GENERAL INFORMATION

The University of Illinois at Urbana-Champaign 2018-2019 Academic Catalog is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the Catalog is in effect.

The class schedule is available each term in the Course Explorer (http://courses.illinois.edu). The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this Catalog are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the intended/recommended level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors.

Courses numbered 200-299 are intended for lower division students who satisfy the published prerequisite(s), if any. Transfer credit from two-year colleges around the state would correspond to 100- and 200-level offerings.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from two-year colleges does not correspond to these numbers.

Courses numbered 400-499 are intended for upper division undergraduate students, sometimes also for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law, medicine, and veterinary programs.

Course credit is listed after each course title. The university counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer (http://courses.illinois.edu). For information on credit policies, see the Student Code.

A crosslisted course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or several departments and will be noted by the statement: "Same as." The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department's course is noted by "See...".

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Degree Programs

The undergraduate degree programs of study are organized by Colleges and Schools. Specific majors can be found by clicking on degree programs in the left-hand navigation or by exploring offerings in each college or school or by using the "Undergraduate Programs" link in the upper navigation bar to find an alpha list of programs offered as majors, minors or concentrations. Graduate programs of study are organized by program. A listing of programs is found in the left-hand navigation as well as the "Graduate Programs" tab in the upper navigation bar.

Degree Requirements

General Education Requirements

The University of Illinois at Urbana-Champaign requires that all undergraduate students take General Education - or "Gen Ed" - courses to gain and use broad knowledge beyond the specialized learning they will do in a major field of study. These Gen Ed requirements cover the kinds of knowledge all students should have: the humanities and arts, social and behavioral sciences, natural sciences and technology, quantitative reasoning, composition/writing, and cultural studies.

General Education courses at Illinois are mindful of our students' diverse backgrounds, needs, and interests, and are an essential component of the transformative learning that prepares our graduates to become alumni who make a significant societal impact. These courses build students' abilities to think critically, solve problems, generate new ideas and create knowledge, make connections between academic disciplines, respect and understand differences, and develop as citizens and leaders.

General Education at Illinois is more than a set of required courses; it is a gateway into the Illinois experience.

Courses are noted as fulfilling one or more of the following categories:

- Composition I
- Advanced Composition
- Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
- Natural Sciences and Technology: Life Science or Physical Science
- Quantitative Reasoning
- Social and Behavioral Sciences
- Cultural Studies: Western/Comparative Cultures, Non-Western Cultures, and US Minority Cultures

For a list of current courses approved for General Education credit, please visit the Course Explorer (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

Written Communication Requirement

Undergraduate Students:

- Satisfactory proficiency in written communication is a requirement for all undergraduate degrees awarded at the University of Illinois at Urbana-Champaign. This proficiency can be certified by the satisfactory completion of the "Composition I" general education requirement via the one-semester, four-hour course Rhetoric 105 (Writing and Research); the two-semester, eight-hour sequence of Rhetoric 101 (Principles of Writing) and 102 (Principles of Research) with Rhetoric 100 tutorials in both semesters; or the two-semester, six-hour sequence Communication 111 and 112 (Oral & Written Communication I and II).
• A student who achieved, prior to enrolling in college-level coursework, a sufficiently high score on either the appropriate college-preparatory English exam (currently ACT, SAT, AP, or IB) will earn course credit that fulfills the general education “Composition I” requirement and thus will satisfy the Written Communication requirement for graduation. More information can be found under “Proficiency Testing” at go.illinois.edu/pnp.

• Non-native English-speaking students who are mandated to take the English Placement Test (EPT) and given an English as a Second Language (ESL) placement must fulfill their Written Communication requirement by taking the two-semester, six-hour sequence of ESL 111 and 112 or the one-semester, four-hour ESL 115 course. They might also be required to take ESL 110 (Pronunciation). Non-native English-speaking students who are not required to take the EPT due to sufficiently high TOFEL iBT or IELTS scores may elect to satisfy the Written Communication requirement by taking the ESL, or the Rhetoric, or the Communication sequences. Students in this category who wish to take ESL must take the EPT to determine correct placement.

• If the academic credentials of a transfer student do not indicate fulfillment of coursework equivalent to fulfill the Written Communication graduation requirement, the student will need to do additional coursework to satisfy this requirement. Non-native English-speaking transfer students may be required to take the English Placement Test (EPT).

Graduate Students:

• Satisfactory proficiency in academic writing in English is a requirement for all graduate degrees awarded at the University of Illinois at Urbana-Champaign.

• Graduate students who are admitted on limited status because they do not meet this proficiency requirement prior to admission may be placed into mandatory ESL courses based on the results of the EPT exam.

• Proficiency can then be certified by the satisfactory completion of a one-semester course (ESL 515) or the two-semester sequence (ESL 511 and 512). Students may also select equivalent coursework from the “English for specific purposes” tracks available through ESL (e.g., business track ESL 521, 522). International graduate students may also be required to take ESL 510 (Pronunciation).

• Mandatory ESL course assignments must be fulfilled in order to be eligible for graduation.

Kinesiology, Language Other Than English, and Undergraduate Open Seminar Credit

Credit for Kinesiology

Kinesiology courses numbered from 100 through 110 are activity courses. Credit earned in kinesiology activity courses may be included in the grade point average at the discretion of the individual colleges and may, at the discretion of the individual colleges, be included in the total hours required for graduation.

Language Other Than English Credit

• Except as prohibited or limited by the established policy of the student’s college, credit in University of Illinois at Urbana-Champaign language courses other than English taken to remove high school entrance deficiencies may, at the discretion of the college:
  1. be counted in the total hours required for graduation, or
  2. be accepted in partial or complete satisfaction of the language other than English requirement for the degree.

• Normally no more than ten hours of proficiency credit for the study of a single language other than English at the elementary and intermediate level shall be counted for graduation in the College of Liberal Arts and Sciences. Additional credit may be granted for advanced courses emphasizing literature and language structure rather than communicative competence in the language.

• Students who have earned the State Seal of Biliteracy will earn eight hours of credit, which will appear on their transcript as eight total hours of 100-level language credit (UFL1 1– for four hours and UFL2 1– for four hours).

Credit for Undergraduate Open Seminar Courses

• Credit in each 199 course shall not exceed four credit hours per semester.

• A student may accumulate an unlimited number of credit hours in 199 courses, but no more than 12 such hours listed on the student’s transcript may be counted toward fulfilling graduation requirements, except in cases in which a larger number of credit hours in 199 courses is an integral part of a formal, college-approved program of study (e.g., Individual Plans of Study).

• A 199 course appears on a student’s transcript with the departmental rubric and the title “Undergraduate Open Seminar” when a specific section title has not been assigned by the department offering the course.

Policy Notes

Illinois Copyright Policy

The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources)

Annual Copyright Notice to Students (p. 3)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (http://copyright.illinois.edu/compliance).

Religious Observances

The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).

Smoke-Free Campus

As of January 1, 2014, smoking is prohibited on all campus property at the University of Illinois at Urbana–Champaign, both indoors and outdoors, in university-owned vehicles and in privately-owned vehicles parked on campus property. The advertising, sale, or free sampling of tobacco products is also prohibited on campus property. Littering the
remains of tobacco products or any other related waste product on campus property is further prohibited. The complete policy is available here (http://cam.illinois.edu/v/v-B-2.1.htm).

Student Code

Policies and procedures applying apply to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code (http://studentcode.illinois.edu).

Student Consumer Information

Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois at Urbana-Champaign is available on the Office of the Provost’s website (http://provost.illinois.edu/student-consumer-information). This includes a description of the institution’s accreditation and state authorization, contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.

Annual Announcement of Copyright Policies

Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies, please note that it is not necessary to reply to this email.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) music, movies and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages set at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504 and 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

All universities of the University of Illinois System make every effort to comply with laws and institutional policies on copyright. Students that receive a copyright infringement notice may face disciplinary actions. These disciplinary actions may include, and are not limited to, loss of network access, mandatory training about copyright infringement, sanctions of record on academic transcripts, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: http://copyright.illinois.edu.

Undergraduate

The Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Business; Education; Engineering; Fine and Applied Arts; Liberal Arts and Sciences; Media; and the School of Social Work offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

excellent resources. The College of ACES Library and Information Center
houses the college’s collection of educational resources, computing
factors and the College of ACES career development and placement
office, which assists students in personal and career development
through internships and placement after graduation. The Family
Resiliency Center, Institute for Genomic Biology, Child Development
Laboratory and extensive research centers in Champaign-Urbana and
across the state are other examples of unique and excellent college
resources. For instance, the Morrow Plots, a national historic landmark
established in 1876, are the oldest agronomic research plots in the
United States. The Morrow Plots are located on campus next to the
undergraduate library.

The ACES James Scholar Honors Program and the Jonathan Baldwin
Turner Undergraduate Research Program offer excellent opportunities
for students to be involved in cutting edge research and solving
contemporary challenges. Research is conducted in the broad areas of
consumer behavior, biotechnology, environmental quality and protection,
financial planning, food science, human nutrition, natural resource
systems, and individual and family well-being.

Increasing the international knowledge and experience of students
and faculty helps meet the growing demand for graduates who are
internationally literate and able to work effectively in different countries,
in different languages and with people of different cultures. The
academic programs office provides initiative and focus to College
international study abroad programs as well as integrating an
international dimension to the educational experience.

The distinguished faculty, innovative programs, and pioneering
achievements in teaching, research, and outreach activities, together with
an enthusiastic and competitive student body, place the College of ACES
among the top institutions in the country in a survey of peers.

Departments and Curricula
The Department of Agricultural and Biological Engineering offers two
majors: Agricultural and Biological Engineering/Agricultural Engineering
Sciences and Technical Systems Management. Students in the
Agricultural and Biological Engineering major earn that degree from
the College of Engineering and have the option of a second degree in
Agricultural Engineering Sciences. This major is designed to produce
graduates who have a basic engineering education for careers of
engineering service to the agricultural, environmental, and biofuels
industries. The intent of the program is to provide a combination of
engineering theory and applications courses to permit students to pursue
goals in academia, government or industry. The graduates are expected
to provide engineering solutions in agricultural production, bioprocesses
and product utilization, natural resources conservation, and are exposed
to current social and cultural concepts and ideas. The Technical Systems
Management major is designed to prepare students for careers requiring
the application, management, and marketing of engineering technologies.
Students study technological systems, business and economics
(including organization, operations, management, marketing, and sales),
and oral and written communications. Graduates of the TSM program
accept positions of employment at highly competitive salaries.

The Department of Agricultural and Consumer Economics offers programs designed to prepare students for business- or policy-
related fields with special emphasis on agriculture, consumers, and
environmental protection. Students’ study is concentrated in one
of the following areas: agri-accounting; finance in agribusiness;
agribusiness markets and management; consumer economics and
finance; environmental economics and policy; farm management;
financial planning; policy, international trade and development; and public
policy and law.

The Department of Animal Sciences offers undergraduate students
unique opportunities to conduct research projects with faculty. In
addition, many students gain animal experience by working part-time at
the U of I Farms. Internships and field study trips are additional avenues
of gaining knowledge and experience. Study Abroad experiences are also
strongly encouraged. Areas of concentration are companion animal and
equine science; science, pre-veterinary and medical; and technology and
management.

The Department of Crop Sciences offers a major in Computer Science
and Crop Science and a major in Crop Sciences with concentrations of
study in plant biotechnology and molecular biology, crop agribusinesses,
biological sciences, agroecology, plant protection, horticultural food
systems, and crops. In each of these concentrations students receive

---

Information listed in this catalog is current as of 07/2019
a strong grounding in science and can apply that knowledge through internship experiences with a wide range of agricultural employers. Each area of study can lead to employment immediately after completion of the B.S. degree, or to graduate or professional study.

The Department of Food Science and Human Nutrition offers concentration of study in dietetics, food science, hospitality management, and human nutrition. Courses in the department include the applications of biology, engineering, chemistry, physics, and microbiology to the processing, formulation, packaging, and distribution of food.

The Department of Human Development and Family Studies' major allows students to choose to concentrate their study in either child and adolescent development or family studies. The program prepares students for graduate education or employment in areas such as child care services, family life education, social work, human services, marriage and family counseling, pediatric services in hospitals, cooperative extension work or business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender.

The Department of Natural Resources and Environmental Sciences provides students the opportunity to study resource and wildlife conservation and management, restoration ecology, the impacts of global change, and human dimensions of the environment. NRES is an interdisciplinary program that brings biological, physical, and social scientists together to teach and discover techniques to improve the health and integrity of urban and natural ecosystems.

Agricultural Communications is a major offered jointly by the Colleges of ACES and Media. The program is administratively housed in the College of ACES. Students specialize in advertising or journalism and go on to careers and graduate study in newspaper and magazine writing and publishing, advertising, broadcasting, and public relations.

The program in Agricultural Education offers the Agricultural Leadership and Science Education major. Students select a concentration of either Agricultural Leadership Education or Agricultural Science Education. This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu)).

The College also offers a program for undeclared students which allows them to explore the many areas of ACES, working with a college advisor to find the right major for their specific interests.

Admission Requirements

Freshman applicants must meet general course pattern admission requirements of the University.

Applicants for freshman admission are evaluated on the basis of their ACT scores, high school percentile rank, and statements of personal and professional interest, among other factors. Detailed information on the admission process may be obtained from the Office of Undergraduate Admissions.

Transfer applicants are evaluated on the basis of their transfer grade point averages and completion of core course requisites. Transfer applicants to the Dietetics and Human Nutrition major must have a grade point average of at least 3.0 (A = 4.0); applicants to Agricultural and Consumer Economics and Agricultural Science Education need a minimum GPA of 2.75, and all other curricula require at least a grade point average of 2.5. Applicants are encouraged to consult the Office of Undergraduate Admissions for specific course requirements.

Graduation Requirements

The minimum number of hours required for graduation varies between 126 and 130 for all curricula within the college. Included in the total must be all courses prescribed in the given curriculum and a sufficient number of electives to obtain the total number.

Each candidate for graduation must have a grade point average of not less than 2.0 (A = 4.0), including grades in courses transferred from other institutions, and a grade point average of not less than 2.0 in all courses taken at the University of Illinois at Urbana-Champaign. Candidates for graduation from Dietetics, Human Nutrition, and Agricultural Science Education must have institutional and overall grade point averages of at least 2.5 (A = 4.0).

Scholarship Information

A number of scholarships for undergraduate students enrolled in the College of ACES are made available through the generous support of alumni and friends of the College. Incoming and currently enrolled ACES students are eligible for consideration for merit-based awards that are awarded annually by the College. Additional information on scholarships for ACES students can be found at academics.aces.illinois.edu/ scholarships (http://academics.aces.illinois.edu/scholarships).

E-mail: abe@illinois.edu

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The Department of Agricultural and Biological Engineering offers programs through the College of ACES and the College of Engineering.

- Technical Systems Management, B.S (p. 13), through the College of ACES.
- Agricultural and Biological Engineering, B.S. through the College of Engineering with concentrations:
  - Agricultural Engineering (p. 9)
  - Biological Engineering (p. 11)
- Agricultural and Biological Engineering, B.S. and Agricultural Engineering and Agricultural Science, B.S.A.G (p. 12) through both the College of Engineering and the College of ACES.

Information listed in this catalog is current as of 07/2019
The curriculum requires 128 hours for graduation.

### Prescribed Courses for Core Curriculum (including Campus General Education)

The curriculum requires 128 hours for graduation.

#### Orientation and Professional Development

These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Agricultural and Biological Engineering Technical Core Hours: 30

#### Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Total Hours: 96

1. *External transfer students take ENG 300 instead.*
2. ECON 102 or ACE 100 will fulfill this requirement.
3. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements.
4. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
5. The extra hour of credit for this course may be used to help meet free elective requirements.
6. [College of Engineering Advising Website](https://wiki.cites.illinois.edu/wiki/display/ugadvice/Undergrad+Advising+Home)

Agricultural and Biological Engineering, B.S.

Biological Engineering Concentration

Students pursuing the B.S. Degree in Agricultural and Biological Engineering choose from one of two concentrations, one of which is the concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bienvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

Prescribed Courses for Core Curriculum (including Campus General Education)

The curriculum requires 128 hours for graduation.

Agricultural & Biological Engineering, B.S. and Agricultural Engineering & Agricultural Science, B.S.A.G.

Dual Degree – Five Year Academic Program

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from the College of Engineering as well as the Bachelor of Science with a major in Agricultural Engineering and Agricultural Science from the College of ACES.

Students enroll in the College of ACES and then transfer to the College of Engineering after two years. Students then complete the ABET-accredited degree in Agricultural and Biological Engineering in the College of Engineering before entering a fifth year in ACES, in the Agricultural Engineering Sciences major. The suggested program of study that follows fulfills graduation requirements for both the College of Engineering and the College of ACES.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing.

Overview of Curricular Requirements

The curriculum for the dual major requires 158 hours for graduation, of which 128 hours are specified for the major in Agricultural and Biological Engineering from the College of Engineering. Curriculum requirements specific to the dual major are organized as follows.

<table>
<thead>
<tr>
<th>Code</th>

6 College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home)
Total hours required to receive a B.S. in Agricultural and Biological Engineering and a B.S.A.G. in Agricultural Engineering and Agricultural Science

1 In addition to the Biological and Natural Sciences Elective hours required for Agricultural and Biological Engineering (6 hours), a further 4 hours of biological sciences must be completed to make up a total of 10 hours. These hours can be selected from the Biological and Natural Sciences Electives (https://abe.illinois.edu/undergraduate/biological-natural-sciences-electives) list.

2 Fifteen hours of agricultural sciences with courses from at least two subject areas other than Agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.

3 Sufficient open electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirements for both degrees.

Technical Systems Management, B.S.

This major in Technical Systems Management is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of agricultural engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution.

Students can specialize in Construction Systems Management; Environmental Systems Management; Mechanization, Marketing, and Technology Management Systems; Production Systems; or Renewable Energy Systems.

Agricultural and Consumer Economics

Sean Fox, Department Head
332 Mumford Hall, 1301 West Gregory Drive, Urbana
PH: (217) 333-1810
http://ace.illinois.edu

The Department of Agricultural and Consumer Economics (ACE) has roots that reach back over 75 years at the University of Illinois at Urbana-Champaign, a world-wide reputation for its academic excellence, and a forward-looking vision for excellence in teaching, research, and outreach related to important economic and social challenges. Visit the ACE faculty (http://ace.illinois.edu/faculty) websites to learn more about each faculty member’s interests, publications, and current projects. Sample highlights include:

- Publications in high impact journals such as Science, PNAS, the American Journal of Agricultural Economics, the Journal of Environmental Economics and Management, Food Policy and World Development
- Steady funding through competitive research grants from sources like the NSF, USDA, DOD, and EPA
- Editor of the AJAE and Associate Editors of other top journals
- Fellows of the Agricultural and Applied Economics Association
- Elected leadership positions in professional organizations (Agricultural and Applied Economics Association, Association of Environmental and Resource Economists)

GRADUATE PROGRAM: Our graduate program is highly ranked nationally and received a rating of “Excellent” on the Tier-1 research university campus of UIUC. We have three department seminars in which students can see and present work in progress, strong core coursework, and professional development through the second-year research paper requirement and end-of-program job-market seminar. Our graduate students have excellent placement both in and out of academia.

UNDERGRADUATE PROGRAM: Our thriving undergraduate program has over 700 students. We offer concentrations in subjects like agribusiness, accounting, finance in agribusiness, consumer economics and finance, environmental economics, farm management, financial planning, policy and law, and international trade and development. Our hallmarks are experiential learning outside the classroom; research opportunities in classes and through independent studies; and excellent placements both in employment and in graduate and law schools.

Synergies between the undergraduate and graduate programs give graduate students opportunities for professional development in instruction and undergrad students opportunities to learn about career options from graduate student role models.

### Agricultural and Consumer Economics, BS

#### Department Requirements

- Minimum Hours in the College of ACES of which 20, excluding ACE 161 and ACE 261, must be in the Department of ACE
- Minimum of two 400-level courses in ACE
- ACE 100 Agr Cons and Resource Econ
- ACCY 201 Accounting and Accountancy I
- ECON 103 Macroeconomic Principles
- ECON 302 Inter Microeconomic Theory
- ACE 161 Microcomputer Applications
- or CS 105 Intro Computing: Non-Tech
- ACE 341 Issues & Careers in Applied Econ

At least 3 hours of credit for study abroad or one international course selected from:

- Elected leadership positions in professional organizations
- Fellows of the Agricultural and Applied Economics Association
- Editor of the AJAE and Associate Editors of other top journals
- Steady funding through competitive research grants from sources like the NSF, USDA, DOD, and EPA
- Editor of the AJAE and Associate Editors of other top journals
- Fellows of the Agricultural and Applied Economics Association

#### Quantitative Reasoning I

Select one of:
- MATH 124 Finite Mathematics
- MATH 125 Elementary Linear Algebra
- MATH 231 Calculus II

Select one of:
- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

#### Quantitative Reasoning II

Select one of:
- ACE 261 Applied Statistical Methods
- ECON 202 Economic Statistics I
- ECON 203 Economic Statistics II

#### Humanities and the Arts

Selected from campus approved list.

#### Natural Sciences and Technology

Selected from campus approved list.

#### Social and Behavioral Sciences

Selected from campus approved list.

#### Cultural Studies

Select one course from Western culture, one from non-Western culture, and one from U.S. minority culture from campus approved lists.

#### ACES Prescribed

- ACES 101 Contemporary Issues in ACES (for freshmen only)

Information listed in this catalog is current as of 07/2019
Agribusiness Markets and Management Concentration

Students in Agribusiness Markets and Management obtain management skills; strategy development and implementation; and an awareness of the interaction among agricultural technology, supply, distribution, processing, and marketing firms in the business environment. Graduates are prepared for entry-level management, sales and marketing, and technical analyst positions, and are sought by firms involved in the production, marketing, sales, and financing of farm inputs, agricultural commodities, and food and other retail products.

Consumer Economics and Finance Concentration

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

**Environmental Economics and Policy**

Students in Environmental Economics and Policy study environmental and resource management issues at the local, state, national, and international levels. Graduates are prepared for positions in governmental, environmental, and resource management agencies; interest groups; and the environmental area of private firms. Course concentrations include law, policy, management, administration, quantitative methods, and sociology, as well as economics.

- NRES 454  GIS in Natural Resource Mgmt
- UP 418   GIS for Planners

Total Hours 18

**Farm Management Concentration**

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

Total Hours 23

1 Registration may be restricted by the department offering the course; access cannot be assured.

**Finance in Agribusiness Concentration**

Students in Finance in Agribusiness study finance as used in agribusiness, farming, financial institutions, and more broadly, in the financial services industry. In addition to positions as loan officers in banks and other lending institutions, recent graduates are working in trust and other banking operations, investments and securities firms, rural appraisals, financial management, financial planning, insurance, real estate, and related fields.

- ACE 449  Retirement & Benefit Planning
- FIN 300  Financial Markets

Total Hours 22

**Financial Planning Concentration**

Students in the Financial Planning concentration study finance and economics as they apply to individuals, households, and small businesses in the course of accumulating and using financial resource. Students are introduced to issues of credit management, insurance and other risk management strategies, saving and investing, retirement planning, and estate planning. Students also study the financial marketplace as it relates to the needs of households and small businesses.

Agricultural and Consumer Economics

Minor in Environmental Economics and Law

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply those tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

Total Hours: 18-19

A minimum of 18 hours must be completed for this minor. Courses in the minor cannot be completed Credit/No Credit.

Enrollment in the Environmental Economics and Law minor is not available to students enrolled in the Environmental Economics and Policy concentration of the Department of ACE. Enrollment is also not available to those enrolled in the Human Dimensions of the Environment concentration of the Department of the major in Natural Resources and Environmental Sciences if enrolled in that concentration was prior to January, 2013.

Agricultural and Consumer Economics

Minor in Food and Agribusiness Management

The Food and Agribusiness Management minor is designed for students to deepen their knowledge of the economics and management of agribusinesses as a complement to studies and practices in their major field. Courses will address food, biofuels, biotechnology, agriculture, the environment, and management within the global agribusiness system.
ACE 454  Econ Dev of Tropical Africa
ACE 455  Intl Trade in Food and Agr

At least 12 hours taken from the preceding two categories  3

TOTAL HOURS  18-19

Some of these courses have additional non-ACE prerequisites. A semester-long study abroad experience in an emerging market or development economy (i.e. countries not part of the OECD) will be accepted in lieu of one of these courses.

The minor should consist of at least 18 hours of course work. At least 6 hours of the minor must be advanced (300 or 400) level courses.

Courses in the minor cannot be completed Credit/No-Credit.

Minor advising information available from:
Dr. Joyce Allen-Smith
Associate Professor, Department of ACE
326 Mumford Hall
mailto:jallensm@illinois.edu (jallensm@illinois.edu)

Policy, International Trade and Development Concentration

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

Code  Title  Hours
Required for the Policy, International Trade and Development Concentration in Addition to Department Requirements
ACE 251  The World Food Economy  3
ACE 455  Intl Trade in Food and Agr  3
ACE 456  Agr and Food Policies  3

Select two of the following:  6
ACE 410  Energy Economics
ACE 411  Environment and Development
ACE 451  Agriculture in Intl Dev
ACE 454  Econ Dev of Tropical Africa

ECON 452  The Latin American Economies

Total Hours  15

Public Policy and Law Concentration

Students in Public Policy and Law become expert in the economics of public policy in general and in its application to specific areas of interest. This concentration will expose students to the legal and institutional structures in which policies are developed, the analysis of the economics impacts of policies, and special circumstances of public policy and law pertaining to the environment, consumers, the agricultural sector, international relations, and other.

Code  Title  Hours
Required for the Public Policy and Law Concentration in Addition to Department Requirements
PS 220  Intro to Public Policy  3
ECON 411  Public Sector Economics  3

Select one of the following:  3
ACE 210  Environmental Economics
ACE 251  The World Food Economy
ACE 255  Economics of Food and Environmental Justice

ACE 270  Consumer Economics

Select one of the following:  3
ACE 306  Food Law

Total Hours  21

Animal Sciences

Rodney Johnson, Department Head
116 Animal Sciences Laboratory, 1207 West Gregory, Urbana
PH: (217) 244-1681
http://ansc.illinois.edu

Welcome to the Department of Animal Sciences, an academic family that includes more than 6,000 alumni, 500 undergraduate students, and more than 100 graduate students. We are proud of our legacy, and we are dedicated to enhancing the quality of life for our students and stakeholders through excellence in teaching, research and outreach programs.

Why Animal Sciences?

Students in Animal Sciences combine their interests in biology and animals in a learning environment that extends beyond the classroom. The Department of Animal Sciences offers our students opportunities to conduct undergraduate research, gain hands-on experience working in our laboratories and farms, participate in internships, and become active in a number of student organizations. For instance, our students work with beef cattle and poultry in state-of-the-art research facilities,

Information listed in this catalog is current as of 07/2019
serve internships in animal shelters and zoos, and conduct discovery research in cutting-edge programs in immunology and reproductive biology. We provide opportunities for virtually every area of interest and our students become skilled in applying their knowledge to address real-world problems.

The work of the Department of Animal Sciences is important. Our research, teaching, and Extension programs address subjects such as bioenergy, the environment, food production, animal health, and animal behavior. We study production efficiency, profitability, and well-being of dairy and beef cattle, pigs, and poultry to enhance the supply of food for a growing world population. Our programs in companion animal biology and humane education create information for pet owners and help us understand the value of positive relationships between humans and animals. Fundamental research in physiology, nutrition, and behavior solve animal sciences problems and have significant impact on improving human health.

Our Commitment

We have a diverse and nationally respected faculty who solve problems of real importance to society and who are deeply committed to providing the best educational experiences to our students. We care about the success of our students and we provide a high-quality education that will equip them to identify and solve the challenges of the future.

The learning opportunities in the Department of Animal Sciences and the University of Illinois are without limit. Come see for yourself why the Department of Animal Sciences is held in high regard in the nation and throughout the world.

Animal Sciences, B.S.

Students pursuing this major select one of three concentrations:

• Companion Animal and Equine Science Concentration (p. 20)
• Food Animal Production and Management Concentration (p. 22)
• Science, Pre-Veterinary and Medical Concentration (p. 23)

Minor in Animal Sciences

The minor in Animal Sciences is designed to provide students with a basic understanding and knowledge of a discipline subject matter area of their choice. Subject matter areas include animal production and management, nutrition, genetics, animal behavior, immunology, meat science/muscle biology, microbiology, reproductive physiology, and molecular biology. Courses in the minor cannot be completed Credit/No Credit.

Minimum two additional 300- or 400-level ANSC courses. These courses must be distinct from the student's major or an additional minor. ANSC 398 and ANSC 499 do not count toward the minor.

Total Hours 20

Animal Sciences, B.S., Companion and Equine Science Concentration

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

Animal Sciences, B.S., Food Animal Production and Management Concentration

The Food Animal Production and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student's practical knowledge through business courses.

Animal Sciences: Science, Pre-Veterinary and Medical Concentration, BS

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

Additional elective courses must be completed to yield at least 126 total Hours for graduation. 20-29

Total Hours 126

1 ANSC 398 only fulfills the degree requirement when taken for a standard letter grade.

Crop Sciences
Patrick J. Tranel, Interim Head
AW-101 Turner Hall, 1102 South Goodwin, Urbana
PH: (217) 333-3420
http://cropsciences.illinois.edu

Plant your future in the Department of Crop Sciences at the University of Illinois. Join our efforts to advance science to meet the needs of a growing world population. From plant breeding and molecular biology to sustainable food and fuel production systems, our internationally recognized faculty are prepared to educate the future leaders of our industry to use the latest advancements in science and technology to improve food and fuel production.

Our department offers students opportunities to succeed and find their niche. When our students graduate, they often have more than one lucrative job opportunity waiting. The demand for our students is high.

Information listed in this catalog is current as of 07/2019
and the future looks even more promising for well-trained scientists as societal demands change. For example, by 2020, estimates say 1,430 new graduates will be needed with a master's degree or Ph.D. in plant breeding alone.

The Bachelor of Science in Crop Sciences allows students to choose from concentrations in plant biotechnology and molecular biology, plant protection, agroecology, crop agribusiness, biological sciences, crops, and horticultural food systems. Sponsored jointly by the departments of Computer Science and Crop Sciences, the Bachelor of Science in Computer Science and Crop Sciences is a flexible program for undergraduate students who plan to pursue careers in the agricultural field that have a technology focus. This degree will prepare students for advanced study at the graduate level as well as immediate entry into the workforce. The Department of Crop Sciences also offers advanced degree programs tailored to your specific interests that will prepare you for enriching careers with a spectrum of public and private organizations in a global agricultural industry.

In order to reach our mission, we are developing and delivering educational and research programs that foster the creation and adoption of agricultural plant production systems that are profitable, environmentally sound, socially responsible and sustainable.

We are developing well educated, highly skilled and creative individuals with the potential to be national and international leaders in their field. If you are looking for a challenging, exciting career that will make a difference, I am confident our department can meet your needs.

- Bachelor of Science in Crop Sciences (p. 25)
- Bachelor of Science in Computer Science and Crop Sciences (p. 32)

Minor in Crop and Soil Management (p. 33)

Minor in Horticulture (p. 33)

**Crop Sciences, B.S.**

Students pursuing the Bachelor of Science in Crop Sciences select one of these concentrations:

- Agroecology Concentration (p. 25)
- Biological Sciences Concentration (p. 26)
- Crop Agribusiness Concentration (p. 27)
- Crops Concentration (p. 28)
- Horticultural Food Systems Concentration (p. 29)
- Plant Biotechnology and Molecular Biology Concentration (p. 31)
- Plant Protection Concentration (p. 30)

**Crop Sciences, B.S., Agroecology Concentration**

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

Information listed in this catalog is current as of 07/2019
Crop Sciences, B.S., Biological Sciences Concentration

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the student’s faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

Total ACES prescribed and elective courses must total 35 hours, of which 20 hours must be completed in residence.

Crop Sciences, B.S., Crop Agribusiness Concentration
The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

Crop Sciences, B.S., Crops Concentration

The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants—how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

Total Hours 126

Crop Sciences, B.S., Horticultural Food Systems Concentration

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

Biological Sciences

ACE 100 or ECON 102 are not required for the Biological Sciences Concentration.
Crop Sciences, B.S., Plant Protection Concentration

The plant protection concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

Crop Sciences, B.S., Plant Biotechnology and Molecular Biology Concentration

The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

# Computer Science and Crop Sciences, B.S.

Email: academic@cs.illinois.edu or cropsci@illinois.edu

Minimum required major and supporting coursework equates to 74-77 hours. All Campus General Education and College of ACES foreign language requirements must be met. The minimum hours required for graduate is 126. At least twenty-one hours of 300- and 400-level coursework must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the Department of Computer Science Office of Undergraduate Affairs and the Undergraduate Teaching Office in Crop Sciences by the beginning of the fifth semester (60-75 hours). Please see the Computer Science advisor in 1210 Siebel Center, as well as the Crop Sciences Teaching Coordinator in Turner Hall AE-120.

To graduate from the Computer Science and Crop Sciences curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

Food Science and Human Nutrition

Sharon Nickols-Richardson
260 Bevier Hall, 905 South Goodwin, Urbana
PH: (217) 244-4498
http://fshn.illinois.edu

The Department of Food Science and Human Nutrition (FSHN) at the University of Illinois at Urbana-Champaign is dedicated to implementing
education, research, and outreach programs designed to promote a safe, nutritious, and affordable food supply that enhances human health. To this end, students and faculty work collectively toward learning, discovering, and disseminating new knowledge and in applying novel technologies to achieve the departmental mission. The basic human need for high quality food for optimal health and wellness drives the core of student training within the FSHN Department.

Undergraduate concentrations leading to the B.S. degree include Dietetics, Food Science, Hospitality Management, and Human Nutrition. Career opportunities for graduates of our program are excellent and include position titles including nutritionist, dietitian, food technologist, product developer, food scientist, senior scientist, entrepreneur, restauranteur, and food systems manager. Graduate students may pursue M.S. and Ph.D. degrees, focusing on original research in the general concentrations of Food Science or Human Nutrition. The FSHN Department also offers a non-thesis Professional Science Master’s degree that includes foundational courses within the department along with business and marketing courses. The University of Illinois Online Food Science Master’s Degree Program is a popular option for individuals working full-time and who desire a non-thesis M.S. degree in Food Science. Advanced degrees lead to accelerated careers in industry, government, and academia.

Departmental faculty expertise includes:

*Integrated food, nutrition and health
*Food materials science and engineering
*Biochemical and molecular nutrition
*Food safety and security
*Food service management

The FSHN Department values diversity in people, cultures, learning, and science. Collaboration with experts in engineering, biomedical sciences, cellular and molecular biology, and multiple disciplines within the field of agricultural, consumer, and environmental sciences (ACES) is important and routine for students and faculty to promote health, wellness, and sustainable human and economic development.

**Required Concentration**

Concentration prescribed courses. See specific requirements for each concentration listed below.

| Total Hours | 126 or 130 |

Approved concentrations:

- Food Science Concentration (p. 35)
- Dietetics Concentration (p. 35)
- Human Nutrition Concentration (p. 36)
- Hospitality Management Concentration (p. 36)

1 Students in the Food Science Concentration must select from MATH 220 or MATH 221.

2 Students in the Hospitality Management Concentration must take CHEM 101. All other concentrations take CHEM 102 + 103 & CHEM 104 + 105, which are not required for the Hospitality Management Concentration.

3 Six hours for Food Science Concentration.
The Food Science Concentration requires a minimum of 130 hours; the Dietetics, Human Nutrition, and Hospitality Management Concentrations each require a minimum of 126 hours.

- Minor in Food Science (p. 36)
- Minor in Nutrition (p. 37)

**Food Science and Human Nutrition:**

### Dietetics, BS

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this concentration who do not complete an internship will be prepared for entry-level supervisory positions in food service facilities and in the food and pharmaceutical industries.

**Food Science and Human Nutrition:**

### Food Science, BS

The Food Science concentration exposes students to all components of food production: harvesting and raw-product handling, food-processing procedures and techniques, packaging, and food storage. Students selecting this concentration are prepared for careers in many areas of the food industry.

**Elective hours as needed to reach a minimum of 130**

1 Cannot be used to fulfill more than one requirement.
Food Science and Human Nutrition: Hospitality Management, BS

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. Through the integration of food-focused theory, practice, and experience, it is the mission of the program to prepare leaders in the hospitality industry with a foundation in science, business, and management.

Elective hours as needed to reach a minimum of 126

Food Science and Human Nutrition: Human Nutrition, BS

This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong human nutrition preparation that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see Dietetics.

Elective hours as needed to reach a minimum of 126

Food Science and Human Nutrition

Minor in Food Science

The minor in Food Science is designed to broaden the student’s knowledge of science and in particular food chemistry, food microbiology, and food engineering. The Food Science minor is also suitable for students who intend to pursue careers in engineering, microbiology, chemistry, scientific journalism, hospitality management, or science secondary education.
Occupational therapy, nutrition research, and nutrition communication. Industries, or those planning to enter medicine, dentistry, nursing, and those who intend to pursue careers in the food, health, and fitness of the biological sciences, with a particular emphasis on the Minor in Nutrition.

Food Science and Human Nutrition

**Minor in Nutrition**

The minor in Nutrition is designed to broaden the student’s knowledge of the biological sciences, with a particular emphasis on the interdisciplinary nature of nutrition. A minor in nutrition would benefit those who intend to pursue careers in the food, health, and fitness industries, or those planning to enter medicine, dentistry, nursing, and other health professions such as physician's assistant, physical or occupational therapy, nutrition research, and nutrition communication.

**Total Hours Required** 18

1 Students who take FSHN 461 & FSHN 462 for 6 hours only need to select one course (3 hours) at minimum from the second list to reach the total minimum required hours. Students who take FSHN 465, 3 hours, will need to select two courses (6 hours) at minimum from the second list to reach the total minimum required hours.

For a FS minor with an emphasis in food processing it is recommended that students select the FSHN 461 and FSHN 462 option. However, FSHN 461 and FSHN 462 have prerequisites that not every student seeking a minor may choose to meet.

Students cannot take both FSHN 461 & FSHN 462 or FSHN 461 & FSHN 465.

### Human Development and Family Studies

**Susan Koerner**

222 Bevier Hall

905 South Goodwin Ave.

Urbana IL 61801

PH: (217) 333-3790

http://hdfs.illinois.edu/

The Department of Human Development and Family Studies (HDFS) at the University of Illinois at Urbana-Champaign engages in teaching, research, and outreach to improve the lives of children, youth, and adults in the contexts of families, communities, and societies. The department creates an environment where these efforts are enriched by a multicultural perspective. HDFS faculty recognize the diversity of cultures and classes in American society, and this perspective prepares students to address contemporary social issues.

**Teaching:** Our faculty regularly earn campus and national awards for outstanding teaching. Our teaching assistants who provide support to students outside of the classroom and in small discussion sections routinely are rated as among the best TAs on campus. In recent years, Drs. Jennifer Hardesty (http://hcd.illinois.edu/people/faculty/hardesty_jennifer/profile.html) and Ramona Oswald (http://hcd.illinois.edu/people/faculty/oswald_ramona_f/profile.html) earned national awards for teaching excellence. Lyndal Khaw (http://hcd.illinois.edu/people/graduates/khaw_lyndal/profile.html), a graduate student, earned a campus award for teaching.

**Study Abroad:** There are many opportunities (http://hcd.illinois.edu/student_information/studyabroad.html) for our students to study abroad. We sponsor two short programs in South Africa and Brazil where our students get experience with learning the culture and understanding the needs of children and families in poverty. Currently, about 30% of our students have participated in study abroad sometime during their four years, and more are participating every year.

**Undergraduate Research Experience:** About 50% of our undergraduate students go on to graduate school. During their undergraduate program, they have many opportunities to work with graduate students and faculty on important scientific questions about children and families. Close to 50% of our undergraduate students participate in at least one research opportunity.

**Undergraduate Program:** Our program in Human Development and Family Studies prepares students for careers working with children, adolescents, and families. Students have the opportunity to work with children, families, and professionals in the Child Development Laboratory (http://cdl.illinois.edu), the Child Care Resource Service (http://ccrs.illinois.edu), the Family Resiliency Center (http://familyresiliency.illinois.edu), The Autism Program (http://go.illinois.edu/tap), and numerous social service, child assistance, and family social service agencies. This hands-on experience complements classroom instruction.

**Graduate Program:** This program (http://hcd.illinois.edu/student_information/current_programs.html) prepares students for careers in higher education, social service administration, and public policy settings. Our students are involved in significant research.
activities and have the opportunity to participate in outreach work that translates research to practice. We have advanced research facilities for studying children in our Child Development Laboratory. We have a unique family observation research facility at the Family Resiliency Center that allows for intricate study of family interactions in a home-like atmosphere. There is support for students in terms of teaching assistantships, research assistantships, and fellowships. Our students complete their programs with many awards, publications, and other important achievements.

Research: Our faculty are among the top scientists studying children and families in the world. They focus on significant societal issues. (http://hcd.illinois.edu/research) Our work could be described as "science with a social conscience." Faculty are interested in the most challenging basic scientific issues, but they are always asking how this information can be applied or how they can make a difference.

Preparation of Advanced Methods in Unique Laboratory Facilities: Faculty and students are engaged in developing and mastering the most sophisticated quantitative and qualitative methods available to social and behavioral scientists and to practicing these skills in state-of-the-art laboratories.

Collaborative and Collegial Interactions: Professor Isabel Bevier, a pioneering scientist in 1900, noted that the wide-open Illinois prairie provided "no boundaries," and this characterized the faculty's intellectual orientation as well. Our faculty work across disciplines, programs, and methodologies, and they work with colleagues across settings, departments, and institutions.

Faculty with Major Scientific Leadership Roles: Our faculty are not only excellent researchers and scholars, but they are also leaders in the scientific community. They are recognized by their peers for awards and hold elective office. They are invited to give lectures at major national meetings and at universities across the world. They serve as editors of the major journals in the field.

Outreach and Extension: Our faculty are not content just to find out more about children and families; they want to improve their lives. We have a long tradition of creating unique educational resources and programs for helping families. For the past fifteen years, our faculty have been especially interested in creating web-based educational resources. Dr. Aaron Ebata has been at the forefront of educating parents online with the latest version being Parenting 24/7 (http://parenting247.org). Parents who are interested in managing work and life issues more effectively can gain information from Intentional Harmony (http://worklife.illinois.edu).

In addition to these online educational programs, our Department was one of the pioneers in providing information and resources to parents about child care. From the humble beginnings of a telephone and desk in the hallway staffed by a part-time person, the Child Care Resource Service (http://ccrs.illinois.edu) today is one of the national leaders in innovative methods of providing resource and referral services to families.

Similarly, The Autism Program (http://go.illinois.edu/tap) provides information, consultation, and training for families who have children with autism, as well as for professionals who serve these families.

Another long-time feature of the department is working with Family Life Extension Educators (http://hcd.illinois.edu/outreach/family_life_extension.html) across Illinois who are adept at providing community-based educational programs to fit the specialized needs of family members. These educators have developed unique skills for reaching underserved rural and urban families who often would not have the opportunity to learn about children and families.

Human Development and Family Studies, B.S.

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as pediatric services in hospitals, medicine and allied health fields, marriage and family therapy, family law, human resources, child care services, family life education, social work, counseling, human services, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students select one of two concentrations within this major: Child and Adolescent Development or Family Studies. Completion of the Family Studies option may qualify some graduates for provisional certification as a Family Life Educator by the National Council on Family Relations. Additional information is available at the NCFR website.

Additional courses must be completed to yield a total of 126 hours for graduation.

Total Hours  126

Approved Concentrations:
• Child and Adolescent Development Concentration (p. 39)
• Family Studies Concentration (p. 40)

Minor in Adult Development
The Adult Development minor combines theoretical and practical approaches to understanding issues faced by adults as individuals, partners, family members, learners, caregivers, and clients of social agencies. Course work examines adults from age 25 to 90+ in the contexts of evolving family roles, health issues, and social service needs. Students anticipating careers in social or health-related services will find an understanding of adult development and its attendant issues a valuable compliment to other professional skills.

The minor requires a minimum of 18 hours. At least six hours of advanced course work must be distinct from credit earned for the student’s major or another minor. Courses in the minor cannot be taken Credit/No Credit. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Total Hours  18-19

1 HDFS majors pursuing the minor may not use this course to meet a major requirement.
2 No more than three combined hours of HDFS 294, 450, 494 or equivalent field/research experience may be counted toward minor requirements. Field/research experience must focus on adults.

Human Development and Family Studies, BS: Child and Adolescent Development Concentration

The Child and Adolescent Development concentration emphasizes the influence of families, peer groups, schools and communities on the well-being of children and adolescents. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include early childhood education, parent education, developmental therapy, Child Life specialty, adoption case work and day-care administration. Graduates also may choose to pursue graduate education in a variety of fields, including human development research, education, psychology, social work, law, medicine, and business.
Family Studies Concentration

Students in the Family Studies concentration focus on how families operate, develop and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage conflict. Graduates with this concentration are qualified to provide many services to couples and families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including family studies, marriage and family therapy, social work, education, sociology, psychology, law, medicine, or business.

The Family Studies concentration is approved by the National Council of Family Relations (NCFR) for the provisional Certified Family Life Educator credential. Family life education focuses on healthy family functioning within a family systems perspective and provides a primarily preventive approach. The goal of family life education is to teach and foster skills and knowledge to enable individuals and families to function optimally. Within two years after receiving their degree, graduates are required to complete a combination of field courses and at least one project-oriented capstone course.

Students in the NRES major begin their studies by taking a set of core courses that provide the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because

nresssc@illinois.edu

NRES provides outstanding undergraduate and graduate educational opportunities. Many alumni of our B.S. program have gone on to complete graduate and professional degrees. Our graduates work in environmental science and natural resource management positions in government, corporations, consulting firms, and non-governmental organizations. NRES also offers traditional Master of Science, online Master of Science, and Doctor of Philosophy degrees. Our graduate students gain employment with research universities, government agencies, national and international non-governmental organizations, and business enterprises.

All NRES educational and research programs center on science, applied ecology, and conservation in a variety of aquatic, terrestrial and human dominated ecosystems. Within that framework, our faculty, staff, and students study a wide variety of ecological systems with emphases on soil, water, people and social systems, forests, plants, animals, and microbes. Much of our research focuses on natural and social processes, such as habitat fragmentation, regulation, dispersal, disturbance, invasion, bioactivity, and decision-making. We research and work in locations locally, across the United States, and around the world.

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world’s most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because
of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

Natural Resources and Environmental Sciences, B.S., Ecosystem Stewardship and Restoration Ecology Concentration

Ecosystem Stewardship and Restoration Ecology emphasizes the ecology, structure, and function of ecosystems, with a particular focus on plant communities and their interactions with the living and non-living parts of ecosystems. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. The concentration includes coursework in the areas of restoration, landscape, and plant ecology, as well as courses focused on specific ecosystems (e.g. streams, wetlands, agroecosystems), invasive species, community ecology, and ecosystem science.

### Natural Resources and Environmental Sciences, BS: Human Dimensions of the Environment Concentration

Human Dimensions of the Environment emphasizes the social scientific interpretations of human-environment interactions at multiple levels, as well as applied policy and management implications. This concentration requires advanced coursework in behavior change science, natural resource economics, environmental and conservation psychology, communications, social impact assessment, environmental policy, and environmental law. Students who have completed degrees in this concentration have gone on to careers in natural resource management, environmental policy, law, advocacy, and education.

- NRES 108 Env Sc & Nat Resource Careers
- NRES 109 Global Environmental Issues
- NRES 201 Introductory Soils
- ACE/NRES 210 Environmental Economics
- NRES 219 Principles of Ecosystem Mgmt
- ACE/NRES 310 Natural Resource Economics

**Total Concentration-Required Hours** 19-22

### Natural Resources and Environmental Sciences

#### Minor in Natural Resource Conservation

The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources.

A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

Natural Resources and Environmental Sciences

Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills.

In order to be eligible to declare this minor, a student must have successfully completed the Quantitative Reasoning I and Quantitative Reasoning II requirements. The minor requires the completion of an additional 18 hours of coursework selected from the following list. Students must earn credit for at least three hours in each of the three categories. Courses taken to fulfill the minor may not be counted towards the NRES major, but may count towards majors in other fields.

Select one of the following: 3-4
NRES 340  Environ Social Sci Res Meth
NRES 421  Quantitative Methods in NRES
CPSC 440  Applied Statistical Methods I
NRES 445  Statistical Methods
SOC 485  Intermediate Social Statistics
STAT 200  Statistical Analysis

Mathematical Modeling
Select one of the following: 3-4
NRES 422  Earth Systems Modeling
NRES 427  Modeling Natural Resources
ANSC 448  Math Modeling in Life Sciences
GEOG 468  Biological Modeling

Spatial Analysis
Select one of the following: 3-5
NRES 454  GIS in Natural Resource Mgmt
NRES 455  Adv GIS for Nat Res Planning
NRES 465  Landscape Ecology
GEOG 478  Techniques of Remote Sensing
GEOG 479  Advanced Topics in GIS
GEOG 489  Programming for GIS

Minimum hours required for the minor 18

Agricultural Communications

Dr. Lulu Rodriguez, Director
274 Bevier Hall
905 S. Goodwin Ave.
PH: 217-300-1045
http://agcomm.illinois.edu/

For the Degree of Bachelor of Science with a Major in Agricultural Communications

The major in Agricultural Communications is for students wishing to pursue careers as professionals in writing, editing, and publishing; public relations; advertising; radio and television broadcasting; photography; and related activities with an emphasis on the fields of food, agriculture, the environment, energy and consumer behavior. Concentrations in Journalism or Advertising allow students to pursue these professional interests. Program requirements in each concentration include the completion of an interdisciplinary minor in Food and Environmental Systems. The College of Agricultural, Consumer and Environmental Sciences and the College of Media jointly offer this curriculum.

A minimum of 126 hours are required for graduation, including:
General Education Requirements
Agricultural Communications major requirements
Minor in Food and Environmental Systems requirements
College of Media concentration requirements

Agricultural, Consumer and Environmental Sciences, College of

Minor in Food and Environmental Systems

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student’s major and interests.

Enrollment in ACES 102, FSHN 101, and NRES 100, four hours from selected 100- and 200-level courses, and six hours of 300- and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Major in Agricultural Leadership and Science Education

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/).

Agricultural Leadership Education Concentration

The Agricultural Leadership Education concentration prepares students for educational leadership, training and outreach positions in agricultural, extension, community and governmental agencies. Coursework focuses
on designing educational/training programs, making professional presentations, leadership development, teaching/training methods and interpersonal communications. A 4 to 12-week business/agency summer internship is required. The curriculum provides the flexibility for students to specialize in a chosen area of agriculture.

### Agricultural Science Education Concentration

The Agricultural Science Education concentration prepares students to teach agricultural science, agribusiness, agricultural mechanics and horticulture in Illinois high schools. State of Illinois certification requirements include a minimum of 2,000 hours of employment experience in agriculture. Teacher certification students must maintain a 2.5 GPA or above to remain in good standing. Review procedures are provided by the Council on Teacher Education.

### Agricultural, Consumer and Environmental Sciences, College of International Minor in ACES

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours (ACES or non-ACES) must come from 400-level courses. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Minor in Leadership Studies

The Minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundational courses, five to six hours of elective context courses, and three hours in a capstone course.

Global Study in the Natural Science Disciplines

Minimum of 3 hours, maximum of 9 hours, selected from: 3-9

- ANSC 205 World Animal Resources
- ATMS 140 Climate and Global Change
- CPSC 116 The Global Food Production Web
- CPSC 431 Plants and Global Change
- NRES 109 Global Environmental Issues
- PLPA 200 Plants, Pathogens, and People
- TSM 311 Humanity in the Food Web

Regional Specialization

The following four approaches/options can be used (separately or in combinations) to complete this portion of the minor.

Academic credit earned through study or supervised activities outside the U.S. through:

- ACES 293 International Internship
- ACES 298 International Experience
- ACES 299 ACES Study Abroad

Completion of one or more of the following courses offered by the Department of Agricultural and Consumer Economics:

- ACE 254 Economic Systems in Africa
- ACE 452 The Latin American Economies
- ACE 454 Econ Dev of Tropical Africa

Completion of courses that are approved by Area Studies Programs (see minor advisor):

- Center for African Studies
- Center for East Asian and Pacific Studies
- Center for Latin American and Caribbean Studies
  Program in South Asian and Middle Eastern Studies
- European Union Center

Foreign language courses that exceed College of ACES graduation requirements.

Total Hours 21
The bachelor of science degree is offered in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

The bachelor of science degree is offered in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

Along with the relationships they establish with faculty, students work closely with an academic adviser. The College of Applied Health Sciences requires students to meet with advisers to develop a relationship that will guide their studies and experiences while on campus. A solid network of student services available at the University of Illinois enhances the advising experience.

The programs in the College of Applied Health Sciences provide students with a holistic understanding of health and human behavior. Drawing on the expertise of our faculty and industry partners, we equip students to design, develop and implement initiatives that enhance health and well-being. Students with an interest in health professions, administration, education and advocacy or public policy can find a program of study that will match their interest in the College of Applied Health Sciences.

As America's approach to health and wellness changes, health care is no longer limited to the traditional practice of doctors and nurses. As a result, the growth market lies in areas related to prevention, quality of life, health planning, and therapeutic intervention. As society struggles with these issues, the College and its graduates will continue to play an important role in shaping the future. A degree from the College of Applied Health Studies allows graduates to pursue a wide array of scientific and professional careers.

Students in the College of Applied Health Sciences enjoy many advantages: high quality degree programs, small classes, an emphasis on student-faculty interaction, active research programs, the opportunity to participate in professional student organizations, the availability of internships, and the largest separate college library in our field.

Programs of Study

The bachelor of science degree is offered in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

- Advising services are available to assist with career information and the development of appropriate courses of study.

**Community Health Program**

Health care is among the most rapidly evolving industries in the United States today. People in all settings are concerned about maintaining access to effective health care and the costs of securing it. An aging population places greater demand upon health care providers. To address these issues, hospitals and clinics have reorganized, consolidated, and introduced educational components designed to teach patients how to manage their personal health concerns. At the same time, business and industry leaders have invested millions of dollars in new health programs for their employees. Federal and state governments are evaluating ways to make health care more effective and less costly.

Recognized as one of the leaders in the United States with its strong emphasis on research and excellence in scholarship, the Community Health Program prepares students for careers in the rapidly changing world of health and rehabilitative services. It is an exciting time in health care with emerging behavioral and environmental health concerns that challenge the field for new theories, policies, and technological innovations. The department's programs place special emphasis on the community context in which health care is delivered. Students can become involved in a variety of research projects related to issues such as bioethics, cancer epidemiology, disability studies, cultural aspects of health and disability, information technologies in health education, and health policy.

The Community Health Program offers students the opportunity to focus their studies in Health Planning and Administration, Health Education or Rehabilitation Studies. In addition to the core of community health courses, course work is completed in areas related to business, health behavior, marketing, and promotion. The degree is culminated with a fieldwork experience in setting appropriate to the area of concentration. Graduates are equally prepared for jobs in progressive careers such as health education, policy, planning, and administration or for graduate study in areas such as medicine, nursing, and physical therapy.

**Interdisciplinary Health Sciences Program**

Based on the premise that human health is too complex to be addressed within a single discipline, the Interdisciplinary Health Sciences (i-Health) degree program integrates knowledge from a variety of social and behavioral fields, such as psychology and sociology, as well as the applied health sciences. While the core curriculum provides students with a solid understanding of human health, students may build a customized program addressing their specific interests within three concentration areas: Health and Aging, Health Behavior Change, and Health Diversity.

Students in this program are equipped to assume leadership roles in a variety of health-related careers, as well as professional and graduate degree programs. Graduates have pursued careers in pharmaceutical sales, health education, corporate wellness and patient/client relations. Graduates are also fully prepared to pursue graduate school in a variety of health professions.
of professional or biomedical programs such as law, medicine, physical and occupational therapy, nursing, or public health.

Kinesiology Program
The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill of physical activity; physical growth, development, and body form throughout the life span; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

Recreation, Sport and Tourism
The Department of Recreation, Sport and Tourism is internationally renowned for its excellence, low student-faculty ratio, ethnic and cultural diversity, and an extensive alumni network. In short, studying recreation, sport and tourism at the University of Illinois is an ideal way to prepare for a future of leadership in the world's most vigorous and exhilarating industry.

The curriculum in Recreation, Sport and Tourism prepares students to design, manage, and deliver services to a variety of populations and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses which touch topics such as leadership, marketing, administration and human resource management. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus their studies in Recreation Management, Sport Management or Tourism Management. Recreation, sport and tourism offer outstanding career prospects because they are each facets of one of the world’s fastest growing industries. Graduates have enjoyed successful careers in amateur and professional sport organizations, public and commercial recreation organizations, resorts, and conference and convention centers.

Speech and Hearing Science
Research has shown that communication is a key element in resolving the major problems of our society; improving communication for all people is an overall goal of study in speech and hearing science. In the Department of Speech and Hearing Science, students learn about human interpersonal communication. Through studies in speech-language pathology and audiology, they focus on the prevention, diagnosis, and treatment of hearing, speech, and language disorders in people of all ages.

This major also equips students with strong oral and written communication skills and necessary tools to enter today’s job market. Graduates hold positions in school systems, hospitals, medical practices, and clinics. They also work in government agencies, research laboratories, and various businesses. A baccalaureate degree in speech and hearing science also prepares students to enter a graduate program in speech-language pathology or audiology or other areas including psychology, special education, business, medicine, and dentistry.

Special Programs

Honors at Graduation
Graduation from the College of Applied Health Sciences with any honors designation requires that a student must have attained at the University of Illinois at Urbana-Champaign a specific minimum cumulative grade point average based on a minimum of 55 semester hours in residence.

• Bronze Tablet (see Graduation with Honors section)
• Dean's List (see Graduation with Honors section)
• Highest Honors: 3.75 to 4.0
• High Honors: 3.5 to 3.74
• Honors: 3.25 to 3.49

Edmund James Scholars
The James Scholar Program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors.

• Community Health (p.  )
• Interdisciplinary Health Sciences (p. 60)
• Kinesiology (p.  )
• Recreation, Sport and Tourism (p. 55)
• Speech and Hearing Science (p. 56)
• Interdisciplinary Minor in Aging (p. 60)

Kinesiology and Community Health

Amy Woods, Department Head
117 Huff Hall
1206 South Fourth Street
PH: (217) 244-0823

The Kinesiology (p. 53) curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student’s area of concentration within Kinesiology.

The Community Health (p. 52) Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education and Promotion, Health Planning and Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

The Department of Kinesiology and Community Health offers two Bachelor of Science majors:

• Community Health, B.S. (p. 52)
• Kinesiology, B.S. (p. 53)

Community Health, BS

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education and Promotion, Health Planning and Administration, and Rehabilitation Studies. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology and Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5-year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 429). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

Requirements Including General Education

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

The prescribed courses are as follows:

### Communication Arts
- Composition I and an approved speech performance course; or CMN 111 and CMN 112; Advanced Composition (CHLH 304 fulfills requirement)

### Quantitative Reasoning I & II
- From approved campus list (must include a course in statistics from approved campus list) (CHLH 244 and CHLH 421 fulfills requirement)

### Humanities and the Arts
- From approved campus list (CHLH 260 fulfills 3 hours of requirement)

### Social and Behavioral Sciences
- From approved campus list

### Natural Sciences and Technology
- From approved campus list

### Cultural Studies
- One course from Non-Western Cultures approved campus list.
- One course from U.S. Minority Cultures approved campus list.
- One course from Western Cultures approved campus list.

### Foreign Language
- Completion through the third level of the same language in high school or college

### Total Hours

51-53

Courses in cultural studies may be completed through other categories where appropriate.

**Kinesiology, BS**

Amy Woods, Department Head
117 Freer Hall, 906 South Goodwin, Urbana
PH: (217) 244-0823
http://www.kch.illinois.edu

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control, and skill of physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for...
the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

Teacher Certification Concentration Requirements for Teacher Certification

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. Students must pass an Illinois-approved test of basic skills prior to student teaching. Approved tests consist of the Illinois Test of Academic Proficiency (TAP)¹, ACT or SAT with approved scores. In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of Specialization Committee. In addition, students must complete all professional education and content-area courses with a grade of C or better for licensure.

In addition to the General Education requirements for all Kinesiology undergraduates, the teacher licensure requirements for students in all curricula, and the Kinesiology core requirements, students pursuing licensure to teach physical education (K-12) must include the following courses in the elective kinesiology, correlate area studies, and free electives areas:

Information listed in this catalog is current as of 07/2019
The Department of Recreation, Sport and Tourism originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals in the field. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver leisure services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus on a major market segment within the leisure and recreation field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 104 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses and a pre-internship field experience. The pre-internship program requires students to accumulate a minimum of 300 Hours of practical work experience in leisure service settings. It is strongly recommended that students begin acquiring field experiences as early in their academic career as possible. Students register for RST 480 in the first semester of their senior year. During this semester, students make final arrangements for completing RST 484, the Recreation, Sport and Tourism Practicum the following semester.

The practicum is taken after the student satisfactorily completes all course work including RST 480, and fulfills the pre-internship field experience. RST 484 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

Recreation, Sport and Tourism, BS
Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by consulting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

1 As identified in the Illinois State Board of Education (ISBE)'s Teach Illinois: Strong Teachers, Strong Classrooms report, beginning June 30, 2019, the Test of Academic Proficiency (TAP400) will be put on hold indefinitely while ISBE conducts a study of alternative basic skills assessments. The last day to register for the TAP is June 27, 2019. TAP tests passed prior to June 30, 2019, will continue to be accepted to meet the Illinois basic skills requirement past June 30, 2019. ISBE will continue to require specific scores on the ACT or SAT as a test of basic skills for the issuance of a Professional Educator License.

Speech and Hearing Science

Karen Kirk, Department Head
901 South Sixth Street, Champaign
PH: (217) 333-2230
http://shs.illinois.edu

The undergraduate curriculum in Speech and Hearing Science provides a broad background in the biological, behavioral, linguistic, and social foundations of human communication and communication disorders. The major prepares students to pursue a career or graduate education in many fields related to human communication and healthy communication practices. The degree requires at least 128 hours. The program has four concentrations: Audiology, Speech-Language Pathology, Neuroscience of Communication, and Cultural-Linguistic Diversity. Each of the four concentrations can be combined with pre-certification requirements from the American Speech-Language-Hearing Association for undergraduates wanting to pursue a career as either a speech-language pathologist or audiologist. The American Sign Language sequence of courses is available to students across all four concentrations.

A concentration must be declared prior to the senior year. Academic advising is required in the College of Applied Health Sciences and students are advised to consult Undergraduate Advising (http://shs.illinois.edu/undergrad-advising) on a regular basis to ensure they are meeting all requirements.

For an overview of the program and career opportunities, see this site (http://labs.shs.illinois.edu/Undergraduates/Careers.aspx). For further information, contact the Department of Speech and Hearing Science (http://www.shs.uiuc.edu), 220 Speech and Hearing Building, 901 S. Sixth Street, Champaign, IL 61820, (217) 333-2230.

Speech and Hearing Science, B.S.

General Education

Students are advised to select their General Education course requirements from the University’s approved list of courses (www.courses.illinois.edu/cis/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.
All students must complete a series of SHS core classes regardless of their area of concentration. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order. One area of concentration (Speech-Language Pathology, Audiology, Neuroscience of Communication, or Cultural-Linguistic Diversity) must be declared prior to the senior year.

### Communication Skills

<table>
<thead>
<tr>
<th>Code</th>

<td>Oral &amp; Written Comm I and Oral &amp; Written Comm II</td>
<td></td>
</tr>
</tbody>
</table>

*Advanced Composition* 3

One course in Advanced Writing/Composition II from approved list

### Quantitative Reasoning I

One course from the approved Gen. Ed. list

### Quantitative Reasoning II

One course from the approved list required.

### Humanities and the Arts

Minimum of two courses from approved list required

### Social and Behavioral Sciences

Minimum of two courses from approved list required

### Natural Sciences and Technology

Two classes or six hours from the university approved Gen. Ed. list required.

### Cultural Studies

One course from Western Cultures approved campus list

One course from Non-Western Cultures approved campus list

One course from U.S. Minority Cultures approved campus list

### Foreign Language

May be satisfied if had three years of one non-English language in high school or completed the equivalent of three semesters of college level foreign language (through the intermediate level).

Total Hours 40-54

1 must be taken at U of I

2 A course in general statistics will address the BS degree requirement; however, those planning to pursue a graduate degree in communication science and disorders are advised to consider taking additional math (calculus may be required by some programs).

3 While not specifically required for the BS degree, students planning to pursue the Speech-Language Pathology or Audiology concentrations and eventual graduate studies in these areas, are advised to take one course in Life Science (a biological science is suggested) and one course in Physical Science (a course in Physics or Chemistry is recommended) to satisfy eventual ASHA certification requirements.

### Speech and Hearing Science Professional Core Requirements

All students must complete a series of SHS core classes regardless of their area of concentration. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order. One area of concentration (Speech-Language Pathology, Audiology, Neuroscience of Communication, or Cultural-Linguistic Diversity) must be declared prior to the senior year.

Total Hours 25

1 Same as LING 300.

2 Same as LING 303. Should be taken after SHS 300.

### Electives

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

- Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EDO), Curriculum & Instruction (CJ), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women's Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University's requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

### Areas of Concentration (22-23 Hours)

- Audiology (p. 59)
- Cultural-Linguistic Diversity (p. 58)
- Neuroscience of Communication (p. 59)
- Speech-Language Pathology (p. 58)

### Speech and Hearing Science Minor

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student’s individual needs, thus accommodating students from different disciplines across the campus. There are no
prerequisites for this minor. For more information contact Kathi Ritten, Academic Advisor, at ritten@illinois.edu.

**Speech and Hearing Science, B.S.**

**Speech-Language Pathology Concentration**

The concentration in Speech-Language Pathology provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org.

Select two of the following: 6-7

Eight to Nine additional hours of speech and hearing science courses chosen from the following list:

- SHS 120 Child, Comm, & Lang Ability
- SHS 200 General Phonetics
- SHS 270 Comm Disability in the Media
- SHS 271 Communication and Aging
- SHS 301 General Speech Science
- SHS 375 Comm Partners & Health
- SHS 410 Stuttering: Theory & Practice
- SHS 411 Normal and Disordered Voice
- SHS 427 Language and the Brain
- SHS 450 Intro Audiol & Hear Disorders
- SHS 451 Aural Rehab Children to Adults
- SHS 470 Neural Bases Spch Lang
- SHS 473 Augmentative & Alt Comm

Total Hours: 17-19

Note: Students must take at least six credits hours of speech and hearing science courses at the 300 or 400 levels from this approved list.

**Cultural-Linguistic Diversity Concentration**

The Cultural-Linguistic Diversity concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socioeconomic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Students must also take 6 hours from the following specific electives:

- SHS 271 Communication and Aging
- SHS 285 Quantitative Bases in SHS (or an approved substitute) ^1
- SHS 291 Research Lab Experience in SHS (Approved for S/U grading only. Must be arranged with individual faculty member.)
- SHS 375 Comm Partners & Health
- SHS 410 Stuttering: Theory & Practice (Requires senior standing in the SHS program or instructor consent)
- SHS 411 Normal and Disordered Voice (Requires senior standing in the SHS program or instructor consent)
- SHS 430 Devel & Disorders Phonol Artic
- SHS 431 Lang Disorders Preschool Child (requires senior standing in the SHS program or instructor consent)

Total Hours: 20-24

^1 Approved course substitutions include: CHEM 101, CHEM 102 & 103, CHEM 108, PHYS 101, PHYS 140, PHYS 150, PHYS 193 provided this is not used to satisfy a university General Education requirement.
Speech and Hearing Science, BS
Neuroscience of Communication Concentration

The Neuroscience of Communication concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association’s website: http://www.asha.org.

Students must also take 6 hours from the following specified electives:

- Any Chemistry or Physics 100-level class
- IB 100 Biology in Today’s World
- PSYC 204 Intro to Brain and Cognition
- PSYC 216 Child Psych
- or EPSY 236 Child Dev in Education
- PSYC 230 Perception & Sensory Processes
- SHS 222 Language & Culture of Deaf Communities
- SHS 270 Comm Disability in the Media
- SHS 271 Communication and Aging

Total Hours: 19-20

1. Approved substitutions include: CHEM 101, CHEM 102 & 103, CHEM 108, PHYS 101, PHYS 140, PHYS 150, or PHYS 193 provided this is not being used to satisfy a university General Education requirement.
2. Provided courses are not used to satisfy a university General Education requirement.
3. Approved for S/U grading only. Must be arranged with individual faculty member.
4. Prerequisite: Senior level in the SHS program or consent of instructor.

Information listed in this catalog is current as of 07/2019

PH: (217) 333-2131
http://ihealth.illinois.edu

The undergraduate degree program in Interdisciplinary Health Sciences is focused on applied health and societal issues that cut across a range of traditional fields. The program of study includes a set of core courses that builds an interdisciplinary foundation in the study of health, and provides a basic knowledge of health-related issues. The degree program also includes a set of three concentrations, of which a student must complete at least one, that emphasize some of the foremost issues facing society: health and aging; health behavior change; and health diversity. Finally, the degree program includes a capstone experience with several options for completion, e.g., an internship, faculty-guided research experience. The program of study addresses a major need across the nation and world for graduates prepared to enter a range of biomedical and health-related careers and/or to pursue graduate study in fields relevant to health, wellness, and the biomedical sciences. For questions regarding Interdisciplinary Health Sciences contact the advisor, Beth Frasca (bfrasca@illinois.edu).

A 5 year BS/MPH joint degree program is available for students majoring in Community Health, Interdisciplinary Health Sciences, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS/MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 429). The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program).

The Interdisciplinary Health Sciences, B.S degree program includes a set of three concentrations, of which a student must complete at least one:

- Interdisciplinary Health Sciences, B.S. - Health and Aging Concentration
- Interdisciplinary Health Sciences, B.S. - Health Behavior Change Concentration
- Interdisciplinary Health Sciences, B.S. - Health Diversity Concentration

### Interdisciplinary Minor in Aging

The Interdisciplinary Minor in Aging provides students with the opportunity to study aging as it relates to health, communication, development and activity. The minor is offered through the College of Applied Health Sciences. There are no prerequisites for the minor. Minors should be declared by filling out the intent to pursue a minor form which can be found at http://provost.illinois.edu/programs/advising/declare.html and turning the form into Julie Bobitt, Interdisciplinary Health Sciences Program, in 228 Huff Hall or contact Julie via email at jbobitt@illinois.edu.

#### Required Courses

<td>Gerontology</td>
<td></td>
</tr>
<tr>
<td>PSYC 361</td>
<td>The Psychology of Aging</td>
<td></td>
</tr>
</tbody>
</table>

### Additional aging-related courses chosen from the following list:

- KIN 459 Physical Activity & Aging
- SOCW 240 Death & Dying
- SOCW 315 Social Work Services for Older Adults
- CHLH 494 Special Topics
- RST 316 Leisure and Human Development
- RST 335 Leisure and Consumer Culture
- SHS 271 Communication and Aging
- KIN 386 Exercise Instruction & Elderly
- EPSY 407 Adult Learning and Development
- UP 340 Planning for Healthy Cities

Total Hours 18

---

1. Students may also earn elective credit by participating in an aging-related internship or independent study that is also pre-approved by the advisor for the minor. Minor modification forms should be filled out if you are requesting to use an independent study or internship. Forms can be found at http://provost.illinois.edu/files/2017/01/Minor-Modification-Form.pdf.

2. Special Topics courses must include aging-related content and be approved by the Aging minor advisor.

### Business, Gies College of

Office of Undergraduate Affairs  
1055 Business Instructional Facility  
515 East Gregory Drive  
Champaign, IL 61820  
PH: (217) 333-2740  
FX: (217) 244-9992  
http://www.business.illinois.edu

undergrads@business.illinois.edu

The purpose of the Gies College of Business is to provide an educational experience that will help students develop their potential for leadership and service in business, government, teaching, and research. The undergraduate curricula provide a study of the basic aspects of business and preparation for careers in fields such as accounting, business management, banking, insurance, and marketing.

The curricula, leading to the Bachelor of Science degrees in the various degree programs in business, are based on 124 hours of college work. Students are required to elect courses in other colleges of the University, including mathematics, rhetoric, humanities and the arts, speech, and natural and behavioral sciences, and to secure as liberal an education as possible to avoid the narrowing effects of overspecialization.

The Gies College of Business offers graduate and professional programs in business areas. Detailed information on graduate programs may be obtained from the Graduate College or visit our web site (https://business.illinois.edu).

### Departments and Curricula

Undergraduate instruction in the Gies College of Business is organized under the Departments of Accountancy, Business Administration, and Finance. Each of these departments offers courses that provide one or more curricula that a student may elect. These curricula lead to Bachelor of Science degrees in the various fields of study in the college and are designed to encourage each student to fully realize his or her intellectual promise. There can be changes to curricular requirements and new course offerings. For the most current information, visit our advisors in 1055 Business Instructional Facility and our web site (http://www.business.illinois.edu/undergrad).

### Requirements

#### Admission

Applicants must meet general University requirements as well as those specified by the Gies College of Business.

Students transferring from other institutions must have met the requirements specified by the college. See our web site (http://
www.business.uiuc.edu) and the Illinois Office of Undergraduate Admissions (http://admissions.illinois.edu) for further information.

Mathematics Placement Test
The ALEKS Math Placement Exam is used to place the students in the appropriate math course. The results of the test are used to place students in MATH 112 or to exempt them from algebra and allow them to enroll in a mathematics course required for graduation (see below).

Graduation
Students in the Gies College of Business who meet the University’s requirements with reference to registration, residence, and fees and who maintain satisfactory scholastic records in the college are awarded degrees appropriate to their curricula.

Each candidate for a degree must have a 2.0 (A = 4.0) grade point average or above for all courses counted toward graduation, a 2.0 grade point average or above for all courses taken at this University, a 2.0 grade point average or above for all courses taken in the major or field of concentration, and a 2.0 grade point average or above for courses taken in the major or field of concentration at this University.

Students are responsible for meeting the requirements for graduation. Therefore, students should familiarize themselves with the requirements listed in this catalog and other information in the Office of Undergraduate Affairs, 1055 Business Instructional Facility, and should refer to them each time they plan their programs. The Gies College of Business requires that undergraduate degrees be completed in nine semesters or less. If you need assistance with course planning, consult the Office of Undergraduate Affairs.

Mathematics Requirement
Any one of the MATH courses described below meets the Gies College of Business requirement. The most appropriate mathematics course depends on the student’s background, interest, motivation, and objectives. Background can be evaluated in terms of mathematics courses already completed and the student’s score on the ALEKS Math Placement Exam. Interest, motivation, and objectives must be determined by the student. The three courses open to the student are:

- MATH 234 Calculus for Business I. This course is most common for Business students and provides a good background in calculus. It is difficult to take upper-level courses in mathematics after this course.
- MATH 220 Calculus. This course is appropriate for students who do not have previous calculus experience and who believe they may want to take undergraduate courses in mathematics.
- MATH 221 Calculus I. This course is appropriate for students who do have previous calculus experience and who believe they may want to take upper-level courses in mathematics.

Residency
Students must earn no fewer than 60 semester hours of University of Illinois Urbana-Champaign coursework applicable to their degree-including at least 21 credit hours of advanced coursework.

Special Programs
Honors at Graduation
Honors, designated on diplomas, are awarded to superior students as follows: for graduation with honors, a minimum grade point average of 3.5 (A = 4.0) in all courses accepted toward the student’s degree; for graduation with high honors, a minimum grade point average of 3.75 in all courses accepted toward the degree; and for graduation with highest honors, a minimum grade point average of 3.90 in all courses accepted toward the degree. To qualify for graduation honors, transfer students’ University of Illinois at Urbana-Champaign and total cumulative grade point averages both must qualify.

Curricula
Core Curriculum
Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course. A required course that is failed must be repeated the next semester.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit. For military and naval science courses, only credit at the 300 level and above may be counted toward the degree.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

University Composition Requirements
Code Title Hours
Composition I: Principles of Composition 1 4-7
Advanced Composition 3

General Education Requirements
Code Title Hours
A minimum of six courses is required, as follows: 18
Humanities & the Arts: Literature & the Arts (1-2 courses) 4
Humanities & the Arts: Historical & Philosophical Perspectives (1-2 courses) 4
Natural Sciences & Technology: Physical Sciences (0-2 courses) 5
Natural Sciences & Technology: Life Sciences (0-2 courses) 5
Behavioral Sciences (1 course)
Cultural Studies: Non-Western Cultures (1 course)
Cultural Studies: U.S. Minorities Cultures (1 course)
Cultural Studies: Western/Comparative Cultures (1 course)

Total Hours: 52

Courses to yield this total: 15-38

Elective course work: 0-32

Minimum total hours for the degree: 124

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2 BUS 101 and BUS 201 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 101 and BUS 201 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

3 MATH 220 or MATH 221 may be substituted for MATH 234. (See college mathematics requirement above.

4 Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

5 Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete on course in the Physical Sciences and Life Sciences subcategories.

6 This course includes limited voluntary participation as a subject in experiments.

Total Hours: 21

Accountancy courses (both required and elective) to be applied toward the 124-hour requirement for the Bachelor of Science Degree in Accountancy may not be taken on a credit/no-credit basis. In addition, a limit of 33 hours of accountancy courses (including ACCY 201 and ACCY 202) may be counted toward the 124 total hour requirement. Finally, students must select from either ACCY 405 or ACCY 415. Both courses cannot count toward the Bachelor of Science degree.

**Business Administration**

Cele Otnes, Interim Department Head
330 Wohlers Hall, 1206 South Sixth Street, Champaign
PH: (217) 333-4240
http://business.illinois.edu/ba

The Department of Business Administration offers five baccalaureate degree majors: Information Systems, Management, Marketing, Operations Management and Supply Chain Management. The five majors require completion of the minimum of twenty-seven credit hours within each major’s content area.

In addition to the Business Administration Majors’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section).

**Double Majors Within the Department of Business Administration**

Only Gies College of Business students with a declared Business Administration Major may earn a second Business Administration Major.

Business students may only earn two Business Administration Majors. Business students may only earn one Management Major Concentration.

The Business Administration Majors:

- Information Systems
- Management- only one concentration will be selected: Entrepreneurship or General Management or International Business
- Marketing
• Operations Management
• Supply Chain Management

Each Business Administration Major requires nine courses. Business students desiring to earn a second Business Administration Major must fulfill the course requirements for both majors.

Some Business Administration (BADM) courses will fulfill requirements of both majors, but a second Business Administration Major will add possibly two to five additional BADM courses during a business student’s junior and senior years since each Business Administration Major requires unique advanced coursework.

• Information Systems (p. 67)
• Management (p. 68)
• Marketing (p. 69)
• Operations Management
• Supply Chain Management (p. 70)

Major in Operations Management
For the Degree of Bachelor of Science in Operations Management

The Operations Management Major develops concepts and skills for crafting innovative ways to deliver a firm’s goods and services. It focuses upon the productive management of capital, human capital and information resources upon the process of value creation. The coursework devotes particular attention to the definition of business goals and the design of management policies and procedures for achieving those goals. Operations Management students typically seek careers as operations or strategy consultants, supply chain analysts, quality management professionals, manufacturing or service operations managers, project managers or leaders within other mission-critical functions of an organization.

In addition to the Operations Management Major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate section).

Major in Management

For the Degree of Bachelor of Science in Management

The Management Major is designed to prepare business students to be leaders and innovators in analyzing and solving managerial problems that every organization faces in its day-to-day operations. To be effective, managers must be able to design organizations that can compete in complex and volatile business environments and execute their strategies within these organizations. Effective managers also must be ethical leaders and competent decision-makers who formulate goals and long-term plans, build effective teams, and motivate their employees.

Students majoring in Management must select one concentration either in Entrepreneurship or General Management or International Business, depending on their career objectives.

The Entrepreneurship Concentration studies how business opportunities are identified and exploited to create wealth. This concentration is intended for students who are interested in new venture creation. Some graduates will work within existing organizations while others will create new organizations. The General Management Concentration is designed to educate and train future business leaders, decision-makers and strategic thinkers to skillfully manage human capital in firms and organizations. The International Business Concentration is designed to provide students with the sound understanding of how International Business principles and the managerial issues faced by multinational companies. Students who select the International Business Concentration will focus on political, cultural and institutional differences among nations by taking courses offered across the Urbana-Champaign campus.

In addition to the Management Major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section (p. 63)).

Major in Supply Chain Management

For the Degree of Bachelor of Science in Supply Chain Management

The Supply Chain Management student studies the movement of materials from their procurement as raw material, parts or components through the manufacturing or processing sector to the marketing and distribution of end products for industrial or commercial users. The Supply Chain Management Major is available only to qualified students based upon application and personal interviews. For more information, contact the Director of the Supply Chain Management Program.

In addition to the Supply Chain Management Major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section (p. 63)).

Students are required to complete an approved internship to earn the Bachelor of Science in Supply Chain Management degree.

Finance

Louis Chan
340 Wohlers Hall
1206 S. Sixth Street
Champaign, IL 61820
PH: (217) 244-2239
FX: (217) 333-3102
http://www.business.illinois.edu/finance

For the Degree of Bachelor of Science in Finance

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate.

In addition to the finance major requirements, students in finance must meet the University General Education requirements and the Gies College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (p. 63)). Minimum requirements in the major for the Bachelor of Science degree in Finance are:

<table>

Elective Courses Requirement

Note: ACCY 200, BADM 310, BADM 320, FIN 221 and the two Elective Courses must be earned from the Urbana-Champaign campus. No exceptions will be made for study abroad and transfer courses to fulfill the minor’s course requirements.

All six Business Minor courses must be completed with letter grades.

Advising Notes

• Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
• It is recommended that Finance majors take additional accounting.
ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

Minor in Business for Non-Business Majors

Please refer to the Business Minor website (https://business.illinois.edu/minor) for important changes to the application process and requirements.

The Business Minor is designed for students earning Undergraduate degrees in colleges other than the Gies College of Business. The Business Minor provides a fundamental academic preparation for Non-Business students who wish to pursue a business career. The Business Minor provides coursework through which Non-Business students learn skills used in business. Business Minor students will learn the theories, techniques and concepts of Accountancy, Finance, Management and Marketing. The Business Minor is not available to Gies College of Business students and Technology and Management Minor students.

The Business Minor is not to be considered as preparation for transfer into the Gies College of Business to earn an Undergraduate Business degree.

To declare their Minors, Non-Business students must submit their Statement of Intent to Pursue a Campus-Approved Minor (http://provost.illinois.edu/files/2017/01/Intent-to-Pursue-Minor.pdf) (Statements) to 1055 Business Instructional Facility (BIF) at any time.

Statements submitted prior to January 28, 2019, will be collected and held until that time, as open Business Minor course enrollments will begin in the 2019 Fall Semester Registration Period. Prospective Business Minor students will not be permitted to enroll in the 2019 Spring Semester and 2019 Summer Session Business Minor Core and Elective courses.

Contact busminor@business.illinois.edu to address academic and admission questions.

ADVICE TO PROSPECTIVE MINORS

Technology and Management – Minor, UG

1055 Business Instructional Facility
515 East Gregory Drive
Champaign, IL 61820
PH: (217) 333-2740
FX: (217) 244-9992 (fax)
http://www.techmgmt.illinois.edu/

Email: tech-mgmt@illinois.edu

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations
of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management for students in the College of Business is outlined below.

Throughout the program, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, eBay, John Deere, Motorola Solutions, and Walmart.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for example, professional branding, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student's academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website (http://www.techmgmt.uiuc.edu) or contact the Technology & Management Program Office (1055 Business Instructional Facility, (217)244-5752, tech-mgmt@illinois.edu).

### Education, College of

142 Education Building  
1310 South Sixth Street  
Champaign, IL 61820  
PH: (217) 333-2800  
http://education.illinois.edu

The College of Education at the University of Illinois at Urbana-Champaign offers undergraduate degree programs in the majors of Early Childhood Education, Elementary Education, Middle Grades Education, Special Education and a minor in Secondary Education, all of which include teaching licensure. The College of Education also offers a non-licensure undergraduate degree in the major of Learning and Education Studies.

A distinguishing hallmark of the College of Education is the commitment to diversity. Faculty members engage in research, teaching, and service activities developed to ensure that all children, including those who are racially, ethnically, linguistically, and economically different as well as people with different abilities and disabilities, are provided with educational opportunities.

The Early Childhood Education degree program prepares students for recommendation for Illinois Early Childhood licensure (birth through grade three). The program also incorporates course work leading to an Early Childhood Special Education approval. The Elementary Education program prepares students for recommendation for Illinois licensure (grades one through six). The Middle Grades Education program prepares students for recommendation for Illinois licensure for grades five through eight in one or more areas of concentration from Math, Social Science, Science, or Literacy. The concentrations align with the Illinois State Board of Education areas of endorsement. The teacher education minor in Secondary Education is a component of the teaching option within the following majors in the College of Liberal Arts and Sciences: Biology, Chemistry, English, Geology, History, Mathematics, and Physics. Students who satisfactorily complete an LAS degree in one of these areas and the teacher education minor in secondary education are eligible for the University’s recommendation for Illinois licensure in grades nine through twelve. For additional information regarding Liberal Arts and Sciences requirements, see the College of Liberal Arts and Sciences (p. 196).

The Special Education major offers an undergraduate field-based professional preparation program designed to prepare teacher candidates to work with individuals with varying disabilities including: learning disabilities, social or emotional disorders, cognitive disabilities, physical disabilities and other health impairments, autism and traumatic brain injury. Candidates who successfully complete the degree program are eligible for the University’s recommendation for Illinois licensure to teach students with disabilities from pre-K through 21 in a range of settings.

The Learning and Education Studies degree program is a non-licensure major with concentrations in Applied Learning Science, Educational Equality and Cultural Understanding, Workplace Training and Development, and Digital Environments for Learning, Teaching and Agency. The curriculum prepares students for a broad range of positions requiring expertise in formal and non-formal learning and education. Examples include training and program development, international schools, and other education-related positions in agencies, business, and government.

---

**Requirements**

**Admission**

Admission to the College of Education at any level (freshmen, off campus and on-campus applicants) is competitive. Freshman and off-campus transfer application information is available on the Office of Undergraduate Admissions website (https://www.admissions.illinois.edu/apply). Information for on-campus applicants can be found on the College of Education website (http://
education.illinois.edu/programs/information-for.ui-students-applying-to-the-major).

**General Education**

In order to meet the University's current requirements in general education, each candidate for a degree from the College of Education must complete the campus general education requirements and the Language other than English through the third level. In most teacher education curricula, specific coursework within the general education areas must be taken. Also, in some teacher education curricula, additional credit in the general education areas is required. For more information on required general education coursework, contact a College of Education academic adviser. Students must select their courses for general education from the campus general education course list (https://courses.illinois.edu/DEFAULT/DEFAULT).

**Graduation**

Undergraduate students in the College of Education must meet the University requirements for graduation. For those in a major leading to licensure, the requirements of the Council on Teacher Education (http://cote.illinois.edu) for licensure must also be met. Students in all curricula must meet the course and academic credit requirements of their curricula with satisfactory scholastic averages. Student teaching is required of all undergraduates in a licensure major and must be completed through the University of Illinois at Urbana-Champaign.

Students in need of additional information concerning regulations and degree requirements of the College of Education should consult their academic advisers or the Assistant Dean for Academic Affairs in the College of Education, University of Illinois at Urbana-Champaign, 142 Education Building, 1310 South Sixth Street, Champaign, IL 61820.

**Special Programs**

**Honors at Graduation**

Eligibility for graduation with honors is established after all grades are recorded following a student’s final semester. A student who achieves the required scholastic average in all work presented for graduation (excluding credit for courses not included in the computation of the grade point average) may be recommended for honors as follows: honors, minimum cumulative grade point average of 3.75; high honors, minimum cumulative grade point average of 3.85; highest honors, minimum cumulative grade point average of 3.90.

**Edmund J. James Scholars**

The James Scholar program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. As a James Scholar, students are entitled to certain academic privileges, including priority assignment of registration time, access to the “stacks” in the library, and official recognition on the University of Illinois transcript.

Entering freshmen are invited to participate for the upcoming fall semester based on the Office of Undergraduate Admissions standard that combines factors such as standardized test scores and high school GPA. Transfer and continuing students must have achieved at least a 3.5 cumulative and University of Illinois grade point average to participate.

Students are certified as James Scholars by the college on a yearly basis. To qualify for this certification, the student must successfully complete a James Scholar project/requirement in the fall and spring semester and maintain a 3.5 University of Illinois and cumulative grade point average.

Details are available on the college website (http://education.illinois.edu/current-students/undergraduate/james-scholars).

Interim Head of Department: Sarah McCarthy

311 Education Building, 1310 South Sixth, Champaign, (217) 244-8286

**Curriculum Preparatory to Early Childhood School Teaching**

This program prepares student candidates to teach birth to grade 2. A minimum of 120 semester hours of credit is necessary for graduation.

State law mandates passing the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (http://www.ltesnc.org) prior to student teaching. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (http://education.illinois.edu/students/prospective-students/ACT), (http://education.illinois.edu/students/prospective-students/ACT)

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Information listed in this catalog is current as of 07/2019
This is a Gateways to Opportunity (http://www.ilgateways.com/en) approved program.

Information listed in this catalog is current as of 07/2019
For the Degree of Bachelor of Science in Learning and Education Studies

This curriculum prepares individuals for positions requiring expertise in formal and non-formal learning and educational settings that do NOT require licensure (becoming a licensed teacher). Students interested in becoming a licensed teacher should consider the licensure program in the majors of Elementary Education, Early Childhood Education, Special Education, or Middle Grades.

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations: 1) Applied Learning Science; 2) Educational Equality and Cultural Understanding; 3) Workplace Training and Development; or 4) Digital Environments for Learning, Teaching and Agency.

Total Hours 120

Total minimum hours include general education, language other than English, concentration and core credits.

1 General Education Requirement. Courses must be selected from the Campus General Education Approved Course List (https://courses.illinois.edu).
2 EPSY 280 is recommended for the AppLeS concentration.
3 Concentration and Core Requirement courses found on the General Education Approved Course List (https://courses.illinois.edu) may also be credited toward the General Education requirements.
4 Courses except EDUC 202 and EPS 402 may be counted toward both the Core and Concentration requirements.

Applied Learning Science (AppLeS) Concentration

The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University),
as well as in education, psychology, business, law, and other more traditional areas of study. In addition, through their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

**Educational Equality and Cultural Understanding Concentration**

This undergraduate non-licensure concentration will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Understanding how education as an institution operates to perpetuate social and economic stratification will give students a perspective on the challenges of creating a more equitable distribution of education. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory. Students will understand the contemporary and historical barriers to the distribution of education and examine recent human rights-based demands for extending education to people of all social classes, regions, ethnicity, language groups, and genders.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediary classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to international and domestic students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women's Studies, or LGBT/Queer Studies.
The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

1 Course can be counted in the Core requirement or the Concentration requirement but not both.
2 Concentration courses found on the General Education Approved Course List may also be credited toward the General Education requirements.

**Workplace Training and Development Concentration**

Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees.

An internship is recommended during the program, but it is not required. For internship credit, students can register in HRD 491 Professional Skill Development before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Workplace Training and Development departmental contact.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;
- Individuals who wish to work in the business and industry outreach departments of community colleges;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

**Digital Environments for Learning, Teaching and Agency (DELTA) Concentration**

The undergraduate non-licensure concentration in Digital Environments for Learning, Teaching, and Agency (DELTA) will provide students with a strong background in the design, development and implementation of technology for a range of learning environments. Courses will introduce
students to learning theory, designing and using technology to support learning, and issues encountered when deploying technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

Graduating students will be prepared to engage with various stakeholders interested in using technology to support learning in a range of different contexts. Examples include selecting and deploying appropriate technology to support pedagogic goals for schools, corporations, or informal learning environments such as museums and afterschool clubs, designing educational games or toys and educational application development. One of the main objectives for students in DELTA is to build new ways to support learning, and prepare them for leadership roles in formal and informal environments, technology design and implementation strategies. They will also be prepared to pursue graduate study in a range of programs, such as educational technology, learning sciences, or instructional technology at the University of Illinois or elsewhere.

Students are encouraged to pursue a relevant minor or coherent set of electives from several related departments. Suggested minors include: computer science, communication, psychology, informatics, media and cinema studies or sociology. Students may also consider a minor in a specific content area from the arts and sciences to develop expertise in a particular field.

The DELTA concentration consists of 24 hours of course work. Students are required to take a minimum of two foundations courses, three core courses and three elective courses. The core courses are designed to ensure students leave the program with foundational knowledge and skills necessary to design, develop, implement, manage, and evaluate digital environments. The elective courses allow students to tailor the concentration to fit individual career goals and areas of interest. Students should take the foundation course Introduction to Digital Environments in the first semester they join DELTA. Similarly, the Capstone Research Project should be taken in the last semester after the majority of DELTA-related course work is complete.

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office. Approvals related course work is complete.

Middle Grades Education

For the Degree of Bachelor of Science in Middle Grades Education

http://education.illinois.edu/ci

Department: Curriculum and Instruction

Interim Head of Department: Sarah McCarthy
311 Education Building, 1310 South Sixth, Champaign, (217) 244-8286

This program prepares teachers for grades five through eight. A minimum of 120 semester hours is necessary for graduation.

Illinois law requires passing the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (http://www.icts.nesinc.com) prior to student teaching. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (http://education.illinois.edu/students/prospective-students/ACT) for the Degree of Bachelor of Science in Middle Grades Education.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

Students are admitted to Middle Grades Education as freshmen. In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional grade point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. For teacher education licensure applicable to all curricula, see the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.
Students in the Middle Grades Education licensure program must complete the Campus General Education Requirements, the courses for one or more concentration (literacy, social sciences, science or math) and the professional education coursework.

### Degree Requirements

1 Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2 If seeking the Science concentration, exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with adviser for further information.
3 PSYC 100 is a prerequisite for EPSY 201.
4 The total hours required for the degree may be higher for students who have not already completed the language other than English requirement.
## Concentration Requirements

Some concentration courses can count towards the general education requirements. Courses in concentrations may not be allowed to count for more than two degree requirements. If you have questions, see your adviser.

Information listed in this catalog is current as of 07/2019
Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade-point averages of 2.5 (A = 4.0). Candidates in teaching licensure programs must maintain a C or better in area, and professional education grade-point averages of 2.5 (A = 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

State law mandates passage an Illinois approved test of basic skills prior to student teaching. Approved tests consist of the Illinois Test of Academic Proficiency (http://www.icts.nesinc.com) (TAP), ACT, or SAT with approved scores. Previously passed Illinois Test of Basic Skills (096, 3100, or 400) may also be used to meet this requirement. See information on the details. (http://cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf)
### Teacher Education Minor in Secondary School Teaching

**College of Education**

Director of Teacher Education: Chris Span
142 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

**Liberal Arts and Sciences**

Academic Adviser: Steven Cox

Admissions Information: las-teach@illinois.edu (las-teach@illinois.edu?subject=Question about the Teaching Education Minor in Secondary School Teaching)

2002 Lincoln Hall, 702 S. Wright Street, Urbana

This minor is a component of the teaching option within the following Science and Letters majors: biology (p. 315), chemistry (p. 214), English (p. 230), geology (p. 242), history (p. 254), mathematics (p. 272), and physics (p. 324). Enrollment is limited to candidates in these options. Students are admitted into the College of Liberal Arts and Sciences (http://www.las.illinois.edu/students/programs/majors) major of interest and apply to enter the minor in their sophomore year.

Transfer into the teaching option within a major can be made only by students who have received approval to complete the minor in education. Approval for admission to the minor in education is gained by successful application to the Department of Curriculum and Instruction in the College of Education, upon recommendation by the joint Education/LAS content area admissions committees. State law mandates passing an Illinois-approved test of basic skills before student teaching. The Illinois test of basic skills options include the Test of Academic Proficiency (TAP) (https://www.il.nesinc.com/TestView.aspx?f=HTML_FRAG/IL400_TestPage.html) or an ACT/SAT (http://cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf) score that meets specific criteria.

Prerequisites for the minor: Students must be in good academic standing; and have a minimum content, UIUC, and cumulative GPA of 2.5. Additionally, each major stipulates prerequisite courses that must be completed before admission to the teaching option. Interested students should see the academic advisers in the major or the LAS Secondary Education Program Adviser for further information.

Most students will be able to complete all the prerequisite courses for transfer into the teaching option of their major by the spring of their sophomore year; those students may be able to complete the requirements for the bachelor’s degree in LAS, as well as the minor in education and all other requirements for teacher licensure in four years (five years for biology majors). Students who establish eligibility to transfer into the teaching option of their major in the spring of their junior year may need more time to satisfy the requirements for teacher licensure.

In order to be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their adviser or the

**Mission**

The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. Based on that foundation, the mission of the College of Engineering is to meet the needs of the state and nation through excellence in education, research, and public service. The goals are to instill in students the attitudes, values, vision, and training that will prepare them for lifetimes of continued learning and leadership in engineering and other fields; to generate new knowledge for the benefit of society; and to provide special services when there are needs that the college is uniquely qualified to meet.

---

**Vision**

The vision of the College of Engineering is to be a distinguished institution, providing knowledge that focuses on the creation and management of systems and resources. This knowledge is to be shared by motivating and educating qualified students to master the most important components of science and engineering at all levels. The students are also to have an appreciation for human and ethical values.
Graduates of the program will have an ability to:

- demonstrate their attainment of the following outcomes.

To accomplish the educational objectives and to fulfill current educational objectives which are broad statements that describe what graduates are expected to attain within a few years of graduation. In general, all the programs provide students with a comprehensive education that includes in-depth instruction in their chosen fields of study. The programs are designed to emphasize analysis and problem solving and to provide exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

**Educational Objectives**

The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelor's level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. Based on the mission and vision statement of the college, each engineering program has developed educational objectives which are broad statements that describe what graduates are expected to attain within a few years of graduation. In general, all the programs provide students with a comprehensive education that includes in-depth instruction in their chosen fields of study. The programs are designed to emphasize analysis and problem solving and to provide exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

**Outcomes and Assessment**

To accomplish the educational objectives and to fulfill current engineering accreditation criteria, all engineering programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply the engineering design process to produce solutions that meet specific needs with consideration for public health and safety, and global, cultural, social, environmental, economic, and other factors as appropriate to the discipline.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge.
- An ability to function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment.

Similarly, to accomplish the educational objectives and to fulfill current computing accreditation criteria, the computer science program provides the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes.

Graduates of the program will have an ability to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

An assessment system for continuous measurement, evaluation, and improvement is in place in each academic department and within each program. In addition, the college collects college-wide data and provides coordination and assistance to the departments for the overall process.

**Professional Component**

Each program also contains a professional component, as required for accreditation that is consistent with the objectives of the program and the institution. The professional component includes:

- a minimum of 30 semester credit hours (or equivalent) of a combination of college-level mathematics and basic sciences with experimental experience appropriate to the program.
- a minimum of 45 semester credit hours (or equivalent) of engineering topics appropriate to the program, consisting of engineering sciences and engineering design, and utilizing modern engineering tools.
- a broad education component that complements the technical content of the curriculum and is consistent with the program educational objectives.
- a culminating major engineering design experience based on the knowledge and skills acquired in earlier course work that incorporates appropriate engineering standards and multiple constraints.

In the case of computing accreditation, the computer science program must include mathematics appropriate to the discipline and at least 30 hours of up-to-date coverage of fundamental and advanced computing topics that provide both breadth and depth. The computing topics must include:

- Techniques, skills, and tools necessary for computing practice.
- Principles and practices for secure computing.
- Local and global impacts of computing solutions on individuals, organizations, and society.

The paragraphs below further describe these elements of the programs and expected student outcomes and experiences.

**Breadth of Programs**

The college provides training in the mathematical and physical sciences and their application to a broad spectrum of technological and social requirements of society. The engineering programs, although widely varied and specialized, are built on a general foundation of scientific theory applicable to many different fields. Work in the classroom and laboratory is brought into sharper focus by practical problems that the student solves by methods similar to those of practicing engineers. Engineering design experience is introduced early in the programs, is integrated throughout, and culminates in a major design project team-work experience in the senior year.

Although each student pursues a program chosen to meet individual career goals, all students take certain courses. Basic courses in
mathematics, chemistry, physics, rhetoric, and computer science are required in the first two years. The scientific and technical portion of the majors provides the rudimentary development of technical skills, the modern engineering tools and methods for solving problems in practice, the design of experiments and associated data analysis, an understanding of values and cost, an understanding of the ethical characteristics of the engineering profession and practice, a sensitivity to the socially related technical problems that confront health and safety, and the ability and emphasis for maintaining professional competence through lifelong learning. Although the programs are progressively specialized in the third and fourth years, each student is required to take some courses outside his or her chosen field.

Non-technical courses are included in each program; they may be required or elective. Many non-technical courses satisfy the broad objectives of the humanities and social sciences requirements of the engineering programs, enabling strong, effective communications, making the student keenly aware of the urgent contemporary problems of society, and developing a deeper appreciation of human cultural achievements in a global context. The humanities and social sciences courses are usually drawn from the liberal arts and sciences, economics, and approved courses in fine and applied arts. A student who desires a broader cultural background may wish to consider a combined engineering-liberal arts and sciences program.

**Illinois Engineering Freshman Experience (IEFX)**

The Illinois Engineering First-Year Experience (http://iefx.engineering.illinois.edu) is an interdisciplinary program for all first-year engineering students. Students’ aspirations are respected, supported, and fostered within program initiatives that lay a solid foundation for your collegiate career.

You have the opportunity to begin your experience by participating in Summer Scholars, a program centered on helping you transition to Illinois and increase your academic performance for the first-year. You attend the eight-week Summer Session II and take the IEFX Projects course and another class of your choice.

For the fall semester, all first-year students attend Launch, your official welcome event to Engineering at Illinois, the Saturday before classes begin. You will meet faculty, staff, and other students at this popular party event that helps you build community and get a strong start.

Your experience continues with ENG 100, a fall-semester orientation course where you will learn important skills and information regarding engineering and the University, and you connect with a peer mentor that is trained and eager to assist you for academic success. You are also encouraged to enroll in one or more of the IEFX Electives. These courses offer variety to and enhancement of the first year.

Along with the opportunities mentioned previously there are other events and sub-programs in IEFX that build community and helps students establish a strong sense of engineering identity.

For further information regarding IEFX, visit the IEFX website (http://iefx.engineering.illinois.edu), contact the IEFX Office (First Floor, Engineering Hall, iefx@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Engineering Career Services**

The College of Engineering is committed to your success as a student and beyond. Our Engineering Career Services (ECS) office offers support, guidance, and resources to help you with every step of your career path.

Whether you are interested in gaining practical experience through a co-op position or an internship, applying to graduate school, or entering the professional world upon your graduation, ECS provides a variety of services from career planning to offer evaluation and negotiation. We encourage you to take advantage of these services both as a student and as an alum of the College.

The ECS team is here to support you through the entire career development and search process. You’ll have the opportunity to meet companies at information sessions, workshops, career fairs and on-campus interview. ECS’s online job system: Handshake @ Illinois should be your first stop to learning about career opportunities. Employers use Handshake @ Illinois to communicate with students by posting job opportunities and promoting on-campus recruiting activities.

ECS services include:

- Workshops and seminars
- Career exploration and counseling
- Resume and cover letter reviews
- Mock interviews
- Career fairs and on-campus recruiting events
- Job shadows, internships, co-ops, and full-time job postings
- Company databases and contact information
- Salary and placement statistics
- Offer evaluation and negotiation
- Presentations for classes and student organizations
- Personal consultation appointments

To take advantage of these services and many more, students simply need to register with the Engineering Career Services office (3270 Digital Computer Lab, 217-333-1960, ecs@engr.illinois.edu), or visit the Engineering Career Services website. (http://ecs.engineering.illinois.edu)

**Departments and Programs**

The engineering degree programs offered at Illinois awarding Bachelor of Science degrees are listed in the table below. The programs accredited by an accreditation commission of ABET (http://www.abet.org) and the year in which first accredited are indicated. The Computer Science program is accredited by the Computing Accreditation Commission (CAC); all others are accredited by the Engineering Accreditation Commission (EAC).

Information listed in this catalog is current as of 07/2019
A student with advanced placement (AP or IB) credit in mathematics, chemistry, or physics will receive credit toward graduation and will be placed in advanced course work consistent with academic preparation.

All of the engineering curricula are built around a common core of courses. In addition all students in engineering curricula have 18 hours of social sciences and humanities electives and at least 6 hours of free electives; these choices are generally not prescribed by the curriculum. These common elements allow a student to transfer from one curriculum to another early in their college career with minimal loss of credit.

The following table gives an indication of the common elements in the early stages of the engineering curricula. There are math, chemistry, physics, and rhetoric courses required in all curricula. There are also several courses that are common to many curricula. When a course substitution applies (e.g., MATH 286 for MATH 285, or MATH 415 for MATH 225) the most flexible option is to take the more demanding course as it meets the requirements of the less demanding course (and generally provides a stronger education in that subject).

| Subject            | Core Courses Common to All Engineering Curricula | Core Courses Common to Many Engineering Curricula |
|--------------------|-------------------------------------------------|________________________________________________|
| Math               | MATH 221, MATH 231, MATH 241, MATH 285          | MATH 225, MATH 415                               |
| Physics            | PHYS 211, PHYS 212                              | PHYS 213, PHYS 214                              |
| Chemistry          | CHEM 102, CHEM 103                              | CHEM 104, CHEM 105                              |
| Composition        | RHET 105                                        |                                                 |
| Other Foundational Courses | SE 101, ME 170, ECE 110, CS 101              |                                                 |

Students with no background in calculus should take MATH 220 instead of MATH 221. Four of the five credit hours of MATH 220 apply to the degree requirements.

MATH 286 is required in some curricula and is an acceptable substitute for MATH 285 in all curricula.

MATH 415 is an acceptable substitute for MATH 225 in all curricula that require MATH 225. Note that MATH 415 can be used in the Mathematics Minor whereas MATH 225 cannot.

CMN 111 + CMN 112 are acceptable substitutes for RHET 105 in all curricula for those who qualify to take those courses.

Transferring into Engineering from Other Institutions

The College of Engineering admits qualified transfer students from both community and four-year colleges and has worked closely with many of these schools in Illinois to implement coordinated engineering programs. Students may complete courses at other accredited institutions and transfer to Illinois with little or no loss of credit, provided that they follow the proper program. A suggested list of courses that should be completed before transferring may be viewed at the College of Engineering Transfer website (http://engr.illinois.edu/students/prospective/transfer_admission.php).

Students may also apply and participate in the Pathways program, a guaranteed admission program for qualifying students. To learn more, go to the Pathways website (http://pathways.engineering.illinois.edu).

Students may transfer to the college for the fall, spring, or summer session. Both the overall grade point average (GPA) of all transferable courses and the separate GPA of the technical courses (mathematics, physics, chemistry) must meet or exceed the competitive cutoffs.
Transfer students are normally required to have also completed the basic mathematics (through calculus), physics, chemistry, and English (rhetoric and composition). Transfer students starting their studies in the fall semester are allowed to advance enroll during the preceding summer. Students are informed of this opportunity after they are admitted.

For more information, view the Office of Admissions Transfer website, (http://admissions.illinois.edu/apply/requirements_transfer.html) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Transferring into Engineering from Other Colleges on Our Campus

Any student in good standing in a college outside Engineering is eligible to seek transfer into a curriculum offered by the College of Engineering. The likelihood of success of such an intercollege transfer (ICT) petition depends upon the qualifications of the student, primarily as evidenced by performance in U of I courses. A student with a B average or above and with demonstrated success (primarily A’s and B’s) in Math, Physics, and Chemistry may be a good candidate for transfer.

For much more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageId=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Changing Curricula within Engineering

Students enrolled in the College of Engineering may petition for transfer to another department within the college. Such a transfer is considered an interdepartmental transfer (IDT).

Approval of an IDT petition will depend upon the reasons given by the petitioner for wanting to transfer, the comments of current and prospective departments, and availability of space in the target curriculum. Each case will be considered individually on its own merits.

For much more ICT information, view the College of Engineering Changing Majors website (https://wiki.cites.illinois.edu/wiki/pages/viewpage.action?pageId=397279242) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Special Degree Programs

Combined Engineering-Liberal Arts and Sciences Program

A dual degree program of study permits a student to earn a Bachelor of Science degree in a field of engineering from the College of Engineering and a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

This program affords the student the opportunity to prepare for a career of an interdisciplinary nature. A student who desires a broader background than can be provided in the four-year engineering programs can develop a combined program that includes a synergistic scientific education or an enhanced cultural education in addition to an engineering specialty. Each student must file an approved program with the College of Engineering's Office of the Associate Dean for Undergraduate Programs and with the College of Liberal Arts and Sciences Academic Affairs Office.

Advisors in both colleges assist in planning a program of study to meet the needs and requirements for both degrees. Most combinations of engineering and liberal arts programs may be completed in ten semesters if the student does not have deficiencies in the entrance requirements of either college.

Most engineering programs can be combined with one of a variety of liberal arts and sciences majors, including science, languages, social sciences, humanities, speech communication, and philosophy. This combined program operates under the following conditions:

- Students entering the program must meet admission requirements for both colleges. Students planning completion of the two degrees in 8 semesters are recommended to submit the application in the fifth term of enrollment but no later than the first week of classes in the seventh term. Students planning completion in 10 semesters are recommended to submit the application in the seventh term of enrollment but no later than the first week of classes of the eighth term.
- Beginning with students who matriculated in Fall 2005, an Illinois GPA of 3.25 (or above for certain programs) will be required at the time of application for a second degree.
- Students must complete all of the requirements specified for the additional LAS degree as well as at least an additional 30 hours over and above those required for the first degree. The candidate must also complete 12 distinct advanced hours in the LAS major that are not used in meeting the requirements for any other degree program.
- All second degree candidates in LAS must be enrolled in the College of Liberal Arts and Sciences for a minimum of two semesters. Also, campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree.
- A student who starts in the program and decides to transfer from it is subject to the existing graduation requirements of the college of his or her choice.
- The degrees of Bachelor of Science in engineering and Bachelor of Arts or Bachelor of Science in liberal arts and sciences may be awarded simultaneously. If not, a student must complete the LAS degree first, having fulfilled the two-semester residency requirement in LAS, and transfer back to the College of Engineering to complete the other degree.
- Participants must satisfy the College of Liberal Arts and Sciences foreign language graduation requirement.
- Students electing advanced Reserve Officers' Training Corps and Naval ROTC programs are required to meet these commitments in addition to the combined program as outlined.
- Students with 75 or more hours of transfer credit are not advised to enter this program because they cannot ordinarily complete it in five years.
- Students transferring from other colleges and universities must plan to complete at least one year in the College of Liberal Arts and Sciences at Urbana-Champaign and one year in the College of Engineering at Urbana-Champaign to satisfy residency requirements if both degrees are to be granted here.

For further information about this program, students should contact the Office of the Associate Dean in either the College of Engineering or the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

Dual-Degree Programs within the College of Engineering

Students enrolled in any department of the College of Engineering may pursue a second engineering degree if the following requirements are fulfilled:
• Students seeking a second engineering degree must apply for the program no later than the first week of classes of the term they intend to graduate with the first degree. The two engineering degrees may be awarded simultaneously or consecutively. All candidates for engineering degrees are accorded a maximum of 10 semesters of Illinois enrollment to complete their degrees. Students must petition to request an extension beyond this limit, which must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering.

• The Department offering the curriculum for the second degree must approve the double-degree request. The criteria for approval are the same as the ones applied for transfer into that curriculum.

• Campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree. The candidate must also complete at least 12 distinct advanced hours in the second degree that are not used in meeting the requirements for the first degree program.

Advanced students with multidisciplinary ambitions may also consider pursuing a graduate master's degree as an alternative to a second undergraduate engineering degree, particularly if interested in research. Students should seek the advice of advisors and faculty members in the specific departments of interest to gather information on graduate programs and on available research opportunities.

A special dual-degree opportunity exists with the Bachelor of Science in Innovation, Leadership, and Engineering Entrepreneurship (BS ILEE) offered through the Technology Entrepreneur Center (TEC) of the College of Engineering. The BS ILEE is only offered as a dual degree for College of Engineering students and those in LAS Chemical Engineering. As with other dual-degree programs within the College of Engineering, the requirements for BOTH degrees must be met completely. See TEC’s BS ILEE (https://tec.illinois.edu/academics/degree) degree website for details.

**Program Modification**

A student can seek to modify his or her program of studies using course substitutions by submitting a Curriculum Modification form to the Office of the Associate Dean for Undergraduate Programs in the College of Engineering, 206 Engineering Hall (note that the forms can be obtained there too). The student should seek an endorsement of the change from his or her academic advisor and the Chief Advisor of the department responsible for the student’s program. The Associate Dean for Undergraduate Programs is responsible for approving all curriculum modifications. No program modification is automatically granted, and each request must come through the formal process. Once approved the student is notified by return copy of the form and the program change is entered in the graduation audit.

**Custom Degree Program**

Some program changes do not fit the direct course substitution mode anticipated by a Program Modification. In such a case a student may seek permission to vary the program requirements of one of the standard Engineering degree programs by written petition to the Associate Dean for Undergraduate Programs. There is no standard form for this transaction. A student should submit a letter proposal outlining the nature of the request and the justification. The special program must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering, who will consult with the head of the department in which the student is registered.

**Special Off-Campus Programs**

**Experiential Learning Programs**

Co-ops and internships (summer and semester) provide students with a competitive advantage when seeking full-time career opportunities in industry. These Experiential Learning Programs not only enable students to gain up to a full year of professional work experience while paying for their education, but also offer the opportunity to explore engineering-related fields in-depth, to apply what you learn in the classroom to a real situation, and to provide insight into some of the nation's leading companies.

As a Co-op, a student alternates terms of work with terms of school, working at least two semesters and one summer with the same company. Students that participate in a Co-op opportunity graduate with one year of professional work experience increasing their marketability throughout the recruiting process. Semester Interns work for a period of 4-7 months with one company (a spring or fall semester may be combined with a summer). Many students also participate in summer internships, working for one company during a summer (2-3 months). Students may complete multiple internships, and all internships and co-ops are paid employment positions.

Students find these Experiential Learning Programs valuable and rewarding for a number of reasons:

• They are able to explore opportunities within a specific field.
• They gain industry experience prior to graduation.
• They improve their overall communication and team skills.
• Time spent with an employer inspires their performance in their course work and expands their classroom experiences.
• The practical experience helps them to identify if they have really chosen the right field of interest for them and offers numerous alternative ideas.
• They earn money that can be applied to college expenses.

ECS also offers a job shadow program, which takes place each year during winter break. The Job Shadow Program is a one day program for freshmen and sophomores interested in spending time with an engineer to better understand what it means to work in a specific industry or company. This program provides students with an opportunity for a brief yet valuable introduction to the daily demands of an engineer during the course of a day. Each student is matched with an engineer in the student’s field of interest and spends time at the engineer’s firm. This unique interactive experience will give participants a better idea of how the professional world “feels” in their chosen field of study.

For more information regarding Experiential Learning Programs visit the Engineering Career Services website (http://ecs.engineering.illinois.edu), contact Engineering Career Services (3270 Digital Computer Lab, 217-333-1960, ecs@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Study Abroad Programs**

Engineering students at Illinois are presented with very attractive opportunities to study overseas as part of their university experience. Students may spend a summer, semester, or even an entire academic year abroad. Credits earned during this time may be transferred to Illinois to satisfy curricular requirements. Additionally, a student may even elect to pursue an International Minor in Engineering (http://catalog.illinois.edu/undergraduate/engineer/international-minor-engineering) that is focused on the country or region of the student’s choice.
A variety of study abroad and international work programs are available to provide students an international experience. Currently, International Programs in Engineering (IPENG) has programs at universities in Argentina, Australia, Austria, Belgium, Brazil, Chile, China, Denmark, France, Germany, Ireland, Italy, Japan, Netherlands, Singapore, S. Korea, and the U.K. More are continually being developed in these and other countries. IPENG’s membership in the Global Engineering Education Exchange (GE3) consortia provides additional overseas locations and fellowships for study abroad. Students can also participate through the main campus programs in several other countries. For information on these programs visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or the Study Abroad Office website (http://studyabroad.illinois.edu) or contact the Engineering Study Abroad Office (210 Engineering Hall, ipeng@illinois.edu).

To help new students gain an understanding of the importance of an international experience during their academic career at Illinois, the College of Engineering offers short programs for freshman level students to “get their feet wet.” These are 10-14 day trips in either the winter break (Guatemala) or spring break (Cuba) and also one for women in engineering at the end of the spring semester to Uruguay. Some of these programs include the opportunity to earn credit towards degree requirements.

An overseas academic experience can begin as early as the summer after the first year at Illinois. An academic semester or year exchange program provides an even greater depth to the undergraduate experience and will greatly enhance a resume when a student begins their professional job search.

The personal and academic advantages gained by participating in the program are numerous and reflect many financial incentives. These advantages can include: IPENG help with round-trip airfare for all engineering students who study or work abroad on approved programs and a reduced on campus tuition charge when studying. The result is that Illinois provides the opportunity to earn credit overseas at only a fraction of the cost of studying on campus.

The College of Engineering also offers scholarships for Study Abroad participants. The College of Engineering believes in this opportunity so firmly that much has been done to make this as affordable as possible for students. In addition to help with round-trip airfare and tuition incentives, newly admitted students are offered an opportunity to apply for the International Engineering Scholarship. This scholarship provides a one-time payment of $2,000 during the Study Abroad program. Additional scholarships are also provided to students upon acceptance to a study abroad program.

For more information about study abroad, visit the International Programs in Engineering website (http://engineering.illinois.edu/ipeng) or contact IPENG (210 Engineering Hall, 217-244-0054, ipeng@illinois.edu).

Other International Opportunities

New Internship programs through Global Experiences and Sage Corps have been included in the College of Engineering’s repertoire of programs. These are non-paid experiential internships that will help enhance a student’s resume and provide hands-on engineering related experiences. See the International Programs in Engineering Website (http://www.engineering.illinois.edu/studyabroad).

Engineers Without Borders (EWB) Illinois works with disadvantaged communities to improve their quality of life through implementation of environmentally and economically sustainable engineering projects, while developing international responsible engineering students. Current international projects include biofuel electricity generation, charge controller circuit design, and wood-stove emissions control. Furthermore, EWB-Illinois holds local events to create awareness on campus of international development and environmental issues. EWB-Illinois is open to all majors and, indeed, is always in need of dedicated people from all fields. For more information, visit the Engineers Without Borders website (https://ewbusauiuc.wordpress.com).

Advanced ROTC Training

A student in the College of Engineering may elect to participate in the Reserve Officers’ Training Corps Program and earn a commission in the U.S. Army Reserve, Air Force Reserve, or Naval Reserve. A commission is awarded simultaneously with the awarding of the bachelor of science degree in an engineering field. Participation in these programs is limited to students who apply to and are selected by the army, air force, and navy units at Illinois. Monthly stipends are paid to those selected for advanced military training.

These programs require from one to three summer camps or cruises and the earning of specified numbers of credits in advanced military courses. Credits earned appear in all academic averages computed by the College of Engineering. Basic military courses do not count toward graduation. A maximum of 6 hours of upper-level military science courses may be used as free electives. A student should plan on taking nine semesters to obtain both a bachelor’s degree in engineering and a commission in the ROTC program. For further information, write directly to the professor of military science, aerospace studies, or naval science.

Technical Grade Point Average Requirements

Technical grade point average (TGPA) requirements for graduation and advanced-level course registration apply to students enrolled in certain College of Engineering curricula. These rules apply in addition to the Illinois campus-wide drop and probation rules. The table below summarizes the TGPA rules applicable.

Note: TGPA rules for the General Engineering and Industrial Engineering curricula shown in the table below are under review and subject to change. Click here (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements) for the most current information.

Tau Beta Pi

Tau Beta Pi is a national engineering honor society that recognizes students, alumni, and engineers for outstanding academic achievements and exemplary character. The Alpha chapter at Illinois was founded in 1897 and is the fifth oldest chapter. In addition to gaining scholastic recognition, members participate in a range of activities that serve the chapter, the College of Engineering, and the community. The scholastic requirement for membership in Tau Beta Pi is that juniors must be in the upper one-fifth of their graduating class, seniors must be in the upper one-eighth of their graduating class and upper one-fifth of their graduating class.

Edmund J. James Scholars

The honors program in engineering is part of the Illinois James Scholar program, which was established to recognize and develop the talents of academically outstanding students. Engineering students in this program are known as "James Scholars in Engineering." Each has access to a departmental honors advisor and receives special consideration in the selection of courses to meet specific needs.

Admission for incoming freshmen is based on a holistic review of the application rather than on standardized test scores alone. Students selected as James Scholars for fall semester freshman admission will be notified in late February. Those not selected upon freshman admission, may apply to be a Freshman James Scholar within the first ten days of classes in the spring semester if they have achieved a 3.5 Grade Point Average (GPA) or higher in the first semester at the Urbana-Champaign campus. Upon completion of the freshman honors requirement, students will still receive honors recognition on their transcripts for the full year.

Students continuing in the program and newly accepted upperclass students are required to maintain a minimum 3.5 GPA. All students in the program are required to submit a detailed plan each semester. Upperclass students must meet with their departmental advisor to develop and gain approval of an honors contract, which is a specific and coherent plan of special academic work. Students are required to submit only one honors contract, which must be submitted no later than midterm in the second semester of the sophomore year.

Good standing in the James Scholar program at graduation requires a minimum 3.5 GPA, along with submission of the student's semester plan for every semester, and completion of an approved honors contract, at both the department and college levels.

For more information about the James Scholar Program, visit the college’s James Scholar website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Honors?src=search). Contact the Engineering James Scholars Adviser via email at james-scholar@engr.illinois.edu to schedule an advising appointment.

Dean’s List

The names of undergraduates who have achieved a grade point average in the top 20 percent of their college class for a given semester will be included on a list prepared for the dean of the college.

To be eligible for Dean’s List recognition, students must successfully complete at least 12 academic semester hours taken for a letter grade. Students who are registered with the Center for Wounded Veterans (CWV) or with Disability Resources and Educational Services (DRES) who are enrolled in less than 12 but a minimum of nine graded academic semester hours who are in the top 20 percent of their college are also eligible. Such students must sign a release with CWV or DRES indicating their consent for consideration for Dean’s List eligibility and have submitted to their home unit’s academic affairs office no later than Reading Day in the semester in which they wish to be considered for Dean’s List. These consent forms are valid only for the semester in which they are issued, and students must submit by the deadline updated consent forms for each semester in which they wish to be considered for Dean’s List.
Courses must be taken for a letter grade (A-F). Credits earned during the semester through proficiency examinations or for courses taken as Credit/No Credit or Satisfactory/Unsatisfactory are not counted.

**General Education Requirements**

The campus General Education requirements fall into several categories. Those in Composition I, Natural Sciences and Technology, and Quantitative Reasoning are met by courses required in engineering curricula. Beginning with the class that entered in fall 2000, students must complete a third-level college language course. Most students satisfy this requirement by completing three years of high school instruction in a single language.

The campus General Education requirements in social and behavioral sciences and in humanities and the arts can be met while satisfying the College of Engineering's liberal education course work requirements (see below). Proper choices will assure that these courses also satisfy the campus requirements in the areas of Western and non-Western cultures. Beginning with the class that entered in fall 2018, students must also assure that they take a course that satisfies the campus requirement in the area of U.S. Minority Culture. Many of these courses satisfy the campus Advanced Composition requirement, which assures that students have the advanced writing skills expected of all college graduates.

Students may obtain credit from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits. All course work taken to satisfy campus general education requirements must be taken for grade.

For more information about General Education course work requirements, consult the campus' General Education website (https://courses.illinois.edu).

**Elective Course Work**

**Liberal Education Electives**

The College of Engineering requires eighteen hours of liberal education course work. The courses are normally chosen to also satisfy the campus General Education requirements consisting of six hours of social and behavioral sciences (S&B&S) and six hours of humanities and arts (H&A) course work. All twelve hours of these hours must be taken for grade. The remaining six hours of liberal education course work may include more approved General Education S&B&S or H&A credit, foreign language credit beyond the basic requirement, and liberal education courses from a list approved by the College (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Course+List?src=search).

Credit for this course work may come from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits.

For more information about College of Engineering liberal education course work requirements, consult the college’s Liberal Education website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives).

**Technical Electives**

All technical elective courses must be selected in accordance with departmental requirements. Technical electives generally include 300- and 400-level courses in engineering, mathematics, and the natural sciences.

**Free Electives**

These unrestricted electives are selected at the prerogative of the student with certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search). Every curriculum administered by the College of Engineering has at least six free elective hours. This course credit insures the required number of credit hours for the degree is earned.

**Credit-No Credit Option**

The credit-no credit grade option is available for students who want to explore areas of academic interest that they might otherwise avoid for fear of poor grades. All students considering this option are cautioned that many graduate and professional schools consider applicants whose transcripts bear a significant number of non-grade symbols less favorably than those whose transcripts contain none or very few. Required courses in the College of Engineering may not be taken on this basis. For more details, consult the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Grades).

**Combined B.S.-M.S. Engineering Degree Programs**

**Aerospace Engineering (M.S.) (p. 358)**

The joint B.S.-M.S. program in AE combines two degrees: a B.S. in AE with a M.S. in AE. Current Illinois AE students enrolled in the CoE with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student's knowledge beyond that in the standard four-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.S. degree have been successfully completed.

**Course Requirements**

B.S. Component (121 hours)\(^1\)

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 121.
- The reduction of 7 credit hours includes:
  a. 4 hours in Free Electives in both AE curricula
  b. 3 hours in other non-AE Technical Electives
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Students can apply after they complete their junior-level courses, but before they start their senior year.
- Illinois undergraduate student minimum residence requirement must be satisfied.

At the graduate level, requirements are identical for both the M.S. Non-Thesis Track (p. 358) (32 additional hours of coursework) and the M.S. Thesis Track (p. 358) (32 additional hours of coursework).

---

\(^1\) The 121-hour B.S. degree from the B.S.-M.S. program is not ABET accredited, but would be if the student withdrew from the M.S. component and completed the requirements of the traditional 128-hour B.S. program.
Admission
For deadlines and procedures, consult the department website. Current Illinois AE students can apply after they complete their junior-level courses, but before they start their senior year. Students with an overall GPA of at least 3.40 may apply for admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:
• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.40 through completion of the B.S. component of the program in order to remain in the program.
• must maintain a technical GPA of 3.40 through completion of the B.S. component of the program.
• may register for graduate courses and earn graduate hours credits, with approval from their graduate academic advisor, when they have less than 12 credit hours remaining in their B.S. component.
• must earn at least 121 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component students:
• must apply and be officially admitted into the Graduate College.
• will be issued letters of admission from the Graduate College and the AE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal
Students may withdraw from the program at any time by notifying the AE Undergraduate Programs Office. Students who do not complete all 5-year B.S.-M.S. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. in AE degree. Students reverting to a traditional B.S. degree program must complete 128 hours and satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Computer Science (M.S.) (http://cs.illinois.edu/academics/graduate/fifth-year-masters-programs)
The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Illinois Computer Science students enrolled in the College of Engineering with junior standing who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

Course Requirements
B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):
• Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
• Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
• Illinois undergraduate student minimum residence requirement satisfied
• Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):
• Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
• Satisfy Illinois’ graduate student minimum residence requirement.
• Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

Admission
For deadlines and procedures, consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-ms-5-year-program). Current Illinois Computer Science students who are in their junior year (normally at least 90+ credit hours, including those in progress, and at least one year of undergraduate course work remaining) with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:
• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
• must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:
• will be officially admitted into the Graduate College.
• will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal
Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.-M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Continued Graduate Study
Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master’s degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master’s degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

Computer Science (M.C.S.) (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program)
The 5-year program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. in Computer Science. This program is competitive and admission is based on overall academic performance, letters of recommendation, and statement of purpose.

Course Requirements
B.S. Component: 120 hours plus 3 "Breadth Requirement" courses for 9-12 graduate hours
  - Same required courses as the traditional B.S. degree with the minimum hours required reduced to 120 hours.
  - Must complete 3 out of the 4 "Breadth Requirement" courses: four different courses, each from a different area, from the following eight core areas with a grade of B- or higher.
  - University undergraduate minimum residence requirement satisfied.
  - Overall GPA of 3.0 or higher maintained through the completion of the B.S. component of the program.

M.C.S. Component: Minimum 20-23 additional coursework hours
- Program is identical to the traditional M.C.S. program with the 3 out 4 "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)" courses satisfied while still classified as an undergraduate.
- Students who take the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)" courses for 3 credit hours instead of 4 will need to complete a minimum of 23 additional graduate level coursework hours.
- Students must satisfy the university's graduate student minimum residence requirement.
- Students must complete remaining M.C.S. degree requirements in two semesters (fall-spring, spring-summer, or spring-fall).
- Students must maintain an overall GPA of 3.0 through completion of the M.C.S. component of the program.

Admission
For deadlines and procedures, please consult the department website (http://cs.illinois.edu/current-students/graduate-students/bs-mcs-5-year-program). Current Illinois Computer Science students enrolled in the College of Engineering with a junior standing (must have at least one year left of their undergraduate study after admitted into the program) who maintain an excellent academic performance are eligible to apply for this program. Students admitted to this program will receive both degrees once all requirements for both degrees have been successfully completed. Transfer students entering the CS undergraduate program their junior year are also eligible to apply to this program.

Students provisionally admitted to the program:
- are assigned a graduate academic advisor.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the program to remain in the program.
- may register for graduate courses and earn graduate credit hours, with approval from their graduate academic advisor, if they have 12 hours or less to complete in their FINAL semester of their undergraduate studies. Please note that students cannot transfer more than 12 credit hours of coursework over to their M.C.S. degree, which includes the shared coursework.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (this is the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"), and satisfy all B.S. requirements to be officially recommended for admission to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ)"), and an overall GPA of at least 3.0 GPA, students
- will be officially admitted into the Graduate College, with the application fee paid by the department.
- will be issued letter of admission from the Graduate College Admission Office and the Department of Computer Science, at which time they will be considered graduate students and assessed graduate tuition the following semester. International students may be required to submit additional documentation at this time.
• must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.

• must complete all the remaining M.C.S. degree requirements within two semesters (fall-spring, spring-summer, or spring-fall). Please note that if you finish your B.S. requirements in less than four years, you will not be given extra time to complete the M.C.S. degree requirements. You will just finish this joint program in less than 5-years and be able to start working sooner!

Withdrawal

Students who do not complete all 5-Year B.S.-M.C.S. degree program requirements may request by petition to have graduate hours earned, including the Breath Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Electrical and Computer Engineering (https://www.ece.illinois.edu/academics/ugrad/jointbsmeng.asp)

The joint B.S.-M.Eng. program in Electrical and Computer Engineering combines two degrees: a B.S. in EE or CompE with a M.Eng. in ECE. Current Illinois ECE students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in the standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed. Students may participate in the graduation ceremonies for their B.S. degree once the 120 credit-hour requirement is met. There will be no Graduate College or BOT waivers allowed for students in this program. This program is not intended for students intending to pursue the Ph.D. degree—such students should apply to the traditional M.S. (with thesis) degree program.

Course Requirements

B.S. Component (120 hours)*

• Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 120.

• The reduction of 8 credit hours includes:
  • 6 hours in Free Electives in both EE and CompE curricula
  • 2 hours in ECE courses in EE Technical Electives or 2 hours in ECE or CS courses in CompE Technical Electives.

• Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.

• Illinois undergraduate student minimum residence requirement must be satisfied.

M.Eng. Component (32 additional hours of coursework)

• Identical to stand-alone M.Eng. degree requirements:
  • ECE 500 registration (0 hours) every term while in residence
  • 500-level ECE courses (subject to Other Requirements and Conditions below)
  • Professional Development: ECE 596
  • Master’s Project supervised by ECE (or affiliate) graduate faculty or course(s) in leadership, entrepreneurship, or other business-related topic from approved list or as approved by ECE Director of Graduate Studies
  • Elective courses (subject to Other Requirements and Conditions below)

Required Courses: Required Hours
Coursework 32
ECE 500 registration (0 hours) every 0 term while in residence
500-level ECE courses (subject to 12 Other Requirements and Conditions below)
Professional Development: ECE 596 4
Master’s Project supervised by ECE (or affiliate) graduate faculty or course(s) in leadership, entrepreneurship, or other business-related topic from approved list or as approved by ECE Director of Graduate Studies
Elective courses (subject to Other 16 Requirements and Conditions below)

Other Requirements and Conditions (may overlap)

A minimum of 12 credit hours of ECE coursework at 500-level must be applied toward the degree. Up to 4 hours of ECE 596 and/or ECE 597 (or other individual study) may be applied toward this degree requirement.

Coursework must include at least 18 credit hours of ECE coursework; 15 of these hours must be from no more than 2 different focus areas. The ECE Graduate Committee maintains the Focus area course lists.

Credit in ECE 411, ECE 415, ECE 445, ECE 590, PHYS 404, PHYS 435, PHYS 436, and STAT 400 do not count toward the degree.

No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.

This degree option is non-thesis only.

Maintain a minimum program GPA of 3.0.

Admission to the Program

For deadlines and procedures, consult the department website. Current Illinois ECE students with at least 90 credit hours and an overall GPA of at least 3.40 may apply for provisional admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.

• must maintain an overall GPA of 3.40 through completion of the B.S. component of the program in order to remain in the program.
B.S. Component (124 hours):

- Course Requirements

  students intending to pursue a Ph.D. degree.

  the equivalent number of credit hours. This program is not intended for

  degree graduation ceremonies with their class if they have completed

  successfully completed but will be permitted to participate in the B.S.

  once all requirements for both the B.S. - M.Eng. degree have been

  curriculum. Students admitted to the program will receive both degrees

  broaden a student’s knowledge beyond that possible in a standard 4-year

  are eligible to apply for this program. The program is designed to

  coursework remaining) who maintain superior academic performance

  of Engineering with junior standing (normally at least 90 credit hours,

  in Energy Systems. Current Illinois students enrolled in the College

  undergraduate major with the M.Eng. in Engineering with a Concentration

  Energy Systems program combines two degrees: a B.S. in any engineering

  undergraduate major with the M.Eng. in Engineering with a Concentration

  in Energy Systems. Current Illinois students enrolled in the College

  of Engineering with junior standing (normally at least 90 credit hours,

  including those in process, and at least one year of undergraduate

  coursework remaining) who maintain superior academic performance

  are eligible to apply for this program. The program is designed to

  broaden a student’s knowledge beyond that possible in a standard 4-year

  curriculum. Students admitted to the program will receive both degrees

  once all requirements for both the B.S. - M.Eng. degree have been

  successfully completed but will be permitted to participate in the B.S.

  degree graduation ceremonies with their class if they have completed

  the equivalent number of credit hours. This program is not intended for

  students intending to pursue a Ph.D. degree.

  • Overall grade point average (GPA) of 3.0 maintained through

    completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework):

- Identical to the current M.Eng. in Engineering with a Concentration

  in Energy Systems. A total of 32 hours (including the shared

  coursework) are required.

- Satisfy Illinois’ graduate student minimum residency requirement.

- Overall GPA of 3.00 must be maintained through completion of

  M.Eng. component of the program.

Admissions

For deadlines and procedures, consult the departmental website (http://

npre.illinois.edu). Current Illinois Engineering students who are in their

junior year (normally at least 90 credit hours, including those in progress,

and at least one year of undergraduate coursework remaining) with

an overall GPA of at least 3.0 and a technical GPA of 3.0 may apply for

provisional admission to the program. Admission decisions are based on

overall academic performance, letters of reference, and statement of

purpose.

Admissions to the program will occur both in the fall and the spring term.

The application deadline for the spring term will be October 2 and for fall

term will be June 1. The Energy and Sustainability Engineering M.Eng.

admissions committee will review applications for this program and

students accepted into the program will be given "provisional admission."

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.

- must maintain an overall GPA of 3.0 through completion of the B.S.

  component of the degree to remain in the program.

- may register for graduate courses and earn graduate hours credit,

  with approval from their graduate academic advisor, if they have less

  than 12 credit hours remaining in their B.S. component.

- must earn at least 124 hours of undergraduate credit and satisfy

  all B.S. requirements of this program to be officially admitted to the

  Graduate College.

Upon successful completion of the B.S. component, students:

- must apply and be officially admitted into the Graduate College.

- will be issued letters of admission from the Graduate College and

  the ECE Department, at which time they will be considered graduate

  students and assessed graduate tuition the following semester.

- must satisfy the graduate student minimum residence requirement,

  which is 24 graduate credit hours.

- must continue to maintain a graduate GPA of 3.00 or better in order

  to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the

Office of the Associate Dean for Undergraduate Programs. Students

who do not complete all B.S. - M.Eng. degree requirements may request

by petition to have graduate hours earned converted to undergraduate

hours and applied toward a traditional B.S. in Electrical Engineering

or B.S. in Computer Engineering degree. Students reverting to a

traditional B.S. degree program must complete 128 hours and satisfy

all degree requirements. Graduate credit not used to fulfill the B.S. degree

requirements will remain on the transcript and may, at some future point,

be considered for transfer to another degree program.

*The 120-hour B.S. degree from the B.S. - M.Eng. program is not ABET

accredited, but would be if the student withdrew from the M.Eng.

component and completed the requirements of the traditional 128-hour

B.S. program.

Engineering with a Concentration in Energy Systems

The joint B.S. - M.Eng. in Engineering with a Concentration in Energy

Systems program combines two degrees: a B.S. in any engineering

undergraduate major with the M.Eng. in Engineering with a Concentration

in Energy Systems. Current Illinois students enrolled in the College

of Engineering with junior standing (normally at least 90 credit hours,

including those in process, and at least one year of undergraduate

coursework remaining) who maintain superior academic performance

are eligible to apply for this program. The program is designed to

broaden a student’s knowledge beyond that possible in a standard 4-year

curriculum. Students admitted to the program will receive both degrees

once all requirements for both the B.S. - M.Eng. degree have been

successfully completed but will be permitted to participate in the B.S.

degree graduation ceremonies with their class if they have completed

the equivalent number of credit hours. This program is not intended for

students intending to pursue a Ph.D. degree.

Course Requirements

B.S. Component (124 hours):

- Same required courses as the traditional B.S. degree with the

  minimum hours required reduced from 128 to 124 hours. The

  reduction of 4 credit hours is based on the utilization of 4 hours in

  free electives in the student’s undergraduate curriculum.

- Illinois undergraduate student minimum residency requirement

  satisfied.

- Overall grade point average (GPA) of 3.0 maintained through

  completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework):

- Identical to the current M.Eng. in Engineering with a Concentration

  in Energy Systems. A total of 32 hours (including the shared

  coursework) are required.

- Satisfy Illinois’ graduate student minimum residency requirement.

- Overall GPA of 3.00 must be maintained through completion of

  M.Eng. component of the program.

Admissions

For deadlines and procedures, consult the departmental website (http://
npre.illinois.edu). Current Illinois Engineering students who are in their

junior year (normally at least 90 credit hours, including those in progress,

and at least one year of undergraduate coursework remaining) with

an overall GPA of at least 3.0 and a technical GPA of 3.0 may apply for

provisional admission to the program. Admission decisions are based on

overall academic performance, letters of reference, and statement of

purpose.

Admissions to the program will occur both in the fall and the spring term.

The application deadline for the spring term will be October 2 and for fall

term will be June 1. The Energy and Sustainability Engineering M.Eng.

admissions committee will review applications for this program and

students accepted into the program will be given “provisional admission.”

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.

- must maintain an overall GPA of 3.0 through completion of the B.S.

  component of the degree to remain in the program.

- may register for graduate courses and earn graduate hours credit,

  with approval from their graduate academic advisor, if they have less

  than 12 credit hours remaining in their B.S. component.

- must earn at least 124 hours of undergraduate credit and satisfy

  all B.S. requirements of this program to be officially admitted to the

  Graduate College.

Upon successful completion of the B.S. component, students:

- must apply and be officially admitted into the Graduate College.

- will be issued letters of admission from the Graduate College and

  the ECE Department, at which time they will be considered graduate

  students and assessed graduate tuition the following semester.

- must satisfy the graduate student minimum residence requirement,

  which is 24 graduate credit hours.

- must continue to maintain a graduate GPA of 3.00 or better in order

  to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the

Office of the Associate Dean for Undergraduate Programs. Students

who do not complete both the B.S. - M.Eng. degree program requirements

may request by petition to have graduate hours earned converted to

undergraduate hours and applied toward the student’s traditional

engineering undergraduate major. Students reverting to the traditional

B.S. degree program must complete 128 hours and must satisfy all

degree requirements. Graduate credit not used to fulfill the B.S. degree

requirements will remain on the transcript and may, at some future point,

be considered for transfer to another degree program.
The 124-hour B.S. degree from the B.S. - M. Eng. program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program. It is noted students desiring to have their B.S. degree ABET accredited should remain in their B.S. (128 hours) program and apply for the M.Eng. degree during their senior year.

**Industrial Engineering**

The Department offers a combined Bachelor of Science and Master of Science program in Industrial Engineering. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

**Course Requirements**

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares to 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program shown above, except that the following requirements are waived:

- one IE technical elective — 3 hours
- Free electives — 5 hours

In addition, independent study project courses may not be used as IE or technical electives in the B.S. portion of the combined program.

In the M.S. portion of the program, 32 hours of credit and a thesis are required. There must be at least 24 hours of formal graded course work at the 400 level or greater, eight of which must be at the 500 level, and four of the eight must be in the major field. A Master’s thesis, for which at least four and no more than eight hours of IE 599 credit is required. Students must also register for the graduate seminar course (IE 590) every semester following formal admission into the graduate portion of the program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

**Admission**

Formal admission to the combined program normally occurs late in the junior year or early in the senior year. Undergraduate students in IE may apply for formal admission to the combined program with the following provisions:

- Students must have a minimum Illinois GPA of 3.60 or higher, and have earned 96 credit hours towards the B.S.I.E. requirements at the time they are invited to apply.
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ISE Graduate Programs Office, Room 111 Transportation Building. There are two annual application deadlines: September 15 and January 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee for these students.
- Each student is required to identify a graduate advisor and file a graduate course plan in the semester the student is granted formal admission to the graduate portion of the program.
- Once the student is admitted into the B.S.-M.S. program, the Director of Graduate Programs will act as the student’s advisor until a permanent advisor is found.

**Withdrawal**

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

**Continued Graduate Study**

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department’s qualifying examination no later than the second calendar semester after graduation from the combined program.

**Materials Engineering**

The five-year B.S.-M.Eng. program in Materials Science and Engineering combines two degrees: a B.S. in Materials Science and Engineering (MatSE) with an M.Eng in Materials Engineering. Current Illinois MatSE students enrolled in the College of Engineering, who maintain appropriate academic performance, are eligible to apply for this program. The program is designed to enhance the students experience in the engineering aspects of materials, broaden their knowledge beyond that possible in the standard 4-year curriculum and obtain a foundation in business, technology management, and/or entrepreneurship. Two semesters (or equivalent, a minimum of 30 weeks) of industrial co-op or internship are required; a research thesis is not required. In addition the students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department). Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.Eng. degree program have been successfully completed but will be permitted to participate in the B.S. graduation ceremonies with their class if they have completed the equivalent number of credit hours. Once graduate student status is achieved, students in the program would be eligible for a teaching assistantship in MatSE (only).
Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, 2 months before the end of the Fall semester of the students Junior year. The application and letter of reference forms for the B.S.-M.Eng. Program are available from the MatSE department office.

**Admission to the Program**

Current Illinois MatSE students with Junior standing and with an overall grade point average (GPA) of at least 3.00 (A = 4.00) may apply for provisional admission to the program. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, in order to remain in the program
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component
- must earn at least 120 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area coursework, and an overall GPA of at least 3.00 in all graduate coursework, students:

- will be officially admitted into the Graduate College
- will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester
- may apply or be considered for graduate teaching assistantships and tuition waivers, as well as fellowships and scholarships (in MatSE only) available to graduate students in MatSE
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are not eligible to continue in the Ph.D. program in MatSE. Students wishing to pursue a Ph.D. must apply separately for admission to that program.

**Course Requirements**

**B.S. Component (120 hours)**

- Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours
- The reduction of 8 credit hours includes:
  - 5 hours of free electives.
  - 3 hours of the area specialty course in a different area (the latter becomes part of M.Eng. program requirements)
- At least one semester (or 2 summers) devoted to an industrial internship or co-op.
- It is strongly suggested that the student take 2 courses in some aspect of business, economics, environmental studies, labor and industrial relations, technology entrepreneurship or technology and management as the elective component of their Liberal Education requirements. Partial or complete fulfillment of the Technology and Management or Business minor or the Technology Commercialization Certificate is recommended for those admitted by application if available hours permit. The students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department), with additional hours recommended. It is noted that since receipt of the B.S. degree is delayed until the requirements for the M.Eng are completed, the student has the opportunity to complete the undergraduate minors while taking the M.Eng requirements.

- Overall GPA of 3.00 maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

**M.Eng. Component (minimum 36 additional hours of coursework)**

- 36 hours course work, including at least 19 graduate hours of MatSE courses with 12 hours credit overall in 500-level courses. The course work shall include MSE 585 (two semesters or equivalent, 30 weeks total, of industrial internships or co-ops; one of the semesters can be during the B.S. program), 6 hours of 400- or 500-level area specialty courses in the student’s area, 3 hours of 400- or 500-level MSE courses from a different area, 2 hours of MSE 595, and 2 hours of MSE 529 or MSE 559. Ten hours of courses in one or more of the areas of business or technology management, and entrepreneurship are required to be included in the overall program. Completion of the requirements for the various Certificates granted by the Technology Entrepreneur Center is recommended.
- MSE 492; credit does not count toward degree.

**Withdrawal**

Students who do not complete all of the 5-year B.S.-M.Eng. degree program requirements may request, by petition to the Graduate College after obtaining approval by their advisor, the department, and the Associate Dean for Undergraduate Programs in the College of Engineering, to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. degree in MatSE. Students reverting to the traditional B.S. degree program must satisfy all degree requirements, including completion of the required “area specialty course(s) in a different area” and the stated credit hour requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

---

1. The B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional B.S. program or if the student completed all of the requirements of the standard B.S. degree (8 additional hours, as specified).

2. Students find internship companies and positions with the help of the departmental and College Placement offices. The MSE 585 internship requires approval by the departmental Director of Graduate Studies to insure that it matches the student’s individual career objectives and meets the learning goals of the program. Students taking an internship as part of their undergraduate B.S program should also check with the Director of Graduate Studies; his/her approval is required if the student is already accepted in the combined B.S./M. Eng. Program. Students will be expected to present an oral report on their internship in either MSE 529 or MSE 559, as appropriate, the semester following completion of the internship.

Information listed in this catalog is current as of 07/2019
Materials Science and Engineering (http://www.matse.illinois.edu/academics/undergraduate/combined-degree-program.html)

The five-year B.S.-M.S. program in Materials Science and Engineering combines two degrees: a B.S. in MatSE with an M.S. (with thesis) in MatSE. Current Illinois MatSE students enrolled in the College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-Year B.S.-M.S. degree program have been successfully completed but will be permitted to participate in the Graduation Ceremonies with their class if they have completed 128 hours.

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MEB, two months before the end of the Fall semester of the student’s Junior year. Application and letter of reference forms for the B.S.-M.S. Program are available from the MatSE department office.

Admission to the Program

Current Illinois MatSE students with Junior standing with an overall grade point average (GPA) of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.50 through completion of the B.S. component of the program, in order to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
• must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit in advanced level area courses, and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area course work, and an overall GPA of at least 3.00 in all graduate course work, students:

• will be officially admitted into the Graduate College
• will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• may apply or be considered for graduate research or teaching assistantships, and tuition waivers, as well as fellowships and scholarships available to graduate students.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are eligible to apply for the Ph.D. program in MatSE near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master’s degree.

Course Requirements

B.S. component (120 hours including 3 advanced (graduate level) area courses for at least 9 hours):

• Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours; except MSE 395\(^2\) is dropped (i.e., 1 hour)
• Two of the required remaining four area specialty courses are to be taken at the graduate level (i.e., the students will be held to the course and grading requirements of a graduate student). The third advanced level course can be either in the specialty area or in another specialty area.
• The reduction of 8 credit hours includes:
  • 5 hours of free electives.
  • 3 hours of the area specialty course in a different area (becomes part of M.S. program requirements) for all concentrations.
• Senior thesis is to be taken in lieu of MSE 395\(^2\) and one area specialty course (5 hours total recommended, with 1 hour being the remaining hour of free elective).
• An overall GPA of 3.50 must be maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.S. component (minimum 24 additional hours of course work plus 8 hours of MSE 599):

• Same overall requirements as for traditional M.S. with thesis.
• At least one 400-500 level course (for the B.S. or M.S.) will be a MatSE area specialty course from a different area.
• Complete a M.S. thesis according to MatSE department requirements; research for the senior thesis will often serve as a beginning for the M.S. thesis but the student may change thesis advisors.

Withdrawal

Students that do not complete all of the 5-year B.S.-M.S. degree program requirements may request, by petition to the Graduate College with approval of their advisor, the department, and the Associate Dean for Undergraduate Programs of the College of Engineering, to have graduate hours earned, including the three advanced area courses, converted to undergraduate hours and applied toward a traditional B.S. in MatSE degree. Students reverting back to the traditional B.S. in MatSE degree program must earn a minimum of 128 hours and satisfy all traditional degree requirements, including MSE 395\(^2\) and the area specialty course(s) in a different area, to receive the B.S. degree in MatSE. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

1 The B.S. degree from the B.S.-M.S. Program is not ABET accredited.
2 At present, students in their fourth or fifth year considering withdrawing from the M.S. portion of the program should register for MSE 395 in the Spring semester; the resulting B.S. degree would then be ABET accredited. It is anticipated that, in the near future, senior thesis will be accepted by ABET as an appropriate “design experience;” when approved, and if accepted in terms of satisfying the objectives of MSE 395 by the MSE 395 instructor, it can be used for the MSE 395 design project.

Mechanical Engineering

The department offers a combined Bachelor of Science and Master of Science program. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.
Course Requirements
The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares with 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program, except that the following requirements are waived:

- one MechSE elective — 3 hours
- one Technical elective — 3 hours
- Free electives — 2 hours

In addition, independent study project courses may not be used as MechSE or technical electives in the B.S. portion of the combined program.

The M.S. portion of the program requires completion of 32 hours of credit. This consists of a minimum of 24 hours of formal graded course work at the 400 level or above and eight hours of thesis research credit. Additionally, the formal graded course work must include eight hours at the 500 level and eight hours in the major area of study (ME) with a minimum of four of those hours at the 500 level. A Master’s thesis is required, consisting of at least four and no more than eight hours of ME 599 credit. Students must also register for the graduate seminar course (ME 590) every semester following formal admission into the graduate portion of the program and complete MSE 492. The seminar and lab safety credits will not count toward the degree. The non-thesis option is not available to students in this combined program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission
Formal admission to the combined program normally occurs late in the junior year or early in the senior year and is by invitation only with the following provisions:

- Students must have a minimum Illinois GPA of 3.80 or higher, and have earned 96 credit hours toward the B.S.M.E. requirements at the time they are invited to apply (60 of these hours must have been earned at Illinois).
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ME Graduate Programs Office, Room 164 MEB. There are two annual application deadlines: October 15 and March 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee ($60 US, $75 International) for these students.

- Each student is required to identify a graduate advisor and provide a tentative thesis topic at the time of application to the program.

Withdrawal
Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study
Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department’s qualifying examination no later than the second calendar semester after graduation from the combined program.

For the Degree of Bachelor of Science in Aerospace Engineering

The Aerospace Engineering curriculum provides a strong fundamental background in engineering, mathematics, and science, along with the ability to apply this fundamental knowledge to the analysis and design of future aircraft and spacecraft. It also prepares students for lifelong learning and the attainment of their career goals in the field of aerospace engineering and in a wide range of other areas. The concepts of system design are introduced early in the curriculum and culminate in the yearlong senior capstone design experience (AE 442, AE 443), in which students work in teams to respond to a design challenge from industry, government, or a professional engineering society. A total of 18 hours of technical and free electives allows the student to pursue an individualized program of study.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<tr>
<td>ENG 100</td>
<td>Engineering Orientation</td>
<td>0</td>
</tr>
</tbody>
</table>

Total Hours: 0

1. This optional course may be used to help meet free elective requirements.

2. External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Hours: 30

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Aerospace Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of aerospace engineering.

Liberal Education

The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+EElectives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

<table>

</tr>
</tbody>
</table>

1 Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western, and U.S. Minority lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+EElectives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

<table>
<thead>

</tr>
</tbody>
</table>

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

1. Entering freshmen are expected to enroll in AE 100 in the fall of the first year. This optional course may be used to help meet free elective requirements.

2. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a liberal education elective.

5. STAT 400 may be substituted.

6. Sequence satisfies the General Education Advanced Composition requirement.

7. Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives (http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives), satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

**Agricultural and Biological Engineering**

Alan Hansen, Interim Head
338 Agricultural Engineering Sciences Building, 1304 West Pennsylvania Avenue, Urbana
PH: (217) 333-3570
http://abe.illinois.edu
abe.illinois.edu/undergrad_programs (http://www.abe.illinois.edu/undergrad_programs)
Fax: (217) 244-0323
E-mail: abe@illinois.edu

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The Department of Agricultural and Biological Engineering offers programs through the College of ACES and the College of Engineering.

- Agricultural and Biological Engineering, B.S. through the College of Engineering with concentrations:
  - Agricultural Engineering (p. 9)
  - Biological Engineering (p. 11)

- Agricultural and Biological Engineering, B.S. and Agricultural Engineering and Agricultural Science, B.S.A.G (p. 12) through both the College of Engineering and the College of ACES.

Information listed in this catalog is current as of 07/2019
• **Technical Systems Management, B.S** (p. 13) through the College of ACES.

• Minor in Technical Systems Management (p. 14)
• Minor in Agricultural Safety and Health (p. 14)

**Plans of Study are available for:**

Agricultural and Biological Engineering, B.S. – Agricultural Engineering (http://catalog.illinois.edu/undergraduate/engineer/departments/ag-bio-engin/pos-abe-ae) through the College of Engineering.

Agricultural and Biological Engineering, B.S. – Biological Engineering (p. 11) through the College of Engineering.

**For the Degree of Bachelor of Science in Bioengineering**

Bioengineers use tools from biology, chemistry, physics and math to solve engineering problems that arise in biological systems related to biomaterials, biomechanics and prosthetics, tissue engineering, molecular modeling, imaging, bioinformatics, nanomedicine, synthetic biology, and drug delivery. The goal of research and education in bioengineering is to advance fundamental understanding of how human biological systems function, and to develop effective technology-based solutions to the wide spectrum of societal needs in human development and disease diagnosis, treatment, and prevention.

The Bioengineering department (BIOE) aims to graduate students who:

• Enter into industry jobs in prominent companies as engineers who work in the areas of:
  • Medical device design
  • Manufacturing
  • Quality control
  • Marketing
  • And work toward the advancement of medicine
• Pursue graduate studies in bioengineering-related fields such as:
  • Imaging and Sensing
  • Therapeutics
  • Tissue Engineering
  • Computational and Systems Biology
  • Biomechanics
• Broaden their education by attending professional school in areas of medicine, law, and business
• Maintain professional development through societal memberships and industry workshops

The curriculum includes integration of principles of biology and engineering in coursework such as biomechanics, modeling of human physiology, bioinstrumentation, and cell and tissue engineering. The curriculum is project-based and has a strong emphasis on systems-thinking as an approach to large-scale bioengineering problems. During the first and second years, students take fundamental courses introducing them to bioengineering as a field and introducing clinically relevant projects as learning experiences. The program also features hands-on laboratory courses for real-world experience throughout the curriculum. The final two years allow students to focus on a particular track of Bioengineering for further study. A year-long senior capstone design course provides experience in applying engineering fundamentals to biological problems submitted by faculty, clinicians, and industrial firms.

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Undergrad+Advising+Home).

**Orientation and Professional Development**

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours 55

1 May be taken for 3 or 4 credit hours; the extra hour may be used to help meet free elective requirements.

Track Electives

Students must complete 15 hours of engineering study which show coherence, focus, and purpose within a bioengineering context. Students may choose from among the following pre-approved tracks:

- Biomechanics
- Cell and Tissue Engineering
- Computational and Systems Biology
- Imaging and Sensing
- Therapeutics Engineering

Alternately a student may devise a special track and set of courses which must be approved by the Bioengineering Department. In either case, average hours in required courses may be counted toward the 15-hour minimum.

</table>

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western course, and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy the Humanities and the Arts and cultural studies requirements. Courses from the western, non-western, and U.S. minority culture lists that fall into free electives or other categories may also be used satisfy the Humanities and the Arts or cultural studies requirements.

Composition

**Civil and Environmental Engineering**

Benito Marinas  
1114 Newmark Civil Engineering Laboratory, 205 North Mathews Avenue, Urbana  
PH: (217) 333-8038  
http://cee.illinois.edu

For the Degree of Bachelor of Science in Civil Engineering

Civil engineering is a profession that applies the basic principles of science in conjunction with mathematical and computational tools to solve problems associated with developing and sustaining civilized life on our planet. Civil engineering works are generally one-of-a-kind projects;
they are often grand in scale; and they usually require cooperation among professionals of many different disciplines. The completion of a civil engineering project involves the solution of technical problems in which uncertainty of information and myriad non-technical factors often play a significant role. Some of the most common examples of civil engineering works include bridges, buildings, dams, airports, highways, tunnels, and water distribution systems. Civil engineers are concerned with flood control, landslides, air and water pollution, and the design of facilities to withstand earthquakes and other natural hazards, in addition to protecting our environment for a sustainable future.

The civil engineering program comprises seven areas (construction engineering and management, construction materials engineering, environmental engineering, geotechnical engineering, environmental hydrology and hydraulics, structural engineering, and transportation engineering) and three interdisciplinary programs (sustainable and resilient infrastructure systems; energy, water, and environmental sustainability; and societal risk management). Although each area has its own special body of knowledge and engineering tools, they all rely on the same fundamental core principles. Civil engineering projects often draw expertise from many of these areas and programs.

CEE’s Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse areas that include structural, transportation, geotechnical, materials, environmental, and hydrologic engineering; construction management; or other related or emerging fields.
2. Pursue graduate education and research at major research universities in civil and environmental engineering, and related fields.
3. Pursue professional licensure.
4. Advance to leadership positions in the profession.
5. Engage in continued learning through professional development.
6. Participate in and contribute to professional societies and community services.

Program Review and Approval
To qualify for the degree of Bachelor of Science in Civil Engineering, each student’s academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours: 128

¹ Offered in the fall semester should be taken in the first or second semester of enrollment in Civil Engineering.
² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101.
³ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
⁴ Liberal education electives https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western, and US minority lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
⁵ Civil engineering technical courses are defined as core courses and advanced technical electives and must total 34 hours of credit. Five courses and a minimum of fifteen hours must be core courses as outlined in the Civil Engineering Undergraduate Handbook. Advanced technical electives are selected to correspond with chosen primary and secondary areas of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook. A minimum of twelve and six hours must be taken for the primary and secondary areas, respectively.
⁶ The science elective is selected in accord with recommendations for the chosen primary area of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook.

Computer Science

http://cs.illinois.edu

Head of Department: Vikram Adve
For the Degree of Bachelor of Science in Computer Science

The computer science curriculum provides both a broad and deep knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework in areas of the student's choosing follows in the second two years, which include either a senior thesis or a senior project. Graduates may go on to graduate study or leading positions in industry.

A combined B.S.-M.S. Computer Science degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 84).

A Software Engineering Certificate (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-softengcert) is also available to all students in the computer science curriculum interested in a career in software engineering. It provides knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework in areas of the student's choosing follows in the second two years, which include either a senior thesis or a senior project. Graduates may go on to graduate study or leading positions in industry.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Technical Electives

These courses stress the rigorous analysis and design principles practiced in major subdisciplines of computer science. Students select eight courses, at least six of which must be advanced CS courses. Three courses must be selected from one area of CS and at least one course should satisfy the team project requirement.

<table>

Total Hours 31

1. Freshmen take ECE 110 for 3 credit hours. Lab-only version of ECE 110 taken by transfer students (with special permission) is 1 credit hour.
2. STAT 410 may be substituted.
3. ECE 496 AND ECE 499 may be substituted.

Technical Electives
This elective requirement gives each student freedom to define a technical course of study in electrical engineering of considerable breadth and focus. The Advanced Core ECE Electives are introductory to major subdisciplines of electrical engineering (http://www.ece.illinois.edu/academics/ugrad/subdisciplines).

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students’ understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western, and U.S. Minority lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Total Hours 18

Composition
These courses teach fundamentals of expository writing.

Advanced Composition (satisfied by completing ECE 445 in the Electrical Engineering Technical Core). May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.

Total Hours 4

**Free Electives**

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors. At least seven hours must be taken for a grade.

Industrial and Enterprise Systems Engineering

Undergraduate Program Office: 104 Transportation Building
Fax: (217) 244-5705

Part of a nationally top-ranked engineering college on a premier Big Ten university campus, the Department of Industrial & Enterprise Systems Engineering offers students a blend of intellectual challenge, excitement, and energy that is transformational—this is a campus where you can learn from a world-renowned faculty, study in the most technologically advanced engineering library in the nation, and contribute to research that has real impact. The University attracts the best students from across the country and around the world. You can choose from about 4,000 courses as well as a variety of sports, the arts, and student activities—you’ll never lack amazing things to do.

You can explore your personal interests and goals in more than 50 professional and honor engineering societies, or the more than 1,000 other organizations across campus. These student-run groups offer opportunities to develop leadership skills, test technical competence, and serve society through volunteer projects.

Many students choose a study-abroad experience to gain a better understanding of other cultures, while also developing skills that make them more marketable in the global workplace. The Office of International Programs in Engineering coordinates travel and fellowships to countries all over the world. Engineering at Illinois is the only U.S. institution to successfully in the engineering profession. They also provide the skills to work effectively and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

A combined B.S.-M.S. Industrial Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 84).

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below. Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

Note: the TGPA rules for this curriculum are under review and if changed, will be reflected at the Web site indicated.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Industrial Engineering

For the Degree of Bachelor of Science in Industrial Engineering

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from production management to process control. Industrial engineers design efficient, productive systems in a wide range of business, industrial, and governmental settings.

The technical portion of the industrial engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student’s first year is spent mastering the basics of science: math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. During their senior year, students broaden and deepen their knowledge with additional technical elective courses. Finally, all students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

---

1. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is SE 101.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, highly recommended before the fourth semester. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western, and U.S. Minority lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
4. Selected from the departmentally approved lists of Track Option Electives (http://ise.illinois.edu/undergraduate-programs/industrial-engineering-degree/industrial-engineering-track-options) or by petition to the department.
5. Selected from the departmentally approved list of Computer Science Electives (https://ise.illinois.edu/undergraduate/courses-curriculum.html)
Successfully in the engineering profession.

Department, and curriculum can offer you as you work to achieve

These courses introduce the opportunities and resources your college,

Orientation and Professional Development

These courses introduce the opportunities and resources your college,

department, and curriculum can offer you as you work to achieve

effective and get results in a team environment.

Design experience and project management are emphasized and

integrated across the core with a focus on establishing critical problem-
solving skills applied across disciplines, strong communication skills,

and the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design

undergraduates is the Senior Project Course. Students work

collaboratively with industry and a team of faculty members on a real-

world problem during their final semester. The results are documented

in a final written report and a formal presentation at the end of the

semester to the company so that the student recommendations may be

implemented.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as

shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college,

department, and curriculum can offer you as you work to achieve

your career goals. They also provide the skills to work effectively and

successfully in the engineering profession.

Systems Engineering and Design

For the Degree of Bachelor of Science in Systems Engineering and Design
(formerly General Engineering)

Systems Engineering and Design (SED) is a comprehensive, interdisciplinary program emphasizing interactions between parts of a whole. It brings together basic sciences, engineering analysis, and engineering design. The curriculum offers flexibility through a Secondary Field Option, while providing a broad background in engineering as a whole and decision-making that supports overall design. Systems Engineers understand how to coordinate interacting parts of a whole and to evaluate engineering within economic and physical constraints.

Design experience and project management are emphasized and

integrated across the core with a focus on establishing critical problem-
solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Systems Engineering and Design Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of systems engineering and design.

Secondary Field Option Electives

These courses enable the student to tailor the studies to one’s interests and career goals in both technical and nontechnical areas.

Selected from the departmentally approved list of IE Technical Electives (https://ise.illinois.edu/undergraduate/courses-curriculum.html)

SE 494 and SE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a liberal education elective.

Combination satisfies the General Education Advanced Composition requirement.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Design experience and project management are emphasized and

integrated across the core with a focus on establishing critical problem-

Electives from the campus General Education Humanities and the Arts list. 6

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. 6

Total Hours: 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the Systems Engineering and Design Technical Core) 4

Total Hours: 4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

Secondary Field Options

Secondary field options are of two types: preapproved and customized. Preapproved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by pre-approved fields. To do this, a suitable title and all the courses must be petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student’s goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

Preapproved Secondary Fields

Preapproved secondary fields are listed below. Approved courses for each are specified at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:

- CEE 202, IE 300, STAT 400
- CEE 201, IE 310
- MSE 406, CEE 300
- ECE 486, SE 320, ME 340

Students may petition to the department for inclusion of a course in the secondary fields listed below. The most likely classes to be accepted are non-permanent and experimental offerings relevant to the various fields. A current list of these may be found at the department's secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option).

- Automotive Engineering
- Bioengineering
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer Science
- Construction
- Control Systems
- Digital Prototyping
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Internet of Things (IOT)
- Manufacturing Engineering
- Nondestructive Testing and Evaluation
• Operations Research  
• Quality Control  
• Rehabilitation Engineering  
• Robotics  
• Theoretical and Applied Mechanics  

1 Students fulfilling the corresponding Campus Minor may simultaneously complete the requirements of this Systems Engineering and Design secondary field option.

Customized Secondary Fields
Customized secondary fields differ from preapproved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

The following list contains examples of over fifty titles of customized secondary field options which have been approved. The complete list may be found at the department’s secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). Additional titles beyond those listed may be proposed.

• A foreign language (several)  
• An engineering discipline (several)  
• Audio Engineering  
• Economics  
• Entrepreneurship  
• Finance  
• Fluid Dynamics  
• International Business  
• Mathematics  
• Pre-Law  
• Pre-Med  
• Renewable Energy

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Information listed in this catalog is current as of 07/2019
For the Degree of Bachelor of Science in Materials Science and Engineering

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to provide the underpinning knowledge for graduate study. Note: students interested in biomaterials take a specific set of courses to provide them with a background in biology and chemistry while maintaining a strong engineering focus.

A combined B.S.-M.S. Materials Science and Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 84) and the department’s website.

Focus Areas

The MatSE program provides a diverse set of courses enabling a plan of study designed around the interest of the student. The plan of study includes the core areas of materials science (ceramics, metals, polymers, electronic materials, and biomaterials), as well as emerging interdisciplinary topics (e.g., materials for energy, advanced processing and/or characterization methods, materials theory and computation). The biomaterials area requires a unique set of prerequisites and courses, and so has a distinct curriculum. Students are encouraged to take engineering, science, and business electives of interest to them and of relevance to their career goals. Highlights of the possible focus areas are:

- Advanced Processing and Characterization Methods: Introduces principles for designing and engineering materials structure, properties, and chemistry from atomic to macroscopic scales, This area also teaches fundamental and practical concepts necessary for determining materials structure and chemistry at different length scales. This area utilizes basic knowledge from physics and chemistry.
- Biomaterials: The science and engineering of materials for use in biological applications, particularly as related to human health. This area includes concepts in basic and intermediate chemistry and and basic and intermediate biology, with relatively less coverage of physics topics. It includes a subset of the standard junior year courses and requires additional chemistry and biology in the junior year.
• Composites: Studies the science and engineering of materials formed by combining multiple materials into a single material. Studies of composites make significant use of properties of materials and mathematical knowledge.

• Ceramics: Studies the science and engineering of ceramic materials, including alloy design, composites, synthesis, and processing methods. Ceramics makes significant use of concepts from both basic physics and basic chemistry.

• Electronic Materials: Describes the design and engineering of materials primarily for the microelectronics industries. Topics span the ceramics, metals, and polymers areas. Concepts from basic and intermediate physics are used along with basic chemistry.

• Metals: Introduces the design and processing of metals and alloys to achieve desired properties. This area primarily uses concepts from basic and intermediate physics with relatively less emphasis on chemical concepts.

• Polymers: Teaches the methods for molecular design to achieve desired properties in individual polymers, polymer blends, and polymer composites as well as processing methods. This area primarily uses concepts from basic and intermediate chemistry with relatively less emphasis on physics concepts.

• Materials for Energy and the Environment: Studies materials for energy production, harvesting, and storage; materials for environmental remediation, water purification, and recycling; and includes discussions on sustainability and life-cycle analysis of the environmental impact of materials. Materials issues related to both renewable and non-renewable energy production are covered. This area utilizes concepts from both physics and chemistry.

• Materials Theory and Computation: Introduces computational modeling approaches for materials that span length- and time-scales from the atomic to the macroscopic. This area focuses on computational prediction of material response to different stimuli (mechanical loads, temperature, electronic excitations, etc.) and fundamental material properties.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

<table>
<thead>
<tr>

Information listed in this catalog is current as of 07/2019
Electives either from a list approved by the college, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy two or more cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

**Composition**

These courses teach fundamentals of expository writing.

**Free Electives**

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

**Topical Lecture Courses**

The courses listed below have been approved by the department as topical lectures for all focus areas.
Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first two years of the Suggested Sequence is the same for all MatSE students. The third and fourth years vary with the Focus Area chosen. Refer to the appropriate third and fourth year sequence.

**For the Degree of Bachelor of Science in Engineering Mechanics**

Engineering mechanics is a discipline devoted to the solution of engineering and mechanics problems through integrated application of mathematical, scientific, and engineering principles. Special emphasis is placed on the physical principles underlying modern engineering design.

In this ABET-accredited program, students in engineering mechanics develop a strong foundation in mathematics, physics, and chemistry. The program derives its strength from a rigorous curriculum composed of statics, dynamics, solid mechanics, fluid mechanics, and mechanics of materials course. These topics form the basis of all engineering disciplines and have wide applicability in modern engineering. Special emphasis is placed on advanced dynamics, continuum mechanics, and the rapidly emerging field of computational mechanics. Laboratory experiments in fluid mechanics and mechanics of materials complement an integrated design sequence, which starts freshman year. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout the entire curriculum. Students also have the

**Total Hours:** 66

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. RHET 105 can be taken in the first or second semester as authorized. The alternative is a social sciences or humanities elective.

3. Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvice/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy two or more cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4. This course is highly recommended for freshmen, who may use it to help meet free elective requirements.

5. The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Area unless one of their biomaterials area topical lectures and one of their topical lectures outside the biomaterials area are deemed by the Accreditation Board for Engineering and Technology (ABET) to be an engineering course. The extra hour of credit for STAT 400 may be used to help meet free elective requirements.

6. **Satisfies the General Education Advanced Composition requirement.**
opportunity for independent, creative work in a one-on-one or small group environment under the supervision of a faculty member.

Students in engineering mechanics also benefit from a built-in area of specialization in one of seven secondary fields within mechanics, such as biomechanics, experimental mechanics, mechanics of materials and more. Alternatively, students may fashion their own area of specialization with departmental approval. At the end of the curriculum, students take the capstone senior design course where the knowledge and skills they have learned are applied to projects submitted to the department by corporate or faculty sponsors, preparing Engineering Mechanics students for their next leap into industry or graduate school.

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

**Orientation and Professional Development**

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

**Secondary Field Option Electives**

This component of the curriculum enables the student to specialize further by electing a secondary field, a coherent group of technical courses in mechanics and closely related subjects. The current secondary fields are:

- Biomechanics
- Computational Mechanics
- Engineering Science and Applied Mathematics
- Experimental Mechanics
- Fluid Mechanics
- Mechanics of Materials
- Solid Mechanics

Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for them are indicated on the Engineering Mechanics Secondary Field Webpage (https://mechanical.illinois.edu/undergraduate/bs-engineering-mechanics/#emtech). To add flexibility to the program and to accommodate particular interests, the student may petition to substitute appropriate courses, including 500-level courses if the student has the adequate preparation, for any of the secondary field elective courses. Without petition, a student may select any one course listed as required in one of the secondary field options to satisfy elective course credits in a chosen secondary field.

Total Hours 18

Students entering after the Spring 2018 semester must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western course and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Students entering prior to the Spring 2018 semester will need to complete requirements (i) and either (ii) or (iii). Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western and U.S. minority culture(s) lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

For the Degree of Bachelor of Science in Mechanical Engineering
Mechanical engineering is one of the most diverse engineering fields available, embracing many subfields and affecting all aspects of our lives. Mechanical engineers work on new machines, products, and processes that hold the promise of better lives for all of us. They are concerned with both technological and economic aspects in the design, development, and use of their products. Today, one of the challenges is to design efficient, low-cost machines and processes that use the fewest possible natural resources to improve the lives of people throughout the world.

In this ABET-accredited program, engineering design, communication, teamwork, and laboratory experiences are integrated throughout the curriculum from freshman to senior year. The technical portion of the mechanical engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student's first year is spent mastering the basics of science: math, chemistry, and physics. Building on this base, in the second year students begin to take fundamental engineering courses such as statics, dynamics, basic circuits and electronics, thermodynamics, and strength of materials. By the third year, students are taking specialized mechanical engineering courses in the subfields of fluid mechanics, heat transfer, dynamic systems and controls, materials, mechanical design, and manufacturing. Finally, during the senior year, students have the opportunity to both broaden and deepen their knowledge of the field through individually chosen technical elective courses. At the end of the curriculum, students take the capstone senior design course where the knowledge and skills they have learned are applied to projects submitted to the department by corporate or faculty sponsors, preparing Mechanical Engineering students for their next leap into industry or graduate school.

A combined B.S.-M.S. Mechanical Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 84).

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements?src=search).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Electives from the campus General Education Social and Behavioral Sciences list.

Electives from the campus General Education Humanities and the Arts list.

Electives either from a list approved by the college, or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Total Hours: 18

Students entering after the Spring 2018 semester must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western course and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Students entering prior to the Spring 2018 semester will need to complete requirements (i) and either (ii) or (iii). Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western, non-western and U.S. minority culture(s) lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.
Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

| Total Hours: | 128 |

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is ME 170.
3. Liberal education electives (<https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives?src=search>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirement.
4. Science elective(s) — 4 hours required. Choose from CHEM 104 + CHEM 105, MCB 150, or PHYS 213 + PHYS 214. If MCB 150 is taken, then MCB 151 is also recommended. Note that PHYS 213 and PHYS 214 will normally be taken in the fourth semester or later, since they have PHYS 211 and PHYS 212, respectively, as prerequisites, in addition to MATH 241.

For the Degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering

Nuclear, plasma, and radiological engineering is a branch of engineering that is concerned with the development and use of nuclear energy and radiation sources for a wide variety of applications in energy production, in materials processing and science, and for biomedical and industrial uses. Areas of interest include the continued safe and reliable application of fusion reactors as central power plant thermal sources; plasma processing applications and the longer term development of fusion reactors for electric power generation; and the use of radiation sources in such areas as materials, biological systems, medical treatment, radiation instrumentation, environmental systems, and activation analysis.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to digital computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in bioengineering. To complete this concentration area, students should take certain chemistry and biology courses in the first two years of the curriculum.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.
These courses teach fundamentals of expository writing.

Composition
These courses teach fundamentals of expository writing.

Professional Concentration Area Electives
The NPRE Professional Concentration Area requirement is fulfilled by taking certain required technical and some elective technical courses stressing the rigorous analysis and design principles practiced in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Professional Concentration Area Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Power, Safety, and the Environment

Plasma and Fusion Science and Engineering

- ECE 206 Electrical and Electronic Circuits Lab 1
- NPRE 446 Radiation Interact w/Matter I 3
- TAM 335 or ME 310 (or Professional Concentration Area elective in Radiological, Medical, and Instrumentation Applications) ³ 4

Liberal education elective ³ 3

Free elective 3

Semester Hours 17

**Second Semester**

- NPRE 421 (or Plasma and Fusion Science Professional Concentration Area elective in Radiological, Medical, and Instrumentation Applications) ³ 3

Liberal education elective ³ 3

Semester Hours 16

**Fourth Year**

**First Semester**
NPRE 431 Materials in Nuclear Engrg 3
NPRE 448 Nuclear Syst Engrg Design 4
Professional Concentration Area electives 6
Liberal education elective 3

Second Semester
NPRE 441 Radiation Protection 4
NPRE 458 Design in NPRE 4
Professional Concentration Area electives 6

Total Hours: 128

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2 RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a free elective.

3 Liberal education electives (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) must include 6 hours of social & behavioral sciences and 6 hours of humanities and the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

4 Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

5 Consideration should be given to NPRE 101 as a free elective in the spring semester of the freshman or sophomore year. Alternately, free elective hours provide a means to fulfill requirements for campus minors such as Bioengineering, Computer Science, International Minor in Engineering, Mathematics, or Physics, without excessive additional hours beyond the normal degree requirements.

6 Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. This facilitates the minor in Physics. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

7 A student must fulfill the NPRE Professional Concentration Area requirement (http://npre.illinois.edu/academics/undergraduate-program/technical-electives) by taking the required technical courses and technical elective courses in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

8 Students in the Power, Safety, and the Environment and in the Plasma and Fusion Science Engineering Professional Concentration Areas must take a fluid mechanics course (TAM 335 or ME 310) and NPRE 421. Students in the Radiological, Medical, and Instrumentation Applications Concentration are not required to take these courses. They may instead use the hours otherwise filled with these courses to take electives in the Radiological, Medical and Instrumentation Applications Areas.

For the Degree of Bachelor of Science in Engineering Physics
The Engineering Physics curriculum is a flexible program that combines a firm foundation in physics and mathematics with the freedom to choose from a diverse range of technical options. The curriculum is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.
A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Code Title Hours
ENG 100 Engineering Orientation 1 0
PHYS 110 Physics Careers 1 0
Total Hours 0

Total Hours: 3

1. Approved list of Mathematics Electives

Technical/Professional Option Electives
Students may select from a list of preapproved options or design a custom option, subject to departmental approval. The current preapproved options, requiring 12-22 credit hours of course work, are:

- Acoustical Physics
- Astrophysics
- Atmospheric Science
- Biophysics
- Business
- Computational Physics
- Computer Engineering
- Energy/Sustainability
- Materials Science
- Nuclear Physics
- Optical Physics
- Law
- Professional Physics
- Solid State Electronics
- Pre-Med
- Pre-Law

The course work is selected in consultation with the student's advisor to address an intellectually coherent body of knowledge.

Liberal Education
The liberal education courses (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Liberal+Education+Electives) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural...
studies requirements. Courses from the western, non-western, and U.S. Minority lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

**Composition**

These courses teach fundamentals of expository writing.

Minor in Bioengineering

http://bioengineering.illinois.edu

Bioengineering is a broad, interdisciplinary field that brings together engineering, biology, and medicine to create new techniques, devices, and understanding of living systems to improve the quality of human life. Its practice ranges from the fundamental study of the behavior of biological materials at the molecular level to the design of medical devices to help the disabled.

Any of the existing engineering programs can provide a good foundation for work in bioengineering. However, the engineering undergraduate needs additional education in the biologically oriented sciences to obtain a strong background for bioengineering. With such a background, the student should be able to progress rapidly on the graduate level in any branch of bioengineering. In industry, the graduate will be competent to handle engineering tasks related to biology.

For students pursuing the Bioengineering Minor from non-engineering backgrounds, please note that upper level electives may have engineering courses as prerequisites and these, and any subsequent prerequisite courses, are required for anyone taking the course.

Students may fulfill the requirements for a minor in bioengineering by completing the following course sequence. Engineering students who are proficient in biology may waive MCB 150 as a prerequisite for courses in this minor.

1 Courses to be selected from a list of departmentally approved list of 300- and 400-level Bioengineering Related Technical Electives (http://bioengineering.illinois.edu/undergraduate-minor/bioengineering-minor-engineering-students/related%20courses).

For more information regarding the Bioengineering minor, visit the Bioengineering minor Web site (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students), contact the Bioengineering Department Office (1270 Digital Computer Laboratory, 217-333-1867, bioengineering@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Computer Science

This minor is offered by the Department of Computer Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except Computer Science and Computer Engineering majors.

The foundation upper-level courses in computer programming and software and in theory of computation are required. Three elective 200- and 300-level courses provide some specialization and depth and breadth of study. Specific requirements are listed below. Note that some courses have other prerequisites.

Three courses, including at least one at the 400 level, chosen from a departmentally approved list.  

Total Hours: 20

1. The following substitutions are routinely allowed: ECE 220 for CS 125; MATH 213 for CS 173; and ECE 391 for CS 241.

2. Departmentally approved list (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor).

For more information regarding the CS minor, visit the CS minor Web site (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor), contact the Computer Science Academic Office (1210 Siebel Center, 217-333-4428, undergrad@cs.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Minor in Electrical and Computer Engineering**

Electrical and computer engineering transforms our day-to-day lives through a multitude of innovative technologies and products. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

Select one of the following options:  

A. Electrical Engineering Option

Core requirement: ECE 210 Analog Signal Processing

Advanced Core Electives: Two ECE courses chosen from an approved list.

B. Computing Engineering Option

Core Requirement: ECE 120 Introduction to Computing

ECE 220 Computer Systems & Programming

Advanced Core Electives: One ECE course chosen from an approved list.

**Elective ECE Courses to achieve a minimum of 18 hours of ECE course work.**

Total Hours: 21-23

1. If the student will be taking ECE 220 following ECE 120, this requirement will be waived.
2. ECE 313 or IE 300 or BIOE 310 or MATH 461 or MATH 463/STAT 400 or CEE 202 or CS/STAT 361
3. To complete the minor, both the Core and Advanced Core courses from Option “A” or “B,” must be completed.
4. Advanced Core Electives (EE): ECE 310, ECE 329, ECE 330, ECE 340, ECE 342/343
5. Advanced Core Electives (CE): ECE 385, ECE 391, ECE 411
6. Completion of the minor requires a minimum of 18 hours ECE course work. No additional hours are needed in this category if all courses taken to satisfy the previous requirements are ECE courses. Otherwise chose from any 300 and 400 level classes except ECE 316, 317, 396, 397, 496, 499.

For more information regarding the Electrical and Computer Engineering minor, visit the Electrical and Computer Engineering minor Web site (http://www.ece.illinois.edu/academics/ugrad/ece-minor.asp), contact the Electrical and Computer Engineering Undergraduate Programs Office (2120 ECE Building, 217-333-0716, ece-advisor@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**International Minor in Engineering**

Many College of Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation. The requirements are:

- Completion of all degree requirements in the student’s selected engineering discipline. Courses for the International Minor can be combined with degree requirements.
- Completion of foreign language studies in a language of the student’s choice of geographical area (proficiency level will vary with the geographical area selected) if applicable. Students completing a minor in Great Britain or Australian studies will NOT have to have completed a foreign language.
- Completion of a minimum of 21 hours of cultural and language studies related to the geographical area of concentration; 9 hours must be other than language credit and include at least one 300- or 400-level course. These courses can be used as campus and college general education requirements. Courses taken on campus for the minor must be taken for grade. Students completing Great Britain or Australian minor will complete their 21 hours of related coursework in the “other” non-language area.
- Completion of a minimum five-week approved residence in the chosen country or geographic area, whether it be for work or study.

The student will be expected to select a specific geographical area for concentration, which will be identified in the designation of the minor; for example International Minor-Latin American studies. Course work selected for the minor must be approved by the International Programs in Engineering Office; a list of suggested courses is available.

International Programs in Engineering sponsors academic year, semester, and summer programs that include language and cultural courses and satisfy the residency requirement. With sufficient foreign language background before entering engineering, a student will normally be able
to complete the degree and minor in four years. Those not having this background, or taking a year of study at a foreign institution, may take four and one-half to five years to complete their degrees.

For more information regarding the International Minor (IM), visit the International Minor website (http://engineering.illinois.edu/ipeng/opportunities/international-minor-in-engineering.html), contact the Engineering Study Abroad Office (210 Engineering Hall, (217)244-0054, ipeng@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, International Programs in Engineering Office, 210 Engineering Hall. To sign up for the minor students should follow the directions at the IM website.

### Minor in Materials Science and Engineering

Materials are the basis for all engineering and also are the basis for much of the research in various areas of science. The Minor in Materials Science and Engineering is designed to give students in other areas of engineering and science both a broad view of all materials as well as several courses in a particular area of materials, knowledge that will be of value whether the student pursues a career in industry, government, or academia.

The courses, listed below, have been selected to give an undergraduate student both a strong background in all types of materials as well as more detailed knowledge of a particular area of materials (e.g., ceramics, metals, polymers, electronic materials or biomaterials).

The following six courses are required:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Total Hours**: 18

$^1$ Other thermodynamics courses may be substituted upon petition.

$^2$ Approved List of Core Courses.

$^3$ Approved List for Area Introductory Courses, Senior Lab Courses, and Advanced Area Courses.

For more information regarding the Materials Science and Engineering minor, visit the Materials Science and Engineering minor Web site (http://matse.illinois.edu/academics/matse_minor.html), contact the MatSE Department Office (201 MSEB, 217-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

### Physics Minor

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

**Total Hours**: 21-25

For more information regarding the Physics minor, visit the Physics minor website (https://physics.illinois.edu/admissions/undergraduates/minor-in-physics.html), contact the Physics Undergraduate Programs Office (233 Loomis Laboratory of Physics, 217-333-4361, undergrad@physics.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

### Polymer Science and Engineering Minor

Polymer science and engineering is a broad, interdisciplinary field that brings together various aspects of chemistry, physics, and engineering for the understanding, development, and application of the materials science of polymers. Many of the existing engineering programs provide a good foundation for work in polymer science and engineering. However, the undergraduate student needs additional courses specifically dealing with the science and engineering of large molecules. With such a background, the student should be able to progress rapidly in industry or at the graduate level. In addition to those students specifically desiring a career in polymers, this minor also can be valuable to students interested in the development, design, and application of materials in general.

The courses listed below have been selected specifically to give an undergraduate student a strong background in polymer science and engineering. A minimum of eight courses is required, including 3 Core courses, one course each in thermodynamics, mechanical properties, and chemistry and two additional polymer-related courses, as listed below. Several of these the student would normally take to satisfy the requirements of the basic degree. The student should consult the Department of Materials Science and Engineering when formulating a plan of course work.

The following courses are required. Credit hours will exceed 25 if a Thermodynamics course-pair option is chosen.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

$^1$ Thermodynamics course-pair option is chosen.
TAM 251  Introductory Solid Mechanics  (Mechanical Properties)  3
CHEM 236  Fundamental Organic Chem I  (Chemistry)  4
Polymer-Related Course Work: two courses chosen from an approved list. 2  6
Total Hours  25-30

1 Thermodynamics approved list
2 Polymer approved list

For more information, visit the Polymer Science and Engineering minor website (http://www.matse.illinois.edu/academics/undergraduate/curriculum/polymer.html), contact the MatSE Department Office (201 MSEB, (217)-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Systems Engineering and Design
For the Degree of Bachelor of Science in Systems Engineering and Design
(formerly General Engineering)

Systems Engineering and Design (SED) is a comprehensive, interdisciplinary program emphasizing interactions between parts of a whole. It brings together basic sciences, engineering analysis, and engineering design. The curriculum offers flexibility through a Secondary Field Option, while providing a broad background in engineering as a whole and decision-making that supports overall design. Systems Engineers understand how to coordinate interacting parts of a whole and to evaluate engineering within economic and physical constraints.

Design experience and project management are emphasized and integrated across the core with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Overview of Curricular Requirements
The curriculum requires 128 hours for graduation and is organized as shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering’s Undergraduate Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Technical+GPA+Requirements).

Orientation and Professional Development
These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Secondary field option electives selected from departmentally approved lists or by petition to the department. See the Secondary Field Options section below.</td>
<td></td>
</tr>
</tbody>
</table>

Technical Electives
The design elective augments a student's knowledge in one or more subdisciplines of mechanics and structures, control systems, and decision-making that support a systems approach to engineering. The engineering science elective extends the knowledge of that area.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Hours 18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition
These courses teach fundamentals of expository writing.

Free Electives
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering Advising Website (https://wiki.cites.illinois.edu/wiki/display/ugadvise/Free+Electives?src=search), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

</tr>
</tbody>
</table>

Secondary Field Options
Secondary field options are of two types: preapproved and customized. Preapproved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by pre-approved fields. To do this, a suitable title and all the courses must be petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student's goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

Preapproved Secondary Fields
Preapproved secondary fields are listed below. Approved courses for each are specified at the department's secondary field website (http://mise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:

- CEE 202, IE 300, STAT 400
- CEE 201, IE 310
- MSE 406, CEE 300
- ECE 486, SE 320, ME 340

Students may petition to the department for inclusion of a course in the secondary fields listed below. The most likely classes to be accepted are non-permanent and experimental offerings relevant to the various fields. A current list of these may be found at the department's secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option).

- Automotive Engineering
- Bioengineering

• Business Systems Integration and Consulting
• Civil Engineering Structures
• Communications and Computer Systems
• Computer Science
• Construction
• Control Systems
• Digital Prototyping
• Engineering Administration
• Engineering Marketing
• Environmental Quality
• Internet of Things (IOT)
• Manufacturing Engineering
• Nondestructive Testing and Evaluation
• Operations Research
• Quality Control
• Rehabilitation Engineering
• Robotics
• Theoretical and Applied Mechanics

Students fulfilling the corresponding Campus Minor may simultaneously complete the requirements of this Systems Engineering and Design secondary field option.

Customized Secondary Fields
Customized secondary fields differ from preapproved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

The following list contains examples of over fifty titles of customized secondary field options which have been approved. The complete list may be found at the department's secondary field website (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option). Additional titles beyond those listed may be proposed.

• A foreign language (several)
• An engineering discipline (several)
• Audio Engineering
• Economics
• Entrepreneurship
• Finance
• Fluid Dynamics
• International Business
• Mathematics
• Pre-Law
• Pre-Med
• Renewable Energy

Suggested Sequence
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

## Minor in Technology and Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

<table>

</tr>
</tbody>
</table>

Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include...
Abbott, Anheuser-Busch InBev, BP, Boeing, Capital One, John Deere, and Motorola Solutions.

In addition to formal courses, the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development and career development workshops, business skills workshops (for example, professional branding, improvisation training, etiquette dinner, and golf etiquette), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student’s academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management website (http://www.techmgmt.uiuc.edu) or contact the Technology & Management Program Office (470K Wohlers Hall, (217) 244-5752, techmgmt@illinois.edu).

### Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE)

The Technology Entrepreneur Center offers studies leading to the Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE). The BS in ILEE degree is intended for College of Engineering students to better understand the innovative processes involved in identifying problems and creating, developing, and leading efforts to provide their engineering solutions. The curriculum is based on a sound disciplinary engineering technical core with additional aspects of problem identification and innovation, and complex multidisciplinary engineering project management and leadership.

Currently the BS in ILEE degree is only being offered as a dual degree for current College of Engineering Students.

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below.

**Orientation and Professional Development**

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

Total Hours: 128

¹ MATH 220 - Calculus may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
² RHET 105 should be taken in the first or second semester of the first year as authorized. The alternative is a social sciences or humanities elective.
³ Liberal education electives must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used to satisfy the cultural studies requirements.
⁴ to be chosen from approved list
The College of Fine and Applied Arts prepares men and women for professional work in architecture, art and design, dance, landscape architecture, music, theatre, and urban and regional planning. Freshmen and transfer students may apply for admission. In each curriculum specific basic courses, professional courses, and general education requirements must be completed in order to qualify for the specific baccalaureate degree offered.

Graduate degrees are offered in all areas of study through the Graduate College.

The College of Fine and Applied Arts offers introductory courses designed to increase aesthetic appreciation and development, and to portray the role of the arts in civilization for all students who are attending the University of Illinois at Urbana-Champaign. Participation in the many bands, choruses, and orchestras on campus, as well as private instruction on most instruments and in voice, is available to students in all colleges by audition.

To serve the total academic community and all citizens in the state of Illinois, the college features the arts in exhibitions, concerts, lectures, performances, demonstrations, and conferences. Many outstanding professionals and works in these fields are brought to the University campus. All departments in the College of Fine and Applied Arts reserve the right to retain, exhibit, and reproduce the works submitted by students for credit in any course.

In addition to the teaching divisions, the College of Fine and Applied Arts includes the Krannert Center for the Performing Arts, the Krannert Art Museum and Kinkead Pavilion, Japan House, the Smart Energy Design Assistance Center, and the Visual Resources Center.

**Special Facilities**

**Career Services Office**

The Career Services Office (https://faa.illinois.edu/current-students/career-services) in the College of Fine and Applied Arts recognizes the unique career needs of students in the visual and performing arts. The office provides presentations and individual appointments to help students explore all of their options. The office also serves as a resource for concerned parents.

**Krannert Art Museum and Kinkead Pavilion**

Krannert Art Museum (http://www.kam.uiuc.edu) is an accredited general art museum with eight permanent galleries, four temporary exhibition galleries, and an open virtual-reality lab. Its outstanding permanent collection places it among the top tier of university art museums in the nation. But the space is used as more than an art museum by students at the University of Illinois. Here they can gather to hear improvised music played by international artists, watch films, and participate in an open mic hip-hop cafe. Come and experience a space that allows for simultaneous interplay between more than one artistic form.

**Krannert Center for the Performing Arts**

The Krannert Center for the Performing Arts (http://www.krannertcenter.illinois.edu) is a remarkable four-theatre performing arts complex with spaces for instruction, rehearsal, and performance in theatre, opera, dance, and music. The Foellinger Great Hall, seating 2,200, is designed for large-scale musical events. The Tryon Festival Theatre, with 1,000 seats, is for opera, dance, and other musical stage productions. The Colwell Playhouse seats 700 and is the home of the Department of Theatre. The Studio Theatre, seating 150, is for experimental productions. An outdoor amphitheater, rehearsal rooms, offices, dressing rooms, technical shops, and underground parking on two levels for 650 cars complete this monumental facility.

**Japan House**

The study of Japanese culture began at the University of Illinois in 1900, with the arrival of the first Japanese student. Throughout the last century, the University's role as a leader in Japanese studies began to take form. A major theme of Japan House (http://japanhouse.art.illinois.edu/en) is peace. The focus of Japan House is its three tea rooms. The grounds also feature a Japanese tea garden, strolling garden, and Zen-style rock garden.

**SEDAC – Smart Energy Design Assistance Center**

The Smart Energy Design Assistance Center (http://smartenergy.illinois.edu/about-us.html) provides advice and analyses enabling private and public facilities in the State of Illinois to increase their economic viability through the efficient use of energy resources.

**University Music Performance Organizations**

The School of Music offers credit for all students enrolled in its many performance organizations. These organizations include ensembles in the nationally recognized Band Division: a Wind Symphony, two Symphonic Bands, three Concert Bands, Basketball Band, Brass Band, Clarinet Choir, and the world-famous Marching Illini. The Choral Division offers singers the opportunity to perform in the Oratorio Society, Black Chorus, Women's Chorus, University Chorus, Men's and Women's Glee Clubs, Concert Choir, and UI Chorale. The University Symphony and Illini Symphony, three jazz bands, gamelans and other ethnomusicology performance ensembles, and ensembles specializing in contemporary music, chamber music, and early music, among others, satisfy student interest both as performers and concertgoers.

A student in any college wishing to enroll in a performance organization should contact the Office of Academic Affairs, Room 3076 Music Building (phone: 217-244-2670) or the appropriate ensemble director to receive further information and arrange for an audition.

**Visual Resources Center**

The Visual Resources Center facilitates access to images and other visual formats, provides instruction on using a variety of educational software, works with users on image related research projects, and provides consultation related to digitization best practices. The digital collection is available via ARTstor. 35mm and lantern slide collections are available during business hours.

**Libraries**

Students in the college have at their disposal outstanding library resources. In addition to the University Library, one of this country's great university collections, there are specialized libraries serving the needs of specific fields. The Ricker Library of Architecture and Art contains more than 49,000 books (with almost 50,000 additional publications in the

Information listed in this catalog is current as of 07/2019
same fields located in the main University Library), 33,000 photographs, and 9,400 clippings.

The City Planning and Landscape Architecture Library houses about 20,000 volumes of current interest, while more than 110,000 additional related volumes in the Funk Library.

The Music and Performing Arts Library, located in the Music Building, contains more than 765,000 items. These include introductory, instructive, research, and reference materials including books, editions of music, recordings, manuscripts, microfilm, and other materials.

library.illinois.edu (http://library.illinois.edu)

Departments, Schools, and Curricula
The College of Fine and Applied Arts consists of the Departments of Dance, Landscape Architecture, Theatre, and Urban and Regional Planning; the Schools of Architecture, Art and Design, and Music. The specific functions of each department or school and the undergraduate curricula are described on the following pages. Consult the Undergraduate Handbook available on the college website for specific academic policies and procedures for students and faculty in the college.

Special Programs

Study Abroad
International study can be a life transforming experience. The college provides the opportunity for students to obtain campus credit for foreign study and/or travel for a summer session, one semester, or an academic year. Students in FAA have a range of opportunities for study abroad. They can pick from programs developed specifically for students in their major (e.g., senior year abroad in Barcelona for Architecture students) or from the many programs available through the Study Abroad Office (http://www.studyabroad.illinois.edu) which serves the entire university population.

Prior to departure students are required to submit a study plan for review by their advisor and the college. Students with approved study plans retain their status as UI students and may continue their student health insurance while abroad. Participation in an approved UI program also counts as time in residence at the University.

The Study Abroad Office also provides information on financial aid specifically for study away from campus. The office is located in the International Studies Building, 910 S. Fifth St., Champaign, IL.

Graduation Honors
The College honors superior students honors at graduation. To be eligible, students must have completed a minimum of four semesters of work and 65 hours of credit in residence at the Urbana-Champaign campus. More information on specifics may be found on the College website.

Dean’s List
Each semester students are recognized by the College for academic excellence through the Dean’s List. Eligible students must successfully complete at least 12 academic hours, taken for a letter grade (A through F), and earn a grade-point average that places them in the top 20 percent (approximately) of the College. Students who are registered with the Center for Wounded Veterans (CWV) or with Disability Resources and Educational Services (DRES) who are enrolled in less than 12 but a minimum of nine graded semester hours who are in the approximate top 20 percent are also eligible. Such students must sign a release with CWV or DRES indicating their consent for consideration for Dean’s List eligibility and have submitted that consent to their home unit’s academic affairs office no later than Reading Day in the semester in which they wish to be considered for Dean’s List. These consent forms are valid only for the semester in which they are issued, and students must submit by the deadline updated consent forms for each semester in which they wish to be considered for Dean’s List.

Students with grades that are incomplete or deferred are not considered for the Dean’s List until letter grades have been submitted for those courses. The GPA level necessary to be placed on the Dean’s List is revised annually and is posted on the College Web site.

James Scholar Honors Program
The James Scholars Program in the College of Fine and Applied Arts focuses on developing Socially Engaged Artists by offering a series of required courses that provide progressive experiences in community engagement. James Scholars have opportunities to develop research projects within the local communities, to apply for funding to support their research, and to participate in symposia presenting their research to the campus and the general public. Detailed information on admission and requirements are available on the College website.

Requirements

Admission
All incoming students hoping to enroll in the College of Fine and Applied Arts as undergraduates must first complete the application for admission available from the university’s Office of Undergraduate Admissions. Several programs within the college (majors in Art, Dance, Music and Theatre) require a portfolio, audition and/or interview as part of the admissions process. All application materials must be received before an admission decision can be made.

Graduation
Students who meet the general University requirements with reference to registration, residence, scholarship, fees, and general education requirements, and who maintain the minimum grade-point average required in their degree program, receive degrees appropriate to the curriculum completed. Refer to the specific unit and curricular requirements listed in the following sections. In addition, students must complete the required senior courses in their major field of study in residence at the Urbana-Champaign campus.

General Education
The Campus Senate, the faculty General Education Board, and the colleges have developed campus wide common general education requirements. Students are advised that some general education requirements may be fulfilled by courses required in the major. All FAA curricula require students to meet the minimum campus general education requirements for graduation. Some programs require additional general education courses. See the individual programs of study for each curriculum.

http://arch.illinois.edu

At Illinois, we are an internationally recognized leader in educating future professionals and scholars in architecture and allied fields. We provide a robust technical and conceptual program that enables students to create and innovate. The depth and breadth of our curriculum enables students to become leaders in a range of disciplinary specialties. Our comprehensive programs prepare students to design and research in a rapidly changing global context from the macro to the micro scale through our bachelors, masters, and doctoral degrees.

Degree Programs in Architecture

Contact: Carl Lewis, Undergraduate Student Services
School Office: 117 Temple Buell Hall, 611 Taft Drive, Champaign, IL 61820, (217) 333-7720, rfrank@illinois.edu

The School of Architecture offers a four-year pre-professional curriculum leading to the Bachelor of Science in Architectural Studies (BSAS) degree as well as a minor in Architectural Studies. The BS in Architectural Studies degree provides an undergraduate academic education in architecture that can serve as a foundation for advanced professional education. The undergraduate curriculum offers an appropriate balance of basic professional studies in architectural design, architectural history, practice and technology, structures, and studies in the arts and sciences.

The following statement is from the National Architectural Accrediting Board (NAAB):

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree."

The University of Illinois at Urbana-Champaign, College of Fine and Applied Arts, School of Architecture offers the following NAAB-accredited degree programs:

Master of Architecture (Pre-professional undergraduate degrees + 62 graduate credits)
Master of Architecture (Undergraduate degree + 65 prerequisite credit hours + 54 graduate credits)

Next accreditation visit for all programs: 2023

The NAAB Conditions for Accreditation (including Student Performance Criteria) may be found on the NAAB Web site (http://www.naab.org).

Since 1967, the School of Architecture operates a full academic-year study abroad program in Barcelona, Spain, which is open to qualified students on a priority basis. Course offerings parallel those available to students on the Urbana-Champaign campus but stress the European context.

Architectural Studies, BS

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted. For the Bachelor of Science in Architectural Studies degree, a total of 120 semester hours are required.

1. See current University of Illinois General Education requirements. (https://courses.illinois.edu/gened/DEFAULT/DEFAULT)

The General Education quantitative reasoning requirement I is satisfied by the required MATH 220 or MATH 221 course; the quantitative reasoning II requirement is satisfied by the MATH 231 or PHYS 101 course. Students considering a concentration in Building Structures or Structural Engineering should take MATH 231. The Advanced Composition requirement may be fulfilled by either a separate, approved Advanced Composition course or by an Advanced Composition course which also satisfies one of the general education distribution list requirements. If by the latter, electives would be taken to make up the credit deficiency.

General Education foreign language requirement 0-12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.

2. The Composition I requirement may be fulfilled by any of the following courses or course sequences (placement is determined by examination): ESL 111 and ESL 112; ESL 115; RHET 101, and RHET 102; or RHET 105; or CMN 111 and CMN 112.

3. For information about electives, see the Undergraduate Handbook at the FAA website (https://faa.illinois.edu). A maximum of nine hours may be taken as professional electives.

4. Architectural history: All students in the undergraduate program in architecture must fulfill the architectural history requirement: three courses in addition to ARCH 210. Select from: ARCH 222, ARCH 314, ARCH 402, ARCH 403, ARCH 407, ARCH 409, Section B (Barcelona only), ARCH 410, ARCH 411, ARCH 412, ARCH 413, ARCH 414, ARCH 415, ARCH 416, ARCH 417, or ARCH 418.

5. The UP 101 requirement can be fulfilled by substituting one of the following approved courses: ARCH 418, ARCH 468, GEOG 204, GEOG 210, and GEOG 483.

**Minor in Architectural Studies**

The minor in Architectural Studies allows non-architecture undergraduate students to gain an overview of architecture by taking a series of required courses in architecture. This is the only undergraduate minor offered by the School of Architecture.

**Course Requirements**

The architecture minor requires the successful completion of a minimum of 20 hours of architecture courses. Students entering the program with advanced credit for required courses must take courses from the Additional Courses list to attain the total hours needed for completion of the minor. All students in the minor must have at least 6 hours of 300- or 400-level courses.

Total Hours: 19-21

**Prerequisites**

Students must comply with the prerequisite requirements of courses to be taken under this program. Some of these requirements may be satisfied while in the program.

**Admission**

Admission to the minor will be processed by the School of Architecture Undergraduate Programs Office. Students may enter the Minor in Architectural Studies from sophomore year until such time that allows the completion of the minor before graduating in their major area of study.

**Advising**

Advising of students in the minor will be conducted by the advisors in the Undergraduate Programs Office of the School of Architecture.

**Certification of Successful Completion**

The Associate Dean for Undergraduate Academic Affairs in the College of Fine and Applied Arts (FAA) will certify successful completion of the minor.

Students must declare their intentions and be admitted to the program to pursue the Minor in Architectural Studies.

**Dance, Department of**

Jan Erkert
9071/2 W. Nevada Street
Urbana, IL 61801
PH: (217) 333-1010
dance@illinois.edu

The Department of Dance, a unit in the College of Fine and Applied Arts, offers a small, personalized program within the context of a large university setting. The resident faculty of eleven full-time members is augmented by part-time faculty and artists-in-residence. The teaching staff includes ten graduate teaching assistants who teach dance in the general education program. The department is an accredited institutional member of the National Association of Schools of Dance.

Program focus in the MFA and the BFA is on the professional preparation of performers, choreographers, and teachers with a breadth of understanding in the discipline. The choreographic and performance emphasis is in contemporary dance; ballet is included as an integral component of training. Classes in yoga, jazz, tap, and world dance forms are offered in the major curriculum. The field of dance science is addressed through courses in Bartenieff movement fundamentals, Laban movement analysis, dance kinesiology, and the Alexander Technique. Additional courses are taught in dance for the camera, dance technology, and other topics of current import. The BA in Dance has a broader, more interdisciplinary scope and is geared toward students who wish to explore careers related to dance and/or create interdisciplinary performance works.

The performance component of the department is housed in the Krannert Center for the Performing Arts, utilizing the exceptional performing, production, and teaching resources of this world-class facility. Additional studio and classroom facilities and the faculty and administrative offices are housed in two adjacent buildings in close proximity to the Krannert Center. Four department concerts per year are produced in the theatres of the Krannert Center, including two concerts of student choreography. The resident lecture-demonstration company performs in community schools, and additional performing opportunities are provided in concerts presented in the dance studio/theatre, in operas and music performances, in University and community musicals, and in regional and national college dance festivals.

**Bachelor of Arts in Dance**

The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study three core areas in Dance: Technique, Creative Process, and Dance Academics. Students will identify at least one other key area of interest such as Theater, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Major, Minor or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will create a BA Capstone Project in their senior year as a synthesis of the studies within dance and another area of study.

Students pursuing a Dance degree at the University of Illinois must be admitted to the BFA in Dance (audition required). Once admitted, those
desiring a broader education may choose to apply for admittance into the BA in Dance, rather than continuing in the BFA.

A total of 120 hours is required for this degree.

• Bachelor of Arts in Dance (p. 155)

Bachelor of Fine Arts in Dance

The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screen dance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required. Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

• Bachelor of Fine Arts in Dance (p. 156)

Common Requirements

In addition to the degree-specific requirements listed above, students in either the BA or the BFA in Dance are required to complete the courses in the table below.

---

1. DANC 160 and 260 must be taken for at least 4 hours each but are repeatable beyond 4 hours.
2. DANC 497, Senior Capstone Project, is a new course expected to be available by the start of the Fall, 2015 semester.
Landscape Architecture, Department of

William C. Sullivan, Head of Department
101 Temple Hoyne Buell Hall, 611 East Lorado Taft Drive, Champaign
PH: (217) 333-0176
http://landarch.illinois.edu
Email: ladep@illinois.edu (LADept@illinois.edu)

The Department of Landscape Architecture offers a four-plus-year undergraduate curriculum, leading to the professional degree of Bachelor of Landscape Architecture as well as a minor in Landscape Studies. The degree is accredited by the Landscape Architecture Accreditation Board (LAAB).

The curriculum is a balanced program of technical, design, and general education courses that prepare the student with the necessary skills for entry-level professional practice in private offices or public agencies. Program requirements include design studio courses and classes in construction, plants, history, and design communication. Following the third year, students complete a professional internship to further advance their knowledge of built landscapes and the practice of landscape architecture. The curriculum also includes a minimum of 12 hours of credit in supporting electives that are taken in related art and science courses. A total of 124 semester hours of credit is required for graduation.

Bachelor of Landscape Architecture

A student must have and maintain a minimum 2.00 cumulative grade point average.

University of Illinois transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.0 (A = 4.0). Transfer students from other institutions must have earned a GPA of at least 2.5 (A = 4.0). Prerequisite credits in composition and pre-calculus are required. Courses in physical geography and plant or environmental biology are highly recommended.

The department's administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The sophomore studio is located in Mumford Hall.

Landscape Studies Minor

The Minor in Landscape Studies enables students to gain considerable knowledge of the ecological, social, cultural and historical factors that have shaped landscapes of the western and non-western world. Students interested in integrative studies of the natural, cultural and built environment, and those concerned with landscape as context for art and design, will develop a comprehensive theoretical framework for work in their major field of study.

Course Requirements
A minimum of 17 credit hours from the following three categories is required for completion of the minor. A minimum of 6 hours at the 300-level is required.

Students are permitted to substitute one Landscape Architecture course from category 3 for one of the courses in category 2 upon the approval of the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Admission
University of Illinois students with a minimum GPA of 2.0 and completion of the campus Composition I and Quantitative Reasoning I requirements are eligible for admission. Applicants from other institutions must have a minimum GPA of 2.5. Students must declare their intentions and be admitted to the program by the Academic Affairs Coordinator in the Department of Landscape Architecture.

Prerequisites
Students must comply with any prerequisite requirements of courses to be taken under this program.

Advising
Advising of students in the minor will be conducted by the Academic Affairs Coordinator in the Department of Landscape Architecture.

Certification of Successful Completion
Completion of the Minor in Landscape Studies will be certified by the student’s home college office.

Music, School of
Professor Jeffrey Magee
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 244-2676
http://www.music.illinois.edu

2040 Music Building
1114 West Nevada Street
Urbana, IL 61801
(217) 333-2620

The School of Music occupies the Music Building, Smith Memorial Hall, Harding Band Building, Music Education Annex, and space in the Krannert Center for the Performing Arts. These facilities include faculty studios, classrooms, and practice and rehearsal rooms; experimental electronic music, computer music, digital piano, two computer-assisted music instruction laboratories, and jazz multimedia practice rooms; and musical instruments, audio equipment, and several auditoriums used for concert, recital, opera, and musical theatre performances. The Music and Performing Arts Library boasts comprehensive holdings in Theatre and Dance, as well as one of the largest collections of music items in America.

The faculty and students of the school present more than 1,000 concerts, recitals, and stage performances throughout the year, both on and off campus. In addition, visiting artists and scholars from throughout the world present master classes and lectures that complement the concert and academic offerings provided on the Urbana-Champaign campus. The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

The School offers four professional undergraduate degrees: the Bachelor of Music (BMUS), the Bachelor of Music Education (BME), the Bachelor of Science in Musical Arts in Lyric Theatre (BMA), and the Bachelor of Science in Computer Science and Music (CS+Music). Undergraduate students whose musical interests are in the broad historical, cultural, and theoretical aspects of music (rather than professional training) pursue the School of Music’s Bachelor of Arts in Music (BA) degree. Graduate degrees are offered in a variety of fields of study in music at the master’s and doctoral levels. The School also offers a post-Master’s Artist Diploma degree.

Students from all parts of campus perform in our bands, choirs, orchestras, jazz bands, new music ensembles, world music ensembles, lyric theatre (opera and musical theatre), and many other musical organizations. All of our ensembles are open by audition to both music and non-music majors, and some ensembles are open to members of the university and civic communities. Private lessons and courses in music history, world music, jazz history, theory, and music appreciation are open to all qualified students in the University. A minor in music for non-music majors is also available.

Admission to all School of Music degree programs is based on a composite review of both School of Music and University applications. For those degrees which require an audition, on-campus auditions are preferred, but digital auditions are acceptable under certain circumstances. In addition, applicants for music composition, music technology, and musicology majors must submit music portfolios or other pertinent writings or projects to substantiate their ability to pursue work in these areas. Applicants in music education, composition, musicology, open studies, lyric theatre, CS+Music, and the Bachelor of Arts in Music must also complete an interview with faculty in those respective areas.

For complete information concerning audition schedules, special admission requirements, and curricula (including a minor in music), prospective students should visit the School’s web site (http://www.music.illinois.edu) or contact the Music Admissions Office, School of Music, 1114 West Nevada Street, Room 1014, Urbana IL 61801. Phone: (217) 244-7899 | Email: musicadmissions@illinois.edu.

Bachelor of Music Education (p. 168) (BME)
Bachelor of Musical Arts in Lyric Theatre (p. 171) (BMA)
Bachelor of Science in Computer Science + Music (p. 173) (CS + Music)
Bachelor of Arts with a Major in Music (p. 160) (BA)

Bachelor of Music (BMUS) – specific Majors:
- BMUS-Instrumental Performance Music (p. 161)
- BMUS-Vocal Performance (p. 167)
- BMUS-Jazz Performance (p. 162)
- BMUS-Composition/Theory (p. 163)
- BMUS-Musicology (p. 165)
- BMUS-Open Studies (p. 166)

Curricula for the Degree of Bachelor of Music
This degree requires a minimum of 130 semester hours of credit for graduation.
Public performance is an integral part of the training in applied music, and all students, when sufficiently prepared, are required to participate in student recitals.

All students pursuing this degree are required to successfully complete at least one course in conducting (normally MUS 242) and must demonstrate keyboard competency by examination at the outset of their matriculation, or by enrolling in MUS 172 and/or MUS 173; keyboard performance majors must demonstrate competency by successfully completing MUS 454.

Foreign language study may be required according to the major chosen, experience in or study of languages prior to matriculation, and/or the results of language placement tests at the University.

For a semester-by-semester sequential listing of classes a student might take during a four-year course of study, please consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate).

Students majoring in music should meet with their adviser at least once per semester and consult the Undergraduate Music Handbook (http://publish.illinois.edu/musicresources/academic-handbooks-undergraduate), for clarification and explanations concerning the Bachelor of Music majors.

Common Requirements for all Bachelor of Music Degrees

Students in the School of Music must complete the Campus General Education requirements. Some Music courses apply toward the General Education requirements.

### Bachelor of Arts with a Major in Music

The Bachelor of Arts with a Major in Music is a 120-hour degree that is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students to select a specific area of study, called an "option." Current options include music technology, music theory, composition, and various branches of musicology; or students may work with an advisor to explore alternate options not listed here (music "*+`). BA students work with their BA advisor to designate supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study (option) during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2. Woodwind and percussion majors complete 32 hours; string majors complete 26 hours; brass and voice majors complete 24 hours; jazz, musicology, and composition-theory majors complete 16 hours; and open studies majors complete a minimum of 12 hours.
3. Students majoring in instrumental or vocal performance are required to study a minor instrument or voice for a minimum of eight semester hours. Piano majors are required to complete only six hours of minor applied music.
4. All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. Jazz Performance majors must enroll in MUS 266.
5. Music Majors must demonstrate keyboard competency by examination at the outset of their matriculation or by enrolling in MUS 172 and MUS 173. Keyboard performance majors demonstrate keyboard competency by successfully completing MUS 454

- • Minor in Music (p. 164)
- • Minor in Musical Theatre (p. 165)
should designate their option by no later than the start of the spring semester of the sophomore year.

Minimum required major and supporting coursework normally equates to 48-50 hours excluding the keyboard skills (MUS 172 and MUS 173) requirement, and includes 37-41 hours in music courses, 29-31 hours in core courses. Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music. Credits earned in applied music lessons are generally considered elective.

Students must complete the following core music courses and and select an area of study, called an "option." An option consists of advanced music courses and supporting (non-Music) coursework. The coursework is determined in consultation with the student's advisor.

</table>

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.

3. A Major Plan of Study Form must be completed and submitted to the School of Music Undergraduate Academic Advisor (Music Building 2058) before the end of the fifth semester (60-75 hours). Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus. Please see your BA Music advisor, or the Undergraduate Academic Advisor, for assistance in completing the form.

4. Advanced music courses are at the 300- or 400-level. The Senior Project is generally included in this area.

5. Supporting Coursework is outside the School of Music and is chosen in consultation with an advisor.

For admission requirements for the Bachelor of Arts in Music, please see the School of Music's Admissions website (http://www.music.illinois.edu/prospective-students) or contact the Music Admissions Office:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801
Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

**Instrumental Performance Major**

http://www.music.illinois.edu

Students may major in piano, organ, harpsichord, violin, viola, violoncello, double bass, harp, flute, oboe, bassoon, clarinet, saxophone, trumpet, horn, euphonium, trombone, tuba, or percussion.

A student enrolled in this major normally takes two applied subjects, one a major (24-32 semester hours in the same applied area) and the other a minor (8 semester hours in the same applied area). Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Instrumental Performance Major within the Bachelor of Music degree.

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2. String majors will register for four semester hours of applied music in the first year; thereafter, string majors will register for three semester hours of applied music and one semester hour of MUS 267 in the second, third, and fourth years. Brass majors will register for three semesters hours of applied music and one semester hour of MUS 267 each semester for all four years. All other instrumental majors register for four semester hours of applied music each semester.

3. Concurrent registration in MUS 250 is required for all students who register for any of MUS 183-MUS 186 and MUS 483-MUS 486.

4. Keyboard majors are required to complete only 6 hours of minor applied music.

5. All music majors are required to participate in an approved ensemble every semester in residence. All string majors must audition for the orchestras at the beginning of each fall. For a complete list of approved ensembles, please refer to the Undergraduate Music Handbook.

6. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. Keyboard performance majors demonstrate keyboard competency by successfully completing MUS 454.

### Jazz Performance Major

http://www.music.illinois.edu

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, guitar, or voice as the major instrument. Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242.

- **MUS 436**: Jazz Aural Skills II

### Electives as needed to total 130 hours

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2. Of the eight semesters of applied music, two semesters (4 hours) must be in classical applied study.
3. All music majors are required to enroll in at least one approved performance ensemble each semester in residence. Jazz Performance majors register for at least one Jazz ensemble each semester. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.
4. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. For students with no keyboard skills, MUS 172 and MUS 173 taken in the first year, followed by Jazz Keyboard I and II in the second year will satisfy the secondary applied instrument requirement. For students whose principal instrument is piano, a secondary instrument or jazz voice may be chosen as a substitute for MUS 172, MUS 173 and Jazz Keyboard I and II, in consultation with the advisor.
5. MUS 436 now replaces MUS 499 (Proseminar in Music).

## Music Composition-Theory Major

http://www.music.illinois.edu

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

### Minor in Music

The School of Music offers non-music majors an exposure to music through courses in musicology and ethnomusicology, music theory, music composition, music technology, jazz history and studies, and performance studies (through applied lessons and ensemble). The Music Minor is intended for student musicians with previously established, fundamental musical experiences - individuals who wish to expand upon already obtained musical skills and related study - and is not intended to be an introduction to music.

#### Admission to the Music Minor
Prospective Music Minors must apply for acceptance into the program. For more information, please see https://my.faa.illinois.edu/gradstat/login.asp, or contact the Music Admissions Office (musicadmissions@illinois.edu) in Music Building Room 2018 for general instructions on how to apply for the minor.

#### Course Requirements
The Music Minor requires the successful completion of 21 semester hours of courses in music according to the following distribution:

1. Six to eight (6-8) credit hours in music core coursework, including either four (4) credits in Music Theory and Practice I and II (MUS 101 and MUS 102) or six (6) credits in Rudiments of Music Theory I and II (MUS 103 and MUS 104), plus two (2) credits in Introduction to Art Music (MUS 110);
2. At least six credit hours must derive from upper division or advanced music courses. This includes MUS 313 and MUS 314 (which also serve as General Education courses), or any other MUS 300-or 400-level music course with instructor approval;
3. Additional music elective credit hours may include private lessons (applied lessons) pending successful completion of an audition with the appropriate music professor and availability of teaching staff;
4. Up to three (3) credit hours of ensembles may be used for electives and can be selected from MUS 250, MUS 252-MUS 257, MUS 260-MUS 272;
5. Topics offered under MUS 199 or MUS 499 must be approved for credit toward by the music minor advisor.

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>21</td>
</tr>
</tbody>
</table>

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2. All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.

3. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.

4. The music theory electives for the third and fourth years are to be chosen from MUS 404 (may be repeated to a maximum of six semester hours), MUS 405, MUS 407, MUS 408 (may be repeated to a maximum of six semester hours in addition to MUS 408, sections D or E), MUS 409, and MUS 499 (may be repeated to a maximum of four semester hours; senior standing in music required). If the curricular emphasis is in music theory, the following will apply: juniors will substitute an additional three semester hours of MUS 408 for MUS 406; seniors will take MUS 299 (two semesters), MUS 405, and substitute an additional 400-level music history course for MUS 406. Note: The 14 hours of theory electives include the six hours of two courses that were retired in Fall 2017: MUS 402 and MUS 425.

5. Students who completed two years of French, German, or Italian in high school have met this requirement. Other languages may be chosen with permission of the composition-theory adviser. Completion of this requirement does not complete the General Education language requirement.
Minor in Musical Theatre

The Musical Theatre Minor is intended for students in the performing arts who are majoring in either dance or the acting concentration of the theatre major in the College of Fine and Applied Arts. These are individuals who wish to expand upon their performance skills in a related study, which has an emphasis in Musical Theatre. This minor is not intended for students outside the College of Fine and Applied Arts.

Prerequisites for the Minor in Musical Theatre:
1. MUS 103, Rudiments of Music Theory I
2. MUS 222, Singing in Musical Theatre
3. THEA 170, Fundamentals of Acting (dance majors only)
4. DANC 101, Modern Dance I (acting majors only)
5. DANC 107, Ballet I (acting majors only)

Admission Requirements
1. Applicants must be dance or acting majors who have completed at least 30 credit hours prior to the January application period to become eligible for admission review.
2. Applicants must complete all prerequisite courses prior to the January application period to become eligible for admission review and must have Academic Good Standing status (2.0 cumulative GPA or higher), plus have a cumulative 2.5 GPA or higher in prerequisite courses.
3. Formal application is made through the School of Music Admissions Office in the Music Building. Email: musicadmissions@illinois.edu.
4. Applications are reviewed in February, and successful applicants are invited to audition for the Lyric Theatre faculty. Final decision of all applicants is made by the end of March.
5. Only those students officially admitted into the Musical Theatre Minor Program by the School of Music may earn the Musical Theatre Minor.

Course Requirements
The Musical Theatre Minor requires the successful completion of 21 semester hours for Dance majors and 22 semester hours for Acting concentration in Theatre majors according to the following distribution.

Musicology Major
http://www.music.illinois.edu

This major offers a broad cultural education that unites academic and musical training. It also provides preparation for the graduate study required for research and teaching in musicology or ethnomusicology.

Students must complete a fourth-level college foreign language course or its equivalent for graduation. French, German, or Italian are strongly encouraged.

The fourth-year student, working with an adviser, must complete a satisfactory thesis (MUS 299) as part of the requirements for the Musicology Major Bachelor of Music Degree.

Foreign language 6 8
Electives as needed to total 130 hours 1

1 Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2 Students enroll in applied music in the same instrument or in voice each semester. It is strongly recommended that students in this major acquire a thorough practical knowledge of the piano beyond basic keyboard competency as part of the applied music study.

3 All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.

4 All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.

5 May not be used to satisfy general education requirements.

6 Students must complete the equivalent of a fourth-level college foreign language course or demonstrate fourth-level proficiency for graduation. French, German, or Italian is strongly encouraged.

Open Studies

The Open Studies major allows students to focus on diverse fields such as music of other cultures, piano pedagogy, music technology, sound engineering, theatre, social or behavioral science, or any other areas of particular interest. Open Studies requires completion of the common requirements for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2. All music majors are required to enroll in at least one approved performance ensemble each semester in residence. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.
3. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.
4. Students submit an Open Studies Plan of Study in consultation with their advisor.
5. Music electives to be chosen from 100-, 200-, 300- and 400-level courses.
6. Professional Electives are normally reserved for courses outside the School of Music. However, depending on the student’s interest, and with advisor consultation, part or all of these electives may come from the School of Music.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the associate dean of the College of Fine and Applied Arts. Additional information may be obtained from:

## Vocal Performance, BMUS

Professor Jeffrey Magee, Head of the Department
2040 Music Building, 1114 West Nevada, Urbana
PH: (217) 244-2676
http://www.music.illinois.edu

The primary applied subject in this major includes both private lessons in voice and classes in vocal diction.

At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

http://www.music.illinois.edu

For the Degree of Bachelor of Music Education

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte-s.education.illinois.edu/dotnet/webpages/webpage.aspx). Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) GPA of 2.75, and professional education course GPA of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

Illinois state law requires passing the Illinois Certification Test System Test of Academic Proficiency (TAP), or submit a composite ACT+Writing score of 22 (plus a combined English/Writing score of at least 19 for tests prior to September 2015; or ACT writing score of at least 16 for tests taken September 2016 or after), or a composite SAT (mathematics and critical reading) score of 1030 (SAT Writing score of at least 450) before student teaching. All music education students must earn a grade of C- or better in all music and education courses required for licensure.

Bachelor of Musical Arts in Lyric Theatre

The Bachelor of Musical Arts with a major in Lyric Theatre is an interdisciplinary degree designed for the singer-actor, which incorporates training in dance and theatre in addition to music. This degree requires students to choose one of two Concentrations: Performance (performer) or Creative (director, choreographer, dramaturg, set designer, composer).

The BMA Lyric Theatre curriculum is formed around courses in music, dance, and theatre. Advanced coursework includes a senior project. This degree requires a minimum of 129 semester hours of credit for graduation.

For admission requirements for the Bachelor of Musical Arts, please see the School of Music’s Admissions website or contact the Music Admissions Office:

Bachelor of Musical Arts in Lyric Theatre Concentrations

In addition to the Music and Lyric Theatre core areas, students choose one of two Concentrations (Creative or Performance). Courses will be determined in consultation with and approval of their advisor. Students must complete a minimum of 12 hours of coursework in their area of concentration.

Performance Concentration (p. 172)
Creative Concentration (p. 172)

Bachelor of Musical Arts in Lyric Theatre, Creative Concentration

In addition to the Music and Lyric Theatre core areas, students who choose the Creative Concentration must also complete a minimum of twelve (12) hours of coursework within the concentration. Students may choose a combination of the below courses in consultation with and approval of their advisor. At least six (6) hours must be taken from the first three (3) courses which deal with the performance of original work. With the other courses, similar type classes may be substituted with the approval of the Lyric Theatre faculty.

**Bachelor of Science in Computer Science and Music (CS + Music)**

Professor Jeffrey Magee, Director
School of Music
2040 Music Building
1114 West Nevada, Urbana

PH: (217)244-6449
http://music.illinois.edu

The Bachelor of Science in Computer Science and Music (CS + Music) is designed for students who plan to pursue a career in music technology, as well as students who want to push the state-of-the-art in music composition and explore new avenues of expression. This degree will prepare students for advanced study at the graduate level for many existing programs in music and audio technology, as well as equip them with the proper skills to successfully join and lead a vibrant workforce centered around the creation and distribution of entertainment media through constantly evolving technological platforms.

The CS + Music curriculum provides a broad knowledge of the theory, design, and application of computer systems integrated with the theory, history, and application of music. The curriculum is formed around courses in music, mathematics, science, and computation. Advanced coursework includes either a senior thesis or a senior project. A minimum of 120 hours is required for graduation.

For admission requirements for the Bachelor of Science in CS + Music, please see the School of Music’s Admissions website or contact the Music Admissions Office:

Art and Design, School of

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission.

Crafts, BFA

Alan Mette
143 Art and Design Building, 408 East Peabody
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in Crafts consists of a concentration in Metal. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
140 Art and Design Building, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

¹ Drawing courses include: ARTF 102 Observational Drawing; ARTF 104 Expressive Drawing; ARTF 106 Visualization Drawing.

² 2D Category courses include: ARTD 151 Introduction to Graphic Design; ARTD 160 The Image World; ARTS 205 Introduction to Printmaking; ARTS 251 Beginning Painting.

³ 3D Category courses include: ARTD 101 Introduction to Industrial Design; ARTS 201 Crafts Design; Arts 280 Beginning Sculpture.

⁴ 4D Category courses include: ARTS 241 Image Practice; ARTS 243 Time Arts I; Arts 244 Interaction I.

## Art Education, BFA

Alan Mette

143 Art and Design Building, 408 East Peabody, Champaign

PH: (217) 333-0855

http://art.illinois.edu

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/programs).

State law mandates passing one of the Illinois-approved basic skills tests prior to student teaching. The Illinois State Board of Education approved basic skills testing options include the ACT Plus Writing/SAT or the Test of Academic Proficiency. In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Contact: Mark Avery

Coordinator of Undergraduate Academic Affairs
School Office: 140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

First Year Curricula for All Art and Design Majors

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. All major’s first-year experience will include courses in drawing, 2D, 3D, and 4D practices. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission to the School of Art and Design.

5 4D Category courses include: ARTS 241 Image Practice; ARTS 243 Time Arts I; ARTS 244 Interaction I.
Students are assigned to a Composition I course (RHET or ESL) for either fall or spring semester. Students will take a general education elective during the semester they are not taking their Composition I course.

History of Art, BFA

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in the history of art requires 122 credit hours and offers a broad cultural education that unites academic and studio training. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

To be eligible for distinction, a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for further details.

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
School Office: 140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

Students must complete a fourth-level college foreign language course or its equivalent for graduation with a B.F.A. in Art History.

Graphic Design, BFA

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, advanced interaction design, and the design of Ninth Letter (http://www.ninthletter.com), a nationally-distributed and award-winning literary arts journal.

Alan Mette  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://art.illinois.edu

The curriculum in industrial design requires 122 credit hours and provides education in the design of products for mass production to meet the needs of people and their environment. Emphasis is placed on the awareness of the market demand for design, experience in the problem solving process and methods and materials of production and their relative costs, creation of designs that are in visual harmony with their environment and that are satisfying to the consumer, and responsiveness to the changes in technology and cultural patterns.

Minor in Art and Design

Alan Mette  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://art.illinois.edu

The Art and Design Minor provides students with the opportunity to integrate creative art and design practices with other academic or research pursuits. Students selecting the Art and Design Minor do not necessarily wish to pursue a career as a practicing artist or designer, but do want the chance to work creatively in the visual arts and design, and develop related skills. Students can choose to focus on one particular art form (e.g., photography) or a variety of different media (e.g., photography, typography, and ceramics).

Applicants for admission to the Minor in Art+Design should submit a personal essay explaining their interest in art and design to the Minor Advisor. A minimum cumulative GPA of 2.00 is required.

Contact: Guen Montgomery  
Art and Design Minor Advisor  
129 Art and Design Building, 333-0855, montgo@illinois.edu

Minor in Community-Based Art Education

Alan Mette  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://art.illinois.edu

The Community-Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings. In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

**New Media, BFA**

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in New Media requires 122 credit hours. Students are trained in the production and critique of works for art or design that explore forms and technologies identified as new or emerging. Students receive instruction in technical execution, formal composition, historical precedents and theoretical framing. Advanced course work produces both assigned and self-directed projects that utilize time-based, interactive, physically networked and performative media, and address emerging practices in art and design.

Contact: Mark Avery
Coordinator of Undergraduate Academic Affairs
School Office: 140 Art and Design Building, Champaign, 333-6632, mavery@illinois.edu

Students in the School of Art and Design must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT) requirements. Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT).

A portfolio review is required for admission to the School of Art and Design.

2. 2D Category courses include: ARTD 151 Introduction to Graphic Design; ARTH 160 The Image World; ARTS 205 Introduction to Printmaking; ARTS 251 Beginning Painting.
3. 3D Category courses include: ARTD 101 Introduction to Industrial Design; ARTS 201 Crafts Design; Arts 280 Beginning Sculpture.

**Painting, BFA**

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in painting requires 122 credit hours and provides extensive training in preparation for professional practice as an artist. The first two years are devoted primarily to the study of design, composition, and acquisition of both representational and abstract drawing skills as well as the development of painting skills and techniques in a variety of traditional and alternative painting media. The last two years are devoted to the development of individual creative expression in painting and other media.

When followed by a program leading to a degree of Master of Fine Arts in Painting, this curriculum is recommended as preparation for a career as an artist and as a teacher of painting and drawing and related subjects at the college level.

Photography, BFA

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in photography requires 122 credit hours; its purpose is to encourage the study of photographic media for personal expression, to explore the social implications of pictures, and to develop the skills needed for careers in photography. General art requirements and electives provide a broad foundation in the visual arts, and photography courses provide a strong background in the history, theory, and practice of photography as art.

Sculpture, BFA

Alan Mette
143 Art and Design Building, 408 East Peabody, Champaign
PH: (217) 333-0855
http://art.illinois.edu

The curriculum in sculpture requires 122 credit hours and provides a broad experience of 2D, 3D, and 4D methods as applicable to the making of sculptural forms. Installation and other modes of object-based arts practice, including the use of traditional and contemporary methods and concepts, are explored. Through independent and immersive studio practice, students are encouraged to experience a wide range of materials, techniques, methods, and styles.

Studio Art

Bachelor of Arts in Studio Art

The Bachelor of Arts in Studio Art (with concentrations) focuses on the study of art, design, and art history in the context of a broader program of general study offered by the diverse research and teaching activities across the University of Illinois, Urbana/Champaign campus. It differs from the Bachelor of Fine Arts in that it offers students rigorous
education in studio art while permitting them time to pursue studies in other areas, with a significant part of the educational experience occurring in areas outside the studio. Students choose from courses that will lead to concentrations in Drawing, Painting, Sculpture, Printmaking, New Media, or (general) Studio Art. These options permit students to experience a broad range of media practices or to focus on media-specific credits. Concentrations will be noted on the student’s degree, indicating a level of expertise in a particular sub-discipline that will be useful in the pursuit of advanced study or in employment opportunities where particular material skills are needed.

Foundation courses for the BA in Studio Art introduce basic materials and conceptual approaches to making art, using traditional media including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications. By incorporating new and traditional strategies and technologies students will understand visual organization and communication in 2D (artworks in two dimensions, such as drawing, painting or printmaking), 3D (artworks in three dimensions, such as sculpture and installation), and 4D (artworks of a time-based nature, such as, video and performance art).

The advanced BA Studio Art student can look forward to a changing menu of courses on a variety of topics, taught by a diverse faculty with expertise in a wide variety of conceptual, material and technical strategies for making art. The BA Studio Art’s curriculum offerings are designed to reflect an increasingly dynamic culture and provide students with experiences and skills that promote adaptability after graduation.

BA Studio Art students are provided with individual studio spaces housed in a communal studio building, where they pursue a self-selected studio practice. The communal studio configuration provides the geography for a strong, vibrant community of student-artists working together as they establish their focus and participate in exhibitions, performances, and critiques.

**Bachelor of Fine Arts in Studio Art**

The Bachelor of Fine Arts in Studio Art at the University of Illinois offers students unprecedented flexibility in determining their own courses and topics of study while engaging in a diverse, innovative, research-oriented curriculum. In response to a rapidly changing world in which artists and designers are constantly presented with new tools, platforms, topics, strategies and venues for exhibition, publication, performance and other types of cultural work, the BFA in Studio Art prepares students for the workplaces of the future. This degree is designed to equip graduates with the skills necessary to not only create artwork, but to communicate, think critically and creatively, and gain experience in a broad range of topics that will prepare them as innovative artists and as global citizens. Students will navigate a dynamic curriculum that is responsive to current trends in art, culture and creativity. It encourages new, interdisciplinary initiatives and fosters collaboration and research at the undergraduate level within the context of a premier research university.

Foundation courses for the BFA in Studio Art introduce basic material and conceptual approaches to art-making, using media from traditional disciplines including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications. By incorporating new and traditional strategies and technologies students will understand visual organization and communication in 2D (artworks in two dimensions, such as drawing, painting or printmaking), 3D (artworks in three dimensions, such as sculpture and installation), and 4D (artworks of a time-based nature, such as, video and performance art).

At the intermediate and advanced levels, curriculum offerings are designed to reflect an increasingly dynamic culture, and to provide students with experiences and skills that will enhance their adaptability. A changing menu of courses on a variety of topics is taught by a faculty with expertise in a wide variety of conceptual, material and technical strategies for making art. BFA Studio Art students are provided individual studio spaces, where they develop a self-directed practice, housed in a communal studio building. The studio configuration provides the stage for a strong, vibrant community of student-artists working together as they establish their interests and participate in exhibitions, performances, and critiques. The Bachelor of Fine Arts experience culminates in two capstone courses, in which students will determine a unique project developed from their entire educational experience. From these courses, the BFA Studio Art student will develop a thesis paper to document and create a narrative of their research activities and artistic projects as well as demonstrate their ability to clearly articulate the themes, concepts and position of their work in the context of the contemporary art world.

A finished portfolio of visual work will demonstrate their material, formal, technical and expressive abilities.

BFA Studio Art graduates will enter professional lives as artists at a time when the boundaries between art and other fields are vanishing. Creative individuals with broad and versatile material, technical and intellectual skills will be in demand within expanding diverse practices that comprise contemporary art and society.

- Bachelor of Arts in Studio Art (p. 183)
- Bachelor of Fine Arts in Studio Art (p. 184)

**Studio Art, BASA**

The Bachelor of Arts in Studio Art (with concentrations) focuses on the study of art, design, and art history in the context of a broader program of general study offered by the diverse research and teaching activities across the University of Illinois, Urbana/Champaign campus. It differs from the Bachelor of Fine Arts in that it offers students rigorous education in studio art while permitting them time to pursue studies in other areas, with a significant part of the educational experience occurring in areas outside the studio. Students choose from courses that will lead to concentrations in Drawing, Painting, Sculpture, Printmaking, New Media, or (general) Studio Art. These options permit students to experience a broad range of media practices or to focus on media-specific credits. Concentrations will be noted on the student’s degree, indicating a level of expertise in a particular sub-discipline that will be useful in the pursuit of advanced study or in employment opportunities where particular material skills are needed.

Foundation courses for the BA in Studio Art introduce basic materials and conceptual approaches to making art, using traditional media including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications. ### Art and Design, School of

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. All major's first-year experience will include courses in drawing, 2D, 3D, and 4D practices. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required for admission.

Information listed in this catalog is current as of 07/2019
Art History Requirements, three credits used for gen ed credit | 12
BFA Capstone requirements | 7
Concentration Requirements | 27
General Education Requirements, three hours of art history also count as gen ed credit | 40
Language Requirement | 
Electives to bring the total hours earned to 122, including a minimum of 40 credits at the 300- or 400-level. | 19

Total Hours | 122

1 See Concentrations tab for requirements for individual concentrations.
2 The Language Requirement may be satisfied by:
   • Successfully completing a third-semester college-level course in a language other than English;
   • Successful completion, in high school, of the third year of a language other than English; or
   • Demonstrating proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

If you enter UIUC without three years of language other than English in high school, you must take a language placement test to determine the courses in which you should enroll. A current list of courses approved to satisfy the language requirement is available here (http://fms.registrar.illinois.edu/Report?file=CatalogInformation%5CLanguage%20Reqs%5CCourses_Approved_Language_Requirements.xml).

Theatre, Department of

Kirsten Pullen
4-122 Krannert Center for the Performing Arts, 500 South Goodwin, Urbana
PH: (217) 333-2371
FX: Fax (217) 244-1861
http://theatre.illinois.edu

The curricular concentrations in the Department of Theatre provide intensive and extensive preparation for the rigorous demands of a professional career in the theatre. A strong commitment to work in the theatre and a realistic understanding of its intellectual, aesthetic, and physical demands are therefore necessary in students who enter the department.

Before acceptance into theatre, applicants must participate in auditions or interviews, which take place at the Krannert Center for the Performing Arts five or more weekends each year, and at selected regional locations (normally Chicago and New York). In these auditions, applicants who plan to pursue the concentration in acting should present a three-minute audition, comprising two contrasting works from dramatic literature. Applicants wishing to pursue one of the concentrations in design, technology, and management should present a portfolio of previous theatre work. Applicants who intend to pursue the theatre studies concentration should also bring evidence of their previous theatre work.
and a 500-word essay addressing the aspects of the theatre studies program that interest them most and why they want to pursue those aspects. Information on these auditions and interviews will be sent to applicants once they have applied to the University and their eligibility has been determined by the Office of Admissions and Records.

Concentrations in theatre are in Acting, Costume Design and Technology, Lighting Design, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. Students are initially accepted as theatre majors and then formally admitted to one of these concentrations after an evaluation by the faculty during the student’s first or second year. The concentrations in acting and design, technology, and management are intended for students who, in the judgement of the faculty, are ready to concentrate in these specialties in an intensive undergraduate professional training curriculum. The theatre studies concentration is intended for students who plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As one of the resident producing organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year and three each summer. The theatres and workshops of the Krannert Center serve as laboratories for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists, preparing performances in theatre, opera, and dance. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100-Practicum I. Acting and theatre studies students cast in Krannert Center productions or assigned to assist in Krannert Center productions must also take THEA 400-Practicum II. Design, technology, and management students are required to work on Krannert Center productions as assigned for THEA 400-Practicum II, credit. Students seeking credit for practical theatre work outside the Krannert Center must secure the approval of the faculty, are ready to concentrate in these specialties in an intensive undergraduate professional training curriculum. The theatre studies concentration is intended for students who plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As one of the resident producing organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year and three each summer. 1 First year theatre foundations courses.

Acting Program
The acting program provides intensive training in a wide variety of performing media. In the first and second years, students take introductory courses in movement, voice, and acting. In their second year of study in the department, students must audition for acceptance into the studio in acting. In addition to successful completion of all classes in their first and second years, acceptance will be based on an evaluation of each student’s potential for professional-caliber performance, commitment to theatre, and the necessary discipline for intensive study. Third- and fourth-year students meet in daily four-hour sessions, each of which includes sections in dynamics, voice and speech, movement, and acting. Semester-long acting sections include advanced scene study, of each student’s potential for professional-caliber performance, commitment to theatre, and the necessary discipline for intensive study. Third- and fourth-year students meet in daily four-hour sessions, each of which includes sections in dynamics, voice and speech, movement, and acting. Semester-long acting sections include advanced scene study, musical theatre, Shakespeare, and acting for the camera. Students in the professional studio in acting must audition for department productions and perform as cast.

Division of Design, Technology, and Management

Students planning careers in costume design and construction, lighting design, scenic design, scenic technology, sound design and technology, and stage management are selected for the options in this division by a process of faculty evaluation at the end of their first year of study in the department. Criteria for acceptance and continuance in these options include satisfactory completion of all course work in the first and second years, potential for professional-caliber work, commitment to theatre, and the necessary discipline for intensive study and practice. Students in these options are assigned to teams that design, mount, and manage more than fifteen productions annually in the Krannert Center for the Performing Arts.

Theatre Studies Program

The theatre studies program focuses on the practical application of theatre scholarship and explores theatrical production as a collaborative art form that is grounded in theory, criticism, history, research, and writing.

The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

Emphasis is given to a comprehensive study of theatre practices of the past, material participation in theatre practices of the present, and the discovery and application of theatre practices for the future.

Total Hours 51

Minor in Theatre

The Minor in Theatre offers students a comprehensive overview of the study of theatre, including both academic (history and criticism) and production (acting, design and technology) courses. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses, totaling ten hours. They then take a minimum of ten hours of electives in two general areas (History/Criticism and Production/Performance) with at least one course from each area.

BAUSP Director: Alice Novak, Assistant Department Head

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.
A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

The Department also offers a minor in Urban Studies and Planning. The minor provides students with the opportunity to apply disciplinary knowledge from a variety of fields (such as economics, politics, environmental science, informatics, sociology, architecture, landscape architecture) toward understanding urban phenomena and planning for orderly, efficient, functional, environmentally friendly, and aesthetically pleasing urban development. The minor introduces students to a) cities as arenas with challenges such as housing affordability, population segregation, neighborhood disinvestment and decline, environmental pollution, and traffic congestion; and b) professional planning practice, which devises actions to address such issues and improve the quality of life in urban areas. Urban issues are explored on a range of scales from the neighborhood to the mega city.

The Department’s administrative and faculty offices, classrooms, and computer laboratory space are located in Temple Hoyne Buell Hall. Students may go to Room 111 for information.

The Department of Urban and Regional Planning also offers a program of graduate studies leading to the Master of Urban Planning degree, joint degree programs with the Master of Architecture, Master of Landscape Architecture and the Juris Doctor degrees, and the Doctor of Philosophy in Regional Planning.

**Urban Studies & Planning, BA ( BAUSP)**

A minimum of 120 hours is required for this degree. A concentration is required for this degree, choose one of the following:

- Bachelor of Arts in Urban Studies & Planning-Global Cities (p. 194)
- Bachelor of Arts in Urban Studies & Planning-Policy and Planning (p. 194)
- Bachelor of Arts in Urban Studies & Planning-Social Justice (p. 195)
- Bachelor of Arts in Urban Studies & Planning-Sustainability (p. 195)

**General Requirements for the Program**

Current University of Illinois General Education requirements include courses in humanities, composition, social sciences, natural sciences and technology, cultural studies, quantitative reasoning, and foreign language. See the General Education Web site (http://www.courses.illinois.edu/gened) for information on courses that meet these requirements.

<th>Required Courses</th>
<th>Required Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capstone Preparation: During the 3rd year, students enroll in UP 301, Capstone Preparation. Students meet individually with their capstone advisor to develop a plan to meet the capstone requirement. To pass this course students must turn in a proposal at the end of the semester.</td>
<td>1</td>
</tr>
<tr>
<td>Capstone Experience: Students engage in a semester or summer-long applied activity outside of the classroom. The Capstone Experience is intended to engage the students in the real world and prepare them for the job market. Students typically complete this requirement during their junior year, but have the option to complete it during the summer between their 3rd and 4th year. Examples include a paid or unpaid internship, volunteer work, consulting project with a client, summer research and more. Students enroll in UP 390, Planning Internship, and/or UP 397, Undergraduate Project, to receive credit.</td>
<td>3</td>
</tr>
</tbody>
</table>
Capstone Seminar: During the 4th year, students enroll in UP 401 for 2 semesters. Students will participate in monthly activities to discuss and reflect on the Capstone Experience. In addition, students will present a poster summarizing their capstone experience in a public setting; for example at a public engagement conference, public meeting or community meeting, McNair Scholars conference, James Scholars event, Illinois American Planning Association meeting, undergraduate research symposium, or other venue. The seminar sessions also include career development such as resume writing, interviewing and networking with professionals through the Wetmore Lecture Series.

Minor in Art History

The minor in art history is designed for students who seek to study art history in depth as a compliment to their major area of study. The minor provides students with an education in art history that is balanced and diverse culturally, temporally, and geographically. It allows students to choose from a variety of introductory courses that cover a variety of regions, cultures, and periods.

Contact: Mark Avery

Course Requirements

genstudies@illinois.edu

The Division of General Studies (DGS) assists undeclared students with the process of exploring and declaring majors at the University of Illinois by providing holistic, developmental academic advising. DGS offers students the ability to connect with academic advisors who are committed to their success.

The Division of General Studies helps students:

• Clarify their academic, personal, and career goals;
• Identify their strengths, skills, interests, and values;
• Understand the process of exploring majors at Illinois;
• Identify the programs of study available at Illinois;
• Understand specific programmatic and degree requirements;
• Understand the Intercollegiate Transfer (ICT) process at Illinois;
• Recognize the significance of and their responsibility in the academic advising relationship;
• Learn about and connect with appropriate campus resources and services;
• Learn about the educational opportunities available at the University of Illinois including undergraduate research, study abroad, tutoring, leadership development, involvement in student organizations, volunteer experiences, and connections with faculty.

DGS provides students with opportunities to participate in academic achievement programs, the James Scholar Honors program, and short-term study abroad experiences. In addition, all DGS students enroll in an introduction to the university course, General Studies 101 (GS 101), to assist with their transition to college life and provide insight into the major exploration process at Illinois. Students may be enrolled in the Division of General Studies for up to four semesters before being required to declare a major in one of the undergraduate colleges at the University of Illinois.

Liberal Arts and Sciences, College of

2002 Lincoln Hall
702 South Wright Street
Urbana, IL 61801
(217) 333-1705
http://las.illinois.edu

The College of Liberal Arts and Sciences (LAS) has four missions: scholarly inquiry and the generation of knowledge, preparation of individuals for an array of careers and professions, service to the public, and the provision of the intellectual core of the University. The college shares the first three missions with professional schools and other colleges on this campus, but the last mission is uniquely the responsibility of the College of Liberal Arts and Sciences. By fulfilling this responsibility, the college helps develop broadly educated individuals who are committed to or characterized by open inquiry, critical thinking, effective communication, and responsiveness to the needs of individuals and society.

Students in the college are expected to understand the content of and to develop skills in areas that reflect the overall purpose of the college: fluency and facility in English; literacy in at least one additional language; broad exposure to a number of different disciplines; and intensive study in one discipline (or an interdisciplinary program). The student has a wide choice of courses to satisfy these requirements; however, ultimately he or she must plan a diverse and intensive program of study, prepare for an occupational, professional and intellectual future, and develop that clarity and range of mind that is the goal of educated people.

Information for current students may be found here: http://www.las.illinois.edu/students/

Information for newly admitted students may be found here: http://www.las.illinois.edu/students/admission/

Information for prospective students may be found here: http://www.las.illinois.edu/prospective/

African American Studies
Ronald Bailey, Department Head
1201 West Nevada, Urbana
PH: (217) 333-7781
http://www.afro.illinois.edu

The Department of African American Studies undergraduate offerings include an undergraduate major and minor.
African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AAS students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, computer and statistical skills. Students majoring in AAS will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society; and to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in African American Studies
E-mail: cmjenki@illinois.edu

Minimum required major and supporting course work equates to 48 hours.

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level African American Studies courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction:
To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

Information listed in this catalog is current as of 07/2019
B. Cultural Production & Cultural Movements. Students must take at least one course in this area. Students may choose courses from a list in the Department office.

C. Political Economy, Public Policy & Contemporary Issues. Students must take at least one course in this area. Students may choose courses from a list in the Department office.

Elective in any of the above areas 3

Students must take at least one course focusing on Black Women, Gender, and Sexuality Studies chosen from a list in the Department office. Students may count this course toward any of the required areas above.

Total Hours 21

Students must not take more than 6 hours of 100-level courses. A minimum of 6 hours of 300- and 400-level courses is required.

American Indian Studies, Program in

American Indian Studies (AIS) prepares students in a range of methodologies, theories, technologies, and teaching approaches that compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students in preparing for graduate school or for careers in a variety of pursuits including public and business administration, education, public relations, marketing, politics, and government, especially as they relate to American Indian and Native American constituencies. Career opportunities also exist in agencies such as Indian Health Services, the Bureau of Indian Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual foundation for success in an increasingly challenging world.

Minor in American Indian Studies

American Indian Studies (AIS) is an interdisciplinary program with four subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The courses chosen must form a coherent program of study and be approved by an AIS advisor.

The courses listed below are available to students in the minor.

Anthropology

Brenda Farnell
109 Davenport Hall, 607 South Mathews, Urbana
PH: (217) 333-3616
http://www.anthro.illinois.edu/

The Department of Anthropology offers a Major in Anthropology with three concentrations and a minor. In addition, students may pursue Anthropology as part of the LAS Major in Computer Science and Anthropology (p. 317).

Anthropology combines scientific and humanistic interests in human biology and diverse cultures (both past and present) to provide in-depth knowledge and broad perspectives on the human condition. The anthropology major develops research, writing and analytical skills that enable graduates to confront problems, issues and situations that require understanding of cultural differences and human biological variation. College graduates with a background in anthropology thrive in a broad range of jobs and professions including global/international relations, social work, education, law, medicine and health professions, bioscience and technology, government, NGOs and business, as well as further graduate study in anthropology.

Professional anthropologists work as research scientists and teachers in museums, universities, and archaeological surveys; as staff members in government agencies, social service programs, and business firms in which international understanding of human and social concerns is important; or as independent consultants to such agencies, programs, and firms.

The Major in Anthropology includes all four fields of anthropology:
- biological anthropology (biological diversity and evolutionary history of human and nonhuman primates),
- archaeology (human prehistory and the organization and growth of technology and society),
- sociocultural anthropology (daily life at home and abroad; identity and power in social contexts),
- linguistic anthropology (language and communication in cultural contexts).

Although the student should strive for a topical and geographical balance, an undergraduate may specialize in one of these four branches and may also study a world cultural area intensively through an area studies program.

The Archaeology Concentration offers students a program to explore the human past through its material remains to understand cultural and societal change through time, and the role of heritage in the present. We offer many opportunities for students to conduct research with faculty in our archaeology labs, field schools, and in our extensive research collections.

The Human Evolutionary Biology Concentration offers students a program to examine the interconnections between genetics, environment and culture to address issues from human origins and morphology to forensics and modern health.

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in these closely related fields. Sociocultural anthropologists study the daily lives of people around the world, both at home and abroad. They conduct field research to get a hands-on feel for people's lives and passions and examine everything from beauty pageants to political protest marches, from Disney films to the lab practices of nuclear scientists. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a crucial window on the largest processes and problems of our time, from globalization to race relations and violence.

Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the “English Only” movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom, on social media, or at the United Nations, as well as how the way we talk creates our sense of self and reality.

Because the field of anthropology presents a wide range of disciplinary perspectives on the human condition, students electing this major concentration are encouraged to select from among relevant course offerings in archaeology or biological anthropology to fulfill General Education requirements.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Students must select one of the following in consultation with an advisor:
- Major in Anthropology (p. 203)
- Major in Anthropology, Archaeology Concentration (p. 202)
- Major in Anthropology, Human Evolutionary Biology Concentration (p. 204)
- Major in Anthropology, Sociocultural and Linguistics Anthropology Concentration (p. 205)

Minor in Anthropology

The minor in anthropology may be tailored to each student’s individual needs, thus accommodating students with interests as diverse as premedicine, prelaw, geography, and art history.

E-mail: anthro@illinois.edu
Archaeology Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Anthropology, Archaeology Concentration

E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

Research and/or Additional Field School- 3-6 hours. Further data analysis and a research report associated with ANTH 455 or an additional approved ANTH 454-Archaeology Field School and ANTH 455- Lab Analysis in Archaeology

Total Hours 45

Anthropology, BALAS

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Anthropology
E-mail: anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of anthropology courses and supporting course work with a departmental adviser.

Code Title Hours

When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements.

Anthropology Core Courses 9

Choose 3 of the following core courses. Students may make one substitution for 1 of the 3 required courses, choosing from the option listed.

ANTH 220 or ANTH 105 Introduction to Archaeology or World Archaeology

ANTH 230 or ANTH 103 Sociocultural Anthropology or Anthro in a Changing World

ANTH 240 or ANTH 102 Biological Anthropology or Human Origins and Culture

ANTH 270/271 or ANTH 104 Language in Culture or Talking Culture

Thematic Area Courses 21

Choose courses in Thematic Areas within the Department of Anthropology. Students must meet with the departmental advisor to discuss selection of courses. Thematic Areas:

Anthropology of Africa, Asia, Europe
Criminology, Law and Social Justice
Environment, Landscape and Sustainability
Family, Community and Social Life
Health, Wellness and Society
Heritage, Museums and Tourism
Human Evolution and Culture
Identity: Race, Class, Gender, Sexuality, Disability
Immigration, Transnationalism and Diaspora
Language, Culture and Communication
Performance, Body, Arts and Media
Science and Technology

Additional courses within Anthropology or closely related departments that complement the student's thematic area of study

Research and Service Learning Coursework 3

Choose one of the following areas in consultation with the departmental advisor:

Archaeology
ANTH 454 Archaeological Field School or ANTH 455 Lab Analysis in Archaeology

Biological Anthropology
ANTH 444 Methods in Bioanthropology or ANTH 445 Research in Bioanthropology

Sociocultural/Linguistic Anthropology
ANTH 411 Research Methods in Socio-Cultural Anthropology (or ANTH 499- Research Methods in Linguistic Anthropology section)

Museum Anthropology
ANTH 462 Museum Theory and Practice or MUSE 390 Museum Internship

Senior Capstone Project 3-6

Choose one option below (Honors Thesis, Senior Capstone Seminar, Internship, Study Abroad, Field School or Research) in consultation with the departmental advisor:

Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis
ANTH 494 Honors Senior Thesis I
ANTH 495 Honors Senior Thesis II

Senior Capstone Seminar (Independent Research)- 3 hours
ANTH 498 Senior Capstone Seminar

Internship- 3 hours. A portfolio and report associated with an approved departmental internship
ANTH 390 Individual Study

Study Abroad- 3 hours. A portfolio and report associated with an approved Study Abroad experience
ANTH 390 Individual Study

Research and/or Field School- 3-6 hours. Data analysis and a research report associated with one of the following:
ANTH 454 Archaeological Field School & ANTH 455 and Lab Analysis in Archaeology
Human Evolutionary Biology Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Anthropology, Human Evolutionary Biology Concentration

E-mail:anthro@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

### Asian American Studies

Soo Ah Kwon

Head
For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Asian American Studies

Minimum required courses: 33 hours.

General Education: The LAS General Education requirements will fulfill the Campus General Education requirements including the campus general education language requirement.

12 hours of 300- or 400-level courses in your major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Advising: The Department of Asian American Studies provides advising for students. Students must officially declare their major by registering with the Associate Head of Asian American Studies. Students will work with their advisor to choose appropriate courses from the Additional Coursework List and the Approved Elective List to help plan a coherent program of study. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Interdisciplinary Minor in Asian American Studies

The Asian American Studies Department offers a campus-wide Interdisciplinary Minor. This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of race and diversity in the United States and transnationally. It is relevant to curricula such as letters and sciences, business, economics, education, health studies, pre-law, social work, or urban and regional planning.

Astronomy

Leslie Looney
103 Astronomy Building, 1002 West Green, Urbana
PH: (217) 333-3090
http://www.astro.illinois.edu

The Department of Astronomy offers a major and a minor in astronomy. In addition, students may pursue astronomy as part of the LAS Major in Computer Science and Astronomy (p. 317).

The major in astronomy, administered by the Department of Astronomy, is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education. It may be chosen by students who wish to have an astronomy research career or an astronomy background for use in related fields, such as working in national laboratories, observatories, planetariums, NASA, aerospace industry, many computer-related fields, journalism, or science writing to name a few. Astronomy courses can also be customized to satisfy a secondary field for the undergraduate curriculum in General Engineering.

Astronomy students are also encouraged to double major or minor in a second field such as chemistry, computer science, geology, mathematics or physics. Specific programs of study in other areas such as biology, economics, English, history, or journalism for individual students can be designed and periodically updated through mutual discussions between the students and their academic advisers.

The Department of Astronomy also sponsors the Minor in Astronomy.
For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Astronomy

E-mail: astronomy@illinois.edu

Minimum required major and supporting course work normally equates to 47-48 hours.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level Astronomy/Physics courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction. A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at UIUC. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

</tbody>
</table>

¹ Students without a background in physics or astronomy are encouraged to take ASTR 121 and ASTR 122 during their freshman year.

² Other 300- or 400-level technical classes, e.g. chemistry, computer science engineering, or statistics can be substituted with academic adviser approval.

³ A maximum of 4 hours of credit in ASTR 390 (or equivalent "Independent Study" course, such as PHYS 497) can be counted towards this requirement.

⁴ MATH 220 may be substituted for MATH 221. MATH 220 is appropriate for students with no background in calculus.

Minor in Astronomy

The minor in astronomy is designed to broaden the student’s knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

Advanced Astronomy

300- or 400-level courses taught by the Department of Astronomy ²: 9

Courses at any level taught by the Department of Astronomy ²: 3-6

Minimum total hours: 18

¹ Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.

² No more than 4 hours of ASTR 390 will be counted towards the minor.

Atmospheric Sciences

R. Jeff Trapp
3072 Natural History Building
1301 W. Green Street
Urbana
PH: (217) 333-2046
https://www.atmos.illinois.edu

The Science and Letters Curriculum in Atmospheric Sciences prepares students for careers in a wide range of disciplines within the atmospheric sciences including meteorology, environmental science, climate, remote sensing, atmospheric chemistry, computational science and other areas. The curriculum is tailored to achieve the student’s long term educational goals, their career aspirations in atmospheric sciences and general interests in the field. All students receive a firm foundation in mathematics, physics and chemistry and develop data analysis and computational skills that can be used in a wide range of applications within and beyond the atmospheric sciences. Students can emphasize specific areas of interest in their elective choices. Students majoring in Atmospheric Sciences will have opportunities for employment within agencies of government (e.g. the National Weather Service/NOAA, NASA, EPA, DOD, DOE), many private firms and in colleges and universities for those who continue with graduate education. All students can take part in independent study, internship or research projects as a capstone experience in their senior year. Students interested in a research career in atmospheric sciences are encouraged to undertake research projects in the capstone experience.

The undergraduate curriculum in atmospheric sciences is modeled on the recently published recommendations of the American Meteorological Society. The American Meteorological Society is the professional society for atmospheric sciences.
for atmospheric scientists and meteorologists in the United States. Their "recommended attributes" for undergraduate degree programs in the atmospheric sciences are guidelines for graduates to be successful in finding employment or in seeking admission to graduate programs. Therefore, we have closely adhered to these recommended attributes in designing our program.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Atmospheric Sciences

Email: atmos-sci@illinois.edu

Minimum required major and supporting course work normally equates to 58-59 hours including at least 32 hours in Atmospheric Sciences.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in Atmospheric Sciences can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

   For distinction: A minimum cumulative grade point average of 3.2 in all of their Atmospheric Sciences courses, and completing three Atmospheric Sciences Elective courses.

   For high distinction: A minimum cumulative grade point average of 3.4 in all of their Atmospheric Sciences courses, and completing four Atmospheric Sciences Elective courses.

   For highest distinction: A minimum cumulative grade point average of 3.6 in all of their Atmospheric Sciences courses, and completing five Atmospheric Sciences Elective courses.

Minor in Atmospheric Sciences

The minor in Atmospheric Sciences is designed for students who desire a significant background in Atmospheric Sciences to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture; or scientific pursuits such as chemistry, physics, biology, and scientific writing.

Chemical and Biomolecular Engineering (Specialized Curriculum)

Paul Kenis
114 Roger Adams Laboratory, 600 South Mathews, Urbana
PH: (217) 333-3640
http://chbe.illinois.edu

Chemical engineering is the study and practice of transforming substances on a large scale to produce products or energy for the improvement of society. Such processes are the fundamental core of the chemical, petroleum, pharmaceutical, and electronics industries. Chemical Engineers work in a variety of segments within these industries, including processing, manufacturing, research and development, management, environmental compliance, and business. Chemical Engineering differs from Chemistry in that Chemical Engineers produce products on a large scale, so that they are affordable and available to as many consumers as possible. In this way, Chemical Engineering emphasizes fundamentals required to design, optimize, and operate chemical processes as safely and efficiently as possible.

For the Degree of Bachelor of Science in Chemical Engineering

Major in Chemical Engineering (Specialized Curriculum)

Biomolecular Engineering Concentration

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses.
It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two areas of concentration: Chemical Engineering and Biomolecular Engineering. Each concentration is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration’s technical electives focus more on bio-applied processing and technology.

Areas of Concentration
- Chemical Engineering: The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- Biomolecular Engineering: The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

Overview of Curricular Requirements
The curriculum requires 129 hours for graduation and is organized as shown below.

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

Orientation and Professional Development
These courses introduce opportunities and resources the college, department as juniors and seniors.

Foundational Mathematics and Science
These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

2 A maximum of 3 hours from this Category may be undergraduate research credit.
3 A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

Social Sciences and Humanities

The social sciences and humanities courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

Concentration in Biomolecular Engineering

Second Year
First Semester

Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The EN 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.
Minor in Biomolecular Engineering

Biomolecular Engineering is a broad, interdisciplinary field with its main goal of engineering value-added biomolecules and biomolecular systems for applications in medical, chemical, agricultural and food industries. Its practice ranges from fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare nanomedical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in chemical engineering. Those students should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For further information, please contact the Department of Chemical and Biomolecular Engineering.

1 Students must take at least three "Biomolecular Engineering" courses offered by the Department of Chemical and Biomolecular Engineering (for example, including CHBE 471, CHBE 472, CHBE 473, and CHBE 474). Students may obtain a current list of courses that may be used to satisfy this requirement in Room 99 RAL.

2 Course to be selected from a departmentally approved list of biomolecular engineering related technical electives.

For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@scs.illinois.edu.

Chemistry

Martin Gruebele
107 Noyes Laboratory, 505 South Mathews, Urbana
PH: (217) 333-0711
http://chemistry.illinois.edu

Students may pursue chemistry by following the specialized curriculum in chemistry (p. 216) (leading to the Bachelor of Science in Chemistry), the Chemistry Major (p. 213) or Chemistry Teaching Concentration (p. 214) in the Sciences and Letters Curriculum (leading to the Bachelor of Science in Liberal Arts and Sciences). Students within the specialized curriculum in Chemistry may choose the Environmental Chemistry concentration (p. 214). In addition, students may pursue chemistry as part of the LAS Major in Computer Science and Chemistry (p. 318). The department also sponsors a minor in chemistry (p. 213). These programs of study are administered by the Department of Chemistry.

The specialized curriculum in chemistry (p. 216) is a rigorous, specialized program suitable for those planning careers in chemistry. It meets standards prescribed by the American Chemical Society. The chemistry major (p. 213) in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

Cooperative Education Program: Students accepted into the School of Chemical Sciences Cooperative Education Program spend alternate periods of attendance at the University with periods of employment in industry or government. Transcript recognition is given as well as a certificate of participation at graduation. Additional information and applications are available in the School of Chemical Sciences Placement and Student Services office.

Chemistry Advising Information:

Total Hours 19-24

1 The following courses may not be used to complete the minor: CHEM 315, CHEM 397, CHEM 420, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and CHEM 499.

Chemistry (Sciences and Letters)

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Chemistry (Sciences and Letters)

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising)

Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in Chemistry and/or Biochemistry must be taken on this campus.

NOTE: Transfer credit in chemistry must be approved by an adviser in chemistry in order to be included in the 30 hours.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

1 Excluding CHEM 101, CHEM 108, and CHEM 199.
2 No more than 10 hours of the following courses may count toward the 22-26 hours in Chemistry: CHEM 197, CHEM 199, CHEM 297, CHEM 397, CHEM 496, CHEM 497, and CHEM 499.
Chemistry Teaching Concentration
For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Chemistry (Sciences and Letters), Chemistry Teaching Concentration

For advising contact SCS Academic Advising (http://publish.illinois.edu/scsadvising).

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in Chemistry must be taken on this campus.

Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school (grades 9-12) chemistry through the AP/honors level and biology, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Students in the Chemistry Teaching Concentration may submit their final teaching portfolio for evaluation in lieu of taking CHEM 499 and submitting a senior thesis. Final decisions on awarding Distinction honors will be made by the Head or designee.

Environmental Chemistry Concentration
For the Degree of Bachelor of Science in Chemistry

Major in Chemistry (Specialized Curriculum), Environmental Chemistry Concentration

For advising see the Chemistry Overview Section (p. 212)

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas.
These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

Advanced Chemistry

Chemistry/Biochemistry courses numbered 300 or higher, which must include one from the following:

- CHEM 317 | Inorganic Chemistry Lab                           |
- CHEM 437 | Organic Chemistry Lab                             |
- CHEM 447 | Physical Principles Lab II                        |

Additional laboratory work:

- BIOC 445 | Current Topics in Biochemistry                    |
- CHEM 317 | Inorganic Chemistry Lab                           |
- CHEM 437 | Organic Chemistry Lab                             |
- CHEM 447 | Physical Principles Lab II                        |
- CHEM 483 | Solid State Structural Analysis                    |
- CHEM 494 | Lab Safety Fundamentals (lab sections only)       |

Additional chemistry/biochemistry courses to complete the 11-hour requirement in advanced chemistry (excluding CHEM 499):

Mathematics:

- MATH 220 | Calculus                                           |
- MATH 221 | Calculus I                                        |
- MATH 231 | Calculus II                                       |
- MATH 241 | Calculus III                                      |

Physics:

- PHYS 211 | University Physics: Mechanics                      |
- PHYS 212 | University Physics: Elec & Mag                     |
- PHYS 214 | Univ Physics; Quantum Physics                      |

Technical Electives, including the following Mathematics courses:

- MATH 225 | Introductory Matrix Theory                        |
- MATH 415 | Applied Linear Algebra                            |
- MATH 285 | Intro Differential Equations (or equivalent)      |

Required Technical Elective Courses for the Environmental Chemistry Concentration

**Basic Courses**

- CHEM 360 | Chemistry of the Environment                      | 3 |
- CHEM 230 | Environmental Engineering                          |   |

**Advanced Courses: Select three courses from the following:**

- CHEM 460 | Green Chemistry                                    | 9 |
- CEE 443 | Env Eng Principles, Chemical                       |   |
- GEOL 380 | Environmental Geology                              |   |
- IB 485  | Environ Toxicology & Health                        |   |
- CHEM 397 | Individual Study Junior                            |   |
- CHEM 497 | Individual Study Senior                            |   |
- CHEM 499 | Senior Thesis                                      |   |

Other 400-level courses dealing with economic, engineering, biological aspects of environmental chemistry upon consultation with the faculty advisor.

Free electives

---

1. Hours given are those typical to meet requirement.
2. If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.
3. The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.
4. Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list maintained in the advising office. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation are required to complete only one laboratory course from the list maintained in the advising office.
5. Students contemplating transfer to the chemical engineering curriculum should choose MATH 225.
6. The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required course work in the curriculum.
Chemistry, BS

Specialized Curriculum

The typical program of courses required to satisfy this degree totals 128-134 hours; in no case will a program totaling less than 120 hours qualify for graduation. Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses. The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Students in the specialized curriculum in Chemistry must include a course in Biochemistry in the Advanced Hours area or the Technical Elective area to be certified by the American Chemical Society as having met its specifications.

For advising contact SCS Academic Advising (http://advising.scs.illinois.edu)

Web address for department: www.chemistry.illinois.edu (http://www.chemistry.illinois.edu)

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have an average grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Requirements

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements.

Minimum hours required for graduation: 120 hours

Nontechnical Requirements

General education: For foreign language - three semesters of college study (or three years of high school study) in a single foreign language

Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)
The study of the languages and cultures of ancient Greece and Rome is valuable for those seeking a broad education in the liberal arts or preparing for graduate study in one of the many fields of Classical, Medieval, or Renaissance scholarship. It is also excellent preparation for the advanced study of law and medicine; it is increasingly admired in the business world. Within the general requirements of the major, the Department of the Classics offers individual programs designed to meet the needs and interests of each student. Close interaction between faculty and students, individual attention, tutorial instruction, opportunity for study abroad in Greece and Italy, and the unmatched resources of the Classics Library and the collections of ancient art and other objects from classical antiquity in the museums on campus provide unique advantages for the pursuit of classical studies.

**B.A. in the Teaching of Latin** prepares students to teach Latin.

### For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Students in Classics must choose one of the areas below. The Major in Classics and all concentrations require an additional 12 hours of approved supporting course work which may be drawn from a wide range of fields and disciplines. Students must plan their programs in consultation with a departmental adviser.

- Major in Classics (p. 218)
- Major in Classics, Classical Archaeology Concentration (p. 217)
- Major in Classics, Classical Civilization Concentration (p. 218)
- Major in Classics, Greek Concentration (p. 219)
- Major in Classics, Latin Concentration (p. 219)

### For the Degree of Bachelor of Arts in the Teaching of Latin

Curriculum Preparatory to the Teaching of Latin (p. 218)

The department sponsors minors in Classical Archaeology (p. 220), Classical Civilization (p. 220), Greek (p. 220), and Latin (p. 220).

### Classical Archaeology Concentration

### For the Degree of Bachelor of Arts in Liberal Arts and Sciences

**Major in Classics, Classical Archaeology Concentration**

E-mail: classics@illinois.edu

Minimum required major and supporting course work normally equates to 42-48 hours.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Major Advising Office or to the LAS Student Affairs Office before the end of the fourth semester (60-75 hours). Please see your adviser.

**NOTE:** Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the campus general education language requirement with one of the classical languages.
Minimum hours required for graduation: 120 hours

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department's honors committee at the earliest opportunity.

Communication

John Caughlin, Head of Department
3001 Lincoln Hall, 702 South Wright, Urbana
PH: (217) 333-2683
http://communication.illinois.edu

The Communication major prepares 21st century students to become critical thinkers, avid consumers of information, and effective problem solvers in both their personal and professional lives.

The goal of the Communication course of study is for undergraduates to learn about communication from a broad liberal arts perspective. Students will study the nature of effective communication across domains, develop effective communication skills, and gain knowledge of how to help others improve their skills. Students gain theoretical and practical knowledge of public advocacy and debate and the critical capacity to evaluate the face-to-face and mediated political and cultural information upon which we all depend. They also should achieve a sophisticated understanding of the political and social import of communication on all aspects of public and private life, from public policy and health care to cultural norms, personal interactions, and notions of racial, class, gender, and sexual identity.

Communication is an appropriate major for:

- students seeking a general liberal arts education, with a particular focus on communication issues
- students preparing for careers in many different fields involving communication skills (for example, law, business management, sales, public relations, human resources, corporate communication, consulting, media-related fields, or politics)
- students preparing for graduate work in areas such as communication, media studies, public policy, or public health
- students preparing for advanced study in law, medicine, business, or human resources

Communication, BALAS

E-mail: communication@illinois.edu
Departmental distinction: Superior students are encouraged to consult the departmental honors adviser about requirements and opportunities for participation in the departmental honors program.

Minimum required major course work equates to a minimum of 37 hours of Communication courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

At least 15 hours of the required 37 hours in Communication must be at the 300 level or above.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

</tr>
</tbody>
</table>

Communication Courses: Students will select an option (A or B) and a specialization (if Option B is chosen) in consultation with an undergraduate advisor in Communication.

OPTION A: Students who wish a general course of study will take at least one course from five of the following six areas and the remaining hours will be selected in consultation with an advisor.

OPTION B: Students who choose to concentrate within an area must take four courses from one of the six areas listed below and the remaining hours will be selected in consultation with an advisor. Students may complete more than one specialization by completing four courses in each area desired; however, individual courses may not be counted toward more than one specialization.

Special topics courses (CMN 199, CMN 396, or CMN 496) may count toward a specialization with the approval of an advisor; however, CMN 199, CMN 390, CMN 491, and CMN 493 taken as independent studies may not count toward the four required courses for a specialization.

Approved lists of courses within these areas are available from the Communication academic advisor:

- Communication and Culture
- Communication and Health
- Communication and Organizations
- Interpersonal Communication
- Mediated Communication and Technology
- Rhetoric and Public Communication

Total Hours 37

¹ CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the minimum of 37 hours of Communication courses required for the major.

The undergraduate minor in Communication is designed for students who wish to obtain a deeper understanding of communication processes and how they influence social, cultural, and political processes. It is appropriate for students majoring in a variety of disciplines in the social sciences or humanities and for students in professionally-oriented programs.

At least one course from each of two areas of specialization within the Department of Communication (Communication and Culture, Communication and Health, Communication and Organizations, Interpersonal Communication, Mediated Communication and Technology, and Rhetoric and Public Communication). These courses must be numbered at the 200-level or above. A list of courses is available from the Communication undergraduate advisor.

Additional hours in Communication. These courses must be numbered at the 200-level or above.

Total Hours 6

At least 6 hours must be at the 300-level or 400-level.

Comparative and World Literature, Program in

Lilya Kaganovsky
3080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-4987
http://www.complit.illinois.edu/Welcome.html

A student who elects comparative literature as a major must complete 48 hours, including at least 12 hours in courses numbered 300 or above. The major comprises two areas, Comparative Literature (p. 222) and World Literature (p. 223) (foreign literatures in translation). Besides knowing English, the student who chooses Comparative Literature must have sufficient linguistic skill in at least one foreign language to participate in 200- to 400-level literature courses offered by the various foreign language and literature departments.

As soon as a student contemplates choosing comparative and world literature as a major, the faculty adviser should be consulted. The adviser will assist the student in selecting appropriate courses that will be especially helpful as preparation for the advanced comparative literature training beginning with the junior year. Courses in classical civilization and in literature (particularly courses dealing with works from several countries) are especially recommended at relatively early stages of study. An ample selection of such courses at the 100- and 200-levels exists in the various literature departments.

The distribution of course work allows for considerable flexibility. The major is administered by the Program in Comparative and World Literature.

Minor in Communication

Comparative Literature, BALAS

https://complit.illinois.edu/
Single National Literature (minimum of 9 hours required) or several national literatures including comparative literature; or in other humanistic fields, such as history, philosophy, speech, art, music, psychology, sociology, theatre, anthropology, and Asian studies. Because some of the courses in these subjects are more suitable than others to balance a student’s individual major in comparative literature, the student must follow the guidelines set by his or her adviser.

Total Hours 48

1. Literature in the Original Language is defined by what is currently offered by the University (i.e. mostly English, French, German and Spanish). Literatures generally taught in translation (including, but not limited to, Bengali, Chinese, Hebrew, Japanese, Polish, Russian, and Yiddish) may be chosen in consultation with the Undergraduate Advisor.

2. If one of the literatures studied is English, a student who continues in a graduate program in comparative literature will be required to acquire a reading knowledge of a second foreign language (i.e., one foreign language for the B.A., two foreign languages for the M.A., three foreign languages for the Ph.D.).

World Literature Concentration

https://complit.illinois.edu/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Comparative Literature, World Literature Concentration

E-mail: comlit@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours 300 or 400-level courses in the major must be taken on this campus. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Minimum required major and supporting course work equate to 48 hours with at least 15 hours of Comparative Literature courses in the Comparative Literature concentration and 21 hours of Comparative Literature courses in the World Literature concentration.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

The remaining hours should be selected from four of the following 100- or 200-level courses: CWL 114, CWL 151, CWL 189, CWL 190, CWL 208, CWL 241, CWL 242.

One of the following upper-level methodology courses

- CWL 395 Special Topics Comp Lit I
- CWL 441 Themes in Narrative
- CWL 461 Lit Genres and Forms
- CWL 471 International Lit Relations
- CWL 496 Special Topics in Comp Lit II

Area/Literature Concentrations: Courses must be chosen in consultation with the student’s faculty advisor and selected from the approved list of courses housed in the department advising office. All courses chosen must be at the 200 level and above.

For the Degree Bachelor of Arts in Liberal Arts and Sciences

East Asian Languages and Cultures

Robert Tierney, Head of Department
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 244-1432
http://www.ealc.illinois.edu

The Department of East Asian Languages and Cultures offers a major in East Asian Languages and Cultures and a concentration in the Teaching of East Asian Languages. The goal of the major in East Asian Languages and Cultures is that the student gain an introductory knowledge of the civilizations of East Asia, a firm competence in an East Asian language, a solid familiarity with East Asian cultures through multiple disciplines, and a more advanced knowledge of the region including research and writing in a seminar or senior project. This major is useful for the student seeking a broad liberal arts education and preparation for graduate or professional study involving East Asia.

The Concentration Preparatory to the Teaching of East Asian Languages is to prepare its graduates for certification for teaching East Asian Languages (currently Mandarin Chinese or Japanese) in the public schools in Illinois.

For the Degree Bachelor of Arts in Liberal Arts and Sciences

Concentration Preparatory for the Teaching of East Asian Languages
For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in East Asian Languages and Cultures, Teaching East Asian Languages Concentration

This concentration prepares its graduates for teaching an East Asian Language (currently Mandarin Chinese or Japanese) in the public schools in Illinois.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain University of Illinois, cumulative, content area and professional education grade point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Minimum required course work normally equates to 89 hours.

General education: Consult the Curriculum Preparatory to the Teaching of Foreign Languages (p. 231).

Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.25 overall, a 3.5 average in the major and complete an approved project or series of projects. Consult the Japanese or Chinese teacher education advisor for details.

Foreign study: Future teachers of Mandarin or Japanese are strongly encouraged to engage in one or more semesters of study abroad in China or Japan. Some of the curricular requirements may be met through the Year-in-Japan Program at Konan University or other approved programs or at an exchange program in China.

1 Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.

2 No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.

3 Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.

Economics

Economics is a social science concerned with the creation, consumption, and transfer of wealth, studying problems caused by scarcity and how individuals, institutions, and societies may deal with these problems. Economics shares common interests with business-oriented disciplines, such as finance and business administration. Students gain critical thinking and analytical skills, along with quantitative skills, such as calculus and statistics. These skills are used to derive economic principles useful in forming policies or models designed to solve economic problems.

The basic theoretical and statistical tools of economics are applied to virtually every field of human endeavor. Major fields of study within economics include Behavioral Economics, Economic Development, Econometrics, Economic History, Financial Economics, Industrial Organization, International Economics, Labor Economics, Macroeconomics, Mathematical Economics, Political Economics, Public Economics, Economic Theory, and Urban Economics. Economics can provide insights in areas as diverse as how workers should be rewarded, how government should conduct fiscal and monetary policy, and how health care markets work.

Microeconomics: concerned with understanding how individual persons and firms make choices. From a basic grounding in microeconomic theory, one can describe and predict the responses of consumers and firms to economic conditions and extrapolate from these individual choices to understand aggregate supply, demand, and price determination.

Macroeconomics: a higher-level perspective on the economy, focusing on national production, national income, and the overall level of employment of productive resources such as labor and capital. Benefits of this perspective are better understanding of country growth, monetary policy, and international trade.

Econometrics: grounded in classical statistics, provides tools for estimating all aspects of economic phenomena, including labor supply, supply and demand, and business cycles. Econometrics is used to test hypotheses about the world that are developed from economic theory. Econometric estimates can be used to forecast future conditions, aiding individuals, businesses, and governments in making decisions.

Economics students gain a variety of analytical skills through the Economics major, providing a broad range of career and graduate school opportunities. Sectors where our graduates work include for-profit and non-profit business organizations, all levels of government, and education. Examples of some of the industries our graduates have gone on to include banking and finance, marketing, insurance, and consulting.

The Economics Department offers the following Undergraduate Curriculum:

BALAS in Economics

- Provides a strong foundation of economics, statistics, and calculus, and requires supporting coursework outside the major selected based on the student’s interest and future goals, and approved by the Department.

- Students may take economics courses within a variety of areas, or focus on a specific area of interest, including Behavioral, Financial, Political, International, Public, and many more.

- Prepares students for a broad assortment of positions, including consulting, banking, finance, and many other areas in the public, private, or non-profit sector. Also prepares students for various graduate programs within fields of Finance, Statistics, Accounting, Business, Economics, and others.

BSLAS in Econometrics and Quantitative Economics

- Provides students with a quantitative curriculum, consisting of economics (specifically in econometrics), statistics, mathematics, and computer science.

- Students will be trained in advanced data analysis skills to answer economic questions, uncovering relationships while taking all information into account.

- Prepares students for positions in research departments of corporations and government agencies and working with large
administrative data sets on consumers or firms. Also provides the technical training for graduate programs in economics and finance, research positions in industry, and quantitative policy positions in government.

BSLAS in Computer Science and Economics Major (p. 227) (CS + Economics)

- Provides students with enhanced quantitative analysis and programming skills.
- Students learn a variety of economic analytical skills, both theoretical and empirical, and computational skills.
- There is an increasing need for more sophisticated skills to examine large administrative datasets ("Big Data"), thus combining the computer science and economics curriculums will produce students who are able to write their own code and develop their own software for analyzing these data sets. Possible job opportunities for graduates include area such as banking, finance, insurance, policy centers, government agencies and non-profit organizations. The degree will also prepare students for various graduate programs, including areas of economics, finance, policy, and financial engineering.

Economics Minor (tracks: Microeconomics, Macroeconomics, and Econometrics)

- Enables students not majoring in economics to conduct comprehensive study within the discipline of economics.
- The Minor enables students to become knowledgeable in one of the three core fields of economics: microeconomics, macroeconomics, or econometrics. Students will take a set of core economics courses and then choose one of the fields above for their elective courses.

Economics (p. 226) - For the degree of Bachelor of Arts in Liberal Arts and Sciences

Econometrics and Quantitative Economics - For the degree of Bachelor of Science in Liberal Arts and Sciences

Computer Science and Economics - For the degree of Bachelor of Science in Liberal Arts and Sciences

Minor in Economics

The minor in economics, administered by the Department of Economics, is designed to provide students who are not majoring in economics with a basic foundation in economic analysis. The minor offers training in economic theory through the intermediate level, instruction in quantitative methods of econometrics, and opportunity for advanced work in a student’s particular area of interest following the microeconomic, macroeconomic, or econometric track. Students completing the minor in economics will enhance their major field of study and prepare them for a career in their chosen field and/or for graduate studies in a variety of fields. The minor consists of 18-21 hours within economics. Students must complete the prerequisite mathematics and economics courses with the required grade/GPA in order to apply. Interested students should work with the Economics Undergraduate Studies Office. Students must choose from the Microeconomics, Macroeconomics, or Econometrics Track.

Prerequisite to applying for the Economics Minor:

- Microeconomics and Macroeconomics tracks:

  - MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher. MATH 234 can substitute for MATH 220 or MATH 221, with a grade of C or higher. Discuss your intended plan with the Department of Economics Advising Office to ensure MATH 234 will prepare you for advanced Economics coursework.
  - Econ 102 and Econ 202 with a 2.33 or higher Illinois Economics GPA. Either Econ 102 or Econ 202 must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

Econometrics track:

- MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher.
- MATH 225 with a grade of C or higher.
- Econ 102 and Econ 202 with a 2.33 or higher Illinois Economics GPA. Either Econ 102 or Econ 202 must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

Students will select one of the following tracks:

Microeconomics Track

- Two 400-level elective courses in Economics from a set of microeconomics courses

Macroeconomics Track

- ECON 103 | Macroeconomic Principles                   | 9     |
- ECON 303 | Inter Macroeconomic Theory                 |       |

One 400-level elective course in Economics from a set of macroeconomics courses

Econometrics Track

- ECON 471 | Intro to Applied Econometrics              | 9     |

Two 400-level elective courses in Economics from a set of econometrics courses

Total Hours 18-21

Economics, BALAS

E-mail: econug@illinois.edu

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: A student must have a grade point average of at least 3.25 overall and at least 3.5 in economics; complete a research project (e.g., complete ECON 399); and be recommended by the faculty research adviser.

Minimum required major and supporting course work normally equates to 55-56 hours including a minimum of 30 hours of economics courses excluding ECON 199, ECON 220, ECON 398, and ECON 399.
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Four 400-level courses in Economics selected from an approval list of computation-focused courses 12

Total Hours: 65-67

1 CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.

English

Vicki Mahaffey, Department Head
208 English Building, 608 South Wright, Urbana
PH: (217) 333-2391
http://www.english.illinois.edu

English majors at the University of Illinois take 12 courses (36 hours) from the Department of English in the study of literature, text, and culture. These courses help students develop sophisticated interpretation and composition skills through studying a wide range of cultural materials, historical periods, and literatures.

The Department of English sponsors the following majors:

- The English Major (p. 229) is organized to provide instruction in literature in English, literary theory and criticism, the English language, English education, film, cultural studies, and closely related fields. Students who major in English have many choices in planning a field of study, but the basic program is designed to accommodate students who seek to broaden their familiarity with our literature, to intensify their language skills for personal and professional reasons, and to learn more about literature's relationship to the other arts, history, philosophy, psychology, and the modern languages.

- The English Teaching Concentration (p. 230) leads to certification to teach in Secondary School. Coursework in this concentration is largely similar to the English Concentration and based on the same core goals as the English Concentration. Students working toward earning a teaching certificate are guided toward additional coursework focused on language and composition.

- The Creative Writing Major (p. 228) combines small workshops (poetry, fiction, nonfiction) and a variety of literature courses. The result is a strong but flexible program of study that develops students' analytical and creative skills and prepares them for work of graduate study in any number of fields.

- The department also offers two undergraduate minors- English (p. 231) and Creative Writing (p. 231).

The Department of English offers the following majors:

- English-Allows students to focus on literatures in English and the practices of literary theory and criticism, while encouraging them to explore the English language, expository and creative writing, writing studies, film, and other closely-related fields. Students select from the following:
  - Major in English (p. 229)
  - Major in English, English Teaching Concentration (p. 230)
  - Major in Creative Writing - (p. 228) Combines small workshops (poetry, fiction, nonfiction) and a variety of literature courses for a strong but flexible program of study that develops students’ analytical and creative skills and prepares them for work of graduate study in any number of fields.

- Minor in Creative Writing (p. 231)
- Minor in English (p. 231)

Creative Writing, BALAS

http://www.english.illinois.edu/undergraduate/majors/

E-mail: english@illinois.edu

Minimum required core and supporting course work normally equates to 36 hours.
General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus, of which at least three hours must be Creative Writing Courses (CW 404 or CW 406). All Creative Writing courses must be taken in sequence (CW 104 before CW 204, etc.).

Minimum hours required for graduation: 120 hours

1 Credit is not given for both RHET 233 and CW 243. Students who have taken RHET 233 prior to declaring the CW major must take CW 208 instead of CW 243 to complete this requirement. Students who take CW 208 for their Expository Writing requirement cannot count CW 208 toward the required 12 hours of Creative Writing coursework.

English, BALAS

http://www.english.illinois.edu/undergraduate/majors/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in English

E-mail: englishadvising@illinois.edu

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the major. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate/streams.html (http://www.english.illinois.edu/undergraduate/streams.html).

Minimum required major and supporting course work equates to 42 hours including a minimum of 36 hours of English Department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 300, ENGL 301, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

English Teaching Concentration

http://www.english.illinois.edu/undergraduate/majors/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in English, English Teaching Concentration

E-mail: englishadvising@illinois.edu

Minimum required concentration and supporting course work normally equates to 81 hours: 42 hours in the English concentration and 39 hours of courses from the Teaching Education Minor in Secondary School Teaching.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

This concentration fulfills state certification requirements to teach high school (grades 9-12) English Language Arts through the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching. See the College of Education section for requirements of the minor (39 hours) (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters, with some students requiring 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the concentration. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate(streams.html (http://www.english.illinois.edu/undergraduate(streams.html).

At least one course from one of the following periods: ENGL Medieval; ENGL Early Modern; ENGL long eighteenth century; ENGL Shakespeare; ENGL 1800-1900; R.E.P.C.I.S. (race/ethnicity/indigeneity/post-coloniality/sexuality)

Additional required coursework

Teacher Education Minor in Secondary School Teaching (p. 83) 39

ENGL 300 Writing About Lit Text&Culture (fulfills the university’s Advanced Composition requirement)

Period Courses (American, British, transatlantic, Anglophone, etc.)

Shakespeare 3

A course focused on literature, text, and/or culture in one of the following categories:

Medieval (before 1550)
Early modern (1550-1660 other than Shakespeare)
The long eighteenth century (1600-1800)

One course focused on literature, text, and/or culture in the category 1800-1900

Language and Composition Courses

ENGL 402 Descriptive English Grammar 3
ENGL 481 Composition Theory and Practice 3

Select one of the following:

Information listed in this catalog is current as of 07/2019
ENGL 310  Introduction to the Study of the English Language  
ENGL 311  History of the English Language  
ENGL 380  Topics in Writing Studies  
ENGL 482  Writing Technologies  
BTW 490  Special Topics Prof Writing  

**Additional English Coursework**

- One course offered by the Department of English (Business and Technical Writing, Creative Writing, or English).
- One course must focus on race/ethnicity/indigeneity/post-coloniality/sexuality. This course can be used to fulfill part of the Textual Analysis, Period Courses, or Additional Coursework requirements.

**Supporting Coursework**

- History and Culture Coursework: Choose one of the following pairs:
  - CWL 241 & CWL 242: Early Masterpieces of Western Culture and Modern Masterpieces of Western Culture
  - HIST 141 & HIST 142: Western Civ to 1660 and Western Civ Since 1660
  - HIST 171 & HIST 172: US Hist to 1877 and US Hist Since 1877
  - HIST 255 & HIST 256: British Isles to 1688 and Britain and World Since 1688

**Minor in Creative Writing**

http://www.english.illinois.edu/undergraduate/majors/creative/

The Creative Writing minor, administered by the Department of English’s Creative Writing Program, is designed to augment majors from all over campus with a program of small workshops (poetry or fiction) and a variety of other writing, literature, and film courses. The result should be the development of a range of analytical and creative skills that will enrich the undergraduate experience and help prepare students for work in any number of fields.

**Creative Writing Coursework**

Students complete 9 hours of creative writing coursework by choosing one of the following 3-course (9-hour) sequences:

- CW 106: Introductory Poetry Writing
- CW 206: Intermediate Poetry Writing
- CW 406: Advanced Poetry Writing
- OR
- CW 104: Introductory Narrative Writing
- CW 204: Intermediate Narrative Writing
- CW 404: Advanced Narrative Writing

**Approved Electives**

Students complete 6 hours of coursework in any of the following areas (a minimum of 3 hours must be at the advanced 300 /400 level):

- Any ENGL or CW course
- CMN 310: The Rhetorical Tradition
- CMN 423: Rhetorical Criticism
- JOUR 475: Magazine Writing
- THEA 211: Introduction to Playwriting
- IS 409: Storytelling

**Foreign Language Teaching Curricula Preparatory to Teach Foreign Languages**

The College of Liberal Arts and Sciences offers curricula for the preparation of teachers of French (p. 233), German (p. 247), Latin (p. 218), and Spanish (p. 310) and concentrations in East Asian Languages and Cultures for the teaching of Japanese and Mandarin Chinese (p. 224).

Illinois law and Council on Teacher Education policy require that all candidates pass the Illinois Certification Testing System test of Basic Skills and all candidates for certification in Modern Languages pass an oral proficiency test in their content major language prior to student teaching.

A student must have at least 2.5 (A+ = 4.0) cumulative and University of Illinois grade point averages to remain in the teaching option. A student must also maintain at least a 2.5 grade point average in all attempts at content area and pedagogy courses taken at the University of Illinois in order to remain in the teaching option.

E-mail: flte@illinois.edu

**Prerequisite to application to the Teaching Option**

GPA or 2.5 in all content courses in the intended majors of French, German, Latin, Spanish, and East Asian Languages and Cultures (Chinese
and Japanese); completion of or concurrent enrollment in FLTE 471 and three courses at the 200-level or higher in the intended language. Completion of Basic Skills Test.

General Education Requirements: Students in the Foreign Language Teaching Curricula of French, German, Latin, Spanish and in the East Asian Languages and Cultures Concentration Preparatory for the Teaching of East Asian Languages will be expected to complete the Campus General Education (https://courses.illinois.edu) requirements (including the campus general education language requirement) as well as the following specific programmatic requirements:

- Communication: RHET 105 or 108 and CMN 101 or a speech performance elective, and one course approved by the university as satisfying the Composition II requirement. Alternatively, students may complete CMN 111 and 112 and one course satisfying the Composition II requirement. NOTE: Some departments specify particular courses within their major to satisfy the Composition II requirement.
- American History: One course (LAS Historical and Philosophical Perspectives Category)
- American Government: One course (LAS Social Sciences Category)
- Literature and the Arts: One course chosen from the LAS Literature and the Arts Category that is outside the student’s major area.
- A course in health and physical development is recommended.

Total Hours: 29

1 In the fall semester, students enroll for 3 hours with instruction occurring in the first 10 weeks. In the spring semester, students enroll for 1 hour with instruction occurring in the first 4 weeks.

The Department offers three majors: French, Italian and Teaching of French; two minors: French and Italian; and a 5-year BA/MA in French or Italian and European Union Studies.

The BALAS in French allows students to specialize in one of the following concentrations:

- French Commercial Studies Concentration
- French Studies Concentration

The BALAS in Italian allows students to study Italian language, literature, film, linguistics, and cultural studies.

The B.A. in the Teaching of French prepares students to teach French.

Study Abroad opportunities enhance the undergraduate education in French and Italian.

The minors in French and Italian offer a unique opportunity for students to enhance their education with the study of French or Italian language and culture.

5 Year BALAS/MA in French and European Union Studies allows students to receive two degrees, a BALAS in French and an MA in European Union Studies.

5 Year BALAS/MA in Italian and European Union Studies allows students to receive two degrees, a BALAS in Italian and an MA in European Union Studies.

- Italian

5 Year BALAS /MA in French or Italian and European Union Studies

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in French or Italian and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS–granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Minor in French

Minor in Italian
Curriculum Preparatory to the Teaching of French

For the Degree of Bachelor of Arts in the Teaching of French

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: french-italian@illinois.edu

Web address for department: www.frit.illinois.edu (http://www.frit.illinois.edu)

Minimum required course work normally equates to 37 hours of French courses and 29 hours of professional education courses. The required coursework could be 16 additional hours, respectively, if the student does not already have the equivalent of French 101-102-133-134. NOTE: FR 299 is strongly recommended.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 231).

Minimum hours required for graduation: 120 hours.

Departmental distinction: A student must have a minimum 3.5 cumulative grade point average, including a 'Satisfactory' in the teaching practicum; complete two additional advanced-level courses in French or the teaching minor; complete FR 492, and provide two letters of recommendation as evidence of exceptional teaching potential. Consult the teacher education adviser for details.

Gender and Women's Studies

Siobhan Somerville, Chair
1205 W. Nevada Street, Urbana
PH: (217) 333-2990
http://gws.illinois.edu

The mission of the Department of Gender and Women's Studies (GWS) is to explore, analyze and challenge the ways in which gender shapes people's lives. Assumptions about gender difference saturate many aspects of social and political life and create different forms of inequality in the workforce, in education, in cultural production, in scientific research, as well as in resource allocation in both public and private institutions. Because gender assumptions manifest differently in various communities, in our courses we systematically incorporate analysis of how race, ethnicity, class, sexuality, and physical ability shape gender inequality.

We train students to identify where and how inequalities are produced and reproduced. We also give them the skills to figure out how to initiate change and work for justice. They go on to challenge gender inequalities in their personal lives, in their communities, and in their future careers.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Gender and Women's Studies

E-mail: gws@illinois.edu

Minimum required courses: 33 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a cumulative grade-point average (GPA) of 3.5 and a 3.5 GPA within the major.

High distinction. To be eligible for graduation with high distinction, a student must have a cumulative grade point average (GPA) of 3.5, a GPA
of 3.7 within the major, and complete a thesis or project in a 400-level GWS course that is approved by the department.

Advising: The Department of Gender and Women's Studies provides advising for students to help plan a coherent program of study.

Additional Coursework 1
At least 15 additional hours of coursework offered by the Gender & Women’s Studies Department, with no more than 3 hours at the 100 or 200 level. Required courses are offered by the Department of Gender & Women’s Studies and are on an approved list maintained in the department office and with the GWS advisor.

Area Electives
Two courses in Gender and Women's Studies. No more than one may be counted from the 100 or 200 level. For a list of approved courses contact the GWS department or the GWS advisor.

Of the 33 hours in the major, students must take at least one course focused on transnational or non-U.S. issues. For a list of approved courses contact the GWS department or the GWS advisor.

Total Hours 33

1 Topics courses (GWS 199, GWS 295, GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

Minor in LGBT/Queer Studies

The LGBT/Queer Studies minor provides the opportunity to explore how various political, social, and cultural definitions of sexual identities and their expression have been constructed and challenged in different places and points in time. Attention is given to queer politics, and interactions with nation, race, ethnicity, and gender. A minor in LGBT/Queer Studies provides complementary tools for many majors in the humanities, arts and sciences.

The Department of Gender and Women's Studies must approve a student’s minor course plan. Students must register their minor with the Gender and Women’s Studies advisor.

</tbody>
</table>

Area electives at any level. For a list of approved courses contact the GWS Department office or the GWS advisor. 3

Total Hours 18

1 Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

At least 6 hours of advanced coursework must be distinct from credit earned for the student’s major or another minor.
Students may choose to major in Gender & Women’s Studies and Minor in LGBT/Queer Studies, but classes may not count towards both.

Geography & Geographic Information Science

Shaowen Wang, Department Head
2042 Natural History Building
1301 W. Green Street
Urbana, IL 61801
PH: (217) 333-1880
http://geog.illinois.edu

The Department of Geography and Geographic Information Science offers:

The Bachelor of Arts in Liberal Arts and Sciences (BALAS) in Geography & Geographic Information Science with two concentrations:

- General Geography Concentration (p. 238)
  Geography majors integrate social science, physical science, and technology in their study of how humans use the Earth’s surface. Majors in Geography & GIS can sample courses from different subfields of geography without having to choose one specialty of the discipline. Upon completion, the students are prepared for diverse employment opportunities, or further studies in a geography graduate program.

- Human Geography Concentration (p. 239)
  The Human Geography concentration allows students to specialize in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences. Employment opportunities for human geographers include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

The Bachelor of Science in Liberal Arts and Sciences (BSLAS) in Geography & Geographic Information Science with two concentrations:

- Geographic Information Science (GIS) Concentration (p. 238)
  The GIS concentration emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS concentration provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth’s systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

- Physical Geography Concentration (p. 240)
  The Physical Geography concentration examines the earth sciences including patterns of climates, land-forms, vegetation, soils, and water. Graduates of our physical geography concentration will be equipped for careers in infrastructure development, land and water resources management, and surveying.

The department also offers a minor in Geography & GIS that exposes students to a comprehensive selection of courses embracing our three broad areas of study: human geography, physical/environmental geography, and geographic information science.

Students must select from the following in consultation with our academic advisor.

Email: ggis-advisor@illinois.edu.

- Geography & Geographic Information Science, BALAS, General Geography Concentration (p. 238)
- Geography & Geographic Information Science, BSLAS, Geographic Information Science Concentration (p. 238)
- Geography & Geographic Information Science, BALAS, Human Geography Concentration (p. 239)
- Geography & Geographic Information Science, BSLAS, Physical Geography Concentration (p. 240)

Minor in Geography and GIS

The minor in Geography and GIS will expose students to a comprehensive selection of courses embracing our three broad areas of study: human geography, physical/environmental geography, and geographic information science. Students select 6 hours at the 100 level, then 3 hours each from the human, physical/environmental, and geospatial sub-disciplines (as listed below), and then 3 additional hours from any of the three sub-disciplines for a total of 18 credits. At least 6 hours total must be at the 300 or 400 level.

One course in physical/environmental geography, selected from the following:

- GEOG 210: Social & Environmental Issues
- GEOG 215: Resource Conflicts
- GEOG 222: Big Rivers of the World
- ESE 320: Water Planet, Water Crisis
- GEOG 381: Environmental Perspectives
- NRES/GEOG 401: Watershed Hydrology
- GEOG 405: Geography Field Course
- GEOG 406: Fluvial Geomorphology
- GEOG 408: Humans and River Systems
- GEOG 412: Geospatial Tech & Society
- GEOG 459: Ecohydraulics
- GEOG 481: Intl Environ Cooperation
- GEOG 493: Democracy and Environment
- GEOG 496: Climate & Social Vulnerability

One course in geographic information science, selected from the following:

- GEOG 371: Spatial Analysis
- GEOG 379: Intro to GIS Systems
- GEOG 412: Geospatial Tech & Society
- GEOG 440: Business Applications of GIS
- PATH 439: Health Applications of GIS
- GEOG 460: Aerial Photo Analysis
- GEOG 468: Biological Modeling
- GEOG 473: Digital Cartography & Map Design
- GEOG 476: Applied GIS to Environ Studies
- GEOG 477: Introduction to Remote Sensing
- GEOG 478: Techniques of Remote Sensing
- GEOG 479: Advanced Topics in GIS
- GEOG 480: Principles of GIS

One 200-400 level course selected from any of the above. 3

Total Hours 18

At least 6 hours total must be at the 300 or 400 level.

**Geography and Geographic Information Science, B.A.L.A.S.**

https://www.geog.illinois.edu/students/undergrad

**General Geography Concentration**

E-mail: geograph@illinois.edu

A minimum of 35 credit hours of Geography and Geographic Information Science courses are required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in Geography and Geographic Information Science can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

For distinction: 3.3 GPA overall; 3.3 GPA in GGIS courses.

For high distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses.

For highest distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses; satisfactorily complete an independent project (GEOG 391).

Students should consult their advisors regarding distinction requirements as soon as they enter the major (no later than the end of their junior year).

& Geographic Information Science,  
BALAS  

Major in Computer Science and Geography & Geographic Information Science  

Computer Science email: academic@cs.illinois.edu  

Geography and GIS email: ggis-advisor@illinois.edu  

Minimum required major and supporting course work normally equates to 66 hours.  

General education: Students must complete the Campus General Education requirements including the campus language requirement.  

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.  

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office by the beginning of the fifth semester (60-75 hours). Please see the computer science advisor as well as the geography advisor.  

Minimum hours required for graduation: 120 hours

1 CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.

Geology

Tom Johnson
3028 Natural History Building
1301 W. Green St.
Urbana, IL 61801
PH: (217) 333-3540
http://www.geology.illinois.edu

The Sciences and Letters Curriculum in Geology (BSLAS), administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

The Specialized Curriculum in Geology (BS) is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor’s degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

The Department of Geology also sponsors the Minor in Geology.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

• Major in Geology (Sciences and Letters) (p. 242), Earth Science Teaching Concentration (p. 242)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

• Major in Geology (Specialized Curriculum) (p. 245)
• Major in Geology (p. 246) (Specialized Curriculum) (p. 246), Geophysics Concentration (p. 246)
• Major in Geology (p. 244) (Specialized Curriculum) (p. 244), Environmental Geology Concentration (p. 244)

Minor in Geology

The geology minor is designed for students who desire a significant background in Geology to support study and practice of their major field. Selection of courses at the 300- or 400-level will depend on the major and interests of the student.

1 Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Earth Science Teaching Concentration

https://www.geology.illinois.edu/undergraduate

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Geology (Sciences and Letters), Earth Science Teaching Concentration

E-mail: geology@illinois.edu

Minimum required course work normally equates to 55-59 hours in the concentration and 39 hours for the Teacher Education Minor in Secondary School Teaching.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school (grades 9-12) Earth and Space Science through the AP/honors level and biology, chemistry, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: The student must have a grade-point average of at least 3.5 in all geology courses as well as all courses in the Teacher Education Minor and a GPA of at least 3.0 in all other science and mathematics courses and must present evidence of exemplary teaching.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration

E-mail: geology@illinois.edu

Minimum required coursework normally equates to 43 hours including at least 26 hours in Geology.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least four hours of credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Information listed in this catalog is current as of 07/2019
Environmental Geology Concentration

https://www.geology.illinois.edu/undergraduate

For the Degree of Bachelor of Science in Geology
Major in Geology (Specialized Curriculum), Environmental Geology Concentration

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

E-mail: geology@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours

Departmental distinction: Students who maintain a grade point average of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least 4 hours credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

GEOL 417 is a 6-hour summer field course taught off campus.
## Geology (Sciences and Letters)

For the Degree of Bachelor of Science in Liberal Arts and Sciences

**Major in Geology (Sciences and Letters)**

E-mail: geology@illinois.edu

Minimum required course work normally equates to 47-52 hours including at least 26 hours in Geology.

*General education:* Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

**Departmental distinction:** Students who maintain grade point averages of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least four hours of credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

### Code | Title | Hours
--- | --- | ---
GEOL 107 | Physical Geology | 4
GEOL 208 | History of the Earth System | 4
CHEM 102 | General Chemistry I | 3
CHEM 103 | General Chemistry Lab I | 1
Select one of the following MATH courses: | 4-5
MATH 220 | Calculus | 4
or MATH 221 | Calculus I | 5
MATH 234 | Calculus for Business I | 5
Additional requirements beyond the core requirements:
CHEM 104 | General Chemistry II | 3
CHEM 105 | General Chemistry Lab II | 3
PHYS 101 | College Physics: Mech & Heat | 4-5
or PHYS 211 | University Physics: Mechanics | 5
GEOL 411 | Structural Geol and Tectonics | 4
GEOL 417 | Geol Field Methods, Western US | 6
GEOL 432 | Mineralogy and Mineral Optics | 4
GEOL 436 | Petrology and Petrography | 4
GEOL 440 | Sedimentology and Stratigraphy | 4
Three to four hours of advanced Geology or cognate science elective | 3-4

1. Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

2. An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended.

3. GEOL 417 is a summer field course taught off campus.
Geophysics Concentration

https://www.geology.illinois.edu/undergraduate

For the Degree of Bachelor of Science in Geology

Major in Geology (Specialized Curriculum), Geophysics Concentration

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

E-mail: geology@illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours

Departmental distinction: Students who maintain a grade point average of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least 4 hours credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

1 Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

2 Students transferring into the geology concentration from another science or engineering program may substitute up to 8 hours of 300- or 400-level science or engineering credits for 8 hours of 300- or 400-level geology courses with departmental approval.

3 GEOL 417 is a 6-hour summer field course taught off campus.
Germanic Languages and Literatures

Laurie Johnson, Acting Head
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-1288
http://www.germanic.illinois.edu

The Department of Germanic Languages and Literatures offers the following majors and minors along with study abroad programs:

The BALAS in Germanic Studies serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, and science. Students specialize in one of the following concentrations:

- German Culture and Literature Concentration
- German Business and Commercial Studies Concentration
- German Linguistics Concentration
- Scandinavian Studies Concentration

The BA in the Teaching of German prepares student to teach in German.

The 5 year BALAS/MA in Germanic Studies allows students to receive two degrees, a BALAS in Germanic Languages and Literatures and an MA in German.

The minor in German offers students a background in the language through the advanced undergraduate level, an introduction to the study of German literary classics, and a knowledge of the history of German culture.

The minor in Scandinavian Studies offers students exposure to the study of a Scandinavian language and broad knowledge of Scandinavian culture, literature, film, art, and history.

The 5 Year BALAS/MA in German and European Union Studies allows students to receive two degrees, a BALAS in Germanic Studies and an MA in European Union Studies.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, Major in Germanic Studies

Students must select one concentration in consultation with an adviser.

- German Culture and Literature Concentration (p. 250)
- German Business and Commercial Studies Concentration (p. 250)
- German Linguistics Concentration (p. 249)
- Scandinavian Studies Concentration (p. 249)

For the Degree of Bachelor of Arts in the Teaching of German

Curriculum Preparatory to the Teaching of German (p. 247)

5 year BALAS/MA in Germanic Studies

The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Studies and an MA in German. In order to be admitted to this program, student can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their second year, students will need to be in good standing, have finished GER 211 and GER 331, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their third year, students will have to have finished GER 401 and GER 420, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students’ admission to the 5-year program will be made by the graduate admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

5 Year BALAS/MA in German and European Union Studies

The Department of Germanic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in German (including a Scandinavian Studies Concentration) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the standalone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

- Minor in German (p. 248)
- Minor in Scandinavian Studies (p. 248)

Curriculum Preparatory to the Teaching of German

http://www.germanic.illinois.edu/undergraduate/

For the Degree of Bachelor of Arts in the Teaching of German

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: german@illinois.edu

Scandinavian Studies Concentration

http://www.germanic.illinois.edu/undergraduate/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Germanic Studies, Scandinavian Studies Concentration

E-mail: german@illinois.edu

Minimum required major and supporting course work normally equates to 41-42 hours with at least 29 credit hours of Scandinavian courses beyond SCAN 101-102.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

Designed for students with a broad interest in Scandinavian Studies, including acquiring proficiency in a modern Scandinavian language. Fulfilling the requirements for the Major usually involves one semester of study abroad at a Scandinavian university.

5 Year BALAS/MA in Global Studies and European Union Studies

The LAS Global Studies program with the European Union Center offers a business, law, finance, education, and communications.

This program of study was developed in response to the growing demand for knowledge and skills necessary to analyze and solve contemporary world problems. In consultation with an advisor, students select courses from a variety of departments to form a coherent program of study suited to individual interests, educational and career aspirations. The Global Studies minor can complement any major.

The Global Markets and Society minor enables students at the University of Illinois to gain interdisciplinary knowledge of global market-society relations through historical and global perspectives that emphasize the social, political, and economic forces that shape market institutions and practices. A professional development capstone experience course is optional and can be met by completing an internship or participating in a research experience and/or written project. The LAS Global Markets and Society Minor is open to undergraduate students in any major at the University of Illinois at Urbana-Champaign campus.

Global Studies

Zsuzsa Gille, Director
702 S. Wright St, 3062 Lincoln Hall
MC-442
Champaign, IL 61820
http://globalstudies.illinois.edu

The Global Studies major develops knowledge sets, skills and values necessary for the analysis and solution of contemporary world problems. The requirements of the major enrich, complement, and coordinate departmental offerings with the goals of:

- providing knowledge of diverse cultures: their social, economic and political interactions and impacts on the world;
- developing skills for successfully negotiating realities of contemporary societies;
- fostering values that respect diverse ways of living and deepen commitment to sustainability.

The Global Studies major is interdisciplinary, drawing upon the resources of faculty and departments across the university. The major has three elements. The Foundations requirement introduces a variety of global issues and skills necessary for their analysis. The Language and Culture requirements allow students to develop area expertise in one world region through on-campus coursework and a semester-long study abroad. The Thematic Area focuses student programs on a topic of global importance to allow for an in-depth and multidisciplinary understanding of relevant historical and emerging issues, how they are analyzed and addressed. Students work with an advisor to customize the major curriculum most appropriate to their individual interests and career plans.

This program of study was developed in response to the growing demand for knowledge and skills to successfully navigate concerns at international and global levels. The competencies established through this program are critical for students preparing for careers or further study in a variety of fields including international affairs, public policy, business, law, finance, education, and communications.

The LAS Global Studies program with the European Union Center offers a 5 Year BALAS/MA in Global Studies and European Union Studies.

Global Studies also offers two undergraduate minors.

The Global Studies minor develops the interdisciplinary knowledge and intercultural skills necessary to analyze and solve contemporary world problems. In consultation with an advisor, students select courses from a variety of departments to form a coherent program of study suited to individual interests, educational and career aspirations. The Global Studies minor can complement any major.

The Global Markets and Society minor enables students at the University of Illinois to gain interdisciplinary knowledge of global market-society relations through historical and global perspectives that emphasize the social, political, and economic forces that shape market institutions and practices. A professional development capstone experience course is optional and can be met by completing an internship or participating in a research experience and/or written project. The LAS Global Markets and Society Minor is open to undergraduate students in any major at the University of Illinois at Urbana-Champaign campus.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Global Studies

E-mail: globalstudies@illinois.edu

Minimum required major and supporting course work equates to 51-52 hours and includes a semester-long full time study abroad program and a minimum of 12 hours of 300- and 400-level courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who successfully completes 3 hours of GLBL 494 or other approved research methods course and who completes a distinction research project. See the departmental academic advisor for details.

Total hours: 43
Minor in Global Markets and Society

The LAS Global Markets and Society Minor enables students at the University of Illinois to gain interdisciplinary knowledge of global market-society relations through historical and global perspectives that emphasize the social, political, and economic forces that shape market institutions and practices. The minor requires 18-21 hours of coursework completed through six courses, with a minimum of six hours at the advanced level (300- or 400-level). A professional development capstone experience course is optional and can be met by completing an internship or participating in a research experience and/or written project.

Area Studies. 200- to 400-level courses which complement the language requirement must include work in at least two disciplinary departments. Area Studies and Language must be geographically related and correspond to language and study abroad location.

One Semester (Fall or Spring) Study Abroad. Students study a variety of subjects in an approved study abroad program that furthers their language and cultural knowledge or their cultural knowledge and thematic area knowledge. Students must be enrolled full-time to receive credit toward this requirement.

Thematic Area Requirements

Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum of a minimum of 18 hours. Students cannot include more than 3 hours of 100-level work and must complete 9 hours of 300- and 400-level coursework. Courses must be taken from more than one department.

Approved thematic areas are:

A. Cultures in Contact
B. Wealth and Poverty in a Globalized World
C. Human Rights
D. Governance, Conflict and Resolution
E. Knowledge, Communication and Information Systems
F. Environment, Sustainability, and Social Responsibility
G. Global Health

Optional Senior Capstone. Students do an individual research project (GLBL 200, 494 and GLBL 495) based on their Thematic Area.

Total Hours 51-52

5 Year BALAS/MA in Global Studies and European Union Studies

The Program in Global Studies with the European Union Center offers a 5-year BALAS /MA degree program in Global Studies and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Global Studies Minor (p. 253)

Global Markets and Society Minor (p. 252)

Applications Requirements and Procedures

Completion of 30 hours of undergraduate coursework by the end of the Spring semester of application.

Students are admitted by application into the LAS Global Markets and Society Minor. Interested students will be asked to demonstrate a commitment to the program through (a) completing an application to the program, including a written statement of goals for participation in the program and/or evidence of or commitment to participation in activities designed to enhance leadership, and (b) developing a program plan with the program coordinator and/or their academic advisor prior to admission.

Only students officially admitted into the LAS Global Markets and Society Minor may earn the minor.

Core Courses

Choose 2 from the following list (Courses used in the core cannot be used again in your Specialization Track)

CMN 211 Business Communication
CS 105 Intro Computing: Non-Tech
ECON 102 Microeconomic Principles
GEOG 205 Business Location Decisions
HIST 259 20thC World from Midcentury
PS 220 Intro to Public Policy
PSYC 245 Industrial Org Psych
SOC 160 Global Ineq and Social Change

Specialization Track

Choose three courses in your track. At least 2 of the 3 courses must be at the 300- or 400-level. Alternate courses may be considered on a case-by-case basis.

Students choose courses from a list maintained by LAS Global Studies, and reviewed annually by the Global Markets and Society Advisory Committee. (http://www.globalstudies.illinois.edu/current/academics/globalmarket)

Global Markets and Governance. The economy is intricately connected to institutions at the local, national, and international levels that affect market practices and outcomes. This track focuses on the institutions and social relations that govern global market practices.

Science, Technology, and Markets. Technological innovations in transportation and communications are driving business location decision-making and operations at the global scale. This track is aimed at science and technology majors with entrepreneurial ambitions as well as students in the social sciences and humanities investigating the interface between science, technology, and society.
Global Encounters. Participation in the global economy requires firms to be geographically dispersed and capable of partnering with a global audience of stakeholders. This track is focused on the historical and cross-cultural understanding necessary to engage in global markets.

Markets, Development, and the Environment. Global markets can create positive environmental outcomes in the locations where they operate. This track focuses on the challenges in designing, building, and evaluating sustainable environmental and development outcomes, including ecological modernization, market environmentalism, and political ecology.

The Global Workforce. Global production systems depend on the effective organization and participation of workers in the global workforce. This track focuses on human resources, organizational structures, and group communication in the contexts of working class history and global labor markets.

Analytical Approaches & Languages. Investigating global market-society relations requires a basic level of competence in communication skills, research methods, and analytical techniques. This track offers students a range of market language, methods, and skills oriented courses that build such competency.

OPTIONAL Professional Development Capstone Experience (3 hours)

Choose one option in consultation with the Global Markets and Society minor advisor:

- Internship or Field Experience in a market-focused organization
- Research Experience with a Faculty Member
- Analytical/Research Paper with Faculty Guidance

Credit is awarded for each of these three options on the basis of an analytical/research paper written by the student under the supervision of a faculty adviser

Total Minimum Hours 18

Minor in Global Studies

http://www.globalstudies.illinois.edu/current/academics/minor/

The Global Studies Minor provides a multidisciplinary study of a global theme with the requirement of advanced language training to promote the development of intercultural skills. In consultation with an advisor, students select 21 hours of thematically-related courses from a variety of departments to form a coherent program of study suited to individual interests, educational and/or career aspirations. The Global Studies Minor can complement any major.

E-mail: globalstudies@illinois.edu

History

Clare Crowston, Chair of Department
309 Gregory Hall, 810 South Wright, Urbana
PH: (217) 333-1155
http://history.illinois.edu

Administered by the Department of History, students in the history major should acquire a broad background from the study of the human experience in different cultures and time periods. A wide distribution of courses is therefore advisable. This is especially true for those who wish to enter government service, or professional schools for law, social work, museum and library science, business administration, or labor and industrial relations. The Social Science: History Teaching Concentration (p. 254) prepares students to teach social studies in Secondary School. The department also offers an undergraduate minor.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in History

Students must select one of the following:

- Major in History (p. 253)
- Major in History, Social Science: History Teaching Concentration (p. 254)

Minor in History

A history minor is designed for students who desire to understand the historical background of their major field or to pursue a passion for history in conjunction with any major at the university. Selection of courses will depend on the major and on the interests of the student.

E-mail: history@illinois.edu

For the Degree of Bachelor or Arts in Liberal Arts and Sciences

Major in History

E-mail: history@illinois.edu

Departmental distinction:

To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 495, HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. the completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only (not high or highest distinction).

Requirements

Minimum required major coursework normally equates to 36 hours of History courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Major in History, Social Science: History Teaching Concentration

E-mail: history@illinois.edu

Students are required to take a minimum of 36 hours in History courses. Only one of the following Advanced Composition courses (HIST 140, HIST 143, HIST 170, HIST 173) will count toward the 36 hours required in History courses.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level History courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters, but some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 495, HIST 492 and successful completion of either...
1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. the completion of two approved independent research projects under the supervision of two different advisors (HIST 490) (in which case, students will be eligible for an award of distinction only [not high or highest distinction]).

- HIST 172 US Hist Since 1877
- HIST 173 US Hist Since 1877-ACP

One additional History course (HIST 200 - Intro Hist Interpretation is required for the major and recommended for transfer into the program)

**Integrative Biology, School of**

Carla Caceres
286 Morrill Hall, 505 South Goodwin Avenue, Urbana
PH: (217) 333-3044
http://sib.illinois.edu/

Students in Integrative Biology (http://sib.illinois.edu/undergraduate/programs) focus on the disciplines of genetics, physiology, behavior, ecology and evolution. In Integrative Biology, the emphasis is on bringing multiple disciplines to bear on complex scientific questions. From genomics to global change, Integrative Biology seeks to discover the complex interrelationships between organisms and the physical and biological environment in which they live. This major prepares students for careers in medicine and the health professions, research, organisms, and the environment. The School of Integrative Biology also sponsors two minors. The Minor in Integrative Biology is designed for students intending to have a career for which a background in integrative biology is complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. The Minor in Ecology and Conservation Biology prepares students for diverse careers, including environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

**Major in Integrative Biology**

Students must select one of the following:

- Major in Integrative Biology (p. 255)
- Major in Integrative Biology, Honors Integrative Biology Concentration (p. 256)
- Minor in Integrative Biology (p. 258)
- Minor in Ecology and Conservation Biology (p. 257)

Integrative Biology

http://sib.illinois.edu/undergraduate/programs
For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Integrative Biology
E-mail: sib@illinois.edu

The Integrative Biology major provides students with a solid preparation in genetics, evolution, anatomy, physiology, ecology, and molecular biology. After completion of the foundational 100- and core 200-300-level courses in IB, students complete the required advanced coursework by taking a variety of IB and other courses or focusing on a limited area of IB. Plans for the student’s combination of advanced courses are developed in consultation with an adviser.

All undergraduates in this field are required to have a strong background in the biological and physical sciences. Students who do not begin mathematics, chemistry, and biology in their freshman year generally will be at a disadvantage.

Students pursuing a degree in Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Minimum Required Courses normally equate to 66-76 hours.

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum Hours Required for Graduation: 120 hours

Integrative Biology Distinction: To be eligible for distinction a student must graduate with a grade-point average of at least 3.25 and submit a report of an independent student project (IB 490) about two months prior to graduation for approval by the Integrative Biology Distinction Committee. For additional information visit: http://sib.illinois.edu/undergraduate/distinction

At least 14 hours of coursework from the Approve List of Advanced Courses for IB majors, including:

At least one course from two of the following three areas:
Area I: Organismal and Evolutionary Biology
Area II: Behavior, Ecology, and the Environment
Area III: Integrative Anatomy, Physiology, and Molecular Biology

One advanced course with a laboratory and/or field component.

¹ The Biocalculus section of MATH 220 is strongly recommended for IB Majors.
² IB 202 requires animal dissection and no equivalent alternative is available. IB majors are required to enroll in the 4-hour version of this course.
³ IB majors are required to enroll in the 4-hour version of IB 204.

Honors Integrative Biology Concentration

http://sib.illinois.edu/undergraduate/programs

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Integrative Biology, Honors Integrative Biology Concentration

Honors Integrative Biology is designed for superior students wishing to pursue an intensive program in integrative biology and, concurrently, to gain a strong background in the physical sciences and mathematics. Admission is by interview in spring of the freshman year prior to graduation. An overall 3.0 GPA is required to apply for admission. Honors Integrative Biology provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors.

E-mail: honors@sib.illinois.edu (ibhonors@life.illinois.edu)

Minimum required courses normally equate to 80-91 hours.

Students earning the Honors Integrative Biology Concentration will also earn the Chemistry minor.

Students pursuing a degree in Honors Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Honors Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.
General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

No more than 8 hours of credit in 100-level courses in IB or MCB may be counted toward graduation.

Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.

Substitutions or other changes in the requirements below may be made only by petition to and approval of the director of the Honors Integrative Biology Concentration.

Minimum hours required for graduation: 120 hours

Departmental distinction: Candidates for distinction must:

1. Consult with an IB Honors adviser no later than the beginning of their junior year to discuss their proposed research plan.
2. Have a minimum GPA of 3.25 when applying for distinction.
3. Present an acceptable written report on the research to the Integrative Biology Distinction Committee about two months prior to graduation. The research must have been an in-depth experience and produced substantial results to be considered eligible for distinction.

Additional details on requirements, procedures, and deadlines are available at sib.illinois.edu/undergraduate/distinction (http://sib.illinois.edu/undergraduate/distinction).

Students must consult with their Integrative Biology honors adviser at least once each semester.

### Minor in Ecology and Conservation Biology

The minor, administered by the School of Integrative Biology, is designed for students interested in gaining strength in this subdiscipline of biology. Preparation for many careers is advanced by coursework in ecology and conservation, e.g., environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.

Students must contact an SIB advisor for acceptance into the minor. Web address for School advising information: sib.illinois.edu/undergraduate/advising/ (http://sib.illinois.edu/undergraduate/advising).

1. Continuation in the Integrative Biology Honors Concentration requires a grade of B or better in each of IB 270, IB 271, and IB 372 and a 3.0 overall cumulative GPA.
2. If IB 494 is taken instead of MATH 231, it will not count towards the requirement of 10 hours of 300- or 400-level courses in the biological sciences.
3. Introductory chemistry should be completed prior to enrolling in IB 270.
4. Recommended courses are: CHEM 312, CHEM 332, CHEM 360, CHEM 437, CHEM 440. Students should discuss alternate choices with the IB advising office. To earn the Chemistry minor students must choose 3 or 4 hour Chemistry courses, excluding research or independent study.

Recommended courses are: ATMS 421, ANSC 448, MCB 432 or IBH Director approved.

5. NRES 421 is recommended. Other suitable courses are CPSC 440 or STAT 400.
6. Independent study equivalent to IB 490 in non-IB programs must first be approved by Director of IBH Concentration.
Minor in Integrative Biology

The minor, administered by the School of Integrative Biology, is designed for students intending to have a career in a field other than biology, but for whom a background in biology is nevertheless complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. A minor in integrative biology provides an understanding of fundamental principles for one major subdiscipline of biology, whether this be organismal and evolutionary biology; behavior, ecology and the environment; or integrative anatomy, physiology, and molecular biology.

Students must contact an SIB advisor for acceptance into the minor.

Web address for School advising information: sib.illinois.edu/undergraduate/advising (http://sib.illinois.edu/undergraduate/advising)

</table>

Two additional courses at the 300 or 400 level (3-4 hours, some 5 hours) selected from the IB Area Courses. The prerequisite course(s) must be taken if specified by an advanced course. (http://sib.illinois.edu/courses/area)

Total Hours 16-20

Other possible combinations of courses are possible for the Integrative Biology minor, if an SIB advisor approves the combination.

Interdisciplinary Studies

Interdisciplinary Studies Majors

Departments in the College of Liberal Arts and Sciences, in addition to their own disciplinary majors, have developed and sponsor an interdisciplinary program of study, which encompasses several distinct programs designed to acquaint students in a coherent manner with topics that cross disciplinary boundaries. Administered by the College of Liberal Arts and Sciences, the interdisciplinary studies major includes program concentrations in Jewish Studies and Medieval Studies. Although it is not possible to offer concentrations in all specialties or topics of humanistic study, students whose interests do not coincide with one of the specific concentrations are encouraged to consider developing their own programs through the Individual Plans of Study (IPS) major. Enrollment in the major in interdisciplinary studies requires election of one of the concentrations. The College of Liberal Arts and Sciences also sponsors an Interdisciplinary Minor in Science and Technology in Society.

Each concentration of the major in interdisciplinary studies is supervised by faculty members whose own scholarship and educational interests have involved them in interdisciplinary teaching and research. An advisor for students is available in each concentration and is responsible for approving students’ plans of study.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Interdisciplinary Studies

Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

Requirements

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the distribution requirements listed below; at least 25 hours must be at the 200, 300 or 400 level.

- Jewish Studies Concentration (p. 259)
- Medieval Studies Concentration (p. 260)
Minors in Science and Technology in Society

The Interdisciplinary Minor in Science and Technology in Society requires students to integrate and synthesize a wide variety of materials. Students will enrich their experiences in diverse disciplines with a substantive engagement with science studies. Required courses in the minor emphasize critical and creative thinking and many courses require substantial writing and research. This minor is administered by the LAS Student Academic Affairs Office.

All courses must be selected in consultation with the adviser from the list of courses approved for the minor. No more than 3 hours of course work may be 100-level. Students must maintain a 3.0 GPA in course work in the minor.

Medieval Studies Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Interdisciplinary, Medieval Studies Concentration

Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Substitution for specific courses listed above will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

The Program in Medieval Studies (http://www.medieval.illinois.edu/education/undergrad) sponsors this concentration.

This concentration introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographic regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; (III) advanced medieval coursework selected by the student in consultation with a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a diverse range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study in Medieval Studies should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

### Additional Medieval Studies Coursework

Information listed in this catalog is current as of 07/2019
Medieval-related coursework from participating departments selected in consultation with the concentration advisor. At least 12 hours must be at the 300- or 400-level. A list of courses in Medieval Studies is maintained on the Medieval Studies Program website. Up to 12 hours of appropriate language study can be applied to meet this requirement with approval of a Medieval Studies faculty advisor. 

Capstone Experience

A capstone experience (normally in the student's senior year) involving intensive interdisciplinary research and writing on a medieval topic. Any 400-level MDVL course (or medieval-related course not cross-listed with MDVL, with the approval of a Medieval Studies faculty advisor) can be designated as a capstone experience with approval of the instructor. For the course to qualify as a capstone experience, the student must undertake a substantial research project that supplements the standard course requirements, in the form either of an additional project or of a longer and more research-intensive version of an existing course project. The project must involve both primary and secondary research using advanced disciplinary methodologies and resources.

Total Hours 45

1 A student may substitute the "Medieval World" section of HIST 100, by petition to a Medieval Studies faculty advisor. Only the section of HIST 100 devoted to the Middle Ages may be substituted.
2 A student may substitute up to 6 hours in geographical distribution coursework with courses on the medieval civilizations of the Americas: ANTH 277, ANTH 278, or both. However, at least one course must still be taken from each of the three regional areas.
3 List of courses to fulfill Additional Medieval Studies Coursework.
(http://www.medieval.illinois.edu/education/undergrad)
4 A student may also petition to satisfy the capstone experience by enrolling in MDVL 500, Seminar in Medieval Studies. Enrollment requires approval of the instructor and Director of the Program in Medieval Studies.

Jewish Culture and Society, Program in

</table>

One course in the cluster of Religion, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.

One course in the cluster of History, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.

Electives within the minor. Students may choose additional courses from any of the three clusters or can choose from the following language courses:

- HEBR 199 Undergraduate Open Seminar
- HEBR 205 Intensive Biblical Hebrew
- HEBR 403 Intermediate Modern Hebrew I
- HEBR 404 Intermediate Modern Hebrew II
- HEBR 405 Advanced Modern Hebrew I
- HEBR 406 Advanced Modern Hebrew II
- HEBR 407 Topics Hebrew Lang & Lit I
- HEBR 408 Topics Hebrew Lang & Lit II
- YDSH 103 Intermediate Yiddish I
- YDSH 104 Intermediate Yiddish II

Total Hours 18

Of the 18 required hours, two courses (6 hours) must be 300- or 400-level courses. HEBR 403 and HEBR 404 cannot be used to satisfy this requirement.

1 HEBR 403 and HEBR 404 cannot be used to satisfy LAS Advanced Hours requirement (http://www.las.illinois.edu/students/requirements/minimum) or the 6 hours of 300- or 400-level courses for the Jewish Culture and Society Interdisciplinary Minor.

No more than 6 hours (two courses) may be at the 100 level.

The 18 hours selected by students for a minor in Jewish Culture and Society should form a coherent program and must be approved by the undergraduate advisor for the Program in Jewish Culture and Society.

A list of courses, regularly updated by the Program in Jewish Culture and Society, is available from the Program Office (http://www.jewishculture.illinois.edu). 109 English Bldg., 608 South Wright Street, Urbana, Illinois, 61801.

Latin American and Caribbean Studies, Center for

Andrew Orta, Acting Director
201 International Studies Building, 910 South Fifth Street, Champaign
PH: (217) 333-3182
http://clacs.illinois.edu

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student's interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken from these categories:
1. LAST 170-Introduction to Latin American Studies;
2. Approved courses with content focused on Latin America;
3. Approved courses with content focused on Latin America in a global context;
4. LAST 490 - Independent Study, or approved Study Abroad course, or approved service-learning course.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to MesoAmerica or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

**For the Degree of Bachelor of Arts in Liberal Arts and Sciences**

**Major in Latin American Studies**

E-mail: clacs@illinois.edu

Minimum required major and supporting course work equates to 33 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Each student’s course of study is devised in consultation with the Associate Director of the Center for Latin American and Caribbean Studies and is subject to the Associate Director’s approval.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be eligible, a student must achieve at least a 3.5 grade point average in the major, complete a senior thesis, and receive the approval of the center’s research committee.

2. Normally taken in the senior year.

**Interdisciplinary Minor in Latin American Studies**

The Center for Latin American and Caribbean Studies offers an interdisciplinary minor for students majoring in another discipline. The minor in Latin American Studies consists of a total of 21 credit hours selected from offerings by the Center and various departments. This program must be approved by the Associate Director.

The minor is for those students who wish to concentrate their work in a specific discipline yet maintain a Latin American focus in their coursework. For students completing a major sponsored by the College of Liberal Arts and Sciences, the department or unit sponsoring the student’s major must approve the minor.

E-mail: clacs@illinois.edu

The Undergraduate Major in Latina/Latino Studies explores the experiences and lives of Latinas/os in the context of the United States. The major provides a broad and deep approach to theory, research, and
multidisciplinary study of the Latina/o experience. Students will complete 34 hours of required and elective courses, and a minimum of 18 hours of supporting course work or a minor in an area outside of the major. Students majoring in Latina/Latino Studies receive excellent preparation for graduate study or careers in education, social and welfare policy, counseling, law, public policy, and other fields that address Latino issues.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Latina/Latino Studies

E-mail: aprodrig@illinois.edu

Minimum required hours: 52 hours required, including 34 hours in Latina/Latino Studies courses

General education: The LAS General Education requirements will fulfill the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Latina/Latino Studies courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Advising: The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

Twelve hours of 300- and 400-level Latina/Latino Studies courses must be 300 and 400-level courses.

No more than 3 hours may be at the 100 level and at least 6 hours must be at the 400 level.

Students must officially declare their minor by registering with the Latina/Latino Studies advisor.

Completion of the program requires a minimum grade point average of 2.75 (A+ = 4.0) in Latina/Latino Studies courses.

Linguistics

James Yoon
4080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-3563
http://linguistics.illinois.edu

The Department of Linguistics offers undergraduate instruction of four types: courses in linguistics, in English as an International Language, English as a Second Language, and in non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest not only to linguistics majors, but to students in any field where the analysis of languages is important: anthropology, speech and hearing science, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages, and are useful to any students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with literatures and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture.
Undergraduate Major offered by the Department of Linguistics

- Linguistics

In addition, students may pursue linguistics as part of the LAS Major in Computer Science and Linguistics (p. 320).

Undergraduate Minors offered by the Department of Linguistics

- Arabic Studies
- English as a Second Language
- Hindi Studies
- Linguistics
- Sub-Saharan African Languages
- Teacher Education Minor in English as a Second Language

Languages Offered by the Department of Linguistics

- African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu)
- Arabic
- Hindi
- Modern Greek
- Persian
- Sanskrit
- Turkish

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Linguistics

For advising information please visit the Linguistics advising page.

Minimum major and supporting course work normally equates to 50-52 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Students must complete 21 hours of coursework at the 300- or 400-level, including at least 12 hours of 300- or 400-level linguistics courses on this campus. These courses may be included in the core courses or electives.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

- LING 225 Language, Mind, and Brain
- LING 250 Language Diversity in the USA

Major electives: 15 hours of Linguistics courses at the 200- to 400-level, chosen in consultation with the student’s advisor

Students must fulfill the LAS foreign language requirement, and in addition, complete at least 8 hours in a second foreign language. One of these languages must be a non-Western language chosen from the following list or approved in consultation with the student’s advisor: American Sign Language, Arabic, Bamana, Basque, Chinese, Hebrew, Hindi/Urdu, Japanese, Korean, Lingala, Persian, Quechua, Sanskrit, Swahili, Turkish, Wolof, Zulu. Courses used to complete this requirement may also be used to meet the requirement of "Courses in linguistically relevant areas," below.

Courses in linguistically relevant areas chosen in consultation with the student’s advisor. There are two ways of meeting this requirement:

A. The courses may come from any of the following disciplines: any foreign language, anthropology, classics, computer science, English, English as an international language, philosophy, psychology, speech and hearing science, communication.

B. Students desiring to specialize in the linguistics of a particular language should complete at least four semesters of instruction in that language beyond the elementary level, and a linguistics course or independent study focusing on the selected language or its language family.

Minor in English as a Second Language

This minor, sponsored by the Department of Linguistics, prepares a student to teach English overseas and in contexts other than U.S. public schools. Completion of the minor fulfills the course work requirement for a Certificate in Teaching English as a Second Language (TESL). To receive a Certificate in TESL and a letter of completion from the department, the student must apply for the Certificate after completing all certificate requirements. Students must declare their minor at the start of their study. The Certificate in TESL does not lead to ISBE State certification for K-12 Schools.

For advising information please visit the Linguistics advising page.

Code | Title | Hours
--- | --- | ---
LING 100 | Intro to Language Science | 3
LING 400 | Intro to Linguistic Structure | 3

Minor in Hindi Studies

The minor in Hindi Studies is designed for students interested in receiving training in processing and using Hindi in a wide variety of authentic (from informal to institutional) contexts. Students will be encouraged to read authentic Hindi material from different genres and registers (including Hindi print media). Completion of the minor requires at least 19 hours in applicable courses. For advising information please visit the Linguistics advising page.

Code | Title | Hours
--- | --- | ---
HNDI 404 | Intermediate Hindi II | 10
HNDI 405 | Advanced Hindi I | 10
HNDI 406 | Advanced Hindi II | 10

PERS 202 | Elementary Persian II | 3
HNDI 408 | Intro to South Asian Lit | 3

Students with prior knowledge of any of the languages mentioned above can also meet the 3-5 credit requirement by taking upper level courses of the languages.

Total Hours 19-21

Minor in Linguistics

The Linguistics Minor is designed for students who seek a basic familiarity with the field and is especially suited for students with majors in foreign language and other language-related fields such as anthropology, computer science, English, psychology, communication, and for anyone interested in the nature of language.

For advising information please visit the Linguistics advising page.

Information listed in this catalog is current as of 07/2019
Minor in Sub-Saharan African Languages

The minor in Sub-Saharan African Languages is designed for students who are interested in developing proficiency in any one of the languages for which there is faculty expertise, and to develop their understanding of the region, as a complement to their disciplinary major. Available African Languages include: Bamana, Lingala, Swahili, Wolof and Zulu. Completion of the minor requires at least 18 hours.

For advising information please visit the Linguistics advising page.

Teacher Education Minor in English as a Second Language

For those in another teacher education curriculum who want to prepare themselves to gain an ESL approval on their teacher's certificate related to their major field. Teacher education minors are available only to students seeking to add additional teaching fields to their teaching majors.

Students are advised that additional course work is necessary to teach middle grades six through eight. Consult the certification officer at 505 East Green suite 203 for additional information. For advising information please visit the Linguistics advising page.

Mathematics

Jeremy Tyson, Department Chair
273 Altgeld Hall, 1409 West Green, Urbana
PH: (217) 333-3350
http://math.illinois.edu

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 during the first semester. Admission to MATH 220 requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

The Department of Mathematics sponsors the Mathematics major, including the Teaching of Mathematics concentration; the Mathematics minor; Teacher Education Minor in Math, Grades 9-12; the Actuarial Science (p. 267) major; and a major in Mathematics and Computer Science (p. 270) in coordination with the Department of Computer Science.
The Department of Mathematics offers the following majors:

Actuarial Science (p. 267)- an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management.

Mathematics- Students must select one of the following in consultation with their adviser:

- Major in Mathematics (p. 269)
- Major in Mathematics, Graduate Preparation Concentration (p. 268)
- Major in Mathematics, Applied Mathematics Concentration (p. 267)
- Major in Mathematics, Operations Research Concentration (p. 271)
- Major in Mathematics, Mathematics Teaching Concentration (p. 272)

Mathematics and Computer Science (p. 270)- Prepares students for professional or graduate work in mathematics and computer science.

- Minor in Mathematics (p. 270)
- Teacher Education Minor in Mathematics, Grades 9-12 (p. 272)

Actuarial Science
https://math.illinois.edu/academics/actuarial-science

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management. See also Mathematics (p. 266) and Mathematics and Computer Science (p. 270).

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Actuarial Science
E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 57-59 hours including 29-30 hours of mathematics beyond calculus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for distinction, the student must take ASRM 472 (formerly MATH 472), have a grade point average in mathematics courses of at least 3.25, and pass at least two examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least three professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

Applied Mathematics Concentration
https://math.illinois.edu/academics/undergraduate-program-mathematics

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Mathematics, Applied Mathematics Concentration
E-mail: mathadvising@illinois.edu
Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

### Graduate Preparation Concentration

https://math.illinois.edu/academics/undergraduate-program-mathematics

One additional 400- or 500-level Math course 3

Total Hours 49-52

1 Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.

2 Beginning in Fall 2012, students may not receive credit for both MATH 416 and either ASRM 406(formerly MATH 410) or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of ASRM 406(formerly MATH 410) or MATH 415.

3 If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied.

4 If STAT 400 is completed, a requirement for the Operations Research concentration has been satisfied.
Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Mathematics
https://math.illinois.edu/academics/undergraduate-program-mathematics

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Major in Mathematics
E-mail: mathadvising@illinois.edu

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Minimum hours required for graduation: 120 hours
Mathematics and Computer Science

https://math.illinois.edu/academics/undergraduate-program-mathematics

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Mathematics and Computer Science

E-mail: academic@cs.illinois.edu or mathadvising@illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following: CS 196, CS 296, CS 397, CS 492, CS 493, CS 499, any CS course numbered 411 or higher, MATH 412, MATH 414, MATH 417, MATH 418, MATH 423, MATH 432, MATH 482, MATH 484, MATH 496.

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

- CS/MATH 473 Algorithms
- CS/MATH 475 Formal Models of Computation
- CS 476 Program Verification
- CS 477 Formal Software Devel Methods
- CS 481 Advanced Topics in Stochastic Processes & Applications
- CS 482 Simulation

Minor in Mathematics

E-mail: mathadvising@illinois.edu

Web address for department: www.math.illinois.edu (http://www.math.illinois.edu)

Students must complete MATH 241, and at least one 400-level MATH course for admission into the minor. The Mathematics minor is designed to prepare students majoring in some other discipline with a background in mathematics that is both broad and deep. Students interested in pursuing the minor should have completed the calculus sequence through MATH 241, and one additional Math course at the 400-level demonstrating a strong record of success in college-level mathematics courses. Given the cumulative character of mathematics preparation, students earning grades of C or below in previous mathematics courses are advised not to pursue the minor.

Completed in one of two ways:

**Mathematics Teaching Concentration**

https://math.illinois.edu/academics/undergraduate-program-mathematics

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

**Major in Mathematics, Mathematics Teaching Concentration**

E-mail: mathadvising@illinois.edu

Minimum required course work normally equates to 80-84 hours including 27-29 hours of mathematics beyond calculus, 3-4 hours of computer science, and 39 hours for the Teacher Education Minor in Secondary School Teaching.

General education: Students must fulfill the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school math (grades 9-12) through the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters, with some students requiring 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A= 4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.
The globe from approximately the fourth through the fifteenth centuries

languages, religion, philosophy, art, and archaeology of cultures across

the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographical regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

### Interdisciplinary Minor in Medieval Studies

This minor introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographical regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

### Medieval Studies, Program In

Eleonora Stoppino, Director

4080 Foreign Languages Building

707 S. Mathews Avenue

Urbana, Illinois 61801

e-mail: medievalstudies@illinois.edu

PH: (217) 265-6254

FX: (217) 244-8430

http://medieval.illinois.edu

The purpose of the Program in Medieval Studies is to foster the interdisciplinary and cross-cultural study of the history, literature, languages, religion, philosophy, art, and archaeology of cultures across the globe from approximately the fourth through the fifteenth centuries.
**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

Students choose the Major in Molecular and Cellular Biology (p. 274) or the Major in MCB, Honors concentration (p. 275).

**For the Degree of Bachelor of Science in Biochemistry**

Major in Biochemistry (Specialized Curriculum) (p. 276)

**Minor in Molecular and Cellular Biology**

The minor, administered by the School of Molecular and Cellular Biology, is designed to provide students with an understanding of foundational principles of physiology, cellular and developmental biology, microbiology, molecular genetics and biochemistry. A minor in Molecular and Cellular Biology will prepare students for training in medicine and other health sciences, graduate studies in related disciplines, as well as for employment opportunities in pharmaceutical and biotechnology industries.

Students must contact an MCB advisor (https://mcb.illinois.edu/undergrad/advising) for acceptance into the minor. MCB 150 must be completed or in progress before acceptance into the minor.

Choose one additional 3-5 credit hour course from the approved list of 300- and 400-level courses for MCB majors.

Total Hours: 19-21

**Molecular and Cellular Biology**

http://mcb.illinois.edu/undergrad/

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

Major in Molecular and Cellular Biology

E-mail address: undergrad@mcb.illinois.edu

Minimum required courses: 67-71 hours, including 21 hours of 300- or 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus.

General Education requirements: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Certain advanced courses may be taken prior to completion of the MCB 250-MCB 253, MCB 354 sequence with permission of an academic advisor.
To be eligible for graduation with Distinction a student must:

Students in MCB can qualify for Distinction via one of the following:

- Double major in Integrative Biology.
- Students earning a degree in Molecular and Cellular Biology may not also earn a second degree in the Specialized Curriculum in Biochemistry.
- Minimum hours required for graduation: 120 hours.
  - Departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

In addition, undergraduate research (MCB 290, MCB 291 or departmental equivalent) is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290, MCB 291 or departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

Minimum hours required for graduation: 120 hours.

Students earning a degree in Molecular and Cellular Biology may not double major in Integrative Biology.

To be eligible for graduation with Highest Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with Academic Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with Academic Distinction a student must:

Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

Molecular and Cellular Biology Honors Concentration

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB concentration (p. 274). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (http://mcb.illinois.edu/undergrad/honors) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

**Distinction**

Students in MCB can qualify for Distinction via one of the following:

- Distinction for Excellence in Research:
- Distinction for Excellence in Academics:
- Distinction for Excellence in Research:
- Distinction for Excellence in Academics:

**To be eligible for graduation with Distinction a student must:**

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

**To be eligible for graduation with High Distinction a student must:**

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.
semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

- Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

- Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

Biochemistry (Specialized Curriculum)

For the Degree of Bachelor of Science in Biochemistry

Major in Biochemistry (Specialized Curriculum)

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

E-mail: biocug@mcb.uiuc.edu

Web address for department: http://mcb.illinois.edu/departments/biochemistry

All students must complete the General education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: A student seeking distinction must satisfy the following:

- Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.
- Earn at least a 3.25 grade-point average.
- Present a senior thesis to the department.

Select 10 hours of Advanced Science/Technical Electives (may include up to 7 hours of BIOC 492, Senior Thesis) from approved list.  5

Nontecnical Requirements:  6  variable

General education:
Foreign language - three semesters of college study (or three years of high school study) in a single foreign language to satisfy the campus foreign language requirement
Composition I writing requirement to satisfy the campus Composition I requirement
Advanced Composition writing requirement (BIOC 460 is required)

Humanities/Arts to satisfy the campus general education requirements
Social/Behavioral sciences to satisfy the campus general education requirements
Cultural Studies to satisfy the campus general education requirement

Electives (not including any credit in satisfaction of the above variable requirements)

1  Transfer credit must be approved by an advisor in biochemistry in order to be used to satisfy degree requirements.
2  A more detailed description of the requirements is listed in the Biochemistry Curriculum Handbook, available in room 419A of Roger Adams Laboratory.
3  PHYS 213 is not required if CHEM 442/CHEM 444 sequence is taken.
4  Freshman orientation course is under development and will be required. See advisor for details.
5  An approved list of current courses will be updated annually in January/February for the coming year. Contact advisor.
6  The requirements for the Campus General Education categories of Natural Sciences and Technology and Quantitative Reasoning I are fulfilled through coursework in the curriculum.

### Philosophy

Kirk Sanders, Department Head
105 Gregory Hall, 810 South Wright, Urbana
PH: (217) 333-2889
http://www.philosophy.illinois.edu/

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one’s ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

### For the Degree of Bachelor of Arts in Liberal Arts and Sciences

#### Major in Philosophy

E-mail: phildept@illinois.edu

Minimum required major and supporting course work normally equates to 44 hours including at least 32 hours of Philosophy courses

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Eligibility for distinction may be pursued by either:

1. the thesis option, which requires at least 35 hours of philosophy courses (including 5 courses at the 300- or 400-level), a grade point average of 3.5 in all philosophy courses, and writing a thesis; or
2. the course work option, which requires 38 hours of philosophy (including 8 advanced courses) and a 3.5 grade point average in all philosophy courses. For further information, inquire in the department office.

#### Code  Title  Hours

32 hours of Philosophy courses including:  1

<td></td>
</tr>
</tbody>
</table>
At least 15 additional hours of course work in philosophy, with 12 of those hours being above the 100 level (including at least two 300- or 400-level courses).

A student may select either of two types of programs of supporting course work and should work out a specific program of the type chosen with the help and approval of a departmental adviser.

Twelve hours minimum. Select from:

Option I: Intensive study in another discipline. Courses normally beyond the 100 level in one other discipline. Most approved minors satisfy this requirement. A second major may also be used to satisfy this requirement

or

Option II: A special program of study built around a unifying theme or topic. Course work outside philosophy in one or more other discipline(s), normally beyond the 100 level.

Total Hours 44

1 If possible, students should take these courses prior to the senior year. Substitutions may be made only with the approval of the chair of the department.

2 Those considering graduate work in philosophy should take PHIL 202.

In consultation with an advisor, choose 12 hours of philosophy courses, not more than one of which may be at the 100-level and at least two of which must be at the 300- or 400-level.

1 CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.

Political Science

Robert Pahre, Head of Department
420 David Kinley Hall, MC - 713, 1407 West Gregory Drive, Urbana, IL
PH: (217) 333-3881
http://www.pol.illinois.edu

The Department of Political Science helps students acquire a broad understanding of government and politics, political behavior, and public policy, as they develop mastery in one or more of the subfields of the discipline. The department provides courses of study that introduce students to the discipline and to its principal fields. Students also complete 12 hours of supporting coursework in a thematically-related...
field approved by an advisor. The supporting coursework requirement may be met by a second major or minor.

The subfields in political science are the following:

- Citizen Politics is the study of mass politics. Topics include how and why citizens form political attitudes, beliefs, and identities; how people engage in political decision-making; and what political behaviors individuals choose to participate in.

- Civic Leadership aims to provide students interested in careers in public life with an informed appreciation for American democracy, the values and structures on which it is based, and the challenges and opportunities it faces in the 21st century.

- International Relations is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors in the interstate system.

- Law and Power teaches students about how power, law, and ideas about justice shape political life. Courses cover questions concerning the procedures for social and legal change, the status of citizens in social and political institutions in society, and the ways that ideology and identity categories shape the pursuit of equality and justice.

- Public Policy and Democratic Institutions explores political institutions and processes and how and why they work as they do. Courses use historical and contemporary examples to understand the political system the founders established and the ways it has shaped modern politics. Students study institutions such as the presidency, Congress, courts, the bureaucracy, and political parties, with a focus on their organization and on important patterns of behavior within them, such as interest group lobbying and campaigning.

- World Politics compares internal political dynamics of and patterns of political behavior in the world’s more than 200 countries. Major comparative themes include democracy; dictatorship and regime change; political institutions (parties, elections, and decision-making); voting behavior, attitudes, and the creation and dissemination of political information; religious and ethnic identity politics; political economy of development and developing countries; social change and political violence; and the impact of globalization and transnational forces such as migration.

The Department of Political Science, along with the European Union Center, offers a 5 year BALAS/MA in Political Science and European Union Studies. In order to be admitted to this degree program, students apply through a joint application process to their BALAS--granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEU. Students will receive both degrees when the requirements are met for the degrees; BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

The Political Science Department offers one major:

**Political Science, B.A.L.A.S. (Bachelor of Arts in Liberal Arts and Sciences)**

Students must complete one concentration in consultation with an academic advisor.

- General Political Science Concentration (p. 281)
- Citizen Politics Concentration (p. 280)
- World Politics Concentration (p. 285)
- Law and Power Concentration (p. 283)
- International Relations Concentration (p. 283)
- Public Policy and Democratic Institutions Concentration (p. 284)
- Civic Leadership Concentration (p. 279)

**Departmental distinction**

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
   c. Earn a grade point average in PS 496 of 3.67 or higher.

2. Honors Program Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
   c. Be admitted to and maintain good standing within the departmental honors program, and
   d. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of PS 230 or PS 231 or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) of political science on this campus,
4. Application and affirmative vote of a departmental committee.

**High Distinction**

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 of 3.67 or higher.

- Political and Civic Leadership Minor (p. 286)
- Political Science Minor (p. 286)

**Political Science, B.A.L.A.S.**

**Civic Leadership Concentration**

Email: pol@illinois.edu

The Civic Leadership concentration aims to provide students interested in careers in public life with an informed appreciation for American democracy, the values and structures on which it is based, and the challenges and opportunities it faces in the 21st century.
See the Political Science Distinction page (p. 279) for departmental distinction information.

**Summary of Degree Requirements**

Students must complete the [Campus General Education](https://courses.illinois.edu/gened/DEFAULT/DEFAULT) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Political Science courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor. Minimum required major and supporting course work equates to 45 hours of Political Science courses.

Minimum hours required for graduation: 120 hours.

See the Political Science Major page (p. 279) for additional requirements and departmental distinction information.

Students will select a second major, or a minor, or a set of courses of at least 12 hours of thematically-related coursework outside political science, developed in conjunction with an academic advisor.

Total Hours 27

1 Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General Political Science Concentration Requirements

E-mail: mailto:pol@illinois.edu (pol@illinois.edu)

See the Political Science Distinction page (p. 279) for departmental distinction information.

Political Science Core Requirements

Summary of Degree Requirements

Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Political Science courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor. Minimum required major and supporting course work equates to 45 hours of Political Science courses.

Minimum hours required for graduation: 120 hours.

See the Political Science Major page (p. 279) for additional requirements and departmental distinction information.

Political Science

Robert Pahre, Head of Department
420 David Kinley Hall, MC - 713, 1407 West Gregory Drive, Urbana, IL
PH: (217) 333-3881
http://www.pol.illinois.edu

The Department of Political Science helps students acquire a broad understanding of government and politics, political behavior, and public policy, as they develop mastery in one or more of the subfields of the discipline. The department provides courses of study that introduce students to the discipline and to its principal fields. Students also complete 12 hours of supporting coursework in a thematically-related field approved by an advisor. The supporting coursework requirement may be met by a second major or minor.

The subfields in political science are the following:

- Citizen Politics is the study of mass politics. Topics include how and why citizens form political attitudes, beliefs, and identities; how people engage in political decision-making; and what political behaviors individuals choose to participate in.
- Civic Leadership aims to provide students interested in careers in public life with an informed appreciation for American democracy, the values and structures on which it is based, and the challenges and opportunities it faces in the 21st century.
- International Relations is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors in the interstate system.
- Law and Power teaches students about how power, law, and ideas about justice shape political life. Courses cover questions concerning the procedures for social and legal change, the status of citizens in social and political institutions in society, and the ways that ideology and identity categories shape the pursuit of equality and justice.
- Public Policy and Democratic Institutions explores political institutions and processes and how and why they work as they do. Courses use historical and contemporary examples to understand the political system the founders established and the ways it has shaped modern politics. Students study institutions such as the presidency, Congress, courts, the bureaucracy, and political parties, with a focus on their organization and on important patterns of behavior within them, such as interest group lobbying and campaigning.
- World Politics compares internal political dynamics of and patterns of political behavior in the world’s more than 200 countries. Major comparative themes include democracy; dictatorship and regime change; political institutions (parties, elections, and decision-making); voting behavior, attitudes, and the creation and dissemination of political information; religious and ethnic identity politics; political economy of development and developing countries; social change and political violence; and the impact of globalization and transnational forces such as migration.

The Department of Political Science, along with the European Union Center, offers a 5 year BALAS/MA in Political Science and European Union Studies. In order to be admitted to this degree program, students apply through a joint application process to their BALAS –granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

The Political Science Department offers one major:
Political Science, B.A.L.A.S. (Bachelor of Arts in Liberal Arts and Sciences)

Students must complete one concentration in consultation with an academic advisor.

- General Political Science Concentration (p. 281)
- Citizen Politics Concentration (p. 280)
- Civic Leadership Concentration (p. 279)
- International Relations Concentration (p. 283)
- Law and Power Concentration (p. 283)
- Public Policy and Democratic Institutions Concentration (p. 284)
- World Politics Concentration (p. 285)

Departmental distinction

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
   c. Earn a grade point average in PS 496 of 3.67 or higher.

2. Honors Program Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
   c. Be admitted to and maintain good standing within the departmental honors program, and
   d. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of PS 230 or PS 231 or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) of political science on this campus,
4. Application and affirmative vote of a departmental committee.

High Distinction

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 of 3.67 or higher.
   • Political and Civic Leadership Minor (p. 286)
   • Political Science Minor (p. 286)

Political Science, B.A.L.A.S.

International Relations Concentration

International relations (IR) is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors across the interstate system.

Students take advanced courses in two or more of the following topics: international law and organization, international cooperation, international political economy, globalization, foreign policy, diplomacy, political strategy in IR, conflict, interstate war, civil war, terrorism, global environmental politics, and international human rights.

See the Political Science Distinction page (p. 279) for departmental distinction information.

Summary of Degree Requirements

Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level Political Science courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor. Minimum required major and supporting coursework equates to 45 hours of Political Science courses.

Minimum hours required for graduation: 120 hours.

See the Political Science Major page (p. 279) for additional requirements and departmental distinction information.

**Minor in Political Science**

https://pol.illinois.edu/academics/undergraduate-program

A minor in political science is designed for students who want to improve their ability to deal intelligently and critically with issues and ideas about government and politics. The minor introduces students to courses involving important theoretical and applied questions about the role of citizens, associations, and states in the application of political power. Students will be exposed to advanced courses that build on relevant introductory courses.

1. Credit is not given for both PS 100 and PS 200.
2. Choose from a list maintained by the Department of Political Science.
Psychology

Wendy Heller, Head of Department
315 Psychology Building, 603 East Daniel, Champaign
PH: (217) 333-0631
http://www.psychology.illinois.edu

Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major:

- **Behavioral Neuroscience** is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organicism processes.

- **Clinical psychology** is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.

- **Community psychology** is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.

- **Cognitive neuroscience** is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.

- **Cognitive psychology** is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.

- **Developmental psychology** is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.

- **Engineering psychology** is the study of human behavior in the context of interactions between humans and machines.

- **Organizational psychology** is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.

- **Personality psychology** focuses on individual behavior. It is the study of ways to understand and describe an individual's behavior and to predict an individual's future behavior.

- **Quantitative psychology** specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.

- **Social psychology** is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.

- **Visual cognition and human performance** is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

**Prescribing Psychologists:**

The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

- 2-semester course sequence in chemistry or biochemistry with lab
- 1 semester microbiology with lab
- 1 semester general biology for science majors
- 1 semester physiology
- 1 semester human anatomy
- 1 semester physiology and anatomy
- Medical terminology (class or proficiency)

For more information on becoming a prescribing psychologist and a detailed list of which courses meet these requirements, please consult with one of the academic advisors in psychology.

**Undergraduate Program**

The Psychology major provides both depth and breadth of knowledge in Psychology. The major consists of an introductory course, a statistics course, a breadth of knowledge or foundation in the different areas of psychology that comes from a set of core courses, a research methods course, and elective courses that give students a depth of knowledge. Each concentration, except for intradisciplinary psychology, has a core course specific to that area of psychology with a research methods course designed for that concentration. In formulating their Plan of Study, students can decide either to undertake a concentration in Intradisciplinary Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help.

---

3 PS 199 is a temporary designation. As these courses are developed and receive PS numbers, these new course numbers will take the place of PS 199.
in creating a plan of study and research that best meets their goals and interests.

Departmental Distinction: To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor's thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics an laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.

Academic Advising
The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Psychology, BSLAS
E-mail: psych-advising@illinois.edu

Students must meet the requirements for one of the concentrations as listed below. Minimum required concentration and supporting course work equates to 32-36 hours of Psychology courses, including at least 12 hours of advanced coursework in Psychology. Please see your academic advisor. Concentrations can be declared during the second semester of the junior year. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

For all concentrations, twelve hours of 300- and 400-level courses in Psychology must be taken on this campus.

Minimum hours required for graduation is 120.

Students must also complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Concentrations

- Intradisciplinary Psychology (p. 288)
- Behavioral Neuroscience (p. 289)
- Clinical/Community Psychology (p. 290)
- Cognitive Neuroscience (p. 293)
- Cognitive Psychology (p. 290)
- Developmental Psychology (p. 293)
- Diversity Science (p. 294)
- Organizational Psychology (p. 295)
- Personality Psychology (p. 295)
- Social Psychology (p. 296)

Minor in Psychology
The minor in psychology should be tailored to each student’s individual needs. The Psychology minor is suitable for students who intend to pursue careers in a wide variety of fields including business, medicine, law, political science, and education. Students should work with their major advisor to determine the Psychology courses that best fit their interests and career goals.

Select two 300- or 400-level Psychology courses 6

Total Hours 18-19

The Psychology Minor requires 18 hours of Psychology courses. PSYC 290, PSYC 340, PSYC 341, PSYC 398, PSYC 492, PSYC 494, PSYC 495, PSYC 498, and PSYC 499 credit hours cannot be counted toward the minor requirement.

¹ Students who transfer credit from another institution only receive 3 credits for PSYC 100.
² Current equivalent courses include: STAT 100, ECON 202, EPSY 480, PSYC 301, and SOC 485. Contact the Psychology Advising Office to consult on other equivalents. Students who do not take PSYC 235 or PSYC 301 to satisfy their statistics requirement will need to take an additional Psychology course to meet the minimum of 18 hours of Psychology courses.

Cognitive Psychophysiology
Language and the Brain
Perception & Sensory Processes

Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major:

- Behavioral Neuroscience is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organismic processes.
- Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.
- Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.
- Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.
- Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.
- Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.
- Engineering psychology is the study of human behavior in the context of interactions between humans and machines.
- Organizational psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.
- Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual’s behavior and to predict an individual’s future behavior.
- Quantitative psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.
- Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.
- Visual cognition and human performance is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Prescribing Psychologists:
The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other
states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

- 2-semester course sequence in chemistry or biochemistry with lab
- 1 semester microbiology with lab
- 1 semester general biology for science majors
- 1 semester physiology
- 1 semester human anatomy
- 1 semester physiology and anatomy
- Medical terminology (class or proficiency)

For more information on becoming a prescribing psychologist and a detailed list of which courses meet these requirements, please consult with one of the academic advisors in psychology.

### Undergraduate Program

The Psychology program of study is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others.

The Psychology major provides both depth and breadth of knowledge in Psychology. The major consists of an introductory course, a statistics course, a breadth of knowledge or foundation in the different areas of psychology that comes from a set of core courses, a research methods course, and elective courses that give students a depth of knowledge. Each concentration, except for intradisciplinary psychology, has a core course specific to that area of psychology with a research methods course designed for that concentration. In formulating their Plan of Study, students can decide either to undertake a concentration in Intradisciplinary Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

**Departmental Distinction:** To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor’s thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics an laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.

### Academic Advising

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

### Psychology, BSLAS

E-mail: psych-advising@illinois.edu

Students must meet the requirements for one of the concentrations as listed below. Minimum required concentration and supporting course work equates to 32-36 hours of Psychology courses, including at least 12 hours of advanced coursework in Psychology. Please see your academic advisor. Concentrations can be declared during the second semester of the junior year. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

For all concentrations, twelve hours of 300- and 400-level courses in Psychology must be taken on this campus.

Minimum hours required for graduation is 120.

Students must also complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

### Concentrations

- Intradisciplinary Psychology (p. 288)
- Behavioral Neuroscience (p. 289)
- Clinical/Community Psychology (p. 290)
- Cognitive Neuroscience (p. 293)
- Cognitive Psychology (p. 290)
- Developmental Psychology (p. 293)
- Diversity Science (p. 294)
- Organizational Psychology (p. 295)
- Personality Psychology (p. 295)
- Social Psychology (p. 296)

### Minor in Psychology

The minor in psychology should be tailored to each student’s individual needs. The Psychology minor is suitable for students who intend to pursue careers in a wide variety of fields including business, medicine, law, political science, and education. Students should work with their major advisor to determine the Psychology courses that best fit their interests and career goals.

- PSYC 204 | Intro to Brain and Cognition

Information listed in this catalog is current as of 07/2019
PSYC 210  Behavioral Neuroscience
PSYC 220  Images of Mind
PSYC 224  Cognitive Psych
PSYC 230  Perceptio & Sensory Processes
PSYC 248  Learning and Memory

Clinical/Developmental/Social Psychology Course  3
Select one from the following:
PSYC 201  Intro to Social Psych
PSYC 216  Child Psych
PSYC 238  Psychopathology and Problems in Living
PSYC 239  Community Psych
PSYC 245  Industrial Org Psych
PSYC 250  Psych of Personality

Select two 300- or 400-level Psychology courses  6

Total Hours  18-19

The Psychology Minor requires 18 hours of Psychology courses. PSYC 290, PSYC 340, PSYC 341, PSYC 398, PSYC 492, PSYC 494, PSYC 495, PSYC 498, and PSYC 499 credit hours cannot be counted toward the minor requirement.

1 Students who transfer credit from another institution only receive 3 credits for PSYC 100.
2 Current equivalent courses include: STAT 100, ECON 202, EPSY 480, PSYC 301, and SOC 485. Contact the Psychology Advising Office to consult on other equivalents. Students who do not take PSYC 235 or PSYC 301 to satisfy their statistics requirement will need to take an additional Psychology course to meet the minimum of 18 hours of Psychology courses.

Religion

Valerie Hoffman
3080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-2022
http://www.religion.illinois.edu

A major and minor are sponsored by the Department of Religion.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Religion
E-mail: religion@illinois.edu

A minimum of 30 hours of coursework is required for the major. This includes (a)REL 230 or REL 231, and (b) completing a Capstone course, as explained below.

At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level. Twelve hours of 300 or 400-level courses in your major must be taken on this campus.

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser’s office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser’s office.

A major and minor are sponsored by the Department of Religion.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental adviser.

Capstone Experience

Research paper for one 400-level course in Religion (REL): Each major must make special arrangements with a professor teaching a 400-level REL course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each Religion major has conducted a significant research project. REL 493 can be used to satisfy this requirement.

Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements.

Language Requirements: The major in Religion does not require any language study beyond meeting the University’s general education language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate language study.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of REL 493. The level of distinction is based on evaluation of the thesis.

Distribution Requirement: Courses taken must include: 12

(a) Two courses in the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser’s office and

(b) Two courses in the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser’s office.

Three courses in a primary area of study 1 9
Two courses in a secondary area of study 1 6
Capstone Experience: a 400-level REL course in which a research project is undertaken and a 20 page research paper is written. This course can be REL 493 and can also be used to fulfill part of the distribution or primary or secondary area of study requirement.

Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the primary area of study cannot also be used to fulfill the secondary area of study.

Minor in Religion
E-mail: religion@illinois.edu

www.religion.illinois.edu (https://religion.illinois.edu)

The Minor in Religion is designed to give students the opportunity either to gain a broad knowledge of a number of religious traditions or to emphasize one field in the academic study of Religion. Completion of the minor requires 6 courses selected by the student in consultation with the director of undergraduate studies.

Russian, East European, and Eurasian Studies Center
Donna Buchanan, Acting Director of Center
104 International Studies Building, 910 South Fifth Street, Champaign
PH: (217) 333-1244
http://www.reeec.illinois.edu

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student’s interests and career goals, in consultation with the undergraduate advisor of the Center.

The major in Russian, East European, and Eurasian Studies consists of three components: 1) language study (Russian, Polish, Czech, Ukrainian, Bosnian-Croatian-Serbian, Turkish, and more); 2) a multidisciplinary area studies focus; and 3) concentration in a single discipline. Language study can be in Russian or in any of the other languages of the region offered at the University. Students also take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. In addition, the concentration in a single discipline provides students with deep knowledge of a specific field that can qualify them for graduate or professional study. Many students also use this concentration to double major. With this program, the REEES major provides students with an interdisciplinary focus on issues critical to the region and foundational language training necessary for professional specialization in the area.

Students often go on to careers in government service (foreign service, FBI, CIA) or to work at NGOs (environment, human rights, and other international careers) in addition to publishing, editing, writing, translation, international business, law, teaching, and research.

REEES is one of two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The REEES major has a current affairs focus and multidisciplinary area studies that develops students’ skill sets in the humanities, social sciences, and other fields. The major in Slavic Studies emphasizes the study of language and literature, and students develop intensive cultural literacy and communication skills through humanities-oriented training. Many Slavic Studies majors go on to careers in writing and editing, media, or work with international cultural foundations and organizations. Both majors are excellent preparation for law school or graduate school and careers in teaching or research.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
E-mail: reec@illinois.edu

Minimum required major and supporting courses equate to 48 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.
## Interdisciplinary Minor in Russian, East European, and Eurasian Studies

The interdisciplinary minor in Russian, East European, and Eurasian studies allows students in diverse fields to complement their programs with a study of Russia, Eastern Europe, and Eurasia. Programs of study can be tailored to the needs and interests of individual students, in consultation with the undergraduate advisor.

E-mail: reec@illinois.edu

### Component 1
Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.

### Component 2
Russian and East European studies core courses, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>REES 200</td>
<td>Intro to Russia and Eurasia</td>
<td>6</td>
</tr>
<tr>
<td>REES 201</td>
<td>Introduction to Eastern Europe</td>
<td>6</td>
</tr>
<tr>
<td>REES 495</td>
<td>Senior Seminar</td>
<td>6</td>
</tr>
</tbody>
</table>

15 hours: Choose one course from each of three departments other than the department used for component 3 below. The courses comprising the remaining hours of component 2 may be from the same discipline as those under component 3; however, a course may be counted toward the total for only one component. Language courses that concentrate on the basic skills of speaking, listening, reading, and writing cannot be counted as part of this component.

### Component 3
Courses in a single discipline. Among those disciplines that are most commonly used with this specialization are anthropology, economics, geography, history, political science, Russian language and literature, and sociology. Among disciplines also used are business administration, comparative literature, education, English, fine arts, French, German, journalism, linguistics, mathematics, music, philosophy, psychology, and various natural sciences. Others are permitted. Consult your advisor.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

<td></td>
<td>6-8</td>
</tr>
</tbody>
</table>

The equivalent of three semesters of college-level language study in Russian or another language of Eastern Europe or Eurasia. This stipulation may be satisfied through partial fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. If a non-REEE language is selected to meet the LAS requirement, then the three semesters of REEE language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only those hours earned in the second and third semester of language study are calculated into the degree, as the first semester represents a prerequisite for the other two.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Courses on Russia, Eastern Europe, or Eurasia from at least three different academic units. (Literature courses are acceptable for this requirement; language courses are not.) No more than 6 hours may be counted from any one unit; 6 hours must be at the 300- or 400-level.

**Total Hours:** 21

1. The Center maintains a list of applicable courses.
2. No more than 9 hours may be taken at the 100-level.

## School of Earth, Society, and Environment

Robert Rauber, Director of School
3086 Natural History Building
1301 W. Green St.
Urbana
PH: (217) 333-3440
http://www.earth.illinois.edu/students/

The major in Earth, Society, and Environmental Sustainability (ESE) offers a unique, multidisciplinary program in the College of Liberal Arts and Sciences (LAS). Students will learn about the interconnectedness of environmental, economic, and social systems of the world; the implications of our actions on the environment; factors that determine the sustainability of human institutions, organizations, cultures, and technologies; finding solutions through innovative approaches; and expanding future options by practicing environmental stewardship. Following the classical definition of sustainability, the aim is to develop citizens, businesses, and societies that meet the needs of the present without compromising the ability of future generations to do the same.

Required introductory coursework provide breadth in the essential natural and social sciences needed for interdisciplinary environmental sustainability study. The major offers two concentrations within which majors gain content expertise: Science of the Earth System, and Society and the Environment. Depth of knowledge is achieved by requiring a minimum of five advanced classes in a coherent field of study.

The major is available to both on-campus and off-campus students. On-campus students need only be eligible to be in LAS to transfer to the degree. The program is also designed so that students with an associates (or equivalent) degree, or who have sufficient previous coursework, can transfer to the University and complete a Bachelor of Science degree entirely off-campus. Students interested in completing the course off-campus, but have less than 60 hours of coursework, should consult with the program advisor.
The degree will prepare students for a variety of career paths in either the private or the public sector, as well as for graduate study. The interdisciplinary background in both scientific and human aspects of environmental problems will prepare students for a variety of positions with businesses, state and federal regulatory agencies, research institutions, consulting firms and nongovernmental education and advocacy organizations. The major also provides a platform for entry into professional schools (e.g. law, business, and public policy programs) as well as graduate study in a variety of physical science and social science disciplines, and in interdisciplinary programs related to the environment.

For the Degree of Bachelor Science in Liberal Arts and Sciences

Major in Earth, Society, and Environmental Sustainability
E-mail: sese-info@illinois.edu

Students select one concentration in consultation with an academic advisor:

- Society and the Environment (SAE) Concentration (p. 300)
- Science of the Earth System (SES) Concentration (p. 301)

On-campus UIUC students can transfer to this degree without any special requirements.

Off-campus students who plan to transfer to this degree should have completed, or have in progress, the following:

- the Composition 1 requirement.
- the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at UIUC or elsewhere) and should consult the program advisor:

- the UIUC LAS language requirement should be satisfied.
- the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
- the Cognate Coursework should be completed.

Minor in Earth, Society, and Environment

The ESE minor is designed for students who desire to obtain a background in topics related to environmental studies, in order to support study and practice of their major field. A minimum of 18 hours is required.

For more information and a list of approved courses visit: www.earth.illinois.edu. (http://www.earth.illinois.edu)

Questions may be addressed to Jonathan Tomkin, tomkin@illinois.edu.

For the Degree of Bachelor Science in Liberal Arts and Sciences

Major in Earth, Society, and Environmental Sustainability, Society and the Environment Concentration
E-mail: sese-info@illinois.edu

Minimum required major and supporting courses equate to 48-58 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

Twelve hours of 300- or 400-level courses must be taken on this campus.

Substitutions may be made with advisor approval.

A Major Plan of Study form must be completed and submitted to the Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

ESE Core Requirements:

<table>

ESE coursework 6

Information listed in this catalog is current as of 07/2019
GEOG 379  Intro to GIS Systems
ESE 200  Earth Systems

Advanced Courses  15-20

A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the “ESE Introductory Core” requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400-level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.

Society and the Environment Concentration Requirements:

Cognate Course Work  16-18

10-12 hours-Introductory Social Science (Select three courses from approved list)
3 hours-Statistics (Select one course from approved list)
3 hours-Economics: ECON 102

Highly recommended: CHEM 101 or CHEM 102

Slavic Languages and Literatures

Valeria Sobol
2090 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-0680
http://www.slavic.illinois.edu

The major in Slavic Studies enables students to specialize in one of five concentrations:

1. Russian Language, Literature, and Culture
2. Polish Studies
3. South Slavic Studies
4. Czech Studies
5. Ukrainian Studies

Unlike the major in Russian, East European, and Eurasian Studies (p. 298), which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.
The department also offers a minor in Russian Language and Literature and a minor in Slavic Language, Literature, and Culture.

The 5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies allows students to receive two degrees, a BALAS in Slavic Studies and an MA in European Union Studies.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Slavic Studies

E-mail: slavic@illinois.edu

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

- Major in Slavic Studies, Russian Language, Literature, and Culture Concentration (p. 305)
- Major in Slavic Studies, Polish Studies Concentration (p. 304)
- Major in Slavic Studies, South Slavic Studies Concentration (p. 306)
- Major in Slavic Studies, Czech Studies concentration (p. 303)
- Major in Slavic Studies, Ukrainian Studies Concentration (p. 306)

5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies

The Department of Slavic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS -granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

- Minor in Russian Language and Literature (p. 304)
- Minor in Slavic Language, Literature, and Culture (p. 304)

Czech Studies Concentration

https://slavic.illinois.edu/academics/undergraduate-program

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Slavic Studies, Czech Studies Concentration

E-mail: slavic@illinois.edu

Minimum required major courses equate to 30 hours including 6 hours in advanced language and 24 hours in literature and culture.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

- GPA in departmental courses of 3.75; or
- GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Russian literature and culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Russian language (RUSS 301, 302, 305, or equivalent) can substitute for one course in this requirement.

Total Hours 18-20

6 hours must be advanced (300- or 400-) level courses.

Minor in Slavic Language, Literature, and Culture

https://slavic.illinois.edu/academics/undergraduate-program

A minor in Slavic language, literature, and culture may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure.

In completing the requirements for the minor, students may choose to pursue study of a particular Slavic language and culture, or may combine study of a single language with other courses that treat the region more broadly. For example, a student could specialize in Polish by taking POL 201, POL 202, POL 301 for the language and POL 115, POL 245, and HIST 467 for the literature and culture requirements. Please consult the Undergraduate Advisor to choose coursework.

Choose one of the following:

- REES 201 Introduction to Russia and Eurasia
In the Department of Sociology you can choose the major in Sociology, the minor in Sociology, or the minor in Criminology, Law and Society (CLS). Whereas the major and minor in Sociology provide an overview into the broader disciplines of Sociology, the minor in CLS is a more specialized approach for those students interested in law and justice related careers and occupations.

Each student should see a Sociology departmental advisor at least once a year to choose sociology courses and to monitor their progress.

## Major in Sociology

E-mail: soc@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 44 hours including 32 hours of Sociology courses.

General education: Students must complete the Campus General Education [requirements](https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours.

### Departmental distinction: In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

- Have completed SOC 490 or SOC 495
- Attain a UIUC GPA of 3.25 or higher
- If both these requirements are met, then the MAJOR GPA distributes as follows:
  - 3.25 – Distinction
  - 3.50 – High Distinction
  - 3.75 – Highest Distinction

1. If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 32 hours of Sociology courses.

### Capstone Experience:

- All majors are required to complete a capstone course, project, or experience chosen from among the following:
  - (1) RUSS 493 Honors Senior Thesis (2 hrs); or
  - (2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or
  - (3) Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

1. Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Ukrainian region.

### Sociology

Brian Dill, Interim Head of Department

3120 Lincoln Hall, 702 S. Wright Street, Urbana

PH: (217) 333-1950

http://www.sociology.illinois.edu

Large-scale societal change begins with individuals like you – hungry for knowledge and ready to make a real difference; in the Department of Sociology you will study the inner workings of society with a focus on either Inequalities or Global Sociology.

Sociologists explore human social life at every level, from personal relationships to global society. Major topics of study include inequality, social movements, criminology, race and class relations, gender, social institutions such as religion and education, and fundamental population processes like immigration and mortality. Sociologists use a range of methods and theories to develop and evaluate ideas about social life.

As a student of Sociology, you will train in research methods and become fluent in social statistics while understanding the complexity of societal diversity and social change. These skills are usable in a wide variety of work settings and are skills that employers value.

Recent graduates have pursued careers with the FBI, as Human Resource Specialists, with non-profit organizations, as policy officers, and have earned advanced degrees in Social Work, Sociology, Law, Medicine, and more. The career paths of Sociology alumni are as diverse as our student population – who represent the best and the brightest from a variety of backgrounds.

In the Department of Sociology you can choose the major in Sociology, the minor in Sociology, or the minor in Criminology, Law and Society (CLS). Whereas the major and minor in Sociology provide an overview...
Supporting course work is designed to expand the student’s education, and should be taken outside of Sociology. A student may take supporting course work from one department, such as psychology, economics, history, or statistics, or from a cohesive selection of courses in various units. With an advisor’s approval, departmental or interdisciplinary minors, or a double major, may be used to fulfill the requirements of supporting course work.

- Criminology, Law, and Society (p. 308)
- Sociology (p. 308)

### Minor in Criminology, Law, and Society

Criminology, Law, and Society provides a foundation for students seeking to supplement their major area of study, to develop knowledge and skills needed for criminological, law, and justice related occupations, or to lay foundation for law school or graduate study in sociology, criminology, or justice fields. Students take a range of sociology courses that provide theoretical and practical knowledge while exposing students to current sociological, legal, and justice issues.

<td>Advanced Topics in Sociology</td>
<td>2</td>
</tr>
</tbody>
</table>

Total Hours 18

1. If not taken as part of the core.
2. Advisor approval required – course topic must be focused in criminology and/or law.

### Minor in Sociology

https://sociology.illinois.edu/academics/minors-offered

A minor in sociology requires that students learn the basic theoretical and methodological approaches in sociology. Students must also learn about the substance of sociology in some depth and are thus required to take at least two sociology courses at an advanced level and a total of at least 18 hours of sociology courses. The course work must include the requirements listed below.

E-mail: soc@illinois.edu

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

At least two Sociology courses at the 300- or 400-level 6

Elective Sociology hours as needed to fill the 18 hour requirement 3-6

Total Hours 18

1. If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 18 hours of Sociology courses.
South Asian and Middle Eastern Studies, Center for

Hadi Esfahani, Director
http://www.csames.illinois.edu/

The Center for South Asian and Middle Eastern Studies offers two Interdisciplinary Minors: South Asian Studies and Study of the Islamic World.

For additional information, please contact:
Associate Director: Angela Williams
Email:aswilliams@illinois.edu
Phone: 244-5939

- Interdisciplinary Minor in South Asian Studies (p. 309)
- Interdisciplinary Minor in the Study of the Islamic World (p. 309)

Interdisciplinary Minor in South Asian Studies

The Center for South Asian and Middle Eastern Studies (http://www.csames.illinois.edu) offers an Interdisciplinary Minor in South Asian Studies. The minor is especially suited for students interested in a program of studies with focus on South Asia, as a complement to their disciplinary study. The structure of the minor provides students a great amount of flexibility; possible areas of emphasis include language and literature, as well as history and social sciences.

A minimum grade-point average of 2.75 in South Asian Studies courses is required for completion of the minor. The 18-20 hours of courses selected by students for the South Asian Studies Minor should form a coherent program of study and must meet the approval of an advisor in the Center for South Asian and Middle Eastern Studies. The program must include at least 6 hours of 300- or 400-level courses. A student’s plan of courses for the minor must be approved by the program.

</tbody>
</table>

Total Hours: 18-20

1 Other area-relevant courses may be substituted as they are offered, with approval of the advisor. These include courses in languages other than Hindi and independent study courses with South Asia teaching faculty and with appropriate topics, such as the following ANTH 390, HIST 490, LING 290, PS 490, REL 390, SOC 390. Students wanting to take such independent study courses need to get permission from the instructor; not more than two independent study courses may be taken to meet the degree requirements.

For a list of approved courses, visit CSAMES Course Archive (http://www.csames.illinois.edu/program/courses/archive/all).

Interdisciplinary Minor in the Study of the Islamic World

An interdisciplinary minor in the Study of the Islamic World is offered by the Center for South Asian and Middle Eastern Studies. It is designed for students interested in developing an expertise in one or more parts of the Islamic world or in Islamic culture generally, as a complement to their disciplinary major. Completion of the minor requires 19 credit hours in applicable courses with a minimum grade-point average of 2.75. For a list of approved courses, visit CSAMES Course Archive (http://www.csames.illinois.edu/program/courses/archive/all).

Completion of a fourth semester course in an Islamic language (e.g. Arabic, Turkish, Swahili, Wolof). Select courses from the approved course list.

Select one of the following: 3

- HIST 135 History of Islamic Middle East
- SAME 152 The New Middle East
- REL 214 Introduction to Islam
  or REL 213 Intro to Islam - ACP

Additional courses chosen from the approved course list. The courses must come from at least two disciplines. At least six hours must be at the 300- or 400-level.

Total Hours: 19
Spanish and Portuguese

Mariselle Melendez, Head of Department
4080 Foreign Languages Building, 707 South Mathews, Urbana
PH: (217) 333-3390
http://www.spanport.illinois.edu/

The Dept of Spanish and Portuguese offers majors in the following areas: Spanish, Portuguese, and a Curriculum Preparatory to the Teaching of Spanish. The department also offers the following undergraduate minors: Spanish and Portuguese. The 5 year BALAS /MA in Spanish and European Union Studies allows students to receive two degrees, a BALAS in Spanish and an MA in European Union Studies.

Spanish

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, Major in Spanish
• Spanish (p. 311)

For the Degree of Bachelor of Arts in the Teaching of Spanish
• Teaching of Spanish (p. 310)

Portuguese

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, Major in Portuguese
• Portuguese (p. 311)

5 Year BALAS/MA in Spanish and European Union Studies

The Department of Spanish and Portuguese with the European Union Center offers a 5-year BALAS /MA degree program in Spanish and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

• Minor in Spanish (p. 311)
• Minor in Portuguese (p. 310)

Curriculum Preparatory to the Teaching of Spanish

For the Degree of Bachelor of Arts in the Teaching of Spanish
E-mail: span-port@illinois.edu

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 29 hours of professional education courses.

Minimum hours required for graduation: A minimum of 123 hours of credit is required for graduation.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 231).

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

Study Abroad: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (http://www.spanport.illinois.edu/studyabroad/spanish).

Supporting course work or a minor in a related area of study chosen by the student and approved by the adviser. There is a wide choice of supporting courses because the student’s interests may vary from Iberian literature to animal husbandry in Angola and urbanology in Brazil. Supporting areas may include humanities (comparative literature, comparative religion, linguistics, philosophy), social sciences (anthropology, geography, history, Latin American studies, political science, sociology), education, fine and applied arts, and/or journalism. Other fields, or groups of fields, may be approved by the Portuguese undergraduate adviser. 1

1 A minor consists of a minimum of 18 hours.

Supporting course work, a minor, or a second major in an area of study chosen by the student and approved by the advisor. 2

1 With permission of the adviser, students will be able to take up to two SPAN courses that are taught in a language other than Spanish.

2 A minor generally consists of 16-21 hours.
Statistics

Jeff Douglas, Acting Chair
101 Illini Hall, 725 South Wright St., Champaign, IL 61820
PH: (217) 333-2167
FX: (217) 244-7190
http://www.stat.illinois.edu

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

The Department of Statistics offers the following majors:

- Statistics (p. 312)- The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

- Statistics and Computer Science (p. 313)- This major is sponsored jointly by the Departments of Statistics and Computer Science. The Statistics and Computer Science major is designed for students who would like a strong foundation in computer science, coupled with significant advanced coursework in statistics. The major prepares students for professional or graduate work in statistics and computer science, and for applications of computing in which knowledge of statistics is particularly important, such as data mining and machine learning.

Minor in Statistics

The minor, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students to for graduate studies in statistics or in one of many areas where data analysis plays an important role. Interested students should contact the Statistics undergraduate advisor for admission into the minor. Students should have completed the calculus sequence through MATH 241 before entering the minor. Students must choose from either the Applied or Mathematical Statistics Track.

Applied Statistics Track

<table>

Major in Statistics and Computer Science

E-mail: stat-office@illinois.edu or academic@cs.illinois.edu (academic@cs.uiuc.edu)

Minimum required major and supporting course work normally equates to 68-69 hours
Information listed in this catalog is current as of 07/2019

**History of Art, BALAS**

Terri Weissman  
143 Art and Design Building, 408 East Peabody, Champaign  
PH: (217) 333-0855  
http://www.art.illinois.edu/index.php/prospective/academics/undergraduate-programs/art-history

Like the other humanities, the history of art as an undergraduate major offers an enrichment of and a preparation for life, rather than training for a specific occupation. The student who goes on to graduate work in the field can pursue a career in teaching, museum work, or employment in a commercial art gallery, or auction house.

Working in consultation with the LAS undergraduate adviser for art history in the School of Art and Design, Professor Kristin Romberg (kromberg@illinois.edu), each student will design a program of study that satisfies the requirements listed below. Students who wish to take a considerable number of studio courses as part of their major should enroll in the history of art option offered by the School of Art and Design within the College of Fine and Applied Arts.

For advising information please visit the LAS Advising site (http://www.las.illinois.edu/students/advising/declared).

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

Minimum required major and supporting course work equates to 48 hours including 30 hours of Art History courses, 15 hours of supporting coursework and 3 hours of studio.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

For students considering graduate work in Art History French or German is strongly recommended for the language requirement. Other languages including Chinese or Japanese may be used with the approval of the adviser as the needs of the student's program dictate.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

<td></td>
</tr>
</tbody>
</table>

1 Credit will not be given for ARTH 112 and ARTH 115.

2 Courses in the history of architecture, excluding ARCH 210, may be used with the approval of the adviser for as many as 9 hours of credit in meeting the requirement for 18 hours of art history at the 200-400 level.

**Biology**

Students interested in applying to either school of biology should simply choose Biology as their major. After taking two introductory courses, students will choose a major in either Integrative Biology or Molecular and Cellular Biology.

**Integrative Biology, School of** (http://www.life.uiuc.edu/sib)

Director of School: Carla Cáceres

School Office: 286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044

**Molecular and Cellular Biology, School of** (http://mcb.illinois.edu)

Director of School: Milan Bagchi

School Office: 393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166
An interschool option in Teaching of Biology (p. 315) is sponsored by the School of Integrative Biology and the School of Molecular and Cellular Biology.

Also, see majors in Integrative Biology (p. 255) and Molecular and Cellular Biology (p. 274).

**Biology Teaching Concentration**

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

**Major in Biology, Biology Teacher Education Concentration**

E-mail: advising@life.uiuc.edu

Minimum required courses normally equate to 79-82 hours in the major and 39 hours for the Teacher Education Minor in Secondary School Teaching.

General education: Students must complete the Campus General Education requirements (https://courses.illinois.edu) including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

This major fulfills state certification requirements to teach high school (grades 9-12) biology through the AP/honors level and chemistry, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this major must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 83).

Time to degree completion varies. Minimum time to completion is 8 semesters, but some students may require 10 semesters. Transfer students may need 10 total semesters to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education (p. 340) for the list of courses used to compute these grade-point averages.

Departmental distinction: To graduate with distinction, the student must have at least a 3.5 grade point average for all work completed, and present evidence of exemplary student teaching.

Additional 300- and 400-level courses selected from IB and/or MCB in consultation with the advisor.

1. Students should speak with an advisor to help choose the appropriate section of CHEM 232 and CHEM 233.

2. IB 202 requires animal dissection and no equivalent alternative is available.

**Computer Science and Liberal Arts and Sciences Discipline**

The LAS major in Computer Science and an LAS Discipline is a flexible program for students who plan to pursue technical or professional careers in arts and sciences areas requiring a sound grounding in computer science. This major allows students to combine study of computer science with training in a field in Liberal Arts and Sciences to offer students novel perspectives in interdisciplinary work. Students can use the supporting coursework to prepare for employment immediately upon graduation or for pursuing graduate study in a wide variety of fields or to complete a significant body of courses in a single area, such as a double major or minor.

Students are strongly encouraged to get involved in undergraduate research through independent studies and funded research experiences, with the goal of learning from the University of Illinois CS and LAS
externally recognized scholars outside the classroom and participating in the exciting quest for new contributions to the field.

Students interested in Mathematics or Statistics should enroll in the Math/CS (p. 270) or Stat/CS (p. 313) degree

Current approved curricula include:

**Computer Science and Anthropology**

Today, anthropologists use computational tools and algorithms to analyze large amounts of data either gathered from a field site or by studying on-line social communities and social networks. Students majoring in CS + Anthropology will have knowledge of how people live and communicate as social beings, which can inform best designs and user interfaces for software.

**Computer Science and Astronomy**

Astronomy is a computation-intensive discipline. Computational challenges in astronomy, including radio astronomical data processing, analysis of large optical image data sets, and dynamical and statistical simulation of astronomical systems, test the limits of currently available hardware and software and have led to significant advances in computational science. This major will offer computationally focused students with a grounding in astronomy for them to understand astronomically motivated computational challenges such as mysteries of the origins of life and our universe.

**Computer Science and Chemistry**

Students majoring in Computer Science and Chemistry are prepared for a variety of careers, including helping manufacturers design more productive and efficient processes, helping pharmaceutical firms characterize new compounds for drug discovery, and conducting research that requires studying the fundamental properties of atoms, molecules, and chemical reactions. Computer Science and Chemistry majors might develop computer models or simulate chemical and biochemical processes, perform statistical analysis of large data sets, or create visualizations of reaction pathways, molecular interactions, or other phenomena.

**Computer Science and Economics**

The Computer Science and Economics program provides students with enhanced quantitative analysis and programming skills. Students learn a variety of economic analytical skills, both theoretical and empirical, and computational skills. These are an asset for students interested in nearly all fields of economics, including the three of the core fields (microeconomics, macroeconomics, and econometrics), but also the applied fields of industrial organization, public economics, labor economics, development economics, international economics, and financial economics.

There is an increasing need for more sophisticated skills to examine large administrative datasets ("Big Data"), thus combining the computer science and economics curriculums will produce students who are able to write their own code and develop their own software for analyzing these data sets. Possible job opportunities for graduates include area such as banking, finance, insurance, policy centers, government agencies and non-profit organizations. The degree will also prepare students for various graduate programs, including areas of economics, finance, policy, and financial engineering.

**Computer Science and Geography & Geographic Information Science**

The widespread use of location-aware devices (GPS-equipped smartphones) and geospatial technologies (e.g., remote sensing) has led to the generation of massive amounts of place-based data. These data often contain high-resolution and continuous space-time information about a wide variety of phenomena of interest to geographers (e.g., the spatial patterns of people moving through a city). The development and application of computational algorithms or methods in geography has become increasingly important in understanding the physical and social processes that shape the landscape, from public health to urban sustainability to ecological modeling. Students in Computer Science and Geographic Information Science will bring together social, physical, and computer sciences to investigate spatial processes and solve geographic problems.

**Computer Science and Linguistics**

The Computer Science and Linguistics program brings together students and faculty interested in different aspects of the computer – natural language relationship – i.e., studying the cognitive aspects of natural languages; endowing computers with human-like behavior and understanding of spoken and written natural language; and designing user-friendly computer programs and interfaces using natural language communication.

Students will be exposed to the tools of both disciplines — formal methods, philosophical analysis, computer programming, and empirical research — with the aim of acquiring the appropriate skills required by the field. Graduates will be successful in landing jobs in various areas, including natural language software design and applications, teaching and research, law, medicine, and public service. The innovative aspect of the program is its focus on relating computers to language, technology, and society where the combination has potential for great impact.

**Computer Science and Philosophy**

The Computer Science and Philosophy major provides students strong analytical, critical, technical, and communications skills that will prove useful for careers in academia, industry, public service, and elsewhere. Computer science and philosophy share deep historical roots. Questions about the nature of algorithms, complexity, the ability of computers to think, and computation itself are as much philosophical as they are technical. Likewise, many basic philosophical questions – what does it take to know something, when does something cause something else, what makes an action right or wrong to do – matter for practical computer science applications. As computers and machines continue to play an ever-increasing role in our daily lives, there is also a corresponding need to think clearly and rigorously about the ethical implications of machine technology with respect to, e.g., questions of privacy, security, equality, and justice. Tools from both computer science and philosophy help to clarify and to answer such questions, as well as many others.

- Computer Science and Anthropology (p. 317)
- Computer Science and Astronomy (p. 317)
- Computer Science and Chemistry (p. 318)
- Computer Science and Economics (p. 227)

**Major in Computer Science** ([https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs/#requirements](https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs/#requirements))  and **Linguistics** ([http://www.linguistics.illinois.edu/students/undergrad](http://www.linguistics.illinois.edu/students/undergrad))

Please see the computer science advisor as well as the linguistics advisor.

Computer Science email: academic@cs.illinois.edu
Linguistics advising: [http://www.linguistics.illinois.edu/students/undergrad/advising.html](http://www.linguistics.illinois.edu/students/undergrad/advising.html)
Minimum required major coursework normally equates to 66 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours). Please see the computer science advisor as well as the linguistics advisor.

Minimum hours required for graduation: 120 hours

In consultation with an advisor, choose 12 hours of philosophy courses, not more than one of which may be at the 100-level and at least two of which must be at the 300- or 400-level.

1 CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.

Individual Plans of Study (IPS)

Tenaya Reifsteck, LAS Academic Advisor
2002 Lincoln Hall, 702 S. Wright St., Urbana, IL 61801
http://www.las.illinois.edu/students/programs/majors/ips/

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences

Major in Individual Plans of Study

E-mail: las-ips@illinois.edu

Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must

1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the IPS advisory committee.

Further information on requirements for graduation with distinction may be obtained from the secretary of the IPS advisory committee.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major—the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Cinematography, Entomology, Neuroscience, Meteorology, and Middle Eastern Studies.

The development of an IPS program begins with the student's perception that a more appropriate field of study could exist beyond the present majors. Consultation with the secretary of the IPS advisory committee and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the IPS advisory committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The IPS Advisory Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student’s junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

Physics

Dale Van Harlingen
209 Loomis Laboratory of Physics, 1110 West Green, Urbana
PH: (217) 333-3761
http://physics.illinois.edu

Physics in the Sciences and Letters Curriculum (BSLAS) allows students maximum flexibility to develop scientifically oriented careers in fields requiring a physics background through the Major in Physics or the Physics Teaching Concentration.

The Major in Physics is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields.

The Physics Teaching Concentration fulfills state certification requirements to teach both physics and general science.

LAS Specialized Curriculum in Physics (BS) is designed for students who plan to pursue graduate study in physics or a closely allied field. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees.

See also Engineering Physics (p. 137) in the College of Engineering. See the Physics Department for additional information.

https://physics.illinois.edu/academics/undergraduates/curricula-and-programs

For the Degree of Bachelor of Science in Physics

Major in Physics (Specialized Curriculum)
E-mail: undergrad-info@physics.illinois.edu

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. However, students who want to pursue a combined major and minor, a double major, or a double degree should consider the LAS Science and Letters Curriculum in Physics because of the greater flexibility it offers. Students in the Specialized Curriculum beyond the freshman year must maintain an overall grade point average of at least 2.5 and also a grade point average of 2.5 in all required mathematics and physics courses.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

Departmental distinction: Graduation with distinctions awarded to students who complete 8 additional hours of 300- or 400-level physics courses or advanced courses in closely related technical subjects and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

Requirements

General Education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Minimum required major and supporting course work normally equates to 65-73 hours

General Education - Students must complete the Campus General Education requirements.

Free Electives (No restrictions on these courses.) 15-35

Minimum Hours 85

1 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Physics (Sciences and Letters)

https://physics.illinois.edu/academics/undergraduates/curricula-and-programs

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Physics (Sciences and Letters)
E-mail: undergrad-info@physics.illinois.edu

Minimum required major and supporting course work normally equates to 65-73 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.
A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction is awarded to students who complete 8 additional hours of 300- or 400- or 500-level physics courses or advanced courses in closely related technical subjects, and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

The Physics Major (Sciences and Letters) is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees. Students in the major must pursue an overall grade point average of at least 2.0 and also a grade point average of at least 2.0 in all required physics and mathematics courses. To be permitted to enroll in advanced physics courses in this major a student must maintain at least a 2.0 average in all attempts at science and mathematics courses taken at the University of Illinois.

Students in this major must choose an approved elective technical or professional option no later than the end of the second semester of the sophomore year. A set of pre-approved options is available via the departmental web site (http://physics.illinois.edu/undergrad/las-sl-flexcore.asp) and from the departmental undergraduate studies office. Students may also design and follow a "custom option" subject to departmental approval. Students completing the Astrophysics option will earn a minor in Astronomy, if appropriate Minor form is filed.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement background in calculus.

Flexible physics core electives. Choose three courses from a departmentally approved list, with at least one being PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of hours varies depending upon the courses chosen. (http://physics.illinois.edu/undergrad/las-sl-flexcore.asp)

</tr>
</tbody>
</table>

### Elective Technical or Professional Option

A set of technical or professional courses that addresses an intellectually coherent body of knowledge. At least 9 hours should be at the 200-level or higher. Required courses may not be included in the set. Students may select from a list of pre-approved options or design a custom option, subject to departmental approval.

1 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

### Physics Teaching Concentration

https://physics.illinois.edu/academics/undergraduates/curricula-and-programs

### For the Degree of Bachelor of Science in Liberal Arts and Sciences

#### Major in Physics (Sciences and Letters), Physics Teaching Concentration

E-mail: undergrad-info@physics.illinois.edu

Web address for department: http://physics.illinois.edu

General education: Students must complete the Campus General Education (https://courses.illinois.edu) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

This concentration fulfills state certification requirements to teach high school physics (grades 9-12) through the AP/honors level and general science (high school biology, chemistry, earth and space science, and environmental science up to but not including the AP/honors level).
Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching. See the College of Education section for requirements of the minor (p. 83) (39 hours).

Time to degree completion varies. Minimum time to completion is 8 semesters, some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. http://www.cote.illinois.edu/

Departmental distinction: Distinction is determined by a combination of grade point average and achievement in student teaching. The student’s practice teaching experience will be evaluated by the departmental honors adviser and the teaching supervisor. Distinction requires a 3.2 grade point average; high distinction, 3.4; highest distinction, 3.6. Students desiring distinction should consult with the departmental honors adviser during the junior year.

**Media, College of**

Student Services Center
18 Gregory Hall
810 S. Wright St., MC-477
Urbana, IL 61801
PH: (217) 244-4329
http://media.illinois.edu
media-ssc@illinois.edu

The College of Media strives to give students solid backgrounds in social sciences and humanities and to provide them broad career competence in advertising, journalism or media studies. The College’s premise is that students need to understand the world and its people if they are to communicate effectively and enjoy fulfilling and meaningful lives.

The College offers Bachelor of Science degrees in Advertising, Computer Science and Advertising, Journalism, and Media and Cinema Studies. Students have opportunities to become leaders in cutting-edge media, study with leading professionals and scholars, and learn using the latest equipment and facilities. Included are laboratories for reporting, editing, design, and multimedia-journalism; editing suites for radio and television production; and a television studio. The Communications Library is recognized as one of the best in the nation. Dedicated career services are available for students in the College.

The College also includes Illinois Public Media, which operates the local PBS and NPR stations WILL-AM, FM, TV and online.

The College also houses the Institute of Communications Research.

The College has a rich past and a bright future. It traces its history to 1902, when instruction in journalism began. A school of journalism was established in 1927. In 1950 it became the School of Journalism and Communications. In 1957 the school was elevated to college status. The name College of Communications was adopted in 1968. To better reflect the College’s emphasis on mediated communication, the name College of Media was adopted in 2008 becoming one of the first Colleges of Media in the country.
Departments and Curricula
The College, fully accredited by the Accrediting Council on Education in Journalism and Mass Communication, offers these majors:

- ADVERTISING (ADV), which offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a better and longer-lasting education for students.

- COMPUTER SCIENCE AND ADVERTISING, sponsored jointly by the Departments of Computer Science and Advertising. This is a flexible program for students who plan to pursue careers in the advertising field that have a technology focus. Cloud computing, the availability and ubiquity of data, and the rapid and pervasive adoption of mobile technology have created a paradigm shift in the advertising industry. Projected areas of growth in advertising and communications will be in Search Engine Optimization, web analytics, Computational Advertising, and other emerging areas of technology/media. The degree will prepare students for advanced study in the graduate level as well as immediate entry into the workforce at advertising agencies, businesses with in-house advertising and marketing divisions, and technology companies.

- JOURNALISM (JOUR), prepares students for exciting and fulfilling careers in traditional broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

- MEDIA AND CINEMA STUDIES (MACS), prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment. MACS offers an undergraduate and graduate minor in CINEMA STUDIES.

The College also offers minors in PUBLIC RELATIONS, JOURNALISM, and CINEMA STUDIES.

The Department of Advertising offers the Master of Science degree in Advertising, and the Department of Journalism has graduate programs leading to the Master of Journalism (MJ) and the Master of Science (MS) in Journalism. The Department of Media and Cinema Studies offers an undergraduate and graduate minor in Cinema Studies. The College also offers an interdisciplinary program leading to a Doctor of Philosophy degree in communications and media.

Requirements
Admission
High school seniors and transfer students from another institution should contact the Office of Undergraduate Admissions for admission requirements and applications for a specific term.

Current University of Illinois students who will have completed at least one year on the Urbana-Champaign campus should apply during the first weeks of the semester during which they will complete their 30th hour of course credit. Successful applicants will be admitted for the following semester. Applications also will be accepted from more advanced students provided that by the end of the semester in which they apply, they will have completed no more than 90 hours. Application forms are available on the College web site. Specific deadlines are cited on the forms.

Students seeking to transfer from another university may apply early in the spring semester provided they will have completed at least 30 transferable hours by the end of the spring semester. Hours planned during upcoming summer semesters are not considered. Applications are available from the Office of Undergraduate Admissions.

Inter-college transfer students (students already on campus) should include a personal essay of up to 500 words. The essay should demonstrate the applicant's media-related abilities and detail the applicant's interest in and demonstrated commitment to a career for which a College of Media degree would be appropriate.

Admission is competitive. While there is no specific requirement regarding grades, a strong GPA is advantageous especially in core classes that are part of the major you wish to transfer in to. Students with the best essays and the best academic or professional qualifications, including any pertinent extracurricular activities or internships, will receive highest priority. For a University of Illinois student, one way to demonstrate interest is to have earned a grade of B or better in introductory courses such as ADV 140, JOUR 200, MACS 100, MACS 101, MACS 261, MACS 262, or other courses taught by the College.

Students currently enrolled in other colleges on campus are accepted on the condition that by the time they join the College at the start of the semester after they apply, they must:

- Have completed at least two semesters in the University of Illinois at Urbana-Champaign academic unit to which they were admitted, if admitted as freshmen.
- Be classified by the university as sophomores (at least 30 credit hours) or as juniors (fewer than 90 credit hours).
- Be in good academic standing.
- Have completed approximately one-fourth (if sophomores) or one-half (if juniors) or more of the total credit hours required to satisfy the university’s General Education requirements.
- Have made substantial progress toward completing any departmental requirements for courses outside the College of Media. For example, applicants for Advertising ideally will have completed ADV 150, ECON 102 and ECON 103, STAT 100 and two of these three courses: SOC 100, ANTH 103 and PSYC 100.

Students may apply to any major in the College: Advertising, Computer Science and Advertising, Journalism, or Media and Cinema Studies. College of Media students may not complete double majors within the College. Students majoring in Journalism may not pursue a Journalism Minor.

Students who would require more than nine total semesters of overall college or university enrollment to complete their degree will be denied admission. Students must complete their College of Media degrees within seven semesters of joining the College as sophomores or within five semesters of joining the College as juniors. A minimum of three semesters within the College is required for students admitted as juniors.
A minimum of five semesters within the College is required for students admitted as sophomores.

Minors in areas outside the College are strongly encouraged. However, because considerable coursework in other colleges is implicit within the requirements for all College of Media degrees, students are not admitted to the College of Media for the purpose of pursuing second majors or second undergraduate degrees.

Most required courses in Advertising, Computer Science and Advertising, Journalism, and Media and Cinema Studies must be completed at the University of Illinois at Urbana-Champaign. Students completing freshman and sophomore studies at institutions other than the University of Illinois at Urbana-Champaign may test their interest in the Media field. However, a maximum of nine hours of transferable Media courses are allowed toward the 124 hour graduation requirement.

Graduation
To graduate, students must satisfy all University requirements as to residency, scholarship, and fees and must complete the University’s general education requirements. All students also must fulfill these general requirements of the College of Media:

- Complete a total of 124 semester hours of course credit of which no more than 12 hours total may be in basic physical education activity courses (KIN 100–KIN 111, KIN 122), vocational and technical education courses, basic courses in military science (AFAS, MILS and NS courses numbered below 300), Institute of Aviation courses, Undergraduate Open Seminar (199) courses, and independent study courses and other experimental or special topics courses (such as LAS 110) outside the College of Media. Independent study courses additionally must be approved by the College to ensure that credit is given only for academic work directly supervised by a faculty member. The College encourages its students to have appropriate professional internships and to participate in professional activities. While it does not allow academic credit for such experience, one credit hour is possible through an academic course or independent study supervised by a College of Media faculty member and taken in conjunction with an internship.
- Complete not less than 72 hours of credit outside the College of Media.
- No course of any number that is offered by or cross-listed with Advertising, Journalism or Media and Cinema Studies or is substantially similar to courses offered by Advertising, Journalism or Media and Cinema Studies may count toward the total hours outside the College of Media, regardless of the rubric under which it is taken. For each hour of credit beyond 44 in College of Media courses, the number of hours required for graduation increases by one additional hour to ensure that the requirement of 80 hours outside the College is met.
- Complete not less than 20 hours in courses numbered 200 or above outside the College of Media and not cross-listed in the College of Media, regardless of the rubric under which they are taken. At least 9 of the 20 hours must be in courses numbered 300 and above.
- Complete the specific requirements of one of the four curricula offered by the College.
- Earn a cumulative grade point average of 2.00 (A = 4.00) in all courses presented for the degree and a cumulative 2.00 grade point average for all courses taken in the College.

Special Programs
Dean’s List
To be eligible for Dean’s List recognition for any semester, students must rank in the top 20 percent of the College in grade point average and must complete at least 12 hours taken for a letter grade (A through F) on the Urbana-Champaign campus. Transfer, study abroad and guided individual study coursework is excluded.

Students who are registered with the Center for Wounded Veterans (CWV) or with Disability Resources and Educational Services (DRES) who are enrolled in less than 12 but at least nine graded semester hours who are in the top 20 percent of the College are also eligible. Such students must sign a release with CWV or DRES indicating their consent for consideration for Dean’s List eligibility and have submitted that consent to their home unit’s academic affairs office no later than Reading Day in the semester in which they wish to be considered for Dean’s List. These consent forms are valid only for the semester in which they are issued, and students must submit by the deadline updated consent forms for each semester in which they wish to be considered for the Dean’s List.

The specific grade point average necessary to achieve Dean’s List recognition may vary. College of Media standards are high.

Dean’s List recognition is determined before the start of the ensuing semester. Students who are not initially selected but who believe they might qualify because of the late resolution of incomplete, deferred or missing grades may petition before the end of the next semester for retroactive addition to the list.

Honors at Graduation
For graduation with honors, a student must rank in the upper 20 percent of his or her graduation class in overall grade point average. For graduation with high honors, a student must additionally rank in the upper 10 percent. For graduation with highest honors, a student must additionally rank in the upper 5 percent.

For purposes of this award, “graduating class” means all students listed as receiving or as being candidates for receiving bachelor’s degrees in all College majors at the College’s annual commencement convocation each May. This includes students who graduated in the previous December and those who are candidates for graduation in May and August. Grade point averages are computed through the fall semester immediately preceding the annual convocation and include all transfer courses and other grades posted as of that date.

Transfer students, in addition to meeting the general requirement, must have cumulative University of Illinois at Urbana-Champaign grade-point averages as high as the lowest ones listed for students who qualify on the basis of having completed all of their work at the University of Illinois at Urbana-Champaign and must have earned 40 or more semester hours at the University of Illinois at Urbana-Champaign through the fall semester immediately preceding the annual convocation.

Kappa Tau Alpha
Each year, scholastically high-ranking graduating juniors and seniors in the College of Media are considered for membership in Kappa Tau Alpha, the seventh oldest national honorary society, founded to recognize and promote academic excellence and scholarship in journalism and mass communication.

Students must rank in the upper 10 percent of their class, must have completed at least five semesters of degree work and must have
completed at least nine semester hours in professional skills courses, as defined by the national society.

**Edmund J. James Scholars**
The James Scholar Program, named for the University of Illinois’ fourth president, Edmund J. James, focuses on giving high-ability students the opportunity to gain additional knowledge by working closely with instructors.

To remain in good standing as a James Scholar in the College of Media, students must maintain semester and cumulative GPAs of 3.5 and higher, complete at least 14 credit hours for traditional letter grades each semester and complete at least one honors course or project each academic year. Students may choose from taking a Campus Honors Program course, completing an Honors Credit Learning Agreement with a professor in any course, working on an honors project with a College of Media professor as an independent study, or from the pre-approved honors activity list as provided by the honors Dean to complete the honors requirement. Students who study abroad will be exempt of the GPA and credit hour requirements during the semester(s) they are abroad. The honors requirement should be completed the semester the student is on campus.

James Scholars’ academic records are reviewed each summer. If a student has met the stated requirements for each of the two past semesters at the time of the review, he or she will be certified as a James Scholar for the next academic year and the James Scholar designation will be added to his or her transcripts for that academic year. Any student who does not fulfill the requirements will be removed from the James Scholars program. Because James Scholar review takes place once a year, a student who does not meet the requirements in the fall semester will remain in the program for the spring. However, s/he will be dropped during the summer review period and the James Scholar notation will not appear on the transcript for the previous academic year. In order to graduate with the James Scholar designation, all students must have completed a minimum of four honors activities, with at least one being completed each year the student is in the program.

Students entering the College of Media as freshmen are invited to join the James Scholars program at the time of admission if they rank in the top 20 percent of the College’s incoming class, as determined by an Office of Admissions and Records standard that combines factors such as standardized test scores and high school GPA.

Students already in the College of Media are invited to become James Scholars for the upcoming fall semester if they have completed fewer than 75 hours, have at least a 3.5 overall GPA and were included on the Dean’s List for the spring semester. If a student loses the James Scholar status, he or she must sit out of the program for at least one academic year before becoming eligible for reinstatement. A student may only be reinstated by making the College’s spring Dean’s List.

Students who transfer into the College of Media from another college on the Urbana-Champaign campus are invited to participate in the James Scholar program immediately if they were a James Scholar in their previous college. Students who transfer to the College from another institution may request to participate if they have a transfer GPA of at least 3.7.

A qualifying student may enter the program for his or her sophomore or junior year, but not for his or her senior year alone. Students who join the James Scholar program during the sophomore or junior year will need to pick up additional honors activities in order to graduate with the minimum four required to graduate with the honor.

For complete policies and procedures, please see: [https://media.illinois.edu/student-honors-and-awards](https://media.illinois.edu/student-honors-and-awards)

**Credit/No Credit Grading Option**
The College follows credit/no credit provisions described in Article 3-105 (http://studentcode.illinois.edu/article3_part1_3-105.html) of the Student Code.

All courses listed or cross-listed with departments in the College, or specifically required by one of those departments for its majors or used to fulfill University General Education requirements, must be taken for a traditional letter grade. For Advertising majors, this means these courses outside the College must be taken for a grade: STAT 100 (or any of the allowed substitutes for it), ECON 102-ECON 103, BADM 320, and two out of the three courses PSYC 100, SOC 100 and ANTH 103. Journalism majors must take CS 105, ECON 102, ECON 103, PSYC 100, SOC 100, and STAT 100 (or any of the allowed substitutes for it) for a letter grade. For all majors, courses taken to fulfill the College’s advanced hour requirement (20 hours outside the College in courses numbered 200 and above) also must be taken for traditional letter grades.

**Degree: Bachelor of Science**

**Majors:** Advertising; Advertising and Computer Science  
**Minor:** Public Relations

- B.S. in Advertising (p. 329)  
- B.S. in Computer Science and Advertising (p. 329)

**Minor in Public Relations**

The Public Relations (PR) minor is designed to provide undergraduate students with a foundational understanding of how public relations practitioners manage relationships between organizations and their stakeholders and manage the reputations of those organizations.
Courses within the PR minor will help students develop skills in writing, research, strategic planning, relationship management, and crisis communication that can be applied in business, nonprofit, or government contexts.

Students who plan to pursue careers in public relations, advertising, communications, marketing, or other related fields will find that the PR minor serves as a valuable complement to the courses in their major. Students from other majors who wish to have a better understanding of the role public relations plays in organizations and who wish to sharpen skills in writing, persuasion, strategic planning, and public communication will also benefit from the minor.

The minor requires a minimum of 18 credit hours. Students majoring in Advertising or Journalism must complete at least six hours of advanced course work for the minor distinct from credits earned for their major.

**Total Hours**: 18-19

1 College Electives must include at least six credits of Advertising elective courses numbered 300 or above for students admitted to the major starting in Fall 2016. Students admitted to the major prior to Fall 2016 are also strongly encouraged to fulfill six credits of Advertising elective courses numbered 300 or above. College of Media elective courses offered by or cross-listed with Journalism (JOUR), Media and Cinema Studies (MACS), or the College of Media (MDIA) count toward the remainder.

2 Which may be credited toward the College requirement of advanced hours outside the College.

3 Or another approved basic course or course sequence in statistical methods, which currently includes ECON 202, EPSY 280, PSYC 235, SOC 280, SOCW 225. Such courses may, if they qualify, also be credited toward the requirement of advanced ours and General Education courses outside the College.

Minimum required major and supporting course work normally equates to 68 hours plus 12 additional hours of College of Media requirements. All campus general education and foreign language requirements must be met. The minimum hours required for graduation is 124. At least 12 hours of 300- and 400-level course work must be taken on this campus, and a minimum of 40 hours of upper-division course work is required.

A Major Plan of Study Form must be completed and submitted to the Department of Computer Science Office of Undergraduate Affairs by the beginning of the fifth semester (60-75 hours). Please see the computer science advisor in 1210 Siebel Center, as well as an advertising advisor in the College of Media Student Services Center.

To graduate from the Computer Science and Advertising curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

Degree: Bachelor of Science

Major: Journalism
Minor: Journalism

A degree in Journalism prepares students for exciting and fulfilling careers in traditional broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

Campus General Education requirements not met by classes listed above  12

Minors or Specializations  18
Recognized minor or one 18-hour specialization or two 9-hour specializations, approved by adviser, from outside College of Media and Department of Communication. May include hours listed above. Students may choose to complete a Public Relations minor in addition to the non-Media minor or specialization.

Total Hours Outside the College of Media  72-73
Advanced Hours Requirement
At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. Nine of the 20 hours must be in courses numbered 300 or above.

Minumum Total Hours required for graduation  124

Journalism

Minor in Journalism
The Minor in Journalism allows a student to explore the role of journalism in a democracy and to assess how journalism is meeting its social responsibility to engage, enlighten and empower citizens. The minor equips students to participate in the ever-changing world of media delivery and consumption.

Media and Cinema Studies

Dr. C. L. Cole, Department Head
119 Gregory Hall, 810 South Wright Street, Urbana
PH: (217) 333-1549
https://media.illinois.edu/degrees/media-and-cinema-studies-bs/undergraduate-programs

Degree: Bachelor of Science

Major: Media and Cinema Studies

Minor: Cinema Studies
Students in the Media and Cinema Studies major have the option to declare a thematic specialization from Cinema Studies, Media Industries & Culture, Difference & Power, Science Technology, & Visualization, Global Media & Cinema, Sport Media, and Media Making, Design, & Research. The department also offers an undergraduate Minor in Cinema Studies, a graduate Minor in Cinema Studies, and a Certificate in Sport Media.

Students in the Media and Cinema Studies program develop an understanding of modern communications, media, and cinema from an interdisciplinary perspective. They explore the theory behind contemporary media and the origins, structures and implications for our society. Students also address the history of media and cinema both in the United States and internationally. The development of all media forms is considered in light of more general concerns about technology, culture, society, and politics.

For the Degree of Bachelor of Science in Media and Cinema Studies

To graduate from the media and cinema studies curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade and for which all prerequisites will be enforced.

<table>
<thead>
<tr>
<th>Code</th>

### College of Media Electives

Students must earn at least 36 hours in the College of Media. Remaining hours are completed with ADV, JOUR, MACS, or MDIA electives.

### Required Area of Study or Minor Outside the College of Media

In addition to the courses in the major plan described above, students must complete 9 hours in an approved area outside the College of Media. Approved areas include: African American Studies; American Indian Studies; Anthropology; Art History; Asian American Studies; Business Administration; Communication; Computer Science; Creative Writing; Economics; Food Science and Human Nutrition; Gender and Women’s Studies; History; Kinesiology and Community Health; Latina/o Studies; Linguistics; Literature; Natural Resources and Environmental Sciences; Non-English Languages; Philosophy; Political Science; Psychology; Recreation, Sport and Tourism; Regional Area Studies; or Sociology. A university-approved minor may substitute for this requirement. Courses may, if they qualify, also count toward the requirement for advanced hours outside of the College.

### Advanced Hours Requirement

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 and above.
Minor in Cinema Studies

The Minor in Cinema Studies provides undergraduate students with certain core courses in the discipline while also allowing them the freedom to explore the various approaches to the subject presented by different departments.

The Minor in Cinema Studies requires a minimum of 21 hours distributed over seven courses as follows. At least six hours of advanced (300 or 400) level courses must be included:

<table>
<thead>
<tr>

Two additional courses on film offered by or cross-listed with MACS, other than those used to fulfill the requirements above. A list of approved courses is maintained by the department.

### Agricultural Communications

Dr. Lulu Rodriguez, Director
274 Bevier Hall
905 S. Goodwin Ave.
PH: 217-300-1045
http://agcomm.illinois.edu/

### For the Degree of Bachelor of Science with a Major in Agricultural Communications

The major in Agricultural Communications is for students wishing to pursue careers as professionals in writing, editing, and publishing; public relations; advertising; radio and television broadcasting; photography; and related activities with an emphasis on the fields of food, agriculture, the environment, energy and consumer behavior. Concentrations in Journalism or Advertising allow students to pursue these professional interests. Program requirements in each concentration include the completion of an interdisciplinary minor in Food and Environmental Systems. The College of Agricultural, Consumer and Environmental Sciences and the College of Media jointly offer this curriculum.

A minimum of 126 hours are required for graduation, including: General Education Requirements Agricultural Communications major requirements Minor in Food and Environmental Systems requirements College of Media concentration requirements

### Social Work, School of

http://socialwork.illinois.edu

Dean of the School: Steven Anderson
Director of BSW Program: Brenda Lindsey
1010 W. Nevada St.
Urbana, IL 61801
(217) 244-5246
E-mail: undergradsocialwork@illinois.edu
(undergradsocialwork@illinois.edu)

**Overview of Curriculum and Requirements**

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, healthcare, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing status in many masters of Social Work (MSW) programs. The
advanced standing status enables BSW graduates to receive an MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

Degree title: Bachelor of Social Work
The social work major prepares practitioners for generalist social work practice with individuals, groups, families and communities. The curriculum requires a minimum of 120 hours for graduation. Minimum required coursework in the major equates to 53 course hours of social work coursework, which includes 15 credit hours of combined agency-based field practicum (internship) and field seminar.

Departmental Distinction
The top 10% of the BSW graduating class will graduate with distinction.

Experiential Learning Fee
The University of Illinois Board of Trustees approved an experiential learning fee in 2010 that is assessed to all Bachelor of Social Work majors to help cover part of the extensive faculty resources required to provide enriched social work learning opportunities. A one-time fee of $750 will be charged to BSW students once the student has earned 60-89.9 progress hours; including transfer hours.

Admission Requirements for Freshman
The following requirements must be met for consideration for admission as a freshman into the BSW Program:

- University of Illinois application-The application includes a major selection, an essay, a list of activities, work experience, community service, honors and awards, and an accurate email address
- Application fee
- Self-Reported Academic Record (SRAR)
- Official test scores-Standardized test scores are required for admission review: either ACT (code 1154) or SAT I (cod 1836) scores are accepted
- English proficiency
- We do NOT accept letters of recommendation

For more detailed information regarding application requirements and the application process, please visit the University of Illinois Admissions website at: www.admissions.illinois.edu (http://www.admissions.illinois.edu)

Admission Requirements for Transfer and Inter-College Transfer Students (ICT)
The following requirements must be met for consideration for admission into the BSW Program:

- Documentation of a minimum of 50 (fifty) hours of volunteer1 or paid work experience must be provided with the submission of the BSW application or prior to beginning the BSM program. These hours must be completed by working with or for an underrepresented population or population in need.1
- Cumulative minimum GPA 2.5 or higher
- Evidence of strong communication and interpersonal skills
- Evidence of personal attributes that are suitable for the profession of social work
- Successful completion of the application process for entry https://socialwork.illinois.edu/academics/bachelor-of-social-work/admissions-information/bsw-application/

1 Volunteer hours may include classroom service learning and work completed through registered student organizations and Greek organization affiliations. If you need assistance obtaining additional hours, please contact the Community Learning Lab (http://socialwork.illinois.edu/community-learning-lab) or the Office of Volunteer Programs (http://union.illinois.edu/get-involved/office-of-volunteer-programs).

Application Deadline:
To be guaranteed consideration for the Spring term, you must apply by October 15th. To be guaranteed consideration for the Fall term, you must apply by March 1st. The School of Social Work may consider ICT applications after this date if the application specifically requests consideration for an earlier term.

The Social Work Minor is designed for students interested in combining a primary academic area with social welfare and professional social work content. It emphasizes synthesis and application of social work theories, policies and research in the development of comprehensive solutions to major social problems.

Minor in Global Labor Studies

Global Labor Studies analyzes the interplay of class, gender, race, and labor organizations in the workplace, the economy, and the political arena from a multi-disciplinary and global perspective. A minor in Global Labor Studies requires 18 credit hours in LER Global Labor Studies Courses.

A minimum grade point average of 2.75 is required for completion of the minor and all courses required for the minor must be taken for a grade.

Minor in Informatics

Allen Renear, Interim Director, Illinois Informatics Institute
Current address:
3014 NCSA
1205 W. Clark, MC-257
Urbana, IL 61801

Moving late fall 2018 to:
616 E. Green St., Suite 210
Champaign, IL 61820
PH: 217-333-4930
FX: 217-333-5878
http://informatics.illinois.edu
Contact info- (inf-minor@illinois.edu)minor@illinois.edu, or Karin Readel, the Informatics Education Coordinator at 244-1220, if you have any questions.

The Minor in Informatics will teach you to become a better creator and user of computing technology in your major area and to think critically about new technology’s role in society. No other field has, and will have, a greater influence on humanity in our generation.

Informatics studies the design, application, use and impact of information technology. The ability to handle vast amounts of information cheaply has changed the way we live. Advances in computer power, the World Wide Web, search engines, social networking, mobile technology, GIS, and large-scale collaborative initiatives, to name a few, have revolutionized the way knowledge is created and shared. Information has become a ubiquitous, indispensable component of our everyday lives, as we strive to manage information, create knowledge, and make decisions.

The Informatics Minor signals that you have concrete expertise in computing and Information Technology (IT) and understand their human implications.

Students from any major interested in applying technology or studying its effect on humanity are encouraged to apply, preferably by the end of sophomore year. Although there are no prerequisites, basic familiarity with computers is expected.

To receive the Informatics Minor students must complete three core courses plus three upper-level classes with sufficient informatics or computational content from an approved list of courses offered from a wide range of disciplines. The core courses are INFO 102, CS 105, and INFO 202. INFO 102 is a broad introduction to computer science and provides an understanding of the nature, capabilities, and limitations of IT. CS 105 is an introduction to computer programming for non-science and non-engineering majors. INFO 202 explores the ways in which IT has and is transforming society and how these technologies affect a range of social, political, and economic issues from the individual to societal levels. Some substitutions can be made. The list of upper-level courses that count toward the minor is here: http://www.informatics.illinois.edu/informatics-minor/upper-level-related-course/. This list is dynamic as new classes are added each year.

Course requirements for students who are not CS majors or minors or ECE majors:

Sustainability, Energy, and Environment Fellows Program (SEE FP)

Professor Madhu Khanna, iSEE Associate Director for Education & Outreach

Institute for Sustainability, Energy, and Environment  
1101 W. Peabody, Suite 350 (NSRC), MC-635 | Urbana, IL 61801  
sustainability@illinois.edu

PH: 217.333.4178  
FX: 217.244.2006

http://sustainability.illinois.edu/education/sustainability-minor/

Why is true sustainability so hard to achieve? Behind every environmentally friendly practice is a web of consequences, trade-offs, feedbacks, and barriers — and this undergraduate minor administered by the Institute for Sustainability, Energy, and Environment (SEE) will help you develop a systems-level perspective of the economic, environmental and social dimensions of sustainability to help you navigate them.

The Sustainability, Energy, and Environment Fellows Program (SEE FP) is a campuswide undergraduate minor that prepares students for pursuing careers in the corporate sector, nonprofit organizations, government agencies and environmental advocacy groups.

To find out more about the minor and the enrollment process, email Professor Madhu Khanna, iSEE Associate Director for Education & Outreach, at see-fellows@illinois.edu.

Pharmacy

Health Professions advising is part of The Career Center at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website.
Information listed in this catalog is current as of 07/2019
Candidates who wish to continue in teacher education must comply with such referrals.

Student Teaching

State law mandates candidates pass an ISBE approved test of basic skills before student teaching. Candidates may use an ACT or SAT score to meet the test of basic skills if it meets the ISBE requirements for substitution. Students who have not passed and submitted their basic skills scores to ISBE will not be permitted to student teach.

In addition, state law mandates candidates pass the appropriate content area test prior to student teaching. Students who have not passed the appropriate content area test will not be permitted to student teach. Student teaching application forms are available in the college clinical experiences office that houses each program. (Candidates may obtain referrals to the appropriate office by contacting the Council.) A candidate seeking placement in student teaching should contact the appropriate program's clinical experiences office no later than October 1 of the academic year preceding the desired placement to determine departmental deadlines and meeting dates. Departments may set earlier deadlines. Candidates who apply after their departments' deadlines cannot be guaranteed a student teaching assignment during the next academic year. A candidate who will not be on campus during the fall semester, but who expects to enroll in educational practice (student teaching) during the next school year, should secure an application form from his or her program's clinical experiences office before leaving campus. A candidate who has submitted an application will receive a student teaching assignment pending verification that he or she has completed all requirements of the appropriate Common Assessment Plan.

Only those candidates officially registered in teacher education curricula are eligible for student teaching placements. The Council reserves the right to deny student teaching placement to candidates who have not met all requirements of the appropriate Common Assessment Plan. Candidates may also be denied a student teaching placement for health reasons.

Candidates in teacher education should anticipate and plan for student teaching assignments. For most candidates, additional expense will be incurred during the semester in which student teaching is scheduled. Candidates cannot be guaranteed assignments in local schools. Student teaching is a full-time commitment on the part of teacher candidates. Teacher candidates should not plan to take additional coursework outside their program during student teaching, nor should they plan to be employed. School districts have the right to not accept a candidate and therefore, the Council cannot guarantee each candidate a placement.

However, each program will exhaust every effort to seek a placement for each candidate.

Candidates are expected to complete all field experiences, including student teaching, at the University of Illinois at Urbana-Champaign. A candidate who wishes to complete student teaching through another university, yet receive a University of Illinois at Urbana-Champaign degree and recommendation for licensure, must secure the prior approval of his or her adviser, clinical experiences program coordinator, college, and the Council on Teacher Education via petition. The petition must be supported by verification from the other university that it will accept the candidate as a student teacher and will comply with all Council on Teacher Education requirements. Approvals of such arrangements are rare, and candidates should expect to incur additional costs. Consult the Council for additional information.

Teacher Licensure

A candidate who completes all of the coursework and other requirements in a program approved for purposes of licensure by the Illinois State Board of Education is entitled to receive the recommendation of the University for the appropriate license and endorsement(s), provided the candidate has met all of the requirements of the appropriate Common Assessment Plan and has passed all licensure tests and assessments required by the State of Illinois. In addition, all professional education and content-area coursework that forms part of an application for licensure, endorsement, or approval must have been passed with a grade no lower than C- or equivalent in order to be counted towards fulfillment of the applicable requirements.

In some instances a candidate may be denied a recommendation for licensure but be granted a degree by his or her college. A candidate who believes that the recommendation for licensure has been withheld unjustly may seek redress through the grievance policy established by the Council on Teacher Education.

General Education

Candidates for licensure are required to complete coursework that includes the theoretical and practical understanding generally expected of a liberally educated person. General education includes developing knowledge related to the arts, communications, history, literature, mathematics, philosophy, sciences, and the social studies from multicultural and global perspectives. This requirement is satisfied by the University of Illinois general education pattern incorporated into all undergraduate teacher education programs.

Licensure Tests

All candidates for licensure as teachers, school administrators, and school support personnel must pass tests mandated by the Illinois State Board of Education as a condition for licensure. Illinois law requires that applicants to all educator preparation programs pass a test in basic skills (reading, writing, grammar, and mathematics) and a separate test in their major area. All candidates in programs leading to teaching must also pass a teacher performance assessment (edTPA). Candidates for Learning Behavior Specialist I licensure must pass a fourth test: Special Education General Curriculum.

State law requires prospective candidates for licensure as school administrators or school support personnel pass a test of basic skills, as determined by the State, if the Illinois Test of Basic Skills was not passed previously. If the basic skill tests was not already taken and passed, the Test of Academic Proficiency must be passed prior to admission to the educator preparation program. In addition, candidates must pass the appropriate content-area test. Candidates may use an ACT or SAT score to meet the test of basic skills if it meets the ISBE requirements for substitution. See www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf (http://www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf) for information regarding specific requirements.

Time Limit on Licensure

Because licensure requirements are subject to change at any time as a result of new mandates from the Illinois State Board of Education and the Illinois General Assembly, the University is unable to guarantee a recommendation for licensure to anyone who does not apply for licensure immediately upon completion of licensure requirements. A candidate completing an approved program is strongly encouraged to apply for licensure during his or her last term on campus and claim said license on the Educator Licensure Information System (ELIS) once it has been
entitled. Applications for licensure are available on the candidate's student portal or in the Council office. Failure to claim a license through the ELIS once it has been entitled could result in additional requirements should candidate seek to claim license at a later date.

**Background Investigation of Applicants for Field Placement and Employment**

State law mandates that all candidates for public school licensure in programs under the purview of the Council on Teacher Education complete a criminal background check and checks of the Statewide Sex Offender Database and Statewide Child Murderer and Violent Offender Against Youth Database before they may be placed in schools. Candidates are responsible for all fees connected with this procedure.

This means each educator preparation candidate in an Illinois school district is required to authorize the school district to initiate a criminal background check which will include a request for fingerprints. A school district may host an educator preparation candidate only after a background check has been initiated and may not knowingly host an educator preparation candidate who has been convicted of a felony or of attempting to commit certain offenses enumerated in The School Code of Illinois. This criminal background check is in addition to any background check you may have completed for the University of Illinois at Urbana-Champaign.

Final decisions regarding the placement of candidates in schools are made in agreement between the relevant department/college/program and the school/district.

The criminal background check is typically conducted prior to any field experience in the schools and before student teaching or internship.

**Curricula**

A candidate seeking licensure must complete the requirements of both his or her chosen curriculum, Council on Teacher Education requirements, and all additional State mandated requirements. Teacher education, school support personnel, and administrator curricula and the colleges and departments that offer them are listed below. All curricula have been approved by the Illinois State Board of Education.

Candidates are advised that licensure requirements may be altered at any time by the Illinois State Board of Education or the legislature. In such cases, candidates may be compelled to satisfy the new requirements to qualify for the University's recommendation for licensure.

**College of Agriculture, Consumer and Environmental Sciences** (p. 7)
- Agricultural Education

Concentrations

A graduate concentration constitutes a coherent program of study requiring additional breadth or considerable depth of knowledge. A concentration may refer to a subfield within a discipline, or to an interdepartmental and/or interdisciplinary area of knowledge. Concentrations appear on academic transcripts.

Some concentrations (major-based) are only open to a student majoring in the offering department. Other concentrations (floating) are open to students in a broad range of majors. Both types are listed here, with the eligible programs listed below each concentration.

Accountancy (p. 354)
- Business Administration (M.B.A. (p. 407) and M.S. (p. 399))
- Finance (M.S.) (p. 476)
- Technology Management (M.S.) (p. 399)

Acting
- Theatre (M.F.A.) (p. 626)

Actuarial Science
- Applied Mathematics (M.S.) (p. 538)
- Actuarial Science and Risk Analytics (Ph.D.) (p. 541)

Advanced Analytics
- Industrial & Enterprise Engineering (M.S.) (p. 502)

Advanced Clinical
- Social Work (M.S.W. on-campus and extramural) (p. 606)

African American Studies (p. 359)
- African Studies (M.A.) (p. 361)
- Educational Policy Studies (M.A. and Ph.D.) (p. 454)
- Educational Psychology (all, except online degrees) (p. 458)
• History (all) (p. 493)
• Political Science (all) (p. 587)
• Sociology (all) (p. 609)

Analytics
• Statistics (M.S.) (p. 623)

Animal Sciences
• Bioinformatics (M.S.) (p. 372)

Applied Statistics
• Statistics (M.S.) (p. 623)

Astrochemistry (p. 385)
• Astronomy (Ph.D.) (p. 387)
• Chemistry (Ph.D.) (p. 415)

Bioengineering (p. 395)
• Bioinformatics (M.S.) (p. 392)

Biomechanics (p. 548)
• Bioengineering (M.S.) (p. 394)
• Materials Engineering (MENG) (p. 536)
• Electrical and Computer Engineering (M.S., Ph.D.) (p. 469)
• Materials Science and Engineering (M.S.) (p. 537)
• Mechanical Science and Engineering (M.S., MENG, Ph.D.) (p. 547)
• Theoretical and Applied Mechanics (M.S (p. 547), Ph.D. (p. 545))

Major: Accountancy
Degrees Offered: M.A.S., M.S., Ph.D.

Graduate Minor: Accountancy

Graduate Concentration: Accountancy; Data Analytics in Accountancy

Off Campus Program: Major: Taxation (not currently accepting applications; suspended effective Summer, 2018)
Degrees Offered: M.S.

Graduate Degree Programs

The Department of Accountancy offers on campus graduate programs leading to the degrees of Master of Accounting Science (M.A.S.), Master of Science in Accountancy (M.S.A.), and Doctor of Philosophy in Accountancy. The M.A.S., M.S.A. and Ph.D. degrees are offered on the Urbana-Champaign campus. The master’s degree requirements can be completed in one year. The Ph.D. degree takes approximately four to five years of full-time study and research. The Department also offers a fully online program through the iMSA program. The iMSA can be completed in 4 semesters (18 months) with an August start date or 6 semesters (24 months) with a January start date.

Admission

All applicants to the Master of Accounting Science program should refer to MAS program (https://business.illinois.edu/accountancy/programs/mas/admissions).

All applicants to the Master of Science in Accountancy program should refer to the MSA program (https://business.illinois.edu/accountancy/programs/msa/prospective-students/admission).

All applicants to the online Master of Science in Accountancy program should refer to the iMSA program (https://onlinemsa.illinois.edu/admissions).

All applicants to the Accountancy doctoral program should refer to the PhD program (https://business.illinois.edu/accountancy/programs/phd/admission).

• Master of Accounting Science (M.A.S.) in Accountancy (p. 351)
• Master of Accounting Science (M.A.S.) in Accountancy, Taxation Concentration (p. 352)
• Master of Science in Accountancy (p. 352)
• Master of Science in Taxation (p. 353)
• Online Master of Science in Accountancy (p. 350)

The online Master of Science in Accountancy (https://onlinemsa.illinois.edu) (iMSA) is a fully online program. The highly-engaged delivery format and our world-renowned faculty provide students with a hands-on and practice-oriented learning experience. The iMSA prepares students for success in accounting careers and provides the academic prerequisites for candidates who wish to take the United States Uniform Certified Public Accountant (CPA) exam.

The iMSA is designed for those already working in the accounting field looking to refresh their skill set and for those who intend to use the degree to enter the field for the first time. A mirror of the on-campus Master of Science in Accountancy (p. 352) (MSA) curriculum, the online MSA (iMSA) uses a flexible program format. It allows students to balance academic life with other obligations. The shortest time to degree completion with an August start date is four semesters (18 months) and with a January start date 6 semesters (24 months). Students can take as many as eight semesters (36 months) to complete the degree.

The University of Illinois accountancy programs have consistently been ranked in the top three by the US News & World Report and the Public Accounting Report.

Doctor of Philosophy

The student’s doctoral program is determined in consultation with a faculty advisory committee. The student’s evolving plans for the doctoral thesis serve as a guide in planning the program. Program coursework is comprised of two general categories: core studies and advanced studies within an area of specialization (i.e., a supporting field). The latter coursework is tailored to facilitate the student’s dissertation.

In addition, candidates must pass a written accountancy core examination and both oral preliminary and oral final examinations on the doctoral thesis. In the accountancy core examination, candidates must demonstrate a thorough knowledge of research methods and accounting theory; a general acquaintance with the subject matter of the variety addressed within accountancy doctoral core studies; and proficiency in the required areas of economic theory, quantitative methods, behavioral science and financial economics.

Graduate Minor in Accountancy

The minor in Accountancy seeks to develop business leaders who understand the role of accountancy and accounting in the conduct of business and the allocation of resources within society.

This minor requires twelve graduate hours of coursework. Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

Note: Students within the major cannot minor in the same program.

Accountancy, MAS

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from a regionally accredited U.S. institution. Each student will select either a Taxation or Audit Option as a primary focus. Each Option (listed below) includes room for graduate electives. By design, the program emphasizes the emerging trend of data analytics in the practice of accounting, with a standard course plan that leads to a graduate concentration in data analytics in accountancy (p. 354) to fulfill the graduate electives. Students have the choice of remaining in the standard course plan or selecting from among the following alternative graduate concentrations to fulfill the graduate elective requirement: finance (p. 478), corporate governance and international business (p. 401), information technology and control (p. 402), real estate (p. 478), and supply chain management (p. 402). Students who wish to deviate from the standard course plan, but do not wish to pursue a listed graduate concentration, may petition to take other graduate courses of interest subject to approval of an Accountancy Advisor. Admission to a concentration requires application to the Department no later than February 1 for fall admission. Admission to some concentrations may be competitive.

Other Requirements

Other requirements may overlap

All 32 graduate hours must be completed at the University of Illinois at Urbana-Champaign.

Minimum GPA: 3.0

For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/mas) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Information listed in this catalog is current as of 07/2019
Master of Accounting Science (M.A.S.) in Accountancy, Taxation Concentration

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from a regionally accredited U.S. institution. The Concentration in Taxation is one of the primary options available within the MAS program.

Students in the Taxation concentration may pursue a second optional concentration. If admitted to a second concentration, the coursework for the second concentration may also count toward the graduate electives requirements for the MAS degree. Second concentration options include:

- Data Analytics for Accountancy
- Finance
- Corporate Governance and International Business
- Information Technology and Control
- Real Estate
- Supply Chain Management

The MS in Accountancy (MSA) program offers a one year accounting degree. Our students include those with limited prior accounting education as well as students with an undergraduate degree in accounting. The MSA core curriculum applies to all of our students. However, for those students who have previously taken significantly equivalent courses to any of those in our core curriculum, we will work with our students to find a suitable replacement to recognize the sufficiency of their prior accounting education. Our MSA program prepares students for success in accounting careers and provides the academic prerequisites for candidates who wish to take the United States Uniform Certified Public Accountant (CPA) exam.

Although successful completion of our students’ academic requirements will always take top priority, our MS in Accountancy program also strives for a balanced approach to our students’ experience. We aim to help every student become a more complete accounting professional by delivering an intentional multi-faceted student experience that focuses on technical and non-technical business skill development. We will deliver on our commitment to provide each student with more than just an accountancy degree. That’s what makes our MSA program distinctive.

The MSA program begins in June each year with Summer Session II.

Master of Science in Taxation

This program is suspended effective Summer, 2018.

The Master of Science in Taxation (M.S.T) is an executive-style degree offered only at the Illini Center in Chicago. The M.S.T. is a one-year program for students with at least two years of work experience. The program begins in May and meets weekly on Friday afternoons and all day Saturday. Students applying for admission should have acquired a background in business and an accounting undergraduate major from an accredited college or university. Graduation requires 36 graduate hours of study that consists of twelve required courses delivered in three thirteen-week semesters.

Data Analytics in Accountancy Concentration

The Data Analytics in Accountancy Graduate Concentration is designed to develop leaders who understand (1) how to apply data analytics in a variety of accounting and business contexts, (2) critically solve business problems using data-intensive business and accounting information, and (3) synthesize and effectively communicate data-intensive information, findings, and conclusions to other environment-constituents, including supervisors, peers, and subordinates, clients, and regulatory agencies. This concentration will not only provide a strong foundational knowledge of data analytics, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

team-oriented in their approach to management and communications; and be prepared to continue to learn as the media environment evolves.

Admission
I. Admission to graduate study in advertising requires completion of the requirements for a bachelor’s degree in an accredited institution of recognized standing. Applicants are required to submit results from either the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) and are required to upload to the application a short essay indicating why they want to pursue graduate work in advertising. The Department of Advertising requires non-native English-speaking applicants to show evidence of English proficiency, which is provided by a satisfactory score on the Test of English as a Foreign Language (TOEFL). Minimum scores for TOEFL (international students only): 253 (CBT), 104 (IBT), 607 (PBT), and IELTS greater than 6.5. Three letters of recommendation are required. Transcripts from all universities that you have attended must be submitted (note: can be uploaded in your application). The required method of applying is online through the Graduate College Web site, and the Graduate College admission requirements also apply, see http://www.grad.illinois.edu/admissions/apply/requirements. Completed applications are due February 15, and applications are accepted for fall admission only.

II. Admission to the MS in Strategic Brand Communication program, applicants are expected to have a minimum grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate study and a 3.0 for any previous graduate work completed. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of 102 (IBT), 253 (CBT), or 610 (PBT) or minimum International English Language Testing System (IELTS) exam scores of 6.5 overall and 6.0 in all subsections. Prerequisite: course in Statistics or Calculus from an accredited institution. The admissions criteria will be based on an evaluation of each applicant’s academic and professional experience, GPA, English aptitude, and letters of recommendation.

A minimum GPA of 2.75 is required for continued enrollment.

Faculty Research Interests
Faculty profiles (https://media.illinois.edu/degrees/advertising-bs-ms/faculty/faculty-profiles) are available at the Advertising Department’s Web site.

• Master of Science in Advertising (p. 355)
• Master of Science in Strategic Brand Communication (p. 404)

M.B.A. Joint Degree Program
Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements and contact the M.B.A. program and their major department office for more information.

Master of Science in Advertising
Students are required to complete 36 hours towards the degree, including a professional project or thesis requirement. Full-time status requires 12 hours per semester, making it possible to complete the degree in three semesters. Admission is only granted for fall semester.

A graduate course listing (https://courses.illinois.edu) for Advertising students is available online.

Aerospace Engineering, PhD

Philippe Geubelle
306 Talbot Laboratory
104 South Wright Street
Urbana, IL 61801
PH: (217) 333-2651
http://aerospace.illinois.edu/

Director of Graduate Programs: Gregory S. Elliott
E-mail: ae@illinois.edu (aerospace@illinois.edu)

Major: Aerospace Engineering
Degrees Offered: M.S. and Ph.D.

Online Program: Aerospace Engineering. M.S.

Graduate Degree Programs

The Department of Aerospace Engineering (AE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The AE graduate program provides students with a strong background in engineering and applied science while placing emphasis on aircraft and spaceflight engineering. Students may major in one of the following general areas: aerodynamics, astrodynamics, combustion and propulsion, control systems, dynamical systems, fluid mechanics, structural mechanics, and materials.

Opportunity also exists for specializing in:

1. computational science and engineering via the Computational Science and Engineering (CSE) (http://www.cse.illinois.edu/education) transcriptable certificate
2. energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Option, (http://ease.illinois.edu)
3. systems engineering within the department’s graduate programs via the Systems Engineering Option (SE) (https://aerospace.illinois.edu/academics/graduate/ms-degree-program/ms-degree-non-thesis-campus/aerospace-system-engineering)

Admission

The Department of Aerospace Engineering accepts applications for admission to the graduate program for both fall and spring semesters. The application deadline for the fall semester for the Ph.D. and M.S. with Thesis programs and for full consideration for funding opportunities is January 1. The application deadline for the MS Non-thesis and the MS Non-thesis Systems Engineering option for the fall semester is July 1. The deadline for spring admission for all programs is October 8.

Typically, the prerequisite for graduate study is the equivalent of the B.S. in Aerospace Engineering (https://aerospace.illinois.edu/academics/undergraduate); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org) general test are required of all applicants. There are no minimum score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas from the following list:

- aerodynamics
- aeroelasticity
- astrodynamics
- combustion
- computational mechanics
- control and estimation
- dynamical systems
- experimental mechanics
- fluid mechanics
- information technology
- materials
- propulsion
- robotics
- structural mechanics-structural dynamics
- systems engineering

All applicants whose native language is not English are required to submit a minimum TOEFL (http://www.toefl.org) score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 7.0 overall and 6.0 in all subsections. No exemptions from the TOEFL are granted by the department. Full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to Aerospace Engineering are above the minimum scores demonstrating an acceptable level of English language proficiency. Applicants wishing to be considered for teaching assistantships must score 24 on the SPEAK portion of the TOEFL exam.

Full information on admission requirements and how to apply, see the department’s graduate programs Web site (https://aerospace.illinois.edu/academics/graduate).

Graduate Teaching Experience

M.S. students are not required to hold a teaching assistantship. Ph.D. students are required to hold a 25% teaching assistantship for at least one semester in order to meet the requirements for the Department of Aerospace Engineering doctoral program. Information about teaching assistantships can be found in the department’s Web site (https://aerospace.illinois.edu/academics/graduate).
Faculty Research Interests

Research activities in the AE Department encompass a wide range of problem areas in aerospace engineering and related engineering disciplines cited in the Graduate Programs section above and more fully described at the department's research area Web site (https://aerospace.illinois.edu/research).

Centers, Programs, and Institutes

Several nationally renowned interdisciplinary centers exist within the College of Engineering in which Aerospace Engineering faculty members along with many other campus faculty engage in research. A list of these, along with links to full descriptions, appears at the department's interdisciplinary centers Web site (https://aerospace.illinois.edu/research). Among these are the Beckman Institute for Advanced Science and Technology, the Center for the Simulation of Advanced Rockets (CSTAR), the Coordinated Science Laboratory (CSL), the Micro and Nanotechnology Laboratory, and the National Center for Supercomputing Applications (NCSA).

Facilities and Resources

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research Web site (https://aerospace.illinois.edu/research).

Financial Aid

Students in the M.S. non-thesis option are not provided funding by the department. Financial aid for graduate students in thesis graduate programs is available in the form of fellowships, teaching and research assistantships. A block grant from the National Aeronautics and Space Administration supports a multidisciplinary research and training program. Qualified candidates are considered for financial support upon application. In addition, graduate students making satisfactory progress toward their degrees may also be considered for financial support. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

The Aerospace Engineering Department offers two Masters programs:

- Aerospace Engineering, M.S. (p. 358)
- Aerospace Engineering, M.S. - Online (p. 358)

Qualifying Exam Information

Aerospace Engineering, M.S.
Online Program

The degree requirements are the same as for the on-campus non-thesis M.S. program (https://aerospace.illinois.edu/academics/graduate/ms-degree-program)—32 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

Students should develop a course program plan in consultation with their advisor. Suggested program tracts (https://aerospace.illinois.edu/academics/graduate/suggested-program-tracks) are provided for each of the three main technical divisions in the department:

1. Aerodynamics, Fluid Mechanics, Combustion and Propulsion (AFMCP);  
2. Astrodynamics, Controls and Dynamical Systems (ACDS); and  

The Aerospace Systems Engineering option (https://aerospace.illinois.edu/academics/graduate/ms-degree-program/ms-degree-non-thesis-campus/aerospace-system-engineering) is also available online.

One mathematics course from an approved list (https://aerospace.illinois.edu/academics/graduate/breadth-and-mathematics-requirements)

Elective courses chosen in consultation with an advisor (subject to Other Requirements and Conditions below) 16-20

Total Hours 32

### Other Requirements and Conditions

- A minimum of 16 hours of AE course work at the 400-level and above.
- A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being AE courses.
- A maximum of 4 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.
- Attendance at all Aerospace Engineering AE 590 seminars each semester while on campus.

Minimum GPA: 3.0

Generally, students holding a research assistantship will not be allowed in the non-thesis option.

A departmental petition is required to change from the thesis to the non-thesis option and vice-versa.

1 For additional details and requirements refer to the department’s Website (https://aerospace.illinois.edu) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

### Graduate Minor in African American Studies

The Department of African American Studies also offers a graduate minor in African American Studies. The minor is designed to complement graduate work in a variety of disciplines. Students wishing to take advantage of the minor must be in good standing, and must apply for acceptance into the minor.

<table>

Total Hours 12

### Graduate Concentration in African American Studies

The Department of African American Studies (DAAS) offers an interdisciplinary graduate concentration in African American Studies. This concentration is designed to complement doctoral work in the social sciences or humanities; applicants must demonstrate an interest in African American Studies and be in good standing in one of the following doctoral programs:

- History
- Educational Policy, Organization and Leadership
- Educational Psychology
- African Studies
- Sociology
- Political Science

Those wishing to apply for the concentration must submit three letters of recommendation, as well as a brief personal essay describing their background and career plans and explaining how a concentration in African American Studies enhances their primary program of study. Students must be accepted into the concentration. Students also would be expected to have a faculty member affiliated with the department on their doctoral committee. For admission to the concentration or for more information, please contact DAAS. A student’s intent to pursue a
graduate concentration must be approved by the student’s adviser and graduate program director.

Major: African Studies
Degrees offered: M.A.

Graduate Minor: African Studies

Joint Degree Program: African Studies and Library and Information Science
Degrees offered: M.A. and M.S.

Graduate Degree Programs

The Center for African Studies administers a two-year program of area studies courses and intensive African language instruction leading to a Master of Arts degree designed to give students an interdisciplinary perspective on the study of Africa. The program provides both language and area training for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. For more information about the Center’s graduate programs, please visit: http://www.afrst.illinois.edu/academics/grad/.

Admissions

The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor’s degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) – 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For more information about the application process and to access both domestic and international student applications, start here: https://grad.illinois.edu/admissions/apply/.

For more information about the Center’s admission requirements and procedures, and deadlines please visit www.afrst.illinois.edu/academics/grad/apply/ (http://www.afrst.illinois.edu/academics/grad/apply).

Students interested in the graduate minor in African Studies must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact Dr. Maimouna Barro (barro@illinois.edu).

Faculty Research

The Center for African Studies has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit: http://www.afrst.illinois.edu/people/faculty/

Facilities and Resources

Established since 1970, the Center for African Studies is one the largest and most dynamic African National resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the university of Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

In 2012, the University of Illinois Library reorganized its international and area studies units into one large International and Area Studies Library (IASL) in an excellent renovated space. This new unit includes the African Studies library and other world areas library collections. The University Library has supported a full-time African Studies Bibliographer since 1969, and has provided the necessary acquisitions, cataloging, and processing staff since then.

The African Studies collection include over 354,000 items in all formats, with more than 300,000 in printed volumes and in English and French and a smaller number in Portuguese, German and other European languages. The Library adds about 900 items written in African languages each year. About 16,000 volumes written in Arabic deal with topics related to Africa, and more than 7000 are in Amharic, Barman, Hausa, Lingala, Swahili, Tigrinya, Wolof, and Zulu. There are roughly 2,900 serials and 46,000 maps, of which 2849 have been digitized, as well as 12,000 microforms, and more than 800 audio-visual materials. The collection covers all African countries and includes materials in about 80 African

Information listed in this catalog is current as of 07/2019
languages. Priority countries for collecting include: Burkina Faso, Côte d'Ivoire, Democratic Republic of the Congo, Egypt, Eritrea, Ethiopia, Gambia, Kenya, Morocco, Mozambique, Nigeria, Senegal, South Sudan, South Africa, Tanzania, Tunisia, Zambia, and Zimbabwe. The collection is interdisciplinary and concentrated mainly in the humanities, social sciences, human rights and law, and agriculture. Our large collection of primary source materials, covering all of Africa, includes 120,000 pages of Arabic manuscripts and thousands of United States, United Kingdom, and African government documents. The Africana film collection is one of the finest in the US, and our African film database provides access to more than 800 films from or about Africa. UI’s rich museum collections include the Krannt Art Museum and the Spurlock Museum and hold over 10,000 African artifacts. The museums present interesting exhibits and host African performances. Teacher kits on various African topics are also provided by the Krannt Art Museum.

The African studies bibliographer runs the Africana library and teaches IS 530, one of the Center’s core courses and plays a key role in the Center's graduate program. For further information about the Africana library, please visit: http://www.library.illinois.edu/ias/africana/

Financial Aid

Students must apply and be admitted according to the set deadlines to be considered for assistantships and fellowships. The Center evaluates and ranks entering students on the basis of academic promise. This ranking becomes part of the basis for financial aid decisions. Funding is generally awarded to cover the fall and spring semesters and occasionally on a semester-by-semester basis. Multiple years of funding cannot be guaranteed, but the Center considers it a priority to fund students and see them through the program. Continued funding is based on academic performance (in the case of Foreign Language and Area Studies Fellowships) and job performance (in the case of assistantships), the availability of positions, and the Center's budget in a given year or US Department of Education Title VI funding cycle.

Students are encouraged to check the Graduate College’s website (http://www.grad.uiuc.edu) for funding opportunities—whether they are fellowships or assistantships: https://grad.illinois.edu/ and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

African Studies, MA and Library and Information Science, MS - Joint Program

This joint master's degree includes a program of language and area studies courses leading to an interdisciplinary Master of Arts degree in African Studies as well as a program of study leading to the Master of Science in Library and Information Science. The joint degree matches area expertise with professional education, and prepares students for professional careers in all types of information organizations, including libraries.

Agricultural Education

David Rosch, Graduate Program Coordinator
174 Bevier Hall
905 South Goodwin Avenue
Urbana, IL 61801
PH: (217) 333-3165
http://aged.illinois.edu/
E-mail: aces-aged@illinois.edu

Major: Agricultural Education
Degrees offered: M.S.

Online and Off-Campus Programs: Agricultural Education
Degrees offered: M.S.

Information listed in this catalog is current as of 07/2019
Graduate Degree Programs

The M.S. in Agricultural Education is a professional degree for training classroom-based educators and community and organizational developers to address issues as they pertain to teaching and learning in and about the agricultural, life, and environmental sciences. Students are typically interested in either furthering their career in Extension, agricultural classrooms in secondary education, professional organizations in training and supervisory roles, or community development. We also work with students interested in gaining licensure for teaching agriculture in Illinois public schools for grades 9-12.

Admission

We are looking for highly motivated students with strong academic records. Students with backgrounds in agriculture, education, behavioral or social sciences are especially encouraged to apply. The minimum undergraduate grade-point average for admission is 3.0 (A = 4.0). Applicants for the online/off-campus program are not required to take the Graduate Record Examination (GRE). International applicants from non-English-speaking countries must have official TOEFL scores of at least 575 (written version) or 233 (computer-based version) to be eligible for admission. To receive full consideration for admission (and financial aid opportunities if you are applying for the full-time, on-campus program), please apply by February 15 for possible admission the following fall semester or September 15 for possible admission to the following spring semester.

Each applicant’s undergraduate transcript will be evaluated for completion of general education courses required for certification by the Illinois State Board of Education. Students with deficiencies may be admitted with the stipulation that these be met before completion of the master’s program.

Student Teaching

In addition to meeting the above criteria, applicants interested in gaining a teaching license in the state of Illinois must pass the Illinois Certification Testing System test of Basic Skills test prior to student teaching. If taking this examination prior to admission presents substantial hardship (e.g., the applicant is from another state), the applicant should contact the director of the agricultural education graduate program to discuss the possible options.

Financial Aid

We are committed to funding as many of full-time on-campus students who are making timely progress as possible. The duration and amount of our commitment varies. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. For information regarding federal and state financial aid, please refer to www.osfa.illinois.edu (http://www.osfa.illinois.edu).

Agricultural Education can be pursued as an online degree. Please refer to http://aged.illinois.edu/grad/online-MS for more information.

Other Requirements

Other requirements may overlap

Minimum 500-level Hours Required Overall: 12, 8 must be in the unit
Minimum GPA: 2.75

1 Requirement may be waived if taken as an undergraduate at UIUC.
   If waived, student may substitute this credit requirement with an
   agricultural education or technical subject matter elective.

2 Students may take up to four credit hours in agricultural education to
   fulfill the technical subject matter course requirements. This is only
   recommended for students completing a thesis (AGED 599 credits) or for
   students who desire to take an agriculture content course for teachers
   (i.e. AGED 500).

3 The applied research option requires the completion of a thesis, and
   the program development and online options require the completion of
   a project in the area of agricultural education, broadly defined, and
   submission of a research/professional paper.

4 For additional details and requirements refer to the
   department’s Graduate Program Information (http://aged.illinois.edu/
   grad/reqs) and the Graduate College Handbook (http://
   www.grad.illinois.edu/gradhandbook).

For the Degree of Master of Science in Agricultural Production: Professional Master’s Concentration

Graduate Degree Programs

The College of Agricultural, Consumer and Environmental Sciences (ACES) offers graduate work leading to the Master of Science degree with a Major in Agricultural Production and Concentration in Professional Science Master’s (PSM). Fields of specialization within this interdisciplinary program include Food Animal Production, Crop Production, and Sustainable Production Systems. In addition to the rigorous scientific training in the area of agricultural production, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities.

Admission

Candidates for admission to the M.S. program must have a bachelor’s degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last 60 hours of undergraduate work and for any graduate study is required for admission. Graduate Record Examination (GRE) scores are required of all applicants and the minimum acceptable Test of English as a Foreign Language (TOEFL) score is 590 on the paper-based test, 243 on the computer-based test, or 79 on the internet-based test. Applications are only accepted for the fall semester. Transfer credit may not be applied.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

E-mail: abe@illinois.edu

Major: Agricultural and Biological Engineering
Degrees offered: M.S. and Ph.D.

Major: Technical Systems Management
Degrees offered: M.S.

Graduate Concentration: Professional Science Master’s

Graduate Degree Programs

The Department of Agricultural and Biological Engineering offers a graduate degree program which is at the forefront of the application of engineering principles to solve problems of agricultural production, utilization, environmental control, and biological systems and to improve the quality of life. Students may concentrate study in one of the faculty research interest areas listed below. Supporting course work includes: mathematics; computer science; statistics; engineering mechanics; chemical, civil, electrical, and mechanical engineering; animal science; crop sciences; food science; and other appropriate fields. Opportunity also exists for specializing in

1. computational science and engineering and
2. energy and sustainability engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education/cse-educational-programs-overview) and the Energy and Sustainability Engineering (EaSE) Option (http://ease.illinois.edu)

Information listed in this catalog is current as of 07/2019
Admission

Admission requirements for either master’s program include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum (in the case of the ABE M.S.) or the Technical Systems Management (TSM) curriculum (in the case of the TSM M.S.) with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work. Applicants must submit Graduate Record Examination (GRE) scores.

Admission to the Ph.D. program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining a Master of Science degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the M.S. degree program.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subcategories. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) taken upon arrival on campus.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. For details of expectations, see the department’s Graduate Handbook (http://abe.illinois.edu/graduate/handbook).

Faculty Research Interests

Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, biomanufacturing, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department’s graduate program Web site. (http://abe.illinois.edu/graduate/areas)

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. For all other students, fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

(217) 333-1810
Fax: (217) 333-5538
Director of Graduate Studies: Nick Paulson
Director of Graduate Recruiting and Admissions: Madhu Khanna
E-mail: ace-grad@illinois.edu

Major: Agricultural and Applied Economics
Degrees offered: M.S. and Ph.D.
Graduate Degree Programs

The Department of Agricultural and Consumer Economics (ACE) offers courses of study that lead to the Master of Science and the Doctor of Philosophy degrees. Applicants with a baccalaureate degree are initially admitted to the M.S. program. Students who fulfill specific requirements in the first year of the M.S. program may request transfer into the Ph.D. program.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English must have a Test of English as a Foreign Language (TOEFL iBT) score of at least 88 (230 computer-based and 570 paper-based) or an International English Language Testing System (IELTS) academic examination overall score of at least 6.5 with a minimum sub-section score of 6 in each of the four modules (speaking, listening, writing, and reading). Graduate Record Examination (GRE) general test scores are required for candidates seeking financial aid and are requested for all applicants. Applicants to the Ph.D. program are requested to provide a sample of their academic writing. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. An applicant with a master’s degree in an appropriate discipline will be considered for the Ph.D. degree. Students may commence study in either semester, but initial enrollment in fall semester is preferable.

Student Thesis and Dissertation Research

Our students’ research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees. Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Agricultural and Applied Economics. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp (http://www.med.illinois.edu/msp).

Agricultural and Applied Economics, MS

The M.S. offers considerable flexibility. Students using the degree as a foundation for a doctorate emphasize economic theory and analytical research tools. Students seeking the terminal master’s degree focus their study on the concepts and analytical techniques used by analysts and managers in industries, governments, and other organizations.

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit. M.S. students entering the ACE graduate program will be admitted only to the Thesis Option. For the Thesis Option, a thesis is prepared under the supervision of a faculty advisory committee. The thesis is defended in a formal oral examination, which usually coincides with an open departmental seminar, administered by the thesis committee. The Non-Thesis Option requires advanced coursework in lieu of a thesis. The Non-Thesis Option is available only to students already enrolled in the Thesis Option of the ACE M.S. program or in the ACE Ph.D. program. Application for admission to the Non-Thesis Option is by petition to the Department after at least two semesters of graduate coursework have been completed.

Minimum Hours Required Within the Unit: 20 at the 500 level, not including ACE 566, 599 or independent study

Minimum 500-level Hours Required Overall: 20

Minimum GPA: 3.0

A 3.0 (A = 4.0) GPA is required in all courses completed in the program.

Doctor of Philosophy in Agricultural and Applied Economics

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- agricultural finance
- environmental and natural resource economics
- family and consumer economics
- farm and agribusiness management
- international and policy economics
- price analysis and agricultural marketing
- regional economics and public policy

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

A 3.0 (A = 4.0) GPA is required in all courses completed in the program.

Non-Thesis Option

Minimum Hours Required Within the Unit at the 500-Level: 16 excluding indep study, 599 and core courses

A written paper in the form of a journal article approved by the research paper committee and presented at a department conference.

Masters Degree Required for Admission to PhD?

Yes, but students meeting specific conditions may petition to move from the M.S. to the Ph.D. program within three semesters. Students who take this route must complete 96 total hours.

Minimum GPA:

Doctor of Philosophy in Agricultural and Applied Economics

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- agricultural finance
- environmental and natural resource economics
- family and consumer economics
- farm and agribusiness management
- international and policy economics
- price analysis and agricultural marketing
- regional economics and public policy

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

A 3.0 (A = 4.0) GPA is required in all courses completed in the program.

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements and contact the M.B.A. program and their major department office for more information.

M.U.P. Joint Degree Program

For joint programs, at least 40 hours must be in Urban Planning, including all core courses and capstone requirements. The two programs must total a minimum of (a) 80 hours, or (b) the sum of 40 Urban Planning
hours plus the required number of hours for the second degree, whichever is greater. (In the latter case, the other program may at its discretion count up to 8 hours of Urban Planning courses as electives in meeting its degree requirements as long as students are required to take no fewer than 40 additional hours in that program.) The MUP capstone requirement may be waived for a thesis completed in another program provided faculty from both programs participate on the thesis committee. Students must be in residence in Urban Planning for at least two semesters.

Consult the department’s M.U.P. joint degree (http://www.urban.illinois.edu/academic-programs/mup/mup_joint.html) web page for more information about the admissions process and joint degree requirements. For additional guidance, please contact the Director of the M.U.P. Program.

Overall: 12
Minimum GPA: 3.0

1 For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Admission

Acceptance for graduate study in animal biology is based on the applicant’s research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Courses required for admission are inorganic and organic chemistry, a year of physics, and mathematics through calculus. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is mandatory. Considerable emphasis is placed on a student’s interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are considered for fall admission only. The deadline for application materials is December 15. A minimum paper-based Test of English as a Foreign Language (TOEFL) score of 570 (230 on the computer-based version, 88 on the internet-based version) is preferred for international applicants.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biology-Ecology, Ethology & Evolution. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.

Biology: Concentration in Ecology, Ethology & Evolution, PhD

Candidates for the Ph.D. degree must demonstrate excellence by examination and, in consultation with an adviser and doctoral committee, plan and carry out original thesis research with distinction. A preliminary examination evaluating the ability of students to integrate subject matter related to their fields is given during the third year. Additional requirements may be prescribed by the adviser and doctoral committee. A final examination, in which the student defends the thesis, and a presentation of the thesis at the departmental seminar complete the program.

Other Requirements

A concentration is required.

Experience in Teaching is required as part of the academic work of all Ph.D. candidates in this program.

Masters Degree Required for Admission to PhD? No, but Masters level requirements must be met (additional 32 hours)
Qualifying Exam Required: No
Preliminary Exam Required: Yes
Final Exam/Dissertation Defense Required: Yes
Dissertation Deposit Required: Yes
Minimum GPA: 3.0

For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Graduate Degree Programs

The Department of Animal Sciences offers graduate work leading to the Master of Animal Sciences, Master of Science, and Doctor of Philosophy degrees. Fields of specialization include:

- animal breeding and genetics
- animal behavior
- biochemistry
- environmental physiology
- immunobiology
- meat science and muscle biology
- microbiology
- nutrition
- systems of animal management and production
- physiology of lactation
- physiology of reproduction

Beef and dairy cattle, horses, poultry, sheep, swine, and a variety of companion and laboratory animals are available for study.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the Bioinformatics program will be able to integrate basic and applied concepts in the three areas and applied them to biotechnology and medical research.

Admission

Candidates for admission to the M.S. and Ph.D. programs must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Students must take the Graduate Record Examination (GRE) and are recommended to take the advanced test in biology. English proficiency requirements for admission follow Graduate College requirement. Emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Admission is possible for spring and summer semesters.

For the M.A.S.N.C., application materials include baccalaureate degree transcripts, resume, personal statement, Graduate Record Examination (GRE) general test scores, and three letters of recommendation. One letter of recommendation must be provided by the Animal Sciences faculty member that will advise the student indicating commitment to mentor. A departmental committee will evaluate the applications and recommend admissions.
Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is encouraged as part of the academic work of students in the M.S. and Ph.D. programs.

Financial Aid

For the M.S. and Ph.D., financial aid for graduate students is available in the form of fellowships, teaching and research assistantships, tuition and partial fee waivers, and traineeships. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a full tuition waiver and a partial fee waiver, as well as a stipend.

The tuition and fees for the M.A.N.S.C. correspond to the standard University of Illinois at Urbana-Champaign graduate studies tuition and fee rates. For tuition information and external funding resources, please visit the department's graduate program website. Students in the Master of Animal Sciences in Animal Sciences degree are not eligible for Board of Trustees tuition waivers.

Anthropology

http://www.anthro.illinois.edu

Head of the Department: Brenda Farnell
Director of Graduate Studies: Ellen Moodie
Museum Studies Program Coordinator: Susan Frankenbarg
109 Davenport Hall
607 South Mathews Avenue
Urbana, IL 61801
(217) 333-3616
E-mail: anthro@illinois.edu

Major: Anthropology
Degrees offered: M.A., Ph.D.
Graduate Concentration: Second Language Acquisition and Teacher Education (p. 601) (Ph.D. only)
Graduate Minor: Museum Studies

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Anthropology and Doctor of Medicine (M.D.) through the Medical Scholars Program (https://www.med.illinois.edu/mdphd).

Graduate Degree Programs

The Department of Anthropology offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees. We generically do not accept students for a terminal M.A.

Admission

Students without the equivalent of the department’s undergraduate concentration may be admitted to either degree program, but they may be required to make up any deficiencies in their anthropological backgrounds. In addition to the Graduate College admission requirements, students are required to submit Graduate Record Examination (GRE) scores. Students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) (http://www.grad.illinois.edu/admissions/instructions/04c), with minimum scores set by the Graduate College. Students are admitted for the fall term only.

Students wishing to pursue the minor in Museum Studies must be in good standing in the graduate program of an academic department, and must apply for acceptance into the minor. Admission to the minor is contingent upon approval of the student’s home department and the Museum Studies Steering Committee. Students may apply to the minor during the first week of the fall and spring semesters in any academic year, and should contact the Museum Studies Program Coordinator for application instructions or more information.

Degree Requirements

Each subfield (Archaeology, Biological Anthropology, and Sociocultural/Linguistic Anthropology) requires a specific set of courses for graduation. Achieving doctoral candidacy in all three subfields entails passing (a) language (and/or skill) exam(s), (b) passing a set of preliminary examinations, and (c) successfully submitting a predissertation paper, and/or a doctoral proposal, all to be defended in an oral examination. For specific details and requirements for admission to and navigation of the Ph.D. program, please refer to the Anthropology Department Graduate Programs Handbook (http://www.anthro.illinois.edu/programs/graduate/...
American Studies, Asian American Studies, Gender and Women’s Studies, and Latina/Latino Studies), along with the Women and Gender in Global Perspectives Program, Spurlock Museum, the Museum of Natural History, Krannert Art Museum, the Institute for Genomic Biology, and the Program in Ancient Technologies and Archaeological Materials.

Agreements between the University and various governments and institutes facilitate research in many nations. Training is available in various languages (some with funding available), including Arabic, Bengali, Burmese, Chinese, Hausa, Hebrew, Hindi, Indonesian, Japanese, Korean, Portuguese, Quechua, Lingala, Russian, Shona, Swahili, Thai, and Urdu. Students have ready access to the extensive computer facilities of the University and to the department’s facilities.

**Financial Aid**

University fellowships, Graduate College fellowships for under-represented minorities, and teaching and research assistantships provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany most fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. University of Illinois public archaeology programs, including the Illinois State Archaeological Survey and the Public Service Archaeology and Architecture Program, have provided support and research employment for graduate students in the past, as has the U.S. Army Construction Engineering Research Laboratory in Champaign.

**Master of Arts in Anthropology**

The master’s degree can be a first stage toward the doctorate or may be used by students wishing to apply knowledge of anthropology to a related field. Candidates must present a thesis or paper in lieu of a thesis acceptable to their advisers and another member of the graduate faculty within the department.

Doctor of Philosophy in Anthropology
The preliminary examination consists of a pre-dissertation research paper, a proposal for doctoral research, and a written examination designed by the student’s doctoral committee followed by a two-hour oral examination. The final examination is a defense of the doctoral thesis. Fieldwork is strongly recommended, although not required.

Graduate Minor in Museum Studies
The Graduate Minor in Museum Studies is designed for MA and PhD students who wish to complement their degree program with interdisciplinary study of the theory, organization and management of museums and museum collections. The program offers broad coverage of different disciplines’ approaches to museum theory, and practice, including interdisciplinary perspectives from Anthropology, Art History, Landscape Architecture, History, Education, and Library and Information Sciences. The program also focuses on the collaborative, international and multicultural nature of museum work in curating, researching and communicating the tangible and intangible evidence of people and their environment. Students acquire the applied theory required to successfully work on, with or in museums. Students may tailor the minor to their career goals by choosing among electives that emphasize different theoretical and technical aspects of museum studies.

Architecture
http://arch.illinois.edu

Director of the School: Peter Mortensen (Interim)
Director of Graduate Studies: Randy Deutsch
117 Temple Hoyne Buell Hall
611 Taft Drive
Champaign, IL 61820
(217) 244-4723
E-Mail: arch-grad@illinois.edu

Major: Architecture
Degrees Offered: M. Arch, PhD
Graduate Concentration: Medieval Studies (p. 549) (M. Arch and PhD)

Major: Architectural Studies
Degrees Offered: M.S.
Graduate Concentration: Structures (p. 378) (M.S.)

Joint Degree Program: the master of Architecture can be earned jointly with the following degrees offered:
Masters in Architectural Studies
Masters in Business Administration
Masters in Computer Science
Masters in Urban Planning
Master of Science in Civil Engineering (Construction Engineering and Management) or (Structures)

Graduate Degree Programs
The School of Architecture offers two graduate programs, leading to a Masters degree:
1. a two-year Master of Architecture (Professional Degree) and
2. a one-year Master of Science in Architectural Studies (Post-professional Degree).

The Master of Architecture program is for students holding a four-year Bachelor of Science in Architectural Studies (or similar degree in architecture). One may be admitted to the Master of Architecture program with Limited Standing if the student holds a bachelor's degree (or higher) in any field other than architecture. Student in M. Arch (Limited Standing) typically take two years to complete undergraduate prerequisite courses to attain full standing in the M. Arch program. The Master of Architecture degree is a professional degree accredited by the National Architectural Accreditation Board (NAAB).

The Master of Science in Architectural Studies (Post-professional Degree) program is for students holding a five-year Bachelor of Architecture professional degree. The MSAS degree is not accredited by NAAB.

The School of Architecture, together with the graduate programs of business administration, computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Business Administration, Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

The School of Architecture, together with the Department of Landscape Architecture, offers a graduate program leading to the Doctor of Philosophy degree.

**Admission**

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are required for all applicants whose native language is not English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

**Financial Aid**

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

- Master of Architecture (Professional Degree) (p. 379)
- Master of Architecture (Limited Standing) (p. 379)
- Master of Science in Architectural Studies (Post-professional Degree) (p. 380)
- Structures Concentration (p. 378)
- Medieval Studies Concentration (p. 549)

**Doctor of Philosophy in Architecture**

This program offers advanced, rigorous education for those students whose goal is the advancement of the intellectual base of the discipline through a career of research and scholarship. Three areas of concentration are offered: history and theory, environment and technology, and behavioral and cultural factors in design. The program is administered jointly with the Department of Landscape Architecture.

Master of Architecture and Master of Science in Architectural Studies

The School of Architecture offers a joint Master of Architecture (M.Arch.)/Master of Science in Architectural Studies (MS in AS) degree program for students interested in pursuing both an M.Arch. degree as well as one of the concentrations offered through the MS in AS degree program. Completion of in-depth programs (e.g. Structures) will result in recording of the Concentration on the student’s transcript under the MS in AS degree. Per Graduate College guidelines, students in a joint degree program are permitted to count up to 12 hours of course work from one degree as electives toward the second degree.

Students interested in participating in the joint M.Arch./MS in AS degree program must be admitted to and meet all requirements of each degree program and complete a minimum of 82 credit hours of graduate work. Students with no undergraduate degrees in architecture and participating in the four-year M.Arch. degree program may petition to enter the joint M.Arch./MS in AS degree program upon completion of their required undergraduate courses.

The M.Arch. degree is a professional degree accredited by the National Architectural Accreditation Board (NAAP), but the MS in AS degree is not accredited.

Master of Architecture and Master of Urban Planning

This joint degree program offers an opportunity to obtain an education for a career that combines the disciplines of architecture and urban planning. For entry into this program, applicants must satisfy the admission requirements of each academic unit. Application for admission may be made either simultaneously to both units or in sequence.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 86 hours of graduate work (54 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in six semesters and one summer session. Candidates entering the program with a five-year Bachelor of Architecture degree must complete at least 64 hours of graduate work (32 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in four semesters and a summer session.

Master of Architecture and Master of Business Administration

This joint master’s degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

Candidates entering the Master of Architecture/Master of Business Administration joint degree program with a four-year baccalaureate in architectural studies must complete 110 hours of graduate work, 50 hours in Architecture and 60 hours for the M.B.A.

Master of Architecture and Master of Computer Science

This joint master’s degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

The combination of Master of Architecture and Master of Computer Science degrees requires 74 graduate hours if no prerequisites are needed in computer science. Candidates entering either of these programs with a five-year bachelor of architecture degree must complete at least 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Master of Architecture and Master of Science in Civil Engineering (Construction Management) or (Structures)

This joint degree program offers qualified applicants the opportunity to develop competence in a career that combines the disciplines of architecture and civil engineering (construction management) or (structures). For entry into these programs, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission should be made to the School of Architecture. Admission to the other unit may be sought after the first semester of graduate study in architecture.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 78 (32 in Civil Engineering and 46 in Architecture) hours of graduate work and, if admitted with full status, may complete the program in five semesters. Candidates entering the program with a five-year Bachelor of Architecture degree must complete 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Architecture

Master of Science in Architectural Studies (Structures Concentration)

The School of Architecture offers a Structures Concentration under its MS in AS degree program. Completion of this in-depth plan of study will result in recording of Structures as a Concentration on the student’s transcript under the MS in AS degree. Students interested in participating in the Structures Concentration must be admitted to the School of Architecture’s MS in AS degree program; register their intent to enter the Structures Concentration with the School’s Graduate Office prior to completing their first semester in their degree program and complete 27 graduate credit hours of architectural structures courses from the required courses list below. Prerequisite subjects for the Structures Concentration include the following: calculus I and II; statics and dynamics; mechanics of materials; one course in structural steel design
and one course in reinforced concrete design. Students without these prerequisites may enter the Structures Concentration upon completion of their prerequisite courses.

**Architecture**

**Master of Architecture Limited Standing**

The variable-length professional degree program has been designed for applicants who have a bachelor's degree in any field other than architecture. Emphasis is placed on the development of sufficient background in introductory architectural studies so that the applicants may successfully complete the equivalent of the two-year graduate program described above.

Applicants accepted into this program will initially be admitted with limited status. Full status may be attained by completion of introductory architectural studies. Once full status is attained, a minimum of 54 hours of graduate work is required for completion.

The time necessary to complete the program will depend on the nature of undergraduate coursework completed by the applicant.

Candidates attaining full standing may complete the program in two years of full-time academic study.

**Architecture**

**Master of Architecture Professional Degree**

The two-year professional degree program, intended for students entering with a four-year baccalaureate in architectural studies, emphasizes further study in architectural disciplines. Students may elect to concentrate in any one of several areas of specialization aligned with research-oriented program areas.
Candidates admitted with full or limited status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

**Joint Degree Programs**

Joint degree programs allow students to pursue two graduate degrees simultaneously, where the total time for the two degrees is decreased. A student who wishes to enter a joint degree program must be admitted separately to each program as a joint degree candidate. Find out more about joint degree programs at the Graduate College.

(Including Art Education, Art History, Graphic Design, Industrial Design, Metals, Painting, Photography, New Media, and Sculpture)

Director: Alan Mette
Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum’s excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant’s grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

- Master of Education in Art Education (p. 384)
- Master of Arts in Art Education (p. 384)
- Master of Arts in Art History (p. 383)
- Master of Fine Arts in Art and Design (p. 385)
- Master of Fine Arts in Art and Design, concentration in Industrial Design (p. 383)
- Doctor of Philosophy in Art Education (p. 383)
- Doctor of Philosophy in Art History (p. 383)

Graduate Minor in Art History

The Graduate Minor in Art History is designed to provide UIUC graduate students, both at the master’s and doctoral levels from any discipline, a foundation in the histories, theories and methods of art history and visual cultures. The Minor is taken in conjunction with, and is intended to complement the student’s work in their primary disciplines.

In addition to the minor requirements, students must also complete the requirements of their major degree. Students interested in the Art History Graduate Minor should contact the Director of Graduate Studies in Art History.

Graduate Degree Programs

The School of Art and Design offers the Master of Arts in Art Education and in Art History, the Master of Education in Art Education, the Master of Fine Arts in Art and Design, the Doctor of Philosophy in Art Education, and the Doctor of Philosophy in Art History. In addition to the listed concentrations, we also offer a specialization in New Media in the M.F.A. program.

Admission

Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores. International applicants or applicants who are not native English speakers must present a recent TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

Doctor of Philosophy in Art Education

The doctoral program in art education is designed for advanced graduate students who want to pursue scholarly study and research in art education. Doctoral level coursework includes studies in both art education and in relevant disciplines and departments within the university. Applicants for admission must hold a master’s degree in art education or a related field from an accredited institution. Admission is determined by a sample of academic writing, official records of previous education and experience, and letters of recommendation.

1. For additional details and requirements refer to the department’s graduate studies requirements and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Doctor of Philosophy in Art History

The program leading to the degree of Doctor of Philosophy in Art History is designed to prepare students for scholarship and for teaching at the college level. Applicants must have the Master of Arts in Art History. Students earning the master’s degree at Illinois must write a thesis or research paper of superior quality in order to be admitted to the doctoral program. Students taking the master’s degree elsewhere must satisfy the Graduate Committee on the History of Art and Architecture as to their preparation to undertake work on a doctoral level. Students usually elect to major and write a dissertation in one of various fields:

- Classical
- Medieval
- Renaissance
- Baroque
- Modern
- Contemporary
- History of Photography
- American
- African
- Asian or Latin American

Master of Arts in Art History

This program provides basic preparation for teaching at the college level, background in the history of art for museum work, and preliminary study for the doctoral degree. In addition to the general requirements, the prerequisite for admission is ordinarily an undergraduate degree in art...
history or a strong preparation in related humanistic studies. Applicants with little background in art history but who have done exceptionally well as undergraduates in other disciplines will be seriously considered. A thesis or scholarly essay is required for completion of the degree.

Master of Arts, Art Education

The program of study leading to the degree of Master of Arts in Art Education is designed to provide advanced level professional study for students who are interested in research in art education. It can serve as preparation for a variety of careers, such as museum education, community arts, arts advocacy, arts policy formation; professional development for art teachers and supervisors in the public schools; and as preparation for the doctoral degree.

In addition to required courses in art education, students can choose electives from studio, art education and art history, and any other graduate courses offered by the university that complement their studies or professional aspirations. Specific course selection is determined in consultation with the student’s adviser. Students may simultaneously study for teaching certification but graduate credit is not usually granted for such study. A thesis is required.

Art and Design

Master of Fine Arts in Art and Design

The degree of Master of Fine Arts in Art and Design is designed to prepare qualified individuals for distinctive achievement in the professional area of their choice. Fields of concentration include Graphic Design, Industrial Design, Photography, Metal, Ceramics, and an interdisciplinary Studio which includes concentrations in Painting, Sculpture, and specialization in New Media. A minimum of 64 hours of graduate credit is required for the M.F.A. degree. Individual studio space and specialized resources essential to the acquisition of a high-quality professional education are available to students in all areas of study. The Graphic Design, Photography, Metal, Ceramics, and interdisciplinary Studio which includes concentrations in Painting, Sculpture, and New Media programs require a graduation exhibition of creative work and a written thesis approved by a thesis committee for deposit in the School of Art and Design’s graduate office. The Industrial Design Program requires a graduation exhibition, a written thesis approved by a thesis committee and a thesis deposit in the Graduate College Thesis Office. Admission for all programs is determined by a faculty review of a portfolio of the applicant’s creative work, records of previous education and experience, letters of recommendation, and other significant achievements that may be viewed as predictors for success in the program.

All Programs except Industrial Design

Astrochemistry

Ben McCall, Coordinator
166 Roger Adams Laboratory
600 S. Mathews Avenue
Urbana, Illinois 61801
PH: (217) 244-0230
E-mail: bjmccall@illinois.edu

Graduate Concentration: Astrochemistry
Participating Programs: Astronomy (PhD only) and Chemistry (PhD only)

Graduate Degree Programs

Astrochemistry is an interdisciplinary area of knowledge at the intersection between chemistry and astronomy. As a few examples, topics of active research in this area include identifying organic molecules in interstellar space, building models of the chemical reactions that occur in interstellar space, laboratory measurements of astronomically important molecules, searching for Earthlike planets using molecular signatures, and understanding the contributions of interstellar molecules to the chemical origin of life. In order to succeed in this field, students require training in both of the traditional disciplines of chemistry and astronomy.

The Astrochemistry graduate concentration (http://astrochemistry.illinois.edu) is intended for Ph.D. students in Chemistry or Astronomy who wish to gain the necessary background to perform original research in the emerging interdisciplinary field of astrochemistry. It is an addition to the Chemistry and Astronomy Ph.D. programs at Illinois and offers transcript recognition that will ensure that students are recognized as qualified by scientists in both traditional fields (chemistry and astronomy).

Admission

As the Astrochemistry graduate concentration (http://astrochemistry.uiuc.edu/concentration.php) is a part of the Chemistry and Astronomy Ph.D. programs, students should submit applications directly to either the Department of Chemistry (http://chemistry.uiuc.edu/graduates) or the Department of Astronomy.

Faculty Research Interests

A variety of faculty members in the departments of Chemistry, Astronomy, and Physics have research interests related to astrochemistry. A partial listing of research groups is available on the Astrochemistry concentration website (http://astrochemistry.illinois.edu/groups.php).

Facilities and Resources

Facilities that can be utilized by astrochemistry students in their thesis research include a wide variety of laboratory spectroscopy equipment in Chemistry, the Combined Array for Research in Millimeter-wave Astronomy, computing facilities in both Chemistry and Astronomy, and other national and international observational astronomy facilities.
Financial Aid

Financial aid in the form of teaching assistantships and/or research assistantships is generally provided for admitted students by the Departments of Chemistry and Astronomy.

The requirements for the Astrochemistry graduate concentration (http://astrochemistry.illinois.edu/concentration.php) are supplemental to the degree requirements of the Ph.D. in either Chemistry or Astronomy, and are summarized in the table below. For this concentration, at least 24 hours of graduate level coursework (at the 400- and 500-level) are required, of which at least 12 must be in chemistry courses and at least 12 in astronomy courses. A list of recommended courses is given on the Astrochemistry concentration website (http://astrochemistry.illinois.edu/concentration.php), but students may substitute other courses with consent of the Astrochemistry concentration steering committee.

All students in the concentration are required to take CHEM/ASTR 450, Astrochemistry, which may count toward either the astronomy or chemistry requirements. Students concentrating in astrochemistry should have at least one member from each department on their thesis committee.

<td><strong>24</strong></td>
<td></td>
</tr>
</tbody>
</table>

Other Requirements

Other requirements may overlap

At least one member of each department must serve on the PhD thesis committee.

Thesis research must be related to astrochemistry.

1 For additional details and requirements refer to the department’s graduate concentration program (http://astrochemistry.illinois.edu/concentration.php) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Astronomy

http://www.astro.illinois.edu

Chair of the Department: Leslie Looney
103 Astronomy Building
1002 West Green Street
Urbana, IL 61801
(217) 333-3090
E-mail: astronomy@illinois.edu

Major: Astronomy
Degrees offered: M.S., Ph.D.
Graduate Concentration: Astrochemistry (p. 385) (Ph.D. only)

Graduate Degree Programs

The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy for a small and carefully selected student body. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of modern physics as well as of general astronomy. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Admission

Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by test scores, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor’s degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 (A = 4.0) and satisfactory scores on the Graduate Record Examination (GRE) (verbal, quantitative, and advanced physics portions) are required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the Graduate College Admissions Web site (http://www.grad.illinois.edu/admissions/instructions/04c).

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by January 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions Web site (www.astro.illinois.edu/academics/graduate/) (http://www.astro.illinois.edu/academics/graduate/) for more information and application materials.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Research activity in the Department of Astronomy includes observational and theoretical investigations of a wide array of astronomical objects:

- Early-universe cosmology (inflation, particle dark matter, cosmic nucleosynthesis)
- Large-scale structure of the universe (cosmic microwave background, galaxy clusters)
- Extragalactic systems (galaxy structure and evolution, interacting galaxies, active galaxies, jets, and quasars)
Facilities and Resources

- The Dark Energy Survey
- The Large Synoptic Survey Telescope
- The South Pole Telescope
- Astronomy students and faculty successfully compete for time on national facilities. These include ground-based telescopes of the National Radio Astronomy Observatory, such as the Atacama Large Millimeter Telescope and the Very Large Array, and the National Optical Astronomy Observatory telescopes. Illinois research involves many space-based telescopes, including the Hubble, Planck, Spitzer, Herschel, Chandra, and Fermi.
- A number of projects in the Department of Astronomy partner with the National Center for Supercomputing Applications (NCSA) at Illinois. This includes development and application of astrophysical simulations such as the FLASH package and general relativistic magnetohydrodynamic codes that provide insight into the nature of structure formation and the physics of black holes. Astronomy faculty also leverage NCSA's pioneering development of cyberinfrastructure environments to facilitate data transport for the Sloan Digital Sky Survey (SDSS), the Dark Energy Survey, the Square Kilometer Array, and the Large Synoptic Survey Telescope. NCSA and the Astronomy Department also jointly founded the Laboratory for Cosmological Data Mining to apply novel algorithms to the rich datasets now available for cosmological analysis, including those from the SDSS and Wilkinson Microwave Anisotropy Probe.
- Illinois is the home of the Blue Waters National Petascale Computing Facility, one of the most powerful supercomputers in the world, and the most powerful on a university campus. A portion of Blue Waters time is dedicated to Illinois faculty, and Astronomy students and faculty use Blue Waters for their research.

Financial Aid

University fellowships are available and may be combined with part-time teaching assistantships. Most resident students are supported for their first two or three years by half-time teaching assistantships. The typical teaching assistant takes two or three graduate courses per semester and spends twenty hours per week handling quiz sections in elementary astronomy courses. Teaching assistantships are responsible positions, and the concomitant duties are considered to be a valuable part of the student’s educational experience. Advanced students may compete for research assistantships offered by faculty members whose research is partially supported by federal grants.

Based on Placement Exam results, students may be required to complete ASTR 404, ASTR 405, ASTR 406, and/or ASTR 414 during their first year. A maximum of 8 hours of these courses may be applied to the degree (Max. 8)

Total Hours

32

Other Requirements

Other requirements may overlap
Of the additional formal coursework, the minimum number of hours in the unit (excluding thesis research, non-thesis research, and independent study credit hours)

Of the additional formal coursework, the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours)

1 Research Project (minimum 4 hours)
- The student will complete a research project with an Astronomy Department faculty member (i.e. ASTR 590). A paper reporting the results is required, which must be prepared in scientific journal style and approved by the faculty member.

2 Demonstrated Proficiency in Astronomy (ASTR 404, ASTR 405, ASTR 406 and ASTR 414)
Students must show proficiency in the four courses by one of the following options:
- Pass the appropriate section of the placement exam (four sections aligned to the four courses), which is offered at the start of every Fall semester. A student can petition to take the exam once more the following year. The decision on petition approval by the graduate advisor will depend on the student’s background and proficiency plan.
- Pass the course with a B grade or better.
- Students who have had an equivalent course at another institution (B grade or better) may petition for those courses to count as proficiency.

3 For additional details and requirements refer to the department’s Graduate Programs (http://www.astro.illinois.edu/academics/graduate/programs) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Total Hours 96

**Other Requirements**

Other requirements may overlap Students may add a graduate concentration in Astrochemistry.

**First Summer Research Project (4 hours)**

During the first summer in residence, each student will enroll in ASTR 590 (Independent Study) and will complete a research project with an Astronomy Department faculty member. A paper reporting the results is required, which must be prepared in scientific journal style and approved by the faculty member.

---

1. Students entering with an approved M.A. or M.S. degree may proficiency out of ASTR 501 and ASTR 502 with departmental approval. Other 500-level ASTR graduate courses must be taken in the unit for substitute credit hours

2. **Demonstrated Proficiency in Astronomy** (ASTR 404, ASTR 405, ASTR 406 and ASTR 414)

Students must show proficiency in the four courses by one of the following options:

- Pass the appropriate section of the placement exam (four sections aligned to the four courses), which is offered at the start of every Fall semester. A student can petition to take the exam once more the following year. The decision on petition approval by the graduate advisor will depend on the student's background and proficiency plan.
- Pass the course with a B grade or better.
- Students who have had an equivalent course at another institution (B grade or better) may petition for those courses to count as proficiency.

3. For additional details and requirements refer to the department's Graduate Programs (http://www.astro.illinois.edu/academics/graduate/programs) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

4. Of the additional formal coursework, 8 is the minimum number of hours in the unit (excluding thesis research, non-thesis research, and independent study credit hours)

5. Of the additional formal coursework, 8 (with 4 in the unit) is the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours)
Graduate Degree Programs

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are offered. Opportunity also exists for specializing in computational science and engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option (http://www.cse.illinois.edu).

Admission

Applications for admission are encouraged from students with bachelor’s degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to take the Graduate Record Exam (GRE) and submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include the physics of aerosol, clouds and precipitation, atmospheric radiative processes, radar and satellite meteorology, remote sensing, convective phenomena including severe storms, synoptic and mesoscale meteorology, boundary layer meteorology, tropical meteorology, hydrometeorology, numerical weather prediction, atmospheric dynamics, climate variability and climate modeling including chemical, radiative, and transport effects; atmospheric chemistry, land-atmosphere interactions, oceanography, human and natural perturbations of global ozone and climate, biogeochemical cycles, and climate impacts, risks, and policy. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

With more than 2.5 computers per person, the department maintains a capable and extensive computing infrastructure as this is a vital component of all of its educational, research and outreach endeavors. All graduate students, staff, and faculty members have a desktop or laptop computer, usually a Windows PC or Mac. There is a departmental computer lab for hands-on class exercises, computers and display projectors in classroom areas and wireless access throughout the buildings. The Department hosts a new synoptic/GIS laboratory, a data visualization laboratory, and an instruments lab all within the Natural History Building. An up-to-date high-capacity network connects these to various departmental computing resources including e-mail, file and web servers, resources provided by the campus as well as our linux-based research computing systems.

These research systems include the department’s ever-expanding computing cluster, hundreds of terabytes worth of storage, other departmental systems and a number of systems specific to each faculty member’s research group. These systems are used for numerical simulations, analysis and modeling of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results. Our faculty research groups regularly use supercomputers including Blue Waters, the NCAR Supercomputing facility, and other supercomputers nationwide.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including agencies like NOAA, UCAR, international sources and other peer institutions. These are available for visualization with a variety of tools to aid in the understanding of current weather events and case studies of recent major events.

Because computers are only good when they work and you understand how to use them, the department maintains a dedicated computer support staff which is responsible for maintaining everything and personally assisting users with problems, questions and accomplishing their research goals.

Financial Aid

Financial aid is available in the form of research and teaching assistantships, University fellowships, and waivers of tuition and service fees. More information is available at the Department Website (https://www.atmos.illinois.edu/cms/One.aspx?portalId=127458&pageId=187177).

Other Requirements
Other requirements may overlap

The student is required to develop a project in ATMS 596 that focuses on a topic proposed by the student and approved by the department head and present an informal (non-seminar series) talk to a committee.

Minimum GPA: 3.0

For additional details and requirements refer to the department’s Graduate Programs (https://www.atmos.illinois.edu) website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

600 South Mathews Avenue
Urbana, IL 61801
(217) 333-2013
E-mail: biochem@mcb.uiuc.edu
http://mcb.illinois.edu/departments/biochemistry

Major: Biochemistry
Degrees offered: M.S., Ph.D.

Graduate Degree Programs

The Department of Biochemistry offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website at www.mcb.illinois.edu/graduate/gradprospect.html.

The Department of Biochemistry is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Cell and Developmental Biology, Microbiology and Molecular and Integrative Physiology as well as Programs in Biophysics and Neurosciences. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. In addition, dual degrees via the Medical Scholars Program are offered. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the College of Medicine, and the College of Veterinary Medicine.

Admission

Interested students must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December in mutual agreement with their desired advisor and formally join the appropriate graduate program/department at that time.

Students electing biochemistry as a major for an advanced degree should have a strong background in chemistry, biology, physics, and calculus and a grade point average of a 3.0 or higher (A = 4.0). Admission requirements include: a bachelor’s degree; Graduate Record Examination (GRE) scores. In addition to the above requirements, international students must attain a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 590 (243 on the computer-based test). A score of 96 on the internet-based test (iBT), with a score of 24 on the speaking section, is also accepted. The department does not normally admit students directly into the M.S. program.

Information listed in this catalog is current as of 07/2019
Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Faculty Research Interests
Faculty research in the Department of Biochemistry covers a broad spectrum of the most dynamic areas of current research in biological chemistry and molecular biology: physical approaches to the structure and function of macromolecules and membranes; nucleic acid biochemistry and enzymology; enzyme mechanisms and evolution; membrane biochemistry and bioenergetics; protein-lipid interactions; protein-nucleic acid interactions and molecular recognition; molecular biological approaches to gene organization and expression; immunology; microbial physiology, and signal transduction.

Centers, Programs, and Institutes
Biochemistry faculty are appointed and active in several cross-campus academic and research units, including the Center for Biophysics & Computational Biology, the Beckman Institute for Advanced Science and Technology, the Institute for Genomic Biology, as well as the interdepartmental graduate programs in Biophysics & Computational Biology, and Neuroscience, and the joint M.D./Ph.D. Medical Scholars Program of the College of Medicine.

Facilities and Resources
Campus resources for science research are state-of-the-art and available to all faculty research programs. Notably among these is the Roy J. Carver Biotechnology Center, which comprises the W.M. Keck Center for Comparative and Functional Genomics (Custom Library Services, High-Throughput Sequencing and Genotyping, DNA Core Sequencing, Fragment Analysis, Oligonucleotide Synthesis, Functional Genomics and Bioinformatics), Proteomics Services (Protein Science Facility, Immunological Resource Center and Flow Cytometry Facility), a Metabolomics Center and a Transgenic Mouse Facility. It also provides career counselling through the Career Services Office. Many other cross-campus facilities are important for the faculty research programs in Biochemistry, including the Fred Seitz Materials Research Laboratory, the National Center for Supercomputing Applications (NCSA), the high-field VOICE NMR Laboratory, Mass Spectrometry Center, Microanalysis Laboratory, Cell Media Facility, and many electronics, machine and glass shop service facilities. The University of Illinois is also a full member of the LS-CAT beamline for macromolecular crystallography at the Advanced Photon Source, Argonne National Laboratory.

Financial Aid
Financial aid for Ph.D. graduate students in biochemistry is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. In addition, interdepartmental training grants from the National Institutes of Health support multidisciplinary training programs. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a stipend, as well as a full tuition waiver and a partial fee waiver.

Biochemistry, MS
A coursework master’s degree requires a minimum of two full-time semesters. A thesis master’s degree usually requires a minimum of three semesters.

Graduate Degree Programs

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (M.Eng.), the Master of Science in Bioengineering (M.S.), and the Doctor of Philosophy (Ph.D.) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the M.S. and Ph.D. programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology. Opportunity also exists for specializing in (1) computational science and engineering and (2) energy and sustainability engineering via the Computational Science and Engineering (CSE) t (http://cse.illinois.edu/education-programs/graduate-program) transcribable concentration and the Energy and Sustainability Engineering (EaSE) Option (http://ease.illinois.edu).

Admission

For the M.S. and Ph.D. programs, applicants should have an undergraduate or graduate degree, respectively, in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. All applicants must submit results from the Graduate Record Examination (GRE) (http://www.ets.org) general test.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org) score of 97 (iBT), 243 (CBT), or 590 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c) is granted for scores of 103 (TOEFL iBT) or greater, 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines) based on an ESL Placement Test (EPT) (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Please see the financial aid eligibility for the M.Eng. in Bioengineering under the "Masters" tab.

Total Hours: 36

#### Other Requirements and Conditions

- Other Requirements and Conditions may overlap
- A concentration is required.
- A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being Bioengineering courses; a maximum of 2 hours of seminar courses can be counted to towards these 12 hours.

The non-thesis option is only available with permission of the advisor. Requirements include an additional 8 hours of elective courses which, with the approval of an advisor, may include supervised research experiences including internships and projects.

Minimum GPA: 3.0

1 For additional details and requirements for all degrees, please refer to the department's Graduate Studies Web site (http://bioengineering.illinois.edu) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook).

### Graduate Concentration in Cancer Nanotechnology

The Cancer Nanotechnology Concentration requires students to earn a B or better in each concentration course. Students must complete 12 credit hours, including at least one core Cancer course and one core Nanotechnology course. Participants may take a second core Cancer course and/or a second core Nanotechnology course as an elective. Fulfillment of these requirements will be monitored by the graduate coordinator in Bioengineering.

ABE 446  Biological Nanoengineering
BIOE 416  Biosensors
ECE/ME 485  MEMS Devices & Systems

Elective Courses
FSHN 480  Basic Toxicology
ME 483  Mechanobiology
ME 487  MEMS-NEMS Theory & Fabrication
ME 586  Mechanics of MEMS

Total hours required for the concentration: 12

Courses taken toward this concentration will count toward the student’s graduate degree.

Students must notify their department of their plan to pursue this concentration.

When choosing courses, students must work directly with their department to ensure that all degree requirements will be met.

Note that students who intend to complete both a Biomechanics Concentration and a Cancer Nanotechnology Concentration may only overlap one course between the two concentrations.

Master of Engineering in Bioengineering

Master of Engineering in Bioengineering (p. 394)

Biology

See also Animal Biology; Biochemistry; Cell and Developmental Biology; Entomology; Microbiology; Molecular and Integrative Physiology; and Plant Biology
Admission

The Master of Science in Biology Program is being phased out and is no longer accepting applications or transfer students.

Financial Aid

Financial assistance is not available to M.S. students through the program.

Master of Science in Biology

To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. If a student has a teaching or research appointment he or she may register for 8 credit hours. A research report or thesis is required of all candidates for the degree. To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. Biophysics and Quantitative Biology

http://www.biophysics.illinois.edu

Center Director: Satish Nair
179 Loomis
1110 West Green Street
Urbana, IL 61801
(217) 333-1630
E-mail: biophysics@life.illinois.edu

Major: Biophysics and Quantitative Biology

Degrees offered: M.S. and Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Biophysics and Quantitative Biology and Doctor of Medicine (M.D.) through the Medical Scholars Program (http://www.med.illinois.edu/mdphd).

Graduate Degree Programs

Biophysics and Quantitative Biology offers a doctor of philosophy degree program. In rare circumstances and with special permission of the director and advisor, a current student may obtain a terminal master’s degree after meeting the requirements of the degree. Biophysics students are not admitted initially into the program for a master’s degree. Opportunity also exists for specializing in computational science and engineering within the department’s graduate program via the Computational Science and Engineering (CSE) Concentration (http://www.cse.illinois.edu/education/minor-and-concentration/graduate-concentration).

Admission

The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. Most applicants who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Financial Aid

All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.

Biophysics and Quantitative Biology

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests

Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics web site (http://biophysics.illinois.edu/people/faculty).

Facilities and Resources

Center faculty and students have access to world-class research facilities at the University of Illinois, including the Beckman Institute, the Carl R Woese Institute for Genomic Biology, Blue Waters Sustained Petascale Computing, the National Center for Supercomputing Applications, the Biomedical Imaging Center, the Roy J Carver Biotechnology Center, and the School of Chemical Sciences’ Mass Spectroscopy Center and Electron Paramagnetic Resonance (EPR) Research Center.

Information listed in this catalog is current as of 07/2019
Biophysics and Quantitative Biology, PhD

The Ph.D. degree is a research degree, and the program is designed with a major emphasis on individual research.

A qualifying examination is offered each spring. This qualifier must be passed by the end of the second year. By the end of the third year, after formulating a definite research problem, the student takes a preliminary examination where the chosen research topic is presented to the student’s faculty committee. The committee also examines the candidate on their chosen general research area. The Ph.D. thesis is based on original work of the student and is defended at a final public examination. The thesis and the exam must demonstrate a thorough knowledge of theory and techniques in one of the areas of biophysics.

Other Requirements

Other requirements may overlap

Students are required to teach for a minimum of one semester during their graduate career

Masters Degree Required in Biophysics and Quantitative Biology: No, but Masters level requirements must be met (32 additional hours for Admission to PhD? 32 min)

Qualifying Exam Required: Yes

Preliminary Exam Required: Yes

Final Exam/Dissertation Defense Required: Yes

Dissertation Deposit Required: Yes

Minimum GPA: 3.0

For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook).

Business Administration

http://www.business.illinois.edu/ba

Interim Head of the Department: Cele Otnes
Director of Graduate Studies: Deepak Somaya

Graduate Degree Programs

The Department of Business Administration offers graduate programs leading to the Master of Science in Management, Master of Science in Technology Management, and the Master of Science and the Doctor of Philosophy (Ph.D.) in Business Administration degrees.

Admission

Admission to the Ph.D. program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Records Examination (GRE), three letters of recommendation, and a statement of career goals including research interests.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Ph.D. candidates must achieve the University minimum scores on these examinations.

www.grad.illinois.edu/admissions/apply (http://www.grad.illinois.edu/admissions/apply)

The Ph.D. program allows fall admission only. Please check the Departmental listing for current requirements and program information:

https://business.illinois.edu/ba/doctoral/
Admission to the MS in Management program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT).

Admission to the MS in Business Administration requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT).
