**Learning Outcomes: Teaching of French, BA**

Learning Outcomes for the degree of Bachelor of Arts in the Teaching of French

1. **Teacher Candidates** will be able to demonstrate their understanding of SLA theories and methodologies through the instructional activities and materials that they design to support all students’ learning and skill building in the three modes of communication.

2. Using Bloom’s taxonomy and knowledge of cultural analysis, **Teacher Candidates will be able to** stimulate analytical skills in their second language learners when reading literacy or historical texts or periodicals, such as newspapers, magazines, or blog posts discussing current events.

3. Using their knowledge of French linguistics and the sounds of French, **Teacher Candidates will be able to** model accurate and authentic pronunciation for their learners during instruction.

4. **Teacher Candidates will be able to** demonstrate her/his understanding of and skills in designing multiple methods of assessment that monitor learner progress in the three modes of communication, promote learner efficacy, and guide decision-making of the learner and teacher.

Portuguese, BALAS (p. 345)

for the degree of Bachelor of Arts in the Teaching of Spanish

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

Study Abroad: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (https://spanport.illinois.edu/academics/education-abroad/).
General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 190).

Minimum required major and supporting course work: Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 29 hours of professional education courses.

Minimum hours required for graduation: 123 hours.

Professional education courses. (See Foreign Languages-Curricula Preparatory to Teaching Foreign Languages.) (p. 190)

Technical Systems Management, BS

for the degree of Bachelor of Science Major in Technical Systems Management

Department website: https://abe.illinois.edu/undergraduate/

Department faculty: https://abe.illinois.edu/directory/faculty

Overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

College website: https://aces.illinois.edu/

This major in Technical Systems Management is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of agricultural engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution. Students can specialize in Construction Systems Management; Environmental Systems Management; Mechanization, Marketing, and Technology Management Systems; Production Systems; or Renewable Energy Systems.

**Learning Outcomes: Technical Systems Management, BS**

Learning outcomes for the degree of Bachelor of Science Major in Technical Systems Management (TSM)
Students graduating with the B.S. in TSM should be able to:

1. Obtain subject matter expertise
2. Identify problems and develop problem solving abilities / critical thinking
3. Function effectively on multidisciplinary teams
4. Demonstrate professional and ethical values
5. Communicate effectively in written and oral forms
6. Engage in life-long learning skills
7. Develop leadership and interpersonal skills
8. Analyze and interpret data
9. Understand social and cultural contexts
10. Develop global perspective

Theatre, BFA

for the Bachelor of Fine Arts Major in Theatre

department website: https://theatre.illinois.edu
department faculty: https://theatre.illinois.edu/people/meet-our-faculty/
catalog catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
catalog website: https://faa.illinois.edu/

Students pursuing this major select one of eight concentrations:

Acting (p. 406)
Arts & Entertainment Technology (p. 408)
Costume Design & Technology (p. 409)
Lighting Design & Technology (p. 410)
Scenic Design (p. 412)
Scenic Technology (p. 413)
Sound Design & Technology (p. 414)
Stage Management (p. 415)
Theatre Studies (p. 417)

The curricular concentrations in the Department of Theatre provide extensive preparation for the rigorous demands of a professional career in the theatre and allied arts.

The BFA is an intensive undergraduate professional training curriculum with concentrations in Acting, Costume Design and Technology, Lighting Design and Technology, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. The Theatre Studies concentration is intended for students who want to explore the many facets of theatre or plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As part of the application process, prospective students must complete an interview and participate in auditions or portfolio reviews. Acting applicants should bring a resume/headshot and present 2 contrasting monologues of no more than 2 minutes each for their audition. Applicants who wish to pursue one of the concentrations in Design, Technology, or Management should bring a resume and a portfolio showing examples of their theatrical work, which can include a range of interests and experiences. Applicants who intend to pursue the Theatre Studies Concentration should present a writing portfolio that includes a resume and a short essay on theatre or another short, written creative work.

In the second year of study in the department, BFA Acting students are evaluated for promotion into the advanced studio classes in acting (Junior and Senior years.) In addition to successful completion of all classes in their first and second years, acceptance will be based on each student's potential for professional-caliber performance.

As one of the Resident Producing Organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year. The theatres, rehearsal halls and shops of the Krannert Center serve as laboratories for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100 (Practicum I) and THEA 200 (Practicum II). Students working on Department of Theatre productions in their specific concentration area also take THEA 300 (Practicum III) or THEA 400 (Practicum IV). Design, Technology, and Management concentration students will also receive practicum credit for working on productions in Lyric Theatre, Department of Dance and Events.

catalog website: https://faa.illinois.edu/

Acting Concentration

The acting concentration provides intensive training in a wide range of performance aspects. In the first and second years, students take foundational courses in acting that include movement and vocal production. In the second year of study in the department, BFA Acting students are evaluated for promotion into the advanced studio classes in acting (Junior and Senior years.) In addition to successful completion of all classes in their first and second years, acceptance will be based on each student's potential for professional-caliber performance.

Considerations include potential for expressive movement, effective voice and speech, emotionally connected characterization, intellectually thorough. Analysis and reliable discipline for intensive study. Students who are not promoted into the advanced studio classes may apply to the Theatre Studies concentration. Third- and fourth-year students meet in daily four-hour sessions, each of which includes voice and speech, movement and acting. Students acquire skills in stage combat and dialects. The four semesters of acting scene study focus on modern classical plays, musical theatre, Shakespeare and acting for the camera. Students. In the professional studio in acting are expected to audition for department productions and perform as cast.

for the Bachelor of Fine Arts Major in Theatre, Acting Concentration
A minimum of 128 hours of credit is required for the degree.

Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

40 credits hours in degree required in 300-400 level coursework to meet IBHE requirements.

Learning Outcomes: Acting Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Theatre, Acting Concentration

Student Learning Outcomes

1. Demonstrates a mature, effective ability to analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre and performance.
2. Demonstrates ability to creatively engage in the collaborative process in rehearsal, construction, and performance of works for the stage.
3. Demonstrates an ability to analyze, prepare, and perform in dramatic material including works from contemporary theatre, modern classics, Shakespeare, musical theatre, and media including film, television, and web, among others.
4. Demonstrates increasing ability to recognize and adjust voice, speech, and movement skills (including stage combat techniques) in application to performance for the stage.
5. Demonstrates an understanding of the expectations of professional practice in auditioning for and working in professional theatre, film, television, and other media.

Arts & Entertainment Technology Concentration

Level 21 reflects the design, technology and management disciplines in theatre arts. It has seven unique yet inter-related concentrations in: Arts + Entertainment Technology, Costume Design + Technology, Lighting Design + Technology, Scene Design, Scenic Technology, Sound Design + Technology, and Stage Management. Freshman and sophomore students learn the foundations of theatrical production with a focus on acquiring practical skills for application in advanced course work and in theatre productions. Junior and senior students participate in advanced study in their chosen discipline supported by one-on-one faculty mentoring of assigned projects. Students in this area are the designers, technicians, managers, artisans and crew for over a dozen theater, musical theater, dance and opera productions at Krannert Center for the Performing Arts and work on these shows in various roles throughout their entire course of study.

A minimum of 128 hours of credit is required for the degree.

Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

40 credits hours in degree required in 300-400 level coursework to meet IBHE requirements.

Learning Outcomes: Costume & Design Technology Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Theatre, Costume Design & Construction Concentration

Student Learning Outcomes

1. Demonstrates a mature, effective ability to analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre and performance.
2. Demonstrates ability to actively engage in the collaborative process in preparation, construction, and performance of works for the stage.
3. Demonstrates practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a role related to costume design and technology for a stage production.
4. Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, opera and dance.
5. Demonstrates necessary skills and knowledge to acquire an entry-level position in the field of costume design and technology including significant technical mastery, showing the capacity to produce work and solve problems independently.

### Learning Outcomes: Lighting Design & Technology Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Theatre, Lighting Design Concentration

**Student Learning Outcomes**

1. Communicate design and production ideas to collaborators through graphic skills, language and research and the ability to analyze and interpret creative, critical and theoretical works.
2. Demonstrates the practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a role related to lighting design for a stage production.
3. Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, opera, dance and non-traditional venues and styles of design.
4. Gain the practical ability to see their designs come to life from concept through realization by collaborating on current productions with peers, faculty, staff and guest artists.

Information listed in this catalog is current as of 02/2021
5. Demonstrates necessary skills and knowledge to acquire an entry-level position in the field of lighting design and technology including significant technical mastery, showing the capacity to produce work and solve problems independently.

**Level 21: Design, Technology and Management Concentrations**

Level 21 reflects the design, technology and management disciplines in theatre arts. It has several unique yet inter-related concentrations in: Arts + Entertainment Technology, Costume Design + Technology, Lighting Design + Technology, Scene Design, Scenic Technology, Sound Design + Technology, and Stage Management. Freshman and sophomore students learn the foundations of theatrical production with a focus on acquiring practical skills for application in advanced course work and in theatre productions. Junior and senior students participate in advanced study in their chosen discipline supported by one-on-one faculty mentoring of assigned projects. Students in this area are the designers, technicians, managers, artisans and crew for over a dozen theater, musical theater, dance and opera productions at Krannert Center for the Performing Arts and work on these shows in various roles throughout their entire course of study.

---

**A minimum of 128 hours of credit is required for the degree.**

**Twelve hours of 300 and 400-level courses in the major must be taken on this campus.**  
**40 credits hours in degree required in 300-400 level coursework to meet IBHE requirements.**

Learning Outcomes: Scenic Design Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Theatre, Scenic Design Concentration

Student Learning Outcomes

1. Demonstrates a mature, effective ability to analyze, interpret, and discuss creative and theoretical works.
2. Demonstrates necessary knowledge of materials, tools, techniques, methodologies, and safe working habits of all essential theatrical production environments.
3. Demonstrates practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a collaborative role related to scenic design for a stage production.
4. Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, and opera.
5. Demonstrates necessary skills and knowledge to acquire an entry-level position in the field of scenic design including significant technical mastery, showing the capacity to produce work and solve problems independently.

Learning Outcomes: Scenic Technology Concentration

Learning outcomes for the Bachelor of Fine Arts Major in Theatre, Scenic Technology Concentration

Student Learning Outcomes

1. Demonstrates practical application of learned methodologies to successfully fulfill a leadership role for a stage production.
2. Demonstrate proficiency in technical, managerial and leadership skills required to attain professional, entry-level positions in the live entertainment industry.
3. Demonstrate the ability to effectively communicate ideas, concepts and outcomes through the build, load in, tech and performance of a stage production.
4. Demonstrate the ability to synthesize independently acquired knowledge through the successful execution of a capstone project.
5. Demonstrates the ability to analyze and interpret creative, critical and theoretical works in the field of theatre and performance, both past and present.

Theatre Studies Program
The theatre studies concentration focuses on the practical applications of theatre and explores theatrical productions as a collaborative art form that is grounded in practice, theory, criticism, history, research and writing. The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in the areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing, dramaturgy, playwriting, arts management, social issues theatre and theatre history and criticism. Emphasis is given to a comprehensive study of theatre practices of the past, participation in theatre practices of the present and the discovery and development of theatre practices for the future.

A minimum of 128 hours of credit is required for the degree.

Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

40 credits hours in degree required in 300-400 level coursework to meet IBHE requirements.

college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

Students pursuing this major select one of four concentrations:

Global Cities (p. 420)
Policy & Planning (p. 421)
Social Justice (p. 422)
Sustainability (p. 423)

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

Capstone

Required Courses:  Required Hours
Capstone Preparation: During the 3rd year, students enroll in UP 301, Capstone Preparation. Students meet individually with their capstone advisor to develop a plan to meet the capstone requirement. To pass this course students must turn in a proposal at the end of the semester.

Capstone Experience: Students engage in a semester or summer-long applied activity outside of the classroom. The Capstone Experience is intended to engage the students in the real world and prepare them for the job market. Students typically complete this requirement during their junior year, but have the option to complete it during the summer between their 3rd and 4th year. Examples include a paid or unpaid internship, volunteer work, consulting project with a client, summer research and more. Students enroll in UP 390, Planning Internship, and/or UP 397, Undergraduate Project, to receive credit.

Capstone Seminar: During the 4th year, students enroll in UP 401 for 2 semesters. Students will participate in monthly activities to discuss and reflect on the Capstone Experience. In addition, students will present a poster summarizing their capstone experience in a public setting; for example at a public engagement conference, public meeting or community meeting, McNair Scholars conference, James Scholars event, Illinois American Planning Association meeting, undergraduate research symposium, or other venue. The seminar sessions also include career development such as resume writing, interviewing and networking with professionals through the Wetmore Lecture Series.

Capstone

**Required Courses:**

Capstone Preparation: During the 3rd year, students enroll in UP 301, Capstone Preparation. Students meet individually with their capstone advisor to develop a plan to meet the capstone requirement. To pass this course students must turn in a proposal at the end of the semester.

Capstone Experience: Students engage in a semester or summer-long applied activity outside of the classroom. The Capstone Experience is intended to engage the students in the real world and prepare them for the job market. Students typically complete this requirement during their junior year, but have the option to complete it during the summer between their 3rd and 4th year. Examples include a paid or unpaid internship, volunteer work, consulting project with a client, summer research and more. Students enroll in UP 390, Planning Internship, and/or UP 397, Undergraduate Project, to receive credit.

Capstone Seminar: During the 4th year, students enroll in UP 401 for 2 semesters. Students will participate in monthly activities to discuss and reflect on the Capstone Experience. In addition, students will present a poster summarizing their capstone experience in a public setting; for example at a public engagement conference, public meeting or community meeting, McNair Scholars conference, James Scholars event, Illinois American Planning Association meeting, undergraduate research symposium, or other venue. The seminar sessions also include career development such as resume writing, interviewing and networking with professionals through the Wetmore Lecture Series.

Urban Studies & Planning: Sustainability, BA

For the degree of Bachelor of Arts Major in Urban Studies & Planning, Sustainability Concentration

department website: https://urban.illinois.edu
department faculty: https://urban.illinois.edu/people/meet-our-faculty/
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to
maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

For the degree of Bachelor of Arts Major in Urban Studies & Planning, Sustainability Concentration

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Minimum hours required for graduation: 120 hours.

Aerospace Engineering, BS and Engineering: Energy Systems, MEng

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Engineering in Engineering, Energy Systems Concentration

department website: https://ae.illinois.edu/
department faculty: Aerospace Engineering Faculty (https://ae.illinois.edu/directory/faculty/)
college website: https://grainger.illinois.edu/
email: aerospace@illinois.edu

The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in select engineering undergraduate majors with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student's knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

Admissions

For deadlines and procedures, consult the department Web site (https://www.ae.illinois.edu/). Current Illinois Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program.

Admission decisions are based on overall academic performance, letters of reference, and statement of purpose.

Admissions to this program will occur both in the fall and spring term.

The application deadline for spring term will be December 1 and for fall term will be July 1. The Energy and Sustainability Engineering M.Eng. admissions committee will review applications for this program and students accepted into the program will be given "provisional admission." Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
• must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, students:

• must apply and be officially admitted into the Graduate College.
• will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
• must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student's traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.
For the joint degree of Bachelor of Science in Aerospace Engineering and Master of Engineering in Engineering, Energy Systems Concentration

Course Requirements

B.S. Component (124 hours):

- Same required courses as the traditional B.S. degree with the minimum hours required reduced from 128 to 124 hours.
  - The reduction of 4 credit hours is based on the utilization of 4 hours in free elective in the student's undergraduate curriculum.
- Illinois undergraduate student minimum residence requirement satisfied.
- Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework)

- Identical to the current M.Eng in Engineering with a concentration in Energy Systems (http://catalog.illinois.edu/graduate/concentrations/energy-systems-meng/). A total of 32 hours (including the shared coursework) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.Eng. component of the program.

Aerospace Engineering, BS-MS

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Science in Aerospace Engineering

department website: https://aerospace.illinois.edu/
department faculty: Aerospace Engineering Faculty (https://aerospace.illinois.edu/directory/faculty/faculty-members/)
college website: https://grainger.illinois.edu/
email: aerospace@illinois.edu

The joint B.S.-M.S. program in AE combines two degrees: a B.S. in AE with a M.S. in AE. Current AE students enrolled in The Grainger College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student's knowledge beyond that in the standard four-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.S. degree have been successfully completed.

Admission

For deadlines and procedures, consult the department web site (https://aerospace.illinois.edu/). Current Grainger AE students can apply after they complete their junior-level courses, but before they start their senior year. Students with an overall GPA of at least 3.00 may apply for admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program in order to remain in the program.
- must maintain a technical GPA of 3.40 through completion of the B.S. component of the program.
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, when they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 121 hours of graduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component students:

- must apply and be officially admitted into the Graduate College.
- are assigned a graduate academic advisor when B.S. courses are completed.
- will be issued letters of admission from the Graduate College and the AE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the AE Undergraduate Programs Office. Students who do not complete all 5-year B.S.-M.S. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. in AE degree. Students reverting to a traditional B.S. degree program must complete 128 hours and satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 121-hour B.S. degree from the B.S.-M.S. program is not ABET accredited, but would be if the student withdrew from the M.S. component and completed the requirements of the traditional 128-hour B.S. program.

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Science in Aerospace Engineering

Course Requirements

B.S. Component (121 hours)\(^1\)

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 121.
- The reduction of 7 credit hours includes:
  a. 4 hours in Free Electives in both AE curricula
  b. 3 hours in other non-AE Technical Electives
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
• Students can apply after they complete their junior-level courses, but before they start their senior year.
• Illinois undergraduate student minimum residence requirement must be satisfied.

At the graduate level, requirements are identical for both the M.S. Non-Thesis Track (http://catalog.illinois.edu/graduate/ms-aero-engin/#degreerequirementstext) (32 additional hours of coursework) and the M.S. Thesis Track (http://catalog.illinois.edu/graduate/ms-aero-engin/#degreerequirementstext) (32 additional hours of coursework).

1 If the student withdraws from the MS component they must revert to the traditional BS degree program and satisfy all degree requirements of the BS curriculum.

Animal Sciences BS-MANSC

for the degree of Bachelor of Science Major in Animal Sciences and Master of Animal Sciences in Animal Science

department website: https://ansc.illinois.edu/
department faculty: Animal Sciences Faculty (https://ansc.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The joint BS/MANSC program in Animal Sciences integrates a baccalaureate (BS) in Animal Sciences preparation with a non-thesis Master of Animal Sciences (MANSC) preparation. Students enrolled in the BS in Animal Sciences program that have completed a minimum of 60 credit hours of degree requirements and that have a minimum GPA of 3.0 are eligible to apply and be admitted to this program. Students that have a GPA above 2.75 may be admitted on probationary status. The Department of Animal Sciences will support the application to the MANSC program of the students in this joint program that have completed the required 126 credit hours towards a BS in Animal Sciences degree (including a minimum of 40 hours of 300- or 400-level courses) and that have a minimum GPA of 3.0. Up to 12 graduate-level (400- or 500-level) credit hours from the BS program will count towards the 32 credit-hour requirement of the MANSC program.

### Other Requirements

**Requirement**

The required 126 hours for the B.S. degree must include a minimum of 40 hours of 300- and 400-level courses. Minimum GPA: 3.0

1. ANSC 398 only fulfills the degree requirement when taken for a standard letter grade.

For the Bachelor of Science students must choose one of the concentrations, Companion Animal & Equine Science, Food Animal Production & Management, or Science, Pre-Veterinary & Medical listed below:

#### Companion Animal and Equine Science Concentration

**Required**

Choose one group:

or

2. ANSC 206 & ANSC 306: Horse Management and Equine Science

Select two of the following Applied Sciences courses:

1. ANSC 201: Principles of Dairy Production
2. ANSC 204: Intro Dairy Cattle Evaluation
3. ANSC 205: World Animal Resources
4. ANSC 206: Horse Management
5. ANSC 211: Breeding Animal Evaluation
6. ANSC 219: Meat Technology
7. ANSC 250: Companion Animals in Society
8. ANSC 301: Food Animal Production, Management, and Evaluation
9. ANSC 305: Human Animal Interactions
10. ANSC 306: Equine Science
11. ANSC 307: Companion Animal Management
12. ANSC 309: Meat Production and Marketing
13. ANSC 310: Meat Selection and Grading
14. ANSC 312: Advanced Livestock Evaluation
15. ANSC 313: Horse Appraisal
17. ANSC 322: Livestock Feeds and Feeding
18. ANSC 370: Companion Animal Policy
19. ANSC 400: Dairy Herd Management
20. ANSC 401: Beef Production
21. ANSC 402: Sheep and Goat Production
22. ANSC 403: Pork Production
23. ANSC 404: Poultry Science
24. ANSC 405: Advanced Dairy Management
25. ANSC 407: Animal Shelter Management

#### Select two of the following Basic Sciences courses:

1. ANSC 251: Epidemics and Infectious Diseases
2. ANSC 331: Biology of Reproduction
3. ANSC 350: Cellular Metabolism in Animals
4. ANSC 363: Behavior of Domestic Animals
5. ANSC 366: Animal Behavior
7. ANSC 409: Meat Science
8. ANSC 420: Ruminant Nutrition
9. ANSC 421: Minerals and Vitamins
10. ANSC 422: Companion Animal Nutrition
11. ANSC 431: Advanced Reproductive Biology
12. ANSC 438: Lactation Biology
13. ANSC 440: Applied Statistical Methods I
14. ANSC 441: Human Genetics
15. ANSC 444: Applied Animal Genetics
16. ANSC 445: Statistical Methods
17. ANSC 446: Population Genetics
18. ANSC 447: Advanced Genetics and Genomics
19. ANSC 448: Math Modeling in Life Sciences
20. ANSC 449: Biological Modeling
21. ANSC 450: Comparative Immunobiology
22. ANSC 451: Microbes and the Anim Indust
23. ANSC 452: Animal Growth and Development
24. ANSC 453: Stem Cell Biology
26. ANSC 509: Muscle Biology
27. ANSC 510: Protein and Energy Nutrition
28. ANSC 520: Regulation of Metabolism
29. ANSC 522: Advanced Ruminant Nutrition
30. ANSC 523: Techniques in Animal Nutrition
31. ANSC 524: Nonruminant Nutrition Concepts
32. ANSC 525: Topics in Nutrition Research
33. ANSC 526: Adv Companion Animal Nutrition
34. ANSC 533: Repro Physiology Lab Methods
35. ANSC 541: Regression Analysis
36. ANSC 542: Applied Bioinformatics
37. ANSC 543: Bioinformatics
38. ANSC 545: Statistical Genomics
39. ANSC 554: Immunobiological Methods
40. ANSC 561: Animal Stress Physiology

Additional elective courses must be completed to yield at least 126 total Hours for graduation.

**Total Hours** 126

1. ANSC 206, 250, 306 and 307 may NOT be used to meet more than one requirement.

Information listed in this catalog is current as of 02/2021

### Computer Engineering, BS and Electrical & Computer Engineering, MEng

*for the joint degree of Bachelor of Science in Computer Engineering and Master of Engineering in Electrical & Computer Engineering*

This program is not currently accepting applications.

*for the joint degree of Bachelor of Science in Computer Engineering and Master of Engineering in Electrical & Computer Engineering*

The joint B.S.-M.Eng. program in Electrical and Computer Engineering combines two degrees: a B.S. in CompE with a M.Eng. in ECE. Current Grainger ECE students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in the standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements are completed.
for both the B.S. - M.Eng. degree have been successfully completed. Students may participate in the graduation ceremonies for their B.S. degree once the 120 credit-hour requirement is met. There will be no Graduate College or BOT waivers allowed for students in this program. This program is not intended for students intending to pursue the Ph.D. degree—such students should apply to the traditional M.S. (with thesis) degree program.

Course Requirements

B.S. Component (120 hours)

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 120.
- The reduction of 8 credit hours includes:
  - 6 hours in Free Electives in CompE curricula
  - 2 hours in ECE or CS courses in CompE Technical Electives.
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Illinois undergraduate student minimum residence requirement must be satisfied.

M.Eng. Component (32 additional hours of coursework)

- Identical to stand-alone M.Eng. degree requirements. (http://catalog.illinois.edu/graduate/graduate-majors/ece/me-ece/)

Computer Science, BS-MCS

_for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science_

department website: https://cs.illinois.edu
department faculty: Computer Science Faculty (https://cs.illinois.edu/people/faculty/)
college website: https://grainger.illinois.edu/

The 5-year program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. in Computer Science. This program is competitive and admission is based on overall academic performance, letters of recommendation, and statement of purpose.

Admission

For deadlines and procedures, please consult the department website (https://cs.illinois.edu/academics/graduate/fifth-year-masters-programs/5-year-bs-mcs-program/). Current Computer Science students enrolled in The Grainger College of Engineering with a junior standing (must have at least one year left of their undergraduate study after admitted into the program) who maintain an excellent academic performance are eligible to apply for this program. Students admitted to this program will receive both degrees once all requirements for both degrees have been successfully completed. Transfer students entering the CS undergraduate program their junior year are also eligible to apply to this program.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the program to remain in the program.
- may register for graduate courses and earn graduate credit hours, with approval from their graduate academic advisor, if they have 12 hours or less to complete in their FINAL semester of their undergraduate studies. Please note that students cannot transfer more than 12 credit hours of coursework over to their M.C.S. degree, which includes the shared coursework.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (this is the "Breadth Requirement" (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)), and satisfy all B.S. requirements to be officially recommended for admission to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the "Breadth Requirement" (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)), and an overall GPA of at least 3.0 GPA, students

- will be officially admitted into the Graduate College, with the application fee paid by the department.
- will be issued letter of admission from the Graduate College Admission Office and the Department of Computer Science, at which time they will be considered graduate students and assessed graduate tuition the following semester. International students may be required to submit additional documentation at this time.
- must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.
- must complete all the remaining M.C.S. degree requirements within two semesters (fall-spring, spring-summer, or spring-fall). Please note that if you finish your B.S. requirements in less than four years, you will not be given extra time to complete the M.C.S. degree requirements. You will just finish this joint program in less than 5-years and be able to start working sooner!

Withdrawal

Students who do not complete all 5-Year B.S.- M.C.S. degree program requirements may request by petition to have graduate hours earned, including the Breadth Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

_for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science_

Requirements

B.S. Component: 120 hours plus 3 "Breadth Requirement" courses for 9-12 graduate hours

- Same required courses as the traditional B.S. degree with the minimum hours required reduced to 120 hours.
- Must complete 3 out of the 4 "Breadth Requirement" courses: four different courses, each from a different area, from the following eight core areas with a grade of B- or higher.
- University undergraduate minimum residence requirement satisfied.
Computer Science, BS-MS

for the joint degree of Bachelor of Science in Computer Science and Master of Science in Computer Science

department website: https://cs.illinois.edu
department faculty: Computer Science Faculty (https://cs.illinois.edu/people/faculty/)
college website: https://grainger.illinois.edu/

The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Computer Science students enrolled in The Grainger College of Engineering with junior standing who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

Admission

For deadlines and procedures, consult the department website (https://cs.illinois.edu/academics/graduate/fifth-year-masters-programs/5-year-bs-ms-program/). Current Grainger Engineering Computer Science students who are in their junior year (normally at least 90+ credit hours, including those in progress, and at least one year of undergraduate course work remaining) with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.-M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Continued Graduate Study

Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master's degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master's degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

Requirements

B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):

- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
• Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
• Illinois undergraduate student minimum residence requirement satisfied
• Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):
• Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
• Satisfy Illinois’ graduate student minimum residence requirement.
• Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

Computer Science & Animal Sciences, BS & Animal Science, MANSC

for the degree of Bachelor of Science in Computer Science & Animal Sciences and the Master of Animal Sciences in Animal Science

animal sciences department information: https://ansc.illinois.edu/computer science degree information: https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs/#requirements

Please see the Computer Science advisor in 1210 Siebel Center, as well as the Animal Sciences Undergraduate Curriculum Coordinator, Dr. David Miller, 116 Animal Sciences Lab.

for the degree of Bachelor of Science in Computer Science & Animal Sciences and the Master of Animal Sciences in Animal Science

The joint BS (CS+ANSC)/MANSC program integrates a baccalaureate degree (BS) preparation in Computer Sciences and Animal Sciences (CS+ANSC) with a non-thesis Master of Animal Sciences (MANSC) preparation. Students enrolled in the BS (CS+ANSC) program that have completed at least 60 credit hours of degree requirements and that have a minimum GPA of 3.0 are eligible to apply and be admitted to this program. Students that have a GPA above 2.75 may be admitted on probationary status.

The Department of Animal Sciences will support the application to the MANSC program of the students in this joint program that have completed the required 126 credit hours towards a BS (CS+ANSC) degree (including 40 hours of 300- or 400-level courses) and that have a minimum GPA of 3.0. Up to 12 graduate-level (400- or 500-level) credit hours from the BS program will count towards the 32 credit-hour requirement of the MANSC program.

Twelve (12) hours of graduate level concentration electives in the BS requirements will overlap with 12 hours of electives required for the MS requirements.

Electrical Engineering, BS and Electrical & Computer Engineering, MEng

for the joint degree of Bachelor of Science in Electrical Engineering and Master of Engineering in Electrical & Computer Engineering

This program is not currently accepting applications.

The joint B.S. - M.Eng. program in Electrical and Computer Engineering combines two degrees: a B.S. in EE with a M.Eng. in ECE. Current Grainger ECE students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in the standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S. - M.Eng. degree have been successfully completed. Students may participate in the graduation ceremonies for their B.S. degree once the 120 credit-hour requirement is met. There will be no Graduate College or BOT waivers allowed for students in this program. This program is not intended for students intending to pursue the Ph.D. degree—such students should apply to the traditional M.S. (with thesis) degree program.

Course Requirements

B.S. Component (120 hours)

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 120.
- The reduction of 8 credit hours includes:
  - 6 hours in Free Electives in EE curricula
  - 2 hours in ECE courses in EE Technical Electives or 2 hours in ECE.
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Illinois undergraduate student minimum residence requirement must be satisfied.

M.Eng. Component (32 additional hours of coursework)

- Identical to stand-alone M.Eng. degree requirements. (http://catalog.illinois.edu/graduate/graduate-majors/ece/me-ece/)

Engineering Physics, BS and Engineering: Energy Systems, MEng

for the joint degree of Bachelor of Science in Engineering Physics and Master of Engineering in Engineering, Energy Systems Concentration

department website: Department of Physics (https://physics.illinois.edu)
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in select engineering undergraduate majors with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

Admissions

For deadlines and procedures, consult the department Web site. Current Grainger Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose.

Admissions to this program will occur both in the fall and spring term. The application deadline for spring term will be December 1 and for fall term will be July 1. The Energy and Sustainability Engineering M.Eng.
admissions committee will review applications for this program and students accepted into the program will be given "provisional admission." Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, students:

- must apply and be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student's traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 124-hour B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program. It is noted students desiring to have their B.S. degree ABET accredited should remain in their BS (128 hours) program and apply for the M.Eng. degree in their senior year.

for the joint degree of Bachelor of Science in Engineering Physics and Master of Engineering in Engineering, Energy Systems Concentration

Course Requirements

B.S. Component (124 hours):

- Same required courses as the traditional B.S. degree with the minimum hours required reduced from 128 to 124 hours.
- The reduction of 4 credit hours is based on the utilization of 4 hours in free elective in the student’s undergraduate curriculum.
- Illinois undergraduate student minimum residence requirement satisfied.
- Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework)

- Identical to the current M.Eng. in Engineering with a concentration in Energy Systems (http://catalog.illinois.edu/graduate/concentrations/energy-systems-meng/). A total of 32 hours (including the shared coursework) are required.
- Satisfy Illinois’ graduate student minimum residence requirement.
- Overall GPA of 3.0 must be maintained through completion of M.Eng. component of the program.

Industrial Engineering, BS and Engineering: Energy Systems, MEng

for the joint degree of Bachelor of Science in Industrial Engineering and Master of Engineering in Engineering, Energy Systems Concentration

department website: https://ise.illinois.edu
department faculty: Industrial & Enterprise Systems Faculty (https://ise.illinois.edu/directory/faculty.html)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainier.illinois.edu/admissions/)
college website: https://grainier.illinois.edu/

The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in select engineering undergraduate majors with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in The Grainger College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

Admissions

For deadlines and procedures, consult the department Web site. Current Grainger Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program.

Admission decisions are based on overall academic performance, letters of reference, and statement of purpose.

Admissions to this program will occur both in the fall and spring term. The application deadline for spring term will be December 1 and for fall term will be July 1. The Energy and Sustainability Engineering M.Eng. admissions committee will review applications for this program and students accepted into the program will be given "provisional admission." Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Information listed in this catalog is current as of 02/2021
Upon successful completion of the B.S. component, students:
• must apply and be officially admitted into the Graduate College.
• will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal
Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student’s traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 124-hour B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program. It is noted students desiring to have their B.S. degree ABET accredited should remain in their BS (128 hours) program and apply for the M.Eng. degree in their senior year.

for the joint degree of Bachelor of Science in Industrial Engineering and Master of Engineering in Engineering, Energy Systems Concentration

Course Requirements

B.S. Component (124 hours):
• Same required courses as the traditional B.S. degree with the minimum hours required reduced from 128 to 124 hours.
• The reduction of 4 credit hours is based on the utilization of 4 hours in free elective in the student’s undergraduate curriculum.
• Illinois undergraduate student minimum residence requirement satisfied.
• Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework)
• Identical to the current M.Eng. in Engineering with a concentration in Energy Systems (http://catalog.illinois.edu/graduate/concentrations/energy-systems-meng/). A total of 32 hours (including the shared coursework) are required.
• Satisfy Illinois’ graduate student minimum residence requirement.
• Overall GPA of 3.00 must be maintained through completion of M.Eng. component of the program.

Interdisciplinary Health Sciences, BS and Public Health, MPH
for the degrees of Bachelor of Science Major in Interdisciplinary Health Science and Master of Public Health in Public Health

department website: http://ihealth.illinois.edu/
department faculty: I-Health Faculty and Staff (http://ihealth.illinois.edu/faculty-staff/)
college catalog page: Applied Health Sciences Catalog (p. 1148)
college website: http://www.ahs.illinois.edu/

The Interdisciplinary Health Sciences, BS degree program includes a set of three concentrations, of which a student must complete at least one:

Health & Aging Concentration (p. 231)
Health Behavior Change Concentration (p. 232)
Health Diversity Concentration (http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/)

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the degrees of Bachelor of Science Major in Interdisciplinary Health Science and Master of Public Health in Public Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester. For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

Journalism, BS-MJ
for the degrees of Bachelor of Science in Journalism and Master of Journalism in Journalism
head of department: Stephanie Craft
director of graduate studies: Brant Houston
email: journ@illinois.edu
department website: https://media.illinois.edu/journalism
department faculty: https://media.illinois.edu/journalism/faculty
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply/
college website: https://media.illinois.edu/department website: https://media.illinois.edu/journalism/faculty
dept office: 119 Gregory Hall, 810 S. Wright Street, Urbana, IL 61801
phone: (217) 333-0709

Master of Journalism
The Department of Journalism offers the M.J. degree as part of a 4+1 program focused on the development of a broad range of professional skills for undergraduates enrolled in the Bachelor of Science in Journalism program at the University of Illinois at Urbana-Champaign. Students can apply for the B.S./M.J. program in the first semester of their junior year; admitted students select their remaining undergraduate journalism elective courses according to a plan of study that reserves certain upper-division courses for the graduate portion of their program.

Programs in Journalism

Undergraduate Programs:
  major: Journalism, BS (p. 238)
  major: Journalism, BS-MJ (p. 442)
  minors: Journalism (p. 486) | Media (p. 493)

Graduate Programs:
  degree: Journalism, BS-MJ (p. 442)
  degree: Journalism, MS (p. 810)
  joint degree: Journalism, MS and Law, JD (p. 1131)
The department does not offer a Ph.D. degree. For the program leading to the Doctor of Philosophy in Communications, see Communications and Media, PhD (p. 655).

Admission
Both the M.S. and M.J. programs place a strong emphasis on journalism, and candidates who are accepted are most often those with a demonstrated interest in practicing journalism. It is imperative that all applicants supply writing samples.

Applicants to the M.J. program must be University of Illinois at Urbana-Champaign students in the B.S. in Journalism program with a cumulative GPA of at least 3.40 and have junior standing (at least 60 but no more than 89 credit hours) to be eligible to apply. Because the master’s program has an enrollment ceiling, some applicants with grade point averages of 3.4 or higher may not be admitted.

Letters of recommendation are required. An interview with the head of the department or director of graduate studies is helpful but not required. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College’s recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department’s website (https://media.illinois.edu/journalism/degrees-programs/masters/).

Financial Aid
M.J. students may not hold assistantships or other tuition and fee waiver-generating appointments. A limited number of merit-based scholarships are available for B.S./M.J. students.

for the degrees of Bachelor of Science in Journalism and Master of Journalism in Journalism

Total hours: 32 for M.J. portion, 152 for B.S. and M.J. combined
The B.S./M.J. is an integrated, accelerated program for Illinois Journalism majors that may be completed in less than is required to complete both degrees separately and provides sharper focus on professional multimedia skills than would be available with the two existing degrees combined. Students who maintain superior academic performance are eligible to apply as juniors (after earning at least 60 but not more than 89 credit hours). Accepted students then work on both degrees simultaneously and will receive both at the same time, once all requirements for each have been completed.

- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 444)

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student’s area of concentration within Kinesiology.

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control, and skill of physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of Kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many
students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the degrees of Bachelor of Science Major in Kinesiology and Master of Public Health in Public Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester. For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

Materials Science & Engineering, BS and Engineering: Energy Systems, MEng

for the joint degree of Bachelor of Science in Materials Science & Engineering and Master of Engineering in Engineering, Energy Systems Concentration

department website: https://matse.illinois.edu
department faculty: Materials Science & Engineering Faculty (https://matse.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in any engineering undergraduate major with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in The Grainger College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

Admissions

For deadlines and procedures, consult the department Web site. Current Grainger Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program.

Admission decisions are based on overall academic performance, letters of reference, and statement of purpose.

Admissions to this program will occur both in the fall and spring term. The application deadline for spring term will be October 2 and for fall term will be June 1. The Energy and Sustainability Engineering M.Eng. admissions committee will review applications for this program and students accepted into the program will be given “provisional admission.” Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
• must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, students:

• must apply and be officially admitted into the Graduate College.
• will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student's traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

for the joint degree of Bachelor of Science in Materials Science & Engineering and Master of Engineering in Engineering, Energy Systems Concentration

Course Requirements

B.S. Component (124 hours):

• Same required courses as the traditional B.S. degree with the minimum hours required reduced from 128 to 124 hours.
• The reduction of 4 credit hours is based on the utilization of 4 hours in free elective in the student’s undergraduate curriculum.
• Illinois undergraduate student minimum residence requirement satisfied.
• Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework)

• Identical to the current M.Eng. in Engineering with a concentration in Energy Systems (http://catalog.illinois.edu/graduate/concentrations/energy-systems-meng/). A total of 32 hours (including the shared coursework) are required.

• Satisfy Illinois’ graduate student minimum residence requirement.

• Overall GPA of 3.00 must be maintained through completion of M.Eng. component of the program.

Materials Science & Engineering, BS and Materials Engineering, MEng

for the joint degrees of Bachelor of Science Major in Materials Science & Engineering and Materials Engineering, MEng

This program is not currently accepting applications.

for the joint degrees of Bachelor of Science Major in Materials Science & Engineering & Materials Engineering, MEng

Requirements

B.S. Component (120 hours)

• Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours

• The reduction of 8 credit hours includes:
  • 5 hours of free electives.
  • 3 hours of the area specialty course in a different area (the latter becomes part of M.Eng. program requirements)

• At least one semester (or 2 summers) devoted to an industrial internship or co-op.

• It is strongly suggested that the student take 2 courses in some aspect of business, economics, environmental studies, labor and industrial relations, technology entrepreneurship or technology and management as the elective component of their Liberal Education requirements. Partial or complete fulfillment of the Technology and Management or Business minor or the Technology Commercialization Certificate is recommended for those admitted by application if available hours permit. The students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department), with additional hours recommended. It is noted that since receipt of the B.S. degree is delayed until the requirements for the M.Eng are completed, the student has the opportunity to complete the undergraduate minors while taking the M. Eng requirements.

• Overall GPA of 3.00 maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.Eng. Component (minimum 36 additional hours of coursework)

• 36 hours course work, including at least 19 graduate hours of MatSE courses with 12 hours credit overall in 500-level courses. The course work shall include MSE 585 (two semesters or equivalent, 30 weeks total, of industrial internships or co-ops; one of the semesters can be during the B.S. program), 6 hours of 400- or 500-level area specialty courses in the student’s area, 3 hours of 400- or 500-level MSE courses from a different area, 2 hours of MSE 595, and 2 hours of MSE 529 or MSE 559. Ten hours of courses in one or more of the areas of business or technology management, and entrepreneurship are required to be included in the overall program. Completion of the requirements for the various Certificates granted by the Technology Entrepreneur Center is recommended

• MSE 492; credit does not count toward degree.

1 Students find internship companies and positions with the help of the departmental and College Placement offices. The MSE 585 internship requires approval by the departmental Director of Graduate Studies to insure that it matches the student’s individual career objectives and meets the learning goals of the program. Students taking an internship as part of their undergraduate B.S program should also check with the Director of Graduate Studies; his/her approval is required if the student is already accepted in the combined B.S./M. Eng. Program. Students will be expected to present an oral report on their internship in either MSE 529 or MSE 559, as appropriate, the semester following completion of the internship.

Materials Science & Engineering, BS and Materials Science & Engineering, MS

for the joint degrees of Bachelor of Science Major in Materials Science & Engineering and Master of Science in Materials Science & Engineering

department website: https://matse.illinois.edu
department faculty: Materials Science & Engineering Faculty (https://matse.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://engineering.illinois.edu/

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to
provide the underpinning knowledge for graduate study. Note: students interested in biomaterials take a specific set of courses to provide them with a background in biology and chemistry while maintaining a strong engineering focus.

A combined B.S.-M.S. Materials Science and Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (https://currentcourses.illinois.edu/undergraduate/engineer/) and the department’s website.

**Admission to the Program**

Current Illinois MatSE students with Junior standing and with an overall grade point average (GPA) of at least 3.00 (A = 4.00) may apply for provisional admission to the program. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, in order to remain in the program.
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area coursework, and an overall GPA of at least 3.00 in all graduate coursework, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate teaching assistantships and tuition waivers, as well as fellowships and scholarships (in MatSE only) available to graduate students in MatSE.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are not eligible to continue in the Ph.D. program in MatSE. Students wishing to pursue a Ph.D. must apply separately for admission to that program.

**Withdrawal**

Students who do not complete all of the 5-year B.S.-M.Eng. degree program requirements may request, by petition to the Graduate College after obtaining approval by their advisor, the department, and the Associate Dean for Undergraduate Programs in the College of Engineering, to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. degree in MatSE. Students reverting to the traditional B.S. degree program must satisfy all degree requirements, including completion of the required “area specialty course(s) in a different area” and the stated credit hour requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

**for the joint degrees of Bachelor of Science Major in Materials Science & Engineering and Master of Science in Materials Science & Engineering**

**Course Requirements**

**BS Component** (120 hours including 3 advanced, graduate level, area courses for at least 9 hours). Note that the BS component of this BS/MS degree is not ABET accredited.

- Same required courses as the traditional BS degree with minimum hours reduced to 120 hours; except MSE 395 is dropped (i.e. 1 hour). At present, students in their fourth or fifth year considering withdrawing from the MS portion of the program should register for MSE 395 in the spring semester; the resulting BS degree would then be ABET accredited. It is anticipated that, in the near future, senior thesis will be accepted by ABET as an appropriate ‘design experience’ when approved, MSE 395 will no longer be required.
- 2 of the required remaining 4 area courses are to be taken at the graduate level (i.e. the students will be held to the course and grading requirements of a graduate student). The 3rd advanced level course can be either int he area or in another area as a tech elective.
- Reduction of 7 hours in free electives and 3 hours in tech electives (10 hours).
- Senior thesis to be taken in lieu of MSE 395 and one area course (6 hours total recommended, with 2 being the remaining 2 hours of free electives).
- Student retains one tech elective.
- Overall GPA of 3.5 maintained through completion of BS component of the program and minimum residency requirements satisfied.

**MS Component** (minimum 24 additional hours of coursework, plus 8 hours of MSE 599 thesis).

- Same overall requirements as for traditional MS with thesis.
- At least one 400-500 level course (for the BS or MS) will be a MatSE course from a different area.
- Complete a MS thesis according to MatSE Department requirements; research for the senior thesis will often serve as a beginning for the MS thesis but the student may change thesis advisors.

**Nuclear, Plasma & Radiological Engineering, BS and Engineering: Energy Systems, MEng**

**for the joint degree of Bachelor of Science in Nuclear, Plasma & Radiological Engineering and Master of Engineering in Engineering, Energy Systems Concentration**

**department website:** https://npre.illinois.edu/

**department faculty:** Nuclear, Plasma, & Radiological Engineering Faculty (https://npre.illinois.edu/directory/faculty/)

**overview of college admissions & requirements:** The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)

**college website:** https://grainger.illinois.edu/
The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in select engineering undergraduate majors with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student's knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

**Admissions**

For deadlines and procedures, consult the department Web site. Current Grainger Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. Admissions to this program will occur both in the fall and spring term. The application deadline for spring term will be December 1 and for fall term will be July 1. The Energy and Sustainability Engineering M.Eng. admissions committee will review applications for this program and students accepted into the program will be given "provisional admission." Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, students:

- must apply and be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

**Withdrawal**

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student's traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 124-hour B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program. It is noted students desiring to have their B.S. degree ABET accredited should remain in their BS (128 hours) program and apply for the M.Eng. degree in their senior year.*

**Course Requirements**

**B.S. Component (124 hours):**

- Same required courses as the traditional B.S. degree with the minimum hours required reduced from 128 to 124 hours.
- The reduction of 4 credit hours is based on the utilization of 4 hours in free elective in the student's undergraduate curriculum.
- Illinois undergraduate student minimum residence requirement satisfied.
- Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

**M.Eng. Component (32 additional hours of coursework):**

- Identical to the current M.Eng. in Engineering with a concentration in Energy Systems (http://catalog.illinois.edu/graduate/concentrations/energy-systems-meng/). A total of 32 hours (including the shared coursework) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.0 must be maintained through completion of M.Eng. component of the program.

**Recreation, Sport & Tourism, BS-MS**

_for the degrees of Bachelor of Science and Master of Science, Major in Recreation, Sport & Tourism_

**department website:** http://rst.illinois.edu/
**department faculty:** Recreation, Sport, & Tourism Faculty (http://rst.illinois.edu/faculty/)
**college catalog page:** Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
**college website:** http://ahs.illinois.edu/

The Department of Recreation, Sport and Tourism (RST) offers an integrated and accelerated program for outstanding students that combines a bachelor’s and master’s degree, referred to as the 5-year BS/MS option. This option can be completed in less time than is required for the two degrees separately. The 5-year BS/MS option is designed to provide students with the academic and professional skills needed to succeed in the recreation, sport and tourism industry.

RST majors with a GPA of 3.5 are eligible to apply at the beginning of their junior year. Accepted students will then work on both degrees simultaneously and will receive both degrees at the same time, once all requirements for each have been completed. Although their degrees will not officially be awarded, students may participate in the bachelor's
graduation ceremonies once they have completed the 120 credit-hour requirement for that degree.

Systems Engineering & Design, BS and Engineering: Energy Systems, MEng

for the joint degree of Bachelor of Science in Systems Engineering & Design and Master of Engineering in Engineering, Energy Systems Concentration

department website: https://ise.illinois.edu/
department faculty: Industrial & Enterprise Systems Faculty (https://ise.illinois.edu/directory/faculty.html)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The joint B.S.-M.Eng. in Engineering with a Concentration in Energy Systems program combines two degrees: a B.S. in select engineering undergraduate majors with the M.Eng. in Engineering with a Concentration in Energy Systems. Current Illinois students enrolled in the College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The program is designed to broaden a student’s knowledge beyond that possible in a standard 4-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.Eng. degree have been successfully completed but will be permitted to participate in the B.S. degree graduation ceremonies with their class if they have completed the equivalent number of credit hours. This program is not intended for students intending to pursue a Ph.D. degree.

Admissions

For deadlines and procedures, consult the department Web site. Current Illinois Engineering students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program.

Admission decisions are based on overall academic performance, letters of reference, and statement of purpose.

Admissions to this program will occur both in the fall and spring term. The application deadline for spring term will be December 1 and for fall term will be July 1. The Energy and Sustainability Engineering M.Eng. admissions committee will review applications for this program and students accepted into the program will be given “provisional admission.” Students provisionally admitted to the program:

• are assigned a graduate academic advisor when admitted.
• must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
• may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have less than 12 credit hours remaining in their B.S. component.
• must earn at least 124 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, students:
• must apply and be officially admitted into the Graduate College.
• will be issued letters of admission from the Graduate College and the NPRE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
• must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
• must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs. Students who do not complete both the B.S.-M.Eng. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward the student’s traditional engineering undergraduate major. Students reverting to the traditional B.S. degree program must complete 128 hours and must satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

*The 124-hour B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional 128-hour B.S. program. It is noted students desiring to have their B.S. degree ABET accredited should remain in their BS (128 hours) program and apply for the M.Eng. degree in their senior year.

for the joint degree of Bachelor of Science in Systems Engineering & Design and Master of Engineering in Engineering, Energy Systems Concentration

Information listed in this catalog is current as of 02/2021
Course Requirements

B.S. Component (124 hours):

- Same required courses as the traditional B.S. degree with the
  minimum hours required reduced from 128 to 124 hours.
- The reduction of 4 credit hours is based on the utilization of 4
  hours in free elective in the student's undergraduate curriculum.
- Illinois undergraduate student minimum residence requirement
  satisfied.
- Overall grade point average (GPA) of 3.0 maintained through
  completion of B.S. component of the program.

M.Eng. Component (32 additional hours of coursework)

- Identical to the current M.Eng. in Engineering with a concentration in
  Energy Systems (http://catalog.illinois.edu/graduate/concentrations/
  energy-systems-meng/). A total of 32 hours (including the shared
  coursework) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of
  M.Eng. component of the program.

Urban Studies & Planning, BA &
Urban Planning, MUP

For the degrees of Bachelor of Arts Major in Urban Studies & Planning and
Master of Urban Planning in Urban Planning

department website: https://urban.illinois.edu

department faculty: Urban & Regional Planning Faculty (https://
urban.illinois.edu/people/meet-our-faculty/)
college catalog page: Fine & Applied Arts (p. 1151)
college website: https://www.faa.illinois.edu/

The 4+1 program allows for students completing the BAUSP degree in
the Department to complete the MUP on an accelerated timeline. The 4+1
program is highly selective. Each year, a limited number of outstanding
BAUSP juniors are identified and invited to apply to the program. While
students can notify the BAUSP Director of their interest in the 4+1
program, the Department will independently review student academic
records to identify eligible candidates for the program.
In the fall and spring semesters of their senior year, the BAUSP Director
will collect feedback on 4+1 student performance from their course
instructors, and will make a determination regarding adequate progress in
the program.
At the end of the senior year, the 4+1 student is qualified to graduate with
the BAUSP degree, having met all the requirements of that program. In
the senior year, 4+1 students wishing to complete the MUP degree will
formally apply to the MUP program, submitting a full application package
including recommendations, GRE scores, and transcripts.

Capstone Preparation: During the 3rd year, students enroll in
UP 301, Capstone Preparation. Students meet individually
with their capstone advisor to develop a plan to meet the
capstone requirement. To pass this course students must
turn in a proposal at the end of the semester.

Capstone Experience: Students engage in a semester or
summer-long applied activity outside of the classroom. The
Capstone Experience is intended to engage the students in
the real world and prepare them for the job market. Students
typically complete this requirement during their junior
year, but have the option to complete it during the summer
between their 3rd and 4th year. Examples include a paid or
unpaid internship, volunteer work, consulting project with a
client, summer research and more. Students enroll in UP 390,
Planning Internship, and/or UP 397, Undergraduate Project, to
receive credit.

Capstone Seminar: During the 4th year, students enroll in
UP 401 for 2 semesters. Students will participate in monthly
activities to discuss and reflect on the Capstone Experience.
In addition, students will present a poster summarizing
their capstone experience in a public setting; for example
at a public engagement conference, public meeting or
community meeting, McNair Scholars conference, James
Scholars event, Illinois American Planning Association
meeting, undergraduate research symposium, or other venue.
The seminar sessions also include career development
such as resume writing, interviewing and networking with
professionals through the Wetmore Lecture Series.
Concentration (select one): Sustainability, Policy & Planning, Social Justice, or Global Cities

Total Hours: 18-19

¹ HDFS majors pursuing the minor may not use this course to meet a major requirement.

department website: http://hdfs.illinois.edu/
department faculty: https://hdfs.illinois.edu/directory/faculty (https://hdfs.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/undergraduate/aces/)
college website: https://aces.illinois.edu/

The Adult Development minor combines theoretical and practical approaches to understanding issues faced by adults as individuals, partners, family members, learners, caregivers, and clients of social agencies. Course work examines adults from age 25 to 90+ in the contexts of evolving family roles, health issues, and social service needs. Students anticipating careers in social or health-related services will find an understanding of adult development and its attendant issues a valuable complement to other professional skills.

The minor requires a minimum of 18 hours. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Minimum required hours and supporting course work: At least six hours of advanced coursework must be distinct from credit earned for the student’s major or another minor. Courses in the minor may not be taken Credit/No Credit. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Minimum hours for minor: 18 hours.

Back to Top (p. 505)
HDFS 294 - Research Internship, HDFS 450 - Practicum in HDFS, or HDFS 494 - Applied Research Methods may count towards the Adult Development minor if these field/research experiences are focused on adults ages 25 - 90+. No more than 3 combined hours of HDFS 294, HDFS 450, HDFS 494 or equivalent field/research experience may be counted toward minor requirements.

African-American Studies Interdisciplinary Minor

Interdisciplinary Minor in African-American Studies

department website: https://afro.illinois.edu/
department faculty: African American Studies Faculty (https://afro.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: afro-public@illinois.edu

The Department of African American Studies offers a campus-wide interdisciplinary minor in African American Studies. The minor is premised on the following principles: Interdisciplinarity, the centrality of Black women and gender, the use of the Global Africa/African Diaspora as a contextualizing framework and an emphasis on black agency or self-determining activity of African peoples. A minimum grade point average of 2.33 is required for completion of courses taken in the program. The Department of African American Studies must approve a student’s minor course plan.

American Indian Studies Minor

for the Minor in American Indian Studies

program website: http://ais.illinois.edu
program faculty: American Indian Studies Faculty (https://ais.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: ais@illinois.edu

American Indian Studies (AIS) prepares students in a range of methodologies, theories, technologies, and teaching approaches that compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students in preparing for graduate school or for careers in a variety of pursuits including public and business administration, education, public relations,
marketing, politics, and government, especially as they relate to American Indian and Native American constituencies. Career opportunities also exist in agencies such as Indian Health Services, the Bureau of Indian Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual foundation for success in an increasingly challenging world.

American Indian Studies (AIS) is an interdisciplinary program with four subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The courses chosen must form a coherent program of study and be approved by an AIS advisor.

Architectural Studies Minor
for the Minor in Architectural Studies

School website: https://arch.illinois.edu/
Overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
College website: https://faa.illinois.edu/
Email: architecture@illinois.edu

The minor in Architectural Studies allows non-architecture undergraduate students to gain an overview of architecture by taking a series of required courses in architecture. This is the only undergraduate minor offered by the School of Architecture.

Course Requirements
The architecture minor requires the successful completion of a minimum of 19 hours of architecture courses. Students entering the program with advanced credit for required courses must take courses from the Additional Courses list to attain the total hours needed for completion of the minor. All students in the minor must have at least 6 hours of 300- or 400-level courses. ARCH 231 and ARCH 273 must be taken concurrently.

<table>

Information listed in this catalog is current as of 02/2021
Prerequisites
Students must comply with the prerequisite requirements of courses to be taken under this program. Some of these requirements may be satisfied while in the program.

Admission
Admission to the minor will be processed by the School of Architecture Undergraduate Programs Office. Students may enter the Minor in Architectural Studies from sophomore year until such time that allows the completion of the minor before graduating in their major area of study.

Advising
Advising of students in the minor will be conducted by the advisors in the Undergraduate Programs Office of the School of Architecture.

Certification of Successful Completion
The Associate Dean for Undergraduate Academic Affairs in the College of Fine and Applied Arts (FAA) will certify successful completion of the minor.

Students must declare their intentions in the spring and be admitted to the program for the fall to pursue the Minor in Architectural Studies.

Art & Design Minor

for the minor in Art & Design

Students will be required to have passed one of the approved courses for non-majors (ART 102-105, 140) for entry into the Minor.

Astronomy Minor

for the Minor in Astronomy

**department website:** https://astro.illinois.edu/
**department faculty:** Astronomy Faculty (https://astro.illinois.edu/directory/faculty/)
**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
**college website:** https://las.illinois.edu/
**email:** astronomy@illinois.edu

The minor in astronomy is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

Courses at any level taught by the Department of Astronomy ²  3-6

Minimum total hours  18

¹ Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.
² No more than 4 hours of ASTR 390 will be counted towards the minor.

Atmospheric Sciences Minor

**Minor in Atmospheric Sciences**
The minor in Atmospheric Sciences is designed for students who desire a significant background in Atmospheric Sciences to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture; or scientific pursuits such as chemistry, physics, biology, and scientific writing.

Bioengineering Minor

for the Minor in Bioengineering

College: The Grainger College of Engineering (https://grainger.illinois.edu/)
webpage: Bioengineering Minor (https://bioengineering.illinois.edu/academics/undergraduate/advising/minors/)

Bioengineering is a broad, interdisciplinary field that brings together engineering, biology, and medicine to create new techniques, devices, and understanding of living systems to improve the quality of human life. Its practice ranges from the fundamental study of the behavior of biological materials at the molecular level to the design of medical devices to help the disabled.

Any of the existing engineering programs can provide a good foundation for work in bioengineering. However, the engineering undergraduate needs additional education in the biologically oriented sciences to obtain a strong background for bioengineering. With such a background, the student should be able to progress rapidly on the graduate level in any branch of bioengineering. In industry, the graduate will be competent to handle engineering tasks related to biology.

For students pursuing the Bioengineering Minor from non-engineering backgrounds, please note that upper level electives may have engineering courses as prerequisites and these, and any subsequent prerequisite courses, are required for anyone taking the course. For more information regarding the Bioengineering minor, visit the Bioengineering minor Web site (http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering- students/), contact the Bioengineering Department Office (1240 Everitt Lab, 217-300-8066, bioe-ugradprograms@illinois.edu, bioe-ugradprograms@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Students may fulfill the requirements for a minor in bioengineering by completing the following course sequence. Engineering students who are proficient in biology may waive MCB 150 as a prerequisite for courses in this minor.

Biomolecular Engineering Minor

for the Minor in Biomolecular Engineering

department website: https://chbe.illinois.edu/
department faculty: Chemical & Biomolecular Engineering Faculty (http://chbe.illinois.edu/directory/)
advising: SCS Academic Advising (https://scs.illinois.edu/academics/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

Biomolecular Engineering is a broad, interdisciplinary field with its main goal of engineering value-added biomolecules and biomolecular systems for applications in medical, chemical, agricultural and food industries. Its practice ranges from fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare non-chemical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in chemical engineering. Those students...
should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For further information, please contact the Department of Chemical and Biomolecular Engineering.

¹ Students must take at least three "Biomolecular Engineering" courses offered by the Department of Chemical and Biomolecular Engineering (for example, including CHBE 471, CHBE 472, CHBE 473, and CHBE 474). Students may obtain a current list of courses that may be used to satisfy this requirement in Room 99 RAL.

² Course to be selected from a departmentally approved list of biomolecular engineering related technical electives.

For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@scs.illinois.edu.

**Business Minor for Non-Business Majors**

**for the Minor in Business for Non-Business Majors**

For more information, please visit the Business Minor website (https://business.illinois.edu/minor/) for important changes to the application process and requirements.

The Business Minor is for students earning Undergraduate degrees in colleges other than the Gies College of Business. The Business Minor provides coursework through which Non-Business students learn skills used in business. The Business Minor is not available to Gies College of Business students and Technology and Management Minor students. The Business Minor is not to be considered as preparation for transfer into the Gies College of Business to earn an Undergraduate Business degree.

To declare their Minors, Non-Business students must submit their Statement of Intent to Pursue a Campus-Approved Minor (http://provost.illinois.edu/files/2017/01/Intent-to-Pursue-Minor.pdf) (Statements) to 1055 Business Instructional Facility (BIF) at any time.

1. Please note that not every business minor course will be offered every semester or term. Students must select judiciously and enroll in the business minor courses when they are offered throughout any academic year.
2. Business minor students must register for the online sections of all minor courses if online sections are offered.
3. Enrollment instructions are noted in the semester's class schedule course's Section Detail & Information in Course Explorer. Students must complete all business minor course prerequisites. Students who have not completed a minor course's prerequisite will have their enrollment canceled in that specific course by the department.
4. A minimum number of off-campus transfer courses will be permitted to fulfill the minor core and elective course requirements. You should use Transferology to confirm the off-campus course’s transferability to fulfill the minor requirements. You may confirm with the business minor program if a proposed off-campus course will fulfill the minor requirements.
5. Courses taken through a University of Illinois study abroad program will fulfill the business minor core and elective course requirements. These requirements are fulfilled only if the course taken exactly matches course articulations of the Gies Business course. For example, the study abroad exact equivalent course to our campus's BADM 380 course is an acceptable business minor elective course. Study abroad BADM 3- and BADM 4- courses will not fulfill the minor's core and elective course requirements. In addition, minor core and elective course requirements are not fulfilled with study abroad courses in finance, information systems, operations management, management, marketing, or supply chain management.
6. The Business Minor is designed to be completed within three academic years. Gies College of Business cannot guarantee minor completion.

Contact busminor@business.illinois.edu to address academic questions.

Minimum required minor and supporting course work: All six Business Minor courses must be completed with letter grades. Sophomore standing. For all courses for which online delivery is available, students pursuing the minor must enroll in online sections.

GPA Requirement: a minimum 2.0 GPA is required to declare the minor.

Child Health and Well-being Minor

*for the minor in Child Health and Well-being*

**department website:** http://hdfs.illinois.edu/
**department faculty:** https://hdfs.illinois.edu/directory/faculty (https://hdfs.illinois.edu/directory/faculty/)
**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/undergraduate/aces/)
**college website:** https://aces.illinois.edu/

Understanding child development and well-being are integral to keeping a child healthy. Similarly, knowing how to interact with children, how to ask family members questions to assess development, and knowing typical milestones in development by age group are all a part of good medical and allied health practices. The child health and well-being minor combines theoretical and practical approaches to understanding child development and well-being. Coursework in this minor examines child development biologically, psychologically, and socially from birth through age 18. Development is looked at in the context of the child’s daily experience, with additional coursework focused on medical settings, special needs challenges, and grief.

The minor requires a minimum of 19 hours; ten hours of courses on child development and nine hours of courses examining health and well-being. 6 hours of advanced course credit must be distinct from credit earned for a student’s major or another minor.

Cinema Studies Undergraduate Minor

*for the Minor in Cinema Studies - Undergraduate*

**department website:** https://media.illinois.edu/media-cinema-studies (https://media.illinois.edu/media-cinema-studies/)
**department faculty:** https://media.illinois.edu/media-cinema-studies/faculty (https://media.illinois.edu/media-cinema-studies/faculty/)
**overview of college admissions & requirements:** College of Media (p. 1159)
**college website:** https://media.illinois.edu/

The Cinema Studies minor provides undergraduate students with core coursework in the film studies discipline while also allowing them freedom to explore various approaches to the subject, presented by
world-class Media & Cinema Studies department faculty as well as film scholars throughout campus.

Students pursuing the Cinema Studies minor will take coursework that is core to the discipline with themes including contemporary movies, surveys of world cinema, and film theory and criticism. Students will take at least one course related to either non-U.S. cinema or about identity, culture, and politics within the United States as it interfaces with film.

Programs in Cinema Studies

Undergraduate Programs:
- **major**: Media & Cinema Studies, BS (p. 289)
- **minors**: Cinema Studies (p. 462) | Critical Film Production (p. 468) | Media (p. 493)

Graduate Programs:
- **minor**: Cinema Studies (p. 1102)

Minor in Cinema Studies - Undergraduate

Students are expected to complete 18 hours of approved Cinema Studies minor coursework, of which 6 hours must be at the 300-400-level. At least 3 hours of 300-400-level coursework must be offered by or cross-listed with the Department of Media & Cinema Studies (MACS), other than those used to fulfill the requirements below.

minor advisor: Jennifer Bergmark
email: bergmar1 (bergmar1@illinois.edu)@illinois.edu
phone: (217) 244-7467

school website: School of Art & Design (https://art.illinois.edu/)
school faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: Fine & Applied Arts (https://faa.illinois.edu/)

The Community-Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings. In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

Minimum required major and supporting course work: Students must meet the following course requirements for a total of 18 hours. A minimum of six hours must be completed at the 300 or 400 level.

OPTION 2

Two 400-level CSE courses listed above AND an independent study on a computational topic. In order for an independent study to fulfill the minor requirement, the student must conduct the undergraduate research with one of the CSE affiliated faculty.

**Computer Science Minor**

*for the Minor in Computer Science*

**College:** The Grainger College of Engineering (https://grainger.illinois.edu/)

**webpage:** CS Minor (https://cs.illinois.edu/academics/undergraduate/degree-program-options/minor-computer-science/)

**email:** undergrad@cs.illinois.edu

This minor is offered by the Department of Computer Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except Computer Science and Computer Engineering majors.
The following three courses are required:  

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 125</td>
<td>Intro to Computer Science</td>
<td>3</td>
</tr>
<tr>
<td>CS 173</td>
<td>Discrete Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 225</td>
<td>Data Structures</td>
<td>4</td>
</tr>
</tbody>
</table>

Three courses, including at least one at the 400 level, chosen from the departmentally approved list below. These courses must be taken as University of Illinois credit (though one may be taken in a Study Abroad program). Students may apply 2-3 of the additional courses from among the 400-level offerings:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 233</td>
<td>Computer Architecture</td>
</tr>
<tr>
<td>CS 241</td>
<td>System Programming</td>
</tr>
<tr>
<td>CS 357</td>
<td>Numerical Methods I</td>
</tr>
<tr>
<td>CS 374</td>
<td>Introduction to Algorithms &amp; Models of Computation</td>
</tr>
</tbody>
</table>

Any CS course between and including CS 410 and CS 498 except CS 413, CS 491, CS 492, CS 493, CS 494

1 Transfer equivalents of CS 125, CS 173 and/or CS 225 may satisfy these requirements – even if the number of credits for the transfer courses do not equal that for the UIUC equivalents – as long as the student completes at least 18 total credit hours, minimum, for the minor.

2 The following substitutions are allowed: ECE 220 for CS 125; MATH 213 for CS 173; and ECE 391 for CS 241.

3 Students must submit a course modification for any study abroad course used in this category.

For more information, please visit the CS minor Web site (https://cs.illinois.edu/academics/undergraduate/degree-program-options/minor-computer-science/), contact the Computer Science Academic Office (1210 Siebel Center, 217-333-4428, undergrad@cs.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Creative Writing Minor

*for the Minor in Creative Writing*

department website: English (http://www.english.illinois.edu/)
creative writing website: Creative Writing (https://english.illinois.edu/academics/undergraduate-studies/majors-minors/creative-writing-major/)
department faculty: English Faculty (https://english.illinois.edu/directory/specialty-areas/)
advising: English & Creative Writing advising (https://www.english.illinois.edu/undergraduate/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: englishadvising@illinois.edu

The Creative Writing minor, administered by the Department of English's Creative Writing Program, is designed to augment majors from all over campus with a program of small workshops (poetry or fiction) and a variety of other writing, literature, and film courses. The result should be the development of a range of analytical and creative skills that will enrich the undergraduate experience and help prepare students for work in any number of fields.

Students complete 9 hours of creative writing coursework by choosing one of the following 3-course (9-hour) sequences:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CW 106</td>
<td>Poetry Workshop I</td>
</tr>
<tr>
<td>CW 206</td>
<td>Poetry Workshop II</td>
</tr>
<tr>
<td>CW 406</td>
<td>Poetry Workshop III</td>
</tr>
</tbody>
</table>

OR

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CW 104</td>
<td>Fiction Workshop I</td>
</tr>
<tr>
<td>CW 204</td>
<td>Fiction Workshop II</td>
</tr>
<tr>
<td>CW 404</td>
<td>Fiction Workshop III</td>
</tr>
</tbody>
</table>

Approved Electives

Students complete 6 hours of coursework in any of the following areas (a minimum of 3 hours must be at the advanced 300 /400 level):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Any ENGL or CW course</td>
<td></td>
</tr>
<tr>
<td>CMN 310</td>
<td>The Rhetorical Tradition</td>
</tr>
<tr>
<td>CMN 423</td>
<td>Rhetorical Criticism</td>
</tr>
<tr>
<td>JOUR 475</td>
<td>In-Depth Writing Styles</td>
</tr>
<tr>
<td>THEA 211</td>
<td>Introduction to Playwriting</td>
</tr>
<tr>
<td>IS 410</td>
<td>Storytelling</td>
</tr>
</tbody>
</table>

Total Hours: 18

Criminology, Law, & Society Minor

*for the Minor in Criminology, Law, & Society*

department website: https://sociology.illinois.edu/
department faculty: Sociology Faculty (https://sociology.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: soc@illinois.edu

Criminology, Law, and Society provides a foundation for students seeking to supplement their major area of study, to develop knowledge and skills needed for criminological, law, and justice related occupations, or to lay foundation for law school or graduate study in sociology, criminology, or justice fields. Students take a range of sociology courses that provide theoretical and practical knowledge while exposing students to current sociological, legal, and justice issues.

<table>

Information listed in this catalog is current as of 02/2021

### Critical Film Production Minor

**for the Minor in Critical Film Production - Undergraduate**

Department website: [https://media.illinois.edu/media-cinema-studies/](https://media.illinois.edu/media-cinema-studies/)

Department faculty: [https://media.illinois.edu/media-cinema-studies/faculty/](https://media.illinois.edu/media-cinema-studies/faculty/)

Overview of college admissions & requirements: College of Media (p. 1159)

College website: [https://media.illinois.edu/](https://media.illinois.edu/)

The Minor in Critical Film Production provides undergraduate students with a rigorous introduction to core critical, formal, and technical aspects of filmmaking through the four required courses. The additional electives allow students to gain deeper theoretical, historical and/or methodological knowledge to enrich their filmmaking practice.

#### Programs in Cinema Studies

Undergraduate Programs:
- **Major**: Media & Cinema Studies, BS (p. 289)
- **Minors**: Cinema Studies (p. 462) | Critical Film Production (p. 468) | Media (p. 493)

Graduate Programs:
- **Minor**: Cinema Studies (p. 1102)

### Crop & Soil Management Minor

**for the Minor in Crop and Soil Management**

Department website: [https://cropsciences.illinois.edu/](https://cropsciences.illinois.edu/)

Department faculty: [https://cropsciences.illinois.edu/people/faculty/](https://cropsciences.illinois.edu/people/faculty/)

Overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

College website: [https://aces.illinois.edu/](https://aces.illinois.edu/)

The Crop and Soil Management minor is designed for students who desire a significant background in crop and soil systems to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student’s major and interests. Enrollment in the Crop and Soil Management minor is not available to students enrolled in the Crop Sciences major. Courses in the minor cannot be taken Credit/No Credit.

#### Code Title Hours
- CPSC 112 Introduction to Crop Sciences 4
- CPSC 418 Crop Growth and Management 3
- NRES 201 Introductory Soils 4

1 A course cannot be used toward more than one requirement in the minor.

---

Choose three courses from the following (9 hours minimum; at least 3 hours must be at the 300- or 400-level):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 101</td>
<td>Sociology of Gender</td>
<td></td>
</tr>
<tr>
<td>SOC 225</td>
<td>Race and Ethnicity</td>
<td></td>
</tr>
<tr>
<td>SOC 310</td>
<td>Sociology of Deviance</td>
<td></td>
</tr>
<tr>
<td>SOC 373</td>
<td>Social Inequality</td>
<td></td>
</tr>
<tr>
<td>SOC 375</td>
<td>Criminal Justice System</td>
<td></td>
</tr>
<tr>
<td>SOC 378</td>
<td>Sociology of Law 1</td>
<td></td>
</tr>
<tr>
<td>SOC 390</td>
<td>Individual Study 2</td>
<td></td>
</tr>
<tr>
<td>SOC 396</td>
<td>Topics in Sociology 2</td>
<td></td>
</tr>
<tr>
<td>SOC 400</td>
<td>Internships 2</td>
<td></td>
</tr>
<tr>
<td>SOC 477</td>
<td>Law and Society- ACP 1</td>
<td></td>
</tr>
<tr>
<td>SOC 479</td>
<td>Law and Society</td>
<td></td>
</tr>
<tr>
<td>SOC 490</td>
<td>Advanced Independent Study 2</td>
<td></td>
</tr>
<tr>
<td>SOC 496</td>
<td>Advanced Topics in Sociology 2</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 18

1 If not taken as part of the core. Credit is not given for SOC 477 and SOC 479.

2 Advisor approval required – course topic must be focused in criminology and/or law.
**Programs in Community Health and Kinesiology**

**Undergraduate Programs:**
- **major:** Community Health, BS (p. 102)
  - **concentration:** Community Health: Health Education & Promotion, BS (p. 103)
  - **concentration:** Community Health: Health Planning & Administration, BS (p. 107)
  - **concentration:** Community Health: Rehabilitation Studies, BS (p. 113)
- **major:** Kinesiology, BS (p. 239)
  - **concentration:** Kinesiology: Teacher Certification, BS (p. 240)
- **minor:** Kinesiology (p. 487)
- **minor:** Disability Studies (p. 469)
- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 444)

**Graduate Programs:**
- **degree:** Kinesiology, MS (http://catalog.illinois.edu/graduate/ms_kines/)
- **degree:** Kinesiology, PhD (http://catalog.illinois.edu/graduate/graduate-majors/kinesiology/#doctoratestext)
- **degree:** Community Health, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-comm-health/)
- **degree:** Community Health, PhD (p. 658)
- **degree:** Rehabilitation, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-rehab/)
- **degree:** Public Health, MPH (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/)
- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 444)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 103), Health Planning & Administration (p. 107), and Rehabilitation Studies (p. 113). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

A 5 year BS/MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext).
The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Undergraduate Minor in Disability Studies

The undergraduate Minor in Disability Studies focuses on the physical, behavioral, biological, and social aspects of disability and chronic health conditions. The minor can include coursework from a broad array of departments, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. The curriculum blends cultural and clinical perspectives of disability in society to allow for multiple approaches to understanding disability and to enable individual tailoring to meet students’ varied career interests.

Please refer to https://provost.illinois.edu/education/advising-resources/pursuing-undergraduate-minor/ for additional information regarding policies related to undergraduate minors.

Minimum required course work: Students must take at least six hours of advanced (300-level or 400-level courses) and six hours of coursework must be distinct from credit earned for the student’s major or another minor.

Minimum hours required for completion: 19 hours.

Economics Minor

for the Minor in Economics

department website: https://economics.illinois.edu/
department faculty: Economics Faculty (https://economics.illinois.edudirectory/faculty/)
advising: Economics Advising (https://economics.illinois.edu/academics/undergraduate-program/academic-advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: econug@illinois.edu

The minor in economics, administered by the Department of Economics, is designed to provide students who are not majoring in economics with a basic foundation in economic analysis. The minor offers training in economic theory through the intermediate level, instruction in quantitative methods of econometrics, and opportunity for advanced work in a student’s particular area of interest following the microeconomic, macroeconomic, or econometric track. Students completing the minor in economics will enhance their major field of study and prepare them for a career in their chosen field and/or for graduate studies in a variety of fields. The minor consists of 18-21 hours within economics. Students must complete the prerequisite mathematics and economics courses with the required grade/GPA in order to apply. Interested students should work with the Economics Undergraduate Studies Office. Students must choose from the Microeconomics, Macroeconomics, or Econometrics Track.

Prerequisite to applying for the Economics Minor:

Microeconomics and Macroeconomics tracks:

- MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher. MATH 234 can substitute for MATH 220 or MATH 221, with a grade of C or higher. Discuss your intended plan with the Department of Economics Advising Office to ensure MATH 234 will prepare you for advanced Economics coursework.
- ECON 102 and ECON 202 with a 2.33 or higher Illinois Economics GPA. At least one ECON course must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

Econometrics track:

- MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher.
- MATH 225 with a grade of C or higher. (Recommended prior to application, but not required)
- ECON 102, ECON 202 and ECON 203 with a 2.33 or higher Illinois Economics GPA. At least one ECON course must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

Electrical & Computer Engineering Minor

for the Minor in Electrical & Computer Engineering

College: The Grainger College of Engineering (https://grainger.illinois.edu/)

Electrical and Computer Engineering (ECE) transforms our day-to-day lives through a multitude of innovative technologies and products. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

<td>4</td>
</tr>
</tbody>
</table>

Elective ECE Courses to achieve a minimum of 18 hours of ECE course work.

1. If the student will be taking ECE 220 following ECE 120, this requirement will be waived.
2. Completion of the minor requires a minimum of 18 hours ECE course work. No additional hours are needed in this category if all courses taken to satisfy the previous requirements are ECE courses. Otherwise choose from any 300 and 400 level classes except ECE 316, ECE 317, ECE 396, ECE 397, ECE 496, ECE 499.

English as a Second Language Minor

department website: https://linguistics.illinois.edu/
department faculty: Linguistics Faculty (https://linguistics.illinois.edu/directory/faculty/)
advising: Linguistics advising (https://linguistics.illinois.edu/academics/undergraduate-program/undergraduate-advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
The English as a Second Language minor, sponsored by the Department of Linguistics, prepares a student to teach English overseas and in contexts other than U.S. public schools. Completion of the minor fulfills the course work requirement for a Certificate in Teaching English as a Second Language (TESL). To receive a Certificate in TESL and a letter of completion from the department, the student must apply for the Certificate after completing all certificate requirements. Students must
declare their minor at the start of their study. The Certificate in TESL does not lead to ISBE State certification for K-12 Schools.

**Environmental Economics & Law Minor**

_for the Minor in Environmental Economics and Law_

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply those tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

A minimum of 18 hours must be completed for this minor. Courses in the minor cannot be completed Credit/No Credit.

Enrollment in the Environmental Economics and Law minor is not available to students enrolled in the Environmental Economics and Policy concentration of the Department of ACE. Enrollment is also not available to those enrolled in the Human Dimensions of the Environment concentration of the major in Natural Resources and Environmental Sciences if enrolled in that concentration was prior to January, 2013.

**Food & Agribusiness Management Minor**

_for the Minor in Food and Agribusiness Management_

The Food and Agribusiness Management minor is designed for students to deepen their knowledge of the economics and management of agribusinesses as a complement to studies and practices in their major field. Courses will address food, biofuels, biotechnology, agriculture, the environment, and management within the global agribusiness system.

Information listed in this catalog is current as of 02/2021
A minimum of 18 hours must be completed for this minor. Courses in the minor cannot be completed Credit/No Credit.

Enrollment in the Food and Agribusiness Minor is not available to students enrolled in the Agribusiness Markets and Management concentration of the Department of ACE, but students in other concentrations in ACE may be admitted to the minor. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

**Food & Environmental Systems Minor**

*for the Minor in Food and Environmental Systems*

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student’s major and interests.

Enrollment in ACES 102, FSHN 101, and NRES 100, four hours from selected 100- and 200-level courses, and six hours of 300- and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit. This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

1 Theses courses may only be used to satisfy the requirements of the major in Ag Communications or the Food and Environmental Systems minor, but not both.

**Food Science Minor**

*for the Minor in Food Science*

The minor in Food Science is designed to broaden the student’s knowledge of science and in particular food chemistry, food microbiology, and food engineering. The Food Science minor is also suitable for students who intend to pursue careers in engineering, microbiology, chemistry, scientific journalism, hospitality management, or science secondary education.

A minor in GWS provides complementary tools for many majors in the humanities, arts and sciences. The minor advocates actively reading, questioning, challenging, and understanding racialized, sexualized, and gendered bodies. The Department of Gender and Women’s Studies must approve a student’s minor course plan. Students must register their minor with the Gender and Women’s Studies advisor.

At least 6 hours of advanced coursework must be distinct from credit earned for the student’s major or another minor.

### Geography & Geographic Information Science Minor

**for the Minor in Geography & GIS**

The minor in Geography and GIS will expose students to a comprehensive selection of courses covering our three broad areas of study: human geography, physical/environmental geography, and geographic information science. Students select 6 hours at the 100 level, then 3 hours each from the human, physical/environmental, and geospatial sub-disciplines (as listed below), and then 3 additional hours from any of the three sub-disciplines for a total of 18 credits. At least 6 hours total must be at the 300 or 400 level.

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: globalstudies@illinois.edu

The LAS Global Markets and Society Minor enables students at the University of Illinois to gain interdisciplinary knowledge of global market-society relations through historical and global perspectives that emphasize the social, political, and economic forces that shape market institutions and practices. The minor requires 18-21 hours of coursework completed through six courses, with a minimum of six hours at the advanced level (300- or 400-level). A professional development capstone experience course is optional and can be met by completing an internship or participating in a research experience and/or written project. The LAS Global Markets and Society Minor is open to undergraduate students in any major at the University of Illinois at Urbana-Champaign campus.

Applications Requirements and Procedures

Completion of 30 hours of undergraduate coursework by the end of the Spring semester of application.

Students are admitted by application into the LAS Global Markets and Society Minor. Interested students will be asked to demonstrate a commitment to the program through (a) completing an application to the program, including a written statement of goals for participation in the program and/or evidence of or commitment to participation in activities designed to enhance leadership, and (b) developing a program plan with the program coordinator and/or their academic advisor prior to admission.

Only students officially admitted into the LAS Global Markets and Society Minor may earn the minor.

Information listed in this catalog is current as of 02/2021
Global Markets and Governance. The economy is intricately connected to institutions at the local, national, and international levels that affect market practices and outcomes. This track focuses on the institutions and social relations that govern global market practices.

Science, Technology, and Markets. Technological innovations in transportation and communications are driving business location decision-making and operations at the global scale. This track is aimed at science and technology majors with entrepreneurial ambitions as well as students in the social sciences and humanities investigating the interface between science, technology, and society.

Global Encounters. Participation in the global economy requires firms to be geographically dispersed and capable of partnering with a global audience of stakeholders. This track is focused on the historical and cross-cultural understanding necessary to engage in global markets.

Markets, Development, and the Environment. Global markets can create positive environmental outcomes in the locations where they operate. This track focuses on the challenges in designing, building, and evaluating sustainable environmental and development outcomes, including ecological modernization, market environmentalism, and political ecology.

The Global Workforce. Global production systems depend on the effective organization and participation of workers in the global workforce. This track focuses on human resources, organizational structures, and group communication in the contexts of working class history and global labor markets.

Analytical Approaches & Languages. Investigating global market-society relations requires a basic level of competence in communication skills, research methods, and analytical techniques. This track offers students a range of market language, methods, and skills oriented courses that build such competency.

OPTIONAL Professional Development Capstone Experience (3 hours)

Choose one option in consultation with the Global Markets and Society minor advisor:

- Internship or Field Experience in a market-focused organization
- Research Experience with a Faculty Member
- Analytical/Research Paper with Faculty Guidance

Credit is awarded for each of these three options on the basis of an analytical/research paper written by the student under the supervision of a faculty adviser

Total Minimum Hours 18

Informatics Minor

for the Minor in Informatics

- **Contact**: Karin Readel, Senior Education Coordinator, (217)-244-1220
- **Informatics Minor website**: [https://www.informatics.illinois.edu/minor-program/](https://www.informatics.illinois.edu/minor-program/)
- **Email**: info-(inf-minor@illinois.edu)minor@illinois.edu

The Minor in Informatics will teach you to become a better creator and user of computing technology in your major area and to think critically about new technology's role in society. No other field has, and will have, a greater influence on humanity in our generation.

Informatics studies the design, application, use and impact of information technology. The ability to handle vast amounts of information cheaply has changed the way we live. Advances in computer power, the World Wide Web, search engines, social networking, mobile technology, GIS, and large-scale collaborative initiatives, to name a few, have revolutionized the way knowledge is created and shared. Information has become a ubiquitous, indispensable component of our everyday lives, as we strive to manage information, create knowledge, and make decisions.

The Informatics Minor signals that you have concrete expertise in computing and Information Technology (IT) and understand their human implications.

Students from any major interested in applying technology or studying its effect on humanity are encouraged to apply, preferably by the end of sophomore year. Although there are no prerequisites, basic familiarity
with computers is expected. To receive the Informatics Minor students must complete three core courses plus three upper-level classes with sufficient informatics or computational content from an approved list of courses offered from a wide range of disciplines. The core courses are INFO 102, CS 105, and INFO 202. INFO 102 is a broad introduction to computer science and provides an understanding of the nature, capabilities, and limitations of IT. CS 105 is an introduction to computer programming for non-science and non-engineering majors. INFO 202 explores the ways in which IT has and is transforming society and how these technologies affect a range of social, political, and economic issues from the individual to societal levels. Some substitutions can be made. The list of upper-level courses that count toward the minor is here: https://www.informatics.illinois.edu/courses-for-the-minor/. This list is dynamic as new classes are added each year.

Integrative Biology Minor

for the Minor in Integrative Biology

department website: http://sib.illinois.edu/
department faculty: School of Integrative Biology Faculty (http://sib.illinois.edu/people/faculty/)
advising: SIB advising (http://sib.illinois.edu/undergraduate/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: advising@sib.illinois.edu

The minor, administered by the School of Integrative Biology, is designed for students intending to have a career in a field other than biology, but for whom a background in biology is nevertheless complementary, e.g., law, technology, bioinformatics, business, scientific writing, and engineering. A minor in integrative biology provides an understanding of fundamental principles for one major subdiscipline of biology, whether this be organismal and evolutionary biology; behavior, ecology and the environment; or integrative anatomy, physiology, and molecular biology.

Two additional courses at the 300 or 400 level (3-4 hours, some 5 hours) selected from the IB Area Courses. The prerequisite course(s) must be taken if specified by an advanced course. (http://sib.illinois.edu/courses/area/) 6-8

Total Hours 16-20

Other possible combinations of courses are possible for the Integrative Biology minor, if an SIB advisor approves the combination.

Interdisciplinary Minor in African Studies

for the Interdisciplinary Minor in African Studies

center website: http://www.afrst.illinois.edu/
center faculty: African Studies Faculty (http://www.afrst.illinois.edu/people/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: african@illinois.edu

The Center for African Studies offers an interdisciplinary minor as a complement to any major. The 20 hours selected by students for the African studies minor should form a coherent program of study. This program must be approved by the Center for African Studies. The Dean of the College of Liberal Arts and Sciences will verify that the student has completed the program on the recommendation of the Director of the Center for African Studies and on completion of the requirements below.
Interdisciplinary Minor in Aging

Requirements

Study of an indigenous African Language. Acceptable languages include but are not limited to Arabic, Bamana, Lingala, Swahili, Wolof, and Zulu.

African Studies core courses. These courses contain a minimum of 50 percent African content and are defined according to a list maintained and regularly updated by the Center for African Studies. Courses completed to satisfy the core must come from at least 3 separate departments and must include the following three components:

- Course-work surveying the continent. Choose one of the following:
  - AFST 210 Introduction to Modern African Literature
  - AFST 222 Introduction to Modern Africa
  - AFST 254 Economic Systems in Africa
  - HIST 111 History of Africa to 1800
  - HIST 112 History of Africa from 1800
  - SOC 122 Africa in World Perspective

- 300- or 400-level core courses. Language courses cannot be used to meet this requirement.

- Additional core courses at any level. African language courses may be used to satisfy this requirement if they are at the advanced level (fifth semester or higher). Only 3 hours of AFST 199 may be used to satisfy the requirements of the minor.

Total Hours 20

Interdisciplinary Minor in Jewish Culture & Society

for the Interdisciplinary Minor in Jewish Culture and Society

program website: https://jewishculture.illinois.edu/
program faculty: Jewish Culture & Society Faculty (https://jewishculture.illinois.edu/directory/affiliate-faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: jewishculture@illinois.edu

The Program in Jewish Culture and Society offers an interdisciplinary minor and a concentration in Jewish Studies (through the LAS Interdisciplinary Studies Major (http://catalog.illinois.edu/undergraduate/las/academic-units/interdisc-studies/jewish-studies-concentration/)).

<table>

1 Students may also earn elective credit by participating in an aging-related internship or independent study that is also pre-approved by the advisor for the minor. Minor modification forms should be filled out if you are requesting to use an independent study or internship. Forms can be found at http://provost.illinois.edu/files/2017/01/Minor-Modification-Form.pdf.

2 Special Topics courses must include aging-related content and be approved by the Aging minor advisor.
HEBR 405  Advanced Modern Hebrew I
HEBR 406  Advanced Modern Hebrew II
HEBR 407  Topics Hebrew Lang & Lit
YDSH 103  Intermediate Yiddish I
YDSH 104  Intermediate Yiddish II

Total Hours 18

Of the 18 required hours, two courses (6 hours) must be 300- or 400-level courses. HEBR 403 and HEBR 404 cannot be used to satisfy this requirement.

1 HEBR 403 and HEBR 404 cannot be used to satisfy LAS Advanced Hours requirement (http://www.las.illinois.edu/students/requirements/minimum/) or the 6 hours of 300- or 400-level courses for the Jewish Culture and Society Interdisciplinary Minor.

No more than 6 hours (two courses) may be at the 100 level.

The 18 hours selected by students for a minor in Jewish Culture and Society should form a coherent program and must be approved by the undergraduate advisor for the Program in Jewish Culture and Society.

A list of courses, regularly updated by the Program in Jewish Culture and Society, is available from the Program Office (http://www.jewishculture.illinois.edu/), 109 English Bldg., 608 South Wright Street, Urbana, Illinois, 61801.

Interdisciplinary Minor in Medieval Studies

for the Interdisciplinary Minor in Medieval Studies

department website: http://www.medieval.illinois.edu/education/undergrad/
department faculty: Medieval Studies Faculty (http://www.medieval.illinois.edu/people/faculty/)overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/email: medievalstudies@illinois.edu

This minor introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographical regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Additional Medieval Studies Coursework 9

Information listed in this catalog is current as of 02/2021
Medieval-related coursework from participating departments selected in consultation with the minor advisor. At least 6 hours must be at the 300- or 400-level. A list of courses is maintained on the Medieval Studies Program website. 3 hours of appropriate language study can be applied to meet this requirement with approval of the Director of the Program in Medieval Studies.

International Business Minor

for the Minor in International Business

Please refer to the International Business Minor website for important changes to the application process and requirements.

The International Business Minor is for students earning Undergraduate degrees in the Gies College of Business and is not open to students earning Undergraduate degrees in colleges other than the Gies College. The International Business Minor provides a program of study that exposes students to global business in a manner that complements their existing studies in Accountancy, Finance, Information Systems, Management, Marketing, Operations Management, Supply Chain Management, and Strategic Business Development & Entrepreneurship.

Specifically, the Minor provides students with a clear understanding of the opportunities and challenges involved with international business transactions, as global managers face a diverse set of circumstances when engaging in cross-border business: e.g., enhanced globalization (& de-globalization) forces, cross-national variation in institutions and cultures, increased competition from emerging economies, and altered economic incentives. Thus, the International Business Minor is designed to educate and train future business leaders, decision-makers and strategic thinkers to skillfully manage in the evolving global business environment.

To declare their Minors, Business students must submit their Statement of Intent to Pursue a Campus-Approved Minor (Statements) to 1055 Business Instructional Facility (BIF) at any time.

Some of these courses have additional non-ACE prerequisites. A semester-long study abroad experience in an emerging market or development economy (i.e. countries not part of the OECD) will be accepted in lieu of one of these courses.
The minor should consist of at least 18 hours of course work. At least 6 hours of the minor must be advanced (300 or 400) level courses.

Courses in the minor cannot be completed Credit/No-Credit.

**International Minor in Agricultural, Consumer, & Environmental Sciences**

_for the International Minor in Agricultural, Consumer, and Environmental Sciences_

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours (ACES or non-ACES) must come from 400-level courses. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

**college website:** https://grainger.illinois.edu/

Many Grainger Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation. The requirements are:

- Completion of all degree requirements in the student’s selected engineering discipline. Courses for the International Minor can be combined with degree requirements.

Information listed in this catalog is current as of 02/2021
Italian Minor

for the Minor in Italian

**department website:** http://www.frit.illinois.edu/ (https://frit.illinois.edu/)
**department faculty:** French & Italian Faculty (https://frit.illinois.edu/directory/faculty/)
**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
**college website:** https://las.illinois.edu/
**email:** french-italian@illinois.edu

- Completion of foreign language studies in a language of the student’s choice of geographical area (proficiency level will vary with the geographical area selected) if applicable. Students completing a minor in Great Britain or Australian studies will NOT have to have completed a foreign language.

- Completion of a minimum of 21 hours of cultural and language studies related to the geographical area of concentration; 9 hours must be other than language credit and include at least one 300- or 400-level course. These courses can be used as campus and college general education requirements. Courses taken on campus for the minor must be taken for grade. Students completing the Great Britain or Australian minor will complete their 21 hours of related coursework in the “other” non-language area.

- Completion of a minimum four-week approved residence in the chosen country or geographic area, whether it be for work or study. The student will be expected to select a specific geographical area for concentration, which will be identified in the designation of the minor; for example International Minor-Latin American studies. Course work selected for the minor must be approved by the International Programs in Engineering Office; a list of suggested courses is available.

International Programs in Engineering sponsors academic year, semester, and summer programs that include language and cultural courses and satisfy the residency requirement. With sufficient foreign language background before entering engineering, a student will normally be able to complete the degree and minor in four years. Those not having this background, or taking a year of study at a foreign institution, may take four and one-half to five years to complete their degrees.

For more information regarding the International Minor (IM), contact the Engineering Study Abroad Office (210 Engineering Hall, (217)244-0054, ipeng@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

**Journalism Minor**

for the Minor in Journalism

**department website:** https://media.illinois.edu/journalism (https://media.illinois.edu/journalism/)
**department faculty:** https://media.illinois.edu/journalism/faculty (https://media.illinois.edu/journalism/faculty/)
**overview of college admissions & requirements:** College of Media (p. 1159)
**college website:** https://media.illinois.edu/

The Minor in Journalism allows a student to explore the role of journalism in a democracy and to assess how journalism is meeting its social responsibility to engage, enlighten and empower citizens. The minor equips students to participate in the ever-changing world of media delivery and consumption.

**Programs in Journalism**

**Undergraduate Programs:**
- **major:** Journalism, BS (p. 238)
- **major:** Journalism, BS-MJ (p. 442)
- **minors:** Journalism (p. 486) | Media (p. 493)

**Graduate Programs:**
- **degree:** Journalism, BS-MJ (p. 442)
- **degree:** Journalism, MS (p. 810)
- **joint degree:** Journalism, MS and Law, JD (p. 1131)

The department does not offer a Ph.D. degree. For the program leading to the Doctor of Philosophy in Communications, see Communications and Media, PhD (p. 655).

college catalog page: Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
college website: http://www.ahs.illinois.edu/

To declare the minor or ask questions about the requirements, please contact:
Alicia Richards, M.S.; alrich17@illinois.edu; 217-300-1058

The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching-related occupations, corporate fitness, coaching, and athletic training. Many students continue their education and become certified K-12 physical education teachers, physical therapists, physicians, exercise physiologists, and sports psychologists.

- KIN 362 Curriculum in Grades 7-12

Electives (choose at least 1): 3
- KIN 360 Adapted Physical Education
- KIN 363 Instructional Strategies in PE
- KIN 369 Coaching Strategies
- KIN 460 Technology & Pedagogical KINES

Biomechanics

Required advanced level courses: 6
- KIN 355 Biomechanics of Human Movement
- KIN 457 Motor Learning & Control

Electives (choose at least 1): 3
- KIN 259 Motor Development and Control

Information listed in this catalog is current as of 02/2021
Students are permitted to substitute one Landscape Architecture course from the 'Study of Historical and Cultural Landscapes' category for one of the courses in 'Study of the Professions Engaged in Landscape Inquiry' category upon the approval of the Academic Affairs Coordinator in the Department of Landscape Architecture.

**Admission to the minor**

University of Illinois students with a minimum GPA of 2.0 and completion of the campus Composition I and Quantitative Reasoning I requirements are eligible for admission. Applicants from other institutions must have a minimum GPA of 2.5. Students must declare their intentions and be admitted to the program by the Academic Affairs Coordinator in the Department of Landscape Architecture (ladept@illinois.edu).

**Prerequisites**

Students must comply with any prerequisite requirements of courses to be taken under this program.

**Advising**

Advising of students in the minor will be conducted by the Academic Affairs Coordinator in the Department of Landscape Architecture.

**Certification of Successful Completion**

Completion of the Minor in Landscape Studies will be certified by the student’s home college office.

**Information listed in this catalog is current as of 02/2021**
The minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundation courses, five to six hours of elective context courses, and three hours in a capstone course.

Students should bring the Statement of Intent to Pursue a Campus-Approved Minor form (http://provost.illinois.edu/educational-innovation/advising-resources/pursuing-undergraduate-minor/) to ACES Academic Programs, 128 Mumford Hall.

LGBT/Queer Studies Minor
for the Minor in LGBT/Queer Studies

department website: https://www.gws.illinois.edu/
department faculty: Gender & Women's Studies Faculty (https://gws.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu
email: gws@illinois.edu

The LGBT/Queer Studies minor provides students the opportunity to explore how various political, social, and cultural definitions of sexual identities and their expression have been constructed and challenged in different places and points in time. Attention is given to queer politics, and interactions with nation, race, ethnicity, and gender. A minor in LGBT/Queer Studies provides complementary tools for many majors in the humanities, arts and sciences.

The Department of Gender and Women's Studies must approve a student's minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

The LGBT/Queer Studies minor consists of a 9-hour Core plus 9 hours of Area Electives and 18 hours of Advanced Electives. Students must consult with the LGBT/Queer Studies advisor for approval of courses.

The 9-hour Core consists of the following:

- GWS 202 Sexualities
- or GWS 255 Queer Lives, Queer Politics
- GWS 370 Queer Theory

Additional Coursework: Select three of the following:

- GWS 325 Lesbian/Queer Media Cultures
- GWS 385 Transnational Sexualities
- GWS 387 History of Sexuality in U.S.
- GWS 459 Gender, Sex, & Postcoloniality
- GWS 467 Locating Queer Culture
- GWS 470 Transgender Studies
- GWS 478 Sex, Power and Politics

Area Electives at any level. For a list of approved courses contact the GWS Department office or the GWS advisor.

Total Hours: 18

At least 6 hours of advanced coursework must be distinct from credit earned for the student's major or another minor.

Students may choose to major in Gender & Women's Studies and Minor in LGBT/Queer Studies, but classes may not count towards both.

Linguistics Minor
for the Minor in Linguistics

department website: https://linguistics.illinois.edu/
department faculty: Linguistics Faculty (https://linguistics.illinois.edu/directory/faculty/) 
advising: Linguistics advising (https://linguistics.illinois.edu/academics/undergraduate-program/undergraduate-advising/)

Students must complete MATH 241, and at least one 400-level MATH course for admission into the minor. The Mathematics minor is designed to prepare students majoring in some other discipline with a background in mathematics that is both broad and deep. Students interested in pursuing the minor should have completed the calculus sequence through MATH 241, and one additional Math course at the 400-level demonstrating a strong record of success in college-level mathematics courses. Given the cumulative character of mathematics preparation, students earning grades of C or below in previous mathematics courses are advised not to pursue the minor.
Students pursuing a major in the College of Media are not eligible for a minor in Media.

Programs in the College of Media

Undergraduate Programs:
- major: Advertising, BS (p. 12)
- major: Computer Science & Advertising, BS (p. 133)
- major: Journalism, BS (p. 238)
- major: Media & Cinema Studies, BS (p. 289)
- minors: Cinema Studies (p. 462) | Critical Film Production (p. 468) | Journalism (p. 486) | Media (p. 493) | Public Relations (p. 499)

Graduate Programs:
- degree: Advertising, MS (p. 528)
- degree: Journalism, BS-MJ (p. 442)
- degree: Journalism, MS (p. 810)
- degree: Strategic Brand Communication, MS (p. 1014)
- degree: Communications & Media, PhD (p. 655)
- minor: Cinema Studies (p. 1102)

For the Minor in Media

To complete the Media Minor students will take one introductory course in each of three disciplines in the College of Media (Advertising, Journalism, and Media & Cinema Studies), for a total of 9 hours. Completion of the minor requires an additional 9 hours of advanced (300- and 400-level) courses. The advanced courses must be from at least two departments within the College of Media. Prerequisite courses will be enforced for advanced-level courses. Students may choose to follow a thematic area, but are not required to do so. Please see the College of Media website for thematic areas and related courses.

Students pursuing a major in the College of Media are not eligible to pursue a minor in Media.
Molecular and Cellular Biology Minor

for the Minor in Molecular & Cellular Biology

school website: https://mcb.illinois.edu/undergrad/
school faculty: School Faculty (https://mcb.illinois.edu/people/)
advising: MCB advising (https://mcb.illinois.edu/undergrad/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad@mcb.illinois.edu

The minor, administered by the School of Molecular and Cellular Biology, is designed to provide students with an understanding of foundational principles of physiology, cellular and developmental biology, microbiology, molecular genetics and biochemistry. A minor in Molecular and Cellular Biology will prepare students for training in medicine and other health sciences, graduate studies in related disciplines, as well as for employment opportunities in pharmaceutical and biotechnology industries.

Students must contact an MCB advisor (https://mcb.illinois.edu/undergrad/advising/) for acceptance into the minor. MCB 150 (http://catalog.illinois.edu/search/?P=MCB%20150) must be completed or in progress before acceptance into the minor.

Music Minor

for the Minor in Music

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

The School of Music offers non-music majors an exposure to music through courses in musicology and ethnomusicology, music theory, music composition, music technology, jazz history and studies, and performance studies (through applied lessons and ensemble). The Music Minor is intended for student musicians with previously established, fundamental musical experiences - individuals who wish to expand upon already obtained musical skills and related study - and is not intended to be an introduction to music.

Admission to the Music Minor

Prospective Music Minors must apply for acceptance into the program. For more information, please see https://my.faa.illinois.edu/gradstat/login.asp, or contact the Music Admissions Office (musicadmissions@illinois.edu) in Music Building Room 2018 for general instructions on how to apply for the minor.

Course Requirements

The Music Minor requires the successful completion of 21 semester hours of courses in music according to the following distribution:

1. Six to eight (6-8) credit hours in music core coursework, including either four (4) credits in Music Theory and Practice I and II (MUS 101 and MUS 102) or six (6) credits in Rudiments of Music Theory I and II (MUS 103 and MUS 104), plus two (2) credits in Introduction to Art Music (MUS 110);
2. At least six credit hours must derive from upper division or advanced music courses. This includes MUS 313 and MUS 314 (which also serve as General Education courses), or any other MUS 300- or 400-level music course with instructor approval;
3. Additional music elective credit hours may include private lessons (applied lessons) pending successful completion of an audition with the appropriate music professor and availability of teaching staff;
4. Up to three (3) credit hours of ensembles may be used for electives and can be selected from MUS 250, MUS 252-MUS 257, MUS 260-MUS 272;
5. Topics offered under MUS 199 or MUS 499 must be approved for credit toward by the music minor advisor.

Music Electives

MUS courses at the 300-400 level.  

Information listed in this catalog is current as of 02/2021
Music electives to be taken from theory, aural skills, musicology, jazz history, applied lessons, music technology, conducting, composition, ensembles, etc. 5, 6, 7

Note: Up to three (3) ensemble credits will apply toward the Music Minor. Approved ensembles include MUS 250, MUS 252-MUS 257, and MUS 260-MUS 272.

Total Hours 21

1. MUS 101 and MUS 102 are two (2) credits each. MUS 103 and MUS 104 are three (3) credits each. You cannot mix and match courses: MUS 101 and 102 are paired together; MUS 103 and 104 are paired together.
2. 300-level courses open to Music Minors include MUS 313-314, MUS 317, MUS 339, and MUS 360-369.
3. MUS 400 and MUS 408 will be open only to Music Minors who have taken and passed MUS 201 and MUS 202.
4. Courses in the MUS 410-421 series will be open only to Music Minors who have taken and passed either MUS 313 or MUS 314; courses will be selected in consultation with the Music Minor advisor in accordance with their interests. Music Minors must obtain instructor permission to register for any course in the 410-421 series.
5. This includes both MUS 462-463 (Jazz Listening Seminar I and II) and MUS 464-465 (Jazz History I and II).
6. Students must audition, be accepted into a studio, and pay a nominal fee for applied lessons.
7. Topics offered under MUS 199 or MUS 499 must be approved for credit toward by the music minor advisor.

Admission Requirements

1. Applicants must be dance or acting majors who have completed at least 30 credit hours prior to the January application period to become eligible for admission review.
2. Applicants must complete all prerequisite courses prior to the January application period to become eligible for admission review and must have Academic Good Standing status (2.0 cumulative GPA or higher), plus have a cumulative 2.5 GPA or higher in prerequisite courses.
3. Formal application is made through the School of Music Admissions Office in the Music Building. Email: musicadmissions@illinois.edu.
4. Applications are reviewed in February, and successful applicants are invited to audition for the Lyric Theatre faculty. Final decision of all applicants is made by the end of March.
5. Only those students officially admitted into the Musical Theatre Minor Program by the School of Music may earn the Musical Theatre Minor.

Course Requirements

The Musical Theatre Minor requires the successful completion of 21 semester hours for Dance majors and 22 semester hours for Acting concentration in Theatre majors according to the following distribution.

2. MUS 222, Singing in Musical Theatre
3. THEA 170, Fundamentals of Acting (dance majors only)
4. DANC 101, Modern Dance I (acting majors only)
5. DANC 107, Ballet I (acting majors only)
**Natural Resource Conservation Minor**

*for the Minor in Natural Resource Conservation*

The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources. A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

**Nutrition Minor**

*for the Minor in Nutrition*

The minor in Nutrition is designed to broaden the student’s knowledge of the biological sciences, with a particular emphasis on the interdisciplinary nature of nutrition. A minor in nutrition would benefit those who intend to pursue careers in the food, health, and fitness industries, or those planning to enter medicine, dentistry, nursing, and other health professions such as physician’s assistant, physical or occupational therapy, nutrition research, and nutrition communication.

Physics Minor
for the Minor in Physics

College: https://grainger.illinois.edu/

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

Political Science Minor
for the Minor in Political Science

A minor in political science is designed for students who want to improve their ability to deal intelligently and critically with issues and ideas about government and politics. The minor introduces students to courses involving important theoretical and applied questions about the role of citizens, associations, and states in the application of political power. Students will be exposed to advanced courses that build on relevant introductory courses.

</table>
Polymer science and engineering is a broad, interdisciplinary field that brings together various aspects of chemistry, physics, and engineering for the understanding, development, and application of the materials science of polymers. Many of the existing engineering programs provide a good foundation for work in polymer science and engineering. However, the undergraduate student needs additional courses specifically dealing with the science and engineering of large molecules. With such a background, the student should be able to progress rapidly in industry or at the graduate level. In addition to those students specifically desiring a career in polymers, this minor also can be valuable to students interested in the development, design, and application of materials in general.

The courses listed below have been selected specifically to give an undergraduate student a strong background in polymer science and engineering. A minimum of eight courses is required, including 3 Core courses, one course each in thermodynamics, mechanical properties, and chemistry and two additional polymer-related courses, as listed below. Several of these the student would normally take to satisfy the requirements of the basic degree. The student should consult the Department of Materials Science and Engineering when formulating a plan of course work. The following courses are required. Credit hours will exceed 25 if a Thermodynamics course-pair option is chosen.

that the PR minor serves as a valuable complement to the courses in their major. Students from other majors who wish to have a better understanding of the role public relations plays in organizations and who wish to sharpen skills in writing, persuasion, strategic planning, and public communication will also benefit from the minor. The minor requires a minimum of 18 credit hours. Students majoring in Advertising or Journalism must complete at least six hours of advanced course work for the minor distinct from credits earned for their major.

1. Will be announced in course description as "Eligible for PR minor."

### Recreation, Sport & Tourism Minor

**for the Minor in Recreation, Sport & Tourism**
This minor is directed towards students who have an interest in working in the sports, recreation and/or tourism industries, or students who feel knowledge in these areas will help them succeed in their careers.

The course requirements for the minor are 19-21 hours. This includes three foundational courses (9 hours) that all students are required to take followed by 10-12 courses from a list of approved electives. The foundational courses will enable students to acquire knowledge about the broad range of the field and introduce them to the different areas of the industry. At least 6 hours will be advanced (300 or 400 level course), meeting the requirement for all minors. The elective courses will allow students to gain expertise in a particular area of the field, or develop a deeper knowledge base of the field and industry.

for the Minor in Recreation, Sport & Tourism

Minimum required course work: Students must complete 9 hours of foundational courses and 10-12 hours from approved electives, including at least six hours of advanced (300-level or 400-level courses) and six hours of coursework must be distinct from credit earned for the student’s major or another minor. Minimum hours required for completion: 19 hours.

Russian Language & Literature Minor

for the Minor in Russian Language & Literature

A minor in Russian language and literature may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure. Additional information may be obtained from the undergraduate adviser in the Department of Slavic Languages and Literatures.

6 hours must be advanced (300- or 400-) level courses.

The Interdisciplinary Minor in Science and Technology in Society requires students to integrate and synthesize a wide variety of materials. Students will enrich their experiences in diverse disciplines with a substantive engagement with science studies. Required courses in the minor emphasize critical and creative thinking and many courses require substantial writing and research. This minor is administered by the LAS Student Academic Affairs Office.

All courses must be selected in consultation with the adviser from the list of courses approved for the minor. No more than 3 hours of course work
Slavic Language, Literature, & Culture Minor

may be 100-level. Students must maintain a 3.0 GPA in course work in the minor.

Social Work Minor

for the Minor in Social Work

department website: http://www.slavic.illinois.edu
department faculty: Slavic Faculty (http://www.slavic.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/email: slavic@illinois.edu

A minor in Slavic language, literature, and culture may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering.
A minor in sociology requires that students learn the basic theoretical and methodological approaches in sociology. Students must also learn about the substance of sociology in some depth and are thus required to take at least two sociology courses at an advanced level and a total of at least 18 hours of sociology courses. The course work must include the requirements listed below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 100</td>
<td>Introduction to Sociology</td>

</tr>
</tbody>
</table>

The Center for South Asian and Middle Eastern Studies (http://www.csames.illinois.edu/) offers an Interdisciplinary Minor in South Asian Studies. The minor is especially suited for students interested in a program of studies with focus on South Asia, as a complement to their disciplinary study. The structure of the minor provides students a great amount of flexibility; possible areas of emphasis include language and literature, as well as history and social sciences. A minimum grade-point average of 2.75 in South Asian Studies courses is required for completion of the minor. The 18-20 hours of courses selected by students for the South Asian Studies Minor should form a coherent program of study and must meet the approval of an advisor in the Center for South Asian and Middle Eastern Studies. The program must include at least 6 hours of 300- or 400-level courses. A student’s plan of courses for the minor must be approved by the program.

1 Other area-relevant courses may be substituted as they are offered, with approval of the advisor. These include courses in languages other than Hindi and independent study courses with South Asia teaching faculty and with appropriate topics, such as the following: ANTH 390, HIST 490, LING 290, PS 490, REL 390, SOC 390. Students wanting to take such independent study courses need to get permission from the instructor; not more than two independent study courses can be taken to meet the degree requirements.

For a list of approved courses, visit CSAMES Course Archive (http://www.csames.illinois.edu/program/courses/archive/all/).

**Spanish Minor**

*for the Minor in Spanish*

- **department website**: https://spanport.illinois.edu/

**Information listed in this catalog is current as of 02/2021**

1 One 200-level SPAN course can be substituted with a language course in CATL, BASQ, PORT or LAST (Quechua), from among the following options: BASQ 401, 402; CATL 401, 402, PRT 401, 402; and LAST 445. This course does not count for advanced hours and does not substitute for SPAN 228.

**Spatial & Quantitative Methods in Natural Resources & Environmental Sciences Minor**

*for the Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences*

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills. In order to be eligible to declare this minor, a student must have successfully completed:

1. MATH 220, 221 or 234
2. ACE 261, CPSC 241, ECON 202, PSYC 235, SOC 280 or STAT 100

The minor requires the completion of an additional 18 hours of coursework selected from the following list. Students must earn credit for at least three hours in each of the three categories. At least six hours of 400-level courses must be distinct from any credit earned for the student's major, concentration, and any other minor.

Speech & Hearing Science Minor

for the Speech & Hearing Science Minor

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student's individual needs, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. For more information contact Kathi Ritten, Academic Advisor, at ritten@illinois.edu.

Minimum required major and supporting course work: Students must meet the following course requirements for a total of 17-19 hours.

Statistics Minor

for the Minor in Statistics

department website: https://stat.illinois.edu/
department faculty: Statistics Faculty (https://stat.illinois.edu/directory/)
college catalog page: http://catalog.illinois.edu/schools/las/academic-units/
college website: http://www.ahs.illinois.edu/

The minor, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students to for graduate studies in statistics or in one of many areas where data analysis plays an important role. Interested students should contact the Statistics undergraduate advisor for admission into the minor. Students should have completed the calculus sequence through MATH 241 before entering the minor. Students must choose from either the Applied or Mathematical Statistics Track.

Applied Statistics Track

*college website:* [https://las.illinois.edu/](https://las.illinois.edu/)

*email:* csames@illinois.edu

The minor in Study of the Islamic World is offered by the Center for South Asian and Middle Eastern Studies. It is designed for students interested in developing an expertise in one or more parts of the Islamic world or in Islamic culture generally, as a complement to their disciplinary major. Completion of the minor requires 19 credit hours in applicable courses with a minimum grade-point average of 2.75.

For a list of approved courses, visit CSAMES Course Archive [http://www.csames.illinois.edu/program/courses/archive/all/](http://www.csames.illinois.edu/program/courses/archive/all/).

*Information listed in this catalog is current as of 02/2021*
Why is true sustainability so hard to achieve? Behind every environmentally friendly practice is a web of consequences, trade-offs, feedbacks, and barriers — and this undergraduate minor administered by the Institute for Sustainability, Energy, and Environment (iSEE) will help you develop a systems-level perspective of the economic, environmental and social dimensions of sustainability to help you navigate them.

The Sustainability, Energy, and Environment Fellows Program (SEE FP) is a campuswide undergraduate minor that prepares students for pursuing careers in the corporate sector, nonprofit organizations, government agencies and environmental advocacy groups. To find out more about the minor and the enrollment process, email Professor Madhu Khanna, iSEE Associate Director for Education & Outreach, at see-fellows@illinois.edu.

Technology & Management Minor

for the Minor in Technology & Management

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in Gies College of Business and The Grainger College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

<table>

</tbody>
</table>

Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. The current T&M Corporate Affiliates include Abbott, Anheuser-Busch, Boeing, BP, Caterpillar, John Deere, Motorola Solutions, and Synchrony.

In addition to formal courses, the T&M Program offers a comprehensive set of co-curricular activities to develop skills and provide valuable experiences to students. These include leadership development, career development, and professional development workshops (for example, professional branding and etiquette, improvisation training, and negotiation training), an international immersion trip, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and roles. T&M students have pursued careers in a wide range of industries and fields.
Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and academic directors. Offers of admission are based on the student’s academic record, extracurricular involvement, leadership potential, and personal/professional goals.

Theatre Minor

for the Minor in Theatre

department website: https://theatre.illinois.edu

department faculty: https://theatre.illinois.edu/people/meet-our-faculty/

college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)

college website: https://faa.illinois.edu/

The Minor in Theatre offers students a comprehensive overview of the study of theatre. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses totaling ten hours and a minimum of six hours of electives in two general areas: History/Criticism and Production/Performance with at least one course from each area.

Contact the Department of Theatre for admission information.

Preprofessional Programs

Dentistry (p. 512)
Law (p. 512)
Medicine (p. 512)
Nursing (p. 512)
Occupational Therapy (p. 512)
Optometry (p. 512)
Pharmacy (p. 512)
Physical Therapy (p. 512)
Physician Assistant (p. 513)
Veterinary Medicine (p. 513)

Dentistry

Students in any major can pursue a career in dentistry. For information regarding pre-dental coursework and preparation visit https://www.careercenter.illinois.edu/dentistry-preparation-and-requirements.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Law

http://prelaw.illinois.edu/

All information on Pre-Law Advising Services (PLAS) is available on their website (http://prelaw.illinois.edu/).

Medicine

Students in any major can pursue a career in medicine. For information regarding pre-medical coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/medicine.

For information regarding the Carle Illinois College of Medicine visit https://medicine.illinois.edu/.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Nursing

The University of Illinois-Chicago College of Nursing offers a Bachelor of Science in Nursing (BSN) degree on the Urbana Regional Campus. Information on this program is available at http://www.nursing.uic.edu/bachelor-science-nursing.

Students in any major can pursue a career in Nursing. For information regarding coursework and preparation visit https://www.careercenter.illinois.edu/nursing-preparation-and-requirements.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Occupational Therapy

Students in any major can pursue a career in Occupational Therapy. For information regarding pre-OT coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/occupational-therapy.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Optometry

Students in any major can pursue a career in optometry. For information regarding pre-optometry coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/optometry.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Pharmacy

Students in any major can pursue a career in pharmacy. For information regarding coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/pharmacy.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Physical Therapy

Students in any major can pursue a career in physical therapy. For information regarding pre-PT coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/physical-therapy.

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).
Physician Assistant

Students in any major can pursue a career as a physician assistant. For information regarding pre-PA coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/physician-assistant. (https://www.careercenter.illinois.edu/health-profession/physician-assistant/)

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Veterinary Medicine

Students in any major can pursue a career in veterinary medicine. For information regarding pre-vet coursework and preparation visit https://www.careercenter.illinois.edu/health-profession/veterinary-medicine. (https://www.careercenter.illinois.edu/health-profession/veterinary-medicine/)

Information regarding the University of Illinois College of Veterinary Medicine visit https://vetmed.illinois.edu/education/doctor-veterinary-medicine-degree/admissions/minimum-academic-standards-admission/. (https://vetmed.illinois.edu/education/doctor-veterinary-medicine-degree/admissions/minimum-academic-standards-admission/)

Health Professions advising is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois at Urbana-Champaign. All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).
The Council on Teacher Education formulates, modifies, implements, and monitors compliance with policies related to the education of future educators. The Council also facilitates communication and promotes collaboration among all participants involved in the preparation and continuing professional development of educators. The Council is the designated unit responsible for the coordination of teacher, school support personnel, and administrator education curricula at the Urbana campus and serves as the liaison between the campus and state educator licensure and program approval authorities.

Six colleges and two schools of the University of Illinois at Urbana-Champaign offer degree programs in teacher, school support personnel, and administrator education: the Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Education; Fine and Applied Arts; Liberal Arts and Sciences; and the Graduate College in addition to the School of Information Sciences and the School of Social Work. The list of educator preparation curricula can be found at the end of this section.

Candidates may consult their educator preparation advisers or the Council for additional information about academic regulations and other policies affecting educator preparation. Consult the Executive Director of the Council for information about the Grievance Policy and Procedures for Students Enrolled in Educator Preparation Programs under the purview of the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education (ISBE) or the Illinois General Assembly.

Requirements
Admissions
Applicants to educator preparation programs must meet the admission requirements of the colleges and departments offering the chosen curricula.

Applicants are advised that certain felony convictions, enumerated in Articles 10-21.9 and 21B-80 of the School Code of Illinois (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1005&ChapAct=105%2A0LCS160/5&ChapterID=17&ChapterName=EDSCHOOLS&ActName=School+Code.), prohibit licensure or employment in public schools. Questions pertaining to this matter should be addressed to the Council.

Continuation in an Educator Preparation Program
To be eligible for continuation in an educator preparation program, candidates must satisfy all requirements of the applicable Transition Points which includes maintaining a University of Illinois at Urbana-Champaign and overall grade point averages of 2.5 (A = 4.0) or higher. In addition, candidates must meet the content area and professional education grade-point requirements specific to their programs. The full text of the three Transition Point Plans is available on the Council website (https://cte.s.education.illinois.edu/dotnet/webpages/webpage.aspx/teachereducation/teacher-education/transition-point-plans). The Council on Teacher Education reviews each candidate’s academic progress after the fall and spring semesters. Candidates who do not meet the criteria of the appropriate Transition Point will receive a warning letter from the Council advising them that their continuation in the program, entry into student teaching, and receiving a recommendation for licensure from the University are at risk. Candidates will be directed to their college deans for more information. Candidates may be dropped from licensure programs by the Council if they fail to meet the criteria of the appropriate Transition Point after receiving an initial warning letter.

Teaching effectiveness is influenced not only by academic proficiency, but also by the dispositions and professional behaviors of the candidate. Therefore, faculty members take these characteristics into account as they evaluate candidates’ progress in the program. Teaching effectiveness can also be influenced by the candidate’s health. For this reason, the University provides counseling and medical services for all students. A candidate wishing additional information about these services may call/visit the Council office or contact their advisor or program coordinator.

Because it is essential that counseling and medical services be offered as soon as the need becomes apparent, educator preparation advisers and faculty members are asked to recommend for assistance or examination any candidate about whom they feel concern. A candidate who is recommended for assistance or examination will receive a written request to make an appointment to discuss the situation. It is a requirement of the Council on Teacher Education that a candidate who receives such a request must respond. Failure to do so will jeopardize the candidate’s continuation in their educator preparation program. During the appointment, the candidate will be informed of the counseling and medical services (http://www.mckinley.illinois.edu/) available at the University. The candidate’s use of these services is usually optional. In exceptional cases, however, the Council may require a candidate to satisfactorily complete a mental health or physical examination with one of the campus services. Candidates who wish to continue in teacher education must comply with such referrals.

Student Teaching
State law mandates candidates pass the appropriate content area test prior to student teaching. Students who have not passed the appropriate content area test will not be permitted to student teach. Student teaching application forms are available in the college clinical experiences office that houses each program. (Candidates may obtain referrals to the appropriate office by contacting the Council.) A candidate seeking placement in student teaching should contact the appropriate program’s clinical experiences office no later than October 1 of the academic year preceding the desired placement to determine departmental deadlines and meeting dates. Departments may set earlier deadlines. Candidates who apply after their departments’ deadlines cannot be guaranteed a student teaching assignment during the next academic year. A candidate who will not be on campus during the fall semester, but who expects to enroll in educational practice (student teaching) during the next school year, should secure an application form from his or her program’s clinical experiences office before leaving campus. A candidate who has submitted an application will receive a student teaching assignment pending verification that he or she has completed all requirements of the appropriate Transition Point Plan.

Only those candidates officially registered in teacher education curricula are eligible for student teaching placements. The Council reserves the
right to deny student teaching placement to candidates who have not met all requirements of the appropriate Transition Point Plan. Candidates may also be denied a student teaching placement for health reasons.

Candidates in teacher education should anticipate and plan for student teaching assignments. For most candidates, additional expense will be incurred during the semester in which student teaching is scheduled. Candidates cannot be guaranteed assignments in local schools. Student teaching is a full-time commitment on the part of teacher candidates. Teacher candidates should not plan to take additional coursework outside their program during student teaching, nor should they plan to be employed. School districts have the right to not accept a candidate and therefore, the Council cannot guarantee each candidate a placement. However, each program will exhaust every effort to seek a placement for each candidate.

Candidates are expected to complete all field experiences, including student teaching, at the University of Illinois at Urbana-Champaign. A candidate who wishes to complete student teaching through another university, yet receive a University of Illinois at Urbana-Champaign degree and recommendation for licensure, must secure the prior approval of his or her adviser, clinical experiences program coordinator, college, and the Council on Teacher Education via petition. The petition must be supported by verification from the other university that it will accept the candidate as a student teacher and will comply with all Council on Teacher Education requirements. Approvals of such arrangements are rare, and candidates should expect to incur additional costs. Consult the Council for additional information.

**Teacher Licensure**

A candidate who completes all of the coursework and other requirements in a program approved for purposes of licensure by the Illinois State Board of Education is entitled to receive the recommendation of the University for the appropriate license and endorsement(s), provided the candidate has met all of the requirements of the appropriate Transition Point Plan and has passed all licensure tests and assessments required by the State of Illinois. In addition, all professional education and content-area coursework that forms part of an application for licensure, endorsement, or approval must have been passed with a grade no lower than C- or equivalent in order to be counted towards fulfillment of the applicable requirements.

In some instances, a candidate may be denied a recommendation for licensure but be granted a degree by his or her college. A candidate who believes that the recommendation for licensure has been witheld unjustly may seek redress through the grievance policy established by the Council on Teacher Education.

**Licensure Tests**

All candidates for licensure as teachers, school administrators, and school support personnel must pass tests mandated by the Illinois State Board of Education as a condition for licensure. Illinois law requires that applicants to all educator preparation programs pass a test in their major area. All candidates in programs leading to teaching must also pass a teacher performance assessment (edTPA). Candidates for Learning Behavior Specialist I licensure must pass a third test: Special Education General Curriculum.

**Time Limit on Licensure**

Because licensure requirements are subject to change at any time as a result of new mandates from the Illinois State Board of Education and the Illinois General Assembly, the University is unable to guarantee a recommendation for licensure to anyone who does not apply for licensure immediately upon completion of licensure requirements. A candidate completing an approved program is strongly encouraged to apply for licensure during his or her last term on campus and claim said license on the Educator Licensure Information System (ELIS) once it has been entitled. Applications for licensure are available on the candidate's student portal or in the Council office. Failure to claim a license through the ELIS once it has been entitled could result in additional requirements should candidate seek to claim license at a later date.

**Background Investigation of Applicants for Field Placement and Employment**

State law mandates that all candidates for public school licensure in programs under the purview of the Council on Teacher Education complete a criminal background check and checks of the Statewide Sex Offender Database and Statewide Child Murderer and Violent Offender Against Youth Database before they may be placed in schools. Candidates are responsible for all fees connected with this procedure.

This means each educator preparation candidate in an Illinois school district is required to authorize the school district to initiate a criminal background check which will include a request for fingerprints. A school district may host an educator preparation candidate only after a background check has been initiated and may not knowingly host an educator preparation candidate who has been convicted of a felony or of attempting to commit certain offenses enumerated in The School Code of Illinois. This criminal background check is in addition to any background check you may have completed for the University of Illinois at Urbana-Champaign.

Final decisions regarding the placement of candidates in schools are made in agreement between the relevant department/college/program and the school/district.

The criminal background check is typically conducted prior to any field experience assignments to schools and before student teaching or internship.

**Curricula**

A candidate seeking licensure must complete the requirements of both his or her chosen curriculum, Council on Teacher Education requirements, and all additional State mandated requirements. Teacher education, school support personnel, and administrator curricula and the colleges and departments that offer them are listed below. All curricula have been approved by the Illinois State Board of Education.

Candidates are advised that licensure requirements may be altered at any time by the Illinois State Board of Education or the legislature. In such
cases, candidates may be compelled to satisfy the new requirements to qualify for the University’s recommendation for licensure.

**College of Agriculture, Consumer and Environmental Sciences** ([http://catalog.illinois.edu/undergraduate/aces/](http://catalog.illinois.edu/undergraduate/aces/))
- Agricultural Education

catalog.illinois.edu/graduate/graduate-majors/accountancy/data-analytics-conc/) to fulfill the graduate electives. Students have the choice of remaining in the standard course plan or selecting from among the following alternative graduate concentrations to fulfill the graduate elective requirement: corporate governance and international business (p. 1074), finance (p. 1080), financial reporting & assurance (p. 522), information technology &control (p. 1083), real estate (http://catalog.illinois.edu/graduate/graduate-majors/finance/graduate_concentration_in_real_estate/), taxation (http://catalog.illinois.edu/graduate/bus/concentration/accy/taxation/), and supply chain management (http://catalog.illinois.edu/graduate/graduate-majors/bus-admin-ms/graduate_concentration_in_supply_chain_mgmt/). Students who wish to deviate from the standard course plan, but do not wish to pursue a listed graduate concentration, may petition to take other graduate courses of interest subject to approval of an Accountancy Advisor. Admission to a concentration requires application to the Department no later than February 1 for fall admission. Admission to some concentrations may be competitive.

Graduate Degree Programs in Accountancy
Accountancy, MAS (p. 521)
with optional concentrations:
Business & Public Policy (p. 1071) | Corporate Governance & International Business (p. 1074) | Data Analytics in Accountancy (p. 1075) | Finance (http://catalog.illinois.edu/graduate/bus/concentration/finance/finance/) | Financial Reporting & Assurance (p. 522) | Information Technology & Control (p. 1083) | Real Estate (p. 1087) | Supply Chain Management (p. 1092) | Taxation (p. 1093)
Accountancy, MS (p. 524) (on campus & online)
on campus concentrations:
Business & Public Policy (p. 1071) | Corporate Governance & International Business (p. 1074) | Data Analytics in Accountancy (p. 1075) | Finance (p. 1080) | Information Technology & Control (p. 1083) | Supply Chain Management (p. 1092) | Taxation (p. 1093)

online concentrations:
Accountancy Analytics (p. 525)
Accountancy, PhD (p. 526)
Minor:
Accountancy (p. 1096)

Admission
All applicants to the Master of Accounting Science program should refer to MAS program (https://giesbusiness.illinois.edu/mas/admissions/).
for the degree of Master of Accounting Science in Accountancy

For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/mas/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Information listed in this catalog is current as of 02/2021

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from an accredited U.S. institution. Each student will select either a Taxation or Financial Reporting & Assurance Option as a primary focus. Each Option (listed below) includes room for graduate electives. By design, the program emphasizes the emerging trend of data analytics in the practice of accounting, with a standard course plan that leads to a graduate concentration in data analytics in accountancy (http://
Learning Objectives: Accountancy, MAS

Learning Objective 1: Advanced accounting competency
Students will build on their undergraduate knowledge of accounting by adding advanced knowledge of more complex accounting transactions. Students will also gain the ability to derive decision-relevant information from financial statements to make more strategic use of accounting information for decision-making.

Learning Objective 2: Advanced Professional Research Skills
Students will be able to identify, interpret and apply the authoritative literature related to their areas of specialization to address accounting questions characterized by uncertainty and ambiguity.

Learning Objective 3: Attitude-related Professional Preparation
Students will develop an understanding for and appreciation of an accountant's professional responsibility, and will become aware of society's expectations.

Email: accy@illinois.edu

The MAS program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from a regionally accredited U.S. institution. The Concentration in Taxation is one of the core concentrations available within the MAS program.

Students in the Taxation concentration are also required to choose a secondary concentration. Elective concentration options include: Corporate Governance & International Business (p. 1074), Data Analytics in Accountancy (p. 1075), Finance (http://catalog.illinois.edu/graduate/bus/concentration/finance/finance/), Financial Reporting & Assurance (http://catalog.illinois.edu/graduate/bus/concentration/accy/data-analytics-accountancy/), Information Technology & Control (p. 1083), Real Estate (p. 1087), and Supply Chain Management (p. 1092).

Graduate Degree Programs in Accountancy

Graduate Majors:

The Master of Science in Accountancy can be completed either on campus or online.

The University of Illinois at Urbana-Champaign has consistently ranked among the top accounting schools in the United States. The Public Accounting Report and Accounting Degree Review have rated the Illinois graduate accounting program as one of the top accountancy masters programs in the United States.

The MS in Accountancy (MSA) program (https://giesbusiness.illinois.edu/msa/) offers a one year accounting degree. Our students include those with limited prior accounting education as well as students with an undergraduate degree in accounting. The MSA core curriculum applies to all of our students. However, for those students who have previously taken significantly equivalent courses to any of those in our core curriculum, we will work with our students to find a suitable replacement to recognize the sufficiency of their prior accounting education.

The online Master of Science in Accountancy (https://onlinemsa.illinois.edu/) (iMSA) is a fully online program that can be completed in 18 to 36 months. The highly-engaging delivery format and our world-renowned faculty provide students with a hands-on and practice-oriented learning experience. The iMSA is designed for those already working in the accounting field looking to refresh their skill set and for those who intend to use the degree to enter the field for the first time. A mirror of the on-campus Master of Science in Accountancy (MSA) curriculum, the online MSA (iMSA) uses a flexible program format. It allows students to balance academic life with other obligations.

The MSA program (https://giesbusiness.illinois.edu/msa/) begins in June each year with Summer Session II.

The iMSA program (https://onlinemsa.illinois.edu) begins in August and in January each year.

An optional CPA Review course (ACCY 398) is available. The credit hours for the CPA Review Course do not count towards the 32 credit hours required to graduate.

International students with TOEFL scores below 613 (paper-based), 257 (computer-based), or 103 (internet-based), or IELTS score below 7.0, are required to take the English Placement Test (EPT) when they arrive on campus. After taking the EPT, most students are required to take a Business English course sequence. For these students, completion of the ESL course sequence is mandatory but does not count towards the 32 hour degree requirement.

The Accountancy Analytics concentration can be completed online.

The Accountancy Analytics Concentration is designed to develop leaders who understand (1) how to apply data analytics in a variety of accounting and business contexts, (2) critically solve business problems using data-intensive business and accounting information, and (3) synthesize and effectively communicate data-intensive information, findings, and conclusions to other environment-constituents, including supervisors, peers and subordinates, clients, and regulatory agencies. This concentration will not only provide a strong foundational knowledge of data analytics, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

Learning Outcomes: Accountancy, MS

Learning Outcomes for the degree of Master of Science in Accountancy (on-campus & online)

Learning Objective #1: Discipline-based competency

One goal of the MSA degree is to impart competency in traditional accountancy topics (financial reporting, cost accounting, federal income tax, and auditing), with an expectation of performance at a level higher than undergraduates. Besides providing a technical foundation for career success, a secondary goal of this learning objective is to prepare students to pass the AICPA Uniform CPA examination.

Learning Objective #2: Social and Communication Skills

Students should be able to communicate with others regarding technical accounting topics.

Learning Objective #3: Teamwork

Students should demonstrate the ability to collaborate as an effective team member in varying roles in a diverse group in and in diverse tasks.

Accountancy, PhD

email: accy@illinois.edu

The student’s doctoral program is determined in consultation with a faculty advisory committee. The student’s evolving plans for the doctoral thesis serve as a guide in planning the program. Program coursework is comprised of two general categories: core studies and advanced studies within an area of specialization (i.e., a supporting field). The latter coursework is tailored to facilitate the student’s dissertation.

In addition, candidates must pass a written accountancy core examination and both oral preliminary and oral final examinations on the doctoral thesis. In the accountancy core examination, candidates must demonstrate a thorough knowledge of research methods and accounting theory; a general acquaintance with the subject matter of the variety addressed within accountancy doctoral core studies; and proficiency in the required areas of economic theory, quantitative methods, behavioral science and financial economics.

Graduate Degree Programs in Accountancy

Accountancy, MAS (p. 521)

with optional concentrations:
- Business & Public Policy (p. 1071) | Corporate Governance & International Business (p. 1074)
- Data Analytics in Accountancy (p. 1075) | Finance (p. 745) | Financial Reporting & Assurance (p. 522) | Information Technology & Control (p. 1083) | Real Estate (p. 1087) | Supply Chain Management (p. 1092) | Taxation (p. 1093)

Accountancy, MS (p. 524) (on campus & online)

on campus concentrations:
- Business & Public Policy (p. 1071) | Corporate Governance & International Business (p. 1074) | Data Analytics in Accountancy (p. 1075) | Finance (p. 1080) | Information Technology & Control (p. 1083) | Supply Chain Management (p. 1092) | Taxation (p. 1093)

online concentrations:
- Accountancy Analytics (p. 525)

Minor:
- Accountancy (p. 1096)

Admission

All applicants to the Accountancy doctoral program should refer to the PhD program (https://giesbusiness.illinois.edu/graduate-hub/doctoral/accountancy/).
Learning Outcomes: Accountancy, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Accountancy

Learning Objective #1: Interdisciplinary knowledge, skills and attitudes

Students should possess sufficient knowledge of the economics and other behavioral science theories that are the roots of the accountancy discipline, knowledge of relevant accountancy research literatures, knowledge of the institutional features that characterize the production and utilization of accounting information, and knowledge of design and analysis methods necessary to conduct research in accountancy.

Learning Objective #2: Functioning as a competent researcher

Students should be able to design and conduct a research study in an accountancy related area and to write and present a research paper based on this study to the accountancy faculty. Students should demonstrate accomplishment of this goal in a research study other than their dissertation.

Learning Objective #3: Functioning as a competent educator at the undergraduate level

Students should possess the knowledge, skills and attitudes necessary to teach an undergraduate course based on a common course syllabus developed by a faculty team. These knowledge, skills and attitudes include planning and delivering a class lecture, planning and supervising class activities, and planning and performing assessments of student learning.

Graduate Programs:

degree: Advertising, MS (p. 528)

degree: Strategic Brand Communication, MS (p. 1014)

Advertising education was founded at the University of Illinois in 1946, when Charles H. Sandage, the "father of advertising", arrived on campus. His vision of educating the future of the industry was grounded in theoretical and foundational courses emphasizing the "why of advertising" - not just the "how".

Our courses provide the theoretical, research, and strategic decision-making skills essential for any career in advertising or advanced degree program. Our program allows for flexibility of specialized interest through electives within and outside the department.

Admission

Students are required to complete 36 hours towards the degree, including a professional project or thesis requirement. Full-time status requires 12 hours per semester, making it possible to complete the degree in three semesters. Admission is only granted for fall semester.

Learning Outcomes: Advertising, MS

Learning Outcomes for the degree of Master of Science in Advertising

1. Intellectual reasoning and knowledge
   a. MS graduates will develop an understanding of the "why of advertising" not just the "how".
   b. MS graduates will demonstrate critical thinking skills, making the intellectual connection between quantitative and qualitative tools, theories and context to properly and effectively solve problems and make decisions related to the fast-changing media and advertising industries.

2. Creative inquiry and discovery
   a. MS graduates will have a strategic understanding of advertising and be able to take into account the relationships between this discipline and other related disciplines.
b. MS graduates will assess the interdependent, fast-changing, and diverse world of media and advertising.

c. MS graduates will demonstrate proficiency in analyzing and interpreting research data that is fundamental to innovative problem solving and strategic thinking.

3. Effective leadership and community engagement
   a. MS graduates will utilize interpersonal and group leadership skills (through taking classes with the same cohort every semester and group projects) to be highly effective advertising managers and leaders; demonstrating curiosity, visionary and strategic thinking, teamwork, and knowledge transfer skills.

4. Social awareness and cultural understanding
   a. MS graduates will demonstrate ethical reasoning skills, generate new knowledge, and strengthen professional development.
   b. MS graduates will demonstrate a strong work ethic to foster individual and professional integrity and mutual respect.
   c. MS graduates will be able to think critically and creatively and to apply theory to practice in an atmosphere of inquiry and dynamic exchange with faculty and their peers.
   d. MS graduates will have opportunities for learning outside the classroom.

5. Global consciousness
   a. MS graduates will have opportunity to learn about the fast-changing international and global advertising industry.

6. Professional development
   a. MS graduate students will have the opportunity at least twice per semester to meet with advertising professionals to discuss career goals (i.e., presentations, workshops and collaborations)

The Department of Aerospace Engineering offers both an MS with thesis (https://aerospace.illinois.edu/academics/graduate/ms-degree-program/ms-degree-thesis/) and an MS non-thesis (https://ae.illinois.edu/academics/graduate/ms-degree-program/ms-degree-non-thesis-campus/) program. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://aerospace.illinois.edu/directory/faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

---

**Admission Requirements**

The Department of Aerospace Engineering accepts applications for admission to the MS with thesis and MS non-thesis graduate programs per the following deadlines:

**Fall Admission**
For MS with thesis admission and full consideration for funding opportunities: January 1  
For MS non-thesis admission: July 1

**Spring Admission**
For MS with thesis admission and full consideration for funding opportunities: October 8  
For MS non-thesis admission: December 1

Typically, the prerequisite for graduate study is the equivalent of the BS in Aerospace Engineering (https://aerospace.illinois.edu/academics/undergraduate/); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org/) general test are required of all applicants. There are no minimum GRE score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas from the following list:

- additive technology  
- • aerodynamics  
- • aerospace materials  
- • combustion  
- • computational mechanics  
- • experimental mechanics  
- • fluid mechanics  
- • laser and diagnostic technology  

- • aeropropulsion  
- • • aeropropulsion  
- • • flight control  
- • • • fluid mechanics  
- • • • • mechanics and fatigue

- • controls  
- • • systems and estimation

- • nanotechnologies  
- • • nanosatellites  
- • • • plasma physics
All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

Applicants who are non-native speakers of English and who wish to be considered for teaching assistantships must provide evidence (https://grad.illinois.edu/admissions/taengprof.htm) of spoken English language proficiency. Specifically, they must score 24 or higher on the SPEAK portion of the TOEFL exam and 8 or higher on the speaking sub-section of the IELTS.

For full information on admission requirements and how to apply, see the department’s graduate programs Web site (https://aerospace.illinois.edu/academics/graduate/).

Financial Aid

Students in the MS non-thesis program are not eligible for funding from the department. Financial aid for graduate students in thesis graduate programs is available in the form of fellowships (https://grad.illinois.edu/fellowships/about/), as well as teaching and research assistantships (https://grad.illinois.edu/assistantships/). A block grant from the National Aeronautics and Space Administration supports a multidisciplinary research and training program. Qualified candidates are considered for financial support upon application. In addition, graduate students making satisfactory progress toward their degrees may also be considered for financial support.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL or IELTS, a minimum score of 4CP is required on the EPI test (http://cse.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Graduate Teaching Experience

MS students are not required to hold a teaching assistantship.

Department Research

Research activities in the Department of Aerospace Engineering encompass a wide range of problem areas in aerospace engineering and related engineering disciplines as described on the department’s research area Web site (https://aerospace.illinois.edu/research/).

There are several nationally renowned interdisciplinary centers in The Grainger College of Engineering where Aerospace Engineering faculty members engage in research along many other campus faculty. A list of these, along with links to full descriptions, appears at the department’s interdisciplinary centers Web site (https://aerospace.illinois.edu/research/interdisciplinary-centers/). Among these are the Beckman Institute for Advanced Science and Technology, Center for Exascale Simulation of Plasma-Coupled Combustion (XPACC), Coordinated Science Laboratory (CSL), Micro and Nanotechnology Laboratory, National Center for Supercomputing Applications (NCSA), Air Conditioning and Refrigeration Center (ACRC), Information Trust Institute (ITI), Center for UAS Propulsion (CUP), and Center for Cryogenic High-Efficiency Electrical Technologies for Aircraft (CHEETA).

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research facilities Web site (https://aerospace.illinois.edu/research/research-facilities/).

Other Graduate Programs in the Department of Aerospace Engineering

degrees:

- Aerospace Engineering, PhD (p. 533)
- Aerospace Engineering, Direct PhD (https://aerospace.illinois.edu/academics/graduate/phd-program/phd-student-status-and-requirements/direct-phd/)
- Aerospace Engineering, MENG

optional concentrations:

- Computational Science & Engineering (p. 1073)
- Engineering, MENG
- Computational Science & Engineering (p. 1073)

concentrations:

- Aerospace Systems Engineering (p. 728)

available for:

- Engineering, MENG (p. 728)
- Aerospace Systems Engineering (p. 728)

The Department of Aerospace Engineering (AE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Aerospace Engineering and a Master of Engineering in Engineering degree with a concentration in Aerospace Systems Engineering. The AE graduate program provides students with a strong background in engineering and applied science while placing emphasis on aircraft and spaceflight engineering. Students may major in one of the following general areas: aerodynamics, astrodynamics, combustion and propulsion, control systems, dynamical systems, fluid mechanics, structural mechanics, materials, and space systems.

Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Science in Aerospace Engineering (on campus & non-thesis online)

The MS in Aerospace Engineering is also offered online. The degree requirements are the same as for the on-campus MS non-thesis program and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.
Online students should develop a course program plan in consultation with their advisor. Suggested program tracks (https://aerospace.illinois.edu/academics/graduate/suggested-program-tracks/) are provided for each of the three main technical divisions in the department:

1. Aerodynamics, Fluid Mechanics, Combustion and Propulsion (AFMCP);
2. Astrodynamics, Controls and Dynamical Systems (ACDS); and

For additional details and requirements, refer to the department's Website (http://aerospace.illinois.edu/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

For additional details and requirements refer to the department's Website (https://aerospace.illinois.edu/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Learning Outcomes: Aerospace Engineering, MS

Learning Outcomes for the degree of Master of Science in Aerospace Engineering (on-campus & non-thesis online)

1. An ability to utilize and apply advanced mathematical, computational, design and/or experimental skills
2. An ability to identify, formulate and solve advanced problems in aerospace engineering

For additional details and requirements refer to the department's Website (https://aerospace.illinois.edu/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).
Aerospace Engineering, PhD
for the degree of Doctor of Philosophy in Aerospace Engineering

department head: J (elliottg@illinois.edu)

director of graduate studies: Daniel J Bodony (bodony@illinois.edu)

overview of graduate studies: Aerospace Engineering (https://aerospace.illinois.edu/academics/graduate/phd-program)

department faculty: https://aerospace.illinois.edu/directory/faculty

college website: https://grainger.illinois.edu/

address: 306 Talbot Laboratory, 104 S Wright St, Urbana, IL 61801

phone: (217) 333-2651

email: aerospace@illinois.edu

The Department of Aerospace Engineering offers both a traditional doctoral program and a direct doctoral program (https://aerospace.illinois.edu/academics/graduate/phd-program/phd-student-status-and-requirements/direct-phd/). Students in both programs are required to have a research advisor and applicants are encouraged to contact department faculty (https://aerospace.illinois.edu/directory/faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements
The Department of Aerospace Engineering accepts applications for admission to both the traditional doctoral program and the direct doctoral program per the following deadlines:

3. Effectively communicate technical ideas through reports, presentations, or other media at the high level associated with graduate education
4. Depth of knowledge in one or more sub-disciplines associated with aerospace engineering and their research or technical area of interest.
5. Knowledgeable about contemporary research in aerospace engineering and related disciplines. Knowledgeable about ethical standards of conducting research, analyzing data and disseminating information as part of the engineering profession
6. An ability to conduct research, analyze results, report findings, and draw conclusions that result in original contributions to knowledge in aerospace engineering and/or related fields (Not a requirement for M.S. Non-thesis students)
7. Effectively train and/or teach others in a classroom, laboratory, seminar, or other setting to disseminate knowledge in the aerospace engineering discipline. (Not a requirement for M.S. students)

Fall Admission
For admission and full consideration for funding opportunities: January 1

Spring Admission
For admission and full consideration for funding opportunities: October 8

Typically, the prerequisite for graduate study is the equivalent of the BS in Aerospace Engineering (https://aerospace.illinois.edu/academics/undergraduate/); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org/) general test are required of all applicants. There are no GRE minimum score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas from the following list:

- additive manufacturing
- aerospace materials
- aeroacoustics
- aerodynamics
- aeroelasticity
- aero-space structures
- systems design and simulation
- applied aerodynamics
- autonomous vehicles
- combustion
- composite materials
- computational mechanics
- computational/controls, fluid mechanics
- dynamical systems and estimation
- flow control
- fracture mechanics
- GPS
- hypersonics
- fluid mechanics
- fracture mechanics and fatigue
- lasers
- nanomechanics
- nanosatellites
- plasma physics
- information technology
- nano-mechanics
- nanomaterials
- optical diagnostics
- plasma physics
- robotics
- space environment
- space systems
- structural mechanics
- structural dynamics
- systems and space mission design
- structural dynamics
- unmanned aerial vehicles

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

Applicants who are non-native speakers of English and who wish to be considered for teaching assistantships must provide evidence (https://grad.illinois.edu/admissions/taengprof.htm) of spoken English language proficiency. Specifically, they must score 24 or higher on the SPEAK portion of the TOEFL exam and 8 or higher on the speaking sub-section of the IELTS.
For full information on admission requirements and how to apply, see the department’s graduate programs Web site (https://aerospace.illinois.edu/academics/graduate/).

Financial Aid
Financial aid for graduate students in thesis graduate programs is available in the form of fellowships (https://grad.illinois.edu/fellowships/about/), as well as teaching and research assistantships (https://grad.illinois.edu/assistantships/). Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend. A block grant from the National Aeronautics and Space Administration supports a multidisciplinary research and training program. Qualified candidates are considered for financial support upon application. In addition, graduate students making satisfactory progress toward their degrees may also be considered for financial support.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Graduate Teaching Experience
PhD students are required to hold a 25% teaching assistantship for at least one semester in order to meet the requirements for the Department of Aerospace Engineering doctoral program. Information about teaching assistantships can be found on the department’s teaching assistantships Web site (https://aerospace.illinois.edu/academics/graduate/funding-fees-and-fellowships/teaching-assistantships/).

Department Research
Research activities in the Department of Aerospace Engineering encompass a wide range of problem areas in aerospace engineering and related engineering disciplines as described on the department’s research area Web site (https://aerospace.illinois.edu/research/).

There are several nationally renowned interdisciplinary centers in The Grainger College of Engineering where Aerospace Engineering faculty members engage in research along many other campus faculty. A list of these, along with links to full descriptions, appears at the department’s interdisciplinary centers Web site (https://aerospace.illinois.edu/research/interdisciplinary-centers/). Among these are the Beckman Institute for Advanced Science and Technology, Center for Exascale Simulation of Plasma-Coupled Combustion (XPACC), Coordinated Science Laboratory (CSL), Micro and Nanotechnology Laboratory, National Center for Supercomputing Applications (NCSA), Air Conditioning and Refrigeration Center (ACRC), Information Trust Institute (ITI), Center for UAS Propulsion (CUP), and Center for Cryogenic High-Efficiency Electrical Technologies for Aircraft (CHEETA).

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research facilities Web site (https://aerospace.illinois.edu/research/research-facilities/).

The Center for African Studies administers a two-year program of area studies courses and intensive African language instruction leading to a Master of Arts degree designed to give students an interdisciplinary perspective on the study of Africa. The program provides both language and area training for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. For more information about the Center's graduate programs, please visit: http://www.afrst.illinois.edu/academics/grad/.
Graduate Degree Programs in African Studies

African Studies, MA (p. 535)
African Studies Graduate Minor (p. 1097)
Joint Degree Program:
African Studies, MA and Library and Information Science, MS (p. 1124)

Admissions
The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor’s degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) – 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For information about the application process and to access both domestic and international student applications, start here: https://grad.illinois.edu/admissions/apply/.

For more information about the Center’s admission requirements and procedures, and deadlines please visit www.afrst.illinois.edu/academics/grad/apply/ (http://www.afrst.illinois.edu/academics/grad/apply/).

Students interested in the graduate minor in African Studies must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact Dr. Maimouna Barro (barro@illinois.edu).

Faculty Research
The Center for African Studies’ has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit: http://www.afrst.illinois.edu/people/faculty/

Facilities and Resources
Established since 1970, the Center for African Studies is one the largest and most dynamic African National resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the university of Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

In 2012, the University of Illinois Library reorganized its international and area studies units into one large International and Area Studies Library (IASL) in an excellent renovated space. This new unit includes the African Studies library and other world areas library collections. The University Library has supported a full-time African Studies Bibliographer since 1969, and has provided the necessary acquisitions, cataloging, and processing staff since then.

The African Studies collection include over 354,000 items in all formats, with more than 300,000 in printed volumes and in English and French and a smaller number in Portuguese, German and other European languages. The Library adds about 900 items written in African languages each year. About 16,000 volumes written in Arabic deal with topics related to Africa, and more than 7000 are in Amharic, Bamana, Hausa, Lingala, Swahili, Tigrinya, Wolof, and Zulu. There are roughly 2,900 serials and 46,000 maps, of which 2849 have been digitized, as well as 12,000 microforms, and more than 800 audio-visual materials. The collection covers all African countries and includes materials in about 80 African languages. Priority countries for collecting include: Burkina Faso, Côte d’Ivoire, Democratic Republic of the Congo, Egypt, Eritrea, Ethiopia, Gambia, Kenya, Morocco, Mozambique, Nigeria, Senegal, South Sudan, South Africa, Tanzania, Tunisia, Zambia, and Zimbabwe. The collection is interdisciplinary and concentrated mainly in the humanities, social sciences, human rights and law, and agriculture. Our large collection of primary source materials, covering all of Africa, includes 120,000 pages of Arabic manuscripts and thousands of United States, United Kingdom, and African government documents. The Africana film collection is one of the finest in the US, and our African film database provides access to more than 800 films from or about Africa. UI’s rich museum collections include the Krannert Art Museum and the Spurlock Museum and hold over 10,000 African artifacts. The museums present interesting exhibits and host African performances. Teacher kits on various African topics are also provided by the Krannert Art Museum.

The African studies bibliographer runs the Africana library and teaches IS 530, one of the Center’s core courses and plays a key role in the Center’s graduate program. For further information about the Africana library, please visit: http://www.library.illinois.edu/ias/africana/

Financial Aid
Students must apply and be admitted according to the set deadlines to be considered for assistantships and fellowships. The Center evaluates and ranks entering students on the basis of academic promise. This ranking becomes part of the basis for financial aid decisions. Funding is generally awarded to cover the fall and spring semesters and occasionally on a semester-by-semester basis. Multiple years of funding cannot be guaranteed, but the Center considers it a priority to fund students and see them through the program. Continued funding is based on academic (in the case of Foreign Language and Area Studies Fellowships) and job performance (in the case of assistantships), the availability of positions, and the Center’s budget in a given year or US Department of Education Title VI funding cycle.

Students are encouraged to check the Graduate College’s website (http://www.grad.uiuc.edu/) for funding opportunities—whether they are fellowships or assistantships: https://grad.illinois.edu/
For information about available awards and application deadlines, visit: http://www.afrst.illinois.edu/academics/grants/.

for the Master of Arts in African Studies

For additional details and requirements refer to the department’s Graduate Programs (http://www.afrst.illinois.edu/academics/grad/masters/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

### Learning Outcomes: African Studies, MA

Learning Outcomes for the Master of Arts in African Studies

1. **Strong interdisciplinary knowledge of African area studies, of Africa and its cultures and societies in a broader international and global context**
   a. Students should have a good understanding of the various historical, cultural, social, economic and political conditions that shaped the development of the continent
   b. Students should be able to place their knowledge of Africa and African studies in a broader world context and from a multidisciplinary perspective.

2. **Proficiency in African language and a solid knowledge of research methodologies**
   a. Students should develop appropriate expertise in a region or country in African, acquire proficiency in a language of a particular region/country and equip themselves with a good understanding of the appropriate research tools to study that region/country.

3. **Although international experience is not a requirement for the MA program, experience through study abroad is an integral part of the graduate experience, especially when fellowship opportunities for African language study do exist. Students should demonstrate commitment to conduct fieldwork whenever opportunities for study abroad are available.**

4. **Students should be able to demonstrate strong research skills. Completion of an MA thesis by the end of the second year is a good indication that they have acquired good research skills. However, participation in conferences will also be a good assessment of students’ ability to conduct research.**

5. **Students should be able to make a practical contribution to the center and to African Studies through participation in internships. The Center for African Studies has strong partnerships with organizations and institutions of higher education based on the African continent and can help students identify international internship programs. In case a student is not able to do an internship by the time they graduate, an alternative option would be for them to complete our practicum course (AFST 515). Students enrolled in this course will complete independent projects and will be able to demonstrate their knowledge and practice their skills in real-world settings.**

email: ace-grad@illinois.edu

---

Information listed in this catalog is current as of 02/2021
MAAE Program Overview
The MAAE degree is a course-based (non-thesis) program that provides students with training in economic theory along with the quantitative skills needed to pursue careers as analysts and managers in industry, government, and related organizations. Available course offerings cover a broad range of potential specialization areas within agricultural and applied economics to suit student interests. Course plans for specialization must be approved by the student’s academic advisor and the Director of Graduate Studies. In addition to coursework, the MAAE program includes a required internship component.

Admission
Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English must have a Test of English as a Foreign Language (TOEFL iBT) score of at least 88 (230 computer-based and 570 paper-based) or an International English Language Testing System (IELTS) academic examination overall score of at least 6.5 with a minimum sub-section score of 6 in each of the four modules (speaking, listening, writing, and reading). Graduate Record Examination (GRE) general test scores are suggested, but not required for MAAE applicants. Applicants should be able to demonstrate a strong background in mathematics, microeconomics, and statistics.

Financial Aid
MAAE students are not eligible for graduate assistantships. Limited scholarship funds may be available for outstanding applicants.

Graduate Degree Programs in Agricultural and Applied Economics
for the Master of Science in Agricultural and Applied Economics

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit.

Agricultural & Applied Economics, MS

For the Master of Science in Agricultural and Applied Economics

Program Overview
The ACE M.S. program offers considerable flexibility. Students using the degree as a foundation for a doctorate emphasize economic theory and analytical research tools. Students seeking the terminal master’s degree focus their study on the concepts and analytical techniques used by analysts and managers in industries, governments, and other organizations.

Admission
Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English are required to follow the Graduate College’s Minimum Requirements for Admission. Graduate Record Examination (GRE) general test scores are required for all M.S. program applicants. Applicants to the Ph.D. program are required to provide a sample of their academic writing; a writing sample is optional for M.S. applicants. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. Students may commence study in either semester, but initial enrollment in fall semester is preferable.

Student Thesis and Dissertation Research
Our students’ research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate
experience in this program and is strongly recommended for those intending to pursue an academic career.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees. Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

Graduate Degree Programs in Agricultural and Applied Economics

Agricultural and Applied Economics, MAAE (p. 537)
Agricultural and Applied Economics, MS (p. 538)
Agricultural and Applied Economics, PhD (p. 540)
for the Master of Science in Agricultural and Applied Economics

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit. M.S. students entering the ACE graduate program will be admitted only to the Thesis Option. For the Thesis Option, a thesis is prepared under the supervision of a faculty advisory committee. The thesis is defended in a formal oral examination, which usually coincides with an open departmental seminar, administered by the thesis committee. The Non-Thesis Option requires advanced coursework in lieu of a thesis. The Non-Thesis Option is available only to students already enrolled in the Thesis Option of the ACE M.S. program or in the ACE Ph.D. program. Application for admission to the Non-Thesis Option is by petition to the Department after at least two semesters of graduate coursework have been completed.

For additional details and requirements refer to the department’s Graduate Program information for the Master’s degree (http://ace.illinois.edu/grad/masters/) and the Graduate College Handbook (http://www.grad.uiuc.edu/gradhandbook/).

Learning Outcomes: Agricultural and Applied Economics, MS

Learning Outcomes for the Master of Science in Agricultural and Applied Economics

1. Develop a knowledge base in, and demonstrate an understanding of how to use, microeconomic concepts to set up and analyze economic problems.
2. Identify, summarize, interpret, and critique relevant scholarly literature.
3. Demonstrate the ability to identify important research problems and formulate well-defined research objectives (e.g., testable hypotheses).
4. Identify and use appropriate quantitative methods to accomplish research objectives.
5. Effectively use written and verbal communication skills to present economic concepts and analyses.
6. Understand features of agriculture and natural resources (e.g., inherent risk, institutions, unique government policies, and cultural importance of food) that make them unique for applications of economic principles.
7. Practice highest levels of professional conduct (e.g., in professional activities take responsibility, be accountable, show integrity, have strong ethics, and respect diversity).
Agricultural & Applied Economics, PhD

for the Doctor of Philosophy in Agricultural and Applied Economics

Department Head: Sean Fox
Director of Graduate Studies: Nick Paulson
Director of Graduate Recruiting and Admissions: Madhu Khanna
Address: 326 Mumford Hall, MC-710, 1301 West Gregory Drive, Urbana, IL 61801
Phone: (217) 333-1810
Fax: (217) 333-5538
email: ace-grad@illinois.edu

PhD Program Overview

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- **agricultural finance**
- **environmental and natural resource economics**
- **international and price analysis policy economics and agricultural marketing**
- **family and consumer economics**
- **regional economics and public policy**
- **farm and agribusiness management**

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English are required to follow the Graduate College’s Minimum Requirements for Admission. Graduate Record Examination (GRE) general test scores are required for all applicants. Applicants to the Ph.D. program are required to provide a sample of their academic writing. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. Students may commence study in either semester, but initial enrollment in fall semester is preferable. An applicant with a master’s degree in an appropriate discipline will be considered for the Ph.D. degree. Applicants with a baccalaureate degree can apply directly to the PhD program, but will need to demonstrate sufficient preparation to be admitted.

Student Thesis and Dissertation Research

Our students’ research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Admission requirements include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work. Applicants must submit Graduate Record Examination (GRE) scores.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 6.5 overall. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), 7.0 (IELTS).

Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/)

guidelines/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

**Financial Aid**

Fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

**Department Research**

Current research interests of the faculty include off-road equipment engineering (robotics and automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department’s research Web site. (https://abe.illinois.edu/research/areas/)

**Other Graduate Programs in the Department of Agricultural & Biological Engineering**

degrees:

Learning Outcomes: Agricultural & Biological Engineering, MS

Learning Outcomes for the degree of Master of Science in Agricultural & Biological Engineering

Student learning outcomes are based on educational outcomes suggested by the Accreditation Board for Engineering and Technology (ABET) and the objectives of the program:

1. An ability to apply knowledge of mathematics, science, and engineering;
2. An ability to design and conduct experiments, as well as to analyze and interpret data;
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. An ability to function in multidisciplinary teams;
5. An ability to identify, formulate, and solve engineering problems;
6. An understanding of professional and ethical responsibility;
7. An ability to communicate effectively;
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. A recognition of the need for and an ability to engage in life-long learning;
10. A knowledge of contemporary issues;
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
12. Conduct independent research with expertise in research design, methods, and analysis;
13. Function effectively in leadership roles in their professional careers and activities in professional societies.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Admission to the PhD program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining an MS degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the MS degree program.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 6.5 overall. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 7.0 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Information listed in this catalog is current as of 02/2021
Financial Aid
Fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and The Grainger College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all PhD candidates in this program. For details of expectations, see the department’s Graduate Handbook (https://abe.illinois.edu/graduate/handbook/).

Department Research
Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department’s research Web site. (https://abe.illinois.edu/research/areas/)

Other Graduate Programs in the Department of Agricultural & Biological Engineering degrees:

Agricultural & Biological Engineering, MS (p. 541)
optional concentration:
Computational Science & Engineering (p. 1073)
Technical Systems Management, MS (p. 1029)
Technical Systems Management, MS - Professional Science Master’s (p. 1031)
The Department of Agricultural & Biological Engineering offers a graduate degree program which is at the forefront of the application of engineering principles to solve problems of agricultural production, utilization, environmental control, and biological systems and to improve the quality of life. Students may concentrate study in one of the faculty research interest areas listed below. Supporting course work includes: mathematics; computer science; statistics; engineering mechanics; chemical, civil, electrical, and mechanical engineering; animal science; crop sciences; food science; and other appropriate fields.

Opportunity also exists for specializing in energy and sustainability engineering via the
Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

For additional details and requirements for all degrees, please refer to the program’s Graduate Degree Requirements (https://abe.illinois.edu/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

A Masters degree is required for admission to the Ph.D. program.

Ph.D. exam and dissertation requirements:

- Preliminary exam
- Final Exam or dissertation defense
- Dissertation deposit

1 For additional details and requirements for all degrees, please refer to the program’s Graduate Degree Requirements (http://www.psm.illinois.edu/prospectivestudents/programs/agripro.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Agricultural & Biological Engineering, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Agricultural & Biological Engineering

Student learning outcomes are based on educational outcomes suggested by the Accreditation Board for Engineering and Technology (ABET) and the objectives of the program:

1. An ability to apply knowledge of mathematics, science, and engineering;
2. An ability to design and conduct experiments, as well as to analyze and interpret data;
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. An ability to function in multidisciplinary teams;
5. An ability to identify, formulate, and solve engineering problems;
6. An understanding of professional and ethical responsibility;
7. An ability to communicate effectively;
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. A recognition of the need for and an ability to engage in life-long learning;
10. A knowledge of contemporary issues;
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
12. Conduct independent research with expertise in research design, methods, and analysis;
13. Function effectively in leadership roles in their professional careers and activities in professional societies;
14. For Ph.D. graduates entering academia, function effectively as instructors with presentation skills, e.g., teaching skills (in addition to 1-13)

Admission

We are looking for highly motivated students with strong academic records. Students with backgrounds in agriculture, education, behavioral or social sciences are especially encouraged to apply. The minimum undergraduate grade-point average for admission is 3.0 (A = 4.0). Applications for the online/off-campus program are not required to take the Graduate Record Examination (GRE). International applicants from non-English-speaking countries must have official TOEFL scores of at least 575 (written version) or 233 (computer-based version) to be eligible for admission.

To receive full consideration for admission (and financial aid opportunities if you are applying for the full-time, on-campus program), please apply by February 15 for possible admission the following fall semester or September 15 for possible admission to the following spring semester.

Each applicant’s undergraduate transcript will be evaluated for completion of general education courses required for certification by the Illinois State Board of Education. Students with deficiencies may be admitted with the stipulation that these be met before completion of the master’s program.

Financial Aid

We are committed to funding as many of full-time on-campus students who are making timely progress as possible. The duration and amount of our commitment varies. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application
Learning Outcomes: Agricultural Education, MS

Learning Outcomes for the degree of Master of Science in Agricultural Education (on campus & online)

1. Apply theories of leadership and learning to plan curriculum and deliver effective educational experiences in diverse instructional settings.
2. Apply prior learning from past post-secondary experiences to deliver effective educational experiences in diverse instructional settings.
3. Assess the human capital needs of a group, organization, or community and formulate a solution to an identified need.
4. Create a plan of research inquiry or curriculum development that articulates the human capital challenges within a particular agricultural sector(e.g. education, industry, non-profit, governance)

Agricultural Production, MS - Professional Science Master's

for the Master of Science in Agricultural Production, Professional Science Master's Concentration

1. Apply theories of leadership and learning to plan curriculum and deliver effective educational experiences in diverse instructional settings.
2. Apply prior learning from past post-secondary experiences to deliver effective educational experiences in diverse instructional settings.
3. Assess the human capital needs of a group, organization, or community and formulate a solution to an identified need.
4. Create a plan of research inquiry or curriculum development that articulates the human capital challenges within a particular agricultural sector(e.g. education, industry, non-profit, governance)

Graduate Degree Programs in Agricultural Production
Agricultural Production, MS -- Professional Science Master's (p. 546)
The College of Agricultural, Consumer and Environmental Sciences (ACES) offers graduate work leading to the Master of Science degree with a Major in Agricultural Production and Concentration in Professional Science Master's (PSM). Fields of specialization within this interdisciplinary program include Food Animal Production, Crop Production, and Sustainable Production Systems. In addition to the rigorous scientific training in the area of agricultural production, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities.

Admission
Candidates for admission to the M.S. and Ph.D. programs must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last 60 hours of undergraduate work and for any graduate study is required for admission. Graduate Record Examination (GRE) scores are required of all applicants and the minimum acceptable Test of English as a Foreign Language (TOEFL) score is 590 on the paper-based test, 243 on the computer-based test, or 79 on the internet-based test. Applications are only accepted for the fall semester. Transfer credit may not be applied.

Financial Aid
Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

  Animal Sciences, MANSC (p. 547)
  Animal Sciences, MS (p. 549)
  Animal Sciences, PhD (p. 550)
Graduate Concentrations:
  Bioinformatics: Animal Sciences, MS (p. 608)
Research Areas
The Department of Animal Sciences offers graduate work leading to the Master of Animal Sciences, Master of Science, and Doctor of Philosophy degrees. Fields of specialization include:

- animal breeding
- animal behavior
- biochemistry
- nutrition
- systems of animal management & production
- physiology of lactation
- environmental physiology
- meat science & muscle biology
- physiology of reproduction
- immunobiology
- microbiology

Beef and dairy cattle, horses, poultry, sheep, swine, and a variety of companion and laboratory animals are available for study.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the Bioinformatics program will be able to integrate basic and applied concepts in the three areas and applied them to biotechnology and medical research.

Admission
Candidates for admission to the M.S. and Ph.D. programs must have a bachelor’s degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Students must take the Graduate Record Examination (GRE) and are recommended to take the advanced test in biology. English proficiency requirements for admission follow Graduate College requirement. Emphasis is placed on a student’s interest and ability in research as demonstrated by previous work and letters of recommendation. Admission is possible for spring and summer semesters.

For the M.A.N.S.C., application materials include baccalaureate degree transcripts, resume, personal statement, Graduate Record Examination (GRE) general test scores, and three letters of recommendation. One letter of recommendation must be provided by the Animal Sciences faculty member that will advise the student indicating commitment to mentor. A departmental committee will evaluate the applications and recommend admissions.

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is encouraged as part of the academic work of students in the M.S. and Ph.D. programs.

Learning Outcomes: Animal Sciences, MANSC

Other Requirements

Other Requirements and conditions may overlap
Minimum GPA: 3.0

ANSC 592 or ANSC 593 Research Studies:

- In consultation with their faculty advisor, students will select courses that support the individual research studies project and strengthen career opportunities. The individual research studies project or internship experience and a written report will fulfill the ANSC 592 (Advanced Topics in Animal Science) or ANSC 593 (Research Studies in Animal Sciences) capstone project requirement. The project or internship and the written product provide evidence that the student:
  i) understands and can apply the scientific method;
  ii) has the capability to analyze and interpret scientific information; and
  iii) can effectively communicate scientific information in a field of animal sciences. The written product will follow the format and style of a peer-reviewed manuscript.

Learning Outcomes: Animal Sciences, MANSC

Learning Outcomes for the Master of Science in Animal Sciences Major in Animal Sciences

The recipient of a Master of Animal Sciences in Animal Sciences will demonstrate:

1. Graduate-level understanding of essential concepts and approaches in the area of animal science specialization. The essential concepts will enable the graduate to strengthen the application to a D.V.M or
Ph.D. degree, advance throughout the employment ranks, or secure a mid-management position in industry or federal agencies.

2. Capacity to execute a supervised independent studies project including: a) understanding of the scientific method, research objectives, materials and methods, basic data analysis, and appreciation of the findings; and b) effectively assist on the implementation of essential research activities.

3. Ability to effectively communicate essential disciplinary knowledge and independent studies findings in written format.

4. Aptitude to advocate for interdisciplinary research and education efforts to improve food security, food safety, animal and human health and wellbeing or environmental stewardship.

3. Ability to effectively communicate advanced disciplinary knowledge and dissertation research findings in oral and written formats.

4. Aptitude to lead interdisciplinary research and education efforts to improve food security, food safety, animal and human health and well being or environmental stewardship.

Anthropology, MA

for the Master of Arts in Anthropology

Information listed in this catalog is current as of 02/2021
The master's degree can be a first step toward the doctorate or may be used by students wishing to apply knowledge of anthropology to a related field. Candidates must present a thesis or paper in lieu of a thesis acceptable to their advisers and another member of the graduate faculty within the department.

Graduate Degree Programs in Anthropology

Anthropology, MA (p. 551)
Anthropology, PhD (p. 553)

optional concentration: Second Language Acquisition and Teacher Education (p. 1089)

Museum Studies Graduate Minor (p. 1114)

Admission

Students without the equivalent of the department's undergraduate concentration may be admitted to either degree program, but they may be required to make up any deficiencies in their anthropological backgrounds. In addition to the Graduate College admission requirements, students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) (http://www.grad.illinois.edu/admissions/instructions/04c/), with minimum scores set by the Graduate College. Students are admitted for the fall term only.

Students wishing to pursue the minor in Museum Studies must be in good standing in the graduate program of an academic department, and must apply for acceptance into the minor. Admission to the minor is contingent upon approval of the student's home department and the Museum Studies Steering Committee. Students may apply to the minor during the first week of the fall and spring semesters in any academic year, and should contact the Museum Studies Program Coordinator for application instructions or more information.

Degree Requirements

Each subfield (Archaeology, Biological Anthropology, and Sociocultural/Linguistic Anthropology) requires a specific set of courses for graduation. Achieving doctoral candidacy in all three subfields entails passing (a) language (and/or skill) exam(s), (b) passing a set of preliminary examinations, and (c) successfully submitting a predissertation paper, and/or a doctoral proposal, all to be defended in an oral examination. For specific details and requirements for admission to and navigation of the Ph.D. program, please refer to the Anthropology Department Graduate Programs Handbook (http://www.anthro.illinois.edu/programs/graduate/resources/AnthGradHandbook.pdf) and the University of Illinois Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the Anthropology Department recognizes the importance of teaching experience as part of a graduate education. Most Anthropology graduate students will have the opportunity to work as teaching assistants, to learn to design their own classes, and possibly teach their own classes.

Faculty Research Interests and Facilities

Courses and individualized study provide broad coverage of sociocultural, linguistic, archaeological, and physical anthropology. The department provides special emphases in the analyses of state ideologies and cultural transformations; complex societies in transition; kinship and gender relations; politics, economics, and business studies; social movements and youth; border studies, criminalities, violence, and security; religion, race, and ethnicity; democracy, governance, and policing; social classification; performance and embodiment; food and environment; language and culture; discourse and narrative analysis; transnationalism and diasporas; human evolution; agricultural origins and development; landscape histories and heritage; hunter-gatherer adaptations; climate change and sustainability; diet and nutrition; paleoecology and paleobiology; evolutionary genetics; population genetics; peopling of the Americas; ancient DNA; biomechanics of locomotion; exercise and neurobiology; functional morphology; comparative and analytical osteology; forensics; demography; immunology; evolutionary medicine; microbe-host interaction; reproductive ecology; female reproductive physiology; conservation; and nonhuman primate evolution, morphology, behavior, and ecology. The department's research facilities include laboratories for archaeology, GIS and spatial computing, faunal analysis, casting, stable-isotope analysis, ethnography, ancient DNA, skeletal biology, locomotion and motion analysis, and endocrinology.

Departmental funds and a grant from the National Science Foundation, as well as from area studies centers, are available for graduate students' summer field research. An archaeology field school is held at various locations in Illinois and outside of the US (location varies from year to year). Graduate student programs are enriched by close departmental relationships with the various interdisciplinary units, including area studies centers on campus (African, East Asian and Pacific, European Union, Latin America and Caribbean, Russian and East European; South Asian and Middle Eastern Studies), the ethnic and gender studies units (the American Indian Studies Program and the departments of African-American Studies, Asian American Studies, Gender and Women's Studies, and Latina/Latino Studies), along with the Women and Gender in Global Perspectives Program, Spurlock Museum, the Museum of Natural History, Krannert Art Museum, the Institute for Genomic Biology, and the Program in Ancient Technologies and Archaeological Materials.

Agreements between the University and various governments and institutes facilitate research in many nations. Training is available in various languages (some with funding available), including Arabic, Bengali, Burmese, Chinese, Hausa, Hebrew, Hindi, Indonesian, Japanese, Korean, Portuguese, Quechua, Lingala, Russian, Shona, Swahili, Thai, and Urdu. Students have ready access to the extensive computer facilities of the University and to the department's facilities.

Financial Aid

University fellowships, Graduate College fellowships for under-represented minorities, and teaching and research assistantships...
provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany most fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. University of Illinois public archaeology programs, including the Illinois State Archaeological Survey and the Public Service Archaeology and Architecture Program, have provided support and research employment for graduate students in the past, as has the U.S. Army Construction Engineering Research Laboratory in Champaign.

Learning Outcomes: Anthropology, MA

Learning Outcomes for the Master of Arts in Anthropology

1. **Skills for independent research.** Graduate students will acquire professional-level research and reasoning skills to identify important research problems and to subsequently design, execute, and clearly report the results of independent research programs.

2. **Subfield-specific expertise.** Our program encompasses the four fields of anthropology, while our core curriculum grounds the separate graduate trajectories. Graduate students should develop an in-depth understanding of the differences and similarities of people through a combination of technical skills, language abilities, and theoretical approaches relevant to their chosen expertise.

3. **Contributions to discipline.** Graduate students will develop their intellectual skills to contribute to the discipline through service, research, teaching, and publishing.

4. **Ethical and professional standards.** Graduate students will abide by accepted ethical standards of professional anthropological conduct.

### for the Doctor of Philosophy in Anthropology

The preliminary examination consists of a pre-dissertation research paper, a proposal for doctoral research, and a written examination designed by the student’s doctoral committee followed by a two-hour oral
examination. The final examination is a defense of the doctoral thesis. Fieldwork is strongly recommended, although not required.

The MS in Applied Mathematics program is intended for students wishing to pursue a career in applied mathematics. It is also suitable as preparation for a PhD program in Applied Mathematics. It is rare for students to enter the PhD program at the University of Illinois after finishing this degree. Students may choose one of three tracks: Optimization and Algorithms, Applications to the Sciences, or Computational Science and Engineering. This degree program requires 32 credit hours and can normally be completed in 18 months. A master’s thesis is optional. Applications are accepted for Fall semester. Financial aid is generally not available.

**Graduate Degree Programs in Mathematics**

*Actuarial Science, MS (p. 527)*

*Applied Mathematics, MS (p. 555)*

Learning Outcomes: Applied Mathematics, MS

Learning outcomes for the Master of Science in Applied Mathematics

Optimization and Algorithms Track

1. Students will gain fundamental understanding in at least four of the seven core subjects of graph theory, combinatorics, numerical analysis, algorithms, applied statistics, linear programming, nonlinear programming.
2. Students will gain breadth of knowledge in at least three of the following areas: optimization, control theory and coding theory, combinatorics/graph theory, algorithms/theory of computation, statistics.
3. Students will gain experience in original research in applied mathematics, if desired. This goal applies to students on the thesis track of this program.

Applications to the Sciences Track

1. Students will gain depth of understanding of the theory of differential equations and dynamical systems.
2. Students will gain the ability to engage with theoretical mathematical thinking in areas relevant to the application of differential equations and dynamical systems to the sciences, at the graduate level.
3. Students will gain exposure to the application of mathematics in one or more of the sciences.
4. Students will gain experience in original research in applied mathematics, if desired. This goal applies to students on the thesis track of this program.

Computational Science and Engineering (CSE) Track

1. Students will gain a fundamental understanding of the theory of differential equations/dynamical systems.
2. Students will gain a fundamental understanding, at the graduate level, of at least one of the core subjects of abstract algebra, real analysis, complex analysis.
3. Students will gain an understanding of the use of computational techniques in the study of applied mathematics.
4. Students will gain experience in original research in applied mathematics, if desired. This goal applies to students on the thesis track of this program.

for the Doctor of Philosophy in Mathematics, Actuarial Science and Risk Analytics Concentration

Students working toward a Ph.D. degree usually require four to six years to complete the requirements. Each student must pass the comprehensive examinations (testing the student’s knowledge of basic graduate-level mathematics in algebra, analysis, and other areas) and the preliminary examination (testing the student’s ability to begin or continue research in a chosen field). Students must also write and defend a research thesis in their field of mathematics.

For additional details and requirements refer to the department’s Guide to Graduate Studies (https://files.webservices.illinois.edu/7917/

Master of Science in Architectural Studies

The Master of Science in Architectural Studies program is a one-year course of study with a research focused curriculum developed by the student, in close consultation with the faculty advisor. The program is designed to allow students to develop further expertise in research of the built environment.

Students should have a clear and well-articulated area of research focus upon entry to the program. Prospective applicants are encouraged to contact potential faculty advisors prior to application.

While most students admitted to the program will hold a professional degree prior to admission, a professional degree is not required for admission. Applicants holding degrees from related fields are encouraged to apply. Students considering advanced work at the PhD level are encouraged to apply.

Candidates admitted with full status may complete the program in one year of full-time academic study.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under

Dissertation Deposit Required Yes
Minimum GPA 3.25
3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are required for Master of Science applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Financial Aid
Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

Learning Outcomes: Architectural Studies, MS
Learning Outcomes for the Master of Science in Architectural Studies

The school must provide evidence that its graduates have satisfied each criterion through required coursework. If credits are granted for courses taken at other institutions or online, evidence must be provided that the courses are comparable to those offered in the accredited degree program.

When students complete the MS degree program, they will be able to:

1. **Apply Specialized Knowledge**
   - Engage in the practice of architecture in its many forms.
   - Employ design processes to understand, conceive, and create the many facets of built environments.
   - Utilize the interplay of form and space to create compelling experiences in the built environment.
   - Address environmental, social, political, cultural, and economic challenges through the application of design inquiry.
   - Apply advanced documentation, research, analysis, and design techniques to create innovative design solutions to pressing global challenges.

2. **Apply Broad and Integrative Knowledge**
   - Solve complex problems through the use of advanced design techniques.
   - Communicate complex ideas and concepts through a mastery of graphic, verbal, physical, and digital means.
   - Integrate community voices, cultural perspectives, and participatory practices into design solutions.
   - Employ an understanding of the complex intersections between design and environmental, social, economic, political, and cultural phenomena in historical and contemporary contexts.
   - Use scholarly inquiry to answer questions in support of design solutions.

3. **Utilize Differentiated Modes of Thinking**
   - Understand, differentiate, and apply analytical, critical, and conceptual thinking to the design challenges of the twenty-first century.

For additional details and requirements refer to the department’s program page (http://www.arch.illinois.edu/degrees/master-architecture/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either with or without a thesis, the requirements are listed below:

Information listed in this catalog is current as of 02/2021
who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Financial Aid
Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the degree of Master of Science in Architectural Studies Structures Concentration

The School of Architecture offers a Structures Concentration under its MS in AS degree program. Completion of this in-depth plan of study will result in recording of Structures as a Concentration on the student’s transcript under the MS in AS degree. Students interested in participating in the Structures Concentration must be admitted to the School of Architecture’s MS in AS degree program; register their intent to enter the Structures Concentration with the School’s Graduate Office prior to completing their first semester in their degree program and complete a total of 32 hours with 27 graduate credit hours of architectural structures courses from the required courses list below. Prerequisite subjects for the Structures Concentration include the following: calculus I and II; statics and dynamics; mechanics of materials; one course in structural steel design and one course in reinforced concrete design. Students without these prerequisites may enter the Structures Concentration upon completion of their prerequisite courses.

- Architecture, MARCH & Civil Engineering, MS (p. 1125)  
- Architecture, MARCH & Computer Science, MCS (p. 1125)  
- Architecture, MARCH & Urban Planning, MUP (p. 1126)

The School of Architecture offers a graduate program, leading to a Master of Architecture degree.

The Master of Architecture program is for students holding a four-year Bachelor of Science in Architectural Studies (or similar degree in architecture). Students may be admitted to the Master of Architecture program with Limited Standing if the student holds a bachelor's degree (or higher) in any field other than architecture. Students interested in this track should refer to the Track 3 page for details.

The School of Architecture, together with the graduate programs of computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

**Admission**

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply go to [https://grad.illinois.edu/admissions/apply](https://grad.illinois.edu/admissions/apply). Completed applications must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

**Financial Aid**

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

**Learning Outcomes: Architecture, MARCH**

Learning Outcomes for the degree of Master of Architecture in Architecture

The MARCH is the School’s accredited degree program and must demonstrate that each graduate possesses the knowledge and skills defined by the learning outcomes set out below. The knowledge and skills are the minimum for meeting the demands of an internship leading to registration for architectural practice.

The school must provide evidence that its graduates have satisfied each criterion through required coursework. If credits are granted for courses taken at other institutions or online, evidence must be provided that the courses are comparable to those offered in the accredited degree program.

When students complete the MARCH degree program, they will be able to:

1. **Apply Specialized Knowledge**

   - Engage in the practice of architecture in its many forms.
   - Employ design processes to understand, conceive, and create the many facets of built environments.
   - Utilize the interplay of form and space to create compelling experiences in the built environment.
   - Address environmental, social, political, cultural, and economic challenges through the application of design inquiry.
   - Apply advanced documentation, research, analysis, and design techniques to create innovative design solutions to pressing global challenges.
2. **Apply Broad and Integrative Knowledge**
   - Solve complex problems through the use of advanced design techniques.
   - Communicate complex ideas and concepts through a mastery of graphic, verbal, physical, and digital means.
   - Integrate community voices, cultural perspectives, and participatory practices into design solutions.
   - Employ an understanding of the complex intersections between design and environmental, social, economic, political, and cultural phenomena in historical and contemporary contexts.
   - Use scholarly inquiry to answer questions in support of design solutions.

3. **Utilize Differentiated Modes of Thinking**
   - Understand, differentiate, and apply analytical, critical, and conceptual thinking to the design challenges of the twenty-first century.
   - Evaluate and apply theories of the built environment to understand their impacts on global ecology, human experience, and wellbeing.
   - Research and critically analyze historic and contemporary humanistic conditions related to the built environment in local, regional, and global geographies.

4. **Collaborate Successfully**
   - Foster teamwork and consensus decision-making.
   - Lead and steer complex processes to completion.
   - Value and integrate interdisciplinarity as well as diverse disciplinary approaches in the realm of design.

5. **Contributing to Community, Civic, and Global Equity**
   - Demonstrate the ability to make empathic and ethical decisions throughout the design process.
   - Work toward a more inclusive profession that welcomes practitioners of all genders, abilities, races, ethnicities, and ages.
   - Foreground social, environmental, and economic justice in the design of the environment to contribute to greater equity, diversity, and inclusion.

---

**Architecture: 2 Year Program, MARCH**

*for the Master of Architecture in Architecture, 2 Year Program Concentration*

---

**2-year Professional Master of Architecture Degree**

The two-year professional degree program is intended for students entering with a four-year baccalaureate in architectural studies. The program builds on the undergraduate foundations to develop the knowledge and skills required in today's Architecture profession. Students have the flexibility to pursue individual interests within this 2-year course of study with 16 elective hours of coursework and a variety of thematic studio options each semester. Students may elect to focus in any one of several areas aligned with research-oriented program areas, course offerings and faculty interest. The Master of Architecture degree is a professional degree accredited by the National Architectural Accreditation Board (NAAB) and has a STEM designation.

Candidates admitted with full status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

---

The School of Architecture, together with the graduate programs of computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

---

**Admission**

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.
All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the Master of Architecture in Architecture, 2 Year Program Concentration

The two-year professional degree program, intended for students entering with a four-year baccalaureate in architectural studies, emphasizes further study in architectural disciplines. Students may elect to concentrate in any one of several areas of specialization aligned with research-oriented program areas.

Candidates admitted with full or limited status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

A list of programs and additional requirements can be found on the program's website (https://arch.illinois.edu/degrees/master-architecture-2/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Architecture: Building Performance, MARCH

for the Master of Architecture in Architecture, Building Performance Concentration

Director of the School: Francisco Javier Rodriguez-Suárez
Director of graduate studies: Kevin Erickson
Overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply
School website: http://arch.illinois.edu
College website: http://faa.illinois.edu
School office: 117 Temple Hoyne Buell Hall, 611 Taft Drive, Champaign, IL 61820
phone: (217) 333-7720
e-mail: arch-grad@illinois.edu

The Concentration in Building Performance in the Master of Architecture (M.Arch) Program at the University of Illinois at Urbana-Champaign provides students the opportunity to develop an in-depth understanding of building performance through the integrated design and analysis of environmental, enclosure, structural and related systems. Coursework enables students to engage contemporary architectural issues related to sustainability, environmentally responsible use of energy and materials, human comfort and health, and constructability. In addition to completing architectural design studios focused on technology and performance, students will select from a series of specialized elective courses in building technologies, energy modeling and simulation, building-envelope design, climate-responsive design, daylighting, advanced structural design and analysis, and integrated design processes. The Concentration thus gives students a strong foundation and expertise in the various principles and technologies that contribute to the design of high-performance buildings in contemporary architectural practice.

Students who declare the Concentration in Building Performance are required to submit to their selected Advisor, at the end of their first semester of study and not later than the first day of classes of the second semester, a Plan of Study that outlines their intended coursework during each semester of the M.Arch program. This plan must be signed by the student and the Advisor and submitted to the Chair of the Building Performance Program Area and the Director of Graduate Studies not later than the second week of classes in the student's second semester of study.

This Concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the Concentration will be noted on the student’s official transcript.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade
point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 5.5 and 6.5 in all sub-sections required.

**for the Master of Architecture in Architecture, Building Performance Concentration**

Students who declare the Concentration must complete a minimum of 21 credit hours of coursework with a focus on building performance.

**Architecture: Health and Wellbeing, MARCH**

for the Master of Architecture in Architecture, Health & Wellbeing Concentration

Director of the School: Francisco Javier Rodríguez-Suárez
Director of graduate studies: Kevin Erickson
Overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
School website: http://arch.illinois.edu
College website: http://faa.illinois.edu
School office: 117 Temple Hoyne Buell Hall, 611 Taft Drive, Champaign, IL 61820
phone: (217) 333-7720
e-mail: arch-grad@illinois.edu

The Health and Wellbeing Concentration in the Master of Architecture Program at the University of Illinois at Urbana Champaign provides students with the opportunity to develop an in depth understanding of the relationship between conditions in the built environment and individual performance and population health, well-being, and quality of life. A series of required and elective courses exposes students to a growing base of knowledge at the nexus of architecture, planning, medicine, public health, psychology, and numerous other fields. Concentration coursework enables students to develop expertise in research and strategies for environmental design, planning, and policy to improve human health and wellbeing outcomes through interventions in diverse environment types and contexts, at a range of scales. Responding to an unmet need in the profession, students completing the concentration will be prepared to work on interdisciplinary teams addressing complex societal problems involving the built environment’s critical role in human health and wellbeing in the US and internationally.

Students declaring the Health and Wellbeing Concentration are required to submit, at the end of their first semester of study and not later that the first day of classes of the second semester, a plan schedule that outlines their coursework for the next three semesters. This plan must be signed by the student and the Health and Wellbeing Advisor and submitted to the Chair of the Program Area and the Director of Graduate Programs and Studies not later than the second week of classes of the student’s second semester of study.

This Concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the Concentration will be noted on the student’s official transcript.
Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Students in the concentration are strongly encouraged to consider participation in the Chicago Studio during their MARCH program to explore health and wellbeing topics in the context of urban neighborhoods and communities.

Professional Master of Architecture Degree - Limited Standing

The School of Architecture offers an NAAB accredited professional MARCH 2+ (Track 3) degree program designed for students holding a bachelor’s degree in a field other than architecture, or in architecture but not equivalent to a Bachelor of Science in Architecture. Students develop an individualized curriculum in consultation with their advisor resulting in a program that varies in length from two-and-a-half to three years. Upon completion of requisite background course work lasting between one semester and two years, students enrolled in the MARCH 2+ degree program follow the MARCH program of study. The MARCH 2+ (Track 3) program brings together students with diverse backgrounds to explore and grapple with the complexities of the environment and innovate through the design process.

To be eligible for admission to the MARCH 2+ degree program, the student must have by the term of enrollment:

1) Earned a four-year, baccalaureate degree
2) Completed one calculus class equivalent to U of I MATH 220, five semester hours

Joint Degrees
The School of Architecture, together with the graduate programs of computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

Admission
The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon a review of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Financial Aid
Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

Master of Architecture in Architecture, Track 3 Concentration

Limited Standing
The School of Architecture offers an NAAB accredited professional MARCH 2+ (Track 3) degree program designed for students holding a bachelor's degree in a field other than architecture, or in architecture but not equivalent to a Bachelor of Science in Architecture. Students develop an individualized curriculum in consultation with their advisor resulting in a program that varies in length from two-and-a-half to three years. Upon completion of requisite background course work lasting between one semester and two years, students enrolled in the MARCH 2+ degree program follow the MARCH program of study. The MARCH 2+ (Track 3) program brings together students with diverse backgrounds to explore and grapple with the complexities of the environment and innovate through the design process.

To be eligible for admission to the MARCH 2+ degree program, the student must have by the term of enrollment:
1) Earned a four-year, baccalaureate degree
2) Completed one calculus class equivalent to U of I MATH 220, five semester hours

For additional details and requirements refer to the department's program page (http://www.arch.illinois.edu/degrees/master-architecture/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, the requirements are listed below:

Architecture: Urbanism, MARCH

for the Master of Architecture in Architecture, Urbanism Concentration

Director of the School: Francisco Javier Rodríguez-Suárez
Director of graduate studies: Kevin Erickson
Overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
School website: http://arch.illinois.edu
College website: http://faa.illinois.edu
School office: 117 Temple Hoyne Buell Hall, 611 Taft Drive, Champaign, IL 61820
phone: (217) 333-7720
email: arch-grad@illinois.edu

The Urbanism Concentration in the Master of Architecture Program at the University of Illinois at Urbana Champaign provides students with the opportunity to develop an in-depth understanding of the issues facing cities and urban residents in the 21st century. With complex environmental, political, technological, and economic factors and accelerating urbanization, architects will increasingly be called on to understand and solve urban problems at a variety of scales, from the building to the region. These solutions require understanding across a breadth of issues as well as competency in the appropriate tactics and strategies that can lead to such solutions. The Urbanism Concentration provides students with the opportunity to develop these skills across a range of scales.

Students declaring the Urbanism Concentration are required to submit, at the end of their first semester of study and not later than the first day of classes of the second semester, a plan schedule that outlines their coursework for the next three semesters. This plan must be signed by the student and the Advisor and submitted to the Chair of the Program Area and the Director of Graduate Programs and Studies not later than the second week of classes of the student's second semester of study.

This Concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the Concentration will be noted on the student’s official transcript.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty’s recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant’s past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the website above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

for the Master of Architecture in Architecture, Urbanism Concentration

Students who declare the Concentration must complete a minimum of 21 hours of coursework with a focus on urbanism.

<td></td>
</tr>
<tr>
<td></td>
<td>Coursework taken for completion of the Urbanism Concentration must focus on issues of urbanism. Faculty in the Urbanism Program area offer a wide variety of graduate courses. In any given semester, these may have an appropriate focus for the Urbanism Concentration in other semesters they may not. Each semester Urbanism Faculty determine collectively which courses will be accepted for the Urbanism Concentration.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Other Graduate Courses</td>
<td></td>
</tr>
<tr>
<td></td>
<td>In addition, Faculty in other Program Areas may on occasion offer 400 or 500-level courses that are appropriate for the Urbanism Concentration. In such cases the Chair of Urbanism in consultation with the student’s advisor and after reviewing a formal request from the student may approve seminars taught by Architecture Faculty not in the Urbanism Program Area.</td>
<td></td>
</tr>
</tbody>
</table>
Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

The application process is highly selective. Potential applicants are encouraged to correspond with the chair of the Ph.D. program and or with prospective advisors. Applicants are selected for admission on the basis of academic performance and relevant experience. Application material is evaluated by the Ph.D. Committee and members of the faculty as necessary. Recommendations for admission are based upon an appraisal of prior academic work determined from official transcripts, the statement of research objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester only. Graduate Record Examination (GRE) scores are required for all applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6.5 in all sub-sections required.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

Degree Requirements

The requirements may vary slightly according to students’ area of focus. Please consult the Ph.D Handbook (https://go.illinois.edu/PhDArchandPhDLArchHandbook/) for more explicit details.

Students are required to defend their dissertation; Policies on format of the doctoral examination can be found in the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This program offers advanced training for those students whose goal is a career of research and scholarship in academia, industry, or government. Four areas of focus are offered: History and Theory, Environment and Technology, Health and Wellbeing, and Urbanism. The program is administered jointly with the Department of Landscape Architecture.

**Admission**

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

**Information listed in this catalog is current as of 02/2021**
Learning Outcomes: Architecture, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Architecture

**Theory & Knowledge**

- Students will understand the major theoretical approaches in their architectural subdiscipline, and the assumptions inflected on research situated within any one approach.

- Students will develop mastery of the knowledge in a major architectural subdiscipline and substantial comprehension of knowledge in a minor field outside of architecture.

- Students can identify and describe key theories, concepts, and issues associated with the major theoretical approaches in their architectural subdiscipline.

- Students can combine theoretical approaches to explain phenomena they intend to study.

- Students can select the theoretical approach that is most applicable to a phenomenon and explain why they have selected that perspective

**Research**

- Students will be able to identify, interpret, and synthesize research and describe the gaps in research conducted by other scholars in a particular area of focus.

- Students will comprehend the primary quantitative and qualitative research methods employed in systematic study of the built environment.

- Students will be versed in research ethics pertinent to their architectural subdiscipline.

- Students will be design and carryout a major original research project that contributes new knowledge to the discipline.

- Students will be able to articulate to scholars outside the field the value of including architectural perspectives in interdisciplinary research.

**Dissemination of Scholarship**

- Students will understand the value and obligation for scholars to engage in all aspects of the peer-review process.

- Students informally share their work-in-progress with peers.

- Student can engage peer-review conference and journal venues where they disseminate their research.

**Professional Development**

- Students explore academic and professional post-graduation possibilities for applying their expertise in productive employment.

- Students understand the different types of academic institutions and the expectations of faculty and staff in these different institution settings.

- Students can design and deliver a lecture.

- Students can identify and describe different methods of academic instruction and explain their differential goals.

**Art & Design, MFA**

for the degree of Master of Fine Arts in Art and Design

Information listed in this catalog is current as of 02/2021
The degree of Master of Fine Arts in Art and Design is designed to prepare qualified individuals for distinctive achievement in the professional area of their choice. Fields of concentration include Graphic Design, Design for Responsible Innovation, Industrial Design, Photography, Metal, Ceramics, and an interdisciplinary Studio which includes concentrations in Painting, Sculpture, and specialization in New Media. A minimum of 64 hours of graduate credit is required for the M.F.A. degree. Individual studio space and specialized resources essential to the acquisition of a high-quality professional education are available to students in all areas of study. The Graphic Design, Photography, Metal, Ceramics, and interdisciplinary Studio which includes Painting, Sculpture, and New Media programs require a graduation exhibition of creative work and a written thesis approved by a thesis committee for deposit in the School of Art and Design's graduate office. The Industrial Design and Design for Responsible Innovation programs require a graduation exhibition, a written thesis approved by a thesis committee and a thesis deposit in the Graduate College Thesis Office. Admission for all programs is determined by a faculty review of a portfolio of the applicant’s creative work, records of previous education and experience, letters of recommendation, and other significant achievements that may be viewed as predictors for success in the program.

Graduate Degree Programs in Art & Design
Art & Design, MFA (p. 568)
concentrations:
Crafts (p. 569), Design for Responsible Innovation (p. 571), Graphic Design (p. 572), Industrial Design (p. 573), Metals (p. 574), Painting (p. 575), Photography (p. 577), Printmaking (p. 578), Sculpture (p. 579)
specialization: New Media
Art Education, EdM (p. 580)
Art Education, MA (p. 581)
Art Education, PhD (p. 583)
Art History, MA (p. 584)
Art History, PhD (p. 586)
Art History Minor (p. 1099)

Admission
Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores. International applicants or applicants who are not native English speakers must present a recent TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources
Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid
Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant’s grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

Master of Fine Arts in Art and Design, concentration in Industrial Design

Learning Outcomes: Crafts, MFA

Learning Outcomes for the degree of Master of Fine Arts in Art and Design Crafts Concentration

1. The ability to conceive of, design, problem solve, execute, analyze, and critique complex and conceptually challenging utilitarian and non-utilitarian objects;
2. The ability to employ and demonstrate complex technical competencies in the making of jewelry, hollowware, and objects using traditional and new approaches in a wide variety of materials;
3. the ability to demonstrate a thorough and comprehensive knowledge of historical and contemporary metalwork practice;
4. the ability to recognize and use complex and comprehensive jewelry design and metalworking terminology;
5. the ability to apply complex elements and principles of two and three-dimensional design to the making of jewelry, hollowware, and objects;
6. the ability to create original and conceptually challenging utilitarian and non-utilitarian objects;
7. the ability to apply complex critical thinking strategies when analyzing and writing about ideas and objects;
8. the ability to demonstrate a high level of perceptual awareness;
9. the ability to demonstrate a high level of confidence in and strategies toward individual creativity;
10. the ability to demonstrate a comprehensive knowledge of safe and effective lab process.

The University of Illinois offers an MFA in Design for Responsible Innovation that focuses on interdisciplinary making for research and practice. This program prepares students to contribute to the field of design by entering into practice, academia, or both. Students can explore responsible futures through research in traditional print media and emergent technologies including, but not limited to, data visualization, digital interaction, information design, systems thinking, and visual narrative.

The degree offers these specialized tracks of study:
- Sustainable and regenerative design
- Urban sociology and critical race design
- Visual and cultural studies
- Student-proposed applied research in responsible innovation, social impact, and engagement

Graduate Degree Programs in Art & Design

Art & Design, MFA (p. 568)
  Concentrations:
    Crafts (p. 569), Design for Responsible Innovation (p. 571), Graphic Design (p. 572), Industrial Design (p. 573), Metals (p. 574), Painting (p. 575), Photography (p. 577), Printmaking (p. 578), Sculpture (p. 579)
    Specialization: New Media
      Art Education, EdM (p. 580)
      Art Education, MA (p. 581)
      Art Education, PhD (p. 583)
      Art History, MA (p. 584)
      Art History, PhD (p. 586)
      Art History Minor (p. 1099)

Admission

Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores. International applicants or applicants who are not native English speakers must present a recent TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum’s excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant’s grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

Learning Outcomes: Industrial Design, MFA

Learning Outcomes for the degree of Master of Fine Arts in Art and Design Industrial Design Concentration

1. **Research and inquiry**: Use appropriate research and experimental methods to access existing data sources, to generate new data and as a basis for defining and solving design problems
2. **Creative synthesis**: Use design thinking and appropriate sketching, modeling, prototyping and making strategies to produce creative design solutions which take account of the needs of users, audience, market, and producers as required.
3. **Production**: Select and use appropriate processes for design, production, and manufacture, with an understanding of the potential of new technologies and the demands of sustainability
4. **Contextualization**: To recognize the social responsibility of the profession and to understand the multiple contexts of design practice, including the historical, professional, cultural, theoretical, environmental and technological.
5. **Communication**: Demonstrate appropriate forms of communication during and on completion of the design process to elicit information, to explain, to debate and persuade, adapting to audience and situations as required
6. **Organization**: Plan and implement actions, identifying targets and organizing resources; utilize project management skills with an understanding of developing product timelines. To effectively collaborate with others, using team building and team working skills.
7. **Learning**: Carry out independent learning for academic study, lifelong learning, and professional development. To reflect and independently evaluate your own practice, with the aim of improvement
8. **Teaching**: Demonstrate the ability to employ relevant pedagogical methods for the preparation and delivery of content for college-level teaching in formal and informal situations with reflection on the teaching/learning paradigm.

Master of Fine Arts in Art and Design, concentration in Industrial Design (http://catalog.illinois.edu/graduate/graduate-majors/art-design/#concentrationstext)

Learning Outcomes: Sculpture, MFA

Learning Outcomes for the degree of Master of Fine Arts in Art and Design Sculpture Concentration

1. Demonstrate a practical and theoretical understanding of contemporary art and related practices.
2. Articulate studio and conceptual concerns orally and in writing that makes critical connections between individual works and practices and the larger contexts that inform them.
3. Produce and exhibit a comprehensive body of artwork that demonstrates conceptual rigor and appropriate technical skill.
4. Demonstrate the intention, motivation and skills required to pursue and sustain a career as an artist.
5. Acquire practical pedagogical and technical skills necessary for employment in the field.

phone: (217) 333-0642

The program of study leading to the degree of Master of Education (EdM) in Art Education is designed to provide advanced level study for students of two main kinds. It serves as professional development for art teachers and supervisors in the public schools and as preparation for those interested in a variety of careers, such as museum education, arts advocacy or community arts.

In addition to required courses in art education, students may choose electives in studio art, art education or art history, and any other graduate courses offered by the university that complement their studies or professional aspirations. Specific course selection is determined in consultation with the student’s advisor. Students may simultaneously study for teaching certification but graduate credit is not usually granted for such study. A thesis is not required for the EdM degree.

Applicants for admission must hold a bachelor’s degree in art education or a related field from an accredited institution. Admission is determined by a review of transcripts, letters of recommendation, resume, personal statement, and a writing sample.
Graduate Degree Programs in Art & Design
Art & Design, MFA (p. 568)
concentrations:
Crafts (p. 569), Design for Responsible Innovation (p. 571), Graphic Design (p. 572), Industrial Design (p. 573), Metals (p. 574), Painting (p. 575), Photography (p. 577), Printmaking (p. 578), Sculpture (p. 579)
specialization: New Media
Art Education, EdM (p. 580)
Art Education, MA (p. 581)
Art Education, PhD (p. 583)
Art History, MA (p. 584)
Art History, PhD (p. 586)
Art History Minor (p. 1099)

Admission
Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores. International applicants or applicants who are not native English speakers must present a recent TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources
Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid
Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant’s grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

Learning Outcomes: Art Education, EdM
Learning Outcomes for the degree of Master of Education in Art Education

The EdM program provides advanced-level study for art educators. The program’s objectives are to enable participants to:
1. Become familiar with key debates and concepts in art education
2. Develop the capacity to reflect on and to analyze their own practices in art education
3. Gain a deeper insight of the role of art and visual culture in education and everyday life
4. Develop a critical understanding of both theoretical and practical perspectives on art education and general education
5. Develop the ability to contribute to informed development of policy and practice in arts education and general education

This program provides basic preparation for teaching at the college level, background in the history of art for museum work, and preliminary study for the doctoral degree. In addition to the general requirements, the prerequisite for admission is ordinarily an undergraduate degree in art history or a strong preparation in related humanistic studies. Applicants with little background in art history but who have done exceptionally well as undergraduates in other disciplines will be seriously considered. A thesis or scholarly essay is required for completion of the degree.

Learning Outcomes: Art History, MA

Learning Outcomes for the degree of Master of Arts in Art History

1. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
2. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
3. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.
4. Students will be able to engage in art historical writing at the level of an emerging professional scholar. This involves the critical application of standard art historical methods and marshaling visual and textual evidence to support interpretive claims.

Art History, PhD

for the degree of Doctor of Philosophy in Art History

The program leading to the degree of Doctor of Philosophy in Art History is designed to prepare students for scholarship and for teaching at the college level. Applicants must have the Master of Arts in Art History. Students earning the master’s degree at Illinois must write a thesis or research paper of superior quality in order to be admitted to the doctoral program. Students taking the master’s degree elsewhere must satisfy the Graduate Committee on the History of Art and Architecture as to their preparation to undertake work on a doctoral level. Students usually elect to major and write a dissertation in one of various fields:

- Classical
- Medieval
- Renaissance
- History of Photography
- American
- Baroque
- Modern
- Contemporary
- African
- Asian
- or Latin American

Astronomy, MS

for the degree of Master of Science in Astronomy
The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy for a small and carefully selected student body. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of modern physics as well as of general astronomy. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Graduate Degree Programs in Astronomy
Astronomy, MS (p. 587)
Astronomy, PhD (p. 589)
optional concentration: Astrochemistry (p. 1060)

Admission
Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by test scores, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor's degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 (A = 4.0) and satisfactory scores on the Graduate Record Examination (GRE) (verbal, quantitative, and advanced physics portions) are required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the College Admissions Web site on the English Proficiency Requirement can be found at the College Admissions Web site. Applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by December 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions Web site (http://www.astro.illinois.edu/academics/graduate/) for more information and application materials.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests
Research activity in the Department of Astronomy includes observational and theoretical investigations of a wide array of astronomical objects:

- Early-universe cosmology (inflation, particle dark matter, cosmic nucleosynthesis)
- Large-scale structure of the universe (cosmic microwave background, galaxy clusters)
- Extragalactic systems (galaxy structure and evolution, interacting galaxies, active galaxies, jets, and quasars)
- Interstellar medium (multiple phases, molecular clouds, HII regions, bubbles and superbubbles, planetary nebulae, supernova remnants, magnetic fields, and galactic structure)
- Stars (formation, structure and evolution, atmospheres, nucleosynthesis, novae, supernovae, pulsars, and stellar statistics)
- Compact objects (black holes, neutron stars, white dwarfs)

Theoretical astrophysics is also a strong research interest, with many faculty members in the Department of Astronomy and the Department of Physics. Current activity centers on:

- Astrophysical fluid dynamics, magnetohydrodynamics and radiation hydrodynamics
- Physics of dense stellar matter
- Accretion phenomena
- High energy and relativistic astrophysics
- Cosmic inflation and structure formation
- Nuclear and particle processes in cosmology and astrophysics
- Black hole physics and astrophysics
- Gravitational lensing
- Gravitational wave phenomena

Facilities and Resources
- The Dark Energy Survey
- The Large Synoptic Survey Telescope
- The South Pole Telescope
- Astronomy students and faculty successfully compete for time on national facilities. These include ground-based telescopes of the National Radio Astronomy Observatory, such as the Atacama Large Millimeter Telescope and the Very Large Array, and the National Optical Astronomy Observatory telescopes. Illinois research involves many space-based telescopes, including the Hubble, Planck, Spitzer, Herschel, Chandra, and Fermi.
- A number of projects in the Department of Astronomy partner with the National Center for Supercomputing Applications (NCSA) at Illinois. This includes development and application of astrophysical simulations such as the FLASH package and general
relativistic magnetohydrodynamic codes that provide insight into the nature of structure formation and the physics of black holes. Astronomy faculty also leverage NCSA’s pioneering development of cyberinfrastructure environments to facilitate data transport for the Sloan Digital Sky Survey (SDSS), the Dark Energy Survey, the Square Kilometer Array, and the Large Synoptic Survey Telescope. NCSA and the Astronomy Department also jointly founded the Laboratory for Cosmological Data Mining to apply novel algorithms to the rich datasets now available for cosmological analysis, including those from the SDSS and Wilkinson Microwave Anisotropy Probe.

• Illinois is the home of the Blue Waters National Petascale Computing Facility, one of the most powerful supercomputers in the world, and the most powerful on a university campus. A portion of Blue Waters time is dedicated to Illinois faculty, and Astronomy students and faculty use Blue Waters for their research.

Financial Aid
University fellowships are available and may be combined with part-time teaching assistantships. Most resident students are supported for their first two or three years by half-time teaching assistantships. The typical teaching assistant takes two or three graduate courses per semester and spends twenty hours per week handling quiz sections in elementary astronomy courses. Teaching assistantships are responsible positions, and the concomitant duties are considered to be a valuable part of the student’s educational experience. Advanced students may compete for research assistantships offered by faculty members whose research is partially supported by federal grants.

For the degree of Master of Science in Astronomy

For additional details and requirements refer to the department’s Graduate Programs (http://www.astro.illinois.edu/academics/graduate/programs/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

</tr>
</tbody>
</table>

Of the additional formal coursework, the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours)

1 Research Project (minimum 4 hours)

• The student will complete a research project with an Astronomy Department faculty member (i.e. ASTR 590). A paper reporting the results is required, which must be prepared in scientific journal style and approved by the faculty member.

2 Demonstrated Proficiency in Astronomy (ASTR 404, ASTR 405, ASTR 406 and ASTR 414)

Students must show proficiency in the four courses by one of the following options:

• Pass the appropriate section of the placement exam (four sections aligned to the four courses), which is offered at the start of every Fall semester. A student can petition to take the exam once more the following year. The decision on petition approval by the graduate advisor will depend on the student's background and proficiency plan.

• Pass the course with a B grade or better.

• Students who have had an equivalent course at another institution (B grade or better) may petition for those courses to count as proficiency.

Learning Outcomes: Astronomy, MS

Learning Outcomes for the degree of Master of Science in Astronomy

LO1. Infer and characterize the physical mechanisms that govern the observable properties of the Universe and its constituents, including galaxies, stars, and planets, as well as the changes in those properties over time.

LO2. Understand how the observational, statistical, and computational methods of modern astronomy are used to generate the scientific knowledge referred to in LO1.

LO3. Plan and perform original research in astronomy and astrophysics.

LO4. Effectively communicate astronomy knowledge and research results in both oral and written form to a variety of audiences.

LO5. Demonstrate the ability to formulate and write a research proposal.

Information listed in this catalog is current as of 02/2021.
The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy for a small and carefully selected student body. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of modern physics as well as of general astronomy. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Graduate Degree Programs in Astronomy
Astronomy, MS (p. 587)
Astronomy, PhD (p. 589)
optional concentration: Astrochemistry (p. 1060)

Admission
Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by test scores, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor's degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 (A = 4.0) and satisfactory scores on the Graduate Record Examination (GRE) (verbal, quantitative, and advanced physics portions) are required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the Graduate College Admissions Web site (http://www.grad.illinois.edu/admissions/instructions/04c/).

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by December 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions Web site (http://www.astro.illinois.edu/academics/graduate/) for more information and application materials.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests
Research activity in the Department of Astronomy includes observational and theoretical investigations of a wide array of astronomical objects:

- Early-universe cosmology (inflation, particle dark matter, cosmic nucleosynthesis)
- Large-scale structure of the universe (cosmic microwave background, galaxy clusters)
- Extragalactic systems (galaxy structure and evolution, interacting galaxies, active galaxies, jets, and quasars)
- Interstellar medium (multiple phases, molecular clouds, HII regions, bubbles and superbubbles, planetary nebulae, supernova remnants, magnetic fields, and galactic structure)
- Stars (formation, structure and evolution, atmospheres, nucleosynthesis, novae, supernovae, pulsars, and stellar statistics)
- Compact objects (black holes, neutron stars, white dwarfs)

Theoretical astrophysics is also a strong research interest many faculty members in the Department of Astronomy and the Department of Physics. Current activity centers on:

- Astrophysical fluid dynamics, magnetohydrodynamics and radiation hydrodynamics
- Physics of dense stellar matter
- Accretion phenomena
- High energy and relativistic astrophysics
- Cosmic inflation and structure formation
- Nuclear and particle processes in cosmology and astrophysics
- Black hole physics and astrophysics
- Gravitational lensing
- Gravitational wave phenomena

Facilities and Resources
- The Dark Energy Survey
- The Large Synoptic Survey Telescope
- The South Pole Telescope
- Astronomy students and faculty successfully compete for time on national facilities. These include ground-based telescopes of the National Radio Astronomy Observatory, such as the Atacama Large Millimeter Telescope and the Very Large Array, and the National Optical Astronomy Observatory telescopes. Illinois research involves many space-based telescopes, including the Hubble, Planck, Spitzer, Herschel, Chandra, and Fermi.
- A number of projects in the Department of Astronomy partner with the National Center for Supercomputing Applications (NCSA) at Illinois. This includes development and application of astrophysical simulations such as the FLASH package and general relativistic magnetohydrodynamic codes that provide insight into the nature of structure formation and the physics of black holes.
- Astronomy faculty also leverage NCSA’s pioneering development of cyberinfrastructure environments to facilitate data transport for the Sloan Digital Sky Survey (SDSS), the Dark Energy Survey, the Square Kilometer Array, and the Large Synoptic Survey Telescope. NCSA and the Astronomy Department also jointly founded the Laboratory for Cosmological Data Mining to apply novel algorithms to the rich datasets now available for cosmological analysis, including those from the SDSS and Wilkinson Microwave Anisotropy Probe.
- Illinois is the home of the Blue Waters National Petascale Computing Facility, one of the most powerful supercomputers in the world, and
the most powerful on a university campus. A portion of Blue Waters
time is dedicated to Illinois faculty, and Astronomy students and
faculty use Blue Waters for their research.

Financial Aid

University fellowships are available and may be combined with part-time
teaching assistantships. Most resident students are supported for their
first two or three years by half-time teaching assistantships. The typical
teaching assistant takes two or three graduate courses per semester
and spends twenty hours per week handling quiz sections in elementary
astronomy courses. Teaching assistantships are responsible positions,
and the concomitant duties are considered to be a valuable part of the
student’s educational experience. Advanced students may compete for
research assistantships offered by faculty members whose research is
partially supported by federal grants.

Graduate Degree Programs in Atmospheric Sciences

Atmospheric Sciences, MS (p. 592)
Atmospheric Sciences, PhD (p. 593)

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are offered. Opportunity also exists for specializing in computational science and engineering within the department’s graduate programs via the Computational Science and Engineering (CSE) Option.

Admission

Applications for admission are encouraged from students with bachelor’s degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include atmospheric chemistry and aerosols; climate modeling, processes, change, and assessments; cloud physics and radiative processes; convective-storm dynamics and modeling; extratropical cyclones and winter storms; precipitation and hydrometeorological processes; satellite and radar remote sensing; tropical meteorology and hurricanes; and weather and climate risk. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

The Department maintains an extensive computing infrastructure, which is a vital component of all of its educational, research and outreach endeavors. A Departmental computer lab is available for hands-on class exercises. Computers and display projectors are provided in classroom areas, and wireless access exists throughout the buildings. The Department hosts a synoptic/GIS laboratory, a data visualization laboratory, and an instruments lab all within the Natural History Building. A high-capacity network connects these to various computing resources on campus as well as within the Department.

The cornerstone of the Department’s research computing capabilities is the compute cluster Keeling, which currently is composed of several thousand CPU cores and TB of storage. Keeling allows for numerical simulation and analysis of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results. Our faculty research groups regularly take advantage of high-performance computing resources, including the Blue Waters Petascale computing facility, and the NCAR Supercomputing facility.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including NOAA, UCAR, peer institutions, and international vendors. These are analyzed and visualized with a variety of tools to aid in the understanding of current weather events and case studies of recent major events.

Finally, the Department has numerous capabilities for meteorological observations and measurement in teaching and research. This includes: a QuantAQ system, used to collect data on air quality; two iMET mobile sounding systems; a trailer-mounted, 915 MHz radar wind profiler, manufactured by Radiometrics; and SCAMP (System for Characterizing and Measuring Precipitation) which is designed to quantitatively characterize the vertical profile of precipitation particles, measure the particle size distributions and surface precipitation, and also document the scavenging of air particulates by the falling precipitation. SCAMP includes a Micro Rain Radar, an OTT Parsivel Optical Disdrometer, an MPS Particle Spectrometer, a Geonor T2008 Precipitation Gauge, a TSI Optical Particle Sizer, and a Lufft Ultrasonic Weather Station. All of these instruments can be mounted on a flatbed trailer, and transported by the Department's Ford Cargo Van.

Learning Outcomes: Atmospheric Sciences, MS

Learning Outcomes for the Master of Science in Atmospheric Sciences

1. All graduate students will have a fundamental understanding of the core theoretical underpinnings of atmospheric sciences.
2. All graduate students will have a high level of expertise in their chosen research field within the atmospheric and related sciences, and the ability to apply theoretical and technical skills to novel and long-standing problems relevant to society.
3. All graduate students will have the ability to formulate a research problem, demonstrate the value of its solution in advancing knowledge, and develop an approach towards solving that problem.
4. All graduate students will have ethically responsible and effective communication skills, written and verbal, at a professional scientific level.
5. All graduate students will have knowledge of the frontiers in atmospheric science research.

Graduate Degree Programs

The department offers programs leading to the Master of Arts, Doctor of Audiology, and Doctor of Philosophy degrees, with specialization in various aspects of audiology and speech-language pathology. The Department of Speech and Hearing Science offers graduate programs of study in speech-language pathology, audiology, and speech, language, and hearing science. The department prepares scientists and professionals who specialize in the study of perception and production of spoken, written, signed, and alternative communication and communication disorders, as well as dysphagia. Graduate degrees are offered at the master’s and doctoral levels.

Admission

Although a B.A./B.S. in the field is not required for admission to the clinical M.A. or Au.D. programs, recommended background includes undergraduate credit in the following areas or their equivalents: phonetics, anatomy and physiology of the speech and hearing mechanism, hearing science, speech science, speech pathology, audiology, and aural rehabilitation. The M.A. and Au.D. programs begin in the fall only.

For more information about admissions, see: https://ahs.illinois.edu/doctor-of-audiology

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Graduate Degree Programs in Biochemistry

Biochemistry, MS (p. 596)
Biochemistry, PhD (p. 598)

The Department of Biochemistry offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website at www.mcb.illinois.edu/graduate/gradprospect.html. The Department of Biochemistry is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Cell and Developmental Biology, Microbiology and Molecular and Integrative Physiology as well as Programs in Biophysics and Neurosciences. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. In addition, dual degrees via the Medical Scholars Program are offered. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the College of Medicine, and the College of Veterinary Medicine.

Admission

Interested students must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December in mutual agreement with their desired advisor and formally join the appropriate graduate program/department at that time. Students electing biochemistry as a major for an advanced degree should have a strong background in chemistry, biology, physics, and calculus and a grade point average of a 3.0 or higher (A = 4.0). Admission requirements include: a bachelor’s degree; Graduate Record Examination (GRE) scores. In addition to the above requirements, international students must attain a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 590 (243 on the computer-based test). A score of 96 on the internet-based test (iBT), with a score of 24 on the speaking section, is also accepted. The department does not normally admit students directly into the M.S. program.
Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Centers, Programs, and Institutes
Biochemistry faculty are appointed and active in several cross-campus academic and research units, including the Center for Biophysics & Computational Biology, the Beckman Institute for Advanced Science and Technology, the Institute for Genomic Biology, as well as the interdepartmental graduate programs in Biophysics & Computational Biology, and Neuroscience, and the joint M.D./Ph.D. Medical Scholars Program of the College of Medicine.

Faculty Research Interests
Faculty research in the Department of Biochemistry covers a broad spectrum of the most dynamic areas of current research in biological chemistry and molecular biology; physical approaches to the structure and function of macromolecules and membranes; nucleic acid biochemistry and enzymology, enzyme mechanisms and evolution; membrane biochemistry and bioenergetics; protein-lipid interactions; protein-nucleic acid interactions and molecular recognition; molecular biological approaches to gene organization and expression; immunology; microbial physiology, and signal transduction.

Facilities and Resources
Campus resources for science research are state-of-the-art and available to all faculty research programs. Notably among these is the Roy J. Carver Biotechnology Center, which comprises the W.M. Keck Center for Comparative and Functional Genomics (Custom Library Services, High-Throughput Sequencing and Genotyping, DNA Core Sequencing, Fragment Analysis, Oligonucleotide Synthesis, Functional Genomics and Bioinformatics), Proteomics Services (Protein Science Facility, Immunological Resource Center and Flow Cytometry Facility), a Metabolomics Center and a Transgenic Mouse Facility. It also provides career counseling through the Career Services Office. Many other cross-campus facilities are important for the faculty research programs in Biochemistry, including the Fred Seitz Materials Research Laboratory, the National Center for Supercomputing Applications (NCSA), the high-field VOICE NMR Laboratory, Mass Spectrometry Center, Microanalysis Laboratory, Cell Media Facility, and many electronics, machine and glass shop service facilities. The University of Illinois is also a full member of the LS-CAT beamline for macromolecular crystallography at the Advanced Photon Source, Argonne National Laboratory.

Financial Aid
Financial aid for Ph.D. graduate students in biochemistry is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. In addition, interdepartmental training grants from the National Institutes of Health support multidisciplinary training programs. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a stipend, as well as a full tuition waiver and a partial fee waiver.

for the Master of Science in Biochemistry
For additional details and requirements refer to the department’s Program of Study (http://www.mcb.illinois.edu/departments/biochemistry/gradpgmstudy.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Biochemistry, MS

Learning Outcomes for the Master of Science in Biochemistry

At the conclusion of the degree program students will be able to:

1. Develop and demonstrate an in-depth knowledge of a specific area of biochemical research, which may include (but is not limited to) protein, nucleic acid and/or membrane biochemistry, cancer and molecular immunology, computational and quantitative biology, etc.
2. Demonstrate independent and critical skills necessary to formulate specific experiments aimed at understanding molecular processes.
3. Gain the necessary experience and skills to train others in the performance of experiments.
4. Develop communication skills suitable to discuss scientific outcomes at a level for the layperson to understand but critical enough for peers. Typically, such training is developed through writing and editing scientific manuscripts, with input from a faculty advisor.
5. Deliver effective oral and written presentations of the results and conclusions of experimental work.
6. Be able to ask and answer questions within the research areas of Biochemistry.
7. Develop skills and abilities for effective teaching of Biochemistry in a course room setting.
8. Develop the skills and intellectual background to succeed at postdoctoral work in academics or in the commercial sector.
9. Demonstrate ethical conduct within the research process and the responsibilities of the scientist.

The MEng in Bioengineering is a professionally-oriented degree designed to bridge the skills gap by developing students with advanced technical know-how, a better understanding of the medical healthcare industry and more business acumen through coursework and project work, which provides students exposure to real world industry issues.

Students pursuing this major must select one of three concentrations:

- Bioinstrumentation (p. 600)
- Computational Genomics (p. 601)
- General Bioengineering (p. 603)

Admission Requirements

Students must select one of the concentrations under the MEng in Bioengineering program to apply to and will not be able to complete multiple concentrations. Students should have an undergraduate degree in an engineering or a science related field or must have taken engineering or science related coursework. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in the life sciences through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission. Students in the program do not have automatic admission to the PhD program in any engineering department.
All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

**Financial Aid**
The tuition and fees for the MEng in Bioengineering are the standard Graduate and Professional Programs rates for The Grainger College of Engineering, plus a one-time $2,000 program fee. For tuition information and external funding resources, please visit the program’s tuition and fees Web site (https://bioemeng.illinois.edu/tuition-fees/). Students in the MEng in Bioengineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

**Department Research**
Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale; Molecular, Cellular and Tissue Engineering; Bio-Micro and Nanotechnology; Computational and Systems Bioengineering; and Synthetic Bioengineering. MEng students are able to do independent study research projects with Bioengineering faculty and affiliate faculty (https://bioengineering.illinois.edu/directory/) for class credit.

**Other Graduate Programs in the Department of Bioengineering**
degrees:

- Bioengineering, MS (p. 604)
- **optional concentrations:**
  - Biomechanics (p. 1069)
  - Cancer Nanotechnology (p. 1072)
- Bioengineering, PhD (p. 606)
- **optional concentrations:**
  - Biomechanics (p. 1069)
  - Cancer Nanotechnology (p. 1072)
  - Computational Science and Engineering (p. 1073)

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MENG), the Master of Science in Bioengineering (MS), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology.

Opportunity also exists for specializing in energy and sustainability engineering via the

- Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Engineering in Bioengineering (on campus & online)

Students pursuing this major must select one of three concentrations:

- **Bioinstrumentation (p. 600)**
- **Computational Genomics (p. 601)**
- **General Bioengineering (p. 603)**

For additional details and requirements for all degrees, please refer to the department’s Graduate Studies Web site (https://bioengineering.illinois.edu/academics/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

**Learning Outcomes: Bioengineering, MENG**
Learning Outcomes for the degree of Master of Engineering in Bioengineering (on campus & online)

1. Ability to apply quantitative skills and engineering principles to propose novel and practical solutions to medical/human health problems
2. Prepare students for professional careers
3. Ability to gain basic understanding of business, finances, intellectual property and regulatory matters
4. Understanding of professional and ethical responsibilities
5. Ability to communicate real-world scientific problems with bigger vision and offer solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing
6. Demonstrate moderate to high technical mastery in chosen research area, shown by the ability to identify an important scientific problem, formulate a hypothesis, and design experiments to conduct research and data analysis to test the hypothesis. The student should also be able to formulate alternatives.
7. Develop effective leadership skills in order to foster the ability to conduct collaborative research and work with a diverse team

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MEng), the Master of Science in Bioengineering (MS), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology.

Opportunity also exists for specializing in energy and sustainability engineering via the

Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Engineering in Bioengineering, Computational Genomics Concentration

For additional details and requirements for all degrees, please refer to the department’s Graduate Studies Web site (https://bioengineering.illinois.edu/academics/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

e-mail: bioe-meng@illinois.edu

The MEng in Bioengineering is a professionally-oriented degree designed to bridge the skills gap by developing students with advanced technical know-how, a better understanding of the medical healthcare industry and more business acumen through coursework and project work, which provides students exposure to real world industry issues. Other concentrations under the MEng in Bioengineering major include Bioinstrumentation (p. 600) and Computational Genomics (p. 601).

Admission Requirements

Students must select one of the concentrations under the MEng in Bioengineering program to apply to and will not be able to complete multiple concentrations. Students should have an undergraduate degree in an engineering or a science related field or must have taken engineering or science related coursework. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in the life sciences through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission. Students in the program do not have automatic admission to the PhD program in any engineering department.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid

The tuition and fees for the MEng in Bioengineering are the standard Graduate and Professional Programs rates for The Grainger College of Engineering, plus a one-time $2,000 program fee. For tuition information and external funding resources, please visit the program’s tuition and fees Web site (https://bioemng.illinois.edu/financialaid/). Students in the MEng in Bioengineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

Department Research

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale; Molecular, Cellular and Tissue Engineering; Bio-Micro and Nanotechnology; Computational and Systems Bioengineering; and Synthetic Bioengineering. MEng students are able to do independent study research projects with Bioengineering faculty and affiliate faculty (https://bioengineering.illinois.edu/directory/) for class credit.

### Bioengineering, MS

*for the degree of Master of Science in Bioengineering*

**Department Head:** Mark Anastasio (mfi@illinois.edu)
**Director of Graduate Studies:** Gregory Underhill (bodony@illinois.edu)
**Overview of Admissions & Requirements:** https://bioengineering.illinois.edu/admissions/graduate/ (https://bioengineering.illinois.edu/admissions/graduate/process-and-requirements.html)
**Overview of Grad College Admissions & Requirements:** https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
**Department Website:** https://bioengineering.illinois.edu/
**Program Website:** https://bioengineering.illinois.edu/academics/graduated/ms/
**Department Faculty:** https://bioengineering.illinois.edu/directory/
**College Website:** https://grainger.illinois.edu/
**Contact:** Krista Smith (kristasm@illinois.edu)
**Address:** 1240 Everitt Laboratory, 1406 W Green St, Urbana, IL 61801
**Phone:** (217) 333-1867
**Email:** bioe-gradprograms@illinois.edu (bioengineering@illinois.edu)

The Department of Bioengineering offers both an MS with thesis and an MS non-thesis program. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://bioengineering.illinois.edu/directory/) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in i) biomechanics via the Biomechanics (p. 1069) optional graduate concentration and ii) cancer nanotechnology via the Cancer Nanotechnology (p. 1072) optional graduate concentration.

### Admission Requirements

Applicants should have an undergraduate degree in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. All applicants must submit results from the Graduate Record Examination (GRE) (http://www.ets.org/) general test.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

### Financial Aid

Qualified students may qualify for financial aid in the form of fellowships, teaching and research assistantships, and waivers of tuition and service fees.

All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://cte.illinois.edu/testing/oral_eng/epi_overview.html) conducted prior to the start of the semester.

### Department Research

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale, Molecular, Cellular and Tissue Engineering, Bio-Micro and Nanotechnology, Computational and Systems Bioengineering, and Synthetic Bioengineering. In addition to Bioengineering faculty, the Department of Bioengineering has more than 50 affiliate faculty (http://bioengineering.illinois.edu/directory/).

### Other Graduate Programs in the Department of Bioengineering

degrees:
- Bioengineering, MEng (p. 599)
  - **optional concentrations:** Bioinstrumentation (p. 600)Computational Genomics (p. 601)General Bioengineering (p. 603)

  - **optional concentrations:** Biomechanics (p. 1069)Cancer Nanotechnology (p. 1072)Computational Science and Engineering (p. 1073)

Information listed in this catalog is current as of 02/2021
Learning Outcomes: Bioengineering, MS

Learning Outcomes for the degree of Master of Science in Bioengineering

Thesis Option
1. Ability to apply quantitative skills and engineering principles to propose novel and practical solutions to medical/human health problems
2. Understanding of professional and ethical responsibilities
3. Ability to communicate scientific problems and solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing
4. Demonstrate moderate technical mastery in chosen research area, shown by the ability to identify an important scientific problem, formulate a hypothesis, and design experiments to conduct research and data analysis to test the hypothesis. The student should also be able to formulate alternatives.
5. Develop effective leadership skills in order to foster the ability to conduct collaborative research and work with a diverse team

Non-Thesis Option
1. Ability to apply quantitative skills and engineering principles to propose novel and practical solutions to medical/human health problems
2. Understanding of professional and ethical responsibilities
3. Ability to communicate scientific problems and solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing
4. Demonstrate moderate conceptual mastery in chosen research area, with the capability of expanding it into a future research project in preparation for an industry career or PhD degree
5. Develop effective leadership skills in order to foster the ability to conduct collaborative research and work with a diverse team

Bioengineering, PhD
for the degree of Doctor of Philosophy in Bioengineering

- **department head:** Mark Anastasio (mfi@illinois.edu)
- **director of graduate studies:** Gregory Underhill (bodony@illinois.edu)

- **phone:** (217) 333-1867
- **email:** bioe-gradprograms@illinois.edu (bioengineering@illinois.edu)

The Department of Bioengineering offers both a traditional doctoral program (for students with a previous master's degree) and a direct doctoral program (for students with only a bachelor's degree). Students in both programs are required to have a research advisor and applicants are encouraged to contact department faculty (https://bioengineering.illinois.edu/directory/) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in i) biomechanics via the Biomechanics (p. 1069) optional graduate concentration, ii) cancer nanotechnology via the Cancer Nanotechnology (p. 1072) optional graduate concentration, and iii) computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

**Admission Requirements**

Applicants should have an undergraduate or graduate degree in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. All applicants must submit results from the Graduate Record Examination (GRE) (http://www.ets.org/) general test.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

**Financial Aid**

 Qualified students may apply for financial aid in the form of fellowships, teaching and research assistantships, and waivers of tuition and service fees. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

**Department Research**

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale; Molecular, Cellular and Tissue Engineering; Bio-Micro and Nanotechnology; Computational and Systems Bioengineering; and Synthetic Bioengineering. In addition to Bioengineering faculty, the Department of Bioengineering has more than 50 affiliate faculty (http://bioengineering.illinois.edu/directory/).

Bioinformatics, MS

for the degree of Master of Science in Bioinformatics

bioinformatics website: https://www.informatics.illinois.edu/bioinformatics-masters/
overview of school admissions & requirements: contact the individual departments listed below
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
on-campus contact: contact the individual departments listed below

Students pursuing this major must choose one of these concentrations:

- Animal Sciences (p. 608)
- Crop Sciences (p. 614)
- Chemical & Biomolecular Engineering (p. 611)- not currently accepting applications
- Computer Science (p. 612)
- Bioengineering (p. 609)- not currently accepting applications
- Information Sciences (p. 616)

The MS degree can be taken in a thesis or non-thesis format, depending on the department. For either format, the research adviser must be affiliated with the Bioinformatics program.

Programs in Informatics

Undergraduate Minor
Informatics Minor (p. 480)

Graduate Majors
Bioinformatics, MS (http://catalog.illinois.edu/graduate/provost/ms_bioinfo/)
  - Animal Sciences Concentration (p. 608)
  - Bioengineering Concentration (p. 609)
  - Chemical & Biomolecular Engineering Concentration (p. 611)
  - Computer Science Concentration (http://catalog.illinois.edu/graduate/engineering/ms-bioinfo_cs/)
  - Crop Science Concentration (p. 614)
  - Information Sciences Concentration (http://catalog.illinois.edu/graduate/ischool/ms_bioinfo_is/)
  - Informatics, PhD (http://catalog.illinois.edu/graduate/provost/phd_informatics/)

Admission

Applicants must hold a bachelor’s degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for graduate students entering the Bioinformatics degree program is a bachelor’s or master’s degree in life sciences, computer and mathematical sciences, or engineering, with a minimum of five hours of molecular and cell biology, six hours of general chemistry, nineteen hours of mathematics and statistics, and three hours of introduction to computing. Prerequisites vary somewhat for the different departmental concentrations. Students should view the web page of the specific department they wish to apply to for detailed information about admission criteria and degree requirements. Those links are below:

- Department of Animal Sciences (http://www.anisci.illinois.edu)
- Department of Bioengineering (http://bioengineering.illinois.edu/) - Not currently accepting applications
- Department of Chemical and Biomolecular Engineering (http://chbe.illinois.edu) - Not currently accepting applications
- Department of Computer Science (http://cs.illinois.edu)
- Department of Crop Sciences (http://www.cropsci.illinois.edu)
- School of Information Sciences (http://ischool.illinois.edu)

Financial Aid

 Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis by the admitting department. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships (the most common form of financial aid for new graduate students in the department) must submit a score of at least 50 on the Test of Spoken English (TSE) (http://www.grad.illinois.edu/admissions/taengprof.htm).

Learning Outcomes: Animal Sciences Concentration

Learning Outcomes for the Master of Science Major in Bioinformatics, Animal Sciences Concentration

1. Graduate-level understanding of essential concepts and approaches in the area of bioinformatics with application to animal sciences. The essential bioinformatics concepts will enable the graduate to secure a mid-management position in industry or federal agencies or pursue Ph.D. studies and to advance throughout the professional ranks.

2. Capacity to execute supervised thesis research including: a) understanding of the scientific method, research objectives, materials and methods, advanced data analysis, and appreciation of the findings; and b) leadership on the implementation of essential research activities.

3. Ability to effectively communicate essential bioinformatics and animal sciences knowledge and thesis research findings in oral and written formats.

4. Aptitude to advocate for interdisciplinary research and education efforts to advance food security, food safety, animals and human health and wellbeing or environmental stewardship.

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MS in Bioinformatics, Computer Science Concentration is an interdisciplinary degree that can be counted toward the PhD in Computer Science.

Admission Requirements
Applicants must hold a bachelor’s degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor’s degree in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical)

Information listed in this catalog is current as of 02/2021
are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the Computer Science Concentration of the MS in Bioinformatics program must have a minimum grade point average (GPA) of 3.20 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department’s Prospective Graduate Student Information Web site (http://cs.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid
Research assistantships and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS (academic exam). Students who are unable to take the iBT or IELTS are required to receive a minimum score of 5 on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Other Graduate Programs in the Department of Computer Science

degrees:

Computer Science, MCS (p. 662)
  optional concentrations:
  Computational Science and Engineering (p. 1073)
  Computer Science, MS (p. 664)
  optional concentrations:
  Computational Science and Engineering (p. 1073)
  Computer Science, PhD (p. 665)
  optional concentrations:
  Computational Science and Engineering (p. 1073)

joint programs:

Computer Science, MCS & Architecture, MArch (p. 1125)
Computer Science, MCS & Law, JD (p. 1126)

The Department of Computer Science (CS) offers other graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Computer Science and a Master of Computer Science (MCS). The MCS program is also available online for students who are working full-time and unable to come to campus.

Other Requirements

Information listed in this catalog is current as of 02/2021
All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

**Bioinformatics: Crop Sciences, MS**

### Graduate Degree Programs in Crop Sciences

- Crop Sciences, MS (p. 669) *(on campus & online)*  
- Bioinformatics: Crop Sciences, MS (p. 614)  
- Plant Biotechnology, MS - Professional Science Master’s (p. 949)  
- Crop Sciences, PhD (p. 670)

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,  
2. statistical, mathematical and computer sciences,  
3. informatics and engineering sciences.

Graduates from the bioinformatics program will be able to integrate basic and applied concepts in the three areas and apply them to biotechnology and medical research. For additional information, please see our website at https://cropsciences.illinois.edu/graduate/.

### Admission

Applicants are considered for admission to the Master of Science program if they have a bachelor's or equivalent degree comparable to that granted by the University of Illinois. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant’s credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found at: https://grad.illinois.edu/admissions/apply/begin/international/). Please see our web page for additional information: https://cropsciences.illinois.edu/graduate/admissions/.

### Graduate Teaching Experience

Experience in teaching is considered an important part of the graduate experience in this program.

### Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest: https://cropsciences.illinois.edu/people/faculty/.

### Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference.

*for the Master of Science in Bioinformatics, Crop Sciences Concentration*

The Crop Sciences concentration within the M.S. degree in Bioinformatics can be earned with a thesis option or a non-thesis option, which requires optional supervised research experiences.

For additional details and requirements refer to the department's graduate handbook (http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

**Learning Outcomes: Bioinformatics:**

**Crop Sciences, MS**

Learning Outcomes for the Master of Science in Bioinformatics, Crop Sciences Concentration

**Thesis**

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

**Non-Thesis**

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will acquire professional scientific writing and communication skills.
3. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
4. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Bioinformatics: Information Sciences, MS
for the degree of Master of Science in Bioinformatics, Information Sciences Concentration

**Phone:** (217) 333-7197, (800) 982-0914 (within the US)
**Email:** ischool-apply@illinois.edu

A typical student will take 6 required courses (24 hours) 1 Biology, 1 Computer Science, 1 Fundamental Bioinformatics, and 3 Information Sciences. The student must then choose 3 courses (12 hours) of electives to complete the degree. It is strongly encouraged that up to 2 courses of these electives (8 hours) are thesis. Our expectation is that each student will arrange a custom program of study, suitable for the information management of their particular biological informatics application. Currently, this program requires students to be in residence in Champaign-Urbana.

Graduate Degree Programs in the School of Information Science

- Bioinformatics: Information Sciences, MS (p. 616) (on campus & online)
- Information Management, MS (p. 802) (on campus & online)
- Library & Information Science, MS (p. 835) (on campus & online)
- Library & Information Science, CAS (p. 832) (on campus & online)

  **Concentration:**
  - Digital Libraries (p. 833)
  - Information Sciences, PhD (p. 804)

  **Concentration:**
  - Writing Studies (p. 1093)

Joint Degree Programs:

- Library & Information Science, MS and African Studies, MA (p. 1124)
- Library & Information Science, MS and History, MA (p. 1128)
- Library & Information Science, MS and Russian, East European, & Eurasian Studies, MA (p. 1124)

School Librarian Licensure: available in conjunction with both the MS in LIS and CAS in LIS

The School of Information Sciences (iSchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S.), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available. The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries. The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors. The Library and Information Science concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community. The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one’s professional training several years after completing a M.S. program, or
3. to redirect one’s career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.

**Admission**

The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master’s degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master’s program.

**School Librarian Licensure**

Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

**Facilities and Resources**

Among the major areas of faculty research are:
The iSchool’s Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children’s Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children’s Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with Internet connectivity is integral to teaching and learning activities. The University Library provides a vast reservoir of resources for all types of study and research in library and information science.

The School maintains an ongoing commitment to continuing education through conferences, institutes, workshops, and course offerings.

Financial Aid

Financial aid may be available from the iSchool, the University Library, and elsewhere in the University in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master’s degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

for the degree of Master of Science in Bioinformatics, Information Sciences Concentration

For additional details and requirements, refer to the unit’s Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Learning Outcomes: Bioinformatics: Information Sciences, MS

Learning Outcomes for the degree of Master of Science in Bioinformatics, Information Sciences Concentration

1. Students will be able to describe the essential concepts in data stewardship, data analytics and systems analysis and policy and the ways in which those concepts impact bioinformatics.
2. Students will demonstrate the ability to read, analyze, discuss, and critique scientific advances and limitations described in the research literature.
3. Students will execute a research project that includes their articulation of a tractable research question that is addressed and analyzed using the appropriate scientific methods.
4. Students will effectively and accurately communicate to an interdisciplinary audience in both oral and written formats.
5. Students will adhere to the highest level of ethical standards in all stages of their research and professional activities.

Biology, MS

for the degree of Master of Science in Biology

Students pursuing this major select the Ecology, Ethology, and Evolution concentration (p. 619).

Graduate Degree Programs in Evolution, Ecology, and Behavior

Biology, MS (p. 618)

required concentration:
Biology: Ecology, Ethology, & Evolution, MS (p. 619)
Biology, PhD (p. 620)

required concentration:
Biology: Ecology, Ethology, & Evolution, PhD (p. 621)

The Department of Evolution, Ecology, and Behavior administers graduate degree programs as concentrations in biology. Areas of training include the broadly defined disciplines of Animal Behavior, Biomechanics, Comparative Anatomy, Conservation Biology, Ecology, Evolution, Genetics/Genomics and Physiology.

Admission

Acceptance for graduate study in animal biology is based on the applicant’s research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Courses required for admission are inorganic and organic chemistry, a year of physics, and mathematics through calculus. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is mandatory. Considerable emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are considered for fall admission only. The deadline for application materials is December 15. A minimum paper-based Test of English as a Foreign Language (TOEFL) score of 570 (230 on the computer-based version, 88 on the internet-based version) is preferred for international applicants.

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.
Learning Outcomes: Biology, MS

Learning Outcomes for the degree of Master of Science in Biology

Since the subject matter of our Program is interdisciplinary and broad, there is no one set of subject-based learning outcomes that is suitable for the evaluation of our graduate students. Instead, we will focus on appropriate research and professional development skills.

1. Design and implement independent research and integrate and apply core knowledge related to their field in 3 core areas out of 6 (behavior, conservation biology, ecology, evolution, genetics/genomics, physiology/anatomy)
2. Demonstrate effective oral and written communication skills
   a. Presentations
   b. Publications
   c. Grant writing
3. Apply rigorous statistics/analytical methods that typify their area of study
4. Professional skills
   a. Data management
   b. Citation management
   c. Mentoring
   d. Ethics
   e. Professionalism
   f. Networking
5. Teaching experience

Biophysics & Quantitative Biology, MS

for the degree of Master of Science in Biophysics and Quantitative Biology

Graduate Degree Programs in Department

Biophysics and Quantitative Biology, MS (p. 622)
Biophysics and Quantitative Biology, PhD (p. 624)

Optional concentration:
Computational Science and Engineering (p. 1073)

Biophysics and Quantitative Biology offers a doctor of philosophy degree program. In rare circumstances and with special permission of the director and advisor, a current student may obtain a terminal master's degree after meeting the requirements of the degree. Biophysics students are not admitted initially into the program for a master's degree. Opportunity also exists for specializing in computational science and engineering within the department’s graduate program via the Computational Science and Engineering (CSE) Concentration (http://www.cse.illinois.edu/education/minor-and-concentration/graduate-concentration/).

Admission

The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. Most applicants who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Quantitative Biology Admissions web page (http://www.life.illinois.edu/biophysics/program/admissions.html) for additional information and application deadlines.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.
Faculty Research Interests
Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics web site (http://biophysics.illinois.edu/people/faculty/).

Facilities and Resources
Center faculty and students have access to world-class research facilities at the University of Illinois, including the Beckman Institute, the Carl R Woese Institute for Genomic Biology, Blue Waters Sustained Petascale Computing, the National Center for Supercomputing Applications, the Biomedical Imaging Center, the Roy J Carver Biotechnology Center, and the School of Chemical Sciences’ Mass Spectroscopy Center and Electron Paramagnetic Resonance (EPR) Research Center.

Financial Aid
All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.

for the degree of Master of Science in Biophysics and Quantitative Biology

For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Biophysics & Quantitative Biology, PhD

for the degree of Doctor of Philosophy in Biophysics and Quantitative Biology

center director: Satish Nair
overview of admissions & requirements: Biophysics and Quantitative Biology Admissions (http://www.life.illinois.edu/biophysics/program/admissions.html)
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply

Graduate Degree Programs in Department

Biophysics and Quantitative Biology, MS (p. 622)
Biophysics and Quantitative Biology, PhD (p. 624)

optional concentration:
Computational Science and Engineering (p. 1073)

Biophysics and Quantitative Biology offers a doctor of philosophy degree program. In rare circumstances and with special permission of the director and advisor, a current student may obtain a terminal master's degree after meeting the requirements of the degree. Biophysics students are not admitted initially into the program for a master's degree. Opportunity also exists for specializing in computational science and engineering within the department’s graduate program via the Computational Science and Engineering (CSE) Concentration (http://www.cse.illinois.edu/education/minor-and-concentration/graduate-concentration/).

Admission

The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. Most applicants who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL IBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Quantitative Biology Admissions web page (http://www.life.illinois.edu/biophysics/program/admissions.html) for additional information and application deadlines.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests

Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics web site (http://biophysics.illinois.edu/people/faculty/).

Facilities and Resources

Center faculty and students have access to world-class research facilities at the University of Illinois, including the Beckman Institute, the Carl R. Woese Institute for Genomic Biology, Blue Waters Sustained Petascale Computing, the National Center for Supercomputing Applications, the Biomedical Imaging Center, the Roy J Carver Biotechnology Center, and the School of Chemical Sciences' Mass Spectroscopy Center and Electron Paramagnetic Resonance (EPR) Research Center.

Financial Aid

All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.

for the degree of Doctor of Philosophy in Biophysics and Quantitative Biology

A qualifying examination is offered each spring. This qualifier must be passed by the end of the second year. By the end of the third year, after formulating a definite research problem, the student takes a preliminary
examination where the chosen research topic is presented to the student’s faculty committee. The committee also examines the candidate on their chosen general research area. The Ph.D. thesis is based on original work of the student and is defended at a final public examination. The thesis and the exam must demonstrate a thorough knowledge of theory and techniques in one of the areas of biophysics.

For additional details and requirements refer to the department’s Student Handbook (http://biophysics.illinois.edu/program/courses/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Information listed in this catalog is current as of 02/2021
Learning Outcomes: Bioprocessing and Bioenergy, PSM

Learning Outcomes for the degree of Master of Bioprocessing & Bioenergy: Professional Master’s Concentration

1. Advanced knowledge in bioprocessing and bioenergy. There is no specific undergraduate major that focuses on either bioprocessing or bioenergy, so introducing the scientific basis for converting biomass to value-added products is the key component of the bioprocessing and bioenergy curriculum.

2. Business: Introduce students with strong technical undergraduate degrees to business fundamental concepts such as project management, finance, and accounting.

3. Industry experience that gives the students a realistic view of job opportunities and the hurdles faced by bioprocessing and bioenergy companies.

4. PSM: ability to identify career interests, career path, goals to reach career aspirations, materials and knowledge for a successful internship & career search.

5. PSM: ability to communicate science to a non-science audience; ability to work on a team.

Business Administration, MBA - Online (iMBA)

for the Masters of Business Administration in Business Administration
Graduate Degree Programs in Business Administration

Majors:

Business Administration, MBA (p. 629) (Full-Time) with optional concentrations: Accountancy (p. 1057), Business Data Analytics (p. 1070), Corporate Governance & International Business (p. 1074), Information Technology & Control (p. 1083), Real Estate (p. 1087), Supply Chain Management (p. 1092)

Business Administration, MBA (p. 628) (Professional - part-time) with optional concentrations: Business Data Analytics (p. 1070), Information Technology & Control (p. 1083), Supply Chain Management (p. 1092)

Business Administration, MBA (p. 626) (online-iMBA)

Business Administration, MS (p. 631) with optional concentrations: Accountancy (p. 1057), Business Data Analytics (p. 1070), Business & Public Policy (p. 1071), Corporate Governance & International Business (p. 1074), Supply Chain Management (p. 1092)

Management, MS (p. 841) with optional concentrations: Business Data Analytics (p. 1070)

Technology Management, MS (p. 1032) with optional concentrations: Accountancy (p. 1057), Business Data Analytics (p. 1070), Business & Public Policy (p. 1071), Information Technology & Control (p. 1083), Supply Chain Management (p. 1092)

Business Administration, PhD (p. 632)

Minors:

Information Technology & Control (p. 1110) Corporate Governance & International Business (p. 1104) Supply Chain Management (p. 1118)

Concentrations:

Business Data Analytics (p. 1070) Corporate Governance & International Business (p. 1074) Information Technology & Control (p. 1083) Supply Chain Management (p. 1092)

Joint Degree Program:

Accountancy, MS (iMSA) & Business Administration, MBA (iMBA) (p. 1123)

Admission

Admission to the Illinois Gies MBA is dependent upon an earned undergraduate degree, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE), two letters of recommendation, professional resume and essays. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL) or the IELTS.

Scholarships/Financial Aid

Scholarships are generally not available for the iMBA.

for the Masters of Business Administration in Business Administration

The goal for the iMBA program at Illinois is to deliver a high-quality program that is accessible to global audiences. A mirror of the EMBA curriculum, the online MBA (iMBA) uses a flexible program format. During each IMBA course, virtual study teams are created that are designed to draw upon the diverse academic and professional backgrounds of the class. The program caters to a segment of the population that values mobility, convenience, and believes that the online programs better fit their learning styles and life circumstances.

For additional details and requirements refer to the department's curriculum overview (https://onlinemba.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

**Business Administration, MBA (professional)**

*for the Master of Business Administration in Business Administration*

**Associate dean:** W. Brooke Elliott  
**Email:** mba@illinois.edu  
**Department website:** [https://giesbusiness.illinois.edu/mba](https://giesbusiness.illinois.edu/mba)  
**Department faculty:** [https://business.illinois.edu/people/overview-of-grad-college-admissions-requirements](https://business.illinois.edu/people/overview-of-grad-college-admissions-requirements)  
**College website:** [https://giesbusiness.illinois.edu/](https://giesbusiness.illinois.edu/)  
**Department office:** Business Instructional Facility, Room 3019, 515 E. Gregory, Champaign, IL 61820  
**Phone:** (217) 244-7602

The Gies College of Business offers a degree program leading to the Master of Business Administration (M.B.A.) in 3 delivery modes. The traditional full-time MBA and the Professional MBA are offered on the Urbana campus. The residential MBA and Professional MBA programs are no longer accepting applications. The online program is offered for students who need more flexibility in their MBA programs.

All Illinois MBA programs require 72 hours of credit. Students graduate with a Masters of Business Administration from the University of Illinois at Urbana-Champaign. Student transcripts do not vary based upon program format.

The **Professional MBA** program provides a general management curriculum and focus. The curriculum includes 72 credit hours that are completed over a two and a half year period. This program is designed especially for employed professionals who want to continue working while they pursue the MBA degree.

---

*Information listed in this catalog is current as of 02/2021*
Faculty Research Interests
Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Scholarships/Financial Aid
The Illinois Gies MBA offers a limited number of merit scholarships to outstanding domestic and international applicants. The merit scholarships are awarded at the time of admission. U.S. citizens and permanent residents may be eligible for federal and private student loans.

The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Scholarships/Financial Aid

The Illinois Gies MBA offers a limited number of merit scholarships to outstanding domestic and international applicants. The merit scholarships are awarded at the time of admission. U.S. citizens and permanent residents may be eligible for federal and private student loans.

Business Administration: Executive, MBA

for the degree of Master of Business Administration major in Business Administration Executive Program concentration

The program culminates with an international study experience in which students consult on real business issues with international
organizations and travel overseas to present their recommendations to these companies.

This program caters to senior executives. Each course in the EMBA program is conducted over four weekends. Since the class schedule is compressed over a short period of time, exams / final projects / final assignments are due two weeks after the last class meeting.

For additional details and requirements refer to the department’s curriculum overview (http://www.mbacgchicago.illinois.edu/curriculum/overview.aspx) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

### Business Administration, MS

#### for the Master of Science in Business Administration

- **interim chair of department:** Cele Otnes
- **director of graduate studies:** Deepak Somaya
- **director of admissions committee:** Rakesh Bhatt
- **email:** ba@business.illinois.edu
- **program website:** https://giesbusiness.illinois.edu/msba (https://giesbusiness.illinois.edu/msba/)
- **department faculty:** https://business.illinois.edu/people/
- **overview of grad college admissions & requirements:** https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)

- **department office:** 350 Wohlers Hall, 1206 S. Sixth Street, Champaign, IL 61820
- **phone:** (217) 333-4240

The Master of Science in Business Administration is a 40 graduate hours master’s program best suited for those with a strong technical expertise in one of the concentrations offered within the Ph.D. program. The focus is on preparation for advanced study in the doctoral program or for a research-oriented position. The coursework can usually be completed in four semesters. A major must be specified from one of six areas offered within the Department of Business Administration: organizational behavior/theory, strategic management, marketing, decision sciences and information systems, and process management/management science. At least two courses should be chosen from another area within the Department of Business Administration or a related area outside the department or college.

The program also admits a cohort of professional students focusing on International Business. The cohort requires 12 hours of coursework in International Business, normally completed in three semesters. Students have the option of pursuing an internship during their third (summer) semester.

### Graduate Degree Programs in Business Administration

#### Majors:

- **Business Administration, MBA (p. 629) (Full-Time)**
  - **with optional concentrations:** Accounting (p. 1057), Business Data Analytics (p. 1070), Corporate Governance & International Business (p. 1074), Information Technology & Control (p. 1083), Real Estate (p. 1087), Supply Chain Management (p. 1092)

- **Business Administration, MBA (p. 628) (Professional - part-time)**
  - **with optional concentrations:** Business Data Analytics (p. 1070), Information Technology & Control (p. 1083), Supply Chain Management (p. 1092)

- **Business Administration, MBA (p. 626) (online-iMBA)**

- **Business Administration, MS (p. 631) with optional concentrations:**
  - Business Data Analytics (p. 1070), Finance (p. 1080)

- **Technology Management, MS (p. 1032) with optional concentrations:**
  - Accountancy (p. 1057), Business Data Analytics (p. 1070), Business & Public Policy (p. 1071), Corporate Governance & International Business (p. 1074), Finance (p. 1080), Supply Chain Management (p. 1092)

- **Management, MS (p. 841) with optional concentrations:**
  - Business Data Analytics (p. 1070), Finance (p. 1080)

### Minors:

- Information Technology & Control (p. 1110)
- Corporate Governance & International Business (p. 1104)
- Supply Chain Management (p. 1118)

### Concentrations:

- Business Data Analytics (p. 1070)
- Corporate Governance & International Business (p. 1074)
- Information Technology & Control (p. 1083)
- Supply Chain Management (p. 1092)

### Joint Degree Program:

- Accountancy, MS (iMSA) & Business Administration, MBA (iMBA) (p. 1123)

### Admission

Admission to the MS in Business Administration requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT.

Information listed in this catalog is current as of 02/2021
Faculty Research Interests
Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Financial Aid
Most Ph.D. students receive some form of financial assistance. This assistance is likely to be in the form of a teaching or research assistantship, which includes a waiver of tuition and some fees, and/or the award of a merit-based fellowship. The M.S. in Business Administration, the M.S. in Management, the M.S. in Strategic Brand Communication, and the M.S. in Technology Management do not provide assistantships.

Business Administration, PhD

for the Doctor of Philosophy in Business Administration

This program offers an in-depth education in teaching and research in selected areas of business and administration. Doctoral students can specialize in marketing, organizational behavior/theory, management science/process management, information systems, and strategic management. The program is intensive, flexible, and adapted to individual needs.

Each student's program entails sufficient study and preparation to achieve the following:

1. competence in a common core covering substantive and research methods courses, which are formulated by the faculty in each area;
2. in-depth expertise in a major area;
3. expertise in at least one area in addition to the chosen major area, with this minor area selected from within or outside the department;
4. teaching experience; and
5. research or problem-solving competence.

Competency is determined by comprehensive written and/or oral examinations. Following successful completion of all coursework and comprehensive examinations in major and minor areas, students must propose and gain approval of a thesis topic at a public colloquium. The final program requirement is the successful oral defense of the thesis. Applicants should contact the department for current requirements and program design.

The program usually is completed in four years. Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Other Requirements

1. For additional details and requirements refer to the department’s Programs of Study (https://business.illinois.edu/ba/doctoral/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).
The graduate curriculum in Cell and Developmental Biology is designed to educate students for careers in research and teaching in the biological sciences. Departmental faculty are concerned with the structural and functional relationships of cells and organisms, with research emphases upon eukaryotic cell and molecular biology, neurobiology, developmental biology, and molecular genetics. The department has embarked on a major program to develop research strengths in molecular aspects of developmental, neural, structural, and eukaryotic cell biology to complement existing faculty interests. Students are not admitted to the M.S. program; M.S. requirements are completed as part of the Ph.D. program.

Admission

Students interested in this program must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program/department at that time.

Important factors in the evaluation of applications are general academic performance, background in the biological and chemical sciences and mathematics, Graduate Record Examination (GRE) scores, and letters of recommendation from college professors. The department does not admit students to the M.S. program.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Facilities and Resources

Facilities include modern, well-equipped laboratories for cellular, developmental, genetic, molecular, and structural studies. The University offers exceptional and broadly based research support services. These include the Center for Electron Microscopy, with state-of-the-art instrumentation; the Center for Biotechnology, which includes facilities for molecular cloning, DNA and protein synthesis and sequencing, and transgenic animals; the Cell Science Center, which houses and staffs a hybridoma facility and flow cytometry unit; School of Molecular and Cellular Biology-subsidized shops; and a superb university library system, the third largest in the nation. The University offers outstanding computer services and is home to the National Center for Supercomputing Applications. The Beckman Institute for Advanced Science and Technology combines research in the physical and biological sciences. Opportunities for interaction in the cellular and molecular sciences are also available in many other units within the Schools of Molecular and Cellular Biology, Integrative Biology, and Chemical Sciences and the Colleges of Medicine, Agricultural, Consumer and Environmental Sciences, and Engineering.

Financial Aid

Financial aid is available to qualified applicants in the form of university fellowships (awarded on a competitive basis), teaching assistantships (awarded by the department), research assistantships, and tuition and fee waivers. Outstanding applicants are nominated for support from the Cell and Molecular Biology, Molecular Biophysics.

Learning Outcomes: Cell & Developmental Biology, MS

Learning Outcomes for the Master of Science in Cell & Developmental Biology

Cell & Developmental Biology graduates will:

1. Have mastered the foundational knowledge that defines the fields of cell and developmental biology.
2. Be able to write clearly and effectively about cell and developmental biology at the graduate level as well as in layperson terms.
3. Be able to explain cell and developmental biology orally to professional scientists, students of the discipline, and to a lay audience.
4. Be prepared to teach foundational cell and developmental biology at the college level.
5. Be able to analyze scientific data and draw conclusions from it.
6. Be able to identify important unsolved problems in cell and developmental biology.
7. Be able to articulate a hypothesis of an unsolved problem and design a research plan to test the hypothesis.
8. Be able to perform controlled experiments to test hypotheses.
9. Be able to organize results from experiments into a clear narrative that advances the field.
10. Be able to articulate the significance of their research in the broader context of the field.

Learning Outcomes: Chemical Engineering, MS

Learning Outcomes for the degree of Master of Science in Chemical Engineering

1. Knowledge of the concepts and problem-solving skills in mathematics, science, and engineering that are relevant to identifying, formulating, and solving defined research problems in the field of chemical and biomolecular engineering.

2. Ability to clearly and persuasively communicate (orally and in writing) the motivation for a research project, relevant scientific and engineering concepts, approach, experimental data, data interpretation, conclusions drawn from the research, and the significance of the findings to both experts in the field and non-expert scientists and engineers.

3. Ability to develop and conduct appropriate experimentation or computer simulation, analyze and interpret data, and use engineering judgment to draw conclusions.

4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering, PhD

Email: chbe-gradrecruiting@illinois.edu

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Ideal candidates for advanced degrees in chemical engineering should have a background in chemistry and chemical engineering comparable to the training offered in the undergraduate chemical engineering curriculum at the University of Illinois at Urbana-Champaign. Students whose prior training is deficient in one or more basic areas of chemistry or chemical engineering may be admitted with the understanding that extra coursework will be required to address their deficiencies. Graduate College admission requirements also apply.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Students who remain in good standing and continue to make satisfactory academic progress are guaranteed a funded appointment that includes
a full tuition waiver, a partial fee waiver, and a stipend for the duration of their studies in the program.

**Graduate Teaching Experience**
Experience in teaching is considered a vital part of the Chemical & Biomolecular Engineering PhD program. As part of their academic work, all students in the program are required to serve as a teaching assistant for at least three semesters.

In order to satisfy this requirement, all students whose native language is not English, regardless of US citizenship, must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

**Department Research**
Please see chbe.illinois.edu/research (http://chbe.illinois.edu/research/).

**Other Graduate Programs in Chemical & Biomolecular Engineering**

Minimum 500-level Hours Required 20
Overall:
Teaching experience is required
Requirements include satisfactory performance on qualifying and certification examinations, and a thesis.

Masters Degree Required for Admission to PhD? No
Qualifying Exam Required Yes, the qualifying examination is a written test usually taken during the first year of study.
Preliminary Exam Required Yes, the preliminary examination is an individual oral examination taken after the student has satisfied the course requirements.
Final Exam/Dissertation Defense Required Yes
Dissertation Deposit Required Yes
Minimum GPA: 2.75

**Learning Outcomes: Chemical Engineering, PhD**

Learning Outcomes for the degree of Doctor of Philosophy in Chemical Engineering

1. Knowledge of the concepts and problem-solving skills in mathematics, science, and engineering that are relevant to identifying, formulating, and solving defined research problems in the field of chemical and biomolecular engineering.
2. Ability to clearly and persuasively communicate (orally and in writing) the motivation for a research project, relevant scientific and engineering concepts, approach, experimental data, data interpretation, conclusions drawn from the research, and the significance of the findings to both experts in the field and non-expert scientists and engineers.
3. Ability to develop and conduct appropriate experimentation or computer simulation, analyze and interpret data, and use engineering judgment to draw conclusions.
4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Chemical Physics, PhD**

for the degree of Doctor of Philosophy in Chemical Physics

Information listed in this catalog is current as of 02/2021
Students with undergraduate degrees in chemistry should direct inquiries and applications to the Department of Chemistry 109 Noyes Laboratory, 505 South Mathews Avenue, Urbana, IL 61801.

Students with undergraduate degrees in physics should direct inquiries and applications to the Graduate Advising Office, Department of Physics 227 Loomis Laboratory of Physics, 1110 West Green Street, Urbana, IL 61801-3080.

Graduate Degree Programs in Chemistry

Chemistry, MA (p. 640)
Chemistry, MS (p. 641)
Chemistry, PhD (p. 642)

concentrations:
Astrochemistry (p. 1060)
Computational Science & Engineering (p. 1073)
Chemical Physics, PhD (p. 638)
Teaching of Chemistry, MS (p. 1023)

joint programs:
Chemistry, MS & Law, JD (p. 1132)

A chemical physics program leading to the Doctor of Philosophy makes it possible for students to gain the necessary background and perform original research in this interdisciplinary field of science. Fundamental research on many properties of molecular and solid-state systems is based on an understanding of chemistry, physics, and mathematics that can best be obtained by training in more than one department. Students may use the facilities in both the School of Chemical Sciences and the Department of Physics.

Admission

Applicants who have fulfilled the usual undergraduate course requirements, including at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), may be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, applicants must submit results from the Graduate Record Examination general test and the Graduate Record Examination chemistry subject test.

Applicants whose native language is not English are required to have a minimum paper-based TOEFL score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the Chemistry graduate program and there are special requirements for applicants whose native language is not English. The University requires a minimum TOEFL iBT speaking score of 24 for a contact teaching assistant appointment. Any applicant whose native language is not English is expected to provide TOEFL scores in order to receive full consideration for admission and financial aid.

Please contact chemistry graduate admissions for further information.

Financial Aid

Students may apply for fellowships and assistantships from either the Department of Chemistry or the Department of Physics.

for the degree of Doctor of Philosophy in Chemical Physics

Students entering through the Department of Chemistry must satisfy the registration examination, literature seminar, preliminary examination, and original research proposal requirements of Physical Chemistry. The guidelines for these requirements are in the Department of Chemistry Graduate Manual. Students entering through the Department of Physics must satisfy the PhD requirements of the Department of Physics. Research for the thesis is performed under the direction of faculty members who are currently active in chemical physics. Many of these staff members are affiliated with the Materials Research Laboratory (MRL). MRL is a multidisciplinary facility shared by staff and students from the Departments of Physics, Chemistry, Materials Science and Engineering, Electrical and Computer Engineering, and other related departments that have common interests in materials science.

Admission
Graduate College requirements apply. Further, applicants should have at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), to be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, we ask applicants to submit results from the Graduate Record Examination (GRE) General Test and the GRE Chemistry Subject Test.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the chemistry graduate program, and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50. Any applicant whose native language is not English is expected to provide TSE scores in order to receive full consideration for admission and financial aid.

Students who are currently enrolled in graduate programs at other institutions are advised that they should first complete degree work at their current institution before they will be considered for admission to the chemistry PhD program at the University of Illinois. In addition, we require a statement from the applicant and a letter from the applicant's research adviser or department head detailing the situation. Students might be admitted without a degree from their current institution under exceptional circumstances that will need to be described in detail via a letter from the applicant and a separate statement from the department head of the student's current graduate program.

Contact chemistry graduate admissions for further information. The department does not currently accept applications for the MA program.

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Financial Aid
Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

Learning Outcomes: Chemistry, MA

NOTE: Some of the learning outcomes below were taken or adapted from the 2013 American Chemical Society Presidential Commission on Graduate Education in the Chemical Sciences. The Department of Chemistry uses these as its main guidelines.

1. To have a deep working knowledge of the principles, techniques, and concepts of contemporary chemistry.
2. To be able to effectively design and carry out independent research leading to new knowledge or a practical, applicable result.
3. To be able to communicate clearly and effectively within and across disciplinary lines.
4. To be able to educate students interested in chemical sciences.
5. To be aware of and prepare for various career opportunities with an advanced degree in chemistry.
6. To clearly understand the ethical conduct of research.
7. To understand and adopt the best safety practices in chemical research.

*for the Doctor of Philosophy in Chemistry*

Doctoral programs are offered in a wide range of specialties, including the traditional areas of analytical, inorganic, organic, and physical chemistry as well as materials chemistry and chemical biology. The formal course requirements involve 12 or more hours of 500-level courses, plus 8 or fewer hours of 400-level courses, for a total of 20 hours in chemistry and allied relevant fields. Besides completing formal coursework, students will present a literature seminar, have a formal review of progress following the completion of coursework, pass an oral preliminary examination on research preparation, present and defend an original research proposal not related to their thesis research, and submit a thesis on original research, which is defended at a final oral examination.

For additional details and requirements refer to the department’s Graduate Programs (https://chemistry.illinois.edu/academics/graduate-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

### Civil Engineering, MS

*for the degree of Master of Science in Civil Engineering (on campus & non-thesis online)*
Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

A prerequisite for graduate study in civil engineering is the equivalent of the BS in Civil Engineering (p. 89) from an accredited institution whose requirements for the bachelor’s degree are substantially equivalent to those of the University of Illinois and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) ([https://www.ets.org/portal/site/ets/etsmenuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD](https://www.ets.org/portal/site/ets/etsmenuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD)) is required.

All applicants whose native language is not English are required to submit TOEFL ([http://www.toefl.org/](http://www.toefl.org/)) or International English Language Testing System (IELTS) ([http://www.ielts.org/](http://www.ielts.org/)) scores as evidence of English proficiency. Minimum admission requirements ([https://grad.illinois.edu/admissions/instructions/04c/](https://grad.illinois.edu/admissions/instructions/04c/)) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Applicants to the joint programs with Architecture or Urban Planning must meet the admissions standards for both degree programs and be accepted by both programs. For more information on the joint degree program, please see Civil Engineering, MS & Architecture, MARCH (p. 1125) or Urban Planning, MUP & Related majors, MS (p. 1140).

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency ([http://www.grad.illinois.edu/admissions/taengprof.htm](http://www.grad.illinois.edu/admissions/taengprof.htm)) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test ([http://cte.illinois.edu/testing/oral_eng/epi_overview.html](http://cte.illinois.edu/testing/oral_eng/epi_overview.html)) offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching ([https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/](https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/)) conducted prior to the start of the semester.

Department Research

Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

- structural
- transportation
- sustainable engineering
- energy
- societal risk
- water
- hazard mitigation
- infrastructure
- environment
- sustainability

More information about these specialized areas may be found at the department’s research Web site ([https://cee.illinois.edu/areas/](https://cee.illinois.edu/areas/)).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department’s research centers Web site ([https://cee.illinois.edu/research/research-centers/](https://cee.illinois.edu/research/research-centers/)).

CEE at Illinois is one of the nation’s best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department’s research facilities Web site ([https://cee.illinois.edu/research/research-facilities/](https://cee.illinois.edu/research/research-facilities/)).

Other Graduate Programs in the Department of Civil & Environmental Engineering

degrees:

- Civil Engineering, PhD (p. 645)
- optional concentrations:
  - Computational Science and Engineering (p. 1073)
  - Environmental Engineering in Civil Engineering, MS (p. 739)
- optional concentrations:
  - Computational Science and Engineering (p. 1073)
  - Environmental Engineering in Civil Engineering, PhD (p. 741)
- optional concentrations:
  - Computational Science and Engineering (p. 1073)
- Railway Engineering (p. 732)
- available for:
  - Engineering, MENG (p. 728)
- joint programs:
Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Science in Civil Engineering (on campus & non-thesis online)

The degree requirements for the online programs are the same as for the on-campus non-thesis M.S. program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The M.S. degree in Civil Engineering offered online is currently available for specialization in Construction Management, Infrastructure, Structural Engineering, and Transportation Engineering. Students can also develop cross-disciplinary programs in consultation with their advisers. Additional courses are available online in the following areas of concentration to complement the student’s area of specialty above: Construction Materials, Environmental Engineering and Science, Environmental Hydrology and Hydraulic Engineering, and Geotechnical Engineering.

For additional details and requirements refer to the department’s Graduate Handbook (https://cee.illinois.edu/academics/graduate-programs/graduate-handbook/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement.

At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for residency credit for the degree.

Minimum program GPA 2.75

Learning Outcomes: Civil Engineering, MS

Learning Outcomes for the degree of Master of Science in Civil Engineering (on campus & non-thesis online)

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student’s professional and scientific ethical responsibilities;
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master’s and doctoral degrees. These are in a variety of specialized areas through departmental programs which are described on this page.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements
The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in civil engineering is granted to graduates of accredited institutions whose requirements for the master’s degree are substantially equivalent to those of the University of Illinois, provided the applicant’s preparation is appropriate for advanced study in his or her chosen major field and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f40710VgnVCM10000022f95190RCRD) is required. For additional information, see the department Web site (http://cee.illinois.edu/programs/Grad/GradApps)/.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid
Financial aid is available in the form of fellowships and research and teaching assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research
Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

• construction management engineering and science
• environmental geotechnical materials and management engineering
• hydrology and hydraulic engineering
• structural engineering and resilient infrastructure
• transportation and sustainable systems
• energy and hazard mitigation
• environmental systems
• water and sustainability
• societal risk and infrastructure

More information about these specialized areas may be found at the department’s research Web site (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department’s research centers Web site (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation’s best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department’s research facilities Web site (https://cee.illinois.edu/research/research-facilities/).

Other Graduate Programs in the Department of Civil & Environmental Engineering degrees:

Civil Engineering, MS (p. 643)
optional concentrations:
Computational Science and Engineering (p. 1073)
Environmental Engineering in Civil Engineering, MS (p. 739)
optional concentrations:
Computational Science and Engineering (p. 1073)
Environmental Engineering in Civil Engineering, PhD (p. 741)
optional concentrations:
Computational Science and Engineering (p. 1073)
concentrations:
Railway Engineering (p. 732)
available for:
Engineering, MENG (p. 728)
The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master’s degree. The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

For additional details and requirements refer to the department’s Graduate Handbook (http://cee.illinois.edu/online-graduate-handbook/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

phone: (217) 333-1008
email: classics@illinois.edu

The Doctor of Philosophy is offered only in classical philology, which requires advanced work in both Greek and Latin. Candidates for the Ph.D. program are eligible for acceptance upon completion of the master’s degree in classics or its equivalent. Once admitted, they must complete at least 64 additional graduate hours of coursework. Admission to Stage III requires passing examinations in the translation of Greek and Latin into English, the history of Greek and Latin literature, and a special author, as well as a preliminary oral examination (dissertation prospectus).

Graduate Degree Programs in Classics

Classics, MA (p. 649)
- concentrations: Greek (p. 650) | Latin (p. 652) | Medieval Studies (p. 1085)
Teaching of Latin, MA (p. 1026)
Classical Philology, PhD (p. 648)
- concentration: Medieval Studies (p. 1085)

Admission

Applicants for admission to the MA in Classics (Greek and Latin) must ordinarily present a minimum of 20 semester hours in one of the two languages (Greek or Latin) and 15 semester hours in the other language; candidates for admission to the MA with specialization in either Greek or Latin, or the MAT in Latin, must ordinarily present at least 20 semester hours in the relevant language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a personal statement of 2-3 pages, a resume or CV, transcripts showing all undergraduate and graduate work completed, and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant’s ability to work in the original classical languages and incorporates relevant scholarship as appropriate. Three letters of recommendation are also required.

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Certifications

Students wishing to add teacher certification in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the Foreign Language Teacher Education Program (http://www.flte.illinois.edu).

In order to receive certification, students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin, or an M.A. in the Teaching of Latin.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Faculty Research Interests

Greek and Latin literature of all periods; gender and sexuality; Latin poetry of the imperial period; Greek historiography and ethnography; Greek and Roman drama; reception of Classics, especially in film; animal studies; pedagogy. For further details see www.classics.illinois.edu/people/(http://www.classics.illinois.edu/people/)

Facilities and Resources

We have a renowned university library which boasts the second largest number of volumes among US university libraries after Harvard. Housed within the main library building is our first-rate Classics collection (see www.library.illinois.edu/clx/ (http://www.library.illinois.edu/clx/)) with over 60,000 volumes on open shelves. The University of Illinois Library’s Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic Archive of Papyri. The Department of the Classics also publishes the widely circulating peer-reviewed journal Illinois Classical Studies and its Supplements. The Krannert Art Museum and the Spurlock Museum of World Cultures have outstanding collections of ancient vases and other artifacts.

Financial Aid

University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

**Learning Outcomes: Classical Philology, PhD**

Learning Outcomes for the degree of Doctor of Philosophy in Classical Philology

1. Students demonstrate knowledge of Greek and/or Latin languages at an expert level. Students are able to carry out a detailed analysis of the language, style, and content of individual works of Greek and/or Latin literature.
2. Students demonstrate expert knowledge of the history of Greek and Latin literature (as well as of the relevant secondary work on those subjects) and the ways in which classical texts have been transmitted through the centuries down to our own time.
3. Students are able to conduct and effectively present the results of original scholarly research.
4. Students are familiar with the printed and electronic resources available for advanced study of classical languages and literatures.
5. Students are prepared to teach college-level courses in the languages and literature of ancient Greece and Rome in an effective manner.
6. Students know about opportunities for alternative employment/non-academic career paths and can articulate the value of a Classical education for these.

**Classics, MA**

*[for the degree of Master of Arts in Classics]*

The Department of the Classics offers programs of study leading to the Master of Arts in Classics. Within the master's degree program, students may choose from three options: both Greek and Latin (= Classics), Greek, or Latin. In addition, the department offers the Master of Arts in the Teaching of Latin and the Doctor of Philosophy in Classical Philology. A further concentration in Medieval Studies is available to students pursuing graduate degrees in the Classics.

Graduate students in Classics at Illinois may concentrate at different stages of their study on various aspects of the Greek and Latin languages, literatures, and cultures; classical archaeology; ancient philosophy; or, in conjunction with the appropriate department, comparative literature, ancient history, or linguistics. Additional information is available on our website www.classics.illinois.edu (http://www.classics.illinois.edu/).

### Graduate Degree Programs in Classics

- Classics, MA (p. 649)
  - Concentrations: Greek (p. 650) | Latin (p. 652) | Medieval Studies (p. 1085)

### Graduate Degree Programs in Classics

- Classics, MA (p. 649)
  - **Concentrations**: Greek (p. 650) | Latin (p. 652) | Medieval Studies (p. 1085)
  - Teaching of Latin, MA (p. 1026)
  - Classical Philology, PhD (p. 648)
  - **Concentration**: Medieval Studies (p. 1085)

---

**Admission**

Applicants for admission to the MA in Classics (Greek and Latin) must ordinarily present a minimum of 20 semester hours in one of the two languages (Greek or Latin) and 15 semester hours in the other language; candidates for admission to the MA with specialization in either Greek or Latin, or the MAT in Latin, must ordinarily present at least 20 semester hours in the relevant language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online ([www.grad.illinois.edu/admissions/apply](http://www.grad.illinois.edu/admissions/apply)) and submit a personal statement of 2-3 pages, a resume or CV, transcripts showing all undergraduate and graduate work completed, and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant’s ability to work in the original classical languages and incorporates relevant scholarship as appropriate. Three letters of recommendation are also required.

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 ([see www.grad.illinois.edu/Admissions/instructions/04c](http://www.grad.illinois.edu/Admissions/instructions/04c/)). Applications are accepted for fall admission only.

Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

**Certifications**

Students wishing to add teacher certification in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the Foreign Language Teacher Education Program ([http://www.flte.illinois.edu/](http://www.flte.illinois.edu/)).

In order to receive certification, students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin, or an M.A. in the Teaching of Latin.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability ([see www.grad.illinois.edu/admissions/taengprof.htm](http://www.grad.illinois.edu/admissions/taengprof.htm)).

**Faculty Research Interests**

Greeek and Latin literature of all periods; gender and sexuality; Latin poetry of the imperial period; Greek historiography and ethnography; Greek and Roman drama; reception of Classics, especially in film; animal studies; pedagogy. For further details see [www.classics.illinois.edu/people/](http://www.classics.illinois.edu/people/)

**Facilities and Resources**

We have a renowned university library which boasts the second largest number of volumes among US university libraries after Harvard. Housed within our main library building is our first-rate Classics collection ([see www.library.illinois.edu/clx/](http://www.library.illinois.edu/clx/)) with over 60,000 volumes on open shelves. The University of Illinois Library’s Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic...
Archive of Papyri. The Department of the Classics also publishes the widely circulating peer-reviewed journal *Illinois Classical Studies* and its Supplements. The Krannert Art Museum and the Spurlock Museum of World Cultures have outstanding collections of ancient vases and other artifacts.

**Financial Aid**
University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

**Learning Outcomes: Classics, MA**
Learning Outcomes for the degree of Master of Arts in Classics

1. Students demonstrate knowledge of Greek and/or Latin languages at an advanced level. Students are able to carry out a detailed analysis of the language, style, and content of individual works of Greek and/or Latin literature.
2. Students demonstrate an advanced knowledge of the history of Greek and Latin literature and the ways in which classical texts have been transmitted through the centuries down to our own time.
3. Students are familiar with the methods of research and criticism in Classics and can use these to generate new ideas.
4. Students are familiar with the printed and electronic resources available for advanced study of classical languages and literatures.
5. Students are able to teach Greek and/or Latin language and literature in an effective manner.

Information listed in this catalog is current as of 02/2021
To be accepted as a candidate for the Ph.D. degree, a student must either present a well-rounded undergraduate education with an emphasis in communication and a master's in a cognate discipline, or hold a master's degree in communication from an accredited institution.

Graduate Degree Programs in Communication

Communication, MA (p. 653)
- Concentration: Medieval Studies (p. 1085)
- Health Communication, MS (on campus & online) (p. 782)
- Concentration: Medieval Studies (p. 1085)
- Communication, PhD (p. 654)
  - Concentration: Medieval Studies (p. 1085)
  - Second Language Acquisition & Teacher Education (p. 1089)
  - Writing Studies (p. 1093)

The Department of Communication offers a broad curriculum in communication research. In consultation with an advisor, students assemble individualized programs, concentrating in organizational and group communication, interpersonal and family communication, health communication, communication technology, political communication, rhetoric and public discourse, communication in cultural contexts, or mass communication. Interdisciplinary programs are also encouraged.

Admission

An application must include official transcripts from every post-secondary institution the applicant has attended; scores on the general aptitude parts of the Graduate Record Examination (GRE); at least three letters of recommendation, preferably from academic recommenders; a major paper or essay as a sample of academic writing; and a statement of purpose. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's Web site (https://communication.illinois.edu/admissions/apply-graduate-program/). Ordinarily, students are admitted to begin graduate study in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

for the degree of Doctor of Philosophy in Communication

In addition to meeting general requirements of the Graduate College, the student must satisfactorily complete written and oral preliminary examinations, an oral defense of the thesis prospectus, and an oral defense of the thesis. Students must demonstrate competency in research procedures and tools that may include proficiency in one or more foreign languages, various research methods, or cognate academic work. Students must enroll in CMN 595 in the semester of the preliminary examination and in CMN 599 (thesis hours) in semesters spent working on the dissertation.

Communications & Media, PhD

Doctor of Philosophy in Communications and Media

Information listed in this catalog is current as of 02/2021
director of graduate studies: Mira Sotirovic
email: icr@illinois.edu
department website: https://media.illinois.edu/icr
(department faculty: https://media.illinois.edu/phd-program/faculty/)
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply/
college website: College of Media (https://media.illinois.edu/)
department office: 119 Gregory Hall, 810 S. Wright Street, Urbana, IL 61801
phone: (217) 333-1549
Since its inception, the Institute of Communications Research’s (ICR) doctoral program has encouraged interdisciplinary studies of communication and media. ICR faculty represent the three academic departments within the College of Media: Advertising (https://media.illinois.edu/advertising/), Journalism (https://media.illinois.edu/journalism/), Media & Cinema Studies (https://media.illinois.edu/media-cinema-studies/). ICR faculty are also active in a wide array of interdisciplinary campus initiatives which include but are not limited to: Illinois Informatics Institute, Beckman, Institute for Advanced Science and Technology, National Center for Supercomputing Applications (NCSA), Unit for Criticism and Interpretive Theory, Center for Advanced Study (CAS), Center for Latin American and Caribbean Studies, Illinois Program for Research in the Humanities (IPRH), and the Departments of Gender and Women’s Studies, Latina/Latino Studies, Communication, Psychology and Business Administration. These affiliate networks allow ICR students to develop and pursue unique programs of research that extend the boundaries of current scholarship.
Coursework: The ICR requires 64 credits of coursework and dissertation research for students entering with a Master’s degree. Students are responsible for designing their own programs of coursework, which are submitted for approval by the Institute’s Program Evaluation Committee. Although students are given the broadest latitude in designing interdisciplinary programs, they must include courses that fill certain requirements. Specifically, all new students will take a two course Proseminar sequence during their first year. Because students are admitted from diverse backgrounds, these courses introduce them to the history of and current trends in the field of media and communication research. This sequence also helps new students to locate their own research interests more precisely within the broad landscape of contemporary media and communication research.

Programs in the Institute of Communications Research
Graduate Programs:
degree: Communications and Media, PhD (p. 655)

Admission
Any student with a bachelor’s or master’s degree and with a substantial background in the humanities, social sciences, or physical sciences is eligible to apply to the doctoral program. It is suggested but not required that students have or will have a master’s degree before starting the program. All candidates for admission must submit an application for admission along with the application fee, official transcripts of all undergraduate and graduate courses taken and grades earned, three letters of recommendation, and Graduate Record Examination scores.

Our application process is administered through the ApplyYourself (http://www.grad.illinois.edu/admissions/apply/) system managed by the Graduate College at the University of Illinois. Applicants should consult the instructions on the Graduate College’s website and the guidelines to applicants available on the ICR web page.

Applicants from non-English-speaking countries are required to take the Test of English as a Foreign Language (TOEFL) before they come to the University. Depending on the results, they may be required to take further instruction in English after their arrival. Rules for “International Students & Applicants” can be found on the Graduate College website.

New students will begin the program during the fall term. All material for fall admission should be submitted by a date designated each year on the ICR website.

Financial Aid
Financial aid is available in the form of assistantships and fellowships. Students from populations underrepresented in communications research are eligible for certain University fellowships. Currently, all admitted ICR students receive financial support, including a tuition waiver and stipend. Insofar as possible, the Institute makes financial aid and admission decisions simultaneously.

See also Graduate College Financial Aid (http://www.grad.illinois.edu/funding-jobs/) and Fellowship Office (http://www.grad.illinois.edu/fellowships/).

Research Methods

Students must complete at least 8 hours in research methods. In order to provide a competent background for constructively understanding the field's wide-ranging literature, students are required to take one quantitative and one qualitative course.

In addition to methodology courses taught by the College of Media faculty, students are encouraged to consider relevant courses in quantitative or non-quantitative methods elsewhere on campus. Listings of such courses are available in the ICR office.

Preliminary Exams

Students, in consultation with their chosen advisors, select a committee of four faculty members for their preliminary exams. Upon completion of coursework, students undertake preparing written examinations. Upon completing written answers for each examiner, along with a dissertation proposal, students undergo a 2-hour oral examination. Upon passing the preliminary examination, students proceed with work on their dissertations.

Dissertation

Because the Doctor of Philosophy degree is primarily a research degree, candidates are required to demonstrate a capacity for independent research by producing an original dissertation on a topic within the general area of communications and media research.

Final Examination

After students distribute polished drafts of their dissertations, they take final oral examinations administered by their chosen committees. The student is required to support and interpret the dissertation to the committee's satisfaction, as well as to show an adequate grasp of the selected area of concentration that it represents.

Learning Outcomes: Communications and Media, PhD

Learning Outcomes for the Doctor of Philosophy in Communications and Media

1. Knowledge of both important historical themes and current trends in Media and Communication scholarship.
2. Expertise in at least one research methodology, and general familiarity with both quantitative and qualitative methods, since both methods have informed research traditions in Media & Communication Studies. Expertise in these two methods is one facet of our doctoral program's emphasis on interdisciplinary perspectives theory and research practices. Students in our program are encouraged to design a program of study across departments, within and beyond the College of Media.
3. Teaching proficiency, as demonstrated by serving as the Instructor of Record (IOR) for at least one course as a graduate student.
4. Understanding of the various professional nuances of academia, including the job-search process, promotion and tenure, institutional differences (e.g. Carnegie classifications), research/teaching/service expectations, etc.
5. Presence in a community of scholars through organizational membership, conference participation, etc.

Community Health, MS

for the Master of Science in Community Health

Department Head: Kim Graber
Director of Graduate Studies: John Kosciulek
Graduate Office: Julie Jenkins
Graduate Office Address: 906 South Goodwin Ave, 112 Freer Hall
MC-052, Urbana, IL 61801
Graduate Phone: (217) 333-1083
Graduate Email: jjenkns@illinois.edu

Program Website: https://ahs.illinois.edu/master-of-science-in-community-health
(https://ahs.illinois.edu/master-of-science-in-community-health/)

Admissions

Applications are due on January 15 for Fall admissions. Applications are due October 1 for Spring admissions.

Applicants should have a grade point average of at least 3.0 (A = 4.0) for the last 60 semester hours of their undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses). In addition, satisfactory scores on the Graduate Record Examination (GRE) are required. A statement of education and career goals, and three letters of recommendation are required.

International students must also submit Test of English as a Foreign Language (TOEFL) scores, with a minimum for full status admission: greater than 102 (IBT), greater than 253 (CBT), greater than 610 (PBT), or greater than 7.0 (IELTS). Scores cannot be more than 2 years old. (see https://grad.illinois.edu/admissions/instructions/04c)

### Learning Outcomes: Community Health, MS

Learning Outcomes for the Master of Science in Community Health

1. **Content Knowledge**: Students will demonstrate an advanced understanding of current and historically significant theories, models, themes, and ideas in the biomechanical, physiological, psychological, behavioral, pedagogical, biological, socioeconomic, epidemiological, environmental, and sociocultural correlates of Community Health.

2. **Critical Thinking and Discovery**: Students will demonstrate ethical practices while applying advanced quantitative and/or qualitative methods in collecting, analyzing, and interpreting data which will then be disseminated through publications and/or oral presentations.

3. **Awareness and Understanding**: Students will understand and appreciate the diverse environmental, biological, psychological, socioeconomic, sociocultural, philosophical, and historical factors that influence health, rehabilitation, and human movement.

4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to public health, health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases in culturally diverse populations.

5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

**Joint Degree Program:**  
Public Health, MPH & Community Health, PhD (p. 1136)

---

**Admissions**

Applications are due on **January 15** for Fall admissions. Applications are due on **October 1** for Spring admissions.

Admissions to the PhD degree program requires a minimum of a baccalaureate degree from an accredited institution of higher education with a minimum grade point average of 3.5 (A = 4.0) for the last two years of undergraduate study. Applicants who have a master’s degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit Graduate Record Examination (GRE) test scores, a statement of interest, and three letters of recommendation. International students must also submit Test of English as a Foreign Language (TOEFL) scores, with a minimum for full status admission: greater than 102 (IBT), greater than 253 (CBT), greater than 610 (PBT), or greater than 7.0 (IELTS). Scores cannot be more than 2 years old. (see https://grad.illinois.edu/admissions/instructions/04c (https://grad.illinois.edu/admissions/instructions/04c/)).

The Program in Comparative & World Literature offers graduate courses leading to the Doctor of Philosophy degree, and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts. Students are not normally admitted to a terminal master’s degree program.

Admission

A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee. Students entering with a recognized Masters degree from another university or from another department of this University have the option of taking the comparative literature and critical theory component and a literary component of this program’s regular Master of Arts examination at the end of the first year.
as a qualifying test. For all other student, the Master of Arts examination will function as the qualifying test to proceed to stage two of the PhD program.

Applicants should apply online (www.grad.illinois.edu/admissions/apply/ (http://www.grad.illinois.edu/admissions/apply/)), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLC Graduate Student Services, 3070 Foreign Languages Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c/)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at siclgradservices@illinois.edu

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

**Financial Aid**

The Program aims to support all graduate students for five years through a combination of fellowships, teaching, and other means, but support is always contingent on the student making timely progress to the degree. Such progress is measured by course load, taking exams on time, grades, and other factors.

**for the degree of Master of Arts in Comparative Literature**

The candidate must complete a minimum of 32 gh of credit, including two courses in the theory of literature (CWL 501 and CWL 502), and two seminars in comparative literature selected from CWL 551, CWL 561, CWL 571, and CWL 581. At least 12 of the other 16 gh should be taken in two or three national literatures in a distribution approved by the adviser. The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

**Learning Outcomes: Comparative Literature, MA**

Learning Outcomes for the degree of Master of Arts in Comparative Literature

1. **Linguistic Mastery**: Mastery of at least three foreign languages (one of which can be English) and a research language.
2. **Comparative and Cross-Cultural Analysis**: Ability to analyze problems and questions that cut across national, linguistic, and cultural lines.
3. **Literary / Critical Theory**: Demonstration of mastery of major fields of theoretical inquiry current in the discipline, such as Marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism.
4. **Teaching experience**: Ability to teach a wide range of literary topics; put together syllabi, tests, written assignments, and lectures. Familiarity with current trends in pedagogy for language, literature, and culture. Depending on the area of specialization, teaching in the target language or in the Rhetoric program.
5. **Professionalization**: Completion of CWL 582 (Proseminar), including learning to give talks, making a syllabus, converting seminar papers into conference presentations and journal articles, learning to write book reviews, learning to write cover letters, fellowship applications, and grant applications. Preparation for the academic job market in literary studies and other allied fields. Preparation for relevant non-academic jobs, including editing and publishing, museum work, journalism, artistic and creative careers.

**Comparative Literature, PhD**

for the degree of Doctor of Philosophy in Comparative Literature

Information listed in this catalog is current as of 02/2021

phone: (217) 333-4987
email: complit@illinois.edu

A candidate for the Doctor of Philosophy degree must fulfill the general requirements of the Graduate College in addition to those specified for the master’s degree. At least 12 additional gh of work, normally at the 500 level, should be taken in courses regularly offered by the literature departments; among these, courses cross listed with the program in comparative literature are especially recommended. The candidate is responsible for a knowledge of the history of the literature in one modern language. The student also selects a period of major interest and is responsible for a knowledge of two other literatures in this period, which are considered as minors. The periods may be the Middle Ages, Renaissance, Neoclassicism and the Enlightenment, or the modern (nineteenth and twentieth centuries). Some chronological variations in coordinating the minors will be allowed for students studying non-Western literatures. A preliminary examination, i.e. a four-part written examination based on the individual program, and an oral examination with emphasis on the thesis project must be passed. The candidate must present an acceptable thesis embracing several national literatures and pass a final oral examination on the thesis.

Graduate Degree Programs in Comparative Literature
Comparative Literature, MA (p. 659)
concentration:
Medieval Studies (p. 1085)
Comparative Literature, PhD (p. 660)
concentration:
Medieval Studies (p. 1085)
The Program in Comparative & World Literature offers graduate programs leading to the degrees of Master of Arts and Doctor of Philosophy and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Admission
A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee. Students entering with a recognized Masters degree from another university or from another department of this University have the option of taking the comparative literature and critical theory component and a literary component of this program’s regular Master of Arts examination at the end of the first year as a qualifying test. All other students typically take the Master of Arts examination at the end of their second year as the qualifying exam to proceed to stage two of the PhD.

Applicants should apply online (www.grad.illinois.edu/admissions/apply/ (http://www.grad.illinois.edu/admissions/apply/)), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services, 3070 Foreign Languages Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT), they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c/)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Financial Aid
The Program aims to support all graduate students for five years through a combination of fellowships, teaching, and other means, but support is always contingent on the student making timely progress to the degree. Such progress is measured by course load, taking exams on time, grades, and other factors.

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MCS in Computer Science is a professionally-oriented, coursework-based degree program offered as an on-campus program or online. The online option allows individuals to earn the MCS from a leader in information technology entirely online with no required campus visits. Online students have the option to complete the comprehensive MCS track or the MCS program with a data science track. All online classes are taught by our world-recognized faculty. Online students also receive additional instructional support from Computer Science Graduate Teaching Assistants and program staff. The on-campus MCS program is designed to allow students to complete the degree in as little as one year with a maximum of three continuous semesters. Online students have 5 years in which to complete the program.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Applicants must hold a bachelor’s degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor’s in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are not required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the MCS program must have a minimum grade point average (GPA) of 3.20 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department’s Prospective Graduate Student Information Web site (http://cs.illinois.edu/admissions/graduate/).
All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid
Research assistantships and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. Students who are unable to take the iBT or IELTS are required to receive a minimum score of 5 on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

The Department of Computer Science does not offer research or teaching assistantships to students enrolled in our online programs, including the Online MCS.

Learning Outcomes: Computer Science, MCS

Learning Outcomes for the degree of Master of Computer Science in Computer Science (on campus or online)

1. Plan and conduct original research that addresses questions of significance in a particular subject area in Computer Science.
2. Analyze and be able to articulate the scientific advances and limitations of results described in the research literature.
3. Demonstrate the ability to effectively communicate research proposals and results.
4. Demonstrate in-depth knowledge of a particular subject area and broad knowledge of other areas in Computer Science.
5. Demonstrate an understanding of and ability to follow ethical standards in research, teaching, and professional service.
6. Demonstrate the ability to teach concepts in Computer Science at the university level. Additionally, for the MS Bioinformatics program:
7. Demonstrate broad knowledge of topics in bioinformatics.
8. Demonstrate knowledge of at least one subject in biological sciences.

For additional details and requirements refer to the department's Graduate Degree Requirements (http://cs.illinois.edu/academics/graduate/professional-mcs-program/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MS in Computer Science is a research-oriented degree that can be counted toward the PhD in Computer Science.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor's degree in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science MS program must have a minimum grade point average (GPA) of 3.20 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department's Prospective Graduate Student Information Web site (http://cs.illinois.edu/admissions/graduate/). To apply, click here (http://www.grad.uiuc.edu/admissions/apply/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS (academic exam). Students who are unable to take the iBT or IELTS are required to receive a minimum score of 5 on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 11 research areas (http://cs.illinois.edu/research/), 80 faculty members (http://cs.illinois.edu/people/faculty/) conduct research with over 450 graduate students, and about 30 research staff members. They regularly collaborate with researchers across campus, in other departments or research units.

The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (http://cs.illinois.edu/about-us/), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to The Grainger College of Engineering (https://grainger.illinois.edu/), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

Other Graduate Programs in the Department of Computer Science

**Other Requirements**

Other Requirements and Conditions may overlap

- A minimum of 16 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.
- A minimum of 12 500-level credit hours overall.
- A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.
- A grade of B- or higher is required for Breadth Requirement course work.
- At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign may be transferred and applied to the M.S. degree requirements.
- It is each student's responsibility to secure a M.S. thesis advisor and start thesis research no later than the beginning of the third semester in the program.

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.
Admission Requirements

Applicants must hold a bachelor’s degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor’s or a master’s degree (only if applying to the PhD program) in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science PhD program must have a minimum grade point average (GPA) of 3.40 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admisssibility, application procedures, and deadlines can be found at the department’s Prospective Graduate Student Information Web site (http://cs.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. Students who are unable to take the iBT or IELTS are required to receive a minimum score of 5 on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 11 research areas (http://cs.illinois.edu/research/), 80 faculty members (http://cs.illinois.edu/people/faculty/) conduct research with over 450 graduate students, and about 30 research staff members. They regularly collaborate with researchers across campus, in other departments or research units. The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (http://cs.illinois.edu/about-us/), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to The Grainger College of Engineering (https://grainger.illinois.edu/), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

</table>
Minimum hours of CS course work: 12
CS 597 and CS 591 may not be applied to the 500-level course work requirement.

CS 591 section PHD must be taken in the first semester. A maximum of 4 credit hours of CS 591 can be applied toward the Ph.D. degree.

A teaching assistantship for an entire term, with a satisfactory performance evaluation by the department, is required by the end of the 5th year.

Ph.D. exam and dissertation requirements:
International Students must show demonstration of English proficiency (equivalent to that necessary to be a TA—see Financial Aid) before taking the Qualifying Exam.

Qualifying exam¹
Preliminary exam²
Final exam or dissertation defense³
Dissertation deposit⁴
Minimum GPA: 3.0

Learning Outcomes: Computer Science, PhD
Learning Outcomes for the degree of Doctor of Philosophy in Computer Science

1. Plan and conduct original research that addresses questions of significance in a particular subject area in Computer Science.
2. Analyze and be able to articulate the scientific advances and limitations of results described in the research literature.
3. Demonstrate the ability to effectively communicate research proposals and results.
4. Demonstrate in-depth knowledge of a particular subject area and broad knowledge of other areas in Computer Science.
5. Demonstrate an understanding of and ability to follow ethical standards in research, teaching, and professional service.
6. Demonstrate the ability to teach concepts in Computer Science at the university level. Additionally, for the MS Bioinformatics program:
7. Demonstrate broad knowledge of topics in bioinformatics.
8. Demonstrate knowledge of at least one subject in biological sciences.

Creative Writing, MFA

for the degree of Master of Fine Arts in Creative Writing
head of department: Bob Markley
director of graduate studies: Justine Murison
director of creative writing: Ted Sanders
associate director of creative writing: John Dudek
overview of graduate college admissions & requirements: Graduate

phone: (217) 333-3646
e-mail: shockey@illinois.edu

The Department of English offers a program of study in Creative Writing leading to the Master of Fine Arts degree. We welcome qualified students who wish to pursue their interests in fiction or poetry writing.

Graduate Degree Programs in Creative Writing
Creative Writing, MFA (p. 667)

Admission
A candidate for the MFA must spend at least four semesters or the equivalent in residence and complete at least 48 graduate hours. A full-time student typically completes this program in three academic years. Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College.

All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996).

The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, strong recommendations, and above all a compelling writing sample: in short, a demonstration of an academic record that shows promise of a student capable of doing outstanding work in the field and earning a degree within a reasonable time. Preference is given to applicants who will be full-time students and active degree candidates. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is December 1st.

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and all MFA candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid
Financial aid is available to students in the form of fellowships, teaching assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at https://english.illinois.edu/admissions/our-mfa-creative-

writing (https://english.illinois.edu/admissions/our-mfa-creative-
writing/).

Learning Outcomes: Creative Writing, MFA
Learning outcomes for the degree of Master of Fine Arts in Creative Writing

1. Writing: Students will focus on creating works of high literary quality, honing their own distinctive personal writing styles. They will demonstrate the ability to revise drafts of their work in response to useful critical commentary. Upon completion of the program, students will understand how to create and polish individual shorter works; they will also understand how to compile and complete a book-length manuscript in the genre of their choice.

2. Craft discussion: Students will demonstrate an advanced ability to read, analyze, and discuss published works of literature—especially contemporary literature—from a craft perspective, identifying authorial choices and evaluating the effect of those choices on the work.

3. Literary Community and Profession: Students will demonstrate an understanding of the professional creative writing field with regards to literary journals, presses, and other iterations of the literary community, and will have participated in one or more professional activities, including editorial work on Ninth Letter, giving a public reading, attending a writers’ conference, etc.

4. Teaching: Students will learn best practices for leading creative writing workshops and mentoring beginning writers.
Crop Sciences, MS

Graduate Degree Programs in Crop Sciences
Crop Sciences, MS (p. 669) (on campus & online)
Bioinformatics: Crop Sciences, MS (p. 614)
Plant Biotechnology, MS - Professional Science Master's (p. 949)
Crop Sciences, PhD (p. 670)

Admission
Applicants are considered for admission to the Master of Science program if they have a bachelor’s or equivalent degree comparable to that granted by the University of Illinois. Admission to the Ph.D. program will be considered for applicants with the M.S., those nearing completion of the M.S., and in some cases, those with the B.S. Because of the diversity of programs in the Department of Crop Sciences, the preparation that is needed varies considerably. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant’s credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found at: https://grad.illinois.edu/admissions/apply/grad.illinois.edu/admissions/apply?

Graduate Teaching Experience
Experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests
Please refer to the following webpage for a detailed listing of our faculty and their areas of interest https://cropsciences.illinois.edu/people/graduate/faculty/.

Financial Aid
Fellowships and assistantships are available to outstanding on campus MS students on a competitive basis. Awards for financial assistance are based principally on a candidate’s academic record, statement of plans, and letters of reference.

for the Master of Science in Crop Sciences (on campus & online)

Candidates must complete 32 hours of graduate study as approved by their graduate guidance committee with at least a B average. An oral final examination is required of all M.S. candidates, and written examinations may be required at the option of the examining committee.

The Online M.S. in Crop Sciences program enables students to strengthen their education typically through part-time study, as most students are working professionals. Courses are delivered mainly through online and other distance education technologies and occasional site-based programming (site-based courses are optional and not required to complete the degree). The Crop Sciences Online M.S. degree program is completed as a non-thesis degree. The program has a 30-plus year history of providing high quality University of Illinois courses and began granting off-campus MS degrees in 1986 to agriculture professionals across Illinois, as well as in neighboring states. Students may enroll in individual courses for personal or professional advancement or may apply for admission to the master’s degree program in Crop Sciences. Students who successfully complete three qualifying courses may also receive a Professional Development Certificate in Crop Sciences.

The Online M.S. in Crop Sciences program also works in conjunction with the Natural Resources and Environmental Studies Online M.S. program and the Agriculture Education Online M.S. program to offer a diverse set of courses. The Department of Crop Sciences is looking to the future and the needs of non-traditional students. Therefore, new courses are continually in development for online delivery and blended formats. A student may complete their entire degree requirements online from anywhere in the world and they are available to in-state students and out-of-state students at the same tuition rates. For more information on Crop Sciences, the Online M.S. in Crop Sciences degree program or certificate offerings, please visit https://cropsciences.illinois.edu/online/.

For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Crop Sciences, MS

Learning Outcomes for the Master of Science in Crop Sciences (on campus & online)

**Thesis**

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

**Non-Thesis**

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of one or more disciplinary areas (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will acquire professional scientific writing and communication skills.
3. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
4. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

**Online**

1. Students will be able to evaluate crop research methods critically and significantly contribute in the research community.
2. Students will be able to apply principles of crop sciences to determine agronomic problems and formulate and implement practical management.
3. Students will be able to describe and critically review concepts and practices associated with agriculture and the environment.
4. Students will be able to critically assess scientific papers. Students will be able to synthesize concepts to solve complex scientific problems.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.
Faculty Research Interests
Please refer to the following webpage for a detailed listing of our faculty and their areas of interest https://cropsciences.illinois.edu/people/faculty/.

Financial Aid
Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate’s academic record, statement of plans, and letters of reference.

for the degree of Doctor of Philosophy in Crop Sciences

Students are required to pass a preliminary examination within five semesters of first enrolling, not including the summer terms, and after substantial completion of the Ph.D. graded coursework requirement. The preliminary examination is comprised of both an oral and written component and students are expected to defend their Thesis Proposal at the oral component of the examination. Those students on the BA to PhD plan must also pass a Qualifying Exam. An acceptable dissertation is required. Residence requirements are the same as those of the Graduate College.

For additional details and requirements refer to the department’s graduate handbook (http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

  - (p. 1077)

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master’s degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master’s students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master’s candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally...
combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

Admission
Interested applicants should start at http://education.illinois.edu/programs/grad (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Graduate Record Examination (GRE) scores must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master’s thesis, article, or paper, is required for application to a doctoral program. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction’s TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed

Financial Aid
Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

for the Certificate of Advanced Study in Curriculum and Instruction
A list of additional requirements can be found on the program’s website, (https://education.illinois.edu/faceted-search/programs/?degree=cas&department=ci) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education. (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/)

Learning Outcomes: Curriculum & Instruction, EdM

Learning Outcomes for the degree of Master of Education in Curriculum & Instruction

1. Students will acquire deep knowledge of content in the field of Education.
2. Students will display understanding of psychological foundations of learning.
3. Students will demonstrate a deep understanding of philosophical foundations of education.
4. Students will display a deep understanding of best pedagogical practices in K-12 classrooms with attention to 21st century skills and practices.
5. Students will display knowledge of conducting a study including reviewing literature, collecting and analyzing data and writing a thesis.
Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master’s degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master’s students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master’s candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

**Admission**

Interested applicants should start at http://education.illinois.edu/programs/grad (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Graduate Record Examination (GRE) scores must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master’s thesis, article, or paper, is required for application to a doctoral program. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores.   Digital Learning (p. 1077)
Elementary Education, EdM (p. 725) with teacher licensure
  optional concentrations: Bilingual-Bicultural Education (p. 1060)
  Digital Learning (p. 1077)
Secondary Education, EdM (p. 977) with teacher licensure
  concentrations: English (p. 979)
  Mathematics (p. 980)
  Sciences (p. 980)
  Social Science: History (p. 982)
  optional concentrations: Bilingual-Bicultural Education (p. 1060)
  Digital Learning (p. 1077)

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competient and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master’s degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master’s students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master’s candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full-time study.

Admission

Interested applicants should start at http://education.illinois.edu/programs/grad (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Graduate Record Examination (GRE) scores must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master’s thesis, article, or paper, is required for application to a doctoral program. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction’s TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook www.grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children’s Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: International Journal of Education & the Arts, Journal of Curriculum Studies, and American Educational Research Journal. The department also has available resources and some workshops provided during the academic year. Program areas including DELTA, CREATE, Language & Literacy, and MSE offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with...
planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students (http://www.grad.illinois.edu/current-students/).

**Financial Aid**

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

1 All students will take a minimum of 16-20 credit hours, depending on area of methodology focus, in approved research methods courses (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/phd/#PhDResearch).

Learning Outcomes: Curriculum & Instruction, PhD
Learning Outcomes for the degree of Doctor of Philosophy in Curriculum & Instruction

1. Students will develop a deep knowledge of a content area connected to curriculum and instruction
2. Students will demonstrate the ability to plan, implement, analyze data, and author academic papers.
3. Students will read, interpret, and critique scholarship in their academic field and across multiple fields.
4. Students will understand issues related to school and society including existing inequities.
5. Students will connect research with instructional practices that support learning.

Dance, MFA
for the degree of Master of Fine Arts in Dance
The Department of Dance offers a graduate program leading to the degree of Master of Fine Arts in Dance (MFA). The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The Department of Dance offers a graduate program leading to the degree of Master of Fine Arts in Dance (MFA). The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The MFA Curriculum is designed to promote a candidate’s progress through our stated objectives: Choreography, Communication, Moving, Teaching, and Career Planning. Included in these are courses in dance studies, somatics, pedagogy, and two semesters devoted to an innovative lab team taught by our faculty and designed in collaboration with students. The final year of study is devoted to synthesizing the above objectives evidenced by the production of the candidate’s choreography, their written thesis document, oral presentation, and plans for propelling students’ career into the professional sphere.

Graduate Degree Programs in Dance
Dance, MFA (p. 684)
Graduate Minor in Dance (p. 1105)

The Department of Dance offers a graduate program leading to the Master of Fine Arts degree. The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The Dance Department expects MFA candidates to conduct a creative inquiry that leads to the development of a sophisticated sense of self-definition. Individual research and analysis should culminate in the development of a personal artistic process and mission and should be evident in the following contexts:

- **Choreographing**: Candidates will develop a distinctive choreographic research methodology and demonstrate its skillful application in a performative context. This ideology must establish a solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.

- **Communicating**: Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and convincing and demonstrates clear analytic skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.

- **Moving**: Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.

- **Teaching**: Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/learning environment.

- **Career Planning**: Candidates are assessed on their ability to develop innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.

### Admission Requirements
Prerequisites for admission to the MFA program are:

1. An undergraduate degree and significant experience in dance is required.
2. Demonstrated choreographic achievement and potential to make innovative contributions to the field.
3. Demonstrated potential to engage in critical thinking and writing.
4. A minimum grade point average of 3.0 on a 4 point scale, computed from the last 60 hours of undergraduate work and any graduate work completed.

International students must be eligible for full status admission. International students who receive a TOEFL score greater than 103 on the internet-based test, 257 on the computer-based test, or 613 on the paper test are eligible for full status admission. Students with these scores are exempt from the English as a Second Language Placement Test. The GRE is not required.

### Faculty Research Interests
An extraordinary faculty of artists, researchers and scholars has gathered at Illinois, who are creating new paradigms for interactions between the professional arena and the academic training ground. Our group of professional artists includes Jan Erkert, Sara Hook, Philip Johnston, Linda Lehovec, Jennifer Monson, Kemal Nance, Rebecca Nettl-Fiol, Tere O’Connor, Cynthia Oliver, Kirstie Simson, Endalyn Taylor, John Toenjes, and Abby Zbikowski, all of whom share a commitment to teaching and preparing students for leadership roles in the field of dance.

### Financial Aid
Two forms of financial aid are offered to graduate students by the Department of Dance:

- Teaching and administration assistantships are available to graduate students. Assistantships of 25% or greater qualify the student for a tuition waiver. All students are required to apply for Federal Work Study.
- A variety of Fellowships are available through The Graduate College each year, including: (A full listing of Fellowships can be found at: www.grad.illinois.edu/fellowships (http://www.grad.illinois.edu/fellowships/))
  - The Creative and Performing Arts Fellowship, which may include stipends up to a maximum of $6,000 for a student demonstrating outstanding choreographic and performance talent.
  - The Graduate College Fellowship for Underrepresented Students provides fellowships in the amount of $8,000 and are available to outstanding minority students.

Prospective MFA candidates are encouraged to apply for financial assistance through the Office of Student Financial Aid, 420 Student Services Bldg., University of Illinois at Urbana-Champaign, Champaign, IL 61820. (217) 333-0100.

Learning Outcomes: Dance, MFA

Learning Outcomes for the degree of Master of Fine Arts in Dance

The Department of Dance expects MFA candidates to conduct in-depth creative inquiries that culminate in the development of a personal artistic process and mission that are evident in the following contexts:

1. **Choreographing**: Candidates will develop a distinctive choreographic research methodology and demonstrate skillful application in a performative context. This ideology must establish solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.

2. **Communicating**: Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and convincing and demonstrates analytical skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.

3. **Moving**: Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.

4. **Teaching**: Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/learning environment.

5. **Career Planning**: Candidates are assessed on their ability to develop innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.

---

  Mathematics (p. 980)
  Sciences (p. 980)
  Social Science: History (p. 982)
- optional concentrations: Bilingual-Bicultural Education (p. 1060)
  Digital Learning (p. 1077)

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master’s degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master’s students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master’s candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

Admission

Interested applicants should start at http://education.illinois.edu/programs/grad (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Graduate Record Examination (GRE) scores must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master’s thesis, article, or paper, is required for application to a doctoral program. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction’s TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook www.grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children’s Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: International Journal of Education & the Arts, Journal of Curriculum Studies, and American Educational Research Journal. The department also has available resources and some workshops provided during the academic year. Program areas including DELTA, CREATE, Language & Literacy, and MSE offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with
planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students/.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the College (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

for the degree of Master of Education in Early Childhood Education with teaching licensure

Additional requirements can be found on the program’s website, (https://education.illinois.edu/ci/programs-degrees/ec/) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

Learning Outcomes: Early Childhood Education, EdM

Learning Outcomes for the degree of Master of Education in Early Childhood Education with teaching licensure

1. Students will acquire deep knowledge of child development as it relates to the field of Education.
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction children from infancy to age eight.
3. Students will use assessment data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices)

East Asian Languages & Cultures, MA

for the degree of Master of Arts in East Asian Languages & Cultures

Information listed in this catalog is current as of 02/2021
Chair of Department:
Director of Graduate Studies:
Overview of Admissions & Requirements: Graduate Degree Information East Asian Languages & Cultures (https://ealc.illinois.edu/academics/degree-programs/graduate/graduate-admissions/)
College Website: LAS (https://www.las.illinois.edu/)

Graduate Degree Programs in East Asian Languages & Cultures
East Asian Languages & Cultures, MA (p. 688)
East Asian Languages and Cultures, PhD (p. 690)
Optional Concentrations:
Medieval Studies (p. 1085)Second Language Acquisition & Teacher Education (p. 1089)

Admission
Applicants are expected to have a strong background in at least one East Asian language; normally, this means a minimum of two years of formal study. Applicants to the graduate program must submit an application for admission online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of reference completed by teachers, advisers, or recent employers, and a 10-20 page writing sample. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:
SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 103 on the internet-based test (iBT) for admission with full standing; they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Students with a B.A. or B.S. only should apply to the M.A. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu. (slclgradservices@illinois.edu)

Medical Scholars Program
The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including East Asian Languages and Cultures. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at https://www.med.illinois.edu/mdphd/.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.

www.grad.uiuc.edu/admissions/taengprof.htm (http://www.grad.uiuc.edu/admissions/taengprof.htm)

Financial Aid
The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. In recent years, almost all EALC graduate students have received some form of financial support. Financial aid for graduate students in the Department of East Asian Languages and Cultures may include:

• University Fellowships
• Foreign Language and Area Studies (FLAS) Fellowships
• University Dissertation Completion Fellowships
• Minority Academic Partnership Plan (MAPP) Fellowships
• teaching assistantships
• research assistantships

All awards of financial aid are made following competitive application.

Learning Outcomes: East Asian Languages & Cultures, MA

Learning Outcomes for the degree of Master of Arts in East Asian Languages & Cultures

1. **Learning goal in East Asian languages**: Language proficiency in two East Asian languages.
2. **Learning goal in East Asian disciplines**: Familiarity with a major field and at least one minor field outside of the student’s focused area to broaden students’ perspectives and ability to conduct interdisciplinary research and to teach general courses.
3. **Learning goal in East Asian periods**: Understanding of both modern and pre-modern periods of East Asian societies.
4. **Learning goal in teaching preparedness**: Proficiency in teaching methodologies to teach languages or to teach Gen-Ed courses.

5. **Learning goal in research**: Completion of MA thesis or qualifying exams in three fields for MA students. Three qualifying exams, oral exam, and the completion of the dissertation and defense for Ph.D. students.

East Asian Languages and Cultures, PhD

East Asian Languages and Cultures, PhD (p. 690)

optional concentrations:

Medieval Studies (p. 1085)Second Language Acquisition & Teacher Education (p. 1089)

Admission

Applicants to the PhD program normally must hold a master’s degree in East Asian studies or a related discipline with an East Asian concentration.

Candidates for the PhD may specialize in culture (e.g., religion, literature, history, anthropology), language acquisition, or language pedagogy, with a major concentration in China, Japan, or Korea.

Other general requirements include: an annual review of progress, including an evaluation of research capability; a written and oral preliminary examination in the major and two minor fields (after completion of coursework); presentation of a dissertation proposal (often as part of the preliminary exam); and completion and defense of the dissertation.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.
Financial Aid

The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. **Graduate Degree Programs in Ecology, Evolution & Conservation Biology**

Ecology, Evolution & Conservation Biology, MS (p. 692)  
Ecology, Evolution & Conservation Biology, PhD (p. 693)

The Program in Ecology, Evolution and Conservation Biology (PEEC) is an interdepartmental program designed to provide individualized training in preparation for careers in these disciplines. Because of the breadth of fields covered by this program, there will be no fixed course requirements other than attendance at the program’s seminar series and annual graduate student symposium. Courses taken by a student and the student’s Advisory Committee generally will come from multiple departments. The goal of the program’s regulations is to allow maximum flexibility while providing close supervision, with the outcome of producing scientists who are broadly educated and technically competent in ecology, evolutionary biology and associated disciplines. The program offers M.S. and Ph.D. degrees.

**Admission**

Prospective candidates must meet the requirements for admission set by the Graduate College of the University of Illinois at Urbana-Champaign. Only applicants who have graduated from an accredited college or university and who hold or will be granted a baccalaureate degree (or its equivalent) comparable in content and completed credit hours to that granted by the University of Illinois will be considered. Applicants must have a minimum grade-point average of 3.0 (A = 4.0) computed from the last two years of undergraduate (and any graduate) work completed. The program will give preference to candidates who hold a degree in biology or a closely related discipline and show promise of excellence in research and teaching. Typically, only students with strong letters of recommendation and a GPA well above the minimum stated above will be admitted. Demonstration of academic excellence by other means (e.g., extensive field or laboratory research experience) will also be considered. The Admissions Committee will make decisions concerning admission. For students whose native language is not English, the Program requires a minimum paper-based TOEFL score of 613 (257 on the computer-based test or 103-104 on the web-based test).

**Financial Aid**

Students admitted to the Program are typically offered two years of support for the M.S. degree and five years of support for the Ph.D. Support consists of fellowships, teaching assistantships or research assistantships. Such support typically comes with a waiver of tuition, service fees, or both. Continued offers of assistantships or fellowships each academic year will depend on an evaluation of satisfactory progress by the Director of the Program. Students who require more than two years to complete the M.S. degree or five years to complete the Ph.D. degree must submit a written petition to the Director of the Program, supported by their Advisor, to be considered for an additional year of support.

**Graduate Degree Programs in Ecology, Evolution & Conservation Biology**

All students must register for and attend the weekly PEEC seminar series (IB 546A) each semester in residence. An orientation seminar (IB 546B) must be taken the first fall semester in residence. Excuses because of conflicts must be approved by the Director of the Program. Graduation requires the completion of a thesis. Student research will be guided and approved by an Advisory Committee of three faculty from at least two departments, including the Major Advisor who will serve as chair. The director of the program must approve membership of the Masters Advisory Committee.

**Requirements**

Learning Outcomes: Ecology, Evolution & Conservation Biology, MS

Learning outcomes for the degree of Master of Science in Ecology, Evolution & Conservation Biology

Since the subject matter of our Program is interdisciplinary and broad, there is no one set of subject-based learning outcomes that is suitable for the evaluation of our graduate students. Instead, we will focus on appropriate research and professional development skills.

1. Design and implement independent research and integrate and apply core knowledge related to their field in 3 core areas out of 6 (behavior, conservation biology, ecology, evolution, genetics/genomics, physiology/anatomy).

2. Demonstrate effective oral and written communication skills
   a. Presentations
   b. Publications
   c. Grant writing

3. Apply rigorous statistics/analytical methods that typify their area of study

4. Professional skills
   a. Data management
   b. Citation management
   c. Mentoring
   d. Ethics
   e. Professionalism
   f. Networking

5. Teaching experience
   a. Lead Discussions/Lab Activities Effectively
   b. Effective in the presentation of information/lecture
   c. Consistent Grader with meaningful feedback to students
   d. Genuine concern for the learning outcomes of all students

Graduate Degree Programs in Ecology, Evolution & Conservation Biology

Ecology, Evolution & Conservation Biology, MS (p. 692)
Ecology, Evolution & Conservation Biology, PhD (p. 693)
The Program in Ecology, Evolution and Conservation Biology (PEEC) is an interdepartmental program designed to provide individualized training in preparation for careers in these disciplines. Because of the breadth of fields covered by this program, there will be no fixed course requirements other than attendance at the program’s seminar series and annual graduate student symposium. Courses taken by a student and the student’s Advisory Committee generally will come from multiple departments. The goal of the program’s regulations is to allow maximum flexibility while providing close supervision, with the outcome of producing scientists who are broadly educated and technically competent in ecology, evolutionary biology and associated disciplines. The program offers M.S. and Ph.D. degrees.

Admission

Prospective candidates must meet the requirements for admission set by the Graduate College of the University of Illinois at Urbana-Champaign. Only applicants who have graduated from an accredited college or university and who hold or will be granted a baccalaureate degree (or its equivalent) comparable in content and completed credit hours to that granted by the University of Illinois will be considered. Applicants must have a minimum grade-point average of 3.0 (A = 4.0) computed from the last two years of undergraduate (and any graduate) work completed. The program will give preference to candidates who hold a degree in biology or a closely related discipline and show promise of excellence in research and teaching. Typically, only students with strong letters of recommendation and a GPA well above the minimum stated above will be admitted. Demonstration of academic excellence by other means (e.g., extensive field or laboratory research experience) will also be considered. The Admissions Committee will make decisions concerning admission. For students whose native language is not English, the Program requires a minimum paper-based TOEFL score of 613 (257 on the computer-based test or 103-104 on the web-based test).

Financial Aid

Students admitted to the Program are typically offered two years of support for the M.S. degree and five years of support for the Ph.D.
Support consists of fellowships, teaching assistantships or research assistantships. Such support typically comes with a waiver of tuition, service fees, or both. Continued offers of assistantships or fellowships each academic year will depend on an evaluation of satisfactory progress by the Director of the Program. Students who require more than two years to complete the M.S. degree or five years to complete the Ph.D. degree must submit a written petition to the Director of the Program, supported by their Advisor, to be considered for an additional year of support.

For the degree of Doctor of Philosophy in Ecology, Evolution & Conservation Biology

All students must register for and attend the weekly PEEC seminar series (IB 546A) each semester in residence. The Director of the Program must approve excuses because of conflicts. An orientation seminar (IB 546B) must be taken the first fall semester in residence.

No later than their second semester in the program, the student in consultation with their Major Advisor will select members of the student's Doctoral Committee, which will meet annually with the student to plan coursework and research and to review and facilitate progress toward the degree. Students will prepare a short written report of their activities during the previous year for consideration by the Doctoral Committee. The Doctoral Committee will thoroughly consider all aspects of the student's activities, after which the Major Advisor will provide a written report of progress to the Director of the Program.

The faculty constituting a student's Doctoral Committee must come from two or more departments, comprise a minimum of four members (including the Major Advisor), be familiar with the student's area of research interest, and be approved by the Director of the Program. The chair of the Doctoral Committee is typically the Major Advisor, provided that the advisor is both a member of the University's Graduate Faculty and the Program in Ecology, Evolutionary and Conservation Biology. If this is not the case, the Director of the Program will appoint a chairperson who fulfills these requirements from among the committee membership. The Doctoral Committee will be responsible for administering the necessary examinations. No later than their sixth semester in the program, and preferably in their fifth semester before the deadline for submission of a proposal for an NSF Dissertation Improvement Grant (typically, the third Friday in November), doctoral students must take a Preliminary Examination. For this exam, a member of the Doctoral Committee other than the major advisor will be appointed chair by the Director of the Program. The first part of the three-hour oral exam will be general and cover the student's three core areas of emphasis. The second part of the exam will be a defense of the research proposal. Two weeks prior to the exam, the student must present to the Doctoral Committee a proposal prepared in the format of a proposal for an NSF Dissertation Improvement Grant. It should describe the objectives of the research project, the experimental plan and rationale, the results of pilot studies, a budget, and a tentative timetable for its completion. The student will present evidence of feasibility and significance of the proposal, but the main research for the dissertation shall not have been performed prior to the Preliminary Examination. A detailed report of the exam and a copy of the research proposal shall be submitted to the Director of the Program. A passing grade qualifies the student as a Ph.D. candidate. A failing grade will require the student to take a second preliminary examination no later than the following semester. A second failure will result in dismissal from the program.

Upon completion of a dissertation and the other requirements of the program, the student shall be subject to a Final Examination, supported by their Advisor, to be considered for an additional year of support. A passing grade qualifies the student as a Ph.D. candidate. A failing grade will require the student to take a second preliminary examination no later than the following semester. A second failure will result in dismissal from the program.

The thesis will be judged in relation to published scholarly work in the field, and students will be encouraged to begin publishing their results before taking their Final Examination. Passing this exam and presentation of the dissertation by the student at a public seminar sponsored by the program qualify the student for the Ph.D. degree. Failure will require the student to conduct additional research and to repeat the Final Examination.

Economics, MS (p. 695)
concentration: Economics: Policy Economics, MS (p. 696)
Economics, PhD (http://catalog.illinois.edu/graduate/las/graduate/las/economics-phd/)

Admission

Admission to the Ph.D. program is available only for the fall semester. In addition to the standard undergraduate preparation in economics, students are expected to have had at least two semesters of calculus and one of linear algebra to be admitted to the Ph.D. program. The results of the Graduate Record Examination (GRE) should accompany applications for admission. Graduate College admission requirements apply. In addition, international students must submit Test of English as a Foreign Language (TOEFL) or IELTS results; if they wish to apply for a teaching assistantship, the Test of Spoken English (TSE) or completion of the speaking section of the TOEFL-iBT or IELTS is also required.

Graduate Teaching Experience

Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the Ph.D. program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

for the Master of Science in Economics

Information listed in this catalog is current as of 02/2021
Learning Outcomes: Economics, MS

Learning outcomes for the Master of Science in Economics

1. Research Skills: The main objective of the program is to train students to become independent researchers, who are able to produce high-quality research for both academic and non-academic settings. This requires students to learn how to identify interesting questions, find creative solutions, and learn how to present the results of their work to the scientific community.

2. Analytical Skills: We want to make sure that students have all the mathematical and statistical tools necessary for their future careers. This includes a solid foundation in the core areas of Economics: Microeconomics, Macroeconomics, and Econometrics.

3. Problem Solving Skills: We want to teach students how to solve complex problems, by applying the technical tools that they have acquired, and by identifying and correctly using data sources.

4. Expertise in a Student's Field of Research: Students need to acquire a solid foundation in their chosen field of research. They should be familiar with the key past and present contributions in their area.

5. Presentation and Writing Skills: To be successful in the program and their future career, students must successfully present their work both in seminars and in written form.

email: econ@illinois.edu

This is a specially designed one- to two-year program to address the needs of two groups of students. One is promising young professionals and administrators who need additional training in the areas of economic analysis and quantitative techniques. The other is students who are potentially interested in pursuing a Ph.D. degree but require additional qualification to enable them to do so. While earning the master's degree and acquiring the necessary tools for further studies, they will learn if the pursuit of a Ph.D. degree is within their reach and suits their purposes.

Students enter the program only in the fall term.

The required coursework is further enriched through

1. academic advising wherein an academic advisor with an open-door policy allows the MSPE students to drop by his office at their convenience, discuss their academic questions with him, and re-optimize their program of study on a continual basis. The academic advisor also provides guidance on study plans beyond graduation and provides support in achieving them;

2. an orientation program that includes an intensive mathematics course; this course serves as a refresher for the math content to be utilized during the students' courses in the program;

3. opportunities to participate in field trips to observe the operation of financial institutions, modern industrial production facilities, federal and state government agencies, and international institutions;

4. scheduled lectures by outstanding, internationally known economists;

5. discussion groups and tutoring for participants who are having difficulty;

6. program staff assistance with visas, housing, and other nonacademic concerns; and

7. participation in social activities, including graduation dinners, holiday parties, picnics, and special luncheons.

This is a designated full-cost recovery program and no financial aid is available for the students in this program.

Please see https://economics.illinois.edu/mspe (https://economics.illinois.edu/mspe/) for detailed information on the MSPE Program.

### Learning Outcomes: Economics: Policy Economics, MS

Learning outcomes for the Master of Science in Economics, Policy Economics Concentration

1. **Basic Training Economics:** Develop in-depth competency in the core areas of economics: microeconomic theory, macroeconomic theory. Develop additional competency in one area of specialization through elective coursework and econometrics. Popular fields of specialization include advanced econometrics, development, international economics, monetary economics, public economics, and industrial organization.

2. **Quantitative Skills:** Provide solid training for statistical and econometrics skills. MSPE students will understand how to apply empirical evidence to economic arguments. Specifically, they will learn to obtain and/or collect data, develop empirical evidence using appropriate econometrics techniques, and interpret the results of such analyses.

3. **Preparation for Ph.D. programs:** The Ph.D. track option provides an opportunity for students to continue to the Ph.D. program in economics at UIUC. In addition, provides appropriate preparation for interested students to pursue a doctorate in economics.

4. **Critical Thinking:** MSPE students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

5. **Social skills & cultural awareness:** Enrich the student experience through seminars featuring guest speakers, field trips, events like a picnic, holiday party, Thanksgiving lunch, and graduation dinners.

### Economics, PhD

_for the Doctor of Philosophy in Economics_

---

head of the department: George Deltas
associate head: Seung-Hyun Hong
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
college website: https://las.illinois.edu/
department website: http://www.economics.illinois.edu
department office: 214 David Kinley Hall, 1407 W. Gregory Dr., Urbana, IL 61801
phone: (217) 333-0120
fax: (217) 244-6571
e-mail: econ@illinois.edu

Students must pass comprehensive qualifying examinations on Econometrics, Macroeconomics and Microeconomics. Those who fail the comprehensive examinations will have a 2nd chance in the start of the fall semester and a 3rd chance at the end of the fourth semester (in this 3rd chance they will take the exams with the first year students of the next cohort). Students who have failed the 3rd chance will not be allowed to register for the following year. Upon meeting course and GPA requirements, they will be eligible to receive a master's degree in Economics, provided they have not previously received such a degree from another institution.

Candidates must also successfully complete two fields through coursework and/or a written examination. A research paper must be submitted prior to the start of the third year and approved prior to the end of that year. Students who fail to meet these deadlines will have reduced financial support and be placed on academic probation. Unless they return to good standing by satisfying the requirement, they will be dropped from the program at the end of the following semester.

A dissertation is also required. In addition, candidates are required to give an oral defense of the dissertation proposal and pass an oral final examination covering the research. A student with an appropriate background who devotes full time to graduate work can complete the Ph.D. degree in four years beyond the bachelor’s degree. An additional year or more is usually necessary, especially for those holding part-time assistantships. Students in the Ph.D. program may earn a master’s degree as they work toward the Ph.D. degree.

The candidate for a Ph.D. may specialize in the following fields:
- microeconomic theory
- public economics
- macroeconomic theory
- international economics
- labor economics
- development economics
- mathematical economics
- econometrics
- industrial organization

optional concentrations: EPOL concentrations listed below| Bilingual-Bicultural Education (p. 1060)| Digital Learning (p. 1077)

Education Policy, Organization and Leadership, MA (p. 702) (on campus)

EPOL concentrations: Diversity & Equity in Education (p. 1078), Educational Administration & Leadership (p. 1078), Global Studies in Education (p. 1081), Higher Education (p. 1082), History of Education (p. 1082), Human Resource Development (p. 1083), Learning Design & Leadership (p. 1084), Philosophy of Education (p. 1086), Social Sciences & Education Policy (p. 1091)

College Teaching Minor (p. 1103)

joint programs:

Education Policy, Organization and Leadership, EdM and Business Administration, MBA (http://catalog.illinois.edu/graduate/bus/joint-degree/business-administration-joint-mba/)

Education Policy, Organization and Leadership, MA and Business Administration, MBA (http://catalog.illinois.edu/graduate/bus/joint-degree/business-administration-joint-mba/)

Degree programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at http://education.illinois.edu/programs/grad (http://education.illinois.edu/programs/grad/). The quality of the applicant’s undergraduate and graduate training and grade point average are primary considerations. Other important factors evaluated include the three letters of recommendation and statement of purpose. International applicants must submit a TOEFL score.

Information listed in this catalog is current as of 02/2021
Off-Campus Programs

The Education Policy, Organization and Leadership department offers selected off-campus programs in the Chicago region, through the use of a cohort model. The Ed.M. and C.A.S. degree options with General Administrative Endorsement are offered in the Chicago region. An Ed.D. degree cohort also is available in School Executive Leadership. Requirements for the off-campus Ed.M., C.A.S., and Ed.D. programs are identical to the on-campus degrees.

Facilities and Resources

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students (http://www.grad.illinois.edu/current-students/).

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

for the Certificate of Advanced Study in Education Policy, Organization & Leadership

The Department of Education Policy, Organization & Leadership offers many programs leading to the degree of Certificate of Advanced Study (C.A.S.). A list of programs and additional requirements can be found on the program’s website, (https://education.illinois.edu/faceted-search/programs/?degree=cas&department=epol)the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in:

Diversity & Equity in Education (p. 1078), Educational Administration & Leadership (p. 1078), Global Studies in Education (p. 1081), Higher Education (p. 1082), History of Education (p. 1082), Human Resource Development (p. 1083), Learning Design & Leadership (p. 1084), Philosophy of Education (p. 1086), Social Sciences & Education Policy (p. 1091)

If the student does not have a Master’s degree from the University of Illinois at Urbana-Champaign, the foundation courses listed below must be completed. The minimum GPA is 3.0.

(https://catalog.illinois.edu/graduate/bus/joint-degree/business-administration-joint-mba/)

---

Degree programs in the Department of Education Policy, Organization and Leadership
are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

**Admission**
The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at http://education.illinois.edu/programs/grad
(http://education.illinois.edu/programs/grad/).
The quality of the applicant’s undergraduate and graduate training and grade point average are primary considerations. Other important factors evaluated include the three letters of recommendation and statement of purpose. International applicants must submit a TOEFL score.
Off-Campus Programs
The Education Policy, Organization and Leadership department offers selected off-campus programs in the Chicago region, through the use of a cohort model. The Ed.M. and C.A.S. degree options with General Administrative Endorsement are offered in the Chicago region. An Ed.D. degree cohort also is available in School Executive Leadership. Requirements for the off-campus Ed.M., C.A.S., and Ed.D. programs are identical to the on-campus degrees.

Facilities and Resources
The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students/gradhandbook/.

Financial Aid
Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

for the Doctor of Education in Education Policy, Organization and Leadership
(on campus, off-campus & online)

A list of programs and additional requirements can be found on the program’s website (https://education.illinois.edu/faceted-search/programs/?degree=edd&department=epol), the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in:

African American Studies (p. 1059), Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/), Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/), Diversity & Equity in Education (p. 1078), Educational Administration & Leadership (p. 1078), Global Studies in Education (p. 1081), Higher Education (p. 1082), History of Education (p. 1082), Human Resource Development (p. 1083), Learning Design & Leadership (p. 1084), Philosophy of Education (p. 1086), Social Sciences & Education Policy (p. 1091), Writing Studies (p. 1093)

This degree program can be completed either on campus or online; the requirements are listed below:

Digital Learning (p. 1077)

Educational Psychology, MS (p. 714)
optional concentrations: Bilingual-Bicultural Education (p. 1060)
Digital Learning (p. 1077)

Educational Psychology, PhD (p. 717)
optional concentrations: Digital Learning (p. 1077)

Admission

Students entering without a master’s degree must first complete the requirements for a Master of Science (including a master’s thesis).

The Department offers admission to a terminal on-campus Master of Science (M.S.) degree with a focus on Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES). There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor’s degrees and those who have a master’s degree. Students who enter the program without a prior master’s incorporate their master’s class work and research into their doctoral program, and earn a master’s degree as the first step toward their Ph.D (satisfying the “Early Research Project” requirement). The department does not accept applications for master’s degrees in CSTL, Developmental Sciences, or Counseling Psychology.

Applications

Doctoral applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department Web site (http://www.education.illinois.edu/edpsy/). Applicants to our doctoral program apply for Fall enrollment. Current deadlines are posted on our department Web site (http://www.education.illinois.edu/edpsy/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores, letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master’s candidates are only admitted into QUERIES.

Grade Point Average

The preferred department standard for grade point average is 3.5 on a 4.0 scale. The University calculates undergraduate GPAs on the last

Information listed in this catalog is current as of 02/2021
Learning Outcomes: Educational Psychology, EdM

Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy.
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan. This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical...
analytical methods, research designs, measurement models, and research approaches.

Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars – in education, social welfare, health services, community development, human resource development, and other domains.

optional concentrations:
African American Studies (p. 1059) (available to all on campus degrees)
Second Language Acquisition and Teacher Education (http://www.slate.illinois.edu/) (PhD only)

Admission

Students entering without a master's degree must first complete the requirements for a Master of Science (including a master's thesis).

The Department offers admission to a terminal on-campus Master of Science (M.S.) degree with a focus on Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES). There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor's degrees and those who have a master's degree. Students who enter the program without a prior master's incorporate their master's class work and research into their doctoral program, and earn a master's degree as the first step toward their Ph.D (satisfying the "Early Research Project" requirement). The department does not accept applications for master's degrees in CSTL, Developmental Sciences, or Counseling Psychology.

Applications

Doctoral applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department Web site (http://www.education.illinois.edu/edpsy/). Applicants to our doctoral program apply for Fall enrollment. Current deadlines are posted on our department Web site (http://www.education.illinois.edu/edpsy/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores, letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master's candidates are only admitted into QUERIES.

Grade Point Average

The preferred department standard for grade point average is 3.5 on a 4.0 scale. The University calculates undergraduate GPAs on the last
two years of grades for degreeed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

**Test of English as a Foreign Language (TOEFL)**

International applicants must have demonstrated English language competence with TOEFL scores of greater than 610 (paper and pencil test), greater than 253 (computer-based test), or greater than 102 iBT. An IELTS score of greater than 6.5 overall, with at least 6 in each sub-section, can be substituted for the TOEFL score. Students who are accepted with lower scores will be required by the University to enroll on a limited status basis for at least their first semester.

**Area of Study Affiliation**

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Developmental Sciences
- Studies in Interpretive, Statistical Measurement, and Evaluative Methodologies for Research (QUERIES)

Detailed information about each area and about the research interests of the faculty can be found on the department Web site (http://www.education.illinois.edu/edpsy/).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisors and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

**Faculty Research Interests**

The faculty’s research agendas span a wide range of topics related to the study and application of psychological principles to develop and inform educational interventions and facilitate human development across the life span. Faculty conduct basic and translational research that explores the cognitive, life-span developmental, social-emotional, and socio-cultural factors that affect behavior, learning, and achievement in educational, clinical, and community contexts. They also engage in research on approaches to educational inquiry and the development of quantitative, qualitative and evaluative methodologies that underpin the development of evidence-based, policy-relevant studies. For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

**Center, Programs, and Institutes**

Department faculty are affiliated with both research centers and institutes in the College of Education and the university more broadly, including the Adult Learning Lab, the Center for Education in Small Urban Communities, the Center for Advanced Study, the Beckman Institute, the Center for the Study of Reading, the Social Development Consortium, and others.

**Facilities and Resources**

The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students (http://www.grad.illinois.edu/current-students/).

**Financial Aid**

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

The department does not require a separate financial aid application.

**for the degree of Master of Arts in Educational Psychology**

The Department of Educational Psychology offers many programs leading to the degree of Master of Arts (M.A.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search programas/?degree=edm&department=edpsy) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

Information listed in this catalog is current as of 02/2021
Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy.
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan. This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.
analytical methods, research designs, measurement models, and research approaches.

Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodology, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars – in education, social welfare, health services, community development, human resource development, and other domains.

Educational Psychology, MS

for the degree of Master of Science in Educational Psychology

Chair of the department: Kiel Christianson
Director of graduate studies: Jinming Zhang
Graduate admissions information: Mitzi Koehlerlein
Overview of admissions & requirements: College of Education (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad)
Overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
Department website: http://education.illinois.edu/edpsy (http://education.illinois.edu/edpsy/)
Program website: College of Education Programs (https://education.illinois.edu/faceted-search/programs/)
Department faculty: Educational Psychology Faculty (https://education.illinois.edu/faculty-finder/edpsy/)
College website: http://education.illinois.edu/
Department office: 142 Education Building, 1310 South Sixth Street, Champaign, IL 61820

Graduate Degree Programs in Educational Psychology

Educational Psychology, EdM (p. 708) (on campus & online)
Optional concentrations: Bilingual-Bicultural Education (p. 1060) Digital Learning (p. 1077)
Educational Psychology, MA (p. 711)
Optional concentrations: Bilingual-Bicultural Education (p. 1060) Digital Learning (p. 1077)
Educational Psychology, MS (p. 714)
Optional concentrations: Bilingual-Bicultural Education (p. 1060) Digital Learning (p. 1077)
Educational Psychology, PhD (p. 717)
Optional concentration: Digital Learning (p. 1077)
Optional concentrations:
African American Studies (p. 1059) (available to all on campus degrees)
Second Language Acquisition and Teacher Education (http://www.slate.illinois.edu/) (PhD only)

Admission

Students entering without a master’s degree must first complete the requirements for a Master of Science (including a master’s thesis).

The Department offers admission to a terminal on-campus Master of Science (M.S.) degree with a focus on Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES). There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor’s degrees and those who have a master’s degree. Students who enter the program without a prior master’s incorporate their master’s class work and research into their doctoral program, and earn a master’s degree as the first step toward their Ph.D. (satisfying the “Early Research Project” requirement). The department does not accept applications for master’s degrees in CSTL, Developmental Sciences, or Counseling Psychology.

Applications

Doctoral applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department Web site (http://www.education.illinois.edu/edpsy/). Applicants to our doctoral program apply for Fall enrollment. Current deadlines are posted on our department Web site (http://www.education.illinois.edu/edpsy/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores, letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master’s candidates are only admitted into QUERIES.

Grade Point Average

The preferred department standard for grade point average is 3.5 on a 4.0 scale. The University calculates undergraduate GPAs on the last
two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor’s degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

**Test of English as a Foreign Language (TOEFL)**
International applicants must have demonstrated English language competence with TOEFL scores of greater than 610 (paper and pencil test), greater than 253 (computer-based test), or greater than 102 iBT. An IELTS score of greater than 6.5 overall, with at least 6 in each sub-section, can be substituted for the TOEFL score. Students who are accepted with lower scores will be required by the University to enroll on a limited status basis for at least their first semester.

**Area of Study Affiliation**
All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Developmental Sciences
- Studies in Interpretive, Statistical Measurement, and Evaluative Methodologies for Research (QUERIES)

Detailed information about each area and about the research interests of the faculty can be found on the department Web site (http://www.education.illinois.edu/edpsy/).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisers and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

**Faculty Research Interests**
The faculty’s research agendas span a wide range of topics related to the study and application of psychological principles to develop and inform educational interventions and facilitate human development across the life span. Faculty conduct basic and translational research that explores the cognitive, life-span developmental, social-emotional, and socio-cultural factors that affect behavior, learning, and achievement in educational, clinical, and community contexts. They also engage in research on approaches to educational inquiry and the development of quantitative, qualitative and evaluative methodologies that underpin the development of evidence-based, policy-relevant studies. For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

**Center, Programs, and Institutes**
Department faculty are affiliated with both research centers and institutes in the College of Education and the university more broadly, including the Adult Learning Lab, the Center for Education in Small Urban Communities, the Center for Advanced Study, the Beckman Institute, the Center for the Study of Reading, the Social Development Consortium, and others.

**Facilities and Resources**
The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at http://www.grad.illinois.edu/current-students (http://www.grad.illinois.edu/current-students/).

**Financial Aid**
Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

The department does not require a separate financial aid application.

**for the degree of Master of Science in Educational Psychology**
The Department of Educational Psychology offers many programs leading to the degree of Master of Science (M.S.). A list of programs and additional requirements can be found on the program’s website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=edpsy) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.

Elective Hours: 4

Elective Courses: Select one of the following:
- EPSY 408 Learning and Human Development with Educational Technology
- EPSY 430 Early Adolescent Development
- EPSY 485 Assessing Student Performance
- EPSY 490 Developments in Educational Psychology
- EPSY 553 Global Issues in Learning

Learning Outcomes: Educational Psychology, MS

Learning Outcomes for the degree of Master of Science in Educational Psychology

Philosophical and Social Foundations in Education Policy, Organization and Leadership

Select one of the following: 4
- EPOL 401 History of American Education
- EPOL 402 Asian American Education
- EPOL 403 Historical and Social Barriers
- EPOL 405 School and Society
- EPOL 406 Professional Ethics in Education
- EPOL 407 Critical Thinking in Education
- EPOL 408 Aesthetic Education
- EPOL 409 Sociology of Education
- EPOL 410 Racial and Ethnic Families
- EPOL 412 Politics of Education
- EPOL 413 Economics of Education
- EPOL 480 Technology and Educational Reform
- EPOL 539 Political & Cultural Context of Education

Elective Hours: 24
- 400/500-Level Hours Required: 12 hours (Independent Study and Thesis Hours included)
- 500-Level Hours Required in Education: 12 hours

Research/Project/Independent Study Hours (min/max applied toward degree): 0-8
- EPSY 599 Thesis Research (min/max applied toward degree) 2-8

Total Hours 32

Other Requirements

Requirement Description
- Human Subjects Approval
- Minimum GPA 3.0

1. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
2. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
3. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy.
4. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
5. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
6. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
7. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan. This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical
analytical methods, research designs, measurement models, and research approaches.

**Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES) Division**

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars—in education, social welfare, health services, community development, human resource development, and other domains.

Learning Outcomes: Educational Psychology, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Educational Psychology

Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy.
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan. This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical analytical methods, research designs, measurement models, and research approaches.

Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the use of modern quantitative analytic methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars – in education, social welfare, health services, community development, human resource development, and other domains.

Electrical & Computer Engineering, MENG

for the degree of Master of Engineering in Electrical & Computer Engineering

Information listed in this catalog is current as of 02/2021
The MEng in Electrical & Computer Engineering is a professionally-oriented degree intended for students interested in extending the depth and/or breadth of their technical knowledge in Electrical and Computer Engineering or in a subfield thereof and is most appropriate for students who intend to enter the professional workforce after completing the degree.

**Admission Requirements**

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, due to space limitations, applicants with GPAs below 3.50 are less likely to be admitted. All applicants must submit scores from the general test of the Graduate Record Examination (GRE) (http://www.ets.org/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

**Financial Aid**

Students in the MEng in Electrical and Computer Engineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

**Other Graduate Programs in the Department of Electrical & Computer Engineering**

degrees:

| E Electrical & Computer Engineering, MS (p. 721) |
|---|---|
| **optional concentrations:** | Biomechanics (p. 1069) Cancer Nanotechnology (p. 1072) Computational Science and Engineering (p. 1073) |

The Department of Electrical & Computer Engineering (ECE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Electrical & Computer Engineering and a Master of Engineering in Electrical & Computer Engineering. Virtually every specialty within electrical and computer engineering is represented with courses and research opportunities in the following areas: applied computational theory, bioengineering, acoustics, and biomedical imaging; communications; computer-aided design and testing; computer systems, computer vision and robotics; decision and control; electromagnetic fields; optics, lasers, and plasmas; integrated circuits; microelectromechanical systems; mobile computing and communication; optoelectronics; power and energy systems; power electronics; remote sensing and propagation; semiconductor materials and devices, semiconductor physics and computational electronics; signal, image, and speech processing.

Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Engineering in Electrical & Computer Engineering

For additional details and requirements refer to the department's Graduate Study Manual (https://ece.illinois.edu/academics/grad/overview/meng-manual.asp) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Information listed in this catalog is current as of 02/2021
We expect each graduate student to achieve at least five of the following outcomes:

1. To be able to identify technical challenges, and formulate problems in Electrical and Computer Engineering.
2. To be able to apply theoretical and/or experimental methods to solve problems in Electrical and Computer Engineering.
3. To have in-depth knowledge of at least one sub-area within Electrical and Computer Engineering.
4. To be able to effectively communicate findings to peers in written and oral form.
5. To be able to teach topics in Electrical and Computer Engineering at the university level.

6. To have broad understanding of the scope of research in Electrical and Computer Engineering.

7. To be able to function as an engineer.

**Electrical & Computer Engineering, MS**

for the degree of Master of Science in Electrical and Computer Engineering

**department head:** Bruce Hajek (b-hajek@illinois.edu)
**director of graduate studies:** Michael L Oelze (oelze@illinois.edu)
**overview of admissions & requirements:** https://ece.illinois.edu/admissions/graduate/admissions-requirements-and-process.asp
**overview of grad college admissions & requirements:** https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
**department website:** http://ece.illinois.edu
**program website:** https://ece.illinois.edu/academics/grad/overview/ms.asp
**department faculty:** https://ece.illinois.edu/directory/faculty.asp
**college website:** https://grainger.illinois.edu/
**contact:** Jennifer Merry (merry@illinois.edu)
**address:** 2120 Electrical and Computer Engineering Bldg, 306 N Wright St, Urbana, IL 61801
**phone:** (217) 300-2414
**email:** ece-grad-apps@illinois.edu

Applicants with a bachelor's degree may apply to the MS program or to the direct PhD (p. 723) program.

Opportunity exists for specializing in i) biomechanics via the Biomechanics (p. 1069) optional graduate concentration, ii) cancer nanotechnology via the Cancer Nanotechnology (p. 1072) optional graduate concentration, and iii) computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

**Admission Requirements**

Admission for the spring semester is possible, in addition to the usual fall semester admissions.

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, because of space limitations, applicants with GPAs below 3.50 are rarely admitted. All applicants must submit scores from the general test of the Graduate Record Examination (GRE) (http://www.ets.org/gre).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.
Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are available for the majority of students who are admitted to the MS and PhD programs. International applicants generally are not awarded teaching assistantships, but are eligible for the other forms of financial aid.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester and register for ECE 590TL.

Department Research

Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department’s research website (https://ece.illinois.edu/research/).

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department’s research centers website (https://ece.illinois.edu/research/centers.asp).

Other Graduate Programs in the Department of Electrical & Computer Engineering

degrees:

- Electrical & Computer Engineering, MEng (p. 719)
- Electrical & Computer Engineering, PhD (p. 723)

optional concentrations:
- Biomechanics (p. 1069)
- Cancer Nanotechnology (p. 1072)
- Computational Science and Engineering (p. 1073)

The Department of Electrical & Computer Engineering (ECE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Electrical & Computer Engineering and a Master of Engineering in Electrical & Computer Engineering. Virtually every specialty within electrical and computer engineering is represented with courses and research opportunities in the following areas: applied computational theory; bioengineering, acoustics, and biomedical imaging; communications; computer-aided design and testing; computer systems, computer vision and robotics; decision and control; electromagnetic fields; optics, lasers, and plasmas; integrated circuits; microelectro-mechanical systems; mobile computing and communication; optoelectronics; power and energy systems; power electronics; remote sensing and propagation; semiconductor materials and devices, semiconductor physics and computational electronics; signal, image, and speech processing.

Opportunity also exists for specializing in energy and sustainability engineering via the

Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Science in Electrical and Computer Engineering

For additional details and requirements refer to the department’s Graduate Study Manual (https://ece.illinois.edu/academics/grad/overview/msphd-manual.asp) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

---

The Department of Electrical & Computer Engineering offers both a traditional doctoral program (for students with a previous master's degree) and a direct doctoral program (for students with only a bachelor's degree). Applicants with master's degrees are admitted only if a faculty member is willing to serve as the PhD thesis advisor. Accordingly, such applicants should write, call, or e-mail prospective PhD advisors and discuss their research interests and potential PhD thesis topics well in advance of application deadlines.

Opportunity exists for specializing in i) biomechanics via the Biomechanics (p. 1069) optional graduate concentration, ii) cancer nanotechnology via the Cancer Nanotechnology (p. 1072) optional graduate concentration, and iii) computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements

Admission for the spring semester is possible, in addition to the usual fall semester admissions.

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, because of space limitations, applicants with GPAs below 3.00 are rarely admitted. All applicants must submit scores from the general test of the Graduate Record Examination (GRE) (http://www.ets.org/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are available for the majority of students who are admitted to the MS and PhD programs. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend. International applicants generally are not awarded teaching assistantships, but are eligible for the other forms of financial aid.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL IBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester and register for ECE 590TL.

Department Research

Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department’s research Web site (http://ece.illinois.edu/research/research/).

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department’s research centers Web site (https://ece.illinois.edu/research/centers.asp).

Curriculum and Instruction, PhD (p. 682)
  optional concentrations (PhD only):
    Digital Learning (p. 1077)|Second Language Acquisition and Teacher Education (http://www.slate.illinois.edu/)
Writing Studies (p. 1093)

Early Childhood Education, EdM (p. 686) with teacher licensure
  optional concentrations: Bilingual-Bicultural Education (p. 1060)Digital Learning (p. 1077)
Elementary Education, EdM (p. 725) with teacher licensure
  optional concentrations: Bilingual-Bicultural Education (p. 1060)Digital Learning (p. 1077)
Secondary Education, EdM (p. 977) with teacher licensure
  concentrations: English (p. 979)|Mathematics (p. 980)|Sciences (p. 980)|Social Science: History (p. 982)
  optional concentrations: Bilingual-Bicultural Education (p. 1060)Digital Learning (p. 1077)

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master’s degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master’s students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master’s candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally...
combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

Admission
Interested applicants should start at [http://education.illinois.edu/programs/grad](http://education.illinois.edu/programs/grad). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Graduate Record Examination (GRE) scores must be submitted for all doctoral applicants. A scholarly writing sample in English, such as a master’s thesis, article, or paper, is required for application to a doctoral program. Note: The master’s with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction’s TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office ([http://www.grad.illinois.edu/admissions/depts/](http://www.grad.illinois.edu/admissions/depts/)) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook [www.grad.illinois.edu/admissions/instructions/04c](http://www.grad.illinois.edu/admissions/instructions/04c).

Faculty Research Interests
For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder ([https://education.illinois.edu/faculty-finder](https://education.illinois.edu/faculty-finder)).

Facilities and Resources
Departmental resources consist of cooperation with Children’s Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies,* and *American Educational Research Journal*. The department also has available resources and some workshops during the academic year. Program areas including DELTA, CREATE, Language & Literacy, and MSE offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education ([http://cote.illinois.edu/](http://cote.illinois.edu/)) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at [http://www.grad.illinois.edu/current-students](http://www.grad.illinois.edu/current-students).

Financial Aid
Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college ([https://education.illinois.edu/current-students/graduate/financial-aid/](https://education.illinois.edu/current-students/graduate/financial-aid/)) and campus. Campus opportunities can be found at the Graduate College ([http://www.grad.illinois.edu/funding-jobs/](http://www.grad.illinois.edu/funding-jobs/)) and the Office of Student Financial Aid ([http://www.osfa.illinois.edu/](http://www.osfa.illinois.edu/)). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.

Learning Outcomes: Elementary Education, EdM

Learning Outcomes for the degree of Master of Education in Elementary Education with teaching licensure

1. Students will acquire deep knowledge of content in the field of Education.
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction for elementary students, grades 1-6.
3. Students will use data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).
5. Students will display a deep understanding of educational philosophy and reflective practice.

Joint Programs:

- Public Health, MPH & Community Health, PhD (p. 1136)
- Public Health, MPH & Food Science & Human Nutrition, PhD (p. 1126)
- Public Health, MPH & Human Development & Family Studies, PhD (p. 1129)
- Public Health, MPH & Kinesiology, PhD (p. 1137)
- Public Health, MPH & Nutritional Science, PhD (http://catalog.illinois.edu/graduate/aces_ahs/nutritional-science-phd/public-health-mph/)
- Public Health, MPH & Social Work, PhD (p. 1138)
- Public Health, MPH & Urban Planning, MUP (p. 1138)

Admissions: https://ahs.illinois.edu/application-requirements (https://ahs.illinois.edu/application-requirements/)

How to Apply for MPH: https://ahs.illinois.edu/how-to-apply (https://ahs.illinois.edu/how-to-apply/)

How to Apply for BS-MPH: https://ahs.illinois.edu/how-to-apply-bs-mph (https://ahs.illinois.edu/how-to-apply-bs-mph/)

for the Master of Public Health in Epidemiology

The MPH in Epidemiology degree program requires a minimum of 48 hours. The program includes:

1. Five required core courses in basic content areas of public health
2. Four required courses in the Epidemiology focus area
3. An Applied Practice Experience (practicum)
4. An Integrative Learning Experience (capstone)
5. Seminars and electives

MPH students must complete all core coursework before enrolling in the MPH Applied Practice Experience. It is highly preferable for the applied practice experience to occur during summer term. The Integrative Learning Experience must be completed in the last term of study. There is no thesis requirement. Applicants to the epidemiology program should demonstrate strong quantitative skills. Applications for the Master of Public Health (MPH) in Epidemiology are only accepted for Fall admission. The program generally takes 1.5 to 2 years to complete. University of Illinois undergraduate students who major in Kinesiology, Community Health, or Interdisciplinary Health Sciences are eligible to apply for a 5.5 year joint BS-MPH degree program after their 3rd (junior) year of undergraduate study. Students in the BS-MPH program begin some MPH coursework in their 4th (senior) year of undergraduate study, and begin graduate status in the MPH coursework in their 5th year of study.

Degree Requirements
The Grainger College of Engineering offers a Master of Engineering (MEng) degree program for students whose primary intent is a professional career in industry or government. This degree differs from the Master of Science (MS) degree in that it is a professionally-oriented master’s degree that is not a pathway to a doctoral program. The Major in Engineering for the M.Eng. degree requires the selection of an interdisciplinary concentration, which must be identified at the time of application. Available concentrations are:

- Aerospace Systems Engineering
- Energy Systems
- Plasma Engineering
- Railway Engineering

Admission

Students with bachelor’s or master’s degrees in engineering or related sciences will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for both the fall and spring semesters. Full details of admission requirements are on the Web page of the department offering the concentration.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Higher requirements may be imposed by specific concentrations.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

Other Requirements and Conditions

- A concentration is required.
- A minimum of 12 500-level credit hours with a minimum of 8 500-level credit hours applied toward the concentration.
- A minimum of 8 hours must be in ENG or the home unit of the concentration.
- Minimum program GPA: 3.0

For additional details and requirements, please refer to the Web page of the concentration’s home unit and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).
The MEng in Engineering, Aerospace Systems Engineering Concentration is a professionally-oriented degree program for students whose primary intent is a career in industry or government. This degree differs from the Master of Science degree in that it is a terminal degree and not a pathway to a doctoral program. The Aerospace Systems Engineering Concentration is available on campus and online. Other concentrations under the MEng in Engineering major include Energy Systems (p. 731), Plasma Engineering (p. 730), and Railway Engineering (p. 732).

Admission Requirements

Students with bachelor’s or master’s degrees in engineering or related fields will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the spring term, but most admissions are for the fall term. Full details of admission requirements are on the Aerospace Systems Engineering Concentration website (https://aerospacesystemsmeng.engineering.illinois.edu/).

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

Other Graduate Programs in the Department of Aerospace Engineering

degrees: Aerospace Engineering, MS (p. 530) optional concentrations: Computational Science & Engineering (p. 1073) Aerospace Engineering, PhD (p. 533) optional concentrations: Computational Science & Engineering (p. 1073) Aerospace Engineering, Direct PhD (https://aerospace.illinois.edu/academics/graduate/phd-program/phd-student-status-and-requirements/direct-phd/) optional concentrations: Computational Science & Engineering (p. 1073) The Department of Aerospace Engineering (AE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Aerospace Engineering and a Master of Engineering in Engineering degree with a concentration in Aerospace Systems Engineering. The AE graduate program provides students with a strong background in engineering and applied science while placing emphasis on aircraft and spaceflight engineering. Students may major in one of the following general areas: aerodynamics, astrodynamics, combustion and propulsion, control systems, dynamical systems, fluid mechanics, structural mechanics, materials, and space systems.

Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Engineering, Major in Engineering, Aerospace Systems Engineering Concentration (on campus & online)

For additional details and requirements, refer to the department’s Website (http://aerospace.illinois.edu/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

available for:
Engineering, MENG (p. 728)
The Department of Nuclear, Plasma & Radiological Engineering (NPRE) offers programs leading to degrees of Master of Science and Doctor of Philosophy in Nuclear, Plasma & Radiological Engineering, as well as Master of Engineering in Engineering with a Concentration in Energy Systems or a Concentration in Plasma Engineering. The Master of Science and Doctor of Philosophy degree programs are centered around three theme areas:

• nuclear power engineering
• fusion and plasma science and engineering
• radiological engineering and medical physics

Advanced course work and active research programs are offered in all of these areas.

Opportunity also exists for specializing in energy and sustainability engineering via the

Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Engineering, Major in Engineering, Energy Systems Concentration

For additional details and requirements refer to the program’s Website (https://energysystemseng.engineering.illinois.edu/curriculum/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Learning Outcomes: Energy Systems Concentration

Learning Outcomes for the degree of Master of Engineering in Engineering, Energy Systems Concentration

1. Develop an ability to analyze energy systems at a holistic level and perform lifecycle assessment.
2. Obtain an understanding (at the graduate level) of fundamental limits to energy production, transmission, storage and consumption due to physics and chemistry constraints.
3. Understand the concepts of engineering and economic optimization, and learn their application.
4. Develop an interdisciplinary breadth of understanding of the variety of approaches to development, deployment and sustainability of global energy resources.
5. Develop an understanding of the broader policy and decision-making context in which development of and deployment of energy systems takes place.
6. Complete a study of a particular problem relevant to energy systems in a manner analogous to a professional career assignment.

The MEng in Engineering, Railway Engineering Concentration is a professionally-oriented degree program for students whose primary intent is a career in industry or government. This degree differs from the Master of Science degree in that it is a terminal degree and not a pathway to a doctoral program. Other concentrations under the MEng in Engineering major include Aerospace Systems Engineering (p. 728), Energy Systems (p. 731), and Plasma Engineering (p. 730).

This program is a collaborative effort between the Rail Transportation of Engineering Center (RailTEC) and the Railway Group at KTH Royal Institute of Technology in Stockholm, Sweden.

Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Applicants must hold a bachelor’s or master’s degree in engineering or related fields equivalent to those granted by the University of Illinois at Urbana-Champaign with cumulative grade point average of at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD) is required.

Full details of admission requirements are on the Railway Engineering Concentration website (http://railwaymeng.engineering.illinois.edu/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

English, MA

for the degree of Master of Arts in English

head of department: Bob Markley
director of graduate studies: Justine Murison

overview of graduate college admissions & requirements: Graduate Admissions (https://grad.illinois.edu/admissions/apply/)
overview of department admissions & requirements: https://english.illinois.edu/admissions/graduate-admission (https://english.illinois.edu/admissions/graduate-admission/)
department website: http://www.english.illinois.edu
college website: https://las.illinois.edu/
department office: 210 English Building, 608 South Wright Street, Urbana, IL 61801
phone: (217) 333-3646
eemail: engl_resources@ad.uiuc.edu (http://catalog.illinois.edu/graduate/las/english-ma/engl_resources@ad.uiuc.edu)

The Department of English offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. We welcome qualified students who wish to pursue their interests in English, American, and Anglophone language, literature and film beyond the undergraduate level. The Ph.D. program is, in general, designed to educate and train teacher-scholars who will take positions in colleges and universities throughout the country. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Both the M.A. and Ph.D. may be earned with a specialization in Writing Studies. Also, doctoral students specializing in other fields may earn a graduate concentration in Writing Studies.
Graduate Degree Programs in English

English, MA (p. 733)
- **concentration**: Medieval Studies (p. 1085)
- English, PhD (p. 735)
- **concentration**: Medieval Studies (p. 1085)|Writing Studies (p. 1093)

- Gender and Women's Studies Program
- The Holocaust, Genocide, and Memory Studies Initiative
- Illinois Program for Research in the Humanities
- Latina-Latino Studies Program
- The Program in Jewish Culture and Society
- Unit for Cinema Studies
- Unit for Criticism and Theory

Admission

A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores are required for those applying for the Literary Studies and Writing Studies programs. The GRE subject test for literature in English is not required. For the 2020-2021 application season, the English Department is not requiring the GRE general test, and such scores will not be considered by the readers of applications in their deliberations. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 2nd.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at [https://english.illinois.edu/admissions/graduate-admission](https://english.illinois.edu/admissions/graduate-admission/) or write to the above address.

**for the degree of Master of Arts in English**

A full-time student can complete this program in two academic years. Students must choose to complete a specialization in Literature or Writing Studies.

1 For additional details and requirements refer to the department's Graduate Studies in English (http://www.english.illinois.edu/graduate/) Website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Course work listing for M.A. requirements for the Literature Specialization:

Eight semester-long courses in British and American Literature and Critical Theory.

Courses (worth four hours of credit each) must be taken in six of the following nine areas:

- Medieval British Literature (beginning to 1485)
- Renaissance British Literature (1485-1660)
- Restoration/Eighteenth-Century British Literature (1660-1800)
- Nineteenth-Century British Literature (1800-1900)
- Twentieth-Century British Literature (1900-2000)
- Early American Literature (beginning to Civil War)
- Later American Literature (Civil War to present)
- Anglophone Literature (other than British and American)
- Critical Theory

Candidates may substitute another area (such as film) for one on the above list with the permission of the Director of English Graduate Studies. However, all students must take at least one course in a period before 1660, and one course in either Early or Later American Literature. At least four of the eight courses must be in 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be in 400-level
courses (limited to 36 students) in which graduate students complete work beyond that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar in the teaching of composition or business and technical writing for four hours of credit. (ENGL 593)

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a UIUC foreign language department
3. By passing a non-credit 501 language course with a grade of B or better

Course work listing for M.A. requirements for the Writing Specialization:
Eight semester-long courses in Writing Studies, Literature, and Theory.

Courses (worth four hours each) must be taken as follows:

At least 16 of the 32 required hours must be in 500-level courses. Eight of the 16 hours must be ENGL 505 and 1 course from the following list: ENGL 582, ENGL 583, ENGL 584. In addition, students must take two courses in Literature or Theory and four courses approved by the Writing Studies advisor.

At least four of the eight courses must be 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be 400-level courses (limited to 36 students) in which graduate students complete work in addition to that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar (ENGL 593) in the teaching of composition or the teaching of business and technical writing for four hours of credit.

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a University of Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better.

Affiliated Programs offering certificates or minors:
- Department of African American Studies
- Asian American Studies Program
- American Indian Studies
- Center for Latin American and Caribbean Studies
- Gender and Women's Studies Program
- The Holocaust, Genocide, and Memory Studies Initiative
- Illinois Program for Research in the Humanities
- Latina-Latino Studies Program
- The Program in Jewish Culture and Society
- Unit for Cinema Studies
- Unit for Criticism and Theory

Admission

A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores are required for those applying for the Literary Studies and Writing Studies programs. The GRE subject test for literature in English is not required. For the 2020-2021 application season, the English Department is not requiring the GRE general test, and such
scores will not be considered by the readers of applications in their deliberations. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 2nd.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at https://english.illinois.edu/admissions/graduate-admission/ or write to the above address.

*for the degree of Doctor of Philosophy in English*

Students in the program who have earned their master’s degrees must apply formally to the Ph.D. program. Applicants who have completed their master’s degrees elsewhere may also apply. Seldom are applicants accepted with graduate grade point averages below 3.5. Students must choose to complete a specialization in Literature or Writing Studies. In addition, students may choose to complete the graduate concentration in Writing Studies (http://catalog.illinois.edu/graduate/graduate-majors/writing-studies/).

Interdisciplinary work is encouraged. Students may take courses outside of English. The special field examination is taken as the student completes coursework and prepares to write the thesis. The student then goes on to complete and defend the thesis under the direction of a committee composed of four professors. A full-time student can complete this program in four years beyond the master’s degree.

1 For additional details and requirements refer to the department’s Graduate Studies in English (http://www.english.illinois.edu/graduate/) Website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Course work listing for Ph.D. requirements for the Literature Specialization:

- Eight additional semester-long courses at the 400 and 500 level. These, selected in consultation with a faculty advisor, either focus on the proposed field of specialization and allied fields—in English or in other disciplines—or fill gaps in the student’s background.
- Doctoral students in literature will either take a Professional Seminar in the teaching of literature or film or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. They are expected to teach at least one literature course during their Ph.D. work.
- The Foreign Language Requirement (if not already satisfied at the M.A. level) may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways: By completing the equivalent of three full years of undergraduate work; By passing a proficiency exam administered by a UIUC foreign language department; By passing a non-credit 501 language course with a grade of B or better.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student’s approved Special Field list of primary and secondary sources, including a discussion of its rationale and relation to the proposed dissertation topic. Approved fields include historical periods, genres, film, and critical theory.
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.
Course work listing for Ph.D. requirements for the Writing Studies Specialization:

- Eight additional semester-long courses at the 400 and 500 level. These selected in consultation with a faculty advisor, focus on the proposed field of specialization and allied fields—in English or in other disciplines—or fill gaps in the student's background and include ENGL 505 and 2 methodology courses (at least one of which is an ENGL 582; the second methodology course should be approved by the advisor and typically will be approved by the Center for Writing Studies for the methodology requirement in its Writing Studies Graduate Concentration). In addition, students must take one course in Literature or Theory. Specific courses taken at the MA level (ENGL 505 and ENGL 582) are counted as fulfilling those specific requirements at the PhD level.
- Students who enter the Ph.D. program with an M.A. from another institution must show demonstrated reading knowledge of a foreign language.
- Completion of a Special Field Examination (oral, written, or both). This exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved special field list—which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Entomology, MS

for the degree of Master of Science in Entomology

chair of department: May R. Berenbaum
co-directors of graduate studies: Alexandra Harmon-Thrett and Samuel N. Beshers

The Department of Entomology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The program is designed to accommodate incoming students with a wide range of entomological expertise. The goal of the program is to provide students with a strong background in basic biology as it relates to insects and to equip them with the specialized intellectual and technical skills to pursue a career in research, teaching, and service in entomology and related biological disciplines.

Major areas of specialization within the department include systematics, evolutionary biology, molecular genetics, genomics, chemical ecology, disease ecology, invasion biology, toxicology, pollinator health, social insect biology, insect-microbe interactions, conservation biology, and integrated pest management.

Graduate Degree Programs in Entomology

Entomology, MS (p. 737)
concentration: Computational Science & Engineering (p. 1073)
Entomology, PhD (p. 738)
concentration: Computational Science & Engineering (p. 1073)

Admission

The Graduate Record Examination (GRE) general test scores are not required by our Department but can be submitted if they will support your application. A minimum Test of English as a Foreign Language (TOEFL) score of 550 (paper-based test), 213 (computer-based test), or 79 (internet-based test), or an International English Language Testing System (IELTS) score of 6.5, is required. Previous training in entomology is unnecessary. It is recommended that students who intend to study for advanced degrees in entomology gain a thorough grounding in the physical and biological sciences, mathematics, and the liberal arts. Spring admission is possible for special circumstances.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and serving as a teaching assistant for at least two semesters is required.

Financial Aid

Graduate student awards are available, including teaching and research assistantships. In addition, fellowships and traineeships are offered by the Graduate College and the School of Integrative Biology. A single application to the department is sufficient for consideration for all awards currently available.

for the degree of Master of Science in Entomology

A candidate for the M.S. degree is expected to become knowledgeable in entomology through coursework and independent research and to complete a research thesis in an area of interest chosen in consultation with an adviser.

For additional details and requirements refer to the department's Graduate Handbook (http://www.life.illinois.edu/entomology/handbook.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master's and doctoral degrees. These are in a variety of specialized areas through departmental programs which are described on this page.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements
The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the bachelor's degree are substantially equivalent to those of the University of Illinois and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD) is required.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid
Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 40P is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research
Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

- construction  
- environmental  
- geotechnical  
- materials  
- management  
- engineering  
- and science  
- hydrology  
- engineering  
- and hydraulic  
- engineering  
- • structural  
- • transportation  
- • sustainable  
- • energy-  
- • societal risk  
- • infrastructure  
- • environment  
- • mitigation  
- • sustainability

More information about these specialized areas may be found at the department's research Web site (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department's research centers Web site (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation's best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities Web site (https://cee.illinois.edu/research/research-facilities/).

Other Graduate Programs in the Department of Civil & Environmental Engineering

degrees:

Information listed in this catalog is current as of 02/2021
Opportunity also exists for specializing in energy and sustainability engineering via the

Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

The degree requirements for the online programs are the same as for the on-campus non-thesis MS program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The MS degree in Environmental Engineering offered online includes five core courses in Environmental Engineering and electives chosen in Environmental Engineering, Hydrology and Hydraulic Engineering, or other areas of Civil Engineering to fulfill the degree requirements.

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

<table>

Learning Outcomes: Environmental Engineering, MS

Learning Outcomes for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student's professional and scientific ethical responsibilities;
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level

Information listed in this catalog is current as of 02/2021
Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.

Admission Requirements
The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the master's degree are substantially equivalent to those of the University of Illinois, provided the applicant's preparation is appropriate for advanced study in his or her chosen major field and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD) is required. For additional information, see the department Web site (http://cee.illinois.edu/programs/Grad/GradApps/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid
Financial aid is available in the form of fellowships and research and teaching assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research
Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

• construction • environmental • geotechnical • structural • materials • transportation • sustainable • energy • societal • engineering • engineering • environment • infrastructure • water • risk • systems • sustainability

More information about these specialized areas may be found at the department's research Web site (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department's research centers Web site (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation's best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities Web site (https://cee.illinois.edu/research/research-facilities/).

Other Graduate Programs in the Department of Civil & Environmental Engineering
degrees:

Environmental Engineering in Civil Engineering, MS (p. 739)
optional concentrations:
  • Computational Science and Engineering (p. 1073)
Civil Engineering, MS (p. 643)
optional concentrations:
  • Computational Science and Engineering (p. 1073)
Civil Engineering, PhD (p. 645)
optional concentrations:
  • Computational Science and Engineering (p. 1073)

Railway Engineering (p. 732)
available for:
  • Engineering, MENG (p. 728)

joint programs:

Civil Engineering, MS & Architecture, MARCH (p. 1125),
(Construction Management or Structures)
Civil Engineering, MS & Urban Planning, MS (p. 1140)
Opportunity also exists for specializing in energy and sustainability engineering via the

Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Doctor of Philosophy in Environmental Engineering in Civil Engineering

The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master's degree. The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

Information listed in this catalog is current as of 02/2021
For additional details and requirements refer to the department’s Graduate Handbook (http://cee.illinois.edu/online-graduate-handbook/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

### Learning Outcomes: Environmental Engineering, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Environmental Engineering in Civil Engineering

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student’s professional and scientific ethical responsibilities;
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level

### European Union Studies, MA

for the degree of Master of Arts in European Union Studies

Information listed in this catalog is current as of 02/2021
The European Union Center administers an interdisciplinary program of language and area courses leading to a Master of Arts degree. The program is intended to serve four constituencies of students: those working on the completion of the 5-year BA/MA program; those seeking to combine area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those seeking a stand-alone, professional degree.

Graduate Degree Programs in European Union Studies
European Union Studies, MA (p. 743)
European Union Studies Minor (p. 1106)

Admission
Applicants for admission to the Master of Arts program should have completed at least two years of a language of the European Union and hold a bachelor’s degree from an accredited institution of higher education. The Graduate Record Examination (GRE), or another post-secondary examination such as the LSAT, GMAT, MCAT, is required and international students are required to take the Test of English as a Foreign Language (TOEFL), with minimum scores set by the Graduate College. All admission requirements of the Graduate College also apply.

Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal quantitative, and written) or other post-secondary examination scores, a writing sample, and three letters of reference. Applicants must also submit to the European Union Center a statement of purpose showing how the M.A. degree in European Union Studies fits into their educational and career plans. This statement must show that the interdisciplinary nature of the MA in EU Studies will serve the student better than a disciplinary degree. Admission is ordinarily limited to the fall semester, but exceptions are made for spring and summer admission.

for the degree of Master of Arts in European Union Studies

Students pursuing the thesis option are required to conduct an oral thesis defense before an MA thesis committee. The thesis committee must consist of at least two individuals, with a minimum of one individual drawn from the EU Center Executive Staff. The thesis advisor must be a member of the Graduate Faculty.

For additional details and requirements refer to the department’s graduate degree requirements (http://euc.illinois.edu/academic/degree.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum 500-level Hours Required overall:

At least two substantial research papers on European Union topics as part of course work, when relevant to the candidate’s professional orientation, are required.

Coursework must come from at least three different academic units
Graduate Degree Programs in Finance

Majors

Finance, MS (p. 745)

optional concentrations for the Finance, MS:
- Accountancy (p. 1057), Business & Public Policy (p. 1071), Corporate Governance & International Business (p. 1074), Data Analytics in Finance (p. 1076), Information Technology & Control (p. 1083)
- Financial Engineering, MS (p. 747) (administered by Finance and Industrial & Enterprise Systems Engineering (https://msfe.illinois.edu/))

optional concentration for the Financial Engineering, MS:
- Data Analytics in Finance (p. 1076)

Finance, PhD (p. 746)

Minors

Finance (p. 1107)

Concentrations

- Data Analytics in Finance (p. 1076)
- Finance (p. 1080)
- Business & Public Policy (p. 1071)
- Real Estate (p. 1087)

Terminal masters: The Master of Science in Finance (terminal master’s) is a 15 month program designed primarily for practitioners in finance-related positions. The program is designed to be completed in 15 months, beginning in August.

Admission requirements and other details about the program can be found at https://giesbusiness.illinois.edu/msf (https://giesbusiness.illinois.edu/msf/).

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). To be admitted without deficiencies, the applicant should have completed one undergraduate course each in computer science, financial accounting, managerial accounting, and principles of economics as well as two courses each in calculus, probability and statistics, and financial management. Courses to remove deficiencies may be taken after beginning the program, but such courses will not count toward the departmental requirements for graduation. All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or IBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant’s qualifications for graduate study.

The first stage toward the degree of Doctor of Philosophy ends when the candidate completes certain minimum coursework, fulfillment of other departmental requirements, and successful passing of a qualifying examination. The second stage requires successful completion and presentation of an initial research paper. The third stage includes research and preparation of the dissertation. Completion of this stage requires an oral preliminary thesis proposal defense and an oral final dissertation defense.

The minimum number of graduate hours required for all stages combined is 64. A student plans courses and research with his or her advisor. Consideration is given to previous academic training, career objective and the general requirements of the Graduate College and the Department. The student should become familiar with these requirements and satisfy them as soon as possible.

The Doctor of Philosophy is primarily a research degree, and the candidate must demonstrate the capacity for independent research by producing an original thesis on a topic within his or her major field of study. The subject of the thesis must be reported to the doctoral committee and to the Graduate College at the time of the preliminary examination (proposal defense). The candidate is admitted to the final oral examination by the dean of the Graduate College upon completion of the dissertation and the recommendation of the department.

The doctoral program generally begins in the fall semester. The application period typically runs October 1 through February 15.

Additional details on the program may be found at https://giesbusiness.illinois.edu/programs/doctoral/finance

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or iBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant’s qualifications for graduate study.

**Contact:** Application Inquiries (msfe-apply@illinois.edu)

**Address:** 3252 Digital Computer Lab, 1304 W Springfield Ave, Urbana, IL 61801

**Phone:** (217) 333-3284

**Email:** msfe@illinois.edu

**Financial Engineering (FE)** is the application of quantitative methods to the analysis of financial markets and financial products. The quantitative techniques may include Mathematics, Statistics, Computer Science, Machine Learning, Neural Nets, and generalized Data Analytics. The applications include searching for opportunities as well as deriving solutions to financial problems. All financial markets are a subject for FE, from public exchanges to private over-the-counter markets. Similarly, all financial products, from equities, bonds and derivatives to bitcoins are candidates for quantification. An overarching theme for FE involves balancing reward against techniques for the measurement, management, and mitigation of risk.

**Graduate Degree Programs in Financial Engineering**

The Master of Science in Financial Engineering (MSFE) degree program is jointly sponsored by the Department of Industrial and Enterprise Systems Engineering (ISE) (https://ise.illinois.edu) in The Grainger College of Engineering and the Department of Finance (https://giesbusiness.illinois.edu) in the Gies College of Business. Graduates from this program receive the MSFE degree awarded by the Graduate College. The MSFE program complements other graduate programs offered by the sponsoring departments. The Master of Science in Financial Engineering (terminal master’s) can be completed in 15 or 24 months, beginning in August each year. The second and subsequent semesters allow students the flexibility to pursue specialized tracks within the program, such as data analytics and electronic trading. A corporate-sponsored “practicum”, provides students opportunities to address real world financial modeling problems and provides access to state-of-the-art analytic tools and software products.

**Concentrations**

- Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058)
- Data Analytics in Finance (p. 1076)

**Admission**

Applicants to the MSFE Program will have a Bachelor’s degree with one year of calculus, one semester of linear algebra and differential equations, one semester of programming (preferably in C/C++), and one semester of probability and statistics. Knowledge of basic finance and economics is helpful but not necessary. Given its technical emphasis, applicants to this program typically will have completed a Bachelor’s degree in an engineering field, mathematics, physics, computer science,
or economics that provides sufficient preparation to facilitate a fast-paced, in-depth learning environment.

All applicants are expected to have a minimum grade point average of at least 3.25 (A=4.00) for the last two years of undergraduate study and a 3.50 for any previous graduate work completed. Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are required of all applicants. GMAT (https://www.gmac.com/gmat-other-assessments/about-the-gmat-exam/the-gmat-advantage/) scores will also be considered.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

for the degree of Master of Science in Financial Engineering

Covering topics in finance, economics, numerical methods, stochastic calculus, and computer programming, the MSFE is a rigorous, three-semester, 48-credit, resident degree program with a summer internship opportunity. Twelve courses each of 4 graduate credits are required for graduation; they are expected to be taken in sequence in the respective semesters.

For additional details and requirements refer to the program’s Web site (http://msfe.illinois.edu/academics/curriculum.aspx) and the Graduate (http://www.grad.illinois.edu/gradhandbook/) College (http://www.grad.illinois.edu/gradhandbook/) Handbook (http://www.grad.illinois.edu/gradhandbook/).

Other Requirements

Requirement

A minimum of 36 credit hours must be taken from the University of Illinois Urbana-Champaign campus.

Minimum GPA: 2.75

Learning Outcomes: Financial Engineering, MS

Learning Outcomes for the degree of Master of Science in Financial Engineering

1. Comprehension of common financial engineering techniques (toolkit)
2. Ability to identify and apply the appropriate techniques (tools) to real financial engineering opportunities and problems
3. Ability to minimally code to analysis
4. Awareness & knowledge of the financial environment
5. Ability to assess & articulate results to non-technical peers

Food Science and Human Nutrition, MS

for the Master of Science in Food Science and Human Nutrition (on campus & online)

(fshngradadmissions@illinois.edu)

On Campus: Master of Science in Food Science and Human Nutrition, students are required to select a concentration:

Food Science (p. 750)
Human Nutrition (p. 752)

Online: The focus of the online Master of Science in Food Science and Human Nutrition (https://fshn.illinois.edu/online/) is Food Science. Students are not required to select a concentration.
Graduate Degree Programs in Food Science & Human Nutrition

Graduate Majors:
- Food Science & Human Nutrition, MS (p. 748) (on campus & online)
  concentrations:
  - Food Science (p. 750)
  - Human Nutrition (p. 752)
- Food Science and Human Nutrition, MS – Professional Science Master’s (p. 753)
- Food Science and Human Nutrition, PhD (p. 754)
  concentrations:
  - Food Science (p. 756)
  - Human Nutrition (p. 759)

Joint Degree Program:
- Food Science & Human Nutrition, PhD and Master of Public Health, MPH (p. 1126)

Research Areas
In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- Food processing, engineering, and biotechnology
- Food ingredients, properties, and interactions
- Food microstructures, micro-carriers, and nanotechnology
- Food chemistry
- Food microbiology and biomass conversion
- Food safety and security
- Sensory sciences
- Dietary quality and food and nutrition patterns for optimal health
- Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
- Nutrition across the life span
- Biochemical and molecular nutrition
- Clinical nutrition
- Community nutrition

For additional information go to fshn.illinois.edu/graduate (http://fshn.illinois.edu/graduate/).

The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to psm.illinois.edu/prospectivestudents/programs/foodscience.htm (http://psm.illinois.edu/prospectivestudents/programs/foodscience.htm).

Admission
In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose. Graduate Record Examination (GRE) scores are required of all applicants, and those whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Minimum TOEFL and IELTS scores can be found at grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c/). Students can be admitted to start in fall, spring, or summer semesters except for the PSM concentration, which admits fall semester only. For information on the role faculty have in the admissions process go to fshn.illinois.edu/graduate/applying (http://www.fshn.illinois.edu/graduate/applying/).

Internship in Dietetics
The Department of Food Science and Human Nutrition offers a dietetic internship for master’s and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program please contact Ms. Jessica Madson (jamadson@illinois.edu).

Online Program
A non-thesis Master of Science in Food Science program is offered via live, synchronous online sessions using distance education technology. The program ensures the same degree of excellence, and courses are instructed by the same faculty, as the on-campus non-thesis program. Courses are typically offered in the evening. For requirements and additional information, please contact Dr. Dawn Bohn at dbrehart@illinois.edu.

Graduate Teaching Experience
Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid
Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. Financial aid for non-PSM graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid for graduate students can be found at fshn.illinois.edu/graduate/financial-aid (http://fshn.illinois.edu/graduate/financial-aid/).

for the Master of Science in Food Science and Human Nutrition - Online Program

Online: Students in online program do not complete a graduate concentration, requirements are shown below.
On Campus: Students in the on campus Master of Science in Food Science and Human Nutrition are required to select a concentration:
Food Science Degree Requirements (p. 750)
Human Nutrition Degree Requirements (p. 752)

For additional details and requirements refer to the department's graduate handbook (http://fshn.illinois.edu/graduate/student-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Food Science & Human Nutrition, MS

Learning Outcomes for the Master of Science in Food Science and Human Nutrition (on campus & online)

A FSHN graduate student:

1. Demonstrates knowledge in at least three areas of expertise (based upon required coursework; see FSHN graduate handbook for areas).
2. Displays effective and relevant written and oral communication skills.
3. Conducts methodical and logical research that addresses key issues in food science and/or human nutrition.
4. Displays professional ethics in scholarly achievements.

e-mail: FSHNGradAdmissions@illinois.edu (fshngradadmissions@illinois.edu)

On Campus: Master of Science in Food Science and Human Nutrition, students are required to select a concentration:
Food Science (p. 750)
Human Nutrition (p. 752)

Online: The focus of the online Master of Science in Food Science and Human Nutrition (https://fshn.illinois.edu/online/) is Food Science. Students are not required to select a concentration.

Graduate Degree Programs in Food Science & Human Nutrition

Graduate Majors:
Food Science & Human Nutrition, MS (p. 748) (on campus & online)
concentrations:
Food Science (p. 750)
Human Nutrition (p. 752)
Food Science and Human Nutrition, MS – Professional Science Master’s (p. 753)
Food Science and Human Nutrition, PhD (p. 754)
concentrations:
Food Science (p. 756)
Human Nutrition (p. 759)

Joint Degree Program:
Food Science & Human Nutrition, PhD and Master of Public Health, MPH (p. 1126)

Research Areas

In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:
• Food processing, engineering, and biotechnology
• Food ingredients, properties, and interactions
• Food microstructures, micro-carriers, and nanotechnology
• Food chemistry
• Food microbiology and biomass conversion
• Food safety and security
• Sensory sciences
• Dietary quality and food and nutrition patterns for optimal health
• Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
• Nutrition across the life span
• Biochemical and molecular nutrition
• Clinical nutrition
• Community nutrition

For additional information go to fshn.illinois.edu/graduate (http://fshn.illinois.edu/graduate/).

The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to psm.illinois.edu/prospectivestudents/programs/foodscience.htm (http://psm.illinois.edu/prospectivestudents/programs/foodscience.htm).

Admission
In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose. Graduate Record Examination (GRE) scores are required of all applicants, and those whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Minimum TOEFL and IELTS scores can be found at grad.illinois.edu/admissions/instructions/04c (http://www.grad.illinois.edu/admissions/instructions/04c/). Students can be admitted to start in fall, spring, or summer semesters except for the PSM concentration, which admits fall semester only. For information on the role faculty have in the admissions process go to fshn.illinois.edu/graduate/apply (http://www.fshn.illinois.edu/graduate/apply/).

Internship in Dietetics
The Department of Food Science and Human Nutrition offers a dietetic internship for master’s and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program please contact Ms. Jessica Madson (jamadson@illinois.edu).

Online Program
A non-thesis Master of Science in Food Science program is offered via live, synchronous online sessions using distance education technology. The program ensures the same degree of excellence, and courses are instructed by the same faculty, as the on-campus non-thesis program. Courses are typically offered in the evening. For requirements and additional information, please contact Dr. Dawn Bohn at dbrehart@illinois.edu.

Graduate Teaching Experience
Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid
Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. Financial aid for non-PSM graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid for graduate students can be found at fshn.illinois.edu/graduate/financial-assistance (http://fshn.illinois.edu/graduate/financial-assistance/).

Doctor of Philosophy in Food Science and Human Nutrition, Food Science Concentration

If a candidate has a master’s degree in a related area, a minimum of 64 graduate hours, including up to 38 graduate hours of thesis research, must be completed. In consultation with the adviser and advisory committee, the remainder of the 64 graduate hours required for the degree consists of courses selected from inside or outside the department that are appropriate for training in the student’s field of specialization. Upon completion of all necessary formal courses and special options, the student is required to take an oral preliminary examination. After passage of the preliminary examination, the student’s activities are primarily devoted to thesis research. Upon submission of the dissertation, the candidate is required to pass a final oral examination before a graduate faculty committee.

For additional details and requirements refer to the department’s graduate handbook (http://fshn.illinois.edu/graduate/student-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Food Processing and Engineering

Information listed in this catalog is current as of 02/2021
Students are required to enroll in another seminar course if they have a conflict that precludes their enrollment in FSHN 597 or NUTR 500. The seminar course may be offered by another department.

Course selection is flexible beyond this list if decided in consultation with advisor/advisory committee.

Non-thesis M.S. degree students must complete the concentration requirements, including select at least 3 hours of 500-level elective and other courses to equal a total of at least 32 hours.

Up to 2 hours for thesis degrees; up to 6 hour for non-thesis M.S. degree.

Additional courses may be required beyond the concentration minimum per Advisory Committee recommendation.

Qualifying Exam Required | Yes
Preliminary Exam Required | Yes
Final Exam/Thesis Defense Required | Yes

---

1. Undergraduate training must include statistics (ACE 261, CPSC 241, ECON 202, MATH 161, PSYC 235, SOC 280, or STAT 100) and basic science courses relevant to the student’s chosen focus (including for example, biochemistry, physical chemistry, microbiology, or material science). These undergraduate courses are not required for admission, but must be completed early in the graduate program and do not count toward concentration requirements. Both M.S. and Ph.D. degrees require at least 12 hours of 500-level course work (including thesis research), and at least 8 of these 12 hours must be in the major field for graduation.

2. Additional courses may be required beyond the concentration minimum, per Advisory Committee recommendations, depending upon student/advisor learning objectives. A student whose prior education includes course work with identical or similar content to those specified above will be guided by their advisor and Advisory Committee regarding the selection of additional course work needed to meet the minimum hours of the FS concentration.

3. Students are encouraged to take new courses, rather than retake required courses they have already taken. If you have already taken a required course at the University of Illinois, it is highly recommended that you do not retake it. No petition is required. If you have taken a very similar course at another university, you are strongly encouraged to petition for acceptance of that course in lieu of the required course. Courses should be selected to expand and strengthen your knowledge in core and related disciplines, and/or to increase your research capabilities. Retaking a course does not meet that objective. For additional advice on this topic, contact your advisor and faculty advisory committee.

---
Food Science & Human Nutrition: Human Nutrition, PhD

Doctor of Philosophy in Food Science and Human Nutrition: Human Nutrition Concentration

---

Dissertation Deposit Required: Yes
Minimum GPA: 3.0

1 For additional details and requirements refer to the department’s program information online (https://business.illinois.edu/accountancy/programs/phd/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Research Areas
In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- Food processing, engineering, and biotechnology
- Food ingredients, properties, and interactions
- Food microstructures, micro-carriers, and nanotechnology
- Food chemistry
- Food microbiology and biomass conversion
- Food safety and security
- Sensory sciences
- Dietary quality and food and nutrition patterns for optimal health
- Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
- Nutrition across the life span
- Biochemical and molecular nutrition
- Clinical nutrition
- Community nutrition

For additional information go to fshn.illinois.edu/graduate (http://fshn.illinois.edu/graduate/).

The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to psm.illinois.edu/prospectivestudents/programs/foodscience.htm (http://psm.illinois.edu/prospectivestudents/programs/foodscience.htm).

Admission
In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose. Graduate Record Examination (GRE) scores are required of all applicants, and those whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Minimum TOEFL and IELTS scores can be found at grad.illinois.edu/admissions/instructions/04c. Students can be admitted to start in fall, spring, or summer semesters except for the PSM concentration, which admits fall semester only. For information on the role faculty have in the admissions process go to fshn.illinois.edu/graduate/applying (http://www.fshn.illinois.edu/graduate/applying/).

Internship in Dietetics
The Department of Food Science and Human Nutrition offers a dietetic internship for master’s and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program please contact Ms. Jessica Madson (jamadson@illinois.edu).
Online Program
A non-thesis Master of Science in Food Science program is offered via live, synchronous online sessions using distance education technology. The program ensures the same degree of excellence, and courses are instructed by the same faculty, as the on-campus non-thesis program. Courses are typically offered in the evening. For requirements and additional information, please contact Dr. Dawn Bohn at dbrehart@illinois.edu.

Graduate Teaching Experience
Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid
Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. Financial aid for non-PSM graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid for graduate students can be found at fshn.illinois.edu/graduate/financial-assistance.

Doctor of Philosophy in Food Science and Human Nutrition: Human Nutrition Concentration

If a candidate has a master’s degree in a related area, a minimum of 64 graduate hours, including up to 38 graduate hours of thesis research, must be completed. In consultation with the adviser and advisory committee, the remainder of the 64 graduate hours required for the degree consists of courses selected from inside or outside the department that are appropriate for training in the student’s field of specialization. Upon completion of all necessary formal courses and special options, the student is required to take an oral preliminary examination. After passage of the preliminary examination, the student’s activities are primarily devoted to thesis research. Upon submission of the dissertation, the candidate is required to pass a final oral examination before a graduate faculty committee.

For additional details and requirements refer to the department’s graduate handbook (http://fshn.illinois.edu/graduate/student-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

1 Undergraduate training must include statistics (ACE 261, CPSC 241, ECON 202, MATH 161, PSYC 235, SOC 280, or STAT 100), nutrition (equivalent to FSHN 220), and systemic physiology (equivalent to MCB 246). These undergraduate courses are not required for admission, but must be completed early in the graduate program and do not count toward concentration requirements. M.S. degrees require at least 12 hours of 500-level course work (including thesis research), and at least 8 of these 12 hours must be in the major field for graduation.

2 Additional courses may be required beyond the concentration minimum, per Advisory Committee recommendations, depending upon student/advisor learning objectives. A student whose prior education includes course work with identical or similar content to those specified above will be guided by their advisor and Advisory Committee regarding the selection of additional course work needed to meet the minimum hours of the HN concentration.
Students are encouraged to take new courses, rather than retake required courses they have already taken. If you have already taken a required course at the University of Illinois, it is highly recommended that you do not retake it. No petition is required. If you have taken a very similar course at another university, you are strongly encouraged to petition for acceptance of that course in lieu of the required course. Courses should be selected to expand and strengthen your knowledge in core and related disciplines, and/or to increase your research capabilities. Retaking a course does not meet that objective. For additional advice on this topic, contact your advisor and faculty advisory committee.

Students enrolled in the Graduate Dietetic Internship may count up to 5 hours of FSHN 590 or FSHN 591 towards 500-level course requirements.

Students are required to enroll in another seminar course if they have a conflict that precludes their enrollment in FSHN 597 or NUTR 500. The seminar course may be offered by another department.

Course selection is flexible beyond this list if decided in consultation with advisor/advisory committee.

Non-thesis M.S. students must complete the concentration requirements, including at least 6 hours of 500-level courses, and enroll in other courses to total at least 32 hours.

Up to 2 hours for thesis degrees; up to 6 hour for non-thesis M.S. degree.

- email: french-italian@illinois.edu

The Department of French and Italian offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees in French and in Italian. Candidates for the master’s degree may specialize in French Studies, French Linguistics, French Language Learning, or Italian. Candidates for the doctoral degree in French may choose one of three specializations: French Studies, French Linguistics, or Second Language Acquisition and Teacher Education (SLATE).

The following minors and certificates may be pursued: Cinema Studies (p. 1102), Gender & Women’s Studies (p. 1108), Translation Studies (http://www.translation.illinois.edu), Criticism and Interpretive Theory (https://criticism.english.illinois.edu)

Information listed in this catalog is current as of 02/2021

Admission

French
Students considering admission to the master’s program should usually have had a college major in French. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Italian

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of graduate training and professionalization. Non-native English speakers must first pass a test of their oral English ability. See www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm).

Teaching Assistants in French and Italian are required to take FR 505 or ITAL 505 respectively (4 hours) as part of their contractual obligation. The course does not count toward the graduate degrees.

Faculty Research Interests
Our faculty (https://frt.illinois.edu/directory/faculty/) possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition; graduates serve on the faculties of numerous colleges and universities both in this country and abroad. See also the faculty's areas of research (https://frt.illinois.edu/research/research-areas/).

Centers, Programs, and Institutes
Our faculty hold appointments with the Departments of African American Studies, Gender and Women's Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Program in Comparative and World Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

Facilities and Resources
A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive (www.library.illinois.edu/kolbp) (http://www.library.illinois.edu/kolbp/).

Financial Aid
All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.
Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included in waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Graduate students in French may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

for the degree of Master of Arts in French

Candidates in French Studies must take an examination based on a reading list covering the fields of French literature and culture. The written and oral examination in French linguistics is based on a list of readings in linguistics and in literature and/or civilization. The written exam in French linguistics may be substituted by an extended research paper. The examination in French language learning/teaching includes readings in second-language acquisition and teaching methods in addition to selected readings in French literature and/or civilization. Candidates in all programs are required to demonstrate, at the time of admission to selected readings in French literature and/or civilization.

Candidates in French Studies must take an examination based on a reading list covering the fields of French literature and culture. The written and oral examination in French linguistics is based on a list of readings in linguistics and in literature and/or civilization. The written exam in French linguistics may be substituted by an extended research paper. The examination in French language learning/teaching includes readings in second-language acquisition and teaching methods in addition to selected readings in French literature and/or civilization. Candidates in all programs are required to demonstrate, at the time of the master's examination, an ability to communicate effectively in both written and oral French.

For additional details and requirements refer to the department's graduate programs (http://www.french.illinois.edu/grad/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: French, MA

Learning Outcomes for the degree of Master of Arts in French

French Studies Concentration

1. Language: high level of proficiency in written and oral French. Strong command of written and spoken academic French.

2. French Studies: Acquisition of broad knowledge of French and francophone literature and cultures across several centuries. Development of research and interpretive skills. Familiarity with major research questions within the field and with different approaches to those issues. Introduction to major contemporary works of history, philosophy and/or cultural theory in French.

3. Training in theory and methodologies: Introduction to a variety of methodologies and theoretical approaches to texts and their interpretation in English and in French.

4. Teaching: Ability to teach the French language at the beginning and intermediate levels. Effective communication in French to groups of students with various abilities in the language. Work with faculty to design syllabi and appropriate assessment tools.

5. The Profession: Awareness and development of professional skills, including the ability to write and deliver academic conference presentations, generate syllabi, rework seminar papers, write fellowship applications; awareness of issues in the academic job market in French studies.

French Language Learning Concentration

1. Language: Students display an Advanced Mid to Advanced High proficiency in reading, writing, listening, and speaking in French, as per ACTFL (American Council on the Teaching of Foreign Languages) guidelines.

2. Knowledge of Applied Linguistics: Students can recall, relate, and explain facts and theories about the structure and the teaching and learning of French.

3. Research theories and methodologies: Students can understand, recall, relate, and explain foundational research theories and methodologies used in the field of applied linguistics.

4. Teaching: Students are able to comfortably teach elementary levels of French language courses and have basic skills teaching intermediate levels of French language courses, aligning with a communicative approach to teaching and learning, grounded in basic principles of proficiency-oriented curriculum and assessment design.

5. Professionalism: Students demonstrate awareness and development of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field. Work with faculty to design syllabi and appropriate assessment tools.

French Linguistics Concentration

1. Language: Students display Advanced Mid to Advanced High proficiency in reading, writing, listening, and speaking in French, as per ACTFL (American Council on the Teaching of Foreign Languages) guidelines.

2. French Linguistics: Students acquire broad theoretical and factual knowledge of the structure, history, and contemporary usage of the French language in francophone societies. They learn to establish interdisciplinary connections to literature, film, and the teaching of French and show familiarity with major research questions and methodologies in the field. Among students' applied skills are: the ability to conduct research, translate, and interpret in French.

3. Research theories and methods: Students can understand, recall, relate, and explain in English and in French foundational research theories and methodologies used in the field of theoretical and applied linguistics.

4. Teaching: Students are able to comfortably teach elementary levels of French language courses and have basic skills teaching intermediate levels of French language courses, aligning with a communicative approach to teaching and learning and a proficiency-
oriented curriculum and assessment design. Work with faculty to design syllabi and appropriate assessment tools.

5. **The Profession:** Awareness and development of professional skills, including ability to write and deliver academic conference presentations, generate syllabi, rework seminar papers, write fellowship applications; awareness of issues in the academic job market in French Linguistics and Language Learning/Teaching. Students demonstrate awareness and development of ethical and professional skills relevant to their field, including communicative skills for the profession, collegiate demeanor and participation in professional organizations or events.

- Medieval Studies (p. 1085)  
- Romance Linguistics (p. 1088)  
- Second Language Acquisition & Teacher Education (p. 1089)

---

**Admission**

**French**

Students considering admission to the master’s program should usually have had a college major in French. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://www.grad.illinois.edu/Admissions/instructions/04c.cfm). Admission for the spring semester is rare. Students seeking admission to the Ph.D. program with a Master of Arts degree earned elsewhere are expected to have a minimum 3.5 grade point average in graduate coursework. The master’s degree should be in French literature, French studies, or French linguistics. Candidates seeking admission to the Ph.D. specialization in Second Language Acquisition and Teacher Education may hold a Master of Arts in Teaching degree instead.

For more information about how to apply, see https://frit.illinois.edu/admissions/french-graduate-admissions. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

**Italian**

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of graduate training and professionalization. Non-native English speakers must first pass a test of their oral English ability.
Teaching Assistants in French and Italian are required to take FR 505 or ITAL 505 respectively (4 hours) as part of their contractual obligation. The course does not count toward the graduate degrees.

**Faculty Research Interests**

Our faculty possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition; graduates serve on the faculties of numerous colleges and universities both in this country and abroad. See also the faculty’s areas of research ([https://frit.illinois.edu/research/research-areas/](https://frit.illinois.edu/research/research-areas/)).

**Centers, Programs, and Institutes**

Our faculty hold appointments with the Departments of African American Studies, Gender and Women’s Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Program in Comparative and World Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

**Facilities and Resources**

A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive ([http://www.library.illinois.edu/kolbp/](http://www.library.illinois.edu/kolbp/)).

**Financial Aid**

All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.

Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included in waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Graduate students in French may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

**Specialization in French Studies**

The doctoral program in French Studies is designed to prepare specialists in literature and culture. Candidates are required to include courses in textual criticism, linguistics or linguistically oriented textual theory, and French/Francophone literature and culture. Students are expected to demonstrate reading proficiency in one modern foreign language (other than French or English). They may fulfill this requirement by passing a fourth-semester reading course with a grade of B or better or by demonstrating an equivalent ability by examination. Students may choose to complete a minor in Cinema Studies, Gender and Women’s Studies, or to obtain a certificate in Medieval Studies, Translation Studies or in Criticism, and Interpretive Theory.

**Specialization in French Linguistics**

The Ph.D. curriculum in linguistics offers training in French and Romance linguistics in cooperation with the Department of Spanish and Portuguese and the Department of Linguistics. Candidates selecting this option are required to complete course work in linguistic theory, advanced study of French language and culture, and French and Romance linguistics beyond the requirements of the M.A. in French Linguistics. Advanced course work related to the candidate's research area is chosen from courses offered by participating departments in consultation with the advisors in French and Romance Linguistics. Students are expected to demonstrate proficiency in at least one other Romance language and may select a concentration in Romance Linguistics.

**Specialization in French Second Language Acquisition and Teacher Education (SLATE)**

This Ph.D. curriculum in French SLATE combines advanced studies in French with a research focus on some aspect of second language learning and teaching. It is an inter-disciplinary Ph.D. concentration that offers training in a wide range of disciplines related to second language learning and teaching, with a focus on bilingualism, foreign, second, and heritage language teaching and learning. Courses are offered in collaboration with multiple departments and units in the School of...
Literatures, Cultures, and Linguistics, the College of Liberal Arts and Sciences, and the College of Education. Candidates in French selecting this option are required to complete course work in theories of language teaching and acquisition, linguistic theory, and French language and culture beyond the requirements of the M.A. in Language Learning. Advanced course work related to the candidate’s research area is chosen in consultation with the French SLATE advisor.

**Learning Outcomes: French, PhD**

Learning Outcomes for the degree of Doctor of Philosophy in French

---

**French Studies Concentration**

1. **Language:** Near native written and oral proficiency in French. Mastery of written and spoken academic French and English.

2. **French Studies:** Acquisition of broad knowledge of French and francophone literature and cultures across the centuries, with particular expertise in one area or more. Ability to evaluate the field of French Studies, assess the major issues of concern within the field, and evaluate different approaches to those issues. Familiarity with major contemporary works of history, philosophy and/or cultural theory in French.

3. **Training in theory and methodologies:** Strong command of a variety of methodologies and theoretical approaches to texts and their interpretation in English and in French.

4. **Teaching:** Ability to teach French language, literature and culture in a wide variety of undergraduate courses, from beginning to advanced, with broad historical, cultural and linguistic understanding. Effective communication in French to groups of students with various abilities in the language. Work with faculty to design syllabi and appropriate assessment tools.

5. **The Profession:** Mastery of professional skills, including ability to write and deliver academic conference presentations, generate syllabi, rework and submit seminar papers for publication as articles, write book reviews and fellowship applications; readiness for academic job market in French studies, including ability to identify successful strategies and evaluate different types of institutions and their teaching and research needs.

---

**French Linguistics Concentration**

1. **Language:** Students display an Advanced High to Superior proficiency, as well as native likeness in reading, writing, listening, and speaking in both French and English (American Council on the Teaching of Foreign Languages) guidelines.

2. **French Linguistics:** Students can recall, relate, explain, discuss, and utilize theories in the field of French Linguistics to generate research. They acquire broad specialized knowledge in their subfield of specialization.

3. **Research theories and methods:** Students can understand, recall, relate, and explain in English and in French advanced research theories and methodologies used in the field of linguistics.

4. **Teaching:** Students are able to expertly teach a variety of French language and content courses in their field, grounded in principles of proficiency-oriented curriculum and assessment design, as well as in programmatic sequencing.

5. **Professionalism:** Students demonstrate knowledge and application of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field, readiness for the job market, research publications, and presentations at nationally and internationally recognized research conferences.

---

**Second Language Acquisition Concentration**

1. **Language:** Students display an Advanced High to Superior proficiency, as well as native likeness in reading, writing, listening, and speaking in both French and English (American Council on the Teaching of Foreign Languages) guidelines.

2. **Expert knowledge in applied linguistics:** Students can recall, relate, explain, discuss, and utilize theories in the field of applied linguistics to generate research.

3. **Research theories and methodologies:** Students can understand, relate, explain, discuss, and defend their use of advanced and updated research theories and methodologies consistent with research in the field of applied linguistics.

4. **Teaching:** Students are able to expertly teach a variety of French language and content courses, aligning with a communicative approach to teaching and learning, as well as with the specificity of a major in French, grounded in principles of proficiency-oriented curriculum and assessment design, as well as in programmatic sequencing.

5. **Professionalism:** Students demonstrate knowledge and application of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field, readiness for the job market, research publications, and presentations at nationally and internationally recognized research conferences.

Graduate College Admissions (https://grad.illinois.edu/admissions/apply/)

Graduate Degree Programs in Geography & Geographic Information Science

---

*Information listed in this catalog is current as of 02/2021*
We offer a program leading to the Master of Arts in geography with the following specialization:

- **Cities, Space, and Society**
  Urban health and quality of life; Urban governance and politics; Race, class, and city policing; Critical studies of urban transportation and mobilities; Global north and south; Neoliberalization

**Admission**

Students applying for admission to the master's program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required. GRE scores are not required or evaluated for admission to our graduate programs.

**Assistantships and Fellowships**

Geography graduate students are usually supported and receive tuition/fee waivers through teaching assistantships, research assistantships, or fellowships.

**Graduate Teaching Experience**

Although previous teaching experience is not a Graduate College requirement, it is considered an important part of the graduate experience in this program. We have implemented a professionalization program in our department, where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several graduate students have also served as lead instructor for several of our introductory undergraduate courses.

**Map and Geography Library**

The University Library has a substantial collection of geography books and journals. Most of the new and more recent books are located in the Social Sciences, Health, and Education Library (SSHEL); nearly all geography journals are available full-text through the University Library’s website. The Map Library holds a collection of over 626,000 maps and aerial photographs. Additionally, the Map Library houses an extensive collection of books on cartography and geographic information science and the University Library’s Scholarly Commons can help students locate and collect geospatial data.

**for the degree of Master of Arts in Geography**

For additional details and requirements refer to the department’s Graduate Programs (http://www.geog.illinois.edu/students/grad/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

**Learning Outcomes: Geography, MA**

Learning Outcomes for the degree of Master of Arts in Geography

1. All graduate students will have a fundamental understanding of the history and philosophies of geography in all its diversity and breadth.
2. All graduate students will have knowledge of the latest trends and developments in geography as social science, a discipline
increasingly rooted in geographic information science, and physical science.

3. All graduate students will have a deep and nuanced comprehension of the latest conceptual developments in their selected research areas.

4. All graduate students will have the ability to formulate a research problem, know the proper conceptual tools and methods to appropriately address it, and properly place it in evolving, relevant literature.

5. All graduate students will have a strong knowledge of proper ethical conduct in the performance and completion of advanced research.

Geography, MS

for the degree of Master of Science in Geography

Department Head: Dr. Shaowen Wang
Director of Graduate Studies: Dr. Brian Jefferson
website: ggis.illinois.edu (http://www.geog.illinois.edu/)
email: geography@illinois.edu
phone: (217) 333-1880
Office address:
2044 Natural History Building
1301 W. Green Street
Urbana, IL 61801

College of LAS website (https://LAS.illinois.edu/)
Graduate College Admissions (https://grad.illinois.edu/admissions/apply/)

Successful degree candidates with backgrounds in physical geography or GIS are recommended for a Master of Science; others receive a Master of Arts.

Graduate Degree Programs in Geography & Geographic Information Science

Geography, MA (p. 766)
Geography, MS (p. 768)
concentrations:
- Geographic Information Science - Professional Science Master’s (p. 769)
- Computational Science & Engineering (p. 1073)
Geography, PhD (p. 770)
concentration:
- Computational Science & Engineering (p. 1073)

We offer a program leading to the Master of Science degree in geography with the following specializations:

- Cities, Space, and Society
  Urban health and quality of life; Urban governance and politics; Race, class, and city policing; Critical studies of urban transportation and mobilities; Global north and south; Neoliberalization

- Geographic Information Science
  Geographic information systems; Dynamic modeling of ecological and social systems; Geocomputation and CyberGIS; Aerial photo analysis; Remote sensing; Inter-regional input-output modeling; Regional science; Spatial analysis

- River, Watershed, and Landscape Dynamics
  Fluvial geomorphology; Watershed science and management; Aerial photo analysis; Ecosystem dynamics

Admission

Students applying for admission to the master’s program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required. PhD candidates are generally expected to have at least a 3.5 average in previous graduate work. GRE scores are not required or evaluated for admission to our graduate programs.

Assistantships and Fellowships

Geography graduate students are usually supported and receive tuition/fee waivers through teaching assistantships, research assistantships, or fellowships.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. We have implemented a professionalization program in our department, where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several of our graduate students have also had the opportunity to lead introductory Geography & GIS courses.

Facilities and Resources

The department also includes several state-of-the-art research laboratories maintained by individual faculty members. The CyberInfrastructure and Geospatial Information (CIGI) Lab (https://cigi.illinois.edu/), housed in the department, researches and develops cutting-edge cyberinfrastructure to advance geospatial science and technologies. The department also sponsors the CyberGIS Center for Advanced Digital & Spatial Studies (https://cybergis.illinois.edu/) whose mission is to empower advanced digital and spatial studies through innovation of CyberGIS technologies and applications. The lab houses several high performance computers and servers for performing computationally intensive geographic analysis and problem solving in various research, education, and outreach contexts.

Map and Geography Library

The University Library has a substantial collection of geography books and journals. Most of the new and more recent books are located in the Social Sciences, Health, and Education Library (SSHEL) (https://www.library.illinois.edu/sshel/); nearly all geography journals are available full-text through the University Library's website. The Map Library holds a collection of over 626,000 maps and aerial photographs. Additionally, the Map Library houses an extensive collection of books on cartography and geographic information science. Map Library and University Library Scholarly Commons (https://www.library.illinois.edu/sc/) staff can also help students locate geospatial data.

**College of LAS website**  
**Graduate College Admissions**  
**Illinois Professional Science Master's**

This program is designed for careers in business management using geospatial technologies. Students build a flexible, cross-disciplinary expertise around a strong Geographic Information Science core, while acquiring business knowledge and professional skills. The business curriculum includes technology management, marketing, entrepreneurship, finance, project and/or process management. PSM students typically complete the program in 18 months consisting of 3 full-time, on-campus semesters and a summer internship. Graduates are awarded a master's degree in geography with the Professional Science Master's in GIS concentration.

**Admission**

Candidates for admission must have a bachelor's degree from an accredited U.S. institution, or comparable degree from a recognized institution abroad with a GPA of 3.0 (4.0 scale) for the last 60 hours of undergraduate or graduate coursework. Application requirements include: three letters of recommendation, proof of funding, and TOEFL or IELTS scores for non-native English speakers. Transfer credit from Illinois or
other institutions is not permitted. Please visit the "Graduate College Admissions" link above for complete application details. **GRE scores are not required or evaluated for admission to this program.**

**Financial Aid**

Illinois PSM students may not hold assistantships or other tuition/fee waiver-generating appointments, but may be eligible for student loans and graduate hourly appointments. Statutory waivers and tuition scholarships are accepted.

For the degree of Master of Science in Geography, Geographic Information Science – Professional Science Master's

For additional details and requirements for all degrees, please refer to the program's Graduate Degree Requirements ([https://psm.illinois.edu/gis/](https://psm.illinois.edu/gis/)) and the Graduate College Handbook ([http://www.grad.illinois.edu/gradhandbook/](http://www.grad.illinois.edu/gradhandbook/)).

---

**Learning Outcomes: Geography, PSM**

Learning Outcomes for the degree of Master of Science (MS) in Geography, with Professional Science Master's in Geographic Information Science Concentration

1. All PSM graduate students will have a firm understanding of the theories and applications of geographic information science and all its diversity and development trends.
2. All PSM graduate students will have proficiency in at least one GIS toolbox and will have the technical skills for data manipulation, editing, and geospatial data visualization.
3. All PSM graduate students will be able to effectively apply critical geospatial thinking to address real-world problems.
4. All PSM graduate students will acquire foundational business knowledge and professional skills to work as a geospatial analyst in a pertinent professional team environment.
5. All PSM graduate students will have a strong knowledge of proper ethical conduct in the context of developing and executing geospatial solutions.

Students applying for admission to the master’s program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required. PhD candidates are generally expected to have at least a 3.5 average in previous graduate work. GRE scores are not required or evaluated for admission to our graduate programs.

**Assistantships and Fellowships**

Geography graduate students are usually supported and receive tuition/fee waivers through teaching assistantships, research assistantships, or fellowships.

**Graduate Teaching Experience**

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. We have implemented a professionalization program in our department, where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several of our graduate students have also had the opportunity to lead introductory Geography & GIS courses.

**Facilities and Resources**

The department also includes several state-of-the-art research laboratories maintained by individual faculty members. The CyberInfrastructure and Geospatial Information (CIGI) Lab (https://cigi.illinois.edu/), housed in the department, researches and develops cutting-edge cyberinfrastructure to advance geospatial science and technologies. The department also sponsors the CyberGIS Center for Advanced Digital & Spatial Studies (https://cybergis.illinois.edu/) whose mission is to empower advanced digital and spatial studies through innovation of CyberGIS technologies and applications. The lab houses several high performance computers and servers for performing computationally intensive geographic analysis and problem solving in various research, education, and outreach contexts.

**Map and Geography Library**

The University Library has a substantial collection of geography books and journals. Most of the new and more recent books are located in the Social Sciences, Health, and Education Library (SSHEL) (https://www.library.illinois.edu/sshel/); nearly all geography journals are available full-text through the University Library’s website. The Map Library holds a collection of over 626,000 maps and aerial photographs. Additionally, the Map Library houses an extensive collection of books on cartography and geographic information science. Map Library and University Library Scholarly Commons (https://www.library.illinois.edu/sc/) staff can also help students locate geospatial data.

**for the degree of Doctor of Philosophy in Geography**

For additional details and requirements refer to the department’s Graduate Programs (http://www.geog.illinois.edu/grad/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

## Learning Outcomes: Geography, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Geography

1. All graduate students will have a fundamental understanding of the history and philosophies of geography in all its diversity and breadth.
2. All graduate students will have knowledge of the latest trends and developments in geography as social science, a discipline increasingly rooted in geographic information science, and physical science.
3. All graduate students will have a deep and nuanced comprehension of the latest conceptual developments in their selected research areas.
4. All graduate students will have the ability to formulate a research problem, know the proper conceptual tools and methods to appropriately address it, and properly place it in evolving, relevant literature.
5. All graduate students will have a strong knowledge of proper ethical conduct in the performance and completion of advanced research.

## Geology, MS

for the degree of Master of Science in Geology

Students in the Master of Science program can follow the “standard” (or thesis) option or the “applied geology” (or non-thesis) option. The non-thesis option is intended as a terminal degree for students preparing for professional work in environmental and engineering geology or in applied geophysics and who have already been admitted to the program. We do not currently accept new students for the non-thesis master’s degree. Admitted students must declare their intent to pursue the non-thesis option at least one semester prior to completing degree requirements.

### Head of Department

Thomas Johnson  
Director of Graduate Studies: Lijun Liu  
Department website: https://www.geology.illinois.edu/  
College website: https://las.illinois.edu/  
Overview of Graduate College Admissions & Requirements: https://grad.illinois.edu/admissions/apply/  
Department contact: Lana Holben  
Department office: 3028 Natural History Building, 1301 W. Green Street, Urbana, IL 61801  
Phone: (217) 333-3540  
Email: holben@illinois.edu

### Admission

The admission requirements of the Graduate College apply. In addition, scores for the aptitude test of the Graduate Record Examination (GRE) are required for admission to graduate work in geology, as well as completion of at least one year each of study in college-level calculus, chemistry, and physics. For more information, write to the department contact. Under special circumstances, students can be admitted at the beginning of the spring term.

### Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

### Financial Aid

Candidates for graduate degrees are usually supported through fellowships, research assistantships, teaching assistantships, or work-study programs. Fellowships and assistantships include tuition and service fee waivers. Awards for financial assistance are based principally on a candidate’s academic record, statement of plans, and letters of reference. Continuation of financial aid depends on student performance and, in the case of teaching assistants, on the receipt of good evaluations. Some assistants are appointed by the State Geological Survey located on campus.

400 level coursework is limited to 8 hours required in any of the options of the undergraduate curriculum in geology and geophysics at Urbana-Champaign

All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 or more graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.

### Learning Outcomes: Geology, MS

Learning Outcomes for the degree of Master of Science in Geology

1. All graduate students will have a broad understanding of basic foundational theories and phenomena that describe the makeup and functioning of the Earth, across the fields of geology and geophysics. Students should have mastered all areas at the level of GEOL 107 and 208, and should have mastered areas close to their area of specialty at the level of the core classes (e.g., 400-level) of our undergraduate curriculum.

2. All graduate students will have a high level of expertise (beyond the level of our undergraduate program) in their specialized research area within geoscience and any related sciences, and the ability to apply this expertise, along with theoretical and technical skills, to address new scientific questions in that area.

3. All graduate students will have knowledge of the recent development of their specialized area of research and current major research directions and questions.

4. Ph.D. students will have mastery of their specialized area of research and the ability to identify new research directions that will advance the area of research.

5. All graduate students will have the ability to work independently to develop a research project and creatively answer the questions central to the project.

6. Ph.D. students will have the ability to identify and formulate a research problem, demonstrate the value of its solution in advancing knowledge, and develop a creative approach toward solving that problem.

7. All graduate students will have ethically responsible and effective communication skills, written and verbal, at a professional scientific level.

### Geology, PhD

for the degree of Doctor of Philosophy in Geology

Information listed in this catalog is current as of 02/2021
Ph.D. students are evaluated by three oral examinations: a qualifying examination, a preliminary examination, and a final examination. The qualifying examination tests breadth of knowledge as well as the ability to define and defend a research proposal in a specialized field at an early stage of graduate study. The preliminary examination tests advanced knowledge in a specialized field and the ability to define and defend a Ph.D. dissertation proposal. The final examination tests the ability to complete and defend Ph.D. dissertation research.

Graduate Degree Programs in Geology

Geology, MS (p. 772)
Geology, PhD (p. 773)

The Department of Geology offers programs leading to the Master of Science in Geology and the Doctor of Philosophy in Geology. Students have a wide variety of choices in their courses and research programs. Departmental research programs include many aspects of geology, geochemistry, and geophysics.

Admission

The admission requirements of the Graduate College apply. In addition, scores for the aptitude test of the Graduate Record Examination (GRE) are required for admission to graduate work in geology, as well as completion of at least one year each of study in college-level calculus, chemistry, and physics. For more information, write to the graduate secretary. Under special circumstances, students can be admitted at the beginning of the spring term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Candidates for graduate degrees are usually supported through fellowships, research assistantships, teaching assistantships, or work-study programs. Fellowships and assistantships include tuition and service fee waivers. German, MA

for the degree of Master of Arts in German

acting head of department: Laurie Johnson
director of graduate studies: Anke Pinkert
department website: http://www.germanic.illinois.edu
college website: https://las.illinois.edu/
overview of graduate college admissions & requirements: Graduate Admissions (https://grad.illinois.edu/admissions/apply/)
overview of college admissions & requirements: department office: 2090 Foreign Languages Building, 707 South Mathews Avenue, Urbana, IL 61801
phone: (217) 333-2020
e-mail: germanic@illinois.edu

Graduate Degree Programs in Germanic Languages & Literatures

German, MA (p. 775)
concentration:
  Medieval Studies (p. 1085)
German, PhD (p. 777)
concentration:
  Medieval Studies (p. 1085) Second Language Acquisition & Teacher Education (p. 1089)

The Department of Germanic Languages and Literatures offers graduate programs leading to the degrees of Master of Arts in German, and Doctor of Philosophy in German. Students in the department may choose an additional specialization in Cultural Studies and Interpretive Research (http://www.germanic.illinois.edu/graduate/) or a concentration in Medieval Studies. Candidates for the Ph.D. in German may additionally obtain a certificate in Second Language Acquisition and Teacher Education (http://www.slate.uiuc.edu/) (SLATE Certificate).

Admission

Applicants should apply online (www.grad.illinois.edu/admissions/apply/ (http://www.grad.illinois.edu/admissions/apply/)) and submit a statement of purpose, three letters of recommendation and a sample of their written work in English or German or both. For admission to the Master of Arts program, the writing sample might be a term paper, and for admission to the doctoral level, a master’s thesis or seminar paper. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required. The applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking subsection of the iBT with a minimum score of 24 (see www.grad.illinois.edu/
Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c/)

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Research Interests
The department faculty includes nationally and internationally recognized scholars in all areas of research within the field, from older and modern German language, literature, and culture to Scandinavian languages, literatures and cultures. Some of the current research areas of faculty encompass (but are not limited to) Arctic Studies, Literature and Music, Literature and Medicine, Migration and Multilingualism, Film and Visual Studies, Digital Humanities, Memory Studies, and Intersectional Studies of Race, Gender, and Sexuality. We offer courses on topics in German and Scandinavian languages, literatures, and cultures across all periods, including historical and synchronic Germanic linguistics, and German language pedagogy. The University Library has one of the nation's outstanding collections of works pertaining to study and research in Germanic literatures of all periods and in Germanic and general linguistics.

Financial Aid
All students accepted into the program have financial support, usually in the form of a Teaching Assistantship (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

The department has contacts with a variety of universities and institutions in German-speaking countries; these cooperative endeavors also include arrangements for graduate students to study and teach abroad.

For continuing graduate students, the awarding of financial aid of all types is contingent upon making satisfactory progress toward a degree.

for the degree of Master of Arts in German
Applicants should have completed undergraduate studies similar to the concentration in German at the University of Illinois at Urbana-Champaign, have a grade point average of 3.0 (A = 4.0) for the last 60 hours of undergraduate coursework, and be able to follow lectures in the German language. Acquaintance with German history and culture in their relation to the general European background is desirable. Admission to the program is on a competitive basis.

Candidates for the Master of Arts degree may emphasize either German literature or linguistics. All candidates must take courses in both literature and linguistics.

Learning Outcomes: German, MA

Learning Outcomes for the degree of Master of Arts in German

1. **Disciplinary knowledge, both factual and analytical.** Ours is a very comprehensive graduate program in literature and culture of all periods, visual studies, and linguistics, in which we apply theoretical, digital, and historiographic methods and approaches. We require that students situate their disciplinary knowledge within an interdisciplinary and multicultural context. Graduates will have comprehensive factual knowledge of German literary-cultural periods, movements, authors, and linguistics, as well as the ability to use contemporary tools of analysis. They are able to position themselves within scholarly discourses: broadly at the M.A. level, and, at the Ph.D. level, within their specialties. They express this ability in writing and oral presentation (see outcomes #2 and #4). The program’s foundational course (GER 510) covers learning to conduct research in a tier-one research library, techniques of literary analysis and critical approaches, conventions of scholarly writing, use of bibliographic tools, and learning about the profession. Each subsequent course in the program deepens this knowledge and is designed for students to familiarize themselves with methods of systematic literary study that can yield original findings and practice oral and written scholarly communication.

2. **Research and writing expertise.** Students are familiar with fundamental research tools in the humanities as well as tools specific to the study of German literature, culture, and linguistics. They can sustain a nuanced argument in academic writing and can produce well-written academic texts in English and in German. In their writing, they display an awareness of the audience and an understanding of how textual choices reflect coherent argumentation. Students know how to conduct research and understand the value of multiple-draft writing. They know how to use proper citation, how to evaluate print and online sources, and they understand and avoid plagiarism. Our students are thoroughly trained in theoretical, historical, and comparative methodologies of research and writing. From the start, students learn scholarly conventions, especially for footnotes and bibliography, including intensive library workshops to become acquainted with key research resources. Students learn and model critical approaches to a literary text through close readings, analysis, and interpretation of key passages in online posts, class presentations, and informal and formal writing; and students learn to develop several possible approaches to literary interpretation and criticism.

3. **Teaching preparedness and praxis.** Our graduate students participate in a thorough teacher-training program that includes a graduate seminar on teaching methodologies and approaches(GER 582), which trains students in pedagogical best practices as well as in current topics of interest in the field. Students receive ongoing, consistent mentorship from the Director of the Basic Language Program as well as from all faculty members, through a structured system of classroom observations and discussions. They teach across the curriculum, in German, and in English; they teach language as well as literature/culture courses. Students are acquainted with leading language teaching and learning theories, and consider the relationship of those theories to pedagogy. They understand the curricular and institutional contexts within which teaching and learning take place. Their German skills are at a near-native level, commensurate with the demands of the language classroom; in courses taught in English, our students are able to teach writing and argumentation at a very advanced level. Students leave our program ready to teach in any type of German curriculum or institutional context.

4. **Professional development.** Our students are able to submit and present conference papers successfully; they receive guidance in essential conference behavior, including acting as a respondent and handling question-answer sessions. They gain experience in presenting research by participating in our department lecture forum. They can write abstracts, apply for grants, and are aware of the relevant professional organizations and the advantages of membership. They receive training in professional ethics. They are mentored in preparation for the academic and non-academic job market and in interviewing for a variety of positions. Their German and English language skills are excellent. Ability in German is supported by participation in departmental exchange programs and help with grant applications to spend time researching and/or teaching in German-speaking countries. In the program’s foundational course GER 510, students study the ethics of the profession, and they learn about the profession by writing a professional email, web page content, a CV, MA/PhD reading lists, a grant application, and a conference abstract.

5. **Mobility and academic exchange.** Students all have substantial experience abroad. They gain this experience by participating in one of our departmental exchanges with German universities and/or by spending time in a German-speaking country conducting research with the support of an external grant (e.g., Fulbright, German Academic Exchange Service). The faculty mentors students through the process of writing grant applications. Our exchanges are bidirectional—we host students here and send them abroad, which means that the graduate students here in Illinois have consistent opportunities to interact with German-speaking visitors.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

Research Interests

The department faculty includes nationally and internationally recognized scholars in all areas of research within the field, from older and modern German language, literature, and culture to Scandinavian languages, literatures and cultures. Some of the current research areas of faculty encompass (but are not limited to) Arctic Studies, Literature and Music, Literature and Medicine, Migration and Multilingualism, Film and Visual Studies, Digital Humanities, Memory Studies, and Intersectional Studies of Race, Gender, and Sexuality. We offer courses on topics in German and Scandinavian languages, literatures, and cultures across all periods, including historical and synchronic Germanic linguistics, and German language pedagogy. The University Library has one of the nation's outstanding collections of works pertaining to study and research in Germanic literatures of all periods and in Germanic and general linguistics.

Financial Aid

All students accepted into the program have financial support, usually in the form of a Teaching Assistantship (see www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm)).

The department has contacts with a variety of universities and institutions in German-speaking countries; these cooperative endeavors also include arrangements for graduate students to study and teach abroad.

For continuing graduate students, the awarding of financial aid of all types is contingent upon making satisfactory progress toward a degree.

for the degree of Doctor of Philosophy in German

Applicants must meet the admission standards outlined for the Master of Arts and, in addition, hold a Master of Arts in German (or equivalent) with a graduate grade point average of 3.5 (A = 4.0). Admission to the program is on a competitive basis.

Candidates for the Ph.D. in German may specialize in older German literature, modern German literature, Germanic linguistics, or Scandinavian literature.

Students working toward the Ph.D. degree must have completed all requirements for the Master of Arts degree given above and must complete an additional 40 graduate hours of coursework approved by the graduate adviser. At least 32 graduate hours must be for courses in Germanic Languages and Literatures. No more than 8 hours of credit in 400 level courses beyond those presented for the M.A. will be counted toward these ten units. The 40 hours may include up to 4 hours of GER 593, but may not include any credit for GER 496 for work taken as independent study. Residence requirements are those of the Graduate College.

Learning Outcomes: German, PhD

Learning Outcomes for the degree of Doctor of Philosophy in German

1. Disciplinary knowledge, both factual and analytical. Ours is a very comprehensive graduate program in literature and culture of all periods, visual studies, and linguistics, in which we apply theoretical, digital, and historiographic methods and approaches. We require that students situate their disciplinary knowledge within an interdisciplinary and multicultural context. Graduates will have comprehensive factual knowledge of German literary-cultural periods, movements, authors, and linguistics, as well as the ability to use contemporary tools of analysis. They are able to position themselves within scholarly discourses: broadly at the M.A. level, and, at the Ph.D. level, within their specialties. They express this ability in writing and oral presentation (see outcomes #2 and #4). The program’s foundational course (GER 510) covers learning to conduct research in a tier-one research library, techniques of literary analysis and critical approaches, conventions of scholarly writing, use of bibliographic tools, and learning about the profession. Each subsequent course in the program deepens this knowledge and is designed for students to familiarize themselves with methods of systematic literary study that can yield original findings and practice oral and written scholarly communication.

2. Research and writing expertise. Students are familiar with fundamental research tools in the humanities as well as tools specific to the study of German literature, culture, and linguistics. They can sustain a nuanced argument in academic writing and can produce well-written academic texts in English and in German. In their writing, they display an awareness of the audience and an understanding of how textual choices reflect coherent argumentation. Students know how to conduct research and understand the value of multiple-draft writing. They know how to use proper citation, how to evaluate print and online sources, and they understand and avoid plagiarism. Our students are thoroughly trained in theoretical, historical, and comparative methodologies of research and writing. From the start, students learn scholarly conventions, especially for footnotes and bibliography, including intensive library workshops to become acquainted with key research resources. Students learn and model critical approaches to a literary text through close readings, analysis, and interpretation of key passages in online posts, class presentations, and informal and formal writing; and students learn to develop several possible approaches to literary interpretation and criticism.

3. Teaching preparedness and praxis. Our graduate students participate in a thorough teacher-training program that includes a graduate seminar on teaching methodologies and approaches (GER 582), which trains students in pedagogical best practices as well as in current topics of interest in the field. Students receive ongoing, consistent mentorship from the Director of the Basic Language Program as well as from all faculty members, through a structured system of classroom observations and discussions. They teach across the curriculum, in German, and in English; they teach language as well as literature/culture courses. Students are acquainted with leading language teaching and learning theories, and consider the relationship of those theories to pedagogy. They understand the curricular and institutional contexts within which teaching and learning take place. Their German skills are at a near-native level, commensurate with the demands of the language classroom; in courses taught in English, our students are able to teach writing and argumentation at a very advanced level. Students leave our program ready to teach in any type of German curriculum or institutional context.

4. Professional development. Our students are able to submit and present conference papers successfully; they receive guidance in essential conference behavior, including acting as a respondent and handling question-answer sessions. They gain experience in presenting research by participating in our department lecture forum. They can write abstracts, apply for grants, and are aware of the relevant professional organizations and the advantages of membership. They receive training in professional ethics. They are mentored in preparation for the academic and non-academic job market and in interviewing for a variety of positions. Their German and English language skills are excellent. Ability in German is supported by participation in departmental exchange programs and help with grant applications to spend time researching and/or teaching in German-speaking countries. In the program’s foundational course (GER 510), students study the ethics of the profession, and they learn about the profession by writing a professional email, web page content, a CV, MA/PhD reading lists, a grant application, and a conference abstract.

5. Mobility and academic exchange. Students all have substantial experience abroad. They gain this experience by participating in one of our departmental exchanges with German universities and/or by spending time in a German-speaking country conducting research with the support of an external grant (e.g., Fulbright, German Academic Exchange Service). The faculty mentors students through the process of writing grant applications. Our exchanges are bidirectional—we host students here and send them abroad, which
Health Administration, MS

for the degree of Master of Science in Health Administration

Department Head: Kim Graber
Director of Graduate Studies: John Kosculek
Interim Director of Program: Justine Kaplan
Graduate Office: Julie Jenkins
Graduate Office Address: 906 South Goodwin Ave, 112 Freer Hall
MC-052, Urbana, IL 61801
Graduate Phone: (217) 333-1083
Graduate Email: jjenkins@illinois.edu
Department Website: https://ahs.illinois.edu/community-health
Program Website: https://ahs.illinois.edu/msha-overview

APPLICATIONS SHOULD BE SUBMITTED THROUGH SOPHAS. PLEASE SEE PROGRAM WEBSITE FOR MORE INFORMATION. https://ahs.illinois.edu/msha-apply

The Master of Science in Health Administration program is designed to prepare graduate students to become successful healthcare managers and administrators. Students will gain the knowledge and skills necessary to manage the complex United States healthcare system efficiently and effectively.

Our mission is: Preparing future leaders in healthcare to improve health systems through effective management.
Our vision is: To be nationally recognized for producing top leaders in healthcare management.
Our values: Professionalism Respect Inclusive Distinguished Excellence

The Master of Science in Health Administration program seeks students with a 3.0 GPA or higher from their bachelor’s degree and completion of GRE prior to application. Generally the degree is completed in two years, depending upon prior education and experience. No undergraduate courses will satisfy courses for both an undergraduate and master’s degree (i.e. “double dipping”). Students entering the program are encouraged to have completed undergraduate coursework in health, health administration, and other business related courses with all majors accepted.

A student may choose to write an acceptable thesis for 4 hours of credit (i.e., Community Health 599) or select a non-thesis option by substituting 4 hours of credit (i.e., approved credit that includes 4 hours of Community Health 593 (Independent Study)). The independent study is a practical application project in conjunction with the student’s internship experience.

The Master of Science in Health Administration program requires completion of 48 hours of coursework including an internship. The courses are intended to provide overall knowledge of the United States healthcare system while promoting student’s flexibility in selecting electives. The thesis option provides students the opportunity to study a section of the healthcare system more thoroughly through in-depth research.

Health Technology, MS

for the Master of Science in Health Technology

Information listed in this catalog is current as of 02/2021
Department Head: Kim Graber
Director of Graduate Studies: John Kosciulek
Director of Program: Wendy Rogers
Graduate Office: Julie Jenkins
Graduate Office Address: 906 South Goodwin Ave, 112 Freer Hall
MC-052, Urbana, IL 61801
Graduate Phone: (217) 333-1083
Graduate Email: jjenkins@illinois.edu
Department Website: https://ahs.illinois.edu/community-health
Program Website: https://ahs.illinois.edu/ht-overview
Program Questions: healthtech@illinois.edu

The MS in Health Technology is designed to educate the next generation of Health Technology Professionals in the development, testing, and use of new consumer-facing technologies that promote health, rehabilitation, mitigate disability, and improve independence and quality of life. This includes bringing end-users (e.g., individuals with chronic conditions, older adults, persons with disabilities), industry professionals, and applied health professionals together with Illinois students and faculty in a multidisciplinary and inter-generational environment to identify existing problems and develop technologies to solve them.

Graduate Degree Programs in Applied Health Sciences
Health Technology, MS (p. 780)

Admissions
Students should have an undergraduate degree in a health or science related field or engineering. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in health technology through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission.

Program prerequisites* or equivalents include:

- Introduction to Computer Science (CS 125 or 105)
- Introduction to Statistics (CHLH 244)
- Introduction to Psychology (PSYC 100)
- Intro to Public Health (CHLH 100)
- Linear Algebra (MATH 125, or 225, 410, 415)
- Research Methods (CHLH 201)

*Promising students might be admitted with a contingency that they complete the prerequisites before the start of the first semester.

All applicants must submit GRE scores.

Financial Aid
Students in the MS in Health Technology program are not eligible for tuition-waiver generating assistantships. Students may apply for scholarships available through the University.

Information listed in this catalog is current as of 02/2021
Graduate Degree Programs in Communication

Communication, MA (p. 653)
concentration: Medieval Studies (p. 1085)

Health Communication, MS (p. 782) (on campus & online)
concentration: Medieval Studies (p. 1085)

Communication, PhD (p. 654)
concentration: Medieval Studies (p. 1085)
Second Language Acquisition & Teacher Education (p. 1089)
Writing Studies Concentration (p. 1093)

The Department of Communication offers a broad curriculum in communication research. In consultation with an advisor, students assemble individualized programs, concentrating in organizational and group communication, interpersonal and family communication, health communication, communication technology, political communication, rhetoric and public discourse, communication in cultural contexts, or mass communication. Interdisciplinary programs are also encouraged.

Admission

An application must include official transcripts from every post-secondary institution the applicant has attended; scores on the general aptitude parts of the Graduate Record Examination (GRE); at least three letters of recommendation, preferably from academic recommenders; a major paper or essay as a sample of academic writing; and a statement of purpose. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College’s recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department’s Web site (https://communication.illinois.edu/admissions/apply-graduate-program/). Ordinarily, students are admitted to begin graduate study in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

for the degree of Master of Science in Health Communication

The Department of Communication offers an online Master of Science degree (M.S.) in Health Communication. This program is not offered in a face to face format. Apply to the Master of Science program only; applications to the online Master of Arts in Communication are not being accepted. More information about the online program is available at www.hcom.illinois.edu (http://www.hcom.illinois.edu/).

Information listed in this catalog is current as of 02/2021

### Learning Outcomes: Health Communication, MS

Learning Outcomes for the degree of Master of Science in Health Communication (on-campus & online)

Students who complete the Health Communication program

1. Understand the role of communication processes in the reception and delivery of health care services and information. They learn that communication is not only the transmission of messages but also the interaction between humans and non-human technologies in the creation of practical understandings of health processes.

2. Are able to read and digest qualitative and quantitative research concerning health care services in order to assist practitioners and patients in the most effective delivery of health care messages and information.

3. Are able to identify the effectiveness and limitations of persuasion strategies used to inform and influence audience’s adoption of health care information and behaviors. This outcome includes dedicated health campaigns as well as the influence of media on health behaviors and beliefs.

4. Are familiar with interpersonal communication behaviors in health care settings as well as in private and public life that lead to or prevent the adoption of healthy behaviors. This outcome includes social support and health outcomes, patient-provider communication as well as family and support group communication related to health.

5. Are familiar with the organizational setting in which health communication takes place, particularly with reference to interprofessional communication, managerial communication, and the policies that guide health care services. Students are able to recognize the role of theory in understanding health communication processes and successfully utilize theoretical frameworks to explain breakdowns in health communication and propose methods for repairing communication problems in interpersonal, organizational and social/mediated fields.
Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources
The extraordinary University Library is the department’s main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the area studies libraries (Slavic, Africana, Latin American, Asian Libraries) all serve faculty and students with expert bibliographers and focused collections. Among other special collections much used by historians are Afro-Americana and Women’s Studies; the library is also a major repository for government documents.

Financial Aid
Financial aid is almost always awarded on an academic-year basis. Applications by incoming students are considered with admission applications. All fellowships and assistantships include a stipend plus tuition and service fee waiver.

Both University and department endowment fellowships are available to entering students and to advanced doctoral students embarked on their research or the writing of their dissertations. Foreign Language and Area Studies (FLAS) Fellowships may support first- and second-year students who have special interests in foreign area studies. Entering students from underrepresented groups may be awarded one- to three-year Graduate College Fellowships. The Illinois Consortium for Educational Opportunity Program (ICEOP) offers renewable fellowships to underrepresented minority students who are Illinois residents and plan academic careers within the state. Half-time teaching assistantships are the department’s primary form of financial aid for graduate students in the Ph.D. program. Students who progress satisfactorily toward their degrees and demonstrate effective teaching will have their teaching assistantships renewed for a second, and usually a third, year.

The Department of History offers graduate courses leading to the Doctor of Philosophy degree, complete details of which may be found in the Graduate Studies section of the department's web site. Students are not normally admitted to a terminal master's degree program.

Admission

Applicants should have a minimum of 20 semester hours of undergraduate work in history and cognate disciplines with an overall GPA of 3.25 in the last two years. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit Graduate Record Examination (GRE) scores (verbal, writing, and quantitative are mandatory; history is optional). All applicants are required to submit a writing sample. Language preparation may be weighted heavily, depending upon the field of specialization. Foreign students whose native language is not English need a paper-based Test of English as a Foreign Language (TOEFL) score of at least 600 (250 on the computer-based test). Most successful applicants have GRE verbal scores of over 80% and/or TOEFL scores of over 630 (260 computer). Only in exceptional circumstances are students admitted for the spring term. The department is not currently admitting to the Teaching of Social Programs. For additional details refer to www.history.illinois.edu/graduate/prospective/ (http://www.history.illinois.edu/graduate/prospective/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources

The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the area studies libraries (Slavic, Africana, Latin American, Asian Libraries) all serve faculty and students with expert bibliographers and focused collections. Among other special collections much used by historians are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid

Financial aid is almost always awarded on an academic-year basis. Applications by incoming students are considered with admission applications. All fellowships and assistantships include a stipend plus tuition and service fee waiver.

Both University and department endowment fellowships are available to entering students and to advanced doctoral students embarked on their research or the writing of their dissertations. Foreign Language and Area Studies (FLAS) Fellowships may support first- and second-year students who have special interests in foreign area studies. Entering students from underrepresented groups may be awarded one-to-three-year Graduate College Fellowships. The Illinois Consortium for Educational Opportunity Program (ICEOP) offers renewable fellowships to underrepresented minority students who are Illinois residents and plan academic careers within the state. Half-time teaching assistantships are the department's primary form of financial aid for graduate students in the Ph.D. program. Students who progress satisfactorily toward their degrees and demonstrate effective teaching will have their teaching assistantships renewed for a second, and usually a third, year.

for the degree of Doctor of Philosophy in History

In certain circumstances, a student in British history may substitute courses in quantitative skills for the second language. For the preliminary examination, the candidate customarily offers three fields in history - one major and two minor fields. At least one of these must be a "geographical/chronological field" and one must be a "comparative/thematic" field. One must involve a period of time before 1815. At least two geographical areas must also be represented by the fields offered for the examination. One of the three fields may be in a specialization outside the Department of History or may be a "constructed" field specially designed by the candidate in consultation with field examiners and the major advisor.

Entering with approved M.S./M.A. degree

Another methods course in consultation with the Director of Graduate Studies

To fulfill the minimum requirement of 64 or 96 graduate hours, 16 graduate hours in disciplines other than history may be applied.

Language Requirement: The department requires proven competence in two foreign languages for the Ph.D. degree, except for students of US History who must demonstrate competence in one foreign language. Language competence means the ability to read and comprehend a foreign language well enough to paraphrase a scholarly article in English. Students admitted into the Ph.D. program are expected to demonstrate competence in the second language within four semesters and always before they take their last prelim exam. A major advisor may require a student to acquire a reading knowledge of more than two languages, or more than one for US History students.

Learning Outcomes: History, PhD

Learning Outcomes for the degree of Doctor of Philosophy in History

1. **Field expertise**: broad, deep, and critical knowledge of key areas of chosen study, in both selected chronological-geographic fields and comparative thematic fields.
2. **Methodological knowledge**: understanding and mastery of disciplinary and interdisciplinary methods and concepts.
3. **Research, writing, and dissemination**: Experience and accomplishment in scholarly research based on primary sources, analytical writing, and presenting this work in print and oral presentation.
4. **Teaching**: Pedagogical training and experience.
5. **Professional development**: preparation for the diverse career expectations and possibilities in academia and varied institutions in the public and private sectors.

Graduate Degree Programs in Human Development & Family Studies
Graduate Majors:
Human Development and Family Studies, MS (p. 786)
Human Development and Family Studies, PhD (p. 788)
The Ph.D. in Human Development and Family Studies (HDFS) focuses on positive development and resilience of diverse children, youth, and families in everyday life contexts. Our doctoral concentration is interdisciplinary, drawing upon the canons of anthropology, economics, education, family studies, human development, psychology, and sociology. Further, we value qualitative, quantitative, and mixed methodologies.

Students who enter the doctoral program without a master’s will complete one as the first part of their doctoral requirements.

Admission
Admission is based upon both academic record and the applicant’s fit with faculty research programs. We examine grade point average (GPA), Graduate Record Examination (GRE, we will accept MCAT scores for Medical Scholar applicants) letters of recommendation, and a personal statement. International applicants from non-English speaking countries must have an official paper Test of English as a Foreign Language (TOEFL) score of at least 103 on the internet based test. We will not admit anyone with a GPA less than 3.0 on a 4.0 scale. All applicants are required to submit official GRE scores (MCAT in the case of Medical Scholar applicants) and have previous coursework in a relevant area of social or behavioral sciences. GRE, MCAT and TOEFL scores should be taken no more than two years prior to application. Our application deadline is December 15 for possible admission the following fall semester. We admit students for fall enrollment only. Please refer to our department website for further information.

Graduate Teaching Experience
We do not require our students to teach but recognize the importance of teacher development for their future marketability. Thus, we make teaching assistantships available and encourage students to pursue a variety of teaching experiences as well as mentorship from experienced instructors. We also encourage our students to utilize the variety of teacher training resources that are available across campus.

Learning Outcomes: Human Development and Family Studies, MS

Learning Outcomes for the degree of Master of Science in Human Development & Family Studies

HDFS Graduate Student Learning Outcomes

1. HDFS graduate students will demonstrate subject matter expertise, including theoretical and substantive expertise in a specialized area
   a. Recall key principles, theories, and concepts used in HDFS
   b. Apply key principles, theories, and concepts to the study of HDFS
   c. Critique current theories and empirical knowledge regarding HDFS
   d. Evaluate current knowledge in a specific substantive area using two distinct theories
   e. Identify knowledge gaps in a specific substantive area
   f. Pose questions to remedy said gap

2. HDFS graduate students will demonstrate social science methodology expertise
   a. Apply key principles, concepts and analytic strategies used in quantitative research
   b. Apply key principles, concepts and analytic strategies used in qualitative research
   c. Use data management and analysis software (e.g., SPSS, NVivo, MAXQDA, HLM, R)
   d. Evaluate the methodological strengths and limitations of empirical studies
   e. Design and defend a complete research project
   f. Complete an IRB application
   g. Complete an ethics certificate relevant to project
   h. Conduct a research project as per protocol and ethical standards

3. HDFS graduate students will demonstrate professional competence skills
   a. Identify career and professional goals
   b. Develop leadership skills (e.g., through formal positions; informal mentoring of undergraduates or new graduate students; representing the department; participation in class or lab teamwork)
   c. Develop professional network to support career and professional goals (e.g., relationships with mentors; participation in professional organizations)
   d. Create and maintain a CV and other job-related materials (e.g., cover letter; teaching philosophy; research statement)
   e. Exhibit professional and ethical behavior
   f. Make decisions and solve problems
   g. Collaborate to achieve group goals

4. HDFS graduate students will demonstrate scholarly communication skills in English
   a. Use effective written communication
      i. Use appropriate grammar and writing mechanics
      ii. Demonstrate a working knowledge of APA style
      iii. Respond to constructive criticism (e.g., revision process, peer review)
      iv. Produce written work that is organized, logical, and fully developed
   b. Use effective oral communication
      i. Clearly and logically present ideas aloud through presentation to class or group
   c. Use effective visual communication
      i. Use clear and logical charts, graphs, and other visual displays to present ideas

5. HDFS graduate students will demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion
   a. Critically examine one's own beliefs, assumptions, values, attitudes, and biases regarding diverse individuals and families
   b. Reflect on one's own interconnected positions, privileges, and disadvantages across multiple contexts
   c. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one's own work (written, oral, and visual communication)

For the degree of Doctor of Philosophy in Human Development & Family Studies

Those entering the doctoral program without a master's degree will complete one within their first two years in the doctoral program. Students entering with a non-thesis master's will be required to complete a "thesis equivalency" paper within the first two years of their doctoral program. Requirements for the Ph.D. include 64 graduate hours beyond the M.S. degree, completion of the written qualifying examination, defense of the written dissertation proposal, and a final thesis defense upon completion of the dissertation. Doctoral students may also complete a supporting program in "applied HDFS." This 16 graduate hour option includes 4 hours in program development or policy studies, 4 hours in program evaluation, and two 4 hour internships. The applied optional supporting program prepares students to enter careers in administration, human services, social policy, international aid agencies, and government, as well as traditional careers in teaching and research.

For additional details and requirements refer to the department's Graduate Program Information (http://hdfs.illinois.edu/graduate/handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

   a. Critically examine one's own beliefs, assumptions, values, attitudes, and biases regarding diverse individuals and families
   b. Reflect on one's own interconnected positions, privileges, and disadvantages across multiple contexts
   c. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one's own work (written, oral, and visual communication)

Human Resources & Industrial Relations, MHRIR

for the degree of Master of Human Resources and Industrial Relations (on campus & online)

Information listed in this catalog is current as of 02/2021
The master’s program can lead to a professional, terminal master’s degree, or it can prepare students to continue their graduate study toward a Ph.D. or other doctoral degrees in law and other professional areas.

The master’s degree requires 48 graduate hours of courses and usually takes three semesters to complete. The master’s degree program has core requirements in human resources/industrial relations systems, and quantitative methods, and a subject distribution requirement.

Graduate Degree Programs in Labor & Employment Relations

Human Resources and Industrial Relations, MHRIR (p. 790)
(on campus & online)

Human Resources and Industrial Relations, PhD (p. 793)
Joint Degree Programs with Human Resources and Industrial Relations, MHRIR (on campus only):
   Business Administration, MBA (p. 1129) Law, JD (p. 1130)

The School of Labor and Employment Relations offers graduate work leading to both a master’s and a doctoral degree. Graduate study in Human Resources and Industrial Relations (HHRIR) is based on a multidisciplinary approach to human resources/industrial relations problems and a flexible curriculum. To achieve this, the School has joint faculty appointments or course cross-listings with economics, psychology, law, business administration, history, and finance.

Admission

Students must meet the general admission requirements of the Graduate College, as well as the specific requirements of the School. Admission to the master’s program in either the fall or spring semester is based on an applicant’s undergraduate record, letters of reference, Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT) scores, a resume and a statement of interest and career goals. The minimum requirements for admission are a course in statistics and an average grade of B in the last two years of a four-year undergraduate program. A deficiency in statistics may be made up by taking the required course without graduate credit during the first semester of graduate study. International applicants must provide Test of English as Foreign Language (TOEFL) test results with a recommended minimum score of 96 on the internet-based IBT (590 on the written test) or IELTS with minimum overall score of 6.5.

Students applying to the online program will have the same admissions criteria as the on-campus MHRIR program. However, a waiver of the GRE or GMAT requirement may be available to applicants with 3 or more years of direct HR/IR experience or 5 years of related managerial experience. Eligibility of this waiver will be assessed by the Associate Director, Online Programs. Admission decisions for the online program are made in all semesters (Fall, Spring, and Summer).

Students with outstanding academic credentials, with or without a master's degree, are encouraged to apply to the Ph.D. program. Applicants to the doctoral program must submit evidence of research ability, such as a master’s thesis, an undergraduate thesis, special reports, or published articles. This is in addition to the other required application materials as indicated for the on-campus master’s program. Admission to the doctoral program is made for the fall semester only. An exception is made for current HIRIR master’s degree students at Illinois, who may submit an internal application in the spring.

Graduate Teaching Experience

Although the School has no teaching requirement, doctoral students are encouraged to gain teaching experience in this program.

Financial Aid

The School offers research assistantships, scholarships, and fellowships to graduate students with superior academic credentials in the on-campus MHRIR and Ph.D. programs. A School research/teaching assistant receives a stipend plus waiver of resident or non-resident tuition and some fees (http://www.grad.illinois.edu/gradhandbook/). The Graduate College also awards minority fellowships that carry stipends plus tuition and service fee waivers.

The online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including UIUC employees and employees of other state institutions), Academic waivers from UIUC, UIC and UIS employees, Related Agency waivers, waivers granted through fellowships/assistantships as governed by the Graduate College at UIUC, or Retiree waivers. This program DOES accept statutory waivers (veteran grants, etc.)

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations (on campus & online)

For additional details and requirements refer to the department’s Student Handbook (https://ler.illinois.edu/wp-content/uploads/2015/01/CurrentStudents_LERHandbook.pdf) and the Graduate College Handbook (http://www.grad.uiuc.edu/gradhandbook/).

This degree program can be completed either on campus or online. The non-thesis option is offered online, the requirements are listed below:

Learning Outcomes: Human Resources and Industrial Relations, MHRIR

Learning Outcomes for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations (on campus & online)

The purpose of the Master of Human Resources and Industrial Relations programs are to impart knowledge and skills that individuals may use to advance to mid- and upper-level positions managing employment relations in private and public-sector organizations as well as in labor union organizations. The online program, in particular, was developed to expand our ability to train future human resource management leaders by making the program and its strengths available to place-bound human resources professionals and career-changers.

The Society for Human Resource Management (SHRM) is the leading professional organization for human resource management practitioners worldwide. SHRM created the Human Resources Certification Institute (HRCI), which is the human resource credentialing body to promote the establishment of standards for the profession. HRCI also recognizes human resource professionals who have met, though demonstrated professional experience and the passing of a written comprehensive exam, HRCI’s requirements for mastering the codified HR Body of Knowledge. HRCI regularly reviews exam content for updates and revisions to maintain relevance and include content at the leading edge of the field.

The MHRIR programs have chosen to draw from HRCI’s Human Resource Body of Knowledge and other resources such as faculty expertise and prominent practitioners and scholars in the HR field, as the foundation for our student learning outcomes.

1. Students will apply Business Management and Strategy to shape immediate and long-term HR activities, practices, and policies. Students will critically examine the complex link between strategy and business practices, understand and apply workforce metrics to drive decision-making, and apply a strategic lens to international human resources.
2. Students will drive productivity outcomes, use job and company data to predict the success of new hires, and align human capital requirements to achieve business goals to support Workforce Planning and Development within an organization’s HR operation.
3. Students will understand the structural elements of compensation system design and evaluate an organization’s Compensation and Benefits structure relative to market forces, union agreements, and legal requirements.
4. Students will apply and adhere to statutory and legal requirements when administering HR policies and procedures and employ Risk Management strategies to protect the employer from loss and liability and comply with labor law.
5. Students will lead Employee and Labor Relations by managing workforce relationships, developing inclusive and respectful company culture, and building communication systems.
6. To support Human Resource Development, students will support organizational priorities by managing employee performance through evaluating gaps between employee performance and the desired state, building programs to address these gaps, and designing strategies for motivating employees.
7. Students will be able to integrate, synthesize, and apply knowledge of ethical dilemmas and solutions in Human Resources. Students will apply strategies for realizing the benefits of diversity and inclusion and employ practices that contribute to healthy, safe, and secure workplaces, communities, and societies as part of the organization’s corporate social responsibility.

We have also formed these additional learning outcomes to support a student’s immediate and long-term success in the professional world.

1. Students will be able to use critical thinking and problem-solving skills to act strategically when making decisions in business and in life.
2. Students will produce persuasive and impactful written work and verbal presentations for academic and business audiences.
3. Students will be effective leaders of change and apply interpersonal skills to work well in cross-functional teams.
4. Students will develop professional skills to support long-term career success: resume and cover letter writing, interviewing, and networking.

Human Resources & Industrial Relations, PhD

for the degree of Doctor of Philosophy Major in Human Resources and Industrial Relations

dean: Fritz Drasgow
overview of school admissions & requirements: Labor & Employment Relations (http://catalog.illinois.edu/ler/)
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
school website: https://ler.illinois.edu/
school faculty: Labor & Employment Relations Faculty (https://ler.illinois.edu/about/faculty-staff/)
graduate office: 504 East Armory Avenue, Champaign, IL 61820
on-campus program contact: Becky Barker
e-mail: ebarker@illinois.edu
online program contact: Eden Haycraft
e-mail: ehaycraft@illinois.edu

The Ph.D. is an interdisciplinary degree, which typically leads to a career in teaching and research, especially at business schools or industrial relations schools. Research-oriented careers outside the academic world are also available. The program can be completed in five years beyond the baccalaureate degree or four years beyond the master’s degree. Doctoral students are required to complete 96 graduate hours of credit beyond the baccalaureate degree. Coursework is usually completed in two years. There is a second year paper requirement, one examination that focuses on the candidate’s selected area of specialization, and the preliminary and final exams. Examples of areas of specialization include the effects of technological change on the human resource function; motivation, morale, and job satisfaction; labor-management relations in the public sector; labor markets and employment; and international comparative labor problems. Each student’s program of study is chosen in consultation with the Ph.D. Advisory Committee at the School.
Graduate Degree Programs in Labor & Employment Relations

Human Resources and Industrial Relations, MHRIR (p. 790)  
(on campus & online)
Human Resources and Industrial Relations, PhD (p. 793)  
Joint Degree Programs with Human Resources and Industrial Relations, MHRIR (on campus only):
Law, (p. 1130) JD (p. 1130)
The School of Labor and Employment Relations offers graduate work leading to both a master’s and a doctoral degree. Graduate study in Human Resources and Industrial Relations (HRIR) is based on a multidisciplinary approach to human resources/industrial relations problems and a flexible curriculum. To achieve this, the School has joint faculty appointments or course cross-listings with economics, psychology, law, business administration, history, and finance.

Admission

Students must meet the general admission requirements of the Graduate College, as well as the specific requirements of the School. Admission to the master’s program in either the fall or spring semester is based on an applicant’s undergraduate record, letters of reference, Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT) scores, a resume and a statement of interest and career goals. The minimum requirements for admission are a course in statistics and an average grade of B in the last two years of a four year undergraduate program. A deficiency in statistics may be made up by taking the required course without graduate credit during the first semester of graduate study. International applicants must provide Test of English as Foreign Language (TOEFL) test results with a recommended minimum score of 96 on the internet-based iBT (590 on the written test) or IELTS with minimum overall score of 6.5.

Students applying to the online program will have the same admissions criteria as the on-campus MHRIR program. However, a waiver of the GRE or GMAT requirement may be available to applicants with 3 or more years of direct HR/IR experience or 5 years of related managerial experience. Eligibility of this waiver will be assessed by the Associate Director, Online Programs. Admission decisions for the online program are made in all semesters (Fall, Spring, and Summer).

Students with outstanding academic credentials, with or without a master’s degree, are encouraged to apply to the Ph.D. program. Applicants to the doctoral program must submit evidence of research ability, such as a master’s thesis, an undergraduate thesis, special reports, or published articles. This is in addition to the other required application materials as indicated for the on-campus master’s program. Admission to the doctoral program is made for the fall semester only. An exception is made for current HRIR master’s degree students at Illinois, who may submit an internal application in the spring.

Graduate Teaching Experience

Although the School has no teaching requirement, doctoral students are encouraged to gain teaching experience in this program.

Financial Aid

The School offers research assistantships, scholarships, and fellowships to graduate students with superior academic credentials in the on-campus MHRIR and Ph.D. programs. A School research/teaching assistant receives a stipend plus waiver of resident or non-resident tuition and some fees (http://www.grad.illinois.edu/gradhandbook/). The Graduate College also awards minority fellowships that carry stipends plus tuition and service fee waivers.

The online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including UIUC employees and employees of other state institutions), Academic waivers from UIUC, UIC and UIS employees, Related Agency waivers, waivers granted through fellowships/assistantships as governed by the Graduate College at UIUC, or Retiree waivers. This program DOES accept statutory waivers (veteran grants, etc.)

for the degree of Doctor of Philosophy Major in Human Resources and Industrial Relations

For additional details and requirements refer to the department’s Student Handbook (https://ler.illinois.edu/wp-content/uploads/2015/01/CurrentStudents_LERHandbook.pdf) and the Graduate College Handbook (http://www.grad.uiuc.edu/gradhandbook/).

The purpose of the PhD in Human Resources and Industrial Relations is to train research competence (conducting and communicating research) and the writing of analytical papers of publishable quality. Toward this end, PhD courses and program milestones are designed to impart knowledge and skills that individuals may use to conduct world-class research, primarily in the academic subfields of Human Resources/Industrial Relations, Organizational Behavior, Industrial Relations, Economics, Psychology, and/or Sociology.

The following are intended student learning outcomes.

1. Develop skill in writing analytic papers of publishable quality, and publishing those papers.
2. Develop skill in publicly presenting analytical research of publishable quality.
4. Develop knowledge and skill in using statistics and research methods to conduct research and draw appropriate inferences.
5. Gain specialized knowledge in a social science discipline (e.g., economics, psychology, sociology).

### Industrial Engineering, MS

*for the degree of Master of Science in Industrial Engineering (on campus & online)*

**department head:** Deborah L Thurston (thurston@illinois.edu)  
**associate head of graduate studies:** Ramavarapu S Sreenivas (rsree@illinois.edu)

**program website:** https://ise.illinois.edu/graduate/degrees-and-programs/ms-degree-guide.html  
**department faculty:** https://ise.illinois.edu/directory/faculty.html  
**college website:** https://grainger.illinois.edu/  
**contact:** Lauren Redman (lredman@illinois.edu)  
**address:** 117 Transportation Building, 104 S Mathews Ave, Urbana, IL 61801  
**phone:** (217) 333-2730  
**email:** ise-grad@illinois.edu

The Department of Industrial & Enterprise Systems Engineering offers both an MS with thesis and an MS non-thesis program. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in i) advanced analytics via the Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058) optional graduate concentration and ii) computational science and engineering via the Computational Science & Engineering (p. 1073) optional graduate concentration.
Admission Requirements

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are required of all applicants. Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/instructions/04c/) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://cti.illinois.edu/cti-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Faculty research by ISE faculty is pursued in the following fields:

- computer-aided design
- data analytics
- nondestructive testing and evaluation
- reliability engineering
- human factors
- manufacturing systems
- optimization
- control
- operations research
- supply chain management
- systems dynamics and simulation
- real-time decision making
- financial engineering
- management
- biomechanics
- design
- robotics
- data
- control
- systems
- decision
- science

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research laboratories Web site (https://ise.illinois.edu/research/labs/).

Graduate Programs in Industrial & Enterprise Systems Engineering

degrees:

Industrial Engineering, MS (p. 795)

optional concentrations:

- Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058)
- Computational Science & Engineering (p. 1073)

Industrial Engineering, PhD (p. 797)

optional concentrations:

- Computational Science & Engineering (p. 1073)
- Systems & Entrepreneurial Engineering, MS (p. 1017)
- Systems & Entrepreneurial Engineering, PhD (p. 1019)
- Financial Engineering, MS (p. 747) (sponsored jointly with Department of Finance)

optional concentrations:

- Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058)
- Data Analytics in Finance (p. 1076)

The Department of Industrial and Enterprise Systems Engineering (ISE) offers graduate programs leading to degrees of Master of Science and Doctor of Philosophy in Industrial Engineering (IE) and Systems and Entrepreneurial Engineering (SEE), as well as (jointly with the Department of Finance) Master of Science in Financial Engineering. The ISE programs offer an approach to industrial engineering and systems engineering, engineering design, and entrepreneurial engineering that crosses disciplinary lines. The IE program is based in advanced studies that focus on operations research, optimization, supply chain management, financial engineering, quality and reliability engineering and production management, with the aim to advance modeling, simulation, analysis and decision making for complex engineering and economic systems. The SEE program is founded on the premise of dual competency in both traditional engineering and systems integration. The SEE program offers flexibility by permitting the student to select from a menu of advanced courses and take a wide range of electives to meet individual career goals. Graduates of these programs are prepared to enter academic and professional engineering positions in universities, industry, government, and private practice.

Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/)

for the degree of Master of Science in Industrial Engineering (on campus & online)

The Department of Industrial and Enterprise Systems Engineering offers the non-thesis option in the Master of Science in Industrial Engineering in an online delivery format. Requirements mirror those for the on-campus non-thesis delivery format.

For additional details and requirements refer to the department’s Graduate Programs Web site and the Graduate College Handbook.

Information listed in this catalog is current as of 02/2021

**Learning Outcomes: Industrial Engineering, MS**

Learning Outcomes for the degree of Master of Science in Industrial Engineering (on campus & online)

Graduate-level students should be able to:

1. Apply theory and methodologies to areas of research that address areas within Industrial and Enterprise Systems Engineering.
2. Effectively relate and communicate their data findings to peers, faculty and possibly peer-reviewed journals.
3. Formulate and solve complex problems with ISE by applying appropriate techniques and tools.
4. Write and defend a thesis that is designed with scientifically accepted methods and can be applied to improve a design or other real-world issue.
5. Teach concepts critical to the discipline of Industrial and Enterprise Systems Engineering at the university level.

**Industrial Engineering, PhD**

for the degree of Doctor of Philosophy in Industrial Engineering

**department faculty**: https://ise.illinois.edu/directory/faculty.html

**college website**: https://grainger.illinois.edu/

**contact**: Lauren Redman (lredman@illinois.edu)

**address**: 117 Transportation Building, 104 S Mathews Ave, Urbana, IL 61801

**phone**: (217) 333-2731

**email**: ise-grad@illinois.edu

The Department of Industrial & Enterprise Systems Engineering offers both a traditional doctoral program and a direct doctoral program. A Master’s degree is not required for admission to the direct doctoral program. Students in both programs are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

**Admission Requirements**

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are required of all applicants. Based upon the previous
preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid
Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research
Faculty research by ISE faculty is pursued in the following fields:

- computer-aided design
- data analytics
- manufacturing systems
- nondestructive testing and evaluation
- system dynamics and control
- robotics
- real-time decision making
- reliability engineering systems
- financial operations research
- management
- biomechanics science
- human factors
- supply chain logistics

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department’s research laboratories Web site (https://ise.illinois.edu/research/labs/).

Graduate Programs in Industrial & Enterprise Systems Engineering

degrees:

Industrial Engineering, MS (p. 795)
optional concentrations:
  - Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058) | Computational Science & Engineering (p. 1073)
  - Industrial Engineering, PhD (p. 797)
optional concentrations:
  - Computational Science & Engineering (p. 1073)
  - Systems & Entrepreneurial Engineering, MS (p. 1017)
optional concentrations:
  - Computational Science & Engineering (p. 1073)
  - Systems & Entrepreneurial Engineering, PhD (p. 1019)
Financial Engineering, MS (p. 747) (sponsored jointly with Department of Finance)
optional concentrations:
  - Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1058) | Data Analytics in Finance (p. 1076)

The Department of Industrial and Enterprise Systems Engineering (ISE) offers graduate programs leading to degrees of Master of Science and Doctor of Philosophy in Industrial Engineering (IE) and Systems and Entrepreneurial Engineering (SEE), as well as (jointly with the Department of Finance) Master of Science in Financial Engineering. The ISE programs offer an approach to industrial engineering and systems engineering, engineering design, and entrepreneurial engineering that crosses disciplinary lines. The IE program is based in advanced studies that focus on operations research, optimization, supply chain management, financial engineering, quality and reliability engineering and production management, with the aim to advance modeling, simulation, analysis and decision making for complex engineering and economic systems. The SEE program is founded on the premise of dual competency in both traditional engineering and systems integration. The SEE program offers flexibility by permitting the student to select from a menu of advanced courses and take a wide range of electives to meet individual career goals. Graduates of these programs are prepared to enter academic and professional engineering positions in universities, industry, government, and private practice.

Opportunity also exists for specializing in energy and sustainability engineering via the Energy and Sustainability Engineering (EaSE) Graduate Certificate Option (http://ease.illinois.edu/) for the degree of Doctor of Philosophy in Industrial Engineering

The 96 graduate hours of credit may be divided into three stages of 32 hours each, consisting of 32 hours generally represented by an M.S. degree or equivalent (Stage I), 32 hours of course work beyond the M.S. degree (Stage II), and 32 hours of thesis work for the doctoral thesis (Stage III). Stage I requirements are satisfied by completion of an M.S. degree in the Department or in a related engineering or technical discipline from the University of Illinois or other accredited university. A non-technical M.S. or MBA would normally not count toward the completion of Stage I. Such students would be required to enroll in one of the Master of Science Programs in the Department and satisfy the requirements therein in order to satisfy Stage I of the Ph.D. degree.

To advance to Stage II all students must pass the Qualifying Examination. To advance from Stage II to Stage III the student must pass the Preliminary Exam. Stage III is comprised of a minimum of 32 hours of IE
599 (Thesis Research) credit and a written dissertation followed by a final oral thesis defense.

The Preliminary Examination is taken after the Qualifying Examination (https://ise.illinois.edu/graduate/degrees-and-programs/phd-industrial-engineering.html). A minimum of six months must elapse between the successful completion of the doctoral preliminary examination and the doctoral final examination (oral dissertation defense).

For additional details and requirements refer to the department’s Graduate Programs Web site (http://ise.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Informatics, PhD (http://catalog.illinois.edu/graduate/provost/phd_informatics/)

The Chair of the Governing Committee of the Informatics Ph.D. Program will appoint the supervising committee to approve each student’s program of study, which will be called the Advisory Committee (first half of studies) and then the Dissertation Committee (second half of studies). The membership of these committees should remain constant for each half of the student’s studies, except in unusual circumstances, but may change when it is constituted for the dissertation. In any case, changes to the supervising committees must be approved by the Chair of the Governing Committee. The supervising committee must contain faculty with expertise in both the Applications area and the Foundations area chosen by the student, including at least four faculty members affiliated with the Informatics Program. The supervising committee will provide each student with a review of his or her progress in the spring of each academic year.

Admission

The admissions process will consist of a formal application, specifying experiences, courses, interests, and letters of recommendation. The Informatics PhD Program will admit graduate students who are approved by the Governing committee in conjunction with representatives of the Areas. With the approval of the appropriate committees, students may be admitted to the program with only a Bachelor’s degree. They will work with their Advisory Committee to define appropriate courses to fulfill the 32 hours of Masters-level work. If they wish to receive a Masters degree, they will need to apply to a relevant department and meet the department’s existing Masters degree requirements. If they already hold a Masters degree approved by the IPP Governing Committee, they will receive graduate credit for 32 hours. All applicants whose native language is not English must provide evidence of English proficiency as required by the Graduate College for admission (https://grad.illinois.edu/admissions/instructions/04c/).

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT, or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP (conditional pass) must be earned on the English Proficiency Interview test offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching conducted prior to the start of the semester.

for the degree of Doctor of Philosophy in Informatics

For additional details and requirements refer to the degree requirements (https://www.informatics.illinois.edu/informatics-phd/), the appropriate department’s graduate handbook, and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Informatics, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Informatics

1. Students will acquire broad and deep knowledge of informatics including both foundation and application areas. Students are expected to become experts in their specialties, but also be knowledgeable about basic principles across the informatics domain.

2. Students will demonstrate the ability to conduct informatics research in their area of specialty through developing an original piece of scholarship.

3. Students will demonstrate skills in oral and written communication sufficient to publish and present work in their field and to prepare grant proposals.

4. Students will interact with people from diverse backgrounds as both leaders and team members with integrity and professionalism.

5. Students will be aware of ethical issues regarding research including the use of human subjects (if appropriate), research misconduct, and publication practice.

email: ischool-apply@illinois.edu

The Master of Science (MS) in Information Management prepares students for professional roles in the design and management of information systems and services in organizations in a range of sectors. Areas of specialization include data science and analytics; privacy, trust, security and ethics; information architecture and design; knowledge management and information consulting.

On-campus or Online

Two scheduling options are available to students pursuing the M.S. in Information Management. The on-campus option serves students who are in residence at Urbana-Champaign, as well as part-time, commuting students. The online scheduling option is an online education option that uses the Internet and other information technologies for delivery.

Graduate Degree Programs in the School of Information Science

Bioinformatics: Information Sciences, MS (p. 616) (on campus & online)
Information Management, MS (p. 802) (on campus & online)
Library & Information Science, MS (p. 835) (on campus & online)
Library & Information Science, CAS (p. 832) (on campus & online)

concentration: Digital Libraries (p. 833)
concentration: Writing Studies (p. 1093)

Joint Degree Programs:
Library & Information Science, MS and African Studies, MA (p. 1124)
Library & Information Science, MS and History, MA (p. 1128)
Library & Information Science, MS and Russian, East European, & Eurasian Studies, MA (p. 1124)

School Librarian Licensure: available in conjunction with both the MS in LIS and CAS in LIS

The School of Information Sciences (iSchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S.), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available. The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries. The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors. The Library and Information Science concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community. The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one's professional training several years after completing a M.S. program, or
3. to redirect one's career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.
Admission

The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master's degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master's program.

School Librarian Licensure

Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

Facilities and Resources

Among the major areas of faculty research are:

- community informatics
- data analytics
- data curation
- digital humanities
- digital libraries
- history of information
- information retrieval
- organization of knowledge and information
- privacy, security, and trust
- ethics and values for information
- youth literature, culture, and services

The iSchool’s Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children’s Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children’s Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with

Financial Aid

Financial aid may be available from the iSchool, the University Library, and elsewhere in the University in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master’s degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

for the degree of Master of Science in Information Management (on campus & online)

This degree program can be completed either on campus or online.

For additional details and requirements, refer to the unit’s Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Learning Outcomes: Information Management, MS

Learning Outcomes for the degree of Master of Science in Information Management (on campus & online)

Graduates of the Illinois MS/IM program will be able to:

1. Apply foundational concepts, theories, and principles to problems of information management.
2. Communicate capably with diverse stakeholders.
3. Understand some of the larger socio-technical contexts in which information management occur.
4. Apply appropriate analytic approaches to the needs of a given problem and understand how aspects of logic, statistical analysis and broader domain knowledge can inform the interpretation and confidence in their analyses.
5. Have an awareness of the rapid change in the evolving information professions, the change in technologies and methods deployed, evolving ethical principles around information use, and the need to be
continually learning new skills and sub-specializations in order to be a valuable member of a multidisciplinary team.

Information Sciences, PhD

for the degree of Doctor of Philosophy in Information Sciences

dean: Eunice Santos
overview of MS/LIS admissions & requirements: https://ischool.illinois.edu/degrees-programs/ms-library-and-information-science/apply (https://ischool.illinois.edu/degrees-programs/ms-library-and-information-science/apply/)
overview of grad college admissions & requirements: https://grad.illinois.edu/admissions/apply (https://grad.illinois.edu/admissions/apply/)
school website: School of Information Sciences (https://ischool.illinois.edu/)
school faculty: https://ischool.illinois.edu/people/faculty (https://ischool.illinois.edu/people/faculty/)
graduate office: 501 East Daniel Street, Champaign, IL 61820-6211
program contact: Moises Orozco Villicana
phone: (217) 333-7197, (800) 982-0914 (within the US)
email: ischool-apply@illinois.edu

The Ph.D. program consists of the following components:

1. a history and foundations of IS seminar (4 graduate hours);
2. research methods (8 or more graduate hours);
3. electives (36 graduate hours);
4. field exam; and
5. thesis (32 or more graduate hours).

Thus, a minimum of 48 graduate hours of coursework plus 32 graduate hours of thesis credit are required.

Graduate Degree Programs in the School of Information Science

Bioinformatics: Information Sciences, MS (p. 616) (on campus & online)
Information Management, MS (p. 802) (on campus & online)
Library & Information Science, MS (p. 835) (on campus & online)
Library & Information Science, CAS (p. 832) (on campus & online)

concentration:
  Digital Libraries (p. 833)
  Information Sciences, PhD (p. 804)

concentration:
  Writing Studies (p. 1093)

Joint Degree Programs:
  Library & Information Science, MS and African Studies, MA (p. 1124)
  Library & Information Science, MS and History, MA (p. 1128)
  Library & Information Science, MS and Russian, East European, & Eurasian Studies, MA (p. 1124)

School Librarian Licensure: available in conjunction with both the MS in LIS and CAS in LIS

The School of Information Sciences (ISchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available. The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries. The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors. The Library and Information Science concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community. The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one’s professional training several years after completing a M.S. program, or
3. to redirect one’s career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.

Admission

The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master’s degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master’s program.

School Librarian Licensure

Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

Facilities and Resources

Among the major areas of faculty research are:
The iSchool’s Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children’s Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children’s Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with Internet connectivity is integral to teaching and learning activities. The University Library provides a vast reservoir of resources for all types of study and research in library and information science.

The School maintains an ongoing commitment to continuing education through conferences, institutes, workshops, and course offerings.

Financial Aid
Financial aid may be available from the iSchool, the University Library, and elsewhere in the University in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master’s degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

for the degree of Doctor of Philosophy Major in Information Science

For additional details and requirements, refer to the unit’s Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Learning Outcomes: Information Sciences, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Information Sciences

Information listed in this catalog is current as of 02/2021
1. Global Information Consciousness
   a. **Definition**: The iSchool’s PhD students will discover how complex, interdependent global systems—including informational, social, and technical—affect and are affected by the characteristics and behavior of individuals, communities, and institutions.

2. Intellectual Reasoning and Knowledge
   a. **Definition**: The iSchool’s PhD students will acquire broad and deep expertise, including knowledge and skills, across subfields of information science. This includes the ability to engage with, plan, and conduct interdisciplinary research.

3. Creative Inquiry and Discovery
   a. **Definition**: The iSchool’s PhD students will apply their knowledge and skills to promote inquiry, discover solutions, generate new ideas, and communicate their research. This includes conducting independent and exemplary research, presenting their work in public settings, and publishing their work in peer-reviewed venue.

4. Social and Cultural Awareness and Understanding
   a. **Definition**: The iSchool’s PhD students will develop a critical and reflective orientation toward such social and cultural differences as race, indigeneity, gender, class, sexuality, language, and disability. This includes the ability to conduct ethical and responsible research.

5. Effective Leadership and Community Engagement
   a. **Definition**: The iSchool’s PhD students will build and sustain productive relationships to respond to information-centric, civic and social challenges at local, national, and global levels, creating positive impact in their communities. This includes the ability to convey their knowledge to others, e.g., by teaching or TA courses or workshops, and through outreach and service activities.

The Department of French and Italian offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees in French and in Italian. Candidates for the master’s degree may specialize in French Studies, French Linguistics, French Language Learning, or Italian. Candidates for the doctoral degree in French may choose one of three specializations: French Studies, French Linguistics, or Second Language Acquisition and Teacher Education (SLATE).

The following minors and certificates may be pursued: Cinema Studies (p. 1102), Gender & Women’s Studies (p. 1108), Translation Studies (https://translation.illinois.edu), Criticism and Interpretive Theory (https://criticism.english.illinois.edu)

**Admission**

**French**

Students considering admission to the master’s program should usually have had a college major in French. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation, and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to the institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://www.grad.illinois.edu/Admissions/instructions/04c.cfm). Admission for the spring semester is rare. Students seeking admission to the Ph.D. program with a Master of Arts degree earned elsewhere are expected to have a minimum 3.5 grade point average in graduate coursework. The master’s degree should be in French literature, French studies, or French linguistics. Candidates seeking admission to the Ph.D. specialization in Second Language Acquisition and Teacher Education may hold a Master of Arts in Teaching degree instead.

For more information about how to apply, see https://frit.illinois.edu/admissions/french-graduate-admissions (https://frit.illinois.edu/admissions/french-graduate-admissions/). Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

**Italian**

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation, and a writing sample of approximately 10-20 pages in the form of one or two papers. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to
institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c (http://www.grad.illinois.edu/Admissions/instructions/04c/)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of graduate training and professionalization. Non-native English speakers must first pass a test of their oral English ability. See www.grad.illinois.edu/admissions/taengprof.htm (http://www.grad.illinois.edu/admissions/taengprof.htm).

Teaching Assistants in French and Italian are required to take FR 505 or ITAL 505 respectively (4 hours) as part of their contractual obligation. The course does not count toward the graduate degrees.

Faculty Research Interests
Our faculty (https://frit.illinois.edu/directory/faculty/) possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition: graduates serve on the faculties of numerous colleges and universities both in this country and abroad. See also the faculty’s areas of research (https://frit.illinois.edu/research/research-areas/).

Centers, Programs, and Institutes
Our faculty hold appointments with the Departments of African American Studies, Gender and Women’s Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Program in Comparative and World Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

Facilities and Resources
A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive (http://www.library.illinois.edu/kolbp/).

Financial Aid
All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.

Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included in waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Graduate students in French may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

For the degree of Master of Arts in Italian

Areas of specialization offered in Italian are Italian literature and cultural studies and Italian linguistics. The M.A. in Italian requires a minimum of 32 graduate hours. Students must also successfully complete exams in four areas of Italian literature/cultural studies or three areas of Italian linguistics, chosen in consultation with their advisor.

For additional details and requirements refer to the department's guidelines for graduate students and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Learning Outcomes: Italian, MA

Learning Outcomes for the degree of Master of Arts in Italian

1. **Language:** strong command of spoken and written Italian in all its registers; strong command of academic English, particularly in writing, but also spoken; ability to summarize and explain major issues in language teaching and learning.

2. **Critical Theory:** can outline major fields of theoretical inquiry current in the discipline, such as Marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism, biopolitics, environmental humanities and ecocriticism, and others. Ability to identify current trends and issues in critical theory of interest to the field, as well as the beginning capacity to critically evaluate different theoretical approaches.

3. **Italian Studies:** demonstrates an ability to outline the field of Italian Studies, summarize the major issues of concern within the field, and evaluate some approaches to those issues.
4. **Teaching:** ability to teach Italian language at the beginning and intermediate levels; to create and critically evaluate syllabi, exams, written assignments, and lectures. Ability to identify and assess successful classroom strategies; familiarity with current trends in pedagogy for literature and culture.

5. **The Profession:** awareness and development of professional skills, including the ability to create seminar papers that can serve as raw material for future articles, give in-class presentations as a prelude to academic talks, and create book reviews and fellowship applications.

Learning Outcomes: Italian, PhD
Learning Outcomes for the degree of Doctor of Philosophy in Italian

1. **Language**: mastery of spoken and written Italian in all its registers; mastery of academic English, particularly in writing, but also spoken; ability to summarize and explain major issues in language teaching and learning.

2. **Critical Theory**: demonstrates ability to synthesize knowledge of major fields of theoretical inquiry current in the discipline, such as Marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism, biopolitics, environmental humanities and ecocriticism, and others. Ability to identify current trends and issues in critical theory of interest to the field, as well as capacity to critically evaluate different theoretical approaches, and defend one’s own approach.

3. **Italian Studies**: demonstrates an ability to evaluate the field of Italian Studies, assess the major issues of concern within the field, and evaluate different approaches to those issues.

4. **Teaching**: ability to teach Italian language at all levels, as well as a wide range of literary and cultural topics; to design syllabi, exams, written assignments, and lectures. Ability to identify and assess successful classroom strategies; familiarity with current trends in pedagogy for literature and culture.

5. **The Profession**: mastery of professional skills, including ability to formulate academic talks, generate syllabi, rewrite seminar papers as articles, construct book reviews and fellowship applications; preparation for academic job market in literary and cultural studies.
and other allied fields, including ability to identify successful strategies and evaluate different types of institutions and their teaching and research needs.

**Journalism, MS**

**phone:** (217) 333-0709

The M.S. program is designed to meet the goals of three types of students: 1) students who have recently earned a bachelor's degree in Journalism or a related field and want to explore a specific type of journalism in greater depth, 2) mid-career journalists who want to expand their professional skills, and 3) students who either hold or are pursuing a terminal degree in selected fields (including but not limited to science, technology, engineering and math) seeking to complement their expertise with journalistic skills for communicating it to the public.

### Programs in Journalism

#### Undergraduate Programs:
- **major:** Journalism, BS (p. 238)  
- **major:** Journalism, BS-MJ (p. 442)  
- **minors:** Journalism (p. 486) | Media (p. 493)

#### Graduate Programs:
- **degree:** Journalism, BS-MJ (p. 442)  
- **degree:** Journalism, MS (p. 810)  
- **joint degree:** Journalism, MS and Law, JD (p. 1131)

The department does not offer a Ph.D. degree. For the program leading to the Doctor of Philosophy in Communications, see Communications and Media, PhD (p. 655).

### Admission

Both the M.S. and M.J. programs place a strong emphasis on journalism, and candidates who are accepted are most often those with a demonstrated interest in practicing journalism. It is imperative that all applicants supply writing samples.

Applicants to the M.S. program must have a 4-year bachelor's degree from an accredited U.S. institution or one of recognized standing abroad. A grade point average of 3.0 (A = 4.0) is the minimum requirement for admission to the Graduate College, with exceptions by petition only. Because the master's program has an enrollment ceiling, some applicants with grade point averages of 3.0 or higher may not be admitted. Ordinarily, students are admitted to begin graduate study in the fall semester.

Letters of recommendation are required, and the Graduate Record Examination (GRE) is required of all applicants who do not have either an undergraduate journalism degree from the University of Illinois or an approved post-secondary degree. An interview with the head of the department or director of graduate studies is helpful but not required. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's website [https://media.illinois.edu/journalism/degrees-programs/masters/](https://media.illinois.edu/journalism/degrees-programs/masters/).

### Financial Aid

Fellowships are available only for select M.S. students. Fellowships are awarded on a quarter-time basis and carry a waiver of tuition and most fees. A limited number of merit-based scholarships are available for M.S. students.

*For the degree Master of Science in Journalism*

---

### Master of Science in Journalism

#### First Year

**Fall Semester**
- JOUR 501 Multimedia Storytelling **4**
- JOUR 505 Journalism Proseminar **4**
- Electives – minimum of 4 hours at the JOUR 4– level **4**  
**Total Semester Hours**: **12**

**Spring Semester**
- JOUR 500 Current Issues in Journalism **4**
- JOUR 515 Master's Project (Section A) **4**
- Electives – minimum of two JOUR 4– courses **8**  
**Total Semester Hours**: **16**

**Summer Semester**
- JOUR 515 Master's Project (Section B) **4**
**Total Semester Hours**: **4**

**Total Hours**: **32**

Information listed in this catalog is current as of 02/2021
Undergraduates pursuing a B.S. in Journalism at Illinois are eligible to apply for the M.S. under a joint B.S./M.S. degree program. The B.S./M.S. requires a greater number of credit hours and more theoretical courses than the B.S./M.J. program. Students can apply for the B.S./M.S. program in the first semester of their junior year and, once admitted, are encouraged to select their remaining undergraduate journalism elective courses at the 200- and 300-level from courses covering skills other than those they emphasized in completing their undergraduate degree. As graduate students, they will enroll in a minimum of four advanced electives at the 400- and 500-levels, in addition to the required graduate courses JOUR 500, 505, and 515 (sections A and B). Electives may be in areas inside or outside Journalism to allow them to pursue a topical specialization. Those electives would require the approval of the Director of Graduate Studies. The B.S./M.S. requires a minimum of 16 hours of 500-level coursework, a 3.0 or higher GPA, and additional details and requirements are available on the department's website and in the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

The Director of Graduate Studies must approve any non-Journalism courses chosen as electives.

### Learning Outcomes: Journalism, MS

Learning Outcomes for the degree Master of Science in Journalism

1. Knowledge of principles of journalism and its history and trends.
2. Expertise in news gathering through documents and data, interviews, and field observation.
3. Expertise in one of the major presentations methods in journalism, choosing among text, audio or video presentation, with an understanding of all of these presentation methods include the use of mobile devices.
4. An understanding of professional journalism, including its changing business models, job descriptions and increasing cross-disciplinary collaborations.
5. An understanding of various qualitative and quantitative methods in data journalism.

### Kinesiology, MS

for the degree of Master of Science in Kinesiology

Department Head: Kim Graber
Director of Graduate Studies: Steven Petruzello
Graduate Office: Julie Jenkins
Graduate Office Address: 906 South Goodwin Ave, 112 Freer Hall MC-052, Urbana, IL 61801
Graduate Phone: (217) 333-1083
Graduate Email: jjenkns@illinois.edu
Department Website: https://ahs.illinois.edu/kinesiology
Program Website: https://ahs.illinois.edu/master-of-science-kinesiology

### Graduate Degree Programs

Kinesiology, MS (p. 811)
Kinesiology, PhD (p. 812)
Joint Degree Program:
Kinesiology, PhD and Master of Public Health, MPH (p. 1137)

### Admissions

Students may apply to either the M.S. or the PhD program. Applications are due on January 15 for Fall admissions. Applications are due on October 1 for Spring admissions.

Admissions to the M.S. degree program requires a baccalaureate degree from an accredited institution of higher education, a minimum grade point average of 3.0 (A = 4.0) for the last two years of undergraduate study and any graduate work completed, Graduate Record Examination (GRE) test scores, a statement of interest, and three letters of recommendation.

International students must also submit Test of English as a Foreign Language (TOEFL) scores, with a minimum for full status admission: greater than 102 (IBT), greater than 253 (CBT), greater than 610 (PBT), or greater than 7.0 (IELTS). Scores cannot be more than 2 years old. (see https://grad.illinois.edu/admissions/instructions/04c)

Major areas of specialization at both the master's and doctoral degree levels include:

- Cultural, Interpretive and Science Studies
- Exercise Physiology
- Exercise Psychology
- Motor Control / Biomechanics
- Pedagogy & Physical Activity

It is possible for a full-time student to complete this degree program in one academic year plus one summer session.

Learning Outcomes for the degree of Master of Science in Kinesiology

1. Content Knowledge: Students will demonstrate an advanced understanding of current and historically significant theories, models, themes, and ideas in the biomechanical, physiological, psychological, behavioral, pedagogical, biological, socioeconomic, and sociocultural correlates of Kinesiology.

2. Critical Thinking and Discovery: Students will demonstrate ethical practices while applying advanced quantitative and/or qualitative methods in collecting, analyzing, and interpreting data which will then be disseminated through publications and/or oral presentations.

3. Awareness and Understanding: Students will understand and appreciate the diverse biological, psychological, socioeconomic, sociocultural, philosophical, and historical factors that influence health, physical activity, rehabilitation, and human movement.

4. Programming and Assessment: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases in culturally diverse populations.

5. Leadership and Engagement: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Admissions
Students may apply to either the M.S. or the PhD program. Applications are due on January 15 for Fall admissions. Applications are due on October 1 for Spring admissions.

Admission to the PhD degree program requires a minimum of a baccalaureate degree from an accredited institution of higher education with a minimum grade point average of 3.5 (A = 4.0) for the last two years of undergraduate study. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit Graduate Record Examination (GRE) test scores, a statement of interest, and three letters of recommendation.

International students must also submit Test of English as a Foreign Language (TOEFL) scores, with a minimum for full status admission: greater than 102 (IBT), greater than 253 (CBT), greater than 610 (PBT), or greater than 7.0 (IELTS). Scores cannot be more than 2 years old. (see https://grad.illinois.edu/admissions/instructions/04c/https://grad.illinois.edu/admissions/instructions/04c/)

Graduate Degree Programs in Landscape Architecture

Landscape Architecture, MLA ([http://catalog.illinois.edu/graduate/graduate-majors/landscape-arch/#masterstext](http://catalog.illinois.edu/graduate/graduate-majors/landscape-arch/#masterstext))
Sustainable Urban Design, MSUD (p. 1015)
Heritage Studies Graduate Minor (p. 1110)

Joint programs:
Landscape Architecture, MLA & Urban Planning, MUP (p. 1131)

The Department of Landscape Architecture offers the Master of Landscape Architecture (MLA) degree, the Master of Sustainable Urban Design degree (MSUD), and the PhD degree. The programs enable students to gain fresh insights and to conduct new research pertaining to land and its use by people. Courses and faculty research activities range from on-site to regional scales, and include environmental planning and design as well as community design, cultural heritage, and history.

The MLA is an accredited first professional degree. Students may pursue specialized areas that reflect their interests and career aspirations. This may include ecological design, community design, and cultural heritage history and design. Joint MLA/MUP is available.

Admission

The Graduate College admission requirements apply. Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. MLA candidates from undergraduate design programs must submit portfolios with applications to the MLA program. Candidates without undergraduate preparation in landscape architecture will be admitted on limited status and must complete undergraduate prerequisite courses in addition to graduate work. All students must begin their studies in the fall semester.

Financial Aid

Students compete for fellowships, assistantships and tuition/service fee waivers. Some awards are determined during admissions review and students are informed through the acceptance letter. There are also some financial aid opportunities during the course of study (e.g., semester-long TA positions when available).

For the degree of Master of Landscape Architecture in Landscape Architecture

Master of Landscape Architecture-Thesis Option

Specific courses to be taken are determined in consultation with an adviser. Some students complete a master’s thesis (LA 599), others develop a specialization through additional coursework.

Learning Outcomes: Landscape Architecture, MLA

Learning Outcomes for the degree of Master of Landscape Architecture in Landscape Architecture

Master of Landscape Architecture students will:

1. **Design Thinking.** Use a variety of processes to discover and frame opportunities, generate multiple possibilities, evaluate and refine ideas, rapidly prototype and test your proposal, and share your ideas in a compelling manner.
2. **Communicate with Skill.** Use a variety of digital tools to generate design proposals, test those proposals, and share your ideas with others.
3. **Tap into Existing Knowledge.** Incorporate our best understanding of natural resources, environmental systems, human development, social systems, professional practice and professional ethics into your work.
4. **Technical Competence.** Demonstrate the technical competence to translate design proposals into built work.
5. **Responsibility and Leadership.** Develop and demonstrate a sense of responsibility to the land and the people for whom we design.

Graduate Degree Programs in Landscape Architecture

Landscape Architecture, MLA (http://catalog.illinois.edu/graduate/graduate-majors/landscape-arch/#masterstext)  
Sustainable Urban Design, MSUD (http://catalog.illinois.edu/graduate/faa/sustainable-urban-design-msud/)  
Heritage Studies Graduate Minor (http://catalog.illinois.edu/graduate/faa/minor/heritage-studies/)  
joint programs: Landscape Architecture, MLA & Urban Planning, MUP (p. 1131)

The Department of Landscape Architecture offers the Master of Landscape Architecture (MLA) degree, the Master of Sustainable Urban Design degree (MSUD), and the PhD degree.

The programs enable students to gain fresh insights and to conduct new research pertaining to land and its use by people. The PhD program is jointly administered with the School of Architecture and emphasizes both interdisciplinary study and cross-disciplinary inquiry. Areas of concentration include history and theory; technology and environment; and behavioral and cultural factors in design. Before submitting an application, students should consult the department website for information regarding the specific areas of study and the time needed to complete the requirements.

Several faculty members in the department also participate in the doctoral program administered by the Department of Urban and Regional Planning. See the program description under Regional Planning, PhD (p. 970) for more information.

Admission

The Graduate College admission requirements apply. Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. The doctoral program prefers candidates with master's degrees: MLA, MArch, or related fields such as art history, ecology, geography, or planning. All graduate students must begin their studies in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the PhD program.

Financial Aid

Students compete for fellowships, tuition and service fee waivers, and assistantships. Selection is based on the academic achievement and qualifications of the student.

for the degree of Doctor of Philosophy in Landscape Architecture

For additional details and requirements refer to the department's PhD Handbook (https://go.illinois.edu/PhDArchandPhDLArchHandbook/), Program Curriculum (http://www.landarch.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

The requirements may vary slightly according to students’ area of focus. Please consult the PhD Handbook (https://go.illinois.edu/PhDArchandPhDLArchHandbook/) for more explicit details.
Students are required to defend their dissertation. Policies on format of the doctoral examination can be found in the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum GPA: 3.0

Language and statistics course requirements vary by focus area. To develop proficiency, students may be required to take more than one course. Specific requirements are determined on a case-by-case basis by the Chair of the PhD Committee in consultation with the student’s advisor.

Learning Outcomes: Landscape Architecture, PhD

Learning Outcomes for the degree of Doctor of Philosophy in Landscape Architecture

- **Research Skills.** Develop and practice a variety of research skills. Students will design their research strategy; obtain and analyze evidence; develop evidence-based arguments; identify and evaluate the existing critical literature of the field; master languages in some cases, and in other cases master advanced computer programs.

- **Communicate with Clarity.** Develop and demonstrate the ability to communicate complex and original ideas through clear writing supplemented by graphic representations and delivered as text (dissertation), speech (lecture presentations), and image (PowerPoint to accompany lectures). Doctoral students will gain an advanced level of written, visual, and technical literacy.

- **Original Research.** Develop and carry out a major, original research investigation; develop it into an extended argument (the dissertation), the outcome of which might be a book, policy guidelines, a series of journal articles, or a patent.

- **Design Research.** Use ideas and methods from design research to explore questions that advance knowledge that supports design.

- **Pedagogy.** Demonstrate understanding of basic concepts about teaching and practice a range of instructional techniques in classrooms and studio contexts.

Latin American Studies, MA

*for the degree of Master of Science in Latin American Studies*

PhD students in the Department of Landscape Architecture will:

1. **Research Skills.** Develop and practice a variety of research skills. Students will design their research strategy; obtain and analyze evidence; develop evidence-based arguments; identify and evaluate the existing critical literature of the field; master languages in some cases, and in other cases master advanced computer programs.

2. **Communicate with Clarity.** Develop and demonstrate the ability to communicate complex and original ideas through clear writing supplemented by graphic representations and delivered as text (dissertation), speech (lecture presentations), and image (PowerPoint to accompany lectures). Doctoral students will gain an advanced level of written, visual, and technical literacy.

3. **Original Research.** Develop and carry out a major, original research investigation; develop it into an extended argument (the dissertation), the outcome of which might be a book, policy guidelines, a series of journal articles, or a patent.

4. **Design Research.** Use ideas and methods from design research to explore questions that advance knowledge that supports design.

5. **Pedagogy.** Demonstrate understanding of basic concepts about teaching and practice a range of instructional techniques in classrooms and studio contexts.
The Center for Latin American and Caribbean Studies administers Graduate Degree Programs in Latin American & Caribbean Studies with various departments. The center is a Title VI National Resource Center. The center houses the Lemann Institute for Brazilian Studies.

**Language Instruction**

The Center offers 3 levels of Quechua, the most spoken language in the American continent, with approximately 13 million of speakers in 6 countries. The Center also offers Quechua online courses and free access to the publication Correo de Linguistica Andina and free exercises on Quechua. Visit [www.clacs.illinois.edu/quechua/](http://www.clacs.illinois.edu/quechua/).

Other languages in the University that fulfill the M.A. requirements are Spanish and Portuguese, both offered at the School Literatures, Cultures, and Linguistics.

**Faculty Research Interests**

More than 100 faculty throughout the University are currently affiliated with the Center. The Center’s faculty devote all or a portion of their teaching and research to Latin American subjects, from agriculture to politics, culture and linguistics. Their expertise spans every important discipline and sub-region of Latin America and the Caribbean, with particular strength in the Andean countries, the Caribbean, lowland South America, Mexico, and Brazil.

For a complete list of our affiliated faculty and their research and teaching interests check our people page at [http://www.clacs.illinois.edu/about/people/faculty.aspx](http://www.clacs.illinois.edu/about/people/faculty.aspx).

**Facilities and Resources**

**Latin American Library Collection (LALC)**

The Center assist the Latin American Collection [http://www.library.illinois.edu/lat/](http://www.library.illinois.edu/lat/) at the University Library in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments.

The LALC collection ranks among the six largest in the country and is the largest collection in the Midwest region in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments. It is located in the third floor of the main UIUC library in room 324 and while the Library itself does not house a circulating collection, our knowledgeable staff is available to help locate relevant materials, answer reference questions, and assist you in developing effective searching strategies.

The Latin American and Caribbean Library collection includes:
• More than 400,000 monograph titles;
• Newspapers and magazines from over 20 Latin American and Caribbean countries;
• A strong collection of journals in the humanities and social sciences, as well as publications of professional associations, government agencies, central banks, and non-governmental organizations;
• Access to HAPI Online (Hispanic American Periodicals Index), the Handbook of Latin American Studies (http://lcweb2.loc.gov/hlas/), and other online databases;
• An extensive collection of videos available at the Media Center in the Undergraduate Library;
• over 32,000 maps of Latin America (housed in the Map and Geography Library);
• comprehensive holdings of Brazilian and Andean materials;
• Extensive holdings by and about Gabriel García Márquez;
• Publications from the Archivo General de la Nación de Mexico; and
• A comprehensive Latin American music collection.

List-serv
The Center administers a listserv with more than 500 subscribers. Weekly mass messages “CALCS/Lemann Institute this Week” contain information on activities in campus related to Latin America and the Caribbean region (conferences, workshops, movies), new courses and job positions as well as future conferences in other Universities. To subscribe contact: Angelina Cotler (cotler@illinois.edu).

CLACS Brownbags
Every Thursday at Noon in Room 101 International Studies Building (910 S. Fifth Street in Champaign) CLACS presents a lecture offered by a faculty, graduate student or outside faculty on topics relevant to the region. These are open and free brownbag lectures. For complete list of presentations during the semester visit our website on the events section.

Opportunities and Events
The Center keeps update a complete list of jobs, grants, conferences, and fellowships in the U.S. and abroad for graduate students and faculty. Check it at http://www.clacs.illinois.edu/news/opportunities.aspx.

Outreach Program (http://www.clacs.illinois.edu/outreach/default.aspx)
One of the goals of our mission is to increase knowledge and awareness of Latin America and the Caribbean in the educational community and the general public by promoting language and area studies in their broadest sense. Outreach at CLACS is a service-oriented program funded through a Title VI Federal Area Studies grant. It is designed to increase public knowledge about Latin America and the Caribbean and Latin American and Caribbean peoples and cultures. All our services are free! Services include

• Speakers Bureau composed by graduate students and faculty for presentations in schools on Latin American topics.
• Outreach Library for K-14 teachers and instructors that includes books and DVDs.
• Collaborates with the Illinois International Review, the University of Illinois’ new international publication; produces CLACS This Week, a weekly Calendar of Events; and an annual newsletter on Quechua instruction, Correo de Linguistica Andina.
• Publishes several curriculum development workbooks including: Columbus: Beyond the Myth, A Teacher’s Workbook on Tropical Rain Forests, and Historia Oral: The Latina/o Experience in the United States.
• Organizes the Latin American Brownbag Colloquium, a weekly series of noon seminars in which faculty, students, and visiting scholars present current research and speak on topics of special interest. Additionally, the Center sponsors many cultural events, such as Latin American music and dance ensembles, and art exhibitions.
• Maintains links to Web based curriculum-related materials on its outreach Web pages as a means of facilitating access to curriculum resources and research materials on Latin America and the Caribbean.

For more information visit http://www.clacs.illinois.edu/outreach/default.aspx.

Links
Links to local museums, units and clubs that offer Latin American and Caribbean services as well as external links to institutions abroad and in the U.S. www.clacs.illinois.edu/resources/ (http://www.clacs.illinois.edu/resources/).

Financial Aid
The Center is a recipient of Federal Government Title VI Foreign Language and Area Studies (FLAS) Fellowships for Graduate Studies in any discipline that includes a specialization in Latin American Studies and an intensive program of language instruction. Academic year language courses and summer fellowships for intensive language courses abroad or in the United States are available. Information on how to apply, requirements and datelines are posted in http://publish.illinois.edu/illinoisflas/.

The Center offers Tinker Summer Fellowship Research Grants for graduate students in any department wishing to do research during the summer in Latin America, the Caribbean and the Iberian Peninsula. Both these programs depend on outside funding and thus cannot be guaranteed in any given year. Information on how to apply, requirements and datelines are posted in http://www.clacs.illinois.edu/academics/fellowships/tinker.aspx.

for the degree of Master of Science in Latin American Studies
Specializations in Latin American and Caribbean Studies are administered by the director of the Center for Latin American and Caribbean Studies.

Candidates for the master's degree who elect a specialization in Latin American and Caribbean Studies must complete 8 graduate hours from the courses prescribed by the center. Doctoral candidates who elect a specialization in this area must complete 16 graduate hours for one specialization or 8 graduate hours for a split specialization. Courses must be taken in at least two departments; a list of courses fulfilling the specialization is available from the center. A specialization in agricultural economics and foreign areas studies (in this case, Latin American and Caribbean Studies) is also available. A high level of proficiency in one or more languages of the region (Spanish, Portuguese, and Amerindian Indian languages) is required. For course information, requirements, and methods used to establish the level of proficiency, contact the center’s academic programs coordinator.

Students in technical and professional colleges and schools of the University of Illinois at Urbana-Champaign who seek knowledge of the Latin American and Caribbean region and languages are invited to consult with the director of the center or with their adviser in order to
develop programs suited to their individual needs. Such a program may often be adopted as a specialization under existing regulations if the student so desires. These courses are of particular value to students who intend to undertake technical or professional work in the Latin American and Caribbean area for government, private business, publishing, or religious organizations.

### Learning Outcomes: Latin American Studies, MA

Learning Outcomes for the degree of Master of Science in Latin American Studies

1. **Advanced Proficiency in a Latin American Language (Spanish, Portuguese, Indigenous)** - This will be assessed through completion of appropriate level course work and through OPI or equivalent testing.
2. **Diverse Perspectives**
   - a. Students will partake in interdisciplinary inquiry that engages multiple disciplinary lenses and theoretical frameworks.
   - b. Students should be able to apply these frameworks to multiple contexts (spatial, temporal, cultural etc.) within Latin American Studies.
3. **Critical and Applied Learning**
   - a. Students should be able to critically and reasonably evaluate and apply their knowledge to current debates within Latin American Studies.
   - b. Students will be able to apply interdisciplinary learning across multiple contexts, integrating knowledge and practice.
4. **Interdisciplinary Research**
   - a. Students should be able to apply their knowledge to the design and implementation of along-term independent research project that uses both primary and secondary sources and articulates with current debates within Latin American Studies.
   - b. They should be able to effectively communicate the results of that research in written form by producing a MA thesis.
5. **Effective Communication**
   - a. Students should be able to identify research problems, approach these problems with appropriate methodologies and effectively communicate the results. They should be able to apply their knowledge to real-world situations.
   - b. Students should be able to effectively communicate in written and oral form their knowledge of Latin American culture and language to a broad non-specialist audience.

### Law, JSD

**for the Doctor of the Science of Law**

- **dean of the college:** Vikram David Amar
- **associate dean for graduate and international programs:** Margareth Etiene
- **correspondence and admission information:** Christine Renshaw, Office of Graduate and International Legal Studies

**college website:** [https://law.illinois.edu](https://law.illinois.edu)

**college faculty:** [Law Faculty](https://law.illinois.edu/faculty-research/faculty-profiles/)

**college address:** 244 Law Building, 504 East Pennsylvania Avenue, Champaign, IL 61820

**phone:** (217) 333-6066

**email:** law-gradprograms@illinois.edu

The Doctor of the Science of Law (J.S.D.) degree provides students who primarily intend to pursue an academic career an opportunity for extended study, research, and scholarly writing. Those admitted to the program must have demonstrated analytic and research ability, possess outstanding academic credentials, and have completed the LL.M. or other law degree from the University of Illinois or other accredited American law school. In exceptional cases, consideration will be given to applicants who have completed programs of study in common law countries. All candidates must provide evidence of excellent reading and writing skills in English. The J.S.D. program normally takes a minimum of three years. Two years must be completed in residence at the College of Law and must include two semesters of course work. J.S.D. candidates are assigned a primary faculty advisor with expertise in the student's research area and an additional three faculty members, who form the student's doctoral committee. Each student must pass a qualifying examination demonstrating general proficiency in the student’s field of study and a preliminary examination on the research proposal. The student’s faculty committee then will assess the student’s thesis research and writing progress, make recommendations, and conduct an oral examination on the final draft of the dissertation. The final dissertation will then be completed and deposited with the Graduate College.

Information listed in this catalog is current as of 02/2021
Graduate Degree Programs in the College of Law

Master of Laws, LLM (p. 821)

concentrations:
- Corporate Law, Commercial Law, & Trade (p. 822)
- Criminal Law (p. 823)
- Intellectual Property & Technology Law (p. 825)
- International & Comparative Law (p. 826)
- Justice, Democracy, & Legal Rights (http://catalog.illinois.edu/graduate/graduate-majors/law/judiciary-democracy-legal-rights-concentration/)
- Regulation, Sustainability, & Compliance (http://catalog.illinois.edu/graduate/graduate-majors/law/regulation-sustainability-compliance-concentration/)

US Legal Practice Skills (p. 829)

Master of Studies in Law (p. 830)

Doctor of the Science of Law (p. 819)

Law, JD (http://catalog.illinois.edu/professional-programs/jd_law/)

Joint Degrees with the Law, JD:
- Chemistry, MS (p. 1132)
- Computer Science, MCS (p. 1126)
- Human Resources and Industrial Relations, MHRIR (p. 1130)
- Journalism, MS (p. 1131)
- Natural Resources & Environmental Sciences, MS (p. 1132)
- Political Science: Civic Leadership, MA (p. 1136)
- Political Science, PhD (p. 1136)
- Urban Planning, MUP (p. 1140)

Admission

The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/O4c/) apply. In addition for the LL.M. program, the Test of English as a Foreign Language (TOEFL) requirement is 80 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is generally made for the fall semester only.

Financial Aid

Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of the cost of enrollment. In addition to scholarships, a number of assistantships are available, requiring students to work as research assistants, teaching assistants, or graduate assistants.

Learning Outcomes: Law, JSD

Learning Outcomes for the Doctor of the Science of Law

1. Demonstrate basic knowledge of American substantive and procedural law. This requires:
   a. The foundational rules governing liability for civil and criminal wrongdoing.
   b. The foundational rules that regulate the transaction of business among individuals and the ownership of property.
   c. The constitutional rules that shape the American legal system.
   d. The procedural rules that govern court adjudication.
   e. Several advanced areas of substantive or procedural law or both.

2. Use legal reasoning and legal analysis. This requires:
   a. The ability to identify, formulate, and apply legal rules.
   b. The ability to read and analyze judicial opinions.
   c. The ability to parse and interpret statutes, regulations, contracts, and other similar legal texts.
   d. The ability to construct legal arguments and evaluate critically one’s own and others’ legal arguments.
   e. The ability to identify and evaluate the practical consequences of various legal rules and to formulate policy arguments for and against those rules.

3. Develop practical legal skills. This requires:
   a. The ability to write clearly and effectively in a wide range of legal contexts and for various audiences, such as courts, clients, opposing counsel and academics.
   b. The ability to articulate one’s thoughts verbally in a clear and effective manner.
   c. Knowledge of and ability to use tools of legal research.
   d. The ability to identify and gather factual information relevant to the application of legal rules.
   e. The ability to work collaboratively with others, including others with opposing interests.

4. Conduct himself or herself professionally and in keeping with the highest standards of civic virtue. This requires:
   a. Knowledge and appreciation of the ethical rules governing legal practice and/or academic research.
   b. The ability to learn and grow professionally through self-reflection and continuing education.
   c. An understanding of the lawyer’s distinctive role in society and of the lawyer’s concomitant responsibility to contribute to society through public service and pro bono representation.
   d. The ability to understand and be understood across various social, economic, cultural, political, national, racial, gender, and ethnic backgrounds.

5. Produce a substantial piece of original academic research. This requires:
a. Mastery of literature in a particular area.
b. Mastery of the sub-field in which a thesis will be written.
c. Acquisition of expertise in the subject area of one's thesis.
