GENERAL INFORMATION

The University of Illinois at Urbana-Champaign 2020-2021 Academic Catalog is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the Catalog is in effect.

The class schedule is available each term in the Course Explorer (http://courses.illinois.edu). The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this Catalog are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the intended/recommended level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors.

Courses numbered 200-299 are intended for lower-division students who satisfy the published prerequisite(s), if any. Transfer credit from two-year colleges would correspond to 100- and 200-level offerings.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from two-year colleges does not correspond to these numbers.

Courses numbered 400-499 are intended for upper-division undergraduate students sometimes also for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law, medicine, and veterinary programs.

Course credit is listed after each course title. The university counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer (http://courses.illinois.edu). For information on credit policies, see the Student Code.

A crosslisted course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or more departments and will be noted by the statement: "Same as." The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department’s course is noted by "See..."

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Information listed in this catalog is current as of 10/2020

Degree and General Education Requirements

General Education Requirements

The University of Illinois at Urbana-Champaign requires that all undergraduate students take General Education - or "Gen Ed" - courses to gain and use broad knowledge beyond the specialized learning they will do in a major field of study. These Gen Ed requirements cover the kinds of knowledge all students should have: the humanities and arts, social and behavioral sciences, natural sciences and technology, quantitative reasoning, composition/writing, and cultural studies.

General Education courses at Illinois are mindful of our students’ diverse backgrounds, needs, and interests, and are an essential component of the transformative learning that prepares our graduates to become alumni who make a significant societal impact. These courses build students’ abilities to think critically, solve problems, generate new ideas and create knowledge, make connections between academic disciplines, respect and understand differences, and develop as citizens and leaders.

General Education at Illinois is more than a set of required courses; it is a gateway into the Illinois experience.

Courses are noted as fulfilling one or more of the following categories:

• Composition I
• Advanced Composition
• Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
• Natural Sciences and Technology: Life Science or Physical Science
• Quantitative Reasoning
• Social and Behavioral Sciences
• Cultural Studies: Western/Comparative Cultures, Non-Western Cultures, and US Minority Cultures

For a list of current courses approved for General Education credit, please visit the Course Explorer (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Written Communication Requirement

Undergraduate Students:

• Satisfactory proficiency in written communication is a requirement for all undergraduate degrees awarded at the University of Illinois at Urbana-Champaign. This proficiency can be certified by the satisfactory completion of the "Composition I" general education requirement via the one-semester, four-hour course Rhetoric 105 (Writing and Research); the two-semester, eight-hour sequence of Rhetoric 101 (Principles of Writing) and 102 (Principles of Research) with Rhetoric 100 tutorials in both semesters; or the two-semester, six-hour sequence Communication 111 and 112 (Oral & Written Communication I and II).

• A student who achieved, prior to enrolling in college-level coursework, a sufficiently high score on either the appropriate college-preparatory English exam (currently ACT, SAT, AP, or IB) will earn course credit that fulfills the general education "Composition I" requirement and thus will satisfy the Written Communication requirement for graduation. More information can be found under "Proficiency Testing" at go.illinois.edu/pnp (http://go.illinois.edu/pnp/).

• Non-native English-speaking students who are mandated to take the English Placement Test (EPT) and given an English as a Second
Language (ESL) placement must fulfill their Written Communication requirement by taking the two-semester, six-hour sequence of ESL 111 and 112 or the one-semester, four-hour ESL 115 course. They might also be required to take ESL 110 (Pronunciation). Non-native English-speaking students who are not required to take the EPT due to sufficiently high TOEFL iBT or IELTS scores may elect to satisfy the Written Communication requirement by taking the ESL, or the Rhetoric, or the Communication sequences. Students in this category who wish to take ESL must take the EPT to determine correct placement.

- If the academic credentials of a transfer student do not indicate fulfillment of coursework equivalent to fulfill the Written Communication graduation requirement, the student will need to do additional coursework to satisfy this requirement. Non-native English-speaking transfer students may be required to take the English Placement Test (EPT).

Graduate Students:
- Satisfactory proficiency in academic writing in English is a requirement for all graduate degrees awarded at the University of Illinois at Urbana-Champaign.
- Graduate students who are admitted on limited status because they do not meet this proficiency requirement prior to admission may be placed into mandatory ESL courses based on the results of the EPT exam.
- Proficiency can then be certified by the satisfactory completion of a one-semester course (ESL 515) or the two-semester sequence (ESL 511 and 512). Students may also select equivalent coursework from the "English for specific purposes" tracks available through ESL (e.g., business track ESL 521, 522). International graduate students may also be required to take ESL 510 (Pronunciation).
- Mandatory ESL course assignments must be fulfilled in order to be eligible for graduation.

Kinesiology, Language Other Than English, and Undergraduate Open Seminar Credit

Credit for Kinesiology
Kinesiology courses numbered from 100 through 110 are activity courses. Credit earned in kinesiology activity courses may be included in the grade point average at the discretion of the individual colleges and may, at the discretion of the individual colleges, be included in the total hours required for graduation.

Language Other Than English Credit
- Effective for all entering freshmen in Fall 2000 or later, the following language requirement must be completed for graduation.

  - This requirement may be satisfied by:
    1. Successfully completing a third-semester college-level course in a language other than English;
    2. Successful completion, in high school, of the third year of a language other than English; or
    3. Demonstrating proficiency at the third semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

- Generally, one year of high school language study is equivalent to one semester of college study.

- Current list (http://fms.registrar.illinois.edu/Report/?file=CatalogInformation%5CLanguage%20Reqs%5CCourses_Approved_Language_Requirements.xml) of courses approved to satisfy the language requirement.
- If you enter UIUC without three years of language other than English in high school, or you plan to continue with the language you studied in high school, you must take a language placement test to determine the courses in which you should enroll.
- Students in the Sciences and Letters Curriculum of the College of Liberal Arts and Sciences (LAS) and the Gies College of Business (BUS) are expected to gain language knowledge equivalent to the completion of the fourth semester of college study in a language. The LAS and BUS Language requirement may be met in any of the following ways:
  1. Successfully completing a fourth-semester college-level course in a language other than English;
  2. Successful completion, in high school, of the fourth year of a language other than English;
  3. Successful completion of the third-year level in each of two different languages other than English by any combination of high school and college work;
  4. Demonstrating proficiency at the fourth-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

- Students enrolled in the LAS Chemistry and Chemical Engineering Specialized Curricula are exempt from the four semester LAS Language requirement and must instead adhere to the Campus requirement of three semesters or equivalent. Please contact your adviser if you have any further questions.
- Except as prohibited or limited by the established policy of the student’s college, credit in University of Illinois at Urbana-Champaign language courses other than English taken to remove high school entrance deficiencies may, at the discretion of the college:
  1. be counted in the total hours required for graduation, or
  2. be accepted in partial or complete satisfaction of the language other than English requirement for the degree.

- Normally no more than ten hours of proficiency credit for the study of a single language other than English at the elementary and intermediate level shall be counted for graduation in the College of Liberal Arts and Sciences. Additional credit may be granted for advanced courses emphasizing literature and language structure rather than communicative competence in the language.
- Students with a verified Seal of Biliteracy will earn 8 hours of credit equivalent to the first two levels of foreign language regardless of the language other than English. The credit will appear as 8.00 Earned from Seal of Biliteracy on the official University of Illinois at Urbana-Champaign transcript in the Transfer Credit Accepted by the Institution section.

Credit for Undergraduate Open Seminar Courses
- Credit in each 199 course shall not exceed four credit hours per semester.
- A student may accumulate an unlimited number of credit hours in 199 courses, but no more than 12 such hours listed on the student’s
transcript may be counted toward fulfilling graduation requirements, except in cases in which a larger number of credit hours in 199 courses is an integral part of a formal, college-approved program of study (e.g., Individual Plans of Study).

• A 199 course appears on a student’s transcript with the departmental rubric and the title "Undergraduate Open Seminar" when a specific section title has not been assigned by the department offering the course.

Policy Notes

Illinois Copyright Policy
The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources/)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (http://copyright.illinois.edu/compliance/).

Religious Observances
The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).

Smoke and Tobacco-Free Campus
Smoking and the use of all non-combustible tobacco products and non-FDA approved nicotine delivery devices and products is prohibited on all campus property, both indoors and outdoors, and in university-owned vehicles and in privately owned vehicles parked on campus property. The advertising, sale, and free sampling of tobacco products and non-FDA approved nicotine delivery devices and products are prohibited on campus property. Littering the remains of tobacco and non-FDA approved nicotine delivery devices or products or any other related waste products on campus property is prohibited. The complete policy is available here (http://cam.illinois.edu/v/v-B-2.1.htm).

State Approving Agency Certification
Effective August 1, 2019, the University of Illinois at Urbana-Champaign is in compliance with Title 38, Veterans’ Benefits, Part III, Readjustment and Related Benefits, Section 3679, Disapproval of courses, Subsection e. [38 U.S. Code 3679(e) (https://uscode.house.gov/view.xhtml?path=/prelim@title38/part3/chapter36&edition=prelim)].

Student Code
Policies and procedures applying to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code (http://studentcode.illinois.edu/).

Student Consumer Information
Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois at Urbana-Champaign is available on the Office of the Provost’s website (http://provost.illinois.edu/student-consumer-information/). This includes a description of the institution’s accreditation and state authorization, contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.
Annual Announcement of Copyright Policies

Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) photographic images, music, movies, and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. Copyright compliance enforcement agencies aggressively pursue infringers. If you are infringing, even unknowingly, you can be subject to civil damages per work infringed, and even criminal fines and jail time.

All universities of the University of Illinois System make every effort to comply with laws and institutional policies on copyright. Individuals who receive a copyright infringement notice may face disciplinary or employment actions. These actions may include, but are not limited to, loss of network access, mandatory training about copyright infringement, conduct sanctions, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: http://copyright.illinois.edu.
UNDERGRADUATE MAJORS & CONCENTRATIONS

The undergraduate Colleges and Schools offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

Accountancy, BS

for the degree of Bachelor of Science Major in Accountancy

department office: 360 Wohlers Hall, 1206 South Sixth, Champaign, IL 61820
phone: (217) 333-0857
department catalog page: A (http://catalog.illinois.edu/gies_business/accy/)accountancy (http://catalog.illinois.edu/undergraduate/bus/accountancy-bs/)
department website: https://giesbusiness.illinois.edu/accountancy (https://giesbusiness.illinois.edu/accountancy/)
overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/

The Gies accountancy major combines technical knowledge in accounting, assurance, taxation, and data analytics with professional competencies in critical thinking, communication, leadership, and strategic decision-making. Accountancy majors will study the principles, concepts, and methods used to record and report the transactions and activities of a business entity, as well as the tools and processes to audit and analyze accounting information. Accountancy majors will also study the role of accounting information in shaping and implementing key business strategies. Career opportunities for accountancy majors include positions in audit and assurance services, corporate accounting, taxation, consulting and advisory services, and in governmental and not-for-profit entities.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (p. 1163)).

for the degree of Bachelor of Science Major in Accountancy

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiole activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 120 hours.

Accountancy

Learning Outcomes: Accountancy, BS

1. Discipline-based competency: Students will acquire sufficient discipline-based competency to address business and accounting problems, both current and future. Such competency will include using accounting knowledge and using research tools to address accounting and business problems.

2. Written and verbal communication competency: Students will be able to effectively communicate, both verbally and in writing. This competency will extend to communication in individual and team settings.

3. Attitude-related Professional Preparation: Students will develop an understanding for and appreciation of an accountant’s professional responsibility, and will become aware of society’s expectations.

Actuarial Science, BSLAS

For the degree of Bachelor of Science in Liberal Arts and Sciences Major in Actuarial Science

program website: Actuarial Science (https://math.illinois.edu/academics/actuarial-science/)
program faculty: Actuarial Science Faculty (https://math.illinois.edu/research/faculty-research/actuarial-science/)
department website: https://math.illinois.edu/
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: ASRM-advising@illinois.edu

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management.

Undergraduate programs in Mathematics
Actuarial Science, BSLAS (p. 11)
Mathematics, BSLAS (p. 274)
Mathematics & Computer Science, BSLAS (p. 272)

for the degree of Bachelor of Science in Liberal Arts & Sciences, Major in Actuarial Science

Departmental distinction: To qualify for distinction, the student must have a grade point average in ASRM courses of at least 3.25, and pass at least two examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least three professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: normally equates to 58-61 hours including 32-33 hours of actuarial courses beyond calculus.
Twelve hours of 300- or 400-level courses in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper division coursework (these hours can be drawn from all elements of the degree).

Learning Outcomes: Accountancy, BS

Learning Outcomes for the degree of Bachelor of Science Major in Accountancy

1. Discipline-based competency: Students will acquire sufficient discipline-based competency to address business and accounting problems, both current and future. Such competency will include using accounting knowledge and using research tools to address accounting and business problems.

2. Written and verbal communication competency: Students will be able to effectively communicate, both verbally and in writing. This competency will extend to communication in individual and team settings.

3. Attitude-related Professional Preparation: Students will develop an understanding for and appreciation of an accountant’s professional responsibility, and will become aware of society’s expectations.

Accountancy courses (both required and elective) to be applied toward the 124-hour requirement for the Bachelor of Science Degree in Accountancy may not be taken on a credit/no-credit basis. In addition, a limit of 33 hours of accountancy courses (including ACCY 201 and ACCY 202) may be counted toward the 124 total hour requirement. Finally, students must select from either ACCY 405 or ACCY 415. Both courses cannot count toward the Bachelor of Science degree.

### Student Learning Outcomes

1. Have sufficient exposure to actuarial and financial mathematics to be familiar with at least 80% of the material on five of preliminary Society of Actuaries credentialing exams.
2. Be familiar with the role of insurance in society, basic economic theory, and the basics of how insurance and financial markets operate.
3. Have familiarity with several of the technical tools, computer languages or software packages used by actuaries.
4. Develop communication, leadership and teamwork skills, and understand their importance in the actuarial industry.
5. Be able to apply this knowledge and these skills in new combinations and to new problems.

### Advertising, BS

**for the degree of Bachelor of Science Major in Advertising**

**department website**: https://media.illinois.edu/advertising

**department faculty**: https://media.illinois.edu/advertising/faculty

**overview of college admissions & requirements**: College of Media (p. 1159)

**college website**: https://media.illinois.edu/

ADVERTISING (ADV), offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a long-lasting education for students.

Advanced Hours Requirement

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 or above.

Please note: Courses used to fulfill University General Education requirements or to fulfill requirements for a minor may count toward these requirements. Courses used to fulfill the College of Media's advanced outside hours requirement may also count toward these requirements.

124 total hours are required for graduation

1 College Electives must include at least six credits of Advertising elective courses numbered 300 or above for students admitted to the major starting in Fall 2016. Students admitted to the major prior to Fall 2016 are also strongly encouraged to fulfill six credits of Advertising elective courses numbered 300 or above. College of Media elective courses offered by or cross-listed with Journalism (JOUR), Media and Cinema Studies (MACS), or the College of Media (MDIA) count toward the remainder.

2 Which may be credited toward the College requirement of advanced hours outside the College.

3 Or another approved basic course or course sequence in statistical methods, which currently includes ECON 202, EPSY 280, PSYC 235, SOC 280, SOCW 225. Such courses may, if they qualify, also be credited toward the requirement of advanced ours and General Education courses outside the College.

Learning Outcomes: Advertising, BS

Learning outcomes for the degree of Bachelor of Science Major in Advertising

1. Intellectual reasoning and knowledge
2. Creative inquiry and discovery
3. Effective collaboration and communication
4. Effective leadership and community engagement
5. Social, cultural and global understanding
6. Passion for learning

Aerospace Engineering, BS

for the degree of Bachelor of Science in Aerospace Engineering

Graduation Requirements

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

**Electives Requirements**

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. AE 442 and AE 443 satisfy the General Education Advanced Composition requirement.
4. The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
5. The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

AE 461 Structures Control Lab 2
Technical Electives\(^5\) 9
Free Elective 3

Semester Hours 17

Total Hours: 128

1 MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) may be substituted with four of the five credit hours applying toward the degree. MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) is appropriate for students with no background in calculus.

2 Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s), (ii) one non-western, and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy the Humanities and the Arts and cultural studies course requirements.

3 RHET 105 (http://catalog.illinois.edu/search/?P=RHET%20105) (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if UIN is odd). General education elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/under-written-communication-requirement.

4 Sequence satisfies the General Education Advanced Composition requirement.

5 Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives (https://aerospace.illinois.edu/academics/undergraduate/undergraduate-tech-electives/), satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

Learning Outcomes: Aerospace Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Aerospace Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Aerospace Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

African American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

department website: https://afro.illinois.edu/
department faculty: African American Studies Faculty (https://afro.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: cmjenki@illinois.edu

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AAS students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An
African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, computer and statistical skills. Students majoring in AAS will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society; and to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction:
To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

IV. Cognate or Supporting Coursework
Students must complete 9 hours of supporting coursework. Supporting coursework courses consists of a set of courses which are logically grouped, and which reflect or support a student’s interests outside of the African American Studies major. Supporting coursework courses must be approved by the Department’s undergraduate advisor.

Total Hours: 48

Learning Outcomes: African American Studies, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

Upon completion of the major in African American Studies, students will be able to:

- DESCRIBE the main stages in the historical development of the African American experience that reflects both continuity and change, and the different component parts of the human experience.
- ASSESS the historical development of peoples of African descent in broad global context, emphasizing historical, contemporary, and future implications.
- ANALYZE the experiences of Black people using the perspectives, data, and interpretations from two or more disciplinary fields (e.g., historical studies, cultural studies, social studies).
- EVALUATE successes and failures as people have used their values to initiate efforts to achieve social justice for African Americans and people of diverse social backgrounds.
- DESIGN a strategies and tactics that provide a solution to a major civic or social challenge facing Black communities in various parts of the world, illustrating how “Academic Excellence and Social Responsibility” in Black Studies have contributed to this process.

Agricultural & Biological Engineering, BS

for the degree of Bachelor of Science in Agricultural & Biological Engineering

[department website: https://abe.illinois.edu/undergraduate/]
[department faculty: Agricultural & Biological Engineering Faculty (https://abe.illinois.edu/directory/faculty/)]
[overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)]
[college websites: https://aces.illinois.edu/ and https://grainger.illinois.edu/]
[Email: abe@illinois.edu]

Students pursuing this major select one of two concentrations:

- Agricultural Engineering Concentration (p. 19)
- Biological Engineering Concentration (p. 23)
Agricultural & Biological Engineering, BS and Agricultural & Biological Engineering, BSAG

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

department website: https://abe.illinois.edu/undergraduate/
department faculty: https://abe.illinois.edu/directory/faculty (https://abe.illinois.edu/directory/faculty/)

College websites: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/) & The Grainger College of Engineering (https://grainger.illinois.edu/)

Dual Degree – Five Year Academic Program

Students who successfully complete this five-year academic program receive the Bachelor of Science in a major in Agricultural and Biological Engineering from The Grainger College of Engineering as well as the Bachelor of Science in Agriculture with a major in Agricultural and Biological Engineering from the College of ACES.

Students enroll in the College of ACES and then transfer to The Grainger College of Engineering after two years. Students then complete the ABET-accredited degree program in Agricultural and Biological Engineering in The Grainger College of Engineering while taking additional coursework in ACES to complete the requirements for the Bachelor of Science in Agriculture in Agricultural and Biological Engineering degree program in ACES. The suggested program of study that follows fulfills the additional graduation requirements for the second degree, which requires completion of the Grainger College of Engineering degree.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing.

for the degree of Bachelor of Science in Agricultural & Biological Engineering

department website: https://abe.illinois.edu/undergraduate/
department faculty: Agricultural & Biological Engineering Faculty (https://abe.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
college websites: https://aces.illinois.edu/ and https://grainger.illinois.edu/
email: abe@illinois.edu

Students pursuing this major select one of two concentrations:

• Agricultural Engineering Concentration (p. 19)
• Biological Engineering Concentration (p. 23)

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

While completing the Agricultural & Biological Engineering, B.S. the student takes additional classes in ACES for the BSAG degree. The student is in ACES in years 1 and 2, transferring to The Grainger College of Engineering for years 3 through 5. The curriculum for the additional classes to complete the BSAG degree is as follows:

Agricultural & Biological Engineering, BSAG
Requirements in addition to completion of Agricultural & Biological Engineering, B.S.

Agricultural Sciences Coursework  

Free Electives  

Total hours required to receive an Agricultural and Biological Engineering, BS and an Agricultural and Biological Engineering, BSAG  

1 In addition to the Biological and Natural Sciences Elective hours required for Agricultural and Biological Engineering (6 hours), a further 4 hours of biological sciences must be completed to make up a total of 10 hours.  
2 CHEM 232 and MCB 150 are required for the BIO concentration.  
3 Fifteen hours of agricultural sciences with courses from at least two subject areas other than Agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.  
4 Sufficient free electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirements for both degrees.

Agricultural Engineering Concentration  

Students pursuing B.S. Degree in Agricultural and Biological Engineering choose from one of two concentrations, one of which is the concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:  

- Bioenvironmental Engineering  
- Renewable Energy Systems  
- Off-Road Equipment Engineering  
- Soil and Water Resources Engineering  

Information listed in this catalog is current as of 10/2020
Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103 or ACE 100). Specific Advanced Composition course required for this degree is listed below.

1. The extra hour of credit for this course may be used to help meet free elective requirements.

## Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cee-map/).

</thead>
<tbody>
<tr>
<td>Semester Hours</td>
<td>128</td>
</tr>
</tbody>
</table>

1. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/](http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement).

3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

4. ABE 469 satisfies the General Education Advanced Composition requirement.

5. The extra hour of credit for this course may be used to help meet free elective requirements.

6. Students must complete 15 hours of Technical Electives ([https://abe.illinois.edu/undergraduate/technical-electives/](https://abe.illinois.edu/undergraduate/technical-electives/)) chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives. Students in the Biological Engineering Concentration must complete at least one course with a laboratory component.

7. Students must complete 6 hours from the approved list of Biological and Natural Sciences Electives ([https://abe.illinois.edu/undergraduate/biological-natural-sciences-electives/](https://abe.illinois.edu/undergraduate/biological-natural-sciences-electives/)). Students in the Biological Engineering Concentration must complete at least one course with a laboratory component.
Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The Department of Agricultural and Biological Engineering offers programs through the College of ACES and The Grainger College of Engineering.

Students pursuing the B.S. Degree in Agricultural and Biological Engineering choose from one of two concentrations, one of which is the concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Biological Engineering Concentration

</tbody>
</table>

Total Orientation Hours: 1

**Graduation Requirements**

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103 or ACE 100). Specific Advanced Composition course required for this degree is listed below.

### Orientation and Professional Development

<table>
<thead>
<tr>
<th>Code</th>

**Electives**

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives. Three of the six credit hours must be at the 300 or 400 level.

| ANSC 100 | Intro to Animal Sciences                   | 4     |
| ANSC 221 | Cells, Metabolism and Genetics             | 3     |
| ANSC 350 | Cellular Metabolism in Animals             | 3     |
| ANSC 363 | Behavior of Domestic Animals               | 4     |
| ANSC 400 | Dairy Herd Management                      | 3     |
| ANSC 401 | Beef Production                            | 3     |
| ANSC 402 | Sheep Production                           | 3     |
| ANSC 403 | Pork Production                            | 3     |
| ANSC 404 | Poultry Science                            | 3     |
| ANSC 406 | Zoo Animal Conservation Sci                | 3     |
| ANSC 450 | Comparative Immunobiology                  | 4     |
| ATMS 201 | General Physical Meteorology               | 3     |
| ATMS 307 | Climate Processes                          | 3     |
| CHEM 233 | Elementary Organic Chem Lab I              | 2     |
| CHEM 312 | Inorganic Chemistry                        | 3     |
| CHEM 332 | Elementary Organic Chem II                 | 4     |
| CHEM 360 | Chemistry of the Environment               | 3     |
| CHEM 460 | Green Chemistry                            | 3 or 4|
| CPSC 112 | Introduction to Crop Sciences              | 4     |
| CPSC 261 | Biotechnology in Agriculture               | 3     |
| CPSC 265 | Genetic Engineering Lab                    | 3     |
| CPSC 270 | Applied Entomology                         | 3     |
| CPSC 352 | Plant Genetics                             | 4     |
| CPSC 414 | Forage Crops & Pasture Ecology             | 3     |
| CPSC 415 | Bioenergy Crops                            | 3     |
| CPSC 418 | Crop Growth and Management                 | 3     |
| CPSC 431 | Plants and Global Change                   | 3     |
| CPSC 437 | Principles of Agroecology                  | 3     |
| CPSC 473 | Mgmt of Field Crop Insects                 | 3     |

Information listed in this catalog is current as of 10/2020

May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Biological Engineering Concentration
The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here [https://granger.illinois.edu/academics/undergraduate/majors-and-minors/abe-bio-engr-map/](https://granger.illinois.edu/academics/undergraduate/majors-and-minors/abe-bio-engr-map/).

**Semester Hours:** 16-14

**Total Hours:** 128

---

1. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at [https://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement](http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement).

3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early.

4. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

5. ABE 469 satisfies the General Education Advanced Composition requirement.

6. The extra hour of credit for this course may be used to help meet free elective requirements.

---

Information listed in this catalog is current as of 10/2020.
Learning Outcomes: Agricultural & Biological Engineering, BS

Learning outcomes for the degree of Bachelor of Science Major in Agricultural & Biological Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Agricultural & Biological Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Agricultural & Consumer Economics, BS

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

Agricultural & Consumer Economics: Farm Management, BS

**for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Farm Management Concentration**

department website: https://ace.illinois.edu/
department faculty: https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
college website: https://aces.illinois.edu/

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

**for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Farm Management Concentration**

Agricultural & Consumer Economics: Policy, International Trade & Development, BS
for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Policy, International Trade, & Development Concentration

department website: https://ace.illinois.edu/
department faculty: https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
college website: https://aces.illinois.edu/

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

**Learning Outcomes: Agricultural Leadership, Education, & Communications, BS**

Learning Outcomes for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications

**Communications**
The faculty identified three major categories of student learning outcomes that entail awareness, understanding, and application of the following: (A) food and environmental systems, (B) the role, nature, and context of agricultural journalism and communications, and (C) practices and skills in agricultural journalism and communications.

A1: Awareness, understanding, and application of knowledge about food and environmental systems (achieved through courses required in the mandatory Food and Environmental Systems minor)

1. Contemporary issues in the human, food, and natural resource systems
2. Introduction to the fundamentals of modern crop, livestock and other agricultural production systems, including future challenges and opportunities for addressing world food needs
3. Critical systems thinking and collaborative analysis across multiple disciplines involved in the food, feed, fiber, renewable energy, and rural complex
4. Evolution of the food system and overview of food in relation to nutrition, health, safety, processing, regulations, and other dimensions
5. Introduction to the environmental sciences and current environmental issues in relation to population growth, world food supplies, agriculture, water use, conservation, climate change, and other aspects
6. Relationships between humans and the natural systems that contain our air, water, energy, and biotic and food sources.
B1: Awareness, understanding, and application of knowledge about the role, nature, and context of agricultural journalism and communications (achieved through Agricultural Communications courses)

1. Scope, scale, mission/role, and impacts of communications within agriculture, including the rural-urban dimensions of it, locally to internationally
2. History and development of agricultural information systems and services in the U.S. and beyond
3. Current agricultural communications systems and services in the U.S., including those involving new and emerging media
4. Availability and sources of agricultural communications research, including current types of research issues being addressed in various sectors of this field
5. Concept of information flow and knowledge management for decision making that involves agriculture, broadly defined
6. Audiences/publics for agricultural journalism and communications within the food complex and beyond
7. Theories and conceptual foundations for agricultural journalism and communications
8. Trends, forces for change, and opportunities in agricultural journalism and communications, including fronts for innovation
9. Contemporary issues in agricultural journalism and communications in the U.S. and beyond
10. International and intercultural dimensions of communications in agricultural/rural development and sustainability, including elements of intercultural sensitivity
11. Legal and ethical issues in agricultural journalism and communications
12. Role of the agricultural communicator, including emphasis on the concepts of joint problem solving and the honest broker perspective. Also, current and emerging fields of professional activity in agricultural communications, broadly defined.

B2: Awareness, understanding, and application of knowledge about the role, nature, and context of agricultural journalism and communications (achieved through College of Media courses)

1. Conceptual frameworks for creating multimedia journalism content
2. Theories of freedom of expression, the legal doctrines of greatest concern to mass communicators, and contemporary issues related to free speech and press, including libel, copyright, and news gathering in the digital age
3. Introduction to the profession of advertising
4. How advertising and journalism relate to society in cultural, social, ethical, and regulatory contexts
5. Theories of persuasion, advertising, and marketing

C1: Awareness, understanding, and application of practices and skills in agricultural journalism and communications (achieved through Agricultural Communications courses)

1. Writing and editing in varied settings and for varied purposes, including science writing related to the dimensions of agriculture
2. Coverage and reporting of news, features, and research related to agriculture in print, broadcast, and online media, including risk and crisis communications
3. Communication materials related to agriculture—planning and management, editing, design, layout, production, distribution, and evaluation in print and electronic formats
4. Media analysis and selection in settings related to agriculture, encompassing all means by which humans interact and including all channels and media, earliest to newest
5. Communications planning and management in non-commercial settings (such as Extension and social marketing) related to agriculture
6. Marketing communications related to agriculture—settings, roles, principles, and skills in advertising, promotion, public relations, and sales
7. Visual communications (photography, graphic design, videography) related to agriculture—skills in planning, selection, composition, digital editing, and design
8. Production and presentation of programming in agriculture-related radio and television broadcasting, and other audio/video channels
9. Use of current information and communications technologies (ICT) and software being employed in relation to the varied dimensions of agriculture

C2: Awareness, understanding, and application of practices and skills in agricultural journalism and communications (achieved through College of Media courses)

1. Introductory journalism reporting and writing across print, broadcast, and digital platforms
2. Fundamentals of digital photography, video, audio, and multimedia production as applied in journalism
3. Introductory practices in advertising and integrated promotion—account planning, creatives, audience analysis, consumer behavior, sales promotion, media research, and interactive advertising
4. Research methods in advertising, including qualitative and quantitative techniques commonly used in the advertising industry
5. Insights about consumer knowledge, interests, attitudes, and decision making
6. Developing and applying brand strategies using theories of advertising and marketing, as well as techniques for persuasive presentation

Leadership & Education

1. Communicate in-depth understanding of agricultural systems to provide meaningful educational experiences for learners ranging from PreK through adult.
2. Assess the human capital needs of a group, organization, or community and engage with stakeholders to formulate a solution to an identified need.
3. Apply theories of leadership and learning to plan and deliver positive educational experiences in diverse instructional settings.
4. Demonstrate principles of transformative leadership in the context of a diverse group.

Agricultural Leadership & Science Education, BS

for the degree of Bachelor of Science Major in Agricultural Leadership & Science Education

Information listed in this catalog is current as of 10/2020
presentations, leadership development, teaching/training methods and on designing educational/training programs, making professional extension, community and governmental agencies. Coursework focuses for educational leadership, training and outreach positions in agricultural, engineering.illinois.edu/college website: https://aces.illinois.edu/ (https://engineering.illinois.edu/)

Students pursuing this major select from two concentrations:

- Agricultural Leadership Education (p. 47)
- Agricultural Science Education (p. 48)

The Bachelor of Science with a Major in Agricultural Leadership & Science Education curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation.

Agricultural Leadership & Science Education: Agricultural Leadership Education, BS

for the degree of Bachelor of Science Major in Agricultural Leadership & Science Education, Agricultural Leadership Education concentration

program website: https://aged.illinois.edu/program faculty: Agricultural Education Faculty (https://aged.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/ (https://engineering.illinois.edu/)

The Bachelor of Science with a Major in Agricultural Leadership & Science Education curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu/)).

The Agricultural Leadership Education concentration prepares students for educational leadership, training and outreach positions in agricultural, extension, community and governmental agencies. Coursework focuses on designing educational/training programs, making professional presentations, leadership development, teaching/training methods and interpersonal communications. A 4 to 12-week business/agency summer internship is required. The curriculum provides the flexibility for students to specialize in a chosen area of agriculture.

Information listed in this catalog is current as of 10/2020
A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu/)).

The Agricultural Science Education concentration prepares students to teach agricultural science, agribusiness, agricultural mechanics and horticulture in Illinois high schools. State of Illinois certification requirements include a minimum of 2,000 hours of employment experience in agriculture. Teacher certification students must maintain a 2.5 GPA or above to remain in good standing. Review procedures are provided by the Council on Teacher Education.

**Required Concentration** 42-55

**Total Hours** 126

¹ Not required for transfer students.

---

**Animal Sciences, BS**

_for the degree of Bachelor of Science Major in Animal Sciences_

**department website:** https://ansc.illinois.edu/

**department faculty:** Animal Sciences Faculty (https://ansc.illinois.edu/directory/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

**college website:** https://aces.illinois.edu/

Students pursuing this major select one of three concentrations:

- Companion Animal and Equine Science Concentration (p. 49)
- Food Animal Production and Management Concentration (p. 51)
- Science, Pre-Veterinary and Medical Concentration (p. 52)

---

**Animal Sciences: Companion & Equine Science, BS**

_for the degree of Bachelor of Science Major in Animal Sciences, Companion & Equine Science Concentration_

**department website:** https://ansc.illinois.edu/

**department faculty:** Animal Sciences Faculty (https://ansc.illinois.edu/directory/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

**college website:** https://aces.illinois.edu/

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

---

**Learning Outcomes: Agricultural Leadership & Science Education, BS**

Learning outcomes for the degree of Bachelor of Science Major in Agricultural Leadership & Science Education

1. Communicate in-depth understanding of agricultural systems to provide meaningful educational experiences for learners ranging from PreK through adult.
2. Assess the human capital needs of a group, organization, or community and engage with stakeholders to formulate a solution to an identified need.
3. Apply theories of leadership and learning to plan and deliver positive educational experiences in diverse instructional settings.
4. Demonstrate principles of transformative leadership in the context of a diverse group.

ANSC 398 only fulfills the degree requirement when taken for a standard letter grade.
Animal Sciences: Food Animal Production & Management, BS

for the degree of Bachelor of Science Major in Animal Sciences, Food Animal Production & Management concentration

The Food Animal Production and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student's practical knowledge through business courses.

Animal Sciences: Science, Pre-Veterinary & Medical, BS

For the degree of Bachelor of Science Major in Animal Sciences, Science, Pre-Veterinary & Medical concentration
department website: https://ansc.illinois.edu/
department faculty: Animal Sciences Faculty (https://ansc.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and
emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

Learning Outcomes: Animal Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Animal Sciences

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the basic principles of animal genetics, nutrition, reproduction and physiology

2. Apply knowledge of animal husbandry, behavior and handling techniques to effectively interact with animals in a safe and humane manner

3. Appreciate the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, and the many roles of animals in society

4. Communicate effectively, both written and orally, and demonstrate confidence in attaining transferable job or post-graduate skills

5. Practice the scientific method in solving ‘real-world’ problems including collecting and evaluating information, forming predictions, collecting and interpreting data and implementing actions

6. Build and sustain productive relationships to create positive change in response to challenging issues with animals and the agriculture industry at the local, national and international levels
General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Anthropology: Archaeology, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Anthropology, Archaeology Concentration

department website: https://anthro.illinois.edu/
department faculty: Anthropology Faculty (https://anthro.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: anthro@illinois.edu

The Archaeology Concentration offers students a program to explore the human past through its material remains to understand cultural and societal change through time, and the role of heritage in the present. We offer many opportunities for students to conduct research with faculty in our archaeology labs, field schools, and in our extensive research collections.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Anthropology, Archaeology Concentration
A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details. All students must discuss their selection of coursework with a departmental adviser.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Information listed in this catalog is current as of 10/2020
Anthropology: Sociocultural & Linguistic Anthropology, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Anthropology, Sociocultural and Linguistic Anthropology Concentration

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in these closely related fields. Sociocultural anthropologists study the daily lives of people around the world, both at home and abroad. They conduct field research to get a hands-on feel for people's lives and passions and examine everything from beauty pageants to political protest marches, from Disney films to the lab practices of nuclear scientists. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a crucial window on the largest processes and problems of our time, from globalization to race relations and violence.

Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the "English Only" movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom, on social media, or at the United Nations, as well as how the way we talk creates our sense of self and reality.

Architectural Studies, BS

for the Bachelor of Science Major in Architectural Studies

Director of the School: Francisco Javier Rodríguez-Suárez
School website: https://arch.illinois.edu/
Overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
College website: https://faa.illinois.edu/
Email: architecture@illinois.edu

The Bachelor of Science in Architectural Studies BSAS is a pre-professional degree that prepares students to enter a professional 2-year M ARCH degree. The program provides a strong foundation in design, technology and history as they relate to architectural practice. The degree also provides students with a broad liberal arts foundation that can lead to many other career options.

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted.

For the Bachelor of Science in Architectural Studies degree, a total of 120 semester hours are required.

1. See current University of Illinois General Education requirements. ([https://courses.illinois.edu/gened/DEFAULT/DEFAULT/](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/))

The General Education quantitative reasoning requirement I is satisfied by the required MATH 220 or MATH 221 course; the quantitative reasoning II requirement is satisfied by the MATH 231 or PHYS 101 course. Students considering a concentration in Building Structures or Structural Engineering should take MATH 231. The Advanced Composition requirement may be fulfilled by either a separate, approved Advanced Composition course or by an Advanced Composition course which also satisfies one of the general education distribution list requirements. If by the latter, electives would be taken to make up the credit deficiency.

General Education foreign language requirement 0-12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.

2. The Composition I requirement may be fulfilled by any of the following courses or course sequences (placement is determined by examination): ESL 111 and ESL 112; ESL 115; RHET 101, and RHET 102; or RHET 105; or CMN 111 and CMN 112.

3. For information about electives, see the Undergraduate Handbook at the FAA website ([https://faa.illinois.edu/](https://faa.illinois.edu/)). A maximum of nine hours may be taken as professional electives.

Information listed in this catalog is current as of 10/2020
Architectural history: All students in the undergraduate program in architecture must fulfill the architectural history requirement: one course in addition to ARCH 210. Select from: ARCH 222, ARCH 314, ARCH 402, ARCH 403, ARCH 407, ARCH 409, Section B (Barcelona only), ARCH 410, ARCH 411, ARCH 412, ARCH 413, ARCH 414, ARCH 415, ARCH 416, ARCH 417, or ARCH 418.

The UP 101 requirement can be fulfilled by substituting one of the following approved courses: ARCH 418, ARCH 468, GEOG 204, GEOG 210, and GEOG 483.

Learning Outcomes: Architectural Studies, BS

Learning outcomes for the Bachelor of Science Major in Architectural Studies

Student Learning Outcomes for the BSAS program of study derive from the National Architecture Accrediting Board’s Conditions for Accreditation. The 2009 version of the Conditions are referenced here, as it was this version that guided reaccreditation of the Master of Architecture (M.Arch) degree in 2015. Reaccreditation of the M.Arch degree depended on demonstrations of student learning in a substantial number of undergraduate Architecture courses that lead to admission to Illinois’ and other M.Arch degree programs.

1. Educational Realm A – Critical Thinking and Representation:
Architects must have the ability to build abstract relationships and understand the impact of ideas based on research and analysis of multiple theoretical, social, political, economic, cultural and environmental contexts. This ability includes facility with the wider range of media used to think about architecture including writing, investigative skills, speaking, drawing and model making. Students’ learning aspirations include:
   a. Being broadly educated.
   b. Valuing lifelong inquisitiveness.
   c. Communicating graphically in a range of media.
   d. Recognizing the assessment of evidence.
   e. Comprehending people, place, and context.
   f. Recognizing the disparate needs of client, community, and society.

2. Educational Realm B – Integrated Building Practices, Technical Skills, and Knowledge: Architects are called upon to comprehend the technical aspects of design, systems and materials, and be able to apply that comprehension to their services. Additionally, they must appreciate their role in the implementation of design decisions, and the impact of such decisions on the environment. Student learning aspirations include:
   a. Creating building designs with well-integrated systems.
   b. Comprehending constructability.
   c. Incorporating life safety systems.
   d. Integrating accessibility.
   e. Applying principles of sustainable design.

3. Educational Realm C – Leadership and Practice: Architects need to manage, advocate, and act legally, ethically and critically for the good of the client, society and the public. This includes collaboration, business, and leadership skills. Student learning aspirations include:
   a. Knowing societal and professional responsibilities.
   b. Comprehending the business of building.
   c. Collaborating and negotiating with clients and consultants in the design process.
   d. Discerning the diverse roles of architects and those in related disciplines.
   e. Integrating community service into the practice of architecture.

Art & Art History, BFA

for the degree of Bachelor of Fine Arts Major in Art & Art History

school office: 143 Art and Design Building, Champaign, IL 61820
coordinator of undergraduate academic affairs: Mark Avery
email: mavery@illinois.edu
phone: (217) 333-6632
director of undergraduate studies: Professor Kristin Romberg
email: kromberg@illinois.edu
school website: School of Art & Design (https://art.illinois.edu/)
school faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: Fine & Applied Arts (https://faa.illinois.edu/)

The Program in Art and Art History at the University of Illinois, Urbana-Champaign is unique. Housed in the School of Art and Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Fine Arts degree in a combined Art History and Studio/Design course of study, providing a broad cultural education that unites academic and studio training. Students who earn this degree will be qualified to pursue a range of careers, museum work, or graduate study in either art history or studio practice.

A portfolio review is required for admission to the School of Art and Design.

Departmental Distinction: a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The Student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for further details.

for the degree of Bachelor of Fine Arts Major in Art & Art History

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Art History, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Art & Art History

1. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
2. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
3. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.

college website: Fine & Applied Arts (https://faa.illinois.edu/)

Information listed in this catalog is current as of 10/2020
The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte-s.education.illinois.edu/dotnet/webpages/webpage.aspx).

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

for the Bachelor of Fine Arts Major in Art Education

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Art Education, BFA

for the Bachelor of Fine Arts Major in Art Education

Students graduating with the BFA in Art Education should be able to:

1. Understand the diverse characteristics and abilities of their students and how individuals develop and learn within the context of their social, economic, cultural, linguistic, and academic experiences. Our graduates are prepared to use these experiences to create instructional opportunities that maximize student learning in diverse art education settings such as schools, museums, and community centers.

2. Understand content area knowledge in fine art and visual culture that includes central concepts, methods of inquiry, structures of the disciplines, and content area literacy. Our graduates are prepared to create meaningful learning experiences for students through both content area and pedagogical knowledge.

3. Plan and design instruction for diverse art education settings based upon content area knowledge, diverse student characteristics, student performance data, curriculum goals, and the community context.

4. Create safe and healthy art education learning environments that facilitate cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction, mutual respect, active engagement, academic risk-taking, self-motivation, and personal goal-setting.

5. Differentiate instruction by using a variety of strategies that support critical and creative thinking, problem-solving, and continuous growth and learning. Our graduates understand that art education settings are dynamic, thus requiring ongoing modification of instruction to enhance learning for each student.

6. Enact critical and humanizing expressions of art education that redress and challenge systemic injustices that relate to social identities associated with race, class, gender, sexuality, immigrant origin, religion, age, mental and physical disabilities, and mental and physical illnesses.

7. Possess foundational knowledge of reading, writing, and oral communication within art education (e.g. curriculum and lesson planning, assessment tools, etc.) and recognizes and addresses how student reading, writing, and oral communication facilitate the acquisition of knowledge in art education.

8. Understand the purposes, characteristics, and limitations of different types of assessments in art education, including standardized assessments, universal screening, curriculum-based assessment, and progress monitoring tools.

9. Build and maintain collaborative relationships with colleagues, students, parents, and community members to foster cognitive, linguistic, physical, and social and emotional development of their students.

10. Exhibit ethical, reflective, and professional practices, while providing leadership in their educational settings and advocating for students, parents or guardians, and the profession.

First Year Curricula for All Art + Design Majors

The School of Art + Design offers bachelor of fine arts degrees in art education, graphic design, art & art history, industrial design, photography, and studio art (with concentrations in general studio, new media, painting, printmaking, and sculpture), and a bachelor of arts degree in studio art (with the same concentrations). All majors’ first year curriculum will include courses in drawing, 2D, 3D, and 4D practices. Undeclared students will declare their Art + Design major March 1 of their first year of study.

This first year curriculum is shared across all majors and serves as the temporary major declaration for those who enter as “undeclared.”

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in history of art is also offered in the College of Liberal Arts and Sciences. The school has studios, computing labs, workshops, classrooms, and offices in several different University buildings.

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Asian American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

department website: http://www.asianam.illinois.edu/
department faculty: Asian American Studies Faculty (http://www.asianam.illinois.edu/people/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: aas@illinois.edu

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

Advising: The Department of Asian American Studies provides advising for students. Students must officially declare their major by registering with the Associate Head of Asian American Studies. Students will work with their advisor to choose appropriate courses from the Additional Coursework List and the Approved Elective List to help plan a coherent program of study. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/schools/las/academic-units/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 33 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Asian American Studies, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

1) Intellectual Reasoning and Knowledge

Students acquire proficiency in the field and area of Asian American Studies. This includes, for example, knowledge based in intersectional, comparative, and interdisciplinary approaches. While largely based in an area approach to the United States, Asian American Studies is also deeply concerned with transnational, diasporic, and global studies. Students learn the history of Asian Americans and theories and methods of the social sciences and humanities to understand the Asian American experience. The conceptual rubrics broadly include migration, social movements, US imperialism and racism, and ideas of citizenship and belonging.

2) Critical Inquiry and Discovery

Applying theories in Asian American Studies students develop skills of critical inquiry that draw on intersectional and comparative approaches. As a mode of discovery students exercise their skills using methods of the social sciences and humanities through verbal communication in the classroom and written research projects. Students are asked to apply their critical modes of learning in original and unique projects of discovery through research.

3) Effective Leadership and Community Engagement

Students study models of community leadership and engagement through the histories of Asian American social movements, political culture, and community activism. Reflection based on these approaches provides a context from which to understand the role of classroom learning and the application of theories of social change in communities.

4) Social Awareness and Cultural Understanding

Students learn the dimensions of intersectional analysis of social, cultural, economic, and political issues concerning the Asian Americans. Social theories of power inform how students are taught to understand a number of categories of analysis including race, gender, sexuality, class, ethnicity, religion, and disability, to name a few.

5) Global Consciousness

Students gain an understanding of the global dimensions of intersectional approaches in a broad range of fields and disciplines including literary, historical, cultural and ethnographic approaches. Through the study of migration and diaspora, the broad understanding of individual and collective dynamics are observed, analyzed, and theorized. Students are also asked to think in terms of a comparative framework to understand how race, gender, and sexuality, for example, are thought of from a number of vantage points.
Astronomy, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Astronomy

department website: https://astro.illinois.edu/
department faculty: Astronomy Faculty (https://astro.illinois.edu/ directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: astronomy@illinois.edu

The Department of Astronomy also offers a BSLAS in Computer Science & Astronomy (p. 132)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Astronomy

Departmental distinction: A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at UIUC. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 47-48 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

1 Students without a background in physics or astronomy are encouraged to take ASTR 121 and ASTR 122 during their freshman year.
2 Other 300- or 400-level technical classes, e.g. chemistry, computer science engineering, or statistics can be substituted with academic adviser approval.
3 A maximum of 4 hours of credit in ASTR 390 (or equivalent "Independent Study" course, such as PHYS 497) can be counted towards this requirement.
4 MATH 220 may be substituted for MATH 221. MATH 220 is appropriate for students with no background in calculus.

Learning Outcomes: Astronomy, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Astronomy

Undergraduate Astronomy majors will graduate with a demonstrated ability to:

LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.

LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.

• Identify which principles should be applied to a specified situation
• Show familiarity with astronomical observables and their physical origin.
• Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.

LO3. Analyze astronomical data, and quantitative data generally.

• Demonstrate the ability to link observation and theory.
• Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
• Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.

LO4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.

LO5. Demonstrate the ability to communicate effectively both verbally and in writing.

Atmospheric Sciences, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Atmospheric Sciences
Learning Outcomes: Atmospheric Sciences, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Atmospheric Sciences

1. All students will have a fundamental understanding of the atmosphere and the dynamical and physical processes that control weather and climate.
2. All students will have demonstrable computational problem solving skills, and have the opportunity to participate in scientific research.
3. All students will understand practical applications of weather analysis and forecasting, and the impact of weather analysis and forecasting on public safety and the economy.
4. All students will develop competency in clear scientific written and oral communication.
5. All students will develop an understanding of the natural and anthropogenic processes that control climate and global change, their impact on human livelihood, and ways that individuals can contribute to the reduction of societal risk from weather and climate events and impacts.

Biochemistry, BS

for the degree of Bachelor of Science Major in Biochemistry (Specialized Curriculum)

department website: http://mcb.illinois.edu/departments/biochemistry (http://mcb.illinois.edu/departments/biochemistry/)
department faculty: Biochemistry Faculty (http://mcb.illinois.edu/faculty/biochemistry/)

Undergraduate degree programs in Molecular & Cellular Biology

Biochemistry, BS (p. 68)

Molecular & Cellular Biology, BSLAS (p. 293)

for the degree of Bachelor of Science Major in Biochemistry (Specialized Curriculum)

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.
Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

**Departmental distinction: A student seeking distinction must satisfy the following:**
- Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.
- Earn at least a 3.25 grade-point average.
- Present a senior thesis to the department.

**General education: Students must complete the Campus General Education requirements including the campus general education language requirement.**

**Minimum hours required for graduation: 120 hours.**

**Nontechnical Requirements:**

**General education:**
- Foreign language - three semesters of college study (or three years of high school study) in a single foreign language to satisfy the campus foreign language requirement
- Composition I writing requirement to satisfy the campus Composition I requirement
- Advanced Composition writing requirement (BIOC 460 is required)
- Humanities/Arts to satisfy the campus general education requirements
- Social/Behavioral sciences to satisfy the campus general education requirements
- Cultural Studies to satisfy the campus general education requirement
- Electives (not including any credit in satisfaction of the above requirements)

1. Transfer credit must be approved by an advisor in biochemistry in order to be used to satisfy degree requirements.
2. A more detailed description of the requirements is listed in the Biochemistry Curriculum Handbook, available in room 419A of Roger Adams Laboratory.
3. PHYS 213 is not required if CHEM 442/CHEM 444 sequence is taken.
4. Freshman orientation course is under development and will be required. See advisor for details.
5. An approved list of current courses will be updated annually in January/February for the coming year. Contact advisor.
6. The requirements for the Campus General Education categories of Natural Sciences and Technology and Quantitative Reasoning I are fulfilled through coursework in the curriculum.
Learning Outcomes: Biochemistry, BS

Learning outcomes for the degree of Bachelor of Science Major in Biochemistry (Specialized Curriculum)

Upon successful completion of the Biochemistry Specialized Curriculum, students will be able to:

1. Understand and appreciate that the diversity of life evolved over time by biomolecular processes of mutation, selection, genetic change, and epigenetics.
2. Explain that molecular and macromolecular structure as well as supramolecular architecture determine function and regulation.
3. Explain that information storage and flow are molecular-based, dynamic, and interactive.
4. Understand and appreciate that biochemical mechanisms and kinetics ensure relative cellular stability and function under external or internal changing condition.
5. Explain that energy is required by and transformed in biochemical systems as governed by the laws of thermodynamics.
6. Illustrate that living organisms and biological systems interact via molecular connections.
7. Design a scientific process and employ the scientific method, demonstrating that biochemistry is evidence-based and grounded in the formal practices of observation, objective measurement, and hypothesis testing.
8. Execute quantitative analysis and mathematical reasoning to interpret biochemical data.
9. Construct and utilize predictive models and simulations that define chemical relationships, as well as molecular interactions of complex systems.
10. Apply concepts from other sciences that span biology, chemistry, physics, mathematics, computation, and engineering to interpret biochemical phenomena.
11. Communicate biochemical concepts and understanding to members of a diverse scientific community, as well as to the general public.
12. Identify social and health-related dimensions of biochemical investigations.

Bioengineering, BS

for the degree of Bachelor of Science in Bioengineering

The Bioengineering department (BIOE) aims to graduate students who:

- Enter into industry jobs in prominent companies as engineers who work in the areas of:
  - Medical device design
  - Manufacturing
  - Quality control
  - Marketing
  - And work toward the advancement of medicine
- Pursue graduate studies in bioengineering-related fields such as:
  - Imaging and Sensing
  - Therapeutics
  - Tissue Engineering
  - Computational and Systems Biology
  - Biomechanics
- Broaden their education by attending professional school in areas of medicine, law, and business
- Maintain professional development through societal memberships and industry workshops

The curriculum includes integration of principles of biology and engineering in coursework such as modeling of human physiology, bioinstrumentation, and cell and tissue engineering. The curriculum is project-based and has a strong emphasis on systems-thinking as an approach to large-scale bioengineering problems. During the first and second years, students take fundamental courses introducing them to bioengineering as a field and introducing clinically relevant projects as learning experiences. The program also features hands-on laboratory courses for real-world experience throughout the curriculum. The final two years allow students to focus on a particular track of Bioengineering for further study. A year-long senior capstone design course provides experience in applying engineering fundamentals to biological problems submitted by faculty, clinicians, and industrial firms.

for the degree of Bachelor of Science in Bioengineering

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for Math, Engineering, and Science courses. See Technical GPA to clarify requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

### Bioengineering, BS

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/bioengineering-map/).

#### Electives

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ³

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. ⁴

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 442</td>
<td>Physical Chemistry I</td>
<td>4</td>
</tr>
</tbody>
</table>

**Total Hours of Curriculum to Graduate** 128

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. May be taken for 3 or 4 credit hours; the extra hour may be used to help meet free elective requirements.

3. The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.

4. The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

| Track elective | 3     |
| General education elective | 3     |
| Free elective  | 3     |
| Semester Hours | 14    |

Total Hours: 128

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2 RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). MCB 150 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.

3 Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

4 May be taken for 3 or 4 credit hours; the extra hour may be used to help meet free elective requirements.

5 To be selected from a departmentally approved list of track elective courses (http://bioengineering.illinois.edu/undergraduate-programs/track-electives/) if a pre-approved track is chosen. Alternately a student may devise a special track which must be approved by the Bioengineering Department.

Learning Outcomes: Bioengineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Bioengineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Bioengineering graduates will have:
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

3. An ability to communicate effectively with a range of audiences.

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Biology

Students interested in applying to either school of biology should simply choose Biology as their major. After taking two introductory courses, students will choose a major in either Integrative Biology or Molecular and Cellular Biology.

Integrative Biology, School of (http://www.life.uiuc.edu/sib/)

Director of School: Carla Cáceres

School Office: 286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044

Molecular and Cellular Biology, School of (http://mcb.illinois.edu/)

Director of School: Milan Bagchi

School Office: 393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166

An interschool option in Teaching of Biology (http://catalog.illinois.edu/undergraduate/las/biology-teacher-education-bslas/) is sponsored by the School of Integrative Biology and the School of Molecular and Cellular Biology.

Also, see majors in Integrative Biology (http://catalog.illinois.edu/undergraduate/las/academic-units/integrative-bio/#majortext) and Molecular and Cellular Biology (p. 293).

Brain & Cognitive Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Brain & Cognitive Science

---

department website: http://www.psychology.illinois.edu/undergrad/
department faculty: Psychology Faculty (https://psychology.illinois.edu/directory/faculty/)
advising: Psychology advising (https://psychology.illinois.edu/academics/undergraduate-program/advising-services/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: psych-advising@illinois.edu (bcog-advising@illinois.edu)

The Brain and Cognitive Science major introduces the student to a simple question: How do intelligent systems work? Our world provides two examples of complex intelligent systems—human beings (and possibly some other animals) and intelligent computer systems. Brain and Cognitive Science majors investigate the brain and behavior of intelligent biological systems (e.g., people) from the perspective that the brain is a kind of computer. Consequently, students must learn about how brains and computers work, and how these can explain what we know about mental functions including perception, learning, memory, and language. Brain and Cognitive Science majors make use of discoveries from a number of different disciplines, including psychology, neuroscience, computer science, linguistics, philosophy, and anthropology, and has applications to the development of technology in education, health, language sciences, and design.

The Brain and Cognitive Science major provides fundamental training in psychology, neuroscience, and computation, and it allows a great deal of flexibility with regard to more advanced courses. The major requires training in statistics, a laboratory course, and the capstone course. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

Academic Advising

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Undergraduate Degree Programs in Psychology

BSLAS in Brain & Cognitive Science (p. 74)

BSLAS in Psychology (p. 74) with the following concentrations:

- Behavioral Neuroscience (p. 345)
- Clinical/Community Psychology (p. 346)
- Cognitive Neuroscience (p. 347)
- Cognitive Psychology (p. 348)
- Developmental Psychology (p. 349)
- Diversity Science (p. 349)
- Intradisciplinary Psychology (p. 350)
- Organizational Psychology (p. 351)
- Personality Psychology (p. 351)
- Social Psychology (p. 352)

For the Degree of Bachelor of Science in Liberal Arts and Sciences Major in Brain and Cognitive Science
A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

Departmental distinction: To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor’s thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics and laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 42 hours of coursework, including at least 12 hours of advanced coursework. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Information listed in this catalog is current as of 10/2020
Areas of Concentration

- Chemical Engineering: The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.

- Biomolecular Engineering: The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

Minimum hours required for graduation: The curriculum requires 129 hours for graduation and is organized as shown below.

Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Chemical and Biomolecular Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of chemical engineering and chemical science.
These courses teach fundamentals of expository writing.

Composition

These courses teach fundamentals of expository writing.

1. For students entering the curriculum after the freshman year, 1 additional hour of credit from the list of approved engineering technical electives may be substituted in place of CHBE 121.
2. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. MATH 441 may be substituted for MATH 285. MATH 286 (4 hours) may be substituted for MATH 285 (3 hours).
5. Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.
7. A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit.

---

### For the degree of Bachelor of Science Major in Chemical Engineering

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eights semesters vary with the area of concentration chosen. Refer to the appropriate sequence continuation below.

#### First Year

**Total Hours:** 97
Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.

MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
b) 3 hours any 400-level course from List 1.
c) 6 hours any courses from List 1.
d) 4 hours any 400-level courses from List 2.
A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 9 hours must be from Category A 
b) 6 hours must be from Category B 
c) 4 hours must be 400-level courses from List 2.
A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.

Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.

The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

**department website:** https://chbe.illinois.edu/

**department faculty:** Chemical & Biomolecular Engineering Faculty (https://chbe.illinois.edu/directory/)

**advising:** SCS Academic Advising (https://scs.illinois.edu/academics/advising/)

**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

**college website:** https://las.illinois.edu/

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two areas of concentration: Chemical Engineering and Biomolecular Engineering. Each area is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration’s technical electives focus more on bio-applied processing and technology.

**Areas of Concentration**

- Chemical Engineering (p. 76): The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- Biomolecular Engineering (p. 79): The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

---

1 Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

2 For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

3 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

4 At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

5 Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

6 Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.

7a MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

7b MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

8a At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

   a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
   b) 3 hours any 400-level course from List 1.
   c) 6 hours any courses from List 1.
   d) 4 hours any 400-level courses from List 2.

A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in 99 RAL or from the department Web site (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

8b At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

   a) 9 hours must be from Category A
   b) 6 hours must be from Category B
   c) 4 hours must be 400-level courses from List 2.

A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

9 Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.
Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.

The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

Learning Outcomes: Chemical Engineering, BS
Learning outcomes for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Chemical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Undergraduate Degree Programs in Chemistry

For the Degree of Bachelor of Science in Liberal Arts and Sciences
• Major in Computer Science & Chemistry, BSLAS (p. 133)
• Major in Chemistry (Sciences and Letters) (p. 85)
• Major in Chemistry (Sciences and Letters), Chemistry Teaching Concentration (p. 85)

For the Degree of Bachelor of Science in Chemistry
• Major in Chemistry (Specialized Curriculum) (p. 83)
• Major in Chemistry (Specialized Curriculum), Environmental Chemistry Concentration (p. 87)

for the degree of Bachelor of Science in Chemistry (Specialized Curriculum)

Specialized Curriculum
The typical program of courses required to satisfy this degree totals 128-134 hours; in no case will a program totaling less than 120 hours qualify for graduation. Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses. The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Students in the specialized curriculum in Chemistry must include a course in Biochemistry in the Advanced Hours area or the Technical Elective area to be certified by the American Chemical Society as having met its specifications.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a UIUC coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.
# Requirements

**General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.

**Minimum hours required for graduation:** 120 hours.

Chemistry (300 or higher), biochemistry, chemical engineering (200 or higher)

Courses in life sciences (all courses at 200 or higher)

Mathematics or computer science above the basic level

Other courses in the physical and biological sciences and engineering including CHEM 199

Nontechical Requirements

Variable

**General education:**

Foreign language - three semesters of college study (or three years of high school study) in a single foreign language

Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)

Advanced Composition writing requirement

Humanities/Arts to satisfy the campus general education requirements

Social/Behavioral sciences to satisfy the campus general education requirements

Cultural Studies to satisfy the campus general education requirement

Free electives

---

1. Hours given are those typical to meet requirement.
2. If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.
3. The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.
4. Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation are required to complete only one laboratory course from the list.
5. Students contemplating transfer to the chemical engineering curriculum should choose MATH 415.
6. Three hours maximum credit in CHEM 199. Additional courses in the sciences and engineering can be taken upon the approval of the chair of the chemistry department advising committee. Most approved courses must have a strong technical prerequisite, such as one year of college-level math or science.
7. The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required course work in the curriculum.
8. The course taken to satisfy the Advanced Composition requirement may also be used to partially satisfy one of the core chemistry, advanced chemistry, mathematics, physics, or technical electives requirements (if appropriate), or may be used to partially satisfy the free electives requirements.
9. The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechanical and/or free elective categories.

---

Information listed in this catalog is current as of 10/2020
Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

college website: https://las.illinois.edu/

This concentration fulfills state certification requirements to teach high school (grades 9-12) chemistry through the AP/honors level and biology, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 502).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see

- Major in Chemistry (Specialized Curriculum), Environmental Chemistry Concentration (p. 87)

For the degree of Bachelor of Science in Liberal Arts and Sciences Major in Chemistry, Chemistry Teaching Concentration

This concentration fulfills state certification requirements to teach high school (grades 9-12) chemistry through the AP/honors level and biology, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 502).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a UIUC coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Students in the Chemistry Teaching Concentration may submit their final teaching portfolio for evaluation in lieu of taking CHEM 499 and submitting a senior thesis. Final decisions on awarding Distinction honors will be made by the Head or designee.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses. Advanced Chemistry

For the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

department website: https://chemistry.illinois.edu
department faculty: Chemistry Faculty (https://chemistry.illinois.edu/directory/faculty-by-type/)
advising: SCS Academic Advising (http://advising.scs.illinois.edu/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas. These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

For the Degree of Bachelor of Science in Liberal Arts and Sciences
• Major in Computer Science & Chemistry, BSLAS (p. 133)
• Major in Chemistry (Sciences and Letters) (p. 85)
• Major in Chemistry (Sciences and Letters), Chemistry Teaching Concentration (p. 85)

For the Degree of Bachelor of Science in Chemistry
• Major in Chemistry (Specialized Curriculum) (p. 83)
• Major in Chemistry (Specialized Curriculum), Environmental Chemistry Concentration (p. 87)

For the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.
Minimum hours required for graduation: 120 hours.

Advanced Chemistry

Information listed in this catalog is current as of 10/2020
Free electives

Nontechnical Requirements
- Cultural Studies to satisfy the campus general education requirements
- Social/Behavioral sciences to satisfy the campus general education requirements
- Humanities/Arts to satisfy the campus general education requirements
- Advanced Composition writing requirement
- Composition I writing requirement

Technical Electives, including the following
- Physics:
  - MATH 220 Calculus
  - MATH 231 Calculus II
  - MATH 241 Calculus III
- Mathematics:
  - PHYS 211 University Physics: Mechanics
  - PHYS 212 University Physics: Elec & Mag
  - PHYS 214 Univ Physics: Quantum Physics

Technical Electives, including the following
- MATH 225 Introductory Matrix Theory
- MATH 285 Applied Linear Algebra

Required Mathematics:
- MATH 397

Additional laboratory work:
- CHEM 222 Inorganic Chemistry Lab
- CHEM 203 Organic Chemistry Lab
- CHEM 204 Physical Principles Lab II
- CHEM 205 Physical Principles Lab III
- CHEM 223 Solid State Structural Analysis

Additional chemistry/biochemistry courses to complete the 11-hour requirement in advanced chemistry
- CHEM 199
- CHEM 397
- IB 485
- GEOL 380
- CEE 443
- CHEM 460
- CHEM 497
- CHEM 499

Other courses in the physical and biological sciences and engineering including CHEM 199
- Required Technical Elective Courses for the Environmental Concentration
  - CHEM 307
  - CHEM 310
  - CHEM 315
  - CHEM 320
  - CHEM 321
  - CHEM 322
  - CHEM 323
  - CHEM 324
  - CHEM 325
  - CHEM 326
  - CHEM 327
  - CHEM 328
  - CHEM 329
  - CHEM 330

  - CHEM 383
  - CHEM 384
  - CHEM 385
  - CHEM 386
  - CHEM 387
  - CHEM 388
  - CHEM 389
  - CHEM 390
  - CHEM 391
  - CHEM 392
  - CHEM 393
  - CHEM 394

The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechnical and/or free elective categories.

Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

Nontechical Requirements
- General education:
  - Foreign language - three semesters of college study (or three years of high school study) in a single foreign language
  - Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)
  - Advanced Composition writing requirement
  - Humanities/Arts to satisfy the campus general education requirements
  - Social/Behavioral sciences to satisfy the campus general education requirements
  - Cultural Studies to satisfy the campus general education requirement
- Free electives

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Chemistry, BS

Learning outcomes for the degree of Bachelor of Science Major in Chemistry

Students graduating with the BS in Chemistry will have:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Learning Outcomes: Chemistry, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Chemistry (Sciences & Letters)

Students graduating with the BSLAS in Chemistry (Sciences & Letters) will have:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Civil Engineering, BS

for the degree of Bachelor of Science in Civil Engineering

department website: Department of Civil & Environmental Engineering (https://cee.illinois.edu/)
department faculty: Department of Civil & Environmental Engineering Faculty (https://cee.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Civil engineering is a profession that applies the basic principles of science in conjunction with mathematical and computational tools to solve problems associated with developing and sustaining civilized life on our planet. Civil engineering works are generally one-of-a-kind projects; they are often grand in scale; and they usually require cooperation among professionals of many different disciplines. The completion of a civil engineering project involves the solution of technical problems in which uncertainty of information and myriad non-technical factors often play a significant role. Some of the most common examples of civil engineering works include bridges, buildings, dams, airports, highways, tunnels, and water distribution systems. Civil engineers are concerned with flood control, landslides, air and water pollution, and the design of facilities to withstand earthquakes and other natural hazards, in addition to protecting our environment for a sustainable future.

The civil engineering program comprises seven areas (construction engineering and management, construction materials engineering, environmental engineering, geotechnical engineering, environmental hydrology and hydraulics, structural engineering, and transportation engineering) and three interdisciplinary programs (sustainable and resilient infrastructure systems; energy, water, and environmental sustainability; and societal risk and hazard mitigation). Although each area has its own special body of knowledge and engineering tools, they all rely on the same fundamental core principles. Civil engineering projects often draw expertise from many of these areas and programs.

CEE’s Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse areas that include structural, transportation, geotechnical, materials, environmental, and hydrologic engineering; construction management; or other related or emerging fields.
2. Pursue graduate education and research at major research universities in civil and environmental engineering, and related fields.
3. Pursue professional licensure.
4. Advance to leadership positions in the profession.
5. Engage in continued learning through professional development.
6. Participate in and contribute to professional societies and community services.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student’s academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

for the degree of Bachelor of Science in Civil Engineering
Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/NEW/NEW/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). The Advanced Composition course must be BTW 261.

Civil Engineering Technical Electives

Students choose primary and secondary fields, of which there are seven traditional areas of study and three interdisciplinary programs. The specific choices of courses in this category are made through the submission of a Plan of Study, which is subject to approval by the faculty Program Review Committee.

Civil Engineering Core Courses Recommended:
- CEE 320 Construction Engineering (3)

Advanced Technical Courses Required:
- CEE 460 Steel Structures I (3)
- CEE 461 Reinforced Concrete I (3)
- CEE 465 Design of Structural Systems (Required Integrated Design Course) (3 or 4)
- CEE 470 Structural Analysis (4)

Advanced Technical Courses Recommended - None

Transportation Engineering
Science Electives Required - None
Science Electives Recommended:
- CSE 357 Numerical Methods I (3)
- ECE 205 Electrical and Electronic Circuits (3)
- GEOL 107 Physical Geology (4)
- ME 200 Thermodynamics (3)
- GEOL 118 Natural Disasters (3)
- ME 340 Dynamics of Mechanical Systems (3.5)
- MSE 401 Thermodynamics of Materials (3)
- SE 320 Control Systems (4)
- STAT 420 Methods of Applied Statistics (3 or 4)

Civil Engineering Core Courses Required:
- CEE 300 Behavior of Materials (4)
- CEE 310 Transportation Engineering (3)

Civil Engineering Core Courses Recommended:
- CEE 320 Construction Engineering (3)
- CEE 330 Environmental Engineering (3)
- CEE 350 Water Resources Engineering (3)
- CEE 360 Structural Engineering (3)
- CEE 380 Geotechnical Engineering (3)

Advanced Technical Courses: You must select one course from each of the three Areas below and one course from the recommended list.

Area 1 - Facilities
- CEE 405 Asphalt Materials I (3 or 4)
- CEE 406 Pavement Design I (3 or 4)
- CEE 407 Airport Design (3 or 4)

Area 2 - Systems
- CEE 407 Airport Design (3 or 4)
- CEE 415 Geometric Design of Roads (Required Integrated Design Course) (3 or 4)
- CEE 416 Traffic Capacity Analysis (3 or 4)

Area 3 - Railroads
- CEE 418 Public Transportation Systems (3 or 4)

Water Resources Engineering and Science
Science Electives Required - None
Science Electives Recommended:
- CSE 357 Numerical Methods I (3)
- GEOL 107 Physical Geology (4)
- ME 200 Thermodynamics (3)

Civil Engineering Core Courses Required:
- CEE 350 Water Resources Engineering (3)

Civil Engineering Core Courses Recommended:
- CEE 300 Behavior of Materials (4)
- CEE 320 Construction Engineering (3)
- CEE 330 Environmental Engineering (3)
- CEE 360 Structural Engineering (3)
- CEE 380 Geotechnical Engineering (3)

Advanced Technical Courses Required (Choose one):
- CEE 452 Hydraulic Analysis and Design (3)
- CEE 453 Urban Hydrology and Hydraulics (Required Integrated Design Course) (4)

Advanced Technical Courses Recommended:
- CEE 432 Stream Ecology (3 or 4)
- CEE 433 Water Technology and Policy (3 or 4)
- CEE 434 Environmental Systems I (3)
- CEE 437 Water Quality Engineering (3)
- CEE 450 Surface Hydrology (3)
- CEE 451 Environmental Fluid Mechanics (3)
- CEE 452 Hydraulic Analysis and Design (3)
- CEE 453 Urban Hydrology and Hydraulics (4)
- CEE 457 Groundwater (3)
- CEE 458 Water Resources Field Methods (4)
- CEE 498 Special Topics (Section EH) (1 to 4)

Energy-Water-Environment Sustainability
Science Electives Required:
Advanced Technical Courses Recommended:
CEE 491

Civil Engineering Core Courses Recommended:
CEE 340  Energy and Global Environment 3
CEE 330  Environmental Engineering 3
CEE 350  Water Resources Engineering 3

Advanced Technical Courses Required:
CEE 493  Sustainable Design Eng Tech (Must also select 3 courses from recommended list below) 4

Advanced Technical Courses Recommended:
ABE 436  Renewable Energy Systems 3 or 4
ARCH 441  Heat and Moisture in Buildings 3
CEE 424  Sustainable Const Methods 4
CEE 433  Water Technology and Policy 3 or 4
CEE 434  Environmental Systems I 3
CEE 437  Water Quality Engineering 3
CEE 446  Air Quality Engineering 4
CEE 449  Environmental Engineering Lab 3
CEE 450  Surface Hydrology 3
CEE 452  Hydraulic Analysis and Design 3
CEE 453  Urban Hydrology and Hydraulics 4
CEE 457  Groundwater 3

NPRE 402  Nuclear Power Engineering 3 or 4
NPRE 475  Wind Power Systems 3 or 4

Societal Risk and Hazard Mitigation

Science Electives Required - None

Science Electives Recommended:
FIN 230  Introduction to Insurance 3
GEOL 118  Natural Disasters 3
LAW 301  Introduction to Law 2 or 3
NRES 287  Environment and Society 3
STAT 420  Methods of Applied Statistics 3 or 4

Civil Engineering Core Courses Required:
CEE 340  Energy and Global Environment 3

Civil Engineering Core Courses Recommended:
CEE 300  Behavior of Materials 4
CEE 310  Transportation Engineering 3
CEE 320  Construction Engineering 3
CEE 330  Environmental Engineering 3
CEE 350  Water Resources Engineering 3
CEE 360  Structural Engineering 3
CEE 380  Geotechnical Engineering 3

Advanced Technical Courses Required:
CEE 491  Decision and Risk Analysis (and select 3 from the recommended list below) 3 or 4

Advanced Technical Courses Recommended:
CEE 406  Pavement Design I 3 or 4

EE 416  Traffic Capacity Analysis 3 or 4
CEE 417  Urban Transportation Planning 4
CEE 437  Water Quality Engineering 4
CEE 440  Fate Cleanup Environ Pollutant 4
CEE 449  Environmental Engineering Lab 3
CEE 460  Steel Structures I 3
CEE 461  Reinforced Concrete I 3
CEE 465  Design of Structural Systems 3
CEE 472  Structural Dynamics I 3 or 4
CEE 498  Special Topics (Section WE) 1 to 4

IE 410  Advanced Topics in Section WE Processes & Applications 3 or 4
NPRE 442  Radioactive Waste Management 3
SE 450  Decision Analysis I 3 or 4
STAT 425  Applied Regression and Design 3 or 4
STAT 429  Time Series Analysis 3 or 4
STAT 430  Topics in Applied Statistics 3 or 4
UP 438  Disasters and Urban Planning 4

Sustainable and Resilient Infrastructure Systems

Science Electives Required - None

Science Electives Recommended:
ATMS 120  Severe and Hazardous Weather 3
CS 357  Numerical Methods I 3
ENSC 300  Environmental Sustainability 3
ESE 140  Climate and Global Change 3
ESE 320  Water Planet, Water Crisis 3
ESE 482  Challenges of Sustainability 3
FIN 221  Corporate Finance 3
GEOG 103  Earth’s Physical Systems 4
NPRE 201  Energy Systems 2 or 3
NRES 439  Env and Sustainable Dev 3
SE 320  Control Systems 4
STAT 420  Methods of Applied Statistics 3 or 4
UP 406  Urban Ecology 4

Civil Engineering Core Courses Required:
CEE 340  Energy and Global Environment 3

Civil Engineering Core Courses Recommended:
CEE 300  Behavior of Materials 4
CEE 310  Transportation Engineering 3
CEE 320  Construction Engineering 3
CEE 330  Environmental Engineering 3
CEE 350  Water Resources Engineering 3
CEE 380  Geotechnical Engineering 3

Advanced Technical Courses Required:
CEE 491  Decision and Risk Analysis (And select 3 courses from the recommended list below) 3 or 4

Advanced Technical Courses Recommended:
ABE 436  Renewable Energy Systems 3 or 4
CEE 401  Concrete Materials 4
CEE 406  Pavement Design I 3 or 4
CEE 408  Railroad Transportation Engrg 3 or 4
CEE 409  Railroad Track Engineering 3 or 4

Information listed in this catalog is current as of 10/2020

<td>2</td>
</tr>
<tr>
<td>CHEM 232</td>
<td>Elementary Organic Chemistry I</td>
<td>3 or 4</td>
</tr>
<tr>
<td>ME 200</td>
<td>Thermodynamics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 400</td>
<td>Statistics and Probability I</td>
<td>4</td>
</tr>
</tbody>
</table>

Civil Engineering Core Courses Required - Should take 7 courses from list below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 300</td>
<td>Behavior of Materials</td>
<td>4</td>
</tr>
<tr>
<td>CEE 310</td>
<td>Transportation Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CEE 320</td>
<td>Construction Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CEE 330</td>
<td>Environmental Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CEE 340</td>
<td>Energy and Global Environment</td>

</table>

Information listed in this catalog is current as of 10/2020
Civil Engineering Core Courses Required:
CEE 447 Atmospheric Chemistry 4
CEE 449 Environmental Engineering Lab 3

Geotechnical Engineering
Civil Engineering Core Courses Required:
CEE 380 Geotechnical Engineering 3
Advanced Technical Courses Required:
CEE 480 Foundation Engineering 3-4
or CEE 484 Applied Soil Mechanics
CEE 483 Soil Mechanics and Behavior 4
Advanced Technical Courses Recommended - NONE

Structural Engineering
Civil Engineering Core Courses Required:
CEE 360 Structural Engineering 3
Advanced Technical Courses Required:
CEE 460 Steel Structures I 3
CEE 461 Reinforced Concrete I 3

Transportation Engineering
Civil Engineering Core Courses Required:
CEE 310 Transportation Engineering 3
Advanced Technical Courses Required: Select 2 courses, each from a different Area
Area 1 - Facilities:
CEE 405 Asphalt Materials I 3 or 4
CEE 406 Pavement Design I 3 or 4
CEE 407 Airport Design 3 or 4
Area 2 - Systems:
CEE 407 Airport Design 3 or 4
CEE 415 Geometric Design of Roads 4
CEE 416 Traffic Capacity Analysis 3 or 4
CEE 418 Public Transportation Systems 3 or 4
Area 3 - Railroad:
CEE 408 Railroad Transportation Engrg 3 or 4
CEE 409 Railroad Track Engineering 3 or 4
CEE 410 Railway Signaling & Control 3 or 4
CEE 411 RR Project Design & Constr 3 or 4

Water Resources Engineering and Science
Civil Engineering Core Courses Required:
CEE 350 Water Resources Engineering 3
Advanced Technical Courses Required: 2 courses from the recommended list below:
Advanced Technical Courses Recommended:
CEE 432 Stream Ecology 3 or 4
CEE 433 Water Technology and Policy 3 or 4
CEE 450 Surface Hydrology 3
CEE 451 Environmental Fluid Mechanics 3
CEE 452 Hydraulic Analysis and Design 3
CEE 453 Urban Hydrology and Hydraulics 4
CEE 457 Groundwater 3
CEE 498 Special Topics (Section EH) 1 to 4

Energy-Water-Environment Sustainability

**Global Context**

Science Electives Recommended:
- CPSC 116 The Global Food Production Web | 3
- ESE 140 Climate and Global Change        | 3
- ESE 320 Water Planet, Water Crisis       | 3
- ESE 482 Challenges of Sustainability     | 3

Civil Engineering Core Courses Recommended:
- CEE 330 Environmental Engineering        | 3
- or CEE 350 Water Resources Engineering   | 3
- CEE 340 Energy and Global Environment    | 3

Advanced Technical Courses Recommended: Must take at least 3 credit hours in each of the 2 areas below:

Knowledge and Skills Needed to Effectively Address Global Issues:
- ACE 451 Agriculture in Int'l Dev         | 3 to 4
- ATMS 421 Earth Systems Modeling          | 4
- CEE 438 Science & Environmental Policy   | 3
- CEE 445 Air Quality Modeling             | 4
- CEE 447 Atmospheric Chemistry            | 4
- CEE 450 Surface Hydrology                | 3
- ECON 420 International Economics         | 2 to 4

Global CEE Design:
- CEE 408 Railroad Transportation Engrg    | 3 or 4
- CEE 417 Urban Transportation Planning    | 4
- CEE 437 Water Quality Engineering        | 3
- CEE 449 Environmental Engineering Lab    | 3

**CEE 465** Design of Structural Systems | 3

**CEE Multidisciplinary**

Science Electives Recommended: Any recommended science electives from existing CEE Primary and Secondary listed above

Civil Engineering Core Courses Recommended: Core courses relevant to the student's interests

Advanced Technical Courses: Students work with CEE Academic Advisors

**Atmosphere Science (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:
- CEE 330 Environmental Engineering | 3

Advanced Technical Courses Recommended:
- ATMS 302 Atmospheric Dynamics I | 3
- ATMS 410 Radar Remote Sensing    | 4
- ATMS 411 Satellite Remote Sensing| 4
- ATMS 421 Earth Systems Modeling  | 4
- CEE 445 Air Quality Modeling     | 4
- CEE 447 Atmospheric Chemistry    | 4

**Chemistry (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:
- CEE 330 Environmental Engineering | 3

Advanced Technical Courses Recommended:
- CHEM 232 Elementary Organic Chemistry I| 3 or 4
- CHEM 315 Instrumental Chem Systems Lab| 2
- CHEM 332 Elementary Organic Chem II  | 4
- CHEM 420 Instrumental Characterization| 2
- CHEM 440 Physical Chemistry Principles| 4

**Chemical Engineering (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:
- CEE 330 Environmental Engineering | 3

Advanced Technical Courses Recommended:
- CHBE 321 Thermodynamics             | 4
- CHBE 421 Momentum and Heat Transfer | 4
- CHBE 422 Mass Transfer Operations   | 4
- CHBE 424 Chemical Reaction Engineering| 3

**Microbiology (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:
- CEE 330 Environmental Engineering | 3

Advanced Technical Courses Recommended:
- MCB 301 Experimental Microbiology   | 3
- MCB 431 Microbial Physiology        | 3
- MCB 450 Introductory Biochemistry   | 3
- CEE 444 Env Eng Principles, Biological | 4

**Toxicology (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:
- CEE 330 Environmental Engineering | 3

Advanced Technical Courses Recommended:
- CHEM 332 Elementary Organic Chem II  | 4
- ENVS 431 Environ Toxicology & Health | 3
ENVS 480  Basic Toxicology  3
MCB 450  Introductory Biochemistry  3

Total Hours of Curriculum to Graduate  128

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cee-map/).

Semester Hours 15

Total Hours: 128

1 Offered in the fall semester, student should take in the first or second semester of enrollment in Civil Engineering.
2 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Civil Engineering

Learning Outcomes for the degree of Bachelor of Science Major in Civil Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Civil Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Classics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

department website: http://www.classics.illinois.edu/
department faculty: Classics Faculty (https://classics.illinois.edu/ directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: classics@illinois.edu

Students choose from the following concentrations:

Classical Civilizations (p. 99)
Classical Languages (p. 99)

For students interested in adding licensure to the BALAS in Classics, please visit the Department of the Classics academics page: https://classics.illinois.edu/academics/undergraduate-program/teaching-latin (https://classics.illinois.edu/academics/undergraduate-program/teaching-latin/)

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the campus general education language requirement with one of the classical languages.

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department’s honors committee at the earliest opportunity.

Students choose from the following concentrations:

Classical Civilizations (p. 99)
Classical Languages (p. 99)

Learning Outcomes: Classics, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

1. Acquire and retain a detailed knowledge of Greek and Latin grammar, syntax, vocabulary, and modes of expression so as to be able to read literary and subliterary texts composed in Greek and Latin between roughly 800 BCE and 500 CE.
2. Situate knowledge of the languages within the cultural contexts in which they were used in order to understand the crucial role of language in social dynamics and cross-cultural communication.

3. Acquire facility with contemporary methods of literary and historical analysis sufficient to carry out original, self-directed research into cultures that made use of the Greek and Latin languages.

4. Acquire critical awareness of the place of Greek and Latin in western literary history in order to appreciate the powerful role of tradition in interpreting the texts and events of the past.

5. Acquire a detailed knowledge of the culture of Ancient Greek and Roman civilizations, especially the broader historical, social, and cultural contexts and their development.

Communication Courses: Students will select an option (A or B) and a specialization (if Option B is chosen) in consultation with an undergraduate advisor in Communication.

OPTION A: Students who wish a general course of study will take at least one course from five of the following six areas and the remaining hours will be selected in consultation with an advisor.

OPTION B: Students who choose to concentrate within an area must take four courses from one of the six areas listed below and the remaining hours will be selected in consultation with an advisor. Students may complete more than one specialization by completing four courses in each area desired; however, individual courses may not be counted toward more than one specialization.

Communication & Culture Area
- CMN 232 Intro to Intercultural Comm
- CMN 250 Social Movement Communication
- CMN 275 Media, Money and Power
- CMN 280 Comm Technology & Society
- CMN 320 Comm Controversy Public Policy
- CMN 326 Mass Media and the Audience
- CMN 357 Intro to Conversation Analysis
- CMN 361 Storytelling as Oral Communication
- CMN 375 Popular Media and Culture
- CMN 429 Race and the Mass Media
- CMN 432 Gender Communication
- CMN 450 Topics in Public Communication

Communication & Health Area:
- CMN 220 Communicating Public Policy
- CMN 230 Intro to Interpersonal Comm
- CMN 260 Intro to Health Communication
- CMN 321 Strategies of Persuasion
- CMN 323 Argumentation
- CMN 368 Sexual Communication
- CMN 421 Persuasion Theory & Research
- CMN 467 Communication & Health Equity
- CMN 435 Adv Interpersonal Comm
- CMN 462 Interpersonal Health Comm

Communication & Organizations Area:
- CMN 211 Business and Professional Communication
- CMN 212 Intro to Organizational Comm
- CMN 213 Small Group Communication
- CMN 215 Interviewing: The Art and Science of Effective Questioning
- CMN 232 Intro to Intercultural Comm
- CMN 280 Comm Technology & Society
- CMN 312 Communicating for Innovation
- CMN 323 Argumentation
- CMN 370 Political Economy of Communication
- CMN 377 Propaganda and Modern Society
- CMN 410 Workplace Comm Technology
- CMN 411 Organizational Comm Assessment
- CMN 412 Adv Organizational Comm
- CMN 413 Adv Small Group Communication
- CMN 463 Organizational Health Comm
- CMN 464 Health Communication Campaigns
- CMN 476 Commercialism and the Public

Interpersonal Communication Area:
- CMN 213 Small Group Communication
- CMN 230 Intro to Interpersonal Comm
- CMN 232 Intro to Intercultural Comm
- CMN 260 Intro to Health Communication
- CMN 321 Strategies of Persuasion
- CMN 323 Argumentation
- CMN 336 Family Communication
- CMN 338 Relationships and Technologies
- CMN 357 Intro to Conversation Analysis
- CMN 368 Sexual Communication
- CMN 413 Adv Small Group Communication
- CMN 421 Persuasion Theory & Research
- CMN 432 Gender Communication
- CMN 435 Adv Interpersonal Comm
- CMN 437 Comm in Personal Relationships
- CMN 462 Interpersonal Health Comm

Mediated Communication & Technology Area:
- CMN 275 Media, Money and Power
- CMN 277 Introduction to Mediated Communication
- CMN 280 Comm Technology & Society
- CMN 312 Communicating for Innovation
- CMN 325 Politics and the Media
- CMN 326 Mass Media and the Audience
- CMN 338 Relationships and Technologies
- CMN 340 Visual Politics
- CMN 345 Visual Media Effects
- CMN 370 Political Economy of Communication
- CMN 375 Popular Media and Culture
- CMN 410 Workplace Comm Technology

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 103), Health Planning & Administration (p. 107), and Rehabilitation Studies (p. 113). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and

Learning Outcomes: Communication, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Communication

1. Students will demonstrate competence in oral and written communication, including public speaking, argumentation and reasoning, deliberation, and media analysis and critique.
2. Students will have broad knowledge of communication research and theory and understand how to apply theoretical concepts in practical settings.
3. Students will understand the political and social import of communication and develop competencies required to engage productively with discourses related to all aspects of public and private life.
4. Students will understand the communicative implications of human diversity, including issues related to race, culture, class, religion, gender, sexual identity, and disability.
5. Students will gain communication competencies that afford them rewarding opportunities, such as satisfying employment or post-graduate study.

\footnote{CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the minimum of 37 hours of Communication courses required for the major.}

programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

Programs in Community Health and Kinesiology

Undergraduate Programs:

- **major:** Community Health, BS (p. 102)
  - concentration: Community Health: Health Education & Promotion, BS (p. 103)
  - concentration: Community Health: Health Planning & Administration, BS (p. 107)
  - concentration: Community Health: Rehabilitation Studies, BS (p. 113)
- **major:** Kinesiology, BS (p. 237)
  - concentration: Kinesiology: Teacher Certification, BS (p. 238)
- **minor:** Kinesiology (p. 481)
- **minor:** Disability Studies (http://catalog.illinois.edu/undergraduate/ahs/minors/disability-studies/)
- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 439)

Graduate Programs:

- **degree:** Kinesiology, MS (http://catalog.illinois.edu/graduate/ms_kines/)
- **degree:** Kinesiology, PhD (http://catalog.illinois.edu/graduate/graduate-majors/kinesiology/#doctoratestext)
- **degree:** Community Health, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-comm-health/)
- **degree:** Rehabilitation, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-rehab/)
- **degree:** Public Health, MPH (http://catalog.illinois.edu/graduate/graduate-majors/community-health(master-pub-health/)
- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 439)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 103), Health Planning & Administration (p. 107), and Rehabilitation Studies (p. 113). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with
both BS and MPH degrees. A summary of the requirements for the MPH degree is provided (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Community Health, Health Planning & Administration Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

### General Education

Programs in Community Health and Kinesiology

Undergraduate Programs:

**major:** Community Health, BS (p. 102)
- concentration: Community Health: Health Education & Promotion, BS (p. 103)
- concentration: Community Health: Health Planning & Administration, BS (p. 107)
- concentration: Community Health: Rehabilitation Studies, BS (p. 113)

**minor:** Kinesiology, BS (p. 237)
- concentration: Kinesiology: Teacher Certification, BS (p. 238)

**joint degree:** Community Health, BS and Public Health, MPH (p. 118)

**joint degree:** Kinesiology, BS and Public Health, MPH (p. 439)

Graduate Programs:

**degree:** Kinesiology, MS (http://catalog.illinois.edu/graduate/ms_kines/)

**degree:** Kinesiology, PhD (http://catalog.illinois.edu/graduate/graduate-majors/kinesiology/#doctoratestext)

**degree:** Community Health, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-comm-health/)

**degree:** Rehabilitation, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-rehab/)

**degree:** Public Health, MPH (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/)

**joint degree:** Community Health, BS and Public Health, MPH (p. 118)

**joint degree:** Kinesiology, BS and Public Health, MPH (p. 439)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 103), Health Planning & Administration (p. 107), and Rehabilitation Studies (p. 113). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Community Health, Rehabilitation Studies Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

### Learning Outcomes: Community Health, BS

Learning outcomes for the Bachelor of Science Major in Community Health

1. **Content Knowledge**: Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.

2. **Critical Thinking and Discovery**: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.

3. **Awareness and Understanding**: Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.

4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.

5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and
sustain productive relationships and work for the common good at local, national, and global levels.

Community Health, BS & Public Health, MPH

for the Bachelor of Science Major in Community Health

Department Website: http://kch.illinois.edu/
Department Faculty: Kinesiology & Community Health Faculty (http://kch.illinois.edu/faculty/)
College Catalog Page: Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
College Website: http://ahs.illinois.edu/

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirements). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/ (https://ahs.illinois.edu/how-to-apply-bs-mph/)

joint degree: Kinesiology, BS and Public Health, MPH (p. 439)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion, Health Planning & Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

for the Bachelor of Science Major in Community Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

Information listed in this catalog is current as of 10/2020
The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester. For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

**Comparative & World Literature, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative & World Literature*

**program website:** https://complit.illinois.edu/

**program faculty:** Comparative & World Literature Faculty (https://complit.illinois.edu/faculty/)

**email:** complit@illinois.edu

The Major in Comparative & World Literature, Comparative Literature Concentration provides an engagement with two or more literary and cultural traditions, studied in historical depth, in their original languages (6 hours of advanced foreign language required). Study abroad and work across cultures and disciplines is strongly encouraged. The distribution of course work allows for considerable flexibility. The concentration in Comparative Literature can be easily combined with a major or minor in any national literature, classics, global studies, area studies, ethnic studies, gender and women's studies, or majors and minors in anthropology, art history, cinema and media studies, history, music, philosophy, world religion, the visual arts, or with a certificate in translation studies.

**for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative & World Literature, Comparative Literature Concentration**

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

**Departmental distinction:** To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

**Comparative Literature Concentration Requirements**

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work equate to 39 hours with at least 18 hours of Comparative Literature courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper division coursework (these hours can be drawn from all elements of the degree).

**Major Literature Coursework:** Three courses in a major literature, taught in the original language, at 200-400-level. No more than 2 courses at the 200-level. 1

**Focus Area Coursework:** At least two courses from one of the following focus areas, at 200-400 level. No more than 1 course at the 200-level:

Minor Literature: courses in a second national literature, taught in the original language. 2

Interdisciplinary: courses in another discipline, such as philosophy, cinema, art history, fine arts, music, religion, science, medical humanities, law, creative writing

Information listed in this catalog is current as of 10/2020
Comparative & World Literature: World Literature, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative & World Literature, World Literature Concentration

The Major in Comparative & World Literature, World Literature Concentration focuses on breadth in the study of literatures and cultures from around the globe, read in English translation (no foreign language required beyond the General Education requirement). This concentration can be easily combined with a certificate in Translation Studies, a major or minor in Global Studies, Area Studies, Ethnic Studies, Gender and Women’s Studies, or majors and minors in anthropology, cinema and media studies, history, music, political science, philosophy, world religion, the visual arts, and related fields.

Area Studies: courses in a geographical area related to major literature (Africa, Middle East, Latin America, South Asia, East Asia, Eastern Europe, the European Union).

Minimum Required Hours:

1 Literature in the Original Language is defined by what is currently offered by the University (i.e. English, French, German, Italian, Spanish, etc.). Literatures generally taught in translation (including, but not limited to, Arabic, Chinese, Hebrew, Japanese, Persian, Polish, Russian, and Yiddish) may be chosen in consultation with the Director of Undergraduate Studies.

If one of the literatures studied is English, a student who continues in a graduate program in comparative literature will be required to acquire a reading knowledge of a second foreign language (i.e., one foreign language for the B.A., two foreign languages for the M.A., three foreign languages for the Ph.D.).

Comparative Studies: courses with a focus on race, gender, class, postcolonialism, environmental studies, or the like.

Departmental distinction: To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

World Literature Concentration Requirements

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work equate to 33 hours with at least 18 hours of Comparative Literature courses. Twelve hours of 300-400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper division coursework (these hours can be drawn from all elements of the degree).

Area / Cultural Studies Coursework - Two courses at 300-400 level in any literature or in one of the following fields: 6

Information listed in this catalog is current as of 10/2020
Another discipline: e.g. philosophy, cinema, art history, fine arts, music, religion, science, medical humanities, law, creative writing.

Cultural studies: e.g. race, gender, class, postcolonialism, environmental studies.

Area Studies: Africa, Middle East, Latin America, South Asia, East Asia, Eastern Europe, the European Union.

Minimum Required Hours: 33

Learning Outcomes: Comparative & World Literature, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative Literature

1. Social Awareness and Cultural Understanding / Global Consciousness: CWL students will develop a comparative understanding of national literatures in the context of a globalizing world, and an ability to situate texts in their cultural and historical contexts.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

2. Intellectual Reasoning and Knowledge: CWL students will appreciate the aesthetic qualities of literary texts and develop an awareness of influential critical and interpretive methods.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

3. Intellectual Reasoning and Knowledge: CWL students will demonstrate a general understanding of the conventions of literary genres and of the major developments in literary history.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

4. Creative Inquiry and Discovery: Students will demonstrate ability to express oneself orally and in writing in a clear, coherent and persuasive manner, and to construct an interpretive argument.
   a. Measurable by: analysis of student work samples; focus groups.

5. For Comparative Literature concentration only: Students will demonstrate mastery of at least two languages.
   a. Measurable by: participation in 200-400 level courses in the original language; degree progress and course completion.

Computer Engineering, BS

for the degree of Bachelor of Science in Computer Engineering

department website: https://ece.illinois.edu
department faculty: Electrical & Computer Engineering Faculty (https://ece.illinois.edu/directory/faculty.asp)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Computer Engineering at The Grainger College of Engineering focuses on the development of vital computing technologies, ranging from chips to computers to networks to programming tools to key algorithms for building exciting applications. Fundamentally, Computer Engineering addresses the problem of building scalable, trustworthy computing systems, and the faculty’s interests span a broad spectrum of issues pertinent to this theme. Computer engineering has taken the lead in revolutionizing many science and engineering disciplines with parallel computing, from chips to clouds to planet-scale critical infrastructures, and has defined new standards of security, privacy, and dependability for systems ranging from small circuits to the electric power grids of many nations. Students need a broad and sound set of mathematical and computing skills, and are well-served by a flexible curriculum that enables them to pursue topics of interest among the many subdisciplines in computing.

The computer engineering core curriculum focuses on fundamental computer engineering knowledge: circuits, systems, electromagnetics, computer systems, electronics for information processing and communication, and computer science. The rich set of ECE elective courses permits students to concentrate in any sub-discipline of computer engineering including: hardware systems; cyberphysical systems; foundations and theory; software and languages; algorithms and mathematical tools; trust, reliability, security; networking, mobile and distributed computing; big data analytics and systems; artificial intelligence, robotics, cybernetics.

for the degree of Bachelor of Science in Computer Engineering

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for ECE courses (except ECE 316). See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

CS 440  Artificial Intelligence  3 or 4
CS 446  Machine Learning  3 or 4
CS 450  Numerical Analysis  3 or 4
CS 461  Computer Security I  4
CS 475  Formal Models of Computation  3 or 4
CS 476  Program Verification  3 or 4
CS 477  Formal Software Development Methods  3 or 4
CS 483  Applied Parallel Programming  4
CS 498  Special Topics (MP: Logic for Computer Science )  1 to 4
CS 498  Special Topics (VR: Virtual Reality)  1 to 4
The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/ce-map/).

**Suggested Sequence**

The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

Learning Outcomes: Computer Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Computer Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Computer Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Science + Advertising, BS

for the degree of Bachelor of Science Major in Computer Science & Advertising

advertising department website: https://media.illinois.edu/degrees-programs/computer-science-advertising (https://media.illinois.edu/degrees-programs/computer-science-advertising/)overview of college admissions & requirements: College of Media (p. 1159)college websites: https://media.illinois.edu/ and https://engineering.illinois.eduadvertising email: media-ssc@illinois.edu computer science email: undergrad@cs.illinois.edu (academic@cs.illinois.edu)

COMPUTER SCIENCE AND ADVERTISING, sponsored jointly by the Departments of Computer Science and Advertising. This is a program for students who plan to pursue careers in the advertising field that have a technology focus. Cloud computing, the availability and ubiquity of data, and the rapid and pervasive adoption of mobile technology have created a paradigm shift in the advertising industry. Projected areas of growth in
advertising and communications will be in Search Engine Optimization, web analytics, Computational Advertising, and other emerging areas of technology/media. The degree will prepare students for advanced study at the graduate level as well as immediate entry into the workforce at advertising agencies, businesses with in-house advertising and marketing divisions, and technology companies.

Programs in Advertising

Undergraduate Programs:
- major: Advertising, BS (http://catalog.illinois.edu/schools/media/academic-units/advertising/#undergraduate#text)
- major: Computer Science & Advertising, BS (http://catalog.illinois.edu/undergraduate/media/departments/advertising/csadvm)
- minor: Public Relations (p. 493)

Graduate Programs:
- degree: Advertising, MS (p. 522)
- degree: Strategic Brand Communication, MS (p. 1005)

for the degree of Bachelor of Science Major in Computer Science & Advertising

Please see the computer science advisor in 1210 Siebel Center, as well as an advertising advisor in the College of Media Student Services Center in 18 Gregory Hall.

A Major Plan of Study Form must be completed and submitted to the Department of Computer Science Office of Undergraduate Affairs by the beginning of the fifth semester (60-75 hours).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 68 hours plus 12 additional hours of College of Media requirements.

All campus general education and foreign language requirements must be met. The minimum hours required for graduation is 124. At least 12 hours of 300- and 400-level course work must be taken on this campus, and a minimum of 40 hours of upper-division course work is required.

Minimum hours required for graduation: 124 hours

To graduate from the Computer Science & Advertising curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

Required Astronomy Coursework - Minimum of 27 Hours

**Physics, Mathematics, and Astronomy Foundations**

PHYS 211 University Physics: Mechanics

PHYS 212 University Physics: Elec & Mag

MATH 211 Calculus I

MATH 241 Calculus III

ASTR 210 Introduction to Astrophysics

Advanced Astronomy Courses 12-13

ASTR 310 Computing in Astronomy

Select 2 courses from the following list: 6-7

ASTR 304 Stellar Astrophysics

ASTR 305 Planetary Systems

ASTR 306 Galaxies and the Universe

ASTR 314 Astronomical Techniques

Additional ASTR course(s) at the 300 level or higher (2-3 hours) Minimum 12 total advanced ASTR hours required 2-3

Learning Outcomes: Computer Science + Astronomy, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science & Astronomy

Undergraduate Computer Science & Astronomy majors will graduate with a demonstrated ability to:

LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.

LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.
Identify which principles should be applied to a specified situation.
Show familiarity with astronomical observables and their physical origin.
Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.

L03. Analyze astronomical data, and quantitative data generally.

- Demonstrate the ability to link observation and theory.
- Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
- Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.

L04. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.

L05. Demonstrate the ability to communicate effectively both verbally and in writing.

Required Chemistry Coursework - Minimum of 24 hours

Foundation Courses- 12 hours required

Select one of the following (General or Accelerated Chemistry):

- CHEM 102 General Chemistry I
- & CHEM 102:and General Chemistry Lab I
- & CHEM 102:and General Chemistry II
- & CHEM 102:and General Chemistry Lab II

or

- CHEM 202 Accelerated Chemistry I
- & CHEM 202:and Accelerated Chemistry Lab I
- & CHEM 202:and Accelerated Chemistry II

- CHEM 232 Elementary Organic Chemistry I
  - or CHEM 232:Fundamental Organic Chem I

Advanced Chemistry Courses- 12 hours

- CHEM 440 Physical Chemistry Principles
  - or CHEM 440:Physical Chemistry I

In consultation with an advisor, choose 8 hours of 300- or 400-level chemistry courses 2

Information listed in this catalog is current as of 10/2020
1 CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.

2 The following courses may not be used to complete the advanced chemistry hours: CHEM 315, CHEM 397, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and CHEM 499;

and any course in another unit, such as any BIOC or MCB course.

Learning Outcomes: Computer Science + Chemistry, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science and Chemistry

By the time of graduation, students will have:

Computer Science:

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
4. An ability to function effectively on teams to accomplish a common goal
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
11. An ability to apply design and development principles in the construction of software systems of varying complexity

Chemistry:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the sub-fields of chemistry, including analytical, inorganic, organic and physical chemistry.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Computer Science + Crop Sciences, BS

crop sciences contact: sbartlet@illinois.edu

Computer Science + Crop Sciences (CS+CPSC) is a first-of-its-kind partnership between The Grainger College of Engineering's Department of Computer Science and the Department of Crop Sciences in the College of Agricultural, Consumer and Environmental Sciences.

Our growing population and changing climate demand out-of-the-box, multidisciplinary thinkers who can handle increasingly rich data sets. CS+CPSC students fill this crucial gap in the agriculture sector, combining a strong technical background with crop sciences expertise powerful enough to change the world.

Students will be among the first to analyze robotics-enabled soil and field measurements, predict weather and climate impacts on food supplies, and accelerate plant improvement through the simultaneous analysis of genetics, environment, and management.

for the degree of Bachelor of Science Major in Computer Science & Crop Sciences

Please see the Computer Science advisor in 1210 Siebel Center, as well as the Crop Sciences advisor in AE-116 Turner Hall.

To graduate from the Computer Science and Crop Sciences curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

<table>

Computer Science + Geography & Geographic Information Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science & Geography & Geographic Information Science

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 66 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

</tr>
</tbody>
</table>

Any 200-level or higher Linguistics Course (with the exception of ESL and language courses)

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline.
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution.
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
4. An ability to function effectively on teams to accomplish a common goal.
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
11. An ability to apply design and development principles in the construction of software systems of varying complexity
12. An ability to apply knowledge of linguistics appropriate to the discipline
13. An ability to analyze a problem, and identify and define the computing as well as the linguistics requirements appropriate to its solution.
14. An ability to design, implement, and evaluate a computational linguistics-based system, process, component, or program to meet desired text processing needs.
15. An ability to analyze the local and global impact of computing, language, as well as language technologies on individuals, organizations, and society.
16. An ability to use current linguistics and computational techniques, skills, and tools necessary for computational linguistics practice.
17. An understanding of Linguistics and Computer Science sufficient to be able to apply computational processes to solve problems naturally arising in language.

Computer Science + Philosophy, BSLAS

A combined B.S.-M.S. Computer Science degree program is available. The admission and course requirements are described on the Computer Science website (https://cs.illinois.edu/academics/graduate/fifth-year-masters-programs/5-year-bs-ms-program/).
A Software Engineering Certificate (https://wiki.cites.illinois.edu/wiki/display/undergradProg/Degree+Requirements/#DegreeRequirements-softengcert) is also available to all students in the computer science curriculum interested in a career in software engineering. It provides the depth and breadth necessary for satisfying possible future software engineering accreditation requirements.

for the degree of Bachelor of Science in Computer Science

**Graduation Requirements**

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0

TGPA is required for CS and Math courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

</table>
Three of the CS courses must be chosen from a single focus area, from among the areas below:

### Software Foundations:
- **CS 422** Programming Language Design 3 or 4
- **CS 426** Compiler Construction 3 or 4
- **CS 427** Software Engineering I 3 or 4
- **CS 428** Software Engineering II 3 or 4
- **CS 429** Software Engineering II, ACP 3
- **CS 476** Program Verification 3 or 4
- **CS 477** Formal Software Development Methods 3 or 4
- **CS 492** Senior Project I 3
- **CS 498** Special Topics (Art and Science of Web Programming; Logic; Applied Cryptography; Software Testing) 1 to 4
- **CS 522** Programming Language Semantics 4
- **CS 524** Concurrent Programming Languages 4
- **CS 526** Advanced Compiler Construction 4
- **CS 527** Topics in Software Engineering 4
- **CS 528** Object-Oriented Programming & Design 4
- **CS 576** Topics in Automated Deduction 2 to 4
- **CS 598** Special Topics (Verification, Languages) 2 to 4

### Algorithms and Models of Computation:
- **CS 413** Intro to Combinatorics 3 or 4
- **CS 473** Algorithms 4
- **CS 475** Formal Models of Computation 3 or 4
- **CS 476** Program Verification 3 or 4
- **CS 477** Formal Software Development Methods 3 or 4
- **CS 481** Advanced Topics in Stochastic Processes & Applications 3 or 4
- **CS 482** Simulation 3 or 4
- **CS 498** Special Topics (Logic; Parallel Algorithms; Computational Geometry) 1 to 4
- **CS 571** Combinatorial Mathematics 4
- **CS 572** Extremal Graph Theory 4
- **CS 573** Algorithms 4
- **CS 574** Randomized Algorithms 4
- **CS 575** Methods of Combinatorics 4
- **CS 576** Topics in Automated Deduction 2 to 4
- **CS 579** Computational Complexity 4
- **CS 583** Approximation Algorithms 4
- **CS 584** Embedded System Verification 4
- **CS 598** Special Topics (Crypto) 2 to 4

### Intelligence and Big Data:
- **CS 410** Text Information Systems 3 or 4
- **CS 411** Database Systems 3 or 4
- **CS 412** Introduction to Data Mining 3 or 4
- **CS 414** Multimedia Systems 3 or 4
- **CS 440** Artificial Intelligence 3 or 4
- **CS 445** Computational Photography 3 or 4
- **CS 450** Introduction to Robotics 4
- **CS 446** Machine Learning 3 or 4
- **CS 447** Natural Language Processing 3 or 4
- **CS 466** Introduction to Bioinformatics 3 or 4
- **CS 467** Social Visualization 3 or 4
- **CS 498** Special Topics (Data Visualization; Deep Learning; Applied Machine Learning; Social and Info Networks; Theory II (until Fall 2017); AI for Computer Games (until Fall 2017); Cyber Dystopia; Data Science & Analytics (Spring 2018 and after)) 1 to 4
- **CS 510** Advanced Information Retrieval 4
- **CS 511** Advanced Data Management 4
- **CS 512** Data Mining Principles 4
- **CS 543** Computer Vision 4
- **CS 544** Optimiz in Computer Vision 4
- **CS 546** Machine Learning in NLP 4
- **CS 548** Models of Cognitive Processes 4
- **CS 576** Topics in Automated Deduction 2 to 4
- **CS 598** Special Topics (Machine Learning and Signal Processing) 2 to 4

### Human and Social Impact:
- **CS 460** Security Laboratory 3 or 4
- **CS 461** Computer Security I 4
- **CS 463** Computer Security II 3 or 4
- **CS 465** User Interface Design 3 or 4
- **CS 467** Social Visualization 3 or 4
- **CS 468** Tech and Advertising Campaigns 3
- **CS 498** Special Topics (Art and Science of Web Prog; Computational Advertising; Data Visualization; Applied Machine Learning; HCI; Social and Information Networks; Virtual Reality; Cyber Dystopia; Cyber Physical Systems; Data Science & Analytics (Spring 2018 and after); Smart Cities; Learning and Computer Science; Intro to Online Learning Sys; Mobile Interactive Design) 1 to 4
- **CS 563** Advanced Computer Security 4
- **CS 565** Human-Computer Interaction 4
- **CS 566** Social Software Engineering 4

### Media:
- **CS 414** Multimedia Systems 3 or 4
- **CS 418** Interactive Computer Graphics 3 or 4
- **CS 419** Production Computer Graphics 3 or 4
- **CS 445** Computational Photography 3 or 4
- **CS 465** User Interface Design 3 or 4

Information listed in this catalog is current as of 10/2020
Information listed in this catalog is current as of 10/2020

CS 467 Social Visualization 3 or 4
CS 468 Tech and Advertising Campaigns 3
CS 498 Special Topics (Art and Science of Web Prog; Computational Advertising; Virtual Reality; Data Visualization; Audio Computing Lab) 1 to 4
CS 519 Scientific Visualization 4
CS 565 Human-Computer Interaction 4
CS 598 Special Topics (Machine Learning and Signal Proc.) 2 to 4

Scientific, Parallel, and High Performance Computing:
CS 419 Production Computer Graphics 3 or 4
CS 450 Numerical Analysis 3 or 4
CS 457 Numerical Methods II 3
CS 466 Introduction to Bioinformatics 3 or 4
CS 482 Simulation 3 or 4
CS 483 Applied Parallel Programming 4
CS 484 Parallel Programming 3 or 4
CS 498 Special Topics (Parallel Algorithms) 1 to 4
CS 519 Scientific Visualization 4
CS 554 Parallel Numerical Algorithms 4
CS 555 Numerical Methods for PDEs 4
CS 556 Iterative & Multigrid Methods 4
CS 558 Topics in Numerical Analysis 4

Distributed Systems, Networking, and Security:
CS 423 Operating Systems Design 3 or 4
CS 424 Real-Time Systems 3 or 4
CS 425 Distributed Systems 3 or 4
CS 431 Embedded Systems 3 or 4
CS 436 Computer Networking Laboratory 3 or 4
CS 438 Communication Networks 3 or 4
CS 439 Wireless Networks 3 or 4
CS 460 Security Laboratory 3 or 4
CS 461 Computer Security I 4
CS 463 Computer Security II 3 or 4
CS 483 Applied Parallel Programming 4
CS 484 Parallel Programming 3 or 4
CS 498 Special Topics (Wireless Network Labs; Digital Forensics; Digital Forensics II; Applied Cryptography; Cyber Physical Systems; Internet of Things (Spring 2019 and after); Smart Cities) 1 to 4

CS 523 Advanced Operating Systems 4
CS 524 Concurrent Progmr Languages 4
CS 525 Advanced Distributed Systems 4
CS 538 Advanced Computer Networks 4
CS 563 Advanced Computer Security 4

Machines:
CS 423 Operating Systems Design 3 or 4
CS 424 Real-Time Systems 3 or 4
CS 426 Compiler Construction 3 or 4
CS 431 Embedded Systems 3 or 4
CS 433 Computer System Organization 3 or 4
CS 484 Parallel Programming 3 or 4
CS 498 Special Topics (Internet of Things (Spring 2019 and after); Digital Forensics; Digital Forensics II) 3 or 4
CS 523 Advanced Operating Systems 4
CS 526 Advanced Compiler Construction 4
CS 533 Parallel Computer Architecture 4
CS 536 Fault-Tolerant Dig Syst Design 4
CS 541 Computer Systems Analysis 4
CS 584 Embedded System Verification 4
CS 598 Special Topics (Parallel) 2 to 4

Students must take at least two courses comprising at least 6 hours of 400-level coursework in ANY area offered at the University (including independent study - CS 397 may also be used to count towards these two additional advanced courses). These might be CS courses but don't have to be. Courses must be taken for a letter grade (CS 491 and other seminar courses do not count). It is expected that students will select these additional advanced courses in a way that best augments their program of study. Consultation with faculty mentor is highly encouraged.

Total Hours 6

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. 4

Total Hours of Curriculum to Graduate 128

1 External transfer students take ENG 300 instead.
2 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3 The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
4 The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

for the degree of Bachelor of Science in Computer Science

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite
sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cs-map/).

**Semester Hours**: 16

**Total Hours**: 128

1. This optional course is highly recommended for freshmen, who may use it to help meet free elective requirements.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Students can choose from departmentally approved science elective (https://cs.illinois.edu/academics/undergraduate/degree-program-options/bs-computer-science-engineering/science-electives-cs/) for 3 credit hours.
4. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
5. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
6. To be chosen from a departmentally approved list (https://cs.illinois.edu/academics/undergraduate/degree-program-options/bs-computer-science-engineering/#technical-electives), and to include at least three courses from a single focus area.

### Learning Outcomes: Computer Science, BS

**Learning Outcomes for the degree of Bachelor of Science Major in Computer Science**

By the time of graduation, students will have the ability to:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Crafts, BFA

for the Bachelor of Fine Arts Major in Crafts

No longer accepting students: Fall 2020

department website: https://art.illinois.edu
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/
Students pursuing this major select a concentration:
Metals Concentration (p. 144)

The curriculum in Crafts consists of a concentration in Metals. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

The curriculum in Crafts consists of a concentration in Metal. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Metals Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Crafts: Metal Concentration

1. the ability to conceive of, design, problem solve, execute, analyze, and critique utilitarian and non-utilitarian objects;
2. the ability to employ and demonstrate technical competency in the making of jewelry, hollowware, and objects using traditional and new approaches in a wide variety of materials;
3. the ability to demonstrate a knowledge of historical and contemporary metalwork practice;
4. the ability to recognize and use jewelry design and metalworking terminology;
5. the ability to apply the elements and principles of two and three-dimensional design to the making of jewelry, hollowware, objects;
6. the ability to create original utilitarian and non-utilitarian objects;
7. the ability to apply critical thinking when analyzing objects;
8. the ability to demonstrate a higher level of perceptual awareness;
9. the ability to demonstrate confidence in and strategies toward individual creativity;
10. the ability to demonstrate a knowledge of safe and effective lab processes.

Creative Writing, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Creative Writing

**Undergraduate Degree Programs in English Majors:**

English, BALAS (p. 175) with concentrations:
- English, English Concentration, BALAS (p. 176)
- English, English Teaching Concentration, BALAS (p. 177)
- English, Topics in English Concentration, BALAS (p. 178)

Creative Writing, BALAS (p. 145)

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Creative Writing

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required core and supporting course work normally equates to 36 hours.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus, of which at least three hours must be Creative Writing Courses (CW 404 or CW 406).

All Creative Writing courses must be taken in sequence (CW 104 before CW 204, etc.).

Minimum hours required for graduation: 120 hours

**Literature Foundational Coursework**

- CW 100 Intro to Creative Writing 3
- CW 200 Reading for Writers 3

**Expository Writing (Advanced Composition)**

- CW 243 The Craft Essay: Creative Reading, Reflection, and Revision 3

**Creative Writing Coursework**

Students complete 12 hours of creative writing coursework, including at least one of the following 3-course (9-hour) sequences:

- CW 106 & CW 206 and Poetry Workshop II
- CW 406 and Poetry Workshop III

or

- CW 104 & CW 204 and Fiction Workshop II
- CW 404 and Fiction Workshop III

The remaining three hours of writing coursework can be satisfied by a fourth CW workshop outside of the mandatory sequence or any of the following writing courses: ENGL 401, 402, 403, and 481; BTW 250, 261, and 271; CMN 310, 423, and 432; JOUR 475; and THEA 211

**ENGL 418 Shakespeare**

or ENGL 21 Introduction to Shakespeare

3

**Literature Coursework:**

6 hours of English or American literature coursework chosen from approved list.

**Supporting coursework**

History and Culture Coursework: Choose one of the following pairs:
Learning Outcomes: Creative Writing, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Creative Writing

1. **Concepts:** Students will identify, analyze, and use the elements of literary craft appropriate for their chosen writing genre.
2. **Writing:** Students will develop a personal style, apply craft techniques that they learn during workshops, and choose from several strategies to revise written work.
3. **Workshop:** Students will identify and learn to use the most effective worship practices. They will learn how to critique the written work of their peers, both orally and in writing, in constructive and mutually beneficial ways.
4. **Reading:** Students will read, analyze, and evaluate contemporary and other literature from the perspective of literary craft and the study of creative writing.
5. **Literary Community and Profession:** Students will learn to evaluate, discuss, and research contemporary literary publishing and editing.

Learning Outcomes: Crop Sciences, BS

Learning Outcomes for the degree of Bachelor of Science Major in Crop Sciences

Students graduating with the B.S. in Crop Sciences should be able to:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

Crops Sciences, BS

for the degree of Bachelor of Science Major in Crop Sciences

**department website:** https://cropsciences.illinois.edu/
**department faculty:** https://cropsciences.illinois.edu/people/faculty (https://cropsciences.illinois.edu/people/faculty)/
**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
**college website:** https://aces.illinois.edu/

Students pursuing this major select one of these concentrations:

- Agroecology Concentration (p. 146)
- Biological Sciences Concentration (p. 147)
- Crop Agribusiness Concentration (p. 148)
- Crops Concentration (p. 149)
- Horticultural Food Systems Concentration (p. 151)
- Plant Biotechnology and Molecular Biology Concentration (p. 152)
- Plant Protection Concentration (p. 153)

Crop Sciences: Agroecology, BS

for the degree of Bachelor of Science Major in Crop Sciences, Agroecology Concentration

**department website:** https://cropsciences.illinois.edu/
**department faculty:** https://cropsciences.illinois.edu/people/faculty (https://cropsciences.illinois.edu/people/faculty)/
**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
**college website:** https://aces.illinois.edu/

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the
student's faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

1 ACE 100 or ECON 102 are not required for the Biological Sciences Concentration.

**Crop Sciences: Crop Agribusiness, BS**

for the degree of Bachelor of Science Major in Crop Sciences, Crop Agribusiness Concentration

**department website:** https://cropsciences.illinois.edu/
**department faculty:** https://cropsciences.illinois.edu/people/faculty (https://cropsciences.illinois.edu/people/faculty/)
**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
**college website:** https://aces.illinois.edu/

Information listed in this catalog is current as of 10/2020
The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

- NRES 474 Soil and Water Conservation
- NRES 488 Soil Fertility and Fertilizers

Select one course from each of the following groups: 6-7

- ACE 222 Agricultural Marketing
- or ACE 449 Commodity Futures and Options
- ACE 231 Food and Agribusiness Mgmt
- or ACE 232 Farm Management

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.

**Crop Sciences: Crops, BS**

For the degree of Bachelor of Science Major in Crop Sciences, Crops Concentration

Information listed in this catalog is current as of 10/2020
The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants—how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

Crop Sciences: Horticultural Food Systems, BS

for the degree of Bachelor of Science Major in Crop Science, Horticultural Food Systems Concentration

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

Select 7 or 8 hours from the following specialized courses: 7-8

Select 15 hours from the following focus area electives: 15
The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

### Crop Sciences: Plant Protection, BS

For the degree of Bachelor of Science Major in Crop Sciences, Plant Protection Concentration

- **Department website:** [https://cropsciences.illinois.edu/](https://cropsciences.illinois.edu/)
- **Department faculty:** [https://cropsciences.illinois.edu/people/faculty](https://cropsciences.illinois.edu/people/faculty/)
- **Overview of college admissions & requirements:** [Agricultural, Consumer & Environmental Sciences](http://catalog.illinois.edu/schools/aces/academic-units/#text)
- **College website:** [https://aces.illinois.edu/](https://aces.illinois.edu/)

The plant protection concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

Dance, BA

for the degree of Bachelor of Arts Major in Dance

department website: http://dance.illinois.edu/
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/
email: dance@illinois.edu

The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study three core areas in Dance: Technique, Creative Process, and Dance Academics. Students will identify at least one other key area of interest such as Theater, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Major, Minor or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will create a BA Capstone Project in their senior year as a synthesis of the studies within dance and another area of study.

Students pursuing a Dance degree at the University of Illinois must be admitted to the BFA in Dance (audition required). Once admitted, those desiring a broader education may choose to apply for admittance into the BA in Dance, rather than continuing in the BFA.

Information listed in this catalog is current as of 10/2020
Hours in non-Dance classes, chosen in consultation with an advisor

Open electives as needed to total 120 hours minimum

---

1. DANC 160 and 260 must be taken for at least 4 hours each but are repeatable beyond 4 hours.
2. Students will enroll in one credit hour of DANC 497, BA Capstone Project in fall of their senior year and two credit hours of DANC 497 in spring of their senior year for a total of three credit hours.

### Learning Outcomes: Dance, BA

Learning outcomes for the degree of Bachelor of Arts Major in Dance

Upon graduation the BA student will be able to:

1. Dance with physical, technical and performance skills.
2. Utilize knowledge of anatomical and somatic approaches in theory and practice.
3. Engage in creative processes and collaborate across domains.
4. Produce a capstone project that reflects synthesis of studies in dance and other fields.
5. Employ diverse modes of thinking, both orally and in writing, to communicate ideas relating to dance and other fields.

### Dance, BFA

#### for the degree of Bachelor of Fine Arts Major in Dance

**department website:** [http://dance.illinois.edu/](http://dance.illinois.edu/)

**overview of college admissions & requirements:** Fine & Applied Arts (http://catalog.illinois.edu/faa/)

**college website:** [https://faa.illinois.edu/](https://faa.illinois.edu/)

**email:** dance@illinois.edu

The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screendance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required. Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all
professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

- DANC340| Dancing Black Popular Culture    | 1     |

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Dance, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Dance

Upon graduation the BFA student will be able to:

1. Dance with substantial physicality, exhibiting technical and performance skill, musicality, and creativity.
2. Utilize knowledge of anatomical and somatic approaches in theory and practice.
3. Locate a creative process, conduct choreographic inquiries, and produce a well-conceived dance work for a performance event.
4. Teach a well-structured movement class with an understanding of pedagogical principles.
5. Employ diverse modes of thinking, both verbally and in writing, to communicate ideas relating to dance.
6. Understand basic technology and its application to dance making, teaching, research, and public relations.

Early Childhood Education, BS

for the degree of Bachelor of Science Major in Early Childhood Education

DANC 441  Dance History Seminar
Six hours of Music for Dance courses:
DANC 258  Music Theory for Dancers  3
Select one of the following (all meet a general education requirement):
MUS 130  Music Then and Now
MUS 132  Popular Music Studies
MUS 133  Introduction to World Music
Four hours of Dance Sciences courses:
DANC 245  Introduction to Somatics  1
DANC 345  Dance Anatomy and Kinesiology  3
Choose 3 hours from the following Dance Education courses:
DANC 350  Creative Dance for Children
DANC 450  Teaching Workshop
Current issues and topics
DANC 495  Senior Career Seminar  1
Senior Capstone Project
DANC 498  Senior Thesis Production  1 or 2
DANC 499  Senior Thesis Project  1 to 2
Professional Electives  2  6-9
Focused Electives, chosen in consultation with an advisor.
Additional courses in dance such as technique, choreography, performance, "non-categorized" courses in dance, coursework in Music, Theater, or Art.
Electives as needed to reach a minimum of 130 hours  130

---

Curriculum Preparatory to Early Childhood School Teaching

This program prepares student candidates to teach birth to grade 2. A minimum of 120 semester hours of credit is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This is a Gateways to Opportunity (http://www.ilgateways.com/en/) approved program.

1. Required to meet ISBE Science requirement. Exclusions apply including, but not limited to: Horticulture, Dance, and Urban Planning. Must be a science rubric. Consult with advisors for further information.

2. Courses must be selected from a College of Education approved list (http://education.illinois.edu/docs/default-source/saao-documents/ece-earth_space-recommended.pdf?sfvrsn=0).

3. Across these gen ed categories, students will need to take at least one course from each of the following four different rubrics: ECON, GEOG, HIST, PS to meet the ISBE Science requirement.

4. A maximum of six hours of upper-level ROTC coursework can count toward the degree as free electives.

5. PSYC 100 is a prerequisite for EPSY 201.

6. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement.

---

### Learning Outcomes: Early Childhood Education, BS

Learning Outcomes for the degree of Bachelor of Science Major in Early Childhood Education

1. Students will acquire deep knowledge of child development as it relates to the field of Education.

2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction children from infancy to age eight.
3. Students will use assessment data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices)

Earth, Society, & Environmental Sustainability, BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability

school website: https://www.earth.illinois.edu/
school faculty: Earth, Society & Environment Faculty (https://earth.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/elas/academic-units/)
college website: https://las.illinois.edu/
E-mail: sese-info@illinois.edu

Students select one concentration in consultation with an academic advisor:

• Science of the Earth System (SES) Concentration (p. 159)
• Society and the Environment (SAE) Concentration (p. 160)

On-campus UIUC students can transfer to this degree without any special requirements.

Off-campus students who plan to transfer to this degree should have completed, or have in progress, the following:

• the Composition 1 requirement.
• the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at UIUC or elsewhere) and should consult the program advisor:

• the UIUC LAS language requirement should be satisfied.
• the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
• the Cognate Coursework should be completed.

Earth, Society, & Environmental Sustainability: Science of the Earth System (SES), BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Science of the Earth System Concentration

department website: https://www.earth.illinois.edu/
department faculty: Earth, Society & Environment Faculty (https://earth.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/elas/academic-units/)
college website: https://las.illinois.edu/
E-mail: sese-info@illinois.edu

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Science of the Earth System Concentration

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Distinction: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

High Distinction: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

Highest Distinction: A minimum cumulative grade point average of 3.7, and also completed an approved independent study project, or approved research capstone.

ESE Core Requirements:

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 48-58 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. Substitutions may be made with advisor approval.

Minimum hours required for graduation: 120 hours.

ESE coursework

GEOG 379 Intro to GIS Systems

ESE 200 Earth Systems

Advanced Courses

A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the “ESE Introductory Core” requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400-level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.

Learning Outcomes: Earth, Society, & Environmental Sustainability, BSLAS

Learning Outcomes for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability

1. Be able to recognize, critique and implement commonly accepted Sustainability models and ideas in a wide variety of settings, using systems thinking to link social and natural science concepts.
2. Have a fundamental understanding of the underlying natural science (SES concentration) or social science (SAE concentration) concepts; being able to recognize and apply appropriate scientific methods (SES concentration) and social science methods (SAE concentration).
3. Use quantitative methods to describe, understand and evaluate theoretical and applied issues in environmental and sustainability study; this includes direct calculation, working with data, and using quantitative models.
4. Be able to critically evaluate and then communicate environmental and sustainability concepts to both specialized and wide audiences.
5. Prepare students for professional work in environmental and sustainability practice, such as laboratory and field techniques, apprehending and implementing Geographic Information Sciences (including the use of appropriate software), and quantitative and qualitative methods.

East Asian Languages & Cultures, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences: Major in East Asian Languages & Cultures

department website: https://ealc.illinois.edu/
department faculty: East Asian Languages & Cultures Faculty (https://ealc.illinois.edu/directory/faculty-by-area/
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://www.las.illinois.edu/

Students pursuing this major may also choose a concentration: Teaching of East Asian Languages (http://catalog.illinois.edu/undergraduate/las/east-asian-languages-cultures-balas/teaching-east-asian-languages/)
for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in East Asian Languages & Cultures

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: normally equates to 33-57 hours. Twelve hours of 300- or 400-level courses in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours.

Society and the Environment Concentration Requirements:

<td></td>
</tr>
</tbody>
</table>

1 Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.
2 No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.
3 Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.

Learning Outcomes: East Asian Languages & Cultures, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences: Major in East Asian Languages & Cultures

1. Linguistic Competence and Cultural Understanding: EALC students will effectively deal with the routine tasks and social situations and...
express personal meaning in the language of a target country in a linguistically and culturally appropriate manner.

2. **Intellectual Reasoning and Knowledge**: EALC students will demonstrate broad and deep knowledge of East Asian cultures through coursework in more than one discipline.

3. **Creative Inquiry and Discovery**: EALC students will develop a critical and reflective orientation toward social, cultural, and linguistic differences and apply the knowledge to promote inquiry, discover solutions, and generate new ideas and creative works in the form of research.

Additional mathematics courses are recommended

Supporting course work: 18 hours of courses outside economics but related to the student's major interest in economics (see www.economics.illinois.edu/programs/undergrad (http://www.economics.illinois.edu/programs/undergrad/) for details).

For further information, please visit the Economics undergraduate program page (http://www.economics.illinois.edu/undergrad/info/).

**Learning Outcomes: Economics, BALAS**

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Economics

1. **Analytical Skills/Problem-Solving:** ECON students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer, with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.

2. **Critical Thinking:** ECON students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

3. **Quantitative Reasoning:** ECON students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using appropriate statistical techniques, and interpret the results of such analyses.

4. **Specialized Knowledge and Practical Application:** ECON students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real world situations.

5. **Interdisciplinary Knowledge, Diverse Issues, and Global Consciousness:** ECON students will broaden their global and disciplinary knowledge, enhancing their understanding of the world around them both within economics and beyond.

**Electrical Engineering, BS**

For the Degree of Bachelor of Science in Electrical Engineering

- **department website:** https://ece.illinois.edu
- **department faculty:** Electrical & Computer Engineering Faculty (https://ece.illinois.edu/directory/faculty.asp)
- For **overview of college admissions & requirements:** The Grainger College of Engineering (https://grahing.illinois.edu/admissions/) (department website: https://ece.illinois.edu)

Electrical engineering is a multifaceted discipline that over the last century has produced an astounding progression of technological innovations that have shaped virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing, communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all of the important areas of modern electrical engineering.

For the Degree of Bachelor of Science in Electrical Engineering

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation and is organized as shown below.

**Graduation Requirements**

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0

TSGPA is required for ECE courses (except ECE 316). See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

---

Information listed in this catalog is current as of 10/2020
**Minimum Overall GPA:** 2.0  
**Minimum hours required for graduation:** 128 hours  
**General education:** Students must complete the Campus General Education [link](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

**For the Degree of Bachelor of Science in Electrical Engineering**

**Suggested Sequence**

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainer.illinois.edu/academics/undergraduate/majors-and-minors/ee-map/).

**Semester Hours** 15

Information listed in this catalog is current as of 10/2020

---

1. *External transfer students take ENG 300 instead.*
2. *MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.*
3. *Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour.*
4. *STAT 410 may be substituted.*
5. *ECE 496 AND ECE 499 may be substituted.*
6. *Advanced Composition may be satisfied by completing ECE 445, or a course in either the general education or free elective categories which has the Advanced Composition designation.*
7. The Grainger College of Engineering approved liberal education course list can be found here ([https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives)). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
8. The Grainger College of Engineering restrictions to free electives can be found here ([https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives)).

**Semester Hours** 15

**Total Hours** 128

---

1. Freshmen take ECE 110 for 3 credit hours. Lab only version of ECE 110 taken by transfer students (with special permission) is 1 credit hour.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/](http://catalog.illinois.edu/general-information/degree-general-education-requirements/)
4. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
5. A minimum of 32 hours chosen from the departmentally approved list of Technical Electives ([https://ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06/](https://ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06/)). Of these, at least three courses are to be chosen from the ECE advanced core electives and three courses from the list of ECE laboratory electives; 20 hours must be ECE course work, six hours non-ECE course work, and the remaining hours may be chosen from the entire List.
6. STAT 410 may be substituted
7. Advanced Composition. May be satisfied by completing ECE 445 or ECE 496 AND ECE 499 or a course within either the liberal education or free elective categories which has the Advanced Composition designation.
This program prepares teachers for grades one through six. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

</table>

TOTAL minimum hours include general education and professional education credits.

1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2. Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.
3. Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.
4. ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.
5. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.
6. PYSC 100 is a prerequisite for EPSY 201.
7. Students will register for EDPR 250 during their spring term of the year one professional education sequence year for zero credit hours and register for EDPR 250 again their fall term of the year two professional education sequence for four credit hours.
Learning Outcomes: Elementary Education, BS

Learning Outcomes for the degree of Bachelor of Science Major in Elementary Education

1. Students will acquire deep knowledge of content in the field of Education
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction for elementary students, grades 1-6.
3. Students will use data to drive decisions and solve problems in and out of the classroom
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices)

Engineering Mechanics, BS

for the degree of Bachelor of Science in Engineering Mechanics

department website: http://mechse.illinois.edu/
department faculty: Mechanical Science & Engineering Faculty (https://mechse.illinois.edu/people/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Engineering mechanics is a discipline devoted to the solution of engineering and mechanics problems through integrated application of mathematical, scientific, and engineering principles. Special emphasis is placed on the physical principles underlying modern engineering design.

In this program (accredited by the Engineering Accreditation Commission of ABET, www.abet.org), students in engineering mechanics develop a strong foundation in mathematics, physics, and chemistry. The program derives its strength from a rigorous curriculum composed of statics, dynamics, solid mechanics, fluid mechanics, and mechanics of materials courses. These topics form the basis of all engineering disciplines and have wide applicability in modern engineering. Special emphasis is placed on advanced dynamics, continuum mechanics, and the rapidly emerging field of computational mechanics. Laboratory experiments in fluid mechanics and mechanics of materials complement an integrated design sequence, which starts freshman year. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout the entire curriculum. Students also have the opportunity for independent, creative work in a one-on-one or small group environment under the supervision of a faculty member.

Students in engineering mechanics also benefit from a built-in area of specialization in one of seven secondary fields within mechanics. The seven pre-approved secondary fields are:

- Biomechanics
- Computational Mechanics
- Engineering Science and Applied Mathematics
- Experimental Mechanics
- Fluid Mechanics
- Mechanics of Materials
- Solid Mechanics

Alternatively, students may fashion their own area of specialization with departmental approval. At the end of the curriculum, students take the capstone senior design course where the knowledge and skills they have learned are applied to projects submitted to the department by corporate or faculty sponsors, preparing Engineering Mechanics students for their next leap into industry or graduate school.

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for required Engineering courses and any technical elective courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

### Secondary Field Option Electives

Secondary field electives selected from departmentally approved courses for Secondary Field Options. Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for each are listed below. To add flexibility to the program and to accommodate particular interests, the student may fashion an individualized secondary field option. The only requirements are that the courses be related to mechanics, form a coherent and cohesive group, include at least two engineering courses, and total at least 12 hours of advanced-level coursework that are distinct from required courses in the Engineering Mechanics curriculum. This can include 500-level courses, if the student has the adequate preparation, for any of the secondary field elective courses. Each student must formally declare their choice of secondary field with a Mechanical Science and Engineering Undergraduate Programs Office advisor using a Secondary Field Options form.

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

² RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). ME 170 is taken in the second semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/underWrittenCommunicationRequirement](http://catalog.illinois.edu/general-information/degree-general-education-requirements/underWrittenCommunicationRequirement).

³ Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

⁴ Selected from departmentally approved list of Secondary Field Electives [http://mechanical.illinois.edu/undergraduate/bs-engineering-mechanics/#EMSecondaryFields](http://mechanical.illinois.edu/undergraduate/bs-engineering-mechanics/#EMSecondaryFields).

---

**Learning Outcomes: Engineering Mechanics, BS**

Learning Outcomes for the degree of Bachelor of Science Major in Engineering Mechanics

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Engineering Mechanics graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**English, BALAS**

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English

---

*Information listed in this catalog is current as of 10/2020*
English: English Concentration, BALAS

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, English Concentration

Minimum required major and supporting coursework equates to 39 hours of English department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours), and 6 of these hours must come from two different period areas.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

Minimum hours required for graduation: 120 hours.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in graduating with distinction or high distinction are encouraged to consult the English department advising office.

</tr>
</tbody>
</table>

3 hours: At least one course in Nineteenth-Century Literature & Culture

3 hours: At least one course in Twentieth-Century Literature & Culture

3 hours: At least one course in Contemporary Literature & Culture

Elective Coursework

At least three courses chosen from those controlled by or cross-listed with the Department of English (Business and Technical Writing, Creative Writing, and English)
One course in Difference and Diaspora. This requirement can be fulfilled by taking an appropriately focused course from among ENGL 350: Writing about Literature, Text, and Culture; the historical surveys; the period courses; or the elective coursework.

1. Chosen from the list maintained in the Department of English. Note: ENGL 350 can serve as a period course, a cluster course, an elective course, and/or a Difference and Diaspora course only when it is not also being used to fulfill a core requirement. Students who wish to use ENGL 350 in this way must thus take the course a second time (and with a different topic than the first time).

2. Student may count one Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

Undergraduate Degree Programs in English

Majors:

English, BALAS (p. 175) with concentrations:
- English, English Concentration, BALAS (p. 176)
- English, English Teaching Concentration, BALAS (p. 177)
- English, Topics in English Concentration, BALAS (p. 178)
- Creative Writing, BALAS (p. 145)

for the degree of Bachelors of Arts in Liberal Arts & Sciences: Major in English, English Teaching Concentration

This concentration fulfills state certification requirements to teach high school (grades 9-12) English Language Arts through the AP/honors level.

Minimum required concentration and supporting coursework normally equates to 78 hours: 39 hours of English department courses and 39 hours of courses from the Teacher Education Minor in Secondary School Teaching. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Time to degree completion varies. Minimum time to completion is eight semesters, with some students requiring ten semesters. Transfer students may need ten total semesters combined to complete the program. Please see the LAS Transfer Handbook for more information.

To remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Prerequisites to transfer to the English Teaching concentration: Students must complete ENGL 200, the two required historical surveys, and ENGL 301 (Intro to Critical Theory). In addition, it is strongly recommended that students complete five additional ENGL courses (chosen in consultation with an English advisor) appropriate to the English Teaching Concentration.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

One course in Difference and Diaspora. This requirement can be fulfilled by taking an appropriately focused course from among ENGL 350: Writing about Literature, Text, and Culture; the cluster courses; or the elective coursework.¹

Total Hours  39

¹ Chosen from the list maintained in the Department of English. Note: ENGL 350 can serve as a period course, a cluster course, an elective course, and/or a Difference and Diaspora course only when it is not also being used to fulfill a core requirement. Students who wish to use ENGL 350 in this way must thus take the course a second time (and with a different topic than the first time).

² Students may count one Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

Learning Outcomes: English, BALAS

Learning Outcomes for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English

1. Capacity to understand, analyze, and interpret ‘texts’, broadly construed, through a variety of methods including close reading.
2. Capacity to understand literature and literary history in relation to historical, theoretical, aesthetic, and political contexts.
3. Ability to craft rigorous and well-supported arguments that demonstrate an awareness of audience (skills associated with the research paper).
4. Literacy, including clarity of written expression and the capacity to evaluate external sources.
5. Awareness of the ways in which forms of difference, including racial, ethnic, gender, and sexual difference, inform the production and reception of literature.

**Finance, BS**

*for the degree of Bachelor of Science Major in Finance*

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate. In addition to the finance major requirements, students in finance must meet the University General Education requirements and the Gies College of Business core requirements (for more detail, see the Gies College of Business undergraduate section [http://catalog.illinois.edu/undergraduate/business/]).

*for the degree of Bachelor of Science Major in Finance*

**Advising Notes**

- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

**Core Curriculum**

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accounting courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

**Minimum hours required for graduation: 120 hours.**

Learning Outcomes: Finance, BS

Learning Outcomes for the degree of Bachelor of Science Major in Finance

1. Discipline-based competency: Students will acquire sufficient discipline based competency to address current and future corporate and investment finance problems. Such competency includes using finance knowledge and tools necessary to value real and financial assets, analyze a company's financial performance, and identify risk factors underlying such valuations or analysis.
2. Written and verbal communication competency: Students will be able to effectively integrate information into a coherent, well-organized, professional report.
3. Proficiency in the tools of the trade: Students should be able to demonstrate proficiency in the tools of the trade. First and foremost is Excel, but proficiency in Bloomberg, Morningstar, Capital IQ and the other tools of our trade.
4. Professional practice and ethics: Students should be familiar with professional practice and demonstrate consistent ethical behavior.

Food Science & Human Nutrition, BS

for the degree of Bachelor of Science Major in Food Science & Human Nutrition

department website: https://fshn.illinois.edu
department faculty: https://fshn.illinois.edu/directory/faculty/overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Learning Outcomes

Students pursuing this major select one of four concentrations:
- Food Science Concentration (p. 183)
- Dietetics Concentration (p. 181)
- Human Nutrition Concentration (p. 185)
- Hospitality Management Concentration (p. 184)
Food Science & Human Nutrition: Dietetics, BS

for Bachelor of Science: Major in Food Science & Human Nutrition, Dietetics concentration

**department website:** https://fshn.illinois.edu
**department faculty:** https://fshn.illinois.edu/directory/faculty/
**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#academicunitstext)
**college website:** https://aces.illinois.edu/

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this internship, students selecting this concentration may take the required postgraduate coursework at or above the third level to become Registered Dietitians. Students choosing this concentration who do not complete an internship will be prepared for entry-level supervisory positions in food service facilities and in the food and pharmaceutical industries.

1 Cannot be used to fulfill more than one requirement.

Learning Outcomes: Dietetics Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Dietetics Concentration

All graduates of the University of Illinois Didactic Program in Dietetics (DPD) will be able to:

KRDN 1.1 Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.

KRDN 1.2 Use current information technologies to locate and apply evidence-based guidelines and protocols.

KRDN 1.3 Apply critical thinking skills.

KRDN 1.4 Apply management theories to the development of programs or services.

KRDN 1.5 Describe safety principles related to food, personnel and consumers.

KRDN 1.6 Analyze data for assessment and evaluate data to be used in decision-making for continuous quality improvement.

Information listed in this catalog is current as of 10/2020
Food Science & Human Nutrition: Food Science, BS

for the degree of Bachelor of Science Major in Food Science & Human Nutrition, Food Science Concentration

The Food Science concentration exposes students to all components of food production: harvesting and raw-product handling, food-processing procedures and techniques, packaging, and food storage. Students selecting this concentration are prepared for careers in many areas of the food industry.

Advanced Composition

Select one course from campus approved list of Advanced Composition courses.

Cultural Studies

Select one course from Western culture, one from non-Western culture, and one from U.S. minority culture from campus approved lists.

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following:

- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I (This course does not count for students in the Food Science Concentration; choose from the other two options.)

Quantitative Reasoning II

Select one of the following:

- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Food Science Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Food Science Concentration

All graduates of the University of Illinois Food Science concentration will achieve the following:

1. Graduates are A) competent in core food science areas and B) can integrate and apply their knowledge to solve real-world problems and make decisions. Core Food Science Areas include: Food Chemistry and Analysis, Food Safety and Microbiology, Food Processing and Engineering, and Sensory Science. Associated Areas include: Nutrition and Health, Quality Assurance, Food Laws and Regulations.
2. Graduates possess strong critical thinking and problem solving skills.
3. Graduates are proficient communicators.
4. Graduates possess impactful professional and leadership skills.

Aspirational goals

Graduates of our Food Science program: 1) value diversity, 2) are confident in their abilities, 3) volunteer their services to their professional and societal communities, and 4) take professional and ethical responsibility for their actions.

Food Science & Human Nutrition: Hospitality Management, BS

for the degree of Bachelor of Science Major in Food Science & Human Nutrition, Hospitality Management Concentration

college website: https://aces.illinois.edu/

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. Through the integration of food-focused theory, practice, and experience, it is the mission of the program to prepare leaders in the hospitality industry with a foundation in science, business, and management.

### Learning Outcomes: Hospitality Management Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Hospitality Management Concentration

All graduates of the University of Illinois Hospitality Management concentration will be able to:

1. Professionally manage the preparation, presentation and service of quality food. Apply science concepts to the food and beverage component of the hospitality industry. Identify hotel/lodging management and allied hospitality industries’ concepts. (Industry Skills)
2. Integrate human, financial and physical resources management into hospitality related operations. Practice and evaluate elements of service management. (Management Skills)
3. Demonstrate ability to analyze, assess, evaluate, adapt and apply problem solving skills. (Problem Solving)
4. Demonstrate effective written and oral communication skills. (Communication)
5. Gain practical and professional experiences. Integrate and practice ethics, leadership, and collaboration. (Professional Experiences)

### Food Science & Human Nutrition: Human Nutrition, BS

for the degree of Bachelor of Science Major in Food Science & Human Nutrition, Human Nutrition Concentration
This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong nutrition concentration that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see Dietetics.

Learning Outcomes: Human Nutrition Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Human Nutrition Concentration

All graduates of the University of Illinois Human Nutrition concentration will be able to:

1. Demonstrate critical thinking, problem solving and communication skills.
2. Understand basic sciences relevant to nutrition, research and application of nutrition and an awareness of social and economic factors in food.
3. Prepare to pursue careers in the food, health, and fitness industries, or enter medicine, dentistry, nursing, and other health professions.

Foreign Language Teaching
Curricula Preparatory to Teach Foreign Languages

The College of Liberal Arts and Sciences offers curricula for the preparation of teachers of French (http://catalog.illinois.edu/undergraduate/las/academic-units/french-italian/curriculum-preparatory-teaching-french/), German (http://catalog.illinois.edu/undergraduate/las/academic-units/german/curriculum-preparatory-teaching-german/), Latin (http://catalog.illinois.edu/undergraduate/las/academic-units/classics/teach-latin/), and Spanish (http://catalog.illinois.edu/undergraduate/las/academic-units/spanish-portuguese/teaching-spanish-major/).

Illinois law requires all candidates for licensure in World Languages pass the appropriate language content-area test prior to student teaching, and an oral proficiency test in their content major language prior to licensure.

A student must have at least 2.5 (A+ = 4.0) cumulative and University of Illinois grade point averages to remain in the teaching option. A student must also maintain at least a 2.5 grade point average in all attempts at content area and pedagogy courses taken at the University of Illinois in order to remain in the teaching option.

E-mail: flte@illinois.edu

Prerequisite to application to the Teaching Option

GPA of 2.5 in all content courses in the intended majors of French, German, Latin, Spanish.

General Education Requirements: Students in the Foreign Language Teaching Curricula of French, German, Latin, and Spanish will be expected to complete the Campus General Education (https://courses.illinois.edu/) requirements (including the campus general education language requirement).

The BALAS in French allows students to specialize in one of the following concentrations:

- The French Studies concentration focuses on courses in language, literature, culture, film, and linguistics.
- The French Commercial Studies concentration combines a focus on French language and culture with appropriate courses in business.

Select a concentration in consultation with your adviser.

- French Commercial Studies Concentration (p. 189)
- French Studies Concentration (p. 189)

5 Year BALAS /MA in French and European Union Studies

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in French and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS–granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Literature Courses

Two courses at the 300- or 400-level in French and/or Francophone literature

Medieval and Early Modern Period course
Learning Outcomes: French, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Science Major in French

Upon graduating with a major in French, students shall be able to do the following:

1. Language proficiency and accuracy: reach an advanced level of proficiency and accuracy in reading, writing, listening, and speaking in interpretive, presentational, and interpersonal modes of communication (based on proficiency guidelines outlined by the American Council on the Teaching of Foreign Languages [ACTFL] and the Common European Framework of Reference for Languages [CEFR]).

2. Research skills and literacy in texts, media, and technology in French: access, manage, evaluate, select, and effectively use culturally authentic and relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content.

3. Intercultural awareness, knowledge, and competence: identify and analyze products, practices, and perspectives of the French and Francophone world, and compare them to their own and other cultures.

4. Knowledge about literature and the visual arts in French: acquire general and specific knowledge of literature in French and visual arts from a formal, historical, and global perspective.

Gender & Women's Studies, BALAS

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To be eligible for graduation with distinction, a student must have a cumulative grade-point average (GPA) of 3.5 and a 3.5 GPA within the major.

High distinction. To be eligible for graduation with high distinction, a student must have a cumulative grade-point average (GPA) of 3.5, a GPA of 3.7 within the major, and complete a thesis or project in a 400-level GWS course that is approved by the department.

Advising: The Department of Gender and Women's Studies provides advising for students to help plan a coherent program of study.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 33 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Additional Coursework

At least 15 additional hours of coursework offered by the Gender & Women's Studies Department, with no more than 3 hours at the 100 or 200 level. Required courses are offered by the Department of Gender & Women's Studies and are on an approved list maintained in the department office and with the GWS advisor.

Area Electives

Two courses in Gender and Women's Studies. No more than one may be counted from the 100 or 200 level. For a list of approved courses contact the GWS department or the GWS advisor.

Of the 33 hours in the major, students must take at least one course focused on transnational or non-U.S. issues. For a list of approved courses contact the GWS department or the GWS advisor.

Total Hours 33

1 Topics courses (GWS 199, GWS 295, GWS 395, GWS 495) may count up to 3 hours toward the additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

Learning Outcomes: Gender and Women's Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Gender and Women's Studies
1. Intellectual Reasoning and Knowledge: Students will acquire a level of proficiency in Gender and Women's Studies, which can include but is not limited to broad and deep knowledge about feminist movements, intersectionality, queer and trans studies, imperialism and coloniality, and feminist and queer theories and methods across academic disciplines and fields. Students will learn that feminisms are both historical movements as well as bodies of critical inquiry, encompassing a wide range of actors and objects of study, including forms of information retrieval and knowledge production.

2. Critical Inquiry and Creative literacy: Students will apply feminist and queer theories in developing their own capacities for critical inquiry and creative literacy. Students will also exercise their skills in oral and written communication, expressing new ideas in scholarly compositions and also generating multidisciplinary projects.

3. Social Awareness and Understanding Power: Students will recognize the gendered dimensions of social, philosophical, aesthetic, cultural, and political claims about national and global movements and events. Students will become familiar with feminist and queer theories and movements that consider together indigeneity, race, religion, nation, disability, gender, and sexuality to understand historical and contemporary formations of power.

4. Self-Reflexivity and Community Engagement: Students will demonstrate self-reflexivity about their ideas and social and political positions in their classrooms and communities, learning how to build and sustain relationships in striving for both immediate harm reduction and long-term social justice.

5. Global Consciousness: Students will understand how complex and interdependent forces—environmental, social, cultural, economic, and political—shape a range of possibilities and foreclosures for individuals and populations unevenly across the world, learning to apply indigenous, postcolonial, and transnational feminist and queer critiques to those forces.

Geography & Geographic Information Science

**department website:** https://www.geog.illinois.edu/
**department faculty:** Geography Faculty (https://www.geog.illinois.edu/people/)
**overview of college admissions & requirements:** LAS admissions information (https://www.las.illinois.edu/prospective/)
**college website:** https://las.illinois.edu/
**email:** g (geology@illinois.edu)geography@illinois.edu (geography@illinois.edu)

Students interested in majoring in Geography and Geographic Information Science may choose the Bachelor of Arts in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-blas/), or the Bachelor of Science in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/).

Students pursuing the Bachelor of Arts in Liberal Arts & Sciences select one of two concentrations:

General Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-blas/general-geography/)

Human Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-blas/human-geography/)

The Human Geography concentration allows students to specialize in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences. Employment opportunities for human geographers include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Students pursuing the Bachelor of Science in Liberal Arts & Sciences select one of two concentrations:

Geographic Information Science Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/geographic-information-science/)

The Geographic Information Science (GIS) concentration emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS concentration provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth’s systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

Physical Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/physical-geography/)

The Physical Geography concentration examines the earth sciences including patterns of climates, land-forms, vegetation, soils, and water. Graduates of our physical geography concentration will be equipped for careers in infrastructure development, land and water resources management, and surveying.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

Departmental distinction: Students majoring in Geography and Geographic Information Science can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- For distinction: 3.3 GPA overall; 3.3 GPA in GGIS courses.
- For high distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses.
- For highest distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses; satisfactorily complete an independent project (GEOG 391).

Students should consult their advisors regarding distinction requirements as soon as they enter the major (no later than the end of their junior year).
General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement. Minimum required major and supporting course work: A minimum of 35 credit hours of Geography and Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Undergraduate Degree Programs in Geography & Geographic Information Science

For the Degree of Bachelor of Science in Liberal Arts and Sciences
- Major in Computer Science & Geography & GIS, BSLAS (p. 136)
- Major in Geography & Geographic Information Science, Geographic Information Science Concentration, BSLAS (p. 193)
- Major in Geography & Geographic Information Science, Physical Geography Concentration, BSLAS (p. 195)

For the Degree of Bachelor of Arts in Liberal Arts and Sciences
- Major in Geography & Geographic Information Science, General Geography Concentration, BALAS (p. 192)
- Major in Geography & Geographic Information Science, Human Geography Concentration, BALAS (p. 194)

for the degree of Bachelor of Arts in Liberal Arts & Sciences: Major in Geography & Geographic Information Science, Human Geography Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

Departmental distinction: Students majoring in Geography and Geographic Information Science can earn distinction, high distinction,
and highest distinction upon graduation. The requirements for these awards are:

- For distinction: 3.3 GPA overall; 3.3 GPA in GGIS courses.
- For high distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses.
- For highest distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses; satisfactorily complete an independent project (GGIS 391).

Students should consult their advisors regarding distinction requirements as soon as they enter the major (no later than the end of their junior year).

**General education: Students must complete the** Campus General Education (https://courses.illinois.edu/) **requirements including the campus general education language requirement.**

Minimum required major and supporting course work: A minimum of 35 credit hours of Geography and Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

### Learning Outcomes: Geography & Geographic Information Science, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geography & Geographic Information Science
1. Geographic Understanding
   • Definition: GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.

2. Spatial Patterns and Processes
   • Definition: GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.

3. Problem-Solving and Communication
   • Definition: GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Geology

department website: https://www.geology.illinois.edu/
undergraduate (https://www.geology.illinois.edu/undergraduate/)
department faculty: Geology Faculty (https://www.geology.illinois.edu/directory/faculty/)
overview of college admissions & requirements: LAS admissions information (https://www.las.illinois.edu/prospective/)
college website: https://las.illinois.edu/
email: geology@illinois.edu

Students interested in majoring in geology may choose the Specialized Curriculum in Geology (http://catalog.illinois.edu/undergraduate/las/geology-bs/#degreerequirementstext), leading to the Bachelor of Science Major in Geology, or the Geology Major (http://catalog.illinois.edu/undergraduate/las/geology-bslas/#degreerequirementstext), leading to the Bachelor of Science in Geology.

The Specialized Curriculum in Geology is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor’s degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences
Students select one of the following in consultation with an adviser:
   • Major in Geology (Sciences and Letters) (p. 201)
   • Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 202)
   • Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 203)

For the Degree of Bachelor of Science in Geology
Students select one of the following in consultation with an adviser:
   • Major in Geology (Specialized Curriculum) (p. 197)
   • Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 199)
   • Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 198)

for the degree of Bachelor of Science Major in Geology

Specialized Curriculum

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

Distinction: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone

High Distinction: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone
Minimum hours required for graduation: 126 hours.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Geology: Geophysics, BS

for the degree of Bachelor of Science Major in Geology, Geophysics Concentration (Specialized Curriculum)

department website: https://www.geology.illinois.edu/undergraduate (https://www.geology.illinois.edu/undergraduate/)

college website: https://las.illinois.edu/
email: geology@illinois.edu

The Sciences and Letters Curriculum in Geology (BSLAS), administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary level.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 201)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 202)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 197)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 199)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 198)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geology (Sciences & Letters)

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- Distinction: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- High Distinction: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- Highest Distinction: A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone

General education: Students must complete the Campus General Education (http://catalog.illinois.edu/GENED/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required course work normally equates to 47-52 hours including at least 26 hours in Geology. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

**Undergraduate Degree Programs in Geology**

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 201)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 202)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 203)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 197)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 199)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 198)

This concentration fulfills state certification requirements to teach high school (grades 9-12) Earth and Space Science through the AP/honors level and biology, chemistry, environmental science and physics up to but not including the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

**Departmental Distinction:** Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

**Distinction:** A minimum cumulative grade point average of 3.3, and must present evidence of exemplary teaching

**High Distinction:** A minimum cumulative grade point average of 3.5, and must present evidence of exemplary teaching

**Highest Distinction:** A minimum cumulative grade point average of 3.7, and must present evidence of exemplary teaching

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:**

- Normally equates to 55-59 hours in the concentration and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level in the major must be taken on this campus.

**Minimum hours required for graduation: 120 hours.**

- ASTR 100 Introduction to Astronomy
- ASTR 131 and The Solar System Lab
- ASTR 132 and Stars and Galaxies Lab

or

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Geology, BSLAS

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes.

2. Students will develop an understanding of the physical, chemical and mathematical theories fundamental to earth processes through rigorous coursework and research.

3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom, and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological problems.

4. Students will demonstrate the ability to communicate effectively scientific data, interpretations, and hypotheses through written and oral methods.

5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies.

Germanic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies

department website: https://www.germanic.illinois.edu
department faculty: Germanic Languages & Literatures Faculty (https://germanic.illinois.edu/directory/faculty/)
advising: German advising (https://germanic.illinois.edu/academics/german/undergraduate-programs/undergraduate-advisor/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: germanic@illinois.edu

The BALAS in Germanic Studies serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, and science. Students must select one concentration in consultation with an adviser:

- German Studies Concentration (http://catalog.illinois.edu/undergraduate/las/germanic-studies-balas/german-culture-literature/)
- German Business & Commercial Studies Concentration (p. 205)
- Scandinavian Studies Concentration (p. 206)

The Department of Germanic Languages & Literatures also offers a BA in the Teaching of German (p. 400).

5 year BALAS/MA in Germanic Studies

The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Studies and an MA in German. In order to be admitted to this program, students can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their second year, students will need to be in good standing, have finished GER 211 and GER 331, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their third year, students will have to have finished GER 401 and GER 420, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students’ admission to the 5-year program will be made by the graduate advisor.

1. EDUC 201, EDUC 202 and EPSY 201 can be completed at any time during the degree and are not pre-requisites to apply for the minor.
2. PSYC 100 is a pre-requisite for EPSY 201.

Learning Outcomes: Geology, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geology (Sciences & Letters)

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes.

2. Students will develop an understanding of the physical, chemical and mathematical theories fundamental to earth processes through rigorous coursework and research.
admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

5 Year BALAS/MA in German and European Union Studies

The Department of Germanic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in German (including a Scandinavian Studies Concentration) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the standalone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Germanic Studies: German Business & Commercial Studies, BALAS

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies, German Business & Commercial Studies Concentration*

The German Business and Commercial Studies concentration focuses on the language and customs of the business world in German-speaking countries, together with study of international affairs and commerce, especially trade with Europe.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

**General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.**

Minimum required major and supporting course work: Normally equates to 34 hours in German. Twelve hours of 300- and 400-level in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

Designed for students with a broad interest in Scandinavian Studies, including acquiring proficiency in a modern Scandinavian language. Fulfilling the requirements for the Major usually involves one semester of study abroad at a Scandinavian university.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 30 hours in Scandinavian courses beyond SCAN 101-102. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Germanic Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies

1. Language ability: Students develop and improve their foreign language abilities, i.e. their ability to read, speak, write, and listen in German and/or a modern Scandinavian language in order to work with texts and communicate with others in these languages.

2. Cultural-historical literacy and knowledge: Students develop and improve their ability to function in non-native cultural-historical and linguistic contexts and communities in order to respect and navigate cultural differences and build upon similarities. Furthermore, students will synthesize knowledge relevant to broad cultural and linguistic areas within German and/or Scandinavian studies in order to apply that knowledge toward the other learning outcomes outlined here.

3. Analytical and argumentative skills: Students develop and improve their abilities to analyze diverse cultural artifacts in order to apply analytical thinking and discursive skills to the construction of sound, supported, factual argumentation rather than merely expression of opinion, completely or in part.

4. Writing development: Students will demonstrate and produce well-written, communicative, argumentative, and interpretive texts in German, Swedish, and/or English in order to competently meet diverse writing tasks carried out in any of the relevant languages above. Furthermore, students will be able to carry out various forms of research in support of their writing in order to create more substantive texts, which are also genre appropriate and written for a particular audience.

5 Year BALAS/MA in Global Studies and European Union Studies

The Program in Global Studies with the European Union Center offers a 5-year BALAS/MA degree program in Global Studies and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 51-52 hours and includes a semester-long full time study abroad program and a minimum of 12 hours of 300- and 400-level courses.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Global Studies, BALAS

Student Learning Outcomes: LAS Global Studies strongly supports the campus-wide Student Learning Outcomes as recognized by the Office of the Provost Committee on Student Learning Outcomes. Global Studies majors will be able to:

1. Global Consciousness is not only our most important learning outcome, it is one that we extend beyond its definition in the 2017 SLOs.
   a. Our majors will discover how complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions
   b. Beyond that however, they will have developed new skills in in how to research these interconnections
   c. Required advanced language acquisition and study abroad are indispensable in developing global consciousness.

2. Creative Inquiry and Discovery is a learning outcome we continue to give an increasing emphasis.
   a. Our majors will apply knowledge to promote inquiry, discover solutions, and generate new ideas and creative works and beyond that an increasing number will also conduct their own research.

3. Intellectual Reasoning and Knowledge is produced not only through courses but also through study abroad programs.

4. Gain Social Awareness and Cultural Understanding as a learning outcome is secured through intensive experiential, cross-cultural learning through coursework, advanced language study and study abroad.
   a. Study abroad and advanced language acquisition will foster cultural and linguistic immersion, community engagement, intercultural competency and creative inquiry.
   b. Experiential learning can take place in local, national and global settings.
A portfolio review is required for admission to the School of Art and Design. Some Art and Design courses will also apply toward the General Education requirements. Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements (such as the Global Studies Leaders), fieldwork, RSO engagement, volunteer opportunities, and internships with governmental and non-governmental organizations.

**Graphic Design, BFA**

_for the degree of Bachelor of Fine Arts Major in Graphic Design_

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, advanced interaction design, and the design of Ninth Letter (http://www.ninthletter.com/), a nationally-distributed and award-winning literary arts journal.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Graphic Design, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Graphic Design

1. A deep understanding of effective typography and image relationships as used in the graphic design discipline.
2. Ability to realize an idea through an iterative creative making process of refinement.
3. Skills to see, research, organize, and visualize abstract ideas across multiple media.
4. Ability to use and embrace the research methods, frameworks, tools, technologies, and techniques of the graphic design discipline as it evolves.
5. Ability to apply knowledge of perception, cognition, and embodiment.
6. An understanding of the diverse professional, social, and ethical impacts of the graphic design discipline.
7. Understanding the use of tools and technology, including their roles in the creation, reproduction, and distribution of visual messages.

History of Art, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

The College of Liberal Arts and Sciences administers admission to the major in the History or Art; however, the Program in Art History advises all History of Art majors.

The curriculum in the History of Art requires 120 credit hours and offers a broad historical and cultural education related to the visual and built world. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

<tr>
<td></td>
<td>Three (3) Supporting Courses in the Humanities offered by LAS:</td>
<td>9</td>
</tr>
</tbody>
</table>

These courses must be approved by the Art History advisor and be outside the field of art history with the goal of enhancing the student’s understanding of the cultural context within which works of art and architecture have been created.

See list of Approved Supplemental Courses below.

Six (6) 200-400 level courses in Art History, offered in the School of Art & Design

1. Students must take at least one course in three of the following areas: 1) Africa and the Middle East; 2) Asia; 3) the Americas; 4) Europe.

At least one course must cover material before 1700

At least one course must cover material after 1700

With an advisor’s approval, up to 6 credit hours of courses in the history of architecture or landscape architecture at the 200-400 level may be taken towards the fulfillment of these required hours.

Though students must take a total of 6 courses, some may count toward the fulfillment of more than one area and period requirement. For instance, a course in 20th century African art could count as a class covering both Africa and the Middle East and material after 1700.

Two (2) seminars in Art History at the 400-level

Courses must be designated as art history seminars (not all 400-level courses have this designation), or be approved as a seminar by the undergraduate advisor.
See approved list below

Total Hours required for graduation 120

1 Though students must take a total of 6 courses, some courses may count toward the fulfillment of more than one area and period requirement. For instance, a course in 20th century African art could count as a class covering both Africa and the Middle East and material after 1700.

History, BALAS

for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

Studying History at the University of Illinois, Urbana-Champaign will prepare you for informed participation in public life and wide array of career paths, including in law, government, public policy, business, filmmaking, teaching, advertising, public relations, social work, the media, publishing, diplomacy, and military intelligence. The requirement that every Illinois History major successfully complete a work of original historical research means that our graduates have a demonstrated capacity to think contextually, locate and analyze evidence, evaluate competing viewpoints, assess causation, offer new interpretations, and solve complex problems.

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498, HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major course work: 36 hours of History courses.

HIST 200 and HIST 498 may count toward any of the area requirements or the 12 hours of History electives. For those students in the Honors Program, HIST 490 or HIST 493 may count toward any of the area requirements or the 12 hours of History electives. HIST 492 and HIST 499 must be taken as part of the 12 hours of required History electives.</td>

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

**Department website:** https://www.history.illinois.edu/  
**Department faculty:** History Faculty (https://history.illinois.edu/directory/faculty/)  
**Advising:** History advising (https://history.illinois.edu/academics/undergraduate-studies/academic-advising/)  
**Overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)  
**College website:** https://las.illinois.edu  
**Email:** history@illinois.edu

This concentration fulfills state certification requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, but some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

This concentration fulfills state certification requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies, but when following the new requirements effective Fall 2020, the expected completion time is 8 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

---

1. Chosen from the list maintained in the Department of History
2. Eighteen advanced hours (300- and 400-level) of History courses are required in the major. 12 of those 18 advanced hours must be taken on this campus.

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498, HIST 492 and successful completion of either
1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490) (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Minimum required major and supporting course work: Students are required to take a minimum of 33 hours in History courses. Only one of the following Advanced Composition courses (HIST 140, HIST 143, HIST 170, HIST 173) will count toward the 33 hours required in History courses.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours).

Minimum hours required for graduation: 120 hours.

One 100-400 level course in European History 3

Students must take HIST 498 - Research and Writing Seminar. Students may count the 3 hours towards any of the history areas noted above: US, Nonwestern/GLOBAL, or European.

Students must complete 12 hours of advanced (300+) coursework in History. HIST 498 may count toward those 12 hours.

Pre modern requirement: One History course must have a significant pre-1800 component.

Social Science Requirement
ECON 102 Macroeconomic Principles 3 or ECON 103 Macroeconomic Principles 3

One 100-400 level Geography course 3-4

Learning Outcomes: History, BALAS
Learning outcomes for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

1. Historical interpretation:
   a. Students will be able to connect past and present, demonstrating an understanding of ways that the past has shaped the world we live in today
   b. Students will be able to grasp the complexity of historical causation
   c. Students will have a broad and empathetic understanding of the commonalities and differences of the human experience, as influenced by factors such as culture, race, ethnicity, gender, and class in a matrix of time and place
   d. Students will be able to critically assess different sources of information and points of view

2. Historical research:
   a. Students will be able to formulate historical questions
   b. Students will be able to locate, organize, analyze, and synthesize data to answer these questions
   c. Students will be able to craft original historical arguments
   d. Students will be able to position these arguments contextually

3. Historical communication:
   a. Students will be able to express their ideas clearly, logically, and in evidence-based ways
   b. Students will be able to convey their ideas to different audiences
   c. Students will be able to evaluate, review, and edit historical writing and other forms of historical communication

Human Development & Family Studies, BS
for the Bachelor of Science Major in Human Development & Family Studies

department website: https://hdfs.illinois.edu/  
department faculty: Human Development & Family Studies Faculty (https://hdfs.illinois.edu/directory/faculty/)  
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)  
college website: https://aces.illinois.edu/

Students pursuing this major select one of two concentrations:
- Child and Adolescent Development Concentration (p. 215)
- Family Studies Concentration (p. 216)

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as pediatric services in hospitals, medicine and allied health fields, marriage and family therapy, family law, human resources, child care services, family life education, social work, counseling, human services, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students select one of two concentrations within this major: Child and Adolescent Development or Family Studies. Completion of the Family Studies option may qualify some graduates for provisional certification as a Family Life Educator by the National Council on Family Relations. Additional information is available at the NCFR website.

The Child and Adolescent Development concentration emphasizes the influence of environment, biology, families, peer groups, schools, and communities on the well-being of children and adolescents. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include child life specialist, parent education, developmental therapy, adoption case work and day-care administration. Graduates also choose to pursue graduate education in a variety of fields, including pediatrics, occupational therapy, nursing, law, human development research, education, psychology, social work, and business.

Information listed in this catalog is current as of 10/2020
Human Development & Family Studies: Family Studies, BS

for the degree of Bachelor of Science Major in Human Development & Family Studies, Family Studies Concentration

department website: https://hdfs.illinois.edu/
department faculty: Human Development & Family Studies Faculty (https://hdfs.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
college website: https://aces.illinois.edu/

Students in the Family Studies concentration focus on how families operate, develop, and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage stress and become resilient. Graduates with this concentration are qualified to provide many services to families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including, marriage and family therapy, social work, policy specialist, psychology, family law, medicine, or human resources.

The Family Studies concentration is approved by the National Council of Family Relations (NCFR) for the provisional Certified Family Life Educator credential. Family life education focuses on healthy family functioning within a family systems perspective and provides a primarily preventive approach. The goal of family life education is to teach and foster skills and knowledge to enable individuals and families to function optimally. Within two years after receiving their degree, graduates who have completed the Family Studies curriculum and four elective courses (HDFS 427: Family Adaptation and Resilience, CHLH 206: Human Sexuality, HDFS 401: Socialization and Development, and HDFS 461: Family Life Education) can apply for the Provisional level of the CFLE credential through an abbreviated application process (details available on the NCFR website).

Advanced Composition
Learning Outcomes: Human Development & Family Studies, BS

Learning outcomes for the Bachelor of Science Major in Human Development & Family Studies

1. **HDFS students will demonstrate a strong foundation in theories and empirical knowledge associated with human development and family studies (i.e., developmental periods and domains; socialization contexts; diversity among families and children; research methods; family dynamics, transitions, and resilience; and family policy)**
   a. Recall key terminology (theoretical, empirical, methodological, substantive concepts)
   b. Describe current and historical challenges affecting individuals and families (e.g., social, political, economic, cultural, ethical, including research ethics)
   c. Summarize key theories, models, and principles (e.g., grand, disciplinary, substantive, methodological)
   d. Apply theories, models, and principles to developmental, relationship, familial, and social issues
   e. Apply knowledge to global contexts
   f. Integrate knowledge across courses and content areas (i.e., human development and family studies; lower level to higher level courses)
   g. Critique current theoretical and empirical knowledge of and methodological approaches to studying human development, relationships, and families

2. **HDFS students will exhibit the skills necessary to effectively apply knowledge and generate new ideas to solve real world issues**
   a. Use effective written communication
   b. Use e to achieve group goals
   c. Apply research-based knowledge to working with children, families, and communities and/or agencies that serve them

3. **HDFS students will demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion**

   a. Describe the historical and current relevance of diversity and inclusion to individuals, relationships, families, and communities
   b. Reflect on one's own interconnected positions, privileges, and disadvantages across multiple contexts
   c. Critically examine one's own beliefs, assumptions, values, attitudes, and biases
   d. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one's own work (e.g., written and oral communication)
   e. Critically evaluate the cultural respectfulness and appropriateness of research, programs, and policies related to human development and families
   f. Critically evaluate the potential impact of research, programs, and policies on diversity and inclusion
   g. Demonstrate awareness of global factors (e.g., economic, political, cultural, social) and how they may affect individuals, families and communities

4. **HDFS students will develop professional competence skills and establish well-informed career and professional goals**
   a. Identify and compare/contrast a range of career options for HDFS majors
   b. Create professional/job-related materials (e.g., resume, cover letter, purpose statement)
   c. Connect discipline knowledge to personal and professional life
   d. Develop leadership skills (e.g., through formal positions; informal mentoring to prospective/new students; representing the department; participation in class teamwork)
   e. Develop professional connections to support career and professional goals (e.g., relationships with professors, internship supervisors who can serve as references; connections to professionals through attending conferences/workshops or engaging with guest speakers in class)
     i. Make decisions appropriate grammar and writing mechanics
     ii. Demonstrate a working knowledge of APA style
     iii. Respond to constructive criticism (e.g., revision process, peer review)
   iv. Produce written work that is organized, logical, and fully developed
   f. Use effective oral communication (e.g., clearly and logically present ideas aloud through presentation to class or group)
   g. Apply knowledge to formulate and investigate hypotheses or research questions
   h. Apply knowledge to propose or create research-based programs or policies
   i. Critically evaluate the quality of published research, programs, and policies and their implications for individuals, relationships, and families
   j. Collaborate and solve problems
     i. Independently
     ii. Collaboratively
   k. Exhibit professional and ethical behavior

Information listed in this catalog is current as of 10/2020
Individual Plans of Study, BALAS or BSLAS

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences Major in Individual Plans of Study

academic advisor: Tenaya Reifsteck
program address: 2002 Lincoln Hall, 702 S. Wright St., Urbana, IL 61801
program information: http://www.las.illinois.edu/students/programs/majors/ips/
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: las-ips@illinois.edu

Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must
1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the IPS advisory committee.

Further information on requirements for graduation with distinction may be obtained from the secretary of the IPS advisory committee.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major—the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Film Studies, Film and Media Studies, and the second major in Film Studies. The development of an IPS program begins with the student's perception that a more appropriate field of study could exist beyond the present majors. Consultation with the secretary of the IPS advisory committee and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the IPS advisory committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The IPS Advisory Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student’s junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

Industrial Design, BFA

for the degree of Bachelor of Fine Arts Major in Industrial Design

school office: 143 Art and Design Building, Champaign, IL 61820
contact: Mark Avery, Coordinator of Undergraduate Academic Affairs
email: mavery@illinois.edu
phone: (217) 333-6632
department website: School of Art & Design (https://art.illinois.edu/)
department faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/
email: mavery@illinois.edu

The Industrial design program focuses on a human centered approach to identify opportunities to design new products and services. The studio courses emphasize learning through problem-solving, understanding user experience, market demand, materials, and production processes. Students can develop their interest, and engage in creating intuitive, innovative products and services, that are in visual harmony with their environment. Designs that satisfy the consumer desire while being responsive to changes in technology and culture benefit society.

The curriculum in Industrial Design requires 122 credit hours.

for the degree of Bachelor of Fine Arts Major in Industrial Design

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

**Learning Outcomes: Industrial Design, BFA**

Learning outcomes for the degree of Bachelor of Fine Arts Major in Industrial Design

1. **Research**...the ability to select and use appropriate research and experimental methods, to access existing data sources or to generate new data, to analyze and draw insights for future work, with particular emphasis on identifying human needs

2. **Creative synthesis**...the ability to produce creative proposals from investigation, or in response to identified opportunities or requirements, using appropriate thinking, modeling and making strategies, taking account of users, audience, market needs, makers, producers or exhibitors as appropriate

3. **Production**...the ability to select and use appropriate making and manufacturing processes in your own work, with an understanding of the potential of new technologies

4. **Organization**...the ability to plan and implement action, identifying targets and organizing resources, effectively managing self and collaborations with others

5. **Communication**...the ability to use various forms of communication as appropriate to elicit information, to explain, to debate and persuade, adapting to audience and situations

6. **Conceptualization**...the ability to realize an idea through an iterative creative making process of refinement

7. **Conceptualization**...the ability to realize an idea through an iterative creative process of refinement

8. **Understanding impacts**...of the diverse professional, social, and ethical effects of the industrial design discipline

9. **Contextualization**...the ability to understand the multiple contexts of design practice, including the historical, theoretical, critical, professional, cultural, environmental and technological

9. **Learning**...the ability to carry out independent learning as a basis for academic study, lifelong learning and for personal professional development including the ability to independently evaluate your own work with the aim of improving and developing your own practice

**Industrial Engineering, BS**

for the degree of Bachelor of Science in Industrial Engineering

department website: https://ise.illinois.edu (https://ise.illinois.edu/)
department faculty: Industrial & Enterprise Systems Faculty (https://ise.illinois.edu/directory/faculty.html)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from production management to process control. Industrial engineers design
efficient, productive systems in a wide range of business, industrial, and governmental settings.

The technical portion of the Industrial Engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student’s first year is spent mastering the basics of science: math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. During their senior year, students broaden and deepen their knowledge with additional technical elective courses. Finally, all students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

for the degree of Bachelor of Science in Industrial Engineering

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for required Engineering and Technical Elective courses, as well as MATH 415. See Technical GPA to clarify requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition courses required for this degree are listed below. Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. 

| Total Hours of Curriculum to Graduate | 128 |

---

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Advanced Composition satisfied by completing the combination of SE 494 and SE 495.
The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.

The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements/#DegreeRequirements-FreeElectives).

for the degree of Bachelor of Science in Industrial Engineering

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/industrial-engineering-map/).

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2 RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
Information Sciences, BS
For the Degree of Bachelor of Science in Information Sciences

Initial Admission Term: Fall 2020

school website: School of Information Sciences (https://ischool.illinois.edu/)
school faculty: iSchool Faculty (https://ischool.illinois.edu/people/faculty/)
overview of school admission & requirements: http://catalog.illinois.edu/schools/ischool/academic-units/#undergraduate
school office: 501 E. Daniel St., Champaign, IL 61820
email: ischool@illinois.edu

The Bachelor of Science in Information Sciences prepares students for a wide range of careers within the knowledge economy. In today’s technology-centered job market, there is a high demand for information professionals. By earning a B.S. in Information Sciences (BS/IS) from the School of Information Sciences (iSchool), you will gain a competitive edge. Our interdisciplinary, STEM-designated degree will prepare students for careers in a variety of fields. As a BS/IS student, you’ll learn how to manage data and other types of information to help organizations achieve their goals. You will become an information technology expert who understands the human perspective, social context, and policy implications.

degree website: School of Information Sciences (https://ischool.illinois.edu/degrees-programs/bs-information-sciences/), B.S.

Departmental Distinction: The top 10% of the graduating class will graduate with distinction.

For the Degree of Bachelor of Science in Information Sciences

Minimum required major and supporting course work: Students must earn at least 51 hours in the School of Information Sciences or in approved courses offered by other departments, approved by an IS advisor. Twelve hours of 300/400 level (advanced) courses in Information Sciences (IS) must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

Minimum required major and supporting course work: Students must earn at least 51 hours in the School of Information Sciences or in approved courses offered by other departments. Students must demonstrate proficiency in at least one programming language.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

GPA Requirement: 2.5 - Earn a cumulative grade point average of 2.50 (A = 4.00) in all courses presented for the degree and a cumulative 2.50 grade point average for all courses taken in the School.

Learning Outcomes: Industrial Engineering, BS
Learning Outcomes for the degree of Bachelor of Science Major in Industrial Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Industrial Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

Selected from the departmentally approved list of IE Technical Electives (https://ise.illinois.edu/undergraduate/electives.html#ie)

Selected from the departmentally approved lists of Track Option Electives (https://ise.illinois.edu/undergraduate/industrial-engineering-degree/industrial-engineering-track-options.html) or by petition to the department.

SE 494 and SE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a free elective.

Combination satisfies the General Education Advanced Composition requirement.

Selected from the departmentally approved list of Computer Science Electives (https://ise.illinois.edu/undergraduate/electives.html#ie)

Information Systems, BS

for the degree of Bachelor of Science Major in Information Systems

overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/) college website: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

The Information Systems (IS) major is concerned with the design, implementation, and protection of systems and technology to address the information processing needs of an organization, and provide data and information for managerial decision-making. IS majors take both, technology and business courses which equip them with the required skill-set to be able to design, develop and deploy computer and software-based solutions in order to help businesses attain their tactical and strategic objectives. Some of the key courses taken by IS majors include information technology for networked organizations, systems analysis and design, and database management. Because computers and software are used in all functional areas of business today, IS majors may choose to take additional courses in data analytics, information security/cyber-security, project management, human-computer interaction, programming, and social media applications to strengthen their resume, gain a wider exposure to domains supported by IS specialists, and prepare themselves to face the challenges in the technology-driven business world of today. IS majors will have the required knowledge and skill-set to make decisions about the selection and implementation of information systems/information technology, be a liaison between non-technical managers, computer programmers, and technical managers, assume a wide variety of roles requiring computer-based solutions, and generally be business leaders of the digital era.

for the degree of Bachelor of Science Major in Information Systems

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 120 hours.

Total Hours: 58

1. For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

   BUS 101 and BUS 201 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 101 and BUS 201 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

   MATH 220 or MATH 221 may be substituted for MATH 234. (See college mathematics requirement above.)

   Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

   Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

   This course includes limited voluntary participation as a subject in experiments.

Learning Outcomes: Information Systems, BS

Learning Outcomes for the degree of Bachelor of Science in Information Systems

1. Develop an understanding of fundamental concepts and key principles in the area of Management Information Systems.
2. The ability to analyze managerial and organizational issues, apply relevant knowledge to come up with solutions, and make recommendations.
3. The ability to use knowledge and skills related to digital technologies to enhance business administration and decision making.
4. The ability to collaborate as a team member in varying roles in a diverse group and communicate effectively.

Innovation, Leadership & Engineering Entrepreneurship (ILEE), BS

for the degree of Bachelor of Science in Innovation, Leadership & Engineering Entrepreneurship

center website: http://www.tec.illinois.edu
college website: https://grainger.illinois.edu/
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)

The Technology Entrepreneur Center offers studies leading to the Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE). The BS in ILEE degree is intended for Grainger Engineering students to better understand the innovative processes involved in identifying problems and creating, developing, and leading efforts to provide their engineering solutions. The curriculum is based on a sound disciplinary engineering technical core with additional aspects of problem identification and innovation, and complex multidisciplinary engineering project management and leadership.

Currently, the BS in ILEE degree is only being offered as a dual degree for current Grainger Engineering Students.
Students should follow their Grainger Engineering primary/first department’s curriculum and take the additional 31 hours of ILEE Orientation and Technical Core.

**Overview of Curricular Requirements**

The curriculum requires 128 hours for graduation from student’s Grainger Engineering primary/first department curriculum and take 31 additional hours of ILEE Technical core (total: 159 credit hours).

**Innovation, Leadership and Engineering Entrepreneurship Orientation**

**Integrative Biology, BSLAS**

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Integrative Biology

**department website**: http://sib.illinois.edu/

**department faculty**: School of Integrative Biology Faculty (http://sib.illinois.edu/people/faculty_all/)

**advising**: SIB advising (http://sib.illinois.edu/undergraduate/advising/)

**overview of college admissions & requirements**: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

**college website**: https://las.illinois.edu/

**email**: sib@illinois.edu

The Integrative Biology major provides students with a solid preparation in genetics, evolution, anatomy, physiology, ecology, and molecular biology. After completion of the foundational 100- and core 200-300-level courses in IB, students complete the required advanced coursework by taking a variety of IB and other courses or focusing on a limited area of IB. Plans for the student’s combination of advanced courses are developed in consultation with an adviser.

All undergraduates in this field are required to have a strong background in the biological and physical sciences.

Students pursuing a degree in Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.
For students interested in adding licensure to the BSLAS in Integrative Biology, please visit the Biology Teaching page: http://sib.illinois.edu/undergraduate/programs/teaching (http://sib.illinois.edu/undergraduate/programs/teaching/)

**for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Integrative Biology**

**Distinction for Excellence in Research:** To be eligible for graduation with Distinction for excellence in Research a student must:
- Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester.
- Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
- Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
- Give a poster presentation at the Undergraduate Research Symposium or other approved venue.
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor. Distinction will be determined by the SIB Distinction Committee based on the poster presentation and the Advisor’s evaluation.
- High or Highest Distinction for Excellence in Research: To be eligible for graduation with High or Highest Distinction for Excellence in Research a student must:
  - Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester. Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
  - Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
  - Submit a written thesis and give an oral presentation at the Undergraduate Research Symposium or other approved venue. Have a completed distinction evaluation form submitted by their Faculty Research Advisor. Distinction will be determined by the SIB Distinction Committee based on the written thesis, the oral presentation, and the Advisor’s evaluation.
  - For additional information visit: http://sib.illinois.edu/undergraduate/distinction (http://sib.illinois.edu/undergraduate/distinction/)

**Integrative Biology Distinction:** To be eligible for distinction a student must:
- Graduate with a grade-point average of at least 3.25 and submit a report of an independent student project (IB 490) about two months prior to graduation for approval by the Integrative Biology Distinction Committee. For additional information visit: http://sib.illinois.edu/undergraduate/distinction (http://sib.illinois.edu/undergraduate/distinction/)

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 66-76 hours.

**Minimum hours required for graduation:** 120 hours.

| IB 150    | Organismal & Evolutionary Biol     | 4     |
| MCB 150   | Molec & Cellular Basis of Life     | 4     |
| IB 202    | Physiology 2                       | 4     |
| IB 203    | Ecology                            | 4     |
| IB 204    | Genetics 3                         | 4     |
| IB 302    | Evolution                          | 4     |

At least 14 hours of coursework from the Approved List of Advanced Courses (http://sib.illinois.edu/courses/area (http://sib.illinois.edu/courses/area/)) for IB majors, including:

**At least one course from two of the following three areas:**
- Area I: Organismal and Evolutionary Biology
- Area II: Behavior, Ecology, and the Environment
- Area III: Integrative Anatomy, Physiology, and Molecular Biology

**One advanced course with a laboratory and/or field component.**

1. The Biocalculus section of MATH 220 is strongly recommended for IB Majors.
2. IB 202 requires animal dissection and no equivalent alternative is available. IB majors are required to enroll in the 4-hour version of this course.
3. IB majors are required to enroll in the 4-hour version of IB 204.

**Learning Outcomes: Integrative Biology, BSLAS**

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Integrative Biology

**Content-related understandings**

1. Possess a significant knowledge base in Integrative Biology, including but not limited to:
a. Structure and function
b. Ecology
c. Genetics
d. Evolution
e. Molecular biology
f. Statistical inference
2. Understand that biology is integrative and multidisciplinary
3. Show curiosity and caring about biology, and an awareness of and appreciation for the diversity of life
4. Understand how paradigms of biology relate to society and policy as well as their own lives

Competencies

1. Carry out the process of scientific inquiry
2. Use critical thinking skills and solve problems
3. Use quantitative reasoning and computation skills
4. Apply simple models (equations/math) to biological phenomena
5. Gain proficiency in scientific writing and speaking
6. Read and evaluate primary scientific literature
7. Critically evaluate science-related news and information
8. Work collaboratively

Integrative Biology: Honors Integrative Biology, BSLAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Integrative Biology, Honors Integrative Biology Concentration

department website: http://sib.illinois.edu/
department faculty: School of Integrative Biology Faculty (http://sib.illinois.edu/people/faculty_all/)
advising: SIB advising (http://sib.illinois.edu/undergraduate/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: honors@sib.illinois.edu (ibhonors@life.illinois.edu)

Honors Integrative Biology is designed for superior students wishing to pursue an intensive program in integrative biology and, concurrently, to gain a strong background in the physical sciences and mathematics. Admission is by interview in spring of the freshman year prior to registration for fall. An overall 3.0 GPA is required to apply for admission. Honors Integrative Biology provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors.

Students earning the Honors Integrative Biology Concentration will also earn the Chemistry minor.

Students pursuing a degree in Honors Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Honors Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Substitutions or other changes in the requirements below may be made only by petition to and approval of the director of the Honors Integrative Biology Concentration.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Integrative Biology, Honors Integrative Biology Concentration

Departmental distinction: Candidates for distinction must:
1. Consult with an IB Honors adviser no later than the beginning of their junior year to discuss their proposed research plan.
2. Have a minimum GPA of 3.25 when applying for distinction.
3. Present an acceptable written report on the research to the Integrative Biology Distinction Committee about two months prior to graduation. The research must have been an in-depth experience and produced substantial results to be considered eligible for distinction. Additional details on requirements, procedures, and deadlines are available at sib.illinois.edu/undergraduate/distinction (http://sib.illinois.edu/undergraduate/distinction/).

Students must consult with their Integrative Biology honors adviser at least once each semester.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 80-91 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. No more than 8 hours of credit in 100-level courses in IB or MCB may be counted toward graduation.

Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Honors Integrative Biology, BSLAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Integrative Biology, Honors Integrative Biology Concentration

By graduation we want all Integrative Biology Honors students to have acquired:

Content-related understandings

1. Possess a significant knowledge base in Integrative Biology and Chemical Sciences, including but not limited to:
   a. Molecular genetics and biology
   b. Diversity and structures and physiological functions of plants and animals
   c. Ecology and evolution
   d. Biochemical and chemical bases of life and/or systems
   e. Statistical inference and modeling of systems
2. Understand that biology is integrative and multidisciplinary
3. Show curiosity and caring about biology, and an awareness of and appreciation for the diversity of life
4. Understand how paradigms of biology relate to society and policy as well as their own lives

Competencies

1. Carry out the process of scientific inquiry
2. Use critical thinking skills and solve problems
3. Use quantitative reasoning and computation skills
4. Apply models (equations/math) to biological phenomena
5. Gain proficiency in scientific writing and speaking
6. Read and evaluate primary scientific literature
7. Critically evaluate science-related news and information
8. Work collaboratively

Learning Outcomes: Interdisciplinary Health Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Interdisciplinary Health Sciences

1. Students will understand the influence of behavior and culture on health and well-being.
2. Students will gain a comprehensive and holistic perspective of health which will prepare them to enter a variety of health related careers.
3. Students will apply health-related knowledge through community service and experientially-based opportunities.
4. Students will be able to identify various health determinants in order to improve equity and access for vulnerable populations.

Interdisciplinary Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

Students pursuing this major select one of two concentrations:

• Jewish Studies Concentration (p. 233)
• Medieval Studies Concentration (http://catalog.illinois.edu/undergraduate/las/academic-units/interdisc-studies/medieval-civilization-concentration/)

Requirements

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to
specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the concentration requirements; at least 25 hours must be at the 200, 300 or 400 level.

**college website:** https://las.illinois.edu/

The Program in Jewish Culture & Society (https://jewishculture.illinois.edu/) sponsors this concentration. This concentration provides the student with knowledge of the Hebrew language, the opportunity to begin a study of Yiddish, and a broad appreciation of Jewish religion, culture, and history.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

---

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 45-51 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

**Minimum hours required for graduation:** 120 hours.

**Interdisciplinary Studies: Medieval Studies, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Medieval Studies Concentration*

**program website:** http://www.medieval.illinois.edu/education/undergrad/
**program faculty:** Medieval Studies Faculty (http://www.medieval.illinois.edu/people/faculty/)
**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
**college website:** https://las.illinois.edu/
**email:** medievalstudies@illinois.edu

The Program in Medieval Studies (http://www.medieval.illinois.edu/education/undergrad/) sponsors this concentration.

This concentration introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographic regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.
The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; (III) advanced medieval coursework selected by the student in consultation with a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a diverse range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study in Medieval Studies should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Medieval Studies Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Substitution for specific courses listed below will be approved by the concentration advisor only in exceptional cases.

**Departmental distinction:** To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

**High distinction:** To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

---

### Additional Medieval Studies Coursework

Medieval-related coursework from participating departments selected in consultation with the concentration advisor. At least 12 hours must be at the 300- or 400-level. A list of courses in Medieval Studies is maintained on the Medieval Studies Program website. Up to 12 hours of appropriate language study can be applied to meet this requirement with approval of a Medieval Studies faculty advisor.

**Capstone Experience**

Information listed in this catalog is current as of 10/2020
A capstone experience (normally in the student's senior year) involving intensive interdisciplinary research and writing on a medieval topic. Any 400-level MDVL course (or medieval-related course not cross-listed with MDVL, with the approval of a Medieval Studies faculty advisor) can be designated as a capstone experience with approval of the instructor. For the course to qualify as a capstone experience, the student must undertake a substantial research project that supplements the standard course requirements, in the form either of an additional project or of a longer and more research-intensive version of an existing course project. The project must involve both primary and secondary research using advanced disciplinary methodologies and resources.  

<table>
<thead>
<tr>
<th>Total Hours</th>
<th>45</th>
</tr>
</thead>
</table>

1. A student may substitute the "Medieval World" section of HIST 100, by petition to a Medieval Studies faculty advisor. Only the section of HIST 100 devoted to the Middle Ages may be substituted.

2. A student may substitute up to 6 hours in geographical distribution coursework with courses on the medieval civilizations of the Americas: ANTH 277, ANTH 278, or both. However, at least one course must still be taken from each of the three regional areas.

3. List of courses to fulfill Additional Medieval Studies Coursework. (http://www.medieval.illinois.edu/education/undergrad/)

4. A student may also petition to satisfy the capstone experience by enrolling in MDVL 500, Seminar in Medieval Studies. Enrollment requires approval of the instructor and Director of the Program in Medieval Studies.

**5 Year BALAS /MA in Italian and European Union Studies**

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in Italian and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS—granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

*for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Italian*

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

**Departmental distinction:** To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Supporting course work or a minor chosen in consultation with an adviser, in one related area (or a combination, with no fewer than 8 hours in each). Areas may include, for example, any other language and literature, history, political science, biology (premed), international law (prelaw), economics, finance, business administration, education, architecture, fine arts, journalism.  

**Learning Outcomes: Italian, BALAS**

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Italian

Upon graduating with a major in Italian, students shall be able to do the following:

1. **Language proficiency and accuracy:** reach proficiency and accuracy in written and oral comprehension and production of Italian (based on proficiency guidelines outlined by the American Council on the
Teaching of Foreign Languages [ACTFL] and the Common European Framework of Reference for Languages [CEFR].

2. **Research skills and literacy in text, media, and technology in Italian:** access, manage, evaluate, and effectively use culturally relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content; develop sensitivity to the changes in cultures and languages produced by emerging technologies.

3. **Intercultural awareness, knowledge, and competence:** develop an awareness of differences between Italian and their own cultures. Identify implicit assumptions present in Italian linguistic practices and relate them to their own cultural conventions. Learn how to identify the cultural component of everyday practices, from food to body language, and recognize difference as culturally specific.

4. **Proficiency in Italian Literature and Culture:** acquire familiarity with Italian literature and culture, their history and their contexts, as well as the critical tools used in their analysis.

5. **Competence in Italian linguistics:** acquire competence in the structure and history of the Italian language.

### Journalism, BS

*for the degree of Bachelor of Science Major in Journalism*

- **Department website:** https://media.illinois.edu/journalism
- **Department faculty:** https://media.illinois.edu/journalism/faculty
- **Overview of college admissions & requirements:** College of Media (p. 1159)
- **College website:** https://media.illinois.edu/

**JOURNALISM (JOUR),** prepares students for exciting and fulfilling careers in traditional broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

### Programs in Journalism

**Undergraduate Programs:**
- **Major:** Journalism, BS (p. 236)
- **Major:** Journalism, BS-MJ (p. 438)
- **Minor:** Journalism (p. 480)

**Graduate Programs:**
- **Degree:** Journalism, BS-MJ (p. 438)
- **Degree:** Journalism, MS (p. 801)
- **Joint degree:** Journalism, MS and Business Administration, MBA (p. 1120)
- **Joint degree:** Journalism, MS and Law, JD (p. 1120)

The department does not offer a Ph.D. degree. For the program leading to the Doctor of Philosophy in Communications, see Communications and Media, PhD (p. 648).

### General requirements: To graduate from the journalism curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

**Campus General Education requirements not met by classes listed above** 12

**Minor or Specialization** 18

- Recognized minor or one 18-hour specialization or two 9-hour specializations, approved by adviser, from outside College of Media and Department of Communication.
- May include hours listed above. Students may choose to complete a Public Relations minor in addition to the non-Media minor or specialization

**Total Hours Outside the College of Media** 72-73

**Advanced Hours Requirement**

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. Nine of the 20 hours must be in courses numbered 300 or above.
Please note: Courses used to fulfill University General Education requirements or to fulfill requirements for a minor may count toward these requirements. Courses used to fulfill the College of Media’s advanced outside hours requirement may also count toward these requirements.

Minimum Total Hours required for graduation 124

Learning Outcomes: Journalism, BS

Learning outcomes for the degree of Bachelor of Science Major in Journalism

Student Learning Outcomes are adapted from requirements of the accrediting body for the Department of Journalism (ACEJMC)

1. Understand and apply principles and laws related to media and freedom of information
2. Write correctly and clearly in appropriate forms and styles
3. Apply basic numerical and statistical concepts
4. Apply current tools and technologies appropriate for the communications profession and to understand the digital world.
5. Demonstrate understanding of the history of journalism development and the role of professionals and institutions in shaping communications
6. Demonstrate an understanding of journalism ethical principles
7. Demonstrate understanding of diversity, both domestic and global
8. Understand concepts and apply theories in the use and presentation of images
9. Conduct research and evaluate information by methods appropriate to the profession
10. Demonstrate an ability to think critically and evaluate their own work and that of others
11. Document professional practice through internships, student media and other publication of student work.

joint degree: Kinesiology, BS and Public Health, MPH (p. 439)

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student’s area of concentration within Kinesiology.

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control, and skill of physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of Kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including
teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Kinesiology

**Requirements Including General Education**

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

<table>

Programs in Community Health and Kinesiology

Undergraduate Programs:
- **major**: Community Health, BS (p. 102)
  - **concentration**: Community Health: Health Education & Promotion, BS (p. 103)
  - **concentration**: Community Health: Health Planning & Administration, BS (p. 107)
  - **concentration**: Community Health: Rehabilitation Studies, BS (p. 113)
- **minor**: Kinesiology, BS (p. 237)
  - **concentration**: Kinesiology: Teacher Certification, BS (p. 238)
- **minor**: Kinesiology (p. 481)
- **minor**: Disability Studies (http://catalog.illinois.edu/undergraduate/ahs/minors/disability-studies/)
- **joint degree**: Community Health, BS and Public Health, MPH (p. 118)
- **joint degree**: Kinesiology, BS and Public Health, MPH (p. 439)

Graduate Programs:
- **degree**: Kinesiology, MS (http://catalog.illinois.edu/graduate/ms_kines/)
- **degree**: Kinesiology, PhD (http://catalog.illinois.edu/graduate/graduate-majors/kinesiology/#doctoratestext)
- **degree**: Community Health, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-comm-health/)
- **degree**: Rehabilitation, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-rehab/)
- **degree**: Public Health, MPH (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/)
- **joint degree**: Community Health, BS and Public Health, MPH (p. 118)
- **joint degree**: Kinesiology, BS and Public Health, MPH (p. 439)

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. In order to remain in good standing in this program, candidates need to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of Specialization Committee. In addition, students must complete all professional education and content-area courses with a grade of C- or better for licensure.

1. As identified in the Illinois State Board of Education (ISBE)’s Teach Illinois: Strong Teachers, Strong Classrooms report, beginning June 30, 2019, the Test of Academic Proficiency (TAP400) will be put on hold indefinitely while ISBE conducts a study of alternative basic skills assessments. The last day to register for the TAP is June 27, 2019. TAP tests passed prior to June 30, 2019, will continue to be accepted to meet the Illinois basic skills requirement past June 30, 2019. ISBE will continue to require specific scores on the ACT or SAT as a test of basic skills for the issuance of a Professional Educator License.

Learning Outcomes: Kinesiology, BS

Learning outcomes for the Bachelor of Science Major in Kinesiology

1. **Content Knowledge**: Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.

2. **Critical Thinking and Discovery**: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.

3. **Awareness and Understanding**: Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.

4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.

5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Landscape Architecture, BLA

The department’s administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The department also has a studio is located in Mumford Hall.

for the degree of Bachelor of Landscape Architecture

A student must have and maintain a minimum 2.00 cumulative grade point average.

University of Illinois transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.0 (A = 4.0). Transfer students from other institutions must have earned a GPA of at least 2.5 (A = 4.0). Prerequisite credits in composition and pre-calculus or introductory statistics are required. Courses in physical geography and plant or environmental biology are highly recommended.

1. IB 103 or IB 105 and GEOG 103 or GEOL 100 fulfill the natural sciences and technology general education requirements for this curriculum.
2. General Education: See current University of Illinois General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Foreign Language Requirement 0 - 12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.
3. Social/Cultural factors elective course options are LA 212, LA 218, LA 220, LA 221, LA 222, LA 242, LA 270, and LA 470.
A minimum of 12 credit hours of professionally related courses selected from the department’s recommended list of supporting electives is required, with a minimum of three credit hours in each of the categories of history, communications, techniques, and environment.

**Learning Outcomes: Landscape Architecture, BLA**

*Learning outcomes for the degree of Bachelor of Landscape Architecture*

Bachelor of Landscape Architecture students will:

1. **Build Knowledge & Develop Reasoning Skills** in applying broad and deep knowledge across academic disciplines and fields and using this knowledge to develop design proposals.
2. Apply knowledge of the **Natural World** to guide design decisions and activities taking into account natural resource constraints that impact land use.
3. **Strengthen Social Awareness** to better understand the social and cultural influences on human behavior and the social, political, economic, and legal institutions which influence land-use and design decisions.
4. **Employ Creative Inquiry and Discovery** in addition to a range of analytical skills, and general knowledge to develop design proposals, solve problems, generate new ideas, and produce creative work.
5. Demonstrate **Responsible Leadership** in working with the land and the people for whom we design.

**Latin American Studies, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies*

center website: [http://www.clacs.illinois.edu/academics/undergrad/und_major.aspx](http://www.clacs.illinois.edu/academics/undergrad/und_major.aspx)
center faculty: Latin American Studies Faculty ([http://www.clacs.illinois.edu/about/people/faculty.aspx](http://www.clacs.illinois.edu/about/people/faculty.aspx))
overview of college admissions & requirements: Liberal Arts & Sciences ([http://catalog.illinois.edu/schools/las/academic-units/](http://catalog.illinois.edu/schools/las/academic-units/))
college website: [https://las.illinois.edu/](https://las.illinois.edu/)
email: clacs@illinois.edu

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student’s interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken from these categories:

1. LAST 170 ([http://catalog.illinois.edu/search/?P=LAST%20170](http://catalog.illinois.edu/search/?P=LAST%20170)) - Introduction to Latin American Studies;
2. Approved courses with content focused on Latin America;
3. Approved courses with content focused on Latin America in a global context;
4. LAST 490 ([http://catalog.illinois.edu/search/?P=LAST%20490](http://catalog.illinois.edu/search/?P=LAST%20490)) - Independent Study, or approved Study Abroad course, or approved service-learning course.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Mesoamerica or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

---

**Learning Outcomes**

- **Build Knowledge & Develop Reasoning Skills**
- **Apply knowledge of the Natural World**
- **Strengthen Social Awareness**
- **Employ Creative Inquiry and Discovery**
- **Demonstrate Responsible Leadership**

**Latin American Studies, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies*

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Mesoamerica or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

---

Information listed in this catalog is current as of 10/2020.
Learning Outcomes: Latin American Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

1. **Strong Declarative Knowledge Base** on Latin American Culture and its position in the broader global world
   - Students should understand the diversity and complexity of Latin American cultures and languages and their historical, cultural, political, and economic development.
   - Students should develop appropriate expertise on a sub-region or culture of Latin America and/or a thematic topic related to Latin America.
   - Students should also be able to place their knowledge of Latin American in a broader global context.

2. **Critical Thinking**
   - Students should be able to critically and reasonably evaluate and formulate claims about social, cultural, political, historic, and economic issues related to Latin America in both academic and popular media.
   - Students should be able to critically and reasonably evaluate and apply their knowledge to real world problems.

3. **Effective Written Communication**
   - Students should be able to identify research problems, approach these problems with appropriate methodologies and effectively communicate the results. They should be able to apply their knowledge to real world situations.
   - Students should be able to effectively communicate their knowledge of Latin American culture and language to a broad non-specialist audience.

4. **Advanced Proficiency in Spanish or Portuguese OR Intermediate** –**High proficiency in an Indigenous Latin American Language** - This will be assessed through completion of appropriate level course work and through OPI or equivalent testing.

Latina/Latino Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latina/ Latino Studies

---

department website: https://lls.illinois.edu/
department faculty: Latina/Latino Faculty (https://lls.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: lls-studies@illinois.edu or aprodrig@illinois.edu

The Undergraduate Major in Latina/Latino Studies explores the experiences and lives of Latinas/os in the context of the United States. The major provides a broad and deep approach to theory, research, and multidisciplinary study of the Latina/o experience. Students will complete 34 hours of required and elective courses, and a minimum of 18 hours of supporting course work or a minor in an area outside of the major. Students majoring in Latina/Latino Studies receive excellent preparation for graduate study or careers in education, social and welfare policy, counseling, law, public policy, and other fields that address Latino issues.

---

**Advising:** The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/ Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 52 hours required, including 34 hours in Latina/Latino Studies courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.

**Minimum hours required for graduation: 120 hours.**

Learning Outcomes: Latina/Latino Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latina/Latino Studies

1. Intellectual Reasoning and Knowledge: Students will become proficient in the field of Latina/Latino Studies, which includes, but is not limited to, interdisciplinary, intersectional, and transnational knowledge about:
   a. sociohistorical, political, economic and cultural processes that affect Latina/Latino groups in contemporary society;
   b. Latina/Latino social movements;
   c. Latina/Latino cultural productions;
   d. the relationship between class, gender, sexuality, race/ethnicity and migration in the construction of Latina/Latino cultural and racial formations; and
   e. Latina/Latino Studies theories and methods. Students will learn that Latina/Latino Studies is a body of critical inquiry that encompasses a wide range of topics and objects of study, and that leverages multiple forms of knowledge production.

2. Critical and Creative Inquiry: Students will apply Latina/Latino Studies theories in developing their capacities for critical and creative inquiry. Specifically, students will exercise their oral and written communication skills as they express new ideas and generate projects that build upon Latina/Latino Studies theories and draw from the range of interdisciplinary Latina/Latino Studies methods.

3. Self-Reflexivity and Community Engagement: To help promote effective leadership and community engagement, students will demonstrate self-reflexivity about their ideas as well as about their social and political positions in their classrooms and communities. They will also learn to build and sustain relationships and take leadership towards the elimination of social inequities at the local, national, and global levels.

4. Social Awareness and Understanding Power: Students will recognize that Latina/Latino lives and communities unfold within historically unequal and racialized social, cultural, economic, and political power relations. Students will become familiar with Latina/Latino theories and social movements that consider indigeneity, race, class, gender, sexuality and citizenship to understand and intervene on historical and contemporary power formations.

5. Global Consciousness: Students will understand how complex and interdependent historical and contemporary global forces—environmental, social, cultural, economic, and political—impact and are impacted by Latinas/Latinos. They will learn to apply Latina/Latino Studies critiques to these forces, including but not limited to those related to migration and transnationalism.

Learning & Education Studies, BS

for the degree of Bachelor of Science Major in Learning & Education Studies

Assistant dean for academic affairs: Kathy Ryan
department office: 110 Education Building
1310 South Sixth
Champaign, IL 61820

phone: (217) 333-2800
department office: 110 Education Building
email: saao@education.illinois.edu
program website: Learning and Education Studies (https://education.illinois.edu/programs/undergrad/learning-and-education-studies/)
faculty: College of Education Faculty (https://education.illinois.edu/faculty-finder/)
overview of college admissions & requirements: U (https://admissions.illinois.edu/myillini-apply/)
college website: https://education.illinois.edu/
a set of core courses, as well as coursework in one of the following concentrations:

- Applied Learning Science (p. 246)
- Educational Equality and Cultural Understanding (p. 250)
- Workplace Training and Development (p. 251)
- Digital Environments for Learning, Teaching and Agency (p. 248)

for the degree of Bachelor of Science Major in Learning & Education Studies

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations:

- Applied Learning Science (p. 246)
- Educational Equality and Cultural Understanding (p. 250)
- Workplace Training and Development (p. 251)
- Digital Environments for Learning, Teaching and Agency (p. 248)

Total Hours 120

Total minimum hours include general education, language other than English, concentration and core credits.

1 General Education Requirement. Courses must be selected from the Campus General Education Approved Course List (https://courses.illinois.edu/).

2 Concentration and Core Requirement courses found on the General Education Approved Course List (https://courses.illinois.edu/) may also be credited toward the General Education requirements.

3 Courses except EDUC 202 and EPS 402 may be counted toward both the Core and Concentration requirements.

Learning & Education Studies: Applied Learning Science, BS (AppLeS)

for the degree of Bachelor of Science Major in Learning & Education Studies, Applied Learning Science concentration
The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University), as well as in education, psychology, business, law, and other more traditional areas of study. In addition, through their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

overview of college admissions & requirements: Undergraduate Admissions (https://admissions.illinois.edu/myillini-apply/) Undergraduate Admissions (https://education.illinois.edu/programs/undergrad/)
college website: https://education.illinois.edu/

The undergraduate non-licensure concentration in Digital Environments for Learning, Teaching, and Agency (DELTA) will provide students with a strong background in the design, development and implementation of technology for a range of learning environments. Courses will introduce students to learning theory, designing and using technology to support learning, and issues encountered when deploying technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

Graduating students will be prepared to engage with various stakeholders interested in using technology to support learning in a range of different contexts. Examples include selecting and deploying appropriate technology to support pedagogic goals for schools, corporations, or informal learning environments such as museums and afterschool clubs, designing educational games or toys and educational application development. One of the main objectives for students in DELTA is to build new ways to support learning, and prepare them for leadership roles in formal and informal environments, technology design and implementation strategies. They will also be prepared to pursue graduate study in a range of programs, such as educational technology, learning sciences, or instructional technology at the University of Illinois or elsewhere.

Students are encouraged to pursue a relevant minor or coherent set of electives from several related departments. Suggested minors include: computer science, communication, psychology, informatics, media and cinema studies or sociology. Students may also consider a minor in a specific content area from the arts and sciences to develop expertise in a particular field.

The DELTA concentration consists of 24 hours of course work. Students are required to take a minimum of two foundations courses, three core

**Concentration**

Students must complete 24 credit hours within one of the following areas of concentration: 1) Applied Learning Science, 2) Educational Equality and Cultural Understanding, 3) Workplace Training and Development, or 4) Digital Environments for Learning, Teaching and Agency.

**Electives**

Electives (including minor, if taken) 12-31

**Total Hours** 120

Total minimum hours include general education, language other than English, concentration and core credits.

1. General Education Requirement. Courses must be selected from the Campus General Education Approved Course List (https://courses.illinois.edu/).
2. Concentration and Core Requirement courses found on the General Education Approved Course List (https://courses.illinois.edu/) may also be credited toward the General Education requirements.
3. Courses except EDUC 202 and EPS 402 may be counted toward both the Core and Concentration requirements.

**Applied Learning Science (AppLeS) Concentration**

The following courses are required for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

courses and three elective courses. The core courses are designed to ensure students leave the program with foundational knowledge and skills necessary to design, develop, implement, manage, and evaluate digital environments. The elective courses allow students to tailor the concentration to fit individual career goals and areas of interest. Students should take the foundation course *Introduction to Digital Environments* in the first semester they join DELTA. Similarly, the *Capstone Research Project* should be taken in the last semester after the majority of DELTA-related course work is complete.

*for the degree of Bachelor of Science Major in Learning & Education Studies, Digital Environments for Learning, Teaching & Agency concentration*

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

Learning & Education Studies: Educational Equality & Cultural Understanding, BS

for the degree of Bachelor of Science Major in Learning & Education Studies, Educational Equality & Cultural Understanding concentration

Assistant dean for academic affairs: Kathy Ryan
department office:  110 Education Building
1310 South Sixth
Champaign, IL 61820
phone: (217) 333-2800
e-mail: saao@education.illinois.edu
program website: Learning and Education Studies (https://education.illinois.edu/programs/undergrad/learning-and-education-studies/)
faculty: College of Education Faculty (https://education.illinois.edu/faculty-finder/)
overview of college admissions & requirements: U (https://admissions.illinois.edu/myillini-apply/Undergraduate Admissions (https://education.illinois.edu/programs/undergrad/)
college website: https://education.illinois.edu/

This undergraduate non-licensure concentration will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Understanding how education as an institution operates to perpetuate social and economic stratification will give students a perspective on the challenges of creating a more equitable distribution of education. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory. Students will understand the contemporary and historical barriers to the distribution of education and examine recent human rights-based demands for extending education to people of all social classes, regions, ethnicity, language groups, and genders.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediary classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to international and domestic students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women's Studies, or LGBT/Queer Studies.

for the degree of Bachelor of Science Major in Learning & Education Studies, Educational Equality & Cultural Understanding concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

1. Course can be counted in the Core requirement or the Concentration requirement but not both.
2. Concentration courses found on the General Education Approved Course List may also be credited toward the General Education requirements.

**Learning & Education Studies: Workplace Training & Development, BS**

for the degree of Bachelor of Science Major in Learning & Education Studies, Workplace Training & Development concentration
Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees.

An internship is recommended during the program, but it is not required. For internship credit, students can register in HRD 491 Professional Skill Development before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Workplace Training and Development departmental contact.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;
- Individuals who wish to work in the business and industry outreach departments of community colleges;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

### Learning Outcomes: Learning & Education Studies, BS

Learning Outcomes for the degree of Bachelor of Science Major in Learning & Education Studies

1. Students will acquire deep knowledge of content in the workplace.
2. Students will effectively learn the skills and disposition to develop, plan, and implement culturally relevant and responsive outcomes in their respective professions and civic engagements.
3. Students will use data to drive decisions and solve problems in their professional careers.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

### Linguistics, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

**department website:** https://linguistics.illinois.edu/

**department faculty:** Linguistics Faculty (https://linguistics.illinois.edu/directory/faculty/)

**advising:** Linguistics Advising (https://linguistics.illinois.edu/academics/undergraduate-program/undergraduate-advising/)

**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

**college website:** https://las.illinois.edu/

The Department of Linguistics offers undergraduate instruction of four types: courses in linguistics, in English as an International Language, English as a Second Language, and in non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest not only to linguistics majors, but to students in any field where the analysis of languages is important: anthropology, speech and hearing science, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages, and are useful to any students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with
Information listed in this catalog is current as of 10/2020

literals and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture. Languages offered by the department are: African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu), Arabic, Hindi, Modern Greek, Persian, Sanskrit, Turkish.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 50-52 hours.

Students must complete 21 hours of coursework at the 300- or 400-level, including at least 12 hours of 300- or 400-level linguistics courses on this campus. These courses may be included in the core courses or electives.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Major electives: 15 hours of Linguistics courses at the 200- to 400-level, chosen in consultation with the student's advisor

Students must fulfill the LAS foreign language requirement, and in addition, complete at least 8 hours in a second foreign language. One of these languages must be a non-Western language chosen from the following list or approved in consultation with the student's advisor: American Sign Language, Arabic, Amharic, Basque, Chinese, Hebrew, Hindi/Urdu, Japanese, Korean, Lingala, Persian, Quechua, Sanskrit, Swahili, Turkish, Wolof, Zulu. Courses used to complete this requirement may also be used to meet the requirement of "Courses in linguistically relevant areas," below.

Courses in linguistically relevant areas chosen in consultation with the student's advisor. There are two ways of meeting this requirement:

A. The courses may come from any of the following disciplines: any foreign language, anthropology, classics, computer science, English, English as an international language, philosophy, psychology, speech and hearing science, communication.

B. Students desiring to specialize in the linguistics of a particular language should complete at least four semesters of instruction in that language beyond the elementary level, and a linguistics course or independent study focusing on the selected language or its language family.

Learning Outcomes: Linguistics, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

1. Students will acquire substantial understanding of how languages are structured, including the organization of phonological, morphological, syntactic, and semantic systems; of the ways such systems vary from language to language; and of how they change over time.
2. Students will gain a sense of how languages function: how they are processed psychologically, how they are learned, how they are effectively taught, how they express social identity, and/or how computational and other technologies may be applied to them.
3. Students will learn to think analytically about language, to present and justify analyses systematically, to support claims with sound arguments and empirical evidence, and to evaluate claims about language critically.

Lyric Theatre, BMA

for the degree of Bachelor of Musical Arts Major in Lyric Theatre

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

Students pursuing this major select one of two concentrations:

Creative Concentration (p. 255)

Performance Concentration (p. 256)

The Bachelor of Musical Arts with a major in Lyric Theatre is an interdisciplinary degree designed for the singer-actor, which incorporates training in dance and theatre in addition to music. This degree requires
students to choose one of two Concentrations: Performance (performer) or Creative (director, choreographer, dramaturg, set designer, composer).

The BMA Lyric Theatre curriculum is formed around courses in music, dance, and theatre. Advanced coursework includes a senior project. This degree requires a minimum of 129 semester hours of credit for graduation.

For admission requirements for the Bachelor of Musical Arts, please see the School of Music’s Admissions website or contact the Music Admissions Office:

Music Admissions Office
School of Music
1114 W. Nevada Street
Urbana, IL 61801
Phone: (217) 244-7899
E-mail: musicadmissions@illinois.edu (%20musicadmissions@illinois.edu)

Lyric Theatre: Creative, BMA

for the degree of Bachelor of Musical Arts Major in Lyric Theatre, Creative Concentration

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

In addition to the Music and Lyric Theatre core areas, students who choose the Creative Concentration must also complete a minimum of twelve (12) hours of coursework within the concentration. Students may choose a combination of the below courses in consultation with and approval of their advisor. At least six (6) hours must be taken from the first three (3) courses which deal with the performance of original work. With the other courses, similar type classes may be substituted with the approval of the Lyric Theatre faculty.

Creative Concentration Requirements

Minimum required major and supporting course work: In addition to the Music and Lyric Theatre core areas, students who choose the Creative Concentration must also complete a minimum of twelve (12) hours of coursework within the concentration. Students may choose a combination of the below courses in consultation with and approval of their advisor. At least six (6) hours must be taken from the first three (3) courses which deal with the performance of original work. With the other courses, similar type classes may be substituted with the approval of the Lyric Theatre faculty.

Information listed in this catalog is current as of 10/2020
Completion of both MUS 313 and MUS 314 meets the general education requirement for Humanities and the Arts.

At least one "Storytelling" course is to be selected in consultation with advisor from the general education requirements.

Select from approved Music major choral ensembles, such as MUS 260-263 and those in MUS 450.

All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. Keyboard majors enroll in MUS 454. It is possible to proficiency out of group piano courses through examination.

The 39-41 hours of the Music Core Requirements reflect 39 hours for keyboard majors, 41 hours for non-keyboard majors.

**Management, BS**

For the degree of Bachelor of Science Major in Management

department office: 330 Wohlers Hall, 1206 South Sixth Street, Champaign, IL 61820
phone: 217-333-4240
email: ba@business.illinois.edu (http://catalog.illinois.edu/undergraduate/bus/management-business-bs/ba@business.illinois.edu)
department website: https://giesbusiness.illinois.edu/business-administration/
overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/

The Management Major is designed to enable business students to be leaders and innovators in their work teams and organizations. You’ll be trained to analyze and solve managerial problems – be they around people, organizations, or markets - that every organization faces in its day-to-day operations. You’ll take courses about leading individuals and teams, designing and managing organizations, effective negotiation, and strategic human resource management. You’ll also choose from a variety of electives, including new product development, project management, entrepreneurship, and international business.

For the degree of Bachelor of Science Major in Management

Minimum requirements for the major in the Bachelor of Science Degree in Management are:

Minimum hours required for graduation: 120 hours.

5. Managing Small Business Formation & Growth

Marketing, BS

for the degree of Bachelor of Science in Marketing

department website:https://business.illinois.edu/ba/undergraduate/marketing/
department faculty: Marketing Faculty (https://business.illinois.edu/ba/directories/marketing/)
overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://business.illinois.edu/
email: ba-undergrad@illinois.edu

The Marketing student studies those business activities directly related to the process of placing meaningful assortments of goods and services in the hands of the consumer. The Marketing student is concerned with the efficient performance of marketing activities and with their effective coordination with the other operations of the firm. In addition to the Marketing Major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section (http://catalog.illinois.edu/schools/gies-business/academic-units/)).

for the degree of Bachelor of Science in Marketing

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of
12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French—no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 120 hours.

¹ For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

² BUS 101 and BUS 201 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall.

³ Inter-College transfer students take BUS 101 and BUS 201 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

⁴ MATH 220 or MATH 221 may be substituted for MATH 234. (See college mathematics requirement above.)

⁵ Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

⁶ Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete on course in the Physical Sciences and Life Sciences subcategories.

⁷ This course includes limited voluntary participation as a subject in experiments.

Information listed in this catalog is current as of 10/2020
In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to provide the underpinning knowledge for graduate study. Note: students interested in biomaterials take a specific set of courses to provide them with a background in biology and chemistry while maintaining a strong engineering focus.

Learning Outcomes: Marketing, BS
Learning Outcomes for the degree of Bachelor of Science in Marketing

1. Master core concepts that pertain to contemporary marketing practices and technologies.
2. Demonstrate the ability to analyze real-world marketing problems, develop alternative solutions, evaluate the strengths and weaknesses of these solutions and choose and implement a solution.
3. Demonstrate the ability to collaborate and problem-solve in teams, and to collaborate with team members and clients across business functions and disciplines.
4. Cultivate a global mindset – an appreciation, curiosity, and empathy toward other cultures, and a capacity to develop innovative solutions to global as well as local marketing problems.
5. Communicate effectively in writing and orally across all modalities – written, oral, and digital.

Materials Science & Engineering, BS
for the degree of Bachelor of Science in Materials Science & Engineering

dept web: https://matse.illinois.edu
department faculty: Materials Science & Engineering Faculty (https://matse.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. In the senior year, students focus on an area of MatSE of

**Suggested Sequence**

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (biomaterials) (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/matse-biomaterials-map/) and here (nonbiomaterials) (https://

Total Hours: 66

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. This course is highly recommended for freshmen, who may use it to help meet free elective requirements.
5. The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Area unless one of their biomaterials area topical lectures and one of their topical lectures outside the biomaterials area are deemed by the Accreditation Board for Engineering and Technology (ABET) to be an engineering course. The extra hour of credit for STAT 400 may be used to help meet free elective requirements.
6. Satisfies the General Education Advanced Composition requirement.
7. To be selected from list of topical lecture courses (https://matse.illinois.edu/academics/undergraduate-programs/undergraduate-curriculum/topical-lectures/) established by the department to provide an acceptable level of study in the student’s chosen focus area.
8. During fourth year, strongly recommended is incorporation of one or more of an internship, co-op position, and a research project during summers or an academic semester, or both. For students who intend to continue in graduate school, recommended additionally is the undertaking of a research project (Senior Thesis) in the senior year. The project may take the place of up to 3 hours of technical electives with the remainder counting for free electives.
9. Each section of MSE 404 is 1.5 hours. Students take 2 unique sections of MSE 404 for 3 hours.

Learning Outcomes: Materials Science & Engineering, BS

Learning outcomes for the degree of Bachelor of Science Major in Materials Science & Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Materials Science & Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following: CS 196, CS 296, CS 397, CS 492, CS 493, CS 499, any CS course numbered 411 or higher, MATH 412, MATH 414, MATH 417, MATH 418, MATH 423, MATH 432, MATH 448, MATH 482, MATH 484, MATH 496.

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours.

Learning Outcomes: Mathematics & Computer Science, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics & Computer Science

By the time of graduation, students will have:

Computer Science:

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

Information listed in this catalog is current as of 10/2020
Mathematics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics

email: mathadvising@illinois.edu

Students in the Mathematics major can choose one of the following to complete the major:

Mathematics major (p. 274)
Mathematics major, Applied Mathematics concentration (p. 275)
Mathematics major, Graduate Preparation concentration (p. 276)
Mathematics major, Mathematics Teaching concentration (p. 277)
Mathematics major, Operations Research concentration (p. 278)

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://
catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Mathematics

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours.

A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

Actuarial Science, BSLAS (p. 11)
Mathematics, BSLAS (p. 274)
Mathematics & Computer Science, BSLAS (p. 272)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Mathematics Teaching Concentration

This concentration fulfills state certification requirements to teach high school math (grades 9-12) through the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, with some students requiring 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A= 4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 80-84 hours including 27-29 hours of mathematics beyond calculus, 3-4 hours of computer science, and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours).

</table>
Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241. Students may not receive credit for both MATH 416 and either ASRM 406 (formerly MATH 410) or MATH 415. If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied. If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Total Hours: 39-40

1. EDUC 201, EDUC 202 and EPSY 201 can be completed at any time during the degree and are not pre-requisites to apply for the minor.
2. PSYC 100 is a pre-requisite for EPSY 201.

Mathematics: Operations Research, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Operations Research Concentration

department website: https://math.illinois.edu/
department faculty: Mathematics Faculty (https://math.illinois.edu/directory/faculty/)
advising: Math advising (https://math.illinois.edu/academics/undergraduate-program/undergraduate-advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

college website: https://las.illinois.edu/
email: mathadvising@illinois.edu

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics
Actuarial Science, BSLAS (p. 11)
Mathematics, BSLAS (p. 274)
Mathematics & Computer Science, BSLAS (p. 272)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Operations Research Concentration

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

Minimum hours required for graduation: 120 hours.

in the subfields of fluid mechanics, heat transfer, dynamic systems and controls, materials, mechanical design, and manufacturing. Finally, during the senior year, students have the opportunity to both broaden and deepen their knowledge of the field through individually chosen technical elective courses. At the end of the curriculum, students take the capstone senior design course where the knowledge and skills they have learned are applied to projects submitted to the department by corporate or faculty sponsors, preparing Mechanical Engineering students for their next leap into industry or graduate school.

for the degree of Bachelor of Science in Mechanical Engineering

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for required Engineering courses and any technical elective courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition courses required for this degree are listed below.

<tbody>
<tr>
<td></td>
<td>The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts 13</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. 14</td>
<td>6</td>
</tr>
</tbody>
</table>

**Total Hours of Curriculum to Graduate**

128

1. External transfer students take ENG 300 instead.
2. CHEM 103 (http://catalog.illinois.edu/search/?P=CHEM%20103) requirement waived for students who received test-based credit (AP, IB, or proficiency) for CHEM 102 (http://catalog.illinois.edu/search/?P=CHEM%20102), similarly CHEM 105 (http://catalog.illinois.edu/search/?P=CHEM%20105) requirement waived for students who received test-based credit for CHEM 104 (http://catalog.illinois.edu/search/?P=CHEM%20104). Students are still required to have 128 hours minimum to graduate.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. MATH 284 (http://catalog.illinois.edu/search/?P=MATH%20284) may be substituted.
5. CS 125 (http://catalog.illinois.edu/search/?P=CS%20125) or ECE 220 (http://catalog.illinois.edu/search/?P=ECE%20220) may be substituted.
6. ECE 110 (http://catalog.illinois.edu/search/?P=ECE%20110) and ECE 210 (http://catalog.illinois.edu/search/?P=ECE%20210) or ECE 211 (http://catalog.illinois.edu/search/?P=ECE%20211)) combined may be substituted.
7. Advanced Composition satisfied by completing ME 470.
8. Transfers and Physics minor/dual degree students may substitute PHYS 325 (http://catalog.illinois.edu/search/?P=PHYS%20325).
9. Transfers and ECE minor/dual degree students may substitute ECE 313 (http://catalog.illinois.edu/search/?P=ECE%20313).
10. A maximum of 3 hours of independent/individual study courses may be used to satisfy the MechSE Elective or Technical Elective requirements.
Depending on the technical content, some Special Topics courses may not be approved for Technical Elective credit. Please provide a syllabus of the course to the Mechanical Science and Engineering Undergraduate Programs Office to request use of the course for Technical Elective credit prior to registering for the course.

Professional Elective course. No more than 3 hours of professional elective credit may be used to satisfy the Technical Electives requirements.

The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.

The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements#DegreeRequirements-FreeElectives).

for the degree of Bachelor of Science in Mechanical Engineering

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/mechanical-map/).

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

² RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). ME 170 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

Science elective(s) – 4 hours required. Choose from CHEM 104 + CHEM 105, MCB 150, or PHYS 213 + PHYS 214. If MCB 150 is taken, then MCB 151 is also recommended. Note that PHYS 213 and PHYS 214 will normally be taken in the fourth semester or later, since they have PHYS 211 and PHYS 212, respectively, as prerequisites, in addition to MATH 241.

Statistics elective – 3 hours required. Choose either IE 300 or STAT 400.

Technical elective(s) – 6 hours required. Choose from a departmentally approved list of Technical Electives. (http://mechanical.illinois.edu/undergraduate/bs-mechanical-engineering/#METechElectives)

**Learning Outcomes:**

**Learning Outcomes: Mechanical Engineering, BS**

Learning Outcomes for the degree of Bachelor of Science Major in Mechanical Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Mechanical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**college website:** [https://media.illinois.edu/](https://media.illinois.edu/)

MEDIA AND CINEMA STUDIES (MACS), prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment.

**Programs in Cinema Studies**

**Undergraduate Programs:**

- **major:** Media & Cinema Studies, BS (p. 286)
- **minors:** Cinema Studies (p. 458) | Critical Film Production (p. 463) | Media (p. 487)

**Graduate Programs:**

- **minor:** Cinema Studies (p. 1093)

*for the degree of Bachelor of Science Major in Media & Cinema Studies*

To graduate from the media and cinema studies curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

<table>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Required Area of Study or Minor Outside the College of Media</td>
<td>9</td>
</tr>
</tbody>
</table>

In addition to the courses in the major plan described above, students must complete 9 hours in an approved area outside the College of Media. Approved areas include: African American Studies; American Indian Studies; Anthropology; Art History; Asian American Studies; Business Administration; Communication; Computer Science; Creative Writing; Economics; Food Science and Human Nutrition; Gender and Women's Studies; History; Kinesiology and Community Health; Latina/o Studies; Linguistics; Literature; Natural Resources and Environmental Sciences; Non-English Languages; Philosophy; Political Science; Psychology; Recreation, Sport and Tourism; Regional Area Studies; or Sociology. A university-approved minor may substitute for this requirement. Courses may, if they qualify, also count toward the requirement for advanced hours outside of the College.

**Learning Outcomes: Media & Cinema Studies, BS**

Learning outcomes for the degree of Bachelor of Science Major in Media & Cinema Studies
Student Learning Outcomes: Students in Media and Cinema Studies will be able to:

1. Demonstrate a thorough knowledge of media and cinema studies’ subject matter areas.
   a. Students demonstrate a broad knowledge of the field by accurately identifying and defining the subject matter areas of media and cinema studies.
2. Demonstrate a comprehension of foundational media and cinema studies’ theories and concepts.
   a. Students can identify, use, and relate key concepts and frameworks that are central to the field.
3. Demonstrate critical thinking skills.
   a. Students can reflexively apply concepts and frameworks to promote inquiry, understanding, and solutions.
4. Demonstrate the ability to critically evaluate media representations in relation to social justice issues.
   a. Students apply methods to demonstrate, through a production-based activity, how representations are connected to social, political, economic, and cultural issues.
5. Demonstrate the ability to work collaboratively to successfully communicate ideas and outcomes of creative research across a range of modalities.
   a. Students present their senior projects using at least two different platforms.

Metropolitan Food & Environmental Systems, BS

for the degree of Bachelor of Science Major in Metropolitan Food & Environmental Systems

Department website: https://mfst.illinois.edu/
Overview of college admissions & requirements: https://academics.aces.illinois.edu/prospective-students/
College website: https://aces.illinois.edu/
Program director: Megan Dailey, Ph.D., mdailey5@illinois.edu
Program office: 215 Mumford Hall, 1301 W. Gregory Dr., Urbana IL
Program phone: (217) 244-5567

The Metropolitan Food & Environmental Systems (MFST) program uses an interdisciplinary approach to understanding and implementing solutions in the area of urban food and environmental systems to ensure the sustainability of readily available nutritious foods for metropolitan populations. The students in this major will learn to understand the science and practice of food production and security across urban environmental, economic, social, and health contexts, while maintaining environmental sustainability. Students in this program will be prepared for jobs in impact areas related to food systems, such as government, non-governmental organizations, institutional food buyers, investment firms, financial and insurance companies, industry, retail, and food service. Alternatively, students may choose to pursue post-baccalaureate education, including law school and graduate school in food systems or in specific areas of the food system. Because the MFST curricula includes required training in STEM education, critical thinking, scientific literacy, communication and leadership, students will obtain the skills necessary to traverse an ever-changing job market and have the freedom to choose from many career-life options.

A minimum of 127 credit hours are required for graduation, including General Education Requirements and the MFST Core Curriculum. Because the core curriculum includes many College of Agricultural, Consumer and Environmental Sciences (ACES) departmental course requirements, the students in MFST have the unique opportunity to minor in many of the ACES departments or to delve deeper into a food system area of interest in addition to the core courses, including (but not limited to) advanced nutrition, plant or animal production, food processing, food safety, environmental sustainability, climate change, or landscape architecture.

Students are admitted to Middle Grades Education as freshmen. In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional grade point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. For teacher education licensure applicable to all curricula, see the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Students in the Middle Grades Education licensure program must complete the Campus General Education Requirements, the courses for one or more concentration (literacy, social sciences, science or math) and the professional education coursework.

Total minimum hours for degree 4 | 120

**Notes:**
1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2. If seeking the Science concentration, exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with adviser for further information.
3. PSYC 100 is a prerequisite for EPSY 201.
4. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement.

### Concentration Requirements
Some concentration courses can count towards the general education requirements. Courses in concentrations may not be allowed to count for more than two degree requirements. If you have questions, see your adviser.

### Code | Title | Hours

Learning Outcomes: Middle Grades Education, BS

Learning Outcomes for the degree of Bachelor of Science in Middle Grades Education

1. Students will acquire deep knowledge of content in the field of Education
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction for elementary students, grades 5-8.
3. Students will use data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

Molecular & Cellular Biology, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

school website: https://mcb.illinois.edu/undergrad/
school faculty: School Faculty (https://mcb.illinois.edu/people/)
advising: MCB advising (https://mcb.illinois.edu/undergrad/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad@mcb.illinois.edu

The Molecular and Cellular Biology major provides students with a solid preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology. Students will also acquire a strong background in chemistry, math and physical sciences. After completion of the core curriculum in MCB, students may complete the required advanced course work by taking a variety of MCB courses or by selecting a more focused group of courses in any of the following areas: biochemistry, cells and tissues, developmental biology, infection and immunity, microbiology, genetics, neurobiology and physiology. The MCB Advising Program (MAP) staff is available to help students plan their combination of advanced courses.

For students interested in adding licensure to the BSLAS in Molecular & Cellular Biology, please visit the Biology Teaching page: http://mcb.illinois.edu/undergrad/advising/teaching/

Undergraduate degree programs in Molecular & Cellular Biology

Biochemistry, BS (p. 68)
Molecular & Cellular Biology, BSLAS (p. 293)
Molecular & Cellular Biology Honors Concentration, BSLAS (p. 294)

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

Certain advanced courses may be taken prior to completion of the MCB 250-MCB 253, MCB 354 sequence with permission of an academic advisor. A minimum of 15 hours of 300- or 400-level courses in MCB from the approved list is required.

In addition, undergraduate research (MCB 290, or departmental equivalent) is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290, or departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

Students earning a degree in Molecular and Cellular Biology may not also earn a second degree in the Specialized Curriculum in Biochemistry.

Students earning a degree in Molecular and Cellular Biology may not double major in Integrative Biology.

Distinction

Students in MCB can qualify for Distinction via one of the following:

Distinction for Excellence in Research:
To be eligible for graduation with Distinction a student must:

1. Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

Distinction for Excellence in Academics:
To be eligible for graduation with Distinction a student must:

1. Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

Distinction for Excellence in Research:
To be eligible for graduation with High Distinction a student must:

1. Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

1. Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

For students interested in adding licensure to the BSLAS in Molecular & Cellular Biology, please visit the Biology Teaching page: http://mcb.illinois.edu/undergrad/advising/teaching/
Molecular & Cellular Biology, Honors Concentration

Minimum required major and supporting course work: 67-71 hours, including 21 hours of 300- or 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB concentration (http://catalog.illinois.edu/undergraduate/las/academic-units/molecular-cell-bio/molecular-cellular-biology-concentration/). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (http://mcb.illinois.edu/undergrad/honors/) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

Distinction for Excellence in Research:

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Information listed in this catalog is current as of 10/2020
Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

- Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more.
- Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester.
- Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.
- Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

- Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 67-71 hours, including 21 hours of 300- to 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

### Learning Outcomes: Molecular & Cellular Biology, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

Upon successful completion of the Molecular & Cellular Biology undergraduate curriculum, students will be able to:

1. understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection and genetic change.
2. illustrate that fundamental structural units define the function of all living things.
3. explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. summarize that biological systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of physics.
5. illustrate that living systems are interconnected and interacting across scales of space and time.
6. design a scientific process and employ the scientific method, demonstrating that biology is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
7. execute quantitative analysis to interpret biological data.
8. construct and utilize predictive models to study and describe complex biological systems.
9. apply concepts from other sciences in order to interpret biological phenomena.
10. communicate biological concepts and understanding to members of a diverse scientific community as well as to the general public.
11. identify social and historical dimensions of biological investigation.

### Music Composition, BMUS

for the degree of Bachelor of Music Major in Music Composition
In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

for the degree of Bachelor of Music Major in Music Composition

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

Minimum required major and supporting course work: If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

### Electives as needed to total 130 hours

1. The Language Requirement may be satisfied by successfully completing a third-semester college-level course in a language other than English; successful completion, in high school, of the third year of a language other than English; or demonstrating proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

2. Six hours of general education requirements in the Humanities and the Arts are met by courses required in the BMUS degree (MUS 313 and MUS 314).

3. The music theory electives for the third and fourth years are to be chosen from MUS 404 (may be repeated to a maximum of six semester hours), MUS 405, MUS 407, MUS 408 (may be repeated to a maximum of six semester hours in addition to MUS 408, sections D or E), MUS 409, and MUS 499 (may be repeated to a maximum of four semester hours; senior standing in music required). If the curricular emphasis is in music theory, the following will apply: juniors will substitute an additional three semester hours of MUS 408 for MUS 406; seniors will substitute an additional 400-level music history course for MUS 406. Note: The 14 hours of theory electives include the six hours of two courses that were retired in Fall 2017: MUS 402 and MUS 425.

4. Students who completed two years of French, German, or Italian in high school have met this requirement. Other languages may be chosen with permission of the composition-theory adviser. Completion of this requirement does not complete the General Education language requirement.

Information listed in this catalog is current as of 10/2020
Learning Outcomes: Music Composition, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Music Composition

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.

2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.

3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.

4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.

5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.

6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Music Education, BME

For the degree of Bachelor of Music Education Major in Music Education

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte-s.education.illinois.edu/dotnet/webpages/webpage.aspx). Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) GPA of 2.75, and professional education course GPA of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

All music education students must earn a grade of C- or better in all music and education courses required for licensure.

- MUS 404 Contemp Compos Techniques 2
- MUS 407 Elect Music Techniques I 3
- MUS 409 Elec Music Techniques II 2
- MUS 433 Music Interdisciplinary Curriculum 2
- MUS 435 Jazz Aural Skills I 2
- MUS 437 Popular Music Pedagogy 2
- MUS 440 Marching Band Procedures 2
- MUS 444 Healthy Music Practices 2
- MUS 446 Songwriting 2
- MUS 447 Advanced Music Ed Technology 2
- MUS 448 Computer Music 3
- MUS 449 Teaching Young Singers 2
- MUS 499 Proseminar in Music (Section ART) 3
- THEA 399 Undergraduate Group Seminar (Section RS) 3
- THEA 453 Introduction to Theatre Sound 3
- THEA 454 Sound Design I 3

1 PSYC 100 is prerequisite to EPSY 201, required in all teacher education programs.
2 Quantitative Reasoning I is satisfied by students in the Technology concentration selecting CS 105 as a Technique course or elective.
3 The Language Requirement may be satisfied by successfully completing a third-semester college-level course in a language other than English. Successful completion, in high school, of the third year of a language other than English; or demonstrating proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.
4 At least 19 hours of general education requirements are met by courses required by the BME.
Enrollment in the applied major is normally expected during the first six semesters, 2 semester hours each.

All music education majors are required to participate in an approved ensemble every semester in residence.

All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173

Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school licensure is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student’s applied major, music theory, or music history.

</tr>
</tbody>
</table>

1. PSYC 100 is prerequisite to EPSY 201, required in all teacher education programs.
2. Quantitative Reasoning I is satisfied by students in the Technology concentration selecting CS 105 as a Technique course or elective.
3. The Language Requirement may be satisfied by successfully completing a third-semester college-level course in a language other than English; successful completion, in high school, of the third year of a language other than English; or demonstrating proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.
4. At least 19 hours of general education requirements are met by courses required by the BME.
5. Enrollment in the applied major is normally expected during the first six semesters, 2 semester hours each.
6. All music education majors are required to participate in an approved ensemble every semester in residence.
7. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.
8. Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school licensure is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student’s applied major, music theory, or music history.

### Technique Course Requirements: 8 credit minimum to be selected with advisor, from lists A, B, and C.

#### List A: Choose 2 credits (of the 8 total requirements for Techniques courses) from the list below:

Learning Outcomes: Music Education, 
BME

Learning outcomes for the degree of Bachelor of Music Education Major in Music Education

1. The well prepared music teacher has in-depth understanding of content area knowledge that includes central concepts, methods of inquiry, structures of the discipline, and multiple forms of music literacy.
2. The well prepared music teacher plans and designs instruction based on content area knowledge; diverse styles, genres, and repertoires; diverse student characteristics; student performance data; curriculum goals; and the community context.
3. The well prepared music teacher differentiates instruction by using a variety of strategies that support critical and creative thinking, problem-solving, and continuous musical growth and learning.
4. The well prepared music teacher understands and uses appropriate formative and summative assessments for determining student needs, monitoring student progress, measuring student growth, and evaluating student outcomes.
5. The well prepared music teacher is an ethical and reflective practitioner who promotes a culture of professional inquiry.

Music, BA

for the degree of Bachelor of Arts Major in Music

deptartment website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

The Bachelor of Arts with a Major in Music is a 120-hour degree that is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students to select a specific area of study, called an "option." An option consists of advanced music courses and supporting (non-Music) coursework. The coursework is determined in consultation with the student's advisor. Current options include music technology, music theory, composition, and various branches of musicology, or students may work with an advisor to explore alternate options not listed here (music + "your choice").

BA students work with their BA advisor to designate supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students should designate their option by no later than the start of the spring semester of the sophomore year.

For admission requirements for the Bachelor of Arts in Music, please see the School of Music's Admissions website (http://www.music.illinois.edu/prospective-students/) or contact the Music Admissions Office: Music Admissions Office

School of Music: 1114 W. Nevada Street, Room 2014 Urbana, IL 61801
Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

for the degree of Bachelor of Arts Major in Music

Minimum required major and supporting coursework: normally equates to 48-50 hours excluding the keyboard skills (MUS 172 and MUS 173) requirement, and includes 37-41 hours in music courses, 29-31 hours in core courses. Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music. Credits earned in applied music lessons are generally considered elective.

Learning Outcomes: Music, BA

Learning outcomes for the degree of Bachelor of Arts Major in Music

Bachelor of Arts in Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
4. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
5. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
6. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
7. Appreciate how music interacts in communities to enhance and engage social and cultural identities to enrich lifelong learning.

Computer Science + Music, BS

for the degree of Bachelor of Science in Computer Science and Music

Computer Science "CS + X" degree information: https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs#requirements

School of Music website: https://music.illinois.edu/

Music Admissions email: musicadmissions@illinois.edu

The Bachelor of Science in Computer Science & Music (CS + Music) is designed for students who plan to pursue a career in music technology, as well as students who want to push the state-of-the-art in music composition and explore new avenues of expression. This degree will prepare students for advanced study at the graduate level for many existing programs in music and audio technology, as well as equip them with the proper skills to successfully join and lead a vibrant workforce centered around the creation and distribution of entertainment media through constantly evolving technological platforms.

The CS + Music curriculum provides a broad knowledge of the theory, design, and application of computer systems integrated with the theory, history, and application of music. The curriculum is formed around courses in music, mathematics, science, and computation. Advanced coursework includes either a senior thesis or a senior project. A minimum of 120 hours is required for graduation.

For admission requirements for the Bachelor of Science in CS + Music, please see the School of Music’s Admissions website (listed above) or contact the Music Admissions Office.

Cultural Studies: US Minority Culture(s) 3
Social and Behavioral Sciences 6
Quantitative Reasoning I and II 6

Total hours required for graduation 120

1 Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
2 All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.
3 A Major Plan of Study Form must be completed and submitted to the School of Music Undergraduate Academic Advisor (Music Building 2058) before the end of the fifth semester (60-75 hours). Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus. Please see your BA Music advisor, or the Undergraduate Academic Advisor, for assistance in completing the form.
4 Advanced music courses are at the 300- or 400-level. The Senior Project is generally included in this area.
5 Supporting Coursework is outside the School of Music and is chosen in consultation with an advisor.

Learning Outcomes: Instrumental Music, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Instrumental Music

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and
awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.

6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Jazz Performance, BMUS

for the degree of Bachelor of Music Major in Jazz Performance

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, guitar, or voice as the major instrument.

Minimum required major and supporting course work: Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242.

**Total Hours required for graduation** 130

1 Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2 Of the eight semesters of applied music, two semesters (4 hours) must be in classical applied study.
Learning Outcomes: Jazz Performance, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Jazz Performance

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Musicology, BMUS

for the degree of Bachelor of Music Major in Musicology

---

3 All music majors are required to enroll in at least one approved performance ensemble each semester in residence. Jazz Performance majors register for at least one Jazz ensemble each semester. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.

4 All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. For students with no keyboard skills, MUS 172 and MUS 173 taken in the first year, followed by Jazz Keyboard I and II in the second year will satisfy the secondary applied instrument requirement. For students whose principal instrument is piano, a secondary instrument or jazz voice may be chosen as a substitute for MUS 172, MUS 173 and Jazz Keyboard I and II, in consultation with the advisor.

5 MUS 436 now replaces MUS 499 (Proseminar in Music).
Learning Outcomes: Musicology, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Musicology

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.

2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.

3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.

4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.

5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.

6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Music-Open Studies, BMUS

for the degree of Bachelor of Music Major in Music-Open Studies

department website: https://music.illinois.edu

department faculty: Music Faculty (https://music.illinois.edu/people/)

college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)

college website: https://faa.illinois.edu/

The Open Studies major allows students to focus on diverse fields such as music of other cultures, piano pedagogy, music technology, sound engineering, theatre, social or behavioral science, or any other areas of particular interest. Open Studies requires completion of the common requirements for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the assistant dean of undergraduate affairs in the College of Fine and Applied Arts. Additional information may be obtained from the:

Music Admissions Office
School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801

Information listed in this catalog is current as of 10/2020

Voice, BMUS

for the degree of Bachelor of Music Major in Voice

- [department website](https://music.illinois.edu)
- [department faculty](https://music.illinois.edu/people/)
- [college catalog page](http://catalog.illinois.edu/faa/) Fine & Applied Arts
- [college website](https://faa.illinois.edu/) https://faa.illinois.edu/

The Voice Performance degree is designed to develop skilled performers in all areas of vocal techniques. Voice majors learn the appropriate stylistic approaches to the vocal literature of various historical periods and also study Italian, French, and German in order to better master the diction of works performed in these languages. There are opportunities to perform onstage throughout the degree program either in solo performance or in group productions with our Lyric Theatre program.

For Jazz Voice, please visit the BMUS-Jazz Performance pages.

Minimum required major and supporting course work:

At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

Natural Resources & Environmental Sciences, BS

for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences

department website: https://nres.illinois.edu/
department faculty: https://nres.illinois.edu/directory/faculty
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Students pursuing this major select one of four concentrations:

- Ecosystem Stewardship & Restoration Ecology (p. 314)
- Environmental Science & Management (p. 316)
- Fish, Wildlife & Conservation Biology (p. 317)
- Human Dimensions of the Environment (p. 318)

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world's most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

Natural Resources & Environmental Sciences: Ecosystem Stewardship & Restoration Ecology, BS

for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences, Ecosystem Stewardship & Restoration Ecology Concentration

Information listed in this catalog is current as of 10/2020
Ecosystem Stewardship and Restoration Ecology emphasizes the ecology, structure, and function of ecosystems, with a particular focus on plant communities and their interactions with the living and non-living parts of ecosystems. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. The concentration includes coursework in the areas of restoration, landscape, and plant ecology, as well as courses focused on specific ecosystems (e.g. streams, wetlands, agroecosystems), invasive species, community ecology, and ecosystem science.

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Environmental Science and Management emphasizes the biological, chemical, and physical features of the environment. It is designed for students interested in the management of soil and water resources and in understanding how to protect and improve environmental quality. The concentration includes coursework in environmental chemistry, environmental microbiology, ecohydrology, and environmental quality, as well as courses focused more specifically on soil and water sciences.

**college website:** https://aces.illinois.edu/

Fish, Wildlife and Conservation Biology emphasizes the ecology, conservation, and sustainable management of fish and wildlife species and communities. It is designed for students interested in understanding interactions among humans, wild animals, and their habitats. The concentration includes coursework in conservation of threatened and endangered species, management of harvested species, aquatic ecosystem conservation, animal behavior, vertebrate natural history, identification of animals and plants, and advanced ecology.

**department website:** https://nres.illinois.edu/ (https://ace.illinois.edu/)

**department faculty:** https://nres.illinois.edu/directory/faculty (https://nres.illinois.edu/directory/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)

**college website:** https://aces.illinois.edu/

Human Dimensions of the Environment emphasizes the social scientific interpretations of human-environment interactions at multiple levels, as well as applied policy and management implications. This concentration requires advanced coursework in behavior change science, natural resource economics, environmental and conservation psychology, communications, social impact assessment, environmental policy, and environmental law. Students who have completed degrees in this concentration have gone on to careers in natural resource management, environmental policy, law, advocacy, and education.

Learning Outcomes: Natural Resources & Environmental Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences (NRES)

Students graduating with the B.S. in NRES should be able to:

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/ environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade-offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

Nuclear, Plasma, & Radiological Engineering, BS

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

Nuclear, plasma, and radiological engineering is a branch of engineering that is concerned with the development and use of nuclear energy and radiation sources for a wide variety of applications in energy production, in materials processing and science, and for biomedical and industrial uses. Areas of interest include the continued safe and reliable application of fission reactors as central electric power plant thermal sources; plasma processing applications and the longer term development of fusion reactors for electric power generation; and the use of radiation sources in such areas as materials, biological systems, medical treatment, radiation instrumentation, environmental systems, and activation analysis.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to digital computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in bioengineering. To complete this concentration area, students should take certain chemistry and biology courses in the first two years of the curriculum.

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103).

**Total Hours of Curriculum to Graduate** 128

Information listed in this catalog is current as of 10/2020
External transfer students take ENG 300 instead.

Math 220 may be substituted, with four of the five credit hours applying toward the degree. Math 220 is appropriate for students with no background in calculus.

Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212.

Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.

The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/npre-map/).

Learning Outcomes: Nuclear, Plasma, & Radiological Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Nuclear, Plasma, & Radiological Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Operations Management, BS

for the degree of Bachelor of Science in Operations Management

overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/) college website: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

The Operations Management (OM) Major prepares students for careers in manufacturing and service management, operations strategy consulting, purchasing and supply management, project management, and quality management. OM professionals work with most other units in any organization, more so with engineering, human resource management, information systems, and marketing. The OM curriculum focuses on analytical decision-making, logistics, new product development, operations strategy, process improvement, project management, quality control, and supply chain management. Students are trained in ways of developing, making, and delivering goods and services efficiently and effectively – generating value by satisfying ever-changing customer needs while improving profitability.

for the degree of Bachelor of Science in Operations Management
Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accounntancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once a student may also meet this requirement by completing two single language in high school satisfies this requirement. A primary language is required. Completion of four years of a non-primary languages to the third level.

Minimum hours required for graduation: 120 hours.

Total Hours 58

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.
2 BUS 101 and BUS 201 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 101 and BUS 201 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.
3 MATH 220 or MATH 221 may be substituted for MATH 234. (See college mathematics requirement above.
4 Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.
5 Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete on course in the Physical Sciences and Life Sciences subcategories.
6 This course includes limited voluntary participation as a subject in experiments.

Chose one of the following elective courses: 1

Information listed in this catalog is current as of 10/2020
Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one’s ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

Learning Outcomes: Operations Management, BS
Learning Outcomes for the degree of Bachelor of Science in Operations Management

1. Disciplinary Competence: Students demonstrate an understanding of fundamental operations concepts, key principles of its management, and relevant analysis approaches.
2. Critical Thinking: Students demonstrate the ability to understand a real-world unstructured problem, and gather necessary information and data to formulate into a structured problem.
3. Problem Solving: Students demonstrate ability to develop quantitative and qualitative analysis framework and solution methods, and appropriately implement them to obtain meaningful solutions.
4. Decision making: Students demonstrate ability to identify strengths and weaknesses of alternative solutions and obtain relevant managerial insights.
5. Communication: Students express themselves logically, persuasively and succinctly & using correct grammar and composition when communicating in oral or written form.

Philosophy, BALAS
for the degree of Bachelor of Arts in Liberal Arts and Sciences: Major in Philosophy

department website: http://www.philosophy.illinois.edu/
department faculty: Philosophy Faculty (https://philosophy.illinois.edu directory/faculty/)
advising: Philosophy advising (https://philosophy.illinois.edu/academics/undergraduate-studies/advising/)
email: phildept@illinois.edu
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues...
Learning Outcomes: Philosophy, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Philosophy

The Philosophy Department aims to produce four main learning outcomes.

1. Philosophical Knowledge: Students will be familiar with major figures and movements in the history of western philosophy; familiar with central topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and familiar with current developments in professional philosophy.

2. Philosophical Reading: Students will develop the ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.

3. Philosophical Inquiry: Students will develop the ability to formulate abstract principles in epistemology and metaphysics, in ethics and value theory, in logic, and in related special topic areas in philosophy; they will develop the ability to identify consequences of the principles they formulate; and they will develop the ability to construct arguments for those principles and compare them to competing principles.

4. Philosophical Writing: Students will develop the ability to write clearly and with logical precision on a wide range of important issues, including (but not limited to): civic and social challenges at local, national, and global levels; social and cultural issues related to race, indigeneity, gender, class, sexuality, language, and disability; and the ways that complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions.

Photography, BFA

for the Bachelor of Fine Arts Major in Photography

school office: 143 Art and Design Building, Champaign, IL 61820
contact: Mark Avery, Coordinator of Undergraduate Academic Affairs
email: mavery@illinois.edu
phone: (217) 333-6632
department website: School of Art & Design (https://art.illinois.edu/)
department faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faq/)
college website: https://faa.illinois.edu/

The curriculum in photography requires 122 credit hours; its purpose is to encourage the study of photographic media for personal expression, to explore the social implications of pictures, and to develop the skills needed for careers in photography. General art requirements and electives provide a broad foundation in the visual arts, and photography courses provide a strong background in the history, theory, and practice of photography as art.

A portfolio review is required for admission to the School of Art and Design.

for the Bachelor of Fine Arts Major in Photography

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Photography, BFA

Learning outcomes for the Bachelor of Fine Arts Major in Photography

Undergraduate Photography graduates will have:

1. acquired the ability to control the procedural construct of an image via camera, software and darkroom techniques.
2. an understanding of and an ability to employ photography’s unique narrative structure.
3. acquired a critical appreciation of the historical and social influences of the medium and the ability to evaluate their own work as well that of others via this construct.
4. developed a cohesive body of work demonstrating technical competency and conceptual awareness.

Physics

department website: Physics (https://physics.illinois.edu)
department faculty: Department of Physics Directory (https://physics.illinois.edu/people/directory/)
email: undergrad-info@physics.illinois.edu
overview of college admissions & requirements: LAS admissions information (https://www.las.illinois.edu/prospective/)
college website: Liberal Arts & Sciences (https://las.illinois.edu/)

Students interested in majoring in physics in the College of Liberal Arts & Sciences may choose the Specialized Curriculum in Physics (http://catalog.illinois.edu/undergraduate/las/physics-bs/), leading to the Bachelor of Science Major in Physics, or the Physics Major (http://catalog.illinois.edu/undergraduate/las/physics-bslas/#text), leading to the Bachelor of Science in Liberal Arts and Sciences.

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field.

The Physics Major in the Sciences and Letters Curriculum is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics.

Engineering Physics, BS

for the degree of Bachelor of Science in Engineering Physics

department website: Department of Physics (https://physics.illinois.edu)
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The Engineering Physics curriculum is a flexible program that combines a firm foundation in physics and mathematics with the freedom to choose from a diverse range of technical options. Students may select from a list of pre-approved options or design a custom option, subject to departmental approval. The current pre-approved options, requiring 12-22 credit hours of course work, are:

- Acoustical Physics
- Astrophysics
- Atmospheric Science
- Biophysics
- Business
- Computational Physics
- Computer Engineering
- Energy/Sustainability
- Materials Science
- Nuclear Physics
- Optical Physics
- Law
- Professional Physics
- Solid State Electronics
- Pre-Med
- Pre-Law

The course work is selected in consultation with the student’s advisor to address an intellectually coherent body of knowledge. The curriculum information listed in this catalog is current as of 10/2020
is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

*for the degree of Bachelor of Science in Engineering Physics*

**Graduation Requirements**

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0

TGPA is required for Math and Physics courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Technical/professional option electives or Free electives 6,11 5
Semester Hours 16-15
Total Hours: 128

1 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2 Students with proficiency or advanced placement (AP or IB) credit in MATH 221 are strongly encouraged to enroll in MATH 231 and PHYS 211 for the first semester.

RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.

Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

MATH 285 may be replaced by MATH 441 followed by MATH 442. To be chosen from a departmentally approved list of Technical/Professional Option Electives (http://physics.illinois.edu/current/undergrad/ep_options.asp), in consultation with the student’s advisor, for the option elected (or a list fashioned for a departmentally approved custom option). The number of credit hours varies 12-22 depending upon the option chosen.

The flexible physics core requirement consists of three courses chosen from a departmentally approved list of Flexible Physics Core Electives with at least one of them being a lab course, PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of credit hours varies 9-15 depending upon the courses chosen.

For courses chosen with more than 3 hours credit, the surplus hours may be used to meet free elective requirements.

To be chosen from a departmentally approved list of Mathematics Electives (http://physics.illinois.edu/undergrad/math-options.asp). Any course satisfying the Mathematics Elective cannot be used to satisfy any other requirement.

10 If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.
11 Taken if needed to complete a technical/professional option requiring more than 12 hours of credit.

Physics, BS (LAS Specialized Curriculum)
for the degree of Bachelor of Science Major in Physics (LAS Specialized Curriculum)

department website: https://physics.illinois.edu
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/)
overview of college admissions & requirements: College of Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad-info@physics.illinois.edu

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. However, students who want to pursue a combined major and minor, a double
major, or a double degree should consider the LAS Science and Letters Curriculum in Physics because of the greater flexibility it offers.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to plan ahead to allow space in their programs for undergraduate research.

_for the degree of Bachelor of Science Major in Physics (LAS Specialized Curriculum)_

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

**Departmental distinction:** Graduation with distinctions awarded to students who complete 8 additional hours of 300- or 400-level physics courses or advanced courses in closely related technical subjects and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

**General education: Students must complete the Campus General Education [requirements including the campus general education language requirement](https://courses.illinois.edu/).**

_Minimum required major and supporting course work: A minimum of 126 hours required for graduation._

_GPA requirements: Students in the Specialized Curriculum beyond the freshman year must maintain an overall grade point average of at least 2.5 and also a grade point average of 2.5 in all required mathematics and physics courses._

### Physics, BSLAS (Sciences & Letters) for the degree of Bachelor of Science in Liberal Arts and Sciences: Major in Physics (Sciences and Letters)

**department website:** https://physics.illinois.edu/

**department faculty:** Physics Faculty (https://physics.illinois.edu/people/directory/)

**overview of college admissions & requirements:** Liberal Arts & Sciences [overview](http://catalog.illinois.edu/schools/las/academic-units/)

**college website:** https://las.illinois.edu/

**email:** undergrad-info@physics.illinois.edu

The Physics Major (Sciences and Letters) is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees.

Students in this major must choose an approved elective technical or professional option no later than the end of the second semester of the sophomore year. A set of pre-approved options is available via the departmental web site (http://physics.illinois.edu/undergrad/las-options.asp) and from the departmental undergraduate studies office. Students may also design and follow a "custom option" subject to departmental approval. Students completing the Astrophysics option will earn a minor in Astronomy, if appropriate Minor form is filed.

_Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement_

Information listed in this catalog is current as of 10/2020
in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to plan ahead to allow space in their programs for undergraduate research.

for the degree of Bachelor of Science in Liberal Arts and Sciences: Major in Physics (Sciences and Letters)

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Graduation with distinction is awarded to students who complete 8 additional hours of 300- or 400- or 500-level physics courses or advanced courses in closely related technical subjects, and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 65-73 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

GPA requirements: Students in the major must maintain an overall grade point average of at least 2.0 and also a grade point average of at least 2.0 in all required physics and mathematics courses. To be permitted to enroll in advanced physics courses in this major a student must maintain at least a 2.0 average in all attempts at science and mathematics courses taken at the University of Illinois.

Physics: Physics Teaching, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences, Major in Physics (Sciences and Letters), Physics Teaching Concentration

department website: https://physics.illinois.edu/
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/)

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad-info@physics.illinois.edu

This concentration fulfills state certification requirements to teach high school physics (grades 9-12) through the AP/honors level and general science (high school biology, chemistry, earth and space science, and environmental science up to but not including the AP/honors level).

Time to degree completion varies. Minimum time to completion is 8 semesters, some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook for more information.

for the degree of Bachelor of Science in Liberal Arts and Sciences, Major in Physics (Sciences and Letters), Physics Teaching Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Distinction is determined by a combination of grade point average and achievement in student teaching. The student’s practice teaching experience will be evaluated by the departmental honors adviser and the teaching supervisor. Distinction requires a 3.2 grade point average; high distinction, 3.4; highest distinction, 3.6. Students desiring distinction should consult with the departmental honors adviser during the junior year.
Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 65-73 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Teacher Education requirements: Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching. See the College of Education section for requirements of the minor (http://catalog.illinois.edu/undergraduate/education/seccondary/) (39 hours).

GPA requirements: To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. http://www.cote.illinois.edu/

Minimum hours required for graduation: 120 hours.

Total Hours 39-40

1 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

EDUC 201, EDUC 202 and EPSY 201 can be completed at any time during the degree and are not pre-requisites to apply for the minor.

PSYC 100 is a pre-requisite for EPSY 201.

Plant Biotechnology, BS

for the degree of Bachelor of Science Major in Plant Biotechnology

Department website: https://cropsciences.illinois.edu/

Department Faculty: https://cropsciences.illinois.edu/people/faculty

Overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

College website: https://aces.illinois.edu/

Biotechnology is now a part of our daily lives in applications such as developing nutritionally enhanced foods, enabling sustainable...
agricultural production, and engineering plants for industrial and medical purposes. The plant biotechnology major provides an interdisciplinary curriculum integrating the science and practice of crop production through courses in molecular biology, genetics and genomics, biochemistry, plant protection, and data analysis. The program also offers many opportunities to participate in research and internships. This curriculum prepares students for careers in biotechnology or for entrance into graduate and professional schools. Our students pursue employment in scientific research or fields related to the biotechnology enterprise including science policy, patent law, and business development.

Political Science, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science

Students must complete one concentration in consultation with an academic advisor.

- Citizen Politics Concentration (p. 337)
- Civic Leadership Concentration (p. 338)
- General Political Science Concentration (p. 339)
- International Relations Concentration (p. 339)
- Law & Power Concentration (p. 340)
• Public Policy & Democratic Institutions Concentration (p. 341)
• World Politics Concentration (p. 342)

5 Year BALAS / MA in Political Science and European Union Studies

The Department of Political Science, along with the European Union Center, offers a 5 year BALAS / MA in Political Science and European Union Studies. In order to be admitted to this degree program, students apply through a joint application process to their BALAS – granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Departmental distinction

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
   c. Earn a grade point average in of 3.67 or higher.
2. Honors Program Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
   c. Be admitted to and maintain good standing within the departmental honors program, and
   d. Complete required coursework in the departmental honors program with a grade point average in and between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of or or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) of political science on this campus,
4. Application and affirmative vote of a departmental committee.

High Distinction

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in and of 3.67 or higher.

Political Science: Citizen Politics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration

department website: https://www.pol.illinois.edu
department faculty: Political Science Faculty (https://pol.illinois.edu/directory/faculty/)
advising: Political Science advising (https://pol.illinois.edu/academics/undergraduate-program/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: pol@illinois.edu

Citizen politics is the study of mass politics. Topics include how and why citizens form political attitudes, beliefs, and identities; how people engage in political decision-making; and what political behaviors individuals choose to participate in.

See the Political Science BALAS page (p. 336) for departmental distinction information.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration

See the Political Science BALAS page (p. 336) for departmental distinction information.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor.

Restrictions: Except as otherwise noted, or by petition to the department, PS 191, PS 291, PS 292, PS 490, PS 491, and PS 492 are excluded from all concentration lists maintained by the department. These courses may be used only for requirements of courses “at any level” without respect to concentration. As an exception, these courses may be used toward the General Concentration or the Civic Leadership Concentration.

Students may include in the major no more than nine hours from any combination of PS 291, PS 292, PS 490, PS 491, and PS 492. Of these, only six hours from PS 490, PS 491, and PS 492 within that group can count toward the major.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Citizen Politics Concentration Requirements

**Political Science: General Political Science, BALAS**

*for the degree of Bachelor of Liberal Arts & Sciences Major in Political Science, General Political Science concentration*

**Political Science: International Relations, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, International Relations Concentration*
International relations (IR) is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors across the interstate system.

Students take advanced courses in two or more of the following topics: international law and organization, international cooperation, international political economy, globalization, foreign policy, diplomacy, political strategy in IR, conflict, interstate war, civil war, terrorism, global environmental politics, and international human rights.

See the Political Science BALAS page (p. 336) for departmental distinction information.

Political Science: Law & Power, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Law and Power Concentration

Information listed in this catalog is current as of 10/2020
The Law and Power concentration teaches students about how power, law, and ideas about justice shape political life. Courses cover questions concerning the procedures for social and legal change, the status of citizens in social and political institutions in society, and the ways that ideology and identity categories shape the pursuit of equality and justice.

See the Political Science BALAS page (p. 336) for departmental distinction information.

Information listed in this catalog is current as of 10/2020
See the Political Science Distinction page (p. 336) for departmental distinction information.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

Learning Outcomes: Political Science, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science

1. Students will be able to apply central concepts of the scientific method to the study of politics, and demonstrate an ability to draw inferences from data.
2. Students will have a foundational knowledge of facts, concepts, and typologies in their chosen subfield in political science.
3. Students will be able to demonstrate basic knowledge of central theories in their chosen subfield and show how to evaluate those theories.
4. Students will be able to define political science and its subfields, drawing contrasts with other social sciences.
5. Students will be able to apply concepts, methods, and theories to research projects, internships, and/or off-campus experiences.

Undergraduate degree programs in Spanish & Portuguese

Spanish, BALAS (p. 366)

Teaching of Spanish, BA (p. 401)
Portuguese, BALAS (p. 343)

For the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Portuguese

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A = 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 42-45 hours including at least 27 hours in Portuguese courses beyond the 100 level.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Learning Outcomes: Portuguese, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Portuguese

1. Students learn and practice the nuances of the language in all of its written and spoken modes, formally and informally
2. Students demonstrate special cultural and linguistic literacy in relation to Portuguese and the ability to use concepts and methods from multiple disciplines
3. Students know the history of Brazil’s interplay with Latin America and the Lusophone world
4. Students evaluate the dynamics of power between dominant and subordinate groups in Brazil, especially through the lens of class, ethnicity, gender, race, and sexuality
5. Students gain a global perspective on civil society and social justice through Brazil and the Portuguese language

Psychology, BSLAS

Students choose from the following concentrations:

- Behavioral Neuroscience (p. 345)
- Clinical/Community Psychology (p. 346)
- Cognitive Neuroscience (p. 347)
- Cognitive Psychology (p. 348)
- Developmental Psychology (p. 349)
- Diversity Science (p. 349)
- Intradisciplinary Psychology (p. 350)
- Organizational Psychology (p. 351)
- Personality Psychology (p. 351)
- Social Psychology (p. 352)

The Psychology major is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others.

The Psychology major provides both depth and breadth of knowledge in Psychology. The major consists of an introductory course, a statistics course, a breadth of knowledge or foundation in the different areas of psychology that comes from a set of core courses, a research methods course, and elective courses that give students a depth of knowledge. Each concentration, except for intradisciplinary psychology, has a core course specific to that area of psychology with a research methods course designed for that concentration. In formulating their Plan of Study, students can decide either to undertake a concentration in Intradisciplinary Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by
fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

The Department of Psychology also offers a BSLAS in Brain & Cognitive Science (p. 74).

Academic Advising
The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Areas of Interest
Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major:

• Behavioral Neuroscience is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organicistic processes.
• Clinical psychology is the study of problems encountered by individuals, groups, and families – especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.
• Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.
• Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.
• Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.
• Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.
• Engineering psychology is the study of human behavior in the context of interactions between humans and machines.

• Organizational psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.
• Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual’s behavior and to predict an individual’s future behavior.
• Quantitative psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.
• Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.
• Visual cognition and human performance is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Prescribing Psychologists
The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

• 2-semester course sequence in chemistry or biochemistry with lab
• 1 semester microbiology with lab
• 1 semester general biology for science majors
• 1 semester physiology
• 1 semester human anatomy
• 1 semester physiology and anatomy
• Medical terminology (class or proficiency)

For more information on becoming a prescribing psychologist and a detailed list of which courses meet these requirements, please consult with one of the academic advisors in psychology.

Learning Outcomes: Psychology, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology

The student learning outcomes are adapted from the American Psychological Association’s (APA) “Guidelines for the Undergraduate Psychology Major” (2013). These guidelines consist of general learning outcomes along with specific indicators that can be assessed. Two sets of indicators are provided by the APA depending on whether a student has completed just the foundational courses (100# and 200# level classes) or is finishing the elective courses (300# and 400# level classes) necessary for each concentration within the Psychology major. The four learning outcomes that we will be evaluating are:

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes, 1.2) developing a working knowledge of the different content or program areas in psychology, and 1.3) describing the application of psychology to everyday life.

2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific reasoning to interpret psychological phenomena; 2.2) demonstrating psychology information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.

3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels.

4. Students will be prepared to apply psychology-specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply psychological content and skills to career goals; 4.2) demonstrate project#management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

Recreation, Sport & Tourism, BS

for the degree of Bachelor of Science Major in Recreation, Sport & Tourism

department website: http://rst.illinois.edu/
department faculty: Recreation, Sport, & Tourism Faculty (http://rst.illinois.edu/faculty/)
college catalog page: Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
college website: http://ahs.illinois.edu/
The Recreation, Sport & Tourism, BS degree program includes a set of three concentrations, of which a student must complete at least one:

Recreation Management Concentration (p. 354)
Sports Management Concentration (p. 355)
Tourism Management Concentration (p. 356)

The Department of Recreation, Sport and Tourism (RST) originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals in the field. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver RST services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating theory, management, and research, the program allows students to focus on a major market segment within the RST field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 219 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses (RST 480 and RST 485). Students register for RST 480 after completing a series of required RST courses. During this semester, students make final arrangements for completing RST 485 the following semester.

The RST 485 Internship is taken after the student satisfactorily completes all required RST course work, including RST 480. RST 485 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

## Learning Outcomes: Recreation, Sport & Tourism, BS

*Learning outcomes for the degree of Bachelor of Science Major in Recreation, Sport & Tourism*
Students graduating with the B.S. in Recreation, Sport & Tourism should be able to:

1. Communicate effectively in writing and in oral presentations about issues in recreation, sport and tourism.
2. Demonstrate a basic understanding of the history and theoretical underpinnings of recreation, sport and tourism in modern society.
3. Demonstrate basic knowledge about various dimensions of diversity, and the impact these dimensions have on service delivery recreation, sport and tourism organizations.
4. Demonstrate a basic understanding of the essential management functions necessary to deliver and manage services in recreation, sport and tourism organizations.
5. Demonstrate an ability to apply knowledge of basic management principles to professional practice.
6. Demonstrate the ability to design, implement, and evaluate services in recreation, sport and tourism venues.
7. Identify basic research methodologies at a level sufficient to collect, analyze, apply, and critique applied research data.

Religion, BALAS
for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion
department website: https://www.religion.illinois.edu/
department faculty: Religion Faculty (https://www.religion.illinois.edu/directory/faculty/)
advising: Religion advising (https://las.illinois.edu/academics/advising/)

college website: https://las.illinois.edu/
email: religion@illinois.edu

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser’s office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser’s office.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental adviser.

Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

Language Requirements
The major in Religion does not require any language study beyond meeting the University’s general education language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate language study.

Capstone Experience
Research paper for one 400-level course in Religion (REL): Each major must make special arrangements with a professor teaching a 400-level REL course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each Religion major has conducted a significant research project. REL 493 can be used to satisfy this requirement.

Departmental distinction
To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of REL 493. The level of distinction is based on evaluation of the thesis.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A minimum of 30 hours of coursework is required for the major. This includes (a)REL 230 or REL 231, and (b) completing a Capstone course. At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

<table>
<thead>

</tbody>
</table>
1 Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the primary area of study cannot also be used to fulfill the secondary area of study.

Learning Outcomes: Religion, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

1. Students will be able to understand and explain how global religious traditions reflect the social contexts in which they emerged, and in turn how the traditions have affected and continue to affect those societies;
2. Students will be able to analyze, and interpret (in both written and oral communication) the relationship between religious traditions and other forms of human cultural and social activity, including languages, literature, arts, political and social movements;
3. Students will be able to appreciate the diversity of global religious traditions and express that appreciation in activities and experiences meaningful to them.
4. Students will be able to develop sound and well-formed written arguments on matters of interest to them that respond insightfully to scholarship significant to their field of study.
5. Students will be able critically to assess and evaluate theories, arguments, and positions that have shaped the fields of the study of religion and individual global traditions.

Russian, East European, & Eurasian Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

department website: https://reeec.illinois.edu/
department faculty: Russian, East European, & Eurasian Studies (https://reeec.illinois.edu/people/groups/faculty/) Faculty (https://reeec.illinois.edu/people/groups/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/elas/academic-units/)
college website: https://las.illinois.edu/
email: reec@illinois.edu

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student’s interests and career goals, in consultation with the undergraduate advisor of the Center.

The major in Russian, East European, and Eurasian Studies consists of three components: 1) language study (Russian, Polish, Czech, Ukrainian, Bosnian-Croatian-Serbian, Turkish, and more); 2) a multidisciplinary area studies focus; and 3) concentration in a single discipline. Language study can be in Russian or in any of the other languages of the region offered at the University. Students also take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. In addition, the concentration in a single discipline provides students with deep knowledge of a specific field that can qualify them for graduate or professional study. Many students also use this concentration to double major. With this program, the REEES major provides students with an interdisciplinary focus on issues critical to the region and foundational language training necessary for professional specialization in the area.

Students often go on to careers in government service (foreign service, FBI, CIA) or to work at NGOs (environment, human rights, and other international careers) in addition to publishing, editing, writing, translation, international business, law, teaching, and research.

REEES is one of two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The REEES major has a current affairs focus and multidisciplinary area studies that develops students’ skill sets in the humanities, social sciences, and other fields. The major in Slavic Studies emphasizes the study of language and literature, and students develop intensive cultural literacy and communication skills through humanities-oriented training. Many Slavic Studies majors go on to careers in writing and editing, media, or work with international cultural foundations and organizations. Both majors are excellent preparation for law school or graduate school and careers in teaching or research.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 48 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.
Learning Outcomes: Russian, East European, & Eurasian Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

1. Global Competence and Intercultural Skills
   - Definition: REEES majors will engage and build productive relationships, founded in proficient language skills, with communities, organizations, and individuals across cultures, both at home and abroad.

2. Interdisciplinary Perspective

---

Component 1: Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.

Component 2: Russian and East European studies core courses, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>REES 200</td>
<td>Intro to Russia and Eurasia</td>
<td>6</td>
</tr>
<tr>
<td>REES 201</td>
<td>Introduction to Eastern Europe</td>
<td></td>
</tr>
<tr>
<td>REES 495</td>
<td>Senior Seminar</td>
<td></td>
</tr>
</tbody>
</table>

15 hours: Choose one course from each of three departments other than the department used for component 3 below. The courses comprising the remaining hours of component 2 may be from the same discipline as those under component 3; however, a course may be counted toward the total for only one component. Language courses that concentrate on the basic skills of speaking, listening, reading, and writing cannot be counted as part of this component.

Component 3: Courses in a single discipline. Among those disciplines that are most commonly used with this specialization are anthropology, economics, geography, history, political science, Russian language and literature, and sociology. Among disciplines also used are business administration, comparative literature, education, English, fine arts, French, German, journalism, linguistics, mathematics, music, philosophy, psychology, and various natural sciences. Others are permitted. Consult your advisor.  

1 The Center maintains a list of applicable courses on its web site.
2 If the study of a language is used for this component, 20 hours must be taken beyond the requirement of 6 additional hours outlined under component 1 above.

---

Slavic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies

department website: http://www.slavic.illinois.edu
department faculty: Slavic Faculty (http://www.slavic.illinois.edu/directory/faculty/)
overview of college admissions & requirements: LAS admissions information (https://las.illinois.edu/prospective/)
college website: https://las.illinois.edu/
email: slavic@illinois.edu

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

- Major in Slavic Studies, Czech Studies concentration (p. 360)
- Major in Slavic Studies, Polish Studies Concentration (p. 360)
- Major in Slavic Studies, Russian Language, Literature, & Culture Concentration (p. 361)
- Major in Slavic Studies, South Slavic Studies Concentration (p. 362)
- Major in Slavic Studies, Ukrainian Studies Concentration (p. 362)

Unlike the major in Russian, East European, and Eurasian Studies, which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies

The Department of Slavic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be
conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Learning Outcomes: Slavic Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies

1. Proficiency in the target language associated with the major track of at least intermediate high level on the ACTFL scale, with some control of advanced low functions.
2. Improved and effective writing and communication skills in the English language.
3. Coherent knowledge and functional grasp of the culture(s) and history(ies) of the region or regions and peoples targeted by the major track.
4. Analytical and interpretive abilities making use of the critical tools and methodologies taught in our courses of literary and cultural study.

Social Work, BSW

for the degree of Bachelor of Social Work Major in Social Work

school office: 1010 W. Nevada St., Urbana, IL 61801
director of BSW Program: Brenda Lindsey
director of Undergraduate Social Work: Brenda Lindsey
director of MSW Program: Brenda Lindsey
email: undergradsocialwork@illinois.edu
(undergradsocialwork@illinois.edu)
phone: (217) 244-5246
school website: https://socialwork.illinois.edu/
school faculty: School of Social Work Faculty (http://socialwork.illinois.edu/about-sww/faculty-and-staff-directory/?doing_wp_cron=1546290133.2576510906219482421875)
overview of school admissions & requirements: School of Social Work (http://catalog.illinois.edu/social-work/)

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, healthcare, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing in many masters of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive an MSW in only one year.

Information listed in this catalog is current as of 10/2020
The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

The social work major prepares practitioners for generalist social work practice with individuals, groups, families and communities. The curriculum requires a minimum of 120 hours for graduation.

for the degree of Bachelor of Social Work Major in Social Work

Departmental Distinction: The top 10% of the BSW graduating class will graduate with distinction.

Minimum required major and supporting course work: A minimum of 53 course hours of social work coursework, which includes 15 credit hours of combined agency-based field practicum (internship) and field seminar.

Learning Outcomes: Social Work, BSW

Learning outcomes for the degree of Bachelor of Social Work Major in Social Work

- Demonstrate ethical and professional behavior
- Engage diversity and difference in practice
- Advance human rights and social, economic, and environmental justice
- Engage in practice-informed research and research-informed practice
- Engage in Policy Practice
- Engage with individuals, families, groups, organizations, and communities
- Assess individuals, families, groups, organizations, and communities
8. Intervene with individuals, families, groups, organizations, and communities
9. Evaluate practice with individuals, families, groups, organizations, and communities

Sociology, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

department website: https://sociology.illinois.edu/
department faculty: Sociology Faculty (https://sociology.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: soc@illinois.edu

Large-scale societal change begins with individuals like you – hungry for knowledge and ready to make a real difference; in the Department of Sociology you will study the inner workings of society with a focus on either Inequalities or Global Sociology.

Sociologists explore human social life at every level, from personal relationships to global society. Major topics of study include inequality, social movements, criminology, race and class relations, gender, social institutions such as religion and education, and fundamental population processes like immigration and mortality. Sociologists use a range of methods and theories to develop and evaluate ideas about social life.

As a student of Sociology, you will train in research methods and become fluent in social statistics while understanding the complexity of societal diversity and social change. These skills are usable in a wide variety of work settings and are skills that employers value.

Recent graduates have pursued careers with the FBI, as Human Resource Specialists, with non-profit organizations, as policy officers, and have earned advanced degrees in Social Work, Sociology, Law, Medicine, and more. The career paths of Sociology alumni are as diverse as our student population – who represent the best and the brightest from a variety of backgrounds.

In the Department of Sociology you can choose the major in Sociology, the minor in Sociology, or the minor in Criminology, Law and Society (CLS). Whereas the major and minor in Sociology provide an overview into the broader disciplines of Sociology, the minor in CLS is a more specialized approach for those students interested in law and justice related careers and occupations.

Each student should see a Sociology departmental advisor at least once a year to choose sociology courses and to monitor their progress.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

• Have completed SOC 490 or SOC 495
• Attain a UIUC GPA of 3.25 or higher
• If both these requirements are met, then the MAJOR GPA distributes as follows:
  • 3.25 – Distinction
  • 3.50 – High Distinction
  • 3.75 – Highest Distinction

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: Normally equates to 44 hours including 32 hours of Sociology courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours.

Students may select any sociology courses to fulfill the requirement of 32 hours in Sociology

Supporting course work taken outside the Department of Sociology \(^2\) 12

\(^1\) If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 32 hours of Sociology courses.

\(^2\) Supporting course work is designed to expand the student’s education, and should be taken outside of Sociology. A student may take supporting course work from one department, such as psychology, economics, history, or statistics, or from a cohesive selection of courses in various units. With an advisor’s approval, departmental or interdisciplinary minors, or a double major, may be used to fulfill the requirements of supporting course work.

Learning Outcomes: Sociology, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

1. Apply sociological theories to understand social phenomena.
2. Critically evaluate explanations of human behavior and social phenomenon.
3. Apply scientific principles to understand the social world.
4. Evaluate the quality of social scientific methods and data.
5. Rigorously analyze social scientific data.
6. Use sociological knowledge to inform policy debates and promote public understanding.

5 Year BALAS/MA in Spanish and European Union Studies

The Department of Spanish and Portuguese with the European Union Center offers a 5-year BALAS /MA degree program in Spanish and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Undergraduate degree programs in Spanish & Portuguese

Spanish, BALAS (p. 366)
Teaching of Spanish, BA (p. 401)
Portuguese, BALAS (p. 343)

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Spanish

A Major Plan of Study Form must be completed and submitted to the Student Affairs Office before the end of the fourth semester (48-60 hours). Please see your adviser.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/ gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: equates to 48 hours, including 33 hours in Spanish courses at the 200-level or higher.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Supporting course work, a minor, or a second major in an area of study chosen by the student and approved by the advisor.

Total Hours 48-54

1 With permission of the adviser, students will be able to take up to two SPAN courses that are taught in a language other than Spanish. Or up to two 200-level SPAN courses can be substituted with any of the following: BASQ 401 and BASQ 402, CATL 401 and CATL 402, PORT 401 and PORT 402, and LAST 445. These courses do not count for advanced hours and do not substitute for SPAN 228.

2 A minor generally consists of 16-21 hours.

Learning Outcomes: Spanish, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Spanish

1. Intellectual Reasoning and Knowledge
   • Definition: Students of Spanish will acquire and apply broad and deep knowledge about the Spanish language and the cultures of the Spanish-speaking world.

2. Translingual competence
   • Definition: Students of Spanish will understand and analyze the nature of the Spanish language, "languages" in general, the social nature of languages and demonstrate intercultural communicative competence.

3. Transcultural competence
   • Definition: Through critical reflection, students of Spanish will understand and analyze the products, practices and perspectives of their own culture, cultures of the Spanish-speaking world and the nature of "culture" itself.

4. Communicative Competence in Spanish
   • Definition: In reading, writing, listening comprehension and speaking, students will acquire advanced proficiency in Spanish as described by the standards set by the American Council on the Teaching of Foreign Languages (ACTFL).

Special Education, BS

for the degree of Bachelor of Science: Major in Special Education
Curriculum Preparatory for Learning and Behavior Specialist I in Special Education

This program is designed to prepare special education teachers for students ages 3-21. An applicant must have a cumulative grade point average of at least 2.5 (A = 4.0), a minimum of 50 hours of prior experience with individuals with disabilities, and sophomore or higher standing upon enrollment in the program. A minimum of 125 semester hours of credit is required for graduation. To proceed to the five semester professional education sequence, students must have completed all degree requirements outside of the professional education coursework.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade-point averages of 2.5 (A = 4.0). Candidates in teaching licensure programs must maintain a C or better in all content and professional education coursework. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu/)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Learning Outcomes: Special Education, BS

Learning Outcomes for the degree of Bachelor of Science Major in Special Education

1. Students will develop a deep understanding of central concepts, tools of inquiry and structures of the discipline of special education and of the content they teach.
2. Students will apply multiple methods of assessment to generate data for use in monitoring learner progress and guiding teacher decision-making.
3. Students will demonstrate consistently in their practice a commitment to fairness, collaboration, professionalism, and the belief that all students can learn.

Speech & Hearing Science, BS

for the degree of Bachelor of Science Major in Speech & Hearing Science

The Audiology concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the audiology concentration is the most directly connected to clinical practice in audiology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's website: http://www.asha.org.

Information listed in this catalog is current as of 10/2020
One course from the university approved Gen Ed list.

**Humanities and the Arts**
6
Minimum of two courses from university approved Gen Ed list.

**Social and Behavioral Sciences**
6
Minimum of two courses from university approved Gen Ed list.

**Natural Sciences and Technology**
6
Choose one from the following and one from the university approved Gen Ed list.
- CHEM 101 Introductory Chemistry
- CHEM 102 General Chemistry I & CHEM 103 General Chemistry Lab I
- CHEM 104 General Chemistry II & CHEM 105 General Chemistry Lab II
- CHEM 108 Chemistry, Everyday Phenomena
- CHEM 202 Accelerated Chemistry I
- CHEM 204 Accelerated Chemistry II & CHEM 205 Accelerated Chemistry Lab II
- PHYS 101 College Physics: Mech & Heat
- PHYS 102 College Physics: E&M & Modern
- PHYS 123 Physics Made Easy
- PHYS 140 How Things Work
- PHYS 150 Physics of Societal Issues
- PHYS 211 University Physics: Mechanics
- PHYS 212 University Physics: Elec & Mag
- PHYS 213 Univ Physics: Thermal Physics
- PHYS 214 Univ Physics: Quantum Physics

**Cultural Studies**
9
One course from Western Cultures university approved Gen Ed list.
One course from Non-Western Cultures university approved Gen Ed list.
One course from U.S. Minority Cultures university approved Gen Ed list.

**Foreign Language**
0-12
May be satisfied if had three years of one non-English language in high school or completed the equivalent of three semesters of college level foreign language (through the intermediate level).

Total Hours: 40-54

**Speech and Hearing Science Professional Core Requirements**
All students must complete a series of SHS core classes regardless of their area of concentration. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order. One area of concentration (Speech-Language Pathology, Audiology, Neuroscience of Communication, or Cultural-Linguistic Diversity) must be declared prior to the senior year.

**Audiology Concentration**

</tr>
</tbody>
</table>

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women’s Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University’s requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.
SHS 333  Children with Neurodevelopmental Disorders Across Communication Contexts
SHS 375  Comm Partners & Health
SHS 390  Individual Study 1
SHS 395  Honors Individual Study 1
SHS 473  Augmentative & Alt Comm (Requires senior standing and completion of core classes)

NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours. These should be completed and recorded prior to graduation (some may be completed prior to serving as a clinical participant in the required SHS 475 pre-practicum).

Total Hours 19

1 No more than 3 credits from SHS 291, SHS 390 and SHS 395 may be counted toward the 6 credits of specified electives.

Speech & Hearing Science: Cultural-Linguistic Diversity, BS
for the degree of Bachelor of Science Major in Speech & Hearing Science, Cultural-Linguistic Diversity Concentration

department website: http://shs.illinois.edu/
department faculty: https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory/)
college catalog page: http://catalog.illinois.edu/schools/ahs/academic-units/
college website: http://www.ahs.illinois.edu/

The Cultural-Linguistic Diversity concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socio-economic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

for the degree of Bachelor of Science Major in Speech & Hearing Science, Cultural-Linguistic Diversity Concentration

General Education: Students are advised to select their General Education course requirements from the University’s approved list of courses (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

Speech & Hearing Science: Neuroscience of Communication, BS

for the degree of Bachelor of Science Major in Speech & Hearing Science, Neuroscience of Communication Concentration

department website: http://shs.illinois.edu/
department faculty: https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory/)

college catalog page: http://catalog.illinois.edu/schools/ahs/academic-units/
college website: http://www.ahs.illinois.edu/

The Neuroscience of Communication concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Electives

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women’s Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED),
Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University’s requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

Students must also take 6 hours from the following specified electives:

- Any Chemistry or Physics 100-level class
- IB 100  Biology in Today’s World
- PSYC 204  Intro to Brain and Cognition
- PSYC 216  Child Psych
  or EPSY 236  Development in Education
- PSYC 230  Perception & Sensory Processes
- PSYC 224  Cognitive Psych
- PSYC 248  Learning and Memory
- SHS 271  Communication and Aging
- SHS 291  Research Lab Experience in SHS ¹
- SHS 333  Children with Neurodevelopmental Disorders Across Communication Contexts
- SHS 375  Comm Partners & Health
- SHS 390  Individual Study ¹
- SHS 395  Honors Individual Study ¹
- SHS 473  Augmentative & Alt Comm
- SHS 475  Prepracticum in SHS

Total Hours 19

¹ No more than 3 credits from SHS 291, SHS 390 and SHS 395 may be counted toward the 6 credits of specified electives.

Speech & Hearing Science: Speech-Language Pathology, BS

for the degree of Bachelor of Science Major in Speech & Hearing Science, Speech-Language Pathology Concentration

department website:  http://shs.illinois.edu/
department faculty:  https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory/)
college catalog page:  http://catalog.illinois.edu/schools/ahs/academic-units/
college website:  http://www.ahs.illinois.edu/

The Speech-Language Pathology concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the Speech-Language Pathology concentration is the most directly associated with opportunities for clinical practice in speech-language pathology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org.

for the degree of Bachelor of Science Major in Speech & Hearing Science, Speech-Language Pathology Concentration

General Education: Students are advised to select their General Education course requirements from the University’s approved list of courses (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

Learning Outcomes: Speech & Hearing Science, BS

Learning outcomes for the degree of Bachelor of Science Major in Speech & Hearing Science
1. Students will describe basic speech, language, and hearing processes across the lifespan from the biological, behavioral, and social science perspectives.
2. Students will apply knowledge of how disruptions in speech, language, and hearing processes relate to human communication functioning and disability.
3. Students will demonstrate the ability to read and evaluate literature related to human communication processes across academic disciplines.
4. Students will apply knowledge of cultural-linguistic diversity to inform discussions about human communication functioning and disability.

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

Learning Outcomes: Statistics, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Statistics

Statistics students will:
1. Be able to apply mathematical and statistical reasoning to draw valid conclusions from data;
2. Communicate the results of a statistical analysis effectively in writing, through visualizations, and orally;
3. Be competent in the use of statistical software, in data management, and in writing statistical code;
4. Be adept in the use of modern methods of statistical computing, statistical learning, and data science;
5. Work effectively as part of a team.

Strategic Business Development & Entrepreneurship, BS

for the degree of Bachelor of Science Major in Strategic Business Development and Entrepreneurship

overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

The Strategic Business Development and Entrepreneurship major examines how business opportunities are identified and exploited for society through existing and new organizations. Students will learn to generate and evaluate ideas, develop those ideas into products and services, assemble resources, mitigate risks, and lead organizations that meet human needs. The degree prepares students to work within existing organizations as well as to create new organizations, both for-profit and not-for-profit.
In addition to the SBDE Major requirements, students must also fulfill the University’s General Education requirements and the Gies College of Business Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section).

for the degree of Bachelor of Science Major in Strategic Business Development and Entrepreneurship

General Student Requirements: Students must fulfill the Urbana-Champaign Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements and the Gies College of Business’s Core Courses.

Learning Outcomes: Studio Art, BASA

Learning outcomes for the Bachelor of Arts Major in Studio Art

1. Students will understand and be able to apply basic principles of visual and material communication, including two-dimensional pictorial concepts, three-dimensional formal and spatial concepts, and a wide variety of media and formats for artistic production, and possess the ability to apply them to a specific aesthetic intent.

2. Students will demonstrate an ability and willingness to experiment and explore the expressive possibilities of various media, and artistic and creative strategies for self-directed art-making, and investigate the diverse activities and conceptual modes available to the contemporary artist, including work that directly addresses or engages with recent developments in the field of fine art as well as broader social questions and challenges. Students are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging.

3. Students will gain knowledge of, understand, and be able to apply concepts of visual rhetoric in the development of content, and be able to recognize and critically analyze an evolving variety of communicative practices in art and visual culture, including those that represent diverse cultures and sociopolitical positions, and to demonstrate openness to new social possibilities and a critical empathy towards both audiences and culture producers of differing histories, origins and identities.

4. Students will be willing and able to investigate and accommodate broad-ranging types of knowledge and artistic strategies for the purpose of synthesizing diverse and even disparate ideas in order to create sophisticated, unique works of art, participate in new types of collaboration, and to make innovative statements and hypotheses, or propose creative solutions to social, organizational and societal problems using aesthetic strategies.

5. Students concentrating in New Media create work for the new disciplinary mechanisms that have arisen to evaluate and promote artwork in digital media, but also for traditional institutional mechanisms of art distribution and art critique. As in Contemporary Art, work in New Media may take the form of performance, sound and radio broadcast, gallery exhibition, curation, public art, cinema and video, a networked event, publication, or even scientific research.

6. Students will develop an innovative, imaginative, and entrepreneurial self-directed studio practice, will gain a deep understanding of their own creativity, be able to apply it in any context, and will learn to independently generate thematic investigation and implementation of research in a broad variety of social locations, including art and educational institutions, activist forums, and cyberspace. Students in the BASA will produce web and print based documents that serve to market and promote their practice as independent makers.

Studio Art, BFASA

for the degree of Bachelor of Fine Arts in Studio Art Major in Studio Art

school office: 143 Art and Design Building, Champaign, IL 61820
contact: Mark Avery, Coordinator of Undergraduate Academic Affairs
email: mavery@illinois.edu
phone: (217) 333-6632
department website: S (https://art.illinois.edu) school of Art & Design (https://art.illinois.edu/)
department faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://fau.illinois.edu/

Students pursuing this major select one of five concentrations:

- General Studio Art Concentration (p. 383)
- New Media Concentration (p. 384)
- Painting Concentration (p. 385)
- Printmaking Concentration (p. 387)
- Sculpture Concentration (p. 388)

The Bachelor of Fine Arts in Studio Art (BFASA) at the University of Illinois offers students unprecedented flexibility in determining their own courses and topics of study, engaging in a diverse, innovative curriculum. In response to a rapidly changing world in which artists and designers are constantly presented with new tools, platforms, topics, strategies and venues for exhibition, publication, performance and other types of cultural...
work, the BFASA prepares students for the workplaces of the future. The BFASA is designed to equip graduates with the skills necessary to not only create artwork, but to communicate, think critically and creatively, and gain experience in a broad range of topics that will prepare them as innovative artists and as global citizens. Students will navigate a dynamic curriculum that is responsive to current trends in art, culture and creativity. It encourages new, interdisciplinary initiatives and fosters collaboration and research at the undergraduate level within the context of a premier research university. The BFASA at Illinois begins with basic material and technological tools and concepts in a variety of studio courses. Students are guided in the understanding of visual organization and communication in two, three, and four dimensions by utilizing both new and traditional technologies and strategies. Foundation courses introduce basic material and conceptual approaches to making art, using media from traditional disciplines including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications.

At the intermediate and advanced levels, curriculum offerings are designed to reflect an increasingly dynamic culture, and to provide students with experiences and skills that will enhance their adaptability. A changing menu of courses on a variety of topics is taught by a faculty with expertise in a wide variety of conceptual, material and technical strategies for making art. BFASA students are provided individual studio spaces, where they develop a self-directed practice, housed in a communal studio building. The studio configuration provides the stage for a strong, vibrant community of student-artists working together as they establish their interests and participate in exhibitions, performances, and critiques. The capstone experience is the BFASA Thesis course, in which students develop an individually determined body of work based on their entire educational experience. A portfolio and written thesis paper will demonstrate their conceptual, technical and expressive abilities.

Our graduates will enter professional lives as artists at a time when the boundaries between art and other fields are vanishing. Creative individuals with broad and versatile material, technical and intellectual skills will be in demand within expanding diverse practices that comprise contemporary art and society.

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Studio Art, BFASA

Learning outcomes for the Bachelor of Fine Arts Major in Studio Art

1. Students will understand and be able to apply basic principles of visual and material communication, including two-dimensional pictorial concepts, three-dimensional formal and spatial concepts, and a wide variety of media and formats for artistic production, and possess the ability to apply them to a specific aesthetic intent.
2. Students will demonstrate an ability and willingness to experiment and explore the expressive possibilities of various media, and artistic and creative strategies for self-directed art-making, and investigate the diverse activities and conceptual modes available to the contemporary artist, including work that directly addresses or engages with recent developments in the field of fine art as well as broader social questions and challenges. Students are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging.
3. Students will gain knowledge of, understand, and be able to apply concepts of visual rhetoric in the development of content, and be able to recognize and critically analyze an evolving variety of communicative practices in art and visual culture, including those that represent diverse cultures and sociopolitical positions, and to demonstrate openness to new social possibilities and a critical empathy towards both audiences and culture producers of differing histories, origins and identities.
4. Students will develop an innovative, imaginative, and entrepreneurial self-directed studio practice, will gain a deep understanding of their own creativity, be able to apply it in any context, and will learn to independently generate thematic investigation and implementation of research in a broad variety of social locations, including art and educational institutions, activist forums, and cyberspace.
5. Students will be willing and able to investigate and accommodate broad-ranging types of knowledge and artistic strategies for the purpose of synthesizing diverse and even disparate ideas in order to create sophisticated, unique works of art, participate in new types of collaborative, and to make innovative statements and hypotheses, or propose creative solutions to social, organizational and societal problems using aesthetic strategies.
6. Students concentrating in New Media create work for the new disciplinary mechanisms that have arisen to evaluate and promote artwork in digital media, but also for traditional institutional mechanisms of art distribution and art critique. As in Contemporary Art, work in New Media may take the form of performance, sound and radio broadcast, gallery exhibition, curation, public art, cinema and video, a networked event, publication, or even scientific research.
7. Junior and Senior years see students working with critics/professors across the School to develop a portfolio of works in time-based, interactive, physical, networked or performative media. In the process...
of generating a body of work around a subject and form of their choice, students receive instruction in technical execution, formal composition, and theoretical framing.

8. While pursuing a BFASA, students prepare for work as artists at a time when artists are employed in a variety of spheres – artistic direction, project management, education, research, fine art, curation, performance, non-profit work, activism, advertising, and many others. As digital medias evolve, our graduates will be flexible, able to understand the best use of emerging technologies while crafting new economic and social connections.

9. Students will produce an integrated, cohesive, critically informed body of work for a thesis exhibition, supported by a written thesis document that serves to position their artistic practice within the broader sphere of contemporary art practices, exhibition strategies, audiences, and economies.

Supply Chain Management, BS

for the degree of Bachelor of Science Major in Supply Chain Management

overview of college admissions & requirements: Gies Catalog (p. 1163)
college website: Gies College of Business (https://giesbusiness.illinois.edu/)

The Supply Chain Management student studies the flow of finances, information and materials starting from supply chain planning to the sourcing of raw material, parts and components through the manufacturing or processing sector to the marketing and delivery of end products for industrial customers or individual consumers. The Supply Chain Management Major is available only to qualified students based upon application and personal interviews. For more information, contact the Director of the Supply Chain Management Program.

for the degree of Bachelor of Science Major in Supply Chain Management

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for credit. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Supply Chain Management, BS

Learning Outcomes for the degree of Bachelor of Science Major in Supply Chain Management

1. Disciplinary Competence: Gain an understanding of the structure of supply chains, the fundamental principles of managing them, and their interactions with other business functions.
2. Disciplinary Competence and Critical Thinking: Demonstrate the ability to analyze, model and evaluate different parts of a supply chain through appropriate quantitative and qualitative methods.
3. Critical Thinking: Develop an ability to critically evaluate real-world supply-chain problems and apply theory and models to create practically implementable solutions.
4. Group Work: Demonstrate the ability to collaborate as an effective team member in varying roles in diverse groups/environments.
5. Communication: Develop the ability to effectively and professionally tell a persuasive story through oral and written presentations.

Sustainable Design, BS

for the Bachelor of Science in Sustainable Design

Bachelor of Science in Sustainable Design
College of Fine and Applied Arts Office of Undergraduate Affairs
110 Architecture Building
608 East Lorado Taft Drive

Faculty Program Administrator: Dr. Daniel Schneider (ddws@illinois.edu)
Program Administrator: Dr. Nicole Turner (nicturn@illinois.edu)
Program Website: https://faa.illinois.edu/bachelor-science-sustainable-design
Program Email: sustaindesign@illinois.edu (sustaindesign@illinois.edu)
College Website: https://faa.illinois.edu/

The major in Sustainable Design offers an innovative, interdisciplinary course of study in design, with a focus on building sustainable communities through the intentional design of environmentally sensitive products, buildings, neighborhoods, landscapes and cities.

The program grounds concrete skills development with opportunities to move between disciplinary barriers, allowing students to prepare for the future in a sustainable world where ideas from many disciplines will be necessary to solve the complex problems of pollution reduction, energy conservation, and biodiversity protection in equitable, healthy, and thriving places.

Required introductory coursework provide a solid grounding in design thinking and skills, coupled with a broad understanding of the role of design in achieving sustainable results across scales. Students will apply their skills and knowledge in a required senior capstone project.

With expertise across disciplines, students in this program will be prepared to work in the public and private sector, or continue preparation in a variety of professional graduate programs such as Architecture, Industrial Design, Landscape Architecture, Urban Design and Urban Planning.

1 The approved internship must be completed prior to enrollment in BADM 336 and a report on the internship must be submitted.

---

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.
2 BUS 101 and BUS 201 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 101 and BUS 201 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.
3 MATH 220 or MATH 221 may be substituted for MATH 234. (See college mathematics requirement above.
4 Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.
5 Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete on course in the Physical Sciences and Life Sciences subcategories.
6 This course includes limited voluntary participation as a subject in experiments.

1 Completion of ARTH 211 (major requirement) meets 3 hours of the general education requirement for Humanities and the Arts.

2 Language Requirements

This requirement may be satisfied by:

- Successfully completing a third-semester college-level course in a language other than English;
- Successful completion, in high school, of the third year of a language other than English; or
- Demonstrating proficiency at the third semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department
- Current list of courses approved to satisfy the language requirement. If you enter UIUC without three years of language other than English in high school, you must take a language placement test to determine the courses in which you should enroll

3 Advanced Hours Requirement: A minimum of 40 credits at the 300 or 400 course level are required.

Systems Engineering & Design, BS
for the degree of Bachelor of Science in Systems Engineering and Design
(formerly General Engineering)

department website: https://ise.illinois.edu/
department faculty: Industrial & Enterprise Systems Faculty
(https://ise.illinois.edu/directory/faculty.html)
overview of college admissions & requirements: The Grainger
College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Systems Engineering and Design (SED) is a comprehensive,
interdisciplinary program emphasizing interactions between parts of
a whole. It brings together basic sciences, engineering analysis, and
engineering design. The curriculum offers flexibility through a Secondary
Field Option, while providing a broad background in engineering as
a whole and decision-making that supports overall design. Systems
Engineers understand how to coordinate interacting parts of a whole and
to evaluate engineering within economic and physical constraints.

Through the Secondary Field Option electives, students can tailor
their studies to one’s interests and career goals in both technical
and nontechnical areas. Secondary field options are of two types:
pre-approved and customized. Pre-approved secondary fields have
designated titles and a specified list of courses, from which several
may be selected. Approval for the substitution of a course for one on
the specified list may be requested via a petition form submitted to the
department. Customized secondary fields may be created to achieve
goals in areas not provided by pre-approved fields. To do this, a suitable
title and all the courses must be petitioned for acceptance by the
department. Petition approval is based on the merit of the secondary field
and the coherence of the courses within it relative to the student’s goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts
may be integrated with customized secondary field options. Courses
taken may be applied to minors, dual degrees, or contracts as well as
secondary field options.

Pre-approved Secondary Fields
- Automotive Engineering
- Bioengineering
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer Science
- Construction
- Control Systems
- Digital Prototyping
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Internet of Things (IOT)
- Manufacturing Engineering
- Nondestructive Testing and Evaluation
- Operations Research
- Quality Control
- Rehabilitation Engineering
- Robotics
- Theoretical and Applied Mechanics

Customized Secondary Fields
Customized secondary fields differ from pre-approved ones in that no
sets of specified courses to choose from have been predefined. For all
customized secondary field options, a course list must be constructed
and submitted for approval by the department.

The following list contains examples of over fifty titles of customized
secondary field options which have been approved. The complete list
may be found at the department’s secondary field website (http://
ise.illinois.edu/undergraduate-programs/general-engineering-degree/
secondary-field-option/). Additional titles beyond those listed may be
proposed.
- A foreign language (several)
- An engineering discipline (several)
- Audio Engineering
- Economics
- Entrepreneurship
- Finance
- Fluid Dynamics
- International Business
- Mathematics
- Pre-Law
- Pre-Med
- Renewable Energy

Design experience and project management are emphasized and
integrated across the core with a focus on establishing critical problem-
solving skills applied across disciplines, strong communication skills, and
the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design
undergraduates is the Senior Project Course. Students work
collaboratively with industry and a team of faculty members on a real-
world problem during their final semester. The results are documented
in a final written report and a formal presentation at the end of the
semester to the company so that the student recommendations may be
implemented.

for the degree of Bachelor of Science in Systems Engineering and Design
(formerly General Engineering)

Graduation Requirements
Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/
ugadvise/Degree+Requirements/#DegreeRequirements-
TechnicalGPARequirement): 2.0
TGPA is required for Engineering and Technical Elective courses
and MATH 415. See Technical GPA (https://wiki.illinois.edu/wiki/display/
ugadvise/Degree+Requirements/#DegreeRequirements-
TechnicalGPARequirement) to clarify requirements.
Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition courses required for this degree are listed below.

BIOE 415 Biomedical Instrumentation Lab 2
or ECE 414 Biomedical Instrumentation
BIOE 498 Special Topics 3
BIOP 401 Introduction to Biophysics 3
CHEM 232 Elementary Organic Chemistry I 3 or 4
CHEM 233 Elementary Organic Chem Lab I 2
IE 340/PSYC 358 Human Factors 4
KIN 355 Biomechanics of Human Movement 3
MCB 150 Molec & Cellular Basis of Life (recommended only if a prerequisite to another listed course) 4
MCB 250 Molecular Genetics (recommended only if a prerequisite to another listed course) 3
MCB 251 Exp Technqs in Molecular Biol (recommended only if a prerequisite to another listed course) 2
MCB 401 Cell & Membrane Physiology 3
MCB 402 Sys & Integrative Physiology 3
MCB 403 Cell & Membrane Physiology Lab 1 or 2
MCB 404 Sys & Integrative Physiol Lab 1 to 2
MCB 450 Introductory Biochemistry 3
SE 400 Engineering Law 3 or 4

Business Systems Integration & Consulting

Core Requirement:
SE 400 Engineering Law 3 or 4
Group I (At least one course):
ACCY 200 Fundamentals of Accounting (A basic accounting course is highly recommended) 3
ACCY 201 Accounting and Accountancy I (A basic accounting course is highly recommended) 3
ACCY 202 Accounting and Accountancy II (A basic accounting course is highly recommended) 3
ADV 150 Introduction to Advertising 3
BADM 310 Mgmt & Organizational Beh 3
BADM 311 Leading Individuals and Teams 3
BADM 312 Designing and Managing Orgs 3
BADM 320 Principles of Marketing 3
BADM 445 Small Business Consulting 4
BADM 446 Entrepreneurship: New Venture Creation 4
BTW 250 Principles Bus Comm 3
BTW 261 Principles Tech Comm 3
FIN 221 Corporate Finance 3
FIN 300 Financial Markets 3
IE 420 Financial Engineering 3 or 4

Group II (At least one course)
BADM 352 Database Design and Management 3
BADM 353 Info Sys Analysis and Design 3
CS 225 Data Structures 4
All other 200-, 300-, 400-level CS courses

Civil Engineering Structures

CEE 380 Geotechnical Engineering 3
CEE 460 Steel Structures I 3
CEE 461 Reinforced Concrete I 3
CEE 462 Steel Structures II 3 or 4
CEE 463 Reinforced Concrete II 3 or 4
CEE 465 Design of Structural Systems 3
SE 400 Engineering Law 3 or 4

Computer Science

CS 173 Discrete Structures 3
CS 225 Data Structures 4
CS 410 Text Information Systems 3 or 4
CS 411 Database Systems 3 or 4
CS 425 Distributed Systems 3 or 4
CS 438 Communication Networks 3 or 4
All other 200-, 300-, 400-level CS courses
SE 400 Engineering Law 3 or 4

Construction

CEE 300 Behavior of Materials (Credit will not be given for CEE 300, ME 330 and MSE 280 (only one course may be taken out of these three)) 4
CEE 310 Transportation Engineering 3
CEE 320 Construction Engineering 3
CEE 380 Geotechnical Engineering 3
CEE 420 Construction Productivity 3 or 4
CEE 421 Construction Planning 3 or 4
CEE 422 Construction Cost Analysis 3 or 4
CEE 460 Steel Structures I 3
CEE 461 Reinforced Concrete I 3
CEE 465 Design of Structural Systems 3
ME 330 Engineering Materials (Credit will not be given for CEE 300, ME 330 and MSE 280 (only one course may be taken out of these three)) 4
SE 400 Engineering Law 3 or 4

Control Systems

CS 225 Data Structures 4
ECE 470/AE 482/MSE 445 Introduction to Robotics 4
ECE 486 Control Systems 4
ECE 490 Introduction to Optimization 3 or 4
IE 410 Advanced Topics in Stochastic Processes & Applications 3 or 4
MATH 444 Elementary Real Analysis 3 or 4
MATH 461 Probability Theory 3 or 4
MATH 464 Statistics and Probability II 3 or 4
ME 360 Signal Processing 3.5
ME 460 Industrial Control Systems 4
ME 461 Computer Cntrl of Mech Systems 3 or 4
SE 400 Engineering Law 3 or 4
SE 420 Digital Control Systems 4
SE 422 Robot Dynamics and Control 4
SE 423 Mechatronics 3

Digital Prototyping

</tr>
</tbody>
</table>

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.  

### Total Hours of Curriculum to Graduate

128

1. **External transfer students take ENG 300 instead.**  
2. **MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.**  
3. **Advanced Composition satisfied by completing the combination of SE 494 and SE 495.**  
4. The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:  
   - CEE 202, IE 300, STAT 400  
   - CEE 201, IE 310  
   - MSE 406, CEE 300  
   - ECE 486, SE 320, ME 340  
5. **The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.**  
6. **The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives). for the degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)**

### Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/systems-engineering-map/).

Semester Hours 17-15

Total Hours: 128

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/under Written Communication Requirement.

3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by completing (i) one Western/comparative culture(s) course, (ii) one non-Western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

4. Selected from the departmentally approved lists of Secondary Field Option Electives (http://ise.illinois.edu/undergraduate-programs/general-engineering-degree/secondary-field-option/preapproved-secondary-field/) or by petition to the department.

5. SE 494 and SE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a secondary field option elective.

6. Combination satisfies the General Education Advanced Composition requirement.

7. Selected from the departmentally approved list of Design Electives (https://ise.illinois.edu/undergraduate/electives.html).
Selected from the departmentally approved list of Engineering Science Electives (https://ise.illinois.edu/undergraduate/electives.html).

Learning Outcomes: Systems Engineering and Design, BS

Learning Outcomes for the degree of Bachelor of Science Major in Systems Engineering and Design (formerly General Engineering)

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Systems Engineering and Design graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Teaching of French, BA

for the degree of Bachelor of Arts in the Teaching of French

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: A student must have a minimum 3.5 cumulative grade point average, including a ‘Satisfactory’ in the teaching practicum; complete two additional advanced-level courses in French or the teaching minor; complete FR 492, and provide two letters of recommendation as evidence of exceptional teaching potential. Consult the teacher education adviser for details.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 188).

Minimum required major and supporting course work: Normally equates to 37 hours of French courses and 29 hours of professional education courses. The required coursework could be 16 additional hours, respectively, if the student does not already have the equivalent of French 101-102-133-134. NOTE: FR 299 is strongly recommended.

Minimum hours required for graduation: 120 hours.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

Study Abroad: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (https://spanport.illinois.edu/academics/education-abroad/).

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 188).

Minimum required major and supporting course work: Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 29 hours of professional education courses.

Minimum hours required for graduation: 123 hours.

**Learning Outcomes: Technical Systems Management, BS**

Learning outcomes for the degree of Bachelor of Science Major in Technical Systems Management (TSM)

Students graduating with the B.S. in TSM should be able to:

1. Obtain subject matter expertise
2. Identify problems and develop problem solving abilities / critical thinking
3. Function effectively on multidisciplinary teams
4. Demonstrate professional and ethical values
5. Communicate effectively in written and oral forms
6. Engage in life-long learning skills
7. Develop leadership and interpersonal skills
8. Analyze and interpret data
9. Understand social and cultural contexts
10. Develop global perspective

**Theatre, BFA**

*for the Bachelor of Fine Arts Major in Theatre*

**department website:** https://theatre.illinois.edu
**department faculty:** https://theatre.illinois.edu/people/meet-our-faculty/
**college catalog page:** Fine & Applied Arts (http://catalog.illinois.edu/faa/)
**college website:** https://faa.illinois.edu/

Students pursuing this major select one of eight concentrations:

- Acting (p. 404)
- Arts & Entertainment Technology (p. 405)
- Costume Design & Technology (p. 406)
- Lighting Design & Technology (p. 408)
- Scenic Design (p. 409)
- Scenic Technology (p. 410)
- Sound Design & Technology (p. 412)
- Stage Management (p. 413)
- Theatre Studies (p. 414)

The curricular concentrations in the Department of Theatre provide extensive preparation for the rigorous demands of a professional career in the theatre and allied arts.

The BFA is an intensive undergraduate professional training curriculum with concentrations in Acting, Costume Design and Technology, Lighting Design and Technology, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. The Theatre Studies concentration is intended for students who want to explore the many facets of theatre or plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As part of the application process, prospective students must complete an interview and participate in auditions or portfolio reviews. Acting applicants should bring a resume/headshot and present 2 contrasting monologues of no more than 2 minutes each for their audition. Applicants who wish to pursue one of the concentrations in Design, Technology, or Management should bring a resume and a portfolio showing examples of their theatrical work, which can include a range of interests and experiences. Applicants who intend to pursue the Theatre Studies Concentration should present a writing portfolio that includes a

Information listed in this catalog is current as of 10/2020
resume and a short essay on theatre or another short, written creative work.

In the second year of study in the department, BFA Acting students are evaluated for promotion into the advanced studio classes in acting (Junior and Senior years.) In addition to successful completion of all classes in their first and second years, acceptance will be based on each student’s potential for professional-caliber performance.
