAW 638 White Collar Crime credit: 2 to 4 Hours.
This course will focus on the federal statutes commonly invoked in corporate and white collar prosecutions, including those used in prosecutions for conspiracy, mail and wire fraud, RICO, extortion, bribery, tax offenses, obstruction of justice, and false statements. The class will investigate the theoretical and policy framework for individual and institutional responsibility in our criminal justice system and will also explore emerging theories of corporate criminal liability and the principles undergirding the sanctions imposed for white collar crime. Prerequisite: This course is appropriate for law students who have completed introductory courses in criminal law and procedure. Some students have found it helpful to complete the course in LAW 633 before taking this course, but it is not a prerequisite.

LAW 639 Corporate Finance credit: 3 or 4 Hours.
Analysis of corporate and securities law problems using the tools of modern financial theory. Emphasis will typically include valuation, capital structure, and fundamental changes of public corporations. 4 graduate hours. 3 professional hours. Prerequisite: LAW 633.

LAW 642 Antitrust Law credit: 3 or 4 Hours.
The limitations imposed by the Sherman Act, Clayton Act, and Federal Trade Commission Act on anticompetitive practices by business firms; emphasizes price fixing and other agreements among competitors, monopolization, mergers, exclusive dealing, tying arrangements. Considers applicability of traditional rules to intellectual property and new technologies. 4 graduate hours. 3 professional hours.

LAW 643 Trademark & Unfair Competition credit: 3 or 4 Hours.
Course introduces basic legal concepts relating to statutory and common-law trademark, interference with contractual relations and trade libel, the federalization of unfair competition law, and the role of the Federal Trade Commission in consumer protection activities. 4 graduate hours. 3 professional hours.

LAW 644 Copyright Law credit: 3 or 4 Hours.
Offers an in-depth look at the legal aspects of copyright with special emphasis on the application of traditional copyright principles to new technologies and media of expression. 4 graduate hours. 3 professional hours.

LAW 645 Patent Law credit: 2 to 4 Hours.
Historical development of protection of ideas, inventions, and discoveries; patentability; securing the patent; amendment and correction of patents; and infringement remedies, defenses, and procedure. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 647 Income Taxation credit: 3 or 4 Hours.
The fundamental course in federal income taxation. Includes materials relating to income taxation of individuals and an introduction to taxation of corporations and shareholders. 4 graduate hours. 3 or 4 professional hours.

LAW 648 Corporate Taxation credit: 3 or 4 Hours.
In-depth study of federal income tax law related to taxation of corporations, shareholders, partnerships, and partners. 4 graduate hours. 3 professional hours. Prerequisite: LAW 647.

LAW 649 Partnership Taxation credit: 3 or 4 Hours.
Involves the study of Subchapter K of the Internal Revenue Code, including partnership formation, allocations, distributions, and liquidations. Also examines the tax treatment of Subchapter S corporations. 4 graduate hours. 3 professional hours. Prerequisite: LAW 647.
LAW 51 Tax Exempt Organizations  credit: 3 to 4 Hours.
Covers the rationale and technical tax requirements for exempting charities from federal and state taxes. Subjects will include the rationale for exemption (especially with respect to churches, schools, and hospitals), qualification rules under I.R.C. Section 5 (c) (3), the Unrelated Business Income Tax, and if time permits, the charitable contributions deduction. 4 graduate hours. 3 professional hours. Prerequisite: LAW 647 is a prerequisite, though it may be waived in appropriate cases.

LAW 53 International Business Trans  credit: 3 or 4 Hours.
Doing business abroad: export-import regulations, use of foreign commission merchants, licensing of patents and know-how, investment and exchange problems, establishing a foreign operation (including forms of business organization available abroad), and application of United States and foreign antitrust law to the business operation. 4 graduate hours. 3 professional hours.

LAW 64 International Trade Policy  credit: 3 or 4 Hours.
Analysis of the regulation of trade between nations by international agreement (e.g., the GATT), by multinational organizations (e.g., the European Communities), and by individual countries; emphasizes U.S. import restraints, export controls, and related laws. 4 graduate hours. 3 professional hours.

LAW 65 European Union Law  credit: 2 to 4 Hours.
Intensive study of the European Common Market, particularly of its laws relating to trade barriers, establishment of companies, and antitrust; and United States legislation in the field of international trade. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 66 International Law  credit: 3 to 4 Hours.
The nature, sources, and subjects of international law and its place in the control of international society; includes an examination of the law of jurisdiction, territory, recognition and succession of states, rights and immunities of states in foreign courts, diplomatic immunities, treaties, protection of citizens abroad, settlement of international disputes, war and neutrality, the United Nations, and the International Court of Justice. 4 graduate hours. 3 professional hours.

LAW 67 International Human Rights Law  credit: 3 or 4 Hours.
Studies established and developing legal rules and procedures governing the protection of international human rights, including Marxist and Third World, as well as Western, conceptions of those rights. 4 graduate hours. 3 professional hours.

LAW 68 Individual Employee Rights  credit: 3 Hours.
This course investigates the legal rights and responsibilities of employees in the non-union workplace. The course will emphasize particularly the role of law in adjusting the balance of power between individual employees and employers. It will study the regulation of contract, tort, and statute of such areas as hiring, discharge, compensation, employee privacy and dignity and the like.

LAW 69 Labor Law I  credit: 3 or 4 Hours.
Study of the National Labor Relations Act as amended, the pre-act history of the labor movement, and the judiciary's response thereto, with emphasis on understanding the problems, experiments, and forces leading to the enactment; includes the negotiation and administration of the collective bargaining agreement, especially the grievance arbitration procedure, its operation and place in national labor policy; and explores the relationship of the individual and the union. Same as LER 547. 4 graduate hours. 3 or 4 professional hours.

LAW 60 Employment Discrimination  credit: 2 to 4 Hours.
Problems arising under federal statutory prohibitions of discrimination in employment, with particular emphasis on evidentiary problems and the use of statistical proofs; defining relevant labor pools, using statistical analyses of data, and establishing proof of test validation. 2 or 4 graduate hours. 2 to 3 professional hours.

LAW 61 Workplace Dispute Resolution  credit: 3 or 4 Hours.
Same as ECON 543 and LER 543. See LER 543.

LAW 62 Family Law  credit: 3 or 4 Hours.
The creation and dissolution of the family, and legal relationships established by marriage, cohabitation and procreation. Covers the law of marriage, divorce, annulment, separation, unmarried cohabitation, legitimacy, adoption and rights of child custody, parental property on divorce, inheritance, and related rights. Legal rules are placed into the social setting in which they operate, and emphasis is given to family policy as reflected in current developments in family law reform, including constitutional law. 4 graduate hours. 3 professional hours.

LAW 63 Decedents' Estates and Trusts  credit: 3 or 4 Hours.
Studies the means of transferring wealth, with primary emphasis on gratuitous transfers; the means available for making gratuitous transfers, including the validity and effect of testamentary instruments and trust deeds; and problems concerning the dispositive provisions of any type of instrument which transfers wealth. 4 graduate hours. 3 professional hours.

LAW 64 Elder Law  credit: 3 or 4 Hours.
Examines the various legal implications of people living longer, with special emphasis on public policies and programs affecting the financing of medical care, housing arrangements, and income maintenance of persons aged 60 years and older. 4 graduate hours. 3 professional hours.

LAW 65 Workers Compensation  credit: 2 or 3 Hours.
A general survey class on rules relating to workers compensation claims and litigation. Begins with an overview of the historical development of workers compensation laws, then surveys the general principles applicable to such laws, with particular emphasis on the Illinois Workers Compensation Act. Guest speakers will include an arbitrator, a petitioners attorney, and a claims manager. 3 graduate hours. 2 professional hours.

LAW 66 Products Liability  credit: 2 to 4 Hours.
Substantive theories of products liability: negligence, breach of warranty, strict liability, and tortious misrepresentation; procedural and remedial problems with, and defenses to, each substantive theory. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 67 Insurance Law  credit: 3 or 4 Hours.
Covers principles generally applicable to insurance law and includes distinctive rules governing certain types of insurance coverage; objectives are to examine the nature of the insurance contract, marketing of insurance, principles of indemnity, individuals and entities protected by insurance rules, and risks that are shifted by insurance coverage. 4 graduate hours. 3 professional hours.

LAW 68 Anthropology and Law  credit: 3 or 4 Hours.
Same as ANTH 560. See ANTH 560.
LAW 679  Criminal Proc: Adjudication  credit: 3 or 4 Hours.  
Problems in the administration of criminal justice, with emphasis upon  
the commencement of formal proceedings (bail, decision to prosecute,  
grand jury, preliminary hearing, location of prosecution, scope of  
prosecution, speedy trial); the adversary system (pleas, discovery, jury  
trials, prejudicial publicity, ethical problems, double jeopardy); and post-  
conviction review (post-trial motions, appeals, habeas corpus, related  
post-conviction remedies). 4 graduate hours. 3 professional hours.

LAW 680  Professional Responsibility  credit: 2 to 4 Hours.  
Problem course analyzing ethical issues that arise in the practice of law  
and considering the approaches to such issues taken by the American  
Bar Association's Code of Professional Responsibility, Model Rules of  
Professional Conduct, and Code of Judicial Conduct. 2 to 4 graduate  
hours. 2 to 3 professional hours.

LAW 682  Evidence  credit: 3 or 4 Hours.  
Law governing the proof of disputed issues of fact; function of the  
court and jury; competence and examination of witnesses; standards of  
relevancy; privileged communications; illegal evidence; hearsay rule; best  
evidence rule; presumptions; and judicial notice. 4 graduate hours. 3 or 4  
professional hours.

LAW 683  Complex Litigation  credit: 3 or 4 Hours.  
Legal and practical issues in "complex" cases: problems of joinder  
in multi-party cases, consolidation of cases brought independently  
(including the activities of the Judicial Panel of Multidistrict Litigation),  
class actions, discovery issues including the assertion and waiver of  
evidentiary privileges and use of computers, consequences of active  
judicial "management" of litigation at the pretrial stage, settlement  
of complex cases, and res judicata problems. 4 graduate hours. 3 or 4  
professional hours.

LAW 684  Federal Courts  credit: 3 or 4 Hours.  
Examination of the relationship of federal courts to other organs of  
federal government and to the states, including an analysis of cases  
dealing with congressional control over jurisdiction, federal review of  
state court decisions (including the relationship between state and  
federal substantive and procedural law), and application of law to  
fact; the scope of the federal question of jurisdiction in federal courts;  
abstention; federal injunctions of state criminal proceedings; and  
problems of justiciability, advisory opinions, and mootness. 4 graduate  
hours. 3 professional hours.

LAW 685  Dispute Resolution  credit: 2 to 4 Hours.  
Examination of the limitations, consequences, and costs, as well as the  
indispensability of some aspects of modern litigation; the possibilities,  
requirements, and legal problems of consensual and of court-annexed  
resolution processes alternative to final judicial adjudication,  
including legal counseling, negotiation, mediation, arbitration, mini-trials,  
summary trials, summary jury trials, early neutral evaluation, private  
resolution providers, and settlement processes; current disputes used for  
illustration. 2 to 4 graduate hours. 2 to 3 professional hours.

LAW 686  Remedies  credit: 2 to 4 Hours.  
Survey of legal and equitable remedies for the protection of personal  
and property rights. Procedural and substantive aspects of injunctions;  
restitution of unjust enrichment in the context of the receipt of  
unsolicited benefits, benefits derived from the commission of tortious  
acts, and the mistaken acquisition of benefits; alternative remedies  
 arising from bargain transactions; and remedies for violations of civil  
rights. 2 or 4 graduate hours. 2 to 3 professional hours.

LAW 687  Jurisprudence  credit: 3 or 4 Hours.  
The place of law in society; the nature, goals, and methods of law; and the  
relation of law and social science. 4 graduate hours. 3 professional hours.

LAW 688  American Legal History  credit: 3 or 4 Hours.  
Studies selected topics in the development of law and legal institutions  
in the United States with particular emphasis on the history of the legal  
professions, legal education, and the role of lawyers and courts in U.S.  
society. 4 graduate hours. 3 professional hours. Prerequisite: Some prior  
study of U.S. history, particularly social and intellectual, is helpful but not  
required.

LAW 689  Law and Economics  credit: 3 or 4 Hours.  
Introduction to the economic analysis of law, including property,  
contracts, torts, criminal law, and related topics. 4 graduate hours. 3  
professional hours.

LAW 692  Field Placements  credit: 1 to 4 Hours.  
Several field placements offer practical legal education, through field  
work in various agencies. Students engage in legal work under the  
supervision of experienced attorneys; the work may include conducting  
client interviews, doing legal research and fact investigation, preparing  
legal documents, negotiating, and in some cases, engaging in real trials.  
1 to 4 professional hours. May be repeated in the same or separate terms.

LAW 693  Clinical Training  credit: 1 to 4 Hours.  
Several clinics offer practical legal education through a variety of  
in-house clinics. The clinics focus on specific lawyering skills that  
are relevant to a particular area of practice (e.g., litigation or family  
avocacy), and have a classroom component. Students engage in legal  
work under the supervision of experienced attorneys; the work may  
include conducting client interviews, doing legal research and fact  
investigation, preparing legal documents, negotiating, and in some cases,  
engaging in real trials. No graduate credit. 1 to 4 professional hours. May  
be repeated up to 22 hours. Approved for both letter and S/U grading.

LAW 694  Trial Advocacy  credit: 1 to 3 Hours.  
Examination of the problems of advocacy and tactics at the trial  
level. Students engage in all aspects of actual trial work, including  
with witness preparation, opening and closing statements, direct and cross  
examination, and jury instructions; culminates in student conduct of a  
full jury trial in late spring; demonstrations are conducted by staff and  
visiting judges and practitioners. 2 professional hours. 3 graduate hours.  
May be repeated to a total of 4 hours. Approved for both letter and S/U  
grading. Prerequisite: Completed or enrolled concurrently with LAW 682.

LAW 695  Fundamentals of Trial Practice  credit: 3 or 4 Hours.  
Explores the theory and reality of trial practice, from developing a theory  
of the case through submission of jury instructions; topics include  
fact gathering, jury selection, opening statements, direct and cross-  
examination, exhibits, expert witnesses, and closing arguments. 3  
professional hours. 4 graduate hours. Approved for both letter and S/U  
grading. Prerequisite: LAW 694 and completion or concurrent enrollment  
in LAW 682.

LAW 696  Legal Problems  credit: 1 to 2 Hours.  
Preparation of articles and notes for publication in the University of  
practicums and clinical assistantships for Law courses and clinics. No  
graduate credit. 1 to 2 professional hours. Approved for letter and S/U  
grading. May be repeated to a maximum of 8 hours in the same term and  
to a maximum of 22 hours in separate terms.

LAW 697  Moot Court  credit: 1 to 2 Hours.  
Preparation of an appellate brief; presentation of an appellate oral  
argument; participation in intramural, state, national, or international  
moot court competition. 1 to 3 graduate hours. 1 to 2 professional hours.  
Approved for S/U grading only. May be repeated to a maximum of 5  
hours.
LAW 699  Independent Study  credit: 0 to 2 Hours. 
Individual research on a special problem selected in consultation with the instructor. 0 to 2 graduate hours. 0 to 2 professional hours. Approved for letter and S/U grading. May be repeated to a maximum of 2 hours.

LAW 792  Current Legal Problems  credit: 1 to 4 Hours. 
This is an umbrella course listing for specialty topics of current legal issues of interest. Additional fees may apply. See Class Schedule. 2 to 4 graduate hours. 1 to 4 professional hours. Approved for letter and S/U grading. May be repeated.

LAW 793  Advanced Litigation Topics  credit: 1 to 4 Hours. 
This is an umbrella course listing for specialty topics of current interest in litigation. 1 to 4 graduate hours. 1 to 4 professional hours. Approved for letter and S/U grading. May be repeated if topics vary.

LAW 794  Adv Topics in Business Law  credit: 1 to 4 Hours. 
This is an umbrella course listing in business law for specialty topics of current interest. 1 to 4 graduate hours. 1 to 4 professional hours. Approved for letter and S/U grading. May be repeated if topics vary.

LAW 796  Comparative Law Topics  credit: 1 to 4 Hours. 
This is an umbrella course listing in comparative law for specialty topics of current interest. 1 to 4 graduate hours. 1 to 4 professional hours. Approved for letter and S/U grading. May be repeated if topics vary.

LAW 797  Intellectual Property Topics  credit: 1 to 4 Hours. 
This is an umbrella course listing in intellectual property law for specialty topics of current interest. 1 to 4 graduate hours. 1 to 4 professional hours. May be repeated if topics vary.

LAW 798  Seminars  credit: 1 to 4 Hours. 
This is an umbrella course listing for specialty topics of special interest. Approved for professional and graduate credit. May be repeated.

Liberal Arts and Sciences (LAS)

LAS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/LAS)

Courses

LAS 100  Success in LAS for International Students  credit: 2 Hours. 
Prepares international students for their transition to campus by examining expectations and focusing on the purpose and value of the higher education experience from a US perspective. Introduces critical concepts to know about academic programs, and engages students in planning their program of study as well as their personal and professional development. Serves as a complement to LAS 101/LAS 102/LAS 122 for students new to the US education system.

LAS 101  Freshman Seminar  credit: 1 Hour. 
Orientation seminar for first-year students enrolled in LAS curricula. Prepares students for collaborative learning environments through campus orientation, study skills, and project-based assignments. Introduces students to the multiple perspectives represented by the Humanities, the Social Sciences, and the Physical and Life Sciences, and helps them appreciate the strengths and weaknesses of both qualitative and quantitative data in addressing real world problems. Prerequisite: Restricted to first-year students in LAS.

LAS 102  Transfer Advantage  credit: 1 Hour. 
Introduction for first-term transfer students to the college and campus. Familiarizes transfer student with the resources available to them and helps them connect with other students and form a bond with the college. Prerequisite: For first-term LAS transfer students only.

LAS 110  Workshop-Tutorial  credit: 0 to 4 Hours. 
Independent study and experimental seminars open to Unit One students and to others; specific offerings vary each term. Approved for letter and S/U grading. May be repeated if topics vary. Credit toward college or departmental requirements is contingent upon approval by the appropriate unit. A total of 12 hours of LAS 110 credit may be applied toward graduation in the College of Liberal Arts and Sciences. Prerequisite: Unit One students or consent of Unit One Director.

LAS 122  Leadership and Society  credit: 1 Hour. 
Engages first-year LAS honors students in the realms of citizenship, stewardship and leadership for the 21st century. En route to becoming competent and agile learners, first-year honors students experience an orientation to Illinois that fosters greater awareness and knowledge of campus resources and an examination of scholarly and personal leadership, global issues, and civic engagement. The course serves as a means for students to enhance their independence, cultural awareness and connection to community. Students work with a small cohort of peer scholars in a one-hour weekly graded session led by an upper-level LAS James Scholar peer mentor. Students are expected to work together and individually on projects involving community partners and campus groups. Assignments will incorporate the concept of service in connection with civic engagement.

LAS 199  Undergraduate Open Seminar  credit: 0 to 5 Hours. 
Topics will vary. See class schedule. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated.

LAS 289  Internship Experience  credit: 0 Hours. 
Students follow a program of study and research through an approved internship. Written work report required. Approved for S/U grading only. May be repeated in separate semesters. Prerequisite: Consent of course instructor required. Restricted to students enrolled in the College of Liberal Arts and Sciences.

LAS 290  FLAS Seminar  credit: 0 to 12 Hours. 
Foreign Language and Area Studies Off-Campus Studies provides campus credit for off-campus study by undergraduate Foreign Language and Area Studies Fellows. Final determination of appropriate credit is made by a faculty review committee upon completion of the student’s approved foreign language program. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Junior standing; intermediate or advanced study of a less-commonly taught language; awarding of FLAS fellowship by campus Title VI National Resource Center; prior review and approval of the student’s program by Center’s FLAS Fellowship Coordinator.

LAS 291  Global Perspectives for Intercultural Learning  credit: 0 Hours. 
Prepares students who are going abroad for a semester or academic year for their transition through a) examining expectations, b) focusing on the purpose and value of the abroad experience, c) preparing students culturally and logistically, d) addressing issues of culture shock, e) helping students with articulating their experience for future personal and professional goals, f) enhancing intercultural communication and global understanding, and g) assisting with re-entry planning. Approved for S/U grading only. May be repeated in separate terms.
LAS 292  Global Perspectives in Cross-Cultural Contexts  credit: 1 Hour.
Provides an opportunity for students studying abroad to consider how
their journey might be articulated as a global learning experience.
Requires students to discuss what they are learning, reflect upon it, and
discern ways to apply the knowledge gained through their experiences.
May be repeated in separate terms. Prerequisite: LAS 291.

LAS 299  LAS Study Abroad  credit: 0 to 18 Hours.
Provides credit toward the undergraduate degree for study at accredited
foreign institutions or approved overseas programs. Final determination
of credit is made upon the student's completion of the work. Approved
for letter and S/U grading. (Summer session, 0 to 8 hours). May be
repeated to a maximum of 36 term hours per academic year or to a total
of 44 term hours, all of which must be earned within one calendar year.
Prerequisite: One year of residence at UIUC, good academic standing, and
prior approval of the major department and the College of Liberal Arts and
Sciences.

LAS 399  Leadership & Professional Development  credit: 1 to 3 Hours.
Leadership and professional development seminar for student interns.
Interns will learn teaching, mentoring, leadership and professional
skills that will enable them to lead a section of an LAS transition course
or experience and share their successful academic experiences with
undergraduate students who are new to the University. Interns will help
their students develop the skills necessary to succeed at the U of I. May
be repeated in separate terms to a maximum of 6 hours. Prerequisite: Instrctor approval required.

LAS 490  LAS Advanced Seminar  credit: 1 to 6 Hours.
See Class Schedule for current topics. 1 to 6 undergraduate hours. 1 to 6
graduate hours. Approved for letter and S/U grading. May be repeated in the
same or separate terms to a maximum of 6 hours.

LAS 494  Senior Project  credit: 2 or 4 Hours.
For students seeking graduation with distinction in IPS. 2 or 4
undergraduate hours. No graduate credit. May be repeated to a maximum
of 4 undergraduate hours. Prerequisite: Consent of instructor and IPS
Advisory Committee; open only to students whose major is IPS and who
have a cumulative grade point average of at least 3.25.

Library & Information Science (LIS) --
Changed to Information Sciences (IS)

Lingala (LGLA)

LGLA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/LGLA)

Courses

LGLA 201  Elementary Lingala I  credit: 5 Hours.
Introduction to Lingala; emphasizes grammar, pronunciation, reading and
conversation in standard Lingala. Participation in language laboratory
required. Same as AFST 211.

LGLA 202  Elementary Lingala II  credit: 5 Hours.
Continuation of elementary Lingala, with introduction of more advanced
grammar, emphasizes more fluency in speaking, reading, and writing
simple sentences in standard Lingala. Same as AFST 212. Participation
in language laboratory required. Prerequisite: LGLA 201.

LGLA 303  Intermediate Lingala I  credit: 4 Hours.
Survey of more advanced grammar, with emphasis on increasing
conversational fluency, composition skills, study of written texts in the
standard and spoken Lingala dialects, and discussion of grammatical
variations. Same as AFST 413. 4 undergraduate hours. 4 graduate hours.
Prerequisite: LGLA 202.

LGLA 404  Intermediate Lingala II  credit: 4 Hours.
Continuation of LGLA 403. Emphasizes ability to engage in reasonably
fluent discourse in Lingala, comprehensive knowledge of formal
grammar, and ability to read ordinary texts in various Lingala dialects.
Same as AFST 414. 4 undergraduate hours. 4 graduate hours.
Prerequisite: LGLA 403.

LGLA 405  Advanced Lingala I  credit: 3 Hours.
Third-year Lingala with emphasis on conversational fluency and
on increased ability in reading and comprehending texts, including
newspaper prose and Central African cultural materials, in at least two
Lingala varieties. Course will also deal with the advanced level grammar
found in such texts. Same as AFST 415. 3 undergraduate hours. 3
graduate hours. Prerequisite: LGLA 404 or equivalent.

LGLA 406  Advanced Lingala II  credit: 3 Hours.
Continuation of LGLA 405 with increased emphasis on conversational
fluency and comprehension of advanced level grammar in the reading of
a variety of prose texts on current cultural issues. Same as AFST 416.
3 undergraduate hours. 3 graduate hours. Prerequisite: LGLA 405 or
equivalent.

LGLA 407  Topics Lingala Lang & Lit I  credit: 3 Hours.
Selected readings from modern Lingala authors and composers, with
a focus on novels, plays, music, and basic poetry illustrative of Central
African cultural issues and advanced level Lingala grammar, as well
as development of expository writing skills. Same as AFST 417. 3
undergraduate hours. 3 graduate hours. Prerequisite: LGLA 406.

LGLA 408  Topics Lingala Lang & Lit II  credit: 3 Hours.
Continuation of LGLA 407 with increased emphasis on the reading and
comprehension of literary texts exemplified in advanced level novels,
plays, and poetry, as well as on advanced mastery of expository writing
skills. Same as AFST 418. Prerequisite: LGLA 407.

Linguistics (LING)

LING Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/LING)

Courses

LING 100  Intro to Language Science  credit: 3 Hours.
Introduction to the theory and methodology of general linguistics;
includes the various branches and applications of linguistics.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

LING 104  Talking Culture  credit: 3 Hours.
Same as ANTH 104. See ANTH 104.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

LING 105  Language in Daily Life  credit: 3 Hours.
Analysis of what constitutes knowledge of language, how it is used
in daily life, and how speakers are perceived by others. Emphasis
on discovering what makes language function as it does through an
examination of its forms and functions in real life.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
LING 110 Cultural Experiences of the Muslim World credit: 0 Hours.
Explores the languages and cultures of the Muslim world through different co-curricular activities. Students will acquire a higher proficiency of the target language and exposure to other languages that are spoken within this region. They will expand their knowledge and gain a better understanding of the target culture as well as of those in the Muslim world. Only offered in conjunction with the Summer Institute for Languages of the Muslim World. Additional fees may apply. See Class Schedule. Approved for S/U grading only. May be repeated if SILMW language course varies.

LING 111 Language in Globalization credit: 3 Hours.
Introduction to the role of language in globalization by examining communication issues concerning language use across cultural, political and geographic boundaries. Explores the interaction of language and other cultural forms in the global context. Among the topics discussed are issues of identity, spread of English and its acculturation to local contexts of use, creativity in language mixing, language in global pop cultures, language in cyberspace, as well as minority language experiences, and loss of indigenous languages. This course can be used to fulfill either Western or Nonwestern general education categories, but not both.
This course satisfies the General Education Criteria for: Cultural Studies - Non-West
Cultural Studies - Western

LING 115 Language and Culture in India credit: 3 Hours.
Examines the relationship between language and culture in the multilingual and multicultural context of India. Special topics of focus are: linguistic and cultural diversity in India, impact of the language and cultural contact on the structure and function of languages (convergence, diglossia, code-mixing, pidgins and creoles), language and identity, language of religion, language and gender, language in the media, literature and culture, language and power, language and globalization. Same as HNDI 115 and REL 115.
This course satisfies the General Education Criteria for: Cultural Studies - Non-West

LING 191 Freshman Honors Tutorial credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars. May be repeated once. Prerequisite: Consent of departmental honors advisor.

LING 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

LING 210 Language History credit: 3 Hours.
Addresses the question Why does language change? Specific topics include: the history and origin of writing; why pronunciation changes; change in vocabulary and what it tells us about change in culture and society; the relation between language and "dialect"; multilingualism and its consequences, including Pidgins and Creoles; genetic relationship between languages, with focus on the "Indo-European" family (English, German, French, Russia, Latin, Greek, and Sanskrit, etc.) and the relationships between human languages. Prerequisite: Fulfillment of the foreign language requirement of the College of Liberal Arts and Sciences. This course satisfies the General Education Criteria for: Humanities - Hist Phil

LING 221 American Sign Language II credit: 4 Hours.
Same as SHS 221. See SHS 221.

LING 225 Language, Mind, and Brain credit: 3 Hours.
Introduction to the theory and methodology of psycholinguistics with emphasis on language acquisition and linguistic behavior. Prerequisite: consent of instructor.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

LING 240 Language in Human History credit: 3 Hours.
Role of language in the life of nations as a tool of communication, as a symbol of identity, and as a means of power. Scripts and orthographies, language planning, culture and language glossopolitics. Prerequisite: Three years of high school foreign language study or fulfillment of the foreign language requirement of Liberal Arts and Sciences. This course satisfies the General Education Criteria for: Humanities - Hist Phil

LING 245 Language Diversity in the USA credit: 3 Hours.
Investigation of the uses and users of different language varieties - English and non-English - as well as issues of language discrimination, gender/race/class, youth culture, and new communication technologies. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

LING 270 Language, Technology & Society credit: 3 Hours.
What technologies have humans developed to augment the quintessential human ability: language? We start with the development of writing, the first technology that was specifically designed for language, and trace its history through the invention of printing, and into the digital age. With the advent of computers the relevance of language for technology has broadened significantly. We review technologies such as automatic speech recognition, speech synthesis and automatic translation, and discuss their implications for present and future human-machine interaction. Prerequisite: LING 100 or consent of instructor.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

LING 290 Individual Study credit: 1 to 4 Hours.
Individual readings and research reports on special topics dealing with the theoretical or applied aspects of the linguistic sciences. May be repeated to a maximum of 8 hours. Prerequisite: Written consent of instructor.

LING 291 Linguistics Laboratory Research Experience credit: 1 to 3 Hours.
Supervised participation in laboratory or other research, usually as an assistant to a senior researcher. May be repeated up to a maximum of 9 hours. Prerequisite: Consent of instructor.

LING 300 Anat & Physiol Spch Mechanism credit: 4 Hours.
Same as SHS 300. See SHS 300.

LING 301 Elements of Syntax credit: 3 Hours.
Introduction to concepts and techniques essential for syntactic analysis and description, with special attention to testing analyses and justifying them. Prerequisite: LING 100 or consent of instructor.
This course satisfies the General Education Criteria for: Advanced Composition

LING 302 Elements of Phonology credit: 3 Hours.
Introduces elements of phonological theory and data analysis. Emphasis is placed on both Structuralist and Generative theories, introducing students to the principles of phonological contrast, allophony, neutralization, and markedness. Formal phonological models are considered, including both distinctive feature theory and prosodic theory. Equal emphasis is placed on linguistic data analysis. Prerequisite: LING 100 or consent of instructor.
LING 303  General Speech Science  credit: 4 Hours.
Same as SHS 301. See SHS 301.

LING 304  Elements of Morphology  credit: 3 Hours.
An introduction to the concepts and methods of morphology, the
linguistic study of word formation. We examine the smallest units
of word structure—how they are arranged and organized, and how
they interact with sentence structures (syntax) and sound patterns
(phonology). Students will consider data from many different languages,
and investigate how those languages are similar and different in terms of
how they form their words. Prerequisite: LING 100.

LING 307  Elmnts Semantics & Pragmatics  credit: 3 Hours.
Introduction to the theory of meaning for natural language, including
techniques for the description of lexical meaning, compositional
determination of phrase and sentence meaning, and pragmatic effects
on interpretation in context. Same as PHIL 307. Prerequisite: LING 100 or
consent of instructor.

LING 321  American Sign Language III  credit: 4 Hours.
Same as SHS 321. See SHS 321.

LING 357  Intro to Conversation Analysis  credit: 3 Hours.
Analysis of everyday conversation and talk in institutional settings,
including basic organizational features of talk such as turn-taking;
sequences of actions, openings and closings, and repair; ways that
participants use talk to perform social actions such as complimenting,
inviting, arguing, blaming, and apologizing; and ways that talk is used
in professional settings such as 911 emergency calls, courtroom
interactions, and doctor-patient interviews to perform the work of these
social institutions. Same as CMN 357.

LING 391  Honors Individual Study  credit: 2 to 4 Hours.
Study and research for honors thesis; open only to seniors in the
linguistics major who are eligible for departmental distinction. May be
repeated to a maximum of 8 hours. Prerequisite: Written consent of
instructor and linguistics course average of 3.4.

LING 400  Intro to Linguistic Structure  credit: 3 or 4 Hours.
Introduction to the theory and methodology of the science of linguistics
with special reference to phonology, morphology, syntax and semantics.
Not intended for undergraduate majors in linguistics. 3 undergraduate
hours. 4 graduate hours.

LING 401  Intro to General Phonetics  credit: 3 or 4 Hours.
Introduction to the main branches of general phonetics and phonological
theory; emphasis on analysis of non-Western languages and research
techniques. 3 undergraduate hours. 4 graduate hours.

LING 402  Tools & Tech Spch & Lang Proc  credit: 3 Hours.
Introduction to aspects of the tools and methods of studies in speech
and natural language processing (NLP), with a focus on programming
for NLP and speech applications, statistical methods for data analysis,
and tools for displaying and manipulating speech data. 3 undergraduate
hours. 3 graduate hours.

LING 404  Tutorials in Non-Western Lang  credit: 1 to 5 Hours.
Advanced or intensive language instruction in a selected non-Western
language; excludes instruction in East or Southeast Asian languages. 1
to 5 undergraduate hours. 2 to 4 graduate hours. May be repeated with
approval. Prerequisite: Consent of instructor.

LING 406  Intro to Computational Ling  credit: 3 or 4 Hours.
Introduces the field of natural language processing and computational
linguistics. Topics include finite-state methods, parsing, probabilistic
methods, machine learning in NLP, computational semantics and
applications of NLP technology. The course is mostly about concepts
rather than programming, though some programming assignments
will be given. 3 undergraduate hours. 4 graduate hours. Prerequisite:
LING 402 or a 100-level computer science programming course, or
consent of instructor.

LING 407  Logic and Linguistic Analysis  credit: 3 or 4 Hours.
Introduction to the theory of logic as applied in linguistic analysis. Same
as PHIL 407. 3 undergraduate hours. 4 graduate hours. Prerequisite:
For undergraduate students: LING 307 or equivalent background with
consent of instructor.

LING 410  Historical Linguistics  credit: 2 to 4 Hours.
Introduction to historical and comparative linguistics with particular
attention to theoretical issues. 3 undergraduate hours. 2 or 4 graduate
hours. Prerequisite: LING 401 (or concurrent registration), and either
LING 301 and LING 302, or LING 400.

LING 412  Lang in African Culture & Soc  credit: 3 or 4 Hours.
Introductory survey of the role of language in African cultures and
societies, with particular emphasis on the study of indigenous African
langue francae in multilingual settings, their spread, and use as media of
communication in various domains, and as tools of development. Same
as AFST 412. 3 undergraduate hours. 4 graduate hours. Prerequisite:
AFST 222 or consent of instructor.

LING 415  Machine Translation: History and Applications  credit: 3 or 4
Hours. Same as TRST 415. See TRST 415.

LING 416  Structure of French Language  credit: 3 Hours.
Same as FR 416. See FR 416.

LING 418  Language&Minorities in Europe  credit: 3 or 4 Hours.
Same as FR 418, GER 418, ITAL 418, PS 418, SLAV 418, and SPAN 418.
See FR 418.

LING 420  Intro to African Linguistics  credit: 3 or 4 Hours.
Introduction to the genetic and typological classification of the
main language families of Africa; concentration on grammatical and
phonological characteristics. 3 undergraduate hours. 4 graduate hours.
Prerequisite: LING 100 or LING 400; consent of instructor.

LING 423  Language Acquisition  credit: 3 or 4 Hours.
Same as MACS 423 and PSYC 423. See PSYC 423.

LING 425  Intro to Psycholinguistics  credit: 3 or 4 Hours.
Introductory survey of psychological and linguistic approaches to the
study of communication. Same as MACS 425. 3 undergraduate hours.
4 graduate hours. Credit is not given for both LING 425 and PSYC 425.
Prerequisite: An introductory course in linguistics or psychology.

LING 426  Child & Adult Lang Acquisition  credit: 3 or 4 Hours.
The study of first and second language acquisition by children and
adults. Course topics will include the following: first language acquisition,
including signed and spoken languages; bilingualism and second
language acquisition; the comparison of monolingual and bilingual
language development. 3 undergraduate hours. 4 graduate hours.
Prerequisite: An introductory course in linguistics or psychology.

LING 427  Language and the Brain  credit: 3 or 4 Hours.
Same as PSYC 427 and SHS 427. See SHS 427.
LING 430  Intro to East Asian Ling  credit: 3 or 4 Hours.
Introduction to the genetic relation of the Far Eastern languages with other languages; concentration on synchronic analysis of phonology and syntax. Same as EALC 430. 3 undergraduate hours. 4 graduate hours. Prerequisite: LING 400; consent of instructor.

LING 432  Gender and Language  credit: 3 or 4 Hours.
Same as CMN 432 and GWS 432. See CMN 432.

LING 438  Philosophy of Language  credit: 3 or 4 Hours.
Same as PHIL 438. See PHIL 438.

LING 450  Sociolinguistics  I  credit: 2 to 4 Hours.
Introduction to the fundamental concepts, philosophy, and research methods of the study of language in its social contexts. Special attention to language spread, and language variation; language attitudes; language diversity; code-switching; language standardization; and language identity and loyalty. 3 undergraduate hours. 2 or 4 graduate hours.

LING 462  Introduction to Romance Linguistics  credit: 3 or 4 Hours.
Same as FR 462, ITAL 435, PORT 435, RMLG 435, and SPAN 435. See SPAN 435.

LING 469  Structure of Semitic Languages  credit: 3 or 4 Hours.
In-depth survey of comparative issues in Semitic Linguistics, with particular emphasis on morphology, syntax, phonology and language change from the perspectives of current linguistic theories. Same as AFST 469. 3 undergraduate hours. 4 graduate hours. Prerequisite: LING 100, LING 400, or consent of instructor.

LING 480  Intro to Slavic Linguistics  credit: 3 or 4 Hours.
Same as SLAV 480. See SLAV 480.

LING 489  Theoretical Foundations of SLA  credit: 3 or 4 Hours.
General introduction to second language acquisition (SLA) theory. Examines nativist, interactionist and cognitive approaches to SLA and explores the role of learner characteristics. Same as FR 481, GER 489, ITAL 489, PORT 489, and SPAN 489. 3 undergraduate hours. 4 graduate hours. Prerequisite: LING 100, LING 400, or consent of instructor.

LING 490  Special Topics in Linguistics  credit: 3 or 4 Hours.
Course provides an opportunity to focus on various subfields of the linguistic sciences, depending on the interests of the faculty and student. 3 undergraduate hours. 4 graduate hours. May be repeated as topic varies to a maximum of 9 undergraduate hours or 12 graduate hours. Students may register for up to two sections in the same term. Prerequisite: LING 100, LING 400, or consent of instructor.

LING 501  Syntax I  credit: 4 Hours.
Introduction to the fundamental concepts, philosophy, and methods of syntactic theory. Prerequisite: LING 400 or equivalent.

LING 502  Phonology I  credit: 4 Hours.
Examination of language-specific phonological problems with a view toward formulating a language-independent theory of phonology. Prerequisite: LING 401 or consent of instructor.

LING 504  Practicum  credit: 2 Hours.
Supervised practical experience in extended linguistic research on individual topics of the student's choice. Concurrent enrollment in at least 2 hours of LING 590 is required. May be repeated to a maximum of 4 hours. Prerequisite: LING 501 and LING 502.

LING 505  Language Teaching Practicum  credit: 1 Hour.
Introduction for graduate teaching assistants to issues specific to the teaching of the so-called less commonly taught language (LCTLs) offered by the Department of Linguistics (African Languages, Arabic, Hindi, Persian, Sanskrit, and Turkish). Familiarizes the instructors with developments in second language acquisition research with special focus on LCTLs. Different approaches to LCTL teaching will be discussed together with practical information on how to develop instructional materials using new technologies and online resources. A number of presentations, demonstrations, and discussions will be led by visiting experts from UIUC and outside UIUC. May be repeated to a maximum of 2 hours in separate terms.

LING 506  Topics in Computational Linguistics  credit: 4 Hours.
Provides an introduction to practical problems in computational linguistics in a laboratory setting. At the beginning of the semester, a substantial project will be assigned to the class, and the class will work as a team towards implementing a solution, and evaluating the final product against a test corpus, which will also be developed during the class. Topical readings will also be assigned and will be discussed. Approved for letter or S/U grading. May be repeated in more than one section per term to a maximum of 8 hours, if topics vary; may be repeated in subsequent terms to a maximum of 12 hours, if topics vary. Prerequisite: LING 406, and an introductory level Computer Science programming course, or consent of instructor.

LING 507  Formal Semantics I  credit: 4 Hours.
Introduction to formal semantic theory for natural language, with attention to quantification, anaphora, tense, intensionality, and related topics. Same as PHIL 507. Prerequisite: LING 407 or consent of the instructor.

LING 512  Language and Culture  credit: 4 Hours.
Same as ANTH 512. See ANTH 512.

LING 514  Design and Methodology in Linguistic Research  credit: 4 Hours.
Introduction to a quantitatively oriented approach to research design and methodology in language study, with emphasis on the construction of appropriate research designs for different subfields of linguistics (with a particular focus on designs for research in syntax/semantics and language acquisition / bilingualism). A variety of research methods are covered in detail, including both offline and online methodologies. Term paper required. 4 graduate hours. No professional credit. Prerequisite: LING 400 or equivalent; LING 425, or EIL 489 or consent of instructor.

LING 516  Field Methods  credit: 4 Hours.
Analysis of the phonetic, phonological, morphological, and syntactic structure of an undescribed language through the elicitation of data from a native language consultant. The class develops a linguistic sketch of the language, including a computerized lexicon. Prerequisite: LING 501 and LING 502.

LING 518  Language in Culture II  credit: 4 Hours.
Same as ANTH 518. See ANTH 518.

LING 520  Acoustic Phonetics  credit: 4 Hours.
Explores advanced issues in acoustic theory and digital signal processing in the context of linguistic phonetics and phonological research. Emphasis is placed on the spectral properties of speech sounds and their instrumental documentation. A significant portion of the course will utilize the phonetics laboratory. Prerequisite: LING 401 and LING 502.
LING 522  Articulatory Phonetics  credit: 4 Hours.
Explores advanced issues in sound production in the context of linguistic phonetics and phonological research. Three main areas of focus include an overview of vocal tract physiology and anatomy, laboratory/instrumental methodology, and linguistic patterns such as assimilations and coarticulations. Prerequisite: LING 401 or equivalent.

LING 524  Dev Psycholinguistics  credit: 2 or 4 Hours.
Same as MDIA 524 and PSYC 524. See PSYC 524.

LING 525  Psycholinguistics  credit: 2 or 4 Hours.
Same as MDIA 525 and PSYC 525. See PSYC 525.

LING 529  Second Lang Acq & Bilingualism  credit: 4 Hours.
Research seminar: students will design and execute a research project on second language acquisition and/or bilingualism. Same as PSYC 529. Prerequisite: Consent of instructor.

LING 541  Syntax II  credit: 4 Hours.
Issues in the theory and practice of syntactic description, with special attention to implications for universal grammar. Prerequisite: LING 501 or consent of instructor.

LING 542  Phonology II  credit: 4 Hours.
Continuation of LING 502. Prerequisite: LING 502.

LING 547  Formal Semantics II  credit: 4 Hours.
A continuation of LING 507 covering advanced topics in formal semantic theory. Same as PHIL 547. Prerequisite: LING 507 or consent of instructor.

LING 550  Sociolinguistics II  credit: 4 Hours.
Focus on a critical examination of issues in the theory and practice of sociolinguistics concerning the study of language variation from a cross-linguistic perspective, language diversity, multilingualism, language ideology and power. Prerequisite: LING 450 or equivalent.

LING 551  Pragmatics  credit: 4 Hours.
Examination of the major theoretical frameworks in Gricean and post-Gramian pragmatics with an emphasis on theories of implicature, speech acts and im/politeness. Same as PHIL 551. Prerequisite: LING 501 and LING 507, or consent of instructor.

LING 559  Sem Romance Ling  credit: 4 Hours.
Same as FR 559, ITAL 559, PORT 559, RMLG 559, and SPAN 557. See SPAN 557.

LING 560  Seminar in Bilingualism  credit: 4 Hours.
Research-oriented seminar on theoretical and applied aspects of bilingualism; critical evaluation of linguistic, neurolinguistic, sociolinguistic, and psycholinguistic approaches to bilingualism; and concentration on selected case studies from Western and non-Western societies, especially Asia and Africa. May be repeated if topics vary. Prerequisite: LING 450 or an introductory course in linguistics.

LING 570  Seminar in Cognitive Science  credit: 2 or 4 Hours.
Same as PSYC 514, ANTH 514, CS 549, EPSY 551, and PHIL 514. See PSYC 514.

LING 575  Exper Phon I  Spch Physiol  credit: 4 Hours.
Same as SHS 500. See SHS 500.

LING 576  Exper Phon II  Spch Acous Perc  credit: 4 Hours.
Same as SHS 501. See SHS 501.

LING 581  Topics in Syntactic Theory  credit: 4 Hours.
Investigation of syntactic universals; recent developments in the theory of syntax. May be repeated if topics vary. Prerequisite: LING 541 or consent of instructor.

LING 582  Topics in Phonological Theory  credit: 4 Hours.
Recent developments in the theory of phonology. May be repeated if topics vary. Prerequisite: LING 542 or consent of instructor.

LING 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, EPSY 563, FR 584, GER 584, ITAL 584, PORT 584, and SPAN 584. See SPAN 584.

LING 587  Topics in Sociolinguistics  credit: 4 Hours.
Discussion of current topics in sociolinguistics that have relevance to contemporary societies. Approved for both letter and S/U grading. May be repeated in more than one section per term to a maximum of 8 hours. May be repeated in subsequent terms to a maximum of 12 hours. Prerequisite: LING 450.

LING 588  Sem Second Lang Learn  credit: 4 Hours.
Same as EALC 588, FR 588, GER 588, ITAL 588, PORT 588, and SPAN 588. See SPAN 588.

LING 590  Special Topics in Linguistics  credit: 2 to 8 Hours.
Individual studies in the areas of linguistics not covered by regular course offerings. May be repeated.

LING 591  Seminar in Linguistic Analysis  credit: 2 or 4 Hours.
Discussion of advanced topics of current interest. May be repeated with approval. Prerequisite: LING 501 and LING 502.

LING 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

LiteraturesCulturesLinguistics (SLCL)

SLCL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/SLCL)

Courses
SLCL 200  Topics in Global Culture  credit: 3 Hours.
Explores the regional and global dimensions of a cultural theme or practice; topics vary and could include Global Languages and Cultures, Global Memory Studies, Global Cinema, Languages and Cultures of the Mediterranean, and Islands and Oceans. See Class Schedule for current topics. May be repeated in separate terms up to 9 hours if topics vary. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Western

SLCL 303  Intro to Research Methods  credit: 3 Hours.
Introduces undergraduate students to both quantitatively and qualitatively oriented approaches to research design, data collection and data analysis in the study of language, literature, and culture. this course covers the basics of research design, archival methods, data collection, data analyses, and analytical writing appropriate for the disciplines represented in the School of Literatures, Cultures and Linguistics. Students develop their own research projects as part of the course. May be repeated in separate terms up to 6 hours if topics vary.

MBA Program (MBA)

MBA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/MBA)
Courses

MBA 500 Issues in Business credit: 0 Hours.
MBA students are faced with a wide variety of issues in the work place. This course will introduce and encourage discussions related to careers transitions, leadership, ethics, and uses of technology in the work place. Guest lecturers and experts in their field will discuss different approaches to these issues and give students the opportunity to discuss strategies and practice skills that will prepare them for the business environment. Additional fees may apply. See Class Schedule. Approved for S/U grading only. Prerequisite: Co-requisite MBA 501 and MBA 502.

MBA 501 Foundations of Business I credit: 2 Hours.
Provides foundations in the form of principles, concepts, tools, and skills important both to the study of business and to the development of business acumen. Specific foundation topics include planning and measuring firm resources, economic theory of the firm, decision making under uncertainty, consumer behavior, financial management, business communication and computing. May be repeated in the same term. Credit is not given for MBA 501 and either ACCY 500, BADM 520, BADM 572, or ECON 567. Prerequisite: Admission to the Master of Business Administration program.

MBA 502 Foundations of Business II credit: 2 Hours.
Provides additional foundations in the form of principles, concepts, tools, and skills important both to the study of business and to the development of business acumen. Specific foundation topics include organizational theory and design, financial accounting and reporting, manufacturing and services processes, marketing management, business communications and computing. May be repeated in the same term. Credit is not given for MBA 502 and either ACCY 500, BADM 509, BADM 520, or BADM 567. Prerequisite: Enrollment in good standing in the MBA program.

MBA 503 Prin & Proc of Management I credit: 2 Hours.
Presents management topics important to the study of business organizations and the economic landscapes within which they exist. Specific topics include financial resources management, human resources management, strategic management and management of technology. May be repeated in the same term. Students who receive credit for MBA 503 may not receive credit for the following courses: FIN 520, BADM 508, and BADM 544. Prerequisite: Enrollment in good standing in the MBA program.

MBA 504 Prin & Proc of Management II credit: 2 Hours.
Presents additional management topics important to the study of business organizations and the economic landscapes within which they exist. Specific topics include financial management, global strategy, decision and risk analysis, leadership, and ethics. May be repeated in the same term. Prerequisite: Enrollment in good standing in the MBA program.

MBA 505 Topics in Management credit: 2 Hours.
Special topics important to the study of business and management. Examples of topics include international business, strategic thinking, operations analysis, project management, information technology, negotiations. May be repeated in the same term. Prerequisite: Enrollment in good standing in the MBA program.

MBA 500 Corporate and Global Strategy credit: 4 Hours.
Focuses on key issues in formulating and implementing corporate strategies with an emphasis on the international operations of firms. Issues are approached from the orientation of the general manager, whose job is to diagnose what is critical in complex business situations and find realistic solutions to strategic and organizational problems. Designed to integrate various functional areas and provide a “total business” perspective on issues pertaining to corporate and international strategy. Builds on learning experiences in previous modules, and acts as an integrative capstone module. Prerequisite: Completion of the first year of the Master of Business Administration Program, including MBA 501, MBA 502, MBA 503, MBA 504, and MBA 505.

MBA 530 Internship credit: 0 Hours.
Approved for S/U grading only. May not be repeated for credit. Prerequisite: Completion of first year of Master of Business Administration program.

MBA 531 Special Projects credit: 1 to 4 Hours.
Individual projects selected by the student in consultation with a faculty member and approved by the executive officer of the program. Approved for letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 12 hours. Prerequisite: Completion of first year of Master of Business Administration program.

Materials Science & Engr (MSE)

MSE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/MSE)

Courses

MSE 101 Materials in Today's World credit: 3 Hours.
Introduction to the field of materials science. Examination and demonstration of materials and their properties in the context of their use in everyday objects. Survey of the role materials have played and will continue to play in shaping society. Intended for non-engineering majors. Technical elective credit is not given to College of Engineering majors. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

MSE 182 Introduction to MatSE credit: 2 Hours.
Overview of MatSE as a basis for understanding how structure, property, and processing relationships are developed and used for different types of materials. Case studies of advances in new materials and processes illustrating the role of materials in modern society. Laboratory-discussion demonstrations and experiments. Design-team analysis or synthesis of objects that use materials creatively.

MSE 183 Freshman Materials Laboratory credit: 1 Hour.
Team-based laboratory developing concepts introduced in MSE 182. Practical descriptions of materials concepts, literature research, experimental design, concept validation, teamwork, and presentation of results. Prerequisite: MSE 182.

MSE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated to a maximum of 5 hours. May be repeated in the same term.

MSE 201 Phases and Phase Relations credit: 3 Hours.
Understanding microstructure. Qualitative examination of phases (crystalline and non-crystalline structures) and the relationships between phases (phase diagrams). Commercial practices for producing desired microscopic phase configurations and macroscopic shapes (processing). Credit is not given for both MSE 201 and MSE 280. Prerequisite: MSE 182; credit or concurrent enrollment in CHEM 104, MATH 231 and PHYS 211.
MSE 206 Mechanics for MatSE credit: 4 Hours.
Statics, mechanics of materials, and fluid mechanics concepts pertinent to the fields of materials science and engineering: force resultants; stresses and strains produced in elastic bodies; microscopic effects of different loading states (tension, compression, torsion, and bending) on deformable bodies; beam stresses and deflections; three-dimensional stresses and strains; stress and strain-rate relationships for Newtonian and non-Newtonian fluids; conservation equations (control volume analysis) for fluid flow; Reynolds number; slow inertial and turbulent flows. Credit is not given for both MSE 206 and either TAM 251 or TAM 335. Prerequisite: MATH 225, MATH 241 and PHYS 211; credit or concurrent enrollment in CS 101 and MSE 201.

MSE 280 Engineering Materials credit: 3 Hours.
Materials science and engineering of ceramics, electronic materials, metals and polymers. Bonding; crystallography; imperfections; processing and properties of semiconductors, polymers, metals, ceramics and composites; phase diagrams. Case studies. Credit is not given for both MSE 280 and any of CEE 300, ME 330, MSE 201. Prerequisite: CHEM 102 and PHYS 211.

MSE 304 Electronic Properties of Matls credit: 3 Hours.
Electronic structure and bonding of materials, electrical conduction in metals and semiconductors, and dielectric and magnetic properties of solids. Credit is not given for both MSE 304 and PHYS 460. Prerequisite: PHYS 214.

MSE 307 Materials Laboratory I credit: 3 Hours.
Experiments using optical and scanning electron microscopy and various thermal and thermodynamic measuring techniques. Familiarization with laboratory test instruments. MSE 307 and MSE 308 are approved for General Education credit only as a sequence. Both courses must be completed to receive Advanced Composition credit. Prerequisite: Credit or concurrent registration in MSE 401 and either MSE 201 or MSE 280. This course satisfies the General Education Criteria for: Advanced Composition

MSE 308 Materials Laboratory II credit: 3 Hours.
Experiments characterizing mechanical, transport, and magnetic-electric properties of materials and the use optical and scanning electron microscopy and infrared spectroscopy. MSE 307 and MSE 308 are approved for General Education credit only as a sequence. Both courses must be completed to receive Advanced Composition credit. Prerequisite: MSE 307; credit or concurrent registration in MSE 304 and MSE 405. This course satisfies the General Education Criteria for: Advanced Composition

MSE 395 Materials Design credit: 3 Hours.
Design of various engineering devices, objects, or systems. Team-based and faculty-guided projects directed toward the development of materials-based solutions to problems originating from student, faculty, and industrial suggestions. Solutions are based on the knowledge, skills, and design experience acquired in earlier course work and incorporate engineering standards and realistic constraints such as economic, environmental, sustainability, manufacturability, ethical, health and safety, social, and political concerns. Prerequisite: This course is available to engineering majors with senior standing only.

MSE 396 Introduction to Research credit: 1 to 3 Hours.
Fundamental tenets of research including an introduction to laboratory safety, constructing a hypothesis, and the design of experiments to test the hypothesis. Basics of mathematical modeling and statistical analysis of data, including the analysis of research data. Emphasis on exposure to the basic procedures comprising engineering communication and the importance of verbal and written communication. Approved for Letter and S/U grading. May be repeated in separate terms.

MSE 397 Independent Study credit: 1 to 4 Hours.
Individual study of any topic in materials science and engineering selected by the student and conducted under the supervision of a member of the faculty. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MSE 398 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in materials science and engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

MSE 401 Thermodynamics of Materials credit: 3 Hours.
Basic thermodynamic principles including energy, entropy, and free energy; macroscopic properties of hard and soft materials systems, such as equilibrium states, phases, and phase transitions. Application of phase diagrams. Statistical interpretation of thermodynamics on the atomic level. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 401 and CHEM 444 or PHYS 427. Prerequisite: MSE 201 or MSE 280; credit or concurrent registration in MATH 285.

MSE 402 Kinetic Processes in Materials credit: 3 Hours.
Kinetics of chemical reactions; rate equations, reaction mechanisms; transport processes; diffusion equations, atomic and molecular diffusion; phase transformations; nucleation, crystallization, displacive, spinodal decomposition; surface and interface phenomena; sintering, grain growth, recovery, and recrystallization. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 201 and MSE 401.

MSE 403 Synthesis of Materials credit: 3 Hours.
Fundamentals of the synthesis of materials. Principles of synthesis; processes, approaches, synthetic methodology and probes; methodologies in materials synthesis; polymerization, sol-gel processes, liquid and vapor phase synthesis, materials coupling reactions, and precursor-derived, radiation-induced and asymmetric synthesis. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 201; credit or concurrent registration in MSE 401.

MSE 404 Laboratory Studies in Materials Science and Engineering credit: 1.5 Hours.
Experiments include direct hands-on investigations or are performed through computational approaches. Laboratory experiences include both fundamental studies as well as investigations on more applied topics. 1.5 undergraduate hours. 1.5 graduate hours. May be repeated if topics vary. Prerequisite: MSE 307 and MSE 308 or permission of instructor. Senior standing.

MSE 405 Microstructure Determination credit: 3 Hours.
Fundamentals and applications of various forms of microscopy and diffraction for characterization of physical microstructure of materials and of various forms of spectroscopy for characterization of chemical microstructure. 3 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 214, CHEM 104, MSE 201, and MSE 307.
MSE 406 Thermal-Mech Behavior of Matls credit: 3 Hours.
Fundamentals of elastic, viscoelastic and plastic deformation of materials, elementary theory of statics and dynamics of dislocations; strengthening mechanisms; behavior of composites; fracture and fatigue behavior; fundamentals of thermal behavior: heat capacity, thermal expansion and conductivity; effects of thermal stress. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 406 and either ME 430 or TAM 424. Prerequisite: MSE 206; credit or concurrent registration in MSE 401.

MSE 420 Ceramic Materials & Properties credit: 3 Hours.
Ceramic material fundamentals, emphasizing structure-property relations. Development, use, and control of the properties of a wide variety of ceramic materials from a physico-chemical point of view. 3 undergraduate hours. 3 graduate hours.

MSE 421 Ceramic Processing credit: 3 or 4 Hours.
Microstructure development and processing of ceramic materials, with an emphasis on structure-property-processing relationships. Processing methodologies and their effects on microstructural development. Illustration and examination of several ceramic components within this context. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 420.

MSE 422 Electrical Ceramics credit: 3 Hours.
Electrical ceramics, from insulators to conductors, and magnetic and optical materials; the role of the processing cycle and microstructure development on the design and performance of electrical components; capacitors, resistors, and inductors; structure-property relations for pyro-, piezo-, and ferroelectric materials; perovskite and spinel based structures; varistors, thermistors, transducers, actuators, memory elements, multilayered components, and their applications. Design project. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 420.

MSE 423 Ceramic Processing Laboratory credit: 3 Hours.
Experiments and demonstrations involving a wide range of modern ceramic processing methods will be conducted to develop fundamental understanding of the relationships between raw materials, processing methods, microstructural development, and physical properties. Lab emphasis on the underlying physics and chemistry of processing and design of processing routes to achieve desired material properties. Technical reports. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 421.

MSE 440 Mechanical Behavior of Metals credit: 3 Hours.
Mechanical behavior of solids: crystal plasticity, dislocations, point defects and grain boundaries, creep and fatigue behavior, and fracture. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 406.

MSE 441 Metals Processing credit: 3 Hours.
Melt, mechanical, thermal, powder, and surface processing of metals. Extraction of metals, joining of metals, metal composites, and metal recycling. Relationships between the processing of metals, the microstructures that are produced, and the behavior of metal components. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 406.

MSE 442 Metals Laboratory credit: 3 Hours.
Advanced metallurgy laboratory. Effects of heat treatment; mechanical testing; oxidation and corrosion; metallography of selected alloys. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 308, MSE 440, and MSE 441.

MSE 443 Design of Engineering Alloys credit: 3 Hours.
Application of science and engineering principles to the design, selection, and performance of engineering alloys. Alloy classes, design, effect of alloying elements, relation to processing variables, and structure-property relationships; design project. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 401 and MSE 402.

MSE 444 Corrosion of Metals credit: 3 or 4 Hours.
Electrochemistry, thermodynamics, and kinetics of corrosion; behavior of ferrous and nonferrous metals; corrosion rates; corrosion control; cathodic and anodic protection; high-temperature corrosion; corrosion testing; electrolytic machining methods. 3 undergraduate hours. 3 or 4 graduate hours.

MSE 450 Polymer Science & Engineering credit: 3 or 4 Hours.
Polymer solution properties, conformation, and molecular weight characterization. Rheological and viscoelastic behavior: relaxations and transitions, rubber elasticity. Crystalinity, morphology, and deformation of crystalline polymers. Blends and composites. Methods of fabrication. 3 undergraduate hours. 3 or 4 graduate hours.

MSE 452 Polymer Laboratory credit: 3 Hours.
Experimental investigations of polymer synthesis, characterization (molecular, thermal, structural and electronic), processing and device fabrication. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 453 Plastics Engineering credit: 3 Hours.
Engineering characteristics of plastics; viscoelasticity, viscosity, yield, and fracture; reinforced polymers; processing; environmental considerations; applicability of technical data sheets; design (project); current advances. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 454 Mechanics of Polymers credit: 3 Hours.
Same as AE 427 and TAM 427. See TAM 427.

MSE 455 Macromolecular Solids credit: 3 Hours.
Mechanical behavior of amorphous and semi-crystalline polymers; overview of polymer structure and characterization; polymer morphology; orientation effects, rubber elasticity, polymer linear viscoelasticity using Boltzmann superposition and mechanical models; measurement of viscoelastic properties; relaxation and transitions; polymeric yield phenomena and plastic flow; deformation mechanisms; fracture and craze formation; impact and fatigue. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 450.

MSE 456 Mechanics of Composites credit: 3 Hours.
Behavior of composite materials and their use in engineering structures: behavior and properties of the constituent fibers and matrices, micromechanical predictions of composite properties, anisotropic elasticity, behavior of composite laminae, and classical lamination theory; fracture mechanisms, failure theories; behavior of composite plates and beams. Same as AE 428 and TAM 428. 3 undergraduate hours. 3 graduate hours. Prerequisite: AE 321, CEE 300, ME 330, or MSE 406.

MSE 457 Polymer Chemistry credit: 3 or 4 Hours.
Methods used to make polymers including reaction mechanisms, kinetics, and analytical techniques. Emphasis on understanding how macromolecule structure, composition, and properties are controlled through a variety of synthetic approaches. Same as CHEM 480. 3 undergraduate hours. 3 or 4 graduate hours.
MSE 458  Polymer Physics  credit: 3 or 4 Hours.
Physics of polymer systems. Equilibrium conformation, structure, properties and phase transitions of polymer solutions, dense melts, liquid crystals, mixtures, block copolymers, surfaces and interfaces, gels and rubbers, biopolymers, and electronic polymers. Same as CHEM 482. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401.

MSE 460  Electronic Materials I  credit: 3 Hours.
Materials science, engineering, and processing of semiconductors. Semiconductor structure and chemistry relationships to electronic and optical properties. Control of processing to achieve desired properties; design and production of novel materials. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340; MSE 304 or PHYS 460.

MSE 461  Electronic Materials II  credit: 3 Hours.
Materials science, engineering, and processing of microlithographic materials, conductors, and dielectrics for electronic applications. Performance related to materials properties and processing. Processing commonly used in microelectronic circuit manufacture for metallization, dielectric formation, and lithography. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 340.

MSE 462  Electronic Materials Lab  credit: 3 Hours.
Fabrication, analysis, and properties of thin film materials. Principles and practice of (i) deposition of thin film materials by vacuum evaporation, sputtering and plasma assisted processes; (ii) modification of properties by thermal reaction, surface treatment, etc.; (iii) characterization of key properties including electrical conductivity, optical properties, and stress. Methods to optimize the film microstructure and engineering properties via growth techniques. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 466 and CHEM 524.

MSE 466  Materials in Electrochem Syst  credit: 3 Hours.
Materials issues in electrochemical systems including fundamental thermodynamics, kinetics and electrode processes in electrochemical systems and materials specific issues in the materials design, materials in energy storage and conversion systems, and electrochemical corrosion. Emphasis placed on issues of materials selection, microstructure, systems design, materials limitations, and data analysis. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MSE 466 and CHEM 524.

MSE 470  Design and Use of Biomaterials  credit: 3 Hours.
Characterization and use of biomaterials in medical applications. Concepts of biocompatibility in terms of structure and properties of materials and interactions between materials and proteins, cells, and tissue. Issues related to the design of biomaterials. Design of biomaterials to meet specific medical needs. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or concurrent registration in both MCB 252 and either CHEM 232 or MSE 403.

MSE 472  Biomaterials Laboratory  credit: 3 Hours.
Experiments involving the chemistry and physics of biomaterials, biocompatibility of materials, tissue regeneration, rheology of biomaterials and tissues, structural studies of biomaterials, and controlled release of small molecules and drugs. Laboratory techniques for protein purification, cytotoxicity testing, tissue culture, mechanical testing, microscopy, and X-ray diffraction. Same as BIOE 473. 3 undergraduate hours. 3 graduate hours. Prerequisite: MSE 470.

MSE 473  Biomolecular Materials Science  credit: 3 Hours.
Fundamental and unifying principles in biomolecular materials science. Nucleic acids, proteins, lipids, and sugars. Specific and non-specific interactions which govern biomolecular behavior in a wide range of contexts (e.g., self-assembly, cell adhesion). Present knowledge and empirical evidence integrated with discussions of experimental characterization and manipulation techniques in biotechnology. Application of course content and expository research into current literature via a case study term project. 3 undergraduate hours. 3 graduate hours.

MSE 474  Biomaterials and Nanomedicine  credit: 3 Hours.
Design and synthesis of polymeric biomaterials and nanobiomaterials for their applications in drug and gene delivery. Part (1) fundamental biopolymer synthesis: functional group protection and de-protection; bioconjugation; protein pegylation and design and synthesis of natural and synthetic non-degradable and degradable polymers, hydrogels, bio-inspired materials, and stimuli responsive biomaterials. Part (2) preparation of nanomedicines for drug and gene delivery: nanofabrication of micelles, nanoparticles, protein conjugates, drug conjugates, nanoencapsulates, and polymeric vesicles; in-vitro and in-vivo small-molecule, gene, and protein delivery. Impact of the chemical structures of biopolymers on the stability, biocompatibility, toxicity, and in-vitro and in-vivo efficacy; clinical translation of the resulting nanomedicines in drug delivery. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 236 or MSE 457; MCB 450.

MSE 480  Surfaces and Colloids  credit: 3 or 4 Hours.
Chemistry and physics of surfaces and interfaces, with emphasis on behavior in liquid media. Surface composition; surface and interfacial forces; colloidal stability and flocculation; amphiphilic molecules. Same as CHEM 488. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401.

MSE 481  Electron Microscopy  credit: 3 or 4 Hours.
Theory and application of transmission electron microscopy and diffraction with emphasis on thin crystals; electron optics, interference phenomena, interpretation of images and diffraction patterns, specimen preparation. 3 undergraduate hours. 4 graduate hours. Prerequisite: MSE 405.

MSE 484  Composite Materials  credit: 3 or 4 Hours.
Metal, ceramic, and polymer matrix composites. Interrelationships between processing, microstructure, and properties. Selecting composite materials for different engineering applications. 3 or 4 graduate hours. Prerequisite: MSE 201 and MSE 206.

MSE 485  Atomic Scale Simulations  credit: 3 or 4 Hours.
Application of Monte Carlo and Molecular Dynamics techniques in primarily classical simulations to understand and predict properties of microscopic systems in materials science, physics, biology, and chemistry. Numerical algorithms, connections between simulation results and real properties of materials (structural or thermodynamic), and statistical and systematic error estimation using real simulation programs. Simulation project comprised of scientific research, algorithm development, and presentation. Same as CSE 485 and PHYS 466. 3 undergraduate hours. 4 graduate hours. Prerequisite: MSE 401; one of C, C++, or Fortran programming experience.
MSE 487 Materials for Nanotechnology credit: 3 or 4 Hours.
Survey of the synthesis, processing, structure properties and technological applications of materials with nanometer dimensions. Semiconductor nanocrystals and size-dependent optical properties; metal nanostructures and plasmonics; nanowires and nanotubes; electronics and optoelectronics; nanoscale heterostructures; assembly and fabrication. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MSE 401 and PHYS 214.

MSE 488 Optical Materials credit: 3 or 4 Hours.
Optical properties of materials of current and potential technological importance and application to devices. Applicable optics fundamentals based on Maxwell's equations. Liquid crystals for displays; photopolymers for holographic data storage; electro-optic materials for high speed light modulators; electroluminescent materials for light emitting diodes. Application of optics, materials and chemistry in design of practical devices. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: MATH 285 and PHYS 214.

MSE 489 Matl Select for Sustainability credit: 3 or 4 Hours.
Quantitative methods to optimize the selection of materials including traditional (minimize mass or volume, maximize performance) and sustainability (minimize energy consumption and CO2 emission during synthesis, maximize recyclability) goals. Tradeoff methods to optimize both via engineering design and materials selection for product lifetime, economic outlay and return, time dynamics and materials consumption, recycling, and disposal. Application of commercial software to optimize selections. For engineering and science majors only. 3 undergraduate hours. 4 graduate hours.

MSE 492 Lab Safety Fundamentals credit: 1 Hour.
Key aspects of laboratory setups, operating procedures, and emergency preparedness measures necessary for the experimentalist. Same as CHEM 494. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only.

MSE 497 Independent Study credit: 1 to 4 Hours.
Individual study of any topic in materials science and engineering under the supervision of a member of the faculty. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MSE 498 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in materials science and engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

MSE 499 Senior Thesis credit: 1 to 5 Hours.
Individual research in an area of materials science and engineering under the supervision of members of the staff. 1 to 5 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Grade point average of 3.0 and consent of instructor.

MSE 500 Statistical Thermody of Matls credit: 4 Hours.
Atomistic concepts of statistical thermodynamics and their relationship to classical phenomenological thermodynamics. Application of the methods of statistical thermodynamics and statistical mechanics to describe the structure, phase behavior, and properties of both hard and soft materials. Prerequisite: MSE 401.

MSE 501 Kinetic Processes in Materials credit: 4 Hours.
Fundamentals of rate processes in materials, both from a phenomenological and an atomistic point of view, with special emphasis on the kinetics of transformations and the transport of matter in solids. Prerequisite: MSE 500 or PHYS 560.

MSE 529 Hard Materials Seminar credit: 0 to 1 Hours.
Seminar on current research in science and engineering of hard materials; presentations by visiting lecturers, staff, and students. Approved for S/U grading only. May be repeated.

MSE 559 Soft Materials Seminar credit: 0 to 1 Hours.
Seminar on current research in the science and engineering of soft materials; presentations by visiting lecturers, staff, and students. Approved for S/U grading only. May be repeated.

MSE 565 Thin Film Materials credit: 3 Hours.
Thin solid films bonded to relatively thick substrates such as microelectronic devices, thermal barrier coatings in gas turbine engines, mems devices, flexible electronics, and biomedical instruments. Quantitative understanding of the consequences of mechanical stress in film-substrate structures, arising from fabrication methods or service conditions: substrate curvature, film delamination, film fracture, dislocation formation, plastic flow and stress-driven evolution of surface morphology.

MSE 580 Diffraction Physics of Matls credit: 4 Hours.
Quantitative treatment of the physical basis of X-ray, electron, and neutron diffraction instrumentation and use for structural characterization. Applications in materials science and condensed matter physics including structure of condensed matter, defects, phase transitions, disorder, surfaces, and interfaces. Prerequisite: MSE 405 or PHYS 436.

MSE 581 Advanced Electron Microscopy credit: 4 Hours.
Theory of electron microscopy and use for materials structure characterization and microanalysis. Physics of electron microscopes; kinematic and dynamic electron diffraction theory; defect image contrast; high resolution electron microscopy; electron probe formation; STEM; inelastic scattering and microanalysis. Practical experience via laboratory demonstrations and project assignments. Prerequisite: MSE 405 and MSE 481.

MSE 582 Surface Physics credit: 4 Hours.
Theory and experiment describing atomic behavior on crystal surfaces; thermodynamics of surfaces; surface energy; diffraction and structure; gas-solid collisions; Brownian motion, diffusion, and evaporation; electron and ion emission, tunneling; Van der Waals forces; theory of chemical interactions; kinetics and statistics of adsorption. Prerequisite: MSE 501 or PHYS 560.

MSE 583 Dynamics of Complex Fluids credit: 3 or 4 Hours.
Microscopic statistical treatment of the structure and dynamics of polymers, colloids, gels, and other soft materials. Fundamental connections between molecular architecture, intermolecular forces, collective fluid structure, and time-dependent phenomena; Brownian motion, Langevin equation theory, and viscoelasticity, diffusion in colloidal suspensions, gels, and glasses; dynamics of polymer solutions and melts. Prerequisite: MSE 401.
**MSE 584** Point and Line Defects  credit: 4 Hours.
Formation and interactions of point and line defects in solids including metals, semiconductors, dielectrics, and ionic conductors. Theoretical treatment of thermal equilibrium and non-equilibrium conditions. Application to impurity diffusion, ion irradiation, dislocation generation and motion, ionic conductivity, and deep level electronic defects. Prerequisite: MSE 401 or MSE 501; PHYS 460 or PHYS 560.

**MSE 585** Materials Engrg Practicum  credit: 0 to 2 Hours.
Internships or co-ops in industrial or governmental settings pre-approved by the department to foster engineering educational aspects and utilized prior MatSE course work. A paper describing the general area of the practicum, with appropriate references and, to the extent permitted by employer confidentiality, the student’s contribution required. In addition to the paper, a report documenting work completed, verified by the work supervisor, to the extent permitted by confidentiality, and a questionnaire answered by the work supervisor form the basis for the grade. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours.

**MSE 590** Research Seminars  credit: 0 to 1 Hours.
Discussions and lectures on current research under the direction of individual staff members. Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

**MSE 595** Materials Colloquium  credit: 0 to 1 Hours.
Presentation of (i) cutting-edge materials research by visiting lectures from academia as well as national and industrial research laboratories and (ii) some of the current research conducted in the Department. Approved for S/U grading only. May be repeated.

**MSE 597** Independent Study  credit: 1 to 4 Hours.
Individual study of any topic in materials science and engineering under the supervision of a member of the faculty. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

**MSE 598** Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in materials science and engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

**MSE 599** Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

**Mathematics (MATH)**

**MATH Class Schedule** (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/MATH)

**Courses**

**MATH 002** Introductory Algebra  credit: 3 Hours.
Methods of elementary algebra, including simplification of algebraic expressions, solving linear and quadratic equations, equations of lines, systems of linear equations, and radicals. Approved for Letter and S/U grading. Enrollment is restricted. Credit may not be used toward graduation at the University of Illinois. Prerequisite: Score on appropriate placement test, or consent of Mathematics Department.

**MATH 101** Thinking Mathematically  credit: 3 Hours.
Designed for students in majors that do not specifically require a mathematics course beyond the level of precalculus. Focus is on critical thinking and applications. All topics are covered from a contextual standpoint. Topics include proportional reasoning and modeling, functions, sets, consumer math, probability, and statistics. Other topics may be covered as time permits. Prerequisite: Three years of high school mathematics. Undergraduates only.

**MATH 103** Theory of Arithmetic  credit: 4 Hours.
Analyses of the mathematical issues and methodology underlying elementary mathematics in grades K-5. Topics include sets, arithmetic algorithms, elementary number theory, rational and irrational numbers, measurement, and probability. There is an emphasis on problem solving. Priority registration will be given to students enrolled in teacher education programs leading to certification in elementary or childhood education. Prerequisite: MATH 112 (formerly MATH 012) or equivalent. This course satisfies the General Education Criteria for: Quantitative Reasoning I

**MATH 112** Algebra  credit: 3 Hours.
Rapid review of basic techniques of factoring, rational expressions, equations and inequalities; functions and graphs; exponential and logarithm functions; systems of equations; matrices and determinants; polynomials; and the binomial theorem. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of 1.5 units of high school algebra and 1 unit of high school geometry.

**MATH 114** Trigonometry  credit: 2 Hours.
Studies degrees and radians, the trigonometric functions, identities and equations, inverse functions, oblique triangles and applications. Credit is not given for MATH 114 and either MATH 014 or MATH 115. Prerequisite: 1.5 units of high school algebra; 1 unit of high school geometry.

**MATH 115** Preparation for Calculus  credit: 3 Hours.
Reviews trigonometric, rational, exponential, and logarithmic functions; exponential and logarithm functions; systems of equations; matrices and determinants; polynomials; and the binomial theorem. Prerequisite: ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of the topics of MATH 112.

This course satisfies the General Education Criteria for: Quantitative Reasoning I

**MATH 117** Elementary Mathematics  credit: 4 Hours.
Analyses of the mathematical issues and methodology underlying elementary mathematics in grades 6-8. Topics include the Real number system and field axioms, sequences and series, functions and math modeling with technology, Euclidean and non-Euclidean geometry, probability and statistics. Priority registration will be given to students enrolled in teacher education programs leading to certification in elementary education. Prerequisite: MATH 112 (formerly MATH 012) or equivalent.

This course satisfies the General Education Criteria for: Quantitative Reasoning I

Information listed in this catalog is current as of 04/2018
MATH 119 Ideas in Geometry  credit: 3 Hours.
General education course in mathematics, for students who do not have mathematics as a central part of their studies. The goal is to convey the spirit of mathematical thinking through topics chosen mainly from plane geometry. Prerequisite: Two units of high school algebra; one unit of high school geometry; or equivalent. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 124 Finite Mathematics  credit: 3 Hours.
Introduction to finite mathematics for students in the social sciences; introduces the student to the basic ideas of logic, set theory, probability, vectors and matrices, and Markov chains. Problems are selected from social sciences and business. Prerequisite: MATH 112 (formerly MATH 012) or an adequate ALEKS score. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 125 Elementary Linear Algebra  credit: 3 Hours.
Basic concepts and techniques of linear algebra; includes systems of linear equations, matrices, determinants, vectors in n-space, and eigenvectors, together with selected applications, such as Markov processes, linear programming, economic models, least squares, and population growth. Credit is not given for both MATH 125 and any of MATH 225, MATH 410, or MATH 415. Prerequisite: MATH 112 (formerly MATH 012) or an adequate ALEKS score.

MATH 181 A Mathematical World  credit: 3 Hours.
Introduction to selected areas of mathematical sciences through application to modeling and solution of problems involving networks, circuits, trees, linear programming, random samples, regression, probability, inference, voting systems, game theory, symmetry and tilings, geometric growth, comparison of algorithms, codes and data management. Prerequisite: Three years of high school mathematics, including two years of algebra and one year of geometry. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 198 Freshman Seminar  credit: 3 Hours.
Guides the student in the study of selected topics not considered in standard courses. Prerequisite: Enrollment in the mathematics honors program; consent of department.

MATH 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

MATH 210 Theory of Interest  credit: 3 Hours.
Study of compound interest and annuities; applications to problems in finance. Prerequisite: MATH 231 or equivalent.

MATH 213 Basic Discrete Mathematics  credit: 3 Hours.
Beginning course on discrete mathematics, including sets and relations, functions, basic counting techniques, recurrence relations, graphs and trees, and matrix algebra; emphasis throughout is on algorithms and their efficacy. Credit is not given for both MATH 213 and CS 173. Prerequisite: MATH 220 or MATH 221, or equivalent. This course satisfies the General Education Criteria for: Quantitative Reasoning II

MATH 220 Calculus  credit: 5 Hours.
First course in calculus and analytic geometry; basic techniques of differentiation and integration with applications including curve sketching; antidifferentiation, the Riemann integral, fundamental theorem, exponential and trigonometric functions. Credit is not given for both MATH 220 and either MATH 221 or MATH 234. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of topics of MATH 115. Students with previous calculus experience should consider MATH 221. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 221 Calculus I  credit: 4 Hours.
First course in calculus and analytic geometry for students with some calculus background; basic techniques of differentiation and integration with applications including curve sketching; antidifferentiation, the Riemann integral, fundamental theorem, exponential and trigonometric functions. Credit is not given for both MATH 221 and either MATH 220 or MATH 234. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/ and either one year of high school calculus or a minimum score of 2 on the AB Calculus AP exam. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 225 Introductory Matrix Theory  credit: 2 Hours.
Systems of linear equations, matrices and inverses, determinants, and a glimpse at vector spaces, eigenvalues and eigenvectors. Credit is not given for both MATH 225 and any of MATH 125, MATH 410, or MATH 415. Prerequisite: MATH 220 or MATH 221, or equivalent.

MATH 231 Calculus II  credit: 3 Hours.
Second course in calculus and analytic geometry: techniques of integration, conic sections, polar coordinates, and infinite series. Prerequisite: MATH 220 or MATH 221. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 234 Calculus for Business I  credit: 4 Hours.
Introduction to the concept of functions and the basic ideas of the calculus. Credit is not given for both MATH 234 and either MATH 220 or MATH 221. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of the topics of MATH 112. This course satisfies the General Education Criteria for: Quantitative Reasoning I

MATH 241 Calculus III  credit: 4 Hours.
First course in advanced calculus and analytic geometry: basic techniques of differentiation and integration with applications including curve sketching, vector-valued functions, the Riemann integral, fundamental theorem, exponential and trigonometric functions. Credit is not given for both MATH 241 and MATH 292. Prerequisite: MATH 231. This course satisfies the General Education Criteria for: Quantitative Reasoning II

MATH 249 Honors Supplement  credit: 1 Hour.
Supplemental credit hour for honors courses with additional material or special projects. Prerequisite: Concurrent registration in a specially designated honors section and consent of department.

MATH 284 Intro Differential Systems  credit: 4 Hours.
First order differential equations; mathematical models and numerical methods; linear systems and matrices; higher-order linear differential equations; eigenvalues and eigenvectors; linear systems of differential equations; Laplace transform methods. Credit is not given for both MATH 284 and either MATH 285 or MATH 286. Prerequisite: MATH 231 or equivalent.

Information listed in this catalog is current as of 04/2018
MATH 285  Intro Differential Equations  credit: 3 Hours.
Techniques and applications of ordinary differential equations, including
Fourier series and boundary value problems, and an introduction to
partial differential equations. Intended for engineering majors and others
who require a working knowledge of differential equations. Credit is not
given for both MATH 285 and any of MATH 284, MATH 286, MATH 441.
Prerequisite: MATH 241.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

MATH 286  Intro to Differential Eq Plus  credit: 4 Hours.
Techniques and applications of ordinary differential equations, including
Fourier series and boundary value problems, linear systems of differential
equations, and an introduction to partial differential equations. Covers
all the MATH 285 plus linear systems. Intended for engineering majors
and other who require a working knowledge of differential equations.
Credit is not given for both MATH 286 and any of MATH 284, MATH 285,
MATH 441. Prerequisite: MATH 241.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

MATH 290  Symbolic Computation Lab  credit: 1 Hour.
Laboratory component to courses using a symbolic programming
package. Prerequisite: Consent of department; concurrent registration
in a designated section of a mathematics course with symbolic
computation component. May be taken only once for credit.

MATH 292  Vector Calculus Supplement  credit: 2 Hours.
Course in multivariable calculus. Topics include gradient, divergence,
and curl; line and surface integrals; and the theorems of Green, Stokes,
and Gauss. Intended for transfer students whose multivariable calculus
course did not include the integral theorems of vector calculus. Credit is
not given for both MATH 292 and MATH 241. Prerequisite: Consent of
instructor.

MATH 299  Topics in Mathematics  credit: 1 to 4 Hours.
Topics course; see Class Schedule or department office for current
topics. May be repeated in the same or subsequent semesters to a
maximum of 8 hours. Prerequisite: MATH 220 or MATH 221; consent of
instructor.

MATH 347  Fundamental Mathematics  credit: 3 Hours.
Fundamental ideas used in many areas of mathematics. Topics
will include: techniques of proof, mathematical induction, binomial
coefficients, rational and irrational numbers, the least upper bound
axiom for real numbers, and a rigorous treatment of convergence of
sequences and series. This will be supplemented by the instructor from
topics available in the various texts. Students will regularly write proofs
emphasizing precise reasoning and clear exposition. Credit is not given
for both MATH 347 and MATH 348. Prerequisite: MATH 231.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

MATH 348  Fundamental Mathematics-ACP  credit: 4 Hours.
Course is identical to MATH 347 except for the additional writing
component. Credit is not given for both MATH 348 and MATH 347.
Prerequisite: MATH 231 and completion of the campus Composition I
general education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Quantitative Reasoning II

MATH 357  Numerical Methods I  credit: 3 Hours.
Same as CS 357. See CS 357.

MATH 362  Probability with Engrg Applic  credit: 3 Hours.
Same as ECE 313. See ECE 313.

MATH 370  Actuarial Problem Solving  credit: 1 Hour.
Methods and techniques of solving problems in actuarial mathematics
for advanced students intending to enter the actuarial profession.
Approved for S/U grading only. May be repeated in the same or separate
terms to a maximum of 4 hours. Prerequisite: Consent of instructor.

MATH 390  Individual Study  credit: 0 to 3 Hours.
Guided individual study of advanced topics not covered in other courses.
May be repeated to a maximum of 8 hours. Approved for both letter and
S/U grading. Prerequisite: Consent of instructor.

MATH 399  Math/Actuarial Internship  credit: 0 Hours.
Full-time or part-time practice of math or actuarial science in an off-
campus government, industrial, or research laboratory environment.
Summary report required. Approved for S/U grading only. May be
repeated in separate terms. Prerequisite: After obtaining an internship,
Mathematics majors must request entry from the Mathematics Director
of Undergraduate Studies; Actuarial Science majors must request entry
from the Director of the Actuarial Science Program.

MATH 402  Non Euclidean Geometry  credit: 3 or 4 Hours.
Historical development of geometry; includes tacit assumptions made
by Euclid; the discovery of non-Euclidean geometries; geometry as
a mathematical structure; and an axiomatic development of plane
geometry. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of
credit requires approval of the instructor and department with completion
of additional work of substance. Prerequisite: MATH 241; MATH 347 or
MATH 348, or equivalent; or consent of instructor.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

MATH 403  Euclidean Geometry  credit: 3 or 4 Hours.
Selected topics from geometry, including the nine-point circle, theorems
of Cera and Menelaus, regular figures, isometries in the plane, ordered
and affine geometries, and the invervse plane. 3 or 4 undergraduate
hours. 3 or 4 graduate hours. 4 hours of credit requires approval of
the instructor and department with completion of additional work of
substance. Prerequisite: MATH 241; MATH 347 or 348, or equivalent; or
consent of instructor.

MATH 405  Teacher's Course  credit: 3 or 4 Hours.
In-depth, advanced perspective look at selected topics covered in the
secondary curriculum. Connects mathematics learned at the university
level to content introduced at the secondary level. Intended for students
who plan to seek a secondary certificate in mathematics teaching. 3 or
4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires
approval of the instructor and department with completion of additional
work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348,
or equivalent; or consent of instructor.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

MATH 406  History of Calculus  credit: 3 or 4 Hours.
Examination of the historical origins and genesis of the concepts of
the calculus; includes mathematical developments from the ancient
Greeks to the eighteenth century. 3 or 4 undergraduate hours. 3 or 4
graduate hours. 4 hours of credit requires approval of the instructor
and department with completion of additional work of substance.
Prerequisite: MATH 241 or equivalent.

MATH 408  Actuarial Statistics I  credit: 4 Hours.
Same as STAT 408. See STAT 408.
MATH 409  Actuarial Statistics II  credit: 4 Hours.
Same as STAT 409. See STAT 409.

MATH 410  Lin Algebra & Financial Apps  credit: 3 or 4 Hours.
Emphasizes techniques of linear algebra and introductory and advanced applications to actuarial science, finance, and economics. Topics include linear equations, matrix theory, vector spaces, linear transformations, eigenvalues and eigenvectors, and inner product spaces. In addition, current research topics such as modeling, data mining, and generalized linear models are explored. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 410 and any of MATH 125, MATH 225, MATH 415 or MATH 416. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241; MATH 210 or FIN 221; or consent of instructor.

MATH 412  Graph Theory  credit: 3 or 4 Hours.
Examines basic concepts and applications of graph theory, where graph refers to a set of vertices and edges that join some pairs of vertices; topics include subgraphs, connectivity, trees, cycles, vertex and edge coloring, planar graphs and their colorings. Draws applications from computer science, operations research, chemistry, the social sciences, and other branches of mathematics, but emphasis is placed on theoretical aspects of graphs. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 347 or MATH 348 or equivalent experience or CS 374.

MATH 413  Intro to Combinatorics  credit: 3 or 4 Hours.
Permutations and combinations, generating functions, recurrence relations, inclusion and exclusion, Pólya’s theory of counting, and block designs. Same as CS 413. 3 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: MATH 347 or MATH 348 or equivalent experience.

MATH 414  Mathematical Logic  credit: 3 or 4 Hours.
Introduction to the formalization of mathematics and the study of axiomatic systems; expressive power of logical formulas; detailed treatment of propositional logical and predicate logic; compactness theorem and Gödel completeness theorem, with applications to specific mathematical theories; algorithmic aspects of logical formulas. Proofs are emphasized in this course, which can serve as an introduction to abstract mathematics and rigorous proof; some ability to do mathematical reasoning required. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 347 or MATH 348 or equivalent experience. This course satisfies the General Education Criteria for: Quantitative Reasoning II

MATH 415  Applied Linear Algebra  credit: 3 or 4 Hours.
Introductory course emphasizing techniques of linear algebra with applications to engineering; topics include matrix operations, determinants, linear equations, vector spaces, linear transformations, eigenvalues, and eigenvectors, inner products and norms, orthogonality, equilibrium, and linear dynamical systems. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 415 and any of MATH 125, MATH 225, MATH 410, or MATH 416. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or consent of instructor.

MATH 416  Abstract Linear Algebra  credit: 3 or 4 Hours.
Rigorous proof-oriented course in linear algebra. Topics include determinants, vector spaces over fields, linear transformations, inner product spaces, eigenvectors and eigenvalues, Hermitian matrices, Jordan Normal Form. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 416 and either MATH 410 or MATH 415. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or consent of instructor; MATH 347 is recommended.

MATH 417  Intro to Abstract Algebra  credit: 3 or 4 Hours.
Fundamental theorem of arithmetic, congruences. Permutations. Groups and subgroups, homomorphisms. Group actions with applications. Polynomials. Rings, subrings, and ideals. Integral domains and fields. Roots of polynomials. Maximal ideals, construction of fields. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: Either MATH 416 or one of MATH 410, MATH 415 together with one of MATH 347, MATH 348, CS 374; or consent of instructor.

MATH 418  Intro to Abstract Algebra II  credit: 3 or 4 Hours.
Rings of quotients of an integral domain. Euclidean domains, principal ideal domains. Unique factorization in polynomial rings. Fields extensions, ruler and compass constructions. Finite fields with applications. Modules. Structure theorem for finitely generated modules over principal ideal domains. Application to finitely generated abelian groups and canonical forms of matrices. Introduction to error-correcting codes. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 417 or consent of instructor.

MATH 423  Differential Geometry  credit: 3 or 4 Hours.
Applications of the calculus to the study of the shape and curvature of curves and surfaces; introduction to vector fields, differential forms on Euclidean spaces, and the method of moving frames for low-dimensional differential geometry. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent.

MATH 424  Honors Real Analysis  credit: 3 Hours.
A rigorous treatment of basic real analysis via metric spaces recommended for those who intend to pursue programs heavily dependent upon graduate level Mathematics. Metric space topics include continuity, compactness, completeness, connectedness and uniform convergence. Analysis topics include the theory of differentiation, Riemann-Darboux integration, sequences and series of functions, and interchange of limiting operations. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. Credit is not given for both MATH 424 and either MATH 444 or MATH 447. Approved for honors grading. Prerequisite: An honors section of MATH 347 or an honors section of MATH 416, and consent of the department.

MATH 425  Honors Advanced Analysis  credit: 3 Hours.
A theoretical treatment of differential and integral calculus in higher dimensions. Topics include inverse and implicit function theorems, submanifolds, the theorems of Green, Gauss and Stokes, differential forms, and applications. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. Approved for honors grading. Prerequisite: MATH 424 and either MATH 415 or MATH 416, and consent of the department.
MATH 427  Honors Abstract Algebra  credit: 3 Hours.
Group theory, counting formulae, factorization, modules with applications to Abelian groups and linear operators. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. Approved for honors grading. Credit is not given for both MATH 427 and MATH 417. Prerequisite: Consent of the department is required. Prerequisite courses are either an honors section of MATH 416, or MATH 415 together with an honors section of MATH 347.

MATH 428  Honors Topics in Mathematics  credit: 3 Hours.
A capstone course in the Mathematics Honors Sequences. Topics will vary. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. May be repeated in the same or separate terms to a maximum of 12 hours. Prerequisite: Consent of the department.

MATH 432  Set Theory and Topology  credit: 3 or 4 Hours.
Informal set theory, cardinal and ordinal numbers, and the axiom of choice; topology of metric spaces and introduction to general topological spaces. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 347 or MATH 348 or consent of instructor.

MATH 439  Philosophy of Mathematics  credit: 3 or 4 Hours.
Same as PHIL 439. See PHIL 439.

MATH 441  Differential Equations  credit: 3 or 4 Hours.
Basic course in ordinary differential equations; topics include existence and uniqueness of solutions and the general theory of linear differential equations; treatment is more rigorous than that given in MATH 285. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 441 and any of MATH 284, MATH 285, MATH 286. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348 is recommended.

MATH 442  Intro Partial Diff Equations  credit: 3 or 4 Hours.
Introduces partial differential equations, emphasizing the wave, diffusion and potential (Laplace) equations. Focuses on understanding the physical meaning and mathematical properties of solutions of partial differential equations. Includes fundamental solutions and transform methods for problems on the line, as well as separation of variables using orthogonal series for problems in regions with boundary. Covers convergence of Fourier series in detail. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: One of MATH 284, MATH 285, MATH 286, MATH 441.

MATH 444  Elementary Real Analysis  credit: 3 or 4 Hours.
Careful treatment of the theoretical aspects of the calculus of functions of a real variable intended for those who do not plan to take graduate courses in Mathematics. Topics include the real number system, limits, continuity, derivatives, and the Riemann integral. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 444 and either MATH 424 or MATH 447. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348, or equivalent.

MATH 446  Applied Complex Variables  credit: 3 or 4 Hours.
For students who desire a working knowledge of complex variables; covers the standard topics and gives an introduction to integration by residues, the argument principle, conformal maps, and potential fields. Students desiring a systematic development of the foundations of the subject should take MATH 448. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 446 and MATH 448. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241.

MATH 447  Real Variables  credit: 3 or 4 Hours.
Careful development of elementary real analysis for those who intend to take graduate courses in Mathematics. Topics include completeness property of the real number system; basic topological properties of n-dimensional space; convergence of numerical sequences and series of functions; properties of continuous functions; and basic theorems concerning differentiation and Riemann integration. 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 447 and either MATH 424 or MATH 444. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent; junior standing; MATH 347 or MATH 348, or equivalent experience; or consent of instructor.

MATH 448  Complex Variables  credit: 3 or 4 Hours.
For students who desire a rigorous introduction to the theory of functions of a complex variable; topics include Cauchy's theorem, the residue theorem, the maximum modulus theorem, Laurent series, the fundamental theorem of algebra, and the argument principle. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 448 and MATH 446. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 447.

MATH 450  Numerical Analysis  credit: 3 or 4 Hours.
Same as CS 450, CSE 401 and ECE 491. See CS 450.

MATH 453  Elementary Theory of Numbers  credit: 3 or 4 Hours.
Basic introduction to the theory of numbers. Core topics include divisibility, primes and factorization, congruences, arithmetic functions, quadratic residues and quadratic reciprocity, primitive roots and orders. Additional topics covered at the discretion of the instructor include sums of squares, Diophantine equations, continued fractions, Farey fractions, recurrences, and applications to primality testing and cryptography. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent. This course satisfies the General Education Criteria for: Quantitative Reasoning II

MATH 461  Probability Theory  credit: 3 or 4 Hours.
Introduction to mathematical probability; includes the calculus of probability, combinatorial analysis, random variables, expectation, distribution functions, moment-generating functions, and central limit theorem. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 461 and either MATH 408 or ECE 313. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent.

MATH 463  Statistics and Probability I  credit: 4 Hours.
Same as STAT 400. See STAT 400.

MATH 464  Statistics and Probability II  credit: 3 or 4 Hours.
Same as STAT 410. See STAT 410.

MATH 469  Methods of Applied Statistics  credit: 3 or 4 Hours.
Same as STAT 420. See STAT 420.
MATH 471 Life Contingencies I  credit: 4 Hours. 
Distribution of the time-to-death random variable for a single life, and its implications for evaluations of insurance and annuity functions, net premiums, and reserves. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 408 and MATH 210. 

MATH 472 Life Contingencies II  credit: 3 Hours. 
Continuation of MATH 471. Introduction to tabular or parametric survival models with single or multiple-life states; life insurance and annuity premium calculations; reserving and profit measures; introductions to universal life insurances, participating insurances, pension plans and retirement benefits. 3 undergraduate hours. No graduate credit. Credit is not given for MATH 472 and MATH 565. Prerequisite: MATH 471. 

MATH 473 Algorithms  credit: 4 Hours. 
Same as CS 473 and CSE 414. See CS 473. 

MATH 475 Formal Models of Computation  credit: 3 or 4 Hours. 
Same as CS 475. See CS 475. 

MATH 476 Investments and Financial Markets  credit: 3 Hours. 
Theoretical foundation in financial models and their applications to insurance and other financial risks. Topics include derivative markets, no arbitrage pricing of financial derivatives, interest rate models, dynamic hedging and other risk management techniques. 3 undergraduate hours. No graduate credit. Credit is not given for MATH 476 and MATH 567. Prerequisite: Credit or concurrent registration in STAT 409 or STAT 410. 

MATH 478 Loss Models  credit: 3 Hours. 
Foundation in the actuarial modeling process; construction, selection and validation of empirical models and parametric models. Also covers survival, severity, frequency and aggregate loss models; statistical methods to estimate model parameters. 3 undergraduate hours. No graduate credit. Credit is not given for MATH 478 and MATH 568. Prerequisite: MATH 408, MATH 461 or MATH 463; credit or concurrent registration in MATH 409 or MATH 464. 

MATH 479 Casualty Actuarial Mathematics  credit: 3 or 4 Hours. 
An introduction to property/casualty actuarial science, exploring its mathematical financial, and risk-theoretical foundations. Specific topics include risk theory, loss reserving, ratemaking, risk classification, credibility theory, reinsurance, financial pricing of insurance, and other special issues and applications. 3 or 4 undergraduate hours. No graduate credit. Credit is not given for MATH 479 and MATH 569. Prerequisite: MATH 210; credit or concurrent registration in MATH 409; or consent of instructor. 

MATH 481 Vector and Tensor Analysis  credit: 3 or 4 Hours. 
Introductory course in modern differential geometry focusing on examples, broadly aimed at students in mathematics, the sciences, and engineering. Emphasis on rigorously presented concepts, tools and ideas rather than on proofs. The topics covered include differentiable manifolds, tangent spaces and orientability; vector and tensor fields; differential forms; integration on manifolds and Generalized Stokes Theorem; Riemannian metrics, Riemannian connections and geodesics. Applications to configuration and phase spaces, Maxwell equations and relativity theory will be discussed. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 and one of MATH 415 or MATH 416 or equivalent. 

MATH 482 Linear Programming  credit: 3 or 4 Hours. 
Rigorous introduction to a wide range of topics in optimization, including a thorough treatment of basic ideas of linear programming, with additional topics drawn from numerical considerations, linear complementarity, integer programming and networks, polyhedral methods. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 410, MATH 415, or MATH 416. 

MATH 483 Nonlinear Programming  credit: 3 or 4 Hours. 
Iterative and analytical solutions of constrained and unconstrained problems of optimization; gradient and conjugate gradient solution methods; Newton's method, Lagrange multipliers, duality and the Kuhn-Tucker theorem; and quadratic, convex, and geometric programming. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348; or equivalent; MATH 415 or equivalent; or consent of instructor. 

MATH 484 Nonlinear Programming  credit: 3 or 4 Hours. 
Iterative and analytical solutions of constrained and unconstrained problems of optimization; gradient and conjugate gradient solution methods; Newton's method, Lagrange multipliers, duality and the Kuhn-Tucker theorem; and quadratic, convex, and geometric programming. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent. 

MATH 485 Numerical Analysis in Engineering  credit: 3 or 4 Hours. 
Complex linear algebra, inner product spaces, Fourier transforms and analysis of boundary value problems, Sturm-Liouville theory. Same as ECE 493. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: One of MATH 284, MATH 285, MATH 286, MATH 441. 

MATH 488 Math Methods in Engineering  credit: 3 or 4 Hours. 
Matrices, determinants, bounds and approximations to eigenvalues, introduction to linear operator theory and inner product spaces, orthogonal expansions, and Fourier transforms. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent. 

MATH 489 Dynamics & Differential Eqns  credit: 3 or 4 Hours. 
Studies mathematical theory of dynamical systems, emphasizing both discrete-time dynamics and nonlinear systems of differential equations. Topics include: chaos, fractals, attractors, bifurcations, with application to areas such as population biology, fluid dynamics and classical physics. Basic knowledge of matrix theory will be assumed. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: One of MATH 284, MATH 285, MATH 286, MATH 441. 

MATH 490 Advanced Topics in Mathematics  credit: 1 to 4 Hours. 
Deals with selected topics and applications of mathematics; see Class Schedule or department office for current topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated with approval. Prerequisite: Consent of instructor. 

MATH 492 Undergraduate Research in Math  credit: 1 to 3 Hours. 
Work closely with department faculty on a well-defined research project. Topics and nature of assistance vary. Capstone paper or computational project required. 1 to 3 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated in separate terms up to 8 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head. 

MATH 493 Models in Mathematical Biology  credit: 3 or 4 Hours. 
Research-motivated subject material from Mathematical Biology with emphasis on modeling. 3 undergraduate hours. 4 graduate hours. Prerequisite: MATH 220 or equivalent.
MATH 496 Honors Seminar  credit: 3 Hours.
Careful study of a selected area of mathematics, carried out either deductively from axioms or inductively through problems; subject matter varies with instructor. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Consent of Mathematics Honors Committee.

MATH 499 Introduction Graduate Research  credit: 1 Hour.
Seminar is required of all first-year graduate students in Mathematics. It provides a general introduction to the courses and research work in all of the areas of mathematics that are represented at the University of Illinois at Urbana-Champaign. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only. May be repeated to a maximum of 2 hours. Prerequisite: Graduate standing or consent of instructor.

MATH 500 Abstract Algebra I  credit: 4 Hours.

MATH 501 Abstract Algebra II  credit: 4 Hours.

MATH 502 Commutative Algebra  credit: 4 Hours.
Commutative rings and modules, prime ideals, localization, noetherian rings, primary decomposition, integral extensions and Noether normalization, the Nullstellensatz, dimension, flatness, Hensel's lemma, graded rings, Hilbert polynomial, valuations, regular rings, singularities, unique factorization, homological dimension, depth, completion. Possible further topics: smooth and etale extensions, ramification, Cohen-Macaulay modules, complete intersections. Prerequisite: MATH 501 or consent of instructor.

MATH 503 Intro Geometric Group Theory  credit: 4 Hours.
Free groups, groups given by generators and relations, van Kampen diagrams. Free product with amalgamations and HNN-extensions, Bass-Serre theory. Solvable and nilpotent groups. Quasi-isometries and geometric properties of groups. Prerequisite: MATH 500 or equivalent.

MATH 505 Homological Algebra  credit: 4 Hours.
Topics include: 1. Snake lemma, homology, long exact sequence in homology; 2. Projective and injective modules and resolutions; 3. Categories, functors and derived functors. Tor and Ext, local cohomology; 4. Group cohomology, bar resolution; 5. Spectral sequences, techniques of computation, Serre spectral sequence. Grothendieck spectral sequence of composite functors; 6. Time permitting: Derived categories, Gysin sequence, Kunneth formula, universal coefficient theorem, Eilenberg-Moore sequence. Prerequisite: MATH 501 or equivalent.

MATH 506 Group Representation Theory  credit: 4 Hours.
Representation of groups by linear transformations, group algebras, character theory, and modular representations. Prerequisite: MATH 501 or equivalent.

MATH 510 Riemann Surf & Algebraic Curv  credit: 4 Hours.
An introduction to Riemann Surfaces from both the algebraic and function-theoretic points of view. Topics include holomorphic and meromorphic differential forms, integration of differential forms, divisors and linear equivalence, the genus of a compact Riemann surface, projective algebraic curves, the Riemann-Roch theorem, and applications. Prerequisite: MATH 542.

MATH 511 Intro to Algebraic Geometry  credit: 4 Hours.
An introduction to the study of algebraic sets defined by polynomial equations; affine and projective space and their subvarieties; rational and regular functions and mappings; divisors, linear systems, and projective embeddings; birational geometry, blowing up; Grassmannians and other special varieties. Prerequisite: MATH 500.

MATH 512 Modern Algebraic Geometry  credit: 4 Hours.
An introduction to the tools and ideas of contemporary algebraic geometry, with particular focus on the language of schemes. 4 graduate hours. No professional credit. Prerequisite: MATH 500, and one of MATH 510, MATH 511, or consent of instructor.

MATH 514 Complex Algebraic Geometry  credit: 4 Hours.
Hodge theory of complex manifolds; examples, applications, and topological invariants. 4 graduate hours. No professional credit. Credit is not given for MATH 514 if credit for MATH 524 has been earned. Prerequisite: MATH 448 or consent of instructor.

MATH 518 Differentiable Manifolds I  credit: 4 Hours.
Definitions and properties of differentiable manifolds and maps, (co)tangent bundles, vector fields and flows, Frobenius theorem, differential forms, exterior derivatives, integration and Stokes' theorem, DeRham cohomology, inverse function theorem, Sard's theorem, transversality and intersection theory. Prerequisite: MATH 423 or MATH 481, or consent of instructor.

MATH 519 Differentiable Manifolds II  credit: 4 Hours.
Vector bundles, principal bundles, connections, parallel transport, curvature, Chern-Weyl theory, Hodge-DeRham theory. Other topics may include Riemannian geometry, symplectic geometry, spin geometry, and harmonic maps. Prerequisite: MATH 518 or consent of instructor.

MATH 522 Lie Groups and Lie Algebras I  credit: 4 Hours.
A general introduction to Lie groups and algebras and their representation theory. Theory of finite group representations, Lie groups as matrix groups, and as differentiable manifolds, Lie algebras as tangent spaces and as abstract objects, and their representations. Examples of the classical groups. May be repeated up to 8 hours. Prerequisite: Undergraduate linear algebra, abstract algebra, point set topology, differentiation on manifolds.

MATH 525 Algebraic Topology I  credit: 4 Hours.
Introduction to the study of topological spaces by means of algebraic invariants. Topics include the fundamental group, covering spaces and their classification, simplicial and singular homology, applications such as the Brouwer fixed point theorem and the Jordan curve theorem. Prerequisite: MATH 417 and MATH 448 or consent of instructor.

MATH 526 Algebraic Topology II  credit: 4 Hours.
CW-complexes, relative homeomorphism theorem, cellular homology, cohomology, Kunneth theorem, Eilenberg-Zilber theorem, cup products, Poincare duality, examples. Prerequisite: MATH 525, MATH 500; or consent of instructor. MATH 501 is recommended but not required.
MATH 527  Homotopy Theory  credit: 4 Hours.
Homotopy groups, fibrations and cofibrations, Hurewicz theorem, obstruction theory, Whitehead theorem and additional topics perhaps drawn from Postnikov towers, Freudenthal suspension theorem, Blakers-Massey theorem, spectra. Prerequisite: MATH 526. MATH 501 is recommended but not required.

MATH 530  Algebraic Number Theory  credit: 4 Hours.
Further development of the theory of fields covering topics from valuation theory, ideal theory, units in algebraic number fields, ramification, function fields, and local class field theory. Prerequisite: MATH 500 or equivalent.

MATH 531  Analytic Theory of Numbers I  credit: 4 Hours.
Problems in number theory treated by methods of analysis; arithmetic functions, Dirichlet series, Riemann zeta function, L-functions, Dirichlet's theorem on primes in progressions, the prime number theorem. Prerequisite: MATH 448 and either MATH 417 or MATH 453.

MATH 532  Analytic Theory of Numbers II  credit: 4 Hours.
Development of themes from MATH 531 and further topics chosen from additive number theory, asymptotic properties of multiplicative functions, circle method, diophantine approximation, lattice point problems, metric theory, modular forms, sieve theory. May be repeated. Prerequisite: MATH 531.

MATH 533  Fiber Spaces and Char Classes  credit: 4 Hours.
Study of fiber bundles and their associated characteristic classes; applications to geometric problems. Prerequisite: MATH 526.

MATH 535  General Topology  credit: 4 Hours.
Study of topological spaces and maps, including Cartesian products, identifications, connectedness, compactness, uniform spaces, and function spaces. Prerequisite: Consent of instructor.

MATH 540  Real Analysis  credit: 4 Hours.
Lebesgue measure on the real line; integration and differentiation of real valued functions of a real variable; and additional topics at discretion of instructor. Prerequisite: MATH 447 or equivalent.

MATH 541  Functional Analysis  credit: 4 Hours.
Fundamental results in functional analysis; spectral theory of compact operators; further topics chosen by the instructor. Prerequisite: MATH 540.

MATH 542  Complex Variables I  credit: 4 Hours.
Topics include the Cauchy theory, harmonic functions, entire and meromorphic functions, and the Riemann mapping theorem. Prerequisite: MATH 446 and MATH 447, or MATH 448.

MATH 543  Complex Variables II  credit: 4 Hours.
Continuation of MATH 542. Topics include Riemann Surfaces, Hyperbolic Metric, Potential Theory and Quasiconformal Mappings. Prerequisite: MATH 542.

MATH 545  Harmonic Analysis  credit: 4 Hours.
Harmonic analysis on the circle, the line, and the integers, i.e., Fourier series and transforms; locally compact Abelian groups; convergence and summability; conjugate functions; Hardy spaces; uniqueness; Tauberian theorems; almost-periodic functions; commutative Banach algebras. Prerequisite: MATH 448 and MATH 541; knowledge of Banach spaces.

MATH 546  Hilbert Spaces  credit: 4 Hours.
Geometrical properties of Hilbert spaces, spectral theorems for compact, bounded and unbounded operators, basic theory of operator algebras, and additional material depending on the instructor. Prerequisite: MATH 541.

MATH 547  Banach Spaces  credit: 4 Hours.
Basic properties and fundamental theorems of Banach spaces and bounded linear maps, trace duality, absolutely summing maps, local theory, type and cotype, probabilistic techniques in Banach spaces, and further topics depending on the instructor. 4 graduate hours. No professional credit. Prerequisite: MATH 541.

MATH 550  Dynamical Systems I  credit: 4 Hours.
An introduction to the study of dynamical systems. Considers continuous and discrete dynamical systems at a sophisticated level: differential equations, flows and maps on Euclidean space and other manifolds. Emphasis will be placed on the fundamental theoretical concepts and the interaction between the geometry and topology of manifolds and global flows. Discrete dynamics includes Bernoulli shifts, elementary Anosov diffeomorphisms and surfaces of sections of flows. Bifurcation phenomena in both continuous and discrete dynamics will be studied. Prerequisite: MATH 489 or consent of instructor.

MATH 551  Dynamical Systems II  credit: 4 Hours.
A second course in the study of dynamical systems. Students who intend to do research in nonlinear dynamics are encouraged to take this course. A specific selection will be chosen from the following list to illustrate the theory and use of techniques from global analysis and nonlinear dynamics: (1) discrete dynamical systems, (2) global theory of ordinary differential equations, (3) Hamiltonian systems, (4) KAM theory, (5) bifurcation and stability, (6) Hopf index theory of vector fields, (7) Morse theory of gradient vector fields, (8) Lyapunov theory, (9) infinite dimensional dynamical systems, (10) structural stability. Prerequisite: Consent of instructor.

MATH 553  Partial Differential Equations  credit: 4 Hours.
Basic introduction to the study of partial differential equations; topics include: the Cauchy problem, power-series methods, characteristics, classification, canonical forms, well-posed problems, Riemann's method for hyperbolic equations, the Goursat problem, the wave equation, Sturm-Liouville problems and separation of variables, Fourier series, the heat equation, integral transforms, Laplace's equation, harmonic functions, potential theory, the Dirichlet and Neumann problems, and Green's functions. Prerequisite: Consent of instructor.

MATH 554  Linear Analysis and Partial Differential Equations  credit: 4 Hours.
Course will provide students with the basic background in linear analysis associated with partial differential equations. The specific topics chosen will be largely up to the instructor, but will cover such areas as linear partial differential operators, distribution theory and test functions, Fourier transforms, Sobolev spaces, pseudodifferential operators, microlocal analysis, and applications of the above topics. 4 graduate hours. No professional credit. Prerequisite: MATH 553 or consent of instructor.

MATH 555  Nonlinear Analysis and Partial Differential Equations  credit: 4 Hours.
Course will provide students with the basic background in nonlinear analysis associated with partial differential equations. The specific topics chosen will be largely up to the instructor, but will cover such areas as existence and uniqueness techniques, nonexistence and finite time blow-up results, hyperbolic conservation laws, weak solutions, stability theory, nonlinear elliptic theory, regularity theory, 4 graduate hours. No professional credit. May be repeated as topics vary. Prerequisite: Consent of instructor.
MATH 558 Methods of Applied Mathematics  credit: 4 Hours.
Introduction to modern methods of applied mathematics, including nondimensionalization and scaling analysis, regular and singular asymptotics, analysis of multiscale systems, and analysis of complex systems. Each technique is illustrated with applications from science and engineering. The mathematical frameworks will include ordinary, partial and stochastic differential equations, point processes, and Markov chains. Prerequisite: Undergraduate background in ODEs, PDEs, and probability theory (MATH 441, MATH 442, and MATH 461, or equivalents), or consent of instructor.

MATH 561 Theory of Probability I  credit: 4 Hours.
Mathematical foundations of probability and stochastic processes; probability measures, random variables, distribution functions, convergence theory, the Central Limit Theorem, conditional expectation, and martingale theory. Same as STAT 551. Prerequisite: MATH 541 or consent of instructor.

MATH 562 Theory of Probability II  credit: 4 Hours.
Continuation of MATH 561. Same as STAT 552. Prerequisite: MATH 561.

MATH 563 Risk Modeling and Analysis  credit: 4 Hours.
Quantitative tools for measuring risks and modeling dependencies. Topics include risk measures, stochastic orders, copulas, dependence measures, and their statistical inferences. Same as STAT 558. 4 graduate hours. No professional credit. Prerequisite: MATH 408 or MATH 461.

MATH 564 Applied Stochastic Processes  credit: 4 Hours.
Introduction to topics such as spectral analysis, filtering theory, and prediction theory of stationary processes; Markov chains and Markov processes. Same as STAT 555. Prerequisite: MATH 446 and MATH 447.

MATH 565 Actuarial Models for Life Contingencies  credit: 4 Hours.
Tabular and parametric survival models with single or multiple-life states; life insurance and annuity premium calculations; reserving, and profit measures; introduction to universal life insurances, participating insurances, pension plans and retirement benefits. 4 graduate hours. No professional credit. Prerequisite: MATH 408 or MATH 461.

MATH 566 Actuarial Models for Financial Economics  credit: 4 Hours.
Theoretical basis of financial models and their applications to insurance and other financial risks. Topics include derivative markets, no-arbitrage pricing of financial derivatives, interest rate models, dynamic hedging and other risk management techniques. 4 graduate hours. No professional credit. Credit is not given for MATH 472 and MATH 565. Prerequisite: MATH 471.

MATH 567 Actuarial Science  credit: 4 Hours.
Introduction to the actuarial modeling process: construction, selection and validation of empirical and parametric models. Survival, severity, frequency and aggregate loss models; statistical methods to estimate model parameters. 4 graduate hours. No professional credit. Credit is not given for MATH 478 and MATH 568. Prerequisite: MATH 408, MATH 461 or MATH 463.

MATH 569 Casualty Actuarial Science  credit: 4 Hours.
Principles and fundamental techniques of ratemaking for casualty and property insurances; risk classification; coinsurance; estimation of claim liabilities; financial reporting; catastrophe modeling. 4 graduate hours. No professional credit. Credit is not given for MATH 479 and MATH 569. Prerequisite: MATH 408.

MATH 570 Mathematical Logic  credit: 4 Hours.
Development of first order predicate logic; completeness theorem; formalized number theory and the Godel incompleteness theorem. Prerequisite: MATH 417 or consent of instructor.

MATH 571 Model Theory  credit: 4 Hours.
Techniques for constructing models, including compactness and Lowenheim-Skolem theorems, unions of elementary chains, and omitting types construction; categorical theories; ultraproducts; saturated models; quantifier elimination; applications to algebraically closed fields, real closed fields, and other fundamental structures of mathematics. Prerequisite: MATH 570 or consent of instructor.

MATH 572 Structures of Mathematics  credit: 4 Hours.
Techniques for constructing models, including compactness and Lowenheim-Skolem theorems, unions of elementary chains, and omitting types construction; categorical theories; ultraproducts; saturated models; quantifier elimination; applications to algebraically closed fields, real closed fields, and other fundamental structures of mathematics. Prerequisite: MATH 570 or consent of instructor.

MATH 573 Recursive Function Theory  credit: 4 Hours.
Various characterizations of the class of recursive (i.e., computable) functions; the Church-Turing thesis; unsolvability of the halting problem; the recursion theorem and the enumeration theorem; relative computability, the jump operation, and the arithmetical hierarchy; recursively enumerable sets; degrees of unsolvability; and the priority method. Prerequisite: MATH 570 or consent of instructor.

MATH 574 Set Theory  credit: 4 Hours.
Zermelo-Fraenkel axiomatic set theory; basic concepts in set theory such as ordinal, cardinal, rank, and definition by transfinite recursion; Godel's constructible universe; introduction to forcing; Boolean valued universes; large cardinals; consistency and independence of the continuum hypothesis and the axiom of choice. Prerequisite: MATH 570 or consent of instructor.

MATH 580 Combinatorial Mathematics  credit: 4 Hours.
Fundamental results on core topics of combinatorial mathematics: classical enumeration, basic graph theory, extremal problems on finite sets, probabilistic methods, design theory, discrete optimization. Same as CS 571. Prerequisite: Consent of instructor.

MATH 581 Extremal Graph Theory  credit: 4 Hours.
Extremal problems and parameters for graphs. Distance and connectivity, matching and factors, vertex and edge colorings, perfect and imperfect graphs, intersection classes and intersection parameters, Turan's theorem, graph Ramsey theory, graph decomposition and other extremal problems. Same as CS 572. Prerequisite: MATH 580 or consent of instructor.

MATH 582 Structure of Graphs  credit: 4 Hours.
Structure of graphs and properties of special classes of graphs. Degree sequences and reconstruction, structure of $k$-connected graphs, Hamiltonian cycles and circumference, planar graphs and their properties, graph minors, cycle coverings, matroidal and algebraic aspects of graphs. Prerequisite: MATH 580 or consent of instructor.

MATH 583 Partial Orders and Comb Optim  credit: 4 Hours.
Combinatorial aspects of partially ordered sets and their relation to optimization problems. Structure of posets and lattices, Dilworth's theorem and generalizations, linear extensions and sorting, dimension of posets, order ideals, extremal set theory, integer programming and minmax relations, matroids and their applications. Prerequisite: MATH 580 or consent of instructor.

MATH 584 Methods of Combinatorics  credit: 4 Hours.
Combinatorial methods and other mathematical methods for combinatorial problems. Enumeration by bijections and generating functions, probabilistic methods for existence proofs and asymptotic analysis, randomized algorithms, Ramsey's theorem and related topics, combinatorial designs and their applications, geometric problems and methods. Same as CS 575. Prerequisite: MATH 580 or consent of instructor.
MATH 585  Probabilistic Combinatorics  credit: 4 Hours.
Techniques and applications of probabilistic methods in combinatorics. Draws applications from a variety of areas, but emphasizes theoretical aspects of random graphs, including connectivity, trees & cycles, planarity, and coloring problems. Techniques include the second moment method, Lovasz Local Lemma, martingales, Talgrand’s Inequality, the Rodl Nibble, and Szemerédi’s Regularity Lemma. Applications may come from discrete geometry, coding theory, algorithms & complexity, additive number theory, percolation, positional games, etc. Prerequisite: MATH 412 or 413 or equivalent.

MATH 588  Optimization in Networks  credit: 4 Hours.
Theory and methods for optimization over directed graphs; paths, cuts, flows, and potentials; matchings; PERT and CPM; max flow, min path, out-of-kilter, Hungarian, and other algorithms; nonlinear cost functionals; painting theory; and existence and duality. Prerequisite: MATH 412 or 413 or equivalent.

MATH 589  Conjugate Duality and Optim credit: 4 Hours.
Convex analysis for constrained extremum problems; convex sets, cones, and functions; separation; Fenchel transform; duality correspondences; differential theory; nonlinear programming; sensitivity; and perturbational duality for primal, dual, and Lagrangian problems. Prerequisite: MATH 415 and MATH 447, or consent of instructor.

MATH 593  Mathematical Internship  credit: 0 Hours.
Full-time or part-time practice of graduate-level mathematics in an off-campus government, industrial, or research laboratory environment. Summary report required. 0 graduate credit. No professional credit. Approved for S/U grading only. May be repeated in separate terms.

MATH 595  Advanced Topics in Mathematics  credit: 1 to 4 Hours.
See Class Schedule for current topics. 1 to 4 graduate hours. No professional credit. May be repeated in the same or separate semesters. Prerequisite: Consent of instructor.

MATH 597  Reading Course  credit: 1 to 8 Hours.
Independent study in Mathematics. 1 to 8 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in the same or separate terms, with a maximum of 8 hours per semester. Prerequisite: Consent of instructor.

MATH 598  Literature Seminar in Math  credit: 0 to 4 Hours.
Seminar on topics of current interest in mathematics. Students present seminars and discussions on various topics. See Class Schedule for current topics. Recommended for all Mathematics students. 0 to 4 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in the same or separate semesters as topics vary. Prerequisite: Consent of instructor.

MATH 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

Mechanical Engineering (ME)

ME Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ME)

Courses

ME 170  Computer-Aided Design  credit: 3 Hours.
Geometry and topology of engineered components: creation of engineering models and their presentation in standard 2D blueprint form and as 3D wire-frame and shaded solids; meshed topologies for engineering analysis and tool-path generation for component manufacture; ISO and ANSI standards for coordinate dimensioning and tolerancing; geometric dimensioning and tolerancing. Use of solid-modeling software for creating associative models at the component and assembly levels with automatic blueprint creation, interference checking, and linked bill of materials. Credit is not given for both ME 170 and GE 101.

ME 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

ME 270  Design for Manufacturability  credit: 3 Hours.
Introduction to DFM methodologies and tools; material selection (new and traditional materials); designing for primary manufacturing processes (cutting fundamentals, casting, forming, and shaping); designing with plastics (snap-fits, integral hinges, etc.); design for assembly (DFA); geometric dimensioning and tolerancing (GD&T). Same as TAM 270. Prerequisite: ME 170. ME and EM majors only.

ME 297  Introductory Independent Study  credit: 1 to 3 Hours.
Independent study and/or individual projects related to mechanical engineering. Approved for Letter and S/U grading. May be repeated to a maximum of 6 credit hours for letter grade; no limit for S/U grade mode. Prerequisite: Consent of Instructor.

ME 300  Thermodynamics  credit: 3 Hours.
Classical thermodynamics through the second law; system and control-volume analyses of thermodynamic processes; irreversibility and availability; relations for ideal gas mixtures. Prerequisite: MATH 241.

ME 310  Fundamentals of Fluid Dynamics  credit: 4 Hours.
Fundamentals of fluid mechanics with coverage of theory and applications of incompressible viscous and inviscid flows, and compressible high speed flows. Credit is not given for both ME 310 and TAM 335. Prerequisite: MATH 285; credit or concurrent registration in ME 300.

ME 320  Heat Transfer  credit: 4 Hours.
Principles and application of heat transfer by conduction, convection, and thermal radiation. Prerequisite: ME 310 or TAM 335.

ME 330  Engineering Materials  credit: 4 Hours.
Structures of polymers, metals, and ceramics as the basis for their mechanical behavior. Manipulation of structure through such processes as heat treatment and solidification. Mechanisms of material failure in service (yielding, fracture, fatigue, creep, corrosion, and wear) and simple design techniques to avoid these failures. Strategies for materials selection in design. Credit is not given for both ME 330 and either CEE 300 or MSE 280. Prerequisite: CHEM 102 and TAM 251.

ME 340  Dynamics of Mechanical Systems  credit: 3.5 Hours.
Dynamic modeling of mechanical components and systems; time-domain and frequency-domain analyses of linear time-invariant systems; multi-degree-of-freedom systems; linearization of nonlinear systems. Credit is not given for both ME 340 and either GE 320 or AE 353. Prerequisite: MATH 285 and TAM 212; credit or concurrent registration in ECE 205, ECE 206, and MATH 415.
ME 351 Analysis of Mfg Processes  credit: 3 Hours.
Mechanistic and empirical modeling of manufacturing processes including metal cutting theory, casting analysis, forging analysis, sheet metal forming, plastics molding, welding and mechanical joining assembly analysis. Also, hands-on exposure to manufacturing processes, CAD/CAM software (MasterCam), 5 axis machining (ShopBot), Wire EDM machining, statistical process control (SPC), and geometric dimensioning and tolerancing (GD&T) metrology principles using CMM. Prerequisite: ME 270.

ME 360 Signal Processing  credit: 3.5 Hours.
Basic electromechanical techniques used in modern instrumentation and control systems. Use of transducers and actuators. Signal conditioning, grounding, and shielding. Analog and digital signal processing and feedback control methods with emphasis on frequency domain techniques. Frequency response of continuous and discrete systems. Credit is not given for both ME 360 and ABE 425. Prerequisite: ME 340.

ME 370 Mechanical Design I  credit: 3 Hours.
Kinematics and dynamics of machinery, including analytical kinematics, force analysis, cam design and balancing. Application of elementary mechanics of solids to analyze and size machine components for stress and deflection. Finite-element analysis with emphasis on beam and plate models. Prerequisite: ME 170, TAM 212, and TAM 251.

ME 371 Mechanical Design II  credit: 3 Hours.
Design and analysis of machinery for load-bearing and power transmission. Consideration of material failure modes, including yielding, fracture, fatigue, and creep. Design and selection of machine elements: bolts, springs, rolling-element bearings, fluid-film lubrication, and power transmissions, including gears and friction drives. Prerequisite: ME 330 and ME 370.

ME 390 Seminar  credit: 0 Hours.
Lectures by faculty and invited authorities, concerning the ethics and practices of mechanical engineering/engineering mechanics, as well as its relationship to other fields of engineering, to economics, and to society. Offered fall term only. Approved for S/U grading only.

ME 400 Energy Conversion Systems  credit: 3 or 4 Hours.
Processes and systems for energy conversion, including power and refrigeration cycles, air conditioning, thermoelectrics and fuel cells; ideal-gas mixtures and psychrometrics. 3 undergraduate hours. 4 graduate hours. Prerequisite: ME 300.

ME 401 Refrigeration and Cryogenics  credit: 3 or 4 Hours.
Theory of operation and design of equipment for production of low temperatures, from below ambient to near absolute zero; industrial, consumer, aerospace, medical, and research applications. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 300, ME 310, and ME 320.

ME 402 Design of Thermal Systems  credit: 3 or 4 Hours.
Selection of components in fluid- and energy-processing systems to meet system-performance requirements; computer-aided design; system simulation; optimization techniques; investment economics and statistical combinations of operating conditions. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in ME 320.

ME 403 Internal Combustion Engines  credit: 3 or 4 Hours.
Theory and analysis of reciprocating internal-combustion engines; fuels, carburetion, combustion, exhaust emissions, detonation, fuel injection, and factors affecting performance; laboratory work on variables that affect performance. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in ME 400 or ABE 466.

ME 404 Intermediate Thermodynamics  credit: 4 Hours.
Classical thermodynamics, including the TdS equations and the Maxwell relations; development of thermodynamic property relations, behavior of real gases, thermodynamics of mixtures, phase equilibrium and chemical reactions and equilibrium with an emphasis on combustion reactions; statistical thermodynamics including the effect of molecular and atomic structure, statistical concepts and distributions, calculation of thermodynamic properties of gas-phase atoms and molecules, kinetic theory of gases, and vibrations in crystals and the electron gas in metals; selected applications. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ME 404 and any of PHYS 427, CHEM 442, or CHEM 444. Prerequisite: ME 300.

ME 410 Intermediate Gas Dynamics  credit: 4 Hours.
Solution of internal compressible-flow problems by one-dimensional techniques, both steady and unsteady, flows with smooth and abrupt area change, with friction, with heat addition, and with mass addition; flows with weak and strong waves, multiple confined streams, and shock waves. 4 undergraduate hours. 4 graduate hours. Prerequisite: ME 300 and ME 310; or one of AE 311, TAM 335.

ME 411 Viscous Flow & Heat Transfer  credit: 4 Hours.
Same as AE 412. See AE 412.

ME 412 Numerical Thermo-Fluid Mechs  credit: 2 to 4 Hours.
Numerical techniques for solving the equations governing conduction and convective heat transfer in steady and unsteady fluid flows: finite-difference and finite-volume techniques, basic algorithms, and applications to real-world fluid-flow and heat-transfer problems. Same as CSE 412. 2 or 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 310 and ME 320.

ME 420 Intermediate Heat Transfer  credit: 4 Hours.
Conduction heat transfer, radiation heat transfer, mass transfer, phase change, heat exchangers; numerical methods. 4 undergraduate hours. 4 graduate hours. Prerequisite: ME 310 and ME 320.

ME 430 Failure of Engrg Materials  credit: 3 or 4 Hours.
Material anisotropy and elasto-plastic properties at the crystal level; microstructural basis for fatigue, fracture, and creep in metals, polymers, and ceramics; failure mechanisms and toughening in composites; structure and behavior of metal-matrix composites, ceramic-matrix composites, and polymer composites. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 330.

ME 431 Mechanical Component Failure  credit: 3 or 4 Hours.
Relationship of materials and mechanics concepts to the design of structures and components: elasticity, plasticity, thermal loading, creep, fatigue, fracture, and residual-life assessments as they relate to materials selection and design. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 330 and ME 371; Recommended: ME 430.

ME 432 Fundamentals of Photovoltaics  credit: 3 or 4 Hours.
In this course, we will develop a fundamental understanding of how solar cells convert light to electricity, how solar cells are made, how solar cell performance is evaluated, and the photovoltaic technologies that are currently on the market and/or under development. Using thermodynamics, materials physics, and engineering analysis we will assess and critique the potential and drawbacks of modern photovoltaic technologies, including single- and multi-crystalline silicon, tandem cells, CdTe, CIGS, PVT, bulk heterojunctions (organic), Graetzels cells, nanostructure-based, and third generation PV. 3 undergraduate hours. 4 graduate hours. Approved for Letter and S/U grading. Prerequisite: PHYS 212 and ME 330 or equivalent.
ME 440 Kinem & Dynamics of Mech Syst  credit: 3 or 4 Hours.
Kinematics and dynamics of constrained rigid-body mechanical systems; use of modern computer-based analysis software packages. 3 undergraduate hours. 4 graduate hours. Prerequisite: ME 370.

ME 445 Introduction to Robotics  credit: 4 Hours.
Same as AE 482 and ECE 470. See ECE 470.

ME 446 Robot Dynamics and Control  credit: 4 Hours.
Same as ECE 489 and SE 422. See SE 422.

ME 450 Modeling Materials Processing  credit: 3 Hours.
Manufacturing processes for metals and polymers; creation of process models based on momentum, heat, and mass transfer; model simplification by estimation and scaling; applications to casting, microstructure evolution, polymer molding and extrusion, and welding. 3 undergraduate hours. 3 graduate hours. Prerequisite: ME 320 and ME 330.

ME 451 Computer-Aided Mfg Systems  credit: 3 or 4 Hours.
The application of computer technology and operations research to manufacturing systems. Use of microprocessors for direct numeric control of machine tools, adaptive control and optimization, and integrated manufacturing systems. Applications of industrial robots. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 270.

ME 452 Num Control of Mfg Processes  credit: 3 or 4 Hours.
Numerical control systems, manufacturing processes, principles and practices basic to numerical control, and programming methodology for numerical control. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 101 and ME 270.

ME 455 Micromanufacturing Process & Automation  credit: 3 or 4 Hours.
Scaling laws in miniaturization, Micro-machine tools design and characterization, Micromanufacturing process modeling, simulation and automation, Micro-metrology and Micro-assembly systems. 3 undergraduate hours. 4 graduate hours. Prerequisite: ME 270 or equivalent or consent of instructor.

ME 460 Industrial Control Systems  credit: 4 Hours.
Industrial control techniques; case studies of industrial systems; design, selection, and maintenance of industrial control systems, including electromechanical, pneumatic, thermal, and hydraulic systems. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ME 460 and ECE 486. Prerequisite: ME 340 and ME 360.

ME 461 Computer Cntrl of Mech Systems  credit: 3 or 4 Hours.
Microcomputer control of thermal and mechanical systems: sensors and transducers, signal transmission and conversion, and regulator actuation. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ME 360 or ABE 425.

ME 470 Senior Design Project  credit: 3 Hours.
Solution of a real-world design problem: development, evaluation, and recommendation of alternative solutions subject to realistic constraints that include most of the following considerations: economics, environment, sustainability, manufacturability, ethics, health and safety, society, and politics. 3 undergraduate hours. No graduate credit. Departmental approval required. Prerequisite: Concurrent enrollment in no more than two required ME courses; completion of all required courses. This course satisfies the General Education Criteria for: Advanced Composition

ME 471 Finite Element Analysis  credit: 3 or 4 Hours.
The finite element method and its application to engineering problems: truss and frame structures, heat conduction, and linear elasticity; use of application software; overview of advanced topics such as structural dynamics, fluid flow, and nonlinear structural analysis. Same as AE 420 and CSE 451. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both ME 471 and CEE 470. Prerequisite: CS 101 and ME 370.

ME 472 Introduction to Tribology  credit: 3 or 4 Hours.
Friction, wear, and lubrication; engineering surfaces; surface properties and surface topography; Hertzian contacts and contact of rough surfaces; friction of surfaces in contact; wear and surface failures; boundary lubrication; fluid properties; hydrodynamic lubrication; elastohydrodynamic lubrication; bearing selection; introductory micro- and nanotribology. 3 undergraduate hours. 3 or 4 graduate hours.

ME 481 Whole-Body Musculoskel Biomech  credit: 3 or 4 Hours.
Exploration of the human musculoskeletal system with an emphasis on the whole-body or organism level; modeling and analysis techniques for examining human movement, such as rigid-body modeling techniques, forward and inverse dynamics, and Lagrangian mechanics; examination of current topics, such as orthopedic biomechanics, prosthetics and orthotics, postural control, and locomotion; use of computerized motion-capture equipment and software to examine, simulate, and analyze human movement. Same as BIOE 481. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: TAM 212 and TAM 251.

ME 482 Musculoskel Tissue Mechanics  credit: 3 or 4 Hours.
Composition-structure-function relationships for musculoskeletal tissues, including bone, tendon, ligament, cartilage, and muscle; hierarchical structure of tissues from the macro- to nano-scales; relation of composition to mechanical properties of health and diseased tissue; experimental methods used to obtain mechanical properties. Same as BIOE 482. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: TAM 251.

ME 483 Mechanobiology  credit: 4 Hours.
Integrative approach to mechanobiology; mechanics of cell adhesion; cytoskeletal structure and mechanics; mechanotransduction; mechanics of cell proliferation, apoptosis, cancer cells, and stem cells; aging; critical issues facing the mechanobiological sciences. 4 undergraduate hours. 4 graduate hours. Prerequisite: CHEM 103 and TAM 251.

ME 485 MEMS Devices & Systems  credit: 3 Hours.
Same as ECE 485. See ECE 485.

ME 487 MEMS-NEMS Theory & Fabrication  credit: 4 Hours.
Physical and chemical theory, design, and hands-on fabrication of micro- and nano-electromechanical systems (MEMS and NEMS); cleanroom fabrication theory, including general cleanroom safety, lithography, additive and subtractive processes, bulk and surface micromachining, deep reactive ion etching (DRIE), lithographic Galvanoformung, packaging, scaling, actuators, and micro-nanofluids; fabrication of two take-home devices, such as piezoresistive sensors and microfluidic logic chips, that demonstrate advanced fabrication processing. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 212.

ME 496 Honors Project  credit: 1 to 4 Hours.
Special project or reading course for James Scholars in engineering. 1 to 4 undergraduate hours. No graduate credit. May be repeated. Prerequisite: Consent of instructor.
ME 497 Independent Study credit: 1 to 4 Hours.
Independent study of advanced problems related to mechanical engineering. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

ME 498 Special Topics credit: 0 to 4 Hours.
Subject offerings of new and developing areas of knowledge in mechanical engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 0 to 4 undergraduate hours. 0 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 hours.

ME 501 Combustion Fundamentals credit: 4 Hours.
Fundamentals of kinetic theory, transport phenomena, chemical equilibrium, and reaction kinetics; flames, their gross properties, structure, and gas dynamics including oscillatory and turbulent burning; solid and liquid propellant combustion; one-dimensional detonation theory including structure and initiation; three-dimensional and other complex detonation waves; supersonic burning. Same as AE 538. Prerequisite: AE 311 or ME 410.

ME 502 Thermal Systems credit: 4 Hours.
Steady-state simulation and optimization of thermal systems, dynamic performance, and probabilities in system design. Prerequisite: ME 402.

ME 503 Design of IC Engines credit: 4 Hours.
Design of internal combustion engines, including gas forces, inertia loads, bearing analysis, torsional vibration, balance, lubrication, valve and cam design, and stress analysis of major engine components. Prerequisite: ME 403.

ME 504 Multiphase Systems & Processes credit: 4 Hours.
Dynamics and thermodynamics of multiphase and multicomponent systems with special relevance to air-pollution control and energy conversion; relaxation phenomena; general motion of systems of disparate elemental masses; diffusion in gravitational and electric fields, and boundary-layer motion with mass transport; dispersion and collection of particulate matter; transport with surface reactions. Prerequisite: ME 404.

ME 510 Advanced Gas Dynamics credit: 4 Hours.
Theoretical gas dynamics; fundamental laws and basic equations for subsonic, transonic, and supersonic steady and unsteady flow processes. Same as AE 510. Prerequisite: ME 410.

ME 520 Heat Conduction credit: 4 Hours.
Fundamentals of heat conduction in isotropic and anisotropic materials; methods of solution to steady and transient heat conduction problems in one, two, and three dimensions; internal heat sources; periodic flow of heat; problems involving phase change; approximate analytical techniques; numerical methods; study of current articles on the subject. Prerequisite: ME 420.

ME 521 Convective Heat Transfer credit: 4 Hours.
Fundamentals of convective heat transfer; calculation of heat transfer within ducts and over submerged objects for laminar and turbulent flow; natural convection; film condensation and boiling; liquid metals. Prerequisite: ME 411.

ME 522 Thermal Radiation credit: 4 Hours.
Fundamentals of radiant-energy transport in absorbing and nonabsorbing media; pyrometry; applications to selected problems involving combined energy-transport mechanisms. Prerequisite: ME 420.

ME 523 Nanoscale Energy Transport credit: 4 Hours.
An advanced treatment of diverse transport phenomena at the nanometer scale involving solids, liquids and gases emphasizing common features in transport by molecules, electrons, phonons, photons, and other quasi-particles of interest, oriented toward applied research in the areas of nanoscale heat transfer and nanoscale energy conversion. Topics include intermolecular forces at surfaces and in the bulk, momentum and species transport in microfluidics, linear response theory, free molecular flow in gases, electron and phonon transport in crystals, Boltzmann equation and its moments, ballistic and diffusive transport, thermoelectric energy conversion, interfacial transport, energy transport in nanostructures and radiative transport in the near-field. Approved for letter and S/U grading.

ME 530 Fatigue Analysis credit: 4 Hours.
Fatigue analysis methods for the design of structures and components: stress-life, strain-life, and crack-propagation approaches; multiaxial and high-temperature fatigue; interrelationship among material properties, geometry, and design methodology appropriate for a wide range of mechanical engineering components. Prerequisite: ME 430.

ME 531 Inelastic Design Methods credit: 4 Hours.
Material deformation under combined mechanical and thermal loading; constitutive equations and their application in engineering design and in inelastic finite element methods; material and structural degradation under fatigue and creep conditions. Prerequisite: ME 471 and ME 430.

ME 532 Fracture Resistant Design credit: 4 Hours.
Application of fracture mechanics and microstructural behavior to materials selection for design; practical approximation of linear and inelastic fracture parameters for evaluation of complex components; destructive and nondestructive tests for control of toughness in manufacture; residual life assessment involving time-dependent fracture (creep, fatigue, stress, corrosion); case studies; design project. Prerequisite: ME 430.

ME 533 Physical Basis for Plasticity credit: 4 Hours.
Physical and mathematical foundation for plasticity in crystalline materials, with application to deformation processes. Metal forming; deformation processes in other materials, such as slip in geological materials and polymers; rate dependence of plastic flow, with underlying physical mechanisms; kinetics of dislocation motion, mechanisms of work hardening, and crystallographic texture; theoretical framework for modeling the constitutive response of rate-dependent materials undergoing crystallographic slip, and allied computational procedures. Prerequisite: TAM 445.

ME 540 Control System Theory & Design credit: 4 Hours.
Same as ECE 515. See ECE 515.

ME 541 Control of Machine Systems credit: 4 Hours.
Modeling machining processes and machine tools. Mechanistic modeling of machining processes, machine-tool errors, characterization of machined surfaces, machine-tool system dynamics and stability, and topics in motion control. 4 graduate hours. No professional credit. Prerequisite: ME 340 and ME 270.

ME 544 Dynamic System Reliability credit: 4 Hours.
Same as ECE 554. See ECE 554.

ME 546 Analysis of Nonlinear Systems credit: 4 Hours.
Same as ECE 528 and SE 520. See ECE 528.
ME 550 Solidification Processing credit: 4 Hours.
Principles of control of structure, properties, and shape in processes involving liquid-solid transformations; stresses, heat flow, mass transport, solute redistribution, and nucleation and growth kinetics; relationship between process variables and structures and properties in the resultant material; examples are drawn from existing commercial and new developing processes. Prerequisite: ME 450.

ME 554 Computational Process Modeling credit: 4 Hours.
Development and application of computer models to solve practical problems involving fluid flow, heat transfer, and deformation phenomena. Advanced topics in computational methods for materials process modeling; case studies. Same as CSE 561. Prerequisite: ME 412 or ME 471; ME 450.

ME 561 Convex Methods in Control credit: 4 Hours.
Use of convex optimization in analysis and control of dynamical systems; robust control methods and the use of semidefinite programming; linear matrix inequalities, operator theory, model reduction, H-2 and H-infinity optimal control, S-procedure and integral quadratic constraints, structured singular value and mu-synthesis, and Markovian jump systems; applications in control design. Prerequisite: ECE 515.

ME 562 Robust Adaptive Control credit: 4 Hours.
Mathematical foundation for synthesis and analysis of adaptive control systems: Lyapunov stability theory; methods of direct and indirect model reference adaptive control; recent methods, such as L1 adaptive control, that enable adaptive control with desired transient and steady-stage performance specifications. Prerequisite: Any of ECE 486, ECE 515, ECE 528, GE 424, ME 460.

ME 570 Nonlinear Solid Mech Design credit: 4 Hours.
Optimality conditions; finite element methods; design sensitivity analysis; nonlinear analysis; transient analysis; thermo-mechanical solid mechanics. Prerequisite: One of AE 420, CEE 470, ME 471, TAM 470; TAM 445, TAM 551.

ME 586 Mechanics of MEMS credit: 4 Hours.
Mechanics and dynamics of microelectromechanical systems (MEMS); scaling laws in electrostatics, magnetics, and fluids; analytical models for thin-film growth and etching; effect of surface tension in small dimensions in relations to stability of MEMS during web fabrication; size effects on mechanical properties of MEMS materials; equations of motion for MEMS, involving coupled elastic and electric fields that give rise to nonlinear dynamical behavior; Mathieu behavior and chaotic systems. Prerequisite: ME 485.

ME 590 Seminar credit: 1 Hour.
Presentation and discussion of significant developments in mechanical engineering. Approved for S/U grading only. May be repeated.

ME 591 Interest Group Seminar credit: 1 Hour.
Seminars on current topics in mechanical science and engineering. May be repeated in the same term if topics vary. May be repeated in separate terms.

ME 597 Independent Study credit: 1 to 4 Hours.
Independent study of advanced problems related to mechanical engineering. May be repeated in the same term or in separate terms if topics vary to a maximum of 12 hours. Prerequisite: Consent of instructor.

ME 598 Special Topics credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in mechanical engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

ME 599 Thesis Research credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Media (MDIA)

MDIA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/MDIA)

Courses

MDIA 100 College of Media Orientation credit: 1 Hour.
College of Media Orientation is designed to build academic and social integrity and to give students the resources they need to be responsible members of the University of Illinois community who earn degrees in a timely manner.

MDIA 199 Special Topics credit: 1 to 3 Hours.
Subject offerings of new and developing areas of knowledge and practice in the fields of media. The course is intended to augment the existing curriculum. See Class Schedule or college course information for topics and prerequisites. Approved for letter and S/U grading. May be repeated in the same term to a maximum of 6 hours if topics vary; may be repeated in separate terms to a maximum of 12 hours if topics vary.

MDIA 223 Watching the Environment credit: 3 Hours.
This course examines how films portray the health environment and the need for environmental protection. The course focuses on series of questions including: To what extent does a film suggest that the world has environmental concerns? What are the constraints that narrative form, production routines, financing and distribution put on representing environmental problems and environmentalists? Is the information in the film to be trusted? In documentaries, are physical and social scientists? How do we evaluate and measure the sale once it is completed. It will consist of guest lectures brought in from the sales industry.
MDIA 290 Undergraduate Open Seminar credit: 1 to 3 Hours.
Experimental course on special topics pertinent to the disciplines studied within the College of Media. Topics will vary. Approved for letter and S/U grading. May be repeated in the same or separate terms to a maximum of 6 hours if topics vary.

MDIA 299 Media Study Abroad credit: 0 to 18 Hours.
Provides credit toward the undergraduate degree for study at accredited foreign institutions or approved overseas programs. Final determination of credit is made upon the student's completion of the work. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 44 hours. Prerequisite: One year of residence at UIUC, good academic standing, and prior approval of the College of Media.

MDIA 320 Media Sales Management credit: 3 Hours.
This course addresses conceptual and methodological issues related to the management of sales within media organizations. Responsibilities, function and skills necessary to be an effective media sales manager are covered, including an evaluation of sales organization structures, recruiting, selecting, testing, and training of media salespeople. Related topics include compensation plans, controlling expenses, sales forecasting/projections, routing, quotas, ethics and motivation. It will consist of class lectures, in-class activities, role playing exercises and also include guest lecture from industry leaders/alumni with experience in media sales management. Prerequisite: MDIA 270 (Introduction to Media Sales).

MDIA 370 Advanced Media Sales credit: 3 Hours.
This course focuses on consultative and persuasive selling and interpersonal relationship building, with an emphasis on specific media vehicles (broadcast, print, digital, out-of-home, non-traditional, etc.). It will discuss how to be a successful media salesperson for each medium (listed above), including major account selling, value-added selling, coordination between salespeople and the firm's other functional areas, team selling, negotiating, communication styles, career development, and personal development. The course will also cover the relationship between advertising agencies, advertising clients and salespeople. It will include mock interviews, written sales proposals, and role-playing exercises that will facilitate application of effective media sales techniques. It will also feature exposure to media sales experts for each medium covered in class. Prerequisite: MDIA 270 (Introduction to Media Sales).

MDIA 380 21st Century Documentaries credit: 3 Hours.
Documentary has exploded in the past decade, with more being created, screened and watched than at any time in history. But what has this growth meant to documentary, and how has it impacted what we see on screen and how documentary stories are being told? We will examine the changes and trends taking place in film and television documentaries over the past decade. We will watch and analyze a variety of contemporary documentaries, examining some of the different stylistic, production, and story-telling methods that have developed over this time. If you enjoy watching documentaries and want to learn more about them, you will find this an enjoyable and thought-provoking course.

MDIA 390 Special Topics in Media credit: 1 to 3 Hours.
Special topics course focusing on cultural, economic, historical, political, and social themes and issues that influence or are influenced by the media. Topics will vary. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated for a maximum of 6 hours if topics vary. Prerequisite: One year of Media courses, Junior or senior standing in the College of Media, or consent of instructor.

MDIA 400 Special Topics credit: 1 to 3 Hours.
Varying topics including the cultural, social, historical, legal, economic, political, and other issues that influence or are influenced by Media. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated in the same or separate terms to a maximum of 6 hours if topics vary. Prerequisite: Previous classes in either AGCM, ADV, JOUR, or MACS.

MDIA 510 History of Libraries credit: 1 to 3 Hours.
Same as IS 510. See IS 512.

MDIA 524 Dev Psycholinguistics credit: 2 or 4 Hours.
Same as LING 524 and PSYC 524. See PSYC 524.

MDIA 525 Psycholinguistics credit: 2 or 4 Hours.
Same as LING 525 and PSYC 525. See PSYC 525.

MDIA 560 Feminist Media Studies credit: 4 Hours.
Addresses major areas of theoretical debate or interest in the broad topic of "Feminist Media Studies" and looks in depth at a number of theoretical issues which define it. Develops an understanding of historical, psychoanalytic, interpretive, and social scientific approaches to the study of film and television texts, their reception, and their production. Readings are extensive and directed toward illustrating the range of theoretical and empirical approaches applied to addressing questions of central interest in the field. Viewings will emphasize some lesser-known historical texts central to theoretical debates in the field. Viewings and readings are focused on "popular" film and television. Same as GWS 560.

MDIA 568 Political Economy of Comm credit: 4 Hours.
Analyzes the structure, policy, and behavior of such media of communication as newspapers, magazines, books, postal service, telegraph, telephone, broadcasting, and film; special emphasis on their relationships to the political order and the economy. Prerequisite: Consent of department.

MDIA 570 Popular Culture credit: 4 Hours.
Examines problems of cultural analysis related to the media of communications and the social implications of communications research.

MDIA 571 Proseminar I credit: 4 Hours.
Addresses the mass media of communications, their role as social institutions, and their control and support. Examines evolution of research on mass media content, audience, and effects. Prerequisite: Consent of department.

MDIA 572 Proseminar II credit: 4 Hours.
Addresses the problems of communications, including the individual as a communicating system, symbolic processes, analysis of messages, psycholinguistics, and language as social behavior. Prerequisite: Consent of department.

MDIA 573 Freedom of Expression credit: 4 Hours.
Examines the development of the Anglo-American press system and the idea of freedom of the press; explores contemporary mass media and their implications for freedom and democracy.

MDIA 575 Cultural Studies and Critical Interpretation credit: 4 Hours.
Same as EPS 575. See EPS 575.
MDIA 577  Philosophy of Technology  credit: 4 Hours.
Introduces students to those thinkers who understand technology philosophically as a central component in modern culture. Examines major perspectives on the nature of technology, rooted in Norbert Weiner, Karl Marx, and Martin Heidegger. Links media technologies, information systems, and global communications background problems and basic issues to technology more generally. Develops instrumentalism, feminist and critical approaches, ethical concerns, and alternative technologies in the context of technology as a cultural activity.

MDIA 578  Communication Ethics  credit: 4 Hours.
This course introduces the latest literature in, or directly relevant to, communication, media and information ethics. It examines current efforts in applied and professional ethics, feminist ethics, and social ethics to develop ethical models that are cross-cultural, gender inclusive and international. The major ethical issues are considered in such areas as global communication, new media technologies, information systems, news, and entertainment.

MDIA 580  Advanced Interpretive Methods  credit: 4 Hours.
Same as SOC 580. See SOC 580.

MDIA 590  Special Topics  credit: 2 to 8 Hours.
May be repeated in the same or in multiple semesters if topics vary.

MDIA 592  Quantitative Methods  credit: 4 Hours.
Introduces the methods of empirical research in the behavioral sciences applicable to research problems in human communication, with emphasis on studies of mass communication. Lectures, readings, and laboratory practice.

MDIA 593  Qualitative Methods  credit: 4 Hours.
Introduces qualitative concepts and strategies in the social sciences and humanities which apply to research problems in mass communications.

MDIA 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated to a maximum of 16 hours.

**Media and Cinema Studies (MACS)**

**Courses**

MACS 100  Intro to Popular TV & Movies  credit: 3 Hours.
The goal of this course is for students to begin to develop a critical understanding of the role of popular movies and television in their own lives and in U.S. culture. The course looks at issues of the relationship of media to social violence, gender identities, sexual identities, adolescents, minority cultures, and the role of the U.S. media globally. It also considers some of the major media genres that characterize U.S. popular television and movies.

This course satisfies the General Education Criteria for:
- Humanities - Lit Arts
- Cultural Studies - Western

MACS 101  Intro to the Media  credit: 3 Hours.
Introduces students to core issues in communication, ranging from the role of language in human history to political questions posed by electronic and digital technologies. Exploring key contemporary problems through timely readings, students learn and write about how the media affect everyday life. Prerequisite: Freshman or sophomore standing.

This course satisfies the General Education Criteria for:
- Advanced Composition

MACS 104  Intro to Film  credit: 3 Hours.
Same as ENGL 104. See ENGL 104.
This course satisfies the General Education Criteria for:
- Humanities - Lit Arts

MACS 117  Shakespeare on Film  credit: 3 Hours.
Same as ENGL 117. See ENGL 117.
This course satisfies the General Education Criteria for:
- Humanities - Lit Arts

MACS 166  Contemporary Media Literacy  credit: 3 Hours.
Develops critical media production skills to assess the importance of new media in contemporary culture. The course emphasizes both social and technical aspects of media. As part of the course, students prepare their own media and evaluate current media literacy projects.

This course satisfies the General Education Criteria for:
- Social Beh Sci - Soc Sci

MACS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated to a maximum of 12 hours in separate semesters if topics vary.

MACS 202  Social Aspects Info Tech  credit: 3 Hours.
Same as INFO 202 and IS 202. See INFO 202.
This course satisfies the General Education Criteria for:
- Social Beh Sci - Soc Sci

MACS 203  Contemporary Movies  credit: 3 Hours.
Provides a critical context for recent international cinema by exploring several kinds of genres, aesthetics, and technologies. We will discuss transnational trends in cinema relating to the influence of other media such as gaming, social networking, and personal electronics, as well as consider impacts of economic structures of global filmmaking production and exhibition. We will view popular and art movies, and query longstanding categories such as the teen pic, "woman's" film, and documentary.

MACS 205  Introduction to Documentary  credit: 3 Hours.
This course introduces students to one of the fastest growing areas in media today: the documentary. It's designed for students who want to expand their knowledge and appreciation of documentaries in all their forms. Using weekly in-class screenings, discussion, readings, ad writing, students will examine a wide variety of documentaries, looking at their styles, purposes, and storytelling "voices", as well as learning the language and other fundamentals of documentary. We will also cover some of the basic methods involved in planning and creating a documentary. Please note: this is NOT a hands-on production course. Prerequisite: Sophomore standing or above required.

MACS 207  Indian Cinema in Context  credit: 3 Hours.
Same as CWL 207. See CWL 207.
This course satisfies the General Education Criteria for:
- Humanities - Lit Arts
- Cultural Studies - Non-West

MACS 211  Intro to African-American Film  credit: 3 Hours.
Examination of the history, theory, and aesthetics of African-American filmmaking from the silent era to the present. Films are analyzed within their sociocultural contexts, with particular attention to how constructions of race, identity, and community interact with class, gender, and sexuality; and the link between film and other forms of Black expressive culture. The impact of African-American film on popular culture, links to the African Diaspora, and relations with other communities of color will also be discussed. Same as AFRO 211.
This course satisfies the General Education Criteria for:
- Cultural Studies - US Minority
MACS 224  Sportsmedia Technology & Culture  credit: 3 Hours.
This course is designed for students who are curious about (a) how new technologies are changing sportsmedia cultures, and (b) the kinds of knowledges and skills needed to effectively engage with this powerful cultural and economic industry. We'll use four primary focal points (ESPN, Sport Fandom, Action-Sports, Data Production / Smart Stadiums) to help us understand today's sportsmedia cultural industry's challenges and possibilities, and the kinds of challenges and possibilities that the sportsmedia cultural industry creates for society. We'll also use our course focal points and related industry websites to concretize the key concepts (drawn from theoretical readings and applied studies in media studies, sociology, sport studies, and technology studies).

MACS 227  Studies in Black Television  credit: 3 Hours.
Same as AFRO 227. See AFRO 227.

MACS 250  Latina/os on the Bronze Screen  credit: 3 Hours.
Same as LLS 250. See LLS 250.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

MACS 261  Survey of World Cinema I  credit: 3 Hours.
Survey of the development of equipment, techniques, and themes of the cinema from its origins through the coming of sound; lectures, discussions, and showings of selected films.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

MACS 262  Survey of World Cinema II  credit: 3 Hours.
Survey of the development of equipment, techniques, and themes of the cinema from the coming of sound to the present; lectures, discussions, and showings of selected films.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

MACS 264  Creative and Information Economies  credit: 4 Hours.
An introduction to the political economy of the media in the U.S. The purpose of the class is to acquaint students with a core understanding of how the media system operates, and with what effects, in a capitalist society. The course examines the role of advertising, public relations, corporate concentration, and government regulation upon journalism, entertainment, culture, and participatory democracy. The class also examines issues such as the Internet, globalization, and public broadcasting.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

MACS 273  American Cinema Since 1950  credit: 3 Hours.
Same as ENGL 273. See ENGL 273.

MACS 275  Am Indian and Indigenous Film  credit: 3 Hours.
Same as AIS 275 and ENGL 275. See AIS 275.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

MACS 295  Intro Media/Cinema Topics  credit: 3 Hours.
Introduction to the study of special topics in media and cinema studies, including cultural, social, historical, economic, and/or political issues in media and/or cinema. Topics vary but may include: genres, stars, historical movements, thematic studies, television, convergence culture, new media. May be repeated in the same or separate terms to a maximum of 6 hours if topics vary.

MACS 300  Topics in Film and History  credit: 3 Hours.
Same as HIST 300. See HIST 300.

MACS 317  Media History  credit: 3 Hours.
Presents the nature and development of communication systems; history of communication media; history of journalism, advertising, and broadcasting; and communications in the modern world.

MACS 320  Popular Culture  credit: 3 Hours.
Examines the critical literature on mass media entertainment; reviews significant contemporary issues and develops perspectives for understanding popular culture.

MACS 321  Film Culture  credit: 3 Hours.
Introduces students to key issues of, major theoretical approaches to, and current debates about the cultural function of films. Course addresses theories of spectatorship, the politics of pleasure, the culture of entertainment, and the cinematic construction of race, class, and gender.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

MACS 322  Politics and the Media  credit: 3 Hours.
Same as CMN 325 and PS 312. See PS 312.

MACS 323  Studies Film/Media Production  credit: 1 to 3 Hours.
Provides analytical framework for pursuing film/media production. Emphasizes critical analysis of various aspects of production: e.g., scriptwriting, storyboarding, cinematography, editing, set and costume design, location and studio shooting, sound. Covers theories of representation, narrative, meaning-making, experimentation, and audience in relation to film/media production practices. Does not, however, teach students how to do film and media production (e.g., how to work a camera, etc.). Therefore, students must come to the course with experience in film and/or media production (can be self-taught). Both individual and group projects are encouraged. Students should expect to work as crew for other students in class. Culminates in a public screening at which students present an analysis of their own project—both the process and the finished product. To apply for course, students (individually or in groups) must propose an idea or concept for a film/media project they would like to produce during the class. May be repeated in separate terms to a maximum of 6 hours. May be repeated by students who wish to pursue a longer project in two consecutive semesters (may include summer). Students may not repeat the course to pursue separate projects. Prerequisite: Consent of instructor.

MACS 326  New Media, Culture & Society  credit: 3 Hours.
Digital media is an immensely pervasive and powerful form of communication that despite its rapid growth has yet to reach most of the world's population. This lecture-based survey course for undergraduates traces the history and formation of personal computing and the Internet, the development of virtual communities and virtual worlds, evolving forms of digital representation and communication, digital visual cultures, features of new media industries, and the rise of participatory media. Evaluation and assessment is based on written exams, quizzes, class discussion in section, and practice-based assignments using new media technologies such as wikis, blogs, games, and digital video. Emphasis is on mastering key concepts of digital media through theory and history, and on critical discussion of distinctive features of digital media objects. Lectures and discussion sections are held in computer-equipped classrooms. Same as INFO 326.

MACS 331  Media and Democracy  credit: 3 Hours.
Studies the philosophical bases of the functions and the responsibilities of mass communications.
MACS 335  Film, TV, and Gender  credit: 3 Hours.
Same as GWS 335. See GWS 335.

MACS 345  Digital & Gender Cultures  credit: 3 Hours.
Same as GWS 345, INF0 345, and SOC 345. See GWS 345.

MACS 346  Case Study: Endless Summer  credit: 3 Hours.
Same as KIN 346 and RST 346. See KIN 346.

MACS 351  Social Aspects of Media  credit: 3 Hours.
Examines the role of media, the history and scholarly criticisms of the media, and their impact on society as well as on mass-produced communications. Same as SOC 351.

MACS 352  Attitude Theory and Change  credit: 3 Hours.
Same as PSYC 352 and SOC 300. See PSYC 352.

MACS 356  Sex & Gender in Popular Media  credit: 3 Hours.
Examines the gendered perspective in the media, focusing on the role of women and feminist attempts to create alternatives in mainstream media. Same as GWS 356.

MACS 359  Individual Study  credit: 0 to 3 Hours.
Individual research and exploration of media and cinema studies topics under the guidance of a faculty advisor. May be repeated in the same or in multiple semesters, if topics vary. Prerequisite: Consent of instructor.

MACS 361  Film Theory and Criticism  credit: 3 Hours.
Study of major aesthetic and critical theories about film; study of theory and practice of film criticism.

MACS 364  Topics in Media Business  credit: 3 Hours.
Addresses the business, industry, and economic implications of the interaction of Internet, television, radio, film, and print outlets through digitization-driven platform and interactive technologies. Explores historical and emergent business models, ownership and work patterns, and investment arrangement related to media convergence. Investigates novel forms of individual and collective labor structures and globally distributed modes of production and consumption. Includes attention to economic and scholarly models seeking to analyze media business structures. Specific topics vary by semester, but may include Google, Disney, and Hollywood studios, or activist media organizations. May be repeated for a maximum of 6 hours if topics vary.

MACS 365  Asian American Media and Film  credit: 3 Hours.
Same as AAS 365. See AAS 365.

MACS 373  Special Topics in Film Studies  credit: 3 Hours.
Same as ENGL 373. See ENGL 373.

MACS 374  Case Study: Endless Summer  credit: 3 Hours.
Same as KIN 346 and RST 346. See KIN 346.

MACS 381  Black Women and Film  credit: 3 Hours.
Same as AFRO 381. See AFRO 381.

MACS 382  French & Comparative Cinema I  credit: 3 Hours.
Same as CWL 387, FR 387, and HUM 387. See FR 387.

MACS 383  French & Comparative Cinema II  credit: 3 Hours.
Same as CWL 389, FR 389, and HUM 389. See FR 389.

MACS 389  International Communications  credit: 3 Hours.
Provides an interdisciplinary approach to international communications; its structure and content; the role of international communications in conflict and conflict resolution; the semantics of international communication; the technical and economic aspects of international mass communications; and government-industry relations in communications. Same as PS 389.

MACS 395  Special Media/Cinema Topics  credit: 3 Hours.
Cultural, social, historical, economic, and/or political issues in media and/or cinema; topics vary but may include: genres, historical movements, thematic studies, television, convergence culture, new media. May be repeated to a maximum of 6 hours if topics vary.

MACS 408  TV Studies  credit: 3 or 4 Hours.
Examines factors reshaping TV and its relationship to culture, including genres, industry practices (advertising, production, distribution), new media technologies (YouTube, Twitter, and newer developments), and computer gaming. Analyzes places/spaces of television, mobility, surveillance, television as instruction/guide (dating, cooking, fashion), citizenship, consumption, and TV in everyday life. Focuses on contemporary aspects of TV, with some attention to earlier forms and practices of television. Students required to view and analyze some television programs outside of class. 3 undergraduate hours. 4 graduate hours.

MACS 410  Media Ethics  credit: 3 or 4 Hours.
Surveys the major ethical problems in news, advertising, publications and entertainment media; includes case studies and moral reasoning on confidentiality, privacy, conflicts of interest, deception, violence, and pornography. 3 undergraduate hours. 4 graduate hours.

MACS 419  Russian & East European Film  credit: 3 or 4 Hours.
Same as SLAV 419. See SLAV 419.

MACS 423  Language Acquisition  credit: 3 or 4 Hours.
Same as LING 423 and PSYC 423. See PSYC 423.

MACS 425  Intro to Psycholinguistics  credit: 3 or 4 Hours.
Same as LING 425. See LING 425.

MACS 432  Commodifying Difference  credit: 3 or 4 Hours.
Same as AAS 435, AFRO 435, GWS 435, and LLS 435. See LLS 435.

MACS 461  Politics of Popular Culture  credit: 3 or 4 Hours.
Same as AIS 461. See AIS 461.
MACS 464 Film Festivals credit: 3 or 4 Hours.
Examines the history and significance of film festivals: What they mean for the film industry (marketing, distribution, production), audiences (both at the festival and beyond), film history, and the evolution of filmmaking. Covers specific local, national, and international festivals including festivals focused on particular issues (e.g., Chicago International Children's Film Festival, San Francisco International Asian American Film Festival, Miami Gay and Lesbian Film Festival, and our own local IUB 48-Hour Film Contest). Coordinated with Roger Ebert's Film Festival (which is held in Champaign every April) including internship/volunteer opportunities, screenings, and meetings with guests. Class culminates with a UIUC student film festival, organized, judged, and sponsored by the class. 3 undergraduate hours. 4 graduate hours.

MACS 466 Japanese Cinema credit: 3 or 4 Hours.
Examines the influence of Japan's traditional aesthetics on its cinema and surveys its major film movements, genres, and directors. Same as EALC 466. 4 undergraduate hours. 4 graduate hours. Prerequisite: One course in the College of Media or East Asian Languages and Cultures, or consent of instructor.

MACS 470 Topics in Italian Cinema credit: 3 or 4 Hours.
Same as ITAL 470. See ITAL 470.

MACS 490 Green Screen: Film and Nature credit: 3 or 4 Hours.
Same as EURO 489 and SCAN 490. See SCAN 490.

MACS 492 Scandinavian Cinema credit: 3 or 4 Hours.
Same as SCAN 492. See SCAN 492.

MACS 493 German Cinema I credit: 3 Hours.
Same as GER 493. See GER 493.

MACS 494 German Cinema II credit: 3 Hours.
Same as GER 494. See GER 494.

MACS 495 Internship Seminar credit: 0 to 1 Hours.
Seminar based on internship experience. Offered for College of Media students who complete an approved internship. 0 to 1 undergraduate hours. No graduate credit. Approved for S/U grading only. May be repeated in the same term to a maximum of 2 undergraduate hours. May be repeated in separate terms to a maximum of 3 undergraduate hours. Prerequisite: Consent of instructor.

MACS 496 Advanced Media/Cinema Topics credit: 3 or 4 Hours.
Advanced study of cultural, social, historical, economic, and/or political issues in media and/or cinema; topics vary but may include national and transnational cinemas, directors, genres, historical movements, social and political movements, thematic studies, television, convergence culture, new media. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or separate terms to a maximum of 6 undergraduate hours or 8 graduate hours as topics vary. Prerequisite: One College of Media course or consent of instructor.

MACS 498 Senior Seminar credit: 3 Hours.
Seminar and tutorial in selected Media and Cinema Studies topics. 3 undergraduate hours. No graduate credit. May be repeated in the same or subsequent semesters to a maximum of 6 hours. Prerequisite: Senior standing, a declared Media and Cinema Studies major, or consent of instructor.

MACS 499 Senior Thesis credit: 3 Hours.
Individual research for majors in Media and Cinema Studies leading to the completion of a thesis. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing, a declared Media and Cinema Studies Major, and consent of advisor.

MACS 503 Historiography of Cinema credit: 4 Hours.
Seminar on historical perspectives on cinema as an institution, a body of signifying practices, a product to be consumed, a phenomenon of modernity, and a cultural artifact, and on cinema in relation to other screen media. Same as CWL 503 and ENGL 503.

MACS 504 Theories of Cinema credit: 4 Hours.
Seminar on influential theories and accompanying debates about the textual/extra-textual mechanisms and cultural/political impact of cinema and related screen media. Same as CWL 504 and ENGL 504.

MSP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/MSP)

Courses

MSP 600 MSP: Pre-M1 Completion credit: 0 to 20 Hours.

MSP 601 MSP: Post-M1 Completion credit: 0 to 20 Hours.

MSP 620 Nursing Holding Sections credit: 0 Hours.

Medieval Studies (MDVL)

MDVL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/MDVL)

Courses

MDVL 111 Ancient to Medieval Art credit: 4 Hours.
Same as ARTH 111. See ARTH 111. This course satisfies the General Education Criteria for: Humanities - Lit Arts

MDVL 122 Swords, Sorcery & Sex: The Middle Ages in Popular Culture credit: 3 Hours.
Same as ENGL 122. See ENGL 122. This course satisfies the General Education Criteria for: Humanities - Lit Arts

MDVL 201 Medieval Lit and Culture credit: 3 Hours.
Same as CWL 253 and ENGL 202. See ENGL 202. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

MDVL 216 Legends of King Arthur credit: 3 Hours.
Same as CWL 216 and ENGL 216. See ENGL 216. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

MDVL 222 Medieval Art credit: 3 Hours.
Same as ARTH 222. See ARTH 222.

MDVL 231 Northern Renaissance Art credit: 3 Hours.
Same as ARTH 231. See ARTH 231.

MDVL 240 Italy Middle Ages & Renaissance credit: 3 Hours.
Same as CWL 240 and ITAL 240. See ITAL 240. This course satisfies the General Education Criteria for: Humanities - Lit Arts

MDVL 245 Women & Gender Pre-Mod Europe credit: 3 Hours.
Same as GWS 245 and HIST 245. See HIST 245. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Western

Information listed in this catalog is current as of 04/2018
MDVL 247 Medieval Europe  
credit: 3 Hours.
Same as HIST 247. See HIST 247.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

MDVL 251 Viking Mythology  
credit: 3 Hours.
Same as CWL 251, REL 251, and SCAN 251. See SCAN 251.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

MDVL 252 Viking Sagas in Translation  
credit: 3 Hours.
Same as CWL 252 and SCAN 252. See SCAN 252.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

MDVL 255 British Isles to 1688  
credit: 3 Hours.
Same as HIST 255. See HIST 255.

MDVL 257 Medieval Jewish Thought  
credit: 3 Hours.
Same as REL 344. See REL 344.

MDVL 344 Medieval Jewish Thought  
credit: 3 Hours.
Same as REL 344. See REL 344.

MDVL 345 Medieval Civilization  
credit: 3 Hours.
Same as HIST 345 and REL 345. See HIST 345.

MDVL 346 The Age of the Renaissance  
credit: 3 Hours.
Same as HIST 346 and REL 346. See HIST 346.

MDVL 403 European Education to 1600  
credit: 2 to 4 Hours.
Same as EPS 403 and HIST 440. See EPS 403.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

MDVL 407 Introduction to Old English  
credit: 3 or 4 Hours.
Same as ENGL 407. See ENGL 407.

MDVL 410 Topics in Medieval Brit Lit  
credit: 3 or 4 Hours.
Same as CWL 417 and ENGL 412. See ENGL 412.

MDVL 411 Chaucer  
credit: 3 or 4 Hours.
Same as ENGL 411. See ENGL 411.

MDVL 412 Medieval Architecture  
credit: 3 Hours.
Same as ARCH 412. See ARCH 412.

MDVL 413 Dante  
credit: 3 or 4 Hours.
Same as CWL 413 and ITAL 413. See ITAL 413.

MDVL 414 Petrarch & Boccaccio  
credit: 3 or 4 Hours.
Same as CWL 414 and ITAL 414. See ITAL 414.

MDVL 415 Classical Rhetorics  
credit: 3 or 4 Hours.
Same as CLCV 415 and CMN 415. See CMN 415.

MDVL 417 History of the French Language  
credit: 3 or 4 Hours.
Same as FR 417. See FR 417.

MDVL 420 Masterpieces Renaiss Lit  
credit: 3 or 4 Hours.
Same as CWL 420 and ITAL 420. See ITAL 420.

MDVL 423 Romanesque Art  
credit: 3 or 4 Hours.
Same as ARTH 423. See ARTH 423.

MDVL 424 Gothic Art  
credit: 3 or 4 Hours.
Same as ARTH 424. See ARTH 424.

MDVL 431 Topics: Northern Art 1300-1500  
credit: 3 or 4 Hours.
Same as ARTH 431. See ARTH 431.

MDVL 433 Fifteenth-Century Italian Art  
credit: 3 or 4 Hours.
Same as ARTH 433. See ARTH 433.

MDVL 440 Early Christian Thought  
credit: 3 or 4 Hours.
Same as REL 440. See REL 440.

MDVL 443 Byzantine Empire AD 284-717  
credit: 3 or 4 Hours.
Same as HIST 443. See HIST 443.

MDVL 444 Medieval England  
credit: 2 to 4 Hours.
Same as HIST 445. See HIST 445.

MDVL 460 Medieval Latin  
credit: 3 or 4 Hours.
Same as LAT 460. See LAT 460.

MDVL 470 Middle Ages to Baroque  
credit: 3 Hours.
Same as GER 470. See GER 470.

MDVL 500 Seminar in Medieval Studies  
credit: 4 Hours.
Team-taught, interdisciplinary seminar on varying topics in Medieval Studies drawing on faculty from UIUC and invited scholars from other universities. Approved for letter and S/U grading. May be repeated to a maximum of 12 hours.

MDVL 501 Topics in Medieval Studies  
credit: 3 or 4 Hours.
Experimental and Temporary Courses. May be repeated in separate terms as topics vary.

MDVL 504 Genesis in History  
credit: 4 Hours.
Same as REL 504. See REL 504.

MDVL 505 Old Norse-Icelandic I  
credit: 4 Hours.
Same as SCAN 505. See SCAN 505.

MDVL 506 Old Norse-Icelandic II  
credit: 4 Hours.
Same as SCAN 506. See SCAN 506.

MDVL 508 Beowulf  
credit: 4 Hours.
Same as ENGL 508. See ENGL 508.

MDVL 511 Chaucer  
credit: 4 Hours.
Same as ENGL 511. See ENGL 511.

MDVL 512 Seminar in Medieval Arch  
credit: 3 Hours.
Same as ARCH 512. See ARCH 512.

MDVL 514 Seminar in Medieval Literature  
credit: 4 Hours.
Same as ENGL 514. See ENGL 514.

MDVL 515 Middle High German  
credit: 4 Hours.
Same as GER 515. See GER 515.

MDVL 522 Studies in Medieval Art  
credit: 4 Hours.
Same as ARTH 522. See ARTH 522.

MDVL 530 Old High German  
credit: 4 Hours.
Same as GER 530. See GER 530.

MDVL 540 Seminar in N. Renaissance Art  
credit: 4 Hours.
Same as ARCH 531. See ARCH 531.

MDVL 542 Problems in Medieval History  
credit: 4 Hours.
Same as HIST 542. See HIST 542.

MDVL 543 Seminar in Medieval History  
credit: 4 Hours.
Same as HIST 543. See HIST 543.

MDVL 570 Seminar Old French Literature  
credit: 4 Hours.
Same as FR 570. See FR 570.

MDVL 571 Medieval German Studies  
credit: 4 Hours.
Same as GER 571. See GER 571.
## Microbiology (MICR)

MICR Class Schedule ([https://courses.illinois.edu/schedule/DEFAULT/MICR](https://courses.illinois.edu/schedule/DEFAULT/MICR))

### Courses

<table>

## Military Science (MILS)

MILS Class Schedule ([https://courses.illinois.edu/schedule/DEFAULT/MILS](https://courses.illinois.edu/schedule/DEFAULT/MILS))

### Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>MILS 101</td>
<td>Introduction to Leadership</td>
<td>2</td>
<td>This course introduces you to the personal challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as goal setting, time management, physical fitness, and stress management relate to leadership, officercy, and the Army profession. The focus is on developing basic knowledge and comprehension of Army leadership dimensions, attributes and core leader competencies while gaining a big picture understanding of the ROTC program, its purpose in the Army, and its advantages for the student.</td>
</tr>
<tr>
<td>MILS 102</td>
<td>Introduction to the Profession of Arms</td>
<td>2</td>
<td>This course introduces you to the professional challenges and competencies that are needed for effective execution of the profession of arms and Army communication. Through this course, you will learn how Army ethics and values shape the U.S. Army and the specific ways that these factors are inculcated into Army culture. You will gain a better understanding of the Laws of the Land Warfare and the Principles of War and how they affect and Army Leader’s decision making process. You will understand the fundamentals of military and USGS map reading including methods such as intersection and resection, terrain association, and orienteering.</td>
</tr>
<tr>
<td>MILS 112</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Introductory practical application of military skills and leadership; includes basic military mountaineering and rappelling, first aid, individual marching and weapons familiarization. Field trip may be required. Approved for S/U grading only. May be repeated.</td>
</tr>
<tr>
<td>MILS 114</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Continuation of MILS 112 to include actual firing of weapons. Field trip may be required. Approved for S/U grading only. May be repeated.</td>
</tr>
<tr>
<td>MILS 120</td>
<td>Intro to US Armed Forces</td>
<td>3</td>
<td>Surveys the four major branches of the United States military (Army, Navy, Marines, and Air Force) and their historical development into ? Professions of Arms.? Topics include historical surveys of each branch highlighting key historical developments, organization, structure and customs. Other topics include a discussion of the United States National Command Authority. United States joint military operations and structure, the relationship of the United States Military with its civilian constituency and a survey of emerging Department of Defense issues. Same as AFAS 120 and NS 120. This course satisfies the General Education Criteria for: Humanities - Hist Phil</td>
</tr>
<tr>
<td>MILS 201</td>
<td>Individual Leadership Studies</td>
<td>2</td>
<td>Establishes a foundation in military land navigation and offensive tactics; Explores the dimensions of creative leadership strategies and styles by examining team dynamics and leadership theories; also explores military mountaineering. Prerequisite: Class is only available to students who have less than 60 credit hours.</td>
</tr>
<tr>
<td>MILS 202</td>
<td>Leadership and Teamwork</td>
<td>2</td>
<td>Fundamentals of rifle marksmanship. Systematic study of the maintenance, operation, and employment of the U.S. Army’s primary individual weapon system, the M16 rifle. Also includes instruction on weapons safety, military marksmanship techniques and tactics, an introduction to risk assessment and management, and an integration of a live-fire M16 range. Includes field trips. Prerequisite: Only available to students who have less than 60 credit hours.</td>
</tr>
<tr>
<td>MILS 212</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Intermediate level practical application of military skills and leadership; includes mountaineering and rappelling, first aid, small unit marching, weapons firing, and physical fitness. Field trip required. Approved for S/U grading only. May be repeated.</td>
</tr>
<tr>
<td>MILS 214</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Continuation of MILS 212 to include military radio communication procedures and small unit tactics. Field trip required. Approved for S/U grading only. May be repeated.</td>
</tr>
<tr>
<td>MILS 301</td>
<td>Leadership and Problem Solving</td>
<td>3</td>
<td>Fundamentals of small unit military operations including operations planning, military orders, troop leading procedures, small unit offensive and defensive operations. Includes field practical application. Prerequisite: Successful completion of MILS 101, MILS 102, MILS 201 and MILS 202 is required to enroll in MILS 301.</td>
</tr>
<tr>
<td>MILS 302</td>
<td>Leadership and Ethics</td>
<td>3</td>
<td>Principles of leadership including management practices and their relationship to leadership, problem solving, decision making, human behavior and motivation, superior-subordinate relations, and leadership problems in the military environment. Includes field practical application. Prerequisite: Successful completion of MILS 301 is required to enroll in MILS 302.</td>
</tr>
<tr>
<td>MILS 312</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Advanced level practical application of military skills and leadership with emphasis on the student’s ability to direct and supervise others; includes advanced land navigation, advanced first aid, platoon and company drill and ceremonies, and advanced communications procedures. Field trip required. Approved for S/U grading only. May be repeated.</td>
</tr>
<tr>
<td>MILS 314</td>
<td>Leadership Laboratory</td>
<td>0</td>
<td>Continuation of MILS 312 to include small unit tactics and patrolling techniques. Field trip required. Approved for S/U grading only. May be repeated.</td>
</tr>
</tbody>
</table>
MILS 322 Leadership Laboratory credit: 0 Hours.
Unique opportunity for advanced course students to fully plan, execute, and supervise the military training and activities of other military science students. Emphasis is on leadership, organizing and managing activities, decision making, and effective instructional techniques. Field trip required. Approved for S/U grading only. May be repeated.

MILS 324 Leadership Laboratory credit: 0 Hours.
Continuation of MILS 322. Field trip required. Approved for S/U grading only. May be repeated.

MILS 325 Independent Study credit: 1 or 2 Hours.
Supervised reading and research in a selected area of Military Science. May be repeated to a maximum of 6 hours.

MILS 341 Leadership and Management credit: 3 Hours.
Fundamentals of military law including Law of Land Welfare, the application of federal law to the military, and the military justice system. Examines ethics, values, and professional standards through case studies. Includes introductory instruction on training management. Prerequisite: Successful completion of MILS 301 and MILS 302 is required to enroll in MILS 341.

MILS 342 Officership credit: 3 Hours.
Basic examination of all military management systems: personnel, supply, logistics, training, maintenance, finance, and administration. Includes instruction on military administrative skills - written and verbal communications, meeting management, and briefing techniques. Discusses motivation and counseling techniques. Basic instruction on Army environmental protection policies. Prerequisite: Successful completion of MILS 341 required to enroll in MILS 342.

Modern Greek (GRKM)

GRKM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GRKM)

Courses

GRKM 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated in separate terms.

GRKM 201 Elementary Modern Greek I credit: 5 Hours.
Develops elementary proficiency in spoken and written Modern Greek, and introduces elements of cultural knowledge. Familiarizes beginning students with the Greek alphabet and modern Greek pronunciation rules, and introduces Modern Greek morphology and syntax. Emphasizes listening comprehension, reading skills, and basic conversational skills. Online language laboratory and internet assignments required. Same as GRK 251.

GRKM 202 Elementary Modern Greek II credit: 5 Hours.
Develops elementary proficiency in spoken and written Modern Greek, including familiarity with elements of cultural knowledge and Modern Greek morphology and syntax. Emphasizes listening comprehension, reading skills, writing and conversational abilities. Online language laboratory and internet assignments required. Same as GRK 252. Prerequisite: GRKM 201.

GRKM 403 Intermediate Modern Greek I credit: 4 Hours.
Advances students’ knowledge of Modern Greek grammar and vocabulary and enables them to converse in Modern Greek by exposing them to different uses of Modern Greek in day-to-day communication, and to expand their knowledge of Modern Greek culture. Online language laboratory and internet assignments required. Same as GRK 403. 4 undergraduate hours. 4 graduate hours. Prerequisite: GRKM 202 or consent of the instructor.

GRKM 404 Intermediate Modern Greek II credit: 4 Hours.
Consolidates students’ knowledge of Modern Greek grammar and vocabulary and enables them to converse in Modern Greek by exposing them to different uses of Modern Greek in day-to-day communication. Also offers an introduction to aspects of Modern Greek literature. In addition to listening comprehension and reading skills, the course emphasizes writing and conversational abilities. Online language laboratory and internet assignments required. Same as GRK 404. 4 undergraduate hours. 4 graduate hours. Prerequisite: GRKM 403 or consent of instructor.

GRKM 453 Advanced Modern Greek I credit: 3 Hours.
Practice to enable students to attain conversational fluency and to become independent users of the language who deal effectively and with a good deal of accuracy with familiar communication situations. 3 undergraduate hours. 3 graduate hours. Prerequisite: GRKM 404 or consent of instructor.

GRKM 454 Advanced Modern Greek II credit: 4 Hours.
Continued practice to enable students to improve their fluency and use Modern Greek effectively in a variety of contexts. 4 undergraduate hours. 4 graduate hours. Offered Spring terms only. Prerequisite: GRKM 453 or consent of instructor.

Molecular and Cell Biology (MCB)

MCB Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/DEFAULT/MCB)

Courses

MCB 100 Introductory Microbiology credit: 3 Hours.
Introduction to the principal activities and properties of microorganisms, including bacteria, yeasts, molds, and viruses; consideration of the role of natural processes, such as photosynthesis; and man’s use and control of microorganisms in the production of antibodies and vaccines in industrial fermentations, in sanitation and public health, and in agriculture. Credit is not given for both MCB 100 and MCB 300. Prerequisite: There are no prerequisites for MCB 100, but some chemistry is recommended. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

MCB 101 Intro Microbiology Laboratory credit: 2 Hours.
Laboratory introduction to the techniques employed in the investigation of microbial activities and properties; experiments designed to familiarize the student with the handling, identification, and characterization of microorganisms and their activities, particularly those of interest to man. Credit is not given for both MCB 101 and MCB 301. Prerequisite: Credit or concurrent registration in MCB 100.

MCB 150 Molec & Cellular Basis of Life credit: 4 Hours.
Introductory course focusing on the basic structure, metabolic, and molecular processes (including membranes, energy metabolism, genes) common to all cells. Emphasis on unique properties that differentiate the major sub-groups of organisms (Archaea, Bacteria, plants, and animals), and will discuss how cells are integrated into tissues and organs in multicellular organisms.

This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences
MCB 151 Molec & Cellular Laboratory credit: 1 Hour.
Introductory laboratory course focusing on basic techniques in molecular and cellular biology. Credit is not given for MCB 151 for students majoring in Molecular and Cellular Biology, or Integrative Biology; Credit is not given for both MCB 151 and MCB 251. Prerequisite: Concurrent enrollment in MCB 150.

MCB 170 Society and the Brain credit: 3 Hours.
Presents recent findings concerning the brain-society interaction. The facts will span many levels, from molecular and cellular interactions, to the functions of specific brain regions, and on to the behaviors of individuals, groups and societies. Intended to bring a broad range of neurobiological data and ideas into an interesting and relevant context. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

MCB 180 Human Reproduction & Society credit: 3 Hours.
Lectures and discussions on topics in human reproduction where technological and clinical advances are having economic, social, and ethical consequences. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

MCB 198 Internship credit: 0 Hours.
Full-time or part-time internship at another University or an off-campus medical facility, research institute or other approved institution. Approved for S/U grading only. May be repeated. Prerequisite: For MCB and Biochemistry majors only.

MCB 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated to a maximum of 10 hours.

MCB 215 Foundation in Mol & Cell Bio credit: 3 Hours.
Online course that will provide transfer students with the essential bases in Molecular and Cellular Biology needed to succeed in the MCB core curriculum, when entering it at the sophomore level. Students will be exposed to the major concepts and the experimental aspects of MCB and be presented with an integrated view of a cell and its inner workings. In addition, a strong peer mentoring program will help students transitioning from their previous institutions by introducing them to the complex setting of a large undergraduate campus. Prerequisite: Successful completion of two semesters of college biology. Credit or concurrent enrollment in CHEM 101, CHEM 102, or equivalent, or consent of instructor.

MCB 244 Human Anatomy & Physiology I credit: 3 Hours.
Organ system biology with an emphasis on normal human anatomy and physiology, physiological processes and associated disease processes of the following systems: skeletal, muscle, nervous, sensory, and endocrine. Prerequisite: Credit or concurrent enrollment in CHEM 101, CHEM 102, or equivalent; or consent of instructor.

MCB 245 Human Anat & Physiol Lab I credit: 2 Hours.
Laboratory exploration of normal human anatomy and physiology and relevant disease processes for the following systems: tissue, skeletal, nervous, muscular, sensory, and endocrine. Previously dissected human cadavers are an important part of the learning experience in this course, but students will not dissect human cadavers. Neither animal dissection or animal use are elements of this course. Prerequisite: Credit or concurrent enrollment in CHEM 101, CHEM 102, or equivalent; or consent of instructor.

MCB 246 Human Anatomy & Physiology II credit: 3 Hours.
Organ system biology with an emphasis on normal human anatomy and physiology, physiological processes and associated disease processes of the following systems: digestion, cardiovascular, respiratory, renal, and reproductive. Prerequisite: MCB 244 and credit or concurrent enrollment in CHEM 101, CHEM 102, or equivalent or consent of instructor.

MCB 247 Human Anat & Physiol Lab II credit: 2 Hours.
Laboratory exploration of normal human anatomy and physiology and relevant disease processes for the following systems: digestive, cardiovascular, respiratory, renal, and reproductive. Previously dissected human cadavers are an important part of the learning experience in this course, but students will not dissect human cadavers. Neither animal dissection or animal use are elements of this course. Prerequisite: MCB 245 and credit or concurrent enrollment in CHEM 101, CHEM 102, or equivalent; or consent of instructor.

MCB 250 Molecular Genetics credit: 3 Hours.
Fundamentals of molecular biology including structure of DNA, RNA and proteins, mechanisms of DNA replication, transcription and translation, gene organization, genetic variation and repair, and regulation of gene expression in Bacteria and Eukarya. Students who enter the University Fall 2011 or later are responsible for additional course-based tuition of $300 unless they are already paying differential tuition during the term of course enrollment. Additional fees may apply. See Class Schedule. Prerequisite: MCB 150, CHEM 102 and CHEM 104, or equivalents or consent of instructor.

MCB 251 Exp Techniqs in Molecular Biol credit: 2 Hours.
Laboratory course emphasizing a range of molecular biology questions, and the experimental approaches and methodologies needed to answer these questions. Lectures will accompany labs to explain theoretical background and experimental rationale. Students who enter the University Fall 2011 or later are responsible for additional course-based tuition of $300 unless they are already paying differential tuition during the term of course enrollment. Additional fees may apply. See Class Schedule. Credit is not given for both MCB 251 and MCB 151. Prerequisite: Concurrent or prior enrollment in MCB 250 or consent of instructor.

MCB 252 Cells, Tissues & Development credit: 3 Hours.
Functional organization and physiology of cells and tissues, including cellular signaling, cellular interactions, and developmental processes. Students who enter the University Fall 2011 or later are responsible for additional course-based tuition of $300 unless they are already paying differential tuition during the term of course enrollment. Additional fees may apply. See Class Schedule. Prerequisite: MCB 250 or equivalent with consent of instructor.

MCB 253 Exp Techniqs in Cellular Biol credit: 2 Hours.
Laboratory course emphasizing experimental techniques in cellular biology, cellular physiology, and developmental biology. Students who enter the University Fall 2011 or later are responsible for additional course-based tuition of $300 unless they are already paying differential tuition during the term of course enrollment. Additional fees may apply. See Class Schedule. Credit is not given for both MCB 253 and MCB 151. Prerequisite: Concurrent or prior enrollment in MCB 252 or consent of instructor.
MCB 270 Medical Genetics credit: 3 Hours.
Addresses key issues in medical genetics, defined as human genetics for pre-health care professionals. The course covers basic principles of medical ethics, modes of inheritance, the molecular basis of genetic disorders, treatment approaches, gene therapy and emerging technologies like whole genome sequencing. Prerequisite: MCB 252 or equivalent or consent of instructor.

MCB 290 Undergraduate Research credit: 1 to 5 Hours.
Students assist in and/or conduct research under faculty supervision in an MCB research laboratory. The topics and nature of the work will vary but will be defined as work conducted in MCB research laboratories. For each hour of course credit in fall and spring terms, the student will be expected to complete 5 hours of work in the lab as directed. 75-80 total hours would be the expectation for 1 credit hour during 15-16 week terms. May be repeated to a maximum of 10 hours. Prerequisite: Consent of instructor.

MCB 291 Undergraduate Research Abroad credit: 1 to 5 Hours.
Students engage in research under faculty supervision at a location outside of the United States. Topics and precise nature of assistance to be determined by MCB faculty in consultation with faculty at the institution. May be repeated in separate terms up to 10 hours. Prerequisite: Consent of MCB faculty who has approved the proposed research plan; consent of faculty member at institution abroad who will be supervising the work and has approved the proposed research plan; evidence of adequate preparation for such study; consent of School of MCB. Not available to freshman.

MCB 297 MCB Honors Discussion credit: 1 Hour.
Honors discussion section associated with MCB 250, MCB 252, and MCB 354. Concurrent enrollment in the appropriate lecture course is required. May be repeated in separate terms to a maximum of 3 hours.

MCB 298 MCB Honors Lab Discussion credit: 1 Hour.
Discussion section associated with the Honors lab sections of MCB 251 and MCB 253. Concurrent enrollment in the appropriate Honors lab section is required. May be repeated in separate terms to a maximum of 2 hours.

MCB 299 MCB Merit Program Discussion credit: 1 Hour.
Provides the extra earned credit hours for students enrolled in the Merit Program in MCB 250, MCB 252, or MCB 354. Approved for letter and S/U grading. May be repeated up to 6 hours in a semester, to a maximum of 10 total hours. Prerequisite: Consent of instructor.

MCB 300 Microbiology credit: 3 Hours.
Emphasizes fundamental concepts of microbiology, including nutrition, physiology, genetics, molecular biology, ecology and evolution of microorganisms, and their role in nature, human health and disease. Credit is not given for both MCB 300 and MCB 100. Prerequisite: MCB 250 and credit or concurrent registration in MCB 252 or consent of instructor.

MCB 301 Experimental Microbiology credit: 3 Hours.
Laboratory emphasizing the fundamentals of microbiology. Topics include growth, isolation, and identification of bacteria; restriction endonuclease analysis of DNA, genetic cloning, and gene transfer. Computer methods are used for the identification of microorganisms and for the analysis of recombinant DNA molecules. Prerequisite: MCB 250 and 251 and credit or concurrent registration in MCB 300, or consent of instructor.

MCB 314 Introduction to Neurobiology credit: 3 Hours.
Introduction to functional and organizational principles of the mammalian nervous system. Topics include the function of nerve cells, neural signaling, sensory and motor systems, learning and memory, attention, motivation, emotions, language, neural development and neurological disorders. A general introduction appropriate for all majors. Same as NEUR 314. Prerequisite: Junior or senior standing.

MCB 316 Genetics and Disease credit: 4 Hours.
Introduction of the structure, expression, and regulation of genes of higher eukaryotes with an emphasis upon animal cells. Specific topics will include chromatin structure and its relation to gene expression, regulation of gene expression during development, recombination, molecular genetic technologies, gene replacement therapy, and the molecular genetics of cancers. Credit is not given for both MCB 316 and MCB 317. Prerequisite: MCB 150 and credit or concurrent registration in MCB 250 or consent of instructor.

MCB 317 Genetics and Genomics credit: 4 Hours.
Study of genetics as a discipline, genetic analysis as a tool to understand biology and the role of genome sciences in biology. Credit is not given for both MCB 317 and MCB 316. Prerequisite: MCB 250, MCB 251, MCB 252, and MCB 253; or consent of instructor.

MCB 320 Mechanisms of Human Disease credit: 3 Hours.
The advent of molecular biology and the Human Genome Project has dramatically increased our understanding of the mechanisms of human disease. The underlying molecular causes for many diseases have been elucidated. This course examines how abnormalities that occur at the molecular and cellular level manifest as pathologies affecting the structure and function of human tissues and organs. In addition, this course focuses on the pathophysiology of common human diseases and the environmental, genetic and epigenetic causes of specific disease types. Prerequisite: MCB 252 or consent of instructor.

MCB 354 Biochem & Phys Basis of Life credit: 3 Hours.
Introduction to biochemistry and structural biology emphasizing the physical and chemical properties of macromolecules. Credit is not given for both MCB 354 and MCB 450. Prerequisite: MCB 250, MCB 252, MCB 253; or consent of instructor.

MCB 395 Special Topics in Human Physiology credit: 2 Hours.
This course consists of 2 components: (1) a journal club, in which students explore current advances in the diagnosis, treatment, and understanding of human diseases by reading, presenting and discussing primary research articles; and (2) instructional support for MCB 244, in which students hold open office hours and make brief (10-15 minute) instructional videos that highlight advanced topics covered in journal club. Prerequisite: MCB 244 and MCB 246 and instructor approval.

MCB 396 Special Topics in Human Health and Disease credit: 2 Hours.
This course consists of 2 components: (1) a journal club, in which students explore current advances in the diagnosis, treatment, and understanding of human diseases by reading, presenting and discussing primary research articles; and (2) instructional support for MCB 246, in which students hold open office hours and make brief (10-15 minute) instructional videos that highlight advanced topics covered in journal club. Prerequisite: MCB 244 and MCB 246 and instructor approval.
MCB 400  Cancer Cell Biology  credit: 3 Hours.
Principles of eukaryotic cell biology with an emphasis on cancer cell biology; consideration of molecular and fine structural components of the cell with an emphasis on experimental analysis of the relationship of structure to function of gene, membrane, cytoskeleton, and extracellular matrix. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250, MCB 251, MCB 252, MCB 253, and credit or concurrent registration in MCB 354 or MCB 450 or consent of instructor.

MCB 401  Cell & Membrane Physiology  credit: 3 Hours.
Cellular and molecular basis of physiological process with an emphasis on phenomena taking place at the membrane of cells and organelles (e.g., signal transduction, ion transport, synaptic transmission, nerve conduction, bioelectricity, synaptic plasticity.) Structure and function of biological membranes through a quantitative lens. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or consent of instructor.

MCB 402  Sys & Integrative Physiology  credit: 3 Hours.
Examines human systems physiology. Topics to be covered include the nervous and endocrine systems, muscle physiology, cardiac physiology, respiratory physiology, blood and immune homeostasis, renal physiology, and gastrointestinal physiology and energy homeostasis. Special emphasis is on homeostatic control and integration of body systems in both health and disease. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or consent of instructor.

MCB 403  Cell & Membrane Physiology Lab  credit: 1 or 2 Hours.
Experimental investigation of cellular functions common to most eukaryotic cells; emphasis on biochemical, electrical, and mechanical recording techniques. Some animal dissection and the use of animal tissues are required in this course. Alternatives are not available. Inquiries concerning the use of or the dissection of animal tissues can be directed to the Instructor or Head of the Department. 2 undergraduate hours. 1 graduate hour. Prerequisite: Credit or concurrent registration in MCB 401 and previous biology laboratory experience.

MCB 404  Sys & Integrative Physiol Lab  credit: 1 to 2 Hours.
Experimental investigation of organ systems of vertebrates with emphasis on biochemical, electrical and physical recording techniques. Some animal dissection and the use of animal tissues are required in this course. Alternatives are not available. Inquiries concerning the use of, or the dissection of animal tissues can be directed to the instructor or Head of the Department. 2 undergraduate hours. 1 graduate hour. Prerequisite: Credit or concurrent registration in MCB 402 and previous biology laboratory experience.

MCB 406  Gene Expression & Regulation  credit: 3 Hours.
Provides in-depth and up-to-date coverage of gene expression and regulation. Lectures are centered on the principles of regulating gene expression in eukaryotic cells. The course covers macromolecule structure and function in gene expression; molecular mechanisms of the key gene expression events including transcription, RNA processing, localization and translation. Applications of these principles in medicine and therapeutics such as aging, cancer and drug design are also discussed. Same as BIOC 406. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 354 or consent of instructor.

MCB 408  Immunology  credit: 3 Hours.
Introduction to fundamentals of immunology with emphasis on biological application; basic background for understanding immunological responses and techniques applicable to biological research. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250, MCB 251, MCB 252, MCB 253, and MCB 354; or consent of instructor.

MCB 410  Developmental Biology, Stem Cells and Regenerative Medicine  credit: 3 Hours.
Survey of molecular and cellular mechanisms involved in development and growth of animals, as well as recent advancement in stem cell and Regenerative medicine research. Topics to be covered include fertilization and early cell lineage, body axis formation, gastrulation, neural induction and patterning, segmentation, and other aspects of pattern formation including organogenesis and limb development, as well as embryonic stem cells, induced pluripotent stem cells, adult stem cells, regeneration and regenerative medicine. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or consent of instructor.

MCB 413  Endocrinology  credit: 3 Hours.
Physiology and biochemistry of the endocrine system and its hormones with special reference to vertebrates and to human endocrine disorders. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or consent of instructor. One semester of biochemistry is recommended.

MCB 419  Brain, Behavior & Info Process  credit: 3 Hours.
Exploration of the neural basis of animal behavior. Emphasis on the information processing problems that animals face in complex natural environments and how nervous systems have evolved to solve these problems. Introduction to the use of computer modeling and simulation techniques for exploring principles of nervous system design and function. Current literature in computational neurobiology and neuroethology will be incorporated in readings and class discussion. Same as BIOP 419 and NEUR 419. 3 undergraduate hours. 3 graduate hours. Prerequisite: CS 101; and PHYS 102 or PHYS 212; and MCB 252; or equivalent or consent of instructor.

MCB 421  Microbial Genetics  credit: 3 Hours.
Prokaryotic microbial genetic systems; emphasis on typical data analyses, together with the basic classes of genetic phenomena. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 or consent of instructor.

MCB 424  Microbial Biochemistry  credit: 3 Hours.
Examines the biochemical ecology of diverse microbial groups with emphasis on anaerobic systems. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250 and MCB 354 or MCB 450, or consent of instructor.

MCB 426  Bacterial Pathogenesis  credit: 3 Hours.
Emphasizes prokaryotes that cause important diseases in humans and other animals; host-parasite bacteriology; and chemistry and genetics of mechanisms of pathogenesis. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 and MCB 354, or consent of instructor.

MCB 428  Microbial Pathogens Laboratory  credit: 2 Hours.
Laboratory study of methods of recognition and differentiation, diagnostic tests, and mechanisms of bacterial and viral pathogenesis. Topics include infections of the urinary tract, respiratory tract, gastrointestinal tract, and sexually transmitted diseases. 2 undergraduate hours. 2 graduate hours. Prerequisite: MCB 300 and MCB 301 or consent of instructor.

MCB 429  Cellular Microbiology & Disease  credit: 3 Hours.
Emphasizes cell biology of infectious diseases, using cellular, molecular, and animal models. Will stress molecular cross-talk that drives host-pathogen interactions, state-of-the-art approaches for investigating host and microbial cell and molecular biology, latest paradigms in host cell biology, and, the evolutionary basis by which pathogens can manipulate host cell cytoskeleton, membranes, organelles, cell cycle, gene expression, and signaling in eukaryotic cells. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 and MCB 354 or consent of instructor.
MCB 430 Molecular Microbiology credit: 3 Hours.
Modern contributions to the science of microbiology; emphasizes the structure, function, and synthesis of informational macromolecules and on the role microorganisms have played in molecular biology. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 and credit or concurrent registration in MCB 354, or consent of instructor.

MCB 431 Microbial Physiology credit: 3 Hours.
Examines bacterial physiology, including discussions of energetics, regulation of metabolism, and cell structure. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 or equivalent; credit or concurrent registration in a biochemistry course.

MCB 432 Computing in Molecular Biology credit: 3 Hours.
Examination of computational aspects of biology with an emphasis on the relationships between biological questions and their recastings as mathematical or logical problems. Topics are drawn from biochemistry, genetics, molecular sequence analysis, and molecular structure. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250, MCB 252, MCB 354, and calculus I (MATH 220 or MATH 221), and calculus II (MATH 231) or biostatistics (STAT 212); or consent of instructor.

MCB 433 Virology & Viral Pathogenesis credit: 3 Hours.
Same as PATH 433. See PATH 433.

MCB 434 Food & Industrial Microbiology credit: 3 Hours.
Same as FSHN 471. See FSHN 471.

MCB 435 Evolution of Infectious Disease credit: 3 Hours.
Understanding the evolution and ecology of the microbial world is of great importance to human health and the health of our planet. Students will explore the ecology and evolution principles that apply to viruses, microbial eukaryotes, archaea and bacteria. The primary literature on historical and emerging infectious diseases will be used to illustrate critical applications of these basic principles. Examples include applying genomics tools to understand the evolutionary basis for antibiotic resistance, the spread of emerging pathogens, and the ecology of probiotics and the human microbiome. The objective of this class is to better understand how humans shape the diversity and dynamics of the microbial world living in and around us every day. Same as IB 442. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 300 or consent of instructor.

MCB 436 Global Biosecurity credit: 1 Hour.
Designed to provide students with broad coverage of key areas of scientific, legal, social, ethical, and political aspects of biosecurity, emphasizing current problems and research in the areas of biodefense, emerging infectious diseases, synthetic biology, and other topics. In combination with related reading assignments, the weekly special topics-based seminar will integrate knowledge of modern biomedical research, advances in biotechnology, and natural and manmade biological threats with the skills to analyze and develop public policies and strategies for enhancing global biosecurity. 1 undergraduate hour. 1 graduate hour. Prerequisite: MCB 150 or the equivalent or consent of instructor.

MCB 442 Comparative Immunobiology credit: 4 Hours.
Same as ANSC 450 and PATH 410. See ANSC 450.

MCB 446 Physical Biochemistry credit: 3 Hours.
Same as CHEM 472 and BIOC 446. See BIOC 446.

MCB 450 Introductory Biochemistry credit: 3 Hours.
Chemistry and metabolism of carbohydrates, lipids, proteins, nucleic acids, vitamins, and coenzymes and their relation to the regulation and processes of organisms, cells, and subcellular components. Students who enter the University Fall 2011 or later are responsible for additional course-based tuition of $300 unless they are already paying differential tuition during the term of course enrollment. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Credit is not given for both MCB 450 and MCB 354. Prerequisite: CHEM 232 or CHEM 236, or equivalent, or consent of instructor. Not intended for students in the MCB or biochemistry curricula.

MCB 458 Basic Human Pathology credit: 3 Hours.
Introduction to the basic mechanisms of human disease with a focus on the building blocks of pathological processes at the sub-organismal and organismal level. Basic biological processes will be stressed including tissue adaptation, injury, inflammation, repair and neoplasia. Pathology synthesizes cellular and molecular biology, biochemistry and immunology holistically so as to understand the body's limited responses to the cornucopia of experienced physiological insults. 3 undergraduate hours. No graduate credit. Prerequisite: MCB 354 or equivalent, or consent of instructor. For MCB and Biochemistry undergraduate majors only.

MCB 460 Regeneration and Medicine credit: 3 Hours.
A survey of regeneration biology and medicine at the organ, tissues, and cellular/genetic/molecular/levels. Basic concepts are presented with a focus on contemporary methods and seminal experiments. Students will learn to think critically and creatively about experimentation and analyses of three regenerative medicine strategies: stem cell transplantation, bioartificial tissues, and chemical induction of regeneration in vivo. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or MCB 250 or equivalent, or consent of instructor. Recommended: knowledge of vertebrate histology and anatomy.

MCB 461 Cell & Molecular Neuroscience credit: 3 Hours.
Designed as an in-depth foundation course for graduate and undergraduate students with strong neuroscience interests. Covers up-to-date cellular and molecular neurobiology (including basic principles of neuronal function, signaling, and plasticity) and introductory brain anatomy that underlie brain function and animal behaviors. Pathogenic mechanisms of neurological diseases and disorders from the latest research will be heavily explored. Same as NEUR 461. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252, MCB 250 or equivalent, or consent of instructor. May be taken concurrently with MCB 462.

MCB 462 Integrative Neuroscience credit: 3 Hours.
Employs integrative, multi-level systems approaches to nervous system and behavior. Focuses on neural circuits in sensory integration, pattern generation, the integration of sensation, internal states and learning in behavioral decision, the neuronal natures of pain, sleep, and biological rhythms, neuroeconomics, new vistas in neural modeling and interfacing brain and machine. Students are presented in neuroethological contexts of evolution and the economics of behavior and physiology. Same as NEUR 462. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 252 or consent of instructor. May be taken concurrently with MCB 461.
MCB 465 Human Metabolic Disease  
Examination of the molecular and physiological basis of human metabolic disease. Disruption of metabolic and energy homeostasis plays key roles leading to metabolic disorders. We will examine how lipid/glucose levels and energy balance are controlled in health and how they are abnormally regulated in disease states. In addition, we will cover current topics related to control of metabolism including aging and circadian rhythms. Methodologies leading to scientific discoveries and potential preventive and therapeutic agents will also be discussed. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250, MCB 252, or consent of instructor.

MCB 471 Cell Structure and Dynamics  
Molecular basis of cellular organization focusing on how cells secrete, move, adhere, divide, communicate, and die. Material will emphasize critical analysis of experiments, current controversies and hypothesis testing. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 250 and MCB 252 or consent of instructor. Prior or concurrent enrollment in MCB 354 desirable.

MCB 480 Eukaryotic Cell Signaling  
General principles of molecular signaling regulating membrane, cytoplasmic, and nuclear events in eukaryotic cells with emphasis on mammalian systems. Contemporary methods of investigation and the principles of identifying and solving problems related to signal transduction will be emphasized. 2 undergraduate hours. 2 graduate hours. Prerequisite: MCB 252 or consent of instructor.

MCB 481 Developmental Neurobiology  
Principles of vertebrate and invertebrate developmental neurobiology with emphasis on the molecular and cellular mechanisms controlling neuronal determination, axon pathfinding, synapse formation, and plasticity. Same as NEUR 481. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 400 or MCB 461 or consent of instructor.

MCB 492 Senior Thesis  
Research conducted under the direction of a faculty member in the School of Molecular and Cellular Biology. Normally, the student enrolls in MCB 492 during the last semester on campus prior to graduation. In the semester preceding enrollment, interested students should consult with their faculty advisors concerning enrollment procedures. A minimum of 3 credit hours is required, and a thesis must be presented for credit to be received. Successful completion of MCB 492 is required in order to be eligible for graduation with distinction in MCB. 3 to 5 undergraduate hours. No graduate credit. Prerequisite: Two consecutive semesters of at least 2 credit hours of MCB 290 under the guidance of the same faculty member, or consent of instructor.

MCB 493 Special Topics Mol Cell Biol  
Discussion of current topics of interest within the broad domain of molecular and cellular biology; seminar or lecture format. Topics vary. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing and consent of instructor.

MCB 501 Advanced Biochemistry  
Focuses upon structure-function analyses of biomolecules and the chemical and evolutionary foundations of metabolic networks. Emphasis is on research methodology and current problems.

MCB 502 Advanced Molecular Genetics  
An advanced course in molecular genetics. Emphasis is on research methodology and current problems.

MCB 508 Intro to Systems Neuroscience  
Same as NEUR 508 and PSYC 508. See PSYC 508.

MCB 509 Curr Topics Mol & Int Physiol  
Advanced seminars in current physiological research. May be repeated once for credit. Prerequisite: Consent of instructor.

MCB 511 Mol Bio of Microbe-Plant Inter  
Same as PLPA 509. See PLPA 509.

MCB 512 Advanced Endocrinology  
Seminars, lectures, student reports, and discussions of recent advances in endocrinology. Same as ANSC 530 and CB 512. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

MCB 513 Survey of Neurobiology  
Overview of the functional and organizational principles of the mammalian nervous system. Intended for graduate students with little or no prior coursework in neurobiology. Students will read and discuss current scientific papers from the neurobiological literature. Same as NEUR 513.

MCB 520 Advanced Molecular Biology  
Advanced graduate level, primary literature-based discussion course on molecular microbiology. Graduate level companion course for MCB 430. Prerequisite: Concurrent registration in MCB 430 or consent of instructor.

MCB 521 Advanced Microbial Genetics  
Advanced level, primary literature-based discussion course on microbial genetics. Graduate level companion course for MCB 421. Prerequisite: Concurrent or prior enrollment in MCB 421 or consent of instructor.

MCB 526 Adv Bacterial Pathogenesis  
Advanced primary literature-based discussion course on bacterial pathogenesis. Graduate level companion course for MCB 426. Prerequisite: Concurrent or prior enrollment in MCB 426 or consent of instructor.

MCB 529 Special Topics Cell Devel Biol  
Discussion of current topics of interest in higher eukaryotic cellular and molecular biology, development, neurobiology; seminar or lecture format. Topics vary. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

MCB 530 Reproductive Physiol Seminar  
Presentation and discussion of current literature as well as graduate student and staff research proposals and findings in reproductive physiology. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MCB 532 Advanced Microbial Physiology  
Advanced primary literature-based discussion course on microbial physiology. Graduate level companion course for MCB 431. Prerequisite: Concurrent or prior registration in MCB 431 or consent of instructor.

MCB 533 Repro Physiology Lab Methods  
Same as ANSC 533 and CB 533. See ANSC 533.

MCB 534 Advanced Microbial Metabolism  
Advanced primary literature-based discussion course on microbial metabolism. Graduate level companion course for MCB 424. Prerequisite: Concurrent or prior enrollment in MCB 424 or consent of instructor.

MCB 539 Advanced Cellular Microbiology  
Advanced primary literature-based discussion course on cellular microbiology and underlying infectious diseases. Graduate level companion course for MCB 429. Prerequisite: Concurrent or prior enrollment in MCB 429 or consent of instructor.
MCB 540  Scientific Writing  credit: 3 Hours.
Study of scientific communication, geared toward biologists. Topics include writing mechanics, grammar and sentence structure, abstracts for different audiences and purposes, grant writing, manuscript preparation, figure construction, oral presentations, and the grant-review process. Class consists of both lectures and time working in small groups to revise writing assignments. Assignments include weekly writing exercises, a full NIH-style grant proposal and grant reviews for a mock study section. 2 graduate hours. No professional credit.

MCB 545  Functional Genomics in Principle and Practice  credit: 3 Hours.
Experimental and analytical foundations of functional genomics, tailored to experimental biologists who are using high-throughput sequencing technologies to analyze function in animal genomes. Lectures cover experimental methods and tools available for bioinformatics analysis; students will gain experience in the use of online or command-line bioinformatics tools through weekly assignments. Advanced knowledge in eukaryotic molecular genetics is needed but bioinformatics skills are not required. 3 graduate hours. No professional credit. Students must have access to a networked computer on which they can load software in order to complete required assignments for the course. Prerequisite: MCB 502 or equivalent or consent of instructor.

MCB 550  Biomolecular Physics  credit: 4 Hours.
Same as BIOP 550 and PHYS 550. See PHYS 550.

MCB 553  Enzyme Reaction Mechanisms  credit: 3 or 4 Hours.
Same as CHEM 572. See CHEM 572.

MCB 555  Analys Biochemical Literature  credit: 2 Hours.
Discussions of current research and literature. Required of all graduate students whose major is biochemistry. Same as BIOC 555. Prerequisite: Second year graduate standing in biochemistry or consent of instructor.

MCB 561  Mechanisms Viral Pathogenesis  credit: 3 Hours.
Same as PATH 519. See PATH 519.

MCB 571  Bioinformatics  credit: 4 Hours.
Same as ANSC 543, CHBE 571, and STAT 530. See CHBE 571.

MCB 580  Res Ethics & Responsibilities  credit: 1 Hour.
Lecture/discussion course focusing on research ethics and a variety of related issues that can influence success in graduate school in the biological sciences, including scientific integrity and compliance with regulations for laboratory research. Approved for letter and S/U grading. Prerequisite: Consent of instructor.

MCB 581  Laboratory Rotation I  credit: 3 Hours.
Laboratory research methods; familiarization of first-year graduate students with experimental methods used in molecular and cellular biology research. Required of all first-year students entering MCB. Meets first five weeks of each term. Approved for S/U grading only. Prerequisite: First-year graduate status and consent of MCB graduate programs; concurrent registration in MCB 582.

MCB 582  Laboratory Rotation II  credit: 3 Hours.
Laboratory research methods; familiarization of first-year graduate students with experimental methods used in molecular and cellular biology research. Required of all first-year students entering MCB. Meets second five weeks of each term. Approved for S/U grading only. Prerequisite: First-year graduate status and consent of MCB graduate programs; concurrent registration in MCB 581.

MCB 583  Laboratory Rotation III  credit: 3 Hours.
Laboratory research methods; familiarization of first-year graduate students with experimental methods used in molecular and cellular biology research. Required of all first-year students entering MCB. Meets third five weeks of each term. Approved for S/U grading only. Prerequisite: First-year graduate status and consent of MCB graduate programs; concurrent registration in MCB 581 and MCB 582.

MCB 585  Current Topics in Microbiology  credit: 1 Hour.
Discussions, reviews, and appraisal of special topics in microbiology and molecular biology; seminar or lecture. Topics vary. Approved for S/U grading only. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

MCB 586  Concepts/Topics Immunology  credit: 2 Hours.
Same as PATH 518. See PATH 518.

MCB 595  MCB Graduate Seminar  credit: 1 Hour.
Advanced seminars on current topics of interest in molecular and cellular biology. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor.

Molecular & Integrative Physiol (MIP)

MIP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/MIP)

Courses

MIP 590  Individual Topics  credit: 1 to 16 Hours.
For graduate students wishing to study individual problems or topics not assigned in other courses. Approved for S/U grading only. May be repeated. Prerequisite: Approval of department.

MIP 595  Seminars in Physiology  credit: 0 to 1 Hours.
Advanced seminars on current topics of interest in physiology. Approved for S/U grading only. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

MIP 599  Thesis Research  credit: 0 to 16 Hours.
Research may be conducted under supervision of the thesis advisor in the following areas: (a) cellular and molecular physiology; (b) comparative physiology; (c) mammalian physiology; (d) human physiology; (e) endocrinology; (f) neurophysiology; (g) radiobiology; and (h) environmental and stress physiology. Approved for S/U grading only. May be repeated.

Museum Studies (MUSE)

MUSE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/MUSE)

Courses

MUSE 200  Introduction to Museums  credit: 3 Hours.
A broad introduction to the museum world, focusing on what a museum is, what differentiates various types of museums, and how museums function. Examines museums in terms of education, curation, exhibition, public relations, research, administration, ethical and legal obligations, funding and knowledge. Prerequisite: One year of college coursework.
MUSE 250  The World Through Museums  credit: 3 Hours.
Examination of contemporary museums around the world, evaluating their roles as social institutions and communicators of heritage in increasingly global contexts. The first half of the course develops a framework for museum literacy (how to read museums) that incorporates anthropological, globalization, media and critical theories. The second half of the course is a virtual tour and evaluates museums using this analytical skill set. Same as ANTH 250.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

MUSE 330  Learning in Museums  credit: 3 Hours.
An applied course in the multiple responsibilities of professionals in the field of Museum Education. Examines how people, ideas and objects connect in museums; trends in interpretation and museum ethics; best practice and current learning theories; and exemplary programs involving highly varied audiences, community collaboration and advanced technology. Provides practical experience in program development, facilitation, documentation and assessment. Requires some in-museum work outside of regularly scheduled class hours. Includes field trips to local museums. Prerequisite: MUSE 200.

MUSE 389  Seminar in Museum Studies  credit: 3 Hours.
Study of special themes, selected topics or current issues in museum studies for undergraduate students with backgrounds in museology. Course may be in seminar or lecture format. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: MUSE 200 and ANTH 462.

MUSE 390  Museum Internship  credit: 3 Hours.
Supervised field experience in museums, both on and off-campus, designed to introduce students to professional practice. Builds on museum studies coursework, and provides opportunities for applying academic knowledge and analyzing personal development. Students work part-time (150 hours) in a program-approved museum under the guidance of an instructional team. Requires an internship contract before the term, regular reporting and documentation during the term, and compilation of a project portfolio at the end of the term. May be repeated in same and separate terms to a maximum of six hours. Prerequisite: Three courses (nine hours) within the undergraduate minor in Museum Studies. Requires approval of the Museum Studies program advisor.

MUSE 420  Collections Management  credit: 3 or 4 Hours.
An applied course in the preservation, documentation, and maintenance of the physical integrity of museum collections. Examines agents of deterioration and how to mitigate damage to collections; the chemical and physical properties of inorganic, organic, composite and textile materials; collections packing, shipping and storage methods; and collections hazards, safety and emergency planning. Provides practical experience and encourages skills development in collections management. Requires some in-museum work outside of regularly scheduled class hours. 3 undergraduate hours. 4 graduate hours. Prerequisite: MUSE 200 or MUSE 500.

MUSE 440  Museum Registration  credit: 3 or 4 Hours.
An applied course in the management and care of museum collections through registration and records. Examines legal and ethical issues of collections stewardship, and current professional practices and standards. Provides practical experience and encourages skills development in museum registration. Requires some in-museum work outside of regularly scheduled class hours. Includes a field trip to a local museum. 3 undergraduate hours. 4 graduate hours. Prerequisite: MUSE 200 or MUSE 500.

MUSE 500  Core Prob Museum Theory & Pract  credit: 4 Hours.
A critical examination of both historical and current theoretical issues in museum practice. Addresses the development of museums within varied social, cultural and intellectual contexts, and the conceptualizations and criticisms of museums in terms of paradigmatic, institutional, symbolic and other theories. In addition to surveying the broad range of theoretical frameworks adopted in contemporary museum scholarship, students will examine and evaluate curatorial and institutional strategies for responding to the myriad external pressure (including multiple constituencies, standards and best practices) currently placed on museums. Prerequisite: Graduate standing.

MUSE 589  Special Topics Museum Studies  credit: 2 or 4 Hours.
Intensive study of selected topics and problems of special interest in Museum Studies. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.

MUSE 590  Museum Studies Capstone  credit: 0 to 4 Hours.
Supervised individual study involving a museum-based internship, museum-related project or museum-related research paper and fulfilling the capstone requirement for the Graduate Minor in Museum Studies. Approved for letter and S/U grading. Credit is not given for MUSE 590 and either LIS 591 or ARTH 595. Prerequisite: Approval of the Museum Studies Steering Committee.

Music (MUS)

MUS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/MUS)

Courses

MUS 090  Seminar in Music Education  credit: 0 Hours.
Seminar for students preparing to enter student teaching. Students should enroll in the semester prior to student teaching. Approved for letter and S/U grading. Prerequisite: Music education majors or consent of instructor.

MUS 101  Music Theory and Practice I  credit: 2 Hours.
Fundamental theory including terminology and notation; visual analysis of music elements, procedures, and forms; written applications in short projects. Credit is not given for both MUS 101 and MUS 103. Prerequisite: Placement by examination.

MUS 102  Music Theory and Practice II  credit: 2 Hours.
Continuation of MUS 101. Credit is not given for both MUS 102 and MUS 104. Prerequisite: MUS 101 or placement by examination.

MUS 103  Rudiments of Music Theory I  credit: 3 Hours.
Introduces non-music majors to basic terminology, technology, notation and concepts of music, with a co-emphasis on digital audio. Credit is not given for both MUS 103 and MUS 101.

MUS 104  Rudiments of Music Theory II  credit: 3 Hours.
Continuation of MUS 103. Includes study of modulation, chromatic harmony, form, and an introduction to twentieth-century composition and inter-disciplinary music techniques. Credit is not given for both MUS 104 and MUS 102. Prerequisite: MUS 103 or placement by examination; non-music majors only.
MUS 105  Computation and Music I  credit: 2 Hours.
Applies foundational concepts in computer science to the composition and analysis of symbolic music information. Course proceeds in parallel with CS 125 (Introduction to Computer Science) and MUS 101 (Music Theory and Practice I) to integrate key CS techniques with music concepts. Course is run as a workshop presenting eight large programming projects in which students design and implement software systems that analyze and compose musical scores in different formats. Prerequisite: Concurrent enrollment with CS 125 and MUS 101. Restricted to entering CS+Music students and Music Technology students with strong programming experience, or consent of the instructor.

MUS 106  Beginning Composition  credit: 2 Hours.
Class instruction in contemporary compositional practice at the beginning stages. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor on the basis of a student portfolio of composition submitted to the composition-theory faculty and accepted after evaluation.

MUS 107  Musicianship I  credit: 2 Hours.
Beginning aural skills training in the areas of intervals, scales, chords, rhythm, melody, and harmony.

MUS 108  Musicianship II  credit: 2 Hours.
Continuation of aural skills training from MUS 107. Development of performance, notational, and listening skills in the areas of rhythm, melody, harmony, counterpoint, and formal aspects of musical structure; emphasizes tonal pitch structures. Prerequisite: MUS 101 and MUS 107, or placement by examination.

MUS 110  Intro to Art Mus: Intl Perspect  credit: 2 Hours.
Surveys the history of European and American art music in an international context; examines major artistic styles, representative composers and works, and their relationship to pertinent non-western musical traditions and philosophies; reviews fundamental music concepts; strengthens analytical skills; familiarizes students with the music library, and research and writing techniques. Prerequisite: First year standing in music or consent of instructor.

MUS 120  English Diction  credit: 1 Hour.
Phonetics applied to English song literature; individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Freshman standing in voice or consent of instructor.

MUS 121  Italian Diction  credit: 1 Hour.
Phonetics applied to Italian song literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Freshman standing in voice or consent of instructor.

MUS 122  German Diction  credit: 1 Hour.
German pronunciation applied to German vocal literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: Sophomore standing in voice or consent of instructor.

MUS 123  French Diction  credit: 1 Hour.
French pronunciation applied to French vocal literature; class and individual clinical analysis and practice. To be taken with MUS 181. Prerequisite: At least one semester of French or equivalent required, sophomore standing in voice, or consent of instructor.

MUS 125  English Diction and Dialects  credit: 1 Hour.
English Diction and Dialects introduces students to the variety of sounds of spoken English throughout the world. Coursework will include study of recorded resources, IPA (International Phonetic Alphabet) transcription, and performance of monologues, scenes, and musical numbers in a variety of dialects. Transcription will consist of both written IPA and imitative listening and speaking. Coursework will consist of in-class presentations, quizzes, transcriptions, and assessments of video and audio resources. Prerequisite: Restricted to students majoring in Music, or by consent of instructor.

MUS 130  Intro to the Art of Music  credit: 3 Hours.
Provides non-music majors with basic listening skills, the ability to discuss music intelligently, and an acquaintance with many types of music. Prerequisite: For non-music majors only. This course satisfies the General Education Criteria for: Humanities - Lit Arts

MUS 132  Popular Music Studies  credit: 3 Hours.
Courses within this rubric provide an analytical and historical introduction to genres of popular music from the United States and around the world. Iterations of the course may focus on a specific genre, such as Rock, Reggae, or Afropop, or may deal with broader subjects, such as the continua of styles including R&B, Soul, Funk, and Hip Hop, or the pan-generic, international phenomenon of pop music globalization in the twentieth century.
This course satisfies the General Education Criteria for:

MUS 133  Introduction to World Music  credit: 3 Hours.
A survey of various musical traditions from different regions and peoples of the world.

MUS 134  History of Musical Events  credit: 3 Hours.
Focuses on seminal performances of musical works such as, but not limited to, premiere performances and/or recordings. Prerequisite: For non-music majors only.

MUS 140  String Instrument Class  credit: 2 Hours.
Class instruction to enable students to demonstrate proper technique and a characteristic sound on two bowed string instruments (violin or viola, and cello or double bass) in order to teach, via demonstration, beginning string students toward their maximum technical and musical development. May be repeated to a maximum of 4 hours. Prerequisite: For music education majors only, with two semesters required for music education string majors.

MUS 144  Supp WW Inst: Clarinet  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the clarinet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for woodwind majors in the BME instrumental concentration.

MUS 146  Supp WW Inst: Flute  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the flute. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.
MUS 147  Supp WW Inst: Oboe  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the oboe. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Oriented for music majors in the BME instrumental concentration.

MUS 148  Supp WW Inst: Saxophone  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the saxophone. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 149  Supp WW Inst: Bassoon  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the bassoon. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 151  Supp Brass Inst: Trumpet  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the trumpet. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for brass majors in the BME instrumental concentration.

MUS 153  Supp Brass Inst: Horn  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the horn. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 154  Supp Brass Inst: Trombone  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the trombone. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 155  Supp Brass Inst: Euph/Tuba  credit: .5 Hours.
Class instruction in the fundamentals of playing and teaching the euphonium and tuba. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 158  Supp Percussion Instruments  credit: 2 Hours.
Class instruction in the fundamentals of playing and teaching percussion instruments. Acquire knowledge on recommended instruments and equipment, maintenance procedures, and training materials. Prerequisite: Intended for music majors in the BME instrumental concentration.

MUS 160  Jazz Piano Improvisation I  credit: 2 Hours.
Study of jazz theory, harmony, and improvisational techniques at the piano, includes experience in solo and ensemble situations, and a historical survey of jazz development from about 1910. Prerequisite: Completion of MUS 174 or equivalent; MUS 202 and MUS 208 or equivalent; consent of instructor.

MUS 161  Jazz Piano Improvisation II  credit: 2 Hours.
Continuation of MUS 160. Study of jazz theory, harmony, and improvisational techniques at the piano, includes experience in solo and ensemble situations, and a historical survey of jazz development from about 1910. Prerequisite: MUS 160 or consent of instructor.

MUS 163  Jazz Keyboard Studies I  credit: 2 Hours.
Prepares the student (through class participation) to perform one jazz standard on a functional level. Includes basic technique, chord voicing, comping, and lead sheet realization with functional fluency in all keys. Furnishes the student with class instruction on piano, focusing on jazz and improvisational idioms. An in-depth study of overall instrument technique, eminent styles, and other performance practices relevant to jazz piano and improvisation. Prerequisite: MUS 172 and MUS 173, or consent of the instructor.

MUS 164  Jazz Keyboard Studies II  credit: 2 Hours.
Continuation of materials presented in MUS 163, focusing on improvisational idioms of jazz piano. Prepares the student (through class participation) to perform three jazz standards on a functional level. Emphasizes the blues form, minor II-V-I chord progressions with both hands, and introduces all major modes. Includes technique, chord voicing concepts, comping, and lead sheet realization with mid-level fluency in all keys. A continuing in-depth study of overall instrument technique, eminent styles, and other performance practices relevant to jazz piano and improvisation. Prerequisite: MUS 163, or placement exam, or consent of the instructor.

MUS 165  Applied Jazz Instruction  credit: 2 to 4 Hours.
Instruction at the undergraduate level in voice or instruments normally associated with the jazz idiom. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Successful performance audition for the jazz faculty.

MUS 166  Class Jazz Improvisation I  credit: 2 Hours.
Examines the dynamics of group improvisation at a fundamental level. Techniques of individual melodic development, group melodic development, and group contouring will be discussed and practiced. Requires preparation of group improvisations using the blues, a 32-bar song form, and a modal form, as well as class presentations and group demonstrations of basic group improvisational techniques.

MUS 167  Class Jazz Improvisation II  credit: 2 Hours.
Continues to examine the dynamics of group improvisation as presented in MUS 166. Discussion and practical application of techniques of individual melodic development, group melodic development, and group contouring. Requires preparation of group improvisations using blues, 32-bar song form, and free group improvising forms, as well as class presentations and group demonstrations of more advanced improvisational techniques. Prerequisite: MUS 166.

MUS 169  Unit One Sem Instruct in Music  credit: 0 to 2 Hours.
Experimental seminar courses to introduce non-music majors to contemporary ideas in music. Approved for letter and S/U grading. May be repeated to a maximum of 4 hours. Prerequisite: For non-music majors only.

MUS 170  Grp Instr Pno NonMus Maj I  credit: 2 Hours.
Beginning piano for non-music majors. Includes fundamentals of reading, technique, and creative activities; study and performance of simple solo and ensemble repertoire.

MUS 171  Grp Instr Pno NonMus Maj II  credit: 2 Hours.
Continuation of basic skills presented in MUS 170. Elementary piano for non-music majors. Includes reading, technique, creative activities; simple solo and ensemble repertoire. Prerequisite: MUS 170 or equivalent.
MUS 172  Grp Instr Pno for Mus Maj I  credit: 2 Hours.
Group instruction in beginning piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Study of simple piano literature, development of skills in technique, sight reading, harmonization, transposition, improvisation, and analysis. This is the first of two courses that addresses the keyboard competency policy for non-piano majors.

MUS 173  Grp Instr Pno for Mus Maj II  credit: 2 Hours.
Continuation of skills introduced in MUS 172. Group instruction in elementary piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Sight-reading, harmonization, transposition, and improvisation. Easy solos from the main historical periods with appropriate technical development; introduction to piano ensemble literature. This is the second of two courses that addresses the keyboard competency policy for non-piano majors. Prerequisite: MUS 101 and MUS 107; MUS 172 or equivalent; or consent of instructor.

MUS 174  Grp Instr Pno for Mus Maj III  credit: 2 Hours.
Continuation of skills introduced in MUS 173. Group instruction in intermediate piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Study of intermediate level solos and ensemble compositions, harmonization with chromatic chords, sight reading, transposition of four-voice works, improvisation, and learning of patriotic songs. Prerequisite: MUS 102 and MUS 108; MUS 173 or equivalent; or consent of instructor.

MUS 175  Grp Instr Pno for Mus Maj IV  credit: 2 Hours.
Continuation of skills introduced in MUS 174. Group instruction in moderately advanced piano for music majors whose principal performing medium is voice, or an orchestral or band instrument. Emphasis on solos, ensemble compositions, technical development, and more advanced work in sight reading, harmonization, improvisation, transposition, and aural skills. Prerequisite: MUS 201 and MUS 207; MUS 174 or equivalent; or consent of instructor.

MUS 178  Guitar  credit: 2 to 4 Hours.
Instruction in guitar at the undergraduate level, predominantly classical. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 179  Harpsichord  credit: 2 to 4 Hours.
Instruction in harpsichord at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 180  Piano  credit: 2 to 4 Hours.
Instruction in piano at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 181  Voice  credit: 2 to 3 Hours.
Instruction in voice at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 182  Organ  credit: 2 to 4 Hours.
Instruction in organ at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 183  Violin  credit: 2 to 4 Hours.
Instruction in violin at the undergraduate level. Music majors must register concurrently in MUS 250. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 184  Viola  credit: 2 to 4 Hours.
Instruction in viola at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 185  Cello  credit: 2 to 4 Hours.
Instruction in cello at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 186  Double Bass  credit: 2 to 4 Hours.
Instruction in double bass at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 187  Harp  credit: 2 to 4 Hours.
Instruction in harp at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 188  Flute  credit: 2 to 4 Hours.
Instruction in flute at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 189  Clarinet  credit: 2 to 4 Hours.
Instruction in clarinet at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 190  Oboe  credit: 2 to 4 Hours.
Instruction in oboe at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 191  Bassoon  credit: 2 to 4 Hours.
Instruction in bassoon at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 192  Saxophone  credit: 2 to 4 Hours.
Instruction in saxophone at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.
MUS 193 Trumpet credit: 2 to 4 Hours.
Instruction in trumpet at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 194 Horn credit: 2 to 4 Hours.
Instruction in horn at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 195 Trombone credit: 2 to 4 Hours.
Instruction in trombone at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 196 Euphonium credit: 2 to 4 Hours.
Instruction in euphonium at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 197 Tuba credit: 2 to 4 Hours.
Instruction in tuba at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 198 Percussion credit: 2 to 4 Hours.
Instruction in percussion at the undergraduate level. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 16 hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course.

MUS 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated to a maximum of 12 hours.

MUS 201 Music Theory and Practice III credit: 2 Hours.
Continuation of MUS 102. Gradually increased emphasis on contrapuntal techniques, dissonance in tonal music, and musical form. Prerequisite: MUS 102 and MUS 108, or placement by examination.

MUS 202 Music Theory and Practice IV credit: 2 Hours.
Continuation of MUS 201. Study of twentieth century compositional methods. Prerequisite: MUS 201 and MUS 207, or placement by examination.

MUS 205 Computation and Music II credit: 2 Hours.
A follow-up course to Computation and Music I that introduces students to programming music applications with special emphasis on issues related to real-time audio system design. The class will begin by introducing students to the fundamentals of real-time audio synthesis using a graphical audio language such as Max/MSP, and then turn to hands-on design of real-time audio systems using an industry standard language such as C++. The course content reinforces materials presented in CS 126 (Software Design), including GUI frameworks, prototyping, user interface design, code refactoring and debugging. Prerequisite: CS 125, CS 126, and MUS 101, or consent of instructor. Restricted to CS+Music students and Music Technology students with strong programming experience, or by consent of the instructor.

MUS 206 Intermediate Composition credit: 2 Hours.
Class instruction in contemporary compositional practice at the secondary stages. May be repeated to a maximum of 6 hours. Prerequisite: MUS 106 and consent of composition-theory faculty.

MUS 207 Musicianship III credit: 2 Hours.
Continuation of MUS 108. Emphasis on extensions of tonality by means of changing tonal centers and altered chords. Prerequisite: MUS 102 and MUS 108, or placement by examination.

MUS 208 Musicianship IV credit: 1 Hour.
Continuation of MUS 207. Emphasis on atonal pitch structures and complex rhythmic organization. Prerequisite: MUS 201 and MUS 207, or placement by examination.

MUS 209 Music, Sound, Technology credit: 3 Hours.
This course examines the role modern digital technology plays in musical performance, composition, listening, and analysis. The course is divided into three large subject areas each lasting approximately five weeks: (1) sound, sound fields, and digital recording, (2) digital technology in composition and performance, and (3) psychoacoustics and digitized music analysis. Within each subject area, students are first introduced to relevant acoustic and musical principles, then learn about their implementation in the digital domain, and lastly gain practical experience with the subject matter through hands-on projects involving the capture, creation, editing and analysis of musical sound using standard hardware and computer applications. Prerequisite: Restricted to Music Technology students, or by consent of instructor.

MUS 240 Orientation Mus Tchg Lrng K-HS credit: 1 Hour.
Provides guided practice in observing music teaching and learning in a variety of settings. Develops professional perspective and vocabulary for analyzing effective teaching, diverse learning styles, and patterns of music instruction in a variety of contexts. Includes early field experience hours. Must complete criminal background check prior to observing in schools. Prerequisite: Music education majors accepted into Teacher Certification Track.

MUS 242 Elements of Conducting credit: 2 Hours.
Fundamental elements of conducting, score analysis and preparation, transcription and transposition for choral and instrumental ensembles. Focused on development of conducting skills appropriate for use in public school teaching. A special section is offered for music majors not majoring in music education. Prerequisite: Music majors or consent of instructor.

MUS 243 Introductory Music Ed Tech credit: 2 Hours.
Overview and exploration of the ways that technology benefits music education. Opportunities for practical development of skills, work, and play with a variety of software and hardware, and group projects that tie multiple technologies together in larger curricular units. Recent research readings. Consideration of the appropriateness for technology with special learners, as well as in ensemble and early childhood settings. Prerequisite: Music education majors or consent of instructor.

MUS 244 Social Foundations of Music Ed credit: 3 Hours.
Explores the social and cultural contexts of music teaching and learning from multiple perspectives. Examines contemporary and historical American music education philosophy, practice, and policy as well as music education’s place within broader systems of education. Special emphasis will be placed on issues of cultural diversity and social justice and problematizing dominant narratives and potential assumptions relevant to music education. Employs scholarship within and beyond music education concerned with critical theories, history, philosophy, and sociology. Prerequisite: MUS 240 and completion of campus Composition I general education requirement. For music education majors only.

This course satisfies the General Education Criteria for:
Advanced Composition.
MUS 250  University Orchestra  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 252  Ethnomusicology Perf Ensembles  credit: 1 Hour.
Instruction and experience in the performance of various non-Western
and vernacular music traditions such as African mbira, Andean panpipes,
North American string band, European traditional music, etc. Topics
vary according to available instructors. May be repeated in the same or
subsequent terms. Prerequisite: Consent of instructor.

MUS 253  Collegium Musicum  credit: 1 Hour.
Performs medieval, renaissance, and baroque music; various small
groups formed for the performance of sonatas and cantatas of Bach and
Handel, wind serenades of Mozart, etc. Interested students may play on
lute, harpsichord, and other instruments from the University's collection.
May be repeated. Prerequisite: Consent of instructor.

MUS 254  String Ensemble  credit: 1 Hour.
Participation in trios, quartets, quintets, etc., for the study of chamber
music literature. May be repeated. Prerequisite: Consent of instructor.

MUS 255  Woodwind Ensemble  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 256  Brass Ensemble  credit: 1 Hour.
Ensembles of mixed brasses in both small and large forms. May be
repeated. Prerequisite: Consent of instructor.

MUS 257  Percussion Ensemble  credit: 1 Hour.
May be repeated in the same term. Prerequisite: Consent of instructor.

MUS 258  Piano Ensemble  credit: 1 Hour.
May be repeated. Prerequisite: Consent of instructor.

MUS 260  Oratorio Society  credit: 1 Hour.
An advanced mixed-voice chorus open to students, faculty, and members
of the community. Performance of oratorios and other major choral
works in cooperation with the University Symphony Orchestra or Wind
Symphony. May be repeated. Prerequisite: Consent of instructor.

MUS 261  Choral Ensemble  credit: 1 Hour.
A mixed-voice chorus for average and beginning singers open to
students, faculty, and members of the community. Performance of
cantatas and other choral works. May be repeated. Prerequisite: Consent
of instructor.

MUS 262  Women's Glee Club  credit: 1 Hour.
Practical experience in the rehearsal and public performance of choral
music of various periods and styles. Open to all women students. May be
repeated. Prerequisite: Consent of instructor.

MUS 263  Men's Glee Club  credit: 1 Hour.
Practical experience in the rehearsal and public performance of choral
music of various periods and styles. Open to all men students. May be
repeated. Prerequisite: Consent of instructor.

MUS 264  Concert Choir  credit: 1 Hour.
A highly advanced group of competent student singers. Practical
experience in mixed-voice singing of accompanied and unaccompanied
music of various periods and styles. May be repeated. Prerequisite: Consent
of instructor.

MUS 265  Opera  credit: 1 Hour.
Preparation and public performance of grand or light opera. Includes
only singing and acting (students desiring experience in costuming,
stage management, scenery, publicity, etc., should apply to the University
Theatre Department, which cooperates in the opera productions). May be
repeated. Prerequisite: Consent of instructor.

MUS 266  Jazz Ensemble  credit: 1 Hour.
Ensembles of various sizes designed to acquaint proficient
instrumentalists with jazz compositions, arrangements, and
improvisational procedures, and to promote a high degree of stylistic and
technical competence in performance. May be repeated. Prerequisite:
Consent of instructor.

MUS 267  Chamber Music  credit: 1 Hour.
Students will be assigned to chamber groups that will be coached on
a weekly basis by members of the faculty. One public performance per term
may be required. May be repeated. Prerequisite: Music majors or consent
of instructor.

MUS 268  Wind Symphony  credit: 1 Hour.
Maintains a complete large wind ensemble instrumentation for the study
and performance of band/wind ensemble/chamber wind literature. Open
to all students who have been accepted by audition, with assignments
made according to proficiency and instrumentation. Completion of
each course involves, in addition to the regular schedule of rehearsals,
participation in public performances by the ensemble. May be repeated.
Prerequisite: Consent of instructor.

MUS 269  Wind Orchestra  credit: 1 Hour.
Maintains a large wind ensemble instrumentation for the study and
performance of all types of band literature. Open to all students who
have been accepted by audition, with assignments made according to
proficiency and instrumentation. Completion of each course involves,
in addition to the regular schedule of rehearsals, participation in public
performances by the band. May be repeated in separate terms.
Prerequisite: Consent of instructor.

MUS 270  Harding Symphonic Band  credit: 1 Hour.
Maintains the instrumentation of a standard concert band. The
literature studied and performed is of the highest caliber and technical
difficulty. Open to all students who have been accepted by audition,
with assignments made according to proficiency and instrumentation.
Completion of each course involves, in addition to the regular schedule of rehearsals,
participation in public performances by the band. May be repeated. Prerequisite: Consent
of instructor.

MUS 271  Hindsley Symphonic Band  credit: 1 Hour.
Maintains the instrumentation of a standard concert band. The
literature studied and performed is of the highest caliber and technical
difficulty. Open to all students who have been accepted by audition,
with assignments made according to proficiency and instrumentation.
Completion of each course involves, in addition to the regular schedule of rehearsals,
participation in public performances by the band. May be repeated in separate terms.
Prerequisite: Consent of instructor.

MUS 272  Concert Band  credit: 1 Hour.
Maintains the instrumentation of a large concert band. The high
quality band literature is technically less difficult than that of MUS 268-
271. Open to all students who have been accepted by audition,
with assignments made according to proficiency and instrumentation.
Completion of each course involves, in addition to the regular schedule of rehearsals,
participation in public performances by the band. May be repeated in separate terms.
Prerequisite: Consent of instructor.

MUS 273  Marching Illini  credit: 1 to 3 Hours.
Prepares and performs music of the highest available quality in at least
six shows per football season. Open to all students who have been
accepted by audition, with assignments made according to proficiency
and instrumentation. Completion of each course involves, in addition to
the regular schedule of rehearsals, participation in public performances
by the band. May be repeated. Prerequisite: Consent of instructor.

Information listed in this catalog is current as of 04/2018
MUS 274  
Basketball Band  
credit: 1 Hour.
Performs for home basketball games. May be repeated. Credit is given for spring term only. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. Prerequisite: Band Division audition during early October, or consent of instructor.

MUS 275  
Brass Band  
credit: 1 Hour.
Maintains a complete British Brass Band instrumentation for the study and performance of all types and styles of brass band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the bands. May be repeated. Prerequisite: Concurrent registration in MUS 268, MUS 269, MUS 270, MUS 271, or MUS 272, and consent of instructor.

MUS 276  
Summer Band  
credit: 1 Hour.
Maintains the instrumentation of the standard band for the study and performance of all types of band literature. Open to all students who have been accepted by audition, with assignments made according to proficiency and instrumentation. Completion of each course involves, in addition to the regular schedule of rehearsals, participation in public performances by the band. May be repeated. Prerequisite: Consent of instructor.

MUS 299  
Thesis/Adv UG Honors in Music  
credit: 1 or 2 Hours.
Special individual research projects. Required of seniors in the history of music and music theory curricula; open also to advanced undergraduates, including James Scholars, who have achieved university or college honors and who desire to do research in specialized areas of music, including performance. May be repeated to a maximum of 4 hours. Counts for advanced hours in LAS. Prerequisite: Senior standing in the history of music or music theory curricula, or consent of instructor.

MUS 313  
The History of Music I  
credit: 3 Hours.
Survey of music and its development in Western civilization to about 1750. Emphasis on an acquaintance with representative musical works and style, and on understanding musical concepts in the light of their historical and general cultural context. Prerequisite: MUS 110 or consent of instructor.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

MUS 314  
The History of Music II  
credit: 3 Hours.
Survey of the development of music as an art in Western civilization from about 1750 to the present. Emphasizes an acquaintance with formal and stylistic problems through the study of representative works and on understanding specific musical concepts in the light of their historical and general cultural context. Prerequisite: MUS 313 or consent of instructor.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

MUS 317  
Intro to Piano Literature  
credit: 3 Hours.
Overview of representative works for the piano, from Scarlatti to the present. Prerequisite: MUS 314.

MUS 320  
Pre-Student Tchng Experience  
credit: 1 or 2 Hours.
Early Field Experiences in music teacher education. Includes supervised practicum work in observation, co-teaching, and individual teaching in local public schools. Twenty-seven (27) clock hours of EFE required for each hour of credit. May be repeated to a maximum of 4 hours, but only 2 hours may be applied toward the degree. Prerequisite: Music education majors or consent of instructor.

MUS 326  
PRACTICUM IN PIANO TEACHING  
credit: 2 Hours.
Coordinates lesson planning for teaching pre-college piano pupils with extensive teaching experience; gives close examination to beginning and intermediate teaching literature.

MUS 330  
Advanced Choral Conducting I  
credit: 2 Hours.
Laboratory/practicum course for review and development of choral conducting skills and their integration into the student’s full complement of teaching skills and knowledge. Score analysis and preparation lead to the application of teaching and rehearsal skills. Prerequisite: Music education majors; MUS 242; concurrent registration in MUS 348 is required.

MUS 331  
Advanced Choral Conducting II  
credit: 2 Hours.
Practicum course emphasizing teaching and rehearsal techniques, score preparation, and interpretation. Focuses on the integration of aural, vocal, keyboard, and conducting skills for the choral teacher/conductor. Prerequisite: MUS 330; music education majors, or consent of instructor.

MUS 332  
Advanced Wind Band Conducting and Rehearsal Strategies  
credit: 3 Hours.
Develops skills in rehearsal techniques and aural skills. Application of teaching strategies and learning theory. Refinement of fundamental concepts of gesture; development of advanced conducting skills and score reading skills; development of score analysis techniques. Prerequisite: MUS 242; instrumental music education majors, or consent of instructor.

MUS 333  
Cond/Teach Strings-Grp Setting  
credit: 3 Hours.
Survey of concert and training literature for school orchestras; refinement of fundamental concepts of gesture; development of advanced conducting skills and score reading, and score analysis. Prerequisite: MUS 242; music education majors, or consent of instructor.

MUS 335  
Elem and Mid Sch Instrum Music  
credit: 2 Hours.
Examines pedagogical and organizational techniques for teaching elementary and middle school instrumental music. Must be taken concurrently with MUS 320 WP or MUS 320 S, an Early Field Experience. Prerequisite: May only be taken one or two semesters prior to student teaching; music education majors, or consent of instructor.

MUS 336  
Service Learning in Music Education  
credit: 3 Hours.
Service Learning and participatory action research in music education. Students facilitate music learning in cooperation with community partners in Champaign-Urbana, Illinois and surrounding communities. Collaborative planning, learning through inquiry, engaged scholarship, and democratic teaching practices. Student teams develop or work on ongoing projects with community teachers, musicians, or organizations. May be repeated in separate terms.
MUS 339 Principles and Techniques in Music Education credit: 3 Hours.
Overview of music education in K-12 settings, emphasizing philosophy and history of music education, jazz education, methodologies commonly utilized in school curricula, music in special education, and classroom/rehearsal management. Five weeks are devoted to content exploring basic statistical techniques and procedures. Prerequisite: Senior standing in music education, or consent of instructor, plus 80 hours of early field experiences in the teaching of music; completion of the Quantitative Reasoning I requirement. This course satisfies the General Education Criteria for: Quantitative Reasoning II

MUS 342 Music in Childhood credit: 3 Hours.
Provides a model of comprehensive musicianship in general music K-5. Considers musical and conceptual development of learners at various ages. Includes lesson planning and assessment strategies for classroom music instruction including listening, performing, and composing experiences. Prerequisite: MUS 240.

MUS 343 Music in Adolescence credit: 3 Hours.
Detailed consideration of the general music program in both middle school and high school. Emphasis on adolescent characteristics and alternative methods of instruction. Prerequisite: Restricted to Music Education majors or consent of instructor.

MUS 344 Wind Band Methods for Secondary Ensembles credit: 2 Hours.
Surveys concert and training literature for the high school band; develops administrative skills for organizing a school music program; increases skills in rehearsal techniques and addresses current issues in music education. Prerequisite: MUS 332; junior standing in instrumental music education; completion of campus Composition I general education requirement; approval of instructor. This course satisfies the General Education Criteria for: Advanced Composition

MUS 345 Mus Methods in Early Childhood credit: 2 Hours.
Approaches for teaching music to children ages 2 through 8 in preschool and early elementary school settings. Focuses on understanding the role of music in early childhood, developing musical concepts, and organizing appropriate learning experiences.

MUS 346 Choral Methods for Secondary Ensembles credit: 2 Hours.
Lecture/discussion methods course that addresses curriculum development, organization/administration, repertoire, vocal pedagogy and the changing voice, diction, and additional topics typical of secondary school choral music program. Prerequisite: Music education majors or consent of instructor. Concurrent enrollment in MUS 348 required.

MUS 348 Choral Literature credit: 1 Hour.
Exploration of choral literature appropriate for middle and high school music programs. Students carry out lesson plans through peer teaching/rehearsal sequences,culminating in public performance. May be repeated to a maximum of 2 hours. Prerequisite: MUS 242. Restricted to Music Education majors, or consent of instructor.

MUS 350 Music Teaching in Ensemble Settings credit: 5 Hours.
Emphasizing the collaborative nature of teaching and learning, this team-taught, comprehensive course engages students in teaching music through school ensembles of all kinds. Topics include comprehensive musicianship, creativity and composition, instructional planning, management structures and routines, and inclusive practices in music education. Prerequisite: MUS 240 and MUS 242. Music education majors only. Junior standing required.

MUS 352 Teaching Strings in Group Settings credit: 3 Hours.
Organize and teach sequential string playing techniques to students in a group setting to develop their aural skills and left hand and right hand technique; refresh and improve the string performance skills gained in MUS 140; survey materials for string classes; develop awareness of personal teaching delivery skills. Offered only in spring semesters. Prerequisite: Music Education major, completion of MUS 320S, or consent of instructor.

MUS 360 Jazz Improv: Theory and Practice I credit: 2 Hours.
Fundamentals of jazz improvisation, with an emphasis on aural recognition of jazz chord voicings, harmonic progressions, and scales. Includes interactive software related to jazz improvisation ear-training. Application of melodic, harmonic, and rhythmic materials with regard to improvisation. Prerequisite: MUS 102 and MUS 108; MUS 167; or placement by exam with consent of instructor.

MUS 361 Jazz Improv: Theory and Practice II credit: 2 Hours.
Continuation of MUS 360. Exploration of advanced harmonic procedures with an emphasis on aural recognition of advanced forms of jazz harmonic structures, scales, chord qualities, and chord progressions. Additional emphasis on scales, chord/scale relationships, and standard jazz harmonic forms such as blues, standard jazz tunes, and modal tunes. Prerequisite: MUS 360, or placement by exam with consent of instructor.

MUS 362 Jazz Arranging I credit: 3 Hours.
Fundamentals of jazz arranging with an introduction to techniques such as schematic design, score layout, analysis, voicing, section writing, and orchestration. Emphasis on arranging for rhythm section, along with part layout and forms, voicing techniques, and basic harmonic concepts. Three major written projects are required. Prerequisite: MUS 166, or placement by exam/portfolio with consent of instructor.

MUS 363 Jazz Arranging II credit: 3 Hours.
Advanced melodic, harmonic, and rhythmic arranging techniques as applied to jazz instrumentation. Emphasis on practice in analysis, voicing and orchestration techniques such as 4-way closed position double lead, 4-way closed-position drop-2 double lead, 4-way closed position drop-2, and 4-and 5-way closed position. Three major written projects are required. Prerequisite: MUS 362, or placement by exam/portfolio with consent of instructor.

MUS 364 Jazz Composition I credit: 2 Hours.
Examines the basic elements of jazz composition from melodic, harmonic, rhythmic, and tone color perspectives focusing on distinctive styles of jazz. Promotes a better understanding of various jazz compositional styles, jazz composers, creative elements and abilities, melody writing, harmonic systems, rhythmic compositional devices, and jazz reharmonization techniques. Prerequisite: MUS 363.

MUS 365 Jazz Composition II credit: 2 Hours.
Examines advanced elements of jazz composition such as melody construction, harmonic devices, and rhythmic devices used in modern jazz compositions as a continuation and expansion of materials presented in MUS 364. Melodic and harmonic contouring, asymmetrical forms, advanced chromatic-modal construction, and creative practices will be discussed and practiced through written assignments and projects. Prerequisite: MUS 364, or consent of instructor upon approval of a portfolio of jazz compositions.
MUS 368  Jazz Improvisation Styles I  credit: 2 Hours.
Survey of improvisational/jazz artists. Students write and present four papers over the course of the semester, accompanied by four transcriptions of four major improvisational/jazz artists representing four distinct improvisational/jazz styles. All presentations will be done in class. Prerequisite: Consent of instructor.

MUS 369  Jazz Improvisation Styles II  credit: 2 Hours.
A continuation of the survey of improvisational/jazz artists at an advanced level. Students write and present four papers and associated recording transcriptions of four advanced improvisational/jazz artists representing four distinct and advanced improvisational/jazz styles. All presentations will be done in class. Prerequisite: MUS 368 or consent of instructor.

MUS 400  Counterpoint and Fugue  credit: 3 Hours.
Study of contrapuntal writing, including fugue, with emphasis on the works of J.S. Bach. Includes analysis of contrapuntal writing. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208, or consent of instructor.

MUS 404  Contemp Compos Techniques  credit: 2 Hours.
Studies in specialized areas of composition for advanced undergraduates and graduates majoring in composition-theory. May be elected by others with consent of instructor. 2 undergraduate hours. 2 graduate hours. May be repeated. Prerequisite: MUS 106, MUS 202 and MUS 208, or consent of instructor.

MUS 405  Analytical Systems 20thC Mus  credit: 3 Hours.
Study of various analytical techniques developed for music written in the twentieth century based on compositional procedures other than those derived from the common practice period. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208, or consent of instructor.

MUS 406  Advanced Composition  credit: 3 Hours.
Individual instruction in contemporary musical practice. Students submit scores of their compositions to the composition faculty in order to obtain consent to register; consent is granted on the basis of the quality of the music the student has composed and the level of skill demonstrated in the work submitted. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: For undergraduates, MUS 206 and consent of composition faculty; for graduate students, consent of composition faculty.

MUS 407  Elect Music Techniques I  credit: 3 Hours.
Introduces electroacoustic music, including historical background, music literature, techniques of notation and realization, sound synthesis, analog and digital recording, mixing and processing, and compositional application in the areas of musique concrete, electronic music, and Musical Instrument Digital Interface (MIDI) technology as applied to electroacoustic concert art music. Weekly lab times assigned. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing in music, or consent of instructor.

MUS 408  Analysis of Musical Form  credit: 3 Hours.
Extensive study of the formal structure of representative musical compositions from various historical periods: (a) Renaissance and Baroque; (b) Viennese classical; (c) nineteenth century; (d) first half of twentieth century; and (e) since World War II. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 9 hours. Prerequisite: MUS 202 and MUS 208.

MUS 409  Elec Music Techniques II  credit: 2 Hours.
Intermediate level study of Musical Instrument Digital Interface (MIDI) technology, sound design, digital audio engineering techniques, multi-track digital editing and audio processing in music composition, and the study of compositional, technical, and performance considerations as applied to electroacoustic concert art music. Weekly lab times are assigned. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 407 or placement by examination.

MUS 410  Period Studies in Musicology  credit: 3 Hours.
Intensive study of the music of a specific historical period. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: MUS 313 and MUS 314; junior standing in music or consent of instructor.

MUS 411  Genre Studies in Musicology  credit: 3 Hours.
Examination of one or more aspects of musical genre defined by composer(s), historical era, region, performance issues, philosophy, etc. Can include the study of the relationship between genre and performance, genre and pedagogy, genre and the creative process, genre and reception, etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314; junior standing; or consent of instructor.

MUS 412  Composer Studies in Musicology  credit: 3 Hours.
Intensive study of the music of a specific composer. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours if topic varies. Prerequisite: MUS 313 and MUS 314, junior standing in music or consent of instructor.

MUS 413  Music and Performance  credit: 3 Hours.
Examination of one or more aspects of musical performance defined by historical era, region, genre, philosophy, etc. Can include the study of the relationship between performance, improvisation and creative process; performance and publication; performance practices of a specific genre, period, or community; etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314; junior standing; or consent of instructor.

MUS 414  Music and Society  credit: 3 Hours.
Examination of the social context, function and meaning of music/music-making in one or more communities, from one or more areas of the world, in one or more time periods. May address music in relation to such social issues as gender, ethnicity, politics, etc. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours if topic varies. Prerequisite: MUS 313 and MUS 314, and consent of instructor.

MUS 415  Music and Media  credit: 3 Hours.
Intensive study of the impact of various media such as recordings, radio, film, television and/or computer technology on the creation, performance, dissemination and/or patronage of a given repertoire. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 12 hours if topic varies. Prerequisite: MUS 313 and MUS 314, junior standing in music; or consent of instructor.

MUS 416  Anthropology of Music  credit: 3 Hours.
Introduction to the anthropological study of music, including the role of music in the world’s societies and non-Western musical systems and cultures. Same as ANTH 416. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANTH 103 or consent of instructor.
MUS 418 Regional Studies in Musicology credit: 3 or 4 Hours.
Seminar devoted to intensive study in the music of specific peoples, states, or geographic regions from around the world. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 12 undergraduate hours or 16 graduate hours. Prerequisite: MUS 313 and MUS 314; junior standing; MUS 528A (for DMA or MM performance or composition students); or consent of instructor.

MUS 419 Sr Seminar in Musicology credit: 3 Hours.
Intensive capstone seminar for musicology majors directed at graduate school preparation, senior thesis or project development, professional portfolio design, and the cultivation of scholarly writing skills. Introduces advanced research methods and analytical paradigms. Addresses special topics or issues tailored to student interests and faculty expertise, as well as contemporary developments in the discipline or current musical events, from diverse perspectives. 3 undergraduate hours. No graduate credit. Prerequisite: For senior musicology majors (BA or BM) with senior standing, or consent of instructor.

MUS 420 The History of Opera credit: 3 Hours.
Surveys opera and related forms from the end of the 16th century to the present; studies representative works in some detail. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 314 or consent of instructor.

MUS 421 The Music of America credit: 3 Hours.
Study of chamber, choral, and orchestral music written by American composers from about 1850 to the present; jazz and its offshoots; folk and popular music; and experimental music in America. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: Senior standing in music or consent of instructor.

MUS 422 Musical Theatre Repertoire credit: 2 Hours.
Musical Theatre Repertoire is a high-contact class, conducted in a studio setting. Methods of instruction include vocal exercises, studying and singing Musical Theatre repertoire, song memorization, studying and evaluating performances, and utilizing both class and individual evaluations. Vocal health and wellness are stressed as students become familiar with styles of singing in both classical and contemporary Musical Theatre. 2 undergraduate hours. 2 graduate hours. May be repeated in separate terms to a maximum of 8 undergraduate hours or 4 graduate hours. Prerequisite: Students must have two years of applied voice lessons (MUS 181) in order to register for this course. For Music majors, or by consent of instructor.

MUS 423 Intro to Piano Technology credit: 2 Hours.
Introduction to the mechanism and operation of the modern piano, including the historical development of keyboard instruments. Introduction to tuning and regulation, theory, and practice. No previous experience tuning or regulating pianos is necessary. 2 undergraduate hours. 2 graduate hours.

MUS 424 Musical Informatics credit: 3 Hours.
A 21st century approach to music theory: fundamental elements of music illustrated through logical and mathematical concepts, unencumbered by stylistic considerations. Defines the internal structure of sounds and presents a few general methods of organizing them into complex compositions. Intended for musicians having limited familiarity with mathematics, as well as scientifically inclined students with little musical background. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

MUS 426 Orchestration credit: 3 Hours.
A thorough study of writing for all of the orchestral instruments in combinations ranging from solo to varying sizes of chamber ensembles and full orchestra. Includes analysis of musical examples and composing short works for various instrumental ensembles. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 202 and MUS 208.

MUS 430 Applied Music Pedagogy credit: 2 Hours.
Survey of techniques, practices, and materials; presentation of group and individual instruction; an approach to teaching problems, tone production, musical styles, and interpretation for various age levels; actual teaching experience under faculty supervision. Required of performance majors in voice. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing in music or consent of instructor.

MUS 431 Piano Pedagogy I credit: 2 Hours.
Objectives, techniques, literature, and materials for teaching piano to children from about ages five through ten (elementary level); observation of lessons and supervised student teaching experience. 2 undergraduate hours. 2 graduate hours. Required of piano performance majors. Prerequisite: Senior standing in music or music education, or consent of instructor.

MUS 432 Piano Pedagogy II credit: 2 Hours.
Objectives, techniques, literature, and materials for teaching the young pianist from about ages 11 through 18 (middle school to pre-college level); teaching the adult beginner; observation of lessons and supervised student teaching experience. 2 undergraduate hours. 2 graduate hours. Required of piano performance majors. Prerequisite: Senior standing in music or music education, or consent of instructor.

MUS 433 Music Interdisciplinary Curriculum credit: 2 or 4 Hours.
This course focuses on the principles and processes of an interdisciplinary curriculum, with primary emphasis on music's relationship to other areas of study. The organizing framework for the course is grounded on the premise that music influences, and in turn is influenced by, complementary realms of human experience. The purpose is to enable music educators and other interested persons to create sound educative experiences in music built upon strong relationships among persons, ideas, artistic practices, and disciplines. 2 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Undergraduate music students with junior or senior standing. Graduate music students, or consent of instructor.

MUS 434 Assessment/Eval in Music Ed credit: 3 or 4 Hours.
Overview of assessment and evaluation techniques in music education, emphasizing the design of performance assessments, how to collect quality data in the music classroom, and how to use data to alter instruction. Five weeks devoted to context exploring basic statistical techniques, including how to interpret data. 3 undergraduate hours. 4 graduate hours. Prerequisite: Completion of Quantitative Reasoning I requirement. For Music Ed majors with Junior or Senior standing, graduate Music Ed students, or consent of instructor.
MUS 435  Jazz Aural Skills I credit: 2 Hours.
Jazz Aural Skills I is the first of two courses designed to equip students for the rigorous demands of a professional jazz musician. The course is designed to strengthen the student's ability to recognize chord progressions, scales, chord alterations, and common forms in order to react and integrate them into solo improvisation and group playing. Students learn how to strengthen their own relative pitch recognition through singing and/or playing their instrument(s), including piano. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 107, 108, 172 and 173, or by consent of instructor. This course is open to jazz majors, music majors, and interested students.

MUS 436  Jazz Aural Skills II credit: 2 Hours.
Jazz Aural Skills II is a continuation of ear training for the jazz musician and composer. The ability to hear all parts of a tune, chord changes, rhythmic patterns, and the harmonic implications of the chord extensions is considered a fundamental essential skill of the professional jazz and commercial musician. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 107, 108, 173 and 435, or by consent of instructor.

MUS 437  Popular Music Pedagogy credit: 2 or 4 Hours.
Explores various vernacular, popular, and folk musical traditions. Experiences will focus on oral/aural creation and performance as well as responding to and connecting with relevant sociocultural issues and contexts. Special emphasis will include the potential application and inclusion of these musical traditions within school music settings. 2 undergraduate hours. 2 or 4 graduate hours. Prerequisite: MUS 342 or 343, or graduate standing in music education.

MUS 438  Designing Musical Experiences credit: 2 Hours.
Students develop their musicianship through reflective engagement with a variety of approaches to non-performance oriented music learning. Equal emphasis is placed on various kinds of music (literature and repertoire) and the ways in which teachers can structure experiences for students. Students will plan and lead experiences, sing and perform on a variety of instruments, and review recent research and scholarship in the field. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 240 and MUS 342.

MUS 439  Differentiating Music Instruction credit: 3 Hours.
Strategies for adapting and modifying music instruction for students with disabilities in general, choral, and instrumental music classes. 3 undergraduate hours. 3 graduate hours. Prerequisite: MUS 342.

MUS 440  Marching Band Procedures credit: 2 Hours.
Detailed consideration of principles and procedures for preparing a marching band to participate in parades, ceremonies, and shows for sports events. 2 undergraduate hours. 2 graduate hours. Prerequisite: Junior standing in instrumental music education.

MUS 441  Contemp Issues in Inst Mus Ed credit: 2 Hours.
Research-based investigation of concepts and principles of school band programs including repertoire and curriculum, score study and teaching strategies, and leadership and advocacy. 2 undergraduate hours. 2 graduate hours. Prerequisite: Completion of student teaching, graduate standing in music education, or consent of instructor.

MUS 442  Band Arranging credit: 2 Hours.
Development of basic scoring and arranging skills for various small instrumental ensembles and marching band. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 202 and MUS 208 or equivalent.

MUS 443  Orchestral Repertory credit: 1 Hour.
Laboratory class designed for brass, woodwind, and percussion performance majors who wish to become more familiar with orchestral literature and a variety of interpretational orchestral techniques. Emphasis on individual and sectional parts of orchestral masterworks. 1 undergraduate hour. 1 graduate hour. May be repeated to a maximum of 4 undergraduate hours and 4 graduate hours. A maximum of 6 hours of credit is cumulative within either the BM or MM degree, or a combination of the two. Prerequisite: Consent of instructor in consultation with the appropriate studio teacher.

MUS 444  Healthy Music Practices credit: 2 Hours.
This course is intended for the promotion of healthy musical and lifestyle habits and choices, as well as enhancement as a performer and teacher through knowledge of all aspects of their musical selves - physical, psychological, and spiritual. The course will focus on general self-care but will also cover the four target areas identified by the Health Promotion in Schools of Music Conference as crucial for musicians: muscularkeletal issues, hearing conservation, voice care, and psychological issues. 2 undergraduate hours. 2 graduate hours. Prerequisite: Music students, or instructor approval.

MUS 446  Songwriting credit: 2 Hours.
Develops and refines music composition techniques and self-expression in popular, vernacular, and folk music genres. Students will write, record, and perform original songs for class, provide constructive feedback for their peers, reflect personally on their experiences through journaling, and will engage with readings and recordings relevant to class activities. Students should be comfortable singing and creating/performing on an accompanying instrument (e.g. guitar, piano, self-composed digital backing tracks). 2 undergraduate hours. 2 graduate hours.

MUS 447  Advanced Music Ed Technology credit: 2 or 4 Hours.
A deepening of ideas and skills presented in MUS 243. Provides advanced exploration and construction of digital learning environments, as well as exploring the computer as a musical instrument. Students will work alone and in teams to create curricular materials grounded by historical, philosophical, and research in technology and education. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: MUS 243, graduate standing, or consent of instructor.

MUS 448  Computer Music credit: 3 Hours.
Introduction to the multiple ways computers are used in music, with an emphasis on digital sounds synthesis and composition. Elements of acoustics, psychoacoustics, and programming are introduced in order to allow students to use and modify the existing software DISSCO/Sound Maker developed at UIUC. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

MUS 449  Music in Early Childhood credit: 2 Hours.
Provides pre-service music educators with a framework for designing and implementing developmentally appropriate music learning experiences for young children. Includes a survey of recent developments in the fields of early childhood and music education research and pedagogy that emphasize: assessing musical growth, integrating music into the curriculum, and accommodating individual differences in diverse learning settings. Early field experiences at the UIUC Child Development Laboratory are included in the course work. 2 undergraduate hours. 2 graduate hours. Prerequisite: Senior or graduate standing in music, or consent of instructor.
MUS 450  Advanced Ensemble Music  credit: 1 Hour.
Selected projects in the study and performance of ensemble literature, including the areas of operatic, instrumental, vocal-choral, and accompanying. 1 undergraduate hour. 1 graduate hour. May be repeated. Prerequisite: Consent of instructor.

MUS 451  Basso Continuo  credit: 2 Hours.
Introduction to figured bass realization. Techniques of accompanying singers and instrumentalists from a figured bass. 2 undergraduate hours. 2 graduate hours. May be repeated. Prerequisite: Advanced standing in music as a piano, organ, harpsichord, or accompanying major, or consent of instructor.

MUS 452  Special Topics in Harpsichord  credit: 2 Hours.
Practical and theoretical studies in historical tuning and temperament; early fingerings, harpsichord tutors (treatises), styles of figured bass improvisation, harpsichord literature, and other topics related to harpsichord performance. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MUS 453  Special Topics in Organ  credit: 2 Hours.
Development of practical keyboard skills related primarily to the work of the church organist: transposition, score-reading, harmonization, modulation, hymn-playing, and solo and anthem accompaniment. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: Consent of instructor.

MUS 454  Advanced Keyboard Skills I  credit: 2 Hours.
Comprehensive keyboard musicianship course for advanced pianists emphasizing the development of the following skills: sight reading, harmonization, transposition, improvisation, playing by ear, and vocal and instrumental score reading. Ensemble piano music is performed. This course addresses the keyboard competency policy for undergraduate piano performance majors. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 180 (12 hours completed) or MUS 175, and MUS 202 and MUS 208 or equivalent; and consent of instructor.

MUS 455  Advanced Keyboard Skills II  credit: 2 Hours.
Continuation of the topics introduced in MUS 454. 2 undergraduate hours. 2 graduate hours. Prerequisite: MUS 180 (12 hours completed) or MUS 175; MUS 202 and MUS 208 or equivalent; and consent of instructor.

MUS 456  Adv Jazz Piano Improvisation  credit: 2 Hours.
Study of solo jazz piano improvisation on an advanced level. Includes practical experience in traditional, modern, and abstract solo performance, as well as theoretical, stylistic, and historical background. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: MUS 161 or equivalent.

MUS 457  Organ History and Design  credit: 2 Hours.
Survey of the important national and historical styles of organ building and their relation to musical composition, performance practice, and modern organ design. Includes visits to regional organ installations chosen for their pertinent design features. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor.

MUS 459  Professional Internship  credit: 0 to 12 Hours.
Professional work with an approved musical organization that is external to the School of Music, in an area related to the student's academic program; exposure to and participation in professional music-related activities. Full documentation and approval of internship activities required. The default credit will always be 0 credits unless a student, with the faculty advisor's support, petitions the appropriate academic committee (UG or Grad) with a detailed proposal outlining the academic nature, content, and scope of the internship. 0 to 12 undergraduate hours. 0 to 12 graduate hours. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours if topics vary.

MUS 461  Lyric Theatre Voice  credit: 2 Hours.
This is an individualized voice class setting where the student and teacher work exclusively with the technical, musical, and communicative aspects of Lyric Theatre repertoire in a one-on-one setting. Students receive a great deal of feedback from the instructor during each weekly lesson. 2 undergraduate hours. 2 graduate hours. Prerequisite: Passing of a performance audition is required prior to the initial registration in any applied music course. For Music majors only, or by consent of instructor.
MUS 468 Lyric Studio credit: 2 Hours.
Acquaints the student with a variety of opera, operetta, and musical theatre literature in contrasting styles and historical periods, culminating in a public performance of sung theatre (opera, operetta, musical theatre) productions and scenes each semester. Develops skills as both a solo and ensemble performer. Introduces skills related to the field of sung theatre performance, including, but not limited to, stage movement, mind-body awareness, diction, acting, and improvisational techniques. Forms and integrates a performing ensemble to serve as an outreach group that may perform in select venues off campus. Intended for voice majors (BM-Performance and BMA) and vocal accompanying/coaching majors; others by consent of instructor. Audition required. 2 undergraduate hours. 2 graduate hours. May be repeated in separate terms to a maximum of 12 undergraduate hours or 8 graduate hours. Prerequisite: Consent of instructor.

MUS 469 Opera Production I credit: 2 or 3 Hours.
Studies the problems of the lyric stage. Investigation of and practice with casting methods, program selection, production procedures, stage direction, coaching methods, and opera dynamics. 3 undergraduate hours. 2 graduate hours. May be repeated up to a maximum of 6 undergraduate hours or 4 graduate hours. Prerequisite: MUS 265 and MUS 481; consent of instructor.

MUS 470 Opera Production II credit: 2 or 3 Hours.
Continuation of topics introduced in MUS 469. 3 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 4 graduate hours. Prerequisite: MUS 469.

MUS 471 Composer-Chor Workshop credit: 2 Hours.
Same as DANC 464. See DANC 464.

MUS 472 Senior Project Showcase credit: 1 Hour.
Senior Project Showcase will be a sequenced, two semester course, culminating in a final performance(s) in the spring semester. Students will use class time for individual and team writing during the fall semester, presenting their work for faculty approval at the end of the first semester. Students will meet weekly in large and small groups, as well as frequent individual sessions with their advisors, receiving and providing feedback, working on staging, choreography and arrangements, and, later, assisting in the production design as well. Improvisation will play a central role in the development of concept and specific songs from character driven work. 1 undergraduate hour. No graduate credit. May be repeated to a maximum of 2 hours in separate terms. Prerequisite: Musical Theatre Repertoire (MUS 422). For BMA in Lyric Theatre majors only.

MUS 474 Vocal Repertoire I credit: 1 Hour.
Study of the standard solo literature including solo excerpts from larger works, i.e., cantata, oratorio, and opera. Supplements the student’s knowledge of the literature in his/her major field. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing in voice, or consent of instructor and concurrent registration in MUS 481.

MUS 475 Vocal Repertoire II credit: 1 Hour.
Continuation of the study of the standard solo literature including solo excerpts from larger works, i.e., cantata, oratorio, and opera. Supplements the student’s knowledge of the literature in his/her major field. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing in voice, or consent of instructor and concurrent registration in MUS 481.

MUS 477 Principles of Accompanying credit: 2 or 4 Hours.
Principles of accompanying singers and instrumentalists. Practical experience in accompanying and facility in sight reading for keyboard performers. 2 or 4 undergraduate hours. 2 or 4 graduate hours. May be repeated. (Summer session, 2 undergraduate or graduate hours). Prerequisite: Advanced undergraduate or graduate standing in music or music education, and consent of instructor.

MUS 478 Guitar credit: 2 to 4 Hours.
Instruction in guitar at the advanced undergraduate and graduate levels, predominantly classical. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing or above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 479 Harpsichord credit: 2 to 4 Hours.
Instruction in harpsichord at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors, junior standing or above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 480 Piano credit: 2 to 4 Hours.
Instruction in piano at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: For students in the Bachelor of Music program. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 481 Voice credit: 2 to 4 Hours.
Instruction in voice at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Primarily for music majors, junior standing and above. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 482 Organ credit: 2 to 4 Hours.
Instruction in organ at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: For students in the Bachelor of Music program. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 483 Violin credit: 2 to 4 Hours.
Instruction in violin at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.
MUS 484 Viola credit: 2 to 4 Hours.
Instruction in viola at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 485 Cello credit: 2 to 4 Hours.
Instruction in cello at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 486 Double Bass credit: 2 to 4 Hours.
Instruction in double bass at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 3 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Music majors must register concurrently in MUS 250. Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 487 Harp credit: 2 to 4 Hours.
Instruction in harp at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 488 Flute credit: 2 to 4 Hours.
Instruction in flute at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 489 Clarinet credit: 2 to 4 Hours.
Instruction in clarinet at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 490 Oboe credit: 2 to 4 Hours.
Instruction in oboe at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 or 4 undergraduate hours. 2 or 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 491 Bassoon credit: 2 to 4 Hours.
Instruction in bassoon at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 492 Saxophone credit: 2 to 4 Hours.
Instruction in saxophone at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 493 Trumpet credit: 2 to 4 Hours.
Instruction in cornet and trumpet at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 494 Horn credit: 2 to 4 Hours.
Instruction in horn at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 495 Trombone credit: 2 to 4 Hours.
Instruction in trombone at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 496 Euphonium credit: 2 to 4 Hours.
Instruction in euphonium at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 497 Tuba credit: 2 to 4 Hours.
Instruction in tuba at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.
MUS 498  Percussion  credit: 2 to 4 Hours.
Instruction in percussion at the advanced undergraduate and graduate level. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a maximum of 16 hours. Prerequisite: Primarily for music majors; junior standing. Passing of an audition is required prior to initial registration in any applied music course as approved by the faculty of the appropriate applied music division.

MUS 499  Proseminar in Music  credit: .5 to 4 Hours.
Special preparation in specialized fields of musicology, composition-theory, performance, and music education. 0.5 to 4 undergraduate hours. 0.5 to 4 graduate hours. May be repeated to a maximum of 8 hours; undergraduate students in open studies may repeat the course unlimited times with approval of the open studies advisor. Prerequisite: Senior or graduate standing in music or music education; consent of instructor.

MUS 500  Artist Diploma Recital  credit: 1 Hour.
Recital presented in partial fulfillment of requirements for the Artist Diploma. Approved for S/U grading only. May be repeated in the same term to a maximum of 2 hours. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Admission to the Artist Diploma program on the basis of an audition.

MUS 501  Grad Music History Review  credit: 4 Hours.
Review of Western music history both before 1750 (MUS 501 section A) and after 1750 (MUS 501 section B). Refreshes knowledge and understanding of representative examples of repertoire as well as the historical context in which music was written. May be repeated up to 8 hours in separate terms.

MUS 502  Graduate Theory Review  credit: 3 Hours.
Review of concepts from undergraduate music theory, including materials from the common practice period (50xB) and the twentieth century (50x5). Concepts studied include compositional materials and basic form and analysis. May be repeated up to 6 hours in separate terms if topics vary. Credit is not given towards graduate degrees.

MUS 504  Grad. Jazz Improv. I  credit: 4 Hours.
Practical application of mid- to upper level melodic, harmonic, and rhythmic principles used in jazz improvisation. Practice in the use of jazz chord qualities, upper extensions, and upper altered extensions used in jazz. Descriptions of mid-level improvisational sequences, modal improvising, symmetric/synthetic scale usage, symmetric chord usage, and approach-note/enclosure techniques. 4 graduate hours. No professional credit. Prerequisite: Graduate standing in Jazz Performance or consent of instructor. For Graduate Jazz Performance majors only.

MUS 505  Individ Topics in Music Theory  credit: 2 to 4 Hours.
Studies in specialized areas of analysis, theoretical systems, and aesthetics for composition and theory majors and cognates. May be repeated to a maximum of 12 hours. Prerequisite: Graduate standing in music and consent of instructor.

MUS 506  Graduate Level Composition  credit: 2 to 6 Hours.
Advanced instruction in contemporary compositional practice. May be repeated to a maximum of 16 hours.

MUS 507  Sem in Music Comp and Theory  credit: 2 or 4 Hours.
Intensive study of selected topics in the fields of music composition and theory. May be repeated. Prerequisite: Graduate standing in music composition-theory, or consent of instructor.

MUS 508  Grad. Jazz Improv. II  credit: 4 Hours.
The advanced application and examination of improvisational methods, device, and techniques. Study of advanced chord/scale relationships, modal harmonic concepts, harmonic analysis, patterns, linear/vertical approaches to improvising, and various jazz song forms including: advanced blues forms, asymmetrical standards, free improvisational forms, and advanced modal forms. 4 graduate hours. No professional credit. Prerequisite: MUS 504 or consent of instructor. Graduate Jazz Performance majors only.

MUS 509  Graduate Seminar in Band Conducting, History, and Literature  credit: 2 Hours.
This seminar will explore current topics facing the contemporary wind band conductor. Subject matter will include but not be limited to the exploration of new literature, works for chamber winds, and an historical survey of cornerstone repertoire. There will also be a conducting component, using a chamber ensemble. 2 graduate hours. No professional credit. May be repeated to a maximum of 8 hours in separate terms, if topics vary. Prerequisite: Graduate Band Conducting Majors and Admitted Cognate Program Members Only, or with Instructor permission.

MUS 510  History of Music Theory  credit: 4 Hours.
The development of theoretical concepts from antiquity through the Renaissance; a study of selected theoretical treatises written before 1550. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in musicology or composition-theory, or consent of instructor.

MUS 511  Fdns/Methods of Musicology I  credit: 4 Hours.
Introduction to the field for graduate students in musicology. Includes a study of bibliographic resources and techniques; on-line and CD ROM resources; database creation and management; basic historical method; evidence and argumentation in historical research; critical reading and logical analysis; and the nature and taxonomy of musical sources. Students begin a project on the state of research on a particular subject of their choice, which is to be completed in MUS 512. Prerequisite: Graduate standing in musicology or consent of instructor.

MUS 512  Fdns/Methods of Musicology II  credit: 4 Hours.
Continues materials introduced in MUS 511. Focuses on the major resources, intellectual history, theories and methodologies of ethnomusicology. Students pursue a state-of-research project on a topic relevant to their interests, selected in consultation with the instructor. 4 graduate hours. No professional credit. Prerequisite: MUS 511 or consent of instructor.

MUS 514  Musicology and Pedagogy  credit: 4 Hours.
Seminar-style practicum in the teaching of undergraduate courses in Western and non-western music for musicology and non-musicology majors. Intensive review and discussion of pedagogical materials. Instruction in syllabus and lecture design, presentational and discussion styles, and use of multimedia and educational technology. Prerequisite: Graduate musicology majors or consent of instructor.

MUS 515  Topics in Vocal Music  credit: 4 Hours.
Intensive or comparative study of specific repertoires of vocal music, of particular genres or styles of vocal composition or performance practice, and/or of particular vocal artists. 4 graduate hours. No professional credit. May be repeated to a maximum of 8 hours. Prerequisite: MUS 528A, graduate standing in musicology, or consent of instructor. For graduate students in Music.

Information listed in this catalog is current as of 04/2018
MUS 516 Fieldwork and Ethnography  credit: 4 Hours.
Prepares students for the various phases of preparing for and doing ethnomusicological fieldwork and ethnographic analysis and writing. Beginning with the project design and grand-writing stages, participants study and practice fieldwork techniques such as participant observations, interviewing, writing and analyzing field notes, and audio and video recording. The politics and ethics of fieldwork and ethnographic writing are considered through readings and discussion. Finally, a variety of approaches to ethnographic writing are considered through the study of finished musical ethnographies. Prerequisite: MUS 512 or consent of instructor.

MUS 517 Topics in Instrumental Music  credit: 4 Hours.
Intensive or comparative study of specific repertoires of instrumental music, or of particular genres or styles of instrumental composition and performance practice, and/or of particular instrumentalists. Includes broad reading in the social and intellectual climate of the musical practices at issue; pertinent analytical approaches or paradigms; and work with relevant source materials. 4 graduate hours. No professional credit. May be repeated to a maximum of 8 hours. Prerequisite: MUS 528A (consult Class Schedule for specific section information), or graduate standing in musicology, or consent of instructor.

MUS 518 Topics in Opera History  credit: 4 Hours.
Intensive study of a period or school of opera composition or of a particular aspect of the history of opera. Wide reading in the social and intellectual climate of the period concerned; literary, dramatic, and musical analysis; and work with primary sources, whenever possible. May be repeated to a maximum of 8 hours. (Summer session, 2 graduate hours). Prerequisite: MUS 528A (consult Class Schedule for specific section information), graduate standing in musicology, or consent of instructor.

MUS 519 Analytical Methods: Musicology  credit: 4 Hours.
Practical, hands-on experience with and exposure to the transcription, analysis, theoretical constructs, and/or notation of music from any of the world’s repertoires examined within a musicological framework and from both a synchronic and diachronic perspective. A series of case studies posing an array of technical problems encourage students to think critically about the place of theory and analysis in the history of musicology and their own work. May be repeated, as topics vary, in the same term to a maximum of 8 hours and in separate terms to a maximum of 12 hours. Students repeating should consult with the instructor before enrolling. Prerequisite: MUS 511 and MUS 512; or consent of instructor. Graduate students in music will be considered if they passed MUS 528A (consult Class Schedule for specific section information).

MUS 520 Soc Theory in Ethnomusicology  credit: 4 Hours.
History of theoretical ideas and paradigms that have influenced ethnomusicology from the late 19th century through the early 21st century. Helps students to sharpen their own theoretical tools for conducting ethnomusicological research, teaching, and analysis of existing literature. Participants will study theoretical approaches from anthropology, folkloristics, sociology, semiotics, linguistics, communications, and ethnomusicology that have been influential in ethnomusicology. Participants will write a series of short papers to develop their theoretical thinking, writing, and argumentation. Prerequisite: MUS 512, or consent of instructor. Graduate students in music will be considered if they passed MUS 528A (consult Class Schedule for specific section information).

MUS 521 Hist Studies in 20thC Music  credit: 2 or 4 Hours.
Seminar in contemporary music, with emphasis on the historical foundations of current trends in musical composition. May be repeated to a maximum of 8 hours. Prerequisite: MUS 528A (consult Class Schedule for specific section information), or graduate standing in musicology, or consent of instructor.

MUS 522 Special Topics Seminar  credit: 4 Hours.
Intensive study of special topics in musicology, whether historical, ethnomusical, or interdisciplinary in approach; seminar format. 4 graduate hours. No professional credit. May be repeated to a maximum of 8 hours. Prerequisite: MUS 528A or consent of instructor. For graduate students in Music; this course is intended for performance and composition majors, especially DMA students seeking advanced musicology credit.

MUS 523 Seminar in Musicology  credit: 4 Hours.
Problems in historical and systematic musicology or ethnomusicology; discussions of special problems and reports on individual research. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in musicology or consent of instructor. Graduate students in music will be considered if they passed MUS 528A (consult Class Schedule for specific section information).

MUS 524 Sem in Wrks of Select Composer  credit: 2 or 4 Hours.
Intensive historical and analytical study of the works of important composers; each term devoted to one composer. May be repeated to a maximum of 16. (Summer session, 2 or 4 graduate hours). Prerequisite: Graduate standing in musicology or consent of instructor. Graduate students in music will be considered if they passed MUS 528A (consult Class Schedule for specific section information).

MUS 525 Rdgs in Musical and Mus Theory  credit: 2 or 4 Hours.
Individual guidance in intensive readings in the literature of musicology or music theory, selected in consultation with the instructor and in accordance with the needs and interests of the student. May be repeated. (Summer session, 2 graduate hours). Prerequisite: Graduate standing in musicology or music theory.

MUS 526 Baroque Performance Practice  credit: 4 Hours.
Study of musical performance from ca. 1600-1750; discussion of musical instruments, ornamentation, basso continuo, etc., supplemented by demonstration performances using the University’s collection of instruments. Prerequisite: Graduate standing in music; for undergraduates, consent of instructor.

MUS 527 Classical Performance Practice  credit: 4 Hours.
Study of musical performance of the classical period, with an emphasis on the music of Haydn, Mozart, and early Beethoven; discussion of musical instruments, ornamentation, tempo, vibrato, etc., supplemented by demonstration performances using the University’s collection of instruments. Prerequisite: Graduate standing in music; for undergraduates, consent of instructor.

MUS 528 Res & Bibliography in Music  credit: 2 or 4 Hours.
Introduction to basic research skills appropriate to graduate study in music. Topics include accessing library resources and online databases; citation formats and plagiarism issues; critical reading and writing; and critical editions of music. For DMA students additional topics include skills for planning and writing a large research paper; study strategies and resources; and professional skills. All DMA students will complete a draft of their proposal for a final DMA project by the conclusion of this class. Required of all incoming graduate students in the MM (2 hours of credit), except those majoring in musicology, and in the DMA (4 hours of credit). Prerequisite: If required, all remedial coursework in ESL and/or music history must be satisfied prior to enrollment.
MUS 529  Transformative Music Education  credit: 2 or 4 Hours.
Music educators in all settings operate in a crosscurrent of social, musical, educational, and person values. In order to improve our professional practice and transform the profession, we need to examine society’s expectations of schools, education, music and the arts as well as our own. In this course, students will learn how sociology can be used to identify and clarify these connections.

MUS 530  Critical Readings in Mus Ed  credit: 1 to 4 Hours.
Independent critical readings and reflections of topics not treated in regularly scheduled courses. Includes program of approved research that culminates in a written report and/or formal presentations. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing in music education.

MUS 531  Psychology of Music  credit: 4 Hours.
The practice of making, creating, and experiencing music studied from a psychological perspective. Covers a range of psychological issues of interest to musicians and music educator, with the aim of challenging students to consider new ways of thinking about and participating in music as a result of having developed informed approaches to their own musical development and that of others. Prerequisite: Graduate standing in music education.

MUS 532  Global Perspectives on Mus Ed  credit: 4 Hours.
Examines current issues and trends within music education from both a local and global perspective. Focuses on the status and role of the music curriculum in contemporary schools and includes a critical examination of a range of evidence-based principles and approaches that govern music teaching and learning in formal and informal settings. Prerequisite: Graduate standing in music education or consent of instructor.

MUS 533  Research in Music Education  credit: 2 or 4 Hours.
Examines the sources of research literature in music education, provides an overview of traditional research methodologies, and introduces terminology and procedures utilized in qualitative and quantitative research. The purpose of the course is to enable graduate students to become intelligent consumers and interpreters of the music education research literature. Prerequisite: Advanced undergraduate or graduate standing in music or music education, or consent of instructor.

MUS 534  Doctoral Research in Mus Ed  credit: 4 Hours.
Considers music education research within a wider political and social context and addresses some of the dilemma and choices faced when designing and conducting research. Explores different approaches and considers theoretical and methodological issues relevant to the design and conduct of music education research. Students are expected to design a research project that will make a distinct contribution to knowledge and afford evidence of originality, either by the discovery of new evidence, or by the exercise of independent critical judgments. Prerequisite: MUS 533 or equivalent, or consent of instructor.

MUS 535  Philosophic Inquiry in Mus Ed  credit: 4 Hours.
Consideration of the philosophical assumptions that have guided decisions regarding why, what, and how music is taught in schools. Assists students in placing their present values and beliefs about music learning in the context of scholarly ideas on this subject. Addresses questions such as: What is music? Why do people listen to, create, and perform music? What is music’s value for individuals and society? Why teach music in school? How does music fit the large goals of schooling? How have answers to the foregoing changed over the past century? Prerequisite: Graduate standing in music or music education, or consent of instructor.

MUS 536  Soc-Cultur Inquiry Music Learn  credit: 4 Hours.
Consideration of the implications of developmental and socio-contextual inquiry for enhancing music education practice, with an examination of the implications of contemporary theory for the development of more effective teaching and learning processes. Prerequisite: Graduate standing in music or music education, or consent of instructor.

MUS 538  The General Music Program  credit: 2 or 4 Hours.
Concentration on contemporary practices and general music education. Overview of methodologies, historical approaches, and new trends. Additionally, students will explore and develop their own pedagogic content knowledge and general musicianship abilities (improvisation, composition, etc.) within the class setting. Prerequisite: Graduate standing in music education, or consent of instructor.

MUS 539  Music in Higher Education  credit: 2 or 4 Hours.
Provides an orientation to the organization, teaching and administration of music in the college or university. Includes topics such as preparing for and securing a college/university faculty position, promotion and tenure, faculty ethics and evaluation, and personnel/personal relations. Prerequisite: Graduate standing in music or music education.

MUS 540  Graduate Wind Band Conducting  credit: 4 Hours.
Examination of techniques of rehearsal, conducting, and preparation of wind band and chamber wind ensembles for concert performance. Emphasizes discussion, analysis, and preparation of selected scores for private and group lessons, as well as coaching/experience with live ensembles and select performance opportunities. May be repeated to a maximum of 16 hours. Prerequisite: MM wind band conducting students and/or consent of instructor.

MUS 541  Chor Prog in Secondary Schools  credit: 2 or 4 Hours.
In-depth study of the methods, materials and literature for teaching choral music in the secondary schools. Emphasis on curriculum development, musical literacy, and advanced rehearsal techniques. Prerequisite: Graduate standing in music or music education.

MUS 542  Technology in Music Education  credit: 2 or 4 Hours.
Critical exploration of technology in all aspects of music learning. Theoretical approaches, trends in software and hardware, and consideration of technologies as prosthetics of the mind are explored in a seminar format. Limited instruction in hardware and software are also included as needed. The higher amount of credit will require a major project outside of class in consultation with the instructor. Prerequisite: MUS 447; graduate standing, or consent of instructor.

MUS 543  Music Teacher Education  credit: 4 Hours.
This course focuses on the issues, concepts, and processes for the development of preservice music teachers. Intended for prospective university teachers of undergraduate music education majors. Covers educational philosophy, curriculum design, methods of teaching and evaluation, and student teaching and observational experiences as they relate to undergraduate music teacher programs. 4 graduate hours. No professional hours. Prerequisite: PhD Students in Music Education, or as approved by instructor.

MUS 544  Doctoral Seminar in Music Education  credit: 0 or 2 Hours.
Weekly seminar involving special topic discussions on critical issues within the profession. Required each semester for all resident doctoral students in music education during their residency. 0 or 2 graduate hours. No professional credit. Prerequisite: Graduate standing in music education.

MUS 545  Topics in Music Education  credit: 1 to 4 Hours.
In-depth study of a topic or issue within music education. May be repeated. Prerequisite: Graduate standing in music education.
MUS 546 Orchestral Literature I  credit: 2 or 4 Hours.  
Study of orchestral and symphonic literature from about 1700 to 1850.  
May be repeated up to 6 hours. Prerequisite: Graduate orchestral  
conducting majors only; consent of instructor.

MUS 547 Orchestral Literature II  credit: 2 or 4 Hours.  
Study of orchestral and symphonic literature from about 1850 to the  
present. May be repeated up to 6 hours. Prerequisite: Graduate orchestral  
conducting majors only; consent of instructor.

MUS 548 Advanced Jazz Harmony I  credit: 4 Hours.  
A survey of advanced improvisational theory and its conception, use,  
and historical lineage. Examines synthetic, symmetric, and asymmetric  
scales and modes generated from each. Discussion and analysis of  
chord symbols and their functions in asymmetric song forms. In-  
class demonstration by students of linear and vertical approaches to  
improvising on uncommon chord functions. Prerequisite: MUS 361, or  
placement by exam with consent of instructor.

MUS 549 Advanced Jazz Harmony II  credit: 4 Hours.  
Continuation of materials introduced in MUS 548. Surveys advanced  
improvisational theory and its conception, use, and historical lineage.  
Examines use of polychords, pentatonic scales, diminished scales,  
and the modes generated from each. Discussion and analysis of chord  
functions in all song forms. Students demonstrate in class a variety  
of linear and vertical approaches to improvising using harmonic major  
scales. Prerequisite: MUS 548, or placement by exam with consent of  
instructor.

MUS 551 Choral Literature II  credit: 2 Hours.  
Survey of choral repertoire about 1750 to the present. Prerequisite:  
Graduate standing in music; consent of instructor.

MUS 553 Graduate Orchestral Conducting  credit: 2 or 4 Hours.  
Study of conducting techniques and problems related to standard  
orchestral literature. May be repeated to a maximum of 12 hours.  
Prerequisite: MUS 333 or equivalent, and consent of instructor.

MUS 556 Advanced Choral Techniques II  credit: 2 or 4 Hours.  
Intensive survey of choral literature with laboratory organization for  
reading, conducting, and interpreting choral music of all periods, styles,  
and voice arrangements. Prerequisite: Graduate standing in choral music  
or consent of instructor.

MUS 557 Piano Literature  credit: 4 Hours.  
May be repeated to a maximum of 8 hours. Prerequisite: Graduate  
standing in music or consent of instructor.

MUS 558 Vocal Literature  credit: 4 Hours.  
Study of solo song in larger works and solo art song. May be repeated  
to a maximum of 8 hours. Prerequisite: Graduate standing in music or  
consent of instructor.

MUS 559 Organ Literature  credit: 4 Hours.  
Intensive study of organ literature from Bach to the present; includes  
the music itself, recordings, and collateral readings. May be repeated  
to a maximum of 8 hours. Prerequisite: Graduate standing in music or  
consent of instructor.

MUS 560 String Instrument Literature  credit: 4 Hours.  
May be repeated to a maximum of 8 hours. Prerequisite: Graduate  
standing in music or consent of instructor.

MUS 561 Wind Instrument Literature  credit: 4 Hours.  
Survey of solo and ensemble wind literature; includes analysis and  
performance (when possible) of the music itself, recordings, and  
collateral readings. May be repeated to a maximum of 8 hours.  
Prerequisite: Graduate standing in music or consent of instructor.

MUS 562 Percussion Instruments Literature  credit: 4 Hours.  
Survey and analysis of the field of solo and ensemble percussion  
literature; includes analysis and performance (when possible) of the  
music itself, recordings, and collateral readings. May be repeated to  
a maximum of 8 hours. Prerequisite: Graduate standing in music or  
consent of instructor.

MUS 563 History of Vocal and Choral Music  credit: 2 Hours.  
Critical and analytical study of vocal ensemble and choral music from the  
Middle Ages to the present. May be repeated to a maximum of 8 hours.  
Prerequisite: MUS 551 or equivalent, or consent of instructor.

MUS 564 Choral Conducting Project  credit: 2 Hours.  
Participation in a graduate choral conducting laboratory and preparation  
of a choral ensemble for public performance. Required during the final  
term in residence for candidates in the Master of Music in choral music  
curriculum. Prerequisite: Consent of instructor.

MUS 565 Advanced Choral Performance Techniques  credit: 2 Hours.  
Study of performance problems and musical analysis of choral music  
with techniques of preparation and rehearsal from the various style  
periods: Renaissance, Baroque, Classic-Romantic, and Contemporary.  
May be repeated to a maximum of 8 hours. Prerequisite: Admission  
into the Doctor of Musical Arts choral music program, or the equivalent  
background in other doctoral programs.

MUS 566 Graduate Applied Jazz Instruction  credit: 2 to 4 Hours.  
Instruction at the graduate level in voice or in instruments normally  
associated with the jazz idiom. May be repeated to a maximum of 20  
hours. Prerequisite: Successful performance audition for the jazz faculty.

MUS 567 Advanced Instrument: Chamber/Symph  credit: 2 or 4 Hours.  
Orchestration for chamber and symphony orchestras; works of Classical,  
Romantic, and Contemporary composers. Prerequisite: Undergraduate  
course in instrumentation.

MUS 569 Music Education Thesis  credit: 2 Hours.  
Completion of Master of Music Education thesis in approved area of  
study. 2 graduate hours. No professional credit. Prerequisite: MUS 533.

MUS 570 Practicum in Piano Tchg Child and Teens  credit: 4 Hours.  
Student teaching of group piano and musicianship classes for  
elementary, middle school, and high school students; weekly seminar  
dedicated to evaluation and improvement of teaching techniques.  
Prerequisite: Graduate standing in music or consent of instructor.

MUS 571 Practicum in Piano Tchg Adults  credit: 4 Hours.  
Student teaching of group piano for adults in the private studio,  
community college, and university; weekly seminar devoted to evaluation  
and improvement of teaching techniques. Prerequisite: Graduate  
standing in music or consent of instructor.

MUS 572 Doctoral Orchestral Conducting  credit: 4 Hours.  
Advanced study in orchestral conducting performance, pedagogy,  
score study/analysis, and rehearsal techniques. May be repeated to  
a maximum of 16 hours. Prerequisite: Admission into the doctoral  
concentration in orchestral conducting; consent of instructor.

MUS 573 Doctoral Wind Band Conducting  credit: 4 Hours.  
Advanced study in wind band conducting performance, pedagogy,  
score study/ analysis, and rehearsal techniques. May be repeated to  
a maximum of 16 hours. Prerequisite: Admission into the doctoral  
concentration in wind band conducting; for doctoral cognate students,  
consent of instructor.
MUS 574  Jazz Arranging III  credit: 4 Hours.
Advanced arranging styles and orchestration techniques, with emphasis on brass section arranging, saxophone section arranging, and big band arranging. Orchestration techniques with emphasis on band planning (parallelism), 5-part spread, cluster voicings, and line-writing. Study of jazz related re-harmonization techniques with emphasis on tonicization, secondary dominants, and passing chord re-harmonization. Prerequisite: MUS 363, or placement by exam/portfolio with consent of instructor.

MUS 575  Jazz Arranging IV  credit: 4 Hours.
Continued practice and examination of arranging practices for advanced re-harmonization techniques, including tonicization, secondary dominant re-harmonizations, and passing chord re-harmonizations. Score study of advanced voicing techniques, including 5-part spread, whole and half-step planing (parallelism), and modal line-writing. Advanced notation software is introduced and applied in the classroom. Includes discussion of practical application of jazz arranging in a modern music business context. Prerequisite: MUS 574, or placement by exam/portfolio with consent of instructor.

MUS 576  Doctoral Projects  credit: 0 to 16 Hours.
Special projects for candidates for the Doctor of Musical Arts degree. Open only to students in the Doctor of Musical Arts program. Approved for S/U grading only. May be repeated. (Summer session, 0 to 8 graduate hours). Prerequisite: Consent of instructor.

MUS 577  Advanced Accompanying  credit: 4 Hours.
Principles of accompanying singers and instrumentalists, practical experience in accompanying, and facility in sight reading for keyboard performers. May be repeated to a maximum of 12 hours. Prerequisite: Graduate standing in music or consent of instructor.

MUS 579  Graduate Level Harpsichord  credit: 2 to 5 Hours.
Selected studies from the masterworks of harpsichord literature. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for appropriate faculty members of the Organ/Harpsichord Division.

MUS 580  Graduate Level Piano  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the piano faculty.

MUS 581  Graduate Level Voice  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the voice faculty.

MUS 582  Graduate Level Organ  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Selected studies from the masterworks of organ literature. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for appropriate faculty members of the Organ/Harpsichord Division.

MUS 583  Graduate Level Violin  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the string faculty; concurrent registration in MUS 450 section K for students in the Master of Music curriculum in strings.

MUS 584  Graduate Level Viola  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the string faculty; concurrent registration in MUS 450, section K, for students in the Master of Music curriculum in strings.

MUS 585  Graduate Level Cello  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the string faculty; concurrent registration in MUS 450 section K for students in the Master of Music curriculum in strings.

MUS 586  Graduate Level Double Bass  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the string faculty; concurrent registration in MUS 450 section K for students in the Master of Music curriculum in strings.

MUS 587  Graduate Level Harp  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the string faculty; concurrent registration in MUS 450 section K for students in the Master of Music curriculum in strings.

MUS 588  Graduate Level Flute  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 589  Graduate Level Clarinet  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 590  Graduate Level Oboe  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 591  Graduate Level Bassoon  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 592  Graduate Level Saxophone  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 593  Graduate Level Trumpet  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

MUS 594  Graduate Level Horn  credit: 2 to 5 Hours.
Additional fees may apply. See Class Schedule. May be repeated to a maximum of 20 hours. Prerequisite: Graduate standing in music, or successful completion of a qualifying audition for the appropriate applied music faculty.

Information listed in this catalog is current as of 04/2018
NRES 101 Wildlife Conserv 21st Century  credit: 3 Hours.
This course is an introduction to the conservation, diversity and ecology of animals. The diversity of fish, reptiles, amphibians, mammals, and birds both around the world and in Illinois will be explored. The course will have a strong conservation component where students are introduced to a variety of threats facing animals. The students will be introduced to how to manage sustainable wildlife populations. The students will be exposed to current issues in Illinois to illustrate how people and animals can co-occur and a broad overview of the management, restoration, and conservation techniques.

NRES 102 Introduction to NRES  credit: 3 Hours.
Introduction to natural resources (forests, fisheries, soils, aquatic systems) and environmental science. Emphasizes renewable natural resources, ecological concepts, energy use, biodiversity of species, biogeochemical cycles, and air, water, and soil pollution. Provides natural science basis for understanding contemporary environmental issues and natural resource management. Credit is not given for both NRES 100 and NRES 102.

NRES 103 The Great Lakes - Freshwater Wonder at Risk  credit: 3 Hours.
Introduction to the ecology of freshwater systems, viewed through the lens of the Great Lakes and associated tributaries. The Great Lakes hold 20% of the world's freshwater and 95% of the freshwater in North America. They have sustained human and wildlife populations for at least 10,000 years. Now, the integrity of this unique and priceless resource is threatened as never before. This eight-week online course will enhance student understanding of the ecology of this imperiled system, as well as the historical events and policies that have led to the present crisis, and the men and women who have played key roles in this unfolding story.

NRES 104 Env Sc & Nat Resource Careers  credit: 1 Hour.
Explores career options in the fields of Natural Resource Management and Environmental Sciences. Students will improve understanding of their career goals, expand their knowledge of careers available in these fields, improve their job searching skills, and develop a plan for pursuing a career. Approved for S/U grading only.

NRES 105 Global Environmental Issues  credit: 3 Hours.
Discussion course that focuses on analyzing opposing points of view on contemporary environmental issues. Students engage in role-playing activities, debates, and other participatory activities to explore the ecological and social dimensions of the issues.

NRES 106 Undergraduate Open Seminar  credit: 1 to 5 Hours.
Experimental course on a special topic in natural resources and environmental sciences. Topic may not be repeated except in accordance with the Code. May be repeated in the same or subsequent terms. No more than 12 hours may be counted toward graduation.

NRES 107 Introductory Soils  credit: 4 Hours.
The nature and properties of soil including origin, formation, and biological, chemical, and physical aspects. Prerequisite: Successful completion of MATH 234, or equivalent and CHEM 102 is required. CHEM 104 is recommended.

NRES 108 American Environmental History  credit: 3 Hours.
Same as ESE 202 and HIST 202. See HIST 202. This course satisfies the General Education Criteria for: Humanities - Hist Phil
Cultural Studies - Western

NRES 109 Environmental Economics  credit: 3 Hours.
Same as ACE 210, ECON 210, ENVS 210, and UP 210. See ACE 210. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci
NRES 219 Principles of Ecosystem Mgmt credit: 3 Hours.
The principles of ecosystem management are based in ecology, which is the branch of science that explores how organisms interact with their environment. In this course, students will learn about ecological principles that are the foundation for understanding biological systems on many different levels of organization. Topics include abiotic influences on organisms, energy acquisition, population ecology, species interactions, biological communities, and ecosystem ecology. Particular attention is given to integrating these basic principles into a better understanding of ecology in a world that is increasingly dominated by human activities. Completion of a prior course in biology, zoology, or botany is recommended.

NRES 220 Communicating Agriculture credit: 3 Hours.
Same as AGCM 220 and ENVS 220. See AGCM 220. This course satisfies the General Education Criteria for: Advanced Composition

NRES 223 Watching the Environment credit: 3 Hours.
Same as MDIA 223. See MDIA 223. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

NRES 242 Nature and American Culture credit: 3 Hours.
Same as HIST 282, LA 242, and RST 242. See RST 242. This course satisfies the General Education Criteria for: Cultural Studies - Western

NRES 270 Applied Entomology credit: 3 Hours.
Same as CPSC 270 and IB 220. See CPSC 270. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

NRES 276 Introduction to Field Pedology credit: 2 Hours.
Laboratory and field course involving description, interpretation, and classification of soil profiles. Several day, overnight field trip required; fee required. Additional fees may apply. See Class Schedule. May be repeated to a maximum of 4 hours. Prerequisite: NRES 201.

NRES 285 Field Experience credit: 1 or 2 Hours.
Field based course that exposes students to procedures and methods used in various resource settings in a hands-on manner. Includes weekly field trips to visit representative natural resource and environmental science settings with supporting laboratory exercises. Content of offerings vary by section, but all focus on resource management, environmental quality and assessment, and effects of consumption and use on the environment. Field trips required. Additional fees may apply. See Class Schedule. May be repeated in the same or subsequent semesters to a maximum of 6 hours. Prerequisite: NRES 201 and NRES 219.

NRES 287 Environment and Society credit: 3 Hours.
Examination of the relationship between environment and society and implications for ecological and human well-being. Social science perspective covered on topics such as environmental change, environmental decision-making, natural resource management, agricultural systems, and environmental risks, hazards, and disasters. Students will build critical thinking skills focused on contemporary problems in the interface between people and the physical environment. Same as ESE 287, GEOG 287, and PS 273. Prerequisite: NRES 102 and sophomore or higher standing. Introductory social science course recommended.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

NRES 293 Professional Internship credit: 1 to 4 Hours.
Off-campus experience in a field directly pertaining to a subject matter in natural resources and environmental sciences. Approved for Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Consent of academic advisor or Department Internship Coordinator.

NRES 294 Resident Internship credit: 1 to 4 Hours.
Supervised, on-campus, learning experience with faculty engaged in research. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of academic advisor or Department Internship Coordinator.

NRES 295 Undergrad Research or Thesis credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward degree. Prerequisite: Junior standing, cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

NRES 298 Undergraduate Seminar credit: 1 to 3 Hours.
Group discussion on a special topic in a field of study directly pertaining to subject matter in natural resources and environment sciences. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing.

NRES 302 Dendrology credit: 4 Hours.
Emphasizes nomenclature, classification, and the distinguishing morphological characteristics of the native and naturalized tree species of North America. Introduces disciplines related to the systematics of tree species, including: morphology, physiology, phenology, ecology, soil-site relationships, silviculture, geographic range and natural distribution, wood characteristics, economic uses, and natural history (including major diseases and insect pests). Incorporates tree and forest habitats that provide cover, breeding sites, and food for a variety of wildlife species. Serves as a basis for studies in natural resources management, environmental science, and for advanced studies of botany, genetics, and tree physiology. Field trips required. Additional fees may apply. See Class Schedule. Prerequisite: IB 103.

NRES 310 Natural Resource Economics credit: 3 Hours.
Same as ACE 310 and ENVS 310. See ACE 310.

NRES 325 Natural Resource Policy Mgmt credit: 3 Hours.
Explores policy processes and institutions relating to allocation, utilization, and preservation of natural resources. Considers conceptual models of policy processes, and examines both historical examples and current issues. Prerequisite: ECON 102 or ACE 100.

NRES 330 Environmental Communications credit: 3 Hours.
Same as AGCM 330 and ENVS 330. See AGCM 330.

NRES 340 Environ Social Sci Res Meth credit: 3 Hours.
Introduction to social science research methods for addressing environmental issues. It provides basic information about social science concepts and methods (especially observation, surveys, focus groups, and interviews), helps students become informed users of social science research, and guides selection of appropriate social science tools to meet environmental challenges. A group focus on a local environmental issue offers a practical experience in which course content is applied within a specific community context. Field trips within the local community may be required. Additional fees may apply. See Class Schedule. Prerequisite: STAT 100 or equivalent.
NRES 348  Fish and Wildlife Ecology   credit: 3 Hours.
Application of ecological principles and modeling to management of
fish and wildlife populations; significance of abiotic and biotic factors,
including life-history parameters in population growth and management;
and techniques and procedures for the development of management
strategies for animal populations, emphasizing vertebrates. A course in
statistics is highly recommended. Same as IB 348. Prerequisite: IB 203 or
NRES 219.

NRES 351  Introduction to Environmental Chemistry   credit: 3 Hours.
Introduces major inorganic and organic chemical pollutants, their
sources and their fates in the atmosphere, hydrosphere and pedosphere.
In particular, the course covers 1) translocation/distribution of
chemicals in the environment, and 2) abiotic and biotic transformation of
chemicals (e.g., photochemical reactions, hydrolysis, redox, adsorption
and volatilization. Geared towards students in agricultural, natural,
environmental and life science majors. Prerequisite: Successful
completion of MATH 234 (or equivalent) and CHEM 104 is required.
One semester of organic chemistry (CHEM 232 or CHEM 236) is
recommended.

NRES 352  Plant Genetics   credit: 4 Hours.
Same as CPSC 352. See CPSC 352.

NRES 362  Ecology of Invasive Species   credit: 3 Hours.
Focused on the ecology and management of biological invasions, with
emphasis on understanding the introduction, establishment, spread and
impact stages of the invasion process. Students will identify the causes
and impacts of biological invasions, as well as management strategies
for preventing new invasions and mitigating impacts of established
invaders in freshwater, marine, and terrestrial ecosystems. No special
equipment will be required, and any optional, weekend field trips will
occur on campus. Prerequisite: NRES 219 or similar introductory course
in ecology.

NRES 368  Vertebrate Natural History   credit: 4 Hours.
Same as IB 368. See IB 368.

NRES 370  Environmental Sustainability   credit: 3 Hours.
Same as ENSU 300 and LA 370. See LA 370.

NRES 396  UG Honors Research or Thesis   credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design
work under the direction of the Honors advisor. May be repeated in
the same or subsequent terms. No more than 12 hours of special problems,
research, thesis and/or individual studies may be counted toward degree.
Prerequisite: Junior standing, admission to the ACES Honors Program,
and consent of instructor.

NRES 401  Watershed Hydrology   credit: 3 Hours.
Precipitation, evapotranspiration, stream flow, and other aspects of
the hydrologic cycle are studied in a watershed context. Measurement
techniques, statistical analyses of hydrologic data, and simulation
modeling are discussed. Case studies that quantify water movement
in specific watersheds are used to integrate course topics. Same as
GEOG 401. 3 undergraduate hours. 3 graduate hours. Prerequisite:
CHEM 102, completion of the Quantitative Reasoning I requirement, and
completion of the statistics requirement.

NRES 403  Watersheds and Water Quality   credit: 3 Hours.
Examines water quality in streams, rivers, lakes, and wetlands. The
responses of watershed systems to pollution and other human impacts
will be described in terms of their biological, geochemical, and physical
processes. The technical analyses necessary to establish policies aimed
at preserving or restoring these natural resources will be emphasized.
3 undergraduate hours. 3 graduate hours. Prerequisite: One of CEE 330,
CHEM 232, NRES 351; one of MATH 220, MATH 221, MATH 234.

NRES 406  Fluvial Geomorphology   credit: 4 Hours.
Same as GEOG 406 and GEOL 406. See GEOG 406.

NRES 407  Wildlife Population Ecology   credit: 4 Hours.
This course includes the application of principles of population biology
to the analysis, management, and conservation of wildlife populations,
models of population growth, spatio-temporal variation in abundances,
estimation of demographic parameters and methods of decision-making.
4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 348. One
semester of calculus or statistics is recommended.

NRES 409  Fishery Ecol and Conservation   credit: 4 Hours.
Ecological and conservation concepts are applied to fisheries
management practices. Will discuss current literature related to the
interface between basic and applied aspects of fish populations,
focusing on life history, conservation biology and genetics, growth and
recruitment, competition, predation, trophic and community ecology,
ecosystem management, and human dimensions. 4 undergraduate
hours. 4 graduate hours. Prerequisite: NRES 348.

NRES 415  Native Plant ID and Floristics   credit: 4 Hours.
Focuses on gaining skills in identification of native vascular plants in
the field and classroom. Methods of plot-based and plotless vegetation
sampling methods will be introduced. Procedures and applications
for botanical inventory and assessment will be covered. Field trips are
required. Additional fees may apply. See Class Schedule. 4 undergraduate
hours. 4 graduate hours. Credit is not given for NRES 415 if credit for
CPSC 416 has been earned.

NRES 416  Forest Biology   credit: 3 Hours.
Interactions of biotic and abiotic components of forests as they relate
to the health, structure and function of these ecosystems. The course is
ecophysiological and organismic in approach, but includes biochemical
concepts central to the understanding of forest biology. Lecture-
discussion combined with assigned readings, field projects, and a
paper. One Saturday field trip required. Additional fees may apply. See
Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite:
NRES 419 and NRES 302 or HORT 301.

NRES 418  Wetland Ecology & Management   credit: 3 Hours.
Wetlands are important ecosystems that support high biodiversity
and provide numerous benefits to society. This course provides a
comprehensive examination of wetland science, management, and
governance. Lectures, readings and class discussions will focus on
the structure and processes of wetland ecosystems, wetland biota,
wetland conservation and management, and U.S. and international
wetland policies. Special emphasis will be placed on the application of
wetland science to policy and restoration. Offered in alternate years.
3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and
NRES 219, or consent of instructor.
NRES 419  Env and Plant Ecosystems  credit: 3 Hours.
Relationships among environmental factors and plant processes and functions; impact of human activities on the environment and the structure and function of plant ecosystems. Examples will be drawn from a variety of managed and unmanaged plant ecosystems. Field trip required. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 219 or LA 450 or IB 103 and CHEM 104 or NRES 201. This course satisfies the General Education Criteria for: Advanced Composition

NRES 420  Restoration Ecology  credit: 4 Hours.
Historical development of ecological restoration, its philosophical foundation, multidisciplinary borrowings from the natural, applied, and social sciences, and varied practical applications, with emphasis on the application of ecological principles. Case studies, field trips, and laboratory activities on restoration planning. Field trip required. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 219 or LA 450.

NRES 421  Quantitative Methods in NRES  credit: 3 Hours.
Explores the fundamental principles, procedures, and practices that underlie the most common statistical and sampling methods used in natural resources and environmental sciences. This course covers hypothesis testing, regression, and analysis of variance. There is also a strong focus on sampling theory and experimental design. Computer labs utilize the open source R statistical computing environment. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of MATH 220, MATH 221, MATH 234; completion of the statistics requirement.

NRES 422  Earth Systems Modeling  credit: 4 Hours.
Same as ATMS 421, ESE 421, GEOG 421 and GEOL 481. See ATMS 421.

NRES 423  Politics of International Conservation and Development  credit: 3 Hours.
Conserving the earth's rich biological heritage while enhancing the well-being of the poor stands as a critical global challenge. This course examines this complex issue using the lens of political science and allied fields. Readings, discussion, and written work will demonstrate how insights and approaches from these areas of scholarship can help understand and address the twin problems of biodiversity loss and human poverty in developing countries. Examples focus on forest and wildlife conservation and management. Same as GEOG 423. 3 undergraduate hours. 3 graduate hours. Prerequisite: One 200 or 300 level social science course or consent of instructor. Junior standing required.

NRES 424  US Environ, Justic & Policy  credit: 4 Hours.
In the course students will: (a) write about the roles that race, class, and other social differences play in shaping human-environment relationships, (b) understand the role of the Environmental Protection Agency in considering environmental justice in policy, and (3) identify ways that policies for ecological sustainability can be configured to improve the equity of environmental and natural resource decision-making. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior class standing.

NRES 425  Natural Resources Law & Policy  credit: 3 Hours.
Using the case study method and discussion problems, students in this course will study how laws in the U.S. regulate the use of natural resources, including public ownership and preservation of natural resources through other federal and state public lands. Also examines major federal environmental statues designed to protect natural resources, including the Clean Water Act, the Endangered Species Act, the National Environmental Policy Act, and federal acts related to forest, national parks, and wilderness protection. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing.

NRES 426  Renewable Energy Policy  credit: 3 Hours.
Considers how policies can be designed to optimize economic, environmental, and social solutions to transforming the world's unsustainable energy production, distribution, and consumption paradigm. Provides an up-front primer on climate change policy in the U.S., Europe, and internationally, which have become the primary driver of sustainability initiatives in the energy sector. Examines policies that define "renewability" within various energy sectors including fossil fuels (e.g., coal, natural gas, petroleum), biofuels, nuclear power, hydropower, wind, solar, geothermal, and wave energy. 3 undergraduate hours. 3 graduate hours. Prerequisite: Junior standing.

NRES 427  Modeling Natural Resources  credit: 4 Hours.
Examines basic modeling concepts and methods. Modeling skills, model development, and natural resource issues and problems will be emphasized. Content areas include fisheries, forests, wildlife, economics, human dimensions, groundwater and surface water. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of MATH 220, MATH 221, MATH 234.

NRES 429  Aquatic Ecosystem Conservation  credit: 3 Hours.
Application of the principles of aquatic ecology to a broad range of conservation issues. The structure and function of aquatic systems are discussed from an ecosystem perspective, including the major threats and disturbances to aquatic ecosystems. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 102 and PHYS 101 or PHYS 140, and MATH 220 or MATH 221 or MATH 234, and IB 203 or NRES 219.

NRES 430  Comm in Env Social Movements  credit: 3 Hours.
Same as AGCM 430, ENV 430, and SOC 464. See AGCM 430.

NRES 431  Plants and Global Change  credit: 3 Hours.
Same as CPSC 431 and IB 440. See CPSC 431.

NRES 438  Soil Nutrient Cycling  credit: 3 Hours.
The ecology of decomposition and plant nutrient acquisition in terrestrial soils will be addressed using applied ecology concepts. Discussion will focus on the scientific literature addressing biological, physical, and chemical controls over nutrient availability in soils. Writing assignments will teach students to summarize scientific literature. Students will learn about analytical and quantitative methods used in this field of study and gain the interpretive and communication skills needed to assess and/or carry out applied research in plant and soil science arenas. Same as CPSC 438. 3 undergraduate hours. 3 graduate hours. Offered in alternate years. Prerequisite: IB 203 or NRES 219, and NRES 201.
NRES 439 Env and Sustainable Dev credit: 3 Hours.
Comprehensive overview and synthesis of global environmental problems and their relationships to human activities, with a focus on ecological and natural resource elements. Concerns include unsound ethics and concepts of development and modernization, the lack of motivation or funding to implement available technical solutions, the promotion of alternative development ethics, and a review of opportunities to maintain or improve the well-being of people, other organisms, and the environment. Same as CPSC 439. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 219 or ACE 210.

NRES 440 Applied Statistical Methods I credit: 4 Hours.
Same as IB 463. See IB 439.

NRES 441 Biogeography credit: 3 Hours.
Same as ANTH 436, ESE 439, GEOG 436 and IB 439. See IB 439.

NRES 442 Mammalogy credit: 4 Hours.
Same as IB 462. See IB 462.

NRES 445 Statistical Methods credit: 4 Hours.
Same as ABE 445 and ANSC 445. See ANSC 445.

NRES 446 Sustainable Planning Seminar credit: 4 Hours.
Same as GEOG 446, LA 446, and UP 446. See LA 446.

NRES 452 Community Ecology credit: 3 Hours.
Same as IB 453. See IB 453.

NRES 454 GIS in Natural Resource Mgmt credit: 4 Hours.
Geographic Information Systems (GIS) and remote sensing for natural resource management. Personal computers and GIS software are used to demonstrate the utility of these techniques for data acquisition, image processing, and map modeling. Exercises include problems relevant to the management of natural resources such as land cover mapping, monitoring, suitability and productivity assessment, landscape pattern analysis, land use change analysis, spatial modeling, and decision making. 4 undergraduate hours. 4 graduate hours.

NRES 455 Adv GIS for Nat Res Planning credit: 2 Hours.
Examines the application of Geographic Information Systems (GIS) to natural resource planning and decision making. Integrates principles of decision making in various contexts: public and private, single and multiple criteria, and various forms of management constraints. Management alternatives are then incorporated into a GIS system for further review and analysis. Course combines GIS software with computer-based optimization and quantitative decision making models. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: GEG 479 or NRES 454.

NRES 456 Integrative Ecosystem Mgmt credit: 3 Hours.
Examines ecological and human dimensions of ecosystem management through case studies in settings such as the Pacific Northwest, Southwest, Great Lakes, Gulf Coast, and Mississippi River Basin ecosystems. Capstone course for seniors in the NRES major. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: Senior standing; NRES 219 and NRES 287.

NRES 460 Aerial Photo Analysis credit: 3 or 4 Hours.
Same as GEOG 460. See GEOG 460.

NRES 461 Ornithology credit: 4 Hours.
Same as IB 461. See IB 461.

NRES 462 Ecosystem Ecology credit: 3 Hours.
Same as ESE 452 and IB 452. See IB 452.

NRES 463 Ichthyology credit: 4 Hours.
Same as IB 463. See IB 463.

NRES 464 Herpetology credit: 4 Hours.
Same as IB 464. See IB 464.

NRES 465 Landscape Ecology credit: 3 Hours.
Introduction to the theory, methods, and application of landscape ecology, with an emphasis on characterizing heterogeneity and examining its consequences for ecological processes across a variety of spatial and temporal scales. Special attention will be given to the role of natural and human disturbances in shaping spatial patterns. Laboratory exercises are computer-based and focus on concepts and tools in landscape ecology. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 219 or equivalent, NRES 454 or equivalent.

NRES 471 Pedology credit: 3 Hours.
The science of soil genesis, classification, and morphology. Includes factors of soil formation, properties and methods used in distinguishing soils, interpretation of soil profiles and soil stratigraphy, causes of soil variability, and the impact of soil properties upon soil management, land-use decisions, and the environment. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201.

NRES 472 Environmental Psychology credit: 4 Hours.
Theory and research in environmental psychology. Topics include environmental perception, cognition, experience, values and emotion, perceived environmental quality, environmental hazards and risk perception, and conservation attitudes and behavior. Same as PSYC 472. 4 undergraduate hours. 4 graduate hours. Prerequisite: Jr. standing: PSYC 100 or PSYC 103.

NRES 473 Soil Testing Practicum credit: 2 or 3 Hours.
Chemical procedures useful in assessing soil/plant relationships for field crops. Topics include agronomic principles, field sampling, performance of soil tests, interpretation of analytical results, and formulation of nutrient management programs. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Field trip required. Additional laboratory work and consent of instructor required for 3 hours. Prerequisite: NRES 201.

NRES 474 Soil and Water Conservation credit: 3 Hours.
Application of principles of soil conservation and management to the solution of land-use problems; influence of soil characteristics on erosion control, cropping intensity, water management, and land-use planning. Includes a field trip. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201.

NRES 475 Environmental Microbiology credit: 3 Hours.
Introduction to the diversity of microbial populations and their important role in environmental processes in air, water, soils, and sediments. Microbial community ecology and interactions with plants and animals will also be discussed. Students will learn how microbial activities sustain natural ecosystems and contribute to environmental quality, and also how these functions are harnessed to support managed and artificial systems. Molecular biology techniques for investigating microbial communities and their activities will also be discussed. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and CHEM 104.

NRES 477 Introduction to Remote Sensing credit: 3 Hours.
Same as GEOG 477. See GEOG 477.

NRES 478 Environmental Stable Isotopes credit: 3 Hours.
Same as ATMS 422, GEO 488, and IB 488. See IB 488.
NRES 485  Stream Ecosystem Management  credit: 4 Hours.
This course relates the structure and function of streams and rivers to challenges and opportunities in their conservation, management, and restoration using a combination of readings, discussions, and field trips to study sites. Students will develop an integrative understanding of stream and river ecosystem management from the site to watershed scale on issues spanning from nutrient pollution, to the natural flow regime, to the design and implementation of freshwater protected areas. No special equipment will be required. Three required field trips will occur on or near campus. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Prerequisite: NRES 219 or similar introductory course in ecology.

NRES 487  Soil Chemistry  credit: 3 Hours.
Emphasizes inorganic reactions involved in soil development and plant nutrition in soils; topics include colloid systems, properties of water, ion exchange equilibria, plant nutrient forms, and methods of analyses. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201 and CHEM 104.

NRES 488  Soil Fertility and Fertilizers  credit: 3 Hours.
Provides a broad-based understanding of the basic principles of soil fertility and their application. Coverage includes the occurrence, cycling, and plant availability of the essential mineral nutrients in soils; fertilizer sources, soil reactions, and efficiency; evaluating fertilizer and lime needs; methods of fertilizer application; and the economics of fertilization. Same as CPSC 488. 3 undergraduate hours. 3 graduate hours. Prerequisite: NRES 201.

NRES 489  Physics of Plant Environments  credit: 4 Hours.
The physics of transport processes in the soil and aerial environment of plants; exchanges of energy and gases in crop canopies, and the retention and flow of water, gases, solutes, and heat in soils. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 101 or PHYS 140; one of MATH 220, MATH 221, MATH 234; NRES 201.

NRES 490  Surface Water System Chemistry  credit: 4 Hours.
Examines the interaction of chemical and biological processes that govern the chemistry of streams, lakes, and wetlands, and the response of aquatic organisms to pollution. Chemical equilibrium and kinetic principles are used to analyze the behavior of surface water systems through the use of models. Topics include modeling of field studies in environmental inorganic chemistry and biogeochemistry. The laboratory section will be devoted to instruction in the use of computer models and to their practical application. 4 undergraduate hours. 4 graduate hours. Credit not given for both NRES 490 and CEE 443. Prerequisite: CHEM 104; one of MATH 220, MATH 221, MATH 234.

NRES 494  Democracy and Environment  credit: 3 or 4 Hours.
Same as GEOG 493, SOC 493, UP 493. See GEOG 493.

NRES 499  Special Topics  credit: 1 to 4 Hours.
Experimental course on a special topic in natural resources and environmental sciences. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 12 hours as topics vary.

NRES 500  Graduate Seminar  credit: 0 to 1 Hours.
Exposure to current research and specialized topics in natural resources and environmental sciences through attending/viewing and responding to the NRES seminar series. 0 to 1 graduate hours. No professional credit. Approved for S/U grading only. May be repeated.

NRES 501  Special Problems  credit: 0 to 4 Hours.
Individual studies or investigations in selected branches of horticulture, natural resources, and environmental sciences. Approved for letter and S/U grading. May be repeated. No more than 8 hours may be counted toward an MS degree.

NRES 502  Research Methods in NRES  credit: 4 Hours.
Theory and practice of research methods in natural resources, ecology, and environmental sciences. Provides an overview of experimental design and sampling techniques, and includes discussions of discipline-specific statistical methods. Prerequisite: One upper division course is recommended.

NRES 503  Capstone Research Project  credit: 1 to 4 Hours.
A supervised individual investigative study in selected areas of natural resources and environmental sciences relevant to the student's career preparation. Open only to NRES graduate students. A summary report of the investigation is required. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 8 hours. Credit is not given for both NRES 503 and NRES 505 or NRES 507. Prerequisite: Consent of the Academic and Research Advisors.

NRES 504  Critical Issues Recreation Mgt  credit: 4 Hours.
Same as RST 502. See RST 502.

NRES 505  Capstone Internship Experience  credit: 1 to 4 Hours.
A formalized learning experience in an appropriate supervised internship related to the student's career preparation in natural resources and environmental sciences. Open only to NRES graduate students. A summary report of the internship is required. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 8 hours. Credit is not given for both NRES 505 and either NRES 503 or NRES 507. Prerequisite: Consent of Academic Advisor.

NRES 507  Capstone Group Res Project  credit: 1 to 4 Hours.
A supervised collaborative learning experience in which students work together to design, conduct, and present professional interdisciplinary research related to the students' career preparation in natural resources and environmental sciences. Group project may involve collaboration with outside clients, which include industry, government, and non-governmental organizations. Open only to NRES graduate students pursuing a non-thesis M.S. A project report summarizing the learning experience is required. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 8 hours. Credit is not given for both NRES 507 and either NRES 503 or NRES 505. Prerequisite: Consent of the Academic and Research Advisors.

NRES 508  Community & Natural Resources  credit: 4 Hours.
Advanced discussion and analysis of theoretical and empirical approaches to the intersection of social and ecological processes at the human community level emphasizing change, conflict, management, and decision-making. Each student will complete a project applying community-related theory to a particular natural resource or environmental problem. Prerequisite: Upper-level undergraduate course or graduate course in social science related to natural resources or environmental issues in NRES, Geography, Human and Community Development, Political Science, Psychology, Recreation Sport and Tourism, Sociology, or related field.

NRES 510  Adv Natural Resource Economics  credit: 4 Hours.
Same as ACE 510, ECON 548, and ENVS 510. See ACE 510.
NRES 511 Principles of Applied Ecology  credit: 4 Hours.
Provides a thorough foundation of fundamental ecological principles that
govern the distribution and abundance of organisms with extra attention to
applied ecology as it pertains to current-day ecological problems. The
approach will include lectures, discussions, hands-on evaluation and
interpretation of data and experimental design presented in case studies,
and design and implementation of an independent research project.
Prerequisite: At least one undergraduate or graduate course in biology or
ecology.

NRES 512 Discussions in NRES  credit: 1 to 2 Hours.
Discussion of recent developments and current literature in natural
resources and environmental sciences, with a term-long emphasis on a
particular aspect of the subject matter. Approved for Letter and S/U
grading. May be repeated to a maximum of 4 hours.

NRES 516 Ecosystem Biogeochemistry  credit: 4 Hours.
Biological, geological, and chemical processes of forest, agricultural,
freshwater and marine ecosystems. The effects of pollutants and global
change on each ecosystem are addressed along with the biogeochemical
interactions among ecosystems. Each student completes a detailed
biogeochemical study for a particular ecosystem. A 400-level course in
two or more of the following areas are recommended: soil science,
aquatic science, ecology, and hydrology. Same as IB 516.

NRES 565 Spatial Ecological Modeling  credit: 2 Hours.
Computer-based, spatially explicit models are useful for simulating the
long-term dynamics and stability of complex ecological systems and
can provide a basis for the development of tools for management
support and policy advice. This course will build on landscape ecology
principles and GIS skills to develop and analyze spatial ecological
models. Emphasis will be on building and applying individual- and
agent-based models to understand and predict how systems respond to
environmental change. 2 graduate hours. No professional credit.
Prerequisite: NRES 454, NRES 465, or equivalent. Graduate students only.

NRES 572 Chemistry of Soil Fertility  credit: 4 Hours.
The chemistry of essential plant nutrients in soils, and their quantitative
relationships to plant growth. Offered in alternate years. Prerequisite:
NRES 201 and CHEM 222.

NRES 580 Solute Transport in Soils  credit: 4 Hours.
Theoretical and practical aspects of modeling the fate and transport of
chemicals through unsaturated soil. Topics include spatial variability
(scaling theories, geostatistics), fate and coupled transport processes
(adsorption, degradation, preferential flow, dispersion, advection,
diffusion, volatility), and associated modeling (parameter estimation;
screening, regulatory, and research models, including CDE, stochastic-
convective, stream-tube, particle tracking, kinematic wave, stochastic
continuum) using analytical and numerical methods. Offered in alternate
years. Prerequisite: NRES 489 and MATH 342 or MATH 345.

NRES 586 Soil Organic Matter  credit: 4 Hours.
Explores soil organic matter as one of the most important and integrative
characteristics of terrestrial ecosystems. Topics include the nature and
origin of humic and non-humic substances in soils and sediments, their
critical environmental functions (chemical reactivity and role in nutrient
cycling), and the primary methods (elemental analysis, spectroscopy,
isotopic methods, and C and N models) used to characterize organic
matter and its dynamics. Offered in alternate years. Prerequisite:
CHEM 232.

NRES 590 Professionalism and Ethics  credit: 2 Hours.
Same as CPSC 590. See CPSC 590.

NRES 591 Principles of Applied Ecology  credit: 4 Hours.
Provides a thorough foundation of fundamental ecological principles that
govern the distribution and abundance of organisms with extra attention to
applied ecology as it pertains to current-day ecological problems. The
approach will include lectures, discussions, hands-on evaluation and
interpretation of data and experimental design presented in case studies,
and design and implementation of an independent research project.
Prerequisite: At least one undergraduate or graduate course in biology or
ecology.

NRES 592 Sustainable Urban Systems  credit: 4 Hours.
Same as CEE 592 and UP 576. See CEE 592.

NRES 593 Statistical Methods in Ecology  credit: 4 Hours.
Focuses on statistical methods used to analyze ecological data. Includes
application of general and generalized linear models including use of
several probability distributions such as normal, binomial, Poisson, and
negative binomial. Course also focuses on mixed models and approaches for
imposing structure onto the variance-covariance matrix to account for
non-independence or heterogeneous variance. Emphasis throughout is on evaluating and presenting results using both traditional (p-value) and
information-theoretic (AIC) approaches. 4 graduate hours. No
professional credit. Prerequisite: At least one course in ecology, including
basic concepts of population and community ecology, and at least one
course in statistics, including basic concepts of sampling, hypothesis
testing, and techniques such as t-tests, linear regression, and ANOVA
(e.g., CPSC/NRES 440 or equivalent). Graduate standing or permission of
instructor required.

NRES 594 NRES Professional Orientation  credit: 1 Hour.
The philosophy and components of graduate education with
development of the principles useful in teaching, research, and extension
in horticulture, natural resources and environmental sciences. Students
will be required to develop and submit a proposal describing planned
research for their M.S. or Ph.D. thesis. Approved for S/U grading only.

NRES 598 Experimental Graduate Courses  credit: 1 to 4 Hours.
Experimental course on a special topic in natural resources and
environmental sciences. May be repeated to a maximum of 12 hours.

NRES 599 Thesis Research  credit: 0 to 12 Hours.
Research conducted in various phases of horticulture, natural resources,
and environmental sciences leading to a thesis in natural resources and
environmental sciences. Approved for S/U grading only. May be repeated.

Naval Science (NS)

NS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/NS)

Courses

NS 100 Leadership Laboratory  credit: 0 Hours.
Noncredit course designed to give the Naval ROTC student, through
practical application, a better grasp of the naval science subjects taught in
the classroom and a working knowledge of close order drill. Approved for
S/U grading only. May be repeated.

NS 101 Introduction to Naval Science  credit: 2 Hours.
Naval organization and management practices examined within the
context of the naval service, command and control, organization
for logistics, service and support, functions and services of major
components of the Navy and Marine Corps, and shipboard organization
with emphasis on management and leadership functions. Prerequisite:
Consent of instructor.

NS 102 Sea Power and Maritime Affairs  credit: 2 Hours.
Investigates the characteristics of sea power and their impact on the
affairs of our nation; discusses those characteristics with historical and
modern applications to the United States and other world powers.

NS 120 Intro to US Armed Forces  credit: 3 Hours.
Same as AFAS 120 and MILS 120. See MILS 120.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil.
NS 203 Leadership and Management credit: 3 Hours.
Introduction to principles and problems of Naval management and leadership with emphasis upon their relation to the future Naval officer.

NS 204 Navigation/Naval Operations I credit: 3 Hours.
Provides the student with an understanding of the theory and techniques of the three types of marine (nautical) navigation: piloting, electronic, and celestial. Prerequisite: Consent of instructor.

NS 303 Leadership and Management credit: 3 Hours.
Introduction to principles and problems of Naval management and leadership with emphasis upon their relation to the future Naval officer.

NS 305 Intro to Naval Engineering credit: 3 Hours.
Studies ship compartmentation, propulsion systems, auxiliary power systems, interior communications, and ship control; types, structure, and purpose of naval ships; and examines elements of ship design and ship stability. Prerequisite: Consent of instructor.

NS 306 Naval Weapons Systems credit: 3 Hours.
Introduction to concepts of naval weapons systems, their capabilities and limitations, and their individual and complementary roles in a wide variety of offensive and defensive situations. Prerequisite: Consent of instructor.

NS 307 Navigation/Naval Operations II credit: 3 Hours.
Designed to give an understanding of the concepts and use of relative motion principles, international maritime law and the rules of the nautical road, and the fundamentals of U. S. fleet organization, communication, and operations. Prerequisite: NS 204 or consent of instructor.

NS 308 Leadership and Ethics credit: 2 Hours.
Provides the student with an understanding of how personal value systems and external ethical requirements affect their leadership styles. Examines Navy organization, personnel administration procedures, human resource management programs, and military justice in terms of current management theory. Prerequisite: NS 203.

NS 321 Evolution of Warfare credit: 3 Hours.
Survey of the evolution of warfare emphasizing the philosophies and trends which have been significant in land warfare.

NS 322 Maneuver Warfare Fundamentals credit: 3 Hours.
This course prepares future military officers and other leaders for service by studying modern tactical principles, current military developments, and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine. There is a specific focus on the United States Marine Corps as the premier maneuver warfighting organization. Study also includes historical influences on tactical, operational, and strategic levels of maneuver warfare practices in the current and future operating environments. Prerequisite: Advanced undergraduate standing or consent of instructor.

Neuroscience (NEUR)

NEUR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/NEUR)

Courses

NEUR 302 Applied Neuroscie credit: 3 Hours.
Same as PSYC 302. See PSYC 302.

NEUR 314 Introduction to Neurobiology credit: 3 Hours.
Same as MCB 314. See MCB 314.

NEUR 403 Memory and Amnesia credit: 3 or 4 Hours.
Same as PSYC 403. See PSYC 403.

NEUR 405 Cognitive Neuroscience credit: 3 or 4 Hours.
Same as PSYC 404. See PSYC 404.

NEUR 413 Psychopharmacology credit: 3 or 4 Hours.
Same as PSYC 413. See PSYC 413.

NEUR 414 Brain, Learning, and Memory credit: 3 or 4 Hours.
Same as PSYC 414. See PSYC 414.

NEUR 417 Neuroscience of Eating & Drinking credit: 3 or 4 Hours.
Same as FSHN 417 and PSYC 417. See PSYC 417.

NEUR 419 Brain, Behavior & Info Process credit: 3 Hours.
Same as BIOP 419 and MCB 419. See MCB 419.

NEUR 421 Principles of Psychophysiology credit: 3 or 4 Hours.
Same as PSYC 421. See PSYC 421.

NEUR 432 Genes and Behavior credit: 3 Hours.
Same as ANTH, IB 432, and PSYC 432. See IB 432.

NEUR 433 Evolutionary Neuroscience credit: 3 or 4 Hours.
Same as PHIL 433 and PSYC 433. See PSYC 433.

NEUR 445 Cognitive Neuroscience Lab credit: 4 Hours.
Same as PSYC 445. See PSYC 445.

NEUR 450 Cognitive Psychophysiology credit: 3 or 4 Hours.
Same as PSYC 450. See PSYC 450.

NEUR 451 Neurobio of Aging credit: 0 to 4 Hours.
Same as PSYC 451 and KIN 458. See PSYC 451.

NEUR 453 Cog Neuroscience of Vision credit: 3 or 4 Hours.
Same as PSYC 453. See PSYC 453.

NEUR 461 Cell & Molecular Neuroscience credit: 3 Hours.
Same as MCB 461. See MCB 461.

NEUR 462 Integrative Neuroscience credit: 3 Hours.
Same as MCB 462. See MCB 462.

NEUR 481 Developmental Neurobiology credit: 3 Hours.
Same as MCB 481. See MCB 481.

NEUR 500 Topics in Neuroscience credit: 1 Hour.
Critical reading and discussion of current papers from the neuroscience literature, and discussion of other relevant topics such as ethics and career and professional skills development. Grading based on attendance and participation. Approved for letter and S/U grading. May be repeated to a maximum of 2 hours. Prerequisite: Enrollment in Neuroscience Ph.D. program or consent of instructor.

NEUR 508 Intro to Systems Neuroscience credit: 4 Hours.
Same as MCB 508 and PSYC 508. See PSYC 508.

NEUR 510 Advances in Behavioral Neuroscience credit: 3 or 4 Hours.
Same as PSYC 510. See PSYC 510.

NEUR 513 Survey of Neurobiology credit: 1 Hour.
Same as MCB 513. See MCB 513.

NEUR 520 Advanced Topics in Neuroscience credit: 0 or 1 Hours.
Survey of current research in modern neuroscience. 0 or 1 graduate hours. No professional credit. Approved for S/U grading only. May be repeated.

NEUR 530 Special Topics in Neuroscience credit: 1 to 4 Hours.
Discussion of current topics of interest in neuroscience; seminar or lecture format. 1 to 4 graduate hours. No professional credit. May be repeated up to 12 hours as topics vary. Prerequisite: Consent of instructor.
CHEM 102, IB 150, MCB 150, PHYS 211.

Elements of radiation protection and health physics, emphasizing ME 300.
or MATH 221; one of PHYS 101, PHYS 211, CHEM 104, CHEM 204, advanced nuclear systems. Same as GLBL 201. Prerequisite: MATH 220

Patterns of energy production and utilization and technical aspects of renewable energy resources, advanced fossil fuel systems, and controlled thermal nuclear fusion systems. 3 undergraduate hours. 3 graduate hours. Credit is not given for both NPRE 402 and NPRE 247.

Quantitative analysis of the impact of the nuclear power industry; nuclear fuel cycle and capital costs for thermal and fast reactors; optimization of the use of nuclear fuels to provide the lowest energy costs and highest system performance; comparison between fossil fuel systems, fission systems, and controlled thermal nuclear fusion systems. 3 undergraduate hours. 4 graduate hours. Credit is not given for both NPRE 402 and NPRE 247.

Nuclear reactor materials and components. Steady-state and transient operation of nuclear reactors. Nuclear energy removal and conversion. Radiation shielding. Prerequisite: PHYS 212; credit or concurrent registration in MATH 285.

Individual investigations or studies of any phase of nuclear engineering selected by the student and approved by the department. May be repeated. Prerequisite: Consent of instructor.

Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

Principles of utilization of fission energy in nuclear power engineering; includes such topics as fission processes and controlled chain reactions; nuclear reactor types, design principles, and operational characteristics; power reactor design criteria; radiation hazards and radioactive waste treatment; economics; other applications such as propulsion and research reactors. 3 undergraduate hours. 4 graduate hours. Credit is not given for both NPRE 402 and NPRE 247.

This course satisfies the General Education Criteria for:

Quantitative Reasoning II

Introduction to nuclear, plasma, and radiological engineering. Demonstrations and discussion of nuclear phenomena (reactor operation, plasma behavior, and others). Experiments on radioactive decay and radiation shielding with formal laboratory report and a student project.

Experiments relating to plasma engineering and fusion energy. Topics in ultra-high vacuum technology rf and dc electric plasma probes, measurements of dc and pulsed magnetic fields, dynamics of a theta pinch, and laser interferometry to measure plasma density. 2 undergraduate hours. 2 graduate hours. Prerequisite: NPRE 421 and NPRE 451.

Basic principles and examples for adapting and applying the plasma state to solve a number of modern engineering problems. Plasma processing of materials for microelectronics and other uses, lighting, plasma displays, and other technologies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329 or PHYS 435.

Prerequisite: Consent of instructor.

Individual investigations or studies of any phase of nuclear engineering selected by the student and approved by the department. May be repeated. Prerequisite: Consent of instructor.

Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

Principles of utilization of fission energy in nuclear power engineering; includes such topics as fission processes and controlled chain reactions; nuclear reactor types, design principles, and operational characteristics; power reactor design criteria; radiation hazards and radioactive waste treatment; economics; other applications such as propulsion and research reactors. 3 undergraduate hours. 4 graduate hours. Credit is not given for both NPRE 402 and NPRE 247.

This course satisfies the General Education Criteria for:

Quantitative Reasoning II

Introduction to nuclear, plasma, and radiological engineering. Demonstrations and discussion of nuclear phenomena (reactor operation, plasma behavior, and others). Experiments on radioactive decay and radiation shielding with formal laboratory report and a student project.

Experiments relating to plasma engineering and fusion energy. Topics in ultra-high vacuum technology rf and dc electric plasma probes, measurements of dc and pulsed magnetic fields, dynamics of a theta pinch, and laser interferometry to measure plasma density. 2 undergraduate hours. 2 graduate hours. Prerequisite: NPRE 421 and NPRE 451.

Basic principles and examples for adapting and applying the plasma state to solve a number of modern engineering problems. Plasma processing of materials for microelectronics and other uses, lighting, plasma displays, and other technologies. 3 undergraduate hours. 3 graduate hours. Prerequisite: ECE 329 or PHYS 435.
NPRE 431 Materials in Nuclear Engrg  credit: 3 Hours.
Development of a materials engineering background in the context of nuclear systems and radiation applications; relation of structure of materials to their physical and mechanical properties; development of phase formation and reaction kinetics from basic thermodynamics principles; charged particle interactions with surfaces; transport concepts of neutral and charged particles in matter; materials performance in nuclear and radiation applications, including radiation damage and effects. 3 undergraduate hours. 3 graduate hours.

NPRE 432 Nuclear Engrg Materials Lab  credit: 2 Hours.
Experiments relating to materials applications in nuclear engineering and energy systems. Examination of topics in room and elevated temperature mechanical properties of structural materials, corrosion, physical properties, radiation damage and effects, and materials selection in design. 2 undergraduate hours. 2 graduate hours. Prerequisite: Credit or concurrent registration in NPRE 431.

NPRE 435 Radiological Imaging  credit: 3 Hours.
Physical, mathematical and experimental foundations of radiological imaging techniques, such as typical sources of ionizing radiation, the interactions of radiation with matter, image formation techniques, linear systems theory applied to radiological imaging, and the techniques for tomographic image reconstruction. Includes diagnostic radiography imaging modalities, such as X-ray computed tomography (CT), single photon computed emission tomography (SPECT), positron emission tomography (PET), as well as modern X-ray imaging techniques, such as phase contrast imaging and diffraction-enhanced X-ray imaging. Provides a solid foundation for understanding of modern radiological imaging techniques, and in-depth discussions on the strengths and limitations of various modalities in application to medical, physical, security and environmental imaging. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 441 Radiation Protection  credit: 4 Hours.
Sources of nuclear radiation; ionization and energy deposition in matter with an emphasis on biological systems; principles of dosimetry; determination of exposure and limits for internal and external emitters; basic shielding calculations. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 446.

NPRE 442 Radioactive Waste Management  credit: 3 Hours.
Radiation and radiological concepts and measurement, the fuel cycle and waste classification, Part 61, state and federal regulations and regulatory agencies, radiochemistry and the environmental fate of radionuclides, uranium-related wastes, low-level wastes, high-level wastes, used fuel reprocessing, private fuel storage, waste package stability, risk assessment, geologic repositories, transporting radioactive wastes, decommissioning wastes, transmutation, an international perspective on radioactive waste management, and the global nuclear energy partnership. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 231; PHYS 102 or PHYS 212.

NPRE 444 Nuclear Analytical Methods Lab  credit: 2 or 3 Hours.
Experiments relating to nuclear analytical methods and techniques. Emphasis on neutron activation analysis, energy dispersive x-ray fluorescence and particle spectroscopy. Use of radiation for medical and materials imaging. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Credit of 2 hours is given if NPRE 451 or equivalent has been taken. Prerequisite: CHEM 102 and NPRE 446.

NPRE 446 Radiation Interact w/Matter I  credit: 3 Hours.
Experimental and theoretical foundations of interaction of neutrons, photons, and charged particles with matter. Emphasis on topics that underlie the following applications: radiation detection, biological effects and radiation dosimetry, radiation damage and nuclear materials, neutron activation analysis, and fission and fusion energy systems. Classical theory of charged particle cross sections. Introductory quantum mechanics. Exact and numerical solutions of the Schroedinger equation. Quantum theory of cross sections. Photon interactions with atomic electrons and nuclei. Radioactive-series decay. Computer assignments illustrate fundamental concepts. 3 undergraduate hours. 3 graduate hours. Credit is not given to NPRE majors for graduate hours. Prerequisite: MATH 285 and ME 300.

NPRE 447 Radiation Interact w/Matter II  credit: 3 Hours.
Continuation of NPRE 446. Quantum theory of ionization of matter by charged particles. Nuclear models and structure. Alpha decay, fission and fusion reactions. Beta and gamma decay. Nuclear reactions. Radiation damage effects. Special topics. Computer assignments to illustrate fundamental concepts. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 448 Nuclear Syst Engrg & Design  credit: 4 Hours.
Engineering principles underlying nuclear systems designed with emphasis on nuclear power reactors. Materials for nuclear systems. Energy generation and removal in single- and two-phase flows. Reactor and component control systems and nuclear fuel reloading patterns. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 285, ME 300, and NPRE 455.

NPRE 451 NPRE Laboratory  credit: 3 Hours.
Radiation detection and instrumentation; radiation dosimetry and shielding; basic measurements in nuclear engineering; engineering applications; micro computer data acquisition and experimental control. 3 undergraduate hours. 3 graduate hours. Prerequisite: NPRE 446.

NPRE 455 Neutron Diffusion & Transport  credit: 4 Hours.
Neutron migration, neutron slowing down and thermalization; neutron continuity equation, multigroup diffusion theory, homogeneous and heterogeneous medium, thermal and fast assemblies; numerical methods for multigroup diffusion equations; reactor dynamics perturbation theory; reactivity coefficients; introductory transport theory. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 247.

NPRE 457 Safety Anlys Nucl Reactor Syst  credit: 3 or 4 Hours.
Basic safety philosophy in nuclear reactor systems; brief review of nuclear reactor systems; regulatory processes; siting considerations; safety problems related to reactor dynamics; evaluation of postulated accidents; risks associated with nuclear fuel cycle; methods of systems safety analysis. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: NPRE 402 or NPRE 247.

NPRE 458 Design in NPRE  credit: 4 Hours.
Design in nuclear, plasma, and radiological engineering systems; basic principles of definition, organization, constraints, modeling and optimization of system design; case studies; class design projects applying these basic principles. 4 undergraduate hours. 4 graduate hours. Prerequisite: NPRE 448.
NPRE 461 Probabilistic Risk Assessment  credit: 3 or 4 Hours.
Multidisciplinary theories and techniques of risk, safety, and reliability of complex systems and state-of-the-art Probabilistic Risk Assessment (PRA), which provides input for risk-informed decision-making for design, operation, and regulatory oversight in diverse high-consequence industries such as nuclear power, aviation, space, chemical processes, oil and gas, and healthcare. Topics include: Systematic Risk Scenario Modeling, Consequence Analysis, Bayesian Updating, Bayesian Belief Network, Binary Decision Diagram, Uncertainty Propagation, Hardware Reliability, Human Error Modeling, Failure Causal Modeling, Maintenance and Repair Modeling, Risk Importance Ranking, and Data Analytics. PRA and Reliability Engineering software codes will be utilized for assignments. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, Senior or Graduate Standing in any Engineering Department.

NPRE 470 Fuel Cells & Hydrogen Sources  credit: 3 Hours.
The role of hydrogen as a global energy form, hydrogen production by nuclear, fossil and renewable energy sources; hydrogen handling, safety; transportation and storage methods including high-pressure, cryogenic, metal hydrides and chemical hydrides; basic science and technology of fuel cells, including electrochemical processes; fuel cell thermodynamics; low- and high-temperature fuel cells; applications including portable electronics, automotive vehicles, distributed and back-up power, and space power. 3 undergraduate hours. 3 graduate hours. Prerequisite: CHEM 102, MATH 285, and PHYS 212.

NPRE 475 Wind Power Systems  credit: 3 or 4 Hours.
Overview of wind energy systems; historical development, safety aspect, environmental considerations, wind properties and measurement, site selection, and wind turbine design; transmission systems considerations; mechanical, electrical, control aerodynamic and environmental engineering of modern wind turbines; fatigue failure; annual power production; economics and environmental aspects and accident prevention and mitigation; computational fluid dynamics (CFD) analysis of wind flow and blade interactions; energy storage options; hydrogen production; electrical power transmission issues; licensing issues; alternative wind energy systems; design project involving a wind farm or the construction of a specific type of wind turbine based on a wind park site visit. 3 undergraduate hours. 4 graduate hours. Prerequisite: CS 101, MATH 241; one of CHBE 421, ECE 110, ECE 205, ME 310, TAM 335.

NPRE 480 Energy and Security  credit: 3 Hours.
Security and supplies of energy, mineral resources, and water. Evolution of the importance of various fuels in conflicts (including coal, oil, uranium, and natural gas) starting with the Franco-Prussian Wars. Theories of international conflict and examination of the role of individual leaders versus institutional factors in the precipitation and outcome of pivotal wars. Econometric analyses relevant to past and projected future energy use. Same as GLBL 480 and PS 480. 3 graduate hours. 3 graduate hours. Prerequisite: Composition I and Quantitative Reasoning I.

NPRE 481 Writing on Technol & Security  credit: 3 or 4 Hours.
Development of writing skills in standard computer, desktop publishing, and electronic publishing formats. On themes such as, global and regional security environments, arms control, nuclear energy, and climate change. For graduate credit, writing projects include documentation of computational work using software appropriate for typesetting of mathematical formulas. Same as GLBL 481. 3 graduate hours. 3 or 4 graduate hours. 4 graduate hours with consent of instructor. This course satisfies the General Education Criteria for: Advanced Composition

NPRE 483 Seminar on Security  credit: 1 Hour.
Preparation of reports on a set of introductory lectures and student choices from various on-campus seminar series relevant to technology of domestic and international security and the regional and international contexts that influence the nature of security problems. Same as GLBL 483. 1 undergraduate hour. 1 graduate hour. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Composition I.

NPRE 498 Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

NPRE 501 Fundamentals of Nuclear Engrg  credit: 4 Hours.
Background for advanced work in nuclear engineering; problems in materials, heat transfer, and fluid flow; special emphasis on basic ideas and the mathematical similarity of problems in heat transfer, fluid flow, and neutron diffusion. Lecture-problem format. Prerequisite: NPRE 247; credit or concurrent registration in NPRE 446.

NPRE 511 Nuclear Reactor Heat Transfer  credit: 4 Hours.
Selected topics in nuclear reactor heat transfer: thermal analysis of fuel elements under steady and transient operation; convective energy transport from reactor cores; two-phase flow and boiling in reactor cores; liquid metal coolant systems. Prerequisite: NPRE 501.

NPRE 521 Interact of Radiation w/Matter  credit: 4 Hours.
Topics in the interaction of radiation with matter of interest to the nuclear engineering field: the kinematics, kinetics, and cross sections involved in the interaction of charged particles, electromagnetic radiation, and neutrons. Prerequisite: NPRE 446.

NPRE 522 Controlled Fusion Systems  credit: 4 Hours.
Development of plasma models for fusion analysis; treatment of plasma heating and confinement with applications to current experiments; energy balances; energy extraction. Prerequisite: NPRE 421.

NPRE 529 Interact of Rad w/Matter II  credit: 4 Hours.
Continuation of NPRE 521. Multiple events and computational methods of the interaction of radiation (heavy and light charged particles, electromagnetic wave, photons, and neutral particles) with matter. Same as CSE 529. Prerequisite: NPRE 521 or MSE 500.

NPRE 531 Nuclear Materials  credit: 4 Hours.
Metallurgical principles applied to materials problems in nuclear engineering; topics in production of uranium, corrosion, radiation damage, fuel element fabrication, and fuel reprocessing. Prerequisite: NPRE 431.

NPRE 554 Independent Lab Investigations  credit: 1 to 8 Hours.
Individual experimental investigation in areas of nuclear, plasma, and radiological engineering. May be repeated. Prerequisite: Consent of instructor.

NPRE 555 Reactor Theory I  credit: 4 Hours.
Advanced development of neutron transport theory; neutron slowing-down and resonance absorption; approximations to the transport equation; direct numerical methods and other techniques of approximation theory applied to the neutron transport equation; advanced topics. Prerequisite: NPRE 455 (waived for Physics majors).
NPRE 556  Reactor Theory II  credit: 4 Hours.
Advanced treatment of the theory of slow-neutron scattering, neutron thermalization, Doppler broadening, fuel depletion and fuel loadings, properties of neutron migration operators, and mathematical neutron transport theory; interpretation of related experiments; advanced topics. Prerequisite: NPRE 521 and NPRE 555 (waived for Physics majors).

NPRE 558  Advanced Design in NPRE  credit: 4 Hours.
Classroom exercise in the conceptual design of a nuclear engineering system involving a synthesis of previous learning in the field of nuclear engineering and related disciplines. The design includes all necessary ingredients for the system, such as core, thermal-hydraulics, shielding, material selection, and control. Prerequisite: NPRE 448 and NPRE 501.

NPRE 560  Reactor Kinetics and Dynamics  credit: 4 Hours.
Diffusion and transport neutron balances with delayed neutrons; formal development of the point reactor kinetics equations; analytic and numerical solutions of the point reactor kinetics equations; space-dependent, multigroup reactor kinetics; reactivity measurements; reactor noise analysis; advanced topics. Prerequisite: NPRE 555.

NPRE 595  Student Research Seminar  credit: 1 Hour.
Seminar on current research and development activities in NPRE related fields, presented by students. 1 graduate hour. No professional credit. Approved for Letter and S/U grading. May be repeated in separate terms up to 2 hours.

NPRE 596  Seminar in Nuclear Sci & Engrg  credit: 1 Hour.
Lectures and discussions on current work in research and development in nuclear engineering and related fields by staff, advanced students, and visiting lecturers. Approved for S/U grading only. May be repeated.

NPRE 597  Independent Study  credit: 1 to 8 Hours.
Individual study in areas of nuclear engineering and closely related fields not covered by regular course offerings. The work is carried out under the supervision of a member of the faculty. May be repeated. Prerequisite: Consent of instructor.

NPRE 598  Special Topics  credit: 2 to 4 Hours.
Subject offerings of new and developing areas of knowledge in nuclear, plasma, and radiological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

NPRE 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Nutritional Sciences (NUTR)

NUTR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/NUTR)

Courses

NUTR 420  Nutritional Aspects of Disease  credit: 3 Hours.
Same as FSHN 420. See FSHN 420.

NUTR 426  Biochemical Nutrition I  credit: 3 Hours.
Same as FSHN 426. See FSHN 426.

NUTR 427  Biochemical Nutrition II  credit: 3 Hours.
Same as FSHN 427. See FSHN 427.

NUTR 428  Community Nutrition  credit: 3 Hours.
Same as FSHN 428. See FSHN 428.

NUTR 500  Nutritional Sciences Seminar  credit: 0 or 1 Hours.
Discussions of current problems in nutritional sciences. Approved for S/U grading only. May be repeated. Required of all graduate students in the nutritional sciences program.

NUTR 510  Topics in Nutrition Research  credit: 1 Hour.
Series of one-third term intensive courses on current topics in nutritional sciences research. Same as ANSC 525 and FSHN 510. May be repeated in the same term to a maximum of 3 hours. Prerequisite: Advanced Biochemistry.

NUTR 511  Regulation of Metabolism  credit: 4 Hours.
Biochemical and molecular regulatory mechanisms of macronutrient metabolism under various physiological conditions in mammalian species, including humans. Same as ANSC 521 and FSHN 511. 4 graduate hours. No professional credit. Prerequisite: MCB 450, MCB 244, MCB 246 and FSHN 426/ANSC 520 (or equivalent courses in biochemistry, physiology and nutrition). Second year graduate standing or above, or consent of instructor.

NUTR 520  Protein and Energy Nutrition  credit: 3 Hours.
Same as ANSC 520. See ANSC 520.

NUTR 523  Techniques in Animal Nutrition  credit: 3 Hours.
Same as ANSC 523. See ANSC 523.

NUTR 524  Nonruminant Nutrition Concepts  credit: 2 Hours.
Same as ANSC 524. See ANSC 524.

NUTR 530  Childhood Obesity I  credit: 3 Hours.
Introduction of scientific evidence underlying the multifactorial causes and consequences of childhood obesity in the U.S. and worldwide. Examination of existing theories from transdisciplinary perspectives will be stressed. Same as CHLH 530, FSHN 530, HDFS 551, KIN 530, SOCW 570. Approved for letter and S/U grading.

NUTR 531  Childhood Obesity II  credit: 4 Hours.
The current public health recommendations for the prevention of childhood obesity will be presented and the evidence for efficacy of existing interventions will be thoroughly examined. At the end of the semester, students will work in teams to synthesize the best practices and propose how they can be integrated into an intervention within a transdisciplinary context. Same as CHLH 531, FSHN 531, HDFS 552, KIN 531, SOCW 571. Approved for both letter and S/U grading. Prerequisite: NUTR 530.

NUTR 550  Grantsmanship and Ethics  credit: 3 Hours.
Design and implementation of experimental protocols in nutrition. Examines the scientific, regulatory, and ethical context for conducting research in nutrition. The focus of the course will be the writing and evaluation of a simulated peer-reviewed grant proposal. Same as FSHN 550. 3 graduate hours. No professional credit. Prerequisite: Advanced nutritional biochemistry and statistics.

NUTR 561  Advanced Clinical Nutrition  credit: 2 Hours.
Basic pathophysiological changes associated with major organ system failure and appropriate nutritional support and treatment. Provides medical orientation needed for participating in medical nutritional rounds. Same as FSHN 520. 2 graduate hours. No professional credit. May be repeated in the same term up to 4 hours and separate terms up to 8 hours. Prerequisite: Upper division course in physiology and a course in clinical nutrition.
NUTR 590  Disciplinary Seminar  credit: 0 or 1 Hours.
Discussions of current research and literature pertaining to disciplinary
specializations within the Division of Nutritional Sciences. 0 or 1 graduate
hours. No professional credit. Approved for S/U grading only. May be
repeated in the same or different terms, to a maximum of 2 hours for
Masters students and 4 hours for PhD students.

NUTR 593  Individual Topics in Nutrition  credit: 1 or 2 Hours.
For students majoring in nutritional sciences who wish to undertake
individual studies of a nonthesis nature in problems or topics not covered
in other courses; may be taken under the direction of any member of
the nutritional sciences faculty, with the exception of the student’s own
thesis adviser. 1 or 2 graduate hours. No professional credit. May be
repeated within the same or different terms to a maximum of 2 hours per
degree program. Prerequisite: Consent of instructor.

NUTR 599  Thesis Research  credit: 0 to 12 Hours.
Approved for S/U grading only. May be repeated.

Pathobiology (PATH)

PATH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/PATH)

Courses

PATH 190  Discovery Seminar  credit: 1 to 5 Hours.
May be repeated.

PATH 290  Undergraduate Research  credit: 1 to 5 Hours.
Laboratory and/or field studies selected in consultation with a faculty
mentor. May be repeated to a maximum of 10 hours. Prerequisite:
Consent of instructor.

PATH 394  Pathobiology  credit: 1 to 4 Hours.
To be used to designate a trial or experimental course for five or more
students. It is designed to be an undergraduate course. A course can
be taught under this designation two times within a two-year period and
cannot be renewed as PATH 394 course. May be repeated to a maximum
of 8 hours if topics vary. Prerequisite: Consent of instructor.

PATH 410  Comparative Immunobiology  credit: 4 Hours.
Same as ANSC 450 and MCB 442. See ANSC 450.

PATH 433  Virology & Viral Pathogenesis  credit: 3 Hours.
Emphasizes basic principles of virus structure and replication, virus-
cell interactions and virus-host interactions that underlie the molecular
biology, pathogenesis, and transmission of viral disease. Same as
MCB 433. 3 undergraduate hours. 3 graduate hours. Prerequisite:
MCB 300 or MCB 354, or consent of instructor.

PATH 439  Health Applications of GIS  credit: 3 Hours.
Students use spatial technologies and data to address issues of
health. Topics include disease outbreak surveillance and response,
environmental factors such as climate and socio-economic context,
and the medical and other data needed to spatial analysis of health
information. Application-based learning and class lectures are
complemented by readings, guest lectures and class discussions.
Geographic information system and global positioning system use
is covered with examples drawn from public and veterinary health.
Same as GEOG 439 and CHLH 439. 3 undergraduate hours. 3 graduate
hours. Approved for letter and S/U grading. Prerequisite: An introductory
statistics course such as ACE 261, CHLH 244, ECON 202, GEOG 280 or
equivalent.

PATH 460  Biology of Emerging Infect Dis  credit: 3 Hours.
Discusses the biology of emerging and re-emerging infectious disease
pathogens; examples of various bacterial, parasitic, and viral pathogens
are presented to characterize the diverse mechanisms and factors that
enable these agents to emerge; possible corrective and/or preventative
approaches are explored. No undergraduate credit. 3 graduate hours.
Prerequisite: VM 607 or PATH 433 or consent of instructor.

PATH 474  Principles of Epidemiology  credit: 4 Hours.
Same as CHLH 474 and ENVS 474. See CHLH 474.

PATH 494  Pathobiology  credit: 1 to 4 Hours.
To be used to designate a trial or experimental course for five or more
students. A course can be taught under this designation two times within
a two-year period and cannot be renewed as a PATH 494 course. 1 to
4 undergraduate hours. 1 to 4 graduate hours. Approved for letter and
S/U grading. May be repeated to a maximum of 8 hours if topics vary.
Prerequisite: Consent of instructor.

PATH 511  Seminar in Prod/Pop Medicine  credit: 1 Hour.
Discussion of selected topics and journal articles related to production
and population medicine, i.e. health and disease control/prevention
decisions that are based on improving productivity, profitability, and
maintaining populations of animals. Requires presentation of a formal
seminar to receive a letter grade. Same as VCM 511. 1 graduate hour. 1
professional hour. Approved for letter and S/U grading. May be repeated
to a maximum of 4 hours. Prerequisite: Graduate standing in VCM;
VM 608 or equivalent epidemiology course (requires third year standing
in the professional curriculum) and consent of instructors; for graduate
students outside VCM, consent of instructors required.

PATH 513  Biomed Grant Proposal Writing  credit: 2 Hours.
The objective of this course is to develop skills in grant seeking and
proposal writing. Topics include identification of funding sources,
writing style, setting a timeline for proposal preparation, the components
of a grant application, research compliance, scientific integrity, the
review process, and strategies for dealing with critiques and proposal
resubmission. Due to the nature of this course, enrollment will be limited.
Prerequisite: Consent of instructor.

PATH 514  Molec Mech Bact Pathogenesis  credit: 2 Hours.
Introduction of current research literature on host-microbe interactions.
The molecular basis for disease arising from these interactions will
be stressed. 2 graduate hours. 2 professional hours. Prerequisite: One
or more 400- or 500-level courses in microbiology, immunology, or
biochemistry, and consent of instructor.

PATH 515  Mechanisms Microbial Infection  credit: 3 or 4 Hours.
Newer concepts of host-microorganism relations; emphasis on the
dynamics and pathogenic mechanisms of microorganisms, immune
responses and defense factors of the host, and pathogenesis of specific
infections. Lectures, discussions, laboratory, and special problems.
Prerequisite: MCB 426 or VM 605, or equivalent; consent of instructor.

PATH 516  Epidemiology Infectious Dis  credit: 3 Hours.
Ecology of infection and disease; spread of disease and modes of
transmission; methods of control; socioeconomic consideration; selected
diseases: malaria, Lyme disease, anaplasmosis, schistosomiasis,
salmonellosis, pseudorabies, AIDS. Student presentations. Prerequisite:
Epidemiology class (VM 608 or equivalent), or consent of instructor.
PATH 517  Principle/Method Epidemiology  credit: 4 Hours.
Course covers principles of theoretical and applied epidemiology, with examples from veterinary and human medicine. The aim of the course is to integrate epidemiologic concepts and quantitative methodology in order to evaluate disease risk and treatment options at the individual and population levels. Topics include causal inference, epidemiologic study design, evaluation of bias, outbreak investigation, and special areas within epidemiology. Same as CHLH 517. Prerequisite: Graduate student standing or consent of instructor.

PATH 518  Concepts/Topics Immunology  credit: 2 Hours.
Study of newer concepts and theories in the field of immunology, with major emphasis on critical review of the primary literature. Topics include: Innate immunity, MTTC, immune regulation, tolerance, autoimmunity, antibodies, and immunopathogenesis of infectious diseases. Lectures and discussion. Same as MCB 586. Prerequisite: Consent of instructor; MCB 408 recommended.

PATH 519  Mechanisms Viral Pathogenesis  credit: 3 Hours.
Lecture-discussion on topics of molecular mechanisms of viral pathogenesis. Mechanisms of infection, virulence, viral spread, interaction with the immune system, persistence and other host-parasite interactions are covered using modern literature and in depth exploration of several animal virus systems. Same as MCB 561. Prerequisite: PATH 433 or VM 607 or consent of instructor.

PATH 520  Applied Epidemiology  credit: 4 Hours.
Same as CHLH 578. See CHLH 578.

PATH 524  Biostatistics  credit: 4 Hours.
Application of statistical methods to epidemiology, clinical and diagnostic medicine, and laboratory biomedical experiments. Topics include descriptive statistics and graphics, reliability, sample size estimation, contingency table analysis, analysis of group differences, survival analysis, correlation and linear regression. Emphasizes use of computerized statistical software in biomedical data analysis. 4 graduate hours. 4 professional hours. Credit is not given for both PATH 524 and either CPSC 440 or EPSY 480.

PATH 525  Statistics in Epidemiology  credit: 4 Hours.
Same as CHLH 527 and ENVS 527. See CHLH 527.

PATH 527  Parasitology/Epidemiology Sem  credit: 1 Hour.
Discussion of selected historic and current literature related to parasitology. May be repeated to a maximum of 2 hours. Prerequisite: Credit or concurrent registration in VM 607.

PATH 528  Multivariate Biostatistics  credit: 4 Hours.
The application of multivariate data analysis to biology, agriculture, and medicine. Includes principal components and factor analysis, multivariate analysis of variance, discriminate analysis, cluster analysis, and multidimensional scaling. Specific applications include clinical diagnosis, nutritional and physiological profile analysis, ecological niche analysis, and patterns of genetic relatedness using molecular genotyping. Computer exercises using standard statistical software are used throughout. Students will also have individual projects and report their analysis in class presentations. Same as IB 508. Prerequisite: A course in multiple linear regression (PATH 591 or equivalent).

PATH 541  Diseases Hemato & Lymph Tissue  credit: 4 Hours.
Course covers the benign reactive and neoplastic diseases of the bone marrow and lymphoid systems. A comparative approach will be taken with diseases considered from both human and animal aspects utilizing current information on causation, genetic, phenotypic, and morphologic characteristics. Prerequisite: Graduate student standing or consent of instructor. Preference for enrollment will be given to candidates with DVM degrees or medical scholars.

PATH 542  Ocular Pathology  credit: 1 Hour.
This course is aimed at veterinary pathology and ophthalmology residents. The course would also be open to interested UIUC medical students. The course involves examination and discussion of microscopic lesions of clinical veterinary ophthalmology cases through examination of clinical images, glass slides, and digital microscopic images. Students meet weekly concurrently with pathologists and ophthalmologists and either present current diagnostic cases, mystery cases, or lead a topic discussion related to ocular pathology. Same as VCM 542. 1 graduate hour. No professional credit. May be repeated in separate terms up to 9 hours, if topics vary. Prerequisite: Veterinary anatomic pathology residents or veterinary ophthalmology residents and interested UIUC medical students.

PATH 543  Necropsy for Non Path Majors  credit: 1 or 2 Hours.
Course is designed to provide advanced training in veterinary diagnostic pathology for graduate students with majors other than pathology. Teaching material is drawn from diagnostic cases submitted to the Diagnostic Laboratory. Course is adapted individually for each student’s major (clinical residency, laboratory animal residency, or graduate research using animals and animal samples). May be repeated to a maximum of 4 hours. Prerequisite: Graduate Veterinarian or residency status; or consent of instructor. Course restricted to graduate students or residents not majoring in pathology.

PATH 544  Immunobiological Methods  credit: 3 Hours.
A number of immunobiological methods and current immunological techniques are introduced in the context of various research designs with reference to their significance, their evolution and historical value. Detailed description of protocols includes optimization of parameters and modifications of conditions to satisfy different research situations and trouble shooting. Students are required to perform the techniques, collect data, analyze results and keep records. Lab reports including documented critical assessment of the attained conclusions are required for each technique. Same as ANSC 554. Approved for letter and S/U grading. Prerequisite: VM 605 or MCB 408 or ANSC 450 and consent of instructor.

PATH 545  Vet Diagnostic Path 1  credit: 0 to 6 Hours.
Instruction in diagnostic pathology for pathology majors. Instruction based on necropsy cases with emphasis on necropsy protocol; sample collection and submission; recognition, description, and interpretation of gross and microscopic lesions; and case diagnosis based on all test results. Approved for letter and S/U grading. May be repeated to a maximum of 10 hours. Prerequisite: Graduate veterinarian, graduate student with major in pathology, and consent of instructors.

PATH 546  Vet Diagnostic Path 2  credit: 0 to 6 Hours.
Instruction in diagnostic pathology for pathology majors. Instruction based on necropsy cases with emphasis on recognition, description, and interpretation of gross and microscopic lesions; evaluation of results of other diagnostic assays; disease pathogenesis; and final case diagnosis and comments. Approved for letter and S/U grading. May be repeated to a maximum of 10 hours. Prerequisite: PATH 545 and consent of instructors.
PATH 547 Pathology Seminar credit: 0 to 1 Hours.
Review and discussion of selected pathologic and clinico-pathologic material. Students are required to participate in weekly discussions and present at least one formal seminar per semester, on a topic approved by Pathology faculty. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Credit or concurrent registration in PATH 545, and consent of instructor.

PATH 548 Toxicologic Pathology credit: 4 Hours.
Examines the morphological and biochemical aspects of cellular reactions to injury in acute and chronic toxicities; effect of selected toxic agents on target organs in relation to functional and structural changes induced. Prerequisite: VM 605 or equivalent.

PATH 549 Gross Pathology credit: 1 Hour.
This course is aimed at veterinary students and anatomic pathology residents. This is an imaged-based course where interpretation of gross lesions will be taught for organ systems of a variety of different veterinary species. Veterinary students will receive weekly orientation to gross lesions by system with an image and discussion based format, and then will take mock ACVP boards-style gross exams followed by a group discussion of the exam. Pathology residents will take mock ACVP board-style gross exams. Veterinary students meet twice a week for an 8 week block and pathology residents meet once a week for the semester. 1 graduate hour. 1 professional hour. Approved for letter or S/U grading. May be repeated in separate terms for unlimited graduate or professional hours.

PATH 550 Concepts in Pathology credit: 4 Hours.
Lectures and related discussions of selected topics in experimental and theoretical aspects of general pathology. Emphasis on interdisciplinary approach to the mechanisms of disease. Prerequisite: DVM degree or MS in Biology; consent of instructor.

PATH 551 Interpretive Cytopathology credit: 1 Hour.
Discusses selected cytologic material. Emphasizes recognition, interpretation, oral presentation, and written description of cytology case materials. May be repeated to a maximum of 8 hours.

PATH 552 Diagnostic Cytology credit: 2 or 4 Hours.
Instruction in diagnostic cytology for clinical pathology majors. The course is for clinical pathology graduate students to advance their training in cytology. This is an intensive course with one-on-one training with the instructor. Clinical cytology cases and blood smears are evaluated microscopically and then a thorough written description and interpretation of each case is performed and reviewed. May be repeated in separate terms to a maximum of 30 graduate hours. Note that a maximum of 8 credit hours will count towards a graduate degree. Prerequisite: DVM degree or equivalent, clinical pathology graduate student or consent of instructor.

PATH 555 Comparative Oncology credit: 4 Hours.
Comparative study of the nature of mammalian and avian neoplasms based on general and special methods of tumor identification and classification; lectures, demonstrations, and laboratory. Prerequisite: VM 605 and VM 608, or equivalent.

PATH 556 Exotic/Wild Animal Diag Path 1 credit: 1 or 2 Hours.
Instruction in the performance of necropsy examinations on exotic and wild animals; emphasizes recognition, interpretation, oral presentations and written descriptions of gross and histologic lesions; emphasizes histologic features of lesions. For pathology majors only. May be repeated to a maximum of 10 hours. Prerequisite: VM 605 and VM 608; consent of instructor.

PATH 557 Exotic/Wild Animal Diag Path 2 credit: 0 to 2 Hours.
Instruction in the use of supplemental diagnostic data in the areas of bacteriology, clinical pathology, immunology, parasitology, toxicology, and virology in arriving at differential and definitive diagnoses of wild and exotic animals. Pathogenesis of gross and histologic lesions and mechanisms of lesion development are emphasized. For pathology majors only. May be repeated to a maximum of 10 hours. Prerequisite: PATH 556 or equivalent or consent of instructor.

PATH 558 Exotic/Wild Animal Path Sem credit: 0 to 1 Hours.
Discussion of selected pathologic and clinico-pathologic material pertaining to exotic and wild animals and presentation of a formal seminar. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Concurrent enrollment in PATH 556 or PATH 557 or consent of instructor.

PATH 559 Surgical Pathology credit: 0 to 2 Hours.
Discussion and interpretation of disease processes of domestic animals; emphasizes interpretation of pathologic changes in tissue specimens obtained during surgical procedures; correlates structure, function, and prognosis. Approved for letter and S/U grading. May be repeated to a maximum of 10 hours. Prerequisite: PATH 545 and PATH 546, or equivalent; consent of instructor.

PATH 560 Spatial Epidemiology credit: 4 Hours.
Patterns of health and disease in place and time; application of geographic information systems; analysis of time-space relations; clusters and diffusion of disease; geographic epidemiology of selected infectious and noninfectious diseases. Same as GEOG 560. Prerequisite: CHLH 474 or equivalent, or VM 608 or PATH 517 or equivalent; PATH 524 or SOC 485 or equivalent.

PATH 561 Veterinary Clinical Chemistry credit: 1 Hour.
Course will focus on the clinical interpretation and physiologic principles behind conventional clinical biochemical testing, and introduce newer concepts and procedures. The course is directed primarily to graduate veterinarians intending to seek board certification from specialty colleges that require basic knowledge of veterinary clinical pathology of their candidates. Approved for letter and S/U grading. Prerequisite: Graduate Veterinarian or consent of instructor.

PATH 575 Vet Info Tech/Computer App credit: 1 Hour.
Veterinary applications of word processing, spreadsheet, database, statistical, and health management software packages and various methods of information access and retrieval will be complemented by lecture/discussion and computer laboratory sessions. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

PATH 576 Communication Vet Consultation credit: 1 Hour.
Utilization of communication as a tool in veterinary consultation and management. Skills will be developed in oral and written communication through assigned presentations, technical reports, newsletters, and business letters. Veterinary applications will be emphasized. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

PATH 577 Vet Leadership Organ Behavior credit: 2 Hours.
Leadership principles and organizational theory with practical application to veterinary management and consultation. Includes individual, interpersonal, and organizational influences focusing on current issues in the veterinary profession. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

Information listed in this catalog is current as of 04/2018
PATH 578  Veterinary Business Management  credit: 4 Hours. 
Instruction in and application of the principles of veterinary business management including economics, decision making, financial management, marketing, and legal issues. Emphasis on specific practice type (small animal, food animal, equine) depending on interest of students. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

PATH 579  Adv Concept Swine Health Med 1  credit: 3 Hours. 
Instruction on the biostatistics involved in the effective analysis of swine production records, diagnostic tests, and clinical trials. Application of epidemiology principles in a swine production setting. Practical diagnostic, treatment, and preventive procedures for disease conditions related to swine production. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

PATH 580  Adv Concept Swine Health Med 2  credit: 4 Hours. 
Illustrate effective methods of monitor and analyze the effects of environmental conditions have on swine health and productivity. Design and implementation of programs to ensure product quality and consumer safety. Swine nutrition and lean growth modeling for optimal use of rations and providing nutritional consultation to swine producers. Evaluation, development, and application of genetic programs for swine production. Prerequisite: Two years of work experience as a veterinarian (post-graduate DVM) or consent of instructor; priority will be given to students enrolled in the Executive Veterinary Program.

PATH 590  Seminar  credit: 0 or 1 Hours. 
Required of all graduate students whose major is veterinary pathobiology. Approved for letter and S/U grading.

PATH 591  Design/Analysis Biomed Exper  credit: 4 Hours. 
Principles of sampling, treatment assignment, and statistical analysis applied to biomedical experiments; major emphasis include sample size determination, dose-response functions, single and multifactor designs, randomized blocks and repeated measures, and analysis of covariance. Prerequisite: CPSC 440 or PATH 524, or consent of instructor.

PATH 592  Special Problems  credit: 1 to 4 Hours. 
Basic and applied study including orientation and research on pertinent initial and continuing problems in the student's area of interest. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: Consent of instructor.

PATH 593  Econ of Food Animal Health  credit: 3 Hours. 
Concepts and procedures for economically driven decision-making with special emphasis on veterinary medicine. Topics will include: partial budgeting, enterprise budgeting, break-even analysis, decision analysis, production economics, computer modeling and benefit-cost analysis. Published scientific literature will be reviewed to provide practical examples of economic decision-making in optimizing animal health management. 3 graduate hours. 3 professional hours. Prerequisite: Graduate Veterinarian; VM 608 or equivalent epidemiology course (requires third year standing in the professional curriculum); or consent of instructor.

PATH 594  Veterinary Pathobiology  credit: 1 to 4 Hours. 
Course is to be used to designate a trial or experimental course for five or more students, designed to be an elective in the CVM graduate curriculum. A course can be taught under this designation two times within a two year period and cannot be renewed as a PATH 594 course. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: Prerequisites for each experimental course may vary and must be stated in a course outline prior to departmental approval.

PATH 596  Interdisciplinary Tox Sem  credit: 1 Hour. 
Same as ENVS 596 and CB 596. See CB 596.

PATH 598  Non-Thesis Research  credit: 1 to 8 Hours. 
Independent research to fulfill requirement for non-thesis alternative in Master of Science program only. Approved for S/U grading only. May be repeated to a maximum of 8 hours if topics vary. Credit is not given for both PATH 598 and PATH 599. Prerequisite: Must be Graduate Veterinarian.

PATH 599  Thesis Research  credit: 0 to 16 Hours. 
Approved for S/U grading only. May be repeated.

PATH 636  Advanced Clinical Pathology  credit: 2 Hours. 
A case-based approach to clinical pathology. Students are required to critically evaluate clinical case data, turn in a written description of the case and be a discussion leader for at least one class period. Students will be provided with basic history and signalment of cases and with laboratory data including CBC, clinical chemistry, urinalysis and occasionally additional data. Focuses on the dog and cat, however horse and food animal cases will be presented.

PATH 639  Veterinary Forensic Medicine  credit: 1 Hour. 
This course is aimed at veterinary students. This is a small group lecture and discussion based class where we will discuss forensic veterinary medicine. Topics to be discussed include blunt force trauma, projectile injuries, record keeping and forensic entomology. Students will meet twice a week for an 8 week block. 1 professional hour. Approved for S/U grading only.

PATH 642  Geographic Methods for Health  credit: 1 Hour. 
An introduction to geographic information system software and applications through lectures and exercises. Uses application-based learning to address topics related to spatial analysis and mapping for animal and public health. Exercises include making maps of disease occurrence and disease rates, using census data for population estimates, and creating maps that combine environmental factors with patterns of illness. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Credit is not given for both PATH 642 and PATH 493.

PATH 644  Bioscientific Writing  credit: 1 Hour. 
Instruction in communicating research results to a scientific audience. Assignments focus on writing an abstract, constructing a poster presentation, and completing a short manuscript. Intended for veterinary students who have some previous experience in a research setting and access to experimental data that can be used as a basis of writing exercises. Prerequisite: Enrollment in the veterinary curriculum and consent of instructor.

PATH 645  Outbreak Investigation  credit: 1 Hour. 
Published cases of foodborne outbreaks and other outbreaks serve as the basic learning materials for the course. Details about particular diseases/illnesses, how outbreak investigation are conducted, how risk factors are identified in an outbreak, how these factors contribute to incidence of disease, and resolutions of outbreaks are examined. The course expands upon content in the core veterinary curriculum and allows student to hone and apply their epidemiology skills. This course is valuable for veterinary public practice and anyone interested in public health, food safety, and epidemiology. 1 graduate hour. 1 professional hour. May be repeated in separate terms up to 2 hours if topics vary. Prerequisite: DVM students: VM 608 or permission of instructor. Graduate students: None. Restricted to DVM or graduate students.
PATH 669 Veterinary Diagnostic Medicine credit: 1.5 to 3 Hours. For VM-4 professional students, a veterinary diagnostic medicine clerkship in the Veterinary Diagnostic Laboratory. 1.5 to 3 professional hours. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 4.5 hours. Prerequisite: Fourth year standing or its equivalent in veterinary curriculum.

PATH 692 Special Problems credit: 1 to 3 Hours. Individual research on a special problem chosen in consultation with the instructor and department head. Approved for both letter and S/U grading. May be repeated to a maximum of 6 hours if topics vary. 1 to 3 graduate hours. 1 to 3 professional hours. Prerequisite: Registration in veterinary curriculum with grade-point average of 3.0 or above, or consent of instructor.

PATH 694 Veterinary Pathobiology credit: 1 to 3 Hours. To be used to designate a trial or experimental course for five or more students, designed to be an elective in the CVM professional curriculum. The course can be taught under this designation for two years or two offerings, whichever time is greater. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours if topics vary. Prerequisite: Registration in the veterinary curriculum or consent of instructor.

Persian (PERS)

PERS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/PERS)

Courses

PERS 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

PERS 201 Elementary Persian I credit: 5 Hours. Introduction to Persian, including conversation with a native speaker under the direction of a linguist-instructor, and a minimum of formal grammar and writing.

PERS 202 Elementary Persian II credit: 5 Hours. Continuation of PERS 201, with introduction of more advanced grammar and with emphasis on more fluency in speaking and reading. Prerequisite: PERS 201 or equivalent.

PERS 403 Intermediate Persian I credit: 4 Hours. General review of the essentials of grammar, selected reading of materials emphasizing Iranian life and culture, compositions, and practice in speech. 4 undergraduate hours. 4 graduate hours. Prerequisite: PERS 202.

PERS 404 Intermediate Persian II credit: 4 Hours. General review of the essentials of grammar, selected reading of materials emphasizing Iranian life and culture, compositions, and practice in speech. 4 undergraduate hours. 4 graduate hours. Prerequisite: PERS 403.

PERS 453 Advanced Persian I credit: 3 or 4 Hours. Students will develop the ability to read and understand paragraph level text, expand on their oral skills, continue to refine Persian writing skills and expand knowledge on Persian-speaking cultures. 3 undergraduate hours. 4 graduate hours. Prerequisite: PERS 403 and PERS 404; or consent of Persian Studies Program Director (determined after placement test taken by student).

PERS 454 Advanced Persian II credit: 3 or 4 Hours. Continuation of PERS 453. Students will become independent users of the language by studying more complex structures and contexts such as stories, news reports and movies. Students will also learn details of Persian grammar and apply them in written tasks. 3 undergraduate hours. 4 graduate hours. Prerequisite: PERS 453; or consent of Persian Studies Program Director (determined after placement test taken by student).

Philosophy (PHIL)

PHIL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PHIL)

Courses

PHIL 100 Introduction to Philosophy-ACP credit: 3 Hours. Consideration of some main problems of philosophy concerning, for example, knowledge, God, mind and body, and human freedom. Credit is not given for both PHIL 100 and PHIL 101. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil

PHIL 101 Introduction to Philosophy credit: 3 Hours. Consideration of some main problems of philosophy concerning, for example, knowledge, God, mind and body, and human freedom. Credit is not given for both PHIL 101 and PHIL 100. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 102 Logic and Reasoning credit: 3 Hours. Practical study of logical reasoning; techniques for analyzing and criticizing arguments, with emphasis on assessing the logical coherence of what we read and write. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 103 Logic and Reasoning QR II credit: 3 Hours. Introductory logic course that concentrates on investigating how the formal mathematical structure of statements, as well as the structure of the relationships among such statements, reveals the logical force of arguments that we use everyday. PHIL 102 takes a less formal, less mathematical approach to the same material. Credit is not given for both PHIL 103 and PHIL 102. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 104 Intro to Ethics-ACP credit: 3 Hours. Some basic questions of ethics, discussed in the light of influential ethical theories and with reference to specific moral problems, such as: What makes an action morally right? Are moral standards absolute or relative? What is relation between personal morality and social morality, and between social morality and law? Course is identical to PHIL 105 except for the additional writing component. Credit is not given for both PHIL 104 and either PHIL 105 or PHIL 106. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil
PHIL 105  Introduction to Ethics  
Credit: 3 Hours.
Some basic questions of ethics, discussed in the light of influential ethical theories and with reference to specific moral problems, such as: what makes an action morally right? Are moral standards absolute or relative? What is the relation between personal morality and social morality, and between social morality and law? Credit is not given for both PHIL 105 and either PHIL 104 or PHIL 106. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 106  Ethics and Social Policy  
Credit: 3 Hours.
Examination of the moral aspects of social problems, and a survey of ethical principles formulated to validate social policy. Credit is not given for both PHIL 106 and either PHIL 104 or PHIL 105. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

PHIL 107  Intro to Political Philosophy  
Credit: 3 Hours.
Introduction to core ideas in political and legal philosophy, for example, rights, equality, political obligations, legitimacy of states, nationalism, and oppression. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

PHIL 108  Religion & Society in West I  
Credit: 3 Hours.
Same as ANTH 108, JS 108, REL 108, and SOC 108. See REL 108. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Western

PHIL 109  Religion & Society in West II  
Credit: 3 Hours.
Same as ANTH 109, REL 109, and SOC 109. See REL 109. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Western

PHIL 110  World Religions  
Credit: 3 Hours.
Same as REL 110. See REL 110. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

PHIL 191  Freshman Honors Tutorial  
Credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars and Associates. May be repeated one time. Prerequisite: Consent of departmental honors advisor.

PHIL 198  Freshman Seminar  
Credit: 3 Hours.
Investigation of selected fundamental topics of philosophical inquiry. See Schedule for current topics. Prerequisite: Freshman James Scholar.

PHIL 199  Undergraduate Open Seminar  
Credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated.

PHIL 201  Philosophy in Literature  
Credit: 3 Hours.
Consideration of the philosophical themes implicit in a variety of important literary works, both classical and modern; may include such authors as Sophocles, Shakespeare, Goethe, Dostoevsky, and Sartre. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 202  Symbolic Logic  
Credit: 3 Hours.
Introduction to the techniques of formal logic, dealing primarily with truth-functional logic and quantification theory. This course satisfies the General Education Criteria for: Quantitative Reasoning I

PHIL 203  Ancient Philosophy  
Credit: 4 Hours.
Introduction to ancient philosophy, concentrating on Plato and Aristotle, dealing with such topics as metaphysics, ethics, and the theory of knowledge. Same as CLCV 203. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 206  Early Modern Philosophy  
Credit: 4 Hours.
The history of philosophy from Descartes to Kant, concentrating on such topics as metaphysics, ethics, and the theory of knowledge. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 210  Ethics  
Credit: 3 Hours.
Problems in ethical theory; the nature of right and wrong, justice, conscience, moral feelings, etc. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 214  Biomedical Ethics  
Credit: 3 Hours.
Philosophical study of selected moral and social problems concerning medicine and biology, such as euthanasia, abortion, allocation of scarce medical resources, health care and rights, and genetic engineering. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 220  Special Topics  
Credit: 3 Hours.
A consideration of readings on selected philosophical topics. May be repeated in the same semester to a maximum of 6 undergraduate hours and in separate semesters if topics vary. See Class Schedule for current topics.

PHIL 230  Philosophy of Religion Intro  
Credit: 3 Hours.
Introduction to philosophical analysis of religious thought and experience. Same as REL 230. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 231  Religion and Philosophy  
Credit: 3 Hours.
Same as REL 231. See REL 231. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 250  Conceptions of Human Nature  
Credit: 3 Hours.
Comparative examination of important historical and contemporary conceptions of human nature. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 270  Philosophy of Science  
Credit: 3 Hours.
Investigation of the nature of scientific knowledge by examining archetypal examples from physical science (e.g., Ptolemaic and Copernican astronomy); nature of scientific truth, validation of theories, nature of scientific theories, evolution of theories, experimental procedure, role of presuppositions, scientific revolutions, etc. This course satisfies the General Education Criteria for: Humanities - Hist Phil

PHIL 307  Elmnts Semantics & Pragmatics  
Credit: 3 Hours.
Same as LING 307. See LING 307.

PHIL 316  Ethics and Engineering  
Credit: 3 Hours.
Same as ECE 316. See ECE 316. This course satisfies the General Education Criteria for: Advanced Composition Humanities - Hist Phil
PHIL 325  Recent European Philosophy  credit: 3 Hours.
Introduction to the major recent philosophical movements in Europe,
such as phenomenology, existentialism, philosophical anthropology, and
neo-Marxism.

PHIL 351  Thinking and Reasoning  credit: 3 Hours.
Same as PSYC 351. See PSYC 351.

PHIL 356  Evolution of Mind  credit: 3 Hours.
Same as PSYC 356. See PSYC 356.

PHIL 357  Intro Cognitive Science  credit: 3 Hours.
Same as PSYC 357. See PSYC 357.

PHIL 380  Current Controversies  credit: 3 Hours.
Philosophical examination of positions taken on some issue of current
concern, for example, human sexuality, death and dying, feminism, race,
inelligence, war, sociobiology, and environmental ethics. See Class
Schedule for current topics. May be repeated with approval.

PHIL 390  Individual Study  credit: 2 to 4 Hours.
Readings in selected philosophical topics. Course may be taken by
honors students in partial fulfillment of department honors
requirements. May be repeated to a maximum of 6 hours in separate
terms. Prerequisite: Open to juniors and seniors with a grade-point
average of 3.0 only by prior arrangement with a member of the faculty
and with consent of the department director of undergraduate studies or
the chair.

PHIL 398  Advanced Undergraduate Seminar  credit: 3 Hours.
Seminar on selected philosophical topics; intended primarily for
advanced undergraduate philosophy majors. May be repeated to a
maximum of 6 hours. Prerequisite: A grade-point average of 3.0 and
consent of instructor.

PHIL 404  Medieval Philosophy  credit: 3 or 4 Hours.
History of philosophy from St. Augustine to William of Ockham. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: PHIL 101 or
PHIL 203.

PHIL 407  Logic and Linguistic Analysis  credit: 3 or 4 Hours.
Same as LING 407. See LING 407.

PHIL 410  Classical Ancient Philosophers  credit: 3 or 4 Hours.
Intensive study of one ancient philosopher or the intensive study of a
major philosophical problem through the consideration of a
number of ancient philosophers; chief emphasis on Plato and/or Aristotle. 3
undergraduate hours. 3 or 4 graduate hours. May be repeated with
approval, if topics vary. Prerequisite: One course in philosophy, preferably
PHIL 203.

PHIL 411  Nineteenth Century Philosophy  credit: 3 or 4 Hours.
Examination of the thought of such major figures as Hegel, Marx, and
Nietzsche. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: One
course in philosophy.

PHIL 412  Classical Modern Philosophers  credit: 3 or 4 Hours.
Intensive study of one classical modern philosopher or the intensive
study of major philosophical problem through the consideration of a
number of classical modern philosophers, e.g., Descartes, Leibniz, Locke,
Hume, Kant, and Hegel. 3 undergraduate hours. 3 or 4 graduate hours.
May be repeated with approval, if topics vary. Prerequisite: One course in
philosophy, preferably PHIL 206.

PHIL 414  Major Recent Philosophers  credit: 3 or 4 Hours.
Intensive study of one or two important philosophers of the present
century, e.g., Wittgenstein, Dewey, Heidegger, or Quine. Topics vary;
see Class Schedule. 3 undergraduate hours. 3 or 4 graduate hours. May
be repeated with approval, if topics vary. Prerequisite: One course in
philosophy.

PHIL 419  Space, Time, and Matter-ACP  credit: 3 or 4 Hours.
Same as PHYS 419. See PHYS 419.
This course satisfies the General Education Criteria for:
Advanced Composition

PHIL 420  Space, Time, and Matter  credit: 2 Hours.
Same as PHYS 420. See PHYS 420.

PHIL 421  Ethical Theories  credit: 3 or 4 Hours.
Systematic study of selected classics in moral philosophy by
such philosophers as Aristotle, Hume, Mill, Kant, and Nietzsche. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: One course in
philosophy.

PHIL 422  Recent Developments in Ethics  credit: 3 or 4 Hours.
Intensive treatment of issues in contemporary ethical theory. 3
undergraduate hours. 3 or 4 graduate hours. May be repeated one time
with approval. Prerequisite: One course in ethics.

PHIL 424  Philosophy of Religion  credit: 3 or 4 Hours.
Considers central issues in the philosophy of religion, e.g., the
justification of religious belief, the nature of God, religious experience,
etc. Same as REL 424. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: One course in philosophy.

PHIL 425  Philosophy of Mind  credit: 3 or 4 Hours.
Philosophical problems arising in connection with mental phenomena;
the relation of mind and body; free will and determinism; our knowledge
of other minds; and the self and personal identity. 3 undergraduate hours.
3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 426  Metaphysics  credit: 3 or 4 Hours.
Investigation of various metaphysical issues concerning, for example,
existence, particulars and universals, causation, laws of nature, time,
personal identity, material objects, and modality. 3 undergraduate hours.
3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 429  Value Theory  credit: 3 or 4 Hours.
Study of the nature and status of values, and of variable topics in value
theory, e.g., different types of values, and problems of truth, justifiability,
objectivity and relativism with respect to them. 3 undergraduate hours. 3
or 4 graduate hours. May be repeated as topics vary to a maximum of 6
undergraduate hours, or 8 graduate hours. Prerequisite: Junior standing.

PHIL 430  Theory of Knowledge  credit: 3 or 4 Hours.
Investigation of issues concerning, for example, the nature and possibility
of knowledge: its forms and limits; its relation to belief, truth, and
justification; and the nature of truth. 3 undergraduate hours. 3 or 4
graduate hours. Prerequisite: One course in philosophy.

PHIL 433  Evolutionary Neuroscience  credit: 3 or 4 Hours.
Same as NEUR 433 and PSYC 433. See PSYC 433.

PHIL 435  Social Philosophy  credit: 3 or 4 Hours.
Selected topics from the nature of social organization, nature and
convention, utility, justice, equality, liberty, rights, and duties. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: One course in
philosophy.
PHIL 436  Phil of Law and of the State  credit: 3 or 4 Hours.
Examination of issues in the philosophy of law, such as the nature of law, law and morality, justice, liberty and authority, punishment, and legal responsibility. 3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 438  Philosophy of Language  credit: 3 or 4 Hours.
Historical or comparative study of the philosophy of language. Same as LING 438. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 439  Philosophy of Mathematics  credit: 3 or 4 Hours.
Introduction to some of the main philosophical problems and contemporary viewpoints concerning mathematical concepts, mathematical methods, and the nature of mathematical truth. Same as MATH 439. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 441  Existential Philosophy  credit: 3 or 4 Hours.
Study of a selection of the major writings of the more important existential philosophers, e.g., Kierkegaard, Nietzsche, Heidegger, Sartre, and de Beauvoir. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 444  Topics in Recent European Phil  credit: 3 or 4 Hours.
Examines the continental treatments of selected issues, such as interpersonal relationships, human nature, perception or interpretation; see Class Schedule for current topics. 3 undergraduate hours. 3 or 4 graduate hours. May be repeated in separate terms as topics vary to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: One course in philosophy.

PHIL 453  Formal Logic and Philosophy  credit: 3 or 4 Hours.
Techniques and results of symbolic logic, with special attention to topics of philosophical importance. 3 or 4 graduate hours. Prerequisite: PHIL 202 or consent of instructor. This course satisfies the General Education Criteria for: Quantitative Reasoning II

PHIL 454  Advanced Symbolic Logic  credit: 3 or 4 Hours.
Completeness, compactness, and Lowenheim-Skolem theorems for first-order logic; incompleteness and undecidability of formal systems; and additional material on proof theory, model theory, or axiomatic set theory as time permits. 3 or 4 graduate hours. Prerequisite: PHIL 202 or consent of instructor. This course satisfies the General Education Criteria for: Quantitative Reasoning II

PHIL 471  Contemporary Phil of Science  credit: 3 or 4 Hours.
Examines important developments and controversies in recent philosophy of science. 3 undergraduate hours. 4 graduate hours. Prerequisite: One course in philosophy.

PHIL 472  Kierkegaard and the Self  credit: 3 or 4 Hours.
Same as CWL 472, REL 472, and SCAN 472. See SCAN 472.

PHIL 477  Philosophy of Psychology  credit: 3 or 4 Hours.
Psychology, broadly construed, is a cluster of disciplines devoted to the study of mind and behavior, including cognitive and developmental psychology, neuroscience, and artificial intelligence. Investigates the relationships that these disciplines bear to one another and of their overall potential to resolve age-old philosophical questions about the mind. Same as PSYC 477. 3 undergraduate hours. 4 graduate hours. Prerequisite: Two courses in philosophy or two courses in psychology or consent of instructor.

PHIL 492  Thesis  credit: 2 to 4 Hours.
Special training in philosophical investigation. Course may be taken by students pursuing graduation with distinction in partial fulfillment of those requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 4 undergraduate hours. Prerequisite: Open to seniors with a grade-point average of 3.5 in all philosophy courses only by prior arrangement with a member of the faculty and with consent of the department director of undergraduate studies or the chair.

PHIL 501  Seminar on the History of Philosophy  credit: 2 or 4 Hours.
Study of selected major philosophers, movements, problems, or topics in the history of philosophy. 2 or 4 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 507  Formal Semantics I  credit: 4 Hours.
Same as LING 507. See LING 507.

PHIL 511  Seminar Ethical Theory  credit: 2 or 4 Hours.
Intensive study of problems in ethical theory. Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 512  Seminar Social Philosophy  credit: 2 or 4 Hours.
Seminar designed to study special problems in social philosophy. See Schedule for current topics. Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 513  Seminar Philosophy of Logic  credit: 2 or 4 Hours.
Selected topics in contemporary logical theory. Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 514  Seminar in Cognitive Science  credit: 2 or 4 Hours.
Same as PSYC 514, ANTH 514, CS 549, EPSY 551, and LING 570. See PSYC 514.

PHIL 517  Seminar Philosophy of Science  credit: 2 or 4 Hours.
Various problems arising from specific studies in philosophy pertaining to science and vice versa. To be offered with varying topics. Course Information - Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.
PHIL 521 Seminar Contemporary Problems  credit: 2 or 4 Hours.
Intensive study of selected problems or topics in contemporary philosophy. Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 523 Seminar Theory of Knowledge  credit: 2 or 4 Hours.
Selected topics and writings of major importance in the contemporary philosophy of knowledge. Approved for letter and S/U grading. May be repeated. Letter grading applies when offered for 4 hours of credit. For Stage 3 Philosophy PhD students this course is approved for S/U grading when offered for 2 hours of credit. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 525 Seminar Philosophy of Mind  credit: 2 or 4 Hours.
Selected topics from major writings in the philosophy of mind. Approved for letter and S/U grading. May be repeated in the same or separate terms. Approved for letter grading when offered for 4 hours; approved for S/U grading when offered for 2 hours - only available for Stage 3 Philosophy PhD students. Prerequisite: Consent of instructor for non-philosophy graduate students.

PHIL 530 Dissertation Seminar  credit: 3 Hours.
Ongoing dissertation seminar required for all students who have passed the prelim requirement. Approved for S/U grading only. May be repeated in separate terms to a maximum of 24 hours. Prerequisite: Restricted to students satisfying requirements for the Ph.D. degree.

PHIL 547 Formal Semantics II  credit: 4 Hours.
Same as LING 547. See LING 547.

PHIL 551 Pragmatics  credit: 4 Hours.
Same as LING 551. See LING 551.

PHIL 583 Individual Topics  credit: 2 or 4 Hours.
Individual study and oral and written reports on topics not covered in other courses. Topics and plan of study must be approved by the candidate's adviser and by the staff member who directs the work. May be repeated. (Summer session, 2 to 8 hours).

PHIL 590 Directed Research  credit: 0 to 12 Hours.
Restricted to students satisfying requirements for the master's degree by writing a substantial essay. Approved for letter and S/U grading. May be repeated. Normally taken for 8 hours credit but may be taken for 12 hours credit with consent of department chair.

PHIL 599 Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Physics (PHYS)

PHYS 100 Thinking About Physics  credit: 2 Hours.
Conceptual and problem solving skills in preparation for PHYS 211: –analysis and mathematical descriptions of physical situations – understanding the meaning of the solutions Prerequisite: Credit or concurrent registration in MATH 220 or MATH 221.

PHYS 101 College Physics: Mech & Heat  credit: 5 Hours.
Newton's Laws, work and energy, rotational motion, fluids, thermodynamics, and waves. A noncalculus-based approach for majors in the life sciences, preprofessional health programs, agriculture, and veterinary medicine. Credit is not given for both PHYS 101 and either PHYS 211 or PHYS 213. Prerequisite: Trigonometry. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 102 College Physics: E&M & Modern  credit: 5 Hours.
Electric forces and fields, electric potential, electric circuits, magnetic forces and fields, geometrical optics, relativity, and modern physics. A noncalculus-based approach for majors in the life sciences, preprofessional health programs, agriculture, and veterinary medicine. Credit is not given for both PHYS 102 and either PHYS 212 or PHYS 214. Prerequisite: PHYS 101. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 110 Physics Careers  credit: 0 Hours.
Exploration of careers founded on physics undergraduate training. Introduction to the Physics Department, faculty, research and curricula. Outside speaker presentations. Approved for S/U grading only.

PHYS 123 Physics Made Easy  credit: 3 Hours.
Inquiry-based, nonmathematical, hands-on study of physics for elementary school teachers. Coverage of most of the National Science Education K-4 Content Standards. Additional fees may apply. See Class Schedule.

PHYS 140 How Things Work  credit: 3 Hours.
Nonmathematical approach underscoring the generality and ubiquity of basic physical laws in understanding commonplace phenomena: musical instruments, photography, electric and electronic circuits, television, motors, engines, etc. Credit is not given to engineering majors. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences

PHYS 150 Physics of Societal Issues  credit: 3 Hours.
Physics topics and applications relevant in the modern world: energy, quantum mechanics, electricity and magnetism, nuclear physics, waves, light, and outer space. Application to satellites, alternative energy, medical imaging, radiation, nuclear weapons, climate change, and electronics. Emphasis on analytical thinking and the applicability to modern societal issues.

PHYS 192 Science and Pseudoscience  credit: 1 Hour.
Extra-sensory perception, alien abduction, and psychic crime-solving from the standpoint of scientific inquiry and exploration; the scientific method, how science progresses, and the types of argumentative fallacies that pervade the pseudoscientific community; examples of good science and how the scientific method is self-correcting.

PHYS 193 Physics of Music  credit: 2 Hours.
Physics of music and musical instruments; acoustical physics, propagation of sound waves, the biological physics of human hearing, and the acoustical physics associated with all types of musical instruments.
PHYS 194  Behavior of Complex Systems  credit: 1 Hour. 
Exploration of systems with simple rules that nevertheless exhibit complex behavior. Lecture demonstrations on fractal growth, chaos, catastrophes, self-assembly, lightning, turbulence, explosions, and human rhythms. Simple computer models which exhibit regular, irregular, symmetric, and self-similar patterns and dynamics. Dynamics of isolated and coupled complex systems and mathematical tools for quantifying complex behavior.

PHYS 199  Undergraduate Open Seminar  credit: 0 to 5 Hours. 
Approved for letter and S/U grading. May be repeated.

PHYS 211  University Physics: Mechanics  credit: 4 Hours. 
Newton's Laws, work and energy, static properties and fluids, oscillations, transverse waves, systems of particles, and rotations. A calculus-based approach for majors in engineering, mathematics, physics and chemistry. Credit is not given for both PHYS 211 and PHYS 101. Prerequisite: Credit or concurrent registration in MATH 231. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 212  University Physics: Elec & Mag  credit: 4 Hours. 
Coulomb's Law, electric fields, Gauss' Law, electric potential, capacitance, circuits, magnetic forces and fields, Ampere's law, induction, electromagnetic waves, polarization, and geometrical optics. A calculus-based approach for majors in engineering, mathematics, physics, and chemistry. Credit is not given for both PHYS 212 and PHYS 102. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 213  Univ Physics: Thermal Physics  credit: 2 Hours. 
First and second laws of thermodynamics including kinetic theory of gases, heat capacity, heat engines, introduction to entropy and statistical mechanics, and introduction to application of free energy and Boltzmann factor. A calculus-based approach for majors in engineering, mathematics, physics and chemistry. Credit is not given for both PHYS 213 and PHYS 101. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 214  Univ Physics: Quantum Physics  credit: 2 Hours. 
Interference and diffraction, photons and matter waves, the Bohr atom, uncertainty principle, and wave mechanics. A calculus-based course for majors in engineering, mathematics, physics, and chemistry. Credit is not given for both PHYS 214 and PHYS 102. Prerequisite: PHYS 212. This course satisfies the General Education Criteria for: Nat Sci Tech - Phys Sciences Quantitative Reasoning II

PHYS 221  Enrichment Mechanics  credit: 1 Hour. 
Supplement to PHYS 211 with a collaborative group learning approach to improving conceptual understanding and problem solving in introductory calculus-based mechanics. Prerequisite: PHYS 100; concurrent registration in PHYS 211.

PHYS 222  Enrichment E & M  credit: 1 Hour. 
Supplement to PHYS 212 with a collaborative group learning approach to improving conceptual understanding and problem solving in introductory calculus-based electricity & magnetism. Prerequisite: PHYS 100; concurrent registration in PHYS 212.

PHYS 225  Relativity & Math Applications  credit: 2 Hours. 
Theory of Special Relativity, with applications to kinematics and dynamics. Key mathematical methods as they apply to aspects of electromagnetic theory and classical mechanics, including vector analysis, series expansions, matrices, Fourier analysis, partial differentiation, three-dimensional calculus, and simple differential equations. Prerequisite: Credit or concurrent registration in PHYS 212.

PHYS 280  Nuclear Weapons & Arms Control  credit: 3 Hours. 
Nontechnical analysis of the physics of nuclear weapons, nuclear weapon effects, delivery systems, and defenses against nuclear attack; presentation of current issues; basis for making informed judgments about nuclear armaments and arms control. Same as GLBL 280. This course satisfies the General Education Criteria for: Advanced Composition

PHYS 298  Freshmen/Sophomore Special Topics in Physics  credit: 0 to 4 Hours. 
Topical offerings of technical interest, skills, and knowledge in physics, and its practice, intended to augment the existing curriculum at the introductory level. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 credit hours if topics vary. Prerequisite: See Class Schedule or departmental course information for topics and prerequisites. For students with freshman or sophomore standing.

PHYS 325  Classical Mechanics I  credit: 3 Hours. 
Kinematics and dynamics of classical systems, including a review of Newtonian kinematics and dynamics. Three dimensional motion, variable mass, and conservation laws; damped and periodically driven oscillations; gravitational potential of extended objects and motion in rotating frames of reference; Lagrangian and Hamiltonian mechanics. Prerequisite: PHYS 225; credit or concurrent registration in MATH 285.

PHYS 326  Classical Mechanics II  credit: 3 Hours. 
Continuation of PHYS 325. Central force motion, collisions and scattering, rotational motion, coupled oscillations, continuous media, and fluid dynamics. Prerequisite: PHYS 325.

PHYS 329  Atmospheric Dynamics I  credit: 3 Hours. 
Same as ATMS 302. See ATMS 302.

PHYS 330  Atmospheric Dynamics II  credit: 3 Hours. 
Same as ATMS 312. See ATMS 312.

PHYS 398  Sophomore/Junior Special Topics in Physics  credit: 1 to 4 Hours. 
Topical offerings of technical interest, skills, and knowledge in physics, and its practice, intended to augment the existing curriculum at the intermediate level. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 hours if topics vary. Prerequisite: See Class Schedule or departmental course information for topics and prerequisites. For students with sophomore or junior standing.

PHYS 401  Classical Physics Lab  credit: 3 Hours. 
Experiments and techniques in classical mechanics and electromagnetism. Dynamics of electrical and mechanical oscillators in the linear domain. Fourier analysis of system response. Measurements of electrostatic fields, transmission lines, waves, and radiation. Electromagnetic phenomena in dielectrics, conductors, and magnetic materials. Instruction in data analysis and report writing. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or concurrent enrollment in PHYS 325.
PHYS 402 Light credit: 3 or 4 Hours.
Wave kinematics; geometrical optics: basic concepts, ray-tracing and matrix formalism, Gaussian imaging by thick lenses, stops, apertures, and intensity relations; interference; interference spectroscopy and coherence; diffraction: Fresnel-Kirchhoff formulation, Fraunhofer case, Fresnel case, and holography; polarized light. 4 undergraduate hours. 3 graduate hours. Prerequisite: PHYS 435. Relativistic covariance of Maxwell's equations. Course Information: 3 and electromagnetic radiation from charge and current distributions. electromagnetic wave propagation in various media and structures, MATH 285; credit or concurrent enrollment in PHYS 325. relativity is incorporated. Macroscopic fields in material media are Static electric and magnetic fields, their interactions with electric charge and current, and their transformation properties; the effect of special evidence for the atomic nature of matter and the properties of the hydrogen atom, perturbation theory, external fields, and atomic spectroscopy of outer electrons. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 285; PHYS 214 or PHYS 486. Atomic phenomena integrated with an introduction to quantum theory; continuation of PHYS 486. Identical particles, spectral hyperfine structure, magnetic properties of matter, atomic spectroscopy of inner electrons, high-energy photon effects, molecular binding and spectra, emission and absorption of light, and symmetry principles. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 485 or PHYS 486. Atomic Phys & Quantum Theory credit: 3 Hours. Basic concepts of quantum theory which underlie modern theories of the properties of materials; elements of atomic and nuclear theory; kinetic theory and statistical mechanics; quantum theory and simple applications; atomic spectra and atomic structure; molecular structure and chemical binding. 3 undergraduate hours. 3 graduate hours. Credit is not given for both PHYS 485 and CHEM 442. Prerequisite: MATH 285 and PHYS 214. Quantum Physics II credit: 4 Hours. Continuation of PHYS 486. Identical particles, spectral hyperfine structure, magnetic properties of matter, atomic spectroscopy of inner electrons, high-energy photon effects, molecular binding and spectra, emission and absorption of light, and symmetry principles. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 486. Intro to Physics Research credit: 3 Hours. Examination of current research topics through extensive reading, writing, and oral-presentation activities. 3 undergraduate hours. No graduate credit. This course satisfies the General Education Criteria for: Advanced Composition Individual Study credit: 1 to 4 Hours. Individual study at an advanced level in a subject not covered by course offerings. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.
PHYS 498  Special Topics in Physics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in physics intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary.

PHYS 499  Senior Thesis  credit: 3 Hours.
Faculty-guided writing of a senior thesis involving independent research. Oral presentations of research and outside journal articles, proposal writing and reviewing, poster presentation, preparation of graduate school applications, and discussion of physics frontiers with outside experts. 3 undergraduate hours. No graduate credit. Prerequisite: PHYS 496.

PHYS 504  Statistical Physics  credit: 4 Hours.
Single-particle distribution functions; classical and quantum mechanical systems, Boltzmann equation, virial theorem, and equations of state for gases; formal theory: ensembles, identical particles, thermodynamics of simple systems, and distribution functions; nonequilibrium problems; conservation laws and hydrodynamic equations, sound waves, and transport coefficients; plasmas, normal Fermi fluid, superfluids, and systems with internal degrees of freedom. Prerequisite: PHYS 427 and PHYS 486.

PHYS 505  Classical Electromagnetism  credit: 4 Hours.
Review of Maxwell’s equations; relativistic formulation of the electromagnetic field and the motion of charged particles; plane and guided waves; retarded potentials; radiation from simple antennas; radiation from accelerated charged particles; scattering and further topics. Prerequisite: PHYS 436.

PHYS 508  Mathematical Physics I  credit: 4 Hours.
Core techniques of mathematical physics widely used in the physical sciences. Calculus of variations and its applications; partial differential equations of mathematical physics (including classification and boundary conditions); separation of variables, series solutions of ordinary differential equations and Sturm-Liouville eigenproblems; Legendre polynomials, spherical harmonics, Bessel functions and their applications; normal mode eigenproblems (including the wave and diffusion equations); inhomogeneous ordinary differential equations (including variation of parameters); inhomogeneous partial differential equations and Green functions; potential theory; integral equations (including Fredholm theory). Prerequisite: MATH 285.

PHYS 509  Mathematical Physics II  credit: 4 Hours.
Continuation of PHYS 508. Further core techniques of mathematical physics widely used in the physical sciences. Complex variables; group theory in classical and quantum systems; tensors in physics; differential forms and their applications in mechanics; electromagnetism. Prerequisite: PHYS 508.

PHYS 510  Nonlinear Dynamics  credit: 4 Hours.
Broad introduction to nonlinear dynamics of physical systems with varying degrees of complexity; survey of a variety of concepts associated with bifurcation phenomena, mappings, nonlinear oscillations, chaotic behavior, strange attractors, and solitons. Topics of current interest. Prerequisite: PHYS 326.

PHYS 513  Quantum Optics & Information  credit: 4 Hours.
Experimental and theoretical fundamentals of quantum information, using nonclassical features of quantum physics (wave-particle duality, superposition, and entanglement) to surpass the information-processing capabilities of classical systems. Underlying fundamental quantum phenomena, including tests of nonlocality, quantum erasers, the quantum Zeno effect, squeezed light, multi-particle interference, state transformations of the Bloch sphere, and decoherence; quantum cryptography and teleportation; quantum information theory; quantum computation algorithms and techniques for error correction; experimental “qubit” systems. Prerequisite: Recommended: PHYS 580.

PHYS 514  Modern Atomic Physics  credit: 4 Hours.
Rigorous survey of modern atomic, molecular, and optical physics, including a functional approach to theory and an overview of experimental techniques. Atomic structure, including fine and hyperfine structure, multi-electron atoms, and relativistic effects; interaction of single atoms with dynamic and static electromagnetic fields, ultracold collisions between atoms; laser cooling, evaporative cooling, and magnetic trapping; Paul and Penning traps; quantum degenerate gases; atom interferometry. Prerequisite: PHYS 427, PHYS 436, and PHYS 487.

PHYS 515  General Relativity I  credit: 4 Hours.
Systematic introduction to Einstein’s theory, with emphasis on modern coordinate-free methods of computation. Review of special relativity, modern differential geometry, foundations of general relativity, laws of physics in the presence of a gravitational field, linearized theory, and experimental tests of gravitation theories. Same as ASTR 515. Prerequisite: PHYS 436.

PHYS 516  General Relativity II  credit: 4 Hours.
Continuation of PHYS 515 with emphasis on applications to astrophysics and cosmology. Relativistic stars, gravitational collapse, black holes, gravitational waves, numerical relativity, and cosmology. Same as ASTR 516. Prerequisite: PHYS 515.

PHYS 540  Astrophysics  credit: 4 Hours.
Fundamental aspect of astrophysics and cosmology and new developments in these fields. Basic physical concepts and principles, the key observational evidence, and illustrative calculations. Relativistic cosmological models, inflation, Big-Bang nucleosynthesis, and the cosmic microwave background; formation and evolution of galaxy clusters, galaxies, and stars; formation, structure, and evolution of white dwarfs, neutron stars, and black holes; rotation- and accretion-powered pulsars, X-ray and y-ray stars, and gravitational radiation. Same as ASTR 540. Prerequisite: PHYS 435, PHYS 485 or PHYS 486.

PHYS 541  Physics of Compact Objects  credit: 4 Hours.

PHYS 542  Theoretical Stellar Physics  credit: 4 Hours.
Same as ASTR 504. See ASTR 504.
PHYS 550 Biomedical Physics  credit: 4 Hours.
Physical concepts governing the structure and function of biological macromolecules; general properties, spatial structure, energy levels, dynamics and functions, and relation to other complex physical systems such as glasses; recent research in biomolecular physics; physical techniques and concepts from theoretical physics emphasized. Same as BIOP 550 and MCB 550. Prerequisite: CHEM 104; PHYS 485 or PHYS 487.

PHYS 552 Optical Spectroscopy  credit: 4 Hours.
Theoretical and experimental fundamentals of optical spectroscopy. Light-matter interaction (absorption of UV, visible, IR), emission spectroscopy (fluorescence, Raman and light scattering), theoretical backgrounds of molecular electronic and vibrational transitions, modern experimental techniques, and data analysis of the optical spectroscopy experiments. Laboratory exercises applying spectroscopy to a broad spectrum of disciplines, including biophysical examples. Prerequisite: PHYS 427 and PHYS 487.

PHYS 554 Nonequilibrium Stat Mechanics  credit: 4 Hours.
Mathematical description of classical and quantum stochastic systems, thoroughly addressing the tools and the mode of thinking of non-equilibrium statistical mechanics. Equilibrium statistical mechanics (review); Einstein and Smoluchowski diffusion equation; generalized moment expansion of correlation functions; noise-induced limit cycles; time series analysis; diffusion-controlled reactions; classical dynamics under the influence of stochastic forces; observables connected with Brownian transport, echoes, and hysteresis; spin-boson model. Examples from biological physics and theoretical condensed matter physics. Prerequisite: PHYS 504.

PHYS 560 Condensed Matter Physics I  credit: 4 Hours.
Crystalline perfection, free-electron gas, screening, plasma oscillations, and dielectric response; Bloch electrons, Brillouin zones, and band structure; semiconductors, intrinsic and extrinsic, with applications; phonons, elasticity, and anharmonicity; ferromagnetism and second-order phase transitions; superconductivity. Prerequisite: PHYS 427 and PHYS 580.

PHYS 561 Condensed Matter Physics II  credit: 4 Hours.
Hartree-Fock theory and electron-electron interactions; electron-phonon interactions; electron dynamics and transport; BCS theory of superconductivity; elastic properties; thermal properties due to anharmonicity; defects in solids. Prerequisite: PHYS 560 and PHYS 581.

PHYS 563 Phase Transitions  credit: 4 Hours.
Phenomenology of phase transitions, scaling, critical behavior, and multi-criticality; Landau theory of phase transitions; renormalization group methods, including lattice models and epsilon-expansion; numerical methods; critical dynamics; selected additional topics. Prerequisite: PHYS 504.

PHYS 565 Theory of Semicon & Devices  credit: 4 Hours.
Same as ECE 535. See ECE 535.

PHYS 569 Emergent States of Matter  credit: 4 Hours.
Consequences of broken symmetry in condensed matter, the emergence of novel ground states, and the nature of the excitations that arise. Examination of specific systems such as superconductivity, superfluidity, Bose-Einstein condensates, the quantum Hall states, liquid crystals, biological systems and patterns in Rayleigh-Benard convection. Prerequisite: PHYS 504 and PHYS 580.

PHYS 570 Subatomic Physics  credit: 4 Hours.
Nuclear systematics, nucleon-nucleon interaction, shell model, and single-particle and collective excitations; hadron spectroscopy, hadronic quantum numbers, quark-parton model, and hadron dynamics; weak interactions. Prerequisite: PHYS 580; concurrent registration in PHYS 581.

PHYS 575 Particle Physics I  credit: 4 Hours.
Basic calculations in elementary particle theory. Quantum electrodynamics, quantum chromodynamics, and the Glashow-Weinberg-Salam theory of weak and electromagnetic interactions as applied to the phenomenology of particle decays and high energy reactions. Prerequisite: PHYS 570. Recommended: credit or concurrent registration in PHYS 582.

PHYS 576 Particle Physics II  credit: 4 Hours.
Continuation of PHYS 575. Current topics in particle theory. Typically three or four different subjects in depth which may change with each offering. Prerequisite: PHYS 575.

PHYS 580 Quantum Mechanics I  credit: 4 Hours.
Second course in quantum mechanics. Operators, state vectors, and the formal structure of quantum theory; operator treatments of simple systems; angular momentum and vector addition coefficients; stationary state perturbation theory; introduction to scattering theory for particles without spin, partial wave analysis, and Born approximation; examples taken from atomic, nuclear, and elementary particle physics. Prerequisite: PHYS 485 or PHYS 487.

PHYS 581 Quantum Mechanics II  credit: 4 Hours.
Spin and identical particles, simple many-particle systems and elements of second-quantization theory; time-dependent processes, radiative transitions, and quantization of the electromagnetic field; scattering of particles with spin; polarization; introduction to the Klein-Gordon and Dirac equations and properties of simple relativistic systems. Prerequisite: PHYS 580.

PHYS 582 General Field Theory  credit: 4 Hours.
Standard techniques of field theory as used by experimenters and theorists; relativistic quantum mechanics of a single particle; Lagrangian field theories, perturbation theory, and calculation of lowest-order processes; introduction to Feynman diagrams and higher order processes; examples taken from quantum electrodynamics, solid-state and elementary particle physics, and many-body theory. Prerequisite: PHYS 581.

PHYS 583 Advanced Field Theory  credit: 4 Hours.
Quantization and Feynman path integral; gauge theories and renormalization; renormalization group with applications to particle physics and critical phenomena; approximation methods and recent developments. Prerequisite: PHYS 582.

PHYS 596 Graduate Physics Orientation  credit: 1 Hour.
Introduction to research in the Department of Physics. Advice on choosing a field of research and finding a research advisor. Faculty-presented overviews of the major areas of research available in the Physics Department. General discussions on instructional topics as well as ethics in teaching and sciences.

PHYS 597 Individual Study  credit: 1 to 16 Hours.
Individual study in a subject not covered in course offerings may be arranged for credit by registration under this number. May be repeated. 2 to 16 hours for full term; 1 to 8 hours for half-term. Prerequisite: Consent of instructor.
PLPA 204  Introductory Plant Pathology  credit: 3 Hours.
Concepts relating to causal agents of representative plant diseases, symptoms and diagnosis, modes of infection and spread, effects of environment on disease development, and methods of control. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

PLPA 395  Undergrad Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated to a maximum of 12 hours.

PLPA 401  Plant Pathogenic Fungi  credit: 4 Hours.
Principles of the biology, ecology and pathogenesis of fungi that cause plant diseases; morphology, classification, and history of these pathogens. The course includes both lecture and laboratory components. 4 undergraduate hours. 4 graduate hours. Offered in alternate years. Prerequisite: One year of biology or plant biology; and plant and animal genetics; and an introductory plant pathology course; or consent of instructor.

PLPA 402  Phytoparasitic Nematodes  credit: 2 Hours.
Study of plant-pathogenic nematodes with emphasis on economically important groups; nematode morphology, identification, classification, development biology, ecology, and host-parasite relationships; interaction with fungi, bacteria and viruses in plant disease development, experimental and diagnostic techniques; and symptomology and control. 2 undergraduate hours. 2 graduate hours. Prerequisite: PLPA 204 or equivalent.

PLPA 502  Phytoparasitic Nematodes  credit: 2 Hours.
Study of plant-pathogenic nematodes with emphasis on economically important groups; nematode morphology, identification, classification, development biology, ecology, and host-parasite relationships; interaction with fungi, bacteria and viruses in plant disease development, experimental and diagnostic techniques; and symptomology and control. 2 undergraduate hours. 2 graduate hours. Prerequisite: PLPA 204 or PLPA 501; an introductory course in animal biology; or consent of instructor.

PLPA 504  Plant Virology  credit: 2 Hours.
Current knowledge of viruses and the diseases they cause in plants studied in lectures, discussions and laboratories. Topics include virus structure, replication, expression, taxonomy and transmission and viral disease detection, diagnosis, epidemiology and management. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: PLPA 204 or equivalent.

PLPA 505  Plant Disease Diagnosis & Mgmt  credit: 3 Hours.
Field and laboratory techniques in plant disease diagnosis and appraisal; identification of diseases of small grains, turf, corn, soybeans, forage crops, vegetables, fruit, forest and shade trees, and ornamentals, both on field trips and in laboratory exercises. Includes fundamentals of disease management. 3 undergraduate hours. 3 graduate hours. Prerequisite: PLPA 204 or equivalent.

PLPA 506  Phytobacteriology  credit: 2 Hours.
Provides up-to-date coverage of prokaryotes that cause plant diseases. Lectures, discussions, and laboratories cover taxonomy, molecular biology, etiology, detection and identification, epidemiology and management of major plant pathogenic prokaryotes. 2 undergraduate hours. 2 graduate hours. Offered in alternate years. Prerequisite: PLPA 204 or equivalent.

PLPA 507  Diseases of Field Crops  credit: 3 Hours.
Studies the symptoms of major field crop diseases, life histories of causal organisms, and methods of control. Lecture and laboratory. Same as CPSC 407. 3 undergraduate hours. 3 graduate hours. Prerequisite: PLPA 204 or PLPA 401.

PLPA 508  Special Topics in Plant Pathology  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in plant pathology intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

PLPA 509  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.
POL 101  Elementary Polish I  credit: 4 Hours.
Oral and written work on basic pronunciation, grammar, and vocabulary. For students with no prior work in Polish.

POL 102  Elementary Polish II  credit: 4 Hours.
Continuation of POL 101. Prerequisite: POL 101.

POL 115  Intro to Polish Culture  credit: 3 Hours.
Introduction to Polish culture and literature from a broad historical perspective. Drawing on novels and plays, film, the visual arts, and works of historical research, the course provides students with the basic concepts, methodologies and theories of literary and cultural interpretation, with an emphasis on modern Polish culture (1800-2010) within a broader European context. Same as REES 115. This course satisfies the General Education Criteria for: Humanities - Lit Arts; Cultural Studies - Western.

POL 199  Undergraduate Open Seminar  credit: 1 to 5 Hours. May be repeated.

POL 201  Second Yr Polish I  credit: 4 Hours.
Grammar review, conversation practice, written exercises, and selected readings. Prerequisite: POL 102 or equivalent.

POL 202  Second Yr Polish II  credit: 4 Hours.
Continuation of POL 201. Prerequisite: POL 201.

POL 245  Survey of Polish Literature  credit: 3 Hours.
Critical survey, in translation, of Polish literature from the Middle Ages to the end of the nineteenth century; special attention given to the works in their cultural context. Same as CWL 245.

POL 301  Third-Year Polish I  credit: 3 Hours.
Reading and discussion of representative prose and poetry works of Polish authors since 1863. All readings are in the original language; the course emphasis is in the development of language skills. Prerequisite: POL 202 or consent of instructor.

POL 302  Third-Year Polish II  credit: 3 Hours.
Reading and discussion of representative prose and poetry works of Polish authors to 1863. All readings are in the original language; the course emphasis is in the development of language skills. Prerequisite: POL 301 or consent of instructor.

POL 401  Fourth-Year Polish I  credit: 3 Hours.
Analysis of the sound system and grammar of the contemporary Polish language. 3 undergraduate hours. 3 graduate hours. Prerequisite: Knowledge of another Slavic language or consent of instructor.

POL 402  Fourth-Year Polish II  credit: 3 Hours.
Reading and analysis of selected texts. 3 undergraduate hours. 3 graduate hours. Prerequisite: POL 401 or consent of instructor.

POL 446  Problems of Polish Literature  credit: 3 or 4 Hours.
Critical study, in translation, of modern Polish fiction, drama, poetry, and essay, from Young Poland to the "New Wave"; their contribution to literary styles and genres in Poland and abroad; special emphasis on Wyspianiski, Witkiewicz, and Gombrowicz. Same as CWL 436. 3 undergraduate hours. 4 graduate hours.

PS 100  Intro to Political Science  credit: 3 Hours.
Surveys the major concepts and approaches employed in the study of politics. Credit is not given for both PS 100 and PS 200. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci.

PS 101  Intro to US Gov & Pol  credit: 3 Hours.
Examines the organization and development of national, state, and local governments in the U.S.; the federal system; the U.S. Constitutions; civil and political rights; the party system; and the nature, structure, powers, and procedures of national political institutions. This course may require limited participating as a subject in research.

This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci.

PS 125  Washington Experience  credit: 3 Hours.
An examination of political Washington and policymaking. Through visits to think tanks, nonprofit organizations and agencies we will examine the policymaking world in Washington and get to know different participants in this process, what they do, and how they interact and work to affect policy and express their ideas. This course is a required component of the Illinois in Washington Program. Prerequisite: Acceptance to and enrollment in the Illinois in Washington Program.

PS 152  The New Middle East  credit: 3 Hours.
Discussion of contemporary sociopolitical change and current events in the Middle East. We will explore the background to these events, the factors that are driving them, and the short-term and long-term implications for the region and the world. Course reflects diverse fields of study, including cultural studies, economics, education, history, law, linguistics, literature, media, religion, political science, and sociology. Same as SAME 152 and SOC 152.

This course satisfies the General Education Criteria for: Cultural Studies - Non-West; Social Beh Sci - Soc Sci.

PS 180  IntroPolitics of Globalization  credit: 3 Hours.
Introduction to the politics of globalization; identification of the principal actors, properties, and patterns of the politics of globalization that distinguish global politics from other forms of politics between and within groups, communities, states, and international organizations.

PS 191  Topics in Civic Leadership  credit: 1 or 2 Hours.
Examines public and political life from the perspective of public and political leaders. Topics include professional development, career narratives, and/or development or selection of opportunities for civic or public service. May be repeated in separate terms if topics vary to a maximum of 3 hours.

PS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours. May be repeated.
PS 200 Foundations of Pol Sci credit: 3 Hours.
Surveys the social scientific approach to the study of politics. Credit is not given for both PS 200 and PS 100.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 201 US Racial & Ethnic Politics credit: 3 Hours.
Examines efforts by racial and ethnic communities to organize politically and by society to allocate resources based on race or ethnicity. Topical focus includes African Americans, Latinos, Asian Americans, Native Americans, and white ethnics. The primary goal of the course is to develop a more comprehensive understanding of racial and ethnic politics by identifying commonalities and differences among these groups and their relationship to the state. Same as AAS 201, AFRO 201, and LLS 201.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 202 Religion & Politics in the US credit: 3 Hours.
Examines how religion and politics influence each other in the United States, both historically and in contemporary society.

PS 220 Intro to Public Policy credit: 3 Hours.
Surveys the policy process including adoption, implementation, and evaluation. Topics may include reviews of substantive policy issues such as crime, energy, environment, poverty, foreign policy, civil liberties, or economic regulation. Prerequisite: PS 100 or PS 101, or consent of instructor.

PS 222 Ethics and Public Policy credit: 3 Hours.
Examination of the moral issues in public policy that arise in a in a democratic setting, utilizing conceptual tools from political and moral theory to evaluate policy decisions involving means and ends between conflicting goals. Prerequisite: PS 100, PS 101, or consent of instructor.

PS 224 Politics of the National Parks credit: 2 or 3 Hours.
Examines the politics of national parks in the United States, including creation of parks, local support or opposition to parks, and park policy as well as policy questions such as the value of wilderness ecosystem management, endangered species protection, and role of parks in national identity and remembrance of events such as the Civil War, the Indian wars, or the civil rights movement. Same as RST 224. Additional fees may apply. See Class Schedule. May be repeated in separate terms to a maximum of 10 hours.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 225 Environmental Politics & Policy credit: 3 Hours.
Examinations of the political, economic, ecological, and cultural trade-offs between the use and the preservation of the environment, with particular emphasis on the preservation of land and water resources in national parks, forests, and other reserved lands. Same as RST 225.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 230 Intro to Pol Research credit: 3 Hours.
Surveys the principles that guide empirical research in political science; emphasizes definition of research problems, principles and practices of measurement, use of data as evidence, and data analysis. Prerequisite: PS 100 or PS 101, or consent of instructor.

PS 231 Strategic Models credit: 3 Hours.
Introduces strategic models of political behavior and their implications for our understanding of politics. Uses simple models, inspired by game theory, to examine fundamental political questions.

PS 240 Intro to Comp Politics credit: 3 Hours.
Surveys the basic concepts and principles of political analysis from a comparative perspective.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 241 Comp Politics in Dev Nations credit: 3 Hours.
Provides comparative and historical insights into the problems affecting the developing world by examining social, economic and political changes in Africa, Asia, and Latin America.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

PS 242 Introduction to Modern Africa credit: 3 Hours.
Same as AFST 222, ANTH 222, and SOC 222. See AFST 222.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

PS 243 Pan Africanism credit: 3 Hours.
Provides an introduction to Pan African political movements and ideologies from the Americas to continental Africa. Examines the political, social, economic, and ideological relationships and connections between Africans and their descendants in the diaspora from an historical and comparative perspective. Same as AFRO 243, AFST 243, and SOC 267.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

PS 270 Intro to Political Theory credit: 3 Hours.
Introduces the nature, structure, and purposes of political theory; examines major works on the problems of political order, obedience, justice, liberty, and representation to distinguish and clarify different theoretical approaches.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

PS 272 Women and Politics credit: 3 Hours.
Examines the political status and roles of women. Topics include women's political behavior; feminist and anti-feminist politics; and contemporary legislative and public policy issues, such as educational equity, equal rights legislation, and health care delivery for women. Same as GWS 272.

PS 273 Environment and Society credit: 3 Hours.
Same as ESE 287, GEG 287 and NRES 287. See NRES 287.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 280 Intro to Intl Relations credit: 3 Hours.
Structure and processes of international relations, trends in international politics, and the future of the international system. Credit is not given for both PS 280 and PS 281.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

PS 281 Intro to Intl Relations-ACP credit: 3 Hours.
This course is identical to PS 280 except for the additional writing component that fulfills the campus' advanced composition requirement. Credit is not given for both PS 280 and PS 281. Prerequisite: Completion of campus Composition I general education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition
Social Beh Sci - Soc Sci
PS 282 Governing Globalization  credit: 3 Hours.
Examines the historical, socio-economic, political, and moral dimensions associated with the rise of a global society and its governance. Prerequisite: Completion of campus Composition I general education requirement; completion of one course in a social science or consent of instructor.
This course satisfies the General Education Criteria for:
Advanced Composition
Social Beh Sci - Soc Sci

PS 283 Intro to Intl Security  credit: 3 Hours.
Surveys the major issues associated with arms control, disarmament and international security. Also examines the military, socio-economic, and political dimensions of weapons systems, military strategy, the ethics of modern warfare, nuclear proliferation, and regional security issues. Same as GLBL 283.

PS 289 Politics of the Vietnam War  credit: 3 Hours.
Examines questions about the war in Vietnam and the era during which it was fought. Focuses on official policy questions, such as the decision making process, the legality of the war, the question of war crimes, and lessons for international relations. Domestic issues, such as the rise and effect of the antiwar movement, are also discussed. Prerequisite: Allen Hall residency or consent of Unit One director.

PS 292 Undergraduate Research Practicum  credit: 1 to 4 Hours.
Familiarizes students with processes for producing, validating, and analyzing political science data through experiential learning. Nature and topical focus of research projects vary. May be repeated up to 4 hours in separate terms. Prerequisite: Consent of faculty member supervising the practicum.

PS 299 Study Abroad  credit: 0 to 18 Hours.
Lectures, seminars, and practical work in an approved study-abroad program in Political Science, appropriate to the student's course of study. Approved for letter and S/U grading. May be repeated to a maximum of 34 hours per academic year. Prerequisite: Overall GPA 2.75, 3.00 grade point average in Political Science, admission to approved program.

PS 300 Special Topics  credit: 3 Hours.
Selected readings and research in political science. See Class Schedule for current topics. May be repeated to a maximum of 6 hours if topics vary. Prerequisite: Six hours of political science, or consent of instructor.

PS 301 The US Constitution I  credit: 3 Hours.
Analyses issues related to judicial interpretation of the constitution; the separation of governmental powers; federalism; checks and balances among the three branches of the national government; and the jurisdiction of federal courts. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 302 The US Constitution II  credit: 3 Hours.
Analyses issues involved in free speech, freedom of religion, rights of the criminally accused, and government's responsibility to protect persons from discrimination based on race or sexual preference. Pays special attention to the role of law and judges. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 303 The US Congress  credit: 3 Hours.
Examines the legislative function in government; the structure and organization of Congress; legislative procedures; pressure groups and lobbying; the relation of legislature to other branches of government; and problems of legislative reorganization. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 304 The US Presidency  credit: 3 Hours.
Examines the multiple roles of the president; the determinants and growth of presidential influence; presidential decision making; the president's role in the formulation and implementation of public policy; and the president's multiple constituencies. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 305 The US Supreme Court  credit: 3 Hours.
Examines how the modern Supreme Court resolves major issues in American constitutional politics. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor; PS 301 or PS 302.

PS 306 Judicial Politics  credit: 3 Hours.
Introduction to the study of courts and judges as political institutions and actors. Focuses primarily on federal courts in the United States, but also covers courts in the American states. Addresses topics such as how judges are selected; who or what determines which cases are heard; the influence of ideology and the law on judges' decisions; the relationships that exist between the courts in the judiciary; the role of the president and the Senate in judicial decisions; and judges' decisions that run contrary to the public's wishes. Prerequisite: PS 101.

PS 307 Separation of Powers  credit: 3 Hours.
Explores how the checks and balances built into the US Constitution affect the interactions between the Executive, Legislative, and Judicial branches. Addresses topics such as whether Congress is less productive during times of divided government; why some presidential nominees sail through confirmation, while others take years to be confirmed; and whether Supreme Court justices pay attention to the preferences of the President and Congress when deciding cases. Prerequisite: PS 101.

PS 308 Politics, Policy & Regulation  credit: 3 Hours.
Explores how federal agencies (e.g., the Environmental Protection Agency, and the Department of Defense) shape national policy. Provides students with a background in the concepts and ideas that political scientists use in the study of the federal bureaucracy, and motivates further study of political institutions. Students will use traditional political science and legal texts to analyze contemporary policy problems. Prerequisite: PS 101.

PS 309 State Gov in the US  credit: 3 Hours.
Surveys the origins and evolution of state government in the United States. Topics include history, structure and dynamics of state governments, laws and the judiciary, state legislatures, political parties, organized interests, bureaucracies, demographic change and electoral patterns, and political conflicts, and coalitions. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 310 Politics of Organizations  credit: 3 Hours.
Introduction to the study of public organizations with a focus on formal political organizations including parties, legislatures, and bureaucracies. In-depth analysis of two of the main problems confronted by organizations: collective action problems and delegation problems. Students will acquire an understanding of these problems as well as different ways in which they can be addressed. A strong emphasis is also placed on developing the analytical skills necessary for informed analysis of political interactions involving formal organizations. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 311 Political Parties in the US  credit: 3 Hours.
Examines the organization and operation of the American party system; national, state, and local organizations and their interactions; the convention and primary systems; and campaign methods and finance. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.
PS 312 Politics and the Media credit: 3 Hours.  
Examines the processes of mass-mediated political communication in democratic societies. Special emphasis will be given to the role of news media in democratic theory, factors shaping the construction of news such as journalism routines, media economics, and the strategic management of news by political elites. Same as CMN 325 and MACS 322.

PS 313 Congress and Foreign Policy credit: 3 Hours.  
Examines cases of foreign-policy making over 100 years with a focus on the struggle between the legislative and executive branches, constitutional questions, explanations for changes in behavior, and the impact on democratic process. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 314 Political Psychology credit: 3 Hours.  
Explores the psychological processes that underlie political attitudes and behaviors. Specifically, we will take theories from social, personality, cognitive, and evolutionary psychology and apply them to political phenomena. Topics will include how politics is affected by cognitive biases, emotions, persuasion, social influence, identity, prejudice and discrimination, personality, and evolution and genetics. We will also explore what we can learn about basic human psychology by studying politics carefully. Prerequisite: PS 101.

PS 315 African American Politics credit: 3 Hours.  
Examines the role of race in stimulating change in American political life; types of strategies employed in the civil rights struggle; how race affects electoral participation and the broader political and economic conditions of African Americans. Same as AFRO 315. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 316 Latina/Latino Politics credit: 3 Hours.  
Examines the role of Latino electorate in shaping state and national politics. Reviews the histories of Latino national origin groups, examines public policy issues of concern to Latinos, successes and failures of Latino empowerment strategies, and the electoral impact of Latino votes. Focus will be primarily on Mexican Americans, Puerto Ricans, and Cuban Americans and an assessment of the degree to which their political agendas are likely to merge over the coming years. Same as LLS 316. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 317 Asian American Politics credit: 3 Hours.  
Provides an overview of the role of Asian Americans in the American political system. Topics include: the international context of emigration, the history of different Asian groups in the U.S., demographic patterns, issues of identity, classification, and pan-ethnicity, voting behavior, minority representation, and public policy. Same as AAS 317. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 318 Interests Grps & Soc Movements credit: 3 Hours.  
Focuses on two important forces in American politics that provide ways for citizens to affect public policy: interests groups and social movements. Examination of organized interest groups, including their organization, growth, activity, and impact in American politics. Examines the formation and role of social movements. Prerequisite: PS 101, or six hours of Political Science credit, or consent of instructor.

PS 319 Campaigns and Elections credit: 3 Hours.  
Examines the dynamics of United States congressional and presidential campaigns, including electoral rules, campaign organization and finance, candidate strategy, role of parties, interest groups, and the media, campaign effects, and proposals for reform. Prerequisite: PS 101 or six hours of Political Science credit.

PS 320 Public Opinion credit: 3 Hours.  
Examines the nature of public opinion in contemporary American politics. Considers the extent to which public opinion is organized by ideology, values, party identification and other group-related identities. Will analyze both the sources and consequences of public opinion and the nature of public support for democracy and democratic institutions. Will investigate the relationship between public opinion and policymaking. Prerequisite: PS 101.

PS 321 Principles of Public Policy credit: 3 Hours.  
Examines different approaches to evaluating the performance of public sector organizations, including private sector accountability principles. Focuses on how to improve the performance of governmental agencies, as well as corporate social responsibility. Same as ACCY 321, ACE 321, and BADM 303. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 322 Law and Public Policy credit: 3 Hours.  
Examines the nature of law, law makers, and law appliers; the determinants of law-making; and the societal impact of law. Prerequisite: PS 101, six hours of Political Science credit, or consent of instructor.

PS 323 Law and Representation credit: 3 Hours.  
Examines political and legal policies related to electoral representation including constitutional protections of voting rights and related topics such as a gerrymandering, vote counting, majority minority districts, and the Voting Rights Act. Prerequisite: PS 101 or six hours of Political Science or consent of instructor.

PS 324 Introduction to Biology and Politics credit: 3 Hours.  
Examines the biological processes that underlie political attitudes and behaviors. Specifically, we will take theories from behavioral and molecular genetics, psychophysiology, neuroscience, and evolutionary psychology and apply them to political attitudes and behaviors. Topics will include how evolutionary adaptations shape political life, how genes affect political traits, the effects of physiological differences on how people experience the political world, and what political insights can be drawn from studying differences in brain structures and functioning. Prerequisite: PS 101.

PS 325 Immigration & Citizenship credit: 3 Hours.  
Examines of the conceptual issues associated with citizenship and immigration, considering current political debates from a variety of perspectives: empirical, historical, and normative. Focuses on the United States but will also examine the immigration and citizenship processes of other nations as well. Among topics considered: why people migrate; consequences of migration; efforts to integrate immigrants; public opinion, citizenship traditions and rationales; membership; belonging, and national identify; post national citizenship. Prerequisites: PS 101, 6 hours of Political Science credit, or consent of instructor.

PS 326 Intro to Political Behavior credit: 3 Hours.  
Analyzes the relationship between political attitudes and public opinion formation. The course also discusses political participation, political tolerance, and attitudes toward political leaders. Prerequisite: POLS 101, six hours of Political Science credit, or consent of instructor.

PS 327 Intro to Electoral Behavior credit: 3 Hours.  
Examines the social, psychological and institutional determinants of individual voting decisions. Prerequisite: POLS 101, six hours of Political Science credit, or consent of instructor.
PS 339 Political Violence credit: 3 Hours.
Survey of various forms of political violence and examination of competing theories about why these types of political violence occur and their implications. The different "categories" of violence under examination constitute pressing topics in the study of conflict in both international relations and comparative politics. These categories, which may overlap conceptually or empirically, include phenomena such as mass collective action in protests, riots, repression and torture, coups, civil war and insurgency, genocide and massacres, sexual violence during war, self sacrifice, and terrorism. Prerequisite: PS 240 or PS 241 or PS 280, six hours of Political Science credit, or consent of instructor.

PS 340 Politics in Intl Development credit: 3 Hours.
Examines the ways in which the wealthy countries of the world, international organizations and non-governmental organizations have tried to catalyze or facilitate economic and human development in the poorer countries of the world. Prerequisite: PS 240 or PS 241 or PS 281, or six hours of Political Science credit, or consent of instructor.

PS 341 Gov & Pol in Africa credit: 3 Hours.
Examines contemporary economic, social, and political processes in Africa, focusing on three basic explanatory themes: historical patterns of development; emerging patterns of class and interest; and leadership strategies. Same as AFRO 341. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 343 Gov & Pol of China credit: 3 Hours.
Introduces the government and politics of modern China. Same as EALC 343. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 345 Gov & Pol of SE Asia credit: 3 Hours.
Provides a comparative analysis of the political development of the countries of Southeast Asia. Emphasis is placed on differing approaches to the governance and public policy formation, as well as economic, social, historical, and cultural influences on political development. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 346 Gov & Pol of South Asia credit: 3 Hours.
Provides a comparative analysis of the political development of India, Pakistan, Sri Lanka, and other nations in South Asia. Emphasis is placed on the differing approaches to governance and public policy formation, as well as the economic, social, historical, geographical and cultural influences on political development. Same as ASST 346. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 347 Gov & Pol of Middle East credit: 3 Hours.
Analyses the transformation of Middle Eastern society from Morocco to Iran, as case studies in political modernization. The politics of the area are studied with special reference to causes and character of modernization, role of leadership, ideologies and institutions, methods and theories for analyzing political systems undergoing fundamental transformation, and implications for U. S. policy. Same as ASST 347. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 348 Gov & Pol in Western Europe credit: 3 Hours.
Examines the major governmental systems of continental Europe; the evolution, structure, and functioning of the political institutions of France, Germany, Italy, Spain, Switzerland, and the Scandinavian countries. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 351 Gov & Pol Post-Soviet States credit: 3 Hours.
Examines the evolution, structure, and functioning of post-Soviet governments. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 352 Gov & Pol of East Europe credit: 3 Hours.
Examines the collapse of communism and efforts to develop capitalism and democracy. Special emphasis is given to national conflict and European integration. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 353 Gov & Pol of Latin America credit: 3 Hours.
Examines the origin and development of Latin American political institutions. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 355 Democratization credit: 3 Hours.
Examines the global process of democratization, with special attention to gains and failures in selected areas since 1974. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 356 Comparative Political Economy credit: 3 Hours.
Examines the effect of domestic political processes on economic performance, including monetary, fiscal, and trade policies. Topics include partisan influences on policy, interest group intermediation, political accountability for economic outcomes, and consequences of product and capital market internationalization. Same as GLBL 356. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor.

PS 357 Ethnic Conflict credit: 3 Hours.
Explores the bases of nationalist and ethnic identities across a variety of different national and cultural contexts, and how these are related to conflict at the intrastate and interstate levels. Consideration is given to the characteristics and patterns of ethnic conflict with special emphasis on how and when ethnic tensions become manifested in violent conflict. The course concludes with consideration and evaluations of various domestic and international approaches to conflict management and resolution. Same as GLBL 357. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor. This course satisfies the General Education Criteria for: Advanced Composition

PS 358 Comparative Political Behavior credit: 3 Hours.
Examines themes of political behavior such as political participation, electoral politics, political culture, and contentious politics from a cross-national perspective. Prerequisite: PS 240, or PS 241, or six hours of Political Science credit.

PS 371 Classical Political Theory credit: 3 Hours.
Considers the major works of Greek and Roman political theory, stressing their relevance to modern political analysis and action. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.

PS 372 Modern Political Theory credit: 3 Hours.
Provides critical analysis of political theories from the fifteenth century to the present. The discussions focus on topics such as the development of conceptions of human nature, the role of the state, justice, legitimacy, obligation, individual rights, equality, and mechanisms of maintenance and change. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.

PS 373 Democratic Theory credit: 3 Hours.
Examines theories of the nature and conditions of democracy; compares and analyzes contemporary democratic institutions. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.
PS 374 Future Politics credit: 3 Hours. Examines visions of the future drawn from science fiction literature as a way to engage with political and social theory and to cultivate the political imagination. Prerequisite: Six hours of political science credit or consent of instructor.

PS 376 American Political Theory credit: 3 Hours. Surveys American political thought from colonial times to the present. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.

PS 377 Topics Contemp Pol Theory credit: 3 Hours. Examines specific topics and writers of contemporary political theory. Recent themes have included conceptions of power, rights, justice, and radical political thought. May be repeated to a maximum of 9 hours. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.

PS 378 Topics Non-Western Pol Thought credit: 3 Hours. Considers political thought outside of the Greco-Roman, European, and North American tradition. May be repeated if topics vary. Prerequisite: PS 270, six hours of Political Science credit, or consent of instructor.

PS 379 Intl Rel & Domestic Politics credit: 3 Hours. Examines conceptual linkages between international relations and domestic politics. Emphasizes theoretical explanations of and empirical evidence for these linkages. Prerequisite: PS 280 or PS 281, or six hours of Political Science credit, or consent of instructor.

PS 380 International Cooperation credit: 3 Hours. A study of cooperation among states. Cooperation dilemmas and their solutions, with focus on institutional arrangements that are aimed to facilitate cooperation among states. Prerequisite: PS 280 or PS 281, six hours of Political Science credit, or consent of instructor.

PS 382 Intl Political Economy credit: 3 Hours. Examines the interaction between international politics and economics; locates ideologies and practices in the context of international economic relations. Considers such topics as international trade, the global monetary order, multi-national corporations, economic aid relationships, and food and energy politics. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 384 Politics of Globalization credit: 3 Hours. Examines the basic concepts and politics associated with the emergence of the global society. This course evaluates divergent theoretical explanations for the emergence of global politics, as well as how and why the global society governs itself. It examines the strengths and shortcomings of the nation-state, markets, and democratization as responses to the imperatives of order, welfare, and legitimacy. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 385 Politics of the European Union credit: 3 Hours. Considers the history of the European Union and its current functions and operations. Focuses on the ongoing process of political and cultural integration. Consists of sections in Illinois and abroad, interacting extensively via the worldwide web. Same as EURO 385, FR 385, and GER 385. Prerequisite: PS 240 or PS 241, six hours of Political Science credit, or consent of instructor; cross-listings require language training appropriate for enrollment in the respective overseas programs.

PS 386 International Law credit: 3 Hours. Analyzes the concepts and bases of public international law. Topics include sources and subjects of international law, as well as issues of jurisdiction, territory, law of the sea, and use of military force. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 387 National Security Policy credit: 3 Hours. Examines principal theories of international security and evaluates their capacity to explain the security behavior of states and other key international actors. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 389 International Communications credit: 3 Hours. Same as MACS 389. See MACS 389.

PS 390 American Foreign Policy credit: 3 Hours. Considers the major foreign policy decisions currently confronting the United States government: analyzes their background, principal issues, and alternative actions, as well as the policy formulation process. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 391 Soviet & Post-Sov Foreign Pol credit: 3 Hours. Surveys Soviet and Post-Soviet foreign policy from 1917 to the present, with emphasis upon the forces shaping this policy, special attention to the interplay of ideology and national interest in policy formulation. Prerequisite: PS 280 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 392 Intl Organizations&Regionalism credit: 3 Hours. Examines regionalism and regional international organizations and their consequences for multilateralism cooperation, and conflict. Prerequisite: PS 280.

PS 393 Diplomatic Studies Practicum credit: 4 Hours. Practical introduction to the study of international organizations, consisting of three parts: academic modules in Urbana-Champaign; guest lectures and site visits in Vienna, Austria, and field trips TBA; and a final research paper based on fieldwork in Vienna, extending into late June. Enrollment requires prior admission to the Vienna Diplomatic Program.

PS 394 Crisis Diplomacy credit: 3 Hours. A comparative study of foreign policy decision-making and diplomacy among the major states from 1816-1948 with a focus on crisis bargaining, management, and escalation. Foreign relations of Britain, France, Germany, Russia, Italy, Japan, and the United States are covered in light of international relations theories. Emphasis is placed on how domestic political struggles, like those between hard liners and accommodationists, and external factors, like alliances and international norms, affect decision-making. Comparisons are made between those crises that are peacefully settled and those that escalate to war and/or get out of control. Prerequisite: PS 280, PS 281, PS 283, or consent of instructor.

PS 395 International Organization credit: 3 Hours. Examines the development of basic principles underlying world organization; also considers the principles, structure, methods, and operation of international governmental institutions. Gives special attention to the United Nations and related agencies and to their evolution from the League of Nations system. Credit is not given for both PS 383 and PS 395. Prerequisite: PS 280 or PS 281 or PS 283, six hours of Political Science credit, or consent of instructor.
PS 396  International Conflict  credit: 3 Hours.
Examines the conditions that promote war and peace between states. General topics covered are: historical patterns in warfare; causes of war, including arms races and power distributions; outcomes of war; and approaches to peace. Credit is not given for both PS 381 and PS 396. Prerequisite: PS 280 or PS 281 or PS 283, six hours of Political Science credit, or consent of instructor.

PS 397  Authoritarian Regimes  credit: 3 Hours.
Examines the various aspects of the politics in authoritarian regimes: their emergence and breakdown, the policy choices and institutions typically adopted, leadership change, and the theories that explain them. Historical case studies and statistical data will be used to examine real-world cases. Prerequisite: PS 240 or PS 241; or six hours of Political Sciences credit; or consent of instructor.

PS 398  Strategic Intenl Relations  credit: 3 Hours.
Examination of basic concepts and tools for analyzing foreign policy and understanding international politics and economy. Simple game-theoretic models will be used to explore the logic and the mechanisms behind key policy issues in international economy, cooperation, security, and institutions. Prerequisite: PS 280 or PS 281; or six hours of Political Sciences credit; or consent of instructor.

PS 399  Politics of International Treaties  credit: 3 Hours.
Treaties are agreements between sovereign states governed by international law. This course examines why countries commit to treaties and why they comply with them. It will provide advanced undergraduate students with the opportunity to read a range of scholarly works on international agreements and to conduct their own research on related topics. Prerequisite: PS 280.

PS 408  Islam & Politics in Mid. East  credit: 3 or 4 Hours.
Same as REL 408 and SAME 408. See REL 408.

PS 410  Neighborhoods and Politics  credit: 3 or 4 Hours.
Introduction to the social and political impacts of neighborhood life through readings, discussion, and field work. The political theories of local social networks, social ecology, the social context, third places, the physical form, and public space are examined. Students do library research and field work examining theories of social capital, civic engagement, new urbanism, public space, social context and urban form. Same as HDES 410. 3 undergraduate hours. 4 graduate hours. Prerequisite: PS 100 or PS 101 or consent of instructor.

PS 411  Campaigning to Win  credit: 3 or 4 Hours.
Same as CMN 424. See CMN 424.

PS 413  Sex, Power and Politics  credit: 3 or 4 Hours.
Same as GWS 478. See GWS 478.

PS 415  Europe and the Mediterranean  credit: 3 or 4 Hours.
Same as EURO 415 and ITAL 415. See EURO 415.

PS 418  Language&Minorities in Europe  credit: 3 or 4 Hours.
Same as FR 418, GER 418, ITAL 418, LING 418, SLAV 418, and SPAN 418. See FR 418.

PS 456  Democracy and Identity  credit: 3 or 4 Hours.
A normative and empirical examination of the special issues surrounding the development and maintenance of democracy in plural societies. Analyzes the impact of racial, ethnic and religious diversity on citizenship, civil rights, political institutions and public policy, as well as on democratic stability more generally, in established and newly emergent democracies. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

PS 457  Dem Gov in a Global Setting  credit: 3 or 4 Hours.
Examination of the basic concepts and politics associated with the emergence of a global society. Students evaluate competing explanations for the emergence of this new politics and how and why the global society governs itself. It examines the strengths and weaknesses of the nation-state, markets, and democratization as responses, respectively, to the imperatives or order, welfare, and legitimacy in the governance of world’s peoples and states. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

PS 480  Energy and Security  credit: 3 Hours.
Same as GLBL 480 and NPRE 480. See NPRE 480.

PS 490  Individual Study  credit: 1 to 4 Hours.
Special topics not treated in regularly scheduled courses; designed primarily for juniors and seniors. 1 to 4 undergraduate hours. No graduate credit. May be repeated. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head.

PS 491  Internship  credit: 0 to 6 Hours.
Students follow a program of study and research related to an approved internship under the direction of the internship director and/or a faculty sponsor. Consult departmental undergraduate advisor or internship director. 0 to 6 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated to a maximum of 12 undergraduate hours. Prerequisite: 45 credit hours completed, one year in residence at an institution of higher learning, minimum 2.5 grade point average, coursework related to the internship, and acceptance to the internship director or undergraduate director and by faculty sponsor. Students enrolled in internship courses may not register for more than 18 hours total for all courses during the semester of the internship course.

PS 492  UG Research Assistance  credit: 0 to 3 Hours.
Assist departmental faculty in on-going research. Topics and nature of assistance vary. Capstone paper required. 0 to 3 undergraduate hours. No graduate credit. May be repeated in separate terms to a maximum of 6 hours. Credit is not given for more than nine hours toward completion of the political science major from any combination of PS 490, PS 491, and/or PS 492. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head.

PS 494  Junior Honors Seminar  credit: 3 Hours.
Research, reading, and discussion in selected topics and works in literature of political science. A major research project is required in preparation for PS 495. 3 undergraduate hours. No graduate credit. May be repeated in separate terms to a maximum of 6 hours if topics vary. Credit is not given for non-honors courses and honors seminar on the same topic. Prerequisite: Admission to Political Science Honors Program or consent of department.

PS 495  Senior Honors Seminar  credit: 3 Hours.
Provides an advanced overview of methodological issues in political science especially identification of research questions and design of research strategies in political science appropriate for a senior thesis. Requires completion of a substantial research proposal. 3 undergraduate hours. No graduate credit. Credit is not given for more than six hours towards any combination of PS 495 and PS 496. Neither PS 495 nor PS 496 counts towards the 30 hours required for completion of the political science major. Prerequisite: Admission to Political Science Honors Program or consent of instructor.
PS 496 Senior Honors Thesis credit: 2 to 6 Hours.
2 to 6 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Written consent of instructor of department approval; open only to seniors whose major is political science and who have a general University grade point of 3.0.

PS 501 Democratic Political Inst I credit: 4 Hours.
Involves intensive analysis of major institutions and processes of democratic politics (national, state, local); research on selected topics in American government.

PS 502 Democratic Political Inst II credit: 4 Hours.
Discusses contemporary theories about the impact of democratic institutions on politics and policy.

PS 503 US Congress credit: 4 Hours.
Traces the development of Congress as an institution with special attention to the role of norms; considers intra-institutional aspects of Congress including committee decision-making, floor voting, and leadership; examines congressional relationships with other actors including the presidency and Supreme Court, interest groups, and constituents.

PS 506 Pol Parties and Elections credit: 4 Hours.
Examines the role of political parties and elections in the political process; traces the evolution of American parties as a political institution, assesses their impact upon the policy-making processes, and considers macro-level influences upon the electoral process.

PS 507 Collect Action & Interest Grps credit: 4 Hours.
Provides a broad analysis of collective action, interest groups, and politics; examines the meaning of political interests and the forms they take; reviews various approaches to the study of interest groups; analyzes the formation and operation of interest groups; examines innovation and change in interest group politics and research.

PS 511 Proseminar Pol Behavior I credit: 4 Hours.
Introduces interdisciplinary approaches to the analysis of political behavior; formation of opinions, interests, roles, and beliefs.

PS 512 Proseminar Pol Behavior II credit: 4 Hours.
Continuation of PS 511. Prerequisite: PS 511.

PS 514 Founds of Organizational Behav credit: 4 Hours.
Same as BADM 510, PSYC 553, and SOC 575. See BADM 510.

PS 517 Civic Leadership Practicum I credit: 2 or 4 Hours.
The practicum seminar is the capstone experience of the BA/MA Civic Leadership Program and serves as the principal bridge between the academic and multi-faceted practicum components of the program. The fellows will engage in an in-depth exploration of a predetermined policy issue (health care, international trade, welfare reform, citizen engagement, for example). The practicum seminar members will, over two semesters, prepare a background paper and report with options and recommendations, which the seminar members will be expected to make a part of the public debate and policymaking process. Prerequisite: Graduate standing in the Civic Leadership Program.

PS 518 Civic Leadership Practicum II credit: 2 or 4 Hours.
Continuation of PS 517. Prerequisite: Graduate standing in the Civic Leadership Program.

PS 519 Topics in American Politics credit: 4 Hours.
Selected research topics designed for graduate study in American Politics. May be repeated to a maximum of 12 hours.

PS 521 Phil Bases of Pol Inquiry credit: 4 Hours.
Reviews the scope and subject matter of political science; methodological issues in political science and major conceptions of methodology as embodied in the current literature.

PS 522 Research Design and Techniques credit: 4 Hours.
Provides an overview of research techniques for answering questions of concern in political science; indicates the range of available tools; discusses problems in concept formation; and presents current methods of concept measurement. Prerequisite: PS 521 or consent of instructor.

PS 523 The Comparative Method credit: 4 Hours.
Reviews strategies for systematic research based on small number of cases. Emphasis on problems of conceptualization, measurement, and analysis.

PS 524 Methods in Intl Rel credit: 4 Hours.
Deals with major research methodologies in contemporary international relations; includes case studies, aggregate data, content analysis, survey research, gaming and simulations, and causal modeling; presumes knowledge of basic international relations theory. Prerequisite: PS 580.

PS 525 Formal Theory I: Game Theory credit: 4 Hours.
Introduction to game theory and its applications to the study of politics. Study of the central ideas and techniques of game theory.

PS 526 Formal Theory II: Applications credit: 4 Hours.
Survey of major topics in formal political theory and the application of key game-theoretic methods to the study of politics. Prerequisite: PS 525 or consent of instructor.

PS 530 Quant Pol Analysis I credit: 4 Hours.
Introduction to data analysis and inferential statistics, including data collection, analysis and interpretation, sampling, and measures of statistical association and significance. Also introduces statistical software.

PS 531 Quant Pol Analysis II credit: 4 Hours.
Second class in inferential statistics, emphasizing the linear model and assumptions behind linear models. Prerequisite: PS 530 or consent of instructor.

PS 532 Quant Pol Analysis III credit: 4 Hours.
Select topics in inferential statistics, including models for limited dependent variables. Topics vary by semester and may include spatial econometrics, bootstrap models, ecological inference, and causal inference. Prerequisite: PS 531 or consent of instructor.

PS 540 Proseminar Comp Politics I credit: 4 Hours.
Surveys the major works, theories, and approaches that define the field of comparative politics. The substantive focus of the course is on advanced industrial countries.

PS 541 Proseminar Comp Politics II credit: 4 Hours.
Surveys the major works, theories, and approaches that define the field of comparative politics. The substantive focus of the course is on developing countries. Prerequisite: Completion of PS 540 is recommended.

PS 543 Global Democratization credit: 4 Hours.
Examines the roles of domestic and international factors, modes of transition, institutional choices and economic reforms in the transition from authoritarian rule. Comparisons are made of cases in Southern and Eastern Europe, Latin America, East Asia, the former Soviet Union, and others. Prerequisite: Completion of PS 540 or PS 541 is recommended.
PS 544 Politics of African States  credit: 4 Hours.
Advanced research seminar. Focus will alternate among such topics in African politics as (a) the politics of agriculture (b) state and society (c) African political systems and the challenge of democratic practice and (d) political and economic crisis in Sub-Saharan Africa. May be repeated to a maximum of 12 hours if topics vary. Prerequisite: PS 242 and PS 341 or consent of instructor.

PS 545 Politics of Post-Soviet States  credit: 4 Hours.
Study of states which have experienced extended interludes of communist power, especially including the new states of the former Soviet Union, the post-communist regimes of Eastern Europe and China, through a comparative examination of political, economic, and ethnonational problems of regime transformation. Analytic and research papers required. Prerequisite: Completion of PS 540 or PS 541 is recommended.

PS 546 Comparative Political Behavior  credit: 4 Hours.
Examines the political behaviors and opinions of common citizens in dissimilar national contexts, focusing on the theoretical literature and empirical research on topics such as political participation, political culture and contentious politics from a cross-national perspective. Prerequisite: PS 540 or PS 541.

PS 548 Political Economy  credit: 4 Hours.
Same as ECON 572. See ECON 572.

PS 549 Topics in Comparative Politics  credit: 4 Hours.
Selected research topics designed for graduate study in Comparative Politics. May be repeated to a maximum of 12 hours.

PS 571 History of Pol Theories I  credit: 4 Hours.
Reading, analysis and discussion of the leading political thinkers from the Greeks to the middle of the seventeenth century.

PS 572 History of Pol Theories II  credit: 4 Hours.
Reading, analysis and discussion of the leading political thinkers from the middle of the seventeenth century to the present.

PS 579 Topics in Pol Theory  credit: 4 Hours.
Reading, analysis, and discussion of selected topics of political theory. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

PS 580 Proseminar Intl Rel I  credit: 4 Hours.
Examines major theories and approaches to the study of international relations.

PS 581 International War  credit: 4 Hours.
Focusses on the conditions that influence war and peace between nation-states. Considers various factors at different levels of analysis (individual, national, dyadic, and systematic) in an attempt to understand why nations go to war. Readings will consist of current research in this topic area without ignoring "classical" works. Prerequisite: PS 580.

PS 582 Intl Political Economy  credit: 4 Hours.
Comprehensive introduction to major traditions in contemporary thought on the political structure and workings of the global economy. Presumes background knowledge pertaining to the workings of the international economy and its institutions as well as familiarity with the assumptions and approaches of Classical I. P. E. thought and International Relations theory. Prerequisite: PS 580.

PS 583 International Organizations  credit: 4 Hours.
Examines the development and operations of international organizations with special emphasis on United Nations and related agencies. Focuses on activities in security, economic, and social issue area. Prerequisite: PS 580.

PS 584 International Cooperation  credit: 4 Hours.
Major theoretical perspectives and controversies in the literature of international cooperation and international institutions. Although broad spectrums of issues are covered, the focus is on basic logical questions, lines of reasoning, and analytical frameworks. Prerequisite: PS 580.

PS 585 Conflict Management  credit: 4 Hours.
Examines the conditions that influence the processes and outcomes of conflict management between nation-states. Assesses various approaches used in conflict management research with a special emphasis on the relationship between conflict management and theories of IR. Assumes some background knowledge regarding empirical studies of war. Prerequisite: PS 580.

PS 586 Proseminar Intl Relations II  credit: 4 Hours.
Part two of a two course sequence examining major theories and approaches to the study of international relations. Prerequisite: PS 580.

PS 587 Research Seminar in IR  credit: 4 Hours.
Advanced seminar in international relations, providing graduate students with original research experience. Students design and execute a research program, resulting in a major paper suitable for conference presentation and/or publication. The seminar will rotate among specific research topics in the area of international conflict, international law and organization, and international political economy respectively. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: PS 580.

PS 589 Topics in Intl Rel  credit: 4 Hours.
Selected topics designed for graduate study in international relations. May be repeated under different instructors to a maximum of 12 hours. Prerequisite: PS 580 or PS 524, or consent of instructor.

PS 590 Research in Selected Topics  credit: 2 to 12 Hours.
Research in selected topics by arrangement with the instructor.

PS 596 Evaluating New Research  credit: 2 Hours.
Accompanies the Politics Workshop, which brings in speakers from outside the department to present their research. The goal is to expose graduate students to the practice of engaging critically with research presentations from all fields of political science. Students will learn "best practices" in providing feedback about ongoing research projects. They will have the opportunity to utilize these skills both in class discussions and as discussants for the speakers in the Workshop 2 graduate hours. No professional credit. Approved for S/U grading only. May be repeated for up to 4 graduate hours in separate semesters. Prerequisite: Graduate standing in political science required.

PS 597 Preparing Future Faculty  credit: 0 Hours.
Provides graduate students an insight on the responsibilities and expectations of academic faculty. Core responsibilities - research, teaching and service - required of faculty is discussed, along with important resources and strategies to aid students in obtaining a faculty appointment and plotting a successful career path. Approved for S/U grading only. May be repeated in separate terms.

PS 598 Dissertation Design Seminar  credit: 0 Hours.
Addresses the basic steps involved in the development of a dissertation proposal; aims to facilitate the completion of the dissertation proposal for students who have passed the qualifying examinations. Approved for S/U grading only. Prerequisite: Successful completion of required qualifying examinations.

PS 599 Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.
**Portuguese (PORT)**

PORT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PORT)

**Courses**

PORT 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated.

PORT 200  Advanced Grammar  credit: 3 Hours.
The study of the structure of modern Portuguese in both its phonological and syntactic aspects for the student who already has a functional command of the language, with emphasis on developing ability to analyze and interpret grammatical structures. Prerequisite: PORT 202 or consent of instructor.

PORT 201  Intensive Beginning Portuguese  credit: 4 Hours.
Accelerated language learning course designed for beginners, equivalent to two semesters. Early emphasis on production skills; comprehension-based skills will be introduced in rapid succession. Course designed for speakers and non-speakers of Romance languages. Some focus on those linguistics structures specific to Portuguese which differ significantly from equivalents in other Romance languages.

PORT 202  Intensive Intermediate Portuguese  credit: 4 Hours.
Continued development of reading, writing and conversational skills. Completion of this course fulfills the third-semester level of Portuguese language instruction. Followed by a 200- or 300-level course in Portuguese, this course fulfills the fourth-semester level of Portuguese language instruction. Prerequisite: PORT 201 or consent of instructor.

PORT 320  Readings in Portuguese  credit: 3 Hours.
Readings and discussion in Portuguese of a variety of texts by leading Luso-Brazilian writers covering various genres and themes. Designed to emphasize reading skills and discussion, rather than literary criticism. May be repeated if topics vary. Prerequisite: PORT 202 or equivalent.

PORT 334  Brazilian Women’s Lit Trans  credit: 3 Hours.
Study of gender, race and class in Brazil through the study of these issues as documented by women’s voices. Beginning with an analysis of the early representation of women during the Portuguese colonization of the new world up to the present through translations of contemporary literature written by women. Requires no knowledge of Portuguese language. Same as GWS 334.
This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

PORT 400  Intensive Beginning Portuguese  credit: 4 Hours.
Accelerated language learning course designed for beginners, equivalent to two semesters. Early emphasis on production skills; comprehension-based skills will be introduced in rapid succession. Course designed for speakers and non-speakers of Romance languages. Some focus on those linguistics structures specific to Portuguese which differ significantly from equivalents in other Romance languages. 4 undergraduate hours. 4 graduate hours.

PORT 404  Studies in Luso-Brazilian Culture  credit: 3 or 4 Hours.
Affords a broad understanding of Luso-Brazilian civilization and culture. May be offered in English (no prerequisites) or Portuguese (see prerequisite statement). See section description for details on the language of instruction each semester. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Prerequisite: If taught in Portuguese: PORT 403 (former 320) or equivalent or consent of instructor.

PORT 406  Brazilian Film  credit: 3 or 4 Hours.
Study of the evolution of Brazilian cinema through selected films to explore the nature and development of contemporary Brazilian aesthetics. May be offered in English (non prerequisites) or Portuguese (see prerequisite statement). See section description for details on the language of instruction each semester. 3 undergraduate hours. 4 graduate hours. Prerequisite: If taught in Portuguese: PORT 402 (former 200) or 403 (former 320) or equivalent.

PORT 410  Topics in Brazilian Literature  credit: 3 or 4 Hours.
May be offered in English (no prerequisites) or Portuguese (see prerequisite statement). See section description for details on the language of instruction each semester. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 Undergraduate hours or 8 Graduate hours in separate terms if topics vary. Prerequisite: If taught in Portuguese: PORT 402 (former 200) or 403 (former 320) or equivalent.

PORT 435  Introduction to Romance Linguistics  credit: 3 or 4 Hours.
Same as FR 462, ITAL 435, LING 462, RMLG 435, and SPAN 435. See SPAN 435.

PORT 460  Principles of Language Testing  credit: 3 or 4 Hours.
Same as EIL 460, EPSY 487, FR 460, GER 460, ITAL 460, SLS 460, and SPAN 460. See EIL 460.

PORT 489  Theoretical Foundations of SLA  credit: 3 or 4 Hours.
Same as FR 481, GER 489, ITAL 489, LING 489 and SPAN 489. See LING 489.

PORT 510  Seminar Brazilian Literature  credit: 4 Hours.
Advanced study of literary movements, major writers, and intellectual and cultural ideas in Brazilian literature; subject matter varies each time the course is offered. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: PORT 410 or consent of instructor.

PORT 520  Seminar Portuguese Literature  credit: 4 Hours.
Advanced studies on a specific topic, writer, group of writers, or literary movement in Portuguese literature; subject matter may vary. May be repeated if topics vary.

PORT 559  Sem Romance Ling  credit: 4 Hours.
Same as FR 559, ITAL 559, LING 559, RMLG 559, and SPAN 557. See SPAN 557.

PORT 571  Proseminar For Lang Tchg  credit: 4 Hours.
Same as SPAN 571. See SPAN 571.

PORT 572  Theory and Literary Criticism  credit: 4 Hours.
Same as SPAN 572. See SPAN 572.

PORT 573  Professional/Academic Writing  credit: 4 Hours.
Same as GER 553, ITAL 573, and SPAN 573. See SPAN 573.

PORT 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as EIL 580, FR 580, GER 580, ITAL 580, SLS 580, and SPAN 580. See SPAN 580.

PORT 584  Theories in SLA  credit: 4 Hours.
Same as CI 584, EALC 584, EPSY 563, FR 584, GER 584, ITAL 584, LING 584, and SPAN 584. See SPAN 584.

PORT 588  Sem Second Lang Learn  credit: 4 Hours.
Same as EALC 588, FR 588, GER 588, ITAL 588, LING 588, and SPAN 588. See SPAN 588.
PORT 595  Special Topics Port & Braz Lit  credit: 1 to 4 Hours.
Independent study/research under the direction of a faculty member. May or may not fulfill requirements for a particular degree program in Spanish, Italian and Portuguese. Consult graduate advisor. May be repeated in same or subsequent terms to a maximum of 8 hours.

PORT 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Professional Science Master (PSM)

PSM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PSM)

Courses

PSM 501  PSM Industry Seminar I  credit: 0 to 1 Hours.
Engagement with students across science disciplines to address current developments in the science professions. Management and leadership challenges in science and issues facing science professionals in the workplace are addressed. Learning occurs through lecture and discussion with industry leaders. Taken in the first semester of the Professional Science Master’s (PSM) cohort. Approved for letter and S/U grading; S/U grading only if taken for 0 hours credit; letter grade only if taken for 1 hour credit.

PSM 502  PSM Industry Seminar II  credit: 0 to 1 Hours.
Taken in the second semester of the PSM cohort, builds on the experience of the first semester industry seminar. Learning occurs through guest lectures by and discussions with industry leaders. Project management is explored. Engagement with students across science disciplines to address current developments in the science professions. Practical issues facing science professionals in the workplace are addressed. Approved for letter and S/U grading; S/U grading only if taken for 0 hours credit; letter grade only if taken for 1 hour credit. Prerequisite: PSM 501.

PSM 503  PSM Industry Seminar III  credit: 0 to 1 Hours.
Taken in the final semester of the PSM cohort, focuses on the shared experiences of the summer internship and on career development. Students present and critique, individual and in teams, the value and lessons learned from the internship. Discussions and exercises center on long-term career development and lifelong learning and commitment to science. Approved for letter and S/U grading; S/U grading only if taken for 0 hours credit; letter grade only if taken for 1 hour credit. Prerequisite: PSM 502.

PSM 520  Special Topics-Sci & Business  credit: 0 to 3 Hours.
Special, emerging, or advanced topics in science and business. Topics will vary by offering. May be used to pilot course offerings before adding them to the PSM curriculum. Open to Illinois Professional Science Master’s (PSM) students only. Approved for letter and S/U grading. May be repeated in the same term up to 6 hours or separate terms up to 9 hours; this is contingent on program approval and other requirements.

PSM 555  PSM Internship  credit: 0 to 1 Hours.
Practical learning experience in which business knowledge and skills are applied to science problems and opportunities. In consultation with program coordinators, students find internship companies and positions that match their individual career objectives and meet the learning goals of the program. Learning objectives, deliverables, and performance evaluation are determined for each student by the program coordinator. Completed in the summer after the first year of study. Open to Illinois Professional Sciences Master’s (PSM) students only. Internationals holding student visas must have prior authorization from International Student and Scholar Services. Approved for letter and S/U grading. May be repeated in separate terms.

Psychology (PSYC)

PSYC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/PSYC)

Courses

PSYC 100  Intro Psych  credit: 4 Hours.
Study of human behavior with special reference to perception, learning, memory, thinking, emotional life, and individual differences in intelligence, aptitude, and personality; emphasis on the scientific nature of psychological investigations; and discussion of research methods and the relation of their results to daily life and everyday problems. Lectures, discussions, and six hours of participation as a subject in psychological experiments. Credit is not given for both PSYC 100 and either PSYC 103 or PSYC 105.
This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci

PSYC 102  Psych Orientation  credit: 0 Hours.
Lectures designed to acquaint the psychology major with the various specializations available in the field, career exploration procedures, and a wide range of opportunities of special interest to psychology students. Recommended for freshmen in psychology. Approved for S/U grading only.

PSYC 103  Intro Experimental Psych  credit: 4 Hours.
Surveys the field of psychology with an emphasis on experimental approaches to understanding the mind and human behavior; addresses perception, learning, memory, thinking, motivation, emotions, personality, development, intelligence, and other topics in psychology. Credit is not given for both PSYC 103 and either PSYC 100 or PSYC 105. Lectures with discussion, debates, and laboratory experiments in weekly sections. This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci

PSYC 105  Psych Introduction  credit: 4 Hours.
Study of human behavior with special reference to perception, learning, memory, thinking, emotional life, and individual differences in intelligence, aptitude, and personality; emphasis on the scientific nature of psychological investigations; and discussion of research methods and the relation of their results to daily life and everyday problems. Lectures, discussions, and six hours of participation as a subject in psychological experiments. Lectures meet four days per week. See class schedule for enrollment restrictions. Credit is not given for both PSYC 105 and either PSYC 100 or PSYC 103.
This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci

PSYC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated.
PSYC 201 Intro to Social Psych  credit: 3 Hours.
Systematic study of social factors in individual and group behavior; attention to social perception, motivation, and learning; attitudes, norms, and social influence processes; the development and dynamics of groups; and the effects of social and cultural factors on the individual. Prerequisite: PSYC 100 or PSYC 103.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

PSYC 204 Intro to Brain and Cognition  credit: 3 Hours.
Introduction to the interdisciplinary field of cognitive neuroscience, which is concerned with how the cognitive systems supporting a broad range of capacities including memory, attention, and social and emotional processing, arise from the functioning of specific brain modules and brain mechanisms. Emphasizes how functional brain imaging and other cognitive neuroscience methods can be brought to bear on answering these questions. Prerequisite: PSYC 100 or PSYC 103 or PSYC 105.

PSYC 207 Psychology of Prejudice and Discrimination  credit: 3 Hours.
Examines the psychological causes and social consequences of prejudice and discrimination in society. Learn about the current state of prejudice and discrimination in the U.S., empirical methods for studying prejudice and discrimination, and psychological interventions for reducing prejudice and discrimination. Topics include stereotyping, cognitive biases, group conflict, ideology, implicit associations, subtle and benevolent forms of prejudice, and microaggressions. This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

PSYC 210 Behavioral Neuroscience  credit: 3 Hours.
Survey of current knowledge and speculation regarding the brain's role in perception, motivation, sexual behavior, thinking, memory, and learning, based upon human clinical data and research in animal models. Prerequisite: PSYC 100, PSYC 103, or consent of instructor. This course satisfies the General Education Criteria for: Nat Sci Tech - Life Sciences

PSYC 216 Child Psych  credit: 3 Hours.
Study of the psychological development of the child. Credit is not given for both PSYC 216 and EPSY 236. Prerequisite: PSYC 100 or PSYC 103.

PSYC 220 Images of Mind  credit: 3 Hours.
Introduction to neuroimaging and cognitive neuroscience, with a particular emphasis on critically evaluating neuroscience in the media. In addition to surveying reports in the popular press and their corresponding science articles, covers basic neuroanatomy, neuroimaging techniques, and a range of topics from cognitive neuroscience. Prerequisite: PSYC 100, PSYC 103, PSYC 105 or consent of instructor.

PSYC 224 Cognitive Psych  credit: 3 Hours.
Introduction to the psychological study of human information processing and memory; acquisition, retrieval, and forgetting; and general knowledge, concepts, reasoning, and related issues in cognition. Prerequisite: PSYC 100 or PSYC 103.

PSYC 230 Perception & Sensory Processes  credit: 3 Hours.
Survey of the experimental psychology of sensory and perceptual processes and behavior; emphasis on the contribution of behavior science to understanding subjective experience of the physical and social environment. Prerequisite: An introductory course in psychology, physiology, or animal biology.

PSYC 235 Intro to Statistics  credit: 3 Hours.
Development of skill and understanding in the application of statistical methods to problems in psychological research; topics include descriptive statistics, probability theory and distributions, point and interval estimation, and hypothesis testing. Credit is not given for both PSYC 235 and any of STAT 100, ECON 202, EPSY 480, PSYC 301, SOC 485. Prerequisite: PSYC 100 or PSYC 103; college algebra or equivalent; or consent of academic advisor. This course satisfies the General Education Criteria for: Quantitative Reasoning I

PSYC 238 Psychopathology and Problems in Living  credit: 3 Hours.
Conceptions and facts about disordered behavior, including psychoses, neuroses, and other patterns of psychological disturbance. Prerequisite: PSYC 100 or PSYC 103.

PSYC 239 Community Psych  credit: 3 Hours.
Redefines human and social problems and the implications for social programs and policies; reviews the historical antecedents, conceptual models, strategies and tactics of social and community programs; and employs examples from selected social systems (e.g., criminal justice, education, employment, and mental health). Prerequisite: PSYC 100 or PSYC 103.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

PSYC 245 Industrial Org Psych  credit: 3 Hours.
Systematic study of the application of psychological methods and principles in business and industry; emphasis on personnel selection and factors influencing efficiency. Prerequisite: PSYC 100 or PSYC 103; credit or concurrent registration in a statistics course.

PSYC 248 Learning and Memory  credit: 3 Hours.
Survey of basic phenomena in learning and memory emphasizing experimental data from animal and human research. Prerequisite: PSYC 100 or PSYC 103.

PSYC 250 Psych of Personality  credit: 3 Hours.
Study of personality from various points of view: biological, experimental, social, and humanistic; surveys theory and empirical research in the study of personality. Prerequisite: PSYC 100 or PSYC 103.

PSYC 265 Power, Status, and Influence  credit: 3 Hours.
Explores how individuals experience power, status, and influence. The course will focus on the personality and social factors that lead people to attain an elevated rank in society. We will examine how social position shapes basic psychological processes including social perception, relationship strategies, emotion, and well-being across the life course. Multiple forms of power and status will be studied, including those based on peer respect, class, race, gender, and physical dominance.

PSYC 290 Research Experience in Psych  credit: 1 to 4 Hours.
Supervised participation in research and scholarly activities, usually as an assistant to an investigator. Approved for S/U grading only. May be repeated to a maximum of 9 hours. Prerequisite: Ten hours of psychology or cognate area, or written consent of instructor.

PSYC 296 Introduction to Current Topics in Psychology  credit: 0 to 3 Hours.
Introductory treatment of current topics in the field of psychology. May be repeated up to 6 hours in the same semester, to a total of 9 hours in subsequent semesters. Prerequisite: PSYC 100 or consent of instructor.
PSYC 301 Psychological Statistics credit: 5 Hours.
Development of skill and understanding of statistical methods for problems in psychological research; topics include descriptive statistics, probability theory and distributions, point and interval estimation, and hypothesis testing. The class also involves a computer laboratory. Strongly recommended to students who plan to pursue graduate studies in Psychology. Credit is not given for both PSYC 301 and any of STAT 100, ECON 202, EPSY 480, PSYC 235, SOC 485. This course satisfies the General Education Criteria for: Quantitative Reasoning I

PSYC 302 Applied Neuroscience credit: 3 Hours.
Examines topics in neuroscience highly relevant to our daily lives, especially as it pertains to mental health. Topics include neurobiology related to anxiety, depression, addiction, exercise, learning, memory, and personality characteristics. Special attention will be paid to race, sex, and socioeconomic differences and their influence on both genetic risk and environmental stress. The class will emphasize critical thinking and conceptualization and will frequently include open discussions. Same as NEUR 302. Prerequisite: PSYC 100 or equivalent.

PSYC 306 Psychology of Morality credit: 3 Hours.
Presents an overview and analysis of historical and current theory and research on moral psychology. Explores development of morality, moral reasoning and decision-making, rational and biased inputs to moral judgments, moral emotions, moral impression formation and person perception. Emphasis is on the social psychology of morality, but other perspectives such as developmental, cognitive, political, and individual differences will be explored. Prerequisite: PSYC 100 or equivalent.

PSYC 308 Psychology of Religion and Spirituality credit: 3 Hours.
Examines major topics in the psychology of religion and spirituality to promote reflection on how religion shapes attitudes, behavior, and contemporary U.S. society. Through the lens of psychology, we explore questions such as: Why are some people religious and spiritual? How do we study religion and spirituality from a psychological perspective? What do religion and spirituality look like across the lifespan? Does religion shape prejudice, morality, violence, or altruism? What is the role of religion in promoting health? Overall, we will examine these and other questions to promote greater understanding regarding the role of religion and spirituality in the lives of individuals and larger society. Same as REL 308. Prerequisite: PSYC 100 or equivalent.

PSYC 311 Behavioral Neuroscience Lab credit: 4 Hours.
Introduction to the research techniques used in behavioral neuroscience: includes behavioral analysis of drug effects, anatomy of the brain, hormones and behavior, neural circuits and related topics. Students will have direct experience working with laboratory rats to understand their importance in the advancement of our knowledge about how the brain functions. Prerequisite: Credit or concurrent registration in PSYC 210, or consent of instructor.

PSYC 312 Psychology of Race & Ethnicity credit: 3 Hours.
Exploration of the theoretical, empirical, and experiential writings concerning the issues of race and ethnicity as they relate to human behavior from the perspective of the individual in various social contexts. Same as AFRO 312. Prerequisite: PSYC 100.

PSYC 314 Introduction to Aging credit: 3 Hours.
Same as CHLH 314, HDFS 314, RST 314, and REHB 314. See CHLH 314.

PSYC 316 Intro to Psych of Hearing credit: 3 Hours.
Examines the physiology and psychophysics of hearing from the micromechanics of the cochlea to the localization of sound and the acoustics of concert halls, to understand how the auditory system processes information to create perceptions of acoustic events. Prerequisite: PSYC 210.

PSYC 318 Psych of the Infant credit: 3 Hours.
Early infant behavior, emphasizing critical evaluation of the various research techniques; prenatal and perinatal influences, ontogeny of psychological processes, environmental determinants, and infant assessment. Prerequisite: PSYC 216.

PSYC 320 The Teenage Years credit: 3 Hours.
An introduction to development during the teenage years (12-18). The course will cover research on biological, cognitive, social, and emotional development. Topics will include pubertal development and its social consequences, changing relationships with parents, identity development, the increasingly important role of peers, school adjustment, the emergence of psychopathologies, and high risk behaviors such as substance use. The course will focus on normative development in the U.S., but it will also cover cross-cultural development. Prerequisite: PSYC 100 and PSYC 216.

PSYC 321 Human Memory credit: 3 Hours.
Advanced treatment of human memory. Examines basic theory and methodology; types of memory; semantic, episodic, procedural, memory for language, places, and events; knowledge and memory; autobiographical memory; exceptional memory; mnemonics. Prerequisite: Six hours in psychology at or above the 200 level, such as PSYC 224 or PSYC 248.

PSYC 322 Intro Intellectual Disability credit: 3 Hours.
Same as REHB 322 and SPED 322. See SPED 322. This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

PSYC 324 Developmental Psychopathology credit: 3 Hours.
Overview of major theories and research in the field of developmental psychopathology. An emphasis will be placed on understanding how psychopathology is conceptualized from a developmental perspective. Topics will involve issues related to etiology, assessment, classification/diagnosis, and intervention. A range of psychological problems in childhood and adolescence will be discussed to illustrate the central themes. Prerequisite: PSYC 100 and either PSYC 216 or PSYC 238, or consent of instructor.

PSYC 326 Development and Relationships credit: 3 Hours.
Advanced overview of theory and research on interpersonal relationships across the life course and their implications for emotion, cognition, and behavior. Particular emphasis is placed on close relationships, i.e., romantic partners, family members, and mentors. Same as EPSY 330. Prerequisite: PSYC 216.

PSYC 328 Psychology of Gender credit: 3 Hours.
Discusses the similarities and differences between males and females across the lifespan, looking at possible biological and social explanations. Some of the topics covered include how children learn gender roles, similarities and differences across cognitive and social abilities, mental and physical health, and gender in different settings, including at work, at school, and at home. The course will also focus on agents of socialization, including the media, peers, and family. Prerequisite: PSYC 100 or equivalent.
PSYC 331  Cognitive Psych Lab  credit: 4 Hours.
Examination of the methods used to study human thought processes, including attention, memory, decision-making, language and concepts. Students will learn to design, carry out, and report research in cognitive psychology. Prerequisite: PSYC 224 or PSYC 248, PSYC 235.

PSYC 332  Social Psych Methods Lab  credit: 4 Hours.
Lecture and laboratory in the methods and techniques of social psychology research in laboratory settings. Same as SOC 382. Prerequisite: PSYC 201; PSYC 235 or SOC 280.

PSYC 333  Social Psych in Society Lab  credit: 4 Hours.
Methods and techniques of social psychological research in natural settings. Students formulate and carry out research problems using procedures appropriate for research in natural settings. Prerequisite: PSYC 201; PSYC 235 or SOC 280.

PSYC 334  Perception Lab  credit: 4 Hours.
Examination of the research methods used to study human visual and spatial processes, including visual illusion, attention, imagery, navigation and spatial memory. Students will learn to design, carry out, and report psychological research. Prerequisite: PSYC 230 and statistics (PSYC 235 or equivalent).

PSYC 336  Topics in Clin/Comm Psych  credit: 3 Hours.
Survey and critical review of subdisciplines in clinical/comm psychology; concepts, methods, and assessments, intervention strategies and tactics. Subdisciplines addressed will vary. See Class Schedule for current titles. May be repeated with approval to a maximum of 6 undergraduate hours in same term, or to a maximum of 9 undergraduate hours in subsequent terms. Prerequisite: PSYC 238 or PSYC 239 or both depending on topic.

PSYC 340  Community Projects  credit: 4 Hours.
Principles of psychology applied to service problems in the community; students serve as nonprofessional mental health workers in supervised experiences in schools, hospitals, and other nontraditional settings. May be repeated in the same or subsequent terms to a maximum of 8 undergraduate hours. Prerequisite: PSYC 100; junior or senior standing; and consent of instructor. Individual sections may require additional courses and prerequisites - consult the instructor.

PSYC 341  Advanced Community Projects  credit: 4 Hours.
Advanced discussion and practicum on principles of psychology which may supplement mental health and other human services in a community. Students serve as nonprofessional mental health workers in supervised experiences in school hospitals and other nontraditional settings. May be repeated in the same or subsequent terms to a maximum of 8 undergraduate hours. Prerequisite: PSYC 340 and consent of instructor.

PSYC 350  Personality Lab  credit: 4 Hours.
Study of personality emphasizing active participation in designing, conducting, analyzing, and presenting of research; lectures concern the practical aspects of research methodology and the philosophy of personality research; and laboratory involves conducting original research in small groups. Prerequisite: PSYC 235 or equivalent; and PSYC 250 or consent of instructor; completion of campus Composition I general education requirement.

PSYC 351  Thinking and Reasoning  credit: 3 Hours.
An overview of historical and contemporary research on thinking, reasoning, and problem-solving. Topics will include normative systems of logic, defeasible/non-monotonic reasoning, psychological models of reasoning, heuristic problem-solving, insight and creativity, Bayesian decision-making, decision-making biases, and fast-and-frugal heuristics. Same as PHIL 351. Prerequisite: Either PSYC 100 and PSYC 224, or PHIL 101 and PHIL 102, or consent of instructor.

PSYC 352  Attitude Theory and Change  credit: 3 Hours.
Comprehensive analysis of theories of attitude acquisition, organization, and change; emphasis on attitude change through communication and effects of persuasive communication on public opinion. Same as MACS 352 and SOC 300. Prerequisite: PSYC 201 or equivalent.

PSYC 353  Social Cognition  credit: 3 Hours.
Analysis of theory and research on problems related to the manner in which persons judge themselves and others on the basis of information received; topics include impression formation integration, determinants of interpersonal attractions, and attribution processes. Prerequisite: PSYC 201 and PSYC 235, or consent of instructor.

PSYC 356  Evolution of Mind  credit: 3 Hours.
Interpretation of human thought and behavior through the lens of evolutionary theory. Presents the basics of evolutionary theory as applied to human and animal psychology, describes the results of research on selected subtopics, and evaluates alternative explanations of human behavior that historically have been offered and continue to influence the social sciences today. The goal is to enhance understanding of why we behave the way we do. Special emphasis will be places on philosophical analysis of the presented material. Same as PHIL 356. Prerequisite: PSYC 100 or PHIL 101 or MCB 150 or consent of instructor.

PSYC 357  Intro Cognitive Science  credit: 3 Hours.
In-depth introduction to cognitive science: the study of mind and intelligence, natural and artificial. Covers major integrative themes including inverse optics and vision; induction and reasoning; learnability; language; philosophy; minds and brains; evolution; computation and computability; experimental and modeling techniques; information theory; knowledge representation; interrelations among these topics. Same as PHIL 357. Prerequisite: One of PSYC 224, PSYC 248, PHIL 202, PHIL 270, or consent of instructor.

PSYC 358  Human Factors  credit: 4 Hours.
Same as IE 340. See IE 340.

PSYC 361  The Psychology of Aging  credit: 3 Hours.
Survey of changes in behavioral function in later adulthood, with emphasis on methodologies for studying aging, cognitive function, personality, social psychology, and psychopathology. Prerequisite: PSYC 100; Recommended: PSYC 216 or PSYC 224.

PSYC 363  Developmental Child Psych Lab  credit: 4 Hours.
Provides students with a background in developmental research methodology, such as observational techniques used with children. Students will gain experience collecting data and learn how to write research papers. Prerequisite: PSYC 216 and PSYC 235, or equivalent.

PSYC 365  Stress, Trauma and Resilience  credit: 3 Hours.
Provides an overview of traumatic stress, with a particular emphasis on the biological and social factors that shape human responses to trauma. Students will become familiar with the definition and range of potentially traumatic events in various social contexts (e.g. military vs. civilian), as well as the genetic and environmental features that influence vulnerability vs. resilience to trauma. Prerequisite: PSYC 100 or equivalent.
PSYC 370 Understanding Suicide credit: 3 Hours.
Exploration of the enigma of suicide, covering its many dimensions including the historical, literary, neurobiological psychological, sociological, cultural, public health, and personal/subjective. Suicide has been studied from each of these perspectives, and while there is agreement that it is a "multidimensional malaise," bringing these dimensions together has been extremely challenging. Explores this challenge through lectures and discussions. Prerequisite: PSYC 238.

PSYC 373 Culture & Psychology credit: 3 Hours.
Centers on cross-cultural study of substantive areas such as personality, motivation, socialization, interpersonal behavior, psychological environments, cognition and cognitive development, ethnocentrism and stereotypes, and visual perception; emphasis on methodological limitations and contributions of cross-cultural study; and discussion of current problems and research. Same as ANTH 373. Prerequisite: Six hours of psychology or anthropology, or consent of instructor.

PSYC 379 Clinical/Abnormal Psych Lab credit: 4 Hours.
Introduction to research methods used in clinical psychology covering research concerned with psychopathology. Students will learn concepts and key terms; read and discuss research reports; and obtain first-hand experience designing, carrying out, and reporting on their own research. Students in the class will be the participants for all student-developed research. Prerequisite: PSYC 238.

PSYC 381 Beg Prac in Mental Hlth credit: 4 Hours.
Didactic instruction and supervised practicum experience in a community treatment agency; self-report, observational, and physiological approaches to client assessment; and lecture-discussion and direct agency experience each week.

PSYC 383 Adv Prac in Mental Hlth I credit: 4 Hours.
Supervised practicum experiences in a community agency.

PSYC 385 Adv Prac in Mental Hlth II credit: 4 Hours.
Supervised practicum experiences in a community agency.

PSYC 396 Intermediate Current Topics in Psychology credit: 0 to 3 Hours.
Intermediate treatment of current topics in the field of psychology. May be repeated to a maximum of 6 hours in a semester, to a maximum of 12 hours in subsequent semesters. Prerequisite: PSYC 100 or consent of instructor; particular sections may have additional 200-level prerequisites.

PSYC 398 Junior Honors Seminar credit: 3 Hours.
Seminar on experimental methods and contemporary psychological research. Prerequisite: Junior standing and admission to departmental honors program.

PSYC 402 Intro Clin Neuropsych credit: 4 Hours.
Fundamental concepts of clinical neuropsychology will be introduced, and students will learn the neuropsychological measures that are typically employed in assessment. The course will take a developmental perspective, and readings will address assessment issues in children and adolescents as well as adults. The course will be conducted as a lecture/seminar, with a focus on class participation. Actual testing data will be distributed to the class, and discussion will focus on interpretation and case conceptualization. Students will also be required to learn about and administer tests. 4 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210 and PSYC 238 or consent of instructor.

PSYC 403 Memory and Amnesia credit: 3 or 4 Hours.
Examination of the nature of amnesia and what it teaches us about the organization of normal human memory. Coverage will include studies of amnesia and other circumscribed memory impairments in human patients, taken from the scientific literature, which will be compared to the descriptions of amnesia in movies, literature, and the media. Same as NEUR 403. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210 and/or PSYC 224, or consent of instructor.

PSYC 404 Cognitive Neuroscience credit: 3 or 4 Hours.
Examination of research concerned with identifying and characterizing the cognitive systems supporting such capacities as memory, attention, and visual processing, and with understanding how such cognitive activities arise from the functioning of specific brain modules and brain mechanisms. Same as NEUR 405. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210 and/or PSYC 224, or consent of instructor.

PSYC 410 Hate Crimes credit: 3 Hours.
Same as AFRO 410. See AFRO 410.

PSYC 413 Psychopharmacology credit: 3 or 4 Hours.
Behavioral and physiological effects of chemicals either used therapeutically to treat psychological disorders or that may be abused for their psychotropic effects; emphasizes mechanisms and models for the study of drug action. Same as NEUR 413. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: PSYC 210, MCB 150, or consent of instructor.

PSYC 414 Brain, Learning, and Memory credit: 3 or 4 Hours.
Conveys a knowledge of current research on the physiological bases of learning and memory; considers a wide range of topics from molecular (e.g., cellular morphological and functional plasticity) to relatively molar (e.g., effects of clinical and experimental brain damage on learning and memory processes). Same as NEUR 414. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210, MCB 150, or consent of instructor.

PSYC 416 African American Psychology credit: 3 or 4 Hours.
Same as AFRO 411. See AFRO 411.

PSYC 417 Neuroscience of Eating & Drinking credit: 3 or 4 Hours.
Eating and drinking are critical to survival. Despite complex and redundant mechanisms, aberrant ingestive behaviors occur and can result in extreme body weights. This course is designed to critically probe and review the current understanding of neural and behavioral mechanisms of eating and drinking. Students will learn how eating and drinking are closely related to physical and mental health, and how to apply this knowledge to live a healthier life. Same as FSHN 417 and NEUR 417. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 100 or equivalent.

PSYC 420 Theories of Psychotherapy credit: 4 Hours.
Same as EPSY 420. See EPSY 420.

PSYC 421 Principles of Psychophysiology credit: 3 or 4 Hours.
Theoretical and practical aspects of human psychophysiology; measurement techniques and the application of psychophysiological principles to problems in developmental, clinical, social, and experimental psychology. Same as NEUR 421. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 235, six hours of psychology, and an introductory course in physiology.
PSYC 423  Language Acquisition  credit: 3 or 4 Hours.
Survey of theory and research on the acquisition of language, concentrating on the acquisition of a first language by the young child. Same as LING 423 and MACS 423. 3 undergraduate hours. 4 graduate hours. Prerequisite: Six hours of psychology or linguistics above the 100-level, or consent of instructor.

PSYC 425  Psych of Language  credit: 3 or 4 Hours.
Survey of theory and research in the psychology of language; topics include relation of linguistics and psychology, language development, and influence of language on perception, memory, and thought. 3 undergraduate hours. 4 graduate hours. Credit is not given for both PSYC 425 and LING 425. Prerequisite: Six hours of psychology or consent of instructor.

PSYC 427  Language and the Brain  credit: 3 or 4 Hours.
Same as LING 427 and SHS 427. See SHS 427.

PSYC 432  Genes and Behavior  credit: 3 Hours.
Same as ANTH 432, IB 432 and NEUR 432. See IB 432.

PSYC 433  Evolutionary Neuroscience  credit: 3 or 4 Hours.
Current methods, tools, and progress in evolutionary biology and quantitative genetics of brain and behavior of vertebrates. Same as NEUR 433 and PHIL 433. 3 undergraduate hours. 4 graduate hours. Prerequisite: IB 150 or PSYC 210.

PSYC 437  Advanced Psychology Lab  credit: 4 Hours.
An advanced laboratory course in different areas of psychology. Detailed descriptions are provided under the individual sections. 4 undergraduate hours. No graduate credit. May be repeated in separate semesters to a maximum of 8 undergraduate hours. Prerequisite: PSYC 100, additional courses and prerequisites may be required depending on the lab.

PSYC 443  Psychophysiology in Ex & Sport  credit: 3 or 4 Hours.
Same as EPSY 405. 3 undergraduate hours. 4 graduate hours. Prerequisite: Six hours of social science.

PSYC 445  Cognitive Neuroscience Lab  credit: 4 Hours.
Study of the basic principles underlying scanning of the brain using functional Magnetic Resonance Imaging (fMRI). The lectures introduce how to use an MRI scanner, the basic biophysics that makes functional imaging possible, experimental design for fMRI, and basic data analysis. During the labs, students will get hands on experience analyzing fMRI data. Same as NEUR 445. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of the following: PSYC 204, PSYC 210, PSYC 220, or consent of the instructor. PSYC 235 or equivalent is recommended.

PSYC 447  Psych of Sport Performance  credit: 3 or 4 Hours.
Same as KIN 447. See KIN 443.

PSYC 450  Cognitive Psychophysiology  credit: 3 or 4 Hours.
Survey of the theory and practice of using recordings of brain electrical activity to study normal and abnormal perception, attention, decision-making, memory, response preparation, and language. Same as NEUR 450. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 224 or equivalent; PSYC 210 recommended.

PSYC 451  Neurobio of Aging  credit: 0 to 4 Hours.
Study of the neurobiological consequences of aging with an emphasis on brain changes at the cellular and systems level, using animal models of healthy and pathological aging. Same as KIN 458 and NEUR 451. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210 or related courses or consent of instructor.

PSYC 453  Cog Neuroscience of Vision  credit: 3 or 4 Hours.
Overview of the neuroscience of the visual system, the eye and subcortical structures, with a focus on the visual cortex and higher-level vision (e.g. attention and object perception). Same as NEUR 453. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 210, PSYC 220, PSYC 224, PSYC 230 or consent of instructor.

PSYC 455  Organizational Psych  credit: 2 to 4 Hours.
Social psychological research and theory applied to industrial problems; emphasis on interaction and communication theory, role theory, leadership theory, motivational and perceptual theory, and group structure theory as an aid in understanding and analyzing industrial problems. 3 undergraduate hours. 2 to 4 graduate hours. Prerequisite: PSYC 201 or PSYC 245.

PSYC 456  Human Performance and Cognition in Context  credit: 3 or 4 Hours.
Same as EPSY 456 and IE 445. See EPSY 456.

PSYC 462  How Children Think  credit: 3 or 4 Hours.
Examines the development of children’s thinking from birth through the preschool and elementary school years. Addresses questions such as the following: What do babies know about the world? What can they perceive, and how do their perceptual abilities develop? How do children come to understand other people’s actions and mental states? How do they think about biological categories (such as animals and plants) and social categories (such as boys and girls)? When and how do children learn what numbers mean? How is children’s development influenced by culture? 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 216.

PSYC 465  Personality and Soc Dev  credit: 3 or 4 Hours.
Major theories of personality and social development, with attention to processes of social learning, individual differences in personality development, and outcomes of social development; applications to school, home, and other field settings. Same as EPSY 405. 3 undergraduate hours. 4 graduate hours. Prerequisite: PSYC 216 or EPSY 236 or equivalent.

PSYC 466  Image and Neuroimage Analysis  credit: 3 or 4 Hours.
Fundamental concepts, techniques/algorithms, and emerging directions of research in image and neuroimage analysis: image enhancement, image and brain image segmentation, neuroimage registration, functional magnetic resonance imaging (fMRI) time series analysis, and brain connectivity, etc. Same as STAT 466. 3 undergraduate hours. 4 graduate hours. Prerequisite: One of STAT 400, PSYC 406, an equivalent, or consent of instructor; basic programming experience in Matlab, or C/C++, or similar.

PSYC 468  Psych and Law  credit: 2 to 4 Hours.
Examines relationship of the administrative, civil, and criminal justice systems to educational and mental health institutions; individual rights, social issues, and psychological well being. 3 undergraduate hours. 2 to 4 graduate hours. Prerequisite: Six hours of social science.

PSYC 472  Environmental Psychology  credit: 4 Hours.
Same as NRES 472. See NRES 472.

PSYC 475  Personnel Psych  credit: 3 or 4 Hours.
Introduces problems and research relevant to personnel issues in organizations. Topics include: individual differences; selection of personnel; test theory; performance appraisal; equal employment opportunity legislation, regulation, and litigation; assessing bias in selection. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: PSYC 235 or equivalent, and either PSYC 245 or BADM 313.

Information listed in this catalog is current as of 04/2018
PSYC 477  Philosophy of Psychology  credit: 3 or 4 Hours.
Same as PHIL 477. See PHIL 477.

PSYC 484  Ethical Practice of Statistics  credit: 3 or 4 Hours.
Study of the ethical practice of statistics, defined as being in accord
with the accepted rules and standards for right conduct that govern
the discipline of statistics and its many areas of application. An emphasis is
placed on the use of statistical and probabilistic reasoning in the social,
behavioral, and biomedical sciences, with particular stress on the relation
to law and the judiciary. Same as STAT 484. 3 undergraduate hours.
4 graduate hours. Prerequisite: An introductory statistics class, e.g.,
PSYC 235, PSYC 301, STAT 100, ECON 202, EPSY 480, SOC 280.

PSYC 489  Neural Network Modeling Lab  credit: 3 or 4 Hours.
Introduction to neural network modeling, the principles of neural
computation, learning algorithms and the evaluation of neural networks
as models of human perception and cognition. 3 undergraduate hours.
4 graduate hours. Prerequisite: College algebra or equivalent; computer
programming experience, or consent of instructor.

PSYC 490  Measurement & Test Develop Lab  credit: 4 Hours.
The measurement of human behavior in psychological studies; the
construction and use of psychological tests; introduction to tests of
intelligence, achievement, personality, and interest; and practice in test
construction, administration, and validation. Lectures and laboratory.
4 undergraduate hours. 4 graduate hours. Prerequisite: A knowledge of
statistics equivalent to that from PSYC 235.

PSYC 492  Capstone Undergrad Research  credit: 3 Hours.
Capstone experience for undergraduate students doing advanced
research in any area of psychology. Provides in-depth background
knowledge of their research, and teaches students to make effective
oral and written presentations of their findings. In conjunction with
PSYC 494, will facilitate the preparation of a Bachelor's thesis that can be
submitted for the awarding of the departmental distinction at graduation.
May be taken for two semesters with the first semester emphasizing
a review of the literature and the second semester concentrating on
the presentation of the results. 3 undergraduate hours. No graduate
credit. May be repeated in separate terms to a maximum of 6 hours.
Prerequisite: Senior standing in Psychology, consent of instructor, and
students must arrange to do a research project with a faculty member.

PSYC 494  Advanced Research in Psych  credit: 1 to 4 Hours.
Supervised independent investigation of special topics in psychology;
requires a written report with a final copy submitted for departmental
records. 1 to 4 undergraduate hours. No graduate credit. May be repeated
to a maximum of 12 hours. Prerequisite: Ten hours of psychology or
cogitate area, or written consent of instructor.

PSYC 495  Internship Capstone Experience  credit: 3 Hours.
This capstone seminar will connect students' summer internship
experiences to their academic major in Psychology and to their career
goals. Students will reflect, discuss and build on their internship
experiences to help them identify the skills and abilities they have
and need to be successful. They will participate in both individual
assignments and team projects that will facilitate their ability to
communicate in the many different careers available to students with
a degree in psychology. 3 undergraduate hours. No graduate credit.
Prerequisite: Completion of an internship during previous summer.

PSYC 496  Adv Current Topics in Psych  credit: 2 to 4 Hours.
Advanced treatment of current topics in the field of psychology. 2 to
4 undergraduate hours. 2 to 4 graduate hours. May be repeated to a
maximum of 9 hours. Prerequisite: PSYC 100 and junior standing, or
consent of instructor; particular sections may have additional 200-level
and/or 300-level prerequisites.

PSYC 497  Philosophy of Psychology  credit: 3 or 4 Hours.
Continuation of PSYC 398, this course assists students in the Psychology
Honors Program with the researching and writing of an undergraduate
honors thesis, under supervision of a faculty member, on a problem of
appropriate scope and character. 3 undergraduate hours. No graduate
credit. Prerequisite: PSYC 398.
This course satisfies the General Education Criteria for:
Advanced Composition

PSYC 499  Senior Honors Seminar II  credit: 3 Hours.
The completion of writing of an undergraduate honors thesis, under
supervision of a faculty member, on a problem of appropriate scope and
character. Students also create posters describing their work for
presentation at the Psychology Honors Poster Fair and the Campus
Undergraduate Research Symposium. 3 undergraduate hours. No
graduate credit. PSYC 398 and PSYC 499 are approved for General
Education credit only as a sequence. All courses must be completed to
receive Advanced Composition credit. Prerequisite: PSYC 498.
This course satisfies the General Education Criteria for:
Advanced Composition

PSYC 500  Professional Develop for Psych  credit: 1 to 4 Hours.
Provides practical guidance to graduate students in psychology about
a variety of professional issues, including topics such as publishing,
speaking, writing, teaching, research ethics, mentoring, interviewing for
jobs, and preparing for different career options. The course is discussion-
based and provides a forum to address common questions and problems
encountered by graduate students in psychology. 1 to 4 graduate hours.
No professional credit. Approved for Letter and S/U grading. May be
repeated up to 8 credit hours if topics vary.

PSYC 501  Best Psych Research Practices  credit: 2 to 4 Hours.
Explores topics concerning the best research practices used in the
different areas of psychology. Examination of recent advances in
research design, analysis, and reporting will hone methodological and
statistical intuitions. Students will investigate the growing literature
on problematic practices, consider proposed solutions, and construct
and evaluate simulations to enhance their understanding of the best
methodologies so they can contribute to a more open and reproducible
psychological science. 2 to 4 graduate hours. No professional credit. May be
repeated up to 8 graduate hours, if topics vary.

PSYC 503  Categories and Concepts  credit: 4 Hours.
The psychology of human concepts, including concept learning,
categorization, the structure of concepts in memory and conceptual
development. Prerequisite: Graduate standing in psychology or consent
of the instructor.

PSYC 504  Theories of Attention  credit: 2 or 4 Hours.
Systematic study of the psychology of attention, including focused
and divided attention, dual-task performance, attention and memory,
attention and automatization, and skilled performance. The emphasis is
primarily theoretical, focusing on current approaches and the historical
developments that led to them. Prerequisite: Graduate standing in
Psychology or consent of instructor.

PSYC 506  Statistical Methods I  credit: 4 Hours.
Techniques in applied statistics used in psychological research,
including simple linear regression, partial and multiple correlation,
and nonparametric methods; thorough review of statistical estimation
and significance tests; emphasizes applied statistics and statistical
computing. 4 graduate hours. No professional credit. Credit is not given
for both PSYC 506 and SOC 586. Prerequisite: Graduate standing or
consent of instructor.

Information listed in this catalog is current as of 04/2018
PSYC 507 Statistical Methods II credit: 4 Hours.
Continuation of PSYC 506. Experimental design, including Latin Squares, factorials, and nested designs; expected mean squares; analysis of covariance; emphasizes the general linear model. 4 graduate hours. No professional credit. Credit is not given for both PSYC 507 and SOC 587. Prerequisite: PSYC 506.

PSYC 508 Intro to Systems Neuroscience credit: 4 Hours.
In-depth, comprehensive introduction to the structure and function of the nervous system. This focus is on systems neuroscience rather than at the cellular or molecular neuroscience. To prepare students for study in a variety of areas in neuroscience at the graduate level, the lectures will supply key, fundamental knowledge in many areas of neuroscience and then progress to an advanced level. The labs will provide a solid, basic knowledge of neuroanatomy and experience working with different neuroscience techniques. Same as MCB 508 and NEUR 508. Prerequisite: Graduate standing or consent of instructor.

PSYC 509 Psych Scaling Multidimen Meth credit: 4 Hours.
Basic scaling theory; metric, non-metric, and individual differences multidimensional scaling models and methodology, emphasizing underlying assumptions and interpretation; and applications of scaling methods to measurement problems in social and personality psychology, perception, cognition, and sociology. Same as SOC 589. Prerequisite: PSYC 407, SOC 587, or equivalent course in quantitative methods.

PSYC 510 Advances in Behavioral Neuroscience credit: 3 or 4 Hours.
Deals with the relevance of behavioral neuroscience to the subdisciplines of psychology; topics include behavioral genetics, hormones and sexuality, eating and drinking, human memory models and the brain, biorhythms in normal and abnormal behavior, physiology of sensing and perceiving, selective attention, and others. Same as NEUR 510. 3 or 4 graduate hours. No professional credit. Consent of instructor is required for more than 3 hours of credit. Prerequisite: PSYC 210 or consent of instructor.

PSYC 514 Seminar in Cognitive Science credit: 2 or 4 Hours.
In-depth view of cognitive science: the study of mind and intelligence. Covers major areas of cognitive science including: anthropology, artificial intelligence, cognitive neuroscience, cognitive psychology, emotions, linguistics, and philosophy. Lectures focus on prominent questions and issues in each area highlighted by descriptions of current research. Also explores interconnections among these fields. Same as ANTH 514, CS 549, EPSY 551, LING 570, and PHIL 514. Prerequisite: Minimally second semester graduate standing in a cognitive science discipline including: anthropology, computer science, educational psychology, electrical engineering, linguistics, philosophy, psychology, or consent of instructor.

PSYC 515 Neurotoxicology credit: 3 Hours.
Same as CB 514 and ENVS 514. See CB 514.

PSYC 516 Perception credit: 4 Hours.
Systematic study of methods and research findings in the field of human perception, together with an evaluation of theoretical interpretations. Prerequisite: Twelve hours of psychology.

PSYC 518 Exp Psych Human Learn credit: 4 Hours.
Data and theories of verbal learning; verbal mediators and their functions in learning and retention; transfer of training; short-term and long-term memory; and conceptualizations of the forgetting process. Prerequisite: Twelve hours of psychology or consent of instructor.

PSYC 521 Knowledge Representation credit: 4 Hours.
Surveys theories and data about the representation of knowledge by human beings; examines images, concepts, semantic features, propositions, semantic nets, rules, parallel distributed, procedural, schemas, mental models, and theories. Prerequisite: Background in either cognitive psychology, linguistics, or artificial intelligence.

PSYC 523 Prob Solving and Cog Skill Acq credit: 4 Hours.
Selected topics in how people solve problems and learn cognitive skills. A broad range of empirical findings will be discussed, along with psychological and computational accounts. Prerequisite: Consent of instructor.

PSYC 524 Dev Psycholinguistics credit: 2 or 4 Hours.
Examination of empirical and theoretical literature on the acquisition of language; emphasis on universal patterns in the acquisition of a first language and on a consideration of explanations, both psychological and linguistic, for these patterns. Same as LING 524 and MDIA 524. Prerequisite: LING 425, PSYC 425 or PSYC 462, or consent of instructor.

PSYC 525 Psycholinguistics credit: 2 or 4 Hours.
Critical survey of psychological research on language and communication; emphasis on psychological processes that allow humans to produce and understand speech, writing, and gesture. Same as LING 525 and MDIA 525. Prerequisite: Consent of instructor.

PSYC 526 Adv Psycholinguistics credit: 2 or 4 Hours.
Overview of psychological research investigating the perceptual, cognitive, neuropsychological, and behavioral events that accompany speaking, reading, or listening to language. Examines adult language processing as well as the development of specific language skills and the nature of related language disorders. Same as EPSY 566. May be repeated in the same or separate terms to a maximum of 12 hours. Prerequisite: PSYC 525 or consent of instructor.

PSYC 529 Second Lang Acq & Bilingualism credit: 4 Hours.
Same as LING 529. See LING 529.

PSYC 530 Found of Ind Org Psych credit: 4 Hours.
Theoretical and empirical foundations of various content areas in industrial-organizational psychology; sample topics include employee selection and placement, training, human factors engineering, work motivation, employee attitudes, leadership, and organizational theory. Same as LER 530. Prerequisite: Twelve hours of psychology or consent of instructor.

PSYC 531 Psych Measurement in Indus credit: 4 Hours.
Application of psychometric methods and the finding of differential psychology to the selection, classification, and performance evaluation of industrial personnel. Prerequisite: PSYC 407 or equivalent.

PSYC 532 Intro to Clin-Comm Psych III credit: 4 Hours.
Part 3 of a 4 part sequence designed to provide clinical community graduate students with a broad overview of theories, approaches, and methods in clinical and community psychology. This set of courses includes coverage of all major domains in clinical-community psychology, including psychopathology/problems in living, clinical-community assessment, diagnosis, effective interventions and their evaluation, and prevention. These courses are also meant to engage graduate students in the process of critical inquiry in clinical-community psychology. Required of all entering graduate students in clinical-community psychology. Prerequisite: Consent of instructor required for all students not admitted to graduate program in clinical-community psychology.
PSYC 533  Intern in Ind Org Psych  credit: 4 Hours.
Supervised practice in organizational practice and research, implementation of programs, evaluation, feedback of survey results, applied assessments, assistance in EAP programs, and development of personnel guidelines; emphasizes applications of principles and procedures. Offered in special interest of graduate students in I/O psychology program. Prerequisite: Graduate standing in Psychology, credit or concurrent registration in PSYC 530, and consent of instructor.

PSYC 534  Models of Decision and Choice  credit: 4 Hours.
Survey of mathematical and other formal models of human judgment and decision processes. Emphasizes differences between normative and descriptive models. Same as ACCY 595. Prerequisite: PSYC 407.

PSYC 536  Dev Cultural Psychology  credit: 4 Hours.
Analysis of current developments, trends, and controversies in developmental cultural psychology, with an emphasis on how child development unfolds in dynamic cultural contexts; detailed examination of contexts that shape children’s development within and across cultures, social addresses, and historical eras; foregrounds theories and methods that treat children as meaning makers who actively navigate and transform complex cultural realities.

PSYC 537  Development & Psychopathology  credit: 4 Hours.
Overview of major concepts, issues, and research in the field of developmental psychopathology, which is an interdisciplinary field influenced by psychology, medicine, neuroscience, and other disciplines. Explores youth psychopathology from a developmental perspective, focusing on the interaction between normative and atypical development. Introduces students to assessment and classification, key theories of etiology, and research design issues. Representative disorders will be discussed as examples of how these issues interface with specific types of youth psychopathology. Both pioneering and contemporary research in the field will be covered.

PSYC 538  Intro to Clin-Comm Psych I  credit: 4 Hours.
Part 1 of a 4 part sequence designed to provide clinical-community graduate students with a broad overview of theories, approaches, and methods in clinical and community psychology. This set of courses includes coverage of all major domains in clinical-community psychology, including psychopathology/problems in living, clinical-community assessment, diagnosis, effective interventions and their evaluation, and prevention. These courses are also meant to engage graduate students in the process of critical inquiry in clinical-community psychology. Required of all entering graduate students in clinical-community psychology. Prerequisite: Consent of instructor required for all students not admitted to graduate program in clinical-community psychology.

PSYC 539  Intro to Clin-Comm Psych II  credit: 4 Hours.
Part 2 of a 4 part sequence designed to provide clinical-community graduate students with a broad overview of theories, approaches, and methods in clinical and community psychology. This set of courses includes coverage of all major domains in clinical-community psychology, including psychopathology/problems in living, clinical-community assessment, diagnosis, effective interventions and their evaluation, and prevention. These courses are also meant to engage graduate students in the process of critical inquiry in clinical-community psychology. Required of all entering graduate students in clinical-community psychology. Prerequisite: Consent of instructor required for all students not admitted to graduate program in clinical-community psychology.

PSYC 540  Social Development  credit: 4 Hours.
Same as EPSY 530. See EPSY 530.

PSYC 541  Personality and Behav Dynamics  credit: 2 or 4 Hours.
Theory and research in personality, emphasizing personality as individual differences among persons and personality as attributed to persons by others; explores the measurement, antecedents, and consequences of such differences and attributions. Prerequisite: Twelve hours of psychology.

PSYC 545  Intro to Clin-Comm Psych IV  credit: 4 Hours.
Part 4 of a 4 part sequence designed to provide clinical-community graduate students with a broad overview of theories, approaches, and methods in clinical and community psychology. This set of courses includes coverage of all major domains in clinical-community psychology, including psychopathology/problems in living, clinical-community assessment, diagnosis, effective interventions and their evaluation, and prevention. These courses are also meant to engage graduate students in the process of critical inquiry in clinical-community psychology. Required of all entering graduate students in clinical-community psychology. Prerequisite: Consent of instructor required for all students not admitted to graduate program in clinical-community psychology.

PSYC 546  Intervention & Assessment  credit: 2 to 4 Hours.
This two-semester course sequence covers research and methods of intervention, prevention, and assessment/diagnosis in clinical and community psychology. Includes scholarly readings and didactic discussions, as well as supervision of applied work in which the students engage. Instruction in ethical standards and professional development is provided. Emphasis is given to empirically-supported assessment, intervention, and supervision in clinical and community psychology. Approved for S/U grading only. May be repeated. Prerequisite: Credit or concurrent registration in PSYC 538, PSYC 539, PSYC 532, or PSYC 545, or consent of instructor.

PSYC 547  Internship  credit: 0 to 16 Hours.
Supervised field experience in clinical psychology. Approved for letter and S/U grading. Prerequisite: Consent of instructor.

PSYC 551  Theory in Social Psychology  credit: 4 Hours.
Overview of the major theoretical perspectives in experimental social psychology, including theories of attitudes, motivation, emotion, interpersonal and intergroup relations, and the self. Prerequisite: Consent of instructor.

PSYC 552  Soc Psych Theory and Meth II  credit: 4 Hours.
Second of a two-course sequence for first-year graduate students in social psychology. Advanced theoretical and research approaches to a broad range of issues in social psychology; participation and seminar presentations by social psychology program faculty. Each student participates in seminar presentations and develops and conducts a research study in conjunction with one or more faculty members. Prerequisite: Consent of instructor.

PSYC 553  Founds of Organizational Behav  credit: 4 Hours.
Same as BADM 510, PS 514, and SOC 575. See BADM 510.

PSYC 554  Classroom Learning  credit: 4 Hours.
Same as EPSY 552. See EPSY 552.

PSYC 558  Attitudes  credit: 4 Hours.
Intensive analyses of recent developments in attitude theory and research; emphasis on the attitude-behavior relationship; and examination of theories of attitude and attitude change with respect to their utility in predicting and changing social behavior. Prerequisite: Consent of instructor.
PSYC 559  Small Groups  credit: 4 Hours.
Intensive examination of current research and theory on structure, process, and performance of groups; critical examination of recent research and theoretical literature; and development of research designs for related issues in the field. Prerequisite: Consent of instructor.

PSYC 563  Research Methods: Clin/CommPsych  credit: 4 Hours.
Examination of research methods and strategies in Clinical and Community Psychology and related fields; issues involved in causal inference from experimental and quasi-experimental designs; qualitative research methods. Prerequisite: PSYC 406.

PSYC 567  Personality Assessment  credit: 4 Hours.
Methods and theory in the quantitative assessment of personality; review of research findings and trends. Same as EPSY 567. Prerequisite: PSYC 407 or equivalent.

PSYC 569  Cognitive Development  credit: 4 Hours.
Intensive examination of current research on infant cognition. Topics include: object segregation, object permanence, physical reasoning, object individuation, number, and psychological reasoning. Prerequisite: Consent of instructor.

PSYC 570  Prin and Meth of Tchg Psych  credit: 0 to 4 Hours.
Designed for graduate students in psychology; areas considered include developing course objectives and content; developing and presenting teaching-learning situations; evaluating the attainment of course objectives; advising and counseling students; ethics in teaching; and research problems on the teaching of psychology. 0 to 4 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 hours. Prerequisite: Consent of instructor.

PSYC 573  Clin/Comm: History & Systems  credit: 4 Hours.
One of a series of independent study courses to help Clinical/Community Psychology graduate students develop breadth of knowledge in the broader field of Psychology. Involves an overview of the history and systems of psychological thought and satisfies the breadth requirement in the area. Prerequisite: Before enrolling in this course, students must develop and maintain a portfolio of engagement with the breadth area of History and Systems demonstrating 45 hours of effort. Students must first meet with the course instructor to present their portfolio. Instructor approval required. Clinical/Community Psychology graduate students only.

PSYC 574  Microskills & Prof Standards  credit: 2 Hours.
This year-long course covers professional standards and ethics, which emphasizes applied skills for the practice of Clinical and Community Psychology. Students will learn basic skills in rapport-building, including initiating the first contact or session, reflective listening, and paying attention to affect, body language, and interpersonal process in session or interactions. Instruction in professional ethics, supervision, and consultation. Students may practice some of the learned skills by developing relationships with gatekeepers of local organizations and providing consultation and supervision or engaging in collaborations to improve the quality of life of community members. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Clinical/Community Psychology graduate students only; or consent of instructor.

PSYC 575  Clinical/Community: Diversity  credit: 2 Hours.
Addresses issues of human diversity in the research and applied work of Clinical/Community Psychologists. Diversity is broadly defined and includes attention to, for example: national origin, culture, race, ethnicity, social class, physical ability, cognitive ability, sexual orientation, gender identity, and privilege/oppression. Utilizes both the scholarly literature on diversity, and experiential exercises to develop knowledge and cultural competence. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Clinical/Community Psychology graduate students only; or consent of instructor.

PSYC 576  Clinical/Community: Biological  credit: 4 Hours.
One of a series of independent study courses to help Clinical/Community Psychology graduate students develop breadth of knowledge in the broader field of Psychology. Involves an overview of the research and theory in the major subdomains within the area of Biological Psychology and satisfies the breadth requirement in the area. Prerequisite: Before enrolling in the course, students must develop and maintain a portfolio of engagement with the breadth area of Biological Psychology demonstrating 45 hours of effort. Students must first meet with the course instructor to present their portfolio. Instructor approval required.

PSYC 577  Clinical/Community: Cog/Affect  credit: 4 Hours.
One of a series of independent study courses to help Clinical/Community Psychology graduate students develop breadth of knowledge in the broader field of Psychology. Involves an overview of the research and theory in the major subdomains within the area of Cognitive/Affective Psychology and satisfies the breadth requirement in the area. Prerequisite: Before enrolling in this course, students must develop and maintain a portfolio of engagement with the breadth area of Cognitive/Affective Psychology demonstrating 45 hours of effort. Students must first meet with the course instructor to present their portfolio. Instructor approval required.

PSYC 578  Clinical/Community: Development  credit: 4 Hours.
One of a series of independent study courses to help Clinical/Community Psychology graduate students develop breadth of knowledge in the broader field of Psychology. Involves an overview of the research and theory in the major subdomains within the area of Developmental Psychology and satisfies the breadth requirement in the area. Prerequisite: Before enrolling in this course, students must develop and maintain a portfolio of engagement with the breadth area of Developmental Psychology demonstrating 45 hours of effort. Students must first meet with the course instructor to present their portfolio. Instructor approval required.

PSYC 579  Clinical/Community: Social  credit: 4 Hours.
One of a series of independent study courses to help Clinical/Community Psychology graduate students develop breadth of knowledge in the broader field of Psychology. Involves an overview of the research and theory in the major subdomains within the area of Social Psychology and satisfies the breadth requirement in the area. Prerequisite: Before enrolling in this course, students must develop and maintain a portfolio of engagement with the breadth area of Social Psychology demonstrating 45 hours of effort. Students must first meet with the course instructor to present their portfolio. Instructor approval required.

PSYC 581  Applied Regression Analysis  credit: 4 Hours.
Same as EPSY 581. See EPSY 581.

PSYC 587  Hierarchical Linear Models  credit: 4 Hours.
Same as STAT 587 and EPSY 587. See EPSY 587.
Introduction to covariance structure models, linear structural equations, and factor analysis; identification and parameter estimation problems; assessing goodness-of-fit; use of up-to-date computer software implementing current estimation methods; applications to a wide variety of social and behavioral science modeling problems. Same as EPSY 588, SOC 588, and STAT 588. Prerequisite: PSYC 594, STAT 571, or SOC 587.

**PSYC 589** Categorical Data in Ed/Psyc credit: 4 Hours.
Same as EPSY 589 and SOC 579. See EPSY 589.

**PSYC 590** Individual Research credit: 0 to 16 Hours.
For graduate students who wish to conduct research on special problems not included in graduate theses. Approved for S/U grading only. Prerequisite: Consent of instructor.

**PSYC 593** Seminar credit: 2 or 4 Hours.
Discussion of current topics in their historical setting, with special emphasis on research problems. 2 or 4 graduate hours. No professional credit. May be repeated if topics vary.

**PSYC 594** Multivar Anlys in Psych and Ed credit: 4 Hours.
Examines the principal methods of descriptive and inferential statistics used in the analysis of multiple measurements, emphasizing linear transformations, multiple regression, principal components, multivariate analysis of variance, canonical correlation and variates, discriminant functions and variates, and conventional procedures of factor analysis; involves both theory and applications. Same as EPSY 584 and SOC 584. Prerequisite: PSYC 407 or EPSY 581 or EPSY 582 or consent of instructor.

**PSYC 595** Theories of Measurement I credit: 4 Hours.
Same as EPSY 585. See EPSY 585.

**PSYC 596** Theories of Measurement II credit: 4 Hours.
Same as EPSY 586. See EPSY 586.

**PSYC 598** Proseminar in Psychology credit: 0 to 4 Hours.
Weekly presentation and discussions of current research by faculty, graduate students and visiting scholars. Sections of these proseminars are offered by each division in the Psychology Department. Requirements include attendance and participation in discussion. Same as NEUR 598. 0 to 4 graduate hours. Approved for S/U grading only. May be repeated.

**PSYC 599** Thesis Research credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

### Recreation, Sport, and Tourism (RST)

**RST Class Schedule** (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/RST)

**Courses**

**RST 100** Recreation, Sport, and Tourism in Modern Society credit: 3 Hours.
This course examines central issues in defining leisure, recreation, sport, and tourism. Historical, philosophical, sociological, psychological, and economic approaches to understanding these areas, their behaviors and meanings, social contexts, and personal and social resources are examined. By the end of the semester, students should understand their history and evolution, as well as their impact on contemporary society. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

**RST 101** Orientation to Recreation, Sport and Tourism credit: 1 Hour.
Introduction to Recreation, Sport and Tourism which provides an overview of the RST curriculum, areas of study, and opportunities available for a career in the field.

**RST 110** Service Delivery in RST credit: 2 Hours.
Introduces students to the concepts, principles, and practices related to the provision of leisure services; description of the various fields of professional practices and basic elements of leisure service systems such as budgeting, planning, staffing, and characteristics of client populations.

**RST 120** Foundations of Recreation credit: 3 Hours.
Examines historical and philosophical foundations of various organizations responsible for providing recreation opportunities and services. Program planning, evaluation, and marketing and financing strategies are examined in the public, not-for-profit and private recreation delivery systems.

**RST 130** Foundations of Sport Mgt credit: 3 Hours.
Examines career opportunities within the sport industry and provides knowledge relevant to the management, marketing, legal, and financial operations of sport organizations. Incorporates applications in a variety of sport entities including intercollegiate athletics, campus recreation, event and facility management, professional sport, management and marketing agencies, and international sport.

**RST 140** Nature and Wilderness credit: 2 Hours.
Origins of the nature and wilderness preservation movements; philosophy behind nature conservation and outdoor activities; role of parks, outdoor recreation, and nature-tourism in contemporary life.

**RST 150** Foundations of Tourism credit: 3 Hours.
Survey of travel and tourism with emphasis upon tourist behavior, motivations, preferences, decision-making, attractions, transportation services, facilities and information sources. Examines travel and tourism as an element of leisure service delivery from an interdisciplinary perspective.

**RST 180** Professional Applications credit: 3 Hours.
This course examines elements of administration, programming, and facility planning and management to high profile recreation, sport, and tourism destinations. The course consists of 6 modules completed during the second 8 weeks and concludes with a 12-day domestic tour (offered in May/early June) of RST related destinations in Indiana, Ohio, New York, Massachusetts, and Pennsylvania. The course will provide students with a unique opportunity to engage with industry leaders at the destinations. The course allows students to explore, discuss, compare and contrast RST destinations, facilities, and professions and apply concepts from the classroom. Additional fees may apply. See Class Schedule.

**RST 199** Undergraduate Open Seminar credit: 1 to 5 Hours.
Covering various topics for undergraduates in Recreation, Sport & Tourism. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated, as topics vary.

**RST 200** Leadership in Recreation, Sport and Tourism credit: 2 Hours.
Leadership theories and practices related to design and delivery of leisure programs. Processes of group development and interpersonal communication in leisure service organizations.

**RST 216** Leisure and Technology credit: 3 Hours.
Focuses on the roles of technology in leisure and related industries and explores the impact of technology on leisure from both the consumer and producer perspectives. Reviews important technologies, discusses their use as transformative mechanisms, and considers their impact on leisure activities in society.
RST 217  Public Recreation  credit: 3 Hours.
Course examines the public sector and its role in the provision of local park and recreation services. Students will explore its philosophical foundations, organizational structure, policy-making process, and the administrative tasks of public recreation providers.

RST 218  Entrepreneurship  credit: 3 Hours.
In-depth study of the delivery of leisure services in the for-profit sector. Covers the scope and administrative functions of recreation enterprises, including an analysis of planning, controlling, and developing recreation enterprises.

RST 224  Politics of the National Parks  credit: 2 or 3 Hours.
Same as PS 224. See PS 224.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

RST 225  Environmental Politics & Policy  credit: 3 Hours.
Same as PS 225. See PS 225.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

RST 230  Diversity in Recreation, Sport, and Tourism  credit: 3 Hours.
Course is designed to increase awareness and knowledge of the needs of members of ethnic and racial minorities, people of lower socio-economic status, women, older adults, people of alternative lifestyles, and people with disabilities when it comes to recreation, sport, and tourism services. It introduces students to concepts and factors that influence the delivery of recreation, sport, and tourism services to diverse populations. Same as HDFS 263 and KIN 230.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

RST 240  Financial Resource Management in Recreation, Sport and Tourism  credit: 3 Hours.
This course examines financial concepts in the RST industry across public, private, for-profit, and not-for-profit sectors. It covers revenue management, pricing strategies, grantsmanship, fundraising, sponsorship, budgeting, and ratio analysis. Prerequisite: RST 100 and RST 210.

RST 242  Nature and American Culture  credit: 3 Hours.
Appreciation and critique of cultural meanings associated with American natural landscapes. Traditional perspectives including colonial American, romantic, and science-based conservation are characterized, as well as revisionist themes aligned with gender, cultural pluralism, and societal meanings of parks and protected areas. Implications of diversity in cultural meanings toward nature are developed and provide the basis for assessing tenets of contemporary environmental policy and supporting concepts associated with community-based conservation. Same as HIST 282, LA 242, and NRES 242.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

RST 255  Ethical Issues in Recreation, Sport and Tourism  credit: 2 Hours.
Explores ethical issues related to government, recreational sport, sport tourism and travel, journalism and media, education, coaching, and business. Students become familiar with concepts and principles of applied ethics and gain insight in to the complexity of ethical issues in recreation, sport and tourism.

RST 300  Leisure Programming  credit: 3 Hours.
Develops understanding of the process of leisure/recreation programming and the practical aspects of program design and delivery. Prerequisite: RST 100.

RST 312  Discovery, Tourism and Travel  credit: 3 Hours.
Same as HIST 315. See HIST 315.

RST 314  Introduction to Aging  credit: 3 Hours.
Same as CHLH 314, HDFS 314, PSYC 314, and REHB 314. See CHLH 314.

RST 316  Leisure and Human Development  credit: 3 Hours.
Examines changes in expressive style and behavior over the life course, and the interaction of leisure with developmental processes. Prerequisite: RST 100 or consent of instructor.

RST 325  Marketing in Recreation, Sport and Tourism  credit: 3 Hours.
Application of marketing concepts to the delivery of leisure services. Introduces consumer decision theory analysis. Provides an integrative study of the methods and models for developing and evaluating alternative marketing strategies.

RST 335  Leisure and Consumer Culture  credit: 3 Hours.
Examination of contemporary patterns and meanings of leisure in a consumer society. Understanding of the impact of consumption on expressions of identity, gender, social class, race and ethnicity. This course satisfies the General Education Criteria for:
Cultural Studies - Western

RST 340  Facility Management in Recreation, Sport and Tourism  credit: 3 Hours.
Basic understanding of park operations, facility design, construction, and maintenance practices; staff allocations, job analysis, contract administration, organizational structures. Prerequisite: RST 100 and RST 110.

RST 341  Community Recreation Planning  credit: 3 Hours.
Studies the outdoor recreational use of lands in the public domain and their planning, concepts, and processes related to planning resource based systems; multiple-use in planning; planning criteria for outdoor recreation facilities. Additional fees may apply. See Class Schedule. Prerequisite: Junior standing; or consent of instructor.

RST 346  Case Study: Endless Summer  credit: 3 Hours.
Same as KIN 346 and MACS 346. See KIN 346.

RST 350  Tourism and Culture  credit: 3 Hours.
Studies the relationships that exist between tourists, hosts, their respective culture(s), and the cultural environments in which they interact. Studies tourism and its impacts across cultural boundaries, as well as concepts of cultural authenticity, modernity, image creation, social justice, diversity, and representation of social, racial and ethnic groups. Field trip required. Additional fees may apply. See Class Schedule. Prerequisite: Junior or Senior standing.

RST 354  Legal Aspects of Sport  credit: 3 or 4 Hours.
A study of legal principles and their impact on the sport industry; the course examines the application of different areas of law including tort, contract, constitutional, anti-trust, and intellectual property law to professional, amateur and recreational sport.

RST 357  Technology & Sport  credit: 3 Hours.
Same as HIST 343. See HIST 343.

RST 365  Civic Engagement in Wellness  credit: 3 Hours.
Same as AHS 365, CHLH 365, KIN 365, and SHS 370. See KIN 365.
RST 370 Research Methods & Analysis  credit: 3 Hours.
Educates students in principles of research design, data collection, measurement, methods of statistical analysis, techniques in summarizing data, and the interpretation and application of research findings to the field of Leisure Studies.
This course satisfies the General Education Criteria for: Quantitative Reasoning II

RST 390 Honors credit: 2 Hours.
Same as CHLH 390 and KIN 390. See KIN 390.

RST 393 Special Problems  credit: 1 to 3 Hours.
Special projects in research and independent investigation in any phase of physical education, recreation, or related areas selected by the student. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; grade-point average of 3.0; consent of academic advisor, instructor, and head of department.

RST 401 Administration of Leisure Serv  credit: 3 or 4 Hours.
Development of overall leisure management function. Analysis of administration and policies such as organizational structure, executive leadership, decision-making, financing, and public relations. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Undergraduates: Completion of campus Composition I general education requirement and upper level standing.
This course satisfies the General Education Criteria for: Advanced Composition

RST 429 Contemporary Issues in Recreation, Sport and Tourism credit: 4 Hours.
Provides a capstone experience to encourage critical and creative thinking regarding knowledge students accrued from prior courses. The first eight weeks students will meet as a whole and focus on leisure concepts in general, and the second eight weeks students will focus on their specific concentration, (Sport Management, Tourism, or Community Recreation). 4 undergraduate hours. 4 graduate hours. Prerequisite: RST 120, or RST 130, or RST 150, and senior status.

RST 440 HR Management in RST  credit: 3 Hours.
Concepts, principles, and objectives of supervision; the nature of the supervisory relationship; supervisory functions and processes; identification and application of methods and techniques; organizational and operational patterns of supervision in recreation and park settings. 3 undergraduate hours. No graduate credit.

RST 450 Tourism Planning & Development  credit: 4 Hours.
Examines tourism planning and development processes from both applied and conceptual perspectives. Emphasis is placed on tourism planning and development strategies that evaluate destination potential and consider travel destination choice behavior. 4 undergraduate hours. 4 graduate hours. Prerequisite: RST 150 or consent of instructor. Not intended for students with Freshman or Sophomore class standing.

RST 459 Heritage Management  credit: 3 or 4 Hours.
Same as ANTH 460 and LA 460. See ANTH 460.

RST 480 Orientation to Practicum  credit: 1 Hour.
Prepares and places students in the Leisure Studies Practicum. Students must document completion of 300 hours of field work. Topics include placement requirements and policies, resumes, interviewing, letters of application, and the role and issues of professional practice. 1 undergraduate hour. 1 graduate hour. Prerequisite: Junior standing; RST 100 and RST 110.

RST 485 Practicum  credit: 12 Hours.
Students are assigned to University-approved field training stations in an internship capacity for a minimum of forty hours per week for sixteen weeks. Both the agency and the University provide supervision. 12 undergraduate hours. 12 graduate hours. Approved for S/U grading only. Prerequisite: Senior standing; RST 480 and RST 410.

RST 501 Concepts & Applications in Recreation, Sport & Tourism credit: 4 Hours.
Basic philosophical, historical, and scientific foundations and developments in leisure and recreation; analyses of the significance of leisure in modern societies; critical review of major writings in the field with attention to particular special problem areas and current issues. Prerequisite: RST 100 or equivalent.

RST 502 Critical Issues Recreation Mgt credit: 4 Hours.
In-depth study of the public administrative functions in large complex organizational structures; development of an understanding of change and evolution in leisure service agencies as related to the internal and external environments; study of various management styles and situations in leisure service agencies. Same as NRES 504. 4 graduate hours. No professional credit. Prerequisite: Basic course in administration or organization of leisure service agencies.

RST 503 Adv Leisure Research Methods credit: 4 Hours.
Examines methods and techniques of conducting and evaluating leisure research; experimental and survey designs and procedures; data collection, reduction and analysis. Prerequisite: RST 100 or equivalent; RST 370 or equivalent; a course in introductory statistics.

RST 512 Managing Recreation, Sport & Tourism Organizations credit: 4 Hours.
Examines theoretical and technical principles of personnel managers in leisure service agencies; recruitment, training, selection, and evaluation of personnel with special emphasis on applied measurement concepts and legislation related to personnel administration in leisure services. Prerequisite: RST 410 or consent of instructor.

RST 515 Marketing in RST credit: 4 Hours.
Examines quality service issues and service strategies needed to attain competitive advantage across leisure industries. Using a customer-focused management framework, the course focuses on customer satisfaction and retention, linking service quality, customer lifetime value, profitability segmentation, services mapping, understanding customer expectations and developing service and customer-focused relationship marketing strategies.

RST 516 Finance & Budgeting in RST credit: 4 Hours.
Addresses the financial needs of organizations in recreation, sport and tourism. Students are introduced to the terminology and financial measurement tools used by academics and firms in the industry. Current economic issues, revenue streams, and budgeting are emphasized. Students develop the ability to critically assess the financial strengths and vulnerabilities of individual organizations and the field as a whole. An in-depth examination of an organization's internal and external environment in recreation, sport or tourism serves as the capstone.

RST 518 Event Management credit: 4 Hours.
Analyse special events from theoretical and applied perspectives and draw from the social sciences, management, the arts, and related professional fields to analyze the experience and attributed meanings of planned events. Students will acquire an in-depth knowledge of the specialized field of event management and become familiar with techniques and strategies required for successful planning, promotion, implementation and evaluation of special events within recreation, sport and tourism contexts.
RST 520  Critical Issues Sport Mgt  credit: 4 Hours.
An analysis of the sport industry with special emphasis given to the role and function of the sport manager. Addresses advanced issues related to organizational theory, finance, marketing, sponsorship, contemporary management and leadership, decision making and strategic planning.

RST 530  Critical Issues Tourism Mgt  credit: 4 Hours.
Exposes students to advanced theories, methods, practices and principles that govern tourism behavior. Survey the body of literature on tourism, examining ongoing debates regarding how individuals travel and the structures of institutions that shape travel.

RST 550  Theory and Methods of Leisure  credit: 4 Hours.
Surveys concepts, methods, and problems of leisure research that are common to community recreation, sport and tourism. Histories of theoretical and methodological development are discussed, appreciated and critiqued. Examines the development of ideas through literature, with discussion centered on explaining the evolution of a given concept.

RST 551  Contemporary Issues in Leisure  credit: 4 Hours.
Provides students with a greater understanding and appreciation of the various disciplines that influence, and are related to, leisure. Examines how these disciplines might influence future research in leisure studies. Prerequisite: RST 550.

RST 555  Diversity in Leisure Behavior  credit: 4 Hours.
Examines diversity as it relates broadly to leisure behavior and services, and quality of life issues. Examines leisure diversity in terms of sexual identity, age, social class, gender, race, ethnicity, as well as mental and physical ability.

RST 560  Teaching in the Professoriate  credit: 4 Hours.
Same as CHLH 565, KIN 565, and SHS 565. See KIN 565.

RST 570  Cultural Aspects of Tourism  credit: 4 Hours.
Develops an advanced understanding of relationships between tourists and the toured, including in-depth knowledge of the phenomenon of tourism and its consequences for individuals and societies. Examines the complexity of movement of peoples across cultural boundaries, coupled with theories related to authenticity, modernity, image creation, social justice, diversity, and representation of social, racial and ethnic groups. Same as ANTH 570. Prerequisite: Graduate standing.

RST 584  Management Internship  credit: 2 to 4 Hours.
Work-study experience in the management aspects of leisure service delivery systems. Students are assigned to agencies in their special fields of study and are closely supervised by University faculty. Prerequisite: RST 484 or graduate standing.

RST 590  Doctoral Research Seminar and Colloquium  credit: 1 Hour.
Required of all doctoral students for four semesters. Presentations and discussions of current research by doctoral students, faculty members, visiting scholars, and professional leaders. Discussion of topics critical to the academic preparation of doctoral students will also be included, e.g., ethics of conducting research, publication process, grantsmanship, and academic job search. Approved for S/U grading only. May be repeated for up to 4 credit hours toward degree requirements.

RST 593  Special Problems  credit: 2 to 4 Hours.
Independent research on special projects. May be repeated. Prerequisite: Open only to students majoring in recreation, sport and tourism.

RST 594  Special Topics in Leisure  credit: 2 to 4 Hours.
Lecture courses in topics of current interest; specific subject matter will be announced in the Class Schedule. Prerequisite: Will be determined for each section offered and will be indicated in the Class Schedule.

RST 599  Thesis Research  credit: 0 to 16 Hours.
Preparation of thesis in leisure studies. Approved for S/U grading only. May be repeated.

Rehabilitation Counseling (REHB)
REHB Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/REHB)

Courses
REHB 199  Undergraduate Open Seminar  credit: 1 to 4 Hours.
May be repeated to a maximum of 8 hours.

REHB 314  Introduction to Aging  credit: 3 Hours.
Same as CHLH 314, HDFS 314, RST 314, and PSYC 314. See CHLH 314.

REHB 322  Intro Intellectual Disability  credit: 3 Hours.
Same as PSYC 322 and SPED 322. See SPED 322.
This course satisfies the General Education Criteria for: Social Beh Sci - Beh Sci

REHB 330  Disability in American Society  credit: 3 Hours.
Presents a range of issues pertaining to disability including demographics, disability rights, services, policies and current issues. Applies a disability studies perspective in which problems associated with individuals' impairments are seen to result from socially imposed barriers. Same as CHLH 330.
This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

REHB 401  Introduction to Rehabilitation  credit: 4 Hours.
Orientation to general field of rehabilitation; includes foundations, resources, assessment, counseling, and placement. 4 undergraduate hours. 4 graduate hours.

REHB 402  Medical Aspects of Disability  credit: 4 Hours.
Examination of the scope of physical, mental and cognitive disabilities, their causes, complications, and treatment. 4 undergraduate hours. 4 graduate hours.

REHB 407  Disability, Culture & Society  credit: 3 or 4 Hours.
Same as ANTH 404, CHLH 407, and KIN 407. See CHLH 407.

REHB 419  Counseling Pre-Practicum  credit: 2 to 4 Hours.
Same as EPSY 419. See EPSY 419.

REHB 435  Work and Disability  credit: 2 Hours.
Examines theories of job placement, job seeking skills, and techniques for outreach with employees. Focuses on a systems approach to job placement for persons with disabilities. Topics include supported employment, labor market trends, and job restructuring. Lab time with disabled clients who are active in the job search process is required. 2 undergraduate hours. 2 graduate hours.

REHB 501  Rehabilitation Research  credit: 4 Hours.
This course has been designed for students who are interested in pursuing a career in rehabilitation and disability research. The course will cover major topics of research methods and techniques used in rehabilitation and disability research. A review of experimental designs and methods, human subject research, and disability related funding agencies will also be covered. 4 graduate hours. No professional credit.

REHB 520  Psycho-Social Aspects  credit: 4 Hours.
Study of the social and emotional adjustment of individuals with disabilities; evaluation of effects imposed by societal attitudes; analysis of the implications for rehabilitation professionals in dealing with individuals who have a disability; review of relevant research. Same as SPED 520.
REHB 536  Assessment in Rehabilitation  credit: 4 Hours.
Theory and practice of vocational evaluation techniques for persons with
disabilities. Reviews basic psychometric instruments and adds practical
experience with work samples and computer-based testing. Includes
hands-on experience in the evaluation of disabled clients. Prerequisite:
REHB 401 or one basic course in testing.

REHB 545  Transition and Voc Planning  credit: 3 Hours.
Same as SPED 545. See SPED 545.

REHB 583  Counseling Internship  credit: 4 Hours.
Development of individual counseling skills in a rehabilitation setting;
emphasis on vocational evaluation and placement skills as developed in
case management and planning experiences as well as adjustment to
disability, vocational choice, and job placement techniques. May be
repeated to a maximum of 8 hours. Prerequisite: REHB 401, REHB 520,
REHB 536, and consent of instructor.

REHB 585  Rehabilitation Practicum  credit: 4 Hours.
Practical experience in a major area of rehabilitation; discussion/
laboratory sections cover such practicum topics related to
administration, counseling, or supported employment and other
rehabilitation services. Prerequisite: REHB 301 and consent of instructor.

REHB 593  Special Problems  credit: 2 to 4 Hours.
Independent research on special projects. Open only to majors. May be
repeated to a maximum of 8 hours. Prerequisite: REHB 401; consent of
instructor.

REHB 594  Special Topics  credit: 1 to 4 Hours.
Lecture course on topics of current interest; specific subject matter
announced in Schedule. May be repeated to a maximum of 8 hours.
Prerequisite: Will be determined for each topic and will be indicated in
Schedule; REHB 401; consent of instructor.

REHB 599  Thesis Research  credit: 0 to 8 Hours.
Preparation of thesis in rehabilitation. Approved for S/U grading only.
May be repeated to a maximum of 8 hours. Prerequisite: Satisfactory
standing in the master’s program.

Religion (REL)

REL Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/REL)

Courses

REL 101  Bible as Literature  credit: 3 Hours.
Themes and literary genres in the Bible, emphasizing content important in
Western culture. Same as CWL 111 and ENGL 114.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

REL 104  Asian Mythology  credit: 3 Hours.
Introductory survey of the mythologies of India, China, and Japan. Same
as ASST 104.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

REL 106  Archaeology and the Bible  credit: 3 Hours.
Examination of archaeological evidence, especially from Syria-Palestine,
and discussion of its use in the interpretation of Biblical literature.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil

REL 108  Religion & Society in West I  credit: 3 Hours.
Introduction to classic writers and texts in Western religious and social
thought from antiquity to the Enlightenment, with emphasis on their
social and historical contexts. Same as ANTH 108, JS 108, PHIL 108, and
SOC 108.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

REL 109  Religion & Society in West II  credit: 3 Hours.
Introduction to classic writers and texts in Western religious and social
thought from the Enlightenment to the present, with emphasis on their
social and historical contexts. Same as ANTH 109, PHIL 109, and
SOC 109.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

REL 110  World Religions  credit: 3 Hours.
Survey of the leading living religions, including Hinduism, Buddhism,
Confucianism, Taoism, Judaism, Christianity, and Islam; examination of
basic texts and of philosophic theological elaborations of each religion.
Same as PHIL 110.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

REL 111  Elementary Greek I  credit: 4 Hours.
Same as GRK 101. See GRK 101.

REL 112  Elementary Greek II  credit: 4 Hours.
Same as GRK 102. See GRK 102.

REL 115  Language and Culture in India  credit: 3 Hours.
Same as HNDI 115 and LING 115. See LING 115.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

REL 116  Faith & Self in Global Context  credit: 3 Hours.
Whether in fourth-century North African, tenth-century Japan, fourteenth-
century Spain, or twentieth-century America, men and women have
wrestled with the question of who they are and how they are to relate
to the world. Through autobiographic writings, by reading the words of
women and men attempting to make sense of the world and their place in
it, we hope to focus attention on the personal dimensions of faith and of
cross cultural contact at the same time that we provide an introduction to
the worlds’ major religions.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

REL 120  A History of Judaism  credit: 3 Hours.
Examines the social, political, economic, and intellectual history of the
Jews from Abraham to the present-day, with particular attention to
Jewish thought and society. Same as HIST 168.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil

REL 121  Introduction to Christianity  credit: 3 Hours.
Typological and historical approaches to major forms of Christianity:
Eastern Orthodoxy, Catholicism, and Protestantism.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
REL 122 History East Asian Religions credit: 3 Hours.  
Same as EALC 122. See EALC 122.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Non-West  
REL 127 Introduction to Catholicism credit: 3 Hours.  
Introduction to the academic study of Catholicism in its historical,  
philosophical and religious dimensions with an emphasis on its historical  
diversity.  
REL 130 Jewish Customs and Ceremonies credit: 3 Hours.  
The major festivals and life-cycle rituals of Judaism; focuses on sacred  
time, interaction of external and internal factors producing change and  
conservatism, relationship of ritual and theology, and the thematic  
development inherent in the rituals.  
REL 132 Zen credit: 3 Hours.  
Introduces the history, teachings, and practice of Zen Buddhism in China  
and Japan. Same as EALC 132.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Non-West  
REL 140 Native Religious Traditions credit: 3 Hours.  
Same as AIS 140. See AIS 140.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - US Minority  
REL 160 Ancient Greek & Roman Religion credit: 3 Hours.  
Same as CLCV 160. See CLCV 160.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Western  
REL 170 Nature Religion credit: 3 Hours.  
Introductory survey of religious traditions that locate sacred realities  
in the natural world, and of ecological traditions that attribute spiritual  
significance to nature. Same as ESE 170.  
REL 191 Freshman Honors Tutorial credit: 1 to 3 Hours.  
Study of selected topics on an individually arranged basis. Open only to  
honors majors or to Cohn Scholars and Associates. May be repeated one  
time. Prerequisite: Consent of departmental honors advisor.  
REL 199 Undergraduate Open Seminar credit: 1 to 5 Hours.  
Undergraduate Open Seminar. May be repeated.  
REL 200 Classical & Koine Greek I credit: 4 Hours.  
Same as GRK 201. See GRK 201.  
REL 201 Hebrew Bible in English credit: 3 Hours.  
Analyzes the critical issues in the interpretation of the literature of the  
Hebrew Bible/Old Testament; surveys the history and religion of Ancient  
Israel with special reference to Israel's setting in the ancient Near East.  
Prerequisite: Sophomore standing or consent of instructor.  
REL 202 New Testament in English credit: 3 Hours.  
Analyzes the literature of the New Testament in its social and religious  
setting, with special reference to the ministry and teaching of Jesus,  
the emergence of the church as a sect within ancient Judaism, and  
the development of Christian institutions in the Graeco-Roman world.  
Prerequisite: Sophomore standing or consent of instructor.  
REL 203 History of the Bible credit: 3 Hours.  
Broad historical survey of the formation and impact of Christian  
and Jewish Bibles through the centuries. Designed to give students  
an academic setting for investigating the complex (and ongoing)  
history of the Bible. Two guiding questions will be: How have historical  
developments informed different versions of the Bible: How have  
versions of the Bible informed cultural and political developments? Same  
as HIST 291.  
REL 204 Classical & Koine Greek II credit: 4 Hours.  
Same as GRK 202. See GRK 202.  
REL 205 Intensive Biblical Hebrew credit: 5 Hours.  
Acquisition of reading knowledge of biblical Hebrew and a familiarity with  
all major aspects of biblical Hebrew grammar. Same as HEBR 205.  
REL 208 Cultures & Literatures of South Asia credit: 3 Hours.  
Introduction to the literary traditions of South Asia from the beginnings to  
the end of the Mughal era. Students will read - in translation - selections  
from a wide range of texts beginning with the earliest Vedic Hymns to  
same as ASST 208, CWL 208, and SAME 208.  
This course satisfies the General Education Criteria for:  
Humanities - Lit Arts  
Cultural Studies - Non-West  
REL 212 History of Antisemitism credit: 3 Hours.  
Same as JS 201. See JS 201.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Western  
REL 213 Intro to Islam - ACP credit: 4 Hours.  
Course is identical to REL 214 except for the additional writing  
component. See REL 214. Same as SAME 213. Credit is not given for both  
REL 213 and REL 214. Prerequisite: Completion of campus Composition I  
general education requirement.  
This course satisfies the General Education Criteria for:  
Advanced Composition  
Humanities - Hist Phil  
Cultural Studies - Non-West  
REL 214 Introduction to Islam credit: 3 Hours.  
History of Islamic thought from the time of Muhammad to the present,  
including the prophethood of Muhammad, the Qur'an, theology and law,  
ymysticism and philosophy, sectarian movements, modernism and legal  
reform, and contemporary resurgence. Same as SAME 214. Credit is not  
given for both REL 213 and REL 214.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Non-West  
REL 215 African Muslim Cultures credit: 3 Hours.  
Same as AFST 213 and HIST 213. See HIST 213.  
This course satisfies the General Education Criteria for:  
Humanities - Hist Phil  
Cultural Studies - Non-West  
REL 220 Jewish Storytelling credit: 3 Hours.  
Same as CWL 221, ENGL 223, JS 220, and YDSH 220. See YDSH 220.  
This course satisfies the General Education Criteria for:  
Humanities - Lit Arts  
Cultural Studies - Western
REL 221 American Judaism credit: 3 Hours.
Forms of Judaism in America: Reform, Conservative, Reconstructionist, Orthodox, and Hasidic Judaism; the American rabbi; Zionism in America; American Jewish communal life; national Jewish organizations; the American synagogue; and the secular Jew. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition

REL 222 The Qur'an (Koran) credit: 3 Hours.
Introduction to the Qur'an (Koran), the holy scripture of Islam, examining its major doctrines, thematic development, literary style, and its relationship to pre-Qur'anic, especially Biblical, traditions. Special attention is given to various methods Muslims have used to interpret the Qur'an. Same as CWL 223 and SAME 223. Prerequisite: REL 213 or REL 214.

REL 230 Philosophy of Religion Intro credit: 3 Hours.
Same as PHIL 230. See PHIL 230. This course satisfies the General Education Criteria for: Humanities - Lit Arts

REL 231 Religion and Philosophy credit: 3 Hours.
Introduces students to philosophical and theological perspectives and methodologies by focusing on one or two key thinkers, books, or topics. Study and critical assessment will attend to the larger historical context. Same as PHIL 231.

REL 232 Ancient Greek Sanctuaries credit: 3 Hours.
Same as ARTH 218, and CLCV 232. See CLCV 232.

REL 235 History of Religion in America credit: 3 Hours.
Examines the religious history of the lands that have become the United States and the people who have become known as Americans through texts written by and about people of all races and creeds. From the precontact era through the twentieth century, this course emphasizes the diversity of American religion, the discord caused by and present in American religion, and the many instances of dialogue that have been a part of America's religious history. Same as HIST 289.

REL 242 Holocaust Religious Response credit: 3 Hours.
The theoretical foundation for ideas of national and racial superiority which attended the holocaust and responses to this phenomenon by major Jewish and Christian thinkers, including Rubenstein, Buber, Fackenheim, Berkowits, Reuther, and Wiesel.

REL 251 Viking Mythology credit: 3 Hours.
Same as CWL 251, MDVL 251, and SCAN 251. See SCAN 251. This course satisfies the General Education Criteria for: Humanities - Hist Phil

REL 258 Muslims in America credit: 3 Hours.
Same as AAS 258 and LLS 258. See AAS 258. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

REL 260 Mystics and Saints in Islam credit: 3 Hours.
Examines mystical concepts and practices in Islam through the ages, through the lives and writings of important mystics and Sufi holy men and women, as well as the integration of mysticism and the Sufi Orders into Muslim society and Islamic orthodoxy. Same as SAME 260. No knowledge of Islam or foreign language is required. This course satisfies the General Education Criteria for: Humanities - Lit Arts

REL 269 Jewish History Since 1700 credit: 3 Hours.
Same as HIST 269. See HIST 269. This course satisfies the General Education Criteria for: Humanities - Hist Phil

REL 270 Religion, Ethics, Environment credit: 3 Hours.
Introduction to various religious and philosophical perspectives on environmental ethics. Asks whether the religious traditions can provide us with any resources that can help us to deal with contemporary environmental problems. Religious and philosophical perspectives on these topics will be central to the course: attitudes to individual animals, to other species, and in general to non-human nature; the place of human beings in nature; the relative importance of human development and environmental protection; relations between rich and poor; whether we might need to change our conception of what it is to live successfully; and the concepts of stewardship and sustainability. This course satisfies the General Education Criteria for: Humanities - Hist Phil

REL 283 Jewish Sacred Literature credit: 3 Hours.
Literary study of the major post-biblical sacred texts of Judaism; includes readings in translation from Mishnah, Tosefta, Talmudim, midrashim, piyyutim, and mystical treatises. Emphasizes nature, history, function, and development of literary patterns and forms and the relationships between form and content in these texts. Same as CWL 283, and ENGL 283.

REL 284 Modern Jewish Literature credit: 3 Hours.
Same as ENGL 284 and CWL 284. See ENGL 284. This course satisfies the General Education Criteria for: Humanities - Lit Arts
REL 286 Introduction to Hinduism credit: 3 Hours.
Elements of Hindu thought and practice; selected topics presented in historical order and in the context of Indian cultural history (including the present).
This course satisfies the General Education Criteria for:
- Humanities - Hist Phil
- Cultural Studies - Non-West

REL 287 Introduction to Buddhism credit: 3 Hours.
Thematic approach to the history of Buddhism from its origin in India to its spread throughout China and Japan; explores how the doctrinal and social development of Buddhism in East Asia is related to the process of cultural adaptation. Same as EALC 287.
This course satisfies the General Education Criteria for:
- Humanities - Hist Phil
- Cultural Studies - Non-West

REL 291 Hinduism in the United States credit: 3 Hours.
Introduction to the historical, religious, and socio-cultural aspects of Hinduism in the US. The role of Hinduism in the maintenance of the ethnic identity of Indians in the US will be examined in the context of the rituals, languages, temples, family, and other social organizations. The maintenance and/or shift of the features of traditional (Indian) Hinduism in the transplanted counterpart in the US will be examined. Same as AAS 291. Prerequisite: REL 104 or REL 286 or consent of instructor.

REL 308 Psychology of Religion and Spirituality credit: 3 Hours.
Same as PSYC 308. See PSYC 308.

REL 320 Lit Responses to the Holocaust credit: 3 Hours.
Same as CWL 320, ENGL 359, JS 320, and YDSS 320. See YDSS 320. This course satisfies the General Education Criteria for:
- Humanities - Lit Arts
- Cultural Studies - Western

REL 332 Interfaith Service and Theory credit: 3 Hours.
Students will work for a semester with a partner organization and study academic issues that pertain to interfaith studies and interfaith activities.

REL 335 Religion in Contemp America credit: 3 Hours.
Examines the religious dynamics of the twenty-first century United States. Tasks will be to map the religious landscape of contemporary America, to learn something of the history of the many traditions being practiced and lived in our communities, and then to study a series of salient issues involving people of faith; the emergence of new religions, expressions of religious intolerance, religion and politics, race and religion, and religious interpretations of economics and the market.

REL 340 Love & Sex in Hebrew Lit credit: 3 Hours.
Same as CWL 341, JS 341, and SAME 341. See CWL 341.

REL 341 Native People and Christianity credit: 3 Hours.
An interdisciplinary survey of the native religious experience, focusing on the native encounter with Christianity. Charts the cultural context for native religious history and explores native religious diversity in the contemporary period, particularly the relationship between tribal and Christian traditions in reservation and urban communities. Class discussions address the broader theoretical and practical questions raised by the intersections of religion, culture, and politics in a diverse and conflicted world, and are supplemented by audiovisual materials and guest speakers. Same as ANTH 341. Prerequisite: Sophomore standing or consent of instructor.

REL 342 Archaeology of Religion credit: 3 Hours.
Same as ANTH 340. See ANTH 340.

REL 343 Islamic Philosophy credit: 3 Hours.
Survey of major developments within Islamic philosophy from the early classical to the early modern period. Focuses on the ideas and figures that have shaped Islamic philosophy through the centuries, as well as the contexts in which those ideas were produced. Topics covered include the transmission of Greek philosophy into Arabic. Islamic Peripatetic philosophy, Illuminationism, Shi'ite philosophy, and philosophical Sufism, including the great synthesis of Mulla Sadra.

REL 344 Medieval Jewish Thought credit: 3 Hours.
Study of the distinctive religious ideas, movements, and figures of Medieval Judaism [500 CE-1700 CE]. Topics include theology, philosophy, Talmudic and Biblical exegesis, mysticism, Jewish-Christian polemics, and law. Emphasis will be placed not only on content and form, but also on historical and social context. Same as MDVL 344.

REL 345 Medieval Civilization credit: 3 Hours.
Same as HIST 345 and MDVL 345. See HIST 345.

REL 346 The Age of the Renaissance credit: 3 Hours.
Same as HIST 346 and MDVL 346. See HIST 346.

REL 347 Protestant & Catholic Refs credit: 3 Hours.
Same as HIST 347. See HIST 347.

REL 350 South Asian Goddesses credit: 3 Hours.
Introduction to the most well-known Hindu goddesses, at both the pan-Hindu and local level, and explores their mythical narratives, associated powers, iconography, and rituals of worship. Presents different methodological approaches scholars employ in the interpretation of goddess worship in South Asia and abroad. Materials are drawn from textual, historical sources as well as contemporary ethnographic research, and seek to include representative figures from different regions throughout India and the Himalayan region. Same as CWL 350 and SAME 350.

REL 390 Independent Study credit: 1 to 6 Hours.
Special topics not treated in regularly scheduled courses; designed primarily for upperclassmen. May be repeated. Prerequisite: Evidence of adequate preparation for such study; consent of staff member supervising the work.

REL 393 The World of Jewish Sepharad credit: 3 Hours.
Same as ANTH 393 and HIST 393. See ANTH 393.
This course satisfies the General Education Criteria for:
- Humanities - Hist Phil
- Cultural Studies - Western

REL 401 Gender and Hinduism credit: 3 or 4 Hours.
Exploration of the traditional identities, role and expectations of Hindu women and men, as well as popular Hindu beliefs and lived practices informed by understandings of gender, from the ancient period through the present day. Further, the course assesses the way in which these normative ideologies and gendered practices are being perpetuated and/or challenged in the modern world. Sources will include traditionally authoritative texts and treatises, myths and other historical narratives, contemporary ethnographies, and film. Same as SAME 410. 3 undergraduate hours. 4 graduate hours.

REL 403 Women in Muslim Societies credit: 3 or 4 Hours.
Examination of gender ideologies and social realities affecting the lives of women in various Muslim countries. Same as ANTH 403, GLBL 403, GWS 403, HIST 434, and SAME 403. 3 undergraduate hours. 4 graduate hours. Prerequisite: A course in Islam or the Middle East, or consent of instructor.
REL 408 Islam & Politics in Mid. East credit: 3 or 4 Hours.
Examines the role of Islam in contemporary politics, the contemporary resurgences of Islam, and the articulation of Islamic approaches to the new economic order, nationalism, and the changing role of women. Same as PS 408 and SAME 408. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or consent of instructor.

REL 409 Transnational Islam, Europe-US credit: 3 or 4 Hours.
Same as ANTH 402 and ASST 402. See ANTH 402.

REL 412 Readings in Sanskrit I credit: 3 or 4 Hours.
Same as SNSK 403. See SNSK 403.

REL 413 Readings in Sanskrit II credit: 3 or 4 Hours.
Same as SNSK 404. See SNSK 404.

REL 414 Advanced Biblical Hebrew credit: 3 or 4 Hours.
In-depth study of the grammar and syntax of selected texts from the Hebrew Bible. Texts to be studied will change from year to year. Selections will cover the full range of biblical genres and styles, including prophecy, law, historical narrative, psalms, and wisdom literature. Same as HEBR 414. 3 undergraduate hours. 4 graduate hours. May be repeated for a maximum of 6 undergraduate hours or 8 graduate hours in separate terms. Prerequisite: REL 205, or demonstrated proficiency at the 205 level.

REL 415 Intro Readings of the Talmud credit: 3 Hours.
The Talmud is one of the most important works of Jewish literature. For the last millennium, Talmud study has been a central part of Jewish religious and cultural practice. This course will explain the Talmud’s import and durability within Jewish culture while introducing students to the rigors of legal analysis that lie at the heart of most Talmudic passages. The course is ideal for those interested in religion, law, logic games and questions of textual interpretation. The course will study the Talmud entirely in English translation. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours.

REL 416 Readings in Rabbinc Midrash credit: 3 Hours.
Seminar on the foundational text of Judaism: the Midrashic collections (3rd c. - 8th C.E.). We will consider the distinctiveness of Midrashic form and content, and also reflect upon the central methodological issues and problems for the study of this classic corpus. 3 undergraduate hours. 3 graduate hours.

REL 420 Jewish Life-Writing credit: 3 or 4 Hours.
Same as CWL 421, HIST 436, SLAV 420, and YDSH 420. See YDSH 420.

REL 424 Philosophy of Religion credit: 3 or 4 Hours.
Same as PHIL 424. See PHIL 424.

REL 434 History of Jews in Diaspora credit: 3 or 4 Hours.
Same as HIST 433. See HIST 433.

REL 435 Revivalism and Evangelicalism credit: 3 or 4 Hours.
Examination of the history of revivalistic and evangelical Christianities in North America from the colonial period to the twenty-first century. A combination of primary texts and scholarly studies will focus on religious, social, and political legacies, and the current shape of evangelical Christianity in America. Same as HIST 486. 3 undergraduate hours. 4 graduate hours.

REL 436 Religion in America: 1900-1941 credit: 3 or 4 Hours.
An exploration of the religious lives and thoughts of Americans in the first four decades of the twentieth century and the many overlapping issues confronting American society and American religion during that time. Focuses on four themes: debates over the meaning of modernity, understandings of the relationship between religion and society, the gendering of faith, and the relationship between religion and American identity. 3 undergraduate hours. 4 graduate hours. Prerequisite: REL 235 or REL 236.

REL 437 Religion in American Cinema credit: 3 or 4 Hours.
By using films from the 1940s-2010s we will examine the changing religious dynamics of modern American society. We will also use the conceptual tools of religious studies to describe Americans’ changing relationships to cinema. 3 undergraduate hours. 4 graduate hours. Prerequisite: Course work in the religious history of the United States or in film studies.

REL 440 Early Christian Thought credit: 3 or 4 Hours.
Study of major developments in early Christian thought (first four centuries) through discussion of primary texts in translation. Same as MDTV 440. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: REL 121 or REL 202, or consent of instructor.

REL 442 History of Early Judaism credit: 3 Hours.
The history of Judaism from Ezra to the rise of Islam: Hellenism and Judaism, varieties of Judaism, Palestinian Judaism and its documents, Babylonian Judaism, the rabbis, and popular Jewish culture. Same as HIST 432 and JS 442. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit in one course in religion at the 200-, 300-, or 400-level, or consent of instructor.

REL 447 Modern Catholic Thought credit: 3 or 4 Hours.
Traces the history of Catholicism in its interaction with the modern world from the sixteenth century to the present, concentrating on the uneasy relationships that Catholicism has sustained with the modern world. 3 undergraduate hours. 4 graduate hours. Prerequisite: REL 127 or consent of instructor.

REL 458 Christians and Jews 1099-1789 credit: 3 or 4 Hours.
Examines the complex relations between Christians and Jews in Europe from the high Middle Ages through the Enlightenment. Among our topics are the religious and social roots of medieval persecutions of Jews; the history of Jewish banishments; construction of myths to foment hostilities; Renaissance humanism (especially the Christian absorption of Jewish scholarship); the impact of the Christian reform movements, both Protestant and Catholic, on the status of Jews; mercantilism and the re-admission of Jews; and the emergence of a discourse of religious tolerance in the Enlightenment. Same as HIST 458. 3 undergraduate hours. 4 graduate hours.

REL 461 Indigenous Traditions credit: 3 or 4 Hours.
Interdisciplinary seminar on indigenous religious traditions, focusing especially on the study of native North American religions. 3 undergraduate hours. 4 graduate hours.

REL 462 Ecological Criticism credit: 3 or 4 Hours.
The scientific, political, and economic policy debates about global environmental crisis have tended to ignore its religious, historical, and literary dimensions. This interdisciplinary seminar in the environmental humanities redresses that omission by focusing attention on the emerging fields of religion and ecology, environmental history, and literary ecoliteracy. Same as CWL 460 and ESE 462. 3 undergraduate hours. 4 graduate hours.
REL 463  Religion and Society  credit: 4 Hours.
   Same as ANTH 463. See ANTH 463.
REL 468  Religions of Africa  credit: 3 or 4 Hours.
   Same as AFST 468 and ANTH 468. See ANTH 468.
REL 472  Kierkegaard and the Self  credit: 3 or 4 Hours.
   Same as CWL 472, PHIL 472, and SCAN 472. See SCAN 472.
REL 478  19th C US Intel & Cult Hist  credit: 2 to 4 Hours.
   Same as HIST 478. See HIST 479.
REL 479  20th Century US Culture Wars  credit: 2 to 4 Hours.
   Same as HIST 481. See HIST 481.
REL 480  Islamic Law  credit: 3 or 4 Hours.
   Introduction to Islamic legal philosophy and the historical evolution of
   Islamic legal and jurisprudential system. Begins by studying the origins,
   nature, sources and interpretive methodologies of classical Islamic
   law, and the main institutions for upholding this law, the madhhab,
   or school of law, examining its development from the formative to
   the post-formative periods and highlighting important controversies
   generated along the way. Then looks at the early encounter of Islamic
   law with modernity. Followed by an exploration of several contemporary
   topics that have served as catalysts for new tensions and alternative
   approaches and interpretive theories. 3 undergraduate hours. 4 graduate
   hours. Prerequisite: Previous coursework on Islam or consent of
   instructor.
REL 481  Muslim Ethics in Global Age  credit: 3 or 4 Hours.
   Exploration of contemporary, often revisionist Muslim ideas on a broad
   range of ethical issues that face societies today, such as human rights,
   democracy, gender equality, just war, pluralism, and bioethics. Same
   as SAME 481. 3 undergraduate hours. 4 graduate hours. Prerequisite:
   Previous coursework on Islam or the Middle East.
REL 482  Muslim-Christian Interactions  credit: 3 or 4 Hours.
   Explores the complexity of Muslim-Christian interactions since early
   Islam, including theological and philosophical exchanges, debates,
   polemics, interfaith dialogue, perceptions of each other, Muslim
   minorities in the West, and Christian minorities in the Muslim world,
   and the relationship of religion to culture. 3 undergraduate hours. 4 graduate
   hours.
REL 483  Salvation in Islamic Thought  credit: 3 or 4 Hours.
   Introduction to salvation in Islamic thought, with emphasis on
   discussions of the fate of “Others” (i.e. non-Muslims). Begins with a study
   of the origins and sources of this discourse, followed by an examination
   of evolving orientations from the formative to the post-formative periods.
   Important controversies generated along the way, including exclusivist-
   inclusivist, universalist-anti-universalist, and Sufi-anti-Sufi debates, will
   be explored. This is followed by an assessment of the new approaches
   to salvation in modern Islamic thought, with particular emphasis on the
   contemporary pluralist-inclusivist debate. Finally, alternative approaches
   to the topic of salvation, including reincarnation, will be examined.
   3 undergraduate hours. 4 graduate hours. Prerequisite: Previous
   coursework on Islam or consent of instructor.
REL 484  Buddhist Meditation  credit: 3 Hours.
   Examines classical systems of Buddhist meditation and their relation
   to Buddhist psychology and world view. Same as EALC 484. 3
   undergraduate hours. 3 graduate hours. Prerequisite: REL 287 or consent
   of instructor.
REL 488  History of Chinese Buddhism  credit: 3 or 4 Hours.
   Same as EALC 488. See EALC 488.
REL 493  Honors Senior Thesis  credit: 3 Hours.
   Two-term research project. 3 undergraduate hours. No graduate credit.
   May be repeated in separate terms for a total of 6 undergraduate hours.
   Prerequisite: Senior majors in religion who are eligible for graduating with
   distinction from the program.
REL 494  Topics in Religious Thought  credit: 3 or 4 Hours.
   Various topics in religious thought. 3 undergraduate hours. 4 graduate
   hours. May be repeated as topics vary.
REL 495  Topics in Asian Religions  credit: 3 or 4 Hours.
   Topics in Hinduism, Buddhism, Taoism, and other Asian religious
   traditions. Same as EALC 495. 3 undergraduate hours. 4 graduate hours.
   May be repeated to a maximum of 6 undergraduate hours or 8 graduate
   hours as topics vary. Prerequisite: Sophomore standing or consent of
   instructor.
REL 496  Topics in History of Judaism  credit: 3 or 4 Hours.
   Examination of two or three of the most important practices, beliefs,
   icons, texts, myths, and spiritual encounters that have and continue to
   shape Judaism as a religion. Same as JS 496. 3 undergraduate hours.
   4 graduate hours. May be repeated to a maximum of 6 undergraduate
   hours or 8 graduate hours.
REL 498  Topics in Biblical Studies  credit: 3 or 4 Hours.
   Detailed interpretation of selected books of the Bible. 3 undergraduate
   hours. 4 graduate hours. May be repeated to a maximum of 6
   undergraduate hours or 8 graduate hours as topics vary.
REL 503  Renaissance of the Bible  credit: 4 Hours.
   Explores the cultural, intellectual, and, in several key instances, political
   circumstances of the Bible in the Renaissance. Topics include the impact
   of print technology, the biblical philology of Renaissance humanism,
   the function of biblical studies in the reform movements (including the
   Catholic Reformation), the Renaissance Bible and doctrine, translations
   of the Bible, the politics of the English-language Bible, and the artistic
   presentation of the Bible.
REL 504  Genesis in History  credit: 4 Hours.
   Survey of Jewish and Christian cultural reception of Genesis in the
   ancient and medieval worlds. Examines techniques of exegesis and
   strategies of interpretation in the ancient world, such as allegory,
   narrative expansion, and retelling. Engages with foundational studies of
   modern scholarship on biblical reception. While focusing on the initial
   chapters of Genesis, we will also explore the appropriation of Abraham
   traditions and the Joseph story. Same as MDVL 504.
REL 510  Graduate Intro to Religion  credit: 4 Hours.
   Introduction for first semester graduate students to selected methods
   and techniques for conducting research in the area of Religion. Students
   will receive general guidance on strategies for conducting bibliographic
   research and designing research projects. Includes study of some
   currently salient issues and areas of inquiry in a number of disciplines
   pertaining to the study of religion. The course will be supervised
   by one professor and will offer a series of presentations on several
   methodologies and historical issues by experts in various fields. 4
   graduate hours. No professional credit.
REL 511  Seminar in Study of Religion  credit: 4 Hours.
   Intensive study of select topics or issues in the study of religion. May be
   repeated in the same or separates terms as topics vary.
REL 514  Islamic Theology  credit: 4 Hours.
   Study of the language, arguments and schools of classical Islamic
   theology, mainly through direct study of English translations of
   theological texts from two different theological schools. Same as
   SAME 514.
REL 515 History of Jewish Theology credit: 4 Hours.
Study of Israelite and Jewish thought from the biblical to modern period. Particular attention will be paid to theological matters and to the historical, cultural and intellectual challenges that engendered a re-thinking and re-conceptualization of the Jewish faith.

REL 520 Hindu Pilgrimage, Power & Place credit: 4 Hours.
This course undertakes a critical examination of the nature and practices of Hindu pilgrimages, pilgrimage concepts and pilgrimage sites. We will examine central beliefs and practices of lived religion in the Hindu tradition and situate Hindu pilgrimage within the broader context of pilgrimage and related discussions of power and place. Same as SAME 520. 4 graduate hours. No professional credit.

REL 535 Historiography of Religion in America credit: 4 Hours.
Immerses students in major works of recent American religious history. Written from multiple disciplinary perspectives and wrestling with the knotty problems in which religion has been interwoven, these books will give the student a solid foundation in American religious history. Same as HIST 574. 4 graduate hours. No professional credit.

REL 562 Religious Diversity credit: 4 Hours.
Intensive study of philosophical and theological responses to the phenomenon of religious diversity. Prerequisite: Graduate standing in one of the relevant fields, or consent of instructor.

REL 564 Global Religion and Politics credit: 4 Hours.
Same as SAME 564 and SOC 564. See SOC 564.

REL 567 Mahayana Buddhism credit: 4 Hours.
An investigation of Buddhist core notions as conceived from the point of view of the three Major Mahayana traditions with an examination of the ways in which these Mahayana traditions are presented in modern and early modern scholarship. At stake is the fundamental hermeneutic issue of the ways in which the "moderns" look at pre-modern thought, that is, the questions of the historical situatedness of thought. Prerequisite: At least one previous course in Buddhism or consent of instructor.

REL 568 Popular Religion in East Asia credit: 4 Hours.
Study of the history of East Asian religions through primary and secondary sources primarily focusing on Buddhism and indigenous faiths. Students will gain an understanding of the social and historical character of popular religion through East Asia. Same as EALC 567. Prerequisites: Graduate Students majoring in East Asian religions must be prepared to read some primary sources written in the original language; graduate students in the other majors are not required to read in the original language.

REL 590 Independent Study credit: 2 to 6 Hours.
Special topics not treated in regularly scheduled courses; for graduates. 2 to 6 graduate hours. No professional credit. May be repeated. Prerequisite: Evidence of adequate preparation for such study and consent of staff member supervising the work.

REL 599 Thesis Research credit: 0 to 16 Hours.
Researching and writing a thesis in consultation with a faculty adviser. 0 to 16 graduate hours. No professional credit. Approved for S/U grading only. May be repeated. The M.A. program in Religion allows students to receive a maximum of 8 hours for the M.A.

Religious Studies (RLST) -- Changed to Religion (REL)
RMLG 435  Introduction to Romance Linguistics  credit: 3 or 4 Hours.  
Same as FR 462, ITAL 435, LING 462, PORT 435, and SPAN 435. See SPAN 435.

RMLG 559  Sem Romance Ling  credit: 4 Hours.  
Same as FR 559, ITAL 559, LING 559, PORT 559, and SPAN 557. See SPAN 557.

Rural Sociology (RSOC)
RSOC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/RSOC)

Courses
RSOC 110  Intro to Rural Society  credit: 3 Hours.  
Basic concepts for understanding and analyzing rural society; topics include changes in major rural institutions, impacts of technological change on rural people and communities, demographic patterns and trends, migration, rural minorities and subcultures, the city-countryside relationship, emerging controversies and conflicts in rural areas, and cross-cultural comparisons of rural life. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

RSOC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.  
May be repeated.

RSOC 270  Population Issues  credit: 3 Hours.  
Same as SOC 270. See SOC 270. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

RSOC 447  Environmental Sociology  credit: 3 or 4 Hours.  
Same as ENVS 447 and SOC 447. See SOC 447.

Russian (RUSS)
RUSS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/RUSS)

Courses
RUSS 101  First-Year Russian I  credit: 4 Hours.  
Oral-aural practice and elements of grammar, reading, and writing. For students who have no credit in Russian.

RUSS 102  First-Year Russian II  credit: 4 Hours.  

RUSS 115  Intro to Russian Culture  credit: 3 Hours.  
Introduction to the culture of Russia and the USSR. Course addresses two central themes. First, the very distinctiveness of Russian culture, and the functions of that notion within Russia and for outsiders; Second, Russia as a cultural space between East and West. We will explore Russian culture through the following, the language(s); foundational narratives of collective memory going back to the medieval times; the cultural impact of colonial subjugation both by and of peoples to the East, South, and West; Russian Orthodoxy’s connection with the political and cultural spheres; peak achievements in literature, music, architecture and visual arts. Same as REES 116. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

RUSS 191  Freshman Honors Tutorial  credit: 1 to 3 Hours.  
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars. May be repeated one time. Prerequisite: Consent of departmental honors advisor.

RUSS 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.  
May be repeated.

RUSS 201  Second-Year Russian I  credit: 4 Hours.  
Oral-aural practice, systematic functional grammar, reading, and writing. Prerequisite: RUSS 102 or equivalent.

RUSS 202  Second-Year Russian II  credit: 4 Hours.  
Systematic review of the structure of Russian covered in RUSS 101, RUSS 102, and RUSS 201 through class lectures, drills, and homework exercises. Prerequisite: RUSS 201.

RUSS 219  Russian Cinema Survey  credit: 3 Hours.  
Survey of Russian and Soviet film, from Eisenstein to the present. Weekly film screenings. No knowledge of Russian required.

RUSS 220  Golden Age of Russian Lit  credit: 3 Hours.  
Survey of Russian literature in the long 19th century; romanticism, realism, nationalism, orientalism, empire; writers may include Pushkin, Gogol, Lermontov, Pavlova, Turgenev, Dostoevsky, Tolstoy, Chekhov, and others; reading and discussion in English. Same as CWL 227. This course satisfies the General Education Criteria for: Humanities - Lit Arts

RUSS 225  Russian Lit and Revolution  credit: 3 Hours.  
Major works from 1900 to the present; futurism, modernism, Stalinism, post-modernism, and after; writers may include Mayakovsky, Babel, Olesha, Akhmatova, Bulgakov, Nabokov, Solzhenitsyn, Tolstaya, and others; readings and discussion in English. Same as CWL 249. This course satisfies the General Education Criteria for: Humanities - Lit Arts

RUSS 260  Medicine & Russian Literature  credit: 3 Hours.  
Examines cultural significance of medicine and the figure of the physician, and understandings of illness and health, primarily in literature of Russia and the USSR from the 1860s to present. Asks what larger issues are at stake in the literary representation of medical practice by physicians and non-physicians alike in the Russian and Soviet contexts; investigates what medicine and literature offer each other, and the bearing on this of the latter’s formal, aesthetic qualities. Considers how medical practice is conditioned by the broader culture, how medical discourse, knowingly or unknowingly, ‘borrows’ from, is conditioned by, or otherwise reciprocally involved with other greater or peripheral discursive spheres. Reads fiction by leading literary figures who were physicians (Chekhov, Bulgakov, Veresaev, and Aksyonov); fiction by "lay" authors about doctors and medical practice (such as Solzhenitsyn); memoirs by physicians (tales of training and practice, apologies, denunciations); memoirs by patients; ‘real’ and fictional case histories; theoretical and methodological readings. This course satisfies the General Education Criteria for: Humanities - Lit Arts

RUSS 261  Intro Russian-Jewish Culture  credit: 3 Hours.  
Introduction to the interaction of the intellectual, artistic, political, social, and religious life of the Jewish community in Russia through film, literature, art and historical record. Same as HIST 261. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Western
RUSS 290  Readings in Russian  credit: 1 to 4 Hours.
Individual topics or projects chosen in consultation with a Slavic
Department representative. May be repeated to a maximum of 8 hours.
Prerequisite: RUSS 202 or equivalent proficiency.

RUSS 301  Third Year Russian I  credit: 3 Hours.
Grammar review; training in writing Russian; translation from English and
free composition. Prerequisite: RUSS 202 or consent of instructor.

RUSS 302  Third Year Russian II  credit: 3 Hours.
Practice in intermediate-level speaking, listening, reading, and writing,
based upon advanced grammar and conversation topics and upon
readings from current fiction and non-fiction. Students are expected to
write essays and give oral reports based on in-class assignments and
outside interests. Prerequisite: RUSS 301 or consent of department.

RUSS 305  Business Russian  credit: 3 Hours.
Basic tools and skills for conducting business in Russian, including
introduction to Russian economy, banking, insurance, media, internet
technology, advertising, law and culture, practicum in writing the c.v
and business correspondence in Russian. Prerequisite: Successful
completion of RUSS 301 or consent of instructor.

RUSS 320  Russian Writers  credit: 3 Hours.
Focused study of the work of a single Russian writer, or the comparison
of that writer with another major author, in translation. No Russian
required. Same as CWL 321. May be repeated in separate terms to
a maximum of 6 hours, if topics vary. Prerequisite: At least one other
college literature course or consent of instructor.

RUSS 322  Dostoevsky  credit: 3 Hours.
Introduction to the major works of Fyodor Mikhailovich Dostoevsky. No
Russian required. Same as CWL 324 and ENGL 322. May be repeated
up to 6 credit hours in separate terms. Prerequisite: At least one other
college literature course or consent of instructor.

RUSS 323  Tolstoy  credit: 3 Hours.
Introduction to the major works of Lev Tolstoy. No Russian required.
Same as CWL 323 and ENGL 323. May be repeated up to 6 credit hours
in separate terms, if topics vary. Prerequisite: One other college literature
course or consent of instructor.

RUSS 325  Chekhov  credit: 3 Hours.
Introduction to the major works of playwright and author Anton Chekhov.
Same as CWL 325 and THEA 362. Prerequisite: At least one other
literature course or consent of instructor.

RUSS 335  Nabokov  credit: 3 Hours.
Nabokov’s Russian and American novels read in a comparative context.
All works in English, no knowledge of Russian is required. Same as
CWL 335. Prerequisite: At least one other college-level literature course or
consent of instructor.

RUSS 401  Fourth Year Russian I  credit: 3 Hours.
Practice in advanced speaking, listening, reading, and writing, based
upon reading selected from current fiction and non-fiction, and covering
a wide variety of styles: literary, conversational, scientific, etc. Course
taught in Russian. Students are expected to write essays and give oral
reports based on what they read in class and on their outside interests.
3 undergraduate hours. 3 graduate hours. Prerequisite: Three years of
college Russian or consent of instructor.

RUSS 402  Fourth Year Russian II  credit: 3 Hours.
Practice in advanced speaking, listening, reading, and writing, based
upon reading selected from current fiction and non-fiction, and covering
a wide variety of styles: literary, conversational, scientific, etc. Course
taught in Russian. Students are expected to write essays and give oral
reports based on what they read in class and on their outside interests.
3 undergraduate hours. 3 graduate hours. Prerequisite: RUSS 401 or
consent of instructor.

RUSS 418  18th Century Literature  credit: 3 or 4 Hours.
Reading of texts; historical and literary background of the period. 3
undergraduate hours. 4 graduate hours.

RUSS 424  Russian Modernism  credit: 3 or 4 Hours.
Representative works of the period 1880 to 1917, with emphasis on
Chekhov, Gorky, and Blok; readings for non-majors and class discussions
in English. Same as CWL 457. 3 undergraduate hours. 3 or 4 graduate
hours. Prerequisite: Junior standing or consent of instructor.

RUSS 438  Modern Russian Poetry  credit: 3 or 4 Hours.
Study of major Russian poets and their works from romanticism to the
present. Historical background, textual analysis and connections with
Western European poetry. 3 undergraduate hours. 3 or 4 graduate hours.
Prerequisite: Consent of instructor.

RUSS 444  Problems in Romanticism  credit: 3 or 4 Hours.
Study of major authors of the romantic period, and some lesser authors.
Historical background, textual analysis, and connections with Western
European romanticism. Same as CWL 444. 3 undergraduate hours. 3 or 4
graduate hours. Prerequisite: Consent of instructor.

RUSS 445  Problems in Realism  credit: 3 or 4 Hours.
Study of the major texts of nineteenth century Russian realism, including
works by Turgenev, Goncharov, Nekrasov, Dostoevsky, and Tolstoy.
Historical background, relevant intellectual currents, textual analysis, and
connections with Western European realist authors. Same as CWL 445.
3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Consent of
instructor.

RUSS 450  Russian Culture Studies  credit: 3 or 4 Hours.
Study of major authors and their works in the social, political, and intellectual
life of Russia from the 1840s to the present. Same as CWL 440. 3
undergraduate hours. 3 or 4 graduate hours. Prerequisite: Consent of
instructor.

RUSS 460  Russian and the Other  credit: 3 or 4 Hours.
Interdisciplinary and comparative topics including, but not limited to:
Russia and the West, Russia and the East, the Cold War, and post-Soviet
cultural studies. Same as CWL 466. 3 undergraduate hours. 4 graduate
hours. May be repeated to a maximum of 6 undergraduate hours or 8
graduate hours. Prerequisite: Russian course at the 200 or 300 level or
consent of instructor.

RUSS 465  Russian-Jewish Culture  credit: 3 or 4 Hours.
Study of Russian-Jewish cultural, social, and political life through
literature and film. No Russian required. 3 undergraduate hours.
4 graduate hours. Prerequisite: One literature course in the Slavic
department at the 200 or 300 level, or consent of instructor.

RUSS 466  Russian Women’s Writing  credit: 3 or 4 Hours.
Study of fiction and non-fiction writing by Russian women, including
discussion of historical context and feminist theory. 3 undergraduate
hours. 4 graduate hours. Prerequisite: One literature course in the Slavic
department at the 200 or 300 level, or consent of instructor.
RUSS 474  Russian Translation  credit: 3 or 4 Hours.
Theory and practice of translation in Russia from the eighteenth century to the present; "literal" versus "creative" translation; and practical work in translation into English of various Russian texts. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: RUSS 302 or equivalent.

RUSS 493  Honors Senior Thesis  credit: 2 Hours.
Intended primarily for candidates for honors in Russian but open to other seniors. 2 undergraduate hours. No graduate credit. May be repeated. Prerequisite: Senior standing.

RUSS 501  Russian for Grad Students I  credit: 4 Hours.
Provides training in academic Russian for graduate students in social sciences and humanities. Designed for advanced learners of Russian who are interested in developing more specialized language skills. The content of the course will be tailored to the needs of the specific group. May be repeated to a maximum of 8 hours. Prerequisite: RUSS 501 or consent of instructor.

RUSS 502  Russian for Grad Students II  credit: 4 Hours.
Continuation of Russian 501. Provides training in academic Russian for graduate students in social sciences and humanities. Designed for advanced learners of Russian who are interested in developing more specialized language skills. The content of the course will be tailored to the needs of the specific group. May be repeated to a maximum of 8 hours. Prerequisite: RUSS 501 or consent of instructor.

RUSS 511  Russian Literature 1800-1855  credit: 4 Hours.
Graduate-level study of major literary trends and developments in Russian literature from 1800-1855, from early romanticism to the emergence of a realist tradition, in criticism, drama, poetry, and prose. Prerequisite: Ability to read in Russian.

RUSS 512  Russian Literature 1855-1905  credit: 4 Hours.
Graduate-level survey of Russian literature of the second half of the nineteenth century, tracing the emergence, blossom, and decline of the great Russian realist novel, as well as the social and ideological debates of the 1850s and 1860s that were that form's most significant context. Explores the emergence and varied meanings of the term "realism" in Russian literature and criticism of the nineteenth century and will cover the rise of the short form in the 1880s and then, of Russian Decadence/Symbolism in the 1890s. Key developments in Russian drama will also be covered: Ostrovskii, Sukhovo-Kobylin, Chekhov and the Moscow Art Theater. Prerequisite: Ability to read in Russian.

RUSS 520  Russian Writers  credit: 4 Hours.
Study of a Russian author's works in the original Russian, historical and philosophical contexts, current critical approaches. May be repeated to a maximum of 8 hours.

RUSS 521  Gogol  credit: 4 Hours.
Study of Nikolai Gogol's works in the original Russian, historical contexts, and current critical approaches. 4 graduate hours. No professional credit.

RUSS 522  Dostoevsky  credit: 4 Hours.
Study of Dostoevsky's works in the original Russian, historical and philosophical contexts, current critical approaches. May be repeated to a maximum of 8 hours.

RUSS 523  Tolstoy  credit: 4 Hours.
Study of Tolstoy's works in the original Russian, of their historical and philosophical context, and of current critical approaches to Tolstoy's works. 4 graduate hours. No professional credit.

RUSS 524  Pushkin  credit: 4 Hours.
Study of Alexander Pushkin's works in the original Russian, of their historical context, and of current critical approaches to Pushkin's works. 4 graduate hours. No professional credit.

RUSS 535  Nabokov  credit: 4 Hours.
Study of Nabokov's Russian and American novels in the original Russian and English, read in a comparative and theoretical context. Same as CWL 535. Prerequisite: Knowledge of Russian or consent of instructor.

Russian, East European and Eurasian Studies (REES)

REES Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/REES)

Courses

REES 115  Intro to Polish Culture  credit: 3 Hours.
Same as POL 115. See POL 115. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

REES 116  Intro to Russian Culture  credit: 3 Hours.
Same as RUSS 115. See RUSS 115. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

REES 200  Intro to Russia and Eurasia  credit: 3 Hours.
Survey of the societies and states formerly constituted as the Soviet Union. Interdisciplinary and team-taught. Combines lectures, discussions, and films covering the history, political science, economics, sociology, and culture of the area. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

REES 201  Introduction to Eastern Europe  credit: 3 Hours.
Interdisciplinary survey of Eastern Europe focusing mostly on the 20th century to the present, exploring issues of nationalism, socialism, post socialism and EU accession. Focuses on Central Europe and the Balkans, but also references the Baltic States, Belarus, Ukraine, and Russia. Students will learn about the region using perspectives and methodology from historical, economic, political, sociological and anthropological texts. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

REES 296  Special Topics  credit: 3 Hours.
Topics in the interdisciplinary study of Russia, Eastern Europe, and Eurasia. Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours.

REES 325  Social Media and Global Change  credit: 3 Hours.
Same as EPS 325, AFST 325, ASST 325, EURO 325, ASST 325, LAST 325, and SAME 325. See EPS 325.

REES 390  Individual Study or Research  credit: 3 Hours.
Directed reading or research on selected topics. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor supervising the work.

REES 477  Post-Communist Fiction  credit: 3 or 4 Hours.
Same as SLAV 477 and CWL 477. See SLAV 477.

REES 493  Honors Senior Thesis  credit: 3 Hours.
Undergraduate honors thesis. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: REES major with senior standing and 3.5 grade-point average; consent of instructor supervising the work and the REEEC director.
REES 495  Senior Seminar  credit: 3 Hours.
Interdisciplinary seminar normally taken in the senior year. Involving faculty in a number of disciplines, this course approaches understanding Russia, Eastern Europe, and Eurasia and the methodologies of its study through questions of identities, cultural values, and change. Taught in conjunction with REES 550. 3 undergraduate hours. No graduate credit. Prerequisite: Declared major in Russian, East European, and Eurasian Studies or consent of instructor; junior or senior standing.

REES 496  Topics in REEE Studies  credit: 3 or 4 Hours.
Topics in the interdisciplinary study of Russia, Eastern Europe, and Eurasia. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 9 undergraduate hours or 12 graduate hours.

REES 550  Seminar in REEE Studies  credit: 4 Hours.
Interdisciplinary seminar involving faculty in a number of disciplines. The course examines Russia, Eastern Europe, and Eurasia and the methodologies of its study through questions of identities, cultural values, and change.

REES 590  Individual Study or Research  credit: 1 to 8 Hours.
Directed reading or research on selected topics for graduate students. May be repeated in the same or separate terms to a maximum of 8 graduate hours. Prerequisite: Consent of instructor supervising the work.

REES 596  Topics in REEE Studies  credit: 4 Hours.
Topics in the interdisciplinary study of Russia, Eastern Europe, and Eurasia. May be repeated to a maximum of 12 graduate hours.

REES 599  Thesis Research  credit: 0 to 8 Hours.
Designed to meet the thesis requirement for the M.A. in Russian, East European, and Eurasian Studies; taken under supervision of a faculty member in the Russian, East European, and Eurasian Center. Approved for S/U grading only. May be repeated to a maximum of 8 hours. Prerequisite: Enrollment in the M.A. program in REEES and consent of the Director of the Russian, East European, and Eurasian Center.

S. Asian & Middle Eastern (SAME)

SAME Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SAME)

Courses

SAME 150  Lang&Culture of Arab World  credit: 3 Hours.
Same as ARAB 150. See ARAB 150. This course satisfies the General Education Criteria for: Cultural Studies - Non-West

SAME 152  The New Middle East  credit: 3 Hours.
Same as PS 152 and SOC 152. See PS 152. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

SAME 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Special topics in Middle Eastern or South Asian studies; content is variable. May be repeated in the same or separate terms if topics vary.

SAME 208  Cultures & Literatures of South Asia  credit: 3 Hours.
Same as ASST 208, CWL 208 and REL 208. See REL 208. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Non-West

SAME 211  War & Peace in Israeli Lit  credit: 3 Hours.
Same as CWL 211 and JS 211. See CWL 211.

SAME 213  Intro to Islam - ACP  credit: 4 Hours.
Same as REL 213. See REL 213. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

SAME 214  Introduction to Islam  credit: 3 Hours.
Same as REL 214. See REL 214. This course satisfies the General Education Criteria for: Humanities - Hist Phil Cultural Studies - Non-West

SAME 223  The Qur'an (Koran)  credit: 3 Hours.
Same as CWL 223, REL 223. See REL 223. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Non-West

SAME 260  Mystics and Saints in Islam  credit: 3 Hours.
Same as REL 260. See REL 260. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Non-West

SAME 325  Social Media and Global Change  credit: 3 Hours.
Same as EPS 325, AFST 325, ASST 325, EURO 325, INFO 325, LAST 325, and REL 325. See EPS 325.

SAME 341  Love & Sex in Hebrew Lit  credit: 3 Hours.
Same as CWL 341, JS 341 and REL 340. See CWL 341.

SAME 350  South Asian Goddesses  credit: 3 Hours.
Same as CWL 350 and REL 350. See REL 350.

SAME 403  Women in Muslim Societies  credit: 3 or 4 Hours.
Same as ANTH 403, GLBL 403, GWS 403, HIST 434, and REL 403. See REL 403.

SAME 408  Islam & Politics in Mid. East  credit: 3 or 4 Hours.
Same as PS 408 and REL 408. See REL 408.

SAME 410  Gender and Hinduism  credit: 3 or 4 Hours.
Same as REL 401. See REL 401.

SAME 454  Topics in Israeli Lit &Culture  credit: 3 or 4 Hours.
Same as CWL 454 and JS 454. See CWL 454.

SAME 481  Muslim Ethics in Global Age  credit: 3 or 4 Hours.
Same as REL 481. See REL 481.

SAME 490  Special Topics  credit: 3 or 4 Hours.
Study of selected topics in Middle Eastern studies; content is variable. Check Class Schedule for specific topics each semester. 3 undergraduate hours. 4 graduate hour. May be repeated in separate terms as topics vary to a maximum of 6 undergraduate hours or 12 graduate hours.

SAME 514  Islamic Theology  credit: 4 Hours.
Same as REL 514. See REL 514.

SAME 520  Hindu Pilgrimage, Power & Place  credit: 4 Hours.
Same as REL 520. See REL 520.

SAME 564  Global Religion and Politics  credit: 4 Hours.
Same as REL 564 and SOC 564. See SOC 564.

SAME 590  Independent Study  credit: 0 to 4 Hours.
Directed reading or research on selected topics for graduate students. 0 to 4 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in separate terms up to 8 hours. Prerequisite: Graduate standing and consent of instructor supervising the work.
Sanskrit (SNSK)

SNSK Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SNSK)

Courses

SCAN 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

SNSK 201 Elementary Sanskrit I credit: 4 Hours.
Introduction to Sanskrit, treating in full the grammar of the language as preparation for reading.

SNSK 202 Elementary Sanskrit II credit: 4 Hours.
Continuation of SNSK 201. Prerequisite: SNSK 201.

SNSK 403 Readings in Sanskrit I credit: 3 or 4 Hours.
Introduction to the reading of Sanskrit texts. Same as REL 412. 3 undergraduate hours. 4 graduate hours. Prerequisite: SNSK 202.

SNSK 404 Readings in Sanskrit II credit: 3 or 4 Hours.
Readings in Sanskrit texts. Topics may vary according to students' needs; they may include religious texts, classical literature, or a general survey of texts. Same as REL 413. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Prerequisite: SNSK 403 and consent of instructor.

Scandinavian (SCAN)

SCAN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SCAN)

Courses

SCAN 101 Beginning Scandinavian I credit: 4 Hours.
First course in the Scandinavian language sequence (usually Swedish). Instruction is by immersion, emphasis is on basic skills: reading, writing, speaking, and aural comprehension.

SCAN 102 Beginning Scandinavian II credit: 4 Hours.
Second course in the Scandinavian language sequence (usually Swedish). Instruction is by immersion, emphasis is on further developing basic skills: reading, writing, speaking, and aural comprehension. Prerequisite: SCAN 101 or consent of instructor.

SCAN 103 Intermediate Scandinavian I credit: 4 Hours.
Third course in the Scandinavian language sequence (usually Swedish). Emphasis is on conversational skills, discussion techniques and aural comprehension through the study of authentic texts, television and films, with emphasis on learning about contemporary issues in Sweden, including its relationship to the European Union. Instruction is by immersion. Prerequisite: SCAN 102 or consent of instructor.

SCAN 104 Intermediate Scandinavian II credit: 4 Hours.
Fourth course in the Scandinavian language sequence (usually Swedish). Emphasis is on close reading, translation and analysis of authentic texts, such as novels and drama in the target language. Instruction is by immersion. Prerequisite: SCAN 103 or consent of instructor.

SCAN 110 Intensive Intermediate Scan credit: 4 Hours.
Intensive course in a Scandinavian language (usually Swedish) that emphasizes development of reading and writing skills. Focus of class discussions and activities is the study of authentic texts, audio and/or visual media. Instruction is by immersion. May be repeated in the same or separate term up to 8 hours. Prerequisite: SCAN 102 or equivalent or consent of instructor.

SCAN 199 Undergraduate Open Seminar credit: 1 to 5 Hours. May be repeated.

SCAN 215 Madness, Myth, and Murder credit: 3 Hours.
Focuses on the achievements of major Scandinavian writers of prose fiction, from 1850 to today. Explores topics of madness, myth, and murder in literature. All reading, discussion, and writing in English. Same as CWL 215.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

SCAN 225 Vikings to Volvos: Scandinavia credit: 3 Hours.
An introduction to the history, literature, and culture of Scandinavia and the Nordic region, from the Viking age until the modern era (700s-present). Includes discussion of Denmark, Norway, Sweden, Finland, Iceland, Faroe Islands, Svalbard, and Greenland. All readings in English. Same as HIST 254.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

SCAN 240 Arctic Narratives credit: 3 Hours.
Study of the Arctic, its peoples and cultures, as imagined in literature, art, history, media and film. This course makes cross-cultural comparisons with accounts by indigenous people and Scandinavian, American, and European visitors to or settlers in to the Arctic. This course includes emphasis on environmental, colonial, and social aspects from theoretical and historical perspectives. Same as CWL 282, EURO 240. See SCAN 240.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

SCAN 251 Viking Mythology credit: 3 Hours.
Studies pre-Christian beliefs of the Germanic peoples as reflected primarily in medieval Icelandic prose and poetry (in translation). Same as CWL 251, MDVL 251, and REL 251.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

SCAN 252 Viking Sagas in Translation credit: 3 Hours.
Studies Old Norse-Icelandic literature: kings' sagas, family sagas, mythical-heroic sagas, and romances. Texts and lectures in English. Same as CWL 252 and MDVL 252.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Western

SCAN 305 Old Norse - Icelandic I credit: 3 Hours.
Provides a solid proficiency in reading texts in Old Norse, the language of the Viking sagas and mythology. Prerequisite: Any SCAN course or knowledge of one other foreign language.

SCAN 306 Old Norse - Icelandic II credit: 3 Hours.
Assumes general competence in reading Old Norse. Readings and exploration of a wide assortment of essential text in the original language. Prerequisite: SCAN 305 or consent of instructor.
SCAN 376  Children and Youth Literature  credit: 3 Hours.
Explores the understanding of childhood and youth in Scandinavia, with comparative focus on the US and the UK through children's literature and classic accounts of childhood in fiction, film, and related media. Will investigate how childhood is construed in books self-described as children's literature as well as in adult-audience fiction and memoirs; and how representations of childhood correlate with evolving ideas about family formation, child-rearing, the welfare state, and education in twentieth- and twenty-first century Scandinavia. This is put in comparative context with British and/or US children's literature. Same as CWL 376, EURO 376, and GWS 376. Credit is not given for both SCAN 376 and SCAN 576.

SCAN 386  Arctic Environment & Society  credit: 6 Hours.
Same as ESE 386 and GLBL 386. See GLBL 386.

SCAN 463  Modern Scandinavian Drama  credit: 3 or 4 Hours.
Thematic and conceptual study of the Scandinavian dramatic tradition, from the late-nineteenth century classics of Henrik Ibsen and August Strindberg, to mid-century intermediality in works by Ingmar Bergman, and to hyperrealism, postmodernism, and digital performativity by contemporary playwrights. Interpretive contexts include text-image studies, performativity, socio-cultural aspects of the Nordic region, theatre and production history, and gender and sexuality studies. Same as CWL 463 and THEA 483. 3 undergraduate hours. 4 graduate hours. Prerequisite: One college-level literature or theatre course, or consent of instructor.

SCAN 470  Imagining the Welfare State  credit: 3 or 4 Hours.
Investigate conceptions of the Nordic and West-European welfare state from the early twentieth-century to today from critical interpretive, historical, and cultural studies perspectives. Building on close analysis of influential works in literature, film, arts, and architecture from primarily Denmark, Sweden, and Norway, the course will address historical factors and characteristics of the socio-cultural imaginary surrounding the rise and, some argue, subsequent dismantling of the Nordic welfare state. Same as CWL 470 and EURO 470. 3 undergraduate hours. 4 graduate hours. Prerequisite: At least one course in literature, film, or the arts; or consent of the instructor.

SCAN 472  Kierkegaard and the Self  credit: 3 or 4 Hours.
Soren Kierkegaard is an early author who wrestled with the concept of the individual self and championed subjective experience as a counterbalance to objective rationalism. Students in this seminar-style course will gain extensive familiarity with Kierkegaard's major works, as well as how they relate to two currents in 19th century society, existentialism and pietism. These works will be evaluated within their particular Nordic literary context, through critical analysis of related novels, plays and films by Andersen, Ibsen, Bremer, Strindberg, Lagerlof, Blixen, and Bergman (readings in English translation). Same as CWL 472, PHIL 472, and REL 472. 3 undergraduate hours. 4 graduate hours.

SCAN 490  Green Screen: Film and Nature  credit: 3 or 4 Hours.
Provides a thorough examination of documentary and feature film in relation to the natural environment, sustainability studies, ecocriticism, and landscape representation especially in the Scandinavian film tradition. Incorporates theory, film culture and production analysis, and thematic interpretation. Films by Victor Sjostrom, Ingmar Bergman, Mai Zetterling, Lars von Trier, Susanne Bier, Jan Troell, and others. Same as EURO 489 and MACS 490. 3 undergraduate hours. 4 graduate hours.

SCAN 492  Scandinavian Cinema  credit: 3 or 4 Hours.
Covers major directors, traditions, genres, themes, and production and distribution contexts of Scandinavian cinema and media industries. Addressing early cinema, fiction feature, documentary, shorts, experimental, and new and emergent artistic forms, the course will provide students with an in depth understanding of the rich culture of Scandinavian cinema since its inception. Same as MACS 492. 3 undergraduate hours. 4 graduate hours.

SCAN 493  Honors Senior Thesis  credit: 2 to 4 Hours.
2 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing; consent of instructor.

SCAN 494  Topics in Scan Languages  credit: 1 to 4 Hours.
Advanced Scandinavian languages instruction. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in separate terms to a maximum of 9 undergraduate or 9 graduate hours if topics vary. Prerequisite: SCAN 104 or equivalent as approved by instructor.

SCAN 505  Old Norse-Icelandic I  credit: 4 Hours.
Grammar and selected readings. Same as MDVL 505. Offered in alternate years.

SCAN 506  Old Norse-Icelandic II  credit: 4 Hours.
Readings; selections from the Elder Edda and the sagas. Same as MDVL 506. Offered in alternate years. Prerequisite: SCAN 505.

SCAN 576  Children and Youth Literature  credit: 4 Hours.
Explores the understanding and youth in Scandinavia, with comparative focus on the US and the UK, through children's literature and classic accounts of childhood in fiction, film and related media. Will investigate how childhood is construed in books self-described as children's literature as well as in adult-audience fiction and memoirs; and how representations of childhood correlate with evolving ideas about family formation, child-rearing, the welfare state, and education in twentieth- and twenty-first century Scandinavia. This is put in comparative context with British and/or US children's literature and society. Same as CWL 586, EURO 576, and GWS 576. 4 graduate hours. No professional credit.

SCAN 593  Research in Special Topics  credit: 1 to 8 Hours.
Research seminar or research topic. Content varies in consultation with instructor. May be repeated in separate terms to a maximum of 8 hours.

Second Language Studies (SLS)

SLS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SLS)

Courses

SLS 460  Principles of Language Testing  credit: 3 or 4 Hours.
Same as EIL 460, EPSY 487, FR 460, GER 460, ITAL 460, PORT 460, and SPAN 460. See EIL 460.

SLS 580  Classroom Lang Acquisition  credit: 4 Hours.
Same as EIL 580, FR 580, GER 580, ITAL 580, PORT 580, and SPAN 580. See SPAN 580.

Information listed in this catalog is current as of 04/2018
Slavic (SLAV)

SLAV Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SLAV)

Courses

SLAV 117  Russ & E Euro Science Fiction  credit: 3 Hours.
Survey of the science fiction writing of Russia and the countries of Eastern Europe since 1750, with particular emphasis on the post-World War II period. The role of the Science Fiction tradition in the respective national cultures. The influence on Russian and East European Science Fiction of Anglo-American Science Fiction. All readings are in English. Same as CWL 117.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

SLAV 120  Russian & E Euro Folktales  credit: 3 Hours.
Introduction to Russian and East European folktales, focusing on folk beliefs, fairy tales, and folk narratives in Slavic languages from a comparative perspective, with an emphasis on methods of analysis and the role of gender.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

SLAV 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

SLAV 277  Slavic Literature Survey  credit: 3 Hours.
Examines masterpieces of Czech, Polish, and Yugoslav literatures from medieval times to the present in English translation. Representative works are by Capek, Kundera, Mickiewicz, Milosz, Andric and others. Attention given to the European context and national traditions. Same as CWL 277.
Prerequisite: One course in Slavic literature.

SLAV 399  Advanced Undergraduate Open Seminar  credit: 1 to 5 Hours.
Topics will vary. May be repeated, if topics vary.

SLAV 417  11th-17thC Russ Lit & Lang  credit: 3 or 4 Hours.
Historical grammar, origin, and development of the East Slavic/Russian literary language, survey of literary genres of Old Russian Literature. 3 undergraduate hours. 4 graduate hours. Credit is not given for both SLAV 417 and RUSS 517.
Prerequisite: Graduate standing; for undergraduates, completion of or placement beyond RUSS 301-RUSS 302; or, consent of instructor.

SLAV 418  Language&Minorities in Europe  credit: 3 or 4 Hours.
Same as FR 418, GER 418, ITAL 418, LING 418, PS 418, and SPAN 418. See FR 418.

SLAV 419  Russian & East European Film  credit: 3 or 4 Hours.
Study and analysis of major film makers, genres, trends, and theories, including the 1920's Soviet avant garde and the Polish and Czech "New Wave" since 1953; lectures, discussions, screenings, term paper. No reading knowledge of Russian required, except for majors in Slavic Languages and Literatures. Same as MACS 419. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: RUSS 219; or a college level course REES or in CINE; or consent of instructor.

SLAV 420  Jewish Life-Writing  credit: 3 or 4 Hours.
Same as CWL 421, HIST 436, REL 420, and YDSH 420. See YDSH 420.

SLAV 430  History of Translation  credit: 3 or 4 Hours.
Study of the historical development of translation ideas and practices in Europe and in particular cases across major global regions. Reading and analysis of key texts in the development of translation theory and case studies of practices and roles played by translation in different periods and geographical regions. Same as CLCV 430, CWL 430, ENGL 486, GER 405, SPAN 436, and TRST 431.
3 undergraduate hours. 4 graduate hours.

SLAV 452  Slavic Cultural Studies  credit: 3 or 4 Hours.
Selected topics in the literatures of Russia and Eastern Europe. Topics covered will range from in-depth studies of specific authors, time periods, and thematic discussions of specific genre and literary traditions. Readings in English unless specified. Same as CWL 453.
3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours in same term; or 9 undergraduate hours or 12 graduate hours in separate terms.
Prerequisite: Two years of literature, preferably Russian or East European; or consent of instructor.

SLAV 477  Post-Communist Fiction  credit: 3 or 4 Hours.
Survey of the central and east European novel in the postcommunist period. Explores how fiction has responded to and creatively figured the period of the so-called "transition" to capitalism and the continuities and discontinuities in literary traditions in these societies, as well as the relevance of theories of postmodernism and postmodern literary analysis to these literatures. Same as CWL 477 and REES 477.
3 undergraduate hours. 4 graduate hours.
Prerequisite: Two courses in Slavic literature including one at the 300-level or consent of the instructor.

SLAV 505  Old Church Slavonic  credit: 4 Hours.
Analysis of grammar and reading of texts. Prerequisite: Knowledge of a Slavic language.

SLAV 525  Problems in Slavic Literature  credit: 4 Hours.
Selected subjects in Russian and Slavic prose, poetry, drama, and literary criticism. Topics vary. May be repeated to a maximum of 12 hours.

SLAV 556  Methods in Slavic Grad Study  credit: 4 Hours.
Comparative, interdisciplinary methods and theoretical issues crucial to studies in Slavic literature, history, and culture. Theoretical bookshelf followed by specific case studies from Slavic. Same as CWL 576. May be repeated to a maximum of 8 hours as topics vary.

SLAV 577  Slavic Languages Pedagogy Seminar  credit: 2 Hours.
Seminar for graduate students who are currently teaching (or preparing to teach) languages in the Department of Slavic Languages and Literatures. The seminar will help participants develop expertise in language pedagogy by discussing both theoretical and practical aspects of teaching and learning and by adopting a hands-on approach to communicative language teaching through micro-teaching, classroom presentations, discussion, self-reflection, and peer-reviewing.
2 graduate hours. No professional credit. May be repeated to a maximum of 4 graduate hours if topics vary.
Prerequisite: Enrollment restricted to Department of Slavic Languages and Literatures Graduate Students.

SLAV 591  Individual Topics  credit: 1 to 8 Hours.
May be repeated. Prerequisite: Graduate standing with a major or minor in Russian; consent of department.
SLAV 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Social Work (SOCW)

SOCW Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SOCW)

Courses

SOCW 101  SOCW Orientation Seminar  credit: 2 Hours.
Informational orientation seminar for Social Work majors to enhance their understanding of college life and social work as a profession.

SOCW 199  Undergraduate Open Seminar  credit: 1 to 4 Hours.
Approved for letter and S/U grading. May be repeated.

SOCW 200  Introduction to Social Work  credit: 3 Hours.
Broad survey of the field of social work; introduction to social services, social welfare organizations, major social problems and target population groups, and the methods used in working with individuals, groups, and communities; includes the range of personnel and skills in social work agencies, and the means of education and training for social work professionals.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOCW 225  Intro Stat for Social Work  credit: 3 Hours.
Introduction of basic concepts in statistics with emphasis on the application of statistical methods in social work research. Topics include: descriptive statistics, probability theory and distributions, point and interval estimation, hypothesis testing, central tendency, variability, independence, contrasts, correlation and regression, non-parametrics, concepts of levels of measurements, and statistical vs. practical significance. Priority will be given to Social Work majors. Credit is not given for SOCW 225 if credit for a college level introductory statistics course has already been earned.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

SOCW 240  Death & Dying  credit: 3 Hours.
This course will focus on various aspects of death and dying. Content will examine different types of death, impact of death throughout the lifespan, cultural beliefs and practices regarding death and dying, grief, healing after loss, legal and ethical issues related to death, and the role of social workers at the end of life. Students will be encouraged to examine their own thoughts, values, feeling, and beliefs about death and dying.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOCW 297  Asian Families in America  credit: 3 Hours.
Offers a comparative analysis of Asian families as they cope and adapt to American society. Examines: 1) how families from four major Asian-American groups (Chinese, Indian, Japanese and Korean) function in American society; 2) how these families compare to families in their country of origin; and 3) how these families are similar to or different from the ‘typical American’ family. Includes visits to Asian cultural institutions and with Asian families. Same as AAS 297 and HDFS 221.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

SOCW 298  Social Work Experiential Learning Fees  credit: 0 Hours.
This is a shell course to assess fees to support the cost of providing student learning experiences in social work practice settings. Additional fees may apply. See Class Schedule. Approved for S/U grading only. Prerequisite: The SOCW Admissions and Records Officer will manually add this course to student schedules.

SOCW 299  Study Abroad  credit: 0 to 18 Hours.
Lectures, seminars, and practical work in an approved study-abroad program in Social Work appropriate to the student’s course of study. Approved for letter and S/U grading.

SOCW 300  Diversity: Identities & Issues  credit: 3 Hours.
This introductory course explores multiple dimensions of diversity in a pluralistic and increasingly globalized society. Using a social work strengths perspective as well as historical, constructivist, and critical conceptual frameworks; the course examines issues of identity, culture, privilege stigma, prejudice, and discrimination. The social construction and implications of race, class, gender, sexual orientation, and other dimensions of difference is examined at individual, interpersonal, and systems levels. Students are expected to use the course material to explore their personal values, biases, family backgrounds, culture, and formative experiences in order to deepen their self-awareness and develop interpersonal skills in bridging differences. Finally, students apply learning from the course to identify characteristics of effective social work and other health and human service provision among people culturally different themselves; and to identify opportunities for change contributing to prejudice reduction and cross-cultural acceptance at home, work and in society.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

SOCW 310  UG Research Assistance  credit: 0 to 3 Hours.
Assist departmental faculty in on-going research. Topics and nature of assistance vary. Capstone paper required. Approved for Letter and S/U grading. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head. Majors only.

SOCW 315  Social Work Services for Older Adults  credit: 3 Hours.
Focus on the aging process, special needs of older adults, and the role of social work in addressing these needs. All levels of social work intervention are considered, direct practice with older persons and their families, service delivery systems in local communities, and state and national policies. Special attention is given to the needs of caregivers, person-centered care, diverse vulnerable populations and resources for older adults to age in place.

SOCW 321  Social Entre & Social Change  credit: 3 Hours.
Intended for undergraduates who have an interest in creating programs and products that have social values for communities. Features social entrepreneurship as an approach to social development and will consider its application and related change strategies to a wide array of social problems. Social entrepreneurship has emerged as a change approach that features the application of entrepreneurial practices to social ventures. Social entrepreneurship is similar to business entrepreneurship in its emphasis on selected program development and management principles and processes, but social entrepreneurs have the primary goal of creating social value in communities rather than personal or shareholder wealth. The initial part of the class will emphasize instructing students in broad concepts and principles related to entrepreneurship, while the latter portion of the course will feature students working on teams to design social projects.
SOCW 325  International Development with Grassroots Organizations  credit: 3 Hours.
This course engages students to think critically about international aid and development by cultivating an awareness of moral and ethical dilemmas that often go unconsidered by young professionals. It intends to help students develop greater cultural awareness and humility by recognizing differences in equity and global social, economic, and political structures. The course is a second eight-week offering and uses a blended learning approach with asynchronous online content combined with in-person classroom educational activities. Students apply the knowledge learned through the course by working directly with an international grassroots social organization during a 4-8 week immersion experience abroad. Course is an 8 week pre-departure training is required. Students complete a service learning placement in summer with an international grassroots organization.

SOCW 330  International Perspectives  credit: 3 to 6 Hours.
This course provides cross-cultural learning experiences within the context of international community-based service learning. Students will explore human service delivery through direct involvement with international social service institutions. This cultural immersion course is a collaborative partnership between the University of Illinois School of Social Work and selected international universities. Countries visited, varies by semester. May be repeated in separate terms up to 12 undergraduate hours if topics vary.

SOCW 335  Cities and Immigrants  credit: 3 Hours.  
Same as UP 335. See UP 335.

SOCW 350  Health Promotion Practicum  credit: 3 Hours.  
Same as CHLH 340. See CHLH 340.

SOCW 360  Social Work and the Military  credit: 3 Hours.  
This course provides an overview of military social work practice including: military culture, issues and needs of soldiers and their families, ethical considerations, and the role of social workers. Prerequisite: For majors only.

SOCW 380  Current Topics in Social Work  credit: 3 to 6 Hours.  
Presents and analyzes special topics related to current social work practice, policy and research. Topics vary; see Class Schedule for current offering. May be repeated in the same or separate terms.

SOCW 400  Generalist SW Practice Methods  credit: 4 Hours.  
Foundation methods course that is a prerequisite for all advanced methods courses. Overview of generalist social work practice and intervention with individuals, groups, organizations and communities; introduction to core concepts, value base and ethical principles of the profession. Emphasis is given to the bio-ecological framework, person-in-environment, strengths perspective, and system theory. Skills in developing beginning professional relationships are addressed via a skills lab component. Students begin the process of professional self-awareness to begin to identify how the personal values and beliefs they hold impact upon their interactions. 4 undergraduate hours. 4 graduate hours. Prerequisite: Admission to MSW program.

SOCW 401  Practice I  credit: 4 Hours.  
Overview of generalist social work practice with individuals, families, groups, organizations, and communities. Designed to introduce core concepts, values, and ethical principles of the profession as well as to provide basic skills, and knowledge related to generalist social work practice with a broad array of client systems. Emphasis is give to the biological-psycho-social-spiritual framework, person-in-environment, strengths perspective, and system theory. Skills in developing beginning professional relationships, which are characterized by mutuality, collaboration, empowerment, and client self-determination within the problem-solving process are addressed. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 200.

SOCW 402  Practice II  credit: 3 Hours.  
Provides students with culturally responsive, micro-level skills development for working with and on behalf of individuals, families, and groups. Builds on the basic helping skills learned in SOCW 401 and offers further practice on interviewing skills, more emphasis on ethical decision-making, assessment, and intervention, evaluation applied to individuals, families, and groups. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 403  Practice III  credit: 3 Hours.  
Provides knowledge and skills about the theory and practice of planned change in communities and organizations using a generalist model of social work practice. Builds on the foundation knowledge and skills gained in SOCW 401 with emphasis on assessment, planning, intervention, and evaluation skills for macro-level practice. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 410  Social Welfare Pol and Svcs  credit: 3 or 4 Hours.  
Examination of social welfare within a historical context, addressing the economic, political, social and ideological influences that have shaped the social welfare system and programs. Critical study of the income maintenance system in the United States as a response to the problems of inequality of opportunity and income, poverty, and income security; consideration of alternative approaches with discussion of the social worker’s role in the system. 3 undergraduate hours. 4 graduate hours.

SOCW 412  Hispanics in the U.S.  credit: 3 or 4 Hours.  
Hispanics constitute a growing population in the United States. The size and heterogeneity of Hispanics raises complex issues in crafting public policy and in designing and delivering social services. This course offers an extensive portrait of Hispanics in the United States. Students will explore questions and demographic characteristics, language and religious practices, education, criminal justice, neighborhood and economic restructuring, immigration, social service systems, and community action in the context of creating an effective public policy agenda. Same as LLS 412. 3 or 4 undergraduate hours. 3 or 4 graduate hours.

SOCW 416  Child Welfare Issues & Trends  credit: 3 or 4 Hours.  
This course examines theoretical and programmatic aspects for child welfare practice. Emphasis is placed on the roles and functions of child welfare workers, including engagement, assessment, intervention and permanency planning. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOCW major.
SOCW 417  Dementia Care for Older Adults  credit: 3 or 4 Hours.  
This course will equip students with a body of knowledge to supervise, participate in, and facilitate care for persons with dementia throughout the lifespan. Upon completion of the course, students will be eligible for certification as approved dementia trained practitioners. The course will introduce and develop social work practice skills on all levels and choices of dementia care interventions and assessments. Special attention is given to practice skills for working with vulnerable populations and their caregivers through service learning site opportunities and assignments. The course uses an integrated health and person-center care approach with special attention to multi-cultural backgrounds and new family lifestyles related to dementia care. 3 undergraduate hours. 4 graduate hours. Prerequisite: Prior completion of SOCW 315 or other Introduction to Aging course is strongly recommended. BSW majors and MSW students only.

SOCW 418  Independent Study  credit: 1 to 4 Hours.  
Independent study of a topic of special interest in the field of social work. 1 to 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

SOCW 420  Subst Use in Social Context  credit: 3 Hours.  
Introduces students to the problem of substance abuse and its impact on society. Examines the physiological, psychological, social, and cultural aspects of substance abuse. At the individual and familial levels, the course examines the causes, development, prevention, and treatment of substance abuse. At the societal level, the course examines public policy efforts to regular and control substance use from both historical and contemporary perspectives. Implications for social and economic justice are also examined. 3 undergraduate hours. No graduate credit.

SOCW 427  Social Work Research Methods  credit: 3 or 4 Hours.  
Basic principles of social science research and importance for social work practice: overview of research principles including the stages of a research project, design of research; quantitative and qualitative methodologies, design of questionnaires, methods of data collection and preparation of reports. Introduction to various research designs such as the survey, program evaluation, single subject design, quasi-experiments, and experimental design. Enrollment preference given to students in the MSW program. 3 undergraduate hours. 4 graduate hours.

SOCW 436  Intl SW & Development  credit: 3 or 4 Hours.  
This online course introduces students to policy and practice issues associated with international social work. It emphasizes ethical dilemmas, with the goal of sensitizing students to the importance of culturally sensitive practice for marginalized populations in global contexts. Weekly online discussion sessions use the Blackboard Online Platform. Students must have high speed internet connection and headset with microphone for course interaction. 3 undergraduate hours. 4 graduate hours.

SOCW 451  HBSE I: Human Development  credit: 3 or 4 Hours.  
Examination of the major theories that inform social work’s understanding of human behavior in a variety of social contexts. A biocultural systems framework, together with a developmental approach in understanding the ways in which individuals, families, groups, organizations, institutions, and communities interact, is presented. Issues of gender, race, ethnicity, socioeconomic status, disability and sexual orientation are introduced so students can gain understanding of how these components affect and influence development across the lifespan. Enrollment preference given to students in the MSW program. 3 undergraduate hours. 4 graduate hours.

SOCW 455  Social Work with Women  credit: 3 or 4 Hours.  
Focuses on women and now cultural belief systems related to gender are instantiated through the differential treatment of females and males in our education, mental health, social welfare and health care systems; and the consequences of such practices through the lifespan. Includes consideration of policies and practices that support women emphasizing issues of special concern to women of color, lesbians, older women, impoverished women and disabled women. Same as GWS 454. 3 undergraduate hours. 4 graduate hours.

SOCW 457  Health Planning  credit: 3 Hours.  
Same as CHLH 457. See CHLH 457.

SOCW 461  Professional Practice Seminar I  credit: 4 Hours.  
The goal of this course is to begin the process of integrating all the foundation knowledge of generalist social work that students have learned and begin applying it to real life situations. Students will complete a portfolio and a service learning experience that will help them being to make the connection between the core competencies, theories and applications to real life experiences. During this course students will begin the process of being matched with the agency where they will serve their internship during the last semester of their senior year. 4 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 470  Field Practicum & Professional Seminar II  credit: 15 Hours.  
This course is a supervised field practice experience and seminar where students apply knowledge and skills in social work engagement, assessment, planning and interventions to individuals, groups, families, organizations, and communities. Students are expected to promote sustainable social change through planned problem solving and empowerment to enhance the well-being of others. The practicum consists of 32 hours/week for 16 weeks. 15 undergraduate hours. No graduate credit. May be repeated; instructor approval required. Prerequisite: SOCW 461. SOCW majors only.

SOCW 473  Immigration, Health & Society  credit: 3 or 4 Hours.  
Same as CHLH 473, LLS 473, and SOC 473. See LLS 473.

SOCW 475  Undergraduate Research Abroad  credit: 1 to 4 Hours.  
Students assist in research under faculty supervision at a location outside of the United States. Topics and type of assistance vary. 1 to 4 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work (who will have examined the proposed research plan); and approval of department. Not available to freshman.

SOCW 480  UG Research Project  credit: 0 to 3 Hours.  
Conduct research study under the supervision of a departmental faculty member. Topics and nature of assistance vary. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head. Majors only. Not available to freshman and sophomores.

SOCW 500  SW Practice with Indiv & Fam  credit: 4 Hours.  
Systematically and critically examines the theory, procedures, and techniques of selected practice models within four main approaches to social work: cognitive-behavioral, systemic (family and ecological systems; crisis intervention), task-centered, and radical-structural (structural; feminist). Uses selected criteria to analyze and assess those models, examines outcome research, and identifies current practice issues. Prerequisite: SOCW 400.
SOCW 501 SW Practice with Groups  credit: 4 Hours.
Social work practice theory in social group work through comparative study of various practice approaches and research about those approaches, including the use of group work method in contemporary social work practice, practice principles, and the use of group process as applied in the student's area of specialization. Looks at group work for children, adolescents, and adults considering developmental and environmental issues; also includes investigation of practice strategies and models of group therapy and task group leadership across diverse populations. Prerequisite: SOCW 400.

SOCW 502 Brief Motivational Interventions for Substance Use  credit: 4 Hours.
This course prepares social workers to deliver brief interventions that build motivation for change among individuals that use substances. Students participate in hands-on skill development activities for two empirically supported treatments, Screening Brief Intervention and Referral to Treatment (SBIRT) and Motivational Interviewing. Students are expected to reach beginning competency in delivering these two clinical models. 4 graduate hours. No professional credit. Prerequisite: SOCW 400. MSW: Social Work - UIUC.

SOCW 503 Trauma Informed Social Work with Children and Adolescents  credit: 4 Hours.
This course uses a case study and inquiry based approach to foster student learning of the core concepts of trauma (theory and foundational knowledge) and evidence-based practice interventions effective in treating children, youth, and families that experience trauma. Cases discussed include children, youth, and families exposed to traumatic events (i.e. abuse, neglect, domestic violence, community violence and natural disasters). Strength-based practice interventions that build on existing child and family strengths that enhance growth and resiliency after trauma are studied. Prerequisite: SOCW 400.

SOCW 504 SUD Treatment in SW  credit: 4 Hours.
Introduces selected counseling approaches for substance use disorders. Begins with an overview of the causes of substance use disorders, assessment, diagnosis, and treatment planning. Focuses on treatment theories and techniques applied to counseling substance abusers. Selected theories include 12 Step approaches, cognitive and behavioral theories, family systems theory, harm reduction, and motivational interviewing. Special attention is devoted to apply substance abuse treatment models with diverse populations. Prerequisite: SOCW 400.

SOCW 505 Behav and Cogn Methods for SW  credit: 4 Hours.
Students are introduced to brief behavioral and cognitive methods for treating a wide range of human problems, crises, and mental disorders. Content includes: (1) conceptualizing and assessing client problems; (2) identifying appropriate treatment goals; (3) developing comprehensive and differential treatment plans; (4) conducting brief interventions; and (5) evaluating client outcomes using research, consultation, and supervision. Prerequisite: SOCW 400.

SOCW 506 SW Practice with Child/Adol  credit: 4 Hours.
Examination and critical evaluation of selected methods/approaches of intervention; research on their effectiveness and application to specific problems of children and adolescents that come to the attention of social workers and other helping professionals; attention given to remediation and prevention. The course provides opportunities for students to develop skills through participation in a service learning project. Prerequisite: SOCW 400.

SOCW 507 School Social Work Practice  credit: 4 Hours.
Examination of the design and delivery of school social work interventions with special emphasis given to students with physical/mental disabilities and vulnerable populations. Course content provides a foundation for the development of a comprehensive and in-depth understanding of an ecological systems approach to social work practice based upon a foundation of professional values and ethics. Prerequisite: SOCW 400.

SOCW 508 Family Therapy Seminar  credit: 4 Hours.
Advanced seminar providing in-depth exposure to the principles, values, ethics, issues and practice of family therapy in social work. Focuses on family therapy process, the practitioner role, issues in assessment, intervention and evaluation; how discrimination and oppression impact intervention strategies; skills that advance social and economic justice; presentation of cases; use of supervision and consultation, and family therapy with diverse populations. Combines lecture/discussion with taped observations of noted family therapists and participation in a family therapy practicum. Prerequisite: SOCW 400.

SOCW 509 Adv Clin Assess & Interviewing  credit: 4 Hours.
Advanced practice class designed to enhance students' understanding of clinical assessment and interviewing methods. Includes methods for therapeutically intervening with clients who are highly distressed, angry or agitated, resistant or involuntarily mandated for treatment, experiencing severe symptoms, or who have unique and complex problems. Clinical interviewing skills taught in this class will build upon knowledge and skills acquired in previous direct practice classes. Prerequisite: SOCW 400 and SOCW 552.

SOCW 513 Delivery of Health Care  credit: 4 Hours.
Delivery of health care in the United States is examined from a multidisciplinary perspective including social, cultural, political, economic, ethical and legal issues. Health care services are described in relation to various definitions of health, health status and access to care. Current problems and issues in health care including government responsibility and source of authority, policy development and analysis, proposals for reforms, and financing and cost containment are discussed and analyzed. Prerequisite: Admission to MSW program or consent of instructor.

SOCW 514 Mental Health Pol and Svcs  credit: 4 Hours.
Examination of comprehensive community mental health services as they evolve from definitions of the problems and changes in federal and state social policy; the concept of normalization and its criteria for program evaluation; and changing roles of mental health professionals, paraprofessionals, and consumers in policy making and service delivery. Presents the history of mental health policy and services in the U.S.; current policies and activities of the mental health delivery system are critically analyzed. Prerequisite: SOCW 410.

SOCW 515 Integrated Health Care Policy and Services  credit: 4 Hours.
Integrated Health Care Policy and Services is examined from a multidisciplinary perspective including social, cultural, political, economic, ethical and legal issues. Integrated health care services are described in relation to various definitions of health and mental health conditions and access to care. Current problems and issues in integrated health care including government responsibility and source of authority, policy development and analysis, proposals for reforms, and financing and cost containment are discussed and analyzed. 4 graduate hours. No professional credit. Prerequisite: Admission to MSW program or consent of instructor. Restricted to those in the MSW and iMSW program.
SOCW 516  Child, Youth and Family Svcs  credit: 4 Hours.
Examines a range of direct service and public policy issues that social
workers encounter when working with vulnerable children, adolescents,
and families. Focuses particular attention on the families involved
with child protection. Addresses the following questions: What factors
help explain the etiology of violence and neglect in the family home?
Once vulnerable families are identified and become involved with social
service agencies, what interventions are most effective with regard to
decreasing risks and strengthening protective factors? How can social
service systems best prepare vulnerable adolescent for the transition to
adulthood? Prerequisite: SOCW 410.

SOCW 519  Public School Policy/Services  credit: 4 Hours.
Presents content on children with physical and mental disabilities,
educational policies related to vulnerable populations, and federal and
state legislation, with particular emphasis given to the Individuals with
Disabilities Act (IDEA). The following topics are highlighted: eligibility
requirements, general characteristics of the disabling conditions,
education as a continuum from early childhood to adulthood, school
finance, and current educational issues. Content is presented pertaining
to meeting the needs of exceptional children, students with other
special needs, and their families in public schools and the community.
Prerequisite: SOCW 410.

SOCW 520  Social Welfare Planning  credit: 4 Hours.
Introduces students to the theory and practice of social welfare planning.
The course is designed to help students apply concepts and methods
to their specific social work fields of interest. Content includes a review
of policy analysis, needs assessment, establishing goals and objectives,
program design, budgeting, management information systems, and
program evaluation. Prerequisite: Admission to MSW program or consent
of instructor.

SOCW 521  Leadership and Social Change  credit: 4 Hours.
Introduces MSW students to a broad range of strategies for creating
social change. Several overarching concepts that are useful in
undertaking a wide range of social change efforts are introduced. These
concepts are applied to differnt change strategies. This includes
attention to the role of leadership in social change, as the quality of
leadership is critical to the success of most social change efforts. The
importance of policy or social entrepreneurs in creating social change
will also be examined. These entrepreneurs play critical roles by both
identifying and implementing new ideas and by diffusing them on a wider
scale after initial experimentation. Finally, social workers often tend
to be uninformed about sound business practices as they engage in
social change efforts, yet knowledge of basic business concepts can be
critical to the success or failure of a social venture. Therefore, the course
addresses issues such as opportunity recognition and risk assessment,
sustainability and scalability of projects, and attention to both fiscal
management and outcome accountability. Prerequisite: SOCW 400 or by
consent of instructor for non Social Work majors.

SOCW 522  SW Practice with Communities  credit: 4 Hours.
Examines principles and methods that characterize identifiable
approaches used in community organization practice at neighborhood,
community, state, and other levels. This course is an in-depth study
of how citizens can organize. Questions discussed include: What
institutions aid communities in their organizing and self-improvement
efforts? What circumstances encourage the erosion of civil society, civic
involvement, and community institutions? What role should the social
worker and the human service or social service agency play in organizing
communities? Prerequisite: SOCW 400.

SOCW 525  Supervision/Staff Development  credit: 4 Hours.
Course focuses on the acquisition of the essential knowledge and
skills needed to work with people to achieve desired client outcomes.
Includes management and organizational theories, and research and
theory regarding the practice of supervision. Addresses understanding
of the agency context and purposes, interpersonal insights and skills,
the importance of procedural and technical expertise, communication
skills, mastery of the functions of management and leadership ability.
Examines supervisory process in terms of interpersonal sensitivity and
interaction skills including influence techniques. Prerequisite: Admission
to MSW program or consent of instructor.

SOCW 526  Managing Human Service Orgs  credit: 4 Hours.
Focus on the design, administration and management of social programs
from a social work perspective. Content includes: principles and
process of administration and management, history of social welfare
administration and how this relates to the design of current programs,
review of administration Organizational and leadership theories,
policy formulation, agency structure, staff organization, budgeting and
evaluation of management practice. Prerequisite: SOCW 400 or by
consent of instructor for non Social Work majors.

SOCW 531  Field Practicum and Integrative Seminar I  credit: 8 to 12
Hours.
This course is comprised of a field practicum and integrative seminar.
The field practicum is educationally directed and supervised by an
approved field instructor. The seminar component assists students with
the integration of knowledge, skills, values and attitudes of social work
practice acquired in the classroom with the hands-on practice experience
in the field practicum setting. Learning experiences emphasize the
application of knowledge and practice in the areas of ethical and
professional behavior, diversity and difference, human rights and social,
economic and environmental justice, research informed practice, policy
practice, and engagement, assessment, intervention and evaluation with
individuals, families, groups, organizations and communities. 8 to 12
graduate hours. No professional credit. May be repeated in separate
terms.

SOCW 532  Practice Evaluation  credit: 4 Hours.
Examines program evaluation and quality management in the social work
setting. Focuses on evaluation of social work practice within service
delivery organizations. Students learn to define practice problems;
operationalize goals and objectives; develop hypotheses; describe and
analyze interventions; critique organizational practices; utilize outcome
evaluation measurements in relation to policy and practices, and review
and summarize literature. Students are expected to describe, analyze,
and evaluate core elements of an agency’s delivery system. Prerequisite:
SOCW 531; concurrent registration in SOCW 569.

SOCW 533  Field Practicum III  credit: 4 to 6 Hours.
This course is for students completing a part-time field practicum and
is the final semester of the practicum experience. Learning is directed
at the development and demonstration of advanced competency skills.
The field practicum is educationally directed and supervised by an
approved field instructor. The advanced learning experiences emphasize
application of knowledge and practice in the areas of ethical and
professional behavior, diversity and difference, human rights and social,
economic and environmental justice, research informed practice, policy
practice, and engagement, assessment, intervention and evaluation
with individuals, families, groups, organizations and communities. 4 to
6 graduate hours. No professional credit. May be repeated in separate
terms. Prerequisite: Successful completion of SOCW 532. Restricted to
Master of Social Work students.

Information listed in this catalog is current as of 04/2018
SOCW 535  Local Policy & Immigration  credit: 4 Hours.
Same as LA 535 and UP 535. See UP 535.

SOCW 541  Clinical Research Seminar  credit: 4 Hours.
Develops skills for assessing effectiveness of social work interventions using research methods. The course assumes students have had prior courses in research methods and statistical analysis. Building on these courses, this course will focus on the use of research methods in examining important aspects of social work interventions. Students will also develop skills necessary to evaluate social work research practice and practice evidence, as well as skills in grant writing and data analysis. Prerequisite: SOCW 427 or equivalent.

SOCW 542  Program Evaluation  credit: 4 Hours.
An advanced research course that develops skills for evaluating social service programs. The course assumes students have had prior courses in research methods and statistical analysis. This course provides an understanding of theoretical concepts, techniques, and research findings for evaluating a specific program, its implementation, and its effectiveness. It systematically analyzes program evaluation models and critically examines application of these models in the context of social work practice and social welfare policy. Prerequisite: SOCW 427 and a college level statistics course.

SOCW 552  HBSE II: Mental Disorders  credit: 4 Hours.
Interrelationship of biological, emotional, learning and social aspects of mental disorders, and implications for the patient/client, family, and community. Focus on diagnostic assessment and biopsychosocial treatment methods including psychosocial treatment methods, medications, and social work interventions. Students also learn to recognize the potential for bias that can result when assessments are applied across cultural, ethnic, racial, socioeconomic, gender and other groups. Prerequisite: SOCW 451.

SOCW 553  SW Practice in Healthcare Settings  credit: 4 Hours.
Examines the impact of illness and disability on individuals, their families, and the larger community. The physical, psychological, sociological, educational, vocational. And financial aspects of the most common health conditions are discussed. Emphasis is placed on conceptualizing an effective model of social work practice in medical and rehabilitative settings. Prerequisite: Admission to MSW program or consent of instructor.

SOCW 554  Social Ent in Diverse Society  credit: 4 Hours.
Examines issues raised by race, ethnicity, and class in the context of a diverse American society so that students may critically analyze the complexity these bring to the creation and implementation of public policy, service delivery, as well as governance and politics. Emphasizes both the processes of critical analysis and principles of social entrepreneurship as important vehicles to bring about sustainable change. Effective social policies and interventions in a diverse society are characterized by a demonstrable reduction of social tensions at the community level as well as increased access to social goods such as adequate housing, safe communities, efficient transportation, affordable health care, quality education, and other public goods and services. Same as HDFS 541 and LLS 554. 4 graduate hours. No professional credit. Prerequisite: SOCW 451 or consent of instructor for non Social Work majors.

SOCW 561  Special Studies in Soc Work I  credit: 2 to 8 Hours.
Independent or group study in areas of special interest; application of social work principles to special problems or settings. May be repeated in the same or subsequent terms as topics vary. Prerequisite: Consent of instructor.

SOCW 562  Special Studies in Soc Work II  credit: 2 to 8 Hours.
Independent or group study in areas of special interest; application of social work principles to special problems or settings. Prerequisite: Consent of instructor.

SOCW 566  Field Instruction I  credit: 8 Hours.
Field Instruction I is the first term of a two-term consecutive (minimum 31-week) field placement. The field practicum is educationally directed and supervised by an approved agency-based field instructor and provides an opportunity to integrate classroom theories, concepts and principles into practice experiences for the development of social work practice skills. Approved for S/U grading only. Prerequisite: Consent of instructor.

SOCW 569  Field Instruction II  credit: 8 Hours.
Field Instruction II is the second term of a two-term consecutive (minimum 31-week) field placement. Field Instruction II provides a supervised in-depth practice experience in a specialization area of child welfare, community mental health, health care, or school social work. The goal of this practicum is to prepare students for self-directed professional social work practice. Students continue to apply theories and concepts from course work to develop advanced level skills in direct practice with clients and client systems and/or policy, planning and administration. Approved for S/U grading only. Prerequisite: SOCW 568.

SOCW 570  Childhood Obesity I  credit: 3 Hours.
Same as CHLH 530, FSHN 530, HDFS 551, KIN 530, NUTR 530. See NUTR 530.

SOCW 571  Childhood Obesity II  credit: 4 Hours.
Same as CHLH 531, FSHN 531, HDFS 552, KIN 531, NUTR 531. See NUTR 531.

SOCW 575  Social Work Teaching Seminar  credit: 4 Hours.
Doctoral seminar on social work education and the pedagogy of college teaching. Topics include history of social work education, competencies for social work education, course development, principles of active learning, use of diverse instructional methods for teaching and assessing learning, and the scholarship of teaching and learning. The course has a required practicum component where students receive structured mentoring in some aspect of teaching in a social work class.

SOCW 576  Teaching Practicum  credit: 2 Hours.
This course is designed to provide doctoral students with supervised, hands-on teaching training and experience with a faculty member after they complete the required Social Work Teaching Seminar. The primary objective of the teaching practicum is to strengthen the students’ teaching ability and experiences for their entry into the job market. The purpose is for students to be involved in as many aspects of the teaching process as possible (e.g. syllabus development, class preparation, classroom time, office hours, assignment review/grading, meetings with faculty supervisor and any other relevant activities). Approved for S/U grading only. Prerequisite: SOCW 575.

SOCW 579  Social Work Practice Theories  credit: 4 Hours.
Presents theories for social work interventions with individuals, families, groups, and communities and organizations; critically analyzes different theoretical frameworks for such interventions; and examines the conceptual links between theory, process, outcome, and evaluations. This course is intended for students in the Ph.D. program in Social Work.
SOCW 580  Advanced Child Welfare  credit: 4 Hours.
Examines laws, scientific concepts, ethical dilemmas, and new practice
directions with respect to protecting children, preserving families,
regulating foster care, achieving family permanency, and assisting foster
youth in transitioning to independence. Review of legislative, court, and
administrative frameworks for promoting these outcomes at the city,
state, and federal levels. The course analyzes and critiques historical
and contemporary social science, public policy, community organization,
and legal advocacy perspectives on child protection and child welfare.
Contemporary topics and issues are discussed and debated. Prerequisite:
SOCW 516 or consent of instructor.

SOCW 581  Gender Relations & Intl Dev  credit: 4 Hours.
Same as GWS 512 and WGGP 581. See WGGP 581.

SOCW 584  Policy Practice and Advocacy  credit: 4 Hours.
Examines approaches for analyzing social policy development,
implementation and advocacy in the United States; and development
of skills to become effective policy practitioners. Involves ability to
formulate viable policy options as well as skills in advocating for
adoption of desired policies. Content includes knowledge about the
political processes associated with policy development, the technologies
needed to develop policies, communication skills need for policy
advocacy, and knowledge in a specialized area. Course builds on policy
material presented in SOCW 410. Prerequisite: SOCW 410 or consent of
MSW Program Director.

SOCW 585  National Social Welfare Policy  credit: 4 Hours.
This seminar focuses on social policy development, implementation,
evaluation, and research. The class will analyze theories of governmental
policy intervention, both from substantive and procedural standpoints.
Because the social policy arena is heavily politicized, political factors
affecting policy development and implementation will be stressed. In
addition, policy implementation discussions will attend both to program
administration and intergovernmental relations issues. The growing
importance of globalization in social policy development also will receive
attention, as will selected issues in the evaluation of social policy
interventions. 4 graduate hours. No professional hours.

SOCW 589  Social Work and the Law  credit: 4 Hours.
Legal procedures and issues of special relevance to social work practice;
includes legal provisions related to poverty, family development and
crises, racial and ethnic minorities, institutionalized persons, crime and
delinquency, legal authority of social agencies, and regulation of the
profession. Prerequisite: Admission to the MSW program or consent of
instructor.

SOCW 593  Applied Qualitative Research  credit: 4 Hours.
Provides a doctoral level overview of contemporary qualitative research
with an emphasis on applications. Through readings, discussions,
and assignments students will be introduced to: the history and
philosophical underpinnings of qualitative research; research designs,
methods and analysis used in qualitative research; criteria for rigor in
qualitative research; the application of qualitative research to addressing
contemporary social issues; technical and professional issues including
the use of computer programs in qualitative research and grant writing.
Students will begin to elaborate their own research interests through
critical reading, discussion and various applied and written assignments.
Prerequisite: Admission to Ph.D. program.

SOCW 594  Individual Research  credit: 4 Hours.
Course is designed to enhance the research skills of Doctoral students in
social work through research collaboration with a faculty member. May
be repeated to a maximum of 8 hours. Prerequisite: SOCW 593.

SOCW 595  Quantitative Research Designs  credit: 4 Hours.
Provides a doctoral level overview of quantitative designs and conceptual
issues in social work research. It presents a framework for structuring
the statistical analysis and systematic evaluation of the efficacy and
effectiveness of social interventions in achieving desired outcomes for
diverse populations. Although the purpose is not to emphasize statistical
training, the course will reinforce the learning of basic concepts,
mathematical foundations, and assumptions underlying advanced
applications of statistical description and causal inference. Prerequisite:
Admission to the Ph.D. program.

SOCW 599  Dissertation Research  credit: 0 to 16 Hours.
Research and writing of doctoral thesis in social work. Approved for S/U
grading only. May be repeated.

Sociology (SOC)
SOC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/SOC)

Courses
SOC 100  Introduction to Sociology  credit: 4 Hours.
Examination of how societies grow and change; reciprocal effects of
economic, political, community, familial, and scientific institutions on
each other and on individual life changes; and social conflict, problems of
bureaucratic growth and planned and unplanned social change.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOC 101  Sociology of Gender  credit: 3 Hours.
An exploration of current questions of gender and their applications to
students today. The course will focus primarily on the United States
emphasizing individual, interactional, and institutional aspects of
the social world. Topics for study include sociological research on
femininities, masculinities, gendered bodies, socialization, work, family,
politics, sport, and sexualities.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOC 108  Religion & Society in West I  credit: 3 Hours.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

SOC 109  Religion & Society in West II  credit: 3 Hours.
Same as ANTH 109, PHIL 109, and REL 109. See REL 109.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

SOC 122  Africa in World Perspective  credit: 3 Hours.
Examination of Africa in the context of the world-economy, with particular
attention placed upon enduring cultural and material relationships with
Europe and North America.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

SOC 130  Intro Gender & Women's Studies  credit: 3 Hours.
Same as GWS 100 and HDFS 140. See GWS 100.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
SOC 152  The New Middle East  credit: 3 Hours.
Same as PS 152 and SAME 152. See PS 152.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

SOC 160  Global Ineq and Social Change  credit: 3 Hours.
Introduces sociological concepts of poverty, inequality, and social
change within a global context. Themes explored include basic food
security, poverty and hunger; population and resource distribution;
foreign aid and development institutions; and social policies and
movements for change. Course approach is historical and transnational,
and typically includes case studies from Africa, Asia, Latin America, and
the United States.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

SOC 161  Introduction to Poverty  credit: 3 Hours.
Introduction to sociological research about the views, experiences,
causes, and consequences of poverty in both advanced and developing
countries. One objective is to set the facts straight about who
experiences poverty and makes use of the welfare system in the United
States. A second purpose is to make sense of the intractable and much
more extreme forms of poverty observed across the global South.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

SOC 162  Intro to Intl Health Policy  credit: 3 Hours.
Introduces students to international health policy. Students will learn
about data sources, basic analytical techniques, and theoretical
frameworks for understanding international health policy. From a
sociological perspective, students will explore why health issues are
essential components to discussion of globalization, immigration, and
migration. Students also will learn how health policy and foreign policy
decisions in the developed world influence health policy and health care
delivery in the developing world.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

SOC 163  Social Problems  credit: 3 Hours.
A study of social problems in the United States necessarily entails
a discussion of global issues. To that end, this course will examine
many contemporary social issues such as crime, war and terrorism, the
environment, inequality, poverty, discrimination, the economic recession,
and others, through a global framework. Many of the topics we will cover
could motivate an entire semester’s study in their own right; indeed,
some scholars devote their entire careers to but one of these topics.
However, this breadth allows us to think broadly about the issues that
are identified as social problems and the ways in which individuals and
groups attempt to resolve those problems; both processes are revealing
about the time and society in which we live. One of the main objectives
of this class is to learn about how sociologists examine social problems
through analysis and research. Alongside that process, you will improve
your critical thinking skills and become a better/more informed consumer
of information.

SOC 179  Social Organization  credit: 3 Hours.
Beginning with an examination of various examples of organizing, from
street gangs to industrial corporations and modern universities, this
course will discuss common patterns in organizational phenomena.
Basic conceptual frameworks will be provided in the context of
contemporary and local problems, illustrating the core issues.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOC 196  Issues in Sociology  credit: 3 Hours.
Origin of problems; consequences of ameliorative strategies. Typical
topics include crime, mental illness, drug use, suicide, sexual behavior,
violence, and intergroup conflict. May be repeated as topics vary.

SOC 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

SOC 200  Intro to Sociological Theory  credit: 3 Hours.
Analysis of such classical theorists as Marx, Weber, Durkheim, and Mead
and contemporary theorists. Prerequisite: Sophomore standing.

SOC 201  Race, Gender & Power  credit: 3 Hours.
Same as GWS 201. See GWS 201.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

SOC 202  Sexualities  credit: 3 Hours.
Same as GWS 202. See GWS 202.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

SOC 211  Mexican & Latin Am Migration  credit: 3 Hours.
Same as LLS 220. See LLS 220.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOC 212  Mexican & Latin Am Migration  credit: 3 Hours.
Same as AFST 222, ANTH 222, and PS 242. See AFST 222.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

SOC 221  Black Women Contemp US Society  credit: 3 Hours.
Same as AFRO 226 and GWS 226. See AFRO 226.

SOC 222  Asian Am Historical Sociology  credit: 3 Hours.
Same as AAS 224. See AAS 224.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

SOC 223  Asian Am Historical Sociology  credit: 3 Hours.
Same as AAS 224. See AAS 224.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

SOC 224  Race and Ethnicity  credit: 3 Hours.
Sociological and social-psychological analysis of minority groups;
illustrative material drawn from representative racial, ethnic, and status
groups. Prerequisite: SOC 100, SOC 101, OR SOC 163.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

SOC 226  Political Sociology  credit: 3 Hours.
Study of power relations within and between the state, bureaucracy,
community, social classes, and elites in the United States and other
countries.
SOC 227  Latina/Latinos in the Contemporary United States  credit: 3 Hours.
Examines the incorporation of the major Latina/Latino subgroups into United States society, surveys the major theoretical approaches that have been used in the social sciences to explain majority-Latino relations, and provides an empirical overview of how major social institutions affect the daily lives of Latina/Latinos. Same as LLS 227. Prerequisite: One of the following: LLS 100, SOC 100, SOC 101, SOC 163, or consent of instructor. This course satisfies the General Education Criteria for: Cultural Studies - US Minority

SOC 249  Sport & Modern Society  credit: 3 Hours.
Same as KIN 249. See KIN 249. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

SOC 255  Queer Lives, Queer Politics  credit: 3 Hours.
Same as GWS 255. See GWS 255.

SOC 261  Gender in a Transnational Perspective  credit: 3 Hours.
Examines how gender inequality is structured on a transnational level. Emphasis will be placed on the interactive relationship among various countries, and how globalization promotes racial, ethnic, sexual, and national hierarchies among women, in both newly and advanced industrialized countries. Same as GWS 261. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or consent of instructor. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

SOC 267  Pan Africanism  credit: 3 Hours.
Same as AFRO 243, AFST 243, and PS 243. See PS 243. This course satisfies the General Education Criteria for: Cultural Studies - Non-West Social Beh Sci - Soc Sci

SOC 269  Food, Culture, and Society  credit: 3 Hours.
Same as ANTH 209. See ANTH 209. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

SOC 270  Population Issues  credit: 3 Hours.
Examines the current world population situation; the historical and current patterns of birth, death, migration, marriage, contraception, and abortion; and the world food and energy resources, crowding, and problems of overpopulation. Same as RSOC 270. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

SOC 273  Social Perspectives on the Family  credit: 3 Hours.
Examines the societal shaping factors of stable and changing family relations in the U. S. and other countries; focuses on social-structural factors affecting marriage, divorce, co-habitation, child-bearing, the division of work and authority, and other features of life. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci

SOC 274  Introduction to Medical Sociology  credit: 3 Hours.
Sociology of health and illness behavior and the social structure of systems which deliver health care services; includes social constraints on illness, the illness role, medical organizations and professions, and the application of the illness model to deviant forms of behavior. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163.

SOC 275  Criminology  credit: 3 Hours.
Nature and extent of crime; past and present theories of crime causation; criminal behavior in the United States and abroad, and its relation to personal, structural and cultural conditions; the nature of the criminal justice system and the influences of the exercise of discretion among actors in the criminal justice system. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163 or equivalent.

SOC 278  Mapping Latina/o Inequalities  credit: 3 Hours.
Same as LLS 278. See LLS 278.

SOC 280  Intro to Social Statistics  credit: 4 Hours.
First course in social statistics for students without mathematics beyond the high school level; topics include the role of statistics in social science inquiry, measures of central tendency and dispersion, simple correlation techniques, contingency analysis, and introduction to statistical inference; includes the statistical analysis of social science data using personal computers. Same as GEOG 280. Credit is not given for SOC 280 if credit for a college level introductory statistics course has been earned. This course satisfies the General Education Criteria for: Quantitative Reasoning I

SOC 287  Environment and Society  credit: 3 Hours.
Same as ESE 287, GEOG 287, PS 273 and NRES 287. See NRES 287. This course satisfies the General Education Criteria for: Social Beh Sci - Soc Sci Cultural Studies - Western

SOC 290  Attitude Theory and Change  credit: 3 Hours.
Same as MACS 352 and PSYC 352. See PSYC 352.

SOC 300  Sociology of Deviance  credit: 3 Hours.
Study of traits, conditions, actions, and behaviors that violate social norms and elicit negative societal reactions. Explores social, cultural and individual factors in the etiology of deviance; the establishment and maintenance of deviant categories; the motivations behind deviant behavior; the identification as deviant of individuals and of particular segments of society, by formal and informal means; the effects of institutionalization and social control upon the deviant; and the efforts of deviants to eradicate the label society has placed upon them. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163.

SOC 320  Queer Theory  credit: 3 Hours.
Same as GWS 370. See GWS 370.

SOC 321  Gender & Latina/o Migration  credit: 3 Hours.
Same as LLS 320 and GWS 320. See LLS 320.

SOC 322  Gender, Relationships & Society  credit: 3 Hours.
Same as GWS 340 and HDFS 340. See HDFS 340.

SOC 325  Black Men and Masculinities  credit: 3 Hours.
Same as AFRO 342. See AFRO 342.

SOC 328  Asian Americans & Inequalities  credit: 3 Hours.
An examination of various forms of social inequality between Asian Americans and other groups as well as among Asian Americans, including those based on race, gender, class, citizenship and sexuality. Same as AAS 328. Prerequisite: SOC 100 and/or AAS 100 are recommended.

SOC 345  Digital & Gender Cultures  credit: 3 Hours.
Same as GWS 345, INFO 345, and MACS 345. See GWS 345.
SOC 350  Technology and Society  credit: 3 Hours.  
Examines the social and cultural origins of modern technology and technological innovation; the effects of technology and its change on society. Topics include the impact of technology on beliefs and values, accommodation and resistance to change, and technology and the Third World. 
This course satisfies the General Education Criteria for:  
Social Beh Sci - Soc Sci

SOC 351  Social Aspects of Media  credit: 3 Hours. 
Same as MACS 351. See MACS 351.

SOC 355  Race and Mixed Race  credit: 3 Hours. 
Same as AAS 355 and LLS 355. See LLS 355.

SOC 364  Impacts of Globalization  credit: 3 Hours. 
Introduces sociological theory and research on globalization, in debate with the literature on modernization, world-systems, and development/underdevelopment. Explores recent economic, political, and cultural change at macro-sociological level. Themes include: global governance and world society, global diffusion of American culture, global capitalism, and new forms of social resistance. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or consent of instructor.

SOC 365  Contemporary Korean Society  credit: 3 Hours. 
Same as EALC 365. See EALC 365. 
This course satisfies the General Education Criteria for:  
Cultural Studies - Non-West  
Social Beh Sci - Soc Sci

SOC 366  Postsocialism Eastern Europe  credit: 3 Hours. 
Examines the sociological realities of state socialism and postsocialism in Eastern Europe and the former Soviet Union. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, HIST 142, PS 100, or any REES course. 
This course satisfies the General Education Criteria for:  
Social Beh Sci - Soc Sci  
Cultural Studies - Western

SOC 367  Globalization Dynamics Debates  credit: 3 Hours. 
Study of the multidimensional character of globalization. Discussion of key processes of globalization and areas of consensus and controversy in the literature, including major current controversies such as are we headed for a global monoculture; what is the relationship between globalization and neoliberal capitalism; which trend is more significant, globalization or empire? Discussions on scenarios and policy options of global futures.

SOC 373  Social Stratification  credit: 3 Hours. 
Inequities in power, prestige, income, privilege, and lifestyles in the United States and other countries; class and status as determinants of group interests, ideologies, and interaction; and effects of social change and mobility. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163. 
This course satisfies the General Education Criteria for:  
Social Beh Sci - Soc Sci

SOC 374  Immigrants in the U.S.  credit: 3 Hours. 
The change in origin country composition of U.S. immigrants changed dramatically post-1965 from what it was in the early twentieth century and this shift has generated much public and policy concern over the "new" immigrants and their prospects for economic mobility and integration. Since immigration shows no signs of slowing down, its causes and consequences remain some of the most important topics of the 21st century. Some of the questions considered in this course include: Why do immigrants come to the U.S.; Is the average human capital level of immigrants declining?; Are the new immigrants assimilating into U.S. society and what does that mean? Also examines the economic impact of immigration and considers appropriate policy recommendations such as whether the U.S. should adopt a skill-based point system to regulate immigration. Prerequisite: One of the following: SOC 100, SOC 101, or SOC 163.

SOC 375  Criminal Justice System  credit: 3 Hours. 
Exploration of the actors, institutions, and processes that make up the criminal justice system. We review sociological and other social scientific research on topics including the police, prosecutors, the courtroom workgroup, forensic evidence, juries, sentencing, and the impact of mass incarceration. Grades are based on exams, research exercises, and ethnographic observations of criminal courtrooms. Prerequisite: SOC 275 is recommended.

SOC 378  Law and Society  credit: 3 Hours. 
Examination of law and legal institutions sociologically. We begin with an introduction to theoretical perspectives on the problem of order, illustrated by juxtaposing formal law with other means of achieving order. Next, we consider law and legal systems in action, including relations between law and the economy, stratification, culture, ideology and social change. Finally, we investigate the relationship between law’s aims and principles, and law’s real-world implementation.

SOC 380  Social Research Methods  credit: 4 Hours. 
Introduction to the foundations of social research and to the major types of research methods employed in sociology. Provides exposure to the major tools and terminology of social research, including the use of computers in sociology. Topics include: research design, finding and using sociology literature, measurement, sampling, survey research, field methods, use of available data, quantitative data analysis and presentation, and computer resources for research. Prerequisite: SOC 280 and one of the following: SOC 100, SOC 101, or SOC 163. 
This course satisfies the General Education Criteria for:  
Quantitative Reasoning II

SOC 382  Social Psych Methods Lab  credit: 4 Hours. 
Same as PSYC 332. See PSYC 332.

SOC 387  Race, Gender and the Body  credit: 3 Hours. 
Same as LLS 387. See LLS 387.

SOC 390  Individual Study  credit: 1 to 6 Hours. 
Individual study or research project. May be repeated. Prerequisite: Six hours of sociology; written consent of instructor on form available in the Sociology Department Office.

SOC 392  Chicanas&Latinas: Self&Society  credit: 3 Hours. 
Same as GWS 392 and LLS 392. See LLS 392. 
This course satisfies the General Education Criteria for:  
Advanced Composition

Information listed in this catalog is current as of 04/2018
SOC 396  Topics in Sociology  credit: 3 Hours.
Explores topics not covered in regularly scheduled Sociology courses. See Class Schedule for topics. May be repeated if topics vary. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or consent of instructor.

SOC 400  Internships  credit: 0 to 3 Hours.
Selected internship opportunities in which student and faculty member develop a program of study and research related to internship. Consult departmental undergraduate advisor. 0 to 3 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Junior or senior standing; and SOC 100 or SOC 101 or SOC 163; and six additional hours in Sociology or acceptance of faculty member and Director of Undergraduate Studies.

SOC 410  Labor and the European Union  credit: 4 Hours.
Same as EURO 410 and LER 410. See LER 410.

SOC 420  Sociology of Education  credit: 2 to 4 Hours.
Same as EPS 420. See EPS 420.

SOC 421  Racial and Ethnic Families  credit: 2 to 4 Hours.
Same as AFRO 421, EPS 421, and HDFS 424. See EPS 421.

SOC 422  European Working Class History  credit: 2 to 4 Hours.
Same as HIST 450 and LER 450. See HIST 450.

SOC 425  Race, Educational Policy, and Sociology  credit: 3 or 4 Hours.
Examination of the origins and development of sociology as a discipline, as related to the sociology of education, and the reproduction of social and racial inequality. The course focuses on four issues: the production of racial inequality in social scientific knowledge, the role that social science plays in reproducing societal patterns of race, class, and gender inequality, the development of sociology and education in the United States and Africa, and the development of American social science and the reproduction of global inequality. Same as EPS 422. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOC 100 or SOC 101 or SOC 163 or consent of instructor.

SOC 447  Environmental Sociology  credit: 3 or 4 Hours.
Examination of historical and modern consequences of environmental alteration and pollution and resource limitations on human populations in the context of various social change theories. Explores the environmental movement, population explosion, the "limits to growth debate," and the impacts of environmental change on food production, land, and water quality. Same as ENVS 447 and RSOC 447. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: SOC 380 or equivalent; and one of the following: SOC 100, SOC 101, SOC 163, RSOC 110, or equivalent; or consent of instructor.

SOC 450  Senior Capstone Seminar  credit: 3 Hours.
Over the course of the semester, students will conceive and execute an original sociological research project, using their knowledge of the sociological literature developed in substantive courses and their skills in data collection and analysis developed in methods courses. In parallel, students will explore professional opportunities in sociology and engage in professional development activities, including exploring opportunities for graduate education and learning skills in job search, and resume, c.v., personal statement and cover letter development. 3 undergraduate hours. No graduate credit. Prerequisite: One of the following: SOC 100, SOC 101 or SOC 163; and SOC 380. For Sociology majors only.

SOC 451  Climate & Social Vulnerability  credit: 3 or 4 Hours.
Same as ATMS 446 and GEOG 496. See GEOG 496.

SOC 464  Comm in Envy Social Movements  credit: 3 Hours.
Same as AGCM 430, ENVS 430, and NRES 430. See AGCM 430.

SOC 470  Social Movements  credit: 2 to 4 Hours.
Origins and development of groups in promoting and resisting change, resource mobilization, strategies and tactics, individual and social consequences. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or six hours of anthropology, social geography, political science, or sociology.

SOC 471  Collective Action & Revolution  credit: 3 or 4 Hours.
Contemporary theory and research on the life course of social gatherings ranging from small scale and local to nationwide collective actions by people in pursuit of social and political change. Discusses the logic of practice in political, religious and street crowds; collective action of dispersive peoples; and broad-based revolutionary mobilizations. Cases include pre-modern and modern movements from the western and non-western societies. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOC 200, or equivalent, or consent of instructor.

SOC 472  Urban Communities & Public Pol  credit: 3 or 4 Hours.
Same as AFRO 481 and UP 481. See AFRO 481.

SOC 473  Immigration, Health & Society  credit: 3 or 4 Hours.
Same as CHLH 473, LLS 473, and SOCW 473. See LLS 473.

SOC 474  Population Trends and Patterns  credit: 3 or 4 Hours.
Introduction to contemporary demographic patterns and their historical development; transition theory and other models of demographic change; components of population growth and distribution; and trends and differentials in mortality and fertility. 3 undergraduate hours. 4 graduate hours.

SOC 476  Organization of Health Care  credit: 2 to 4 Hours.
Same as CHLH 456. See CHLH 456.

SOC 477  Sociology of Law  credit: 2 to 4 Hours.
Social origins and consequences of law and legal process, emphasizing problems of legal change and structure and function of legal sanctions. Law and law-like phenomena in primitive and modern societies. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or six hours of anthropology, social geography, political science, or sociology. This course satisfies the General Education Criteria for: Advanced Composition

SOC 478  Geography of Health Care  credit: 3 or 4 Hours.
Same as GEOG 438. See GEOG 438.

SOC 480  Methods of Field Research  credit: 2 to 4 Hours.
Instruction, training, and supervised practice in methods of field research as a basic tool of sociology; emphasis on the role of the field researcher as participant, observer, and interviewer in various kinds of research settings, and on approaches to and applications of field data. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: SOC 380 or consent of instructor.

SOC 481  Survey Research  credit: 3 or 4 Hours.
Principles and applications of social science survey research methods; class project designing and conducting a sample survey; training and experience in analysis of survey data; sampling, questionnaire construction, interviewing and data reduction, and file management; and direct use of the computer in survey data analysis. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOC 380 or consent of instructor.
SOC 483 Middle Eastern Societies & Cultures credit: 3 Hours.
Overview of the contemporary Middle East from social, political, and cultural perspectives. Explores how the internal dynamics together with the forces of globalization shape the societies of the Middle East today. Topics include social structure, political dynamics, family, gender, urban life Islam, social and religious movements. 3 undergraduate hours. 3 graduate hours. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or six hours of Anthropology, Social Geography, Politics, or Sociology.

SOC 484 African Urbanization credit: 3 or 4 Hours.
Examines the causes and consequences of African urbanization in historical perspective. The course will engage with various academic theories of urbanization and seek situate the numerous topics and readings among ongoing debates. However, its substantive focus will be devoted entirely to Africa. Same as AFST 484. 3 undergraduate hours. 4 graduate hours.

SOC 485 Intermediate Social Statistics credit: 3 or 4 Hours.
Intermediate course in the theory and application of statistical methods to social science data. Coverage includes overviews of measurement issues, the logic of hypothesis testing and estimation, the general linear model, one-way analysis of variance, correlation and regression. The core of the course is multiple regression analysis and its extensions. Topics include dummy variable analysis, statistical interaction, model assumptions and violations, non-linear and logistic regression, and an introduction to path analysis. Emphasis on the application of statistical computing packages (e.g. SPSS) and the substantive interpretation of results. 3 undergraduate hours. 4 graduate hours. Credit is not given for both SOC 485 and another course with a primary focus on applied multiple regression analysis such as ECON 203, STAT 420, or PSYC 406. Graduate students must incorporate research literature involving statistical analysis from their discipline into their assignments and class discussions. Prerequisite: SOC 280 or equivalent.

SOC 488 Demographic Methods credit: 3 or 4 Hours.
Introduction to statistical and mathematical procedures in population analysis; the gathering, processing, and evaluating of registration and census data; the life table model; and procedures of mortality and fertility analysis and population projections. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOC 380 or consent of instructor. This course satisfies the General Education Criteria for: Quantitative Reasoning II.

SOC 490 Advanced Independent Study credit: 3 Hours.
3 undergraduate hours. No graduate credit. May be repeated. Prerequisite: Open only to seniors in the sociology major who have an overall GPA of 3.25 or higher and therefore may be eligible for departmental distinction; obtain written consent of instructor on form available in the Sociology Department Office.

SOC 493 Democracy and Environment credit: 3 or 4 Hours.
Same as GEOG 493, NRES 494, UP 493. See GEOG 493.

SOC 495 Senior Honors Seminar credit: 3 Hours.
Intensive scrutiny of current literature on one selected topic. Critical reading and discussion followed by writing essays and research proposals. Subject will shift yearly. There may be community work as an aspect of this course; consult the Class Schedule for details. 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: For sociology majors only. Student must have at least 3.5 grade-point average in sociology courses and consent of instructor.

SOC 496 Advanced Topics in Sociology credit: 3 Hours.
Explores topics not covered in regularly scheduled Sociology courses. See Class Schedule for topics. 3 undergraduate hours. No graduate credit. May be repeated if topics vary. Prerequisite: One of the following: SOC 100, SOC 101, SOC 163, or consent of instructor.

SOC 500 Classical Sociological Theory credit: 4 Hours.
Analysis of major classical sociological theorists of the nineteenth and early twentieth centuries, stressing the social, historical, and philosophic foundations of sociological theory; primary emphasis on Marx, Durkheim, and Weber. Prerequisite: SOC 200 or equivalent.

SOC 501 Contemp Sociological Theory credit: 4 Hours.
Major theorists and schools of thought since World War I with emphasis on the contemporary period; includes functionalism, exchange theory, conflict theory, symbolic interaction, and phenomenology. Prerequisite: SOC 500 or equivalent.

SOC 505 Seminars in Sociology credit: 1 Hour.
Provides Sociology graduate students the opportunity to attend and discuss presentations in department and campus seminars. Approved for S/U grading only. May be repeated to a maximum of 4 hours in separate terms. Prerequisite: Graduate standing in Sociology and consent of the Director of Graduate Studies.

SOC 510 Professionalization Seminar credit: 2 Hours.
Introduction to the graduate program in Sociology and to graduate study in the discipline of Sociology. Approved for S/U grading only. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Graduate standing in Sociology and consent of the Director of Graduate Studies.

SOC 521 Sociology of Race and Racism credit: 4 Hours.
Examination of the social construction of race and racism, in various cultural contexts and historical moments and in relation to various groups and research problems.

SOC 532 Access to Justice credit: 4 Hours.
Explores contemporary issues related to the ability of the public to access “justice”. The course examines different perspectives on what justice is, the barriers to obtaining justice through the formal legal system, and the potential solutions to overcoming these barriers. Course readings emphasize empirical research.

SOC 550 Globalization Dynamics Debates credit: 4 Hours.
An advanced study of the multidimensional character of globalization. Discussion of key processes of globalization and areas of consensus and controversy in the literature and examination of the premises of major approaches to globalization in social science and fundamental analytical questions and policy dilemmas that globalization presents. Discussions on scenarios and policy options of global futures.

SOC 561 Development Theories credit: 4 Hours.
Discussion of major trends in development thinking and policy, and development theories from the classics in political economy through modernization theory, dependency, alternative development, neoliberalism, human development and post-development. Addresses ongoing challenges and debates such as globalization and democratization, and trends in social science, such as discourse analysis. Enables participants to assess development theories in a historical context and from the viewpoint of sociology of development knowledge.
SOC 562  Sem in Transnational Studies  credit: 4 Hours.
Intensive study of a selected area in transnational sociology, e.g., diasporas, global political economy, global environmental studies, transnational racial stratification, etc. May be repeated in the same or separate terms to a maximum of 8 hours as topics vary. Prerequisite: Consent of instructor.

SOC 564  Global Religion and Politics  credit: 4 Hours.
Explores the reasons behind the world-wide rise of religion as a key player in the public sphere, and the implications for politics in the contemporary world. The major religions of the world are considered, but with a focus on the Islamic revival and Muslim societies. Students will learn about the secularization debate, religious revivals and globalization, global fundamentalisms, religion and democracy, and post-sectarian and post-Islamist societies. Same as REL 564 and SAME 564.

SOC 565  Megacities of Global South  credit: 4 Hours.
Exploration of the dynamics of urban life in the megacities of the Global South. Studies the ways in which the global, social, and economic restructuring is affecting urban space and people and how urban inhabitants respond to these merging circumstances. Focuses on the way in which politics is articulated in the megacities of the Global South. The course discusses cases from the Middle East, Latin America, Africa and South Asia. Prerequisite: Consent of the instructor.

SOC 571  Demography and Human Ecology  credit: 4 Hours.
Classic and contemporary issues and perspectives in demography and human ecology, emphasizing the relationship between demographic phenomena and social life and on the ecological approach to social organization; demographic change, analytic methods in demography, fertility, mortality, and migration; new research developments. Prerequisite: Consent of instructor.

SOC 572  Community In American Society  credit: 4 Hours.
Same as HDFS 533 and UP 533. See HDFS 533.

SOC 575  Founds of Organizational Behav  credit: 4 Hours.
Same as BADM 510, PS 514, and PSYC 553. See BADM 510.

SOC 576  Survey Methods in Mkt Res  credit: 4 Hours.
Same as BADM 531. See BADM 531.

SOC 578  Ethnography Urban Communities  credit: 4 Hours.
Same as AFRO 552, HDFS 543, and UP 578. See AFRO 552.

SOC 579  Categorical Data in Ed/Psyc  credit: 4 Hours.
Same as EPSY 589 and PSYC 589. See EPSY 589.

SOC 580  Advanced Interpretive Methods  credit: 4 Hours.
Analysis of social interaction based on the social psychology of C. H. Cooley, G. H. Mead, and W. I. Thomas; presentation of problems of theory, concepts, and method. Same as MDIA 580. Prerequisite: 4 hours graduate credit in sociology.

SOC 581  Survey Research Methods I  credit: 4 Hours.
Advanced course in the design of social surveys and collection of social survey data; covers stages from questionnaire construction to preparing data for statistical analysis; issues in survey design involving cross-national, longitudinal and multi-group research. Prerequisite: SOC 485 or equivalent.

SOC 582  Survey Research Methods II  credit: 4 Hours.
Laboratory course in survey research methods to provide students with advanced training and experience in problem formulation and computerized data analysis using statistical packages, e.g., SPSS; under staff guidance, a student will select a topic and write a professional-level paper. Three to ten hours of laboratory time per week.

SOC 583  Qualitative Research Methods  credit: 4 Hours.
Introduction to field and qualitative methods in social science research, in terms of both the practical issues of conducting this type of research and the conceptual debates in the field. Methods include interviewing, participant observation, unobtrusive observation, historical/archival methods, and global ethnography. May be repeated as topics vary.

SOC 584  Multivar Anlys in Psych and Ed  credit: 4 Hours.
Same as EPSY 584 and PSYC 594. See PSYC 594.

SOC 586  Adv Social Statistics I  credit: 4 Hours.
Examines social science applications of the general linear model and its extensions; topics include: model specification; ordinary and generalized least squares; multicollinearity; selection of predictors; interaction of variables and non-linear regression; panel and time-series data; measurement error; path analysis; recursive and non-recursive structural equation models. Applies statistical computing packages (e.g., SPSS) to social science data. Credit is not given for both SOC 586 and PSYC 406. Prerequisite: SOC 485 or equivalent.

SOC 587  Adv Social Statistics II  credit: 4 Hours.
Examines social science applications of discrete and continuous multivariate analysis; topics include: analysis of categorical data (loglinear modelling, probit analysis, etc.); geometric interpretation of matrices; factor analysis and index construction; canonical analysis; discriminant analysis; unobserved variables and structural equation models; issues in model specification and estimation. Applies statistical computing programs such as ECTA and LISREL to social science data. Credit is not given for both SOC 587 and PSYC 407. Prerequisite: SOC 586 or equivalent.

SOC 588  Covar Struct and Factor Models  credit: 4 Hours.
Same as EPSY 588, PSYC 588, and STAT 588. See PSYC 588.

SOC 589  Psych Scaling Multidimen Meth  credit: 4 Hours.
Same as PSYC 509. See PSYC 509.

SOC 590  Individual Topics in Sociology  credit: 1 to 8 Hours.
Supervised individual investigation or study of a topic not covered by regular courses; topic selected by the student and the proposed plan of study must be approved by the adviser and the staff member who supervises the work. Approved for letter and S/U grading. May be repeated.

SOC 596  Recent Developments in Soc  credit: 4 Hours.
Intensive study of selected topics based on contemporary works of major importance in the development of sociological theory. May be repeated if topics vary.

SOC 597  Readings in Sociology  credit: 2 to 12 Hours.
Individual guidance in intensive readings in the literature of one or more subdivisions of the field of sociology, selected in consultation with the student's advisor, in preparation for the specialization examination. Approved for S/U grading only. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Graduate standing in Sociology and consent of advisor.

SOC 598  Thesis Proposal  credit: 2 to 12 Hours.
Individual guidance in designing a doctoral research project and writing a thesis proposal. Focuses on developing a cogent theoretical framework, articulating significance of the project, identifying appropriate research methods, and considering ethical issues. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 12 hours. Prerequisite: Graduate standing in Sociology and consent of advisor.
Spanish (SPAN)

SPAN Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SPAN)

Courses

SPAN 101 Elementary Spanish I  credit: 4 Hours.
Intensive course for beginner students of Spanish. Students will develop basic listening, speaking, reading and writing skills in Spanish to a novice high level, based on the proficiency scale stipulated by the American Council for the Teaching of Foreign Languages (ACTFL) and to provide them with an introduction to the various cultures of the Spanish-speaking world and Hispanics in the United States.

SPAN 102 Elementary Spanish II  credit: 4 Hours.
Continuation of SPAN 101. Students continue developing basic listening, speaking, reading and writing skills in Spanish to an intermediate low level, based on the ACTFL proficiency and provides introduction to the various cultures of the Spanish-speaking world and Hispanics in the United States. Credit is not given for both SPAN 102 and SPAN 122. Prerequisite: SPAN 101 or equivalent.

SPAN 122 Intensive Elementary Spanish  credit: 4 Hours.
Intensive beginning Spanish, equivalent to the first two semesters, for students with little or no experience in Spanish or whose skills need refreshing. This is considered a second level course for purposes of fulfilling the University General Education Language requirement. Prerequisite: None or assignment by placement exam. Students who have the equivalent of four or more years credit in Spanish at the secondary level will not receive credit for SPAN 122.

SPAN 130 Intermediate Spanish  credit: 4 Hours.
Continued development of reading, writing and conversational skills. This is considered a third level course for purposes of fulfilling the University General Education Language requirement. Credit is not given for both SPAN 130 and SPAN 103. Prerequisite: SPAN 122 or equivalent placement score.

SPAN 141 Introduction to Spanish Grammar  credit: 4 Hours.
Introduction to the major structures of Spanish, from a linguistic perspective and will develop students’ formal knowledge of Spanish grammar. This is considered a fourth level course for purposes of fulfilling the University General Education Language requirement. Credit is not given for both SPAN 141 and SPAN 142. Prerequisite: SPAN 130 (previously numbered 103), equivalent course, or placement score.

SPAN 142 Spanish in the Professions  credit: 4 Hours.
Introduction to Spanish in business, law, medical, education & social service fields, with a focus on the importance of bilingualism in the U.S., strategies for lifelong learning, and culture considerations. The development of functional use of Spanish within the professional context is the major focus of the course. This is considered a fourth level course for purposes of fulfilling the University General Education Language requirement. Credit is not given for both SPAN 141 and SPAN 142. Prerequisite: SPAN 130 (formerly numbered 103), equivalent course, or placement score.

SPAN 191 Freshman Honors Tutorial  credit: 1 to 3 Hours.
Study of selected topics on an individually arranged basis. Open only to honors majors or to Cohn Scholars and associates. May be repeated to a maximum of 3 hours. Prerequisite: Consent of departmental honors adviser in Spanish.

SPAN 199 Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for both letter and S/U grading. May be repeated.

SPAN 200 Readings in Hispanic Texts  credit: 3 Hours.
Readings and discussion in Spanish of a variety of texts by leading Hispanic and Hispanic-American writers covering genres and themes; designed to emphasize reading, discussion, and enjoyment rather than literary criticism. Open to non-Spanish majors. Credit may be received by Advanced Placement "Language" or "Literature" examination. Prerequisite: SPAN 141, SPAN 142, or equivalent.

SPAN 202 Spanish for Business  credit: 3 Hours.
Introduction to vocabulary of Hispanic commerce; composition of business letters and similar texts. Prerequisite: SPAN 141, SPAN 142, or equivalent.

SPAN 204 Advanced Spanish Grammar in Context  credit: 3 Hours.
Overview of Spanish grammar, with emphasis on major challenges and areas of contrast with English. The overall goal of the course is to help students gain a greater understanding of some key aspects of Spanish grammar, which will lead to greater accuracy in their written and oral production. Prerequisite: SPAN 141 or equivalent.

SPAN 208 Oral Spanish  credit: 3 Hours.
Practice in speaking Spanish. Prerequisite: SPAN 141, SPAN 142, or equivalent. To be taken concurrently with or subsequent to SPAN 204.

SPAN 228 Spanish Composition  credit: 3 Hours.
Basic composition course; problems of written Spanish and principles of Spanish stylistic patterns; weekly written exercises. Prerequisite: SPAN 141, SPAN 142, or equivalent.

SPAN 232 Spanish in the Community  credit: 3 Hours.
Introduction to Spanish-speaking communities in the Champaign-Urbana area, focusing on issues of particular interest to the local Hispanic community, developing contextualized oral proficiency, and facilitating student civic engagement. Active student reflection is structured throughout the course. Meets two hours a week in class and two hours a week in community-based service work. In their interactions with community members and organizations students both learn from and contribute to the community. Prerequisite: SPAN 141, SPAN 142, or equivalent.

SPAN 240 Latina/o Popular Culture  credit: 3 Hours.
Same as ENGL 224 and LLS 240. See LLS 240.

SPAN 242 Intro to Latina/o Literature  credit: 3 Hours.
Same as ENGL 225 and LLS 242. See LLS 242.
This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - US Minority

SPAN 246 Gender & Sexuality in Latina/o Literature  credit: 3 Hours.
Examination of questions of gender, sexuality, and identity in contemporary Latina/Latino culture through a discussion of novels, performance pieces, essays and films. Spanish majors must complete writing assignments in Spanish. Same as LLS 246.
This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - US Minority

SPAN 250 Introduction to Literary Analysis  credit: 3 Hours.
An introduction to literary analysis and interpretation. Emphasis will be placed upon close reading and critical analysis of texts representing different genres and periods in Spain and Spanish America. Prerequisite: SPAN 228.
SPAN 252  Introduction to Hispanic Linguistics  credit: 3 Hours.
Introduction to Spanish phonology, morphology, syntax, and at least one of the following areas: issues in Spanish semantics and pragmatics, variation in Spanish, Spanish in the U.S., history of Spanish, or acquisition of Spanish. Prerequisite: SPAN 228 or consent of instructor.

SPAN 254  Introduction to Cultural Analysis  credit: 3 Hours.
Introduction to the analysis of culture as concept, practice and representation, including consideration of the debates that the idea of culture has provoked in different contexts. Provides analytical and methodological tools to discuss a full range of cultural forms. Special emphasis on issues of culture and representation, as well as on the notion of cultural difference(s). The theoretical and critical texts studied will represent diverse geographical and cultural locations. Examples and discussion will emphasize cultural issues in the context of Spain, Latin America and U.S. Latinas/os. Prerequisite: SPAN 228.

SPAN 295  Topics in Literature and Cultural Studies  credit: 3 Hours.
Selected topics in Spanish, Latin American and/or Latina/o literature and cultural studies. Specific topics may vary depending on the instructor. Course taught in Spanish. May be repeated in the same or separate terms to a maximum of 6 hours if topics vary. Prerequisite: SPAN 228.

SPAN 299  Study Abroad  credit: 0 to 18 Hours.
Non-advanced level course in Spanish language, literature, history, culture, and/or civilization completed in a Study Abroad program in Spain or Latin America. May be repeated in the same term to a maximum of 18 hours. May be repeated in separate terms to a maximum of 36 hours. Prerequisite: SPAN 141, SPAN 142 or equivalent.

SPAN 303  The Sounds of Spanish  credit: 3 Hours.
Practical, introductory course to Spanish phonetics, stressing practice in pronunciation. May be offered as intensive eight-week course. Prerequisite: SPAN 228 or consent of instructor.

SPAN 305  The Structure of Spanish  credit: 3 Hours.
An in-depth investigation of the structure of Spanish, with a secondary focus on syntactic variation, especially structural differences with English. Introduces concepts and techniques essential for syntactic analysis and description. Taught in Spanish. Prerequisite: SPAN 252 or consent of instructor. May be taken concurrently with SPAN 252.

SPAN 307  Bilingualism  credit: 3 Hours.
Introduction to the fundamental issues in the study of bilingualism as an individual and social phenomenon, with special emphasis on Spanish bilingual communities in the United States, Spain and Latin America. Taught in Spanish. Prerequisite: SPAN 252 or consent of instructor. May be taken concurrently with SPAN 252.

SPAN 308  Spanish in the United States  credit: 3 Hours.
Descriptive and critical overview of the linguistic practices of the different Spanish-speaking communities in the U.S. The main objective of the course is to develop critical and linguistic awareness about the relationship among language, individual, and society. Special emphasis on historical migration patterns and settlements, characteristics of Spanish in contact with English, and language use and attitude patterns. Same as LLS 308. Prerequisite: SPAN 252 or consent of instructor.

SPAN 309  Varieties of Spoken Spanish  credit: 3 Hours.
Relationship between language, individual and society in the context of the spread of Spanish in the world, concentrating on Spanish varieties spoken in Spain and Latin America, including the United States, but will also give an overview of Spanish in Africa (Equatorial Guinea, Morocco), and other parts of the world (Israel, Turkey, the Philippines). Prerequisite: SPAN 252 or consent of instructor. May be taken concurrently with SPAN 252.

SPAN 310  Premodern Spanish Literatures & Cultures  credit: 3 Hours.
A critical analysis of selected texts and authors representative of the Medieval and Early Modern periods in the context of Iberian cultures. Particular emphasis on the relationship between cultural practices and the construction of national identities prior to 1700, as well as on the plurality of cultures that shaped what is now Spain. Specific sections may emphasize critical topics such as gender, ideology, literary form, nationalisms, race, and sexuality, among others. Prerequisite: SPAN 228.

SPAN 312  Modern Spanish Literatures & Cultures  credit: 3 Hours.
Critical analysis of selected texts and periods representative of Spain's literary production from the 18th century to the present, with special attention paid to broader literary and cultural contexts. Specific sections may emphasize critical topics such as gender, ideology, literary form, nationalisms, race, and sexuality, among others. Prerequisite: SPAN 228.

SPAN 314  Latin American Literatures & Cultures to 1800  credit: 3 Hours.
Critical analysis of selected texts and periods representatives of Latin American literary and cultural production from Pre-Columbian until 1800, with special attention paid to broader literary and cultural contexts. Specific sections may emphasize critical topics such as gender, ideology, literary form, nationalisms, race, and sexuality, among others. Prerequisite: SPAN 228.

SPAN 316  Latin American Literatures & Cultures from 1800  credit: 3 Hours.
Critical analysis of selected texts and periods representative of Latin American literary and cultural production from 1800 to present, with special attention paid to broader literary and cultural contexts. Specific sections may emphasize critical topics such as gender, ideology, literary form, nationalisms, race, and sexuality, among others. Prerequisite: SPAN 228.

SPAN 318  Spanish Cultural Studies I  credit: 3 Hours.
A critical analysis of historical events, institutions, artistic production, symbols and values representative of Spanish (Iberian) cultures. Particular emphasis on the relationship between specific cultural practices and/or values and the construction of national identities prior to 1700. May be repeated in separate terms to a maximum of 6 hours, if topics vary. Prerequisite: SPAN 228.

SPAN 320  Spanish Cultural Studies II  credit: 3 Hours.
Critical analysis of selected historical events, artistic production, debates, symbols and values representative of Spanish (Iberian) cultures in the modern and contemporary periods. Particular emphasis on the relationship between cultural practices and national identities, as well as on contextualized analysis of different types of cultural phenomena. May be repeated in separate terms to a maximum of 6 hours, if topics vary. Prerequisite: SPAN 228.

SPAN 324  Latin America Cultural Studies I  credit: 3 Hours.
Examination of the complexities, ramifications and ambiguities of the cultural encounters, processes and expressions which took place in Latin America between different racial and ethnic groups from Pre-Columbian times to the 1800. Particular emphasis will be placed on the critical analysis of major cultural events, periods and issues that influenced the formation of identities in these territories. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: SPAN 228.
SPAN 326  Latin America Cultural Studies II  credit: 3 Hours.
Panoramic view of Latin American cultures since the end of the colonial period (roughly 1820) to the present. Examination of the major debates, authors and cultural issues that shaped those cultures or that were shaped by them. Specific themes may vary by semester, and may include the following: slavery, colonialism and neocolonialism, revolution, mestizaje, gender, the state, and modernization. Analysis will include diverse cultural phenomena, as well as consideration of cultural perspectives and practices. May be repeated in separate terms to a maximum of 6 hours, if topics vary. Prerequisite: SPAN 228.

SPAN 332  Spanish and Entrepreneurship  credit: 3 Hours.
Entrepreneurship means more than starting a business. This course emphasizes social entrepreneurship, in which the basic process of entrepreneurship-opportunity recognition, resource gathering and value creation is used to address social issues, not to create profits. Students do community-based learning in non-profits serving the local Spanish-speaking community, thereby building their language skills, acquiring cultural knowledge and gaining hands-on experience with social entrepreneurship (theory and practice). Each week class meets two hours in class and two hours in community-based service work. Prerequisite: SPAN 228.

SPAN 395  Advanced Topics in Literature & Cultural Studies  credit: 3 Hours.
Selected topics in Spanish, Latin American and/or Latina/o literatures and cultural studies. Specific topics may vary. May be repeated in separate terms to a maximum of 6 hours, if topics vary. Prerequisite: Two 300-level courses in Spanish/Latin American literature or cultural studies.

SPAN 399  Advanced Study Abroad  credit: 0 to 18 Hours.
Advanced level course in Spanish language, literature, history, culture, and/or civilization completed in a Study Abroad program taking place in Spain and Latin America. Approved for Letter and S/U grading. May be repeated to a maximum of 36 hours. Prerequisite: SPAN 228. May be taken concurrently with SPAN 228.

SPAN 410  Spanish/English Translation  credit: 3 or 4 Hours.
Review of current translation theory and analysis and practice of the translation from Spanish to English (and vice versa) of a variety of text types, ranging from short literary texts to everyday commercial discourse such as that found on product labels. Emphasis on linguistic and cultural aspects of literary discourses as well as non-literary texts. Conducted in Spanish. Same as TRST 412. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 250, SPAN 252, and SPAN 254; or consent of instructor.

SPAN 418  Language&Minorities in Europe  credit: 3 or 4 Hours.
Same as FR 418, GER 418, ITAL 418, LING 418, PS 418, and SLAV 418. See FR 418.

SPAN 430  Spanish Phonology  credit: 3 or 4 Hours.
Systematic introduction to the sound structures of Spanish, concentrating on recent contributions of theoretical linguistics to the understanding of the phonology of Spanish in its standard and selected dialectal varieties. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 252 or SPAN 303 or consent of instructor.

SPAN 431  Spanish Morphology  credit: 3 or 4 Hours.
Introductory course to basic concepts of morphological structure and word formation from a functional perspective. The course centers around the specific morphological characteristics of Spanish, considering historical and dialectal variation. Taught in Spanish. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 305 or equivalent; or consent of instructor.

SPAN 432  Spanish Syntax  credit: 3 or 4 Hours.
Systematic introduction to the foundations of Spanish syntax based on standard and more recent treatments of Spanish and syntactic theory. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 305 or consent of instructor.

SPAN 433  Spanish Sociolinguistics  credit: 3 or 4 Hours.
Introduction to the sociolinguistic variation (social, historical, and dialectal) of Spanish-speaking communities, and to the basic theoretical and methodological concepts of sociolinguistic research. Taught in Spanish. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 307 or SPAN 309; or consent of instructor.

SPAN 434  History of the Spanish Language  credit: 3 or 4 Hours.
Study of the historical evolution of the Spanish language, from its origins in Latin to its spread and development in Spain and Latin America, considering also the influence of other languages on Spanish. Both internal history (changes in phonology, morphology, syntax and lexicon) and external history are examined. Taught in Spanish. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 252 or equivalent introduction to Spanish or General Linguistics or consent of instructor.

SPAN 435  Introduction to Romance Linguistics  credit: 3 or 4 Hours.
Comparative and historical analysis of the Romance languages. Same as FR 462, ITAL 435, LING 462, PORT 435, and RMLG 435. 3 undergraduate hours. 4 graduate hours. Prerequisite: Four semesters of a Romance language or Latin, or equivalent; LING 100, SPAN 252, FR 416, or equivalent; or consent of instructor.

SPAN 436  History of Translation  credit: 3 or 4 Hours.
Same as CLCV 430, CWL 430, ENGL 486, GER 405, SLAV 430, and TRST 431. See SLAV 430.

SPAN 437  The Acquisition of Spanish  credit: 3 or 4 Hours.
Examination of the acquisition of Spanish by monolinguals, bilinguals, and second language learners. After a general introduction to theories of language acquisition, the focus of the course is on empirical investigations of the acquisition of the phonology, lexicon, morphology and syntax of Spanish by each to the learner groups listed above. Taught in Spanish. 3 undergraduate hours. 4 graduate hours. Prerequisite: SPAN 303 and SPAN 305 or equivalent, or consent of instructor.

SPAN 442  Latina Literature  credit: 3 or 4 Hours.
Same as LLS 442 and GWS 445. See LLS 442.

SPAN 460  Principles of Language Testing  credit: 3 or 4 Hours.
Same as EIL 460, EPSY 487, FR 460, GER 460, ITAL 460, PORT 460, and SLS 460. See EIL 460.

SPAN 461  Medieval Spanish Studies  credit: 3 or 4 Hours.
An introduction to major works and writers before 1500 with special attention to their political and cultural contexts. 3 undergraduate hours. 4 graduate hours. May be repeated as topics vary, to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: SPAN 310 and SPAN 318.

SPAN 462  Early Modern Spanish Studies  credit: 3 or 4 Hours.
Study of the major authors and texts of the early modern period (Renaissance and Baroque) with particular attention to the cultural and political contexts of sixteenth and seventeenth century Spain. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: SPAN 310 and SPAN 318.
SPAN 463 18-19thC Spanish Studies  credit: 3 or 4 Hours.
Selected literary and non-literary texts published in Spain during the 18th and 19th centuries. Focus on analysis of literary and other manifestations of major cultural movements and artistic currents and preoccupations. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours as topic varies. Prerequisite: SPAN 312 and SPAN 320.

SPAN 464 Spanish Studies 1898-1960  credit: 3 or 4 Hours.
Selected literary and non-literary texts published in Spain between 1898-1960. Focus on analysis of literary and other manifestations of major cultural movements and artistic currents and preoccupations. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours as topic varies. Prerequisite: SPAN 312 and SPAN 320.

SPAN 465 20th-21stC Spanish Studies  credit: 3 or 4 Hours.
Examines the cultural production of 20th and 21st century Spain, with emphasis on major works, critical movements and debates. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: SPAN 312 and SPAN 320.

SPAN 466 Colonial Span Amer Studies  credit: 3 or 4 Hours.
In-depth study of colonial Spanish American discursive and cultural production from Pre-Hispanic times to the eighteenth century. Emphasis is placed upon the intellectual and cultural climate from which these texts emerged. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: SPAN 314 and SPAN 324.

SPAN 467 19thC Sp American Studies  credit: 3 or 4 Hours.
Provides a panoramic view of literary and cultural production in Spanish America between 1810 and 1900. Special attention paid to the emergence of "national literatures" within specific historical and political contexts. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: SPAN 316 and SPAN 326.

SPAN 468 20th-21stC Span Am Studies  credit: 3 or 4 Hours.
Examines major works, critical movements and/or theoretical issues in the 20th and 21st century Spanish American literary and cultural studies. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours if topic varies. Prerequisite: SPAN 316 and SPAN 326.

SPAN 477 Span Grammar Comm Lang Tchg  credit: 3 Hours.
Survey of major Spanish syntactic and morphological patterns with particular emphasis on the acquisition of Spanish grammar by non-native speakers. Students will develop a sensitivity for appropriate teaching of Spanish grammar. 3 undergraduate hours. No graduate credit. Required for teacher education. Prerequisite: SPAN 475 or consent of instructor.

SPAN 489 Theoretical Foundations of SLA  credit: 3 or 4 Hours.
Same as FR 481, GER 489, ITAL 489, LING 489, and PORT 489. See LING 489.

SPAN 490 Advanced Readings in Spanish  credit: 0 to 3 Hours.
Directed reading course intended to develop an advanced student's interest in a special area of Hispanic linguistics or literature (author, genre, period, group of works, etc.). Topics to be chosen in consultation with an advisor. Only topics not covered in regular offerings will be considered. 0 to 3 undergraduate hours. No graduate credit. May be repeated if topics vary. Prerequisite: SPAN 252 for linguistics topics; and any two of SPAN 310, SPAN 312, SPAN 314, or SPAN 316 for literature topics.

SPAN 491 Topics for Honors Students  credit: 1 to 3 Hours.
For candidates for honors in Spanish; intensive study of topics in Hispanic literature or linguistics. 1 to 3 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Consent of instructor and of departmental honors advisor.

SPAN 528 Sem 20thC Spanish Lit  credit: 4 Hours.
Investigation of literary problems presented by the Spanish novel, drama, poetry and/or essay since 1900. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: SPAN 465 or equivalent.

SPAN 535 Sem Spanish-American Lit  credit: 4 Hours.
Special problems in methodology and research; includes other prose fiction. Same as CWL 562. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: A related 400-level course in Spanish American Studies or consent of instructor.

SPAN 540 Sem History of Ideas  credit: 4 Hours.
Major topics in Hispanic intellectual history; sample topics include El ensayo como genero instrumental de las ideas: El peso de la identidad cultural, Corrientes ideologicas coloniales, and Idealismo y realismo. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: A related 400- or 500-level course in Spanish American Studies or consent of instructor.

SPAN 557 Sem Romance Ling  credit: 4 Hours.
Selected topics in comparative Romance linguistics. Same as FR 559, ITAL 559, LING 559, PORT 559, and RMLG 559. May be repeated if topics vary. Prerequisite: SPAN 435 and consent of instructor.

SPAN 558 Sem Spanish Synchronic Ling  credit: 4 Hours.
Selected topics of Spanish phonology, syntax and sociolinguistics in the light of present-day linguistic theory. May be repeated to a maximum of 16 hours if topics vary. Prerequisite: Graduate standing in Spanish or consent of instructor.

SPAN 559 Sem Spanish Diachronic Ling  credit: 4 Hours.
Selected topics on the development of Spanish and its dialects in the light of present-day historical methods. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: Consent of instructor.

SPAN 571 Proseminar For Lang Tchg  credit: 4 Hours.
In-depth exploration of fundamental concepts in foreign language teaching; designed for departmental Teaching Assistants; topics include classroom discourse, teaching approaches, reading, listening, writing, and principles of language testing. Same as PORT 571. 4 graduate hours. No professional credit. Prerequisite: Teaching assistantship in the Department of Spanish and Portuguese or consent of instructor.
SPAN 572  Theory and Literary Criticism  credit: 4 Hours.
Presentation of major critical theories for the analysis of literary and cultural texts since the mid-20th century. Hispanic, Luso-Brasilian, and U.S. Latina/o critical theory will be studied. Students will demonstrate their understanding of these theories by critically engaging texts written in Spanish, Portuguese, or the foreign language of their specialization. Same as PORT 572. 4 graduate hours. No professional credit. Prerequisite: Graduate standing in the Department of Spanish and Portuguese or consent of instructor.

SPAN 573  Professional/Academic Writing  credit: 4 Hours.
Examination and analysis of prevailing models of U.S. academic writing within the Humanities in the light of the varieties of rhetorical traditions across cultures and languages; discussion of current debates regarding academic writing. Development of critical awareness of the foundations of rhetorical structure in English, and comparison of those structures to those of other languages in which students will also be writing professionally. Examination of the academic publication process. Students will apply these discussions as they work on revising an existing scholarly paper for eventual publication. Same as GER 553, ITAL 573 and PORT 573. Prerequisite: Graduate standing.

SPAN 580  Classroom Lang Acquisition  credit: 4 Hours.
Provides for an introduction to the context, process(es), and product of classroom language acquisition; emphasis is placed upon research, research findings, and implications of research. Same as EIL 580, FR 580, GER 580, ITAL 580, PORT 580, and SLS 580. Prerequisite: HUM 471 or equivalent, or consent of instructor.

SPAN 584  Theories in SLA  credit: 4 Hours.
Course introduces doctoral students to current mainstream theories (e.g., linguistic, psycholinguistic, cognitive, and social) used in SLA research. Emphasis is on gaining fundamental understanding of how theories work in SLA, how to evaluate them, and what they attempt to explain. Same as EIL 584, EALC 584, EPSY 563, FR 584, GER 584, ITAL 584, LING 584, and PORT 584. Prerequisite: EIL 489 or equivalent or consent of instructor.

SPAN 588  Sem Second Lang Learn  credit: 4 Hours.
Treats specific topics in second language learning that are of current research and/or theoretical interest. Topics vary from term to term. Same as EALC 588, FR 588, GER 588, ITAL 588, LING 588, and PORT 588. May be repeated to a maximum of 16 hours if topics vary. Prerequisite: SPAN 580 or equivalent or consent of instructor.

SPAN 590  Topics in Hispanic Studies  credit: 4 Hours.
Topical studies of Hispanic literature or linguistics beyond the scope of regular offerings at the 400- or 500-level. May be repeated to a maximum of 12 hours if topics vary. Prerequisite: Corresponding introductory course at the 400-level, or consent of instructor.

SPAN 595  Special Topics in Spanish  credit: 1 to 4 Hours.
Independent study/research under the direction of a faculty member. May or may not fulfill requirements for a particular degree program in SIP. Consult Graduate Advisor. Approved for letter and S/U grading. May be repeated to a maximum of 8 hours.

SPAN 599  Thesis Research  credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated.

Special Education (SPED)

SPED Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SPED)
SPED 413 New Media & Learner Differences credit: 4 Hours.
An investigation of the dimensions of learner diversity: material (class, locale), corporeal (age, race, sex and sexuality, and physical and mental characteristics) and symbolic (culture, language, gender, family, affinity and persona). Examines social-cultural theories of difference, as well as considering alternative responses to these differences in educational settings - ranging from broad, institutional responses to specific pedagogical responses within classes of students. No undergraduate credit. 4 graduate hours. Prerequisite: Acceptance into the Master of Education with an emphasis on New Learning and New Literacies program.

SPED 414 Assessment in ECSE credit: 3 Hours.
Practice in designing and applying assessment devices and procedures and in using them to make educational decisions for children with special needs, birth through kindergarten age. 3 undergraduate hours. No graduate credit. Prerequisite: Credit or concurrent registration in SPED 524 or consent of instructor.

SPED 416 Perspectives on Gifted Edu credit: 3 or 4 Hours.
Consideration of persons in society exhibiting gifted behavior; who they are, their physical, psychological, social, and educational characteristics, and society's needs and provisions for them. The major portion of the course is devoted to the consideration and evaluation of instructional and administrative adjustments that should be made for the gifted in the educational structure. 3 or 4 graduate hours.

SPED 424 Foundations of Assessment credit: 3 Hours.
Course focuses on the theoretical and practical considerations in the psychological and educational assessment of individuals with disabilities. An emphasis will be placed on understanding the technical and practical aspects of current assessment procedures and their application to the education of children and youth with disabilities. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 426 Collaboration and Teaching credit: 3 or 4 Hours.
Course is designed to provide participants with the information needed for effective collaboration and interactive teaming. Participants will learn effective models of collaboration and consultation, team member roles and responsibilities, collaborative practices for participating on teams, and strategies for securing appropriate resources for students with disabilities. Emphasis is placed on skills necessary for working collaboratively with parents, teachers, and other service providers. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Requires concurrent enrollment in SPED 524 or EDPR 420, or consent of instructor.

SPED 431 Assistive Tech & Phys Disab credit: 2 Hours.
Course focuses on specialized health care needs, policies, and procedures for working with students with disabilities. An overview is provided of methods for accommodating students including task or environmental modifications, assistive technology, and adaptive equipment options. 2 undergraduate hours. 2 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 432 Multiple Disabilities credit: 3 Hours.
Focuses upon the physical and educational characteristics of individuals with multiple disabilities, particularly those with physical disabilities and other health and sensory impairments; covers educational curricula, teaching methods, and other educational considerations such as working with parents, medical personnel, and support staff, and educational adaptations. 3 undergraduate hours. 3 graduate hours. Prerequisite: Admission to the Department of Special Education or consent of instructor.

SPED 433 Curriculum for Exceptional Students credit: 3 or 4 Hours.
Curriculum design, development, and adaptation for students with moderate and severe disabilities; includes the following basic curriculum areas: domestic/home living, self-care, socialization, community living, leisure and recreation, and functional academics; a focus is on providing instruction in these areas in inclusive educational settings; and an emphasis throughout the course is on the evaluation of curriculum and program effectiveness. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: SPED 436.

SPED 434 Career Development and Transition credit: 1 or 3 Hours.
Course focuses on developing transition plans and activities that prepare students with disabilities for adulthood, including post school employment, independent living, and postsecondary education. Particular emphasis is placed on career development including determining job interests, career exploration, work experiences prior to graduation, job development, and job placement. 1 or 3 undergraduate hours. 1 or 3 graduate hours. Prerequisite: Admission to the Department of Special Education, or consent of instructor.
SPED 446 Curriculum Development I credit: 4 Hours.
Principles and practices for teaching students with disabilities. Topics include models of curriculum development, procedures for identifying curriculum priorities across content areas, and relationships between curriculum and instructional settings. Emphasis is on development of inclusive educational programs that are outcome-driven and on evaluation of program effectiveness. 4 undergraduate hours. 4 graduate hours. Prerequisite: Admission to the Department of Special Education, or consent of instructor.

SPED 447 Curriculum Development II credit: 4 Hours.
Course focus is on ensuring access for students with disabilities to the general education curriculum in English language arts, mathematics, science and social studies by considering the interaction among content area knowledge, pedagogical knowledge, and evidence-based practice. Construction of curriculum in academic content areas with a scope and sequence tailored to individual student characteristics in an area of emphasis. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 446 and admission to the Department of Special Education, or consent of instructor.

SPED 448 Curriculum Development III credit: 4 Hours.
Review and application of curriculum development and adaptation principles and strategies to life skill domain areas. Curriculum areas addressed include domestic/home-living, leisure and recreation, community living, and vocational programs and job preparation. Emphasis on designing instruction to address life skill curriculum needs in inclusive educational programs and on critically evaluating curriculum and program effectiveness. 4 undergraduate hours. 4 graduate hours. Prerequisite: SPED 446 and admission to the Department of Special Education, or consent of instructor.

SPED 450 Introduction to ECSE credit: 2 Hours.
Overview of the history, trends, and issues of the field of Early Childhood Special Education (ECSE) with particular attention to federal and state policy, service system models, and professional roles and ethics. Emphasis is on current research, theory, and practice. 2 undergraduate hours. 2 graduate hours. Prerequisite: Junior standing.

SPED 460 Communication and Phys Disab credit: 4 Hours.
Focuses upon issues and intervention strategies that can impact the communication skills of persons with moderate or severe intellectual and/or physical disabilities. Specific assessment and intervention strategies are discussed as they relate to both verbal and augmentative communication. 4 undergraduate hours. 4 graduate hours.

SPED 461 AAC and Literacy credit: 2 or 3 Hours.
Course focuses on issues and strategies for teaching communication and literacy to individuals with significant intellectual or physical disabilities. Specific assessment and intervention strategies are discussed as they relate to alternative and augmentative communication (AAC) and the development of beginning literacy skills. 2 or 3 undergraduate hours. 2 or 3 graduate hours. Prerequisite: Concurrent enrollment or prior completion of SPED 440, and admission to the Department of Special Education, or consent of instructor.

SPED 465 Curriculum and Methods in ECSE credit: 3 Hours.
Introduction to the field of early childhood special education, including its history and major issues; instructional methods used in teaching and facilitating development in young children with disabilities are covered in depth. 3 undergraduate hours. 3 graduate hours. Prerequisite: Concurrent registration in SPED 524 or consent of instructor.

SPED 470 Learning Environments I credit: 3 Hours.
Course is designed to provide participants with an introduction to theories and interventions related to school climate and classroom management. Course will focus on using positive behavioral supports to create an effective classroom and school climate. 3 undergraduate hours. 3 graduate hours. Prerequisite: Admission to the Department of Special Education, or consent of instructor.

SPED 471 Learning Environments II credit: 3 Hours.
Course is designed to provide participants with specific information on intervention and evaluation strategies related to designing and managing effective learning environments and to becoming a discriminating consumer of the professional literature related to behavior interventions. 3 undergraduate hours. 3 graduate hours. Prerequisite: SPED 470, and admission to the Department of Special Education, or consent of instructor.

SPED 488 Ethics & Prof. Behavior credit: 3 Hours.
Designed to introduce students to ethical issues and challenges that teacher educators and other professionals, including Board Certified Behavior Analysts, may encounter in practice. The topics to be covered all revolve around ethical conduct in practice and research, as well as the decision-making foundations for resolving ethical issues. Students will obtain knowledge and skills through readings, discussion and various case scenarios, reflections, and discussion of the concepts of issues addressed in the reading and assignments. 3 undergraduate hours. 3 graduate hours. Prerequisite: Graduate standing. Undergraduate Seniors (with permission).

SPED 510 Legal Aspects of Disabilities credit: 4 Hours.
Study of the legal rights of individuals with disabilities and their families, with emphasis on educational aspects; inter-relationship of constitutional, statute, administrative and case law at the federal, state and local levels. Case study simulations and mock due process hearings are included.

SPED 513 Intro to Diversity & Equity credit: 4 Hours.
This course, geared to education non-majors, offers an introduction to ways of thinking about educational theories, concepts, and practices as they relate to philosophical discussions surrounding social justice, especially as pertaining to race, class, gender and disability. Broadens students' reflective understanding of the development of educational institutions and practices and, through an emphasis on class discussion, promotes a critical and analytical approach to thinking about the evaluating these institutions and practices. Same as EPS 576. Prerequisite: Acceptance into the Master of Education with an emphasis on Diversity and Equity in Education.

SPED 514 Equity Issues in Spec Educatio credit: 4 Hours.
A graduate-level overview of issues in equity and access for students with disabilities. Historical and legal foundations are reviewed, but the course focus is issues related to characteristics of individuals with disabilities, challenges in instructional service delivery, including of students with special needs in the general curriculum, and transition of students with disabilities to independent living. Participants reflect on issues in light of their own experiences. Prerequisite: Acceptance into the Master of Education with an emphasis on Diversity and Equity in Education Program or instructor approval.
SPED 517 Disability Issues in SPED credit: 4 Hours.
Overview of special education at the graduate level. Focus is placed on issues related to: assessment, identification, and characteristics across all disability areas. The greatest emphasis is placed on strategies for including students with disabilities in the general curriculum. Historical and legal perspectives that provide the foundation for special education are discussed.

SPED 520 Psycho-Social Aspects credit: 4 Hours.
Same as REHB 520. See REHB 520.

SPED 521 Admin & Supervision in SPED credit: 4 Hours.
Examination of administrative and supervisory practices in educating children with disabilities and gifted children in public and private schools; application of administrative theory to special education programs. Designed for graduate students in education administration or special education preparing to direct special education programs. 4 graduate hours. No professional credit. Prerequisite: SPED 517 or consent of instructor.

SPED 524 Supervised Prac in SPED credit: 1 to 8 Hours.
Supervised practice in one or more settings in which students with mild to severe disabilities are served; practicum settings may include day, residential, special, and regular schools which serve students with disabilities. Additional fees may apply. See Class Schedule. Approved for S/U grading only. May be repeated in same or subsequent terms to a maximum of 8 hours. Prerequisite: Admission to the graduate program in special education; consent of supervising faculty member.

SPED 526 Collaborative Leaders in SPED credit: 4 Hours.
Course provides special educators and other professionals with skills and strategies to assume a leader/change agent role in their schools. Participants focus on effective leadership, collaborative practices, and innovative programs in special education that create unique learning environments, ultimately impacting all stakeholders (student with and without disabilities, teachers, families). Course readings, lectures, and activities address how leaders in the field affect change in special education through grant writing, professional development, and the implementation and evaluation of innovative programs and practices. 4 graduate hours. No professional credit. Prerequisite: SPED 426 or equivalent.

SPED 538 Interdisciplinary Teaming credit: 4 Hours.
Study of roles and functions of teams in early intervention and special education service delivery; considers models of team process within and between service settings; explores dynamics of interaction on teams, including approaches to decision-making, communication, and conflict resolution; examines professional roles and tasks of team members in the intervention process.

SPED 545 Transition and Voc Planning credit: 3 Hours.
Provides an orientation to transition planning and vocational training as integrated components of secondary-level education curriculum. Topics include transition planning practices and participants, vocational assessment methods, supported employment concepts and issues, and vocational training strategies and programs. Same as REHB 545.

SPED 550 Methods of Educational Inquiry credit: 4 Hours.
Same as CI 550, EPOL 550, and EPSY 573. See CI 550.

SPED 556 Prob and Trends in SPED credit: 4 to 8 Hours.
Introduction to significant problems, points of view, and trends in the field concerned; explores significant research related to organization, content, and techniques in the field in question. Students are encouraged to design/propose/conduct special studies in approved areas.

SPED 565 Atypical Development: B to 6 credit: 2 or 4 Hours.
Examines characteristics of children with major biological risk conditions and disabilities, birth - six, with a focus on the impact of these conditions on development; briefly examines interventions used by a variety of professionals in addressing specific developmental needs of children with a variety of disabilities. Prerequisite: EPSY 236 or equivalent.

SPED 566 Leadership in ECSE credit: 4 Hours.
Program issues and research on the efficacy of various program models for young children with special needs from infancy to six; implications for program organization variables such as space, personnel roles, and curriculum. Prerequisite: SPED 465 and concurrent enrollment in SPED 524, or consent of instructor.

SPED 583 Single Case Experimental Design credit: 4 Hours.
Study of the analysis of behavior in one or a few subjects using advanced time series designs; includes making accurate and reliable assessment of objective behaviors and designing experiments that feature interpretable comparisons among interventions and credible generalizability to subjects, settings, and time periods other than those specifically studied. Classic and current exemplars of these designs are studied and critiqued in depth. Same as EPSY 583.

SPED 585 Individual Differences: B to 6 credit: 4 Hours.
Examines major developmental themes in young children from birth to six. Emphasizes individual differences resulting from environmental and biological factors that influence development, including those resulting from disabilities. Focuses on integration among multiple domains of development. Prerequisite: Graduate standing or consent of instructor.

SPED 590 Seminar for Advanced Students credit: 0 to 8 Hours.
Seminar in the education of individuals with special needs; open only to persons who have been admitted for graduate study. Additional fees may apply. See Class Schedule. Approved for letter and S/U grading.

SPED 591 Field Study and Thesis Seminar credit: 1 to 8 Hours.
Planning field studies and thesis problems by graduate students; students present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze all presentations critically. May be repeated up to 8 hours. Prerequisite: Admission to graduate studies in Special Education or consent of instructor.

SPED 592 Concepts and Issues in SPED I credit: 4 Hours.
Roles and competencies for special education leadership positions; includes literature critique, and preparation and presentation of a major review paper in an area of research interest. Prerequisite: Admission to doctoral studies in Special Education or consent of instructor.

SPED 593 Concepts and Issues in SPED II credit: 4 Hours.
Seminar in current concepts and issues relating to all children with special needs; introduction to grant proposal writing; and introduction to journal reviewing; requires critical review of key readings and preparation of a literature review of a topic of current research in special education. Prerequisite: SPED 592 or consent of instructor.

SPED 595 Independent Study credit: 1 to 4 Hours.
Self-directive, independent study, that is, develops the individual's ability as an independent student and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given term. May be repeated with approval. Prerequisite: Approval of study outline by advisor and the department head prior to enrollment.

SPED 599 Thesis Research credit: 0 to 16 Hours.
Individual direction of research and thesis writing. Approved for S/U grading only. May be repeated.
Speech and Hearing Science (SHS)

SHS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SHS)

Courses

SHS 111 Living-Learning ASL Part 1 credit: 2 Hours.
An introductory course in American Sign Language (ASL); no previous knowledge or skills are needed. It is offered through the Living in Residence Program at Allen Hall. The focus is on the acquisition of beginning-level vocabulary items and grammar of ASL. ASL is a non-Indo-European language that uses the visual/manual rather than spoken/auditory modality. Students develop a core vocabulary and basic grammar to enable you to communicate using ASL. The Deaf Community, like other cultural groups, defines a population that shares both a language and pattern of transmission of beliefs and values. The course provides an introduction to the culture, traditions, and values of the Deaf Community.

SHS 112 Living-Learning ASL Part 2 credit: 2 Hours.
The second part of an introductory course in American Sign Language (ASL); some knowledge of and skills in ASL are required. It is offered through the Living in Residence Program at Allen Hall. The focus is on the continued acquisition of beginning-level vocabulary items and grammar of ASL. ASL is a non-Indo-European languages that uses the visual/manual rather than spoken/auditory modality. Students develop core vocabulary and grammar to enable you to communicate using ASL. The Deaf Community, like other cultural groups, defines a population that shares both a language and pattern of transmission of beliefs and values. The course provides further information of the culture, traditions, and values of the Deaf Community.

SHS 120 Child, Comm, & Lang Ability credit: 3 Hours.
Provides an introduction to the study of the human communication and language capacity and includes an overview of three areas of inquiry: language science, language development in children, and language disability in children.
This course satisfies the General Education Criteria for:
Social Beh Sci - Beh Sci

SHS 121 American Sign Language I credit: 4 Hours.
This is an introductory course in American Sign Language (ASL). No prior experience with the language is necessary. Students will learn vocabulary, elementary-level grammatical structures, and elements of U.S. Deaf Culture in order to engage in entry-level conversations in ASL. Basic social and communication skills associated with the use of ASL will be emphasized. This course is part of a sequence of courses that will fulfill the foreign language requirement for UIUC undergraduate students. Approved for Letter and S/U grading.

SHS 150 Hearing Processes & Disorders credit: 3 Hours.
An introduction to basic and clinical aspects of audition and their relevance to communication processes and communication disabilities from biological, humanistic, and technological perspectives. Communication processes and development are explored within historical, behavioral, and scientific frameworks. Hearing disabilities are described according to prevention etiology, manifestation, evaluation and treatment. The effects of disability on individuals and families across the lifespan are also addressed.

SHS 170 Intro Hum Comm Sys & Disorders credit: 3 Hours.
Examines broad perspectives of theories and information regarding normal and abnormal communication: how speech and language develop, how people hear, how they produce speech and what can go wrong; addresses the impact of speech and hearing science on society, culture, and modern technologies.

SHS 191 Freshmen Seminar credit: 0 to 9 Hours.
Special experimental seminar or independent study course intended to cover topics not treated by regular course offerings; open to undergraduates at any level. Requests for activation of this course may be made by students or by faculty and should be directed to the head of the academic department concerned. Although credit toward graduation is normally granted, credit toward satisfying specific college or departmental requirements is contingent upon approval by the appropriate college or departmental committee. Approved for S/U grading only.

SHS 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated, if topics vary.

SHS 200 General Phonetics credit: 3 Hours.
Basic principles of phonetic study; includes observation and representation of pronunciation, ear training, and practice in transcription.

SHS 221 American Sign Language II credit: 4 Hours.
This intermediate course in American Sign Language (ASL) is part of a sequence to fulfill the foreign language requirement. Students must have successfully completed SHS 121 or should be able to demonstrate advanced beginner ASL skills. Students will continue to learn vocabulary items and intermediate-level grammatical structures in order to improve conversation skills. As compared to SHS 121, a greater focus is placed on ASL constructions involving the complex use of space (e.g., verb inflections, so-called "classifiers", and constructed action). Same as LING 221. Approved for letter and S/U grading. Prerequisite: SHS 121 or equivalent language skills.

SHS 222 Language & Culture of Deaf Communities credit: 3 Hours.
Students will learn about culture and how it is manifested in various subgroups of society with a particular focus on the culture and language of Deaf people in the United States. Themes include: the linguistics of American Sign Language, aspects of social unity for Deaf people, common experiences of Deaf individuals, the educational system and Deaf students, and current issues that affect the Deaf community. For those students requiring 4 semesters of language other than English credit (LAS or BUS), SHS 222 can be used as the fourth course in the American Sign Language sequence that includes SHS 121, 221, and 321 to fulfill that requirement but cannot also then be used for Gen Ed requirements. Same as EPSY 222.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

SHS 231 Lang Diff Dis: American Persp credit: 3 Hours.
Same as AFRO 231. See AFRO 231.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

SHS 240 Intro Sound & Hearing Science credit: 3 Hours.
Acoustics, anatomy, and physiology of the auditory system; psychophysical methods; and a consideration of auditory theories and mechanics.
SHS 270  Comm Disability in the Media  credit: 4 Hours.
Introduction to the study of human communication disability across the lifespan as depicted in the media and includes an overview of three areas of inquiry: behavioral/psychosocial impact of communication disability, ethical decisions in rehabilitation interventions, and disability rights. This course satisfies the General Education Criteria for:
Advanced Composition
Social Beh Sci - Soc Sci

SHS 271  Communication and Aging  credit: 3 Hours.
Course introduces social and physical issues of communication and aging, with particular emphasis on intergenerational interactions and on the physical disabilities of aging (e.g., hearing loss, Parkinson's disease, strokes, dementia). Discourse analysis techniques are used to integrate the social and physical aspects of aging and communication that are discussed in class. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SHS 280  Communication Neuroscience  credit: 3 Hours.
This course provides an overview of neuroscience with emphasis on human communication, moving from general concepts in neuroanatomy and neurophysiology to the specifics of the neuroscience of hearing, speech and language.

SHS 291  Research Lab Experience in SHS  credit: 1 to 3 Hours.
Supervised participation in research laboratory and scholarly activities, usually as an assistant to an investigator. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 6 hours.

SHS 300  Anat & Physiol Spch Mechanism  credit: 4 Hours.
Introduction to the anatomic and physiologic characteristics of the normal speech mechanism. Same as LING 300.

SHS 301  General Speech Science  credit: 4 Hours.
Consideration of the physiology of the speaking act, and the acoustical and perceptual aspects of speech. Same as LING 303.

SHS 320  Development of Spoken Language  credit: 3 Hours.
Study of the correlates of language development from the prelinguistic period to adulthood.

SHS 321  American Sign Language III  credit: 4 Hours.
This advanced-intermediate course in American Sign Language (ASL) is part of a sequence to fulfill the foreign language requirement. Students must have successfully completed SHS 221 or should be able to demonstrate intermediate ASL conversation skills. Students will learn technical vocabulary items and complex elements of ASL narratives. In this course, students will focus on the fluid use of ASL across various registers and situations. Special emphasis will be placed on receptive fluency of complex constructions in ASL. Same as LING 321. Approved for letter and S/U grading. Prerequisite: SHS 221 or equivalent language skills.

SHS 352  Hearing Health and Society  credit: 3 Hours.
An analysis of how hearing loss influences behavior of individuals and interactions among individuals within larger social/societal groups across the lifespan. Considers issues associated with early detection of hearing loss and promoting hearing conservation in different environments. Approaches to promoting behaviors that enhance communication in the presence of hearing loss will be explored. Philosophical, policy, and cultural controversies for defining hearing loss as a disability will be examined. Each of these topics will be considered within the interplay between the individual person, culture, age, disability, educational environment, community, and social/family interactions.

SHS 370  Civic Engagement in Wellness  credit: 3 Hours.
Same as AHS 365, CHLH 365, KIN 365, and RST 365. See KIN 365.

SHS 375  Comm Partners & Health  credit: 3 Hours.
Combines a community-based volunteer experience with class-based readings/discussion to introduce students to the study of communication in context. Students will use learning journals to document their volunteer experiences, describe the characteristics of conversational interactions they observe, and reflect on their own skills as flexible communication partners with people of various backgrounds and abilities and in a variety of clinical and professional settings. Includes a one-hour weekly discussion section (taught by SHS faculty/instructional staff) and three-four hour weekly community volunteer experiences (supervised by volunteer site employees). Same as AHS 375 and KIN 375. May be repeated in separate terms to a maximum of 6 hours.

SHS 380  Comm Competence and Disorders  credit: 3 Hours.
This course explores ways of defining and documenting communicative competence for individuals with communication disorders in everyday interactions. It introduces students to theories of communication-in-context and methods of discourse analysis. Students will critically review research on discourse of individuals with communication disorders across the lifespan and discuss its relevance to clinical practice. Prerequisite: Minimum sophomore standing or consent of instructor.

SHS 383  Special Topics  credit: 3 or 4 Hours.
Lecture course in topics of current interest in speech and hearing science; specific subject matter announced in the Class Schedule. May be repeated if topics vary.

SHS 385  Evidence-Based Practice in Communication Sciences and Disorders  credit: 3 Hours.
This course is designed to examine how the field of Speech and Hearing Science creates knowledge or evidence to support the assessment and intervention for individuals with communication disorders. Students will gain an introductory understanding of clinical research methodology and become familiar with the process of selecting evidence-based practices. Prerequisite: Sophomore standing or consent of instructor.

SHS 390  Individual Study  credit: 2 to 4 Hours.
Individual investigation of special problems. May be repeated to a maximum of 6 hours. Prerequisite: Ten hours of speech and hearing science, and written approval by the faculty members who will supervise the student's work.

SHS 395  Honors Individual Study  credit: 2 Hours.
Individual study leading either to a thesis or to departmental honors. May be repeated to a maximum of 4 hours. Prerequisite: Senior standing; a cumulative grade point of 3.5 or consent of the head of the department.

SHS 410  Stuttering: Theory & Practice  credit: 3 or 4 Hours.
Study of the theoretical and research literature concerning the causes, diagnosis, and treatment of stuttering and an analysis of clinical procedures in stuttering therapy. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduate credit, students must have senior level status in the SHS Program or consent of instructor. For graduate credit, students must have graduate level status in SHS Program or consent of instructor. Additional work involved.

SHS 411  Normal and Disordered Voice  credit: 3 or 4 Hours.
Study of the biomechanics of normal and disordered voice production with application to both clinical and pedagogical voice training and care. 3 undergraduate hours. 4 graduate hours. Additional work is involved for 4 credit hours.

Information listed in this catalog is current as of 04/2018
SHS 427  Language and the Brain  credit: 3 or 4 Hours.
How the human brain supports production and comprehension of language. Topics covered include: neuroanatomy of language; neuroimaging of language; language disorders; brain lateralization for language; bilingualism and the brain; sign language and the brain. Same as LING 427 and PSYC 427. 3 undergraduate hours. 4 graduate hours. Prerequisite: One of PSYC 210, PSYC 224, PSYC 248, LING 225, SHS 170, or consent of instructor.

SHS 430  Devel & Disorders Phonol Artic  credit: 3 or 4 Hours.
Survey of basic knowledge concerning normal and deviant phonological development, and principles for applying this knowledge to the assessment and remediation of phonological disorders. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduate credit, students must have senior level status in the SHS Program or consent of instructor. Additional work is involved for 3 hours. For graduate credit, students must have graduate level status in the SHS Program or consent of instructor. Additional work involved for 4 hours.

SHS 431  Lang Disorders Preschool Child  credit: 3 or 4 Hours.
Advanced study of early language milestones, processes, and theories; examination of the nature and character of disordered language acquisition in preschool children, and evaluation of current theory and intervention research in the area. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduate credit, students must have senior level status in the SHS program or consent of instructor. For graduate credit, students must have graduate level status in the SHS Program or consent of instructor. Additional work involved for 4 hours credit.

SHS 450  Intro Audiol & Hear Disorders  credit: 4 Hours.
Review of the history of audiology as a profession; study of symptoms, causes, and treatment of hearing losses; and principles and application of basic audiometry. 4 undergraduate hours. 4 graduate hours. Prerequisite: Consent of Instructor.

SHS 451  Aural Rehab Children to Adults  credit: 2 to 4 Hours.
Principles and methods of clinical and classroom retraining of the hard-of-hearing; includes lip reading, auditory training, speech disorders and conservation, and counseling. 2 to 4 undergraduate hours. 2 to 4 graduate hours. Prerequisite: Consent of instructor.

SHS 470  Neural Bases Spch Lang  credit: 4 Hours.
Advanced study of neuroanatomy and neurophysiology with emphasis on current research pertaining to nervous system structures and functions important for speech and language. Critical analyses of current theories of the function of neural mechanisms utilized in speech and language. 4 undergraduate hours. 4 graduate hours. Prerequisite: SHS 300 and SHS 301, or equivalent, or consent of instructor.

SHS 473  Augmentative & Alt Comm  credit: 2 to 4 Hours.
Introduces students to the field of augmentative and alternative communication (AAC), to the range of assistive technologies, and to diagnostic and treatment approaches used by speech-language pathologists. Focuses on the communicative needs of adults and children with acquired communication disorders in a variety of settings (e.g., hospital, school, home, work). 2 to 4 undergraduate hours. 2 to 4 graduate hours. Prerequisite: For undergraduate credit, 2 or 3 hours, students must have senior level status in the SHS Program, or consent of instructor. Additional work is involved for 3 hours. For graduate credit, 2 to 4 hours, students must have graduate level status in the SHS Program, or consent of instructor. Additional work involved for 4 hours.

SHS 475  Prepracticum in SHS  credit: 1 to 2 Hours.
A mentoring experience in which students will be paired with clinical instructors in SHS and provided opportunities to observe clinical speech-language pathology and audiology sessions in a variety of settings. Prepracticum is designed to provide students: 1) initial opportunities to integrate course work with clinical practice; 2) supported experiences in documentation/data collection skills used in clinical settings; and 3) supervised observation hours required by the American Speech-Language and Hearing Association (ASHA) for certification as a Speech-Language Pathologist or Audiologist. 1 to 2 undergraduate hours. No graduate credit. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 2 hours.

SHS 477  Beginning Practicum in SHS  credit: 1 to 3 Hours.
Mentored experience in which students are paired with a clinical instructor in SHS and provided opportunities to assist in the ongoing management of clinical cases in a variety of settings. The beginning practicum is designed for students with less than a year of supervised clinical experience (i.e. 100 or fewer contact hours as defined by the American Speech-Language Hearing Assoc.-ASHA). Working with the clinical team, the beginning practicum will provide students with: 1) supported opportunities to assist in all aspects of clinical practice (e.g., diagnosis, intervention, documentation, team meetings/planning); 2) opportunities to obtain supervised contact hours required by ASHA for certification in Speech-Language Pathology or Audiology. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated in same term to a maximum of 3 undergraduate or 4 graduate hours. May be repeated in separate terms to a maximum of 3 undergraduate or 6 graduate hours. Prerequisite: For students pursuing clinical preparation in speech-language pathology and/or audiology.

SHS 500  Exper Phon I Spch Physiol  credit: 4 Hours.
Theoretical consideration of speech as motor behavior, special reference to physiological investigations of normal respiration, phonation, and supralaryngeal articulation; and survey of the experimental literature in articulatory phonetics. Same as LING 575. Prerequisite: Consent of instructor.

SHS 501  Exper Phon II Spch Acous Perc  credit: 4 Hours.
Theoretical consideration of speech as an acoustical phenomenon; special reference to acoustical investigations of the laryngeal source and radiated speech signal; and survey of the experimental literature in acoustic phonetics and speech perception. Same as LING 576. Prerequisite: Consent of instructor.

SHS 510  Advanced Seminar in Stuttering  credit: 4 Hours.
Advanced study of stuttering disorders; topics vary, but emphasis is placed on research, measurement, evaluation, and methods. Prerequisite: SHS 410 or consent of instructor.

SHS 511  Assessment and Management of Voice Disorders  credit: 4 Hours.
Study of the anatomy, pathophysiology, etiology, acoustics, and perception of abnormal voice production, including foundational skills for assessment, differential diagnosis, and management of voice disorders. 4 graduate hours. No professional credit. Prerequisite: SHS 300, SHS 301, SHS 411 or equivalent or consent of instructor.

SHS 512  Orofacial Anomalies  credit: 2 to 4 Hours.
Evaluation of current theories and intervention research associated with cleft palate and orofacial anomalies. Advanced study and critical analysis of speech, dental, and surgical treatment procedures. Prerequisite: SHS 300, SHS 301 or equivalent or consent of instructor.
SHS 513 Assessment and Management of Dysphagia  credit: 4 Hours.
Study of the anatomy, physiology, and pathophysiology of the oral and pharyngeal stages of swallowing and critical review of the research literature pertaining to methods for diagnosis and treatment of dysphagia. Prerequisite: SHS 300 or equivalent and SHS 470, or consent of instructor.

SHS 514 Motor Speech Disorders  credit: 4 Hours.
Study of the etiology and symptomatology of pediatric and adult speech problems resulting from neurological impairment, and critical review of the research literature pertaining to methods for assessment and treatment of these disorders. Prerequisite: SHS 300 or equivalent and SHS 470, or consent of instructor.

SHS 520 Language Science  credit: 4 Hours.
Study of recent research and theory in neurolinguistics, psycholinguistics, and sociolinguistics. Intensive examination of data collection and analysis procedures in language acquisition, and interpretation of research results relative to different age groups. Implications for clinical practice and clinical research in language disorders are addressed. Prerequisite: SHS 320 or equivalent, or consent of instructor.

SHS 532 Lang Disorders Schl-Age Child  credit: 2 to 4 Hours.
Advanced study of the nature of language impairments and language/learning disabilities found in the school-age population, and ramifications for academic success and social development; critical review of theoretical models and empirical evidence of language learning in older children; evaluation of research in the diagnosis and treatment of language impairments in older children. Prerequisite: SHS 320 or equivalent, or consent of instructor.

SHS 533 Advanced Language Diagnostics  credit: 2 to 4 Hours.
Advanced study of the diagnosis of language disorders in children from infancy through adolescence; particular emphasis on critical evaluation of current methods in assessment, the development of problem-solving skills, and the application of computer technology in language analysis. Prerequisite: SHS 520 or equivalent, or consent of instructor.

SHS 534 Aphasia and Related Disorders  credit: 2 to 4 Hours.
Advanced study of the communication disorders resulting from neurological impairments in adults: critical analysis of the research literature, examination of current theories regarding aphasia and related disorders; evaluation of existing paradigms of diagnosis and intervention. Prerequisite: SHS 470 or consent of instructor.

SHS 540 Psychoacoustics  credit: 4 Hours.
Advanced study of physical nature of sound and its measurement; theory and practice of psychophysics, including the various aspects of psychoacoustics (sensitivity, masking, loudness, pitch, binaural hearing, speech perception) and the nonlinear nature of the auditory system. Prerequisite: SHS 240 or equivalent.

SHS 541 Clinical Auditory Anat & Phys  credit: 4 Hours.
The objective of the course is for students to gain an understanding of the structure and function of the peripheral and central auditory system from a clinically oriented perspective. Clinically relevant topics on the pathophysiology of the auditory system will be presented. Prerequisite: SHS 240, SHS 450 or equivalent, or consent of instructor.

SHS 550 Assess Audition & Aud Disorder  credit: 4 Hours.
Study of technical and clinical aspects of audiological assessment and auditory disorders; critical analysis of clinical and experimental literature; laboratory experience in audiological assessment techniques. Prerequisite: SHS 240, SHS 450, or equivalent, or consent of instructor.

SHS 551 Electrophys Indices Audition  credit: 4 or 5 Hours.
Study of technical and clinical aspects of electrophysiologic measures of audition; critical analysis of clinical and experimental literature; laboratory experience in electrophysiologic techniques. 4 or 5 graduate hours. No professional credit. Prerequisite: SHS 550 or consent of instructor.

SHS 552 Diag Hear Impair Infants Child  credit: 4 Hours.
Study of the major etiologies underlying hearing impairments encountered in the pediatric population, program models for infants and young children at risk for hearing impairment, behavioral and physiologic issues in assessment and evaluation of residual hearing, and selection of hearing aids and other sensory prosthetic devices. Prerequisite: SHS 550.

SHS 553 Hearing Aids and Amplification  credit: 4 Hours.
Study of technical and clinical aspects of personal hearing aids and amplification devices; survey of clinical and experimental literature; laboratory experience in electroacoustic and real-ear measurement, earmold impressions and modification procedures, and solving fitting problems. Prerequisite: SHS 550.

SHS 554 Advanced Audiological Assess  credit: 4 Hours.
Seminar on current research in advanced audiology, with emphasis on experimental and clinical protocols involving electrophysiologic and behavioral measures in areas including newborn auditory screening using evoked potentials, intraoperative and intensive care unit monitoring, brain-mapping, event-related potentials, central auditory assessment, and computerized assessment of balance function. Prerequisite: SHS 551 or equivalent, or consent of instructor.

SHS 555 Comm Lang Probs Hear Impaired  credit: 4 Hours.
Advanced course in the problems and procedures involved in the acquisition of language and communication by persons with severe hearing impairment, particularly those with profound prelingual deafness; emphasis on research and measurement in the development of speech, speechreading, residual hearing, reading, written language, and manual communication, including finger spelling and the language of signs; and stress on the applications of recent approaches in linguistics and psycholinguistics to language development. Prerequisite: Consent of instructor.

SHS 556 Sens Prosth Devices Hear Loss  credit: 4 Hours.
Seminar on current research in signal processing approaches and experimental protocols for the development and fitting of hearing aids, tactile aids, cochlear implants, and assistive listening devices. Prerequisite: SHS 553 or consent of instructor.

SHS 557 Adv Clin Pract Aud Assess Rehab  credit: 1 to 8 Hours.
Supervised assessment and management of patients. Includes audiological evaluation techniques; treatment counseling; hearing aid selection, evaluation, and dispensing; and aural rehabilitation therapy. External placement in a variety of sites is available as well as in the departmental Audiology Clinic. May be repeated with approval. Prerequisite: Graduate standing, plus SHS 240, SHS 450, SHS 451, or equivalent coursework and consent of instructor.

SHS 558 Tinnitus  credit: 2 Hours.
This advanced seminar on tinnitus covers the types of tinnitus, pathophysiology of chronic subjective/sensorineural tinnitus, latest research involving both animal and human studies, assessment of tinnitus, and management of tinnitus. It examines the complexity of tinnitus, its consequences for individuals and societies, and how health-care providers, specifically audiologists, may mitigate its impact. 2 graduate hours. No professional credit. Prerequisite: SHS 541 or consent of instructor. Graduate student status in Speech and Hearing Science or consent of instructor.
SHS 560  Audiological Assessment Lab  credit: 2 Hours.
Clinical laboratory experience in audiological assessment including the evaluation, identification, diagnosis and treatment of hearing loss. Patient counseling and case history intake skills are addressed. Prerequisite: SHS 550 or concurrent enrollment in SHS 550.

SHS 561  Medical Audiology  credit: 4 Hours.
Students will gain in-depth knowledge of the etiology, prevention, identification, diagnosis, and management of auditory disorders, with focus on pathophysiology, ototoxicity, and genetic influences. 4 graduate hours. No professional credit. Prerequisite: SHS 541 and SHS 550 or consent of instructor. Graduate students only.

SHS 563  Amplification Lab  credit: 2 Hours.
Clinical laboratory experience in the selection, testing, fitting and maintenance of current technology amplification devices. Prerequisite: Concurrent enrollment in SHS 553.

SHS 564  Vestibular Assessment and Rehabilitation  credit: 4 Hours.
This course on vestibular assessment and rehabilitation covers the anatomy and physiology of the vestibular system, common vestibular disorders and other causes of dizziness, bedside examination of the dizzy patient, administration and interpretation of vestibular tests including videonystagmography (VNG) and electronystagmography (ENG). It will also cover the role of audiologists and other health care professionals in the assessment and management of dizzy patients, and vestibular rehabilitation. 4 graduate hours. No professional credit. Prerequisite: Graduate student status or consent of instructor.

SHS 565  Teaching in the Professoriate  credit: 4 Hours.
Same as CHLH 565, KIN 565, RST 565. See KIN 565.

SHS 570  Quant Reasoning Spch Hear Sci  credit: 2 or 4 Hours.
Introduction to experimental designs and methods of statistical analysis in speech and hearing research. Prerequisite: Consent of instructor.

SHS 571  Clinical Sociolinguistics  credit: 4 Hours.
Clinical application of sociolinguistic concepts for communicatively impaired populations. Focuses on language difference, and utilizes technological strategies needed for assessment and intervention with linguistically diverse populations. Includes computer analysis of talk data from language disordered and linguistically different speakers. Prerequisite: Consent of instructor.

SHS 572  Counseling in Comm Disorders  credit: 2 to 4 Hours.
Focuses on counseling principles, theories, and methods useful to the speech-language pathologist and audiologist when working with communication disordered individuals and their families. Issues related to ethics, values, grief, culture, family systems, the impact of disability, referral sources and techniques for interviewing and counseling are discussed. Prerequisite: Consent of instructor.

SHS 575  School Spch-Lang Clin Methods  credit: 2 Hours.
Study of methods and materials used in the schools by the speech and language clinician. Approved for S/U grading only. Prerequisite: Consent of instructor.

SHS 576  School Intrmsph Spch-Lang Path  credit: 4 to 8 Hours.
The student is assigned to a school-based speech-language pathologist for a practical learning experience in P-12 schools full-time for 8-16 weeks. The student is expected to apply knowledge learned in the academic and clinical portions of their program to the entire school caseload by the end of this experience. Approved for letter and S/U grading. May be repeated to a maximum of 8 graduate hours. Prerequisite: Forty graduate hours of coursework including a minimum of 6 graduate hours of clinical practicum in SHS 475 C, D, or E, or consent of instructor.

SHS 577  Advanced Practicum in SHS  credit: 1 to 4 Hours.
A mentored experience in which students are paired with a clinical instructor in SHS and provided opportunities to assist and take leadership roles in the ongoing management of clinical cases in a variety of settings. The advanced practicum is designed for students with more than a year of supervised clinical experience (i.e., more than 100 contact hours as defined by the American Speech-Language and Hearing Association-ASHA). Working within a clinical team, the advanced practicum will provide students with: 1) supported opportunities to assist in all aspects of clinical practice (e.g., diagnosis, intervention, documentation, team meetings/planning); 2) take lead clinician and/or case management roles for some cases; 3) opportunities to obtain supervised contact hours required by the ASHA for certification in Speech-Language Pathology or Audiology. May be repeated with approval. Prerequisite: SHS 477.

SHS 579  Prof/Eth/Legal Issues AuD/SLP  credit: 3 Hours.
Emphasis will be placed on issues on ethical and professional integrity in speech and hearing clinical practice, including certification and licensure, quality assurance, evidence based practice, and health care reimbursement. Prerequisite: SHS 555 or SHS 557.

SHS 580  Cochlear Implants  credit: 4 Hours.
Focuses on current cochlear implant technologies, principles of evidence-based practice of cochlear implant assessment and intervention by audiologists and speech-language pathologists, and empirical outcomes for children and adults. 4 graduate hours. No professional credit. Prerequisite: Graduate standing in the Department of Speech and Hearing Science.

SHS 586  Adv Sem Development Com Dis  credit: 2 Hours.
Study of theoretical and empirical research in typical and atypical developmental aspects of children’s communication. Students will critically analyze and interpret the extant literature; lead seminar discussions and write scholarly reviews; and/or design original research projects. Specific topics will vary and be announced in the Class Schedule. 2 graduate hours. No professional credit. Approved for letter and S/U grading. May be repeated in separate terms, if topics vary.

SHS 587  Advanced Seminar in Acquired Communication Disorders  credit: 2 Hours.
Study of theoretical and empirical research in acquired communication disorders in adulthood. Students will critically analyze and interpret the extant literature; lead seminar discussions and write scholarly reviews; and/or design original research projects. Specific topics will vary and be announced in the Class Schedule. 2 graduate hours. No professional credit. Approved for letter and S/U grading. May be repeated in separate terms, if topics vary.

SHS 588  Adv Sem Neural Bases Com Dis  credit: 2 Hours.
Study of theoretical and empirical research in the neural bases of speech, language, hearing, cognitive, and/or swallowing disorders in pediatric and adult populations. Students will critically analyze and interpret the extant literature; lead seminar discussions and write scholarly reviews; and/or design original research projects. Specific topics will vary and be announced in the Class Schedule. 2 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated in separate terms, if topics vary.
SHS 590 History of CSD credit: 4 Hours.
This doctoral seminar explores the evolution of the field of Communication Sciences and Disorders (CSD) by examining: 1) the historical research base of the field; 2) critical research and practice issues that have emerged across the history of field; and 3) the contributions of key figures in the field. The course is designed to help students understand how the discipline has been organized and where their own research interests fit with the respect to the history of the discipline. Prerequisite: Doctoral students in SHS or consent of instructor.

SHS 592 Prosem Spch & Hear Sci credit: 0 to 1 Hours.
Required seminar for all graduate students; involves reporting of ongoing research of faculty, visiting researchers, and students as well as discussion of topics related to professional and academic research careers. Approved for S/U grading only. May be repeated up to 4 credit hours toward degree requirements as topics vary.

SHS 593 Special Problems credit: 1 to 8 Hours.
Investigative projects in speech and hearing not including theses. 1 to 8 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

SHS 594 PhD Early Research Project credit: 1 to 4 Hours.
This mentored research experience provides individualized opportunities for PhD students to conduct research projects under the direction of their faculty mentors/advisors. Approved for S/U grading only. May be repeated in separate terms to a maximum of 8 hours.

SHS 599 Thesis Research credit: 0 to 16 Hours.
Individual research in the various areas of speech and hearing science. Approved for S/U grading only. May be repeated.

Statistics (STAT)

STAT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/STAT)

Courses

STAT 100 Statistics credit: 3 Hours.
First course in probability and statistics at a precalculus level; emphasizes basic concepts, including descriptive statistics, elementary probability, estimation, and hypothesis testing in both nonparametric and normal models. Credit is not given for both STAT 100 and any one of the following: ECON 202, PSYC 235, or SOC 485. Prerequisite: MATH 112. This course satisfies the General Education Criteria for: Quantitative Reasoning I

STAT 200 Statistical Analysis credit: 3 Hours.
Survey of statistical concepts, data analysis, designed and observational studies and statistical models. Statistical computing using a statistical package such as R or a spreadsheet. Topics to be covered include data summary and visualization, study design, elementary probability, categorical data, comparative experiments, multiple linear regression, analysis of variance, statistical inferences and model diagnostics. May be taken as a first statistics course for quantitatively oriented students, or as a second course to follow a basic concepts course. Credit is not given for both STAT 200 and STAT 212. This course satisfies the General Education Criteria for: Quantitative Reasoning I

STAT 212 Biostatistics credit: 3 Hours.
Application of statistical reasoning and statistical methodology to biology. Topics include descriptive statistics, graphical methods, experimental design, probability, statistical inference and regression. In addition, techniques of statistical computing are covered. Credit is not given for both STAT 212 and STAT 200. This course satisfies the General Education Criteria for: Quantitative Reasoning I

STAT 361 Probability & Statistics for Computer Science credit: 3 Hours.
Same as CS 361. See CS 361.

STAT 385 Statistics Programming Methods credit: 3 Hours.
Statisticians must be savvy in programming methods useful to the wide variety of analysis that they will be expected to perform. This course provides the foundation for writing and packaging statistical algorithms through the creation of functions and object oriented programming. Fundamental programming techniques and considerations will be emphasized. Students will also create dynamic reports that encapsulate their implemented algorithms. Students must have access to a computer on which they can install software. Prerequisite: STAT 200 or STAT 212.

STAT 390 Individual Study credit: 1 or 2 Hours.
May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

STAT 391 Honors Individual Study credit: 1 or 2 Hours.
May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

STAT 400 Statistics and Probability I credit: 4 Hours.
Introduction to mathematical statistics that develops probability as needed; includes the calculus of probability, random variables, expectation, distribution functions, central limit theorem, point estimation, confidence intervals, and hypothesis testing. Offers a basic one-term introduction to statistics and also prepares students for STAT 410. Same as MATH 463. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 241 or equivalent.

STAT 408 Actuarial Statistics I credit: 4 Hours.
Examines elementary theory of probability, including independence, conditional probability, and Bayes' theorem; combinations and permutations; random variables, expectations, and probability distributions; joint and conditional distributions; functions of random variables; sampling; central limit theorem. Same as MATH 408. 4 undergraduate hours. 4 graduate hours. Credit is not given for both STAT 408 and either MATH 461 or STAT 400. Prerequisite: MATH 241 or equivalent.

STAT 409 Actuarial Statistics II credit: 4 Hours.
Continuation of STAT 408. Examines parametric point and interval estimation, including maximum likelihood estimation, sufficiency, completeness, and Bayesian estimation; hypothesis testing; linear models; regression and correlation. Same as MATH 409. 4 undergraduate hours. 4 graduate hours. Credit is not given for both STAT 409 and STAT 410. Prerequisite: STAT 408.

STAT 410 Statistics and Probability II credit: 3 or 4 Hours.
Continuation of STAT 400. Includes moment-generating functions, transformations of random variables, normal sampling theory, sufficiency, best estimators, maximum likelihood estimators, confidence intervals, most powerful tests, unbiased tests, and chi-square tests. Same as MATH 464. 3 undergraduate hours. 4 graduate hours. Credit is not given for both STAT 410 and STAT 409. Prerequisite: STAT 400; or STAT 100 and MATH 461.

Information listed in this catalog is current as of 04/2018
STAT 420  Methods of Applied Statistics  credit: 3 or 4 Hours.
Systematic, calculus-based coverage of the more widely used methods of applied statistics, including simple and multiple regression, correlation, analysis of variance and covariance, multiple comparisons, goodness of fit tests, contingency tables, nonparametric procedures, and power of tests; emphasizes when and why various tests are appropriate and how they are used. Same as MATH 469. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 408 or STAT 400; MATH 231 or equivalent; knowledge of basic matrix manipulations; or consent of instructor.

STAT 424  Analysis of Variance  credit: 3 or 4 Hours.
Estimation and hypotheses testing in linear models; one-, two-, and higher-order layouts; incomplete layouts; analysis of covariance; and random effects models and mixed models. 3 undergraduate hours. 4 graduate hours. Prerequisite: Credit or concurrent registration in MATH 415 and STAT 410.

STAT 425  Applied Regression and Design  credit: 3 or 4 Hours.
Explores linear regression, least squares estimates, F-tests, analysis of residuals, regression diagnostics, transformations, model building, factorial designs, randomized complete block designs, Latin squares, split plot designs. Computer work is an integral part of the course. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410.

STAT 426  Sampling and Categorical Data  credit: 3 or 4 Hours.
Sampling: simple random, stratified, systematic, cluster, and multi-stage sampling. Categorical data: multiway contingency tables, maximum likelihood estimation, goodness-of-fit tests, model selection, logistic regression. Computer work is an integral part of the course. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410.

STAT 427  Statistical Consulting  credit: 3 or 4 Hours.
Students, working in groups under the supervision of the instructor, consult with faculty and graduate students through the Statistical Consulting Service; readings from literature on consulting. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 425 or consent of instructor.

STAT 428  Statistical Computing  credit: 3 or 4 Hours.
Examines statistical packages, numerical analysis for linear and nonlinear models, graphics, and random number generation and Monte Carlo methods. Same as CSE 428. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410 or equivalent; knowledge of a programming language.

STAT 429  Time Series Analysis  credit: 3 or 4 Hours.
Studies theory and data analysis for time series; examines autoregressive moving average model building and statistical techniques; and discusses spectral model building and statistical analysis using windowed periodograms and Fast Fourier Transformations. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410.

STAT 430  Topics in Applied Statistics  credit: 3 or 4 Hours.
Formulation and analysis of mathematical models for random phenomena; extensive involvement with the analysis of real data; and instruction in statistical and computing techniques as needed. 3 undergraduate hours. 4 graduate hours. May be repeated with approval. Prerequisite: STAT 410 or STAT 420; or consent of instructor.

STAT 431  Applied Bayesian Analysis  credit: 3 or 4 Hours.
Introduction to the concepts and methodology of Bayesian statistics, for students with fundamental knowledge of mathematical statistics. Topics include Bayes’ rule, prior and posterior distributions, conjugacy, Bayesian point estimates and intervals, Bayesian hypothesis testing, noninformative priors, practical Markov chain Monte Carlo, hierarchical models and model graphs, and more advanced topics as time permits. Implementations in R and specialized simulation software. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410 and knowledge of R.

STAT 432  Basics of Statistical Learning  credit: 3 or 4 Hours.
Topics in supervised and unsupervised learning are covered, including logistic regression, support vector machines, classification trees and nonparametric regression. Model building and feature selection are discussed for these techniques, with a focus on regularization methods, such as lasso and ridge regression, as well as methods for model selection and assessment using cross validation. Cluster analysis and principal components analysis are introduced as examples of unsupervised learning. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 400, and either STAT 420 or STAT 425.

STAT 434  Survival Analysis  credit: 3 or 4 Hours.
Introduction to the analysis of time-to-event outcomes. Topics center around three main procedures: the Kaplan-Meier estimator, the log-rank test, and Cox regression. Emphasis on big-picture concepts, basic methodological understanding, and practical implementation in R. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 410, STAT 420, and knowledge of R at the level of STAT 420.

STAT 440  Statistical Data Management  credit: 3 or 4 Hours.
The critical elements of data storage, data cleaning, and data extractions that ultimately lead to data analysis are presented. Includes basic theory and methods of databases, auditing and querying databases, as well as data management and data preparation using standard large-scale statistical software. Students will gain competency in the skills required in storing, cleaning, and managing data, all of which are required prior to data analysis. Same as CSE 440. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 400 or STAT 409.

STAT 443  Professional Statistics  credit: 3 or 4 Hours.
This project-based course emphasizes written, visual, and oral communication of statistical results and conclusions. An introduction to statistical consulting is also provided. Additional topics include introductions to statistical methodologies in industry and aspects of careers in statistics. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 400 or STAT 409.

STAT 448  Advanced Data Analysis  credit: 4 Hours.
Several of the most widely used techniques of data analysis are discussed with an emphasis on statistical computing. Topics include linear regression, analysis of variance, generalized linear models, and analysis of categorical data. In addition, an introduction to data mining is provided considering classification, model building, decision trees, and cluster analysis. Same as CSE 448. 4 undergraduate hours. 4 graduate hours. Prerequisite: STAT 400 or STAT 409, and credit for or concurrent registration in STAT 410.

STAT 458  Math Modeling in Life Sciences  credit: 3 or 4 Hours.
Same as ANSC 448 and IB 487. See ANSC 448.

STAT 466  Image and Neuroimage Analysis  credit: 3 or 4 Hours.
Same as PSYC 466. See PSYC 466.
STAT 480  Data Science Foundations  credit: 3 or 4 Hours.
Examines the methods of data management and analysis for "big data", characterized by high volume, variety, velocity, and veracity. Attention will be focused on advanced statistical analysis and visualization in data science applications employing parallel processing, storage and distribution techniques necessary for analysis of massive data sets. Data mining techniques, machine learning methods, and streaming technologies will be utilized for real-time analysis. Students must have access to a computer on which they can install software. 3 undergraduate hours. 4 graduate hours. Prerequisite: STAT 425 and familiarity with high-level language (e.g. Python, Java, C, F#), and command line programming.

STAT 484  Ethical Practice of Statistics  credit: 3 or 4 Hours.
Same as PSYC 484. See PSYC 484.

STAT 510  Mathematical Statistics I  credit: 4 Hours.
Distributions, transformations, order-statistics, exponential families, sufficiency, delta-method, Edgeworth expansions; uniformly minimum variance unbiased estimators, Rao-Blackwell theorem, Cramer-Rao lower bound, information inequality; equivariance. Prerequisite: STAT 410.

STAT 511  Mathematical Statistics II  credit: 4 Hours.
Bayes estimates, minimaxity, admissibility; maximum likelihood estimation, consistency, asymptotic efficiency; testing and confidence intervals; Neyman-Pearson lemma, uniformly most powerful tests; likelihood ratio tests and large-sample approximation; nonparametrics. Prerequisite: STAT 510.

STAT 525  Computational Statistics  credit: 4 Hours.
Various topics, such as ridge regression; robust regression; jackknife, bootstrap, cross-validation and resampling plans; E-M algorithm; projection pursuit; all with a strong computational flavor. Same as CSE 525. May be repeated if topics vary. Prerequisite: STAT 425, STAT 426, and STAT 511; or consent of instructor.

STAT 530  Bioinformatics  credit: 4 Hours.
Same as ANSC 543, CHBE 571, and MCB 571. See CHBE 571.

STAT 534  Advanced Survival Analysis  credit: 4 Hours.
Introduction to the analysis of time-to-event outcomes. Topics include censoring, discrete survival, parametric models, nonparametric one- and K-sample methods, Cox regression, regression diagnostics, time-dependent covariates, and multivariate survival outcomes. Emphasis on key underlying concepts. Counting process-based theoretical justification and practical implementation will also be discussed. 4 graduate hours. No professional credit. Prerequisite: STAT 410, STAT 425, and knowledge of R.

STAT 538  Clinical Trials Methodology  credit: 4 Hours.
The topics of the course focus on clinical trials designs and inferential techniques that are commonly used in the pharmaceutical industry. Topics include fixed sample designs for normal and survival data, two-sided group sequential design, Pocock's and O'Brien-Fleming boundaries, general theory of group sequential design, alpha and beta spending functions, one-sided designs with early stopping to accept the null hypothesis, non-inferiority designs, and inferential techniques. Computing in SAS will be emphasized. 4 graduate hours. No professional credit. Prerequisite: STAT 410, STAT 425, and familiarity with SAS.

STAT 542  Statistical Learning  credit: 4 Hours.
Modern techniques of predictive modeling, classification, and clustering are discussed. Examples of these are linear regression, nonparametric regression, kernel methods, regularization, cluster analysis, classification trees, neural networks, boosting, discrimination, support vector machines, and model selection. Applications are discussed as well as computation and theory. Same as CSE 542. Prerequisite: STAT 410 and STAT 425.

STAT 543  Appl. Multivariate Statistics  credit: 4 Hours.
Same as CPSC 543. See CPSC 543.

STAT 545  Spatial Statistics  credit: 4 Hours.
Theory and methods for analyzing univariate and multivariate spatial and spatiotemporal data. Covers both fundamental theories and cutting-edge research advances for geostatistics, and statistical methods for aggregated data and point processes. Real data examples will be provided in class and statistical software will be used to illustrate the data analysis. 4 graduate hours. No professional credit. Prerequisite: STAT 425 or equivalent.

STAT 551  Theory of Probability I  credit: 4 Hours.
Same as MATH 561. See MATH 561.

STAT 552  Theory of Probability II  credit: 4 Hours.
Same as MATH 562. See MATH 562.

STAT 553  Probability and Measure I  credit: 4 Hours.
Measures and probabilities; integration and expectation; convergence theorems and inequalities for integrals and expectations; independence; convergence in probability, almost surely, and mean; Three Series Theorem; laws of large numbers. Prerequisite: MATH 447 or consent of instructor.

STAT 554  Probability and Measure II  credit: 4 Hours.
Measure extensions, Lebesgue-Stieltjes measure, Kolmogorov consistency theorem; conditional expectation, conditional probability, martingales; distribution functions and characteristic functions; convergence in distribution; Central Limit Theorem; Brownian Motion. Credit is not given for both STAT 554 and either MATH 561 or MATH 562.

STAT 555  Applied Stochastic Processes  credit: 4 Hours.
Same as MATH 564. See MATH 564.

STAT 558  Risk Modeling and Analysis  credit: 4 Hours.
Same as MATH 563. See MATH 563.

STAT 571  Multivariate Analysis  credit: 4 Hours.
Inference in multivariate statistical populations emphasizing the multivariate normal distribution; derivation of tests, estimates, and sampling distributions; and examples from the natural and social sciences. Prerequisite: STAT 410 and MATH 415, or consent of instructor.

STAT 575  Large Sample Theory  credit: 4 Hours.
Limiting distribution of maximum likelihood estimators, likelihood ratio test statistics, U-statistics, M-, L-, and R-estimators, nonparametric test statistics, Von Mises differentiable statistical functions; asymptotic relative efficiencies; asymptotic expansions. Same as ECON 578. Prerequisite: STAT 511 and either MATH 561 or STAT 554.

STAT 578  Topics in Statistics  credit: 4 Hours.
May be repeated if topics vary. Prerequisite: Consent of instructor.

STAT 587  Hierarchical Linear Models  credit: 4 Hours.
Same as PSYC 587 and EPSY 587. See EPSY 587.

STAT 588  Covar Struct and Factor Models  credit: 4 Hours.
Same as EPSY 588, PSYC 588, and SOC 588. See PSYC 588.
SBC 501 Strategic Branding: Global Perspectives credit: 2 Hours.
Within the context of globalization, the course underscores the importance of understanding consumers' values, attitudes, and behaviors for effective product positioning, brand value and effective marketing communications across borders. Focus on consumer behavior and brand positioning across local, regional, and global contexts. This course is designed to provide students with an advanced understanding of consumer behavior in a global context. 2 graduate hours. No professional credit. Prerequisite: Restricted to MS: SBC students.

SBC 502 Essentials of Business Management credit: 3 Hours.
This course provides an understanding of theoretical and historical perspectives on business and capitalism. Covers basic principles of business strategy; understanding of financial accounting and budgeting; the importance of ethics; principles of leadership; and the importance of the global business environment. 3 graduate hours. No professional credit. Approved for Letter and S/U grading. Prerequisite: Restricted to MS: SBC Students.

SBC 503 Consumer Insights I credit: 3 Hours.
The course explores how cultural, sociological and psychological factors shape consumer behavior. It will provide an overview of the key concepts of the discipline of consumer behavior and enable students to put into practice the new found understanding of consumer behavior to shape branding strategies. 3 graduate hours. No professional credit. Approved for Letter and S/U grading. Prerequisite: Restricted to MS: SBC students.

SBC 504 Managing Projects & Teams credit: 3 Hours.
Successful Strategic Brand Communication requires working on a series of projects. This course provides a socio-technical perspective to the management of projects. The technical dimensions deal with needs analysis, work breakdown, scheduling, resource allocation, risk management, and performance tracking and evaluation - within the allocated time frame and cost. The sociocultural dimensions include attributes of sound leadership, formation and management of teams, and managing customer expectations in order to formulate consistent, integrated campaigns across channels. 3 graduate hours. No professional credit. Approved for Letter and S/U grading. Prerequisite: Restricted to MS: SBC students.

SBC 505 Consumer Insights II credit: 3 Hours.
The course will provide an overview of the key qualitative methods used to gain strategic insights into consumer behavior and to provide practice in planning research projects, data collection, and analysis. 3 graduate hours. No professional credit. Approved for Letter and S/U grading. Prerequisite: Restricted to MS: SBC students.

SBC 506 Measurement and Evaluation credit: 3 Hours.
This course will focus on the method and analysis for consumer insights but also for measuring effectiveness of various promotional strategies and campaign effectiveness. This includes an overview of quantitative research methods with emphasis on analysis and interpretation of data, and application to evaluating effectiveness of promotional strategies. 3 graduate hours. No professional credit.

SBC 507 Promotional Strategy credit: 3 Hours.
This course will familiarize students with the topic of marketing communications and promotion management, and will teach students the steps for strategically planning a strategic brand communications campaign. The culmination of this course will be a campaign for a real-world client. 3 graduate hours. No professional credit.

SBC 508 Messaging Strategy credit: 3 Hours.
Creating and executing successful messages across communication channels. Explores the development of persuasive messaging through theories of persuasion, consumer-information processing and theories of creativity. The course examines the relationship between creative strategy and creative executions while allowing students to practice creating content for traditional and non-traditional media. Strategic brand communication manages every message and contact point within an organization. Audiences include not only consumers, but employees, stockholders, the media, and others. 3 graduate hours. No professional credit. Prerequisite: SBC 507.

SBC 509 Strategic Media Management credit: 3 Hours.
Analyses the markets served by various advertising media and factors to consider in the selection and evaluation of media. Markets include investors, employees, and consumer segments. This course will also cover managing media in a global context. This course is designed to provide students with an advanced understanding of media analysis, planning, buying and optimization. 3 graduate hours. No professional credit. Prerequisite: SBC 502, SBC 507. Restricted to MS: SBC students.
SBC 511 Strategic Analytics & Data Visual credit: 2 Hours.
This course will prepare students to utilize data for targeting and building customer and brand relationships, with an emphasis on new and emerging media. The students will get exposure to principles of working with structured data using relational databases and data warehouses. They will understand how to work with unstructured data from the web. The will also get exposure to select data mining methods relevant to data commonly worked on by marketing and communication executives and apply these concepts with cases/exercises during each of these modules. 2 graduate hours. No professional credit. Approved for Letter and S/U grading. Prerequisite: Restricted to MS: SBC student.

SBC 512 Professional SBC Capstone Project credit: 2 Hours.
This course serves as a capstone, requiring the student to demonstrate a mastery of knowledge in the primary areas of Strategic Brand Communication. The project is designed to allow the student to demonstrate his/her mastery of strategic brand communication, focused on Creating and Executing a Research Plan; Repositioning Analysis and Strategy; Strategic Brand Communication Strategy & Tactics; Media Strategy & Tactics; Campaign Monitoring and Evaluation. 2 graduate hours. No professional credit. Prerequisite: SBC 511. Restricted to MS: SBC students.

Swahili (SWAH)

SWAH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SWAH)

Courses

SWAH 201 Elementary Swahili I credit: 5 Hours.
Beginning standard Swahili; emphasizes grammar, pronunciation, reading and conversation in standard Swahili. Same as AFST 231. Participation in language laboratory required.

SWAH 202 Elementary Swahili II credit: 5 Hours.
Continuation of elementary Swahili, with introduction of more advanced grammar; emphasizes more fluency in speaking, reading, and writing simple sentences in standard Swahili. Same as AFST 232. Participation in language laboratory required. Prerequisite: SWAH 201.

SWAH 403 Intermediate Swahili I credit: 4 Hours.
Second-year Swahili with emphasis on developing conversational fluency; some readings on Swahili culture and customs. Same as AFST 433. 4 undergraduate hours. 4 graduate hours. Prerequisite: One year of Swahili.

SWAH 404 Intermediate Swahili II credit: 4 Hours.
Continuation of SWAH 403; emphasis on the development of appropriate reading, writing, speaking, and comprehension skills in Standard Swahili, and understanding of East African culture. Same as AFST 434. 4 undergraduate hours. 4 graduate hours. Prerequisite: SWAH 403 or equivalent.

SWAH 405 Advanced Swahili I credit: 3 Hours.
Third-year Swahili with emphasis on conversational fluency and on increased facility in reading Swahili texts, including current newspaper prose and (East) African culture materials. Same as AFST 435. 3 undergraduate hours. 3 graduate hours. Prerequisite: SWAH 404 or equivalent.

SWAH 406 Advanced Swahili II credit: 3 Hours.
Third-year Swahili with emphasis on conversational fluency and on increased facility in reading Swahili texts, including current newspaper prose and (East) African culture materials. Same as AFST 436. 3 undergraduate hours. 3 graduate hours. Prerequisite: SWAH 405 or equivalent.

SWAH 407 Topics Swahili Lang & Lit I credit: 3 Hours.
Selected readings from modern Kiswahili authors, with a focus on novels, plays, and basic poetry illustrative of East African cultural issues and advanced level Kiswahili grammar, as well as development of expository writing skills. Same as AFST 405. 3 undergraduate hours. 3 graduate hours. Prerequisite: SWAH 406.

SWAH 408 Topics Swahili Lang & Lit II credit: 3 Hours.
Continuation of SWAH 407 with increased emphasis on the reading and comprehension of literary texts exemplified in advanced level novels, plays, and poetry, as well as on advanced mastery of expository writing skills. Same as AFST 406. 3 undergraduate hours. 3 graduate hours. Prerequisite: SWAH 407.

SWAH 409 Adv Topics Swahili Lang & Lit I credit: 3 or 4 Hours.
Introduction to Kiswahili in the professions as documented in selected newspapers, educational radio and TV programs, works of fiction, biographies, anthologies, and professional journals. Students will be introduced to argumentative writing in Kiswahili, expected to make oral presentations, and to write a research paper in their field. Same as AFST 407. 3 undergraduate hours. 4 graduate hours. Prerequisite: SWAH 408.

SWAH 410 Adv Topics Swahili Lang & Lit II credit: 3 or 4 Hours.
Continuation of SWAH 409 with increased emphasis on the development of comprehension and writing of professional language. Same as AFST 408. 3 undergraduate hours. 4 graduate hours. Prerequisite: SWAH 409.

Systems Engineering and Design (SE)

SE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SE)

Courses

SE 100 Introduction to ISE credit: 1 Hour.
Overview of the engineering profession, the Industrial & Enterprise Systems Engineering Department, and the curricula in Industrial Engineering and Systems Engineering and Design.

SE 101 Engineering Graphics & Design credit: 3 Hours.
Computer-aided design (CAD) software modeling of parts and assemblies. Parametric and non-parametric solid, surface, and wireframe models. Part editing and two-dimensional documentation of models. Planar projection theory, including sketching of perspective, isometric, multiview, auxiliary, and section views. Spatial visualization exercises. Dimensioning guidelines, tolerancing techniques. Team design project. Credit is not given for both SE 101 and ME 170.

SE 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
Undergraduate Open Seminar. May be repeated.

SE 261 Business Side of Engineering credit: 1 Hour.
Important elements and metrics of business and contemporary engineering economics: wealth creation, cash flow diagrams, internal rate of return, net present value, breakeven analysis, companies, corporations, profits, prices, balance sheets, income statements, and the basics of business plan writing. Particular emphasis is given to preparation for the economic analysis component of engineering practice.
SE 290  ISE Undergraduate Seminar  credit: 0 Hours.
Lecture-discussion series by department faculty and visiting professional engineers addressing ethics, professional registration, the role of technical societies, and the relation of engineering to such disciplines as economics, sociology, and government. Approved for Letter and S/U grading.

SE 297  Independent Study  credit: 1 to 4 Hours.
Individual investigations of any phase of Systems Engineering and Design selected by the students and approved by the department. May be repeated. Prerequisite: Consent of instructor.

SE 298  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in general engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites.

SE 310  Design of Structures and Mechanisms  credit: 3 Hours.
Fundamental concepts in the classical and computer-based analysis and design of structural and machine components and assemblies. External loads, internal forces, and displacements in statically determinate and indeterminate configurations: kinematics of linkages, gears, and cams; static forces in machines. Prerequisite: CS 101, TAM 212, and TAM 251. Credit or concurrent enrollment in MATH 415.

SE 311  Engineering Design Analysis  credit: 3 Hours.
Stress-strain conditions; analytical and numerical (CAD) solution techniques; analysis of various engineering materials and configurations as applied to the development and application of design analysis criteria. Prerequisite: SE 310; concurrent registration in SE 312.

SE 312  Instrumentation and Test Lab  credit: 1 Hour.
Preparation for experimental projects; mechanical and electrical instruments; mechanical testing of materials; experimental stress analysis and photoelastic methods. Prerequisite: SE 310; concurrent registration in SE 311.

SE 320  Control Systems  credit: 4 Hours.
Fundamental control systems and control systems technology. Sensors, actuators, modeling of physical systems, design and implementation of feedback controllers; operational techniques used in describing, analyzing and designing linear continuous systems; Laplace transforms; response via transfer functions; stability; performance specifications; controller design via transfer functions; frequency response; simple nonlinearities. Credit is not given for both SE 320 and either AE 353 or ME 340. Prerequisite: CS 101, MATH 285, and TAM 212; credit or concurrent registration in ECE 211.

SE 361  Emotional Intelligence Skills  credit: 3 Hours.
Understanding emotions in ourselves and others. Assessment and improvement of interpersonal skills and emotional intelligence competencies including self-regulation, motivation, empathetic listening, communication, influence collaboration and cooperation, conflict management, leadership, teamwork, and managing change. Includes one Saturday laboratory session.

SE 390  General Engineering Seminar  credit: 0 Hours.
Lecture-discussion series by department faculty and visiting professional engineers addressing ethics, professional registration, the role of technical societies, and the relation of engineering to such disciplines as economics, sociology, and government. Approved for Letter and S/U grading.

SE 397  Independent Study  credit: 1 to 4 Hours.
Individual investigations or studies of any phase of General Engineering selected by the students and approved by the department. May be repeated in same term. Prerequisite: Consent of instructor.

SE 398  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in general engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites.

SE 400  Engineering Law  credit: 3 or 4 Hours.
Nature and development of the legal system; legal rights and duties important to engineers in their professions; contracts, uniform commercial code and sales of goods, torts, agency, worker’s compensation, labor law, property, environmental law, intellectual property. 3 undergraduate hours. 4 graduate hours. Prerequisite: RHET 105.

SE 402  Comp-Aided Product Realization  credit: 3 or 4 Hours.
Computer-aided design, analysis, and prototyping tools used in the produce development process. Principles of computer graphics and geometric modeling, including transformations, coordinate systems, parametric solid modeling, spline curves, and surface modeling. Finite element and kinematics analyses. Rapid prototyping, product dissection, CAD-CAM-CAE operability issues, and CAD collaboration tools. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: SE 101 and SE 311.

SE 410  Component Design  credit: 3 Hours.
Design of basic engineering components: structural members, machine parts, and connections. Principles applied include: material failure (yield, fracture, fatigue); buckling and other instabilities; design reliability; analytical simulation. 3 undergraduate hours. No graduate credit. Prerequisite: SE 311 and SE 320.

SE 411  Reliability Engineering  credit: 3 or 4 Hours.
Concepts in engineering design, testing, and management for highly reliable components and systems. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: IE 300.

SE 412  Nondestructive Evaluation  credit: 3 or 4 Hours.
Nondestructive Evaluation (NDE) principles and the role of NDE in design, manufacturing, and maintenance. Primary Nondestructive Testing and Evaluation (NDT&E) techniques, introduced from the fundamental laws of physics, including visual, ultrasonic, acoustic emission, acousto-ultrasonic, radiology, electro-magnetic, eddy-current, penetrant, thermal, and holographic. Industrial applications of probability of flaw detection, material properties characterization, impact and fatigue damage evaluation, adhesion, etc. Current literature. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CEE 300.

SE 413  Engineering Design Optimization  credit: 3 Hours.
Application of optimization techniques to engineering design problems. Emphasis on problem formulation, including applications in structural, mechanical, and other design domains. Important theoretical results and numerical optimization methods. Matlab programming assignments to develop software for solving nonlinear mathematical programming problems. 3 undergraduate hours. 3 graduate hours. Prerequisite: MATH 241 and MATH 415.
SE 420 Digital Control Systems  credit: 4 Hours.
Theory and techniques for control of dynamic processes by digital
computer; linear discrete systems, digital filters, sampling signal
reconstruction, digital design, state space methods, computers, state
estimators, and laboratory techniques. 4 undergraduate hours. 4
graduate hours. Prerequisite: SE 320.

SE 422 Robot Dynamics and Control  credit: 4 Hours.
Fundamental concepts and analytical methods for analysis and design
of robot systems. Laboratory experiments complement theoretical
development. Same as ECE 489 and ME 446. 4 undergraduate hours. 4
graduate hours. Prerequisite: SE 320. Recommended: ECE 470.

SE 423 Mechatronics  credit: 3 Hours.
Mechatronics concepts and practice: computer interfacing of physical
devices (sensors, actuators); data acquisition; real-time programming
and real-time control; human-machine interfaces; design principles of
mechatronics in manufacturing systems and in consumer systems. 3
undergraduate hours. 3 graduate hours. Prerequisite: SE 320.

SE 424 State Space Design for Control  credit: 3 Hours.
Design methods; time domain modeling; trajectories and phase plane
analysis; similarity transforms; controllability and observability; pole
placement and observers; linear quadratic optimal control; Lyapunov
stability and describing functions; simulation. 3 undergraduate hours. 3
graduate hours. Prerequisite: SE 320 and MATH 415.

SE 450 Decision Analysis I  credit: 3 or 4 Hours.
Rules of thought that transform complex decision situations into simpler
ones where the course of action is clear. Practical application of decision
analysis in large organizations; methods to generate insights into real-
life decision problems, avoid the common pitfalls in decision processes,
and overcome the possible barriers to implementing a high-quality
decision-making process for individual and organizational decision
making; graphical representations of decision problems such as decision
diagrams and utility diagrams. 3 or 4 undergraduate hours. 3 or 4
graduate hours. Prerequisite: IE 300.

SE 462 Leading Sustainable Change  credit: 3 Hours.
Theories and process of change; systems thinking concerning change
consequences; building coalitions and communities to support change;
implementing and managing projects effectively. Processes to plan,
implement, manage, and sustain change with an organization through
alignment of change strategies with organizational and individual
concerns. 3 undergraduate hours. 3 graduate hours.

SE 494 Senior Engineering Project I  credit: 3 Hours.
Senior engineering project - team component. Student teams of three
or four, guided by faculty advisors, develop solutions to real-world
engineering problems provided by industry-partnering companies,
subject to realistic constraints and supported by economic analyses and
recommendations for implementation. Prototype solutions fabricated
where practical. Multiple reports and presentations throughout the term.
Several trips to company typical. Common project grade for all team
members. SE 494 and SE 495 taken concurrently fulfill the Advanced
Composition Requirement. Approval of the department is required to
register. 3 undergraduate hours. No graduate credit. Prerequisite: SE 261,
SE 390 and; SE 311, IE 300, IE 310, and TAM 335; or IE 310, IE 311, and
IE Technical Elective; credit or concurrent registration in a SE Design
Elective and IE Engineering Science Elective. Must enroll concurrently in
SE 495.
This course satisfies the General Education Criteria for:
Advanced Composition.

SE 495 Senior Engineering Project II  credit: 2 Hours.
Adjunct to SE 494. Senior engineering project – individual component.
Individual grade for each team member. SE 494 and SE 495 taken
concurrently fulfill the Advanced Composition Requirement. 2
undergraduate hours. No graduate credit. Prerequisite: Concurrent
registration in SE 494.
This course satisfies the General Education Criteria for:
Advanced Composition

SE 497 Independent Study  credit: 0 to 4 Hours.
Advanced problems related to General Engineering. 0 to 4 undergraduate
hours. 0 to 4 graduate hours. Approved for Letter and S/U grading. May
be repeated in same term. Prerequisite: Consent of instructor.

SE 498 Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in
genral engineering intended to augment the existing curriculum. See
Class Schedule or departmental course information for topics and
prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours.

SE 520 Analysis of Nonlinear Systems  credit: 4 Hours.
Same as ECE 528 and ME 546. See ECE 528.

SE 521 Multivariable Control Design  credit: 4 Hours.
Same as AE 555. See AE 555.

SE 522 Discrete Event Dynamic Systems  credit: 3 or 4 Hours.
Modeling, analysis, control, and performance evaluation of discrete
event dynamic systems (DEDS), which are characterized by state
changes only at discrete points in time in response to the occurrence of
particular events. Discrete-state and discrete-event models decidability,
computational issues, forbidden-state problems, forbidden-string
problems, enforcing safety and liveness properties via supervision,
generalized semi-Markov processes, sensitivity analysis via likelihood
ratio and infinitesimal perturbation methods. 3 or 4 graduate hours.
No professional credit. Prerequisite: CS 173 or MATH 213; CS 225;
MATH 415; MATH 461.

SE 524 Data-Based Systems Modeling  credit: 4 Hours.
Identification and building of mathematical and computational models
directly from data. Systems and model types, such as state-space
and distributed-parameter; parametric estimation methods, such as
regression and least-squares recent subspace identification methods;
data preprocessing techniques; model validation methods. Assignment
applications to a wide range of dynamical systems, including biological,
electro-mechanical, and economic. 4 graduate hours. No professional
credit. Prerequisite: SE 424 and IE 300.

SE 525 Control of Complex Systems  credit: 4 Hours.
Control methodologies for complex (i.e., interconnected) dynamic
systems. A unified framework based on the vector Liapunov functions
concept is used to examine various methodologies: decentralized
overlapping control; optimal control of interconnected systems; multi-
player differential game theory; decentralized optimization and its link
with the multi-criteria optimization. Illustrative examples in areas such as
control of groups of unmanned vehicles, control of power systems, and
coverage control. 4 graduate hours. No professional credit. Prerequisite:
SE 424.
SE 530  Multiattribute Decision Making  credit: 4 Hours.
Tools for subjective multiple attribute decision making when present
or future states of nature are uncertain. Exploration of current research
in developing computer aids to decision making. Issues in descriptive
versus normative approaches in the context of the interface between
operations research and artificial intelligence. Multiattribute utility
analysis from theoretical foundations through assessment procedures,
practice, and pitfalls of potential cognitive bases. 4 graduate hours. No
professional credit. Prerequisite: CEE 202 or IE 300.

SE 550  Decision Analysis II  credit: 3 or 4 Hours.
Continuation of SE 450. Fundamental requirements of a decision-making
system; comparison of different decision-making methods; "paradoxes"
in decision making; foundations and history of probability as a degree
of belief; Bayesian vs. classical statistics; entropy of a random variable;
experimentation and optimal stopping; invariance formulations in
utility and probability; one-switch preferences; graph-based methods to
incorporate dependence in multiattribute utility functions. 3 or 4 graduate
hours. No professional credit. Prerequisite: SE 450.

SE 590  Seminar  credit: 0 Hours.
Presentations by graduate students, staff, and guest lecturers of current
topics in research and development in General Engineering. 0 graduate
hours. No professional credit. Approved for Letter and S/U grading. May
be repeated. Required of all graduate students each term.

SE 594  Project Design  credit: 1 to 8 Hours.
Engineering design projects emphasizing advanced engineering analysis,
synthesis, optimization, and engineering economics. 1 to 8 graduate
hours. No professional credit. May be repeated to a maximum of 8 hours
for credit toward the Master's degree.

SE 597  Independent Study  credit: 1 to 4 Hours.
Advanced problems related to General Engineering. 1 to 4 graduate
hours. No professional credit. May be repeated. Prerequisite: Consent of
instructor.

SE 598  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in
general engineering intended to augment the existing curriculum. See
Class Schedule or departmental course information for topics and
prerequisites. 1 to 4 graduate hours. No professional credit. May be
repeated in the same or separate terms if topics vary to a maximum of 12
hours.

SE 599  Thesis Research  credit: 0 to 16 Hours.
Thesis Research. 0 to 16 graduate hours. No professional credit. Approved
for S/U grading only. May be repeated to a maximum of 16
hours for credit toward the Master's or PhD degree.

**Technical Systems Management (TSM)**

TSM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/
DEFAULT/TSM)

**Courses**

TSM 100  Technical Systems in Agr  credit: 3 Hours.
Examples, problems, discussions, and laboratory exercises pointing
to present and potential engineering applications in agriculture;
emphasis on power and machinery, soil and water control, electricity,
and structures.

TSM 109  Technical Systems Management  credit: 3 Hours.
Overview of the history, systems and research needed to develop
new technology for agriculture. Emphasis on problem solving
techniques, planning, and implementation of new systems. 3
graduate hours. Prerequisite: TSM 100.

TSM 110  Introduction to Computation  credit: 3 Hours.
Introduction to computer hardware and software systems and
programming necessary for computer use in systems management.
Prerequisite: TSM 100.

TSM 130  Basics of CAD  credit: 1 Hour.
Introduction to Computer Aided Drawing and Design (CAD).
Application of two and three dimensional CAD tools in construction systems
for creating project plans, structures and building floor plans with fixtures
and layers representing electrical and plumbing configurations. Self-
paced learning through on-line tutorials with instructor guidance.
Prerequisite: TSM 100.

TSM 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Open seminar or experimental course on a topic in technical systems
management. May be repeated to a maximum of 12 hours.

TSM 232  Materials and Construction Sys  credit: 3 Hours.
Selection, use, and maintenance of hand and power tools; shop
safety; selection of building and roofing materials; concrete
construction; and site preparation. Includes laboratory. Priority is given to
technical systems management majors.

TSM 233  Metallurgy & Welding Process  credit: 3 Hours.
Selecting and using metal-arc, inert-gas, submerged arc,
oxyacetylene welding and plasma cutting processes for construction and
maintenance. Includes laboratory. Additional fees may apply. See Class Schedule.

TSM 234  Wiring, Motors and Control Sys  credit: 3 Hours.
Selecting and using wiring materials, electric motors and controls in
lighting, heating, ventilation, and materials handling problems. Includes
laboratory. Prerequisite: TSM 100.

TSM 262  Off-Road Equipment Management  credit: 3 Hours.
Performance, costs, application, selection, and replacement of off-road
machinery and field implements; analysis of mechanized field operations.
Includes laboratory. Prerequisite: TSM 100.

TSM 293  Off-Campus Internship  credit: 1 to 4 Hours.
Supervised off-campus experience in a field directly pertaining to
technical systems management. May be repeated to a maximum of 6
hours. Prerequisite: Sophomore standing and consent of instructor.

TSM 295  Undergrad Research or Thesis  credit: 1 to 4 Hours.
Open seminar or experimental course on a topic in technical systems
management. May be repeated to a maximum of 12 hours.
Prerequisite: Consent of instructor.

TSM 311  Humanity in the Food Web  credit: 3 Hours.
The human food web is the complex network of technologies,
environments, people, and social institutions that produces, processes,
and distributes the world’s food supply. Students will study the food
webs of the past, present, and future and will explore various human
roles, including their own, in the global technology-environment-society-
food system. Course topics include domestication, mechanization,
urbanization, the green revolution, biotechnology, food safety, the
environment, and appropriate technologies for developing countries.
Additional fees may apply. See Class Schedule.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil

TSM 352  Land and Water Mgt Systems  credit: 3 Hours.
Principles of planning, implementing and utilizing land and water
practices for Illinois land uses, especially agriculture. Includes laboratory.
Prerequisite: Completion of Quantitative Reasoning requirement.
TSM 363  Fluid Power Systems  credit: 2 Hours.
Emphasizes basic principles of fluid power systems related to off-road vehicles. Topics include fundamentals of fluid power systems, principles of key fluid power components, and maintenance of fluid power systems. Credit is not given for both TSM 363 and ABE 223.

TSM 371  Residential Housing Design  credit: 3 Hours.
Principles and practices in residential housing; space planning, house types, structures, materials, utilities, environmental control, energy conservation, remodeling, and economic influences. Includes laboratory.

TSM 372  Environ Control & HVAC Systems  credit: 3 Hours.
Introduction to heating, ventilating, and air-conditioning (HVAC) systems for building environment control. Topics include: psychrometrics, basic calculation of heating and cooling loads, human comfort and ventilation requirements, typical HVAC and control systems.

TSM 381  Grain Drying & Storage Systems  credit: 3 Hours.
Grain drying fundamentals, air-moisture relationships, grain drying systems for efficient energy use, fans, grain-handling devices and systems, planning of grain handling systems, grain standards, moisture measurement, grain storage, fungi and insect problems, aeration, processing and milling of corn and soybeans. Includes laboratory.

TSM 396  UG Honors Research or Thesis  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated to a maximum of 12 hours. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

TSM 421  Ag Safety-Injury Prevention  credit: 3 Hours.
Issues associated with agricultural injuries and their prevention. Areas include: agricultural injury situation; injury causation; injury intervention strategies and their applications to agricultural issues; and, specific safety issues in the areas of farm machinery, grain and forage systems, animals, materials handling, electricity, fire safety, special populations, and emergency preparedness. Course information: 3 undergraduate hours. 3 graduate hours.

TSM 422  Ag Health-Illnesses Prevention  credit: 3 Hours.
Overview of occupational illnesses and diseases in the agricultural industry and its practices. Hazards within agricultural production are examined and potential hazards to non-farm populations and those interacting with production personnel are explored. Agricultural industry practices are summarized and potential human health effects of specific practices identified. Specific preventative measures are outlined to reduce exposures and remediate exposure symptoms. Interaction with health/medical professionals is on-going during the semester to familiarize students with medical procedures pertinent to agricultural occupational medicine. 3 undergraduate hours. 3 graduate hours.

TSM 425  Managing Ag Safety Risk  credit: 3 Hours.
Management aspects of farm and agriculturally related business safety and health. Topics include: orientation to farm and agricultural related business safety and health issues, legal and ethical responsibilities, liability issues, injury/illness incident investigation, agricultural safety and health resources, how to approach and organize a safety and health management plan, and safety and health worker education and training. Case study approach to devise a safety and health management plan for an existing farm or agricultural related business. Team work to emulate development of safety management programs in general industry. Student exposure through class discussion exercises to recent agricultural safety and health research studies conducted in North America and Europe. 3 undergraduate hours. 3 graduate hours. Prerequisite: Credit or concurrent registration in TSM 421 or TSM 422, or consent of instructor.

TSM 430  Project Management  credit: 2 Hours.
Same as ABE 430. See ABE 430.

TSM 435  Elec Computer Ctrl Sys  credit: 3 Hours.
Microcomputer and electrical control applications; electrical fundamentals; solid-state devices; relays; biosensors; motor types and characteristics; three-phase power; logic devices; analog/digital convertors; and interfacing for agricultural control applications. Includes laboratory. 3 undergraduate hours. 3 graduate hours.

TSM 438  Renewable Energy Applications  credit: 3 Hours.
Renewable energy sources and applications, including solar, geothermal, wind, and biomass. Environmental consequences of energy conversion including how renewable energy can reduce air pollution and global climate change. Economics of alternative energy systems. 3 undergraduate hours. 3 graduate hours. Credit is not given for both TSM 438 and ABE 436. Prerequisite: Junior, senior, or graduate standing required.

TSM 464  Engine and Tractor Power  credit: 3 Hours.
Construction, performance and maintenance of internal combustion engines, power trains, and hydraulic systems for off-road equipment; methods and equipment for performance testing; and weight transfer and traction. Includes laboratory. 3 undergraduate hours. 3 graduate hours. Credit is not given for both TSM 464 and ABE 466.

TSM 465  Chemical Applications Systems  credit: 3 Hours.
Hydraulic principles; liquid application systems including pumps, controls, and spray nozzles; granular application systems; safe storage, handling, and disposal of pesticides and fertilizers; federal and state legal requirements. Includes laboratory. 3 undergraduate hours. 3 graduate hours.

TSM 467  Precision Agric Technology  credit: 3 Hours.
Practices and equipment used in precision agriculture. Global positioning systems; geographic information systems; mapping; grid sampling of soil fertility and physical properties; yield monitoring; remote sensing; variable-rate technologies. 3 undergraduate hours. 3 graduate hours.

TSM 468  Grain Bioprocessing Coprodutcts  credit: 3 Hours.
Bioprocessing of cereals and oilsseeds by milling, fermentation and extraction processes in the production of a wide variety of coproducts used in animal foods. Includes the effects of the process variables and bioprocess on coproduct quality and the post-processing of coproducts. 3 undergraduate hours. 3 graduate hours.

TSM 496  Independent Study  credit: 1 to 4 Hours.
Individual research, special problems, thesis, development and/or design work under the supervision of a faculty member. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: consent of instructor.

TSM 499  Seminar  credit: 1 to 3 Hours.
Group discussion or an experimental course on a special topic in technical systems management. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 12 hours.

TSM 501  Graduate Research I  credit: 1 Hour.
First of a two-course sequence (with TSM 502) for graduate students in Technical Systems Management. Prepares students to perform successfully in a research environment and to develop skills in teaching. Topics to be covered include research methodology, teaching methods, lecture preparation and delivery, critical review of scientific articles, peer review and publishing, mentoring and peer relationships, time management, and intellectual property.

Information listed in this catalog is current as of 04/2018
TE 200  Introduction to Innovation  credit: 1 Hour.
Fundamental concepts of entrepreneurship, creativity and innovation will be explored within the context of new and existing businesses. Creative thinking and inventive problem solving will be emphasized.

TE 230  Design Thinking/Need-Finding  credit: 3 Hours.
Same as ARTD 230. See ARTD 230.

TE 250  From Idea to Enterprise  credit: 2 Hours.
Fundamentals of technology entrepreneurship and critical areas of the entrepreneurship process: creating a successful startup and transforming it into a sustainable business, validating an idea and taking it to market, evaluation of new ideas, forming high-performance teams, and financing a technology-based startup. Field trips to local startups, businesses, the University Research Park, and Enterprise Works incubator included along with in-depth case studies, and a hands-on class project.

TE 298  Special Topics I  credit: 1 to 3 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

TE 333  Creativity, Innovation, Vision  credit: 4 Hours.
Personal creativity enhancement via exploration of the nature of creativity, how creativity works, and how to envision what others may not. Practice of techniques and processes to enhance personal and group creativity and to nurture a creative lifestyle. Application to a major term project providing the opportunity to move an idea, product, process or service from vision to reality.

TE 345  Design and Innovation  credit: 2 Hours.
Same as ECE 345. See ECE 345.

TE 360  Lectures in Engineering Entrepreneurship  credit: 1 Hour.
Fundamental concepts of entrepreneurship and commercialization of new technology in new and existing businesses. Guest speaker topics vary, but typically include: evaluation of technologies and business ideas in genera; commercializing new technologies; financing through private and public sources; legal issues; product development; marketing; international business issues. May be repeated in separate terms to a maximum of 2 hours, if topics vary; instructor approval required. Prerequisite: For undergraduate students only.

TE 398  Special Topics II  credit: 1 to 4 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate term if topics vary.

TE 401  Developing Breakthrough Projects  credit: 1 to 4 Hours.
Project-based exploration with teams of students working together in a large innovation and entrepreneurial context. Encourage development of innovative, leadership, and entrepreneurial skill sets, including financing, marketing, sales, operations, business plans, and management. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated.

TE 450  Startups: Inc, Fund, Contracts, IP  credit: 3 Hours.
Explore legal tools used in constructing and operating companies. Topics include: issues with business formation, intellectual property, NDA, contracts, and other corporate legal issues impacting startups. 3 undergraduate hours. 3 graduate hours.

TE 502  Graduate Research II  credit: 1 Hour.
Second of a two-course sequence (with TSM 501) for graduate students in Technical Systems Management. Prepares students to perform successfully in a research environment and to develop skills in teaching. Topics to be covered include research methodology, teaching methods, lecture preparation and delivery, critical review of scientific articles, peer review and publishing, mentoring and peer relationships, time management, and intellectual property.

TE 594  Graduate Seminar  credit: 0 Hours.
Presentations of thesis research by graduate students; other presentations on teaching or current research issues related to technical systems management. Approved for S/U grading only. May be repeated to a maximum of six times.

TE 596  Independent Study  credit: 1 to 4 Hours.
Individual investigations or studies of any phases of technical systems management selected by the student and approved by the advisor and the faculty member who will supervise the study. May be repeated in the same or separate terms if topics vary to a maximum of 6 hours. Prerequisite: Consent of instructor.

TE 598  Special Topics  credit: 1 to 4 Hours.
Group discussion or an experimental course on a special topic in technical systems management. May be repeated in the same term to a maximum of 8 hours. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: As specified for each topic offering; see Class Schedule or departmental course information.

TE 599  Thesis Research  credit: 0 to 16 Hours.
Individual research in the various areas of technical systems management under the supervision of faculty members. Approved for S/U grading only. May be repeated in separate terms.

Technology Entrepreneurship (TE)

Courses

TE 100  Introduction to Innovation, Leadership and Engineering Entrepreneurship  credit: 1 Hour.
Introduction course to innovation, leadership, and engineering entrepreneurship as a field of study. The student will learn about innovation and leadership, professionalism and ethics, hear from guest entrepreneurial lecturers, and tour innovative/entrepreneurial spaces. While working in small teams, students will pitch a problem, develop solutions, learn to work as a team, and hone their written and verbal presentation skills.

TE 150  Entrepreneurship Foundations  credit: 3 Hours.
Introduction of new business formation and global entrepreneurship concepts through group projects and real-world experience. Discussion focus on defining an entrepreneur, the impact of innovation and entrepreneurship, clusternomics and societal impact, market scalability, team dynamics, product and technology development, competitive landscape, building a personal mission statement and assessment, skill competencies, and constructing dashboards. Prerequisite: This course is restricted to Innovation LLC students.

TE 250  From Idea to Enterprise  credit: 2 Hours.
Fundamentals of technology entrepreneurship and critical areas of the entrepreneurship process: creating a successful startup and transforming it into a sustainable business, validating an idea and taking it to market, evaluation of new ideas, forming high-performance teams, and financing a technology-based startup. Field trips to local startups, businesses, the University Research Park, and Enterprise Works incubator included along with in-depth case studies, and a hands-on class project.

TE 298  Special Topics I  credit: 1 to 3 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary.

TE 333  Creativity, Innovation, Vision  credit: 4 Hours.
Personal creativity enhancement via exploration of the nature of creativity, how creativity works, and how to envision what others may not. Practice of techniques and processes to enhance personal and group creativity and to nurture a creative lifestyle. Application to a major term project providing the opportunity to move an idea, product, process or service from vision to reality.

TE 345  Design and Innovation  credit: 2 Hours.
Same as ECE 345. See ECE 345.

TE 360  Lectures in Engineering Entrepreneurship  credit: 1 Hour.
Fundamental concepts of entrepreneurship and commercialization of new technology in new and existing businesses. Guest speaker topics vary, but typically include: evaluation of technologies and business ideas in genera; commercializing new technologies; financing through private and public sources; legal issues; product development; marketing; international business issues. May be repeated in separate terms to a maximum of 2 hours, if topics vary; instructor approval required. Prerequisite: For undergraduate students only.

TE 398  Special Topics II  credit: 1 to 4 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate term if topics vary.

TE 401  Developing Breakthrough Projects  credit: 1 to 4 Hours.
Project-based exploration with teams of students working together in a large innovation and entrepreneurial context. Encourage development of innovative, leadership, and entrepreneurial skill sets, including financing, marketing, sales, operations, business plans, and management. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated.

TE 450  Startups: Inc, Fund, Contracts, IP  credit: 3 Hours.
Explore legal tools used in constructing and operating companies. Topics include: issues with business formation, intellectual property, NDA, contracts, and other corporate legal issues impacting startups. 3 undergraduate hours. 3 graduate hours.

Information listed in this catalog is current as of 04/2018
TE 460  Lectures in Engineering Entrepreneurship  credit: 1 Hour.
Fundamental concepts of entrepreneurship and commercialization of new technology in new and existing engineering and high-tech businesses. Guest speaker topics vary, but typically include: evaluation of technologies and business ideas in general; commercializing new technologies; financing through private and public sources; legal issues; product development; marketing; international business issues. 1 undergraduate hour. 1 graduate hour. May be repeated in separate terms to a maximum of 2 hours, if topics vary; instructor approval required. Credit is not given for both TE 360 and TE 460.

TE 461  Technology Entrepreneurship  credit: 3 Hours.
Product design, marketing, financials, and the general business planning preparation required for start-up companies. Many start-up companies have emerged from this course. Students can work in teams (members can be from outside of class) or individually. Students without a particular idea may be provided an option to participate in PIRL (Product Innovation Research Lab) with the School of Art & Design, but spots are limited. 3 undergraduate hours. 3 graduate hours.

TE 466  High-Tech Venture Marketing  credit: 2 Hours.
Cornerstone marketing concepts for innovators and engineers to enable analysis of products and technologies from a marketing perspective: engineering product development and adoption life cycle; objectives and strategies; marketing management; communication skills; sales process and tactics; special considerations for new high-tech engineering products and innovations. 2 undergraduate hours. 2 graduate hours. Credit is not given for both ENG 466 and BADM 365.

TE 497  Independent Study  credit: 1 to 4 Hours.
Advanced projects related to Technology Entrepreneurship. Approved for S/U grading only. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 3 undergraduate hours or 4 graduate hours in the same term if topics vary; may be repeated for an unlimited number of hours in separate terms. Prerequisite: Consent of instructor.

TE 498  Special Topics III  credit: 1 to 4 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. Additional fees may apply. See Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate term if topics vary.

TE 560  Managing Advanced Technol I  credit: 1 Hour.
Business perspective of managing advanced technology in industry: strategic context of advanced technology; analytical financial tools used to estimate its potential value; legal concepts important in its management; interpersonal issues related to leading and advocating on behalf of advanced technology groups. 1 graduate hour. No professional credit.

TE 565  Technol Innovation & Strategy  credit: 2 Hours.
Concepts and frameworks for analyzing how firms can create, commercialize and capture value from technology-based products and services. Business, commercialization, and management aspects of technology. Emphasis on reasons that existing firms or startups which have successfully commercialized products or services fail to sustain their success as technology changes and evolves. 2 graduate hours. No professional credit. Prerequisite: STAT 400.

TE 566  Finance for Engineering Mgmt  credit: 2 Hours.
Cornerstone financial concepts for engineering management to enable analysis of engineering projects from a financial perspective: income statements; the balance sheet; cash flow statements; corporate organization; the time value of money; net present value; discounted cash flow analysis; portfolio theory. 2 graduate hours. No professional credit.

TE 567  Venture Funded Startups  credit: 1 Hour.
Concepts, tools, and language used by venture capitalists (VCs). Venture-scale opportunity assessment and articulation; venture capital financing and valuation; deal structure; term sheets; financial plans for startups; customer development and marketing; product iterations; sales execution. 1 graduate hour. No professional credit. Prerequisite: TE 566.

TE 598  Special Topics IV  credit: 1 to 4 Hours.
Subject offerings of innovation, creativity, technology and entrepreneurship intended to augment the existing curriculum. See class schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms for unlimited graduate hours if topics vary.

Technology and Management (TMGT)

TMGT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/TMGT)

Courses

TMGT 366  Product Design and Development  credit: 3 Hours.
Same as BADM 366. See BADM 366.

TMGT 367  Mgmt of Innov and Technology  credit: 3 Hours.
Same as BADM 367. See BADM 367.

TMGT 460  Business Process Modeling  credit: 3 Hours.
Same as BADM 460. See BADM 460.

TMGT 461  Tech, Eng, & Mgt Final Project  credit: 2 Hours.
Same as BADM 461. See BADM 461.

Theatre (THEA)

THEA Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/THEA)

Courses

THEA 100  Practicum I  credit: 1 to 3 Hours.
Practical work in the design, construction, and handling of scenery, lighting, sound, properties, costumes, and makeup for public performance. A minimum of forty hours of production activity to be arranged for each credit hour. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor required for non-theatre majors.

THEA 101  Introduction to Theatre Arts  credit: 3 Hours.
Introduction to the arts of theater for non-majors, including acting, design, directing, dramaturgy, and playwriting, together with a survey of theatrical history, minority theater, and plays by women. Attendance at Department of Theater productions (ticket fee required). Credit not given for both THEA 101 and THEA 102.

This course satisfies the General Education Criteria for: Humanities - Lit Arts
THEA 101  Introduction to Technical Theatre and Stagecraft  credit: 3 Hours.
Introduction to the use of technical theatre skills. Provides a broad overview of the essential functions and practices of the following foundational technical theatre areas: Scenic Technology, Costume Technology, Lighting Technology, Sound technology, Properties Construction, Scene Painting, and Stage/Production Management. Through lectures and labs the course provides students with practical application and basic skills essential in the areas of Design, Technology, and Stage Management.

THEA 102  Text to Stage  credit: 4 Hours.
Practical exploration of theatre production for Theatre majors with emphasis on the collaborative contributions of playwrights, actors, directors, designers, and dramaturges, culminating in final group projects in planning productions of one-act plays. Attendance at Department of Theatre productions required. Credit not given for both THEA 101 and THEA 102. This course is required for all Theatre Majors. This course satisfies the General Education Criteria for: Humanities - Lit Arts

THEA 103  Survey of Theatre Production  credit: 4 Hours.
Provides a broad overview of the essential functions and practices of the following foundational technical theatre areas: Scenic Technology, Costume Technology, Lighting Technology, Sound technology, Properties Construction Scene Painting, and Stage/Production Management. Through lectures and labs the course provides students with practical application and basic skills essential in the areas of Design, Technology, and Stage Management.

THEA 109  Introduction to Directing  credit: 3 Hours.
Practical course in directing for the stage, focusing on script analysis, dramatic construction and the analysis of weekly writing assignments, focusing on style, and imagination, and culminating in a final term project of a one-act play. Prerequisite: THEA 208 or consent of instructor.

THEA 110  Broadway Musicals  credit: 3 Hours.
A cultural context of the uniquely "American" Broadway musical through an introduction to the art form, an analysis of the pertinent time period, and historical and critical placement of the work as a reflection (and development) of the identity of the United States. This course will introduce the collaborative artistry of the musical, survey specific iconic works, and explore the socio-economic impacts of the Broadway musical. Attendance at selected performances is required. This course satisfies the General Education Criteria for: Humanities - Lit Arts

THEA 119  Undergraduate Open Seminar  credit: 0 to 5 Hours.
Approved for letter and S/U grading. May be repeated to a maximum of 12 hours.

THEA 203  Theatre of Black Experience  credit: 3 Hours.
Surveys the history and literature, and studies dramatic works focused on the black experience through the rehearsal and performance of representative works of black dramatists. May be repeated to a maximum of 9 hours.

THEA 208  Dramatic Analysis  credit: 3 Hours.
Introduction to the study of plays for theatre practitioners employing analytical methods and plays from modern theatre. Requires paper or project assignments for each play. Prerequisite: Consent of instructor required for non-theatre majors.

THEA 210  The Tragic Spirit  credit: 3 Hours.
Same as CLCV 222 and CWL 264. See CLCV 222. This course satisfies the General Education Criteria for: Humanities - Lit Arts

THEA 211  Introduction to Playwriting  credit: 3 Hours.
Practical course in writing for the stage, including a study of basic dramatic construction and the analysis of weekly writing assignments, focusing on style, and imagination, and culminating in a final term project of a one-act play. Prerequisite: THEA 208 or consent of instructor.

THEA 212  Introduction to Directing  credit: 3 Hours.
Practical course in directing for the stage, focusing on script analysis, script preparation, casting, staging techniques, and design strategies, culminating in a directorial concept presentation of a contemporary play. Prerequisite: THEA 208.

THEA 218  Intro to Social Issues Theatre  credit: 3 Hours.
An introductory exploration/survey of the rich histories, theories, and practices of community-based and social issues theatre. Through discussion, participation, lecture, and performance, representative works, movement, and artists will be explored. Lively connections will be made to an array of social issues in today's world. Same as GWS 218.

THEA 220  Survey of Theatrical Design  credit: 3 Hours.
Survey of design elements in theatrical production including the function of scenery, costuming, lighting, and sound in conveying directorial concepts, style, and dramatic meaning. Intended for students not concentrating on theatrical design, this course requires both theoretical and practical projects. Prerequisite: THEA 102, THEA 208, or consent of instructor.

THEA 222  Introduction to Scenic Design  credit: 3 Hours.
Projects and lectures addressing basic technical and aesthetic skills of scene design. Enrollment limited to Theatre majors. Prerequisite: THEA 125.

THEA 223  Intro to Technical Direction  credit: 4 Hours.
Studies in the basic principles of technical direction and practical laboratory training in the materials, techniques, and processes for scenic construction and associated technologies. Prerequisite: Enrollment limited to Theater majors only.

THEA 226  Stagecraft  credit: 3 Hours.
Studies and training in materials, techniques, and processes used in executing scenery for the theater. Drawing and drafting supplies are required. Approved for letter and S/U grading. Prerequisite: Enrollment limited to Theatre majors only.

THEA 231  Intro to Lighting Design  credit: 3 Hours.
Develop an understanding of the basic aspects of lighting design and stage electrics for live performance.
THEA 260  Intro Asian American Theatre  credit: 3 Hours.
Introduction to Asian American theatre, with emphasis on theatre companies, actors, playwrights, and audiences, through the reading of major dramatic works, examining production histories, and viewing Asian American performances and film. Same as AAS 260.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

THEA 262  Literature of Modern Theatre  credit: 3 Hours.
Introduction to the principal modes of dramatic expression from around 1870 to the present day. Prerequisite: Completion of campus Composition I general education requirement and THEA 208; or consent of instructor.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Lit Arts

THEA 263  Intro African American Theat  credit: 3 Hours.
Focuses on theatre artists, theatre companies, and the role of Historically Black Colleges and Universities (HBCUs). Students will read plays, view productions, screen documentaries, and examine various primary sources. Same as AFRO 212.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

THEA 270  Relationships in Acting I  credit: 3 Hours.
Behavior in stage performance explored on the basis of the actor’s relationship with self, with objects, and with other players; emphasizes analysis of playscript to discover action, environment, and relationships. Prerequisite: THEA 175 or consent of instructor.

THEA 271  Voice and Movement I  credit: 2 Hours.
Fundamental development of vocal production as connected to body awareness and movement for the actor. Various exercised, conditioning, and training methods are used. Prerequisite: THEA 175 or consent of instructor.

THEA 275  Relationships in Acting II  credit: 3 Hours.
Beginning scene work with special emphasis on analysis of plays, roles, characterization, and application of skills learned through improvisation and relationships in acting. Prerequisite: THEA 270 or consent of instructor.

THEA 276  Voice and Movement II  credit: 2 Hours.
Further development of the interconnected vocal production and movement processes for the actor. Various exercised, conditioning, and training methods are used. Prerequisite: Enrollment limited to Theatre majors only.

THEA 323  The Comic Imagination  credit: 3 Hours.
Same as CLCV 323 and CWL 322. See CLCV 323.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Lit Arts
Cultural Studies - Western

THEA 360  History of Theatre I  credit: 4 Hours.
History of the drama and theatre of ancient Greece and Rome, the Middle Ages, and the Italian and English Renaissance. Prerequisite: Junior standing or consent of instructor.

THEA 361  History of Theatre II  credit: 4 Hours.
History of the drama and theatre of the Spanish Renaissance, seventeenth-century France, the English Restoration, the eighteenth and nineteenth centuries in Europe and America, and Asia. Prerequisite: THEA 360 or consent of instructor.

THEA 362  Chekhov  credit: 3 Hours.
Same as RUSS 325 and CWL 325. See RUSS 325.

THEA 371  Acting Studio I: Dynamics  credit: 1 Hour.
Development of movement and voice skills for actors. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 372, THEA 373, and THEA 374.

THEA 372  Acting Studio I: Voice  credit: 2 Hours.
Concentrated training in standard speech for the stage and the International Phonetic Alphabet. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 373, and THEA 374.

THEA 373  Acting Studio I: Movement  credit: 2 Hours.
Concentrated training in movement skills and mask characterization. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 372, and THEA 374.

THEA 374  Acting Studio I: Acting  credit: 3 Hours.
Acting in realistic and naturalistic plays. A performance is given at the end of the term. Enrollment limited to Theatre majors. Prerequisite: THEA 275, consent of chair of Acting Program, and concurrent registration in THEA 371, THEA 372, THEA 373 and THEA 374, and concurrent registration in THEA 376, THEA 377 and THEA 378.

THEA 376  Acting Studio II: Voice  credit: 2 Hours.
Continued training in standard speech for the stage and the International Phonetic Alphabet. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373, and THEA 374, and concurrent registration in THEA 375, THEA 377 and THEA 378.

THEA 377  Acting Studio II: Movement  credit: 2 Hours.
Concentrated training in movement for the stage, body alignment and awareness. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373, and THEA 374; and concurrent registration in THEA 375, THEA 376 and THEA 378.

THEA 378  Acting Studio II: Acting  credit: 3 Hours.
Development of acting skills for musical theatre including dance, singing, and the analysis of British and American musical theatre materials. A performance is given at the end of the term. Enrollment limited to Theatre majors. Prerequisite: THEA 371, THEA 372, THEA 373, and THEA 374, and concurrent registration in THEA 375, THEA 376 and THEA 377.

THEA 391  Individual Topics  credit: 2 Hours.
Individual projects and problems. Prerequisite: Consent of instructor.

THEA 392  Individual Topics  credit: 2 Hours.
Individual projects and problems. Prerequisite: Consent of instructor.

THEA 399  Undergraduate Group Seminar  credit: 1 to 4 Hours.
Group exploration of specialized topics. May be repeated in the same term to a maximum of 8 hours. May be repeated in subsequent terms to a maximum of 12 hours.

THEA 400  Practicum II  credit: 1 to 3 Hours.
Advanced practical work in acting; theatre management; dramaturgy and directing; and the design, construction, and handling of scenery, lighting, sound, properties, costumes, and makeup for public performance. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Enrollment limited to Theatre majors.
THEA 406 Opera/Dance Stage Management  credit: 3 or 4 Hours.
Explores the professional practice of opera and dance stage management including understanding producing models, rehearsal and performance practices, and management techniques. Emphasis on building skills to prepare opera and dance prompt-books and production paperwork. 3 undergraduate hours. 4 graduate hours. Prerequisite: Theater Majors only. May be repeated to a maximum of 6 undergraduate hours and 12 graduate hours if topics vary. Prerequisite: THEA 451.

THEA 409 Stage Management Workshop  credit: 3 or 4 Hours.
Explores advanced topics in stage management focusing on practical applications of principles learned in earlier courses. Possible topics include: Touring Stage Management, Stage Managing Opera and Dance, and Production Management. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or separate terms to a maximum of 6 undergraduate hours or 8 graduate hours as topics vary. Prerequisite: THEA 445 and THEA 446.

THEA 410 Dramaturgs Workshop  credit: 3 or 4 Hours.
Seminar course focusing on the role of the dramaturg in the collaborative process. 3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours and 12 graduate hours, if topics vary.

THEA 411 Playwrights Workshop  credit: 3 Hours.
Seminar course focusing on the role of the playwright in the collaborative process. Course may be repeated as topics will vary. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 9 graduate hours. Prerequisite: THEA 211.

THEA 412 Directors Workshop  credit: 3 Hours.
Seminar course exploring the role of the director in the collaborative process. Course may be repeated as topics will vary. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 9 graduate hours. Prerequisite: THEA 212.

THEA 415 Scene Design I  credit: 4 Hours.
Advanced problems in scene design for period and style plays and development of professional portfolio. 4 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 8 hours if topics vary. Cannot repeat a section already taken. Prerequisite: THEA 222 or consent of instructor.

THEA 417 Leading Post-Perform Dialog  credit: 4 Hours.
Study of the history, processes, and methods of leading discussions with social issues theatre audiences. Emphasis on the skills and techniques of facilitators/peer educators; artistic considerations; function and application of the dramaturg; and practical experience through facilitation of social issues theatre dialog. Same as GWS 417. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above or consent of instructor.

THEA 418 Devising Social Issues Theatre  credit: 3 or 4 Hours.
Focuses on the role of the artist as ‘cultural worker’ through devising theatre in a community-based context that is explicitly concerned with social and/or health-related issues. While there is substantial research, reading and critique involved, the overall experience will be that of rigorously composing theatrical work vital to the community. Same as GWS 418. 3 undergraduate hours. 4 graduate hours.

THEA 419 CAD Drafting for the Stage  credit: 3 Hours.
Study and application of computer-aided design techniques for scenery construction and design, focusing on the use of AutoCAD to create technical drawings for theatre. 3 undergraduate hours. 3 graduate hours. May not be repeated for credit. Prerequisite: THEA 425; enrollment limited to Theatre majors or by consent of instructor.

THEA 423 Advanced Lighting Design  credit: 3 or 4 Hours.
A study of lighting design as it relates to color, intensity, distribution, and movement. Material covered includes: script analysis, scenic breakdowns, photometrics and lighting for live performance. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231.

THEA 425 Stage Drafting  credit: 3 Hours.
Traditional and digital drafting techniques for scenic and lighting design and for technical production. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 125. Theatre Majors only.

THEA 426 History of Decor  credit: 3 Hours.
Historical and comparative survey of designs, motifs, and forms of decor in the West. Emphasis on the relationship between research and design for the stage. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. May be repeated in separate terms to a maximum of 6 hours if topics vary.

THEA 427 Scene Painting  credit: 2 Hours.
Techniques and practice of scene painting; lab time required. 2 undergraduate hours. 2 graduate hours. Prerequisite: Consent of instructor.

THEA 428 Scenic Painting II  credit: 3 Hours.
In this course, students will study and apply advanced materials, techniques, and skills of scenic painting. Over the semester, students will work to improve their own skills and techniques, with an emphasis on techniques, mediums, surfaces, and process. 3 undergraduate hours. 3 graduate hours. May be repeated in separate terms to a maximum of 3 hours if topics vary. Prerequisite: THEA 427.

THEA 430 Technical Direction  credit: 3 Hours.
Advanced studies in technical direction and theatre production organization. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 223 or consent of instructor.

THEA 431 The Lighting Laboratory  credit: 3 or 4 Hours.
The investigation of lighting design theories through paper projects and practical experimentation in the lighting lab. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231, THEA 423, or graduate standing.

THEA 432 Lighting for Non-Theatrical Spaces and Styles  credit: 3 or 4 Hours.
A strong focus on lighting for architecture, landscape architecture, special events, theme parks, museums, concerts and site-specific venues. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231, THEA 423, THEA 431.

THEA 433 Business of Lighting Design  credit: 3 or 4 Hours.
Practical approaches to working as a professional lighting designer. Material covered includes: unions, contracts, negotiations, agents, assistants vs. associates, city survival, promotional websites, touring, residencies, etc. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 231, THEA 423, THEA 431, THEA 432.

THEA 434 Advanced Lighting Seminar  credit: 1 Hour.
An open discussion of current shows and trends in the lighting industry including Skype interviews with business professionals. 1 undergraduate hour. 1 graduate hour. Prerequisite: Theatre Majors Only.
THEA 435  Professional Lighting Systems  credit: 2 Hours.
Practical study of state-of-the-art lighting technology for the theatre, using the facilities of the Krannert Center for the Performing Arts. In-depth study of lighting control systems and programming, instrument maintenance, special effects, and the role of the master electrician in production. 2 undergraduate hours. 2 graduate hours. May not be repeated for credit.

THEA 437  Software for Lighting Design  credit: 2 Hours.
Practical study of lighting design software currently used in the professional theatre and the entertainment industry. As technology evolves and new software developed, software programs will be added. Accommodating upgrades may necessitate offering the course every other year. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 4 hours. Prerequisite: THEA 231 and THEA 425.

THEA 439  Stage Mechanics II  credit: 3 Hours.
Examines newly accepted and developing techniques and materials used in constructing and rigging stage scenery with emphasis on metalworking. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours.

THEA 440  Stage Mechanics III  credit: 3 Hours.
Study in advanced scenery methods and materials, including advanced woodworking, plastic-craft, and rigging. Enrollment limited to Theatre majors. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 126.

THEA 442  Costume Patterning  credit: 3 or 4 Hours.
Methods of draping and drafting patterns for period theatrical costumes. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

THEA 444  Costume Draping  credit: 4 Hours.
Development of patterns for theatrical costumes through advanced draping techniques. Extensive lab work culminating in draping and constructing. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 442.

THEA 445  Costume History and Design I  credit: 2 or 4 Hours.
Surveys theatrical costume and fashion of major periods; emphasizes relationships to styles of art and dramaturgy, social milieu, and production design. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: Consent of instructor.

THEA 446  Costume History and Design II  credit: 2 or 4 Hours.
Continuation of THEA 445. 2 or 4 undergraduate hours. 2 or 4 graduate hours. Prerequisite: THEA 445 or equivalent.

THEA 447  Costume Rendering  credit: 3 or 4 Hours.
Studio course in costume rendering techniques: analysis of costume figure, rendering of fabrics, exploration of various rendering media. Enrollment limited to Theatre majors. 3 undergraduate hours. 4 graduate hours. Prerequisite: Consent of instructor.

THEA 448  Advanced Costume Crafts  credit: 3 or 4 Hours.
The research, rendering, and execution of armor, millinery, jewelry, and masks; dyeing with natural substances and with chemical dyes and the art of distressing clothing to achieve an aged, worn, tired or tattered look. Student is responsible for providing all materials used to complete the various projects. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 445 and THEA 446.

THEA 449  Costume Fabrication  credit: 4 Hours.
Explores, through design projects, the appropriateness of various fabrics for specific costumes determined by historical accuracy, style, and constructability. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 445 and THEA 446. Costume Majors or consent of instructor.

THEA 450  Management Seminar  credit: 1 Hour.
Addresses production and management issues surrounding Theater Department and KCPA productions. Guest speakers provide professional points of view on various management topics. 1 undergraduate hour. 1 graduate hour. May be repeated in separate terms to a maximum of 6 undergraduate or 6 graduate hours.

THEA 451  Principles of Stage Management  credit: 3 or 4 Hours.
Studies in the principles and the craft of stage management. Enrollment limited to Theatre majors. 3 undergraduate hours. 4 graduate hours. Prerequisite: Minimum of sophomore standing in a Theatre curriculum.

THEA 452  Principles of Arts Management  credit: 3 or 4 Hours.
Introduction to the basic practices of theatre and arts management with emphasis on facilities management, arts marketing, and financial planning in the performing arts. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior or graduate standing.

THEA 453  Theatre Sound Technology  credit: 3 Hours.
Exploration of audio production techniques and equipment, as related to theatre sound. Related topics include acoustics, electronics, and music. 3 undergraduate hours. 3 graduate hours. Prerequisite: Enrollment limited to junior, senior or graduate theatre majors.

THEA 454  Sound Design I  credit: 3 Hours.
Introduction to sound reproduction, recording, and basic systems design as applied to the modern theatre. 3 undergraduate hours. 3 graduate hours. Prerequisite: THEA 453, THEA 455 and THEA 459.

THEA 455  Audio Production  credit: 2 Hours.
Project-based study of professional techniques in audio recording, mixing, and editing for music, theatre, and film production, utilizing current digital technology. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: THEA 453.

THEA 456  Properties Design  credit: 3 Hours.
Principles of stage property design, planning and management. 3 undergraduate hours. 3 graduate hours.

THEA 457  Model Making for the Stage  credit: 2 Hours.
Familiarizes students with diverse techniques, materials, and tools available to model makers, especially in theatre design. Focuses work on traditional craftsmanship of 1/4” scale and 1/2” scale models including sculpting, casting, and soldering. Also address issues of scale, texture, color, and specialty finishes. Open to all designers, artists, and technicians, including students in Museum Studies. Prior knowledge of studio art helpful but not required. 2 undergraduate hours. 2 graduate hours. Prerequisite: Contact instructor for approval.

THEA 458  Rendering for Live Performance  credit: 2 Hours.
Develops students’ ability to realize visually their design ideas through drawings and renderings. Students will deal with perspective problems and study shadow and light. Focuses on rendering techniques with various media on different surfaces and explorations of different materials used by known designers in the field. Students will be given opportunities to render specific design projects for their personal portfolios. Course consists of lectures, demonstrations, and in-class exercises. Open to all designers, artists, and technicians. 2 undergraduate hours. 2 graduate hours. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor required.

THEA 459  Sound Systems  credit: 2 Hours.
Project-based study of professional techniques in sound system applications and design for sound reinforcement in music, theatre, and architectural applications. 2 undergraduate hours. 2 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: THEA 453.
THEA 460  Multi-Ethnic Theatre  credit: 4 Hours.  
Focuses on the history and aesthetics of African, Asian, African American, Asian American, Latino/Latina, and Native American plays and productions. 4 undergraduate hours. 4 graduate hours. Prerequisite: THEA 102.

THEA 462  Advanced Media Design  credit: 3 or 4 Hours.  
Lecture/Studio Course focused on the advanced tools and skills of creating programmed images for live performance of dance, theatre and music theatre. Students will acquire advanced technical skills as well as continue to explore to the relationship of projected images to text, performer, space and time. Lectures and projects develop advanced skills with digital technology, images and projections in live performance. 3 undergraduate hours. 4 graduate hours.

THEA 463  American Theatre History I  credit: 3 or 4 Hours.  
Survey of the development of American theatre as a cultural, social, political, and economic institution from the colonial era to 1900. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior, or graduate standing.

THEA 464  American Theatre History II  credit: 3 or 4 Hours.  
Survey of the development of American theatre as a cultural, social, political, and economic institution from the late nineteenth century to the present. 3 undergraduate hours. 4 graduate hours. Prerequisite: Junior, senior or graduate standing.

THEA 465  Musical Theatre History  credit: 4 Hours.  
History of the American musical in the twentieth century, studied through the contributions of major composers, lyricists, directors, and choreographers. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior standing or above, or consent of instructor.

THEA 467  Contemporary Theatrical Forms  credit: 3 or 4 Hours.  
Study of post-World War I theatre, including the New Stagecraft, expressionism, Brecht and epic theatre, theatre of the absurd, and later developments. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 208, and junior, senior or graduate standing.  

THEA 471  Acting Studio III: Dynamics  credit: 1 Hour.  
Continuing development of movement and voice skills for actors. Enrollment limited to Theatre majors. 1 undergraduate hour. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 472, THEA 473 and THEA 474.

THEA 472  Acting Studio III: Voice  credit: 2 Hours.  
Advanced training in voice and speech for the stage with emphasis on classic texts. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 471, THEA 473 and THEA 474.

THEA 473  Acting Studio III: Movement  credit: 2 Hours.  
Training in stage combat, sword, and rapier. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent registration in THEA 471, THEA 472 and THEA 474.

THEA 474  Acting Studio III: Acting  credit: 3 Hours.  
Acting in Shakespearean and other Elizabethan, Jacobean, and Caroline drama. A performance is given at the end of the term. Enrollment limited to Theatre majors. 3 undergraduate hours. No graduate credit. Prerequisite: THEA 375, THEA 376, THEA 377 and THEA 378, and concurrent enrollment in THEA 471, THEA 472 and THEA 473.

THEA 475  Acting Studio IV: Dynamics  credit: 1 Hour.  
Continuing development of movement and voice skills for actors. Enrollment limited to Theatre majors. 1 undergraduate hour. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 476, THEA 477 and THEA 478.

THEA 476  Acting Studio IV: Voice  credit: 2 Hours.  
Advanced training in voice and speech for the stage with emphasis on dialects. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 477 and THEA 478.

THEA 477  Acting Studio IV: Movement  credit: 2 Hours.  
Advanced training in unarmed stage combat and quarterstaff. Enrollment limited to Theatre majors. 2 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 476 and THEA 478.

THEA 478  Acting Studio IV: Acting  credit: 3 Hours.  
Studies in the techniques of acting for the camera and cold readings; analysis of distinguished film acting. Scenes are recorded in the television studio. Enrollment limited to Theatre majors. 3 undergraduate hours. No graduate credit. Prerequisite: THEA 471, THEA 472, THEA 473 and THEA 474, and concurrent enrollment in THEA 475, THEA 476 and THEA 477.

THEA 479  Preparation for Auditions  credit: 2 Hours.  
Each actor, through extensive research, prepares a portfolio of audition pieces for the opportunities imminent before and after graduation for resident companies, commercial productions, and film, or professional graduate schools. Enrollment limited to Theatre majors. 2 undergraduate hours. 2 graduate hours. Prerequisite: THEA 375, THEA 376, THEA 377, THEA 378.

THEA 481  Content Creation 1: Camera and Editing for Media Design  credit: 3 or 4 Hours.  
Lecture/Studio Course focused on creating original video content. There is special emphasis on producing media assets to be used as a part of live performance of dance, theatre and music theatre. Lecture and classwork projects develop skills in developing image ideas from text to storyboards to camera images to completed motion video. 3 undergraduate hours. 4 graduate hours.

THEA 482  Content Creation 2: Motion Graphics & VFX for Media Design  credit: 3 or 4 Hours.  
Lecture/Studio Course focused on creating motion graphics and video special effects content. There is special emphasis on producing media assets to be used as a part of live performance of dance, theatre and music theatre. Lecture and classwork projects are intended to explore and develop skills in preparing still images and animating them into motion video. 3 undergraduate hours. 4 graduate hours.

THEA 483  Modern Scandinavian Drama  credit: 3 or 4 Hours.  
Same as CWL 463 and SCAN 463. See SCAN 463.
THEA 485 Prop Furniture Construction credit: 3 or 4 Hours.

This course explores the skills and tools commonly used for furniture construction. Students will learn a variety of fine woodworking techniques while constructing samples that will ultimately lead to a realized piece of furniture. In this advanced course of study, students will focus on joinery, the properties of finer lumber choices, programing the CNC for automated cutting assistance, the use of a wood lathe, and natural fiber upholstery techniques such as rushing and caning. 3 undergraduate hours. 4 graduate hours. Prerequisite: Students taking this class should have prior carpentry and woodworking experience and a familiarity with bench tools, hand tools, various glues, and common construction materials.

THEA 488 Premodern Chinese Drama credit: 3 or 4 Hours.

Same as CWL 416 and EALC 413. See EALC 413.

THEA 490 Professional Internship credit: 0 to 14 Hours.

Professional work with an approved host theatre or institution in an area related to the student's academic program; exposure to and participation in professional theatre. Full documentation and approval of internship activities required. 0 to 14 undergraduate hours. 0 to 12 graduate hours. Approved for S/U grading only. May be repeated in the same or subsequent terms, if topics vary. Prerequisite: Junior, senior, or graduate standing in Theatre; consent of Internship Coordinator.

THEA 491 Advanced CAD Drafting for Lighting Designers credit: 3 or 4 Hours.

Advanced practical study of CAD drafting for lighting designers and technicians utilizing current industry software. 3 undergraduate hours. 4 graduate hours. Prerequisite: THEA 437.

THEA 492 Digital Rendering for Lighting credit: 3 or 4 Hours.

An exploration of 3-D rendering techniques for live performance using software specific to the lighting industry. Teach skills necessary to create an artistic representation of a design and to imagine a production. 3 undergraduate hours. 4 graduate hours.

THEA 493 Lighting Opera & Musicals credit: 3 or 4 Hours.

An advanced study of techniques used for lighting musicals and operas through paper projects and various lectures. 3 undergraduate hours. 4 graduate hours.

THEA 494 Advanced Problem Solving for Lighting Designers credit: 3 or 4 Hours.

Practical projects to help lighting designers and technicians prepare for unforeseen problems that arise in professional situations when dealing with various lighting projects and gear. Topics addressed include storytelling, plot, practical lighting, and repertory. 3 undergraduate hours. 4 graduate hours.

THEA 505 Proseminar in Theatre Practice credit: 4 Hours.

Orientation to production activity at the Krannert Center for the Performing Arts, review of contemporary theatre practice in the United States, survey of methods in production research, and selected projects in theatre specialties. Prerequisite: Enrollment limited to Theatre majors.

THEA 550 Colloquium Design & Theat Tech credit: 4 or 8 Hours.

Projects in design for the theatre or in theatre technology, including stage scenery, costuming, lighting, makeup, projections, and sound and stage systems. May be repeated to a maximum of 32 hours. Prerequisite: Enrollment limited to graduate students in theatre design and technology.

THEA 560 Seminar in Theatre History credit: 4 Hours.

Studies in the history of the theatre. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

THEA 561 Seminar in Dramatic Literature credit: 4 Hours.

Advanced studies of plays as dramatic literature in historical and theoretical contexts. Selection of plays may vary each semester. May be repeated in separate terms to a maximum of 16 graduate hours.

THEA 562 Seminar in Theatre Theory credit: 4 Hours.

Studies in theories of drama, theatre, and performance. Examination of major theorists in both theatre scholarship and critical theory. Emphasis placed on studies in methodology. Specific topics may vary. May be repeated in separate terms to a maximum of 16 hours.

THEA 564 Stud Theatre Hist 20th Century credit: 4 Hours.

Examines selected movements and contributors to the theatre from the late nineteenth-century to the contemporary period. May be repeated to a maximum of 8 hours with approval. Prerequisite: Consent of instructor.

THEA 571 Colloquium in Acting: Dynamics credit: 1 Hour.

Intensive professional training in voice and movement skills for the actor. May be repeated to a maximum of 6 hours. Prerequisite: Enrollment limited to graduate acting students; concurrent registration in THEA 572, THEA 573 and THEA 574.

THEA 572 Colloquium in Acting: Voice credit: 2 Hours.

Intensive professional training in voice and speech for the actor. May be repeated to a maximum of 12 hours. Prerequisite: Enrollment limited to graduate acting students; concurrent registration in THEA 571, THEA 573 and THEA 574.

THEA 573 Colloquium in Acting: Movement credit: 2 Hours.

Intensive professional training in movement and stage combat for the actor. May be repeated to a maximum of 12 hours. Prerequisite: Enrollment limited to graduate acting students; concurrent registration in THEA 571, THEA 572 and THEA 574.

THEA 574 Colloquium in Acting: Acting credit: 3 Hours.

Intensive professional training in acting with a different focus each term on a particular style of dramatic literature. May be repeated to a maximum of 18 hours. Prerequisite: Enrollment limited to graduate acting students; concurrent registration in THEA 571, THEA 572 and THEA 573.

THEA 591 Special Problems credit: 0 to 8 Hours.

Individual research in selected topics by arrangement with the instructor. 0 to 8 graduate hours. No professional credit. Approved for Letter and S/U grading. May be repeated up to 72 hours if topics vary. Prerequisite: Consent of instructor.

THEA 595 Creative Project credit: 1 to 8 Hours.

Open to MFA, MA, and PhD in Theatre 1 to 8 graduate hours. No professional credit. May be repeated up to 20 hours in the same term or 72 hours in separate terms, if topics vary. Prerequisite: Consent of instructor.

THEA 599 Thesis Research credit: 0 to 16 Hours.

Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

Theoretical and Appl Mechanics (TAM)

TAM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/TAM)

Courses

TAM 195 Mechanics in the Modern World credit: 1 Hour.

Freshman introduction to engineering mechanics and its role in modern engineering analysis and design. Project activity.
TAM 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
May be repeated.

TAM 201  Mechanics for Technol & Mgmt  credit: 3 Hours.
Engineering mechanics (statics, dynamics, solid mechanics, and fluid mechanics) and the role that mechanics plays in engineering analysis and design. For Technology and Management majors only.

TAM 210  Introduction to Statics  credit: 2 Hours.
Forces, moments, couples; resultants of force systems; equilibrium analysis and free-body diagrams; analysis of forces acting on members of trusses, frames, etc.; shear-force and bending-moment distributions; Coulomb friction; centroids and center of mass; applications of statics in design. Credit is not given for both TAM 210 and TAM 211. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.

TAM 211  Statics  credit: 3 Hours.
Forces, moments, and couples; resultants of force systems; equilibrium analysis and free-body diagrams; analysis of forces acting on members of trusses, frames, etc.; shear-force and bending-moment distributions; Coulomb friction; centroids, center of mass, moment of inertia, polar moment of inertia, and product of inertia; virtual work; hydrostatic pressure; applications of statics in design. Credit is not given for both TAM 211 and TAM 210. Prerequisite: PHYS 211; credit or concurrent registration in MATH 241.

TAM 212  Introductory Dynamics  credit: 3 Hours.
Kinematics and dynamics of the three-dimensional motion of particles; kinematics and dynamics of the plane motion of rigid bodies; methods of work energy and impulse momentum; moving reference frames. Prerequisite: TAM 210 or TAM 211.

TAM 251  Introductory Solid Mechanics  credit: 3 Hours.
Relationship between internal stresses and deformations produced by external forces acting on deformable bodies, and design principles based on mechanics of solids: normal stresses, shear stresses, and deformations produced by tensile, compressive, torsional, and bending loading of members; beam deflections; elastic energy and impact; multidimensional stress states; buckling of columns. Prerequisite: TAM 210 or TAM 211.

TAM 252  Solid Mechanics Design  credit: 1 Hour.
Design problems and projects intended to accompany TAM 251. Prerequisite: Credit or concurrent registration in TAM 251.

TAM 270  Design for Manufacturability  credit: 3 Hours.
Same as ME 270. See ME 270.

TAM 297  Introductory Independent Study  credit: 1 to 3 Hours.
Independent study and/or individual projects related to engineering mechanics. Approved for Letter and S/U grading. May be repeated to a maximum of 6 credit hours for letter grade; no limit for S/U grade mode. Prerequisite: Consent of Instructor.

TAM 302  Engineering Design Principles  credit: 3 Hours.
Examples of mechanical design problems that occur in engineering practice and the procedures and issues involved in solving them; technical aspects and societal ramifications of the design process; intellectual property, ethics, and contemporary issues; probability and statistics; computational mechanics; case studies; student discussion of design-related issues at different levels; design project reports and presentations; student teams.

TAM 324  Behavior of Materials  credit: 4 Hours.
Same as CEE 300. See CEE 300.

TAM 335  Introductory Fluid Mechanics  credit: 4 Hours.
Fluid statics; continuity, momentum, and energy principles via control volumes; ideal and real fluid flow; introduction to the Navier-Stokes equation; similitude; laminar and turbulent boundary layers; closed-conduit flow, open-channel flow, and turbomachinery. Prerequisite: TAM 212.

TAM 412  Intermediate Dynamics  credit: 4 Hours.
Lagrangian mechanics of dynamical systems with an emphasis on vibrations; constraints and generalized coordinates; motion in accelerating frames; conservation laws and invariance of the Lagrangian; particle motion in one dimension, the two-body problem, and central-force motion; free and forced vibration of linearized single-degree-of-freedom and multi-degree-of-freedom discrete systems; weakly nonlinear vibrations; parametric resonance; introduction to Hamiltonian dynamics; rigid-body motions. 4 undergraduate hours. 4 graduate hours. Credit is not given for both TAM 412 and AE 352. Prerequisite: MATH 225 or MATH 415; MATH 285; TAM 212.

TAM 413  Fund of Engrg Acoustics  credit: 3 or 4 Hours.
Same as ECE 473. See ECE 473.

TAM 416  Intro to Nonlinear Dyn & Vib  credit: 4 Hours.
Single- and multi-degree-of-freedom oscillators; asymptotic methods; forced, internal and combination resonances; time-discrete dynamical systems (maps); complex dynamics; parametric vibrations and resonances; introduction to nonlinear localization and nonlinear targeted energy transfer; nonlinear vibrations of elastic continua; application in mechanics and engineering. 4 undergraduate hours. 4 graduate hours. Prerequisites: MATH 285 OR MATH 441; MATH 415; TAM 212.

TAM 424  Mechanics of Structural Metals  credit: 3 Hours.
Micromechanisms at the atomic, single-crystal, and polycrystal levels and their use in explaining the deformation and failure characteristics of metals; elastic deformation, dislocation mechanics, plastic deformation and strengthening mechanisms, fracture mechanics and fracture mechanisms, fatigue, and creep; design criteria; special topics. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 300 or ME 330.

TAM 427  Mechanics of Polymers  credit: 3 Hours.
Mechanical behavior of amorphous and semi-crystalline polymers; overview of polymer structure, properties, and processing; polymer linear viscoelasticity using Boltzmann superposition and mechanical models; measurement of viscoelastic properties; polymeric yield phenomena; fracture and craze formation; impact and fatigue. Same as AE 427 and MSE 454. 3 undergraduate hours. 3 graduate hours. Prerequisite: CEE 300 or ME 330.

TAM 428  Mechanics of Composites  credit: 3 Hours.
Same as AE 428 and MSE 456. See MSE 456.

TAM 435  Intermediate Fluid Mechanics  credit: 4 Hours.
Analytical solution methods for problems involving ideal and real fluids: potential flow theory, boundary-layer theory; surface waves, vortex dynamics, and compressible flows. 4 undergraduate hours. 4 graduate hours. Prerequisite: One of AE 312, ME 310, TAM 335.

TAM 445  Continuum Mechanics  credit: 4 Hours.
Tensor algebra and analysis; kinematics of continua; mass, force, stress, and the general balance laws of continuum mechanics; introduction to constitutive equations. 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.
TAM 451  Intermediate Solid Mechanics  credit: 4 Hours.
Analysis of stress and strain (definitions, transformation of axes, equilibrium equations, and symmetry of the stress tensor); linear materials, Hooke's law; strain energy, potential energy, energy principles and methods; two-dimensional problems in elasticity (torsion, axisymmetric problems); the finite-element method for two- and three-dimensional boundary-value problems in linear elasticity; plasticity (introduction, yield criteria, elastic-plastic behavior, and limit-load calculations); linear-elastic fracture mechanics (introduction, Griffith's approach, stress intensity factor, and energy release rate). 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.

TAM 456  Experimental Stress Analysis  credit: 3 Hours.
Basic theories for measuring stresses and deformations in load-carrying engineering components; use of optical, electrical, and mechanical instrumentation; laboratory sessions on brittle coatings, electrical resistance strain gages, photoelasticity, and moiré interferometry. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 251.

TAM 461  Cellular Biomechanics  credit: 4 Hours.
Mechanics of biological cells and tissues: cell structure; mechanics of biomembranes; the cytoskeleton and cortex; dynamic cell processes; cell motility and control of cell shape and proliferation; experimental approaches and theoretical models. Same as BIOE 461. 4 undergraduate hours. 4 graduate hours. Prerequisite: TAM 251.

TAM 470  Computational Mechanics  credit: 3 or 4 Hours.
Modern computational mechanics: mappings and iterative methods; stability; convergence; consistency; numerical and symbolic solutions of ordinary and partial differential equations; finite-difference methods; the finite-element method; spectral methods. Applications to problems in solid mechanics, fluid mechanics, and dynamics. Same as CSE 450. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: CS 101 and MATH 285.

TAM 497  Independent Study  credit: 1 to 4 Hours.
Individual studies in any area of theoretical and applied mechanics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 12 hours, with a maximum of 8 hours in any one term. Prerequisite: consent of instructor.

TAM 498  Special Topics  credit: 1 to 4 Hours.
Subject offerings of new and developing areas of knowledge in theoretical and applied mechanics intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 undergraduate hours or 12 graduate hours.

TAM 499  Senior Thesis  credit: 3 Hours.
Theis investigation of special subjects in mechanics, including theoretical or experimental research. 3 undergraduate hours. No graduate credit. Prerequisite: Department and instructor approval required.

TAM 500  Seminar  credit: 1 Hour.
Lectures and discussion on current topics in theoretical and applied mechanics. Approved for S/U grading only.

TAM 514  Elastodynamics and Vibrations  credit: 4 Hours.
Review of theory of multi-degree-of-freedom systems; problems in the free and forced vibration of continuous linear elastic structures, rods, beams, membranes, plates, and three-dimensional solid and fluid bodies; Lagrangian densities, Sturm-Liouville problems, time and frequency domains, damping, Green's functions, and elastic waves; propagation and modal analysis; modeling of damping in structures; response of complex structures. Same as AE 551. 4 graduate hours. No professional credit. Prerequisite: TAM 412, TAM 542, and TAM 551.

TAM 518  Wave Motion  credit: 4 Hours.
Linear waves in one-dimensional homogeneous and inhomogeneous media (both solids and fluids), linear elastic waves in a homogeneous halfspace, scalar waves in a layer and in a layered halfspace, nonlinear diffusive waves, nonlinear dispersive waves, and the inverse scattering transform. Prerequisite: TAM 541 or MATH 556; one of TAM 514, TAM 531, TAM 551.

TAM 524  Micromechanics of Materials  credit: 4 Hours.
Advanced analysis of modern engineering materials with emphasis on relating microstructural phenomena to the mechanics of material behavior: prediction of elastic and thermal properties of materials with heterogeneous microstructure (such as composites), micromechanics of failure and damage, toughening mechanisms, mechanics of phase transformations; current topics in materials research (such as high-temperature response and ferroelasticity). Prerequisite: CEE 300 or ME 330; TAM 551.

TAM 529  Viscoelasticity Theory  credit: 4 Hours.
Same as AE 529. See AE 529.

TAM 531  Inviscid Flow  credit: 4 Hours.
Dynamics of fluids in the limit of zero viscosity: governing equations of motion, kinematics, and vorticity transport; general theory of irrotational flow, including two-dimensional potential flow, the complex potential, and three-dimensional potential flow; applications to thin airfoil theory and free streamline theory; inviscid flows with vorticity; vortex dynamics; water wave theory; aspects of inviscid compressible flow. Prerequisite: MATH 285 and TAM 435.

TAM 532  Viscous Flow  credit: 4 Hours.
Dynamics of flow in which viscosity is significant or dominant, and the development and use of theoretical and numerical tools for practitioners of modern fluid mechanics; physics of viscous layers that arise in both high- and low-Reynolds-number flows; dimensional analysis, exact solutions to the Navier-Stokes equations; jets and wakes; microhydrodynamics; fluid stability; turbulence. Prerequisite: MATH 285 and TAM 435.

TAM 536  Instability and Transition  credit: 4 Hours.
Stability of fluid motion: linearized flow equations and normal-mode analysis, Kelvin-Helmholtz instability, inviscid and viscous theory of parallel shear flow, Squire's and Rayleigh's inflection-point theorems, secondary instability theory; critical layers; boundary-layer stability; Orr-Sommerfeld equations, Tollmien-Schlichting waves; non-parallel theory, centrifugal instabilities, and Benard convection; nonlinear theory and transition to turbulence; bifurcations, Landau's theory; routes to chaos, strange attractors; transition modeling, prediction, and control; boundary-layer receptivity, experimental evidence. Prerequisite: TAM 532.
TAM 537 Experimental Fluid Mechanics credit: 4 Hours.
Methods and techniques for measurement and analysis of data used in experimental fluid mechanics: signal processing, electronics, and electrophysics; fluid mechanical properties; experimental signal processing; random data and signal analysis; analog and digital data processing; dynamic similarity, self-preservation; pressure measurement, thermal anemometry, and laser-Doppler velocimetry; flow visualization, particle-image velocimetry. Prerequisite: TAM 531 or TAM 532.

TAM 538 Turbulence credit: 4 Hours.
Instability and origins of chaotic motion in fluid flow; Reynolds averaging and statistical description of turbulence, correlations and spectral dynamics of homogeneous turbulence, anisotropic flows, coherent structures, inhomogeneous turbulence, transport models, and large-eddy simulations. Prerequisite: TAM 532.

TAM 539 Fluid Mechanics Seminar credit: 1 Hour.
Weekly seminar on current research topics in turbulent and other complex flows: theoretical modeling, numerical analysis, computational techniques, and experimental investigations. Approved for S/U grading only.

TAM 541 Mathematical Methods I credit: 4 Hours.
Vector and tensor algebra and complex-variable methods; ordinary differential equations, qualitative questions of existence and uniqueness; analytic solution methods, numerical methods, power-series solution and special functions; eigenvalue problems, Green’s functions, Laplace transforms, stability of solutions; engineering applications drawn from mechanics. Prerequisite: MATH 285 and TAM 251.

TAM 542 Mathematical Methods II credit: 4 Hours.
Continuation of TAM 541. Modeling, inequalities, elements of functional analysis; partial differential equations, existence and uniqueness, second-order equations; hyperbolic conservation laws; numerical methods, eigenfunction expansions, integral transforms, and fundamental solutions; engineering applications drawn from mechanics. Prerequisite: TAM 541.

TAM 545 Advanced Continuum Mechanics credit: 4 Hours.
Unified treatment of modern continuum mechanics: mathematical preliminaries; review of kinematics and general balance laws; general theory of mechanical constitutive equations, including material constraints and material symmetry. Prerequisite: TAM 551.

TAM 549 Asymptotic Methods credit: 4 Hours.
Advanced methods of perturbation theory and asymptotic analysis, with examples drawn from classical dynamics, fluid mechanics, and wave propagation: asymptotics of integrals, singular perturbation theory (boundary layers, matched asymptotic expansions, and composite expansions), multiple scales, summation of series; special topics. Prerequisite: MATH 446 and TAM 541.

TAM 551 Solid Mechanics I credit: 4 Hours.
Mechanics of elastic deformable bodies, based on the fundamental concepts of modern continuum mechanics: kinematics, balance laws, constitutive equations; classical small-deformation theory; formulation of initial boundary-value problems of linear elastodynamics and boundary-value problems of linear elastostatics; variational formulations, minimum principles; applications of theory to engineering problems. Prerequisite: MATH 285.

TAM 552 Solid Mechanics II credit: 4 Hours.
Continuation of TAM 551. Selected topics in linear elasticity (including St. Venant beam theory and plane problems of elastostatics), plasticity (including yield surfaces, von Mises and Tresca yield criteria, Drucker’s stability postulate, J-flow theory, perfect plasticity, limit analysis, and slip-line theory), and fracture mechanics (including linear elastic analysis, fracture criteria for elastic brittle fracture, and elastic-plastic fracture). Prerequisite: TAM 551.

TAM 554 Plasticity credit: 4 Hours.
Phenomenological and mathematical formulation of the constitutive laws of plasticity; yield criteria and their experimental verification; plastic stress-strain relations and their associated flow rules; correspondence between rate-independent and rate-dependent plasticity; solutions to basic boundary-value problems, including plane problems and those involving cylindrical and spherical symmetries; variational and minimum principles; limit analysis; plane-strain problems and crystal plasticity; finite-strain theory. Prerequisite: TAM 552.

TAM 555 Fracture Mechanics credit: 4 Hours.
Unified analytical treatment of modern fracture problems: macroscopic theories used to determine the static strength of bodies containing cracks; Griffith criterion, linear-elastic fracture mechanics, elastic-plastic fracture mechanics models; small-scale yielding results and their implications; general yielding; interfacial fracture; fracture control; micromechanisms of fracture. Prerequisite: TAM 424 or MSE 440; TAM 541; TAM 552.

TAM 557 Mechanics of Random Media credit: 4 Hours.
Methods to study mechanics of complex/random microstructures involving several scales: random geometry and stochastic processes and fields, including spatial point processes, mathematical morphology, geodesics, ergodicity, entropy, (non)stationary and (an)isotropic tensor random fields for fluids (turbulence) and solids (microstructures), representations and spectra; truss- and beam-lattices and corresponding (non-)classical continua for modeling crystals, cellular media (e.g. metallic foams), and granular matter; geometric and rigidity percolation; plasticity, fracture, slip statistics, and fractals in disordered media; scaling to Representative Volume Element (RVE) in conductivity, (non)linear elasticity, elasto-plasticity, flow in porous media, and coupled field phenomena; statistical continuum theories for problems without RVE (i.e., lacking separation of scales); stochastic finite elements; effects of microscale randomness on waves and wavefronts in (non)linear elastic/dissipative solid or fluid media; fractional calculus and mechanics of fractal media. Prerequisite: TAM 445 or TAM 551; MATH 362.

TAM 570 Computational Fluid Mechanics credit: 4 Hours.
Highly accurate and reliable techniques for large-scale numerical simulations of fluid flows: spectral numerical methods, including Fourier and other functional expansions, Galerkin and collocation projections, domain decompositions and the solution of partial differential equations, especially the Navier-Stokes equations; high-resolution methods for the solution of hyperbolic conservation laws with discontinuous solutions, and issues related to implementation on supercomputers. Same as CSE 560. Prerequisite: TAM 470 and TAM 542.

TAM 574 Adv Finite Element Methods credit: 4 Hours.
Advanced theory and applications of the finite-element method, as needed for research in computational science and engineering; applications to mechanics of solids and fluids, thermal problems, etc.; variational foundations of the finite-element method, error estimates, and adaptive analysis; finite-element methods for parabolic and hyperbolic problems; mixed finite-element methods; applications to systems of equations. Same as CSE 517. Prerequisite: One of TAM 470, CEE 570, CS 555, ME 471.
Translation Studies (TRST)

TRST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/TRST)

Courses

TRST 201 Introduction to Translation Studies credit: 3 Hours.
Introduction to translation as an academic discipline and professional field through a series of texts in translation. Explores the ways in which texts, images, and ideas move across cultures, across time, across languages, and through different art forms; to elevate the students' appreciation of literature and other art forms, and get acquainted with the complexities of a work of art as a cultural manifestation and with the ways in which various artists, writers and translators have attempted to recreate these complexities in other languages and cultures. Prerequisite: Students must have met the University of Illinois foreign language requirement.
This course satisfies the General Education Criteria for: Humanities - Lit Arts

TRST 400 Translation in the EU credit: 3 or 4 Hours.
Focuses on language policy and the role of the translator as mediator and communicator in Europe's multilingual and multicultural societies. Discusses why the EU project depends on the concept of "living together" across languages and cultures and how translation is done in EU institutions and other international organizations. Seeks to answer the question of how multilingual individuals are trained and how they apply their skills to ensure that the multicultural project that the European Union represents will flourish thanks to this diversity, rather than being hampered by it. Preparatory for the study abroad course in Summer I in the European Union, but can be taken whether or not a student studies abroad in the EU. 3 undergraduate hours. 4 graduate hours.

TRST 401 Translation Study Abroad credit: 3 or 4 Hours.
Two to four-week intensive study abroad course in the EU that studies the dynamics of language and the language policy in the EU and provides hands-on experience with the translator's role and responsibility as mediator and communicator in today's European multi-lingual and multi-cultural societies. 3 undergraduate hours. 4 graduate hours. Prerequisite: Students must have met the University of Illinois foreign language requirement. Departmental approval.

TRST 403 German-English Translation: Theory & Practice credit: 3 Hours.
Same as GER 403. See GER 403.

TRST 404 Bilingualism and Translation credit: 3 or 4 Hours.
Studies selected writings by authors published biliterally to reflect on the ways in which the practice of translation may be informed by self-translation, and to encounter biographical aspect of bilingualism that directly relates to translators' self-perception and the experience of translation. The emphasis is on how authors' strategies in self-translation compare with the strategies of a translator and how bilingualism relates to self, creativity, national identity, and politics. 3 undergraduate hours. 4 graduate hours. Prerequisite: Students must have met the University of Illinois foreign language requirement.

TRST 405 Commercial & Technical Trans credit: 3 or 4 Hours.
Theoretical and practical aspects of commercial and technical translation resulting in a portfolio of business and technical documents relating to a fictional business. 3 undergraduate hours. 4 graduate hours. Prerequisite: Departmental approval. Six semesters of foreign language study.

TRST 406 Translation for Professions credit: 3 or 4 Hours.
Develop the practice of "instrumental" translation skills in a variety of technical domains, including translation for new media, medical and legal translation, and localization. Focuses on the technical, cultural and terminological problems that characterize localization and globalization as governing criteria of translation in today's knowledge economy. 3 undergraduate hours. 4 graduate hours. Prerequisite: Departmental approval. Six semesters of foreign language study.

TRST 407 Terminology and CAT credit: 3 or 4 Hours.
The theoretical and practical aspects of terminology studies, as well as the computer skills required of a translator in today's Language Service Provider (LSP) environment, mastery of a variety of computer-assisted translation (CAT) tools and the SDL Trados suite. Practical applications of terminology work include advanced Internet research for translation work, terminology "mining" exercises, construction of terminology databases and management of those databases. Terminology theory is situated within the field of translation studies as derived from the discipline of linguistics. 3 undergraduate hours. 4 graduate hours. Prerequisite: Departmental approval. Six semesters of foreign language study.

TRST 408 Translation Tools & Practice credit: 3 or 4 Hours.
An advanced tools course that provides familiarity with a range of CAT tools and also localization software. Combines the most up-to-date theoretical studies on translation/localization practices with hands-on activities aimed at having students understand and reflect, by using the tools, on the language, culture- and content-bound issues that translation professionals face when adapting content from an L1 to an L2 culture. Standard industry tolls will be used in class and for assignments. The class will be structured into three main units: Corpus Generation, Website/Software Localization and Machine Translation. 3 undergraduate hours. 4 graduate hours.

TRST 410 Translation Theory & Practice credit: 3 or 4 Hours.
Study of the history, theory and methods of literary translation and the practice of literary translation as we engage in our own work as translators. Examines the growing importance of translation studies as a rapidly expanding field which examines the close relationships between language and culture, language and art, and broad questions of intercultural exchange. 3 undergraduate hours. 4 graduate hours. Prerequisite: Departmental approval.

TRST 412 Spanish/English Translation credit: 3 or 4 Hours.
Same as SPAN 410. See SPAN 410.

TRST 413 Arabic-English Translation credit: 3 or 4 Hours.
Same as ARAB 413. See ARAB 413.
TRST 415  Machine Translation: History and Applications  credit: 3 or 4 Hours.
Explores the 60-year history of using computers to translate human languages, from the 1954 Georgetown experiment to the present. Explores the dominant symbolic and statistical paradigms that have defined machine translation, and the positive and negative dynamics that human translators have experienced when interacting with machine translation systems. Provides hands-on experience with machine translation today. Same as LING 415. 3 undergraduate hours. 4 graduate hours.

TRST 420  Translation Practice  credit: 3 or 4 Hours.
Introduction to a variety of issues focused on how to approach translation projects including a study of text types and genres, the formal properties of texts, grammatical and syntactical issues of translating, questions of linguistic register, considerations of the target audience, the meaning of "localization", cultural and ethical concerns and strategies of compensation. The importance of studying a text and making strategic decisions before starting a translation will be emphasized and discussed, as well as the crucial step of revising and editing the translated text. 3 undergraduate hours. 4 graduate hours. Prerequisite: Departmental approval. Six semesters of foreign language study.

TRST 430  Chinese Poetry and Translation  credit: 3 Hours.
Same as EALC 425. See EALC 425.

TRST 431  History of Translation  credit: 3 or 4 Hours.
Same as CLCV 430, CWL 430, ENGL 486, GER 405, SLAV 430, and SPAN 436. See SLAV 430.

TRST 440  Translation Studies Capstone  credit: 3 or 4 Hours.
Capstone project in translation done under the supervision of a mentor or instructor in a specialized area of translation according to the student's area of interest and language pair. Possible specializations include literary, technical, commercial, legal, medical, or translation for new media. The student may combine the project with an internship or apprenticeship in an appropriate organization, such as a health center, courthouse, international corporation, governmental or non-governmental organization, or a publishing house. Students must complete a contract with the instructor or mentor prior to initiating the project and must meet weekly with the advisor. Prerequisites: TRST 407, 410, and 500. Students must be in the final stages of their graduate work in translation studies.

TRST 450  Translation Capstone  credit: 4 Hours.
Graduate level capstone project in translation done under the supervision of a mentor or instructor in a specialized area of translation according to the student's area of interest and language pair. The possible specializations include literary, technical, commercial, legal, medical, or translation for film and new media. The student may combine the project with an internship or apprenticeship in an appropriate organization, such as a health center, courthouse, international corporation, governmental or non-governmental organization, or a publishing house. Students must complete a contract with the instructor or mentor prior to initiating the project and must meet weekly with the advisor. Prerequisites: TRST 407, 410, and 500. Students must be in the final stages of their graduate work in translation studies.

TRST 500  Translation and Interpretation: Reflective Practice  credit: 4 Hours.
Exploration of the ethical and epistemological dimensions of translation and interpreting. Through discussion of primary texts and case studies, this course aims to take students beyond codified codes of professional ethics to discover the intellectual traditions (e.g., hermeneutics and philosophy of language, critical social theory, virtue ethics, etc.) that frame reflective practice. Topics include the nature of language, dialogue across difference, and the crafting of a personally fulfilling and morally responsive life of practice. 4 graduate hours. No professional credit. Prerequisite: TRST 410 or consent of instructor.

TRST 501  Applied Literary Translation I  credit: 4 Hours.
Focuses on both the theory and the practice of literary translation, as well as the business aspect of how to negotiate a translation proposal through the US publishing market. Students will produce a completed translation of a short story or a selection of poems.

TRST 502  Applied Literary Translation II  credit: 4 Hours.
Focuses on the practice and strategies of literary translation through the study of what prominent and successful translators have written about their own experience and through comparative analysis of prize-winning translations. Students will be exposed to reader response theory and the role of the translator as cultural agent while learning how to produce paratext for their translations (prefaces, notes, etc.) and developing skills in translation, editing, grant-writing, and participation in professional associations. Prerequisite: TRST 501 or consent of unit.

TRST 540  Translation Capstone  credit: 4 Hours.
Graduate level capstone project in translation done under the supervision of a mentor or instructor in a specialized area of translation according to the student's area of interest and language pair. The possible specializations include literary, technical, commercial, legal, medical, or translation for film and new media. The student may combine the project with an internship or apprenticeship in an appropriate organization, such as a health center, courthouse, international corporation, governmental or non-governmental organization, or a publishing house. Students must complete a contract with the instructor or mentor prior to initiating the project and must meet weekly with the advisor. Prerequisites: TRST 407, 410, and 500. Students must be in the final stages of their graduate work in translation studies.

TRST 541  Community Interpreting  credit: 4 Hours.
Introduction to community interpreting and its main theoretical concepts, including what is interpreting, interpreting as process, and what is community interpreting. The major areas of community interpreting will be introduced including interpreting in the medical and legal contexts. The interpreter code of ethics and ethical dilemmas of the interpreter will be introduced and analyzed. Prerequisite: Admission to the Masters in Translation and Interpretation.

TRST 542  Conference Interpreting  credit: 4 Hours.
Introduction to conference interpreting as its main theoretical concepts, including what is interpreting, interpreting as process, and what is conference interpreting. Core skills will be introduced and practiced, such as understanding the spoken language and language analysis techniques, acquisition of subject matter knowledge, terminology management, verbal expression skills, interpreting in practice, and mastery of the technologist of the interpreter booth. Interpreting practice in the student's language pairs will be a part of the course. Prerequisite: Admission to the Masters in Translation and Interpretation.

TRST 580  Special Topics in Translation  credit: 4 Hours.
Covers topics of special interests to rising professional translators in the three areas of specialization of the MA in Translation and Interpreting: Applied Literary Translation, Translation for the Professions and Interpreting. Examples of topics may include: Translation for Government, Literary Translation, Translation and Digital Humanities. May be repeated in separate terms for a maximum of 8 hours.

Turkish (TURK)

TURK Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/TURK)

Courses

TURK 199  Undergraduate Open Seminar  credit: 1 to 5 Hours.
Approved for letter and S/U grading. May be repeated in separate terms to a maximum of 10 hours.
TURK 201 Elementary Turkish I credit: 5 Hours.
Mastery of Turkish alphabet and phonetics; elementary formal grammar and the development of reading and writing skills; and conversation in the formal noncolloquial style. Participation in the laboratory is required.

TURK 202 Elementary Turkish II credit: 5 Hours.
Continuation of TURK 201, with introduction of more advanced grammar; emphasis on more fluency in speaking, reading, and writing simple sentences in standard Turkish. Participation in the language laboratory required. Prerequisite: TURK 201 or equivalent.

TURK 403 Intermediate Turkish I credit: 4 Hours.
Continuation of TURK 202; emphasis on the development of appropriate reading, writing, speaking, and comprehension skills in Standard and Colloquial Turkish, with increased attention to ordinary written texts. 4 undergraduate hours. 4 graduate hours. Prerequisite: TURK 202 or equivalent.

TURK 404 Intermediate Turkish II credit: 4 Hours.
Continuation of TURK 403; emphasis on the development of better receptive and productive language skills in Standard and Colloquial Turkish, with increased attention to both written and spoken texts. 4 undergraduate hours. 4 graduate hours. Prerequisite: TURK 403 or equivalent.

TURK 405 Advanced Turkish I credit: 3 Hours.
Third-year Turkish with emphasis on conversational fluency and on increased ability in reading and comprehending, including newspaper prose and Turkish cultural materials. Course will also deal with the advanced level grammar found in such texts. 3 undergraduate hours. 3 graduate hours. Prerequisite: TURK 404 or equivalent.

TURK 406 Advanced Turkish II credit: 3 Hours.
Continuation of TURK 405 with increased emphasis on conversational fluency and comprehension of advanced level grammar in the reading of a variety of prose texts on current cultural issues. 3 undergraduate hours. 3 graduate hours. Prerequisite: TURK 405 or equivalent.

TURK 490 Special Topics in Turkish credit: 2 to 4 Hours.
Provides an opportunity to focus on various aspects of Turkish language, culture, and society. 2 to 4 undergraduate hours. 2 to 4 graduate hours. Approved for letter and S/U grading. May be repeated in separate terms.

Ukrainian (UKR)

UKR Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/UKR)

Courses

UKR 101 Basic Ukrainian I credit: 4 Hours.
Oral and written work on basic pronunciation, grammar, and vocabulary. For students with no previous study of Ukrainian.

UKR 102 Basic Ukrainian II credit: 4 Hours.
Continuation of UKR 101. Prerequisite: UKR 101 or equivalent proficiency.

UKR 113 Ukrainian Culture credit: 3 Hours.
Course situates Ukrainian culture in the broad context of Slavic nations. Acquaints students with Ukrainian culture from the origins of Kievan Rus’ in the Middle Ages to the present. Includes highlights of historical-cultural events, an overview of literature and of the arts, as well as an outline of Ukrainian folklore. No knowledge of Ukrainian required. This course satisfies the General Education Criteria for: Humanities - Lit Arts
Cultural Studies - Western

UKR 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

UKR 201 Second-Year Ukrainian I credit: 4 Hours.
Completion of grammar, oral drills, and written exercises. Prerequisite: UKR 102 or equivalent.

UKR 202 Second-Year Ukrainian II credit: 4 Hours.
Selected readings in contemporary Ukrainian literature. Prerequisite: UKR 201 or equivalent.

UKR 218 Survey of Ukrainian Literature credit: 3 Hours.
Critical survey of major works in Ukrainian literature from the beginnings to the modern period in light of their historical and cultural background; lectures and readings in English. Same as CWL 218.

UKR 498 Problems in Ukrainian Lit credit: 3 or 4 Hours.
Critical survey of major works in Ukrainian literature from the beginnings to the modern period in light of their historical and cultural background; lectures and readings in English. 3 undergraduate hours. 3 or 4 graduate hours.

Urban and Regional Planning (UP)

UP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/UP)

Courses

UP 101 Introduction to City Planning credit: 3 Hours.
Provides an introduction to urban and regional planning by examining the history of American urbanization, the evolution of American planning thought and practice, and contemporary issues and planning approaches.

UP 116 Urban Informatics I credit: 3 Hours.
Introduces students to basic analytical techniques used to better understand how cities work. Topics include the foundational statistical concepts of data, variation, and inference. Students formulate a research question about an urban studies or planning issue, collect data, use statistical software to analyze data, and communicate the findings. This course satisfies the General Education Criteria for: Quantitative Reasoning I

UP 136 Urban Sustainability credit: 3 Hours.
Provides students with a basic understanding of how to make cities more sustainable by connecting how and where we live to environmental issues. Emphasis on green infrastructure and urban systems, vulnerability and resilience, green design and construction methods, energy production and consumption, and water conservation.

UP 185 Cities in a Global Perspective credit: 3 Hours.
Introduction to the process of urbanization from a global perspective by exploring the social, political, cultural, and economic forces that shape urban life. Students will learn to analyze urban development in a range of cities including those in the Middle East and South Asia, Latin America and Africa.

UP 199 Undergraduate Open Seminar credit: 1 to 5 Hours.
May be repeated.

UP 201 Planning in Action credit: 3 Hours.
Introduces students to different career paths open to urban studies and planning majors. Students interact with professionals and take part in hands-on activities related to different concentration areas: sustainability, policy & planning, social justice and global cities.
UP 203 Cities: Planning & Urban Life credit: 3 Hours.
Provides a broad introduction to social science theories and analysis methods to examine how people, communities, and governments plan a city. Draws upon theories and methods of several social science disciplines including economics, geography, political science, anthropology, and sociology. Includes hands-on application of fundamental analysis techniques. Credit is not given for both UP 203 and UP 204. Prerequisite: UP 101.

UP 204 Chicago: Planning & Urban Life credit: 3 Hours.
Provides a broad introduction to social science theories and analysis methods, and uses the City of Chicago as a semester-long case study to examine how people, communities, and governments plan a city. Draws upon theories and methods of several social science disciplines including economics, geography, political science, anthropology, and sociology. Balances themes and concepts from the assigned readings with discussion of Chicago-specific case studies and hands-on application of fundamental analysis techniques. Credit is not given for both UP 204 and UP 203. Prerequisite: UP 101.

UP 205 Ecology & Environmental Sustainability credit: 3 Hours.
Basic ecological principles underlying environmental sustainability. Examination of problems that arise from inadequate consideration of structure and function of ecological systems, and approaches to ecological restoration and environmentally sound planning. Applications of principles to case studies drawn from urban planning, natural resource management and sustainable development. This course satisfies the General Education Criteria for: Nat Sci Tech · Life Sciences

UP 210 Environmental Economics credit: 3 Hours.
Same as ACE 210, ECON 210, ENVS 210, and NRES 210. See ACE 210. This course satisfies the General Education Criteria for: Social Beh Sci · Soc Sci

UP 211 Local Planning, Gov't and Law credit: 3 Hours.
Provides students with a basic understanding of the governmental structure, legal aspects, and practice of local municipal planning, with special emphasis on case law, constitutional principles, zoning, subdivision regulations and comprehensive planning. Gives an introduction for students interested in pursuing more advanced studies in land use law and local government planning.

UP 260 Social Inequality and Planning credit: 3 Hours.
How are inequalities produced and contested in an urban environment? This course examines this question by analyzing how the urban landscape shapes and is shaped by race, class, and gender inequalities. Uses comparative cases to explore successful intervention, both from formal and informal, across multiple scales from the local to the global. This course satisfies the General Education Criteria for: Social Beh Sci · Soc Sci

UP 301 Capstone Preparation credit: 1 Hour.
Students work with capstone advisor to develop a plan to meet the capstone experience requirement. Students submit a proposal at the end of the semester. Approved for S/U grading only. Prerequisite: Junior standing.

UP 312 Communication for Planners credit: 4 Hours.
Integrates written, verbal, and graphic communication techniques into planning and analysis. Activities simulate professional situations where students develop skills and pieces of broader arguments and synthesize them into final products. Prerequisite: Completion of campus Composition I general education requirement. This course satisfies the General Education Criteria for: Advanced Composition

UP 316 Urban Informatics II credit: 3 Hours.
Provides an introduction to formal methods for collecting and analyzing data required in various planning processes. Methods include survey research, regional demographic and economic analysis, forecasting techniques, benefit-cost analysis, and decision analysis. Prerequisite: UP 116 or an introductory statistics course. This course satisfies the General Education Criteria for: Quantitative Reasoning II

UP 330 The Modern American City credit: 3 Hours.
Explore the transformation of the American city in its journey from abandonment to renewed growth. Cities today are sites of rapid change and experimentation with new ideas for how people can and should live. This course examines the resurgence of American cities, the challenges they face, and their transformation in the 21st century. Each week, class will focus on a different aspect of the modern American city—work, housing, globalization, high finance—and explore its promises, challenges, and implications for the future.

UP 335 Cities and Immigrants credit: 3 Hours.
Focuses on the experiences of United States cities and towns undergoing rapid demographic economic, social, and cultural changes and the local responses to those changes, including local policy making, land-use regulations, community controversy, and grassroots activism. Same as SOCW 335.

UP 340 Planning for Healthy Cities credit: 3 Hours.
Explores the evolving role of health in urban planning. Historical and current theories on the relationship between public health and the built environment are highlighted, as are prescriptions for healthy urban design. Community health planning, health disparities, and the needs of special populations in the city are also examined, along with some of the major policy issues affecting urban health care today.

UP 345 Economic Development Planning credit: 3 Hours.
Public-private-partnerships in urban economic development, including study of potentials, problems, and projects; financing urban economic development through federal grant programs, tax increment financing, and other means.

UP 347 Junior Planning Workshop credit: 6 Hours.
Introduction to planning practice, with an emphasis on physical planning skills. Includes field observation, spatial data analysis, professional communication, and design. Prerequisite: UP 205, UP 312, UP 260 and UP 316.

UP 357 The Land Development Process credit: 3 Hours.
The planning practice requires an understanding of the land development process. In this course students will learn about the decision process used for land development and the technical skills required for reading site plans. The course provides the essential skills necessary in the field of public-sector planning. Developers are required to make key determinations in the decision process for developing land. Planners are required to understand these decisions and they must possess the ability to interpret proposed site plans for development. This includes an understanding of existing conditions of land proposed for development and the impact of new development on the site and surrounding areas. This course contains three primary components in teaching an understanding of the land development process. They are: Understanding Market Decision for Developing Land; Reading Site Plans; and Assembling a Development Plan. Credit is not given for UP 357 if credit for UP 347 has already been given. Prerequisite: UP 312—Communication for Planners is highly recommended or basic familiarity with InDesign, Illustrator, and SketchUp.
UP 390 Planning Internship  credit: 0 to 4 Hours.
Professionally supervised field experience in public and private planning or development agencies. Designed to introduce students to professional employment and actual planning practice. Students work in an agency of their own choice, subject to departmental approval, either during the summer session or part-time during a regular term. At least two weeks of full-time employment or its equivalent is required for each term hour of credit to a maximum of 4 hours. Summary reports are submitted by both employer and student. Approved for S/U grading only. May be repeated. Counts toward the Capstone Experience Requirement. Prerequisite: Upper division undergraduate standing in urban planning.

UP 397 Undergraduate Project  credit: 1 to 3 Hours.
Special projects and applied research related to real world urban problems and professional practice. One credit hour requires approximately 80 hours of work. May be repeated up to 3 hours. Counts toward the Capstone Experience Requirement. Prerequisite: Upper division standing in Urban Planning and consent of Capstone advisor.

UP 401 Undergraduate Capstone Seminar  credit: 1 Hour.
Seminar for peer discussion about the capstone experience and required capstone experience presentation. Students will attend lectures and workshops about career opportunities, resume writing, interviewing, and networking. Meets on a monthly basis. 1 undergraduate hour. No graduate credit. Approved for S/U grading only. May be repeated in separate terms up to 2 hours. Prerequisite: Senior standing.

UP 405 Watershed Ecology and Planning  credit: 4 Hours.
Uses the watershed as the basic organizing concept in environmental planning and management; methods for assessing watershed boundaries, soils, land use, and groundwater system processes and developing plans for watershed protection. Emphasizes ecological implications of patterns of land use on functional and qualitative aspects of watershed systems. All-day field trip required. 4 undergraduate hours. 4 graduate hours. Prerequisite: Should have a previous course in environmental science.

UP 406 Urban Ecology  credit: 4 Hours.
Examines cities as natural systems, combining ecological analyses with historical, anthropological, and sociological studies of urban nature. Addresses ecological sustainability, growth management, biodiversity, restoration, and environmental justice. Required field trip. Same as ENVS 406. 4 undergraduate hours. 4 graduate hours.

UP 407 State and Local Public Finance  credit: 4 Hours.
Provides students with an understanding of the fundamental concepts of fiscal planning at the state and local levels of government. Addresses both the theory and methods of state and local finance, focused on state and local fiscal policy. Addresses emerging policy issues involving land use and taxation, spending and budgeting, intergovernmental cooperation, debt financing, financing for economic development, and privatization. 4 undergraduate hours. 4 graduate hours.

UP 418 GIS for Planners  credit: 4 Hours.
Detailed introduction to the design and use of computerized geographic information systems, focusing on their significance for planning. Emphasizes GIS within an institutional setting, covering not only fundamental technical concepts, but also organizational, management, and legal issues. Students will be introduced to GIS applications and products through readings, videos, demonstrations, and exercises. Computer laboratory work is included. 4 undergraduate hours. 4 graduate hours. Prerequisite: Upper division undergraduate or graduate standing.

UP 420 Planning for Historic Preservation  credit: 4 Hours.
Historic preservation in the context of urban planning, including legal issues and ordinances, economic incentives, comprehensive plans and preservation plans, public participation, media relations, and more. Students will conduct a building survey including research and architectural descriptions for an on-going project in Urbana. Tours of local preservation projects. 4 undergraduate hours. 4 graduate hours. Prerequisite: At least junior standing.

UP 423 Community Development in the Global South  credit: 4 Hours.
Introduces students to the main theoretical frameworks and conceptual building blocks of urban and community development in the Global South. It helps students to develop critical grassroots focused understanding of the approaches to development planning, the notion of community participation and empowerment, and the role of various actors including the non-government organizations and the community-based groups. 4 undergraduate hours. 4 graduate hours.

UP 426 Urban Design and Planning  credit: 4 Hours.
Concepts and techniques of urban analysis, plan making, and implementation essential for effective interdisciplinary work in urban design. 4 undergraduate hours. 4 graduate hours. Prerequisite: Senior standing.

UP 428 International Planning Studio  credit: 3 to 6 Hours.
Involves multidisciplinary student teams developing design or policy proposals for urban development of sites in international contexts. The studio combines seminar and studio/workshop formats to apply critical analysis, define planning problems, and propose solutions that integrate the social, economic, physical, and cultural aspects of site development. 3 to 6 undergraduate hours. 3 to 6 graduate hours. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

UP 430 Urban Transportation Planning  credit: 4 Hours.
Role of transportation in urban development and planning; characteristics of urban-person transportation systems and methods of analysis and forecasting of urban-person transportation demand; transportation systems management and capital improvement programming; and emphasis on the needs and activities of metropolitan planning organizations. Same as CEE 417. 4 undergraduate hours. 4 graduate hours.

UP 436 Urban Design Workshop  credit: 4 Hours.
Examines urban design theory and principles, and evaluates the built environment in a lab-based setting. Working in teams, students become immersed in real work examples and propose design interventions for specific places, including socially diverse neighborhoods in small cities and major metropolitan urban centers. Normally includes active engagement with community residents. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 426, senior or graduate standing, or consent of instructor.

UP 438 Disasters and Urban Planning  credit: 4 Hours.
Introduction to the role of urban planners in preparing for and rebuilding after disasters. Emphasizes U.S. planning practice, with particular attention to the role of local government. Includes basic U.S. emergency management laws and framework, local mitigation planning, and post-disaster recovery planning. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate standing, senior in Urban Planning, or consent of instructor.

UP 441 Land Resource Evaluation  credit: 4 Hours.
Same as LA 441. See LA 441.
UP 443  Scenarios, Plans & Future Cities  credit: 3 Hours.
This course teaches theories and tools of scenario analysis, a set of techniques useful for making plans and creating more sustainable future cities. Scenario analysis can be used to think about multiple facets of a problem simultaneously and for addressing the uncertain future in light of the limited cognitive and computational capacity of individuals and organizations. Urban planners and policymakers are adopting and extending scenario approaches to envision the future, analyze decisions, and identify robust strategies in situations as varied as comparing projected outcomes of alternative routes for highway investment, to making decisions in situations when formal regulatory mechanisms may be lacking. The need for knowledge and skills in this area is reflected in (1) the growing use of scenario analysis as a required method in many government-funded planning initiatives in the United States and around the world, (2) new courses and workshops offered by urban planning programs and professional trainers, such as the American Planning Association and Planetizen, and (3) the sprouting of scenario planning support tools, such as Envision Tomorrow and Index PlanBuilder. 3 undergraduate hours. 3 graduate hours. Prerequisite: A completion of an urban planning class would be useful. Junior standing is required.

UP 446  Sustainable Planning Seminar  credit: 4 Hours.
Same as LA 446, GEOG 446, and NRES 446. See LA 446.

UP 447  Land Use Planning Workshop  credit: 4 Hours.
Small group field work applying principles and techniques to specific land use problems in selected jurisdictions. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 211, senior or graduate standing, or consent of instructor.

UP 455  Economic Development Workshop  credit: 4 Hours.
Small group field work applying principles and techniques of economic development planning and policy analysis to specific problems in selected cities, regions, or states. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 345 or consent of instructor.

UP 456  Sustainable Planning Workshop  credit: 4 Hours.
Focuses on applying sustainable planning principles in a real world setting. Readings and research into indices of sustainable development, sustainable urbanism, and related literature help establish parameters for resolving a local planning project. Course is a hybrid workshop with portions of the semester spent on reading, research, and application working with a local planning agency. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 136 and UP 205, senior or graduate standing, or consent of instructor.

UP 457  Small Town/Rural Planning Workshop  credit: 4 Hours.
What is rural and why does it matter? This workshop focuses on small towns and rural communities using Central Illinois communities in local case studies. Students will apply concepts and skills from prior courses and work extensively in teams to compile, synthesize, and communicate information that furthers planning and placemaking efforts. Archival research techniques; analysis of demographic, social, and economic trends; qualitative interviewing; and documentary film production are examples of the kinds of skills students will develop and refine. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 211, senior or graduate standing, or consent of instructor.

UP 460  Transportation/Land Use Policy  credit: 4 Hours.
Provides an integrated perspective and analytical framework for understanding urban transportation and land use policies. Emphasizes the interplay between the built environment and transportation by focusing on: fundamental travel demand theories; performance measures of urban transportation systems; impacts of transportation on land use and urban form; impacts of land use and urban form on travel patterns; congestion pricing; public transportation and active transportation; and transit oriented development (TOD). 4 undergraduate hours. 4 graduate hours.

UP 466  Energy, Plng & Blt Environment  credit: 4 Hours.
Focuses on the study of buildings, including their past and present uses, their place in the environment, and most importantly, how they can become more sustainable. Teaches students to think about and plan physical space from an energy-and climate-centric perspective. Uses climate mitigation and building energy systems-modeling techniques to analyze potential energy systems reductions and approaches to affect a building's carbon footprint. Same as LA 466. 4 undergraduate hours. 4 graduate hours.

UP 470  Shrinking Cities  credit: 4 Hours.
This seminar examines urban shrinkage—a phenomenon typically associated with population loss, but also characterized by obsolescence, disinvestment, and abandonment. While some cities thrive and struggle to house the global urban majority, other cities face the stark reality of shrinkage and decline. What should we do to envision and enact a viable future for our shrinking cities? This course will be taught as a seminar, using readings, student facilitated discussions, and lectures as a means for creating a shared understanding around urban shrinkage. Literature from Planning, Economics, Sociology, and other areas will contribute to discussions of the meaning of urban decline as a set of social, economic, and spatial phenomena. Some seminar sessions will be "lab" sessions, focused on developing your analytical skillset via qualitative and quantitative methods. 4 undergraduate hours. 4 graduate hours. Credit is not given for UP 470 if credit for UP 494-AG has been given. Prerequisite: Students must have at least a junior standing.

UP 473  Housing & Urban Policy  credit: 4 Hours.
The role of housing in American social policy planning: the history of public and private intervention in housing, regulation of supply and demand within housing markets and market imperfections; analysis of public policies for housing as they affect special populations (for example, the poor, the elderly, the disabled, homeless, and minorities). 4 undergraduate hours. 4 graduate hours.

UP 474  Neighborhood Revitalization  credit: 4 Hours.
Examines rationale and techniques for planning at the neighborhood level; the major social, political, and economic issues that confound public and private sector efforts to revitalize distressed neighborhoods. 4 undergraduate hours. 4 graduate hours.
UP 475 Real Estate Development Fundamentals credit: 4 Hours.
This course will provide an introduction to the fundamental concepts and techniques applied in the real estate development process. In addition, this course will examine both the broader economic and social context in which real estate development is situated as well as how various professions interact within this context. Course assessments will include several case study assignments and a group project using an actual development site that will provide students with the chance to apply the concepts and techniques learned in the course, culminating in a final report and presentation. The overall objective of the course is to provide students with a useful framework for understanding the real estate development process, allowing them to identify viable development opportunities and analyze real estate development projects, while weighing the economic, social, and environmental costs and benefits for a community. 4 undergraduate hours. 4 graduate hours. Credit is not given for UP 475 if credit was already given for UP 494-RE. Prerequisite: This course has no prerequisites, however, having had at least an introductory urban planning class would be helpful. Upper-level or graduate standing is recommended.

UP 478 Community Development Workshop credit: 4 Hours.
Application of community development principles and techniques to the solution of environmental, economic and social problems facing low income urban communities. Involves small group projects and off-campus field work in collaboration with community leaders. 4 undergraduate hours. 4 graduate hours. Prerequisite: UP 260, senior or graduate standing, or consent of instructor.

UP 480 Sustainable Design Principles credit: 2 Hours.
Same as LA 480. See LA 480.

UP 481 Urban Communities & Public Pol credit: 3 or 4 Hours.
Same as AFRO 481 and SOC 472. See AFRO 481.

UP 493 Democracy and Environment credit: 3 or 4 Hours.
Same as GEOG 493, NRES 494, SOC 493. See GEOG 493.

UP 494 Special Topics in Planning credit: 1 to 6 Hours.
Seminar on topics of current interest, as announced in the Schedule. 1 to 6 undergraduate hours. 1 to 6 graduate hours. May be repeated to a maximum of 16 hours.

UP 501 Planning History and Theory credit: 4 Hours.
Offers students a survey of classic and contemporary theories of planning. Students will gain a deeper appreciation for the profession's roots as well as be introduced to some of "the theoretical tools" used to analyze planning. An important aspect of the course is intellectual dialogue through critical reading, informed discussion and writing assignments. Prerequisite: Graduate standing in Urban Planning or consent of instructor.

UP 503 Physical Planning credit: 4 Hours.
Provides grounding in the issues and principles underlying physical planning; lecture and discussion sessions are complemented by project work that applies principles and methods. Prerequisite: Graduate standing in Urban Planning or consent of instructor.

UP 504 Urban History and Theory credit: 4 Hours.
Historical and international comparison of the origins and evolution of cities, the process of urbanization, and the human endeavor to effect urban growth and change. Includes history of urban physical form and of planning efforts, emphasizing planning origins in the nineteenth century and transnational influences. Includes equity issues of urban spatial arrangement, including racial segregation and housing market differentiation. Covers elements of urban physical form, including grid and organic structure, commercial city forms, the urban skyline, and urban sprawl. Prerequisite: Graduate standing in Urban Planning or consent of instructor.

UP 505 Urban and Regional Analysis credit: 2 or 4 Hours.
Techniques, data sources, and skills for analyzing regions as economic, social, and spatial systems. The first half of the course focuses on understanding current conditions and trends, and the second half on forecasting most likely and alternative futures. Students may opt to enroll for only the first 8 weeks and receive 2 hours of credit. Prerequisite: Graduate standing in Urban Planning or consent of instructor.

UP 508 Survey Design and Analysis credit: 2 Hours.
Design of primary data collection instruments, focusing on the large sample survey. Discusses techniques for implementing qualitative and physical data collection by mail, web, and phone. Students learn multivariate statistical techniques for analyzing survey results.

UP 509 Economics for Planners credit: 4 Hours.
Exploration of how economics can contribute to understanding and solving urban problems. Application of economic analysis and reasoning to the important issues that planners confront, including zoning, land use, housing investment, and transportation. Focuses also on skills to use economic methods effectively.

UP 510 Plan Making credit: 4 Hours.
Provides skills to develop a wide range of plans and an understanding of the processes to implement them. Topics covered include planning analysis, political constraints of planning and planning ethics, techniques of negotiation, facilitation, mediation, and presentation to the public. Uses a general framework for plan making that includes plan review, problem framing, information gathering, alternative modeling, scenarios development, impact assessment, and alternatives evaluation. Students will work on applied tasks individually and in groups. Prerequisite: Graduate standing or consent of instructor.

UP 511 Law and Planning credit: 4 Hours.
Examines the legal framework within which planning takes place in urban areas of this country. Emphasizes the role of law in structuring local government responses to social, economic and physical planning issues and in allocating power among local governments, between local governments and state and federal governments, and between governments and the private sectors of society. Course may not be repeated for credit.

UP 519 Advanced Applications of GIS credit: 4 Hours.
Advanced course in geographic information systems emphasizing application of GIS to problems involving spatial analysis. Building upon fundamental concepts, students learn to use GIS software frequently found in planning practice. Also prepares students to use GIS in research requiring management and analysis of geographic data. Extensive use of computing workstations. Prerequisite: UP 418 or consent of instructor.

UP 521 International Planning Seminar credit: 4 Hours.
Advanced graduate seminar concerning urban and regional development processes in a global context. Closely examines critical issues and select topics in international development planning based upon individual research readings. Prerequisite: Consent of instructor.
UP 533  Community In American Society  credit: 4 Hours.
Same as HDFS 533 and SOC 572. See HDFS 533.

UP 535  Local Policy & Immigration  credit: 4 Hours.
Explores major issues confronting urban planners, administrators,
elected officials and community activists working in highly diverse
communities that are undergoing rapid demographic, economic, social,
and cultural change. Focuses specifically on local policy-making in
communities with large numbers of immigrants, particularly in cities
and regions in the United States, Canada, Australia and Europe. Same as
LA 535 and SOCW 535.

UP 543  Environmental Policy & Planning  credit: 4 Hours.
Examines environmental policy and planning from both theoretical
and applied perspectives. Provides an overview of the elements of
environmental policy at national and state levels and investigates local
implementation of environmental policies. Students will learn how
local environmental planning practice fits within the broader context
of environmental policies. Intended for graduate students in Urban and
Regional Planning, but also open to graduate students with appropriate
background and interests from Landscape Architecture, Geography, and
relevant social sciences. Prerequisite: Graduate standing in Urban and
Regional Planning or consent of instructor.

UP 545  Economic Development Policy  credit: 4 Hours.
Explores and evaluates urban and regional economic development policy
in the U.S. Taking the twin lenses of cities and urbanized regions, it asks
why the public sector engages in economic development, how the goals
of economic development are defined, and how different policies attempt
to steer economic activity and jobs to particular places. The course pays
special attention to the question of equity, asking who will benefit from
different policies.

UP 546  Land Use Policy and Planning  credit: 4 Hours.
Examines a variety of approaches to land use policy and planning, from
both a theoretical and an applied perspective. Explores different values in
American land use policy, recent evolution of land use policy. Taught as a
seminar.

UP 547  Regional Planning and Policy  credit: 4 Hours.
When are regional approaches more common and why? This course
builds knowledge of principles and practices to tackle challenges that go
beyond the geographical or disciplinary domain of a single agency.
Through readings, seminar discussions, and assignments, students will
develop an understanding of problems and settings that involve
multiple jurisdictions and actors. Topics will address crosscutting issues
such as affordable housing, foreclosures, fiscal stability, and spatial
inequality. Prerequisite: Intended for graduate students in Urban and
Regional Planning, and others with appropriate background and interests
from Public Administration, Political Science, Natural Resources, Civil
Engineering, Landscape Architecture, Geography, and relevant social
sciences.

UP 552  Regional Development Theory  credit: 4 Hours.
Covers fundamental concepts and theories of regional economic
development including export base, neoclassical and endogenous
growth, regional convergence, core-periphery, interregional trade, product
cycle, industrial districts, entrepreneurship, and regional innovation
systems theories. Also discusses policy and planning frameworks for
applying regional theory to spatial development problems. Same as
ACE 552. Prerequisite: UP 445 and UP 407, or consent of instructor.

UP 555  Economic Impact Analysis  credit: 2 Hours.
Same as ACE 555. See ACE 555.

UP 556  Regional Science Methods  credit: 4 Hours.
Same as GEOG 556. See GEOG 556.

UP 557  Seminar in Regional Science  credit: 4 Hours.
Same as GEOG 557. See GEOG 557.

UP 576  Sustainable Urban Systems  credit: 4 Hours.
Same as CEE 592 and NRES 592. See CEE 592.

UP 578  Ethnography Urban Communities  credit: 4 Hours.
Same as AFRO 552, HDFS 543, and SOC 578. See AFRO 552.

UP 580  Advanced Planning Theory  credit: 4 Hours.
Recent advances in planning, policy-making and decision-making
theories as they relate to the efficient use of land and to the complex
interrelationships among the major uses of land, i.e., housing,
transportation, agriculture; specific applications vary annually, reflecting
the students' dissertation research topics. Prerequisite: UP 501 or
consent of instructor.

UP 585  Advanced Modeling in Planning  credit: 4 Hours.
Seminar on formal models used to analyze planning problems and
planning behavior. Includes static and dynamic, linear and non-linear,
and deterministic and stochastic optimization models. Derivations of
models and methods for solution treated in depth, but the emphasis is on
applications to planning problems such as transportation, land use,
and environmental management. Specific themes change from year to year.
Prerequisite: UP 505 and UP 508, or consent of instructor.

UP 587  Qualitative Research Methods  credit: 4 Hours.
Students use individual research to practice qualitative methods of
studying social interaction. Includes field research and historical/archival
research methods; project areas include community development,
environment, and landscape. Discussion is divided between 1) readings
on issues such as techniques and research design, social theory,
ethnocentrism, and combining qualitative with quantitative research and
2) student research reports. Same as GEOG 587.

UP 589  Research Design and Methods  credit: 4 Hours.
Prepares students to embark on thesis research and independent
grant proposals. Introduces the phases of research design process,
including literature review, identification of the research problem,
statement of research objectives and questions, establishment of the
conceptual framework, and selection of methods, sampling strategies,
measurements, and analyses that are most suitable to address the
research questions. Provides an overview of the commonly used
quantitative and qualitative research methods, e.g., survey, quasi-
experiment, and case study. Guides students through the process of
writing and reviewing a research proposal and providing feedback
to others. Prerequisite: Enrollment in a PhD program or consent of
instructor.

UP 590  Professional Internship  credit: 0 Hours.
Summer, part-time, or other professional-level employment in the field
of planning, usually in an area of concentration; exposure to the social,
political, and institutional setting in which planning operates; and full
documentation of internship activities required. Approved for S/U grading
only. Prerequisite: Consent of instructor.

UP 591  Capstone Seminar  credit: 0 Hours.
Provides general capstone advising to MUP students. Seminar is used
for peer discussion and feedback about work in progress, as well as to
organize for the capstone poster session held each spring semester.
Meets on a monthly basis. Approved for S/U grading only. May be
repeated in separate terms.
UP 594 Seminar credit: 1 to 6 Hours.
Selected topics in urban and regional planning; several sections each term. May be repeated.

UP 596 Independent Study credit: 0 to 8 Hours.
Independent study in selected urban and regional planning topics under the supervision of an appropriate member of the faculty. Can be used by doctoral students for synthesis paper requirement. Approved for both letter and S/U grading. May be repeated to a maximum of 8 hours if topics vary.

UP 597 Urban Planning Research credit: 1 to 4 Hours.
Individual research work under the supervision of an appropriate member of the faculty. Approved for S/U grading only. May be repeated to a maximum of 8 hours. May be used by doctoral students for the research paper requirement. Prerequisite: Graduate Standing in Urban and Regional Planning, consent of instructor, and consent of the Department.

UP 598 Master's Project credit: 4 or 8 Hours.
Major independent or small group project applying planning principles and methods to a current problem in urban and regional planning resulting in a final professional product. Approved for S/U grading only. Prerequisite: Graduate standing in Urban and Regional Planning, consent of instructor, and consent of the Department.

UP 599 Thesis Research credit: 0 to 16 Hours.
Approved for S/U grading only. May be repeated to a maximum of 8 hours for Master's students. May be repeated to a maximum of 16 hours for PhD students. Prerequisite: Graduate standing in Urban and Regional Planning, consent of instructor, and consent of the Department.

**Veterinary Clinical Medicine (VCM)**

VCM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/VCM)

**Courses**

VCM 290 Undergraduate Independent Research credit: 1 to 5 Hours.
Supervised scholarly laboratory/field work and/or reading in fields selected in consultation with an appropriate faculty member. Approved for Letter and S/U grading. May be repeated in separate terms.

VCM 501 Zoological Medicine Seminar credit: 2 Hours.
Discussion of selected topics and literature pertaining to zoological, wildlife and aquatic animal medicine and presentation of a formal seminar. May be repeated to a maximum of 6 hours. Prerequisite: Post DVM and enrolled in the Zoological and Aquatic Animal Residency Program.

VCM 502 Issues in Clinical Research credit: 2 Hours.
This course is intended for students interested in applying analytical epidemiological methods in assessing the health and disease status of populations (animal and human) and assessing the factors affecting that status. It includes lecture/discussion sessions and exercises on the study design, statistical analysis, and interpretation of clinical trials and cross-sectional, case-control, and longitudinal studies. Database management, risk assessment, and techniques for enhancing the validity of field-based studies of naturally occurring disease will also be covered. Prerequisite: Consent of instructor.

VCM 503 Current Lit in Equine Med Surg credit: 1 Hour.
This course will use current primary literature in the fields of equine medicine and surgery as a gateway to discussion. Current literature will be reviewed, critiqued, and discussed in the context of current equine clinical practice. Students are expected to be graduate veterinarians with a thorough understanding of equine medical and surgical concepts before enrolling in the course. May be repeated to a maximum of 6 hours. Prerequisite: Graduate Veterinarian or consent of instructor.

VCM 506 Topics in Pathophysiology credit: 1 Hour.
Current basic and advanced concepts in hemostasis (primary hemostasis, secondary hemostasis, fibrinolysis, normal and abnormal endothelium, natural anticoagulants, anticoagulant drugs and their mechanisms of action) and respiratory physiology and pathophysiology (including acid base and strong ion difference). Prerequisite: DVM degree.

VCM 508 Trans Mol Path Veterinary Dz credit: 3 Hours.
Translation Molecular Pathogenesis of Veterinary Disease (Trans Mol Path Veterinary Dz) equips graduate students with knowledge and skills needed to understand molecular pathologic processes and determine how they translate to clinical manifestations of disease. The pathologic processes to be covered including those involved in cellular response to stress, inflammation, tissue repair, circulation and hemodynamics, immunity, cancer, and infectious disease. Translational associations that link pathologic mechanisms with disease manifestations commonly encountered in companion animal veterinary practice will be emphasized and will promote comprehensive bench-to-bedside learning.

VCM 510 Science of Animal Well-Being credit: 1.5 Hours.
Reviews scientific literature on the well-being of agricultural animals. Topics include indicators of well-being, causes and indicators of stress, impact of housing, management, and veterinary practices on well-being, and enrichment methods. Topics relevant to all major agricultural animal species (swine, dairy cattle, beef cattle, horses, poultry, and sheep) will be covered each semester, in accordance with the interests of enrolled students. Students will critically review and summarize literature and lead and participate in class discussions. Grades will be based on attendance, quality of performance, and a final examination. Same as ANSC 510. Prerequisite: Graduate student in the College of Veterinary Medicine or College of ACES, or consent of instructor.

VCM 511 Seminar in Prod/Pop Medicine credit: 1 Hour.
Same as PATH 511. See PATH 511.

VCM 522 Adv Comp Theriogenology credit: 1 Hour.
Advanced study on the principles and practice of theriogenology in domestic and non-domestic animals. May be repeated to a maximum of 6 hours. Prerequisite: Graduate Veterinarian and consent of instructor.

VCM 524 Effective Biomedical Teacher credit: 3 Hours.
Provides current or future university-level biomedical educators with the knowledge, motivation and proficiencies needed to apply the most recent developments in higher education to their teaching. The overall aim of the course is to cultivate an informed, passionate and adventurous approach to teaching and learning in participants. This will be achieved by fostering new thinking about teaching and learning, and by encouraging collaborative and cooperative learning between the class members. May be repeated in separate terms if topics vary.
VCM 528  Comparative Veterinary Physiology  credit: 3 Hours.
This graduate level physiology course covers advanced physiology of all the major organ systems. Enrolled graduate students are assumed to have a knowledge of basic physiology (such as what is obtained during veterinary school). This advanced graduate level course emphasizes the requirements for normal physiology by discussion of pathologies affecting the organ systems. The overall aim is to increase the clinician-scientist-graduate student's merging of physiology into their day to day practice on the clinic floor and research endeavors. 3 graduate hours. 3 professional hours. Prerequisite: Graduate Veterinarian or consent of instructor.

VCM 536  ECC Journal Topics  credit: 1 Hour.
This is a weekly course aimed at evaluating journals specific to the requirements of the American College of Veterinary Emergency and Critical Care. Seminars of selected articles will be presented to the group every week. 1 graduate hour. Approved for S/U grading only.

VCM 542  Ocular Pathology  credit: 1 Hour.
Same as PATH 542. See PATH 542.

VCM 553  Advanced Diagnostic Imaging  credit: 1 Hour.
Reviews the physics, clinical indications and technical aspects of advanced diagnostic imaging. The course will utilize clinical case examples. Studies are required to prepare one lecture and take a final examination. Attendance at 80% of the classes is required. May be repeated in separate terms for unlimited graduate credit.

VCM 572  Clinical Epidemiology  credit: 4 Hours.
Reviews the common epidemiologic and statistical methods used to design studies, analyze data, and interpret diagnostic tests and research findings. 4 graduate hours.

VCM 577  Advanced Large Animal Medicine  credit: 1 Hour.
A seminar series devoted to intense study of pathophysiological and current therapeutic aspects of selected topics in large animal internal medicine. May be repeated to a maximum of 6 hours. Prerequisite: Graduate Veterinarian or consent of instructor.

VCM 581  Emergency Diagnostic Imaging  credit: 1 Hour.
Provides graduate students in emergency medicine, small animal surgery and diagnostic imaging the opportunity to share principles of diagnostic imaging based on recent case examples. Students will be expected to present at least two cases demonstrating competence in reviewing radiographic findings, formulating a list of differential diagnoses and discussing additional imaging modalities, as appropriate. 1 graduate hour. May be repeated in separate terms to a maximum of 9 graduate hours.

VCM 584  Current Concepts Comp Surgery  credit: 1 Hour.
Advanced study of topics concerning the pathophysiology, diagnosis, and current therapy of diseases which are treated with surgical procedures. May be repeated to a maximum of 4 hours. Prerequisite: Graduate Veterinarian or consent of instructor.

VCM 585  Current Lit Sm Anim Medicine  credit: 1 Hour.
Participants will discuss and analyze current veterinary journal articles which pertain to small animal internal medicine. May be repeated to a maximum of 6 hours. Prerequisite: Graduate Veterinarian.

VCM 588  Advances in Vet Dermatology  credit: 1 or 2 Hours.
A series of lectures, seminars and discussions devoted to the intense study of pathophysiologic aspects of the integument and related systems including: structure and functions, endocrinology, immunology, microbiology, virology, parasitology, pharmacology, oncology, and miscellaneous disorders. Students enrolling for graduate credit will also participate in weekly critiques of current literature. May be repeated to a maximum of 8 hours; duplicate registration is permitted up to 4 hours. Prerequisite: Graduate Veterinarian and consent of instructor.

VCM 590  Seminar  credit: 0 to 1 Hours.
Required of all graduate students whose major is Veterinary Clinical Medicine. Approved for S/U grading. May be repeated.

VCM 591  Advances in Vet Internal Med  credit: 0 or 1 Hours.
A series of lectures, seminars, and discussions devoted to intense study of new pathophysiologic aspects of selected topics in veterinary internal medicine. Each term is devoted to three topics. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Graduate Veterinarian and consent of instructor.

VCM 592  Special Problems  credit: 1 to 4 Hours.
Basic and applied study including orientation and research on pertinent initial and continuing problems in the student's area of interest. May be repeated. Prerequisite: Consent of instructor.

VCM 593  Adv Topics Vet Clin Med  credit: 1 to 4 Hours.
Instruction in advanced diagnosis, therapeutic modalities, and research methodologies in the areas of small animal internal medicine, small animal surgery, equine and food animal medicine and surgery, ophthalmology, theriogenology, radiology, and clinical pharmacology. May be repeated to a maximum of 8 hours. Prerequisite: Graduate Veterinarian and consent of instructor.

VCM 598  Manuscript Research  credit: 0 to 12 Hours.
Independent research to fulfill requirement for non-thesis alternative in Master of Science Program. Credit is not given for both VCM 598 and VCM 599. (Summer Session, 1 to 2 hours.) Prerequisite: Must be enrolled in the departmental graduate program.

VCM 599  Thesis Research  credit: 0 to 12 Hours.
Approved for S/U grading only. May be repeated.

VCM 601  Clinical/Laboratory Practice  credit: 1.5 to 6 Hours.
Individual customized clerkship in clinical medicine and surgery for VM-4 professional students. Approved for S/U grading only. May be repeated to a maximum of 9 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 604  Equine Medicine and Surgery  credit: 1.5 to 4.5 Hours.
Clerkship in equine medicine and surgery for VM-4 professional students. Approved for S/U grading only. May be repeated to a maximum of 12 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 608  Equine Veterinary Husbandry  credit: 1 Hour.
Designed to familiarize veterinary students with the basic principles of equine husbandry, including biosecurity, infectious disease prevention, anti-parasite programs, dental care, transport, and nutrition. Approved for both letter and S/U grading. Prerequisite: Good standing in the veterinary professional curriculum, Graduate College, or consent of instructor.

VCM 611  Dermatology  credit: 1.5 Hours.
Clerkship in dermatology for VM-4 professional students. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.
VCM 612 Oncology credit: 1.5 Hours.
Clerkship in oncology for VM-4 professional students. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 613 Clinical Neuro/Neurosurgery credit: 1.5 Hours.
Clerkship in neurology and neurosurgery for VM-4 professional students. Students will obtain basic skills in diagnosis, treatment, and care of medical and surgical neurological diseases. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 615 Ophthalmology credit: 1.5 Hours.
Clerkship in ophthalmology for VM-4 professional students. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 620 Food Animal Selective Rotation credit: 1.5 to 6 Hours.
Enables fourth year veterinary students to expand their clinical experience in food supply veterinary medicine by taking rotations at off-campus locations with different training opportunities than are available at the University of Illinois at Urbana-Champaign. Approved for S/U grading only. May be repeated to a maximum of 15 hours. Only students in the food animal track may take this course for food animal selective credit. Students in all tracks may take this course for free elective credit. Prerequisite: Fourth-year standing in the veterinary medicine professional curriculum.

VCM 624 Bereavement Issues credit: 1 Hour.
Theoretical and clinical perspectives on the concepts of attachment, bonding, grief and loss will be discussed. The course also includes instruction in basic counseling and crisis intervention skills. Students will answer calls on the CVM C.A.R.E. Helpline under the supervision of the instructor.

VCM 625 Exotic Mammal Medicine credit: 1 Hour.
Exotic Mammal Medicine is an elective course for veterinary students in their second year of the veterinary curriculum or graduate students interested in zoology. Students will learn clinical aspects of comparative anatomy, physiology, husbandry and handling of exotic mammal species encountered in zoological practice, including rodents, lagomorphs, marsupials, canids, carnivores, primates, and cervids. The most commonly encountered diseases of these species will also be discussed. 1 graduate hour. 1 professional hour. Approved for both letter and S/U grading. Prerequisite: Enrollment in the 2nd year veterinary curriculum.

VCM 626 Shelter Medicine I credit: 1 Hour.
Introduction to the field of Shelter Animal Medicine and is intended to create a pool of well-informed veterinarians that will become an important resource for shelter managers nationwide. This course is a prerequisite for the more advanced Shelter Medicine II (offered in the third year). Course will foster veterinarian participation in community service and encourage personal responsibility in the area of animal welfare. Offered for S/U grading only.

VCM 627 Equine Infectious Disease credit: 1 Hour.
Provides an in-depth review of common equine infectious diseases (viral, bacterial, parasitic) according to body systems. Primarily uses a lecture-based format to review the key aspects of disease pathogenesis, common clinical signs and most appropriate diagnostic test(s) for pathogen identification. Lectures are followed by several (3-4) cases that the lecturer will review in class with the students. These cases will be designed to emphasize the essential aspects of the different infectious diseases and generate critical thinking by the students with regards to developing an appropriate diagnostic plan. Approved for S/U grading only.

VCM 634 GP Surg. Oncology credit: 1 Hour.
A five-week course focusing on the theory and practice of small animal surgical oncology for general practice. This course will provide students with the theory and practical skills required to diagnose and treat surgical oncology cases at a primary care level. The module includes lectures and cadaver laboratories pertaining to the principles of surgical oncology and the diagnosis, treatment and prognosis of specific neoplasms. In the laboratories, students will practice a variety of biopsy techniques, cutaneous and subcutaneous tumor resection, intestinal resection and anastomosis, visceral tumor resection and limb amputations. No graduate credit. 1 professional hour. Prerequisite: VM 608. DVM professional students only.

VCM 635 Advanced Soft Tissue Surgery credit: 1 Hour.
Seven-week course during the second half of the Fall semester focusing on the theory and practice of small animal soft tissue surgery. This course covers many of the soft tissue surgical procedures which new veterinary graduates are expected to competently perform. Procedures to be covered include bandaging and wound management, drain placement, declaw, dewclaw removal, tendonectomy, aural hematoma repair, pinna repairs, biopsies, surgery of the integument, gastrointestinal surgery, limb amputations and mastectomy. Approved for S/U grading only. Prerequisites: VM 605, VM 606, VM 607 and VM 608.

VCM 636 Inactive credit: 2 Hours.
Inactive.

VCM 640 Advanced Orthopedic Surgery credit: 1 Hour.
This course will provide hands-on training in fracture fixation and common knee and hip procedures to veterinary students with an interest in orthopedic surgery. This hands-on training is not available in the core course. Approved for S/U grading only. Prerequisite: Third year standing in the veterinary curriculum.

VCM 641 Equine Neonatology credit: 1 Hour.
Designed to familiarize the veterinary student with the basic and advanced principles of equine neonatology. Topics include normal and abnormal physiology, problems of the mare that impact the foal, prematurity, sepsis, uremia, musculoskeletal problems, and therapy. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: VM 606.

VCM 642 Equine Critical Care credit: 1 Hour.
Familiarizes the veterinary student with the basic and advanced principles of equine critical medicine. Topic include normal and abnormal physiology particularly as it relates to shock and systemic inflammatory response syndrome (SIRS); point-of-care testing, clinical pathology and other testing techniques, including cardiovascular and imaging, for assessment and monitoring of critically ill horses; responsible antimicrobial use in critically ill horses; and end of life conversations. 1 graduate hour. 1 professional hour. Prerequisite: VM 606.
VCM 643 Equine Emergency Medicine credit: 1 Hour.
Familiarizes the veterinary student with the basic and advanced principles of emergency care for adult horses. Topics include gastrointestinal, musculoskeletal, respiratory, central nervous system, ophthalmic, and urogenital emergency problems of the horse. Particular attention will be paid to gastrointestinal disease of the horse that present as an emergency, such as colic, enteritis, and typhlocolitis. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: VM 606.

VCM 644 Veterinary Pain Management credit: 1 Hour.
This course will serve to increase a student's knowledge base on many aspects of pain management of the veterinary patient. Subjects covered in this course will include in depth review of neuroanatomy and physiology of pain, pathophysiology of pain, pharmacology of medications used for pain management, non-pharmacologic treatments for pain, and specific pain management strategies for various domestic species, and exotic and zoo animals. No graduate credit. 1 professional hour. Approved for S/U grading only. Prerequisite: For students in the veterinary professional program only.

VCM 645 Equine Surgery Laboratory credit: 1 Hour.
Provides introductory laboratory experiences in common and basic equine surgical techniques. Topics include normal and cryptorchid equine castration, distal limb surgeries, casting techniques, and joint injections. Approved for S/U grading only. Prerequisite: VM 606.

VCM 646 Lab Animal Science I credit: 1 Hour.
Addresses fundamental issues in Laboratory Animal Sciences including history, regulatory aspects, ethical considerations, and basic biology and husbandry of common laboratory animal species. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: Second or third-year standing in the veterinary medicine curriculum, registration in the graduate college, or consent of instructor.

VCM 648 One Medicine: One Health credit: 3 Hours.
Explores the interrelatedness of human, animal and environmental health with a focus on new and emerging diseases. Through a combination of lecture, class discussion and small group projects, students will learn about how human, animal and ecosystem health are all affected by many of the same factors and how the health of one affects the health of the others. Public policy affecting community health will be discussed and new policy initiatives will be developed by students. Approved for letter and S/U grading.

VCM 649 Avian Medicine and Surgery credit: 2 Hours.
Avian species represent a significant segment of the companion animal population. Their anatomy, physiology, and behavior are substantially different from traditional species. Intended to provide students with the knowledge and skills required a practice clinical avian medicine and surgery. Diagnostic and therapeutic principles, as well as diseases of companion avian species are included. 2 graduate hours. 2 professional hours. Approved for letter and S/U grading.

VCM 650 Clinical Sm Animal Dentistry credit: 1.5 Hours.
Clerkship in small animal dentistry for VM-4 professional students. Students will assist in the diagnosis and treatment of dogs and cats with dental disease. The psychomotor skills laboratory will be available for students practicing dental procedures on models and frozen specimens. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth-year standing or equivalent in the veterinary medicine curriculum and with prior consent of instructor.

VCM 656 Lab Animal Science II credit: 1 Hour.
Continuation of VCM 646. Additional topics include laboratory animal diseases, biohazard control, gnotobiology and animal models of human disease. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: VCM 646 or equivalent, or consent of instructor.

VCM 657 Shelter Medicine II credit: 1 Hour.
Series of lectures/discussions focusing on the history of the humane movement and animal control in the United States and abroad, legal issues for animal control/welfare, the association of domestic violence, animal abuse, and animal fighting, shelter animal medicine and operation, infectious disease management in the shelter setting, population control/epidemiology, feral animal issues, and animal behavior. The "laboratory" portion entails a optional field trip or out rotations with The Anti-Cruelty Society in Chicago, the Champaign/Urbana Humane Society, and CCHS. Approved for S/U grading only. Prerequisite: VCM 626.

VCM 660 Advanced Equine Anatomy credit: 1 Hour.
Designed to provide an in-depth assessment of the unique anatomical characteristics of the horse with focused attention to clinically important aspects of equine anatomy. The material will cover the anatomy of the head, larynx and pharynx, gastrointestinal anatomy and function, and musculoskeletal anatomy in particular detail, relating equine anatomy to the diagnostic and surgical approaches used in the management of diseases involving these body systems. Prerequisite: VM 604.

VCM 661 Advanced Equine Lameness credit: 2 Hours.
Covers equine lameness from a clinician's perspective. Offers an in-depth integrative approach to the diagnosis of equine lameness using the presenting complaint as a starting point. Rather than approaching equine musculoskeletal disease from the perspective of specific injuries, students will be guided through the lameness examination process. Active student participation in class discussion is expected. 2 professional hours. May not be repeated for credit. Prerequisite: Third year veterinary student.

VCM 663 Small Animal Dermatology credit: 1 Hour.
First half of the course presents a systematic approach to small animal dermatologic diagnoses and therapeutics; the second half deals with immunological disorders, seborrheic syndromes, hereditary disorders, cutaneous neoplasms, and feline dermatology. Prerequisite: VCM 631 or equivalent, or consent of instructor.

VCM 664 Wildlife and Exotics credit: 1.5 or 3 Hours.
Clinical experience pertaining to wildlife and exotic pet species including avian, reptile, amphibian, and small mammal species. Exposes participants to all aspects of non-traditional species care including medicine, surgery, husbandry, population considerations, infectious and zoonotic disease principles and shelter medicine. Participants will work with patients of the Wildlife Medical Clinic, the Exotic Animal service, the Acute Illness Center and participating shelters. A basic understanding of anatomy, physiology, husbandry and handling of non-traditional species is required as is the completion of a relevant project by the end of the course. Approved for S/U grading only. May be repeated to a maximum of 3 hours. Prerequisite: Fourth year standing in the veterinary medicine curriculum, 1 semester of previous participation on the Wildlife Medical Clinic or other demonstrated interest in non-traditional species medicine approved by the course instructor.
VCM 666  Shelter Animal Med and Surg  credit: 1.5 to 4.5 Hours.
Partnering with Chicago's Animal Care and Control, The AntiCruelty Society of Chicago, and the Champaign County Humane Society, this course will provide a truly unique community veterinary practice program for the low income populations of Chicago and Champaign County. Clinical rotations at these facilities will expose veterinary students to community practice through a low income clinic and shelter setting and explore new ways of improving animal health and welfare, alleviating animal suffering, abuse and abandonment, and protecting public health. Approved for S/U grading only. May be repeated to a maximum of 6 hours. Prerequisite: VCM 657.

VCM 669  Primary Care Elective Rotation  credit: 1.5 to 3 Hours.
Externship at a general private veterinary practice in the United States. This elective clinical rotation will expose students to primary and preventive veterinary medical care of small and/or large animals in a private practice setting, and will familiarize students with the business and operational aspects of private practice. Approved for S/U grading only. May be repeated in the same or subsequent terms to a maximum of 3 hours. Prerequisite: All preclinical and paraclinical core courses in the veterinary medicine professional curriculum.

VCM 671  International Vet Medicine  credit: 1 Hour.
Discussion of selected topics relevant to animal welfare and disease in the global society and, with guest speakers, of political issues of different continents. Students present a short seminar on a topic of choice. Prerequisite: DVM student.

VCM 672  Food Supply Disease Prevention  credit: 1 Hour.
This course is designed to familiarize the student with the basic principles of food supply disease control. The first half of the course is designed to enhance the student's ability to detect disease with observation of necropsy lesions at the gross level. The second half of the course will cover immunizations and the judicious use of antimicrobials. 1 graduate hour. 1 professional hour. Prerequisite: VCM 690 or permission of the instructor if a graduate student or house officer.

VCM 673  Companion Animal Rehab  credit: 1 Hour.
Series of lectures/discussions focusing on the proper application of companion animal rehabilitation modalities. Designed to give an understanding of the basics of rehabilitation and begin the thought process of implementing rehabilitation in to veterinary medicine. Prerequisite: Registration in the veterinary curriculum or consent of the instructor.

VCM 674  Equine Exercise Physiology  credit: 1 Hour.
Designed to familiarize veterinary students with the basic principles of equine exercise, physiology and sports medicine. Topics include physiology, energetics, thermoregulation, fatigue, conventional and alternate training techniques, and drugs and medications used in equine athletes. Approved for letter and S/U grading. Prerequisite: Good standing in the veterinary professional curriculum, Graduate College, or consent of instructor.

VCM 677  Study Abroad Germany  credit: 1.5 Hours.
Study Abroad Program to learn about public health issues and regulations in Germany. Approved for S/U grading only.

VCM 678  Reptile Medicine & Surgery  credit: 1 Hour.
Provides an introduction to reptile medicine and surgery. Specific topics to be addressed include non-infectious and infectious diseases, diagnostic sampling techniques, anesthesia and analgesia, and common surgical procedures for reptiles. Approved for S/U grading only.

VCM 679  Adv Veterinary Ophthalmology  credit: 1 Hour.
Anatomic, physiologic, pathologic, and pharmacologic considerations in eye diseases and their treatments; instrumentation and methods of study of ocular structure, physiology, and diseases; and laboratories devoted to techniques of examination of the eye and surgical procedures used in treatment of eye diseases. No graduate credit. 1 professional hour. Approved for S/U grading only. Prerequisite: Third-year standing in veterinary medicine curriculum.

VCM 681  Adv Equine Internal Medicine  credit: 1 or 2 Hours.
Advanced instruction in case management, laboratory data interpretation, decision-making regarding therapeutics, and advanced diagnostic techniques. Approved for S/U grading only. Prerequisite: Consent of instructor.

VCM 682  Wildlife Medicine  credit: 1 Hour.
An 8-week elective course for veterinary students offered in their second or third year of the veterinary curriculum. Participation in weekly rounds and team meetings, for the purpose of independent study and training, is required. Students will be required to maintain a personal clinic journal describing case work, training, and self-assessment. Team leaders should include any training that they conduct for their teams. The journals will be reviewed at the end of the semester by the course instructors. Available to VM2 students during the first and second 8-week terms of the spring term. Available to VM3 students during the first and second 8-week terms of the fall term. May be repeated in the same term to a maximum of 2 hours. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Enrolled students must be an active member assigned to a treatment team in the Wildlife Medical Clinic.

VCM 684  Client Relations  credit: 1 Hour.
Introduction to client relations, including techniques of effective verbal and nonverbal communication and applications of these techniques for veterinary students.

VCM 685  Advanced Diagnostic Imaging  credit: 1 Hour.
Stresses imaging principles and comparative anatomy, using clinical cases as examples for echocardiography, diagnostic ultrasound, nuclear medicine, CT and MRI. Prerequisite: First, second or third year veterinary students or by consent of instructor.

VCM 686  ZooMed: What is Your Diagnosis  credit: 1 Hour.
A series of interactive, non-domestic animal cases will be discussed during each meeting. Expands a veterinary student's confidence and diagnostic skill when working with these species. Approved for S/U grading only. May be repeated in separate terms to a maximum of 2 hours.

VCM 687  Canine Occupational Health I  credit: 1 Hour.
This course will address the most common occupations for working and performance dogs and how these occupational activities may impact health. Subjects covered in this course will include handling of working dogs, breed predisposition to disease, equipment and its proper use, nutrition, rehabilitation and physical therapy, pain management, alternative therapies and prevention strategies in managing occupation-related illnesses in working and performance dogs. The course will be presented in lecture format. No graduate credit. 1 professional hour. Prerequisite: First, Second or Third year standing in the DVM curriculum or permission of instructor.
VCM 688 Food Supply Disease Management credit: 1 Hour.
This course is designed to familiarize the veterinary student with the principles of disease management of the major body systems in herd situations. The student will be given case examples and opportunities to evaluate and treat diseases of the respiratory and enteric systems as well as multiple periparturient diseases. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: VCM 672 or permission of the instructor if a graduate student or house officer. Class Scheduled Information: DVM graduate students or house officers in food animal related training programs.

VCM 690 Intro to Food Supply Medicine credit: 1 Hour.
This course is designed to familiarize the student with the basic principles of food supply veterinary medicine. Topics include epidemiologic investigation, veterinary inputs into food supply systems, reproductive aspects associated with production systems and therapeutic standards in food production. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading. Prerequisite: VCM 601 or permission of the instructor.

VCM 692 Special Problems credit: 1 to 3 Hours.
Individual research on a special problem chosen in consultation with the instructor and department head. 1 to 3 graduate hours. 1 to 3 professional hours. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Enrollment in veterinary medicine curriculum with grade point average of 3.0 or above, or consent of instructor.

VCM 693 Comparative Anatomy - Zoo credit: 1 Hour.
The comparative anatomy of zoological species commonly encountered in clinical practice will be discussed in lecture format followed by laboratory dissection of cadavers. Additionally, radiographic anatomy of these species will be discussed. Species covered include representatives of the taxonomic Classes Chondrichthyes, Osteichthyes, Amphibia, Reptilia, Aves, Mammalia. Cadaver specimens include bony fish, sharks, frogs, iguana, turtles, snakes, birds (pigeons), rats and rabbits. Emphasis will be placed on anatomical differences as related to domestic species. Meets for one hour of lecture and two hours of laboratory, one or two times each week during the eight weeks of the course for a total of eight lecture hours and 16 laboratory hours. Approved for S/U grading only.

VCM 694 Veterinary Clinical Medicine credit: 1 to 3 Hours.
To be used to designate a trial or experimental course for five or more students, designed to be an elective in the CVM professional curriculum. The course can be taught under this designation for two years or two offerings, whichever time is greater. 1 to 3 graduate hours. 1 to 3 professional hours. Approved for letter and S/U grading. May be repeated to a maximum of 6 hours. Prerequisite: Registration in the veterinary medicine curriculum or consent of instructor.

VCM 695 Food Supply Decision Making credit: 1 Hour.
This course is designed to enhance veterinary student knowledge of case management and allow them to utilize case information to make decisions. The course will be laboratory and problem based with the opportunity to use antemortem and postmortem samples of animals with disease to evaluate therapeutic and management outcomes. 1 professional hour. Approved for S/U grading only. Prerequisite: VCM 688.

VCM 696 Fish Medicine and Surgery credit: 1 Hour.
Introduction to ornamental fish medicine and surgery. Specific topics to be addressed in this course include non-infectious and infectious diseases, diagnostic sampling techniques, anesthesia and analgesia, and common surgical procedures for fish. 1 graduate hour. 1 professional hour. Approved for letter and S/U grading.

VCM 697 Adv Topics of Feline Medicine credit: 1 Hour.
Presents basic aspects of feline medicine, feline preventive medicine and current medical topics in feline internal medicine. Approved for S/U grading only.

VCM 698 Adv Small Animal Dentistry credit: 1 Hour.
The recognition and appropriate treatment of various types of feline and canine dental diseases will be discussed. The laboratories will be utilized to assist students in the determination of the appropriate diagnosis based on dental radiographs, photographs and models. Oral surgery, periodontic and endodontic therapy will also be performed in the laboratory. 1 graduate hour. 1 professional hour. Approved for S/U grading only.

Veterinary Medicine Courses (VM)

VM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/VM)

Courses

VM 601 Clinical Practice I credit: 4 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on exposure to the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 4 professional hours. Approved for S/U grading only.

VM 602 Structure and Function I credit: 9.5 Hours.
Teaches gross anatomy of the limbs of the dog, cat, horse, and ox; histology of basic tissues, and endocrine, immune, integumentary, and musculoskeletal systems; early development; cell physiology and endocrinology; neurobiology of excitable tissues including brain, nerves, and muscles; and clinical correlations between these subjects and the clinical experiences of VM 601. No graduate credit. 9.5 professional hours.

VM 603 Structure and Function II credit: 9 Hours.
Teaches gross anatomy of the thoracic and abdominal cavity of the dog, cat, horse, ox, sheep, goat and pig; histology of the cardiovascular, respiratory and gastrointestinal systems; neurobiology of the autonomic system and pain; and clinical correlations between these subjects and the clinical experiences of VM 601. No graduate credit. 9 professional hours. Prerequisite: VCM 602 and good-standing in the veterinary professional curriculum or consent of instructor.

VM 604 Structure and Function III credit: 9.5 Hours.
Teaches gross anatomy of the pelvic cavity and head of the dog, cat, horse, ox, sheep, goat and pig; histology of the reproductive, urinary, and special senses systems; reproductive and renal physiology; neurobiology of cranial nerves and special senses; basic animal nutrition; and clinical correlations between these subjects and the clinical experiences of VM 601. Course Information: No graduate credit. 9.5 professional hours. Prerequisite: VM 603 and good-standing in the veterinary professional curriculum, or consent of instructor.

VM 605 Pathobiology I credit: 9.5 Hours.
Teaches principles of pharmacology; general pathology; immunology; medical genetics; and mechanistic toxicology. No graduate credit. 9.5 professional hours. Prerequisite: VM 604 and good standing in the veterinary professional curriculum, or consent of instructor.
VM 606 Clinical Practice II credit: 4 Hours.
Teaches in greater depth the clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on exposure to the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 4 professional hours. Approved for S/U grading only. Prerequisite: VM 601, VM 604, and good standing in the veterinary professional curriculum, or consent of instructor.

VM 607 Pathobiology II credit: 10 Hours.
Infectious disease concepts in parasitology, protozoology, bacteriology, mycology, and virology; and introduces basic antimicrobial pharmacology. No graduate credit. 10 professional hours. Prerequisite: VM 605, VM 606, and good standing in the veterinary professional curriculum; or consent of instructor.

VM 608 Pathobiology III credit: 9 Hours.
Pathology, clinical pathology, and imaging of organ systems; epidemiology and food safety; and includes an integrative laboratory covering commonly encountered problems in infectious diseases. No graduate credit. 9 professional hours. Prerequisite: VM 607 and good standing in the veterinary professional curriculum, or consent of instructor.

VM 609 Medicine and Surgery I credit: 10.5 Hours.
Teaches the practice of medicine and surgery of anesthesiology, neurology, ophthalmology, reproduction, and neonatology. Surgery and Theriogenology laboratories continue throughout this course. No graduate credit. 10.5 professional hours. Prerequisite: VM 608 and good-standing in the veterinary professional curriculum, or consent of instructor.

VM 610 Medicine and Surgery II credit: 10.5 Hours.
Teaches and practice of medicine and surgery of dermatology, endocrinology, gastroenterology, and urology. Surgery and Theriogenology laboratories continue throughout this course. No graduate credit. 10.5 professional hours. Prerequisite: VM 609 and good standing in the veterinary professional curriculum, or consent of instructor.

VM 611 Medicine and Surgery III credit: 9.5 Hours.
Teaches the practice of medicine and surgery of animal behavior, cardiology, clinical toxicology, imaging, musculoskeletal diseases, oncology/hematology/immune-related diseases, and respiratory diseases. Surgery laboratories continue through the course. No graduate credit. 9.5 professional hours. Prerequisite: VM 610 and good standing in the veterinary professional curriculum, or consent of instructor.

VM 612 Clinical Practice III credit: 8 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on experience in the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 8 professional hours. Approved for S/U grading only. Prerequisite: VM 611.

VM 613 Clinical Practice IV credit: 13 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on experience in the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 13 professional hours. Approved for S/U grading only. Prerequisite: VM 611.

VM 614 Clinical Practice V credit: 8 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on experience in the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 8 professional hours. Approved for S/U grading only. Prerequisite: VM 611.

VM 615 Clinical Practice VI credit: 8 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on experience in the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 8 professional hours. Approved for S/U grading only. Prerequisite: VM 611.

VM 616 Clinical Practice VII credit: 8 Hours.
Teaches clinical skills, practices, and procedures used in the Veterinary Teaching Hospital and the Veterinary Diagnostic Laboratory and provides hands-on experience in the methodologies used to diagnose, treat, and prevent disease in animals. No graduate credit. 8 professional hours. Approved for S/U grading only. Prerequisite: VM 611.

VM 617 Professional Development credit: 8 Hours.
Provides students with a capstone experience near graduation to enhance their educations with advanced professional experiences tailored to their career needs and/or to strengthen perceived areas of weakness in their professional education and development. No graduate credit. 8 professional hours. Approved for S/U grading only. Prerequisite: VM 616 and good standing in the veterinary professional curriculum.

VM 620 Canine Feline Behavior credit: 1 or 3 Hours.
This lecture/discussion course examines the evolutionary histories, domestication process, development behavior social behavior and problem behavior of the dog and the cat. Topics also include learning theory, training methods, and behavior modification approaches for companion animals. Analysis and discussion of behavior/training case studies are included, and lectures and discussions focus on issues that are relevant to the involved in-depth analysis of behavior problem case studies. No graduate credit. 1 or 3 professional hours.

VM 622 Research Project I credit: 2 Hours.
In this lecture/discussion course, students will work in groups, each led by a faculty mentor. Each group will develop a research question, design experiments to answer the question, and write a project proposal. No graduate credit. 2 professional hours. Approved for S/U grading only. Prerequisite: Good standing in the veterinary curriculum.

VM 623 Research Project II credit: 2 Hours.
In this lecture/discussion course, which is a continuation of VM 622, students will work in groups, each led by a faculty mentor. The groups will conduct the research project that was planned and proposed in VM 622, analyze the data, and prepare a scientific manuscript for publication. No graduate credit. 2 professional hours. Approved for S/U grading only. Prerequisite: Good standing in the veterinary curriculum.

VM 626 The Basics of Business credit: 1 Hour.
Business principles related to managing a veterinary practice including economics, negotiations, finance, communication and interpersonal skills, accounting, and management. 1 graduate hour. 1 professional hour. Prerequisite: Third year standing in the veterinary curriculum or consent of instructor.
VM 627 Fundamentals of Finance credit: 1 Hour.
Provides students with a strong introductory background in the basic aspects of personal and corporate finance. Topics addressed include financial statements, budgeting, debt management, interest rates, personal investment strategies, developing and managing a portfolio of investments, time value of money, financial decision making, and managing financial risk. No graduate credit. 1 professional hour. Approved for S/U grading only.

VM 635 Veterinary Medical Spanish credit: 2 Hours.
In this course second year veterinary students will learn basic veterinary Spanish terminology to enable them to communicate effectively with clients. This involves language skills necessary to describe diseases of various animals and discuss treatment options, their benefits and side effects, and cost of treatment with the client. No graduate credit. 2 professional hours. Approved for S/U grading only. Prerequisites: Students should have basic writing, reading, and speaking skills in Spanish. Second year students only.

VM 642 Contemporary Issues in Vet Med credit: 1 Hour.
An introductory course for first year veterinary students that will explore issues affecting the profession and practice of veterinary medicine, as well as career opportunities. Approved for S/U grading only.

VM 643 Fundamentals of Management credit: 1 Hour.
An introductory course for second year veterinary students that explores the aspects of managing people in a business setting. Compliance, motivation, engagement, persuading, developing, and retaining employees will be covered as well as cross generational issues in the workplace. No graduate credit. 1 professional hour. Approved for S/U grading only.

VM 645 Communications in Practice credit: 1 Hour.
An introductory course for third year veterinary students that will explore the service and communication side of veterinary medicine as well as facilitate in educating students on personal finance, resume development, interviewing contracts and negotiation, and intra and interpersonal communication. No graduate credit. 1 professional hour. Approved for S/U grading only.

VM 694 Veterinary Medicine credit: 1 to 4 Hours.
To be used to designate a trial or experimental course for five or more students. It is designed to be an elective for the CVM professional curriculum. A course can be taught under this designation two times within a two-year period and cannot be renewed as a VM 694 course. No graduate credit. 1 to 4 professional hours. May be repeated to a maximum of 8 hours if topics vary. Prerequisite: Registration in the veterinary medicine curriculum or consent of instructor.

Wolof (WLOF)

WLOF Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/WLOF)

Courses

WLOF 201 Elementary Wolof I credit: 5 Hours.
Introduction to Wolof, emphasizes grammar, pronunciation, reading, and conversation in standard Wolof. Same as AFST 241. Participation in language laboratory required.

WLOF 202 Elementary Wolof II credit: 5 Hours.
Continuation of elementary Wolof, with introduction of more advanced grammar, emphasizes more fluency in speaking, reading, and writing simple sentences in standard Wolof. Same as AFST 242. Prerequisite: WLOF 201. Participation in language laboratory required.

WLOF 403 Intermediate Wolof I credit: 4 Hours.
Survey of more advanced grammar, with emphasis on increasing conversational fluency, composition skills, study of written texts in standard and Dakar Wolof, and discussion of grammatical variations. Same as AFST 443. 4 undergraduate hours. 4 graduate hours. Prerequisite: WLOF 202.

WLOF 404 Intermediate Wolof II credit: 4 Hours.
Continuation of WLOF 403. Emphasizes ability to engage in reasonably fluent discourse in Wolof, comprehensive knowledge of formal grammar, and ability to read ordinary texts in standard and Dakar Wolof. Same as AFST 444. 4 undergraduate hours. 4 graduate hours. Prerequisite: WLOF 403.

WLOF 405 Advanced Wolof I credit: 3 Hours.
Third year Wolof with emphasis on conversational fluency and on increased ability in reading and comprehending texts, including newspaper prose and West African cultural materials. Course will also deal with the advanced level grammar found in such texts. Same as AFST 445. 3 undergraduate hours. 3 graduate hours. Prerequisite: WLOF 404 or equivalent.

WLOF 406 Advanced Wolof II credit: 3 Hours.
Continuation of WLOF 405 with increased emphasis on conversational fluency and comprehension of advanced level grammar in the reading of a variety of prose texts on current cultural issues. Same as AFST 446. 3 undergraduate hours. 3 graduate hours. Prerequisite: WLOF 405 or equivalent.

WLOF 407 Topics Wolof Lang & Lit I credit: 3 Hours.
Selected readings from modern Wolof authors, with a focus on novels, plays, and basic poetry illustrative of West African cultural issues and advanced level Wolof grammar, as well as development of expository writing skills. Same as AFST 447. 3 undergraduate hours. 3 graduate hours. Prerequisite: WLOF 405 or equivalent.

WLOF 408 Topics Wolof Lang & Lit II credit: 3 Hours.
Continuation of WLOF 407 with increased emphasis on the reading and comprehension of literary texts exemplified in advanced level novels, plays, and poetry, as well as on advanced mastery of expository writing skills. Same as AFST 448. 3 undergraduate hours. 3 graduate hours. Prerequisite: WLOF 407.

Women and Gender in Global Perspectives (WGGP)

WGGP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/WGGP)

Courses

WGGP 581 Gender Relations & Intl Dev credit: 4 Hours.
Interdisciplinary seminar examining theoretical and empirical research on gender and the transformation of social and economic structures. Students will develop a comparative perspective on issues of women and public policy by contrasting and comparing such policies in North and South America, Eastern and Western Europe, Asia, and Africa. Same as GWS 512 and SOCW 581.

Writing Studies (WRIT)

WRIT Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/WRIT)
Courses

WRIT 300  Issues in Tutoring Writing  credit: 3 Hours.
Introduction to the work of writing centers, theories of composition, and writing pedagogy through readings, discussion, and observation. Theories of learning, collaborative learning, and the dynamics of the tutoring relationship will be discussed issues of working with specific writers such as English Language Learners will be explored. A relevant issue of interest will become the topic for an extended research paper. As theory is applied to practice, students will write, share their writing with others, and observe and participate in writing tutoring session. Later in the semester students will consult with writers, either with an experienced consultant or alone. Satisfactory completion of all requirements of the class and approval of the Writers Workshop Director will allow students to consult in the Writers Workshop the following semester. Credit is not given for WRIT 203 and WRIT 300. Prerequisite: Consent of instructor.

WRIT 303  Writing Across Media  credit: 3 Hours.
Same as INFO 303. See INFO 303. This course satisfies the General Education Criteria for: Advanced Composition

Yiddish (YDSH)

YDSH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/YDSH)

Courses

YDSH 101  Beginning Yiddish I  credit: 4 Hours.
Course develops basic conversational and reading skills as well as the essentials of Yiddish grammar.

YDSH 102  Beginning Yiddish II  credit: 4 Hours.
Continuation of YDSH 101 focusing on comprehension and reading skills. Prerequisite: YDSH 101.

YDSH 103  Intermediate Yiddish I  credit: 4 Hours.
Continuation of YDSH 102. Develops more advanced conversational, comprehension, reading and writing skills as well as introducing more advanced features of Yiddish grammar. Prerequisite: YDSH 102 or equivalent placement score.

YDSH 104  Intermediate Yiddish II  credit: 4 Hours.
Continuation of YDSH 103. Prerequisite: YDSH 103 or equivalent placement score.

YDSH 220  Jewish Storytelling  credit: 3 Hours.
Course will introduce the great Jewish storytellers such as Nachman of Bratslav, Scholem-Aleichem, and I.B. Singer through readings of Yiddish tales, short stories, poetry, drama and excerpts from novels and autobiographies from the 19th and 20th centuries. In addition, Yiddish films and folklore will be used to exemplify the variety of Jewish cultural expression in Eastern Europe, Russia, and America. Course will also present a sample of critical approaches to Yiddish literature. Taught in English translation. Same as CWL 221, ENGL 223, JS 220, and REL 220. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

YDSH 320  Lit Responses to the Holocaust  credit: 3 Hours.
Course introduces a variety of Jewish literary responses to the Holocaust written during and after the Second World War (from 1939). The discussion of Holocaust memoirs, diaries, novels, short stories, poems, and other texts will focus on the unique contribution of literary works to our understanding of the Holocaust. In addition, the works and their authors will be situated in their Jewish cultural historical context. Taught in English translation. Same as CWL 320, ENGL 359, JS 320, and REL 320. This course satisfies the General Education Criteria for: Humanities - Lit Arts Cultural Studies - Western

YDSH 420  Jewish Life-Writing  credit: 3 or 4 Hours.
Jewish life-writing from the late 18th century until today. Emphasis on cultural historical context, literary styles, and forms. All texts will be available in English translation. Same as CWL 421, HIST 436, REL 420, and SLAV 420. 3 undergraduate hours. 4 graduate hours.

Zulu (ZULU)

ZULU Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/ZULU)

Courses

ZULU 201  Elementary Zulu I  credit: 5 Hours.
Introduction to Zulu; emphasis on grammar, pronunciation, reading and conversation in standard Zulu. Same as AFST 251. Participation in the language laboratory is required.

ZULU 202  Elementary Zulu II  credit: 5 Hours.
Continuation of ZULU 201 with introduction of more advanced grammar; emphasis on more fluency in speaking, reading, and writing simple sentences in standard Zulu. Same as AFST 252. Participation in the language laboratory is required. Prerequisite: ZULU 201.

ZULU 203  Intermediate Zulu I  credit: 4 Hours.
Survey of more advanced grammar; emphasis on increasing conversational fluency, composition skills, study of written texts in standard Zulu and discussions of grammatical variations. Same as AFST 451. 4 undergraduate hours. 4 graduate hours. Prerequisite: ZULU 202.

ZULU 204  Intermediate Zulu II  credit: 4 Hours.
Continuation of ZULU 203; emphasis on increasing conversational fluency, composition skills, study of written texts in the standard and spoken Zulu dialects, and discussion of grammatical variations. Same as AFST 452. 4 undergraduate hours. 4 graduate hours. Prerequisite: ZULU 203.

ZULU 205  Advanced Zulu I  credit: 3 Hours.
Third year Zulu with emphasis on conversational fluency and on increased facility in reading, comprehension, writing in response to authentic Zulu texts such as those documented in selected newspapers, magazines, and South African cultural materials. Same as AFST 453. 3 undergraduate hours. 3 graduate hours. Prerequisite: ZULU 204.

ZULU 206  Advanced Zulu II  credit: 3 Hours.
Continuation of ZULU 405 with increased emphasis on conversational fluency and increased facility in reading and comprehending authentic literary texts including prose and cultural materials from South Africa. Same as AFST 454. 3 undergraduate hours. 3 graduate hours. Prerequisite: ZULU 405.
