GENERAL INFORMATION

The University of Illinois at Urbana-Champaign 2020-2021 Academic Catalog is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the Catalog is in effect.

The class schedule is available each term in the Course Explorer (http://courses.illinois.edu). The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this Catalog are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the intended/recommended level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors.

Courses numbered 200-299 are intended for lower-division students who satisfy the published prerequisite(s), if any. Transfer credit from two-year colleges would correspond to 100- and 200-level offerings.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from two-year colleges does not correspond to these numbers.

Courses numbered 400-499 are intended for upper-division undergraduate students sometimes also for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law, medicine, and veterinary programs.

Course credit is listed after each course title. The university counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer (http://courses.illinois.edu). For information on credit policies, see the Student Code.

A crosslisted course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or more departments and will be noted by the statement: "Same as." The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department’s course is noted by "See..."

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Degree and General Education Requirements

General Education Requirements

The University of Illinois at Urbana-Champaign requires that all undergraduate students take General Education - or "Gen Ed" - courses to gain and use broad knowledge beyond the specialized learning they will do in a major field of study. These Gen Ed requirements cover the kinds of knowledge all students should have: the humanities and arts, social and behavioral sciences, natural sciences and technology, quantitative reasoning, composition/writing, and cultural studies.

General Education courses at Illinois are mindful of our students’ diverse backgrounds, needs, and interests, and are an essential component of the transformative learning that prepares our graduates to become alumni who make a significant societal impact. These courses build students’ abilities to think critically, solve problems, generate new ideas and create knowledge, make connections between academic disciplines, respect and understand differences, and develop as citizens and leaders.

General Education at Illinois is more than a set of required courses; it is a gateway into the Illinois experience.

Courses are noted as fulfilling one or more of the following categories:

- Composition I
- Advanced Composition
- Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
• Natural Sciences and Technology: Life Science or Physical Science
• Quantitative Reasoning
• Social and Behavioral Sciences
• Cultural Studies: Western/Comparative Cultures, Non-Western Cultures, and US Minority Cultures

For a list of current courses approved for General Education credit, please visit the Course Explorer (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

**Written Communication Requirement**

**Undergraduate Students:**

• Satisfactory proficiency in written communication is a requirement for all undergraduate degrees awarded at the University of Illinois at Urbana-Champaign. This proficiency can be certified by the satisfactory completion of the “Composition I” general education requirement via the one-semester, four-hour course Rhetoric 105 (Writing and Research); the two-semester, eight-hour sequence of Rhetoric 101 (Principles of Writing) and 102 (Principles of Research) with Rhetoric 100 tutorials in both semesters; or the two-semester, six-hour sequence Communication 111 and 112 (Oral & Written Communication I and II).

• A student who achieved, prior to enrolling in college-level coursework, a sufficiently high score on either the appropriate college-preparatory English exam (currently ACT, SAT, AP, or IB) will earn course credit that fulfills the general education “Composition I” requirement and thus will satisfy the Written Communication requirement for graduation. More information can be found under “Proficiency Testing” at go.illinois.edu/pnp (http://go.illinois.edu/pnp/).

• Non-native English-speaking students who are mandated to take the English Placement Test (EPT) and given an English as a Second Language (ESL) placement must fulfill their Written Communication requirement by taking the two-semester, six-hour sequence of ESL 111 and 112 or the one-semester, four-hour ESL 115 course. They might also be required to take ESL 110 (Pronunciation). Non-native English-speaking students who are not required to take the EPT due to sufficiently high TOFEL iBT or IELTS scores may elect to satisfy the Written Communication requirement by taking the ESL, or the Rhetoric, or the Communication sequences. Students in this category who wish to take ESL must take the EPT to determine correct placement.

• If the academic credentials of a transfer student do not indicate fulfillment of coursework equivalent to fulfill the Written Communication graduation requirement, the student will need to do additional coursework to satisfy this requirement. Non-native English-speaking transfer students may be required to take the English Placement Test (EPT).

**Graduate Students:**

• Satisfactory proficiency in academic writing in English is a requirement for all graduate degrees awarded at the University of Illinois at Urbana-Champaign.

• Graduate students who are admitted on limited status because they do not meet this proficiency requirement prior to admission may be placed into mandatory ESL courses based on the results of the EPT exam.

• Proficiency can then be certified by the satisfactory completion of a one-semester course (ESL 515) or the two-semester sequence (ESL 511 and 512). Students may also select equivalent coursework from the “English for specific purposes” tracks available through ESL (e.g., business track ESL 521, 522). International graduate students may also be required to take ESL 510 (Pronunciation).

• Mandatory ESL course assignments must be fulfilled in order to be eligible for graduation.

**Kinesiology, Language Other Than English, and Undergraduate Open Seminar Credit**

**Credit for Kinesiology**

Kinesiology courses numbered from 100 through 110 are activity courses. Credit earned in kinesiology activity courses may be included in the grade point average at the discretion of the individual colleges and may, at the discretion of the individual colleges, be included in the total hours required for graduation.

**Language Other Than English Credit**

• Effective for all entering freshmen in Fall 2000 or later, the following language requirement must be completed for graduation.

• This requirement may be satisfied by:
  1. Successfully completing a third-semester college-level course in a language other than English;
  2. Successful completion, in high school, of the third year of a language other than English; or
  3. Demonstrating proficiency at the third semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

• Generally, one year of high school language study is equivalent to one semester of college study.

• Current list (http://fms.registrar.illinois.edu/Report/?file=CatalogInformation%5CLanguage%20Reqs%5CCourses_Approved_Language_Requirements.xml) of courses approved to satisfy the language requirement.
• If you enter UIUC without three years of language other than English in high school, or you plan to continue with the language you studied in high school, you must take a language placement test to determine the courses in which you should enroll.

• An exception to the University third-level requirements is for the students in the Gies College of Business (BUS) who matriculated prior to Fall 2021 and all students in the Sciences and Letters Curriculum of the College of Liberal Arts and Sciences (LAS). These students are expected to gain language knowledge equivalent to the completion of the fourth semester of college study in a language. The Language requirement may be met in any of the following ways:
  1. Successfully completing a fourth-semester college-level course in a language other than English;
  2. Successful completion, in high school, of the fourth year of a language other than English;
  3. Successful completion of the third-semester level in each of two different languages other than English by any combination of high school and college work;
  4. Demonstrating proficiency at the fourth-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

• Students enrolled in the LAS Chemistry and Chemical Engineering Specialized Curricula are exempt from the four semester LAS Language requirement and must instead adhere to the Campus requirement of three semesters or equivalent. Please contact your adviser if you have any further questions.

• Except as prohibited or limited by the established policy of the student’s college, credit in University of Illinois at Urbana-Champaign language courses other than English taken to remove high school entrance deficiencies may, at the discretion of the college:
  1. be counted in the total hours required for graduation, or
  2. be accepted in partial or complete satisfaction of the language other than English requirement for the degree.

• Normally no more than ten hours of proficiency credit for the study of a single language other than English at the elementary and intermediate level shall be counted for graduation in the College of Liberal Arts and Sciences. Additional credit may be granted for advanced courses emphasizing literature and language structure rather than communicative competence in the language.

• Students with a verified Seal of Biliteracy will earn 8 hours of credit equivalent to the first two levels of foreign language regardless of the language other than English. The credit will appear as 8.00 Earned hours from Seal of Biliteracy on the official University of Illinois at Urbana-Champaign transcript in the Transfer Credit Accepted by the Institution section.

Credit for Undergraduate Open Seminar Courses
• Credit in each 199 course shall not exceed four credit hours per semester.
• A student may accumulate an unlimited number of credit hours in 199 courses, but no more than 12 such hours listed on the student’s transcript may be counted toward fulfilling graduation requirements, except in cases in which a larger number of credit hours in 199 courses is an integral part of a formal, college-approved program of study (e.g., Individual Plans of Study).
• A 199 course appears on a student’s transcript with the departmental rubric and the title “Undergraduate Open Seminar” when a specific section title has not been assigned by the department offering the course.

Policy Notes
Illinois Copyright Policy
The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources/)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (http://copyright.illinois.edu/compliance/).

Religious Observances
The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).
Smoke and Tobacco-Free Campus
Smoking and the use of all non-combustible tobacco products and non-FDA approved nicotine delivery devices and products is prohibited on all campus property, both indoors and outdoors, and in university-owned vehicles and in privately owned vehicles parked on campus property. The advertising, sale, and free sampling of tobacco products and non-FDA approved nicotine delivery devices and products are prohibited on campus property. Littering the remains of tobacco and non-FDA approved nicotine delivery devices or products or any other related waste products on campus property is prohibited. The complete policy is available [here](http://cam.illinois.edu/v/v-B-2.1.htm).

State Approving Agency Certification
Effective August 1, 2019, the University of Illinois at Urbana-Champaign is in compliance with Title 38, Veterans’ Benefits, Part III, Readjustment and Related Benefits, Section 3679, Disapproval of courses, Subsection e. [38 U.S. Code 3679(e)](https://uscode.house.gov/view.xhtml?path=/prelim@title38/part3/chapter36&edition=prelim).

Student Code
Policies and procedures applying to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code [here](http://studentcode.illinois.edu/).

Student Consumer Information
Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois at Urbana-Champaign is available on the Office of the Provost's website [here](http://provost.illinois.edu/student-consumer-information/). This includes a description of the institution's accreditation and state authorization, contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.

U of I System Statement on Sex Discrimination, Sexual Harassment and Other Sexual Misconduct
Please refer to the University of Illinois System website [here](https://www.hr.uiowa.edu/cms/One.aspx?portalId=4292&pageId=5671) for the most up-to-date statement on Sex Discrimination, Sexual Harassment and Other Sexual Misconduct.

Professional Licensure Disclosures
The University of Illinois at Urbana-Champaign provides public licensure disclosures pursuant to 34 CFR 668.43(a)(5)(v) for educational programs designed to meet or advertised as meeting requirements for professional licensure or certification.

Disclosures by College [here](http://www.dmi.illinois.edu/ProfLicDis.htm)

GI Bill® 1 Pending Payment Policy
Beginning August 1, 2019, and despite any policy to the contrary, the University of Illinois Urbana-Champaign will not take any of the four following actions toward any student using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while their payment from the United States Department of Veterans Affairs is pending to the educational institution:

- Prevent their enrollment;
- Assess a late penalty fee to;
- Require they secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA’s Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies (see our VA School Certifying Official for all requirements).

I hereby certify this addendum to be true and correct in content and policy.

Our institution will adopt this addendum, or one of similar import, in the next revision of our catalog.

Information listed in this catalog is current as of 09/2021
GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill. (https://urldefense.proofpoint.com/v2/url/?u=https-3A__www.benefits.va.gov_gibill.-2522&d=DwQFAg&c=OClEmEwdEq_aNlsP4ff3gFqSN-E3mlr2t9JcDdfOZag&r=001BuolzYf_EKxGsnR6C4GHELOQMtS7tEDYeze9kStc&m=cmPTaWhemCt7JT4tZjwLwU_9-ZuB0kznSP0smShQ&s=cJbsWj-nMuP32Nz_Be1ebklzXE7b-1Zuk7_12mcn42U&e=)

Annual Announcement of Copyright Policies

Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) photographic images, music, movies, and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. Copyright compliance enforcement agencies aggressively pursue infringers. If you are infringing, even unknowingly, you can be subject to civil damages per work infringed, and even criminal fines and jail time.

All universities of the University of Illinois System make every effort to comply with laws and institutional policies on copyright. Individuals who receive a copyright infringement notice may face disciplinary or employment actions. These actions may include, but are not limited to, loss of network access, mandatory training about copyright infringement, conduct sanctions, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: http://copyright.illinois.edu.
The undergraduate Colleges and Schools offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

Accountancy, BS

for the degree of Bachelor of Science Major in Accountancy

department office: 360 Wohlers Hall, 1206 South Sixth, Champaign, IL 61820
phone: (217) 333-0857
department catalog page: A (http://catalog.illinois.edu/gies_businuss/accy/accountancy (http://catalog.illinois.edu/undergraduate/bus/accountancy-bs/)
department website: https://giesbusiness.illinois.edu/accountancy (https://giesbusiness.illinois.edu/accountancy/)
overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/

The Gies accountancy major combines technical knowledge in accounting, assurance, taxation, and data analytics with professional competencies in critical thinking, communication, leadership, and strategic decision-making. Accountancy majors will study the principles, concepts, and methods used to record and report the transactions and activities of a business entity, as well as the tools and processes to audit and analyze accounting information. Accountancy majors will also study the role of accounting information in shaping and implementing key business strategies. Career opportunities for accountancy majors include positions in audit and assurance services, corporate accounting, taxation, consulting and advisory services, and in governmental and not-for-profit entities.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (p. 1202)).

for the degree of Bachelor of Science Major in Accountancy

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 124 hours.

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Accountancy, BS

Learning Outcomes for the degree of Bachelor of Science Major in Accountancy

1. Discipline-based competency: Students will acquire sufficient discipline-based competency to address business and accounting problems, both current and future. Such competency will include using accounting knowledge and using research tools to address accounting and business problems.

2. Written and verbal communication competency: Students will be able to effectively communicate, both verbally and in writing. This competency will extend to communication in individual and team settings.

3. Attitude-related Professional Preparation: Students will develop an understanding for and appreciation of an accountant’s professional responsibility, and will become aware of society’s expectations.

Actuarial Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Actuarial Science

program website: Actuarial Science (https://math.illinois.edu/academics/actuarial-science/)
program faculty: Actuarial Science Faculty (https://math.illinois.edu/research/faculty-research/actuarial-science/)
department website: https://math.illinois.edu/overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/lass/academic-units/)
college website: https://las.illinois.edu/
email: ASRM-advising@illinois.edu

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management.

Undergraduate programs in Mathematics
Actuarial Science, BSLAS (p. 13)
Mathematics, BSLAS (p. 289)
Mathematics & Computer Science, BSLAS (p. 287)

for the degree of Bachelor of Science in Liberal Arts & Sciences, Major in Actuarial Science

Departmental distinction: To qualify for distinction, the student must have a grade point average in ASRM courses of at least 3.25, and pass at least two examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least three professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: normally equates to 58-61 hours including 32-33 hours of actuarial courses beyond calculus.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper division coursework (these hours can be drawn from all elements of the degree).

### Learning Outcomes: Actuarial Science, BSLAS

#### Learning Outcomes for the degree of Bachelor of Science Major in Actuarial Science

**Student Learning Outcomes**

1. Have sufficient exposure to actuarial and financial mathematics to be familiar with at least 80% of the material on five of preliminary Society of Actuaries credentialing exams.
2. Be familiar with the role of insurance in society, basic economic theory, and the basics of how insurance and financial markets operate.
3. Have familiarity with several of the technical tools, computer languages or software packages used by actuaries.
4. Develop communication, leadership and teamwork skills, and understand their importance in the actuarial industry.
5. Be able to apply this knowledge and these skills in new combinations and to new problems.

### Advertising, BS

**for the degree of Bachelor of Science Major in Advertising**

- **department website:** https://media.illinois.edu/advertising
- **department faculty:** https://media.illinois.edu/advertising/faculty
- **department email:** addept@illinois.edu

#### overview of college admissions & requirements:

- **College of Media**
  - **p. 1198**
- **college website:** https://media.illinois.edu/

**Advertising (ADV),** offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a long-lasting education for students.

- **major:** Computer Science & Advertising, BS (http://catalog.illinois.edu/undergraduate/media/departments/advertising/csadv/)

**minors:**

- **Public Relations** (p. 519)
- **Media** (p. 513)

**Graduate Programs:**

- **degree:** Advertising, MS (p. 549)
- **degree:** Strategic Brand Communication, MS (p. 1030)

#### overview of college admissions & requirements:

- **College of Media Electives**

**for the degree of Bachelor of Science Major in Advertising**

To graduate from the advertising curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADV 150</td>
<td>Introduction to Advertising</td>
<td>3</td>
</tr>
<tr>
<td>ADV 281</td>
<td>Advertising Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>ADV 283</td>
<td>Advertising and Brand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>ADV 284</td>
<td>Consumer Insight</td>
<td>3</td>
</tr>
<tr>
<td>ADV 390</td>
<td>Content Creation</td>
<td>3</td>
</tr>
<tr>
<td>ADV 460</td>
<td>Innovation in Advertising</td>
<td>3</td>
</tr>
<tr>
<td>ADV 483</td>
<td>Audience Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ADV 498</td>
<td>The Sandage Project</td>
<td>3</td>
</tr>
</tbody>
</table>

**Major Electives**

Any ADV course not already required above

**College of Media Electives**

- **8-16**

**Hours outside the College of Media (72 hours minimum)**

- **72**

---

*Information listed in this catalog is current as of 09/2021*
### Learning Outcomes: Advertising, BS

Learning outcomes for the degree of Bachelor of Science Major in Advertising

Students graduating with the BS in Advertising will be able to:

1. Evaluate the ethical, economic, legal, cultural, and historical dimensions of advertising in a global society.
2. Conduct research and analyze data to develop appropriate use metrics for advertising planning.
3. Ethically meet brand objectives and reach diverse audiences by critically evaluating and analyzing media outlets.
4. Apply creative concepts and innovative thinking to produce culturally relevant brand storytelling and content creation.
5. Create strategic brand communications built on research and evidence-based strategies appropriate for the intended audience.
6. Effectively collaborate within diverse teams to design and deliver strategic and engaging presentations.

### Aerospace Engineering, BS

for the degree of Bachelor of Science in Aerospace Engineering

#### Graduation Requirements

- **Minimum Overall GPA:** 2.0
- **Minimum hours required for graduation:** 128 hours
- **General education:** Students must complete the Campus General Education requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

#### Orientation and Professional Development

<table>

**Total Hours of Curriculum to Graduate**

128

Information listed in this catalog is current as of 09/2021.
Second Semester
AE 312 Compressible Flow 3
AE 323 Applied Aerospace Structures 3
AE 353 Aerospace Control Systems 3
AE 370 Aerospace Numerical Methods 3
General education elective 3
Semester Hours 15

Fourth Year
First Semester
AE 442* Aerospace Systems Design I 3
AE 433 Aerospace Propulsion 3
AE 460 Aerodynamics Propulsion Lab 2
AE 483 Autonomous Systems Lab 2
Technical Elective 3
Free Elective 3
Semester Hours 16
Second Semester
AE 443+ Aerospace Systems Design II 3
AE 461 Structures Control Lab 2
Technical Electives 5
Free Elective 3
Semester Hours 17
Total Hours: 128

1 MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) may be substituted with four of the five credit hours applying toward the degree. MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) is appropriate for students with no background in calculus.

2 Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s), (ii) one non-western, and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy the Humanities and the Arts and cultural studies course requirements.

3 RHET 105 (http://catalog.illinois.edu/search/?P=RHET%20105) (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if UIN is odd). General education elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/under-written-communication-requirement.

4 Sequence satisfies the General Education Advanced Composition requirement.

5 Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives (https://aerospace.illinois.edu/academics/undergraduate/undergraduate-tech-electives/), satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

Learning Outcomes: Aerospace Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Aerospace Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Aerospace Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

African American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

department website: https://afro.illinois.edu/
department faculty: African American Studies Faculty (https://afro.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: cmjenki@illinois.edu

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AAS students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An
African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, computer and statistical skills. Students majoring in AAS will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society; and to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction:
To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

IV. Cognate or Supporting Coursework
Students must complete 9 hours of supporting coursework. Supporting coursework courses consists of a set of courses which are logically grouped, and which reflect or support a student’s interests outside of the African American Studies major. Supporting coursework courses must be approved by the Department’s undergraduate advisor.

Total Hours 48

Learning Outcomes: African American Studies, BALAS
Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in African American Studies

Upon completion of the major in African American Studies, students will be able to:

- DESCRIBE the main stages in the historical development of the African American experience that reflects both continuity and change, and the different component parts of the human experience.
- ASSESS the historical development of peoples of African descent in broad global context, emphasizing historical, contemporary, and future implications.
- ANALYZE the experiences of Black people using the perspectives, data, and interpretations from two or more disciplinary fields (e.g., historical studies, cultural studies, social studies).
- EVALUATE successes and failures as people have used their values to initiate efforts to achieve social justice for African Americans and people of diverse social backgrounds.
- DESIGN a strategies and tactics that provide a solution to a major civic or social challenge facing Black communities in various parts of the world, illustrating how “Academic Excellence and Social Responsibility” in Black Studies have contributed to this process.

Agricultural & Biological Engineering, BS
for the degree of Bachelor of Science in Agricultural & Biological Engineering

college websites: https://aces.illinois.edu/ and https://grainger.illinois.edu/
email: abe@illinois.edu

Students pursuing this major select one of two concentrations:

- Agricultural Engineering Concentration (p. 21)
- Biological Engineering Concentration (p. 25)
Agricultural & Biological Engineering, BS and Agricultural & Biological Engineering, BSAG

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

department website: https://abe.illinois.edu/undergraduate/
department faculty: https://abe.illinois.edu/directory/faculty (https://abe.illinois.edu/directory/faculty/)

College websites: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/) & The Grainger College of Engineering (https://grainger.illinois.edu/)

Dual Degree – Five Year Academic Program

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from The Grainger College of Engineering as well as the Bachelor of Science in Agriculture with a major in Agricultural and Biological Engineering from the College of ACES.

Students enroll in the College of ACES and then transfer to The Grainger College of Engineering after two years. Students then complete the ABET-accredited degree program in Agricultural and Biological Engineering in The Grainger College of Engineering while taking additional coursework in ACES to complete the requirements for the Bachelor of Science in Agriculture in Agricultural and Biological Engineering degree program in ACES. The suggested program of study that follows fulfills the additional graduation requirements for the second degree, which requires completion of the Grainger College of Engineering degree.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing.

Students pursuing this major select one of two concentrations:

- Agricultural Engineering Concentration (p. 21)
- Biological Engineering Concentration (p. 25)

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

While completing the Agricultural & Biological Engineering, B.S. the student takes additional classes in ACES for the BSAG degree. The student is in ACES in years 1 and 2, transferring to The Grainger College of Engineering for years 3 through 5. The curriculum for the additional classes to complete the BSAG degree is as follows:

Agricultural & Biological Engineering, BSAG
Requirements in addition to completion of Agricultural & Biological Engineering, B.S.

Agricultural Sciences Coursework \(^3\) \hspace{1cm} 15
Free Electives \(^4\) \hspace{1cm} 158

Total hours required to receive an Agricultural and Biological Engineering, BS and an Agricultural and Biological Engineering, BSAG

---

In addition to the Biological and Natural Sciences Elective hours required for Agricultural and Biological Engineering (6 hours), a further 4 hours of biological sciences must be completed to make up a total of 10 hours.

\(^2\) CHEM 232 and MCB 150 are required for the BIO concentration.

\(^3\) Fifteen hours of agricultural sciences with courses from at least two subject areas other than Agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.

\(^4\) Sufficient free electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirements for both degrees.

Agricultural & Biological Engineering: Agricultural Engineering, BS

Agricultural Engineering Concentration

Students pursuing B.S. Degree in Agricultural and Biological Engineering choose from one of two concentrations, one of which is the concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Renewable Energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering
Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103 or ACE 100). Specific requirement. One of the SBS courses must be an introductory requirements including the campus general education language requirement.

### Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here [https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cee-map/](https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cee-map/).

**Other technical elective** | 3
**General education elective** | 3
**Free elective** | 3

**Semester Hours** | 16-17
**Total Hours:** | 128

1. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/](http://catalog.illinois.edu/general-information/degree-general-education-requirements/)
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. ABE 469 satisfies the General Education Advanced Composition requirement.
5. The extra hour of credit for this course may be used to help meet free elective requirements.
6. Students must complete 15 hours of Technical Electives ([https://abe.illinois.edu/undergraduate/technical-electives/](https://abe.illinois.edu/undergraduate/technical-electives/)) chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives. Students in the Biological Engineering Concentration must complete at least one course with a laboratory component.
7. Students must complete 6 hours from the approved list of Biological and Natural Sciences Electives ([https://abe.illinois.edu/undergraduate/biological-natural-sciences-electives/](https://abe.illinois.edu/undergraduate/biological-natural-sciences-electives/)). Students in the Biological Engineering Concentration must complete at least one course with a laboratory component.

**Agricultural & Biological Engineering: Biological Engineering, BS**

For the degree of Bachelor of Science in Agricultural & Biological Engineering, Biological Engineering Concentration

---

Information listed in this catalog is current as of 09/2021
department website: https://abe.illinois.edu/undergraduate/
department faculty: Agricultural & Biological Engineering Faculty (https://abe.illinois.edu/directory/faculty/)
college websites: https://aces.illinois.edu/ and https://grainger.illinois.edu/
email: abe@illinois.edu

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The Department of Agricultural and Biological Engineering offers programs through the College of ACES and The Grainger College of Engineering.

Students pursuing the B.S. Degree in Agricultural and Biological Engineering choose from one of two concentrations, one of which is the concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

• Bioenvironmental Engineering
• Ecological Engineering
• Food and Bioprocess Engineering
• Nanoscale Biological Engineering

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Biological Engineering Concentration

Graduation Requirements
Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103 or ACE 100). Specific Advanced Composition course required for this degree is listed below.

4 The extra hour of credit for this course may be used to help meet free elective requirements.
5 The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives).
6 The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).
Technical Electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives. Must include one course with a lab component.

- ABE 361 Off-Road Machine Design
- ABE 425 Engr Measurement Systems
- ABE 436 Renewable Energy Systems
- ABE 446 Biological Nanoengineering
- ABE 454 Environmental Soil Physics
- ABE 455 Erosion and Sediment Control

- NPRE 201 Energy Systems
- NPRE 470 Fuel Cells & Hydrogen Sources
- NPRE 475 Wind Power Systems

1 May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.
The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/abe-bio-engr-map/).

**Total Hours:** 128

---

1. MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/under Written Communication Requirement.

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Agricultural & Biological Engineering, BS

Learning outcomes for the degree of Bachelor of Science Major in Agricultural & Biological Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Agricultural & Biological Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Agricultural & Consumer Economics, BS

### Agricultural & Consumer Economics: Consumer Economics & Finance, BS

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Consumer Economics & Finance Concentration

**department website:** https://ace.illinois.edu/

**department faculty:** https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)

**college website:** https://aces.illinois.edu/

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

Students in Environmental Economics and Policy study environmental and resource management issues at the local, state, national, and international levels. Graduates are prepared for positions in governmental, environmental, and resource management agencies; interest groups; and the environmental area of private firms. Course
concentrations include law, policy, management, administration, quantitative methods, and sociology, as well as economics.

**Agricultural & Consumer Economics: Farm Management, BS**

*for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Farm Management Concentration*

**department website:** https://ace.illinois.edu/

**department faculty:** https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)

**college website:** https://aces.illinois.edu/

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

### Agricultural & Consumer Economics: Financial Planning, BS

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Financial Planning Concentration

**department website:** https://ace.illinois.edu/

**department faculty:** https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)

**college website:** https://aces.illinois.edu/

Students in the Financial Planning concentration study finance and economics as they apply to individuals, households, and small businesses in the course of accumulating and using financial resource. Students are introduced to issues of credit management, insurance and other risk management strategies, saving and investing, retirement planning, and estate planning. Students also study the financial marketplace as it relates to the needs of households and small businesses.

## Agricultural & Consumer Economics: Policy, International Trade & Development, BS

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Policy, International Trade, & Development Concentration

- **department website:** https://ace.illinois.edu/
- **department faculty:** https://ace.illinois.edu/faculty (https://ace.illinois.edu/faculty/)
- **overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
- **college website:** https://aces.illinois.edu/

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

Required Concentration 15-27

Concentration prescribed courses. See specific requirements for the concentration listed below.

Total Hours 126

1 Requirement must be satisfied by end of first year.

2 Students are encouraged to complete this requirement prior to the seventh semester.

Agricultural & Consumer Economics: Public Policy & Law, BS

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics, Public Policy & Law Concentration

Department website: https://ace.illinois.edu/
Department faculty: https://ace.illinois.edu/faculty/
Overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
College website: https://aces.illinois.edu/

Students in Public Policy and Law become expert in the economics of public policy in general and in its application to specific areas of interest. This concentration will expose students to the legal and institutional structures in which policies are developed, the analysis of the economics impacts of policies, and special circumstances of public policy and law pertaining to the environment, consumers, the agricultural sector, international relations, and other.

### Learning Outcomes: Agricultural & Consumer Economics, BS

Learning Outcomes for the degree of Bachelor of Science Major in Agricultural & Consumer Economics

- Information listed in this catalog is current as of 09/2021
1. ACE students will acquire broad and deep knowledge of Agricultural and Consumer Economics.

2. ACE students will develop a critical and reflective orientation toward global systems (such as natural, environmental, social, cultural, economic, and political) and cultural differences (such as race, indigeneity, gender, class, sexuality, language, and disability).

3. ACE students will develop critical thinking and problem solving skills.

4. ACE students will develop their ability to communicate in a variety of settings.

5. ACE students will build and sustain productive relationships to be effective leaders who can respond to civic and social challenges at local, national, and global levels, creating positive change in their communities.

Agricultural Leadership, Education, & Communications, BS

for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications

Students pursuing the Agricultural Leadership, Education, & Communications, BS (p. 40) select from four concentrations:

- Agricultural Communications - Advertising (p. 40)
- Agricultural Communications - Journalism (p. 42)
- Agricultural Education (p. 45)
- Organizational & Community Leadership (p. 46)

Students pursuing the Agricultural Leadership, Education, & Communications, BS (p. 40) select from four concentrations:

1. Organizational & Community Leadership
2. Agricultural Education
3. Agricultural Communications - Advertising
4. Agricultural Communications - Journalism

The Bachelor of Science with a Major in Agricultural Leadership, Education, & Communications

for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications, Agricultural Communications - Advertising

Quantitative Reasoning I

Select one of the following: 3-4

- ACE 261 Applied Statistical Methods
- CPSC 241 Intro to Applied Statistics
- ECON 202 Economic Statistics I
- PSYC 235 Intro to Statistics
- SOC 280 Intro to Social Statistics
- SOCW 225 Social Work Statistics
- STAT 100 Statistics

Quantitative Reasoning II

AGED Choose from: 3-5

- MATH 124 Finite Mathematics
- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

AGCM/LEAD choose from campus QRII list

Natural Sciences and Technology - Physical Sciences

Select one from the following: 3-4

- ATMS 100 Introduction to Meteorology
ATMS 120  Severe and Hazardous Weather
ATMS 140  Climate and Global Change
CHEM 101  Introductory Chemistry
CHEM 102  General Chemistry I & CHEM 103  and General Chemistry Lab I
ENVS 101  Introduction to Energy Sources
ESE 117  The Oceans
ESE 118  Natural Disasters
GEOL 107  Physical Geology
PHYS 101  College Physics: Mech & Heat

**Natural Sciences & Technology - Life Sciences**

Select one from the following: 3-4

- ANSC 207  The Science of Pets and How to Care for Them
- ANTH 249  Evolution and Human Disease
- CPSC 112  Introduction to Crop Sciences
- CPSC 113  Environment, Agric, & Society
- FSHN 120  Contemporary Nutrition
- IB 103  Introduction to Plant Biology
- IB 105  Environmental Biology
- MCB 100  Introductory Microbiology
- MCB 101  and Intro Microbiology Laboratory

**Humanities and the Arts**

Select from campus approved list. 6

**Social and Behavioral Sciences**

- PSYC 100  Intro Psych 4

And Select one course from the following: 1

- ACE 100  Introduction to Applied Microeconomics
- ECON 102  Microeconomic Principles
- PS 101  Intro to US Gov & Pol

**ACES Required**

- ACES 101  Contemporary Issues in ACES 2

**Major Requirements**

- ALEC 110  Introduction to Agricultural Leadership, Education and Communications 3
- ALEC 451  Professional Development in ALEC 2

**Required Concentration (choose one):**

- Agricultural Communications - Advertising
- Agricultural Communications - Journalism
- Agricultural Education
- Organizational & Community Leadership

**Electives**

Electives to bring total to 126 hours

**Total Hours:** 126

1  **Students in the Agricultural Education Concentration must select from ACE 100 or ECON 102.**

Learning Outcomes: Agricultural Leadership, Education, & Communications, BS
Learning Outcomes for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications

The faculty identified three major categories of student learning outcomes that entail awareness, understanding, and application of the
following: (A) food and environmental systems, (B) the role, nature, and context of agricultural journalism and communications, and (C) practices and skills in agricultural journalism and communications.

A1: Awareness, understanding, and application of knowledge about food and environmental systems (achieved through College of Agricultural Communications courses)

1. Contemporary issues in the human, food, and natural resource systems
2. Introduction to the fundamentals of modern crop, livestock and other agricultural production systems, including future challenges and opportunities for addressing world food needs
3. Critical systems thinking and collaborative analysis across multiple disciplines involved in the food, feed, fiber, renewable energy, and rural complex
4. Evolution of the food system and overview of food in relation to nutrition, health, safety, processing, regulations, and other dimensions
5. Introduction to the environmental sciences and current environmental issues in relation to population growth, world food supplies, agriculture, water use, conservation, climate change, and other aspects
6. Relationships between humans and the natural systems that contain our air, water, energy, and biotic and food sources.

B1: Awareness, understanding, and application of knowledge about the role, nature, and context of agricultural journalism and communications (achieved through Agricultural Communications courses)

1. Scope, scale, mission/role, and impacts of communications within agriculture, including the rural-urban dimensions of it, locally to internationally
2. History and development of agricultural information systems and services in the U.S. and beyond
3. Current agricultural communications systems and services in the U.S., including those involving new and emerging media
4. Availability and sources of agricultural communications research, including current types of research issues being addressed in various sectors of this field
5. Concept of information flow and knowledge management for decision making that involves agriculture, broadly defined
6. Audiences/publics for agricultural journalism and communications within the food complex and beyond
7. Theories and conceptual foundations for agricultural journalism and communications
8. Trends, forces for change, and opportunities in agricultural journalism and communications, including fronts for innovation
9. Contemporary issues in agricultural journalism and communications in the U.S. and beyond
10. International and intercultural dimensions of communications in agricultural/rural development and sustainability, including elements of intercultural sensitivity
11. Legal and ethical issues in agricultural journalism and communications
12. Role of the agricultural communicator, including emphasis on the concepts of joint problem solving and the honest broker perspective. Also, current and emerging fields of professional activity in agricultural communications, broadly defined.

B2: Awareness, understanding, and application of knowledge about the role, nature, and context of agricultural journalism and communications (achieved through College of Media courses)

1. Conceptual frameworks for creating multimedia journalism content
2. Theories of freedom of expression, the legal doctrines of greatest concern to mass communicators, and contemporary issues related to free speech and press, including libel, copyright, and news gathering in the digital age
3. Introduction to the profession of advertising
4. How advertising and journalism relate to society in cultural, social, ethical, and regulatory contexts
5. Theories of persuasion, advertising, and marketing

C1: Awareness, understanding, and application of practices and skills in agricultural journalism and communications (achieved through Agricultural Communications courses)

1. Writing and editing in varied settings and for varied purposes, including science writing related to the dimensions of agriculture
2. Coverage and reporting of news, features, and research related to agriculture in print, broadcast, and online media, including risk and crisis communications
3. Communication materials related to agriculture—planning and management, editing, design, layout, production, distribution, and evaluation in print and electronic formats
4. Media analysis and selection in settings related to agriculture, encompassing all means by which humans interact and including all channels and media, earliest to newest
5. Communications planning and management in non-commercial settings (such as Extension and social marketing) related to agriculture
6. Marketing communications related to agriculture—settings, roles, principles, and skills in advertising, promotion, public relations, and sales
7. Visual communications (photography, graphic design, videography) related to agriculture—skills in planning, selection, composition, digital editing, and design
8. Production and presentation of programming in agriculture-related radio and television broadcasting, and other audio/video channels
9. Use of current information and communications technologies (ICT) and software being employed in relation to the varied dimensions of agriculture

C2: Awareness, understanding, and application of practices and skills in agricultural journalism and communications (achieved through College of Media courses)

1. Introductory journalism reporting and writing across print, broadcast, and digital platforms
2. Fundamentals of digital photography, video, audio, and multimedia production as applied in journalism.
3. Introductory practices in advertising and integrated promotion—account planning, creatives, audience analysis, consumer behavior, sales promotion, media research, and interactive advertising
4. Research methods in advertising, including qualitative and quantitative techniques commonly used in the advertising industry
5. Insights about consumer knowledge, interests, attitudes, and decision making
6. Developing and applying brand strategies using theories of advertising and marketing, as well as techniques for persuasive presentation

Leadership & Education

1. Communicate in-depth understanding of agricultural systems to provide meaningful educational experiences for learners ranging from PreK through adult.
2. Assess the human capital needs of a group, organization, or community and engage with stakeholders to formulate a solution to an identified need.
3. Apply theories of leadership and learning to plan and deliver positive educational experiences in diverse instructional settings.
4. Demonstrate principles of transformative leadership in the context of a diverse group.

Agricultural Leadership & Science Education, BS

for the degree of Bachelor of Science Major in Agricultural Leadership & Science Education

program website: https://aged.illinois.edu/
program faculty: Agricultural Education Faculty (https://aged.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/ (https://engineering.illinois.edu/)

Students pursuing this major select from two concentrations:

- Agricultural Leadership Education (p. 49)
- Agricultural Science Education (p. 50)

The Bachelor of Science with a Major in Agricultural Leadership & Science Education curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural, and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (www.cote.illinois.edu/ (http://www.cote.illinois.edu/)).

The Agricultural Leadership Education concentration prepares students for educational leadership, training and outreach positions in agricultural extension, community and governmental agencies. Coursework focuses on designing educational/training programs, making professional presentations, leadership development, teaching/training methods and interpersonal communications. A 4 to 12-week business/agency summer internship is required. The curriculum provides the flexibility for students to specialize in a chosen area of agriculture.

college website: https://aces.illinois.edu/

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

Animal Sciences: Science, Pre-Veterinary & Medical, BS

for the degree of Bachelor of Science Major in Animal Sciences, Science, Pre-Veterinary & Medical concentration

department website: https://ansc.illinois.edu/
department faculty: Animal Sciences Faculty (https://ansc.illinois.edu/directory/faculty/)

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

Advanced Composition

Select from campus approved list. 3-4

Cultural Studies

Select one course from Western culture, one from non-Western culture, and one from U.S. minority culture from campus approved lists. 9

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 4-5

- MATH 220 Calculus
- MATH 221 Calculus I
- MATH 234 Calculus for Business I

Quantitative Reasoning II

Select one of the following: 3-4

ACE 261 Applied Statistical Methods
CPSC 241 Intro to Applied Statistics
ECON 202 Economic Statistics I
PSYC 235 Intro to Statistics
STAT 100 Statistics
SOC 280 Intro to Social Statistics

Natural Sciences and Technology

CHEM 102 General Chemistry I
& CHEM 103 and General Chemistry Lab I 4
CHEM 104 General Chemistry II
& CHEM 105 and General Chemistry Lab II 4
MCB 100 Introductory Microbiology
& MCB 101 and Intro Microbiology Laboratory 5

Humanities and the Arts

Courses selected from campus approved list 6

Social Sciences

ECON 102 Microeconomic Principles
or ACE 100 Introduction to Applied Microeconomics 3
Additional social or behavioral science course; cannot be an economics course. 3-4

ACES Required

ACES 101 Contemporary Issues in ACES 2

Animal Sciences Required

ANSC 100 Intro to Animal Sciences 4
ANSC 101 Contemporary Animal Issues 3
ANSC 103 Working With Farm Animals 2
ANSC 221 Cells, Metabolism and Genetics 3
ANSC 222 Anatomy and Physiology 3

Learning Outcomes: Animal Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Animal Sciences

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the basic principles of animal genetics, nutrition, reproduction and physiology
2. Apply knowledge of animal husbandry, behavior and handling techniques to effectively interact with animals in a safe and humane manner
3. Appreciate the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, and the many roles of animals in society
4. Communicate effectively, both written and orally, and demonstrate confidence in attaining transferable job or post-graduate skills
5. Practice the scientific method in solving ‘real-world’ problems including collecting and evaluating information, forming predictions, collecting and interpreting data and implementing actions
6. Build and sustain productive relationships to create positive change in response to challenging issues with animals and the agriculture industry at the local, national and international levels

Anthropology, BALAS

For the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Anthropology

Department website: https://anthro.illinois.edu/
Department faculty: Anthropology Faculty (https://anthro.illinois.edu/directory/faculty/)
Overview of college admissions & requirements: LAS admissions information (https://www.las.illinois.edu/prospective/)
College website: https://las.illinois.edu/
Email: anthro@illinois.edu

Students pursuing this major must select one of the following in consultation with an advisor.

Information listed in this catalog is current as of 09/2021
Major in Anthropology (p. 57)  
Archaeology Concentration (p. 57)  
Human Evolutionary Biology Concentration (p. 59)  
Sociocultural & Linguistic Anthropology Concentration (p. 60)  
for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Anthropology

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details. All students must discuss their selection of anthropology courses and supporting course work with a departmental adviser.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

**Anthropology: Archaeology, BALAS**  
for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Anthropology, Archaeology Concentration
The Archaeology Concentration offers students a program to explore the human past through its material remains to understand cultural and societal change through time, and the role of heritage in the present. We offer many opportunities for students to conduct research with faculty in our archaeology labs, field schools, and in our extensive research collections.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Anthropology, Archaeology Concentration

Senior Capstone Project 3-6
Choose one option below (Honors Thesis, Senior Seminar, Internship, or Research) in consultation with the departmental advisor:

Honors Thesis- 6 hours. Two consecutive semesters of research resulting in a written thesis
ANTH 494 Honors Senior Thesis I
ANTH 495 Honors Senior Thesis II

Senior Capstone Seminar (Independent Research)- 3 hours
ANTH 498 Senior Capstone Seminar

Internship- 3 hours. A portfolio and report associated with an approved departmental internship
ANTH 390 Individual Study

Research and/or Additional Field School- 3-6 hours. If not taken to meet the Research and Service Learning Coursework requirement above choose one of the following:

ANTH 444 Methods in Bioanthropology
ANTH 445 Research in Bioanthropology

Further data analysis- ANTH 445 or an additional approved biological anthropology research project- ANTH 444.

Total Hours 42

for the degree of Bachelor of Arts in Liberal Arts and Sciences
Major in Anthropology, Sociocultural and Linguistic Anthropology Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental Distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details. All students must discuss their selection of coursework with a departmental adviser.

General Education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

Minimum hours required for graduation: 120 hour

Socio-cultural and Linguistic Anthropology Courses 21

7 courses selected from the list maintained in the advisor's office. Students select 3 courses from locations across at least 2 regions of the world and 4 courses from theoretical or topical areas course offerings in socio-cultural and linguistic anthropology chosen in consultation with the departmental advisor. Four courses must be at the 300- or 400-level.

Additional socio-cultural and linguistics anthropology courses or courses in related fields such as Sociology, Linguistics, Psychology, Education, History, Gender and Women's Studies, African American Studies, Latina/Latino Studies, Asian American Studies, African Studies, Jewish Studies that complement the student's sociocultural/linguistic focus. Meet with the departmental advisor to discuss the selection of courses.

Research and Service Learning Coursework 3

Choose one of the following:

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in these closely related fields. Sociocultural anthropologists study the daily lives of people around the world, both at home and abroad. They conduct field research to get a hands-on feel for people's lives and passions and examine everything from beauty pageants to political protest marches, from Disney films to the lab practices of nuclear scientists. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a crucial window on the largest processes and problems of our time, from globalization to race relations and violence.

Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages— their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the “English Only” movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom, on social media, or at the United Nations, as well as how the way we talk creates our sense of self and reality.

Architectural Studies, BS

for the Bachelor of Science Major in Architectural Studies

Director of the School: Francisco Javier Rodríguez-Suárez

School website: https://arch.illinois.edu/

Overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)

College website: https://faa.illinois.edu

Email: architecture@illinois.edu

The Bachelor of Science in Architectural Studies BSAS is a pre-professional degree that prepares students to enter a professional 2-year M ARCH degree. The program provides a strong foundation in design, technology and history as they relate to architectural practice. The degree also provides students with a broad liberal arts foundation that can lead to many other career options.

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted.

For the Bachelor of Science in Architectural Studies degree, a total of 120 semester hours are required.

---

1. General Education Language Requirement: Options to satisfy this requirement are noted in the Course Explorer. ([https://courses.illinois.edu/gened/DEFAULT/DEFAULT/](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/))
2. A maximum of nine hours may be taken as professional electives.
See current University of Illinois General Education requirements. (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/)

The General Education quantitative reasoning requirement I is satisfied by the required MATH 220 or MATH 221 course; the quantitative reasoning II requirement is satisfied by the MATH 231 or PHYS 101 course. Students considering a concentration in Building Structures or Structural Engineering should take MATH 231. The Advanced Composition requirement may be fulfilled by either a separate, approved Advanced Composition course or by an Advanced Composition course which also satisfies one of the general education distribution list requirements. If by the latter, electives would be taken to make up the credit deficiency.

General Education foreign language requirement 0-12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.

The Composition I requirement may be fulfilled by any of the following courses or course sequences (placement is determined by examination): ESL 111 and ESL 112; ESL 115; RHET 101, and RHET 102; or RHET 105; or CMN 111 and CMN 112.

For information about electives, see the Undergraduate Handbook at the FAA website (https://faa.illinois.edu/). A maximum of nine hours may be taken as professional electives.

Architectural history: All students in the undergraduate program in architecture must fulfill the architectural history requirement: one course in addition to ARCH 210. Select from: ARCH 222, ARCH 314, ARCH 402, ARCH 403, ARCH 407, ARCH 409, Section B (Barcelona only), ARCH 410, ARCH 411, ARCH 412, ARCH 413, ARCH 414, ARCH 415, ARCH 416, ARCH 417, or ARCH 418.

The UP 101 requirement can be fulfilled by substituting one of the following approved courses: ARCH 418, ARCH 468, GEOG 204, GEOG 210, and GEOG 483.

Learning Outcomes: Architectural Studies, BS

Learning outcomes for the Bachelor of Science Major in Architectural Studies

The Bachelor of Science in Architectural Studies (BSAS) curriculum combines a comprehensive design education with the broad perspective necessary to become active and engaged global citizens. Students learn to address and solve tomorrow's complex problems at the intersection of the social, political, economic and environmental realms. Two- and three-dimensional design form the foundation of the four-year BSAS degree. Technology, history, and structures courses complete the curriculum, preparing students to enter a two-year NAAB-accredited Master of Architecture degree program, or to pursue a graduate degree or career in an allied discipline.

When students complete the BSAS degree they will be able to:

1. Employ Specialized Knowledge

• Apply design thinking approaches to address environmental and societal challenges.
• Implement design processes--documentation, research, analysis and application--intervening to improve a set of environmental conditions.
• Communicate ideas and concepts through verbal and graphic, physical and digital, means.

2. Put Broad and Integrative Knowledge to Use

• Identify complex problems and approaches to addressing them.
• Understand diverse community dynamics and social relationships.
• Explore the intersections among environmental, social, cultural, political and economic aspects.

3. Exercise Intellectual Skills:

• Evaluate and apply theories of the built environment's impact on human wellbeing.
• Differentiate and assess various means of manufacture and their suitability for use in a number of diverse contexts.
• Acknowledge different theories for analyzing and intervening in urban contexts.
• Evidence proficiency integrating technological systems to improve environmental performance.
• Critically examine humanistic perspectives in architecture, urban and landscape throughout time.

4. Demonstrate Proficiency in Applied and Collaborative Learning:

• Apply skills needed for successful teamwork and consensus decision making.
• Employ leadership skills.
• Recognize the value of multidisciplinary contributions in the realm of environmental design.

5. Illustrate Civic and Global Understanding:

• Demonstrate empathic and ethical decision making.
• Apply sustainable practices across a variety of scales and contexts.
• Cultivate self-learning skills and curiosity to learn and broaden cultural perspectives.
• Utilize contemporary and historical perspectives in design thinking processes.

The Program in Art and Art History at the University of Illinois, Urbana-Champaign is unique. Housed in the School of Art and Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Fine Arts degree in a combined Art History and Studio/Design course of study, providing a broad cultural education that unites academic and studio training. Students who earn this degree will be qualified to pursue a range of careers, museum work, or graduate study in either art history or studio practice.

A portfolio review is required for admission to the School of Art and Design.

Departmental Distinction: a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The Student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for further details.

for the degree of Bachelor of Fine Arts Major in Art & Art History

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Students must take at least one course in three of the following areas: 1) Africa and the Middle East; 2) Asia; 3) the Americas; 4) Europe; Students must also take at least one course that covers material before 1700 and one course must cover material after 1700.

Though students must take a total of 6 courses, some courses may count toward the fulfillment of more than one area and period requirement. For instance, a course in 20th century African art could count as a class covering both Africa and the Middle East and material after 1700.

Learning Outcomes: Art History, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Art & Art History

1. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.

2. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.

3. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.

email: mavery@illinois.edu
phone: (217) 333-6632

school website: School of Art & Design (https://art.illinois.edu/)
school faculty: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: Fine & Applied Arts (https://faa.illinois.edu/)

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte.s.education.illinois.edu/dotnet/webpages/webpage.aspx).

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

for the Bachelor of Fine Arts Major in Art Education

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Art Education, BFA

for the Bachelor of Fine Arts Major in Art Education

Students graduating with the BFA in Art Education should be able to:

1. Understand the diverse characteristics and abilities of their students and how individuals develop and learn within the context of their social, economic, cultural, linguistic, and academic experiences.

Our graduates are prepared to use these experiences to create instructional opportunities that maximize student learning in diverse art education settings such as schools, museums, and community centers.

2. Understand content area knowledge in fine art and visual culture that includes central concepts, methods of inquiry, structures of the disciplines, and content area literacy. Our graduates are prepared to create meaningful learning experiences for students through both content area and pedagogical knowledge.

3. Plan and design instruction for diverse art education settings based upon content area knowledge, diverse student characteristics, student performance data, curriculum goals, and the community context.

4. Create safe and healthy art education learning environments that facilitate cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction, mutual respect, active engagement, academic risk-taking, self-motivation, and personal goal-setting.

5. Differentiate instruction by using a variety of strategies that support critical and creative thinking, problem-solving, and continuous growth and learning. Our graduates understand that art education settings are dynamic, thus requiring ongoing modification of instruction to enhance learning for each student.

6. Enact critical and humanizing expressions of art education that redress and challenge systemic injustices that relate to social identities associated with race, class, gender, sexuality, immigrant origin, religion, age, mental and physical disabilities, and mental and physical illnesses.

7. Possess foundational knowledge of reading, writing, and oral communication within art education (e.g. curriculum and lesson planning, assessment tools, etc.) and recognizes and addresses how student reading, writing, and oral communication facilitate the acquisition of knowledge in art education.

8. Understand the purposes, characteristics, and limitations of different types of assessments in art education, including standardized assessments, universal screening, curriculum-based assessment, and progress monitoring tools.

9. Build and maintain collaborative relationships with colleagues, students, parents, and community members to foster cognitive, linguistic, physical, and social and emotional development of their students.

10. Exhibit ethical, reflective, and professional practices, while providing leadership in their educational settings and advocating for students, parents or guardians, and the profession.

---

Art Undeclared

---

**Information listed in this catalog is current as of 09/2021**
First Year Curricula for All Art + Design Majors

The School of Art + Design offers bachelor of fine arts degrees in art education, graphic design, art & art history, industrial design, photography, and studio art (with concentrations in general studio, new media, painting, printmaking, and sculpture), and a bachelor of arts degree in studio art (with the same concentrations). All majors’ first year curriculum will include courses in drawing, 2D, 3D, and 4D practices. Undeclared students will declare their Art + Design major March 1 of their first year of study.

This first year curriculum is shared across all majors and serves as the temporary major declaration for those who enter as “undeclared.”

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in history of art is also offered in the College of Liberal Arts and Sciences. The school has studios, computing labs, workshops, classrooms, and offices in several different University buildings.

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Asian American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

- department website: http://www.asianam.illinois.edu/
- department faculty: Asian American Studies Faculty (http://www.asianam.illinois.edu/people/faculty/)
- overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
- college website: https://las.illinois.edu/
- email: aas@illinois.edu

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

Advising: The Department of Asian American Studies provides advising for students. Students must officially declare their major by registering with the Associate Head of Asian American Studies. Students will work with their advisor to choose appropriate courses from the Additional Coursework List and the Approved Elective List to help plan a coherent program of study. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 33 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Additional Coursework: 15

Complete at least 15 additional hours of substantive coursework offered by Department of Asian American Studies listed on the Approved Additional Coursework List.

Electives: 6

Choose 6 hours from the Approved Elective Course List.

Total Hours: 33

Approved Additional Coursework List and Approved Elective List are maintained in the department office and with the AAS advisor.

Learning Outcomes: Asian American Studies, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Asian American Studies

Information listed in this catalog is current as of 09/2021
1) Intellectual Reasoning and Knowledge

Students acquire proficiency in the field and area of Asian American Studies. This includes, for example, knowledge based in intersectional, comparative, and interdisciplinary approaches. While largely based in an area approach to the United States, Asian American Studies is also deeply concerned with transnational, diasporic, and global studies. Students learn the history of Asian Americans and theories and methods of the social sciences and humanistic approaches to understand the Asian American experience. The conceptual rubrics broadly include migration, social movements, US imperialism and racism, and ideas of citizenship and belonging.

2) Critical Inquiry and Discovery

Applying theories in Asian American Studies students develop skills of critical inquiry that draw on intersectional and comparative approaches. As a mode of discovery students exercise their skills using methods of the social sciences and humanities through verbal communication in the classroom and written research projects. Students are asked to apply their critical modes of learning in original and unique projects of discovery through research.

3) Effective Leadership and Community Engagement

Students study models of community leadership and engagement through the histories of Asian American social movements, political culture, and community activism. Reflection based on these approaches provides a context from which to understand the role of classroom learning and the application of theories of social change in communities.

4) Social Awareness and Cultural Understanding

Students learn the dimensions of intersectional analysis of social, cultural, economic, and political issues concerning the Asian Americans. Social theories of power inform how students are taught to understand a number of categories of analysis including race, gender, sexuality, class, ethnicity, religion, and disability, to name a few.

5) Global Consciousness

Students gain an understanding of the global dimensions of intersectional approaches in a broad range of fields and disciplines including literary, historical, cultural and ethnographic approaches. Through the study of migration and diaspora, the broad understanding of individual and collective dynamics are observed, analyzed, and theorized. Students are also asked to think in terms of a comparative framework to understand how race, gender, and sexuality, for example, are thought of from a number of vantage points.

Astronomy, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Astronomy

---

Departmental distinction: A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at UIUC. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 47-48 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Astronomy, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Astronomy

Undergraduate Astronomy majors will graduate with a demonstrated ability to:

LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.

LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.

- Identify which principles should be applied to a specified situation
- Show familiarity with astronomical observables and their physical origin.
- Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.

LO3. Analyze astronomical data, and quantitative data generally.

- Demonstrate the ability to link observation and theory.
- Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
- Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.

LO4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.

LO5. Demonstrate the ability to communicate effectively both verbally and in writing.

Atmospheric Sciences, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Atmospheric Sciences

department website: https://atmos.illinois.edu/
department faculty: Atmospheric Sciences Faculty (https://atmos.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: atmos-sci@illinois.edu

Information listed in this catalog is current as of 09/2021
2. All students will have demonstrable computational problem solving skills, and have the opportunity to participate in scientific research.

3. All students will understand practical applications of weather analysis and forecasting, and the impact of weather analysis and forecasting on public safety and the economy.

4. All students will develop competency in clear scientific written and oral communication.

5. All students will develop an understanding of the natural and anthropogenic processes that control climate and global change, their impact on human livelihood, and ways that individuals can contribute to the reduction of societal risk from weather and climate events and impacts.

Undergraduate degree programs in Molecular & Cellular Biology
Biochemistry, BS (p. 71)

Molecular & Cellular Biology, BSLAS (p. 308)

for the degree of Bachelor of Science Major in Biochemistry (Specialized Curriculum)

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: A student seeking distinction must satisfy the following:

- Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.
- Earn at least a 3.25 grade-point average.

- Present a senior thesis to the department.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Biochemistry, BS

Learning outcomes for the degree of Bachelor of Science Major in Biochemistry (Specialized Curriculum)

Upon successful completion of the Biochemistry Specialized Curriculum, students will be able to:

1. Understand and appreciate that the diversity of life evolved over time by biomolecular processes of mutation, selection, genetic change, and epigenetics.
2. Explain that molecular and macromolecular structure as well as supramolecular architecture determine function and regulation.
3. Explain that information storage and flow are molecular-based, dynamic, and interactive.
4. Understand and appreciate that biochemical mechanisms and kinetics ensure relative cellular stability and function under external or internal changing condition.
5. Explain that energy is required by and transformed in biochemical systems as governed by the laws of thermodynamics.
6. Illustrate that living organisms and biological systems interact via molecular connections.
7. Design a scientific process and employ the scientific method, demonstrating that biochemistry is evidence-based and grounded in the formal practices of observation, objective measurement, and hypothesis testing.
8. Execute quantitative analysis and mathematical reasoning to interpret biochemical data.
9. Construct and utilize predictive models and simulations that define chemical relationships, as well as molecular interactions of complex systems.
10. Apply concepts from other sciences that span biology, chemistry, physics, mathematics, computation, and engineering to interpret biochemical phenomena.
11. Communicate biochemical concepts and understanding to members of a diverse scientific community, as well as to the general public.
12. Identify social and health-related dimensions of biochemical investigations.

Bioengineering, BS

For the degree of Bachelor of Science in Bioengineering

department website: https://bioengineering.illinois.edu/
department faculty: Bioengineering Faculty (https://bioengineering.illinois.edu/people/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/
Current Program Educational Objectives: https://bioengineering.illinois.edu/academics/undergraduate/education-objectives (https://bioengineering.illinois.edu/academics/undergraduate/education-objectives/)

Bioengineers use engineering principles to solve problems in the life sciences, human health and medicine, and related industries. At the undergraduate level, the goal of bioengineering education is to instill a fundamental understanding of biology while developing core skills to design technologies relevant to human health and disease.

The Bioengineering department at the University of Illinois at Urbana-Champaign provides a rigorous engineering education that prepares graduates to:

# secure and excel in jobs as engineers in industries of biotechnology, health care equipment and technology, life science tools, and pharmaceuticals,
# pursue graduate studies in bioengineering-related fields, and
# pursue professional degrees in the health sciences, law, and business.

During the first and second years of the curriculum, fundamental courses in biology, chemistry, computing, mathematics, and physics introduce
students to the multidisciplinary principles underlying bioengineering as a field. Throughout the curriculum, core coursework becomes progressively more integrative across the disciplines and in years three and four, students specialize in a chosen bioengineering subdiscipline. The program is distinguished by laboratory courses that provide diverse experiences and hands-on skills as well as a capstone design course in which students practice the rigorous application of engineering fundamentals to biological problems identified by faculty, clinicians, and industrial partners.

for the degree of Bachelor of Science in Bioengineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Learning Outcomes: Bioengineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Bioengineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Bioengineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, economic, and environmental factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Biology

Students interested in applying to either school of biology should simply choose Biology as their major. After taking two introductory courses, students will choose a major in either Integrative Biology or Molecular and Cellular Biology.

Integrative Biology, School of (http://www.life.uiuc.edu/sib/)

Director of School: Carla Cáceres
School Office: 286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044
Molecular and Cellular Biology, School of (http://mcb.illinois.edu/)

Director of School: Milan Bagchi
School Office: 393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166

An interschool option in Teaching of Biology (http://catalog.illinois.edu/undergraduate/las/biology-teacher-education-bslas/) is sponsored by the School of Integrative Biology and the School of Molecular and Cellular Biology.

Also, see majors in Integrative Biology (http://catalog.illinois.edu/undergraduate/las/academic-units/integrative-bio/#majorstext) and Molecular and Cellular Biology (p. 308).

Brain & Cognitive Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Brain & Cognitive Science

department website: http://www.psychology.illinois.edu/undergrad/
department faculty: Psychology Faculty (https://psychology.illinois.edu/directory/faculty/)
advising: Psychology advising (https://psychology.illinois.edu/academics/undergraduate-program/advising-services/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: psych-advising@illinois.edu (bcog-advising@illinois.edu)

The Brain and Cognitive Science major introduces the student to a simple question: How do intelligent systems work? Our world provides two examples of complex intelligent systems—human beings (and possibly some other animals) and intelligent computer systems. Brain and Cognitive Science majors investigate the brain and behavior of intelligent biological systems (e.g. people) from the perspective that the brain is a kind of computer. Consequently, students must learn about how brains...
and computers work, and how these can explain what we know about mental functions including perception, learning, memory, and language. Brain and Cognitive Science majors make use of discoveries from a number of different disciplines, including psychology, neuroscience, computer science, linguistics, philosophy, and anthropology, and has applications to the development of technology in education, health, language sciences, and design.

The Brain and Cognitive Science major provides fundamental training in psychology, neuroscience, and computation, and it allows a great deal of flexibility with regard to more advanced courses. The major requires training in statistics, a laboratory course, and the capstone course. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

**Academic Advising**

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

**Undergraduate Degree Programs in Psychology**

BSLAS in Brain & Cognitive Science (p. 76)

BSLAS in Psychology (p. 361) with the following concentrations:

- Behavioral Neuroscience (p. 361)
- Clinical/Community Psychology (p. 361)
- Cognitive Neuroscience (p. 362)
- Cognitive Psychology (p. 363)
- Developmental Psychology (p. 364)
- Diversity Science (p. 365)
- Intradisciplinary Psychology (p. 365)
- Organizational Psychology (p. 366)
- Personality Psychology (p. 367)
- Social Psychology (p. 367)

*For the Degree of Bachelor of Science in Liberal Arts and Sciences Major in Brain and Cognitive Science*

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

**Departmental distinction:** To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor’s thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics and laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 42 hours of coursework, including at least 12 hours of advanced coursework.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

**Minimum hours required for graduation:** 120 hours.

### Chemical Engineering, BS

for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

**department website:** [https://chbe.illinois.edu/](https://chbe.illinois.edu/)
**department faculty:** [Chemical & Biomolecular Engineering Faculty](https://chbe.illinois.edu/directory/)
**advising:** [SCS Academic Advising](https://scs.illinois.edu/academics/advising/)
**overview of college admissions & requirements:** [Liberal Arts & Sciences](http://catalog.illinois.edu/schools/las/academic-units/)
**college website:** [https://las.illinois.edu/](https://las.illinois.edu/)

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two areas of concentration: Chemical Engineering and Biomolecular Engineering. Each area is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration's technical electives focus more on bio-applied processing and technology.

### Areas of Concentration

- **Chemical Engineering (p. 79):** The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- **Biomolecular Engineering (p. 82):** The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering.
engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

Minimum hours required for graduation: The curriculum requires 129 hours for graduation and is organized as shown below.

Orientation and Professional Development
These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

<td>General education courses to satisfy the university requirements for social &amp; behavioral sciences, humanities &amp; the arts, and cultural studies (Non-Western, U.S. Minority, and Western Cultures).</td>
<td>16</td>
</tr>
</tbody>
</table>

Composition
These courses teach fundamentals of expository writing.
The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eights semesters vary with the area of concentration chosen. Refer to the appropriate sequence continuation below.

|             | Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. For students entering the curriculum after the freshman year, 1 additional hr of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus. At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum. Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement. Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence. MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285. MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285. At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

- a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
- b) 3 hours any 400-level course from List 1.
- c) 6 hours any courses from List 1.
- d) 4 hours any 400-level courses from List 2.

A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in Room 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

Draft PDF 2021-2022 81

Information listed in this catalog is current as of 09/2021
Chemical Engineering: Biomolecular Engineering, BS

for the degree of Bachelor of Science in Chemical Engineering, Biomolecular Engineering Concentration (Specialized Curriculum)

department website: https://chbe.illinois.edu/
department faculty: Chemical & Biomolecular Engineering Faculty (https://chbe.illinois.edu/directory/)
advising: SCS Academic Advising (https://scs.illinois.edu/academics/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two areas of concentration: Chemical Engineering and Biomolecular Engineering. Each area is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration’s technical electives focus more on bio-applied processing and technology.

Areas of Concentration

- Chemical Engineering (p. 79): The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- Biomolecular Engineering (p. 82): The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

for the degree of Bachelor of Science in Chemical Engineering, Biomolecular Engineering Concentration (Specialized Curriculum)

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

Minimum hours required for graduation: The curriculum requires 129 hours for graduation and is organized as shown below.

Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Chemical and Biomolecular Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of chemical engineering and chemical science.
These courses teach fundamentals of expository writing.

These courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

These courses stress the rigorous analysis and design principles embodied in the chemical engineering and biomolecular engineering concentrations.

Technical Electives

These courses teach the fundamentals of expository writing. These courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

### Technical Electives

These courses stress the rigorous analysis and design principles embodied in the chemical engineering and biomolecular engineering concentrations.

### Social Sciences and Humanities

The social sciences and humanities courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

### Composition

These courses teach the fundamentals of expository writing.

---

1. For students entering the curriculum after the freshman year, 1 additional hour of credit from the list of approved engineering technical electives may be substituted in place of CHBE 121.
2. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. MATH 441 may be substituted for MATH 285. MATH 286 (4 hours) may be substituted for MATH 285 (3 hours).
5. Students must register in one of the Chemical Engineering-specific CHBE 315 lab sections.
7. A maximum of 3 hours from this Category may be undergraduate research credit.
8. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

---

For the degree of Bachelor of Science Major in Chemical Engineering, Biomolecular Engineering Concentration

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual’s case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eights semesters vary with the area of concentration chosen. Refer to the appropriate sequence continuation below.

1. Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
For students entering the curriculum after the freshman year, 1 additional hour of credit from the list of approved engineering technical electives (List 1) may be substituted in place of CHBE 121. The ENG 100 requirement will be waived. Under no circumstances will these requirements be waived for students who are in the chemical engineering curriculum during their freshman year.

MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.

Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.

Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.

MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.

At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
b) 3 hours any 400-level course from List 1.
c) 6 hours any courses from List 1.
d) 4 hours any 400-level courses from List 2.
A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in Room 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://chbe.illinois.edu/wp-content/uploads/2015/11/Technical.Electives.Current.pdf), satisfying these distribution requirements:

a) 9 hours must be from Category A
b) 6 hours must be from Category B
c) 4 hours must be 400-level courses from List 2.
A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 99 RAL or from the department Web site. (http://chbe.illinois.edu/undergraduate/explore-chbe-at-illinois/curriculum-academic-advising/)

Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.

Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.

The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

Learning Outcomes: Chemical Engineering, BS

Learning outcomes for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Chemical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemistry

department website: https://chemistry.illinois.edu
department faculty: Chemistry Faculty (https://chemistry.illinois.edu/directory/faculty-by-type/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
advising contact: SCS Academic Advising (http://advising.scs.illinois.edu/)

Students interested in majoring in chemistry may choose the Specialized Curriculum in Chemistry (http://catalog.illinois.edu/undergraduate/las/chemistry-bs/), leading to the Bachelor of Science Major in Chemistry, or the Chemistry Major (http://catalog.illinois.edu/undergraduate/las/chemistry-bslas/#requirementstext), leading to the Bachelor of Science in Liberal Arts and Sciences.

The Specialized Curriculum in Chemistry is a rigorous, specialized program suitable for those planning careers in chemistry. The Chemistry
Major in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

for the degree of Bachelor of Science in Chemistry (Specialized Curriculum)

**Specialized Curriculum**

The typical program of courses required to satisfy this degree totals 128-134 hours; in no case will a program totaling less than 120 hours qualify for graduation. Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses. The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Students in the specialized curriculum in Chemistry must include a course in Biochemistry in the Advanced Hours area or the Technical Elective area to be certified by the American Chemical Society as having met its specifications.

**Departmental distinction:** Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a UIUC coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

**Requirements**

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.  
**Minimum hours required for graduation:** 120 hours.

1. Hours given are those typical to meet requirement.
2. On and off-campus transfer students in the BS curriculum may substitute 1 additional hour of 200 level or higher Chemistry (including CHEM 297, CHEM 397, CHEM 496, CHEM 497, or CHEM 499) for CHEM 150. This may not include CHEM 222 or CHEM 223 for students who took the CHEM 102, CHEM 103, CHEM 104 and CHEM 105 sequence instead of CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
3. If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.
4. The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.
5. Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation are required to complete only one laboratory course from the list.
6. Students contemplating transfer to the chemical engineering curriculum should choose MATH 415.
7. Three hours maximum credit in CHEM 199. Additional courses in the sciences and engineering can be taken upon the approval of the chair of the chemistry department advising committee. Most approved courses must have a strong technical prerequisite, such as one year of college-level math or science.
8. The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required coursework in the curriculum.
9. The courses taken to satisfy Advanced Composition requirement may also be used to partially satisfy one of the core chemistry, advanced chemistry, mathematics, physics, or technical electives requirements (if appropriate), or may be used to partially satisfy the free electives requirements.
10. The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechnical and/or free elective requirements.
11. Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

For the degree of Bachelor of Science in Liberal Arts and Sciences Major in Chemistry

The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a UIUC coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Information listed in this catalog is current as of 09/2021
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses. Twelve hours of 300- and 400-level in in Chemistry and/or Biochemistry must be taken on this campus. Transfer credit in chemistry must be approved by an adviser in chemistry in order to be included in the 30 hours. Minimum hours required for graduation: 120 hours.

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

This concentration fulfills state certification requirements to teach high school (grades 9-12) chemistry through the AP/honors level and biology, earth and space science, environmental science and physics up to but not including the AP/honors level.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). See the College of Education section for requirements of the minor (p. 528).

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

2 PSYC 100 is a pre-requisite for EPSY 201.

Chemistry: Environmental Chemistry, BS

For the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

department website: https://chemistry.illinois.edu
department faculty: Chemistry Faculty (https://chemistry.illinois.edu/directory/faculty-by-type/)
advising: SCS Academic Advising (http://advising.scs.illinois.edu/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas. These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

### Learning Outcomes: Chemistry, BS
Learning outcomes for the degree of Bachelor of Science Major in Chemistry

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

### Learning Outcomes: Chemistry, BSLAS
Learning outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Chemistry (Sciences & Letters)

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.

4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Civil Engineering, BS

for the degree of Bachelor of Science in Civil Engineering

department website: Department of Civil & Environmental Engineering (https://cee.illinois.edu/)
department faculty: Department of Civil & Environmental Engineering Faculty (https://cee.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Civil and environmental engineers apply basic principles of science, supported by mathematical and computational tools, to address the biggest challenges facing society: ensuring clean air, safe drinking water and sanitation; addressing our changing environment; protecting the population from natural and man-made hazards; designing a sustainable infrastructure that serves everyone; re-imagining human and commodity traffic for an automated future; and of course designing and constructing the world's tallest buildings and most iconic bridges.

The civil engineering program comprises seven focus areas (construction engineering and management, construction materials, environmental engineering and science, geotechnical engineering, water resources engineering and science, structural engineering, and transportation engineering) and three interdisciplinary programs (sustainable and resilient infrastructure systems; energy-water-environment sustainability; and societal risk and hazard mitigation). Although each area and program has its own special body of knowledge and engineering tools, civil and environmental engineering projects often use knowledge and data from many of these topical areas together in order to address societal challenges.

CEE’s Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse topic areas it comprises;
2. Pursue graduate education and research at major research universities and national laboratories;
3. Pursue professional licensure;
4. Advance to leadership positions in the profession;
5. Engage in continued learning through professional development;
6. Participate in and contribute to professional societies and community services.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student’s academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil and environmental engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

for the degree of Bachelor of Science in Civil Engineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition course required for this degree is listed below.

Orientation and Professional Development

Code Title Hours
CEE 190 Project-Based Introduction to CEE 1 4
CEE 495 Professional Practice 2 0

Science Elective

Code Title Hours
Science elective, selected in accord with recommendations for the chosen primary field in civil engineering. 3
The specific choices of courses in this category are made through the seven traditional areas of study and three interdisciplinary programs. Students choose primary and secondary fields, of which there are seven areas or three interdisciplinary programs of civil engineering. Design experience is distributed in 200-level, 300-level, and 400-level CEE courses including integrated design courses. See list below:

**Sustainable and Resilient Infrastructure Systems**

Science Electives Required - None

Science Electives Recommended:

- ATMS 120 Severe and Hazardous Weather 3
- CS 357 Numerical Methods I 3
- ENSU 300 Environmental Sustainability 3
- ESE 140 Climate and Global Change 3
- ESE 320 Water Planet, Water Crisis 3
- ESE 482 Challenges of Sustainability 3
- FIN 221 Corporate Finance 3
- GEOG 103 Earth's Physical Systems 4
- NPRE 201 Energy Systems 2 or 3
- NRES 439 Env and Sustainable Dev 3
- SE 320 Control Systems 4
- STAT 420 Methods of Applied Statistics 3 or 4
- UP 406 Urban Ecology 4

Civil Engineering Core Courses Required:

- CEE 340 Energy and Global Environment 3

Civil Engineering Core Courses Recommended:

- CEE 300 Behavior of Materials 4
- CEE 310 Transportation Engineering 3
- CEE 320 Construction Engineering 3
- CEE 330 Environmental Engineering 3
- CEE 350 Water Resources Engineering 3
- CEE 360 Structural Engineering 3
- CEE 380 Geotechnical Engineering 3

Advanced Technical Courses Required:

- CEE 491 Decision and Risk Analysis (And select 3 courses from the recommended list below) 3 or 4

### Advanced Technical Courses Recommended:

- ABE 436 Renewable Energy Systems 3 or 4
- CEE 401 Concrete Materials 4
- CEE 406 Pavement Design I 3 or 4
- CEE 408 Railroad Transportation Engng 3 or 4
- CEE 409 Railroad Track Engineering 3 or 4
- CEE 416 Traffic Capacity Analysis 3 or 4
- CEE 417 Urban Transportation Planning 4
- CEE 418 Public Transportation Systems 3 or 4
- CEE 421 Construction Planning 3 or 4
- CEE 424 Sustainable Const Methods 4
- CEE 434 Environmental Systems I 3
- CEE 453 Urban Hydrology and Hydraulics 4
- CEE 458 Water Resources Field Methods 4
- CEE 465 Design of Structural Systems 3
- CEE 493 Sustainable Design Eng Tech 4
- CEE 498 Special Topics (Section PS) 1 to 4
- MSE 489 Matl Select for Sustainability 3 or 4
- UP 466 Energy & the Built Environment 4
- UP 480 Sustainable Design Principles 2

### General Civil Engineering

Science Electives Required - Choose one course from recommended list below:

Science Electives Recommended:

- GEOL 107 Physical Geology 4
- CHEM 222 Quantitative Analysis Lecture 2
- CHEM 232 Elementary Organic Chemistry I 3 or 4
- ME 200 Thermodynamics 3
- STAT 400 Statistics and Probability I 4

Civil Engineering Core Courses Required - Should take 7 courses from list below:

- CEE 300 Behavior of Materials 4
- CEE 310 Transportation Engineering 3
- CEE 320 Construction Engineering 3
- CEE 330 Environmental Engineering 3
- CEE 340 Energy and Global Environment 3
- CEE 350 Water Resources Engineering 3
- CEE 360 Structural Engineering 3
- CEE 380 Geotechnical Engineering 3

Advanced Technical Courses Required - Option I: Pick no more than one course from each area below such that the sum of the core and advanced courses is at least 34 credit hours.

Option II: Pick 2 courses from one area and no more than one course from each area below such that the sum of the core and advanced courses is at least 34 credit hours.

- **Construction:**
  - CEE 420 Construction Productivity 3 or 4
  - CEE 421 Construction Planning 3 or 4
  - CEE 422 Construction Cost Analysis 3 or 4

- **Environmental:**
  - CEE 437 Water Quality Engineering 3
  - CEE 440 Fate Cleanup Environ Pollutant 4
  - CEE 446 Air Quality Engineering 4
Draft PDF 2021-2022

97

Geotechnical:
CEE 483  Soil Mechanics and Behavior  4
CEE 484  Applied Soil Mechanics  3 or 4

Materials:
CEE 401  Concrete Materials  4

Structures:
CEE 460  Steel Structures I  3
CEE 461  Reinforced Concrete I  3

Transportation:
CEE 405  Asphalt Materials I  3 or 4
CEE 406  Pavement Design I  3 or 4
CEE 407  Airport Design  3 or 4
CEE 408  Railroad Transportation Engrg  3 or 4
CEE 409  Railroad Track Engineering  3 or 4
CEE 410  Railway Signaling & Control  3 or 4
CEE 411  RR Project Design & Constr  3 or 4
CEE 412  High-Speed Rail Engineering  3 or 4
CEE 415  Geometric Design of Roads  4
CEE 416  Traffic Capacity Analysis  3 or 4
CEE 417  Urban Transportation Planning  4
CEE 418  Public Transportation Systems  3 or 4

Water Resources:
CEE 452  Hydraulic Analysis and Design  3
CEE 453  Urban Hydrology and Hydraulics  4

Secondary Field Advanced Technical Electives. Select 6 courses from approved lists to complement the primary area and add breadth to the program of study. See list below:

Construction Engineering and Management
Civil Engineering Core Courses Required:
CEE 320  Construction Engineering  3

Advanced Technical Courses Required:
CEE 421  Construction Planning  3 or 4
CEE 420  Construction Productivity  3-4
or CEE 422  Construction Cost Analysis

Advanced Technical Courses Recommended:
CEE 424  Sustainable Const Methods  4

Construction Materials Engineering
Civil Engineering Core Courses Required:
CEE 300  Behavior of Materials  4

Advanced Technical Courses Required - Pick 2 courses from the recommended list below:
Advanced Technical Courses Recommended:
CEE 401  Concrete Materials  4
CEE 405  Asphalt Materials I  3 or 4
CEE 406  Pavement Design I  3 or 4

Environmental Engineering
Civil Engineering Core Courses Required:
CEE 330  Environmental Engineering  3

Advanced Technical Courses Required - Choose 2 courses from the recommended list below:
CEE 430  Ecological Quality Engineering  2
CEE 434  Environmental Systems I  3
CEE 435  Public Health Engineering  3 or 4
CEE 437  Water Quality Engineering  3
CEE 438  Science & Environmental Policy  3
CEE 445
CEE 442  Environmental Engineering Principles, Physical  4
CEE 443  Env Eng Principles, Chemical  4
CEE 444  Env Eng Principles, Biological  4
CEE 446  Air Quality Engineering  4
CEE 447  Atmospheric Chemistry  4
CEE 449  Environmental Engineering Lab  3

Geotechnical Engineering
Civil Engineering Core Courses Required:
CEE 380  Geotechnical Engineering  3

Advanced Technical Courses Required:
CEE 483  Soil Mechanics and Behavior  4
CEE 484  Applied Soil Mechanics  3 or 4

Advanced Technical Courses Recommended - NONE

Structural Engineering
Civil Engineering Core Courses Required:
CEE 360  Structural Engineering  3

Advanced Technical Courses Required:
CEE 460  Steel Structures I  3
CEE 461  Reinforced Concrete I  3

Transportation Engineering
Civil Engineering Core Courses Required:
CEE 310  Transportation Engineering  3

Advanced Technical Courses Required: Select 2 courses, each from a different Area
Area 1 - Facilities:
CEE 405  Asphalt Materials I  3 or 4
CEE 406  Pavement Design I  3 or 4
CEE 407  Airport Design  3 or 4

Area 2 - Systems:
CEE 407  Airport Design  3 or 4
CEE 415  Geometric Design of Roads  4
CEE 416  Traffic Capacity Analysis  3 or 4
CEE 418  Public Transportation Systems  3 or 4

Area 3 - Railroad:
CEE 408  Railroad Transportation Engrg  3 or 4
CEE 409  Railroad Track Engineering  3 or 4
CEE 410  Railway Signaling & Control  3 or 4
CEE 411  RR Project Design & Constr  3 or 4
CEE 412  High-Speed Rail Engineering  3 or 4

Water Resources Engineering and Science
Civil Engineering Core Courses Required:
CEE 350  Water Resources Engineering  3

Advanced Technical Courses Required: 2 courses from the recommended list below:
Advanced Technical Courses Recommended:
CEE 432  Stream Ecology  3 or 4
CEE 433  Water Technology and Policy  3 or 4
CEE 450  Surface Hydrology  3
CEE 451  Environmental Fluid Mechanics  3

Information listed in this catalog is current as of 09/2021
CIVIL ENGINEERING, BS

Information listed in this catalog is current as of 09/2021

CEE 452  Hydraulic Analysis and Design  3
CEE 453  Urban Hydrology and Hydraulics  4
CEE 457  Groundwater  3
CEE 458  Water Resources Field Methods  4
CEE 498  Special Topics (Section EH)  1 to 4

**Energy-Water-Environment Sustainability**

Civil Engineering Core Courses Required:

CEE 340  Energy and Global Environment  3

Advanced Technical Courses Required:

CEE 493  Sustainable Design Eng Tech (and select one course from the recommended list below)  4

Advanced Technical Courses Recommended:

ABE 436  Renewable Energy Systems  3 or 4
ARCH 441  Heat and Moisture in Buildings  3
CEE 424  Sustainable Const Methods  4
CEE 433  Water Technology and Policy  3 or 4
CEE 434  Environmental Systems I  3
CEE 437  Water Quality Engineering  3
CEE 446  Air Quality Engineering  4
CEE 449  Environmental Engineering Lab  3
CEE 450  Surface Hydrology  3
CEE 452  Hydraulic Analysis and Design  3
CEE 453  Urban Hydrology and Hydraulics  4
CEE 457  Groundwater  3
CEE 498  Special Topics (Section EH)  1 to 4
ENG 471  Seminar Energy & Sustain Engrg  1
ME 400  Energy Conversion Systems  3 or 4
NPtE 402  Nuclear Power Engineering  3 or 4
NPtE 475  Wind Power Systems  3 or 4

**Societal Risk and Hazard Mitigation**

Civil Engineering Core Courses Required - None

Advanced Technical Courses Required:

CEE 491  Decision and Risk Analysis (and select one from the recommended list below)  3 or 4

Advanced Technical Courses Recommended:

CEE 406  Pavement Design I  3 or 4
CEE 416  Traffic Capacity Analysis  3 or 4
CEE 417  Urban Transportation Planning  4
CEE 437  Water Quality Engineering  3
CEE 440  Fate Cleanup Environ Pollutant  4
CEE 449  Environmental Engineering Lab  3
CEE 460  Steel Structures I  3
CEE 461  Reinforced Concrete I  3
CEE 465  Design of Structural Systems  3
CEE 472  Structural Dynamics I  3 or 4
CEE 473  Wind Effects on Structures  4
IE 410  Advanced Topics in Stochastic Processes & Applications  3 or 4
NPtE 442  Radioactive Waste Management  3
SE 450  Decision Analysis I  3 or 4
STAT 425  Statistical Modeling I  3 or 4
STAT 429  Time Series Analysis  3 or 4

CE 430  Topics in Applied Statistics  3 or 4
UP 438  Disasters and Urban Planning  4

**Sustainable and Resilient Infrastructure Systems**

Civil Engineering Core Courses Required:

CEE 340  Energy and Global Environment  3

Civil Engineering Core Courses Recommended:

CEE 300  Behavior of Materials  4
CEE 310  Transportation Engineering  3
CEE 320  Construction Engineering  3
CEE 330  Environmental Engineering  3
CEE 350  Water Resources Engineering  3
CEE 380  Geotechnical Engineering  3

Advanced Technical Courses Required:

CEE 491  Decision and Risk Analysis (And select one course from the recommended list below)  3 or 4

Advanced Technical Courses Recommended:

ABE 436  Renewable Energy Systems  3 or 4
CEE 401  Concrete Materials  4
CEE 406  Pavement Design I  3 or 4
CEE 408  Railroad Transportation Engrg  3 or 4
CEE 409  Railroad Track Engineering  3 or 4
CEE 416  Traffic Capacity Analysis  3 or 4
CEE 417  Urban Transportation Planning  4
CEE 418  Public Transportation Systems  3 or 4
CEE 421  Construction Planning  3 or 4
CEE 424  Sustainable Const Methods  4
CEE 434  Environmental Systems I  3
CEE 453  Urban Hydrology and Hydraulics  4
CEE 458  Water Resources Field Methods  4
CEE 465  Design of Structural Systems  3
CEE 493  Sustainable Design Eng Tech  4
CEE 498  Special Topics (Section PS)  1 to 4
MSE 489  Matl Select for Sustainability  3 or 4
UP 466  Energy & the Built Environment  4
UP 480  Sustainable Design Principles  2

**Global Context**

Science Electives Recommended:

CPSC 116  The Global Food Production Web  3
ESE 140  Climate and Global Change  3
ESE 320  Water Planet, Water Crisis  3
ESE 482  Challenges of Sustainability  3

Civil Engineering Core Courses Recommended:

CEE 330  Environmental Engineering  3
CEE 330  or CEE 350  Water Resources Engineering  3
CEE 340  Energy and Global Environment  3

Advanced Technical Courses Recommended: Must take at least 3 credit hours in each of the 2 areas below:

Knowledge and Skills Needed to Effectively Address Global Issues:

ACE 451  Agriculture in Intl Dev  3 to 4
ATMS 421  Earth Systems Modeling  4
CEE 438  Science & Environmental Policy  3
CEE 445  3
Global CEE Design:

- CEE 408 Railroad Transportation Engrg 3 or 4
- CEE 417 Urban Transportation Planning 4
- CEE 437 Water Quality Engineering 3
- CEE 449 Environmental Engineering Lab 3
- CEE 465 Design of Structural Systems 3

**CEE Multidisciplinary**

Science Electives Recommended: Any recommended science electives from existing CEE Primary and Secondary listed above

Civil Engineering Core Courses Required: Core courses relevant to the student's interests

Advanced Technical Courses: Students work with CEE Academic Advisors

**Atmosphere Science (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:

- CEE 330 Environmental Engineering 3

Advanced Technical Courses Recommended:

- ATMS 302 Atmospheric Dynamics I 3
- ATMS 410 Radar Remote Sensing 4
- ATMS 411 Satellite Remote Sensing 4
- ATMS 421 Earth Systems Modeling 4
- CEE 445
- CEE 447 Atmospheric Chemistry 4

**Chemistry (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:

- CEE 330 Environmental Engineering 3

Advanced Technical Courses Recommended:

- CHEM 232 Elementary Organic Chemistry I 3 or 4
- CHEM 315 Instrumental Chem Systems Lab 2
- CHEM 332 Elementary Organic Chem II 4
- CHEM 420 Instrumental Characterization 2
- CHEM 440 Physical Chemistry Principles 4

**Chemical Engineering (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:

- CEE 330 Environmental Engineering 3

Advanced Technical Courses Recommended:

- CHBE 321 Thermodynamics 4
- CHBE 421 Momentum and Heat Transfer 4
- CHBE 422 Mass Transfer Operations 4
- CHBE 424 Chemical Reaction Engineering 3

**Microbiology (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:

- CEE 330 Environmental Engineering 3

Advanced Technical Courses Recommended:

- MCB 301 Experimental Microbiology 3
- MCB 431 Microbial Physiology 3

**MCB 450 Introductory Biochemistry** 3

**CEE 444 Env Eng Principles, Biological** 3

**Toxicology (Primary Field: Environmental Engineering)**

Civil Engineering Core Courses Required:

- CEE 330 Environmental Engineering 3

Advanced Technical Courses Recommended:

- CHEM 332 Elementary Organic Chem II 4
- ENVS 431 Environ Toxicology & Health 3
- ENVS 480 Basic Toxicology 3
- MCB 450 Introductory Biochemistry 3

Information listed in this catalog is current as of 09/2021.
Learning Outcomes: Civil Engineering

Learning Outcomes for the degree of Bachelor of Science Major in Civil Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Civil Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Information listed in this catalog is current as of 09/2021
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Classics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

department website: http://www.classics.illinois.edu/
department faculty: Classics Faculty (https://classics.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: classics@illinois.edu

Students choose from the following concentrations:

Classical Civilizations (p. 101)

Classical Languages (p. 102)

For students interested in adding licensure to the BALAS in Classics, please visit the Department of the Classics academics page: https://classics.illinois.edu/academics/undergraduate-program/teaching-latin (https://classics.illinois.edu/academics/undergraduate-program/teaching-latin/)

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Classical Languages (p. 102)

Learning Outcomes: Classics, BALAS

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

1. Acquire and retain a detailed knowledge of Greek and Latin grammar, syntax, vocabulary, and modes of expression so as to be able to read literary and subliterary texts composed in Greek and Latin between roughly 800 BCE and 500 CE.
2. Situate knowledge of the languages within the cultural contexts in which they were used in order to understand the crucial role of language in social dynamics and cross-cultural communication.
3. Acquire facility with contemporary methods of literary and historical analysis sufficient to carry out original, self-directed research into cultures that made use of the Greek and Latin languages.
4. Acquire critical awareness of the place of Greek and Latin in western literary history in order to appreciate the powerful role of tradition in interpreting the texts and events of the past.
5. Acquire a detailed knowledge of the culture of Ancient Greek and Roman civilizations, especially the broader historical, social, and cultural contexts and their development.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics, Classical Civilizations Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.
Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult the Director of Undergraduate Studies at the earliest opportunity.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting coursework: Normally equates to 44 hours. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics, Classical Languages Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult the Director of Undergraduate Studies at the earliest opportunity.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting coursework: Normally equates to 44 hours. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Students choose one of three tracks: Ancient Greek, Latin, or Ancient Greek & Latin

Ancient Greek Track

GRK 101, Elementary Greek I, is a prerequisite for subsequent GRK courses; does not count toward the 32 hours for the concentration.

Communication Courses: Students will select an option (A or B) and a specialization (if Option B is chosen) in consultation with an undergraduate advisor in Communication.

OPTION A: Students who wish a general course of study will take at least one course from five of the following six areas and the remaining hours will be selected in consultation with an advisor.

OPTION B: Students who choose to concentrate within an area must take four courses from one of the six areas listed below and the remaining hours will be selected in consultation with an advisor. Students may complete more than one specialization by completing four courses in each area desired; however, individual courses may not be counted toward more than one specialization.

Communication & Culture Area

- CMN 232 Intro to Intercultural Comm
- CMN 250 Social Movement Communication
- CMN 275 Media, Money and Power
- CMN 280 Comm Technology & Society
- CMN 320 Comm Controversy Public Policy

**Total Hours**: 37

---

1 CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the minimum of 37 hours of Communication courses required for the major.

---

**Learning Outcomes: Communication, BALAS**

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Communication

1. Students will demonstrate competence in oral and written communication, including public speaking, argumentation and reasoning, deliberation, and media analysis and critique.
2. Students will have broad knowledge of communication research and theory and understand how to apply theoretical concepts in practical settings.
3. Students will understand the political and social import of communication and develop competencies required to engage productively with discourses related to all aspects of public and private life.
4. Students will understand the communicative implications of human diversity, including issues related to race, culture, class, religion, gender, sexual identity, and disability.
5. Students will gain communication competencies that afford them rewarding opportunities, such as satisfying employment or post-graduate study.

Community Health, BS
for the Bachelor of Science Major in Community Health

Department Website: http://kch.illinois.edu/
Department Faculty: Kinesiology & Community Health Faculty (http://kch.illinois.edu/faculty/)
College Catalog Page: Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
College Website: http://ahs.illinois.edu/

Students pursuing this major select one of three concentrations:
Health Education & Promotion (p. 106)
Health Planning & Administration (p. 110)
Rehabilitation Studies (p. 114)

Programs in Community Health and Kinesiology
Undergraduate Programs:

- joint degree: Community Health, BS and Public Health, MPH (p. 118)
- joint degree: Kinesiology, BS and Public Health, MPH (p. 465)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 106), Health Planning & Administration (p. 110), and Rehabilitation Studies (p. 114). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for
the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Community Health, Health Education & Promotion Concentration

Correlates

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will range of electives a student will be able to take depending on the general education number of hours.

- **Joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **Joint degree:** Kinesiology, BS and Public Health, MPH (p. 465)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 106), Health Planning & Administration (p. 110), and Rehabilitation Studies (p. 114). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for
the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Community Health, Health Planning & Administration Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

Programs in Community Health and Kinesiology

Undergraduate Programs:

**major:** Community Health, BS (p. 105)

**concentration:** Community Health: Health Education & Promotion, BS (p. 106)

**concentration:** Community Health: Health Planning & Administration, BS (p. 110)

**concentration:** Community Health: Rehabilitation Studies, BS (p. 114)

**major:** Kinesiology, BS (p. 251)

**concentration:** Kinesiology: Teacher Certification, BS (p. 253)

**minor:** Kinesiology (p. 507)

**minor:** Disability Studies (http://catalog.illinois.edu/undergraduate/ahs/minors/disability-studies/)

**joint degree:** Community Health, BS and Public Health, MPH (p. 118)

**joint degree:** Community Health, BS and Epidemiology, MPH (p. 462)

**joint degree:** Kinesiology, BS and Public Health, MPH (p. 465)

**joint degree:** Kinesiology, BS and Epidemiology, MPH (p. 463)

**joint degree:** Interdisciplinary Health Sciences, BS & Epidemiology, MPH (p. 458)

Graduate Programs:

**degree:** Kinesiology, MS (http://catalog.illinois.edu/graduate/ms_kines/)

**degree:** Kinesiology, PhD (http://catalog.illinois.edu/graduate/graduate-majors/kinesiology/#doctoratetest)

**degree:** Community Health, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-comm-health/)

**degree:** Rehabilitation, MS (http://catalog.illinois.edu/graduate/graduate-majors/community-health/ms-rehab/)

**degree:** Public Health, MPH (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/)

**joint degree:** Community Health, BS and Public Health, MPH (p. 118)

**joint degree:** Kinesiology, BS and Public Health, MPH (p. 465)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion (p. 106), Health Planning & Administration (p. 110), and Rehabilitation Studies (p. 114). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for

Information listed in this catalog is current as of 09/2021
the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website: http://www.mph.illinois.edu/Program/.

for the Bachelor of Science Major in Community Health, Rehabilitation Studies Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

Learning Outcomes: Community Health, BS

1. **Content Knowledge**: Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.

2. **Critical Thinking and Discovery**: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.

3. **Awareness and Understanding**: Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.

4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.

5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided [here](http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext).

The requirements are explained in more detail on the MPH program website: [http://www.mph.illinois.edu/Program/](http://www.mph.illinois.edu/Program/). (https://ahs.illinois.edu/how-to-apply-bs-mph/)

The Community Health Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion, Health Planning & Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Kinesiology & Community Health, University of Illinois at Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

for the joint degrees of Bachelor of Science Major in Community Health and the Master of Public Health in Public Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester.

For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

Comparative & World Literature, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative & World Literature

**program website:** https://complit.illinois.edu/
**program faculty:** Comparative & World Literature Faculty (https://complit.illinois.edu/faculty/)
**overview of college admissions & requirements:** LAS admissions information (https://www.las.illinois.edu/prospective/)
**college website:** https://las.illinois.edu/
**email:** complit@illinois.edu

Students must select one of the following in consultation with an advisor:

Major in Comparative & World Literature, Comparative Literature Concentration (p. 119)

Major in Comparative & World Literature, World Literature Concentration (p. 120)

Comparative & World Literature: Comparative Literature, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative & World Literature, Comparative Literature Concentration

**program website:** https://complit.illinois.edu/
**program faculty:** Comparative & World Literature Faculty (https://complit.illinois.edu/faculty/)

**college website:** https://las.illinois.edu/
**email:** complit@illinois.edu

The Major in Comparative & World Literature, Comparative Literature Concentration provides an engagement with two or more literary and cultural traditions, studied in historical depth, in their original languages (6 hours of advanced foreign language required). Study abroad and work across cultures and disciplines is strongly encouraged. The distribution of course work allows for considerable flexibility. The concentration in Comparative Literature can be easily...
combined with a major or minor in any national literature, classics, global studies, area studies, ethnic studies, gender and women's studies, or majors and minors in anthropology, art history, cinema and media studies, history, music, philosophy, world religion, the visual arts, or with a certificate in translation studies.

**for the degree of Bachelor of Arts in Liberal Arts & Sciences**

**Major in Comparative & World Literature, Comparative Literature Concentration**

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

**Comparative Literature Concentration Requirements**

**General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work equate to 39 hours with at least 18 hours of Comparative Literature courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper division coursework (these hours can be drawn from all elements of the degree).

### Code | Title | Hours
--- | --- | ---
CWL 202 | Literature and Ideas | 3

Five core CWL courses chosen from broadly comparative courses, from the following:

At least two courses must be at the 300-400-level. At least one course must be in a period prior to 1800 and one course in a period since 1800.

Minimum Required Hours: 33

Learning Outcomes: Comparative & World Literature, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Comparative Literature

1. Social Awareness and Cultural Understanding / Global Consciousness: CWL students will develop a comparative understanding of national literatures in the context of a globalizing world, and an ability to situate texts in their cultural and historical contexts.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

2. Intellectual Reasoning and Knowledge: CWL students will appreciate the aesthetic qualities of literary texts and develop an awareness of influential critical and interpretive methods.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

3. Intellectual Reasoning and Knowledge: CWL students will demonstrate a general understanding of the conventions of literary genres and of the major developments in literary history.
   a. Measurable by: analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.

4. Creative Inquiry and Discovery: Students will demonstrate ability to express oneself orally and in writing in a clear, coherent and persuasive manner, and to construct an interpretive argument.
   a. Measurable by: analysis of student work samples; focus groups.

5. For Comparative Literature concentration only: Students will demonstrate mastery of at least two languages.
   a. Measurable by: participation in 200-400 level courses in the original language; degree progress and course completion.

Computer Engineering, BS

for the degree of Bachelor of Science in Computer Engineering

dept website: https://ece.illinois.edu
department faculty: Electrical & Computer Engineering Faculty (https://ece.illinois.edu/about/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Computer Engineering at The Grainger College of Engineering focuses on the development of vital computing technologies, ranging from chips to computers to networks to programming tools to key algorithms for
building exciting applications. Fundamentally, Computer Engineering addresses the problem of building scalable, trustworthy computing systems, and the faculty’s interests span a broad spectrum of issues pertinent to this theme. Computer engineering has taken the lead in revolutionizing many science and engineering disciplines with parallel computing, from chips to clouds to planet-scale critical infrastructures, and has defined new standards of security, privacy, and dependability for systems ranging from small circuits to the electric power grids of many nations. Students need a broad and sound set of mathematical and computing skills, and are well-served by a flexible curriculum that enables them to pursue topics of interest among the many subdisciplines in computing.

The computer engineering core curriculum focuses on fundamental computer engineering knowledge: circuits, systems, electromagnetics, computer systems, electronics for information processing and communication, and computer science. The rich set of ECE elective courses permits students to concentrate in any sub-discipline of computer engineering including: hardware systems; cyberphysical systems; foundations and theory; software and languages; algorithms and mathematical tools; trust, reliability, security; networking, mobile and distributed computing; big data analytics and systems; artificial intelligence, robotics, cybernetics.

**for the degree of Bachelor of Science in Computer Engineering**

### Graduation Requirements

**Minimum Technical GPA** ([https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement)): 2.0

TGPA is required for ECE courses (except ECE 316). See Technical GPA ([https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement)) to clarify requirements.

**Minimum Overall GPA:** 2.0

**Minimum hours required for graduation:** 128 hours

**General education:** Students must complete the Campus General Education ([https://courses.illinois.edu/gened/DEFAULT/DEFAULT/](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/)) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

**Electives**

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.

**Total Hours of Curriculum to Graduate**

128

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour.
4. MATH 213 may be substituted.
5. STAT 410 may be substituted.
6. Advanced Composition may be satisfied by completing ECE 445 or ECE 496 and ECE 499 or a course within either the general education or free elective categories which has the Advanced Composition designation.

Information listed in this catalog is current as of 09/2021
for the degree of Bachelor of Science in Computer Engineering

### Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/ce-map/).

</table>

**Total Hours:** 128

---

1. **MATH 220** may be substituted, with four of the five credit hours applying toward the degree. **MATH 220** is appropriate for students with no background in calculus.

2. **RHET 105** (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is odd). General Education Elective is taken the other semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/](http://catalog.illinois.edu/general-information/degree-general-education-requirements/). under Written Communication Requirement.

3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

4. Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour. **MATH 213** may be substituted.

5. **STAT 410** may be substituted.
All are to be chosen from the departmentally approved List of Technical Electives (https://ece.illinois.edu/academics/ugrad/curriculum/tech-electives-06/). Students must earn a minimum of 29 hours of technical electives consisting of an Advanced EE Core, three Advanced Computing Electives, a Design Elective and the remaining hours may be chosen from the entire list.

ECE 445 or ECE 496 AND ECE 499 may be substituted.

Learning Outcomes: Computer Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Computer Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Computer Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Science + Advertising, BS

for the degree of Bachelor of Science Major in Computer Science & Advertising

computer science degree information: CS+X Degrees (https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs/#requirements)

advertising department website: CS+Advertising (https://media.illinois.edu/degrees-programs/computer-science-advertising/)

overview of college admissions & requirements: College of Media (p. 1198)

college websites: https://media.illinois.edu/ and https://engineering.illinois.edu

advertising email: media-ssc@illinois.edu

computer science email: undergrad@cs.illinois.edu (academic@cs.illinois.edu)

COMPUTER SCIENCE AND ADVERTISING is sponsored jointly by the Departments of Computer Science and Advertising. This is a program for students who plan to pursue careers in the advertising field that have a technology focus. Cloud computing, the availability and ubiquity of data, and the rapid and pervasive adoption of mobile technology have created a paradigm shift in the advertising industry. Projected areas of growth in advertising and communications will be in Search Engine Optimization, web analytics, Computational Advertising, and other emerging areas of technology/media. The degree will prepare students for advanced study at the graduate level as well as immediate entry into the workforce at advertising agencies, businesses with in-house advertising and marketing divisions, and technology companies.

Graduate Programs:

degree: Advertising, MS (p. 549)

degree: Strategic Brand Communication, MS (p. 1030)

for the degree of Bachelor of Science Major in Computer Science & Advertising

Please see the computer science advisor in 1210 Siebel Center, as well as an advertising advisor in the College of Media Student Services Center in 18 Gregory Hall.

A Major Plan of Study Form must be completed and submitted to the Department of Computer Science Office of Undergraduate Affairs by the beginning of the fifth semester (60-75 hours).
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.
Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 68 hours plus 12 additional hours of College of Media requirements. All campus general education and foreign language requirements must be met. The minimum hours required for graduation is 124. At least 12 hours of 300- and 400-level course work must be taken on this campus, and a minimum of 40 hours of upper-division course work is required.
Minimum hours required for graduation: 124 hours
To graduate from the Computer Science & Advertising curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

<table>

Information listed in this catalog is current as of 09/2021
### Mathematical Foundations (fulfills Quantitative Reasoning I & II)
- **CS 361** Probability & Statistics for Computer Science
- **MATH 220** Calculus  
  or **MATH 221** Calculus I
- **MATH 225** Introductory Matrix Theory  
  or **MATH 257** Linear Algebra with Computational Applications
- **MATH 231** Calculus II

### Computer Sciences Core
- **CS 100** Freshman Orientation
- **CS 124** Introduction to Computer Science I
- **CS 128** Introduction to Computer Science II
- **CS 173** Discrete Structures
- **CS 225** Data Structures
- **CS 226** Software Design Lab
- **CS 374** Introduction to Algorithms & Models of Computation
- **CS 357** Numerical Methods I  
  or **CS 421** Programming Languages & Compilers

### Computer Science Technical Track (two options)
- **CS 233** Computer Architecture  
  & **CS 241** and System Programming
- **CS 240** Introduction to Computer Systems
  & Two 400-level CS courses above  
  Any two (2) 400-level CS courses above  
  CS 403 except CS 421 and CS 491

### Animal Sciences Core
- **ANSC 100** Intro to Animal Sciences
- **ANSC 221** Cells, Metabolism and Genetics
- **ANSC 222** Anatomy and Physiology
- **ANSC 223** Animal Nutrition
- **ANSC 224** Animal Reproduction and Growth
- **ANSC 398** UG Experiential Learning
- **ANSC 498** Integrating Animal Sciences

### Applied Animal Sciences Courses (choose 3)
- **ANSC 201** Principles of Dairy Production
- **ANSC 204** Intro Dairy Cattle Evaluation
- **ANSC 205** World Animal Resources
- **ANSC 206** Horse Management
- **ANSC 211** Breeding Animal Evaluation
- **ANSC 219** Meat Technology
- **ANSC 250** Companion Animals in Society
- **ANSC 301** Food Animal Production, Management, and Evaluation
- **ANSC 305** Human Animal Interactions
- **ANSC 307** Companion Animal Management
- **ANSC 309** Meat Production and Marketing
- **ANSC 310** Meat Selection and Grading
- **ANSC 312** Advanced Livestock Evaluation
- **ANSC 313** Horse Appraisal
- **ANSC 314** Adv Dairy Cattle Evaluation
- **ANSC 322** Livestock Feeds and Feeding
- **ANSC 370** Companion Animal Feeding
- **ANSC 400** Dairy Herd Management
- **ANSC 401** Beef Production
- **ANSC 402** Sheep and Goat Production
- **ANSC 403** Pork Production
- **ANSC 404** Poultry Science
- **ANSC 405** Advanced Dairy Management
- **ANSC 407** Animal Shelter Management
- **ANSC 424** Pet Food & Feed Manufacturing
- **ANSC 435** Milk Quality and Udder Health
- **ANSC 437** Adv Reproductive Management
- **ANSC 471** ANSC Leaders & Entrepreneurs

### Basic Animal Sciences Courses (choose 3)
- **ANSC 251** Epidemics and Infectious Diseases
- **ANSC 306** Equine Science
- **ANSC 331** Biology of Reproduction
- **ANSC 350** Cellular Metabolism in Animals
- **ANSC 363** Behavior of Domestic Animals
- **ANSC 366** Animal Behavior
- **ANSC 406** Zoo Animal Conservation Sci
- **ANSC 409** Meat Science
- **ANSC 420** Ruminant Nutrition
- **ANSC 421** Minerals and Vitamins
- **ANSC 422** Companion Animal Nutrition
- **ANSC 431** Advanced Reproductive Biology
- **ANSC 438** Lactation Biology
- **ANSC 440** Applied Statistical Methods I
- **ANSC 441** Human Genetics
- **ANSC 444** Applied Animal Genetics
- **ANSC 445** Statistical Methods
- **ANSC 446** Population Genetics
- **ANSC 447** Advanced Genetics and Genomics
- **ANSC 448** Math Modeling in Life Sciences
- **ANSC 449** Biological Modeling
- **ANSC 450** Comparative Immunobiology
- **ANSC 451** Microbes and the Anim Indust
- **ANSC 452** Animal Growth and Development
- **ANSC 453** Stem Cell Biology
- **ANSC 467** Applied Animal Ecology
- **ANSC 509** Muscle Biology
- **ANSC 520** Protein and Energy Nutrition
- **ANSC 521** Regulation of Metabolism
- **ANSC 522** Advanced Ruminant Nutrition
- **ANSC 523** Techniques in Animal Nutrition
- **ANSC 524** Nonruminant Nutrition Concepts
- **ANSC 525** Topics in Nutrition Research
- **ANSC 526** Adv Companion Animal Nutrition
- **ANSC 533** Repro Physiology Lab Methods
- **ANSC 541** Regression Analysis
- **ANSC 542** Applied Bioinformatics
- **ANSC 543** Bioinformatics

Information listed in this catalog is current as of 09/2021
ANSC 545 Statistical Genomics
ANSC 554 Immunobiological Methods
ANSC 561 Animal Stress Physiology

Computer Science + Anthropology, BSLAS

Learning Outcomes: Computer Science + Astronomy, BSLAS

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science & Astronomy

Undergraduate Computer Science & Astronomy majors will graduate with a demonstrated ability to:

LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.

LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.

- Identify which principles should be applied to a specified situation
- Show familiarity with astronomical observables and their physical origin.
- Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.
LO3. Analyze astronomical data, and quantitative data generally.

- Demonstrate the ability to link observation and theory.
- Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
- Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.

LO4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.

LO5. Demonstrate the ability to communicate effectively both verbally and in writing.

Learning Outcomes: Computer Science + Chemistry, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science and Chemistry

By the time of graduation, students will have:

**Computer Science:**

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
4. An ability to function effectively on teams to accomplish a common goal
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
11. An ability to apply design and development principles in the construction of software systems of varying complexity

**Chemistry:**

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the sub-fields of chemistry, including analytical, inorganic, organic and physical chemistry.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

In consultation with an advisor, choose 8 hours of 300- or 400-level chemistry courses ²

---

1. **CS 100** is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.
2. The following courses may not be used to complete the advanced chemistry hours: CHEM 315, CHEM 397, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and any course in another unit, such as any BIOC or MCB course.

- **crop sciences contact:** ugrad@cropsciences.illinois.edu

Computer Science + Crop Sciences (CS+CPSC) is a first-of-its-kind partnership between The Grainger College of Engineering’s Department of Computer Science and the Department of Crop Sciences in the College of Agricultural, Consumer and Environmental Sciences.

Our growing population and changing climate demand out-of-the-box, multidisciplinary thinkers who can handle increasingly rich data sets. CS+CPSC students fill this crucial gap in the agriculture sector, combining a strong technical background with crop sciences expertise powerful enough to change the world.

Students will be among the first to analyze robotics-enabled soil and field measurements, predict weather and climate impacts on food supplies, and accelerate plant improvement through the simultaneous analysis of genetics, environment, and management.

For the degree of Bachelor of Science Major in Computer Science & Crop Sciences

Please see the Computer Science advisor in 1210 Siebel Center, as well as the Crop Sciences advisor in AE-116 Turner Hall.

To graduate from the Computer Science and Crop Sciences curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

**Composition I and Speech**

<table>

Learning Outcomes: Computer Science + Linguistics, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science & Linguistics

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline.
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution.
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
4. An ability to function effectively on teams to accomplish a common goal.
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices.
11. An ability to apply design and development principles in the construction of software systems of varying complexity.
12. An ability to apply knowledge of linguistics appropriate to the discipline.
13. An ability to analyze a problem, and identify and define the computing as well as the linguistics requirements appropriate to its solution.
14. An ability to design, implement, and evaluate a computational linguistics-based system, process, component, or program to meet desired text processing needs.
15. An ability to analyze the local and global impact of computing, language, as well as language technologies on individuals, organizations, and society.
16. An ability to use current linguistics and computational techniques, skills, and tools necessary for computational linguistics practice.
17. An understanding of Linguistics and Computer Science sufficient to be able to apply computational processes to solve problems naturally arising in language.

Information listed in this catalog is current as of 09/2021
In consultation with an advisor, choose at least 9 additional
hours of coursework in philosophy, with at least 6 of those
hours being at the 300- or 400-level.

Total Hours 68-74

1 CS 100 is an orientation course aimed at first-year students, so students
who declare the major after the freshman year are not required to
complete it.

Computer Science, BS

for the degree of Bachelor of Science in Computer Science

department website: https://cs.illinois.edu
department faculty: Computer Science Faculty (https://
cs.illinois.edu/people/faculty/)
overview of college admissions & requirements: The Grainger
College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The Computer Science curriculum provides both a broad and deep
knowledge of the theory, design, and application of computer systems,
with an emphasis on software systems. Because computing is
ubiquitous, application areas involve virtually any field imaginable - from
developing gene sequencing algorithms via techniques in computational
biology, to designing user interfaces for mobile applications; from
designing methods for high frequency trading, to creating computer
generated graphics and special effects in the gaming industry; and
from creating embedded real time systems to be deployed in medical
devices, to analyzing social data from internet communication patterns.
During the first two years the curriculum provides a strong foundation
in mathematics, science, and computation. Advanced coursework in
areas of the student's choosing follows in the second two years, which
include either a senior thesis or a senior project. Graduates may go on to
graduate study or leading positions in industry.

A combined B.S.-M.S. and B.S-M.C.S. degree program is available. The
admission and course requirements are described on the Computer
Science website (https://cs.illinois.edu/academics/graduate/fifth-year-
masters-programs/5-year-bs-ms-program/).

for the degree of Bachelor of Science in Computer Science

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/
ugadvise/Degree+Requirements/#DegreeRequirements-
TechnicalGPARequirement): 2.0

TGPA is required for CS and Math courses. See Technical GPA (https://
wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/
#DegreeRequirements-TechnicalGPARequirement) to clarify
requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General
Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/)
requirements including the campus general education language
requirement.

One Science elective course: 3

Students must take one course from the Natural Science & Technology (NST) list, in addition to those taken as part of the General Education requirements. The course must be a course that is allowed for credit by the Grainger College of Engineering.

Exceptions to the list are: ASTR 100, PHYS 101 and PHYS 102, and CHEM 101.

Students who select either ASTR 121, ASTR 122, or ASTR 150 to satisfy the Science Elective requirement will not be allowed to take ASTR 131 and ASTR 132 as free elective (maximum of 4 credit hours of ASTR 100-level can count towards graduation requirements for all Grainger College of Engineering Undergraduates)

Technical Electives

Code   Title                                                             Hours

CS 374  Introduction to Algorithms & Models of Computation               4
CS 421  Programming Languages & Compilers                                 3

Total Hours  35

Students must take a minimum of (6) six additional technical electives with at least eighteen (18) cumulative credit hours and chosen from CS 397 and the CS 400-level courses, not including CS 400, CS 401, CS 402, CS 403 or CS 491. CS 500-level courses may be used as technical electives, but only with special permission from the CS Academic Office. CS 397 and CS 499 may be used with a cumulative maximum of six (6) credits from them counting as technical electives. One “CS-like” course in another department (e.g., ECE) may also be counted as a CS 400-level course with permission of the CS Academic Office. Non-CS tech electives will not be considered in focus areas.

At least one (1) of the CS courses used for technical electives must be chosen from the list below of CS courses satisfying the team project requirement.

Team Project Course List:

CS 417  Virtual Reality (Virtual Reality)                                  3
CS 427  Software Engineering I                                             3 or 4
CS 428  Software Engineering II                                            3 or 4
CS 429  Software Engineering II, ACP                                      3
CS 437  Topics in Internet of Things (Topics in Internet of Things)       3
CS 465  User Interface Design                                              4
CS 467  Social Visualization                                               3 or 4
CS 493  Senior Project II, ACP                                            3
CS 494  Senior Project II                                                  3
CS 497  Team Project                                                      1 to 3

At least three (3) of the CS courses used for technical electives must be chosen from a single focus area, from among the list of focus areas listed below. The team project course may be used as one of them.

CS 498 Special Topics and CS 598 Special Topics classes may be included in a focus area by department approval.

Software Foundations:

CS 407  Cryptography (Cryptography)                                       3 or 4
CS 409  The Art of Web Programming (The Art of Web Design)               3
CS 422  Programming Language Design                                       3 or 4
CS 426  Compiler Construction                                             3 or 4
CS 427  Software Engineering I                                            3 or 4
CS 428  Software Engineering II                                           3 or 4
CS 429  Software Engineering II, ACP                                      3
CS 474  Logic in Computer Science (Logic in Computer Science)             3 or 4
CS 476  Program Verification                                              3 or 4
CS 477  Formal Software Development Methods                               3 or 4
CS 492  Senior Project I                                                 3

CS 521  Advanced Topics in Programming Systems (Advanced Topics in Programming Systems)  4
CS 522  Programming Language Semantics                                     4
CS 524  Concurrent Progrmg Languages                                       4
CS 526  Advanced Compiler Construction                                    4
CS 527  Topics in Software Engineering                                    4
CS 528  Obj-Oriented Progrmg & Design                                      4
CS 576  Topics in Automated Deduction                                     2 to 4

Algorithms and Models of Computation:

CS 407  Cryptography (Cryptography)                                       3 or 4
CS 413  Intro to Combinatorics                                            3 or 4
CS 473  Algorithms                                                       4
CS 474  Logic in Computer Science (Logic in Computer Science)             3 or 4
CS 475  Formal Models of Computation                                      3 or 4
CS 476  Program Verification                                              3 or 4
CS 477  Formal Software Development Methods                               3 or 4
CS 481  Advanced Topics in Stochastic Processes & Applications           3 or 4
CS 482  Simulation                                                        3 or 4
CS 571  Combinatorial Mathematics                                         4
CS 572  Extremal Graph Theory                                             4
CS 573  Algorithms                                                       4
CS 574  Randomized Algorithms                                             4
CS 575  Methods of Combinatorics                                          4
CS 576  Topics in Automated Deduction                                    2 to 4
CS 579  Computational Complexity                                          4
CS 580  Topics in Algorithmic Game Theory (Topics in Algorithmic Game Theory)  4
CS 583  Approximation Algorithms                                          4
CS 584  Embedded System Verification                                     4

Intelligence and Big Data:

CS 410  Text Information Systems                                          3 or 4
CS 411  Database Systems                                                  3 or 4
CS 412  Introduction to Data Mining                                       3 or 4
CS 414  Multimedia Systems                                                3 or 4
CS 416  Data Visualization (Data Visualization)                           3 or 4
CS 440  Artificial Intelligence                                          3 or 4
CS 441  Applied Machine Learning (Applied Machine Learning)              3 or 4
CS 445  Computational Photography                                         3 or 4
CS 446  Machine Learning                                                  3 or 4
CS 447  Natural Language Processing                                      3 or 4
CS 448  Audio Computing Laboratory (Audio Computing Laboratory)          3 or 4
CS 464  Topics in Societal and Ethical Impacts of Computer Technology (Topics in Societal and Ethical Impacts of Computer Technology)  3
CS 466  Introduction to Bioinformatics                                    3 or 4
CS 467  Social Visualization                                              3 or 4
CS 469  (Computational Advertising)                                       3
CS 510  Advanced Information Retrieval                                    4

Students must take for a letter grade a minimum of two (2) advanced elective courses comprising at least six (6) credit hours. These advanced elective courses must be distinct from courses used to satisfy the technical electives. They may be chosen from CS 397 Individual Study and the 400-level coursework offered for letter grade in ANY area offered at the University of Illinois at Urbana-Champaign. It is expected that students will select these additional advanced courses in a way that best augments their program of study. Consultation with a faculty mentors is highly encouraged. A maximum of six (6) credit hours of CS 397 may be used in the combination of technical electives and advanced electives.

**Electives**

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.

**Total Hours of Curriculum to Graduate**  128

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvising/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
4. The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvising/Degree+Requirements/#DegreeRequirements-FreeElectives).

**Suggested Sequence**

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cs-map/).

**Fourth Year**

**First Semester**
- CS 421: Programming Languages Compilers 3
- CS Technical electives<sup>8</sup> 6
- General Education electives<sup>5</sup> 3
- Free electives 5

**Second Semester**
- CS Technical electives<sup>8</sup> 9
- Free electives 7

---

1. This optional course is highly recommended for freshmen, who may use it to help meet free elective requirements.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Students must take one course from the Natural Science & Technology (NST) list, in addition to those taken as part of the General Education Requirements. The course must be one that is allowed for credit by the Grainger College of Engineering.
4. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at [http://catalog.illinois.edu/general-information/degree-general-education-requirements/](https://catalog.illinois.edu/general-information/degree-general-education-requirements/)
5. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
6. MATH 415 or MATH 416 may be substituted
7. CS 211 may be substituted. The extra 1 credit hour difference between CS 210 and CS 211 will apply to free electives.

---

### Learning Outcomes: Computer Science, BS

**Learning Outcomes for the degree of Bachelor of Science Major in Computer Science**

By the time of graduation, students will have the ability to:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

### Crafts, BFA

**for the Bachelor of Fine Arts Major in Crafts**

---

**No longer accepting students: Fall 2020**

**department website:** [https://art.illinois.edu](https://art.illinois.edu)
**overview of college admissions & requirements:** [Fine & Applied Arts](http://catalog.illinois.edu/faa/)
**college website:** [https://faa.illinois.edu/](https://faa.illinois.edu/)

**Metals Concentration (p. 145)**

The curriculum in Crafts consists of a concentration in Metals. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

**Learning Outcomes: Metals Concentration**

Learning outcomes for the Bachelor of Fine Arts Major in Crafts: Metal Concentration

1. the ability to conceive of, design, problem solve, execute, analyze, and critique utilitarian and non-utilitarian objects;
2. the ability to employ and demonstrate technical competency in the making of jewelry, hollowware, and objects using traditional and new approaches in a wide variety of materials;
3. the ability to demonstrate a knowledge of historical and contemporary metalwork practice;
4. the ability to recognize and use jewelry design and metalworking terminology;
5. the ability to apply the elements and principles of two and three-dimensional design in the making of jewelry, hollowware, objects;
6. the ability to create original utilitarian and non-utilitarian objects;
7. the ability to apply critical thinking when analyzing objects;
8. the ability to demonstrate a higher level of perceptual awareness;
9. the ability to demonstrate confidence in and strategies toward individual creativity;
10. the ability to demonstrate a knowledge of safe and effective lab processes.

Writing and Literature

3 hours of Writing and Literature coursework, either:
- 3 hours of non-Workshop CW coursework (CW 460, or another approved non-Workshop CW course) 2
- or
- 3 hours of ENGL coursework 3

Additional Literature Coursework 4

12 additional hours of approved ENGL coursework, including:
- 9 hours of approved ENGL Literature coursework 5
- 3 hours of an ENGL Difference & Diaspora course 5

Total Hours 36

1. CW 404 and CW 406 may be repeated once for credit, but may not be repeated to fulfill this requirement.
2. Some sections of CW 199, CW 202, and CW 463 may or may not count as a non-Workshop class, depending on the topics offered in a given semester.
3. These hours must be taken at the 200-level or above.
4. A maximum of 3 hours of 100-level coursework may be counted towards the Additional Literature Coursework requirement.
5. Chosen from a list maintained by the Creative Writing Program and the English Advising Office.
6. Chosen from the Difference & Diaspora list maintained by the English Program and the English Advising office.

Learning Outcomes: Creative Writing, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Creative Writing

1. Concepts: Students will identify, analyze, and use the elements of literary craft appropriate for their chosen writing genre.
2. Writing: Students will develop a personal style, apply craft techniques that they learn during workshops, and choose from several strategies to revise written work.
3. Workshop: Students will identify and learn to use the most effective worship practices. They will learn how to critique the written work of their peers, both orally and in writing, in constructive and mutually beneficial ways.
4. Reading: Students will read, analyze, and evaluate contemporary and other literature from the perspective of literary craft and the study of creative writing.
5. Literary Community and Profession: Students will learn to evaluate, discuss, and research contemporary literary publishing and editing.

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Crop Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Crop Sciences

Students graduating with the B.S. in Crop Sciences should be able to:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

Crop Sciences, BS

for the degree of Bachelor of Science Major in Crop Sciences

department website: https://cropsciences.illinois.edu/
department faculty: https://cropsciences.illinois.edu/people/faculty (https://cropsciences.illinois.edu/people/faculty)/
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

Crop Sciences: Biological Sciences, BS

for the degree of Bachelor of Science Major in Crop Science, Biological Sciences Concentration

department website: https://cropsciences.illinois.edu/
department faculty: https://cropsciences.illinois.edu/people/faculty/(https://cropsciences.illinois.edu/people/faculty)/
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than in included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the student's faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

Crop Sciences: Crop Agribusiness, BS

for the degree of Bachelor of Science Major in Crop Sciences, Crop Agribusiness Concentration

The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

Crop Sciences: Crops, BS
for the degree of Bachelor of Science Major in Crop Sciences, Crops Concentration

department website: https://crops sciences.illinois.edu/department website: https://crops sciences.illinois.edu/departm ent faculty: https://crops sciences.illinois.edu/people/faculty (https://crops sciences.illinois.edu/people/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants—how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#academicunitstext)
college website: https://aces.illinois.edu/

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

Crop Sciences: Plant Biotechnology and Molecular Biology, BS

for the degree of Bachelor of Science Major in Crop Sciences, Plant Biotechnology and Molecular Biology Concentration
The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

Total ACES prescribed and elective courses must total 35 hours, of which 20 must be completed in residence.

1 ACE 100 or ECON 102 are not required for the Biological Sciences Concentration.

department website: https://cropsciences.illinois.edu/
department faculty: https://cropsciences.illinois.edu/people/faculty

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

The plant protection concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

Advanced Composition

Select from campus approved list. 3-4

Cultural Studies

Select one course from Western culture, one from non-Western culture, and one from U.S. minority culture from campus approved lists. 9

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 4-5
- MATH 220 | Calculus                                   |       |
- MATH 221 | Calculus I                                 |       |
- MATH 234 | Calculus for Business I                    |       |

Quantitative Reasoning II

CPSC 241 | Intro to Applied Statistics                | 3     |

Natural Sciences and Technology

See Specific Concentration Requirements

Humanities and the Arts

Select from campus approved list. 6

Social and Behavioral Sciences

ACE 100 | Introduction to Applied Microeconomics    | 3 or 4 |
- or ECON 102 | Microeconomic Principles              |       |

Select from campus approved list. 3-4

ACES required

ACES 101 | Contemporary Issues in ACES               | 2     |

Required Concentration

Concentration prescribed courses. See specific concentration requirements. 58-79

Total Hours 126

Information listed in this catalog is current as of 09/2021
AC 100 or ECON 102 are not required for the Biological Sciences Concentration.

**Dance, BA**

*for the degree of Bachelor of Arts Major in Dance*

**department website:** [http://dance.illinois.edu/](http://dance.illinois.edu/)

**overview of college admissions & requirements:** Fine & Applied Arts [http://catalog.illinois.edu/faa/](http://catalog.illinois.edu/faa/)

**college website:** [https://faa.illinois.edu/](https://faa.illinois.edu/)

**email:** dance@illinois.edu

The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study three core areas in Dance: Technique, Creative Process, and Dance Academics. Students will identify at least one other key area of interest such as Theater, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Major, Minor or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will create a BA Capstone Project in their senior year as a synthesis of the studies within dance and another area of study.

Students pursuing a Dance degree at the University of Illinois must be admitted to the BFA in Dance (audition required). Once admitted, those desiring a broader education may choose to apply for admittance into the BA in Dance, rather than continuing in the BFA.

*for the degree of Bachelor of Arts Major in Dance*

**Minimum hours required for graduation: 120 hours**

1. DANC 160 and 260 must be taken for at least 4 hours each but are repeatable beyond 4 hours.
2. Students will enroll in one credit hour of DANC 497, BA Capstone Project in fall of their senior year and two credit hours of DANC 497 in spring of their senior year for a total of three credit hours.

**Learning Outcomes: Dance, BA**

Learning outcomes for the degree of Bachelor of Arts Major in Dance

Upon graduation the BA student will be able to:

1. Dance with physical, technical and performance skills.
2. Utilize knowledge of anatomical and somatic approaches in theory and practice.
3. Engage in creative processes and collaborate across domains.
4. Produce a capstone project that reflects synthesis of studies in dance and other fields.
5. Employ diverse modes of thinking, both orally and in writing, to communicate ideas relating to dance and other fields.

Dance, BFA

for the degree of Bachelor of Fine Arts Major in Dance

The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screendance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required.

Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

for the degree of Bachelor of Fine Arts Major in Dance

Minimum hours for graduation: 130 hours.

**Creative Process/Performance and Production** 17-20

Choose 1 of the following improvisation courses:

- DANC 259 Contact Improvisation for Actors, Musicians and Dancers

**Creative Process:**

- DANC 262 Choreographic Process I 2

Choose a minimum of 3 courses from the following Advanced Creative Process courses. Courses listed below are repeatable:

- DANC 362 Choreographic Process II
- DANC 363 Advanced Improvisation
- DANC 464 Composer-Chor Workshop
- DANC 465 Screendance

Choose 6 hours from the following Performance courses: 1

- DANC 220 Perf Pract Student Works I
- DANC 221 Performance in Grad Thesis I
- DANC 222 Perf Pract November I
- DANC 223 Perf Pract February I
- DANC 232 Repertory Company
- DANC 420 Perf Pract Student Works II
- DANC 421 Performance in Grad Thesis II
- DANC 422 Perf Pract November II
- DANC 423 Perf Pract February II
- DANC 424 Collaborative Performance

**Production**

- DANC 375 Production in Dance 1

Choose 4 hours from the following Production courses:

- DANC 131 Production Practicum I
- DANC 231 Production Practicum II
- DANC 330 Dance Documentation
- DANC 331 Production Practicum III
- DANC 431 Production Practicum IV

**Dance Academics** 20

Dance history/ theory

- DANC 240 Dance History 3

Select one of the following:

- ANTH 363 Anth of Dance/Movement
- DANC 340 Dancing Black Popular Culture
- DANC 441 Dance History Seminar

Six hours of Music for Dance courses:

- DANC 268 Music Theory for Dancers 3

Select one of the following (all meet a general education requirement):

- MUS 130 Music Then and Now
- MUS 132 Popular Music Studies
- MUS 133 Introduction to World Music

Four hours of Dance Sciences courses:

- DANC 245 Introduction to Somatics 1
- DANC 345 Dance Anatomy and Kinesiology 3

Choose 3 hours from the following Dance Education courses:

- DANC 350 Creative Dance for Children
- DANC 450 Teaching Workshop

**Professional Electives** 2

Focused Electives, chosen in consultation with an advisor. Additional courses in dance such as technique, choreography, performance, "non-categorized" courses in dance, coursework in Music, Theater, or Art.

**Electives as needed to reach a minimum of 130 hours** 130

1 A maximum of 16 hours may be accumulated toward degree requirements in DANC 220, DANC 221, DANC 222, DANC 223, DANC 420, DANC 421, DANC 422, DANC 423.

2 A minimum of 6 - 9 hours must be taken in the area of professional electives, to bring total of Dance courses to 84 hours. It is strongly recommended that dance majors consider taking theatre/arts courses outside of the Department of Dance offerings.

**Learning Outcomes: Dance, BFA**

Learning outcomes for the degree of Bachelor of Fine Arts Major in Dance

1. Dance with substantial physicality, exhibiting technical and performance skill, musicality, and creativity.
2. Utilize knowledge of anatomical and somatic approaches in theory and practice.
3. Locate a creative process, conduct choreographic inquiries, and produce a well-conceived dance work for a performance event.
4. Teach a well-structured movement class with an understanding of pedagogical principles.
5. Employ diverse modes of thinking, both verbally and in writing, to communicate ideas relating to dance.
6. Understand basic technology and its application to dance making, teaching, research, and public relations.

Information listed in this catalog is current as of 09/2021
Curriculum Preparatory to Early Childhood School Teaching

This program prepares students to teach birth to grade 2. A minimum of 120 semester hours of credit is necessary for graduation.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in all content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This is a Gateways to Opportunity approved program.

Earth, Society, & Environmental Sustainability, BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability

**school website:** [https://www.earth.illinois.edu/](https://www.earth.illinois.edu/)

**school faculty:** Earth, Society & Environment Faculty (https://earth.illinois.edudirectory/faculty/)

**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

**college website:** [https://las.illinois.edu/](https://las.illinois.edu/)

**E-mail:** sese-info@illinois.edu

Students select one concentration in consultation with an academic advisor:

- Science of the Earth System (SES) Concentration (p. 161)
- Society and the Environment (SAE) Concentration (p. 162)

**On-campus UIUC students** can transfer to this degree without any special requirements.

**Off-campus students** who plan to transfer to this degree should have completed, or have in progress, the following:

- the Composition 1 requirement.
- the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at UIUC or elsewhere) and should consult the program advisor:

- the UIUC LAS language requirement should be satisfied.
- the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
- the Cognate Coursework should be completed.

---

### Learning Outcomes: Early Childhood Education, BS

Learning Outcomes for the degree of Bachelor of Science Major in Early Childhood Education

1. Students will acquire deep knowledge of child development as it relates to the field of Education.
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction children from infancy to age eight.
3. Students will use assessment data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices)

---

Information listed in this catalog is current as of 09/2021
All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

Earth, Society, & Environmental Sustainability: Society and the Environment (SAE), BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Society and the Environment Concentration

school website: https://www.earth.illinois.edu/
school faculty: Earth, Society & Environment Faculty (https://earth.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
E-mail: sese-info@illinois.edu

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.
Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Society and the Environment Concentration

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Distinction: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

High Distinction: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

Highest Distinction: A minimum cumulative grade point average of 3.7, and also completed an approved independent study project, approved senior thesis, or approved capstone.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 48-58 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. Substitutions may be made with advisor approval.

Minimum hours required for graduation: 120 hours.

A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the "ESE Introductory Core" requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400-level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.

OR in the ESE School office OR at http://www.earth.illinois.edu/students/guides (http://www.earth.illinois.edu/students/guides/)

Society and the Environment Concentration Requirements:

- 10-12 hours-Introductory Social Science (Select three courses from approved list)
- 3 hours-Statistics (Select one course from approved list)
- 3 hours-Economics: ECON 102

Highly recommended: CHEM 101 or CHEM 102

Learning Outcomes: Earth, Society, & Environmental Sustainability, BSLAS

Learning Outcomes for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability

1. Be able to recognize, critique and implement commonly accepted Sustainability models and ideas in a wide variety of settings, using systems thinking to link social and natural science concepts.
2. Have a fundamental understanding of the underlying natural science (SES concentration) or social science (SAE concentration) concepts; being able to recognize and apply appropriate scientific methods (SES concentration) and social science methods (SAE concentration).
3. Use quantitative methods to describe, understand and evaluate theoretical and applied issues in environmental and sustainability study; this includes direct calculation, working with data, and using quantitative models.
4. Be able to critically evaluate and then communicate environmental and sustainability concepts to both specialized and wide audiences.
5. Prepare students for professional work in environmental and sustainability practice, such as laboratory and field techniques, apprehending and implementing Geographic Information Sciences (including the use of appropriate software), and quantitative and qualitative methods.

East Asian Languages & Cultures, BALAS

1 Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.
2 No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.
3 Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.

Learning Outcomes: East Asian Languages & Cultures, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences: Major in East Asian Languages & Cultures

1. Linguistic Competence and Cultural Understanding: EALC students will effectively deal with the routine tasks and social situations and express personal meaning in the language of a target country in a linguistically and culturally appropriate manner.

2. Intellectual Reasoning and Knowledge: EALC students will demonstrate broad and deep knowledge of East Asian cultures through coursework in more than one discipline.

3. Creative Inquiry and Discovery: EALC students will develop a critical and reflective orientation toward social, cultural, and linguistic differences and apply the knowledge to promote inquiry, discover solutions, and generate new ideas and creative works in the form of research.

Additional mathematics courses are recommended

Supporting course work: 18 hours of courses outside economics but related to the student’s major interest in economics (see www.economics.illinois.edu/programs/undergrad (http://www.economics.illinois.edu/programs/undergrad/) for details).

1 Excluding ECON 398 and ECON 399.

For further information, please visit the Economics undergraduate program page (http://www.economics.illinois.edu/undergrad/info/).

Learning Outcomes: Economics, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Economics

1. Analytical Skills/Problem-Solving: ECON students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer, with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.

2. Critical Thinking: ECON students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

3. Quantitative Reasoning: ECON students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using...
appropriate statistical techniques, and interpret the results of such analyses.

4. **Specialized Knowledge and Practical Application:** ECON students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real-world situations.

5. **Interdisciplinary Knowledge, Diverse Issues, and Global Consciousness:** ECON students will broaden their global and disciplinary knowledge, enhancing their understanding of the world around them both within economics and beyond.

### Electrical Engineering, BS

*For the Degree of Bachelor of Science in Electrical Engineering*

**Department website:** https://ece.illinois.edu

**Department faculty:** Electrical & Computer Engineering Faculty (https://ece.illinois.edu/about/directory/faculty/)

**Overview of College Admissions & Requirements:** The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)

**College website:** https://grainger.illinois.edu/

Electrical engineering is a multifaceted discipline that over the last century has produced an astounding progression of technological innovations that have shaped virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical, and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing, communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all of the important areas of modern electrical engineering.

*For the Degree of Bachelor of Science in Electrical Engineering*

## Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

### Graduation Requirements

**Minimum Technical GPA** (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements/#DegreeRequirements-technicalGPARequirement): 2.0

TGPA is required for ECE courses (except ECE 316). See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/DegreeRequirements/#DegreeRequirements-technicalGPARequirement) to clarify requirements.

**Minimum Overall GPA:** 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

**Electives**

- **Code**: string
- **Title**: string

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.

**Total Hours of Curriculum to Graduate**: 128

---

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. Freshmen take ECE 110 for 3 credit hours. Lab-only version taken by transfer students (with special permission) is 1 credit hour.
4. STAT 410 may be substituted.
5. ECE 496 AND ECE 499 may be substituted.
Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/ee-map/).

**Total Hours:** 128

---

1. Freshmen take ECE 110 for 3 credit hours. Lab only version of ECE 110 taken by transfer students (with special permission) is 1 credit hour.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
4. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.

---

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Electrical Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Electrical Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Electrical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Elementary Education, BS

for the degree of Bachelor of Science Major in Elementary Education

department office: Curriculum & Instruction
311 Education Building
1310 South Sixth
Champaign, IL 61820
phone: (217) 244-8286
department website: https://education.illinois.edu/ci (http://education.illinois.edu/ci/)
department faculty: Curriculum & Instruction Faculty (https://education.illinois.edu/faculty-finder/ci/)
overview of college admissions & requirements: College of Education (https://education.illinois.edu/programs/undergrad/programs-degrees/ci-ele-ug/)
college website: https://education.illinois.edu/ (http://education.illinois.edu/)

This program prepares teachers for grades one through six. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

**Total Hours**

| TOTAL minimum hours include general education and professional education credits. | 120 |

1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2. Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.
3. Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.
4. ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.
5. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.
6. EPSY 100 is a prerequisite for EPSY 201.
7. Students will register for EDPR 250 during their spring term of the year one professional education sequence year for zero credit hours and register for EDPR 250 again their fall term of the year two professional education sequence for four credit hours.

---

**Learning Outcomes: Elementary Education, BS**

Learning Outcomes for the degree of Bachelor of Science Major in Elementary Education

1. Students will acquire deep knowledge of content in the field of Education
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction for elementary students, grades 1-6.
3. Students will use data to drive decisions and solve problems in and out of the classroom
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices)

**Engineering Mechanics, BS**

For the degree of Bachelor of Science in Engineering Mechanics

- **department website:** http://mechse.illinois.edu/
- **department faculty:** Mechanical Science & Engineering Faculty ([https://mechse.illinois.edu/people/faculty/](https://mechse.illinois.edu/people/faculty/))
- **overview of college admissions & requirements:** The Grainger College of Engineering ([https://grainger.illinois.edu/admissions/](https://grainger.illinois.edu/admissions/))
- **college website:** [https://grainger.illinois.edu/](https://grainger.illinois.edu/)

The Engineering Mechanics program at Illinois (accredited by the Engineering Accreditation Commission of ABET, www.abet.org) is a major that focuses on the principles of mechanics that underpin design and engineering in diverse industries including materials, energy, biotechnology, civil, and aerospace to name a few. Students learn rigorous mathematical, scientific, and engineering principles in subject areas such as statics, dynamics, strength of materials, and fluid dynamics. Further, Engineering Mechanics students learn how to apply these basic principles in modern engineering design through laboratory and project work. The program also benefits from a cohesive secondary field which students can tailor to fit their academic and career objectives. Engineering Mechanics is well suited for students with an interest in analysis and design, and physical principles.

---

Information listed in this catalog is current as of 09/2021
Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0

TGPA is required for required Engineering courses and any technical elective courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

**Total Hours of Curriculum to Graduate** 128

1. **External transfer students take ENG 300 instead.**
2. **CHEM 103 (http://catalog.illinois.edu/search/?P=CHEM%20103)** requirement waived for students who received test-based credit (AP, IB, or proficiency) for CHEM 102 (http://catalog.illinois.edu/search/?P=CHEM%20102), similarly CHEM 105 (http://catalog.illinois.edu/search/?P=CHEM%20105) requirement waived for students who received test-based credit for CHEM 104 (http://catalog.illinois.edu/search/?P=CHEM%20104). Students are still required to have 128 credit hours minimum to graduate.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. **MATH 415 (http://catalog.illinois.edu/search/?P=MATH%204015)** may be substituted for students entering prior to Fall 2021.
5. **Transfer or incoming students with credit upon admission to the Engineering Mechanics program may substitute MATH 284 (http://catalog.illinois.edu/search/?P=MATH%20284)** or MATH 285 (http://catalog.illinois.edu/search/?P=MATH%20285) with a grade of B+ or higher.
6. **CS 124 or CS 125 (http://catalog.illinois.edu/search/?P=CS%20125)** or ECE 220 (http://catalog.illinois.edu/search/?P=ECE%20220) may be substituted.
7. **ECE 110 (http://catalog.illinois.edu/search/?P=ECE%20110)** and ECE 210 (http://catalog.illinois.edu/search/?P=ECE%20210) (or ECE 211 (http://catalog.illinois.edu/search/?P=ECE%20211)) combined may be substituted.
8. **Advanced Composition satisfied by completing TAM 324 and ME 470.**
9. **Transfers and Physics minor/dual degree students may substitute PHYS 325 (http://catalog.illinois.edu/search/?P=PHYS%20325).**
10. **The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.**
11. **The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree +Requirements/#DegreeRequirements-FreeElectives).**

for the degree of Bachelor of Science in Engineering Mechanics
## Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite and corequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/engineering-mechanics-map/).

| Free elective              | 3     |
| **Semester Hours**         | 15    |

| **Total Hours**            | 128   |

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). ME 170 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours in one of the following lists approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. Select with departmental approval or choose from departmentally pre-approved list of Secondary Field Electives (http://mechanical.illinois.edu/undergraduate/bs-engineering-mechanics/#EMSecondaryFields).
Learning Outcomes: Engineering Mechanics, BS

Learning Outcomes for the degree of Bachelor of Science Major in Engineering Mechanics

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Engineering Mechanics graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Engineering Technology & Management for Agricultural Systems, BS

for the degree of Bachelor of Science Major in Engineering Technology & Management for Agricultural Systems

Students pursuing this major select one of four concentrations:

- Agricultural Production & Processing (p. 179)
- Construction Management (p. 182)
- Digital & Precision Agriculture (p. 184)
- Energy & the Environment (p. 186)

Prescribed Courses including Campus General Education

### Engineering Technology & Management for Agricultural Systems: Agricultural Production & Processing, BS

for the degree of Bachelor of Science Major in Engineering Technology & Management for Agricultural Systems: Agricultural Production & Processing concentration

**department website:** https://abe.illinois.edu/undergraduate/department_faculty

**overview of college admissions & requirements:** Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

**college website:** https://aces.illinois.edu/

Students in the Agricultural Production & Processing concentration learn the technology, machinery, and management of the agricultural production system. Students will gain knowledge and skills in topics including: 1) the agricultural industry from an operational and management perspective; 2) agricultural machinery, grain storage systems, and bioprocessing systems; 3) numerical and scientific processes to drive management decisions; and 4) the science and management of the complete food production system. Graduates of the Agricultural Production & Processing concentration are prepared for
careers in industry with both small and large companies, agricultural retailers and service providers, production farming operations, government and environmental agencies, or for entrance into graduate or professional school.

For the degree of Bachelor of Science Major in Engineering Technology & Management for Agricultural Systems, Agricultural Production & Processing concentration

Engineering Technology & Management for Agricultural Systems: Digital & Precision Agriculture, BS

for the degree of Bachelor of Science Major in Engineering Technology & Management for Agricultural Systems: Digital & Precision Agriculture concentration

department website: https://abe.illinois.edu/undergraduate/
department faculty: https://abe.illinois.edu/directory/faculty/

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Students in the Digital & Precision Agriculture concentration learn the application of technology in agriculture and the larger system of production agriculture, including machinery, agronomy, and business management. Students will gain an understanding of 1) the application of advanced technology used in agriculture with an emphasis on geospatial information systems and machinery technology; 2) the functional workings and management of agricultural machinery; 3) crop and soil science and their interactions with advanced technologies; 4) numerical and scientific processes to drive agricultural management decisions; and 5) business operations and management with a focus on the agricultural industry. Graduates of the Digital & Precision Agriculture concentration are prepared for careers in industry with both small and large companies, agricultural retailers and service providers, production farming operations, government and environmental agencies, or for entrance into graduate or professional school.

for the degree of Bachelor of Science Major in Engineering Technology & Management for Agricultural Systems, Digital & Precision Agriculture concentration

English: English Concentration, BALAS

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, English Concentration
Any ethnic literature survey with a significant pre-1900 focus ¹

**Period Courses (American, British, Anglophone, etc.)** ¹⁵

- 6 hours: At least two courses that cover at least two of the following categories:
  - Medieval Literature & Culture (before 1550)
  - Shakespeare
  - Eighteenth-Century Literature & Culture (1660-1800)
  - Early Modern Literature & Culture (1550-1660, other than Shakespeare)
  - Nineteenth-Century Literature & Culture
  - Twentieth-Century Literature & Culture
  - Contemporary Literature & Culture

**Elective Coursework** ¹, ² ⁹

- At least three courses chosen from those controlled by or cross-listed with the Department of English (Business and Technical Writing, Creative Writing, and English)

One course in Difference and Diaspora. This requirement can be fulfilled by taking an appropriately focused course from among ENGL 350: Writing about Literature, Text, and Culture; the historical surveys; the period courses; or the elective coursework.

**Total Hours** ³⁹

¹ Chosen from the list maintained in the Department of English. Note: ENGL 350 can serve as a period course, a cluster course, an elective course, and/or a Difference and Diaspora course only when it is not also being used to fulfill a core requirement. Students who wish to use ENGL 350 in this way must thus take the course a second time (and with a different topic than the first time).

² Student may count one Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

- Creative Writing, BALAS (p. 147)

for the degree of Bachelors of Arts in Liberal Arts & Sciences: Major in English, English Teaching Concentration

This concentration fulfills state certification requirements to teach high school (grades 9-12) English Language Arts through the AP/honors level.

Minimum required concentration and supporting coursework normally equates to 78 hours: 39 hours of English department courses and 39 hours of courses from the Teacher Education Minor in Secondary School Teaching. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Time to degree completion varies. Minimum time to completion is eight semesters, with some students requiring ten semesters. Transfer students may need ten total semesters combined to complete the program. Please see the LAS Transfer Handbook for more information.

To remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Prerequisites to transfer to the English Teaching concentration: Students must complete ENGL 200, the two required historical surveys, and ENGL 301 (Intro to Critical Theory). In addition, it is strongly recommended that students complete five additional ENGL courses (chosen in consultation with an English advisor) appropriate to the English Teaching Concentration.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

for the degree of Bachelors of Arts in Liberal Arts & Sciences: Major in English, Topics in English Concentration

Minimum required major and supporting coursework equates to 39 hours of English department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours) and 9 of these hours (including the capstone) must be taken in the student’s chosen field.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

Minimum hours required for graduation: 120 hours

For this concentration, students will complete 12 hours of coursework (4 courses) in one of three cluster areas: Literature and Science, Media Cultures, or Race, Indigeneity, Gender, and Sexuality. These 12 hours will be selected from an approved list of courses for this category maintained by the English department. Students can access these lists and a further description of each cluster on the Department of English website (https://english.illinois.edu/academics/undergraduate-studies/majors-minors/).

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

### Learning Outcomes: English, BALAS

Learning Outcomes for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English

1. Capacity to understand, analyze, and interpret 'texts', broadly construed, through a variety of methods including close reading.
2. Capacity to understand literature and literary history in relation to historical, theoretical, aesthetic, and political contexts.
3. Ability to craft rigorous and well-supported arguments that demonstrate an awareness of audience (skills associated with the research paper).
4. Literacy, including clarity of written expression and the capacity to evaluate external sources.
5. Awareness of the ways in which forms of difference, including racial, ethnic, gender, and sexual difference, inform the production and reception of literature.

### Finance, BS

for the degree of Bachelor of Science Major in Finance

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.
As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate. In addition to the finance major requirements, students in finance must meet the University General Education requirements and the Gies College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (https://giesbusiness.illinois.edu/undergraduate-hub/majors-and-minors/finance/)).

for the degree of Bachelor of Science Major in Finance

Advising Notes
- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

Core Curriculum
Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 124 hours.

1 For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2 BUS 101, BUS 201, BUS 301 and BUS 401 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 301 and BUS 401 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

3 Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

4 Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

Information listed in this catalog is current as of 09/2021
Learning Outcomes for the degree of Bachelor of Science Major in Finance, BS

1. Discipline-based competency: Students will acquire sufficient discipline-based competency to address current and future corporate and investment finance problems. Such competency includes using finance knowledge and tools necessary to value real and financial assets, analyze a company’s financial performance, and identify risk factors underlying such valuations or analysis.

2. Written and verbal communication competency: Students will be able to effectively integrate information into a coherent, well-organized, professional report.

3. Proficiency in the tools of the trade: Students should be able to demonstrate proficiency in the tools of the trade. First and foremost is Excel, but proficiency in Bloomberg, Morningstar, Capital IQ and the other tools of our trade.

4. Professional practice and ethics: Students should be familiar with professional practice and demonstrate consistent ethical behavior.

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this concentration who do not complete an internship will be prepared for entry-level supervisory positions in food service facilities and in the food and pharmaceutical industries.

Learning Outcomes: Dietetics Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Dietetics Concentration

All graduates of the University of Illinois Didactic Program in Dietetics (DPD) will be able to:

KRDN 1.1 Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.

KRDN 1.2 Use current information technologies to locate and apply evidence-based guidelines and protocols.

KRDN 1.3 Apply critical thinking skills.

KRDN 2.1 Demonstrate effective and professional oral and written communication and documentation.

KRDN 2.2 Describe the governance of nutrition and dietetics practice, such as the Scope of Nutrition and Dietetics Practice and the Code of Ethics for the Profession of Nutrition and Dietetics; and describe interprofessional relationships in various practice settings.

KRDN 2.3 Assess the impact of a public policy position on nutrition and dietetics practice.

KRDN 2.4 Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.

KRDN 2.5 Identify and describe the work of interprofessional teams and the roles of others with whom the registered dietitian nutritionist collaborates in the delivery of food and nutrition services.

KRDN 2.6 Demonstrate an understanding of cultural competence/sensitivity.

KRDN 2.7 Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession.

KRDN 2.8 Demonstrate an understanding of the importance and expectations of a professional in mentoring and precepting others.

KRDN 3.1 Use the Nutrition Care Process to make decisions, identify nutrition-related problems and determine and evaluate nutrition interventions.

KRDN 3.2 Develop an educational session or program/educational strategy for a target population.

KRDN 3.3 Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.

KRDN 3.4 Explain the processes involved in delivering quality food and nutrition services.

KRDN 3.5 Describe basic concepts of nutritional genomics.

KRDN 4.1 Apply management theories to the development of programs or services.

KRDN 4.2 Evaluate a budget and interpret financial data.

KRDN 4.3 Describe the regulation system related to billing and coding, what services are reimbursable by third party payers, and how reimbursement may be obtained.

KRDN 4.4 Apply the principles of human resource management to different situations.

KRDN 4.5 Describe safety principles related to food, personnel and consumers.

KRDN 4.6 Analyze data for assessment and evaluate data to be used in decision-making for continuous quality improvement.

Food Science & Human Nutrition: Food Science, BS

Learning Outcomes: Food Science Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Food Science Concentration

All graduates of the University of Illinois Food Science concentration will achieve the following:

1. Graduates are A) competent in core food science areas and B) can integrate and apply their knowledge to solve real-world problems and make decisions. Core Food Science Areas include: Food Chemistry and Analysis, Food Safety and Microbiology, Food Processing and Engineering, and Sensory Science. Associated Areas include: Nutrition and Health, Quality Assurance, Food Laws and Regulations.

2. Graduates possess strong critical thinking and problem solving skills.

3. Graduates are proficient communicators.

4. Graduates possess impactful professional and leadership skills.

Aspirational goals

Graduates of our Food Science program: 1) value diversity, 2) are confident in their abilities, 3) volunteer their services to their professional and societal communities, and 4) take professional and ethical responsibility for their actions.

Food Science & Human Nutrition: Hospitality Management, BS

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#academicunitsttext)
college website: https://aces.illinois.edu/

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. Through the integration of food-focused theory, practice, and experience, it is the mission of the program to prepare leaders in the hospitality industry with a foundation in science, business, and management.

## Learning Outcomes: Hospitality Management Concentration

All graduates of the University of Illinois Hospitality Management concentration will be able to:

1. Professionally manage the preparation, presentation and service of quality food. Apply science concepts to the food and beverage component of the hospitality industry. Identify hotel/lodging management and allied hospitality industries’ concepts. (Industry Skills)
2. Integrate human, financial and physical resources management into hospitality related operations. Practice and evaluate elements of service management. (Management Skills)
3. Demonstrate ability to analyze, assess, evaluate, adapt and apply problem solving skills. (Problem Solving)
4. Demonstrate effective written and oral communication skills. (Communication)
5. Gain practical and professional experiences. Integrate and practice ethics, leadership, and collaboration. (Professional Experiences)

### Food Science & Human Nutrition: Human Nutrition, BS

For the degree of Bachelor of Science Major in Food Science & Human Nutrition, Human Nutrition Concentration

This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong human nutrition preparation that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see Dietetics.

### Required Concentration

Concentration prescribed courses. See specific requirements for each concentration listed below.

### Learning Outcomes: Hospitality Management Concentration

Learning outcomes for the degree of Bachelor of Science Major in Food Science & Human Nutrition: Hospitality Management Concentration

1. Professionally manage the preparation, presentation and service of quality food. Apply science concepts to the food and beverage component of the hospitality industry. Identify hotel/lodging management and allied hospitality industries' concepts. (Industry Skills)
2. Integrate human, financial and physical resources management into hospitality related operations. Practice and evaluate elements of service management. (Management Skills)
3. Demonstrate ability to analyze, assess, evaluate, adapt and apply problem solving skills. (Problem Solving)
4. Demonstrate effective written and oral communication skills. (Communication)
5. Gain practical and professional experiences. Integrate and practice ethics, leadership, and collaboration. (Professional Experiences)

1. Students in the Food Science Concentration must choose CPSC 116, and one course from Western cultures, and one from U.S. minority cultures from campus approved lists.
2. Students in the Food Science Concentration must select from MATH 220 or MATH 221.
3. Students in the Hospitality Management Concentration must take CHEM 101. All other concentrations take CHEM 102 + 103 & CHEM 104 + 105, which are not required for the Hospitality Management Concentration.
4. Not required for the Food Science Concentration.
5. AGED 230 or 260 and 3 hours selected from the campus approved list for students in the Food Science Concentration - 6 hours total.
6. The Food Science Concentration requires a minimum of 130 hours; the Dietetics, Human Nutrition, and Hospitality Management Concentrations each require a minimum of 126 hours.

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Human Nutrition Concentration

All graduates of the University of Illinois Human Nutrition concentration will be able to:

1. Demonstrate critical thinking, problem solving and communication skills.
2. Understand basic sciences relevant to nutrition, research and application of nutrition and an awareness of social and economic factors in food.
3. Prepared to pursue careers in the food, health, and fitness industries, or enter medicine, dentistry, nursing, and other health professions.

Foreign Language Teaching
Curricula Preparatory to Teach Foreign Languages
The College of Liberal Arts and Sciences offers curricula for the preparation of teachers of French (http://catalog.illinois.edu/undergraduate/las/academic-units/french-italian/curriculum-preparatory-teaching-french/), German (http://catalog.illinois.edu/undergraduate/las/academic-units/german/curriculum-preparatory-teaching-german/), Latin (http://catalog.illinois.edu/undergraduate/las/academic-units/classics/teach-latin/), and Spanish (http://catalog.illinois.edu/undergraduate/las/academic-units/spanish-portuguese/teaching-spanish-major/).

Illinois law requires all candidates for licensure in World Languages pass the appropriate language content-area test prior to student teaching. The appropriate language content-area test must also be taken at the University of Illinois and an oral proficiency test in their content major language prior to licensure. A student must have at least 2.5 (A+ = 4.0) cumulative and University of Illinois grade point averages to remain in the teaching option. A student must also maintain at least a 2.5 grade point average in all attempts at content area and pedagogy courses taken at the University of Illinois in order to remain in the teaching option.

E-mail: flte@illinois.edu

Prerequisite to application to the Teaching Option
GPA of 2.5 in all content courses in the intended majors of French, German, Latin, Spanish.

General Education Requirements: Students in the Foreign Language Teaching Curricula of French, German, Latin, and Spanish will be expected to complete the Campus General Education (https://courses.illinois.edu/) requirements (including the campus general education language requirement).

college website: https://las.illinois.edu/
email: french-italian@illinois.edu

The BALAS in French allows students to specialize in one of the following concentrations:

- The French Studies concentration focuses on courses in language, literature, culture, film, and linguistics.
- The French Commercial Studies concentration combines a focus on French language and culture with appropriate courses in business.

Select a concentration in consultation with your adviser.
- French Commercial Studies Concentration (p. 201)
- French Studies Concentration (p. 202)

Italian, BALAS (p. 249)

5 Year BALAS /MA in French and European Union Studies

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in French and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS—granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

French: French Commercial Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in French, French Commercial Studies Concentration
A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: A student must have at least a 3.45 LAS cumulative grade point average, complete a senior thesis FR 492, and complete two additional advanced-level courses in French or in supporting course work. Consult the honors adviser for details.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 34 hours beyond the 100-level. Twelve hours of 300- and 400-level in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

Language Courses

FR 205 Oral French
FR 213 French Phonetics
FR 314 Advanced Grammar in Context

Culture Courses

Choose two of the following:
FR 335 French Cultural History to 1789
FR 336 French Cultural History 1789-1968
FR 337 Contemporary France

Literature Courses

Two courses at the 300- or 400-level in French and/or Francophone literature

Medieval and Early Modern Period course

Students must take one course focused on the medieval/early modern period. Students may choose from FR 335 or FR 301. This course can be used to fulfill the Culture or Literature Courses requirement.

Electives
Three French courses at the 300- or 400-level in any of the following areas: language and translation, business, cinema, culture, linguistics, literature, media.

**Learning Outcomes: French, BALAS**

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts and Science Major in French

Upon graduating with a major in French, students shall be able to do the following:

1. **Language proficiency and accuracy:** reach an advanced level of proficiency in reading, writing, speaking, and interpreting the language.
2. **Research skills and literacy in texts, media, and technology in French:** access, manage, evaluate, select, and effectively use culturally authentic and relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content.
3. **Intercultural awareness, knowledge, and competence:** identify and analyze products, practices, and perspectives of the French and Francophone world, and compare them to their own and other cultures.
4. **Knowledge about literature and the visual arts in French:** acquire general and specific knowledge of literature in French and visual arts from a formal, historical, and global perspective.
5. **Knowledge about French linguistics:** acquire general knowledge about the structure and history of the French language.

**Gender & Women's Studies, BALAS**

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Gender and Women's Studies

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

**Departmental distinction:** To be eligible for graduation with distinction, a student must have a cumulative grade-point average (GPA) of 3.5 and a 3.5 GPA within the major.

High distinction. To be eligible for graduation with high distinction, a student must have a cumulative grade point average (GPA) of 3.5, a GPA of 3.7 within the major, and complete a thesis or project in a 400-level GWS course that is approved by the department.

**Advising:** The Department of Gender and Women's Studies provides advising for students to help plan a coherent program of study.

**General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 33 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

**Additional Coursework**

At least 15 additional hours of coursework offered by the Department of Gender and Women's Studies may include other courses approved by the Department of Gender and Women's Studies and are on an approved list maintained in the department office and with the GWS advisor.

**Area Electives**

Two courses in Gender and Women's Studies. No more than one may be counted from the 100 or 200 level. For a list of approved courses contact the GWS department or the GWS advisor.

Of the 33 hours in the major, students must take at least one course focused on transnational or non-U.S. issues. For a list of approved courses contact the GWS department or the GWS advisor.

**Information listed in this catalog is current as of 09/2021**
movements, intersectionality, queer and trans studies, imperialism and coloniality, and feminist and queer theories and methods across academic disciplines and fields. Students will learn that feminisms are both historical movements as well as bodies of critical inquiry, encompassing a wide range of actors and objects of study, including forms of information retrieval and knowledge production.

2. **Critical Inquiry and Creative Literacy**: Students will apply feminist and queer theories in developing their own capacities for critical inquiry and creative literacy. Students will also exercise their skills in oral and written communication, expressing new ideas in scholarly compositions and also generating multidisciplinary projects.

3. **Social Awareness and Understanding Power**: Students will recognize the gendered dimensions of social, philosophical, aesthetic, cultural, and political claims about national and global movements and events. Students will become familiar with feminist and queer theories and movements that consider together indigeneity, race, religion, nation, disability, gender, and sexuality to understand historical and contemporary formations of power.

4. **Self-Reflexivity and Community Engagement**: Students will demonstrate self-reflexivity about their ideas and social and political positions in their classrooms and communities, learning how to build and sustain relationships in striving for both immediate harm reduction and long-term social justice.

5. **Global Consciousness**: Students will understand how complex and interdependent forces—environmental, social, cultural, economic, and political—shape a range of possibilities and foreclosures for individuals and populations unevenly across the world, learning to apply indigenous, postcolonial, and transnational feminist and queer critiques to those forces.

### Geography & Geographic Information Science

**department website:** https://www.geog.illinois.edu/
**department faculty:** Geography Faculty (https://www.geog.illinois.edu/people/)
**overview of college admissions & requirements:** LAS admissions information (https://www.las.illinois.edu/prospective/)
**college website:** https://las.illinois.edu/
**email:** g (geology@illinois.edu) geog@illinois.edu (geography@illinois.edu)

Students interested in majoring in Geography and Geographic Information Science may choose the Bachelor of Arts in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/), or the Bachelor of Science in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/).

Students pursuing the Bachelor of Arts in Liberal Arts & Sciences select one of two concentrations:

**General Geography Concentration** (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/general-geography/)

Geography majors integrate social science, physical science, and technology in their study of how humans use the Earth’s surface. Majors in Geography & GIS can sample courses from different subfields of geography without having to choose one specialty of the discipline.

Upon completion, the students are prepared for diverse employment opportunities, or further studies in a geography graduate program.

**Human Geography Concentration** (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/human-geography/)

The Human Geography concentration allows students to specialize in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences. Employment opportunities for human geographers include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Students pursuing the Bachelor of Science in Liberal Arts & Sciences select one of two concentrations:

**Geographic Information Science Concentration** (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/geographic-information-science/)

The Geographic Information Science (GIS) concentration emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS concentration provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth’s systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

**Physical Geography Concentration** (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/physical-geography/)

The Physical Geography concentration examines the earth sciences including patterns of climates, land-forms, vegetation, soils, and water. Graduates of our physical geography concentration will be equipped for careers in infrastructure development, land and water resources management, and surveying.

**for the degree of Bachelor of Arts in Liberal Arts & Sciences: Major in Geography & Geographic Information Science, General Geography Concentration**

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

**Departmental distinction:** Students majoring in Geography and Geographic Information Science can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- For distinction: 3.3 GPA overall; 3.3 GPA in GGIS courses.
- For high distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses.
- For highest distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses; satisfactorily complete an independent project (GEGG 391).

Students should consult their advisors regarding distinction requirements as soon as they enter the major (no later than the end of their junior year).
General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement. Minimum required major and supporting course work: A minimum of 35 credit hours of Geography and Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Learning Outcomes: Geography & Geographic Information Science, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geography & Geographic Information Science

1. Geographic Understanding
   - Definition: GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.

2. Spatial Patterns and Processes
   - Definition: GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.

Information listed in this catalog is current as of 09/2021
3. Problem-Solving and Communication

- Definition: GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Geology

**department website:** https://www.geology.illinois.edu/
**undergraduate** (https://www.geology.illinois.edu/undergraduate/)
**department faculty:** Geology Faculty (https://www.geology.illinois.edu/directory/faculty/)
**overview of college admissions & requirements:** LAS admissions information (https://www.las.illinois.edu/prospective/)
**college website:** https://las.illinois.edu/
**email:** geology@illinois.edu

Students interested in majoring in geology may choose the Specialized Curriculum in Geology (http://catalog.illinois.edu/undergraduate/las/geology-bs/#degrequirementstext), leading to the Bachelor of Science Major in Geology, or the Geology Major (http://catalog.illinois.edu/undergraduate/las/geology-bs/#degrequirementstext), leading to the Bachelor of Science in Liberal Arts and Sciences.

The Specialized Curriculum in Geology is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology than required. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

### Undergraduate Degree Programs in Geology

**For the Degree of Bachelor of Science in Liberal Arts and Sciences**

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 214)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 215)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 211)

**For the Degree of Bachelor of Science Major in Geology**

### Specialized Curriculum

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

**Departmental Distinction:** Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction:** A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **High Distinction:** A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **Highest Distinction:** A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone

**General Education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Minimum hours required for graduation:** 126 hours.

Additional Technical Requirements

Physics. Select one group of courses:

Mathematics

- MATH 220 Calculus I
- MATH 221 Calculus II
- MATH 225 Introductory Matrix Theory
- MATH 241 Calculus III

CHEM 104 General Chemistry II
CHEM 105 General Chemistry Lab II
or
CHEM 202 Accelerated Chemistry I
CHEM 203 Accelerated Chemistry Lab I
CHEM 204 Accelerated Chemistry II
CHEM 205 Accelerated Chemistry Lab II

45 hours of Geology Courses: ¹

- GEOL 100 History of Life
- GEOL 107 Physical Geology ²
- GEOL 208 History of the Earth System
- GEOL 411 Structural Geol and Tectonics
- GEOL 417 Geol Field Methods, Western US ³
- GEOL 432 Mineralogy and Mineral Optics
- GEOL 436 Petrology and Petrography
- GEOL 440 Sedimentology and Stratigraphy

Select one of the following:

- GEOL 450 Probing the Earth’s Interior
- GEOL 452 Introduction to Geophysics

6 additional hours 300- or 400-level geology

Mathematics ¹³-¹⁵

- MATH 220 Calculus I
- MATH 221 Calculus II
- MATH 225 Introductory Matrix Theory
- MATH 241 Calculus III

Physics. Select one group of courses: ⁸-¹⁰

- PHYS 211 University Physics: Mechanics
- PHYS 212 University Physics: Elec & Mag

or

- PHYS 101 College Physics: Mech & Heat
- PHYS 102 College Physics: E&M & Modern

Additional Technical Requirements ³

Select at least 3 hours from the following:

- IB 103 Introduction to Plant Biology
- IB 104 Animal Biology
- CS 101 Intro Computing: Engrg & Sci
- CS 125 Introduction to Computer Science
- CPSC 440 Applied Statistical Methods I
- STAT 400 Statistics and Probability I
- MATH 285 Intro Differential Equations
- MATH 441 Differential Equations
- PHYS 213 Univ Physics: Thermal Physics
- PHYS 214 Univ Physics: Quantum Physics

¹ Students transferring into the geology concentration from another science or engineering program may substitute up to 8 hours of 300- or 400-level science or engineering credits for 8 hours of 300- or 400-level geology courses with departmental approval.

² Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

³ GEOL 417 is a 6-hour summer field course taught off campus.

Geology: Geophysics, BS

for the degree of Bachelor of Science Major in Geology, Geophysics Concentration (Specialized Curriculum)

department website: https://www.geology.illinois.edu/
dergraduate

department faculty: Geology Faculty (https://www.geology.illinois.edu/people/)

advising: Geology advising (https://www.geology.illinois.edu/cms/One.aspx?portalid=127672&pagelid=258530)

college website: https://las.illinois.edu/
email: geology@illinois.edu

The Specialized Curriculum in Geology (BS) is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor’s degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 214)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 215)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 215)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 210)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 212)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 211)

for the degree of Bachelor of Science Major in Geology, Geophysics Concentration

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The
Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

**Departmental Distinction:** Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction:** A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone.
- **High Distinction:** A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone.
- **Highest Distinction:** A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone.

**General education:** Students must complete the [Campus General Education requirements](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) including the campus general education language requirement.

### Minimum hours required for graduation: 126 hours.

1. Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

2. GEOL 417 is a 6-hour summer field course taught off campus.

Learning Outcomes: Geology, BS

Learning Outcomes for the degree of Bachelor of Science Major in Geology

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes.

2. Students will develop an understanding of the physical, chemical and mathematical theories fundamental to earth processes through rigorous coursework and research.

Information listed in this catalog is current as of 09/2021
3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom, and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological problems.

4. Students will demonstrate the ability to communicate effectively scientific data, interpretations, and hypotheses through written and oral methods.

5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies.

Geology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geology (Sciences & Letters)

department website: https://www.geology.illinois.edu/

overview of college admissions & requirements: Liberal Arts &
Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: geology@illinois.edu

The Sciences and Letters Curriculum in Geology (BSLAS), administered
by the Department of Geology, is designed for students who want
a more flexible course of study than is provided by the Specialized
Curriculum in Geology and Geophysics. It may be used by those wishing
to obtain a more liberal education and/or background in geology for use
in fields such as anthropology, business, mineral economics, regional
planning, journalism, law, sales, or library and information science. It is
not intended to prepare a student for graduate work in the geological
sciences unless the student selects additional courses in mathematics,
chemistry, and physics comparable to those required in the Specialized
Geology and Geophysics Curriculum. Students must choose from the
following: Geology, Earth and Environmental Sciences, or Earth Science
Teaching. The Earth Science Teaching Concentration is designed for
students preparing to teach earth science at the secondary school level.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 214)
- Major in Geology (Sciences and Letters), Earth and Environmental
  Sciences Concentration (p. 215)
- Major in Geology (Sciences and Letters), Earth Science Teaching
  Concentration (p. 215)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 210)
- Major in Geology (Specialized Curriculum), Environmental Geology
  Concentration (p. 212)
- Major in Geology (Specialized Curriculum), Geophysics Concentration
  (p. 211)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in
Geology (Sciences & Letters)

Departmental Distinction: Students majoring in Geology can earn
distinction, high distinction, and highest distinction upon graduation. The
requirements for these awards are:

Distinction: A minimum cumulative grade point average of 3.3, and have
also completed an approved independent study project, approved senior
thesis, or approved capstone

High Distinction: A minimum cumulative grade point average of 3.5, and
have also completed an approved independent study project, approved
senior thesis, or approved capstone

Highest Distinction: A minimum cumulative grade point average of 3.7,
and also completed an approved senior thesis or approved research
capstone

General education: Students must complete the Campus General
Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/)
requirements including the campus general education language
requirement.

Minimum required major and supporting course work: Minimum
required course work normally equates to 47-52 hours including at
least 26 hours in Geology. Twelve hours of 300- and 400-level in
the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Geology: Earth Science Teaching, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geology (Sciences & Letters), Earth Science Teaching Concentration

Notes:
1. Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.
2. An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended.
The Sciences and Letters Curriculum in Geology (BSLAS), administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 214)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 215)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 215)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 210)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 212)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 211)

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- Distinction: A minimum cumulative grade point average of 3.3, and must present evidence of exemplary teaching
- High Distinction: A minimum cumulative grade point average of 3.5, and must present evidence of exemplary teaching
- Highest Distinction: A minimum cumulative grade point average of 3.7, and must present evidence of exemplary teaching

General Education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 55-59 hours in the concentration and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Additional Required Coursework

Teacher Education Minor in Secondary School Teaching (http://catalog.illinois.edu/undergraduate/education/secondary/)

Select one group of courses: 5-6

- ASTR 100 Introduction to Astronomy
- & ASTR 131 and The Solar System Lab
- & ASTR 132 and Stars and Galaxies Lab

or

- ASTR 121 Solar System and Worlds Beyond
- & ASTR 122 and Stars and Galaxies
- ATMS 100 Introduction to Meteorology
- IB 100 Biology in Today's World

Select one group of courses: 4

- CHEM 102 General Chemistry I
- & CHEM 103 and General Chemistry Lab I

or
Learning Outcomes: Geology, BLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Geology (Sciences & Letters)

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes.
2. Students will develop an understanding of the physical, chemical and mathematical theories fundamental to earth processes through rigorous coursework and research.
3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom, and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological problems.
4. Students will demonstrate the ability to communicate effectively scientific data, interpretations, and hypotheses through written and oral methods.
5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies.

Germanic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies

department website: https://www.germanic.illinois.edu
department faculty: Germanic Languages & Literatures Faculty (https://germanic.illinois.edu/directory/faculty/)
advising: German advising (https://germanic.illinois.edu/academics/german/undergraduate-programs/undergraduate-advisor/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: germanic@illinois.edu

The BALAS in Germanic Studies serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, and science. Students must select one concentration in consultation with an adviser:

- German Studies Concentration (http://catalog.illinois.edu/undergraduate/las/germanic-studies-ballas/german-culture-literature/)
- German Business & Commercial Studies Concentration (p. 218)
- Scandinavian Studies Concentration (p. 219)

The Department of German Languages & Literatures also offers a BA in the Teaching of German (p. 422).

5 year BALAS/MA in Germanic Studies

The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Studies and an MA in German. In order to be admitted to this program, student can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their second year, students will need to be in good standing, have finished GER 211 and GER 331, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their third year, students will have to have finished GER 401 and GER 420, have a general GPA of 3.0 and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students’ admission to the 5-year program will be made by the graduate admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the...
BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

5 Year BALAS/MA in German and European Union Studies

The Department of Germanic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in German (including a Scandinavian Studies Concentration) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the standalone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

**Learning Outcomes: Germanic Studies, BALAS**

**Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies**

1. **Language ability:** Students develop and improve their foreign language abilities, i.e. their ability to read, speak, write, and listen in German and/or a modern Scandinavian language in order to work with texts and communicate with others in these languages.

2. **Cultural-historical literacy and knowledge:** Students develop and improve their ability to function in non-native cultural-historical and linguistic contexts and communities in order to respect and navigate cultural differences and build upon similarities. Furthermore, students will synthesize knowledge relevant to broad cultural and linguistic areas within German and/or Scandinavian studies in order to apply that knowledge toward the other learning outcomes outlined here.

3. **Analytical and argumentative skills:** Students develop and improve their abilities to analyze diverse cultural artifacts in order to apply analytical thinking and discursive skills to the construction of sound, supported, factual argumentation rather than merely expression of opinion, completely or in part.

4. **Writing development:** Students will demonstrate and produce well-written, communicative, argumentative, and interpretive texts in German, Swedish, and/or English in order to competently meet diverse writing tasks carried out in any of the relevant languages above. Furthermore, students will be able to carry out various forms of research in support of their writing in order to create more substantive texts, which are also genre appropriate and written for a particular audience.

**5 Year BALAS/MA in Global Studies and European Union Studies**

The Program in Global Studies with the European Union Center offers a 5-year BALAS/MA degree program in Global Studies and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

**for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies**

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

**Departmental distinction:** The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who successfully completes 3 hours of GLBL 494 or other approved research
methods course and who completes a distinction research project. See the departmental academic advisor for details.

**General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 51-52 hours and includes a semester-long full time study abroad program and a minimum of 12 hours of 300- and 400-level courses.

**Minimum hours required for graduation:** 120 hours.

**Learning Outcomes: Global Studies, BALAS**

Learning outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies

**Student Learning Outcomes:** LAS Global Studies strongly supports the campus-wide Student Learning Outcomes as recognized by the Office of the Provost Committee on Student Learning Outcomes. Global Studies majors will be able to:

1. Global Consciousness is not only our most important learning outcome, it is one that we extend beyond its definition in the 2017 SLOs.
   a. Our majors will discover how complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions
   b. Beyond that however, they will have developed new skills in in how to research these interconnections
   c. Required advanced language acquisition and study abroad are indispensable in developing global consciousness.

2. Creative Inquiry and Discovery is a learning outcome we continue to give an increasing emphasis.
   a. Our majors will apply knowledge to promote inquiry, discover solutions, and generate new ideas and creative works and beyond that an increasing number will also conduct their own research.

3. Intellectual Reasoning and Knowledge is produced not only through courses but also through study abroad programs.

4. Gain Social Awareness and Cultural Understanding as a learning outcome is secured through intensive experiential, cross-cultural learning through coursework, advanced language study and study abroad.
   a. Study abroad and advanced language acquisition will foster cultural and linguistic immersion, community engagement, intercultural competency and creative inquiry.
   b. Experiential learning can take place in local, national and global settings.
   c. All of these are crucial in developing a critical and reflective orientation toward such social and cultural differences as race, indigeneity, gender, class, sexuality, language, and disability.

5. Effective Leadership and Community Engagement are important skills our students acquire through developing their ability to make deliberate and independent choices about their intellectual and professional trajectories and through combining coursework and
experiential learning with the pursuit of leadership opportunities (such as the Global Studies Leaders), fieldwork, RSO engagement, volunteer opportunities, and internships with governmental and non-governmental organizations.

**Graphic Design, BFA**

| overview of college admissions & requirements: Fine & Applied Arts (http://catalog.illinois.edu/faa/) |
| college website: https://faa.illinois.edu/ |

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, advanced interaction design, and the design of Ninth Letter (http://www.ninthletter.com/), a nationally-distributed and award-winning literary arts journal.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Graphic Design, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Graphic Design

1. A deep understanding of effective typography and image relationships as used in the graphic design discipline.
2. Ability to realize an idea through an iterative creative making process of refinement.
3. Skills to see, research, organize, and visualize abstract ideas across multiple media.
4. Ability to use and embrace the research methods, frameworks, tools, technologies, and techniques of the graphic design discipline as it evolves.
5. Ability to apply knowledge of perception, cognition, and embodiment.
6. An understanding of the diverse professional, social, and ethical impacts of the graphic design discipline.
7. Understanding the use of tools and technology, including their roles in the creation, reproduction, and distribution of visual messages.

History of Art, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

department website: Art History information (http://www.art.illinois.edu/index.php/prospective/academics/undergraduate-programs/art-history/)
advising information: LAS Advising site (http://las.illinois.edu/students/advising/declared/)
department faculty: Art History Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

The Program in Art History is unique at the University of Illinois, Urbana-Champaign. Though housed in the School of Art and Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Arts degree in the History of Art from the College of Liberal Arts and Sciences. The College of Liberal Arts and Sciences administers admission to the major in the History or Art; however, the Program in Art History advises all History of Art majors.

The curriculum in the History of Art requires 120 credit hours and offers a broad historical and cultural education related to the visual and built world. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Studying History at the University of Illinois, Urbana-Champaign will prepare you for informed participation in public life and wide array of career paths, including in law, government, public policy, business, filmmaking, teaching, advertising, public relations, social work, the media, publishing, diplomacy, and military intelligence. The requirement that every Illinois History major successfully complete a work of original historical research means that our graduates have a demonstrated capacity to think contextually, locate and analyze evidence, evaluate competing viewpoints, assess causation, offer new interpretations, and solve complex problems.

for the degree of Bachelor or Arts in Liberal Arts and Sciences Major in History

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498, HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major course work: 36 hours of History courses.

<table>
<thead>
<tr>

<td>Hours of history electives (at the 200-level or above). NOTE: HIST 200 and HIST 498 are required. HIST 200 and HIST 498 may count toward any of the area requirements or the 12 hours of History electives. For those students in the Honors Program, HIST 490 or HIST 493 may count toward any of the area requirements or the 12 hours of History electives. HIST 492 and HIST 499 must be taken as part of the 12 hours of required History electives.</td>
<td>12</td>
</tr>
</tbody>
</table>

Of the 36 hours of History courses, students must take 6 hours in a pre-modern period, one defined as before 1800 and one defined as before 1800 (HIST 100 and HIST 142 may not be used to fulfill this requirement). 1

Total Hours required for graduation | 120 |

1 Chosen from the list maintained in the Department of History
2 Eighteen advanced hours (300- and 400-level) of History courses are required in the major. 12 of those 18 advanced hours must be taken on this campus.

History: Social Science: History Teaching, BALAS

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

Information listed in this catalog is current as of 09/2021
This concentration fulfills state certification requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, but some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

This concentration fulfills state certification requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies, but when following the new requirements effective Fall 2020, the expected completion time is 8 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498, HIST 492 and successful completion of either

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR

2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490) (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Students are required to take a minimum of 33 hours in History courses. Only one of the following Advanced Composition courses (HIST 140, HIST 143, HIST 170, HIST 173) will count toward the 33 hours required in History courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours). Minimum hours required for graduation: 120 hours.

Learning outcomes for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

**Learning Outcomes: History, BALAS**

Learning outcomes for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

1. **Historical interpretation:**
   a. Students will be able to connect past and present, demonstrating an understanding of ways that the past has shaped the world we live in today
   b. Students will be able to grasp the complexity of historical causation
   c. Students will have a broad and empathetic understanding of the commonalities and differences of the human experience, as influenced by factors such as culture, race, ethnicity, gender, and class in a matrix of time and place
   d. Students will be able to critically assess different sources of information and points of view

2. **Historical research:**
   a. Students will be able to formulate historical questions
   b. Students will be able to locate, organize, analyze, and synthesize data to answer these questions
   c. Students will be able to craft original historical arguments
   d. Students will be able to position these arguments contextually

3. **Historical communication:**
   a. Students will be able to express their ideas clearly, logically, and in evidence-based ways
   b. Students will be able to convey their ideas to different audiences
   c. Students will be able to evaluate, review, and edit historical writing and other forms of historical communication

*overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)

*college website: https://aces.illinois.edu/*

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as pediatric services in hospitals, medicine and allied health fields, marriage and family therapy, family law, human resources, child care services, family life education, social work, counseling, human services, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, and relationship and family science, such as intimate relationships, parent-child interaction, and family stress and change. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students develop an individualized plan within this major according to their career and professional interests.

Human Development & Family Studies: Family Studies, BS

for the degree of Bachelor of Science Major in Human Development & Family Studies, Family Studies Concentration

department website: https://hdfs.illinois.edu/
department faculty: Human Development & Family Studies Faculty (https://hdfs.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/)
college website: https://aces.illinois.edu/
**This concentration will no longer accept students:**  
**Spring 2022**

see Human Development & Family Studies, BS (p. 227)

Students in the Family Studies concentration focus on how families operate, develop, and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage stress and become resilient. Graduates with this concentration are qualified to provide many services to families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including, marriage and family therapy, social work, policy specialist, psychology, family law, medicine, or human resources.

Information listed in this catalog is current as of 09/2021
Learning Outcomes: Human Development & Family Studies, BS

Learning outcomes for the Bachelor of Science Major in Human Development & Family Studies

1. HDFS students will demonstrate a strong foundation in theories and empirical knowledge associated with human development and family studies (i.e., developmental periods and domains; socialization contexts; diversity among families and children; research methods; family dynamics, transitions, and resilience; and family policy)
   a. Recall key terminology (theoretical, empirical, methodological, substantive concepts)
   b. Describe current and historical challenges affecting individuals and families (e.g., social, political, economic, cultural, ethical, including research ethics)
   c. Summarize key theories, models, and principles (e.g., grand, disciplinary, substantive, methodological)
   d. Apply theories, models, and principles to developmental, relationship, familial, and social issues
   e. Apply knowledge to global contexts
   f. Integrate knowledge across courses and content areas (i.e., human development and family studies; lower level to higher level courses)
   g. Critique current theoretical and empirical knowledge of and methodological approaches to studying human development, relationships, and families
   h. Critically evaluate the quality of published research, programs, and policies and their implications for individuals, relationships, and families

2. HDFS students will exhibit the skills necessary to effectively apply knowledge and generate new ideas to solve real world issues
   a. Use effective written communication
   b. Use e to achieve group goals
   c. Apply research-based knowledge to working with children, families, and communities and/or agencies that serve them

3. HDFS students will demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion
   a. Describe the historical and current relevance of diversity and inclusion to individuals, relationships, families, and communities
   b. Reflect on one’s own interconnected positions, privileges, and disadvantages across multiple contexts
   c. Critically examine one’s own beliefs, assumptions, values, attitudes, and biases
   d. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one’s own work (e.g., written and oral communication)
   e. Critically evaluate the cultural respectfulness and appropriateness of research, programs, and policies related to human development and families
   f. Critically evaluate the potential impact of research, programs, and policies on diversity and inclusion
   g. Demonstrate awareness of global factors (e.g., economic, political, cultural, social) and how they may affect individuals, families and communities

4. HDFS students will develop professional competence skills and establish well-informed career and professional goals
   a. Identify and compare/contrast a range of career options for HDFS majors
   b. Create professional/job-related materials (e.g., resume, cover letter, purpose statement)
   c. Connect discipline knowledge to personal and professional life
   d. Develop leadership skills (e.g., through formal positions; informal mentoring to prospective/new students; representing the department; participation in class teamwork)
   e. Develop professional connections to support career and professional goals (e.g., relationships with professors, internship supervisors who can serve as references; connections to professionals through attending conferences/workshops or engaging with guest speakers in class)
      i. Make decisions appropriate grammar and writing mechanics
      ii. Demonstrate a working knowledge of APA style
      iii. Respond to constructive criticism (e.g., revision process, peer review)
   f. Use effective oral communication (e.g., clearly and logically present ideas aloud through presentation to class or group)
   g. Apply knowledge to formulate and investigate hypotheses or research questions
   h. Apply knowledge to propose or create research-based programs or policies
      i. Critically evaluate the quality of published research, programs, and policies and their implications for individuals, relationships, and families
   j. Collaborate and solve problems
      i. Independently
      ii. Collaboratively
   k. Exhibit professional and ethical behavior

Individual Plans of Study, BALAS or BSLAS

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences Major in Individual Plans of Study

academic advisor: Tenaya Reifsteck
program address: 2002 Lincoln Hall, 702 S. Wright St., Urbana, IL 61801
program information: http://www.las.illinois.edu/students/programs/majors/ips/
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/email: las-ips@illinois.edu

Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.
A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must

1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the IPS advisory committee.

Further information on requirements for graduation with distinction may be obtained from the secretary of the IPS advisory committee.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major-the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Cinematography, Entomology, Neuroscience, Meteorology, and Middle Eastern Studies.

The development of an IPS program begins with the student's perception that a more appropriate field of study could exist beyond the present majors. Consultation with the secretary of the IPS advisory committee and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the IPS advisory committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The IPS Advisory Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student's junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

The industrial design program focuses on a human centered approach to identify opportunities to design new products and services. The studio courses emphasize learning through problem-solving, understanding user experience, market demand, materials, and production processes. Students can develop their interest, and engage in creating intuitive, innovative products and services, that are in visual harmony with their environment. Designs that satisfy the consumer desire while being responsive to changes in technology and culture benefit society.

The curriculum in Industrial Design requires 122 credit hours.

*for the degree of Bachelor of Fine Arts Major in Industrial Design*

---

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

### Learning Outcomes: Industrial Design, BFA

Learning outcomes for the degree of Bachelor of Fine Arts Major in Industrial Design

1. **Research**...the ability to select and use appropriate research and experimental methods, to access existing data sources or to generate new data, to analyze and draw insights for future work, with particular emphasis on identifying human needs
2. **Creative synthesis**...the ability to produce creative proposals from investigation, or in response to identified opportunities or requirements, using appropriate thinking, modeling and making strategies, taking account of users, audience, market needs, makers, producers or exhibitors as appropriate
3. **Production**...the ability to select and use appropriate making and manufacturing processes in your own work, with an understanding of the potential of new technologies
4. **Organization**...the ability to plan and implement action, identifying targets and organizing resources, effectively managing self and collaborations with others
5. **Communication**...the ability to use various forms of communication as appropriate to elicit information, to explain, to debate and persuade, adapting to audience and situations
6. **Conceptualization**...the ability to realize an idea through an iterative creative making process of refinement
7. **Understanding impacts**...of the diverse professional, social, and ethical effects of the industrial design discipline
8. **Contextualization**...the ability to understand the multiple contexts of design practice, including the historical, theoretical, critical, professional, cultural, environmental and technological
9. **Learning**...the ability to carry out independent learning as a basis for academic study, lifelong learning and for personal professional development including the ability to independently evaluate your own work with the aim of improving and developing your own practice

**Industrial Engineering, BS**

for the degree of Bachelor of Science in Industrial Engineering

- **Department website**: [https://ise.illinois.edu](https://ise.illinois.edu)
- **Department faculty**: [Industrial & Enterprise Systems Faculty](https://ise.illinois.edu/directory/faculty.html)
- **Overview of college admissions & requirements**: [The Grainger College of Engineering](https://grainger.illinois.edu/admissions/)
- **College website**: [https://grainger.illinois.edu/](https://grainger.illinois.edu/)

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from production management to process control. Industrial engineers design efficient, productive systems in a wide range of business, industrial, and governmental settings.

The technical portion of the Industrial Engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student’s first year is spent mastering the basics of science; math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. During their senior year, students broaden and deepen their knowledge with additional technical elective courses. Finally, all students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.
Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0
TGPA is required for required Engineering and Technical Elective courses, as well as MATH 415. See Technical GPA to clarify requirements.

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition courses required for this degree are listed below.

Optional Health Focus

CHLH 470  Technology, Health, and Aging     3 or 4

**Industrial Engineering Fundamentals (IEF)**

Track Core - Complete the following 4 courses:

IE 330  Industrial Quality Control          3
IE 411  Optimization of Large Systems       3 or 4
IE 412  OR Models for Mfg Systems           3 or 4
IE 340  Human Factors                       4

**Operations Research (OR)**

Track Core - Complete the following 2 courses:

IE 410  Advanced Topics in Stochastic Processes & Applications 3 or 4
IE 411  Optimization of Large Systems         3 or 4

**ECE Electives** - Complete 2 of the following courses:

ECE 490  Introduction to Optimization        3 or 4
IE 420  Financial Engineering                3 or 4
MATH 444  Elementary Real Analysis          3-4
or MATH 447  Real Variables                  3-4
MATH 484  Nonlinear Programming              3 or 4
SE 411  Reliability Engineering             3 or 4
STAT 410  Statistics and Probability II     3-4
or MATH 464  Statistics and Probability II  3-4
STAT 420/ASRM 450  Methods of Applied Statistics 3 or 4
STAT 424  Analysis of Variance              3 or 4
STAT 425  Statistical Modeling I            3 or 4

**Quality Engineering (QE)**

Track Core - Complete the following course:

IE 330  Industrial Quality Control          3

Track Core - Complete 1 of the following courses:

IE 431  Design for Six Sigma                3
SE 411  Reliability Engineering             3 or 4

Track Elective - Complete 1 of the following courses:

STAT 410  Statistics and Probability II     3-4
or MATH 464  Statistics and Probability II  3-4
STAT 420/ASRM 450  Methods of Applied Statistics 3 or 4
STAT 424  Analysis of Variance              3 or 4
STAT 426  Statistical Modeling II           3 or 4

**Supply Chain, Manufacturing and Logistics (SC&L)**

Track Core - Complete the following course:

IE 412  OR Models for Mfg Systems            3 or 4

Track Electives - Complete 3 of the following courses:

ECE 470  Introduction to Robotics            4
IE 330  Industrial Quality Control          3
ME 451  Computer-Aided Mfg Systems           3 or 4

**Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.**

**Total Hours of Curriculum to Graduate**

128

1 External transfer students take ENG 300 instead.
2 MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3 Advanced Composition satisfied by completing the combination of SE 494 and SE 495.
4 The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
5 The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements#DegreeRequirements-FreeElectives).

for the degree of Bachelor of Science in Industrial Engineering

**Suggested Sequence**

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to
achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/industrial-engineering-map/).

---

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). SE 101 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. Selected from the departmentally approved list of IE Technical Electives (https://ise.illinois.edu/undergraduate/electives.html#ie)
5. Selected from the departmentally approved lists of Track Option Electives (https://ise.illinois.edu/undergraduate/industrial-engineering-degree/industrial-engineering-track-options.html) or by petition to the department.
6. SE 494 and SE 495 may be taken in the first or second semester of the fourth year as authorized. The alternative is a free elective.

---

Information listed in this catalog is current as of 09/2021
The Bachelor of Science in Information Sciences prepares students for a wide range of careers within the knowledge economy. In today’s technology-centered job market, there is a high demand for information professionals. By earning a B.S. in Information Sciences (BS/IS) from the School of Information Sciences (iSchool), you will gain a competitive edge. Our interdisciplinary, STEM-designated degree will prepare students for careers in a variety of fields. As a BS/IS student, you’ll learn how to manage data and other types of information to help organizations achieve their goals. You will become an information technology expert who understands the human perspective, social context, and policy implications.

**Learning Outcomes: Industrial Engineering, BS**

Learning Outcomes for the degree of Bachelor of Science Major in Industrial Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Industrial Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Departmental Distinction:** The top 10% of the graduating class will graduate with distinction.

For the Degree of Bachelor of Science in Information Sciences

**Minimum required major and supporting course work:** Students must earn at least 51 hours in the School of Information Sciences or in approved courses offered by other departments, approved by an IS advisor. Twelve hours of 300/400 level (advanced) courses in Information Sciences (IS) must be taken on this campus.

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

**Minimum required major and supporting course work:** Students must earn at least 51 hours in the School of Information Sciences or in approved courses offered by other departments. Students must demonstrate proficiency in at least one programming language.

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

**GPA Requirement:** 2.5 - Earn a cumulative grade point average of 2.50 (A = 4.00) in all courses presented for the degree and a cumulative 2.50 grade point average for all courses taken in the School.

Information Systems, BS

*for the degree of Bachelor of Science Major in Information Systems*

**Overview of College Admissions & Requirements**: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)  
**College Website**: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

The Information Systems major prepares students to comfortably navigate through the challenges posed by the new-age organizations and society that are increasingly getting digitized.

Students learn about the design, implementation, and protection of systems and technology to address the information processing needs of an organization, and provide data and information for managerial decision-making. IS majors take both, technology and business courses which equip them with the required skill-set to be able to design, develop and deploy computer and software-based solutions in order to help businesses attain their tactical and strategic objectives.

Some of the key courses taken by IS majors include information technology for networked organizations, systems analysis and design, and database management. Because computers and software are used in all functional areas of business today, IS majors may choose to take additional courses in data analytics, information security/cyber-security, project management, human-computer interaction, programming, and social media applications to strengthen their resume, gain a wider exposure to domains supported by IS specialists, and prepare themselves to face the challenges in the technology-driven business world of today. IS majors will have the required knowledge and skill-set to make decisions about the selection and implementation of information systems/information technology, be a liaison between non-technical managers, computer programmers, and technical managers, assume a wide variety of roles requiring computer-based solutions, and generally be business leaders of the digital era.

*for the degree of Bachelor of Science Major in Information Systems*

**Core Curriculum**

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

**Minimum Hours Required for Graduation**: 124 hours.

Learning Outcomes: Information Systems, BS

Learning Outcomes for the degree of Bachelor of Science in Information Systems

1. Develop an understanding of fundamental concepts and key principles in the area of Management Information Systems.
2. The ability to analyze managerial and organizational issues, apply relevant knowledge to come up with solutions, and make recommendations.
3. The ability to use knowledge and skills related to digital technologies to enhance business administration and decision making.
4. The ability to collaborate as a team member in varying roles in a diverse group and communicate effectively.

Innovation, Leadership & Engineering Entrepreneurship (ILEE), BS

For the degree of Bachelor of Science in Innovation, Leadership & Engineering Entrepreneurship

Center website: http://www.tec.illinois.edu
College website: https://grainger.illinois.edu/
Overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)

The Technology Entrepreneur Center offers studies leading to the Bachelor of Science in Innovation, Leadership and Engineering Entrepreneurship (ILEE). The BS in ILEE degree is intended for Grainger Engineering students to better understand the innovative processes involved in identifying problems and creating, developing, and leading efforts to provide their engineering solutions. The curriculum is based on a sound disciplinary engineering technical core with additional aspects of problem identification and innovation, and complex multidisciplinary engineering project management and leadership.

Currently, the BS in ILEE degree is only being offered as a dual degree for current Grainger Engineering students and Chemical Engineering students.

Students should follow their Grainger Engineering primary/first department’s curriculum and take the additional 31 hours of ILEE Orientation and Technical Core.
Overview of Curricular Requirements

The curriculum requires 128 hours for graduation from student's Grainger Engineering primary/first department curriculum and take 31 additional hours of ILEE Technical core (total: 159 credit hours).

The Integrative Biology major provides students with a solid preparation in genetics, evolution, anatomy, physiology, ecology, and molecular biology. After completion of the foundational 100- and core 200-300-level courses in IB, students complete the required advanced coursework by taking a variety of IB and other courses or focusing on a limited area of IB. Plans for the student’s combination of advanced courses are developed in consultation with an adviser.

All undergraduates in this field are required to have a strong background in the biological and physical sciences.

Students pursuing a degree in Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

For students interested in adding licensure to the BSLAS in Integrative Biology, please visit the Biology Teaching page: [http://sib.illinois.edu/undergraduate/programs/teaching](http://sib.illinois.edu/undergraduate/programs/teaching)
for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Integrative Biology

**Distinction for Excellence in Research:** To be eligible for graduation with Distinction for excellence in Research a student must:
- Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester.
- Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
- Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
- Give a poster presentation at the Undergraduate Research Symposium or other approved venue.
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor.
- Distinction will be determined by the SIB Distinction Committee based on the poster presentation and the Advisor's evaluation.

**High or Highest Distinction for Excellence in Research:** To be eligible for graduation with High or Highest Distinction for Excellence in Research a student must:
- Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester.
- Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
- Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
- Submit a written thesis and give an oral presentation at the Undergraduate Research Symposium or other approved venue.
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor.
- The level of Distinction will be determined by the SIB Distinction Committee based on the written thesis, the oral presentation, and the Advisor's evaluation.

For additional information visit: http://sib.illinois.edu/undergraduate/distinction/

**General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 66-76 hours.

Minimum hours required for graduation: 120 hours.

At least 14 hours of coursework from the Approved List of Advanced Courses (http://sib.illinois.edu/courses/area/) for IB majors, including:

**At least one course from two of the following three areas:**

- **Area I:** Organismal and Evolutionary Biology
- **Area II:** Behavior, Ecology, and the Environment
- **Area III:** Integrative Anatomy, Physiology, and Molecular Biology

One advanced course with a laboratory and/or field component.

1. The Biocalculus section of MATH 220 is strongly recommended for IB Majors.
2. IB 202 requires animal dissection and no equivalent alternative is available. IB majors are required to enroll in the 4-hour version of this course.
3. IB majors are required to enroll in the 4-hour version of IB 204.

**Learning Outcomes: Integrative Biology, BSLAS**

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Integrative Biology

By the time they graduate, an Integrative Biology major should:

**Content-related understandings**

1. Possess a significant knowledge base in Integrative Biology, including but not limited to:
   a. Structure and function
   b. Ecology
   c. Genetics
   d. Evolution
   e. Molecular biology
   f. Statistical inference

2. Understand that biology is integrative and multidisciplinary

3. Show curiosity and caring about biology, and an awareness of and appreciation for the diversity of life

Information listed in this catalog is current as of 09/2021
4. Understand how paradigms of biology relate to society and policy as well as their own lives

**Competencies**

1. Carry out the process of scientific inquiry
2. Use critical thinking skills and solve problems
3. Use quantitative reasoning and computation skills
4. Apply simple models (equations/math) to biological phenomena
5. Gain proficiency in scientific writing and speaking
6. Read and evaluate primary scientific literature
7. Critically evaluate science-related news and information
8. Work collaboratively

Honors Integrative Biology is designed for superior students wishing to pursue an intensive program in integrative biology and, concurrently, to gain a strong background in the physical sciences and mathematics. Admission is by interview in spring of the freshman year prior to registration for fall. An overall 3.0 GPA is required to apply for admission. Honors Integrative Biology provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors.

Students earning the Honors Integrative Biology Concentration will also earn the Chemistry minor.

Students pursuing a degree in Honors Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Honors Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Substitutions or other changes in the requirements below may be made only by petition to and approval of the director of the Honors Integrative Biology Concentration.

---

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Integrative Biology, Honors Integrative Biology Concentration*

**Distinction for Excellence in Research:** To be eligible for graduation with Distinction for excellence in Research a student must:
- Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester.
- Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
- Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
- Give a poster presentation at the Undergraduate Research Symposium or other approved venue.
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor. Distinction will be determined by the SIB Distinction Committee based on the poster presentation and the Advisor’s evaluation.

**High or Highest Distinction for Excellence in Research:** To be eligible for graduation with High or Highest Distinction for Excellence in Research a student must:
- Complete 2 or more semesters of IB 390 or IB 490 for 2 credit hours or more each semester. Be signed up for IB 490 prior to or during the semester the student is being considered for Distinction.
- Maintain a minimum 3.25 GPA within the major at the end of the penultimate semester.
- Submit a written thesis and give an oral presentation at the Undergraduate Research Symposium or other approved venue.
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor.
- The level of Distinction will be determined by the SIB Distinction Committee based on the written thesis, the oral presentation, and the Advisor’s evaluation.

For additional information visit: [http://sib.illinois.edu/undergraduate/distinction](http://sib.illinois.edu/undergraduate/distinction)

**General education:** Students must complete the Campus General Education ([https://courses.illinois.edu/gened/DEFAULT/DEFAULT/](https://courses.illinois.edu/gened/DEFAULT/DEFAULT/)) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Normally equates to 80-91 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

- **No more than 8 hours of credit in 100-level courses in IB or MCB may be counted toward graduation.**
- **Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.**

**Minimum hours required for graduation:** 120 hours.

By graduation we want all Integrative Biology Honors students to have acquired:

| Learning Outcomes: Honors Integrative Biology, BSLAS |

| Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Integrative Biology, Honors Integrative Biology Concentration |

1. Possess a significant knowledge base in Integrative Biology and Chemical Sciences, including but not limited to:
   a. Molecular genetics and biology
   b. Diversity and structures and physiological functions of plants and animals
   c. Ecology and evolution
   d. Biochemical and chemical bases of life and/or systems
   e. Statistical inference and modeling of systems
2. Understand that biology is integrative and multidisciplinary
3. Show curiosity and caring about biology, and an awareness of and appreciation for the diversity of life
4. Understand how paradigms of biology relate to society and policy as well as their own lives

**Competencies**

1. Carry out the process of scientific inquiry
2. Use critical thinking skills and solve problems
3. Use quantitative reasoning and computation skills
4. Apply models (equations/math) to biological phenomena
5. Gain proficiency in scientific writing and speaking
6. Read and evaluate primary scientific literature
7. Critically evaluate science-related news and information
8. Work collaboratively

**Interdisciplinary Health Sciences, BS**

for the degree of Bachelor of Science Major in Interdisciplinary Health Sciences

**Department website:** [http://ihealth.illinois.edu/](http://ihealth.illinois.edu/)
**Department faculty:** I-Health Faculty and Staff ([https://ahs.illinois.edu/ihealth-directory/](https://ahs.illinois.edu/ihealth-directory/))
**College catalog page:** [Applied Health Sciences Catalog](http://catalog.illinois.edu/) p. 1187
**College website:** [http://www.ahs.illinois.edu/](http://www.ahs.illinois.edu/)

The Interdisciplinary Health Sciences, BS degree program includes a set of three concentrations, of which a student must complete at least one:

- Health & Aging Concentration (p. 243)
- Health Behavior Change Concentration (p. 244)
- Health Diversity Concentration ([http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/](http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/))

### Learning Outcomes: Interdisciplinary Health Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Interdisciplinary Health Sciences

1. Students will understand the influence of behavior and culture on health and well-being.
2. Students will gain a comprehensive and holistic perspective of health which will prepare them to enter a variety of health related careers.
3. Students will apply health-related knowledge through community service and experientially-based opportunities.
4. Students will be able to identify various health determinants in order to improve equity and access for vulnerable populations.

### Interdisciplinary Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies

Information listed in this catalog is current as of 09/2021
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

Students pursuing this major select one of two concentrations:

- Jewish Studies Concentration (p. 247)
- Medieval Studies Concentration (http://catalog.illinois.edu/undergraduate/las/academic-units/interdisc-studies/medieval-civilization-concentration/)

Requirements

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the concentration requirements; at least 25 hours must be at the 200, 300 or 400 level.

Interdisciplinary Studies: Jewish Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Jewish Studies Concentration

program website: https://jewishculture.illinois.edu/
program faculty: Jewish Culture & Society Faculty (https://jewishculture.illinois.edu/directory/affiliate-faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

The Program in Jewish Culture & Society (https://jewishculture.illinois.edu/) sponsors this concentration. This concentration provides the student with knowledge of the Hebrew language, the opportunity to begin a study of Yiddish, and a broad appreciation of Jewish religion, culture, and history.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Jewish Studies Concentration

All substitutions must be approved by the Advisor in the Program in Jewish Culture and Society Office (https://jewishculture.illinois.edu/academics/undergraduate/jewish-studies-major/). Substitution for specific courses listed will be approved by the concentration advisor only in exceptional cases.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction: To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 45-51 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

One course at the 100 or 200 level from each of the following clusters in the Jewish Studies Minor: Religion, Culture, and History. List maintained by the Advisor in the Program in Jewish Culture and Society Office.

Three courses at the 300 level or above from any of the four clusters in the Jewish Studies Minor: Religion, Culture, History, and Language. List maintained by the Advisor in the Program in Jewish Culture and Society Office.

Interdisciplinary Studies: Medieval Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Medieval Studies Concentration

Information listed in this catalog is current as of 09/2021
program website: http://www.medieval.illinois.edu/education/undergrad/
program faculty: Medieval Studies Faculty (http://www.medieval.illinois.edu/people/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: medievalstudies@illinois.edu

The Program in Medieval Studies (http://www.medieval.illinois.edu/education/undergrad/) sponsors this concentration.

This concentration introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographic regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; (III) advanced medieval coursework selected by the student in consultation with a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a diverse range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study in Medieval Studies should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Substitution for specific courses listed below will be approved by the concentration advisor only in exceptional cases.

Departmental distinction: To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction: To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

Medieval Studies Concentration Requirements
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: Normally equates to 45-51 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours.

5 Year BALAS /MA in Italian and European Union Studies

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in Italian and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS—granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Italian

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Supporting course work or a minor chosen in consultation with an adviser, in one related area (or a combination, with no fewer than 8 hours in each). Areas may include, for example, any other language and literature, history, political science, biology (premed), international law (prelaw), economics, finance, business administration, education, architecture, fine arts, journalism.

1 A minor consists of 16-21 hours.

Italian, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Italian

- **department website**: https://frit.illinois.edu/academics/italian/undergraduate-studies
- **department faculty**: French & Italian Faculty (https://frit.illinois.edu/directory/faculty/)
- **advising**: French & Italian advising (https://frit.illinois.edu/academics/advising/)
- **overview of college admissions & requirements**: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
- **college website**: https://las.illinois.edu/
- **email**: french-italian@illinois.edu

**Undergraduate degree programs in French & Italian:**

French, BALAS (p. 201)

Teaching of French, BA (p. 421)

Italian, BALAS (p. 249)
Learning Outcomes: Italian, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Italian

Upon graduating with a major in Italian, students shall be able to do the following:

1. **Language proficiency and accuracy**: reach proficiency and accuracy in written and oral comprehension and production of Italian (based on proficiency guidelines outlined by the American Council on the Teaching of Foreign Languages [ACTFL] and the Common European Framework of Reference for Languages [CEFR]).

2. **Research skills and literacy in text, media, and technology in Italian**: access, manage, evaluate, and effectively use culturally relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content; develop sensitivity to the changes in cultures and languages produced by emerging technologies.

3. **Intercultural awareness, knowledge, and competence**: develop an awareness of differences between Italian and their own cultures. Identify implicit assumptions present in Italian linguistic practices and relate them to their own cultural conventions. Learn how to identify the cultural component of everyday practices, from food to body language, and recognize difference as culturally specific.

4. **Proficiency in Italian Literature and Culture**: acquire familiarity with Italian literature and culture, their history and their contexts, as well as the critical tools used in their analysis.

5. **Competence in Italian linguistics**: acquire competence in the structure and history of the Italian language.

**Journalism, BS**

*for the degree of Bachelor of Science Major in Journalism*

**department website**: https://media.illinois.edu/journalism

**department faculty**: https://media.illinois.edu/journalism/faculty

**department email**: journ@illinois.edu

**overview of college admissions & requirements**: College of Media (p. 1198)

**college website**: https://media.illinois.edu/

JOURNALISM (JOUR), prepares students for exciting and fulfilling careers in broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

### Learning Outcomes: Journalism, BS

Learning outcomes for the degree of Bachelor of Science Major in Journalism

Student Learning Outcomes are adapted from requirements of the accrediting body for the Department of Journalism (ACEJMC)

1. Understand and apply principles and laws related to media and freedom of information
2. Write correctly and clearly in appropriate forms and styles
3. Apply basic numerical and statistical concepts
4. Apply current tools and technologies appropriate for the communications profession and to understand the digital world.
5. Demonstrate understanding of the history of journalism development and the role of professionals and institutions in shaping communications
6. Demonstrate an understanding of journalism ethical principles
7. Demonstrate understanding of diversity, both domestic and global
8. Understand concepts and apply theories in the use and presentation of images
9. Conduct research and evaluate information by methods appropriate to the profession
10. Demonstrate an ability to think critically and evaluate their own work and that of others
11. Document professional practice through internships, student media and other publication of student work.

- **joint degree:** Community Health, BS and Public Health, MPH (p. 118)
- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 465)

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student’s area of concentration within Kinesiology.

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses...
on exercise stress, movement efficiency, and fitness; the social, cultural,
and psychological aspects of participation in physical activity and sport;
coordination, control, and skill of physical activity; physical growth,
development, and body form throughout the lifespan; the effects of
therapeutic techniques of Kinesiology upon recovery from physical injury;
and the instructional process of teaching/coaching of physical activity
and sport.

The curriculum combines a comprehensive liberal arts and sciences
education with in-depth study in a particular area of interest. The program
of study provides knowledge and understanding essential for human
movement and sport careers in either public or private agencies. The
hours required for graduation include prescribed courses for all students
as well as requirements determined by the various areas of emphasis
selected by the student. Teaching and research emphasize hands-
on learning through the use of technology and modern laboratory
equipment. Graduates find employment in a variety of fields including
teaching, corporate fitness, coaching, and athletic training. Many
students continue their education and become physical therapists,
physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring
in Community Health, I-Health, or Kinesiology. Students apply for
the program in the latter part of their third year (junior year) of study.
Students accepted into the BS MPH joint degree program take 12 credit
hours of coursework in their senior year that apply to both BS and MPH
degrees. In the 5th year of study, students complete the remaining
requirements for the MPH degree, and graduate simultaneously with both
BS and MPH degrees. The requirements are explained in more detail on
the MPH program website: http://www.mph.illinois.edu/Program/

Requirements Including General
Education

The Kinesiology Program requires that General Education requirements
must be selected from the Campus General Education course list. The
prescribed courses prepare the student for upper division study and may
be used to satisfy General Education requirements provided they are
on the appropriate General Education list. Specifically required General
Education courses are listed below.

- **joint degree:** Kinesiology, BS and Public Health, MPH (p. 465)

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

#### Learning Outcomes: Kinesiology, BS

**Learning outcomes for the Bachelor of Science Major in Kinesiology**

1. **Content Knowledge:** Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.
2. **Critical Thinking and Discovery:** Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.
3. **Awareness and Understanding:** Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.
4. **Programming and Assessment:** Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.
5. **Leadership and Engagement:** Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

The department’s administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The department also has a studio located in Mumford Hall.
for the degree of Bachelor of Landscape Architecture

A student must have and maintain a minimum 2.00 cumulative grade point average.

University of Illinois transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.0 (A = 4.0). Transfer students from other institutions must have earned a GPA of at least 2.5 (A = 4.0). Prerequisite credits in composition and pre-calculus or introductory statistics are required. Courses in physical geography and plant or environmental biology are highly recommended.

- LA 335 Community Open Space Studio 5
- LA 342 Site Engineering 4
- HORT 301 2
- LA 346 Professional Practice 2

Semester Hours 11

**Second Semester**

- LA 336 Design Workshop Studio I 5
- LA 343 Landscape Construction 4
- General Education Elective 3
- Supporting Elective 4

Semester Hours 14

**Summer Semester**

- LA 345 Professional Internship 5

Semester Hours 5

**Fourth Year**

**First Semester**

- LA 437 Regional Design Studio 5
- LA 452 Natural Precedent in Planting 3
- Supporting elective 4
- Quantitative Reasoning II 3

Semester Hours 14

**Second Semester**

- LA 438 Design Workshop Studio II 5
- Supporting electives 6
- Elective 2

Semester Hours 13

**Total Hours:** 120

---

1. IB 103 or IB 105 and GEOG 103 or GEOL 100 fulfill the natural sciences and technology general education requirements for this curriculum.

2. General Education: See current University of Illinois General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Foreign Language Requirement 0 - 12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.

3. Social/Cultural factors elective course options are LA 212, LA 218, LA 220, LA 221, LA 222, LA 242, LA 270, and LA 470.
A minimum of 12 credit hours of professionally related courses selected from the department’s recommended list of supporting electives is required, with a minimum of three credit hours in each of the categories of history, communications, techniques, and environment.

Learning Outcomes: Landscape Architecture, BLA

Learning outcomes for the degree of Bachelor of Landscape Architecture

Bachelor of Landscape Architecture students will:

1. Build Knowledge & Develop Reasoning Skills in applying broad and deep knowledge across academic disciplines and fields and using this knowledge to develop design proposals.
2. Apply knowledge of the Natural World to guide design decisions and activities taking into account natural resource constraints that impact land use.
3. Strengthen Social Awareness to better understand the social and cultural influences on human behavior and the social, political, economic, and legal institutions which influence land-use and design decisions.
4. Employ Creative Inquiry and Discovery in addition to a range of analytical skills, and general knowledge to develop design proposals, solve problems, generate new ideas, and produce creative work.
5. Demonstrate Responsible Leadership in working with the land and the people for whom we design.

Latin American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

center website: http://www.clacs.illinois.edu/academics/undergrad/und_major.aspx
center faculty: Latin American Studies Faculty (http://www.clacs.illinois.edu/about/people/faculty.aspx)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: clacs@illinois.edu

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student’s interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken from these categories:

1. LAST 170 (http://catalog.illinois.edu/search/?P=LAST%20170) - Introduction to Latin America;
2. Approved courses with content focused on Latin America;
3. Approved courses with content focused on Latin America in a global context;
4. LAST 490 (http://catalog.illinois.edu/search/?P=LAST%20490) - Independent Study, or approved Study Abroad course, or approved service-learning course.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to MesoAmerica or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

A major in Latin American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

Each student’s course of study is devised in consultation with the Associate Director of the Center for Latin American and Caribbean Studies and is subject to the Associate Director’s approval.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: To be eligible, a student must achieve at least a 3.5 grade point average in the major, complete a senior thesis, and receive the approval of the center’s research committee.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 33 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Total Hours 33

1 Normally taken in the freshman or sophomore year.
2 Normally taken in the senior year.
Learning Outcomes: Latin American Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

1. Strong Declarative Knowledge Base on Latin American Culture and its position in the broader global world
   - Students should understand the diversity and complexity of Latin American cultures and languages and their historical, cultural, political, and economic development.
   - Students should develop appropriate expertise on a sub-region or culture of Latin America and/or a thematic topic related to Latin America
   - Students should also be able to place their knowledge of Latin American in a broader global context.

2. Critical Thinking
   - Students should be able to critically and reasonably evaluate and formulate claims about social, cultural, political, historic, and economic issues related to Latin America in both academic and popular media.
   - Students should be able to critically and reasonably evaluate and apply their knowledge to real world problems.

3. Effective Written Communication
   - Students should be able to identify research problems, approach these problems with appropriate methodologies and effectively communicate the results. They should be able to apply their knowledge to real world situations.
   - Students should be able to effectively communicate their knowledge of Latin American culture and language to a broad non-specialist audience.

4. Advanced Proficiency in Spanish or Portuguese OR Intermediate – High proficiency in an Indigenous Latin American Language - This will be assessed through completion of appropriate level course work and through OPI or equivalent testing.

Latina/Latino Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latina/ Latino Studies

department website: https://lls.illinois.edu/
department faculty: Latina/Latino Faculty (https://lls.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: lls-studies@illinois.edu or aprodrig@illinois.edu

The Undergraduate Major in Latina/Latino Studies explores the experiences and lives of Latinas/os in the context of the United States. The major provides a broad and deep approach to theory, research, and multidisciplinary study of the Latina/o experience. Students will complete 34 hours of required and elective courses, and a minimum of 18 hours of supporting course work or a minor in an area outside of the major. Students majoring in Latina/Latino Studies receive excellent preparation for graduate study or careers in education, social and welfare policy, counseling, law, public policy, and other fields that address Latino issues.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latina/ Latino Studies

Advising: The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 52 hours required, including 34 hours in Latina/Latino Studies courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

   - LLS 365  Chicana/Latina Autobiography, Memoir, Testimonio
   - LLS 375  Latina/o Media in the US
   - LLS 410  Writing Latina/o Chicago
   - LLS 435  Commodifying Difference
   - LLS 458  Latina/o Performance
Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts &
Sciences, BALAS

Learning Outcomes: Latina/Latino Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts &
Sciences Major in Latina/Latino Studies

1. **Intellectual Reasoning and Knowledge**: Students will become proficient in the field of Latina/Latino Studies, which includes, but is not limited to, interdisciplinary, intersectional, and transnational knowledge about:
   a. sociohistorical, political, economic and cultural processes that affect Latina/Latino groups in contemporary society;
   b. Latina/Latino social movements;
   c. Latina/Latino cultural productions;
   d. the relationship between class, gender, sexuality, race/ethnicity and migration in the construction of Latina/Latino cultural and racial formations; and
   e. Latina/Latino Studies theories and methods. Students will learn that Latina/Latino Studies is a body of critical inquiry that encompasses a wide range of topics and objects of study, and that leverages multiple forms of knowledge production.

2. **Critical and Creative Inquiry**: Students will apply Latina/Latino Studies theories in developing their capacities for critical and creative inquiry. Specifically, students will exercise their oral and written communication skills as they express new ideas and generate projects that build upon Latina/Latino Studies theories and draw from the range of interdisciplinary Latina/Latino Studies methods.

3. **Self-Reflection and Community Engagement**: To help promote effective leadership and community engagement, students will demonstrate self-reflexivity about their ideas as well as about their social and political positions in their classrooms and communities. They will also learn to build and sustain relationships and take leadership towards the elimination of social inequities at the local, national, and global levels.

4. **Social Awareness and Understanding Power**: Student will recognize that Latina/Latino lives and communities unfold within historically unequal and racialized social, cultural, economic, and political power relations. Students will become familiar with Latina/Latino theories and social movements that consider indigeneity, race, class, gender, sexuality and citizenship to understand and intervene on historical and contemporary power formations.

5. **Global Consciousness**: Students will understand how complex and interdependent historical and contemporary global forces—environmental, social, cultural, economic, and political—impact and are impacted by Latinas/Latinos. They will learn to apply Latina/Latino Studies critiques to these forces, including but not limited to those related to migration and transnationalism.

**Information listed in this catalog is current as of 09/2021**
A set of core courses, as well as coursework in one of the following concentrations:

- Applied Learning Science (p. 260)
- Educational Equality and Cultural Understanding (p. 264)
- Workplace Training and Development (p. 266)
- Digital Environments for Learning, Teaching and Agency (p. 262)

for the degree of Bachelor of Science Major in Learning & Education Studies

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations:

- Applied Learning Science (p. 260)
- Educational Equality and Cultural Understanding (p. 264)
- Workplace Training and Development (p. 266)
- Digital Environments for Learning, Teaching and Agency (p. 262)

Choose 6 from the following Education Foundations: 6-7

Information listed in this catalog is current as of 09/2021
The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University), as well as in education, psychology, business, law, and other more traditional areas of study. In addition, through their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

For the degree of Bachelor of Science Major in Learning & Education Studies, Applied Learning Sciences concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

Learning & Education Studies: Digital Environments for Learning, Teaching & Agency, BS (DELTA)

For the degree of Bachelor of Science Major in Learning & Education Studies, Digital Environments for Learning, Teaching & Agency

For the degree of Bachelor of Science Major in Learning & Education Studies, Digital Environments for Learning, Teaching & Agency

Assistant dean for academic affairs: Kathy Ryan
department office: 110 Education Building
1310 South Sixth
Champaign, IL 61820
phone: (217) 333-2800
e-mail: saao@education.illinois.edu
program website: Learning and Education Studies (https://education.illinois.edu/programs/undergrad/learning-and-education-studies/)
faculty: College of Education Faculty (https://education.illinois.edu/faculty-finder/)
overview of college admissions & requirements: U (https://admissions.illinois.edu/myillini-apply/)
dergraduate Admissions (https://education.illinois.edu/programs/undergrad/)
college website: https://education.illinois.edu/

The undergraduate non-licensure concentration in Digital Environments for Learning, Teaching, and Agency (DELTA) will provide students with a strong background in the design, development and implementation of technology for a range of learning environments. Courses will introduce students to learning theory, designing and using technology to support learning, and issues encountered when deploying technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

Graduating students will be prepared to engage with various stakeholders interested in using technology to support learning in a range of different contexts. Examples include selecting and deploying appropriate technology to support pedagogic goals for schools, corporations, or informal learning environments such as museums and afterschool clubs, designing educational games or toys and educational application development. One of the main objectives for students in DELTA is to build new ways to support learning, and prepare them for leadership roles in formal and informal environments, technology design and implementation strategies. They will also be prepared to pursue graduate study in a range of programs, such as educational technology, learning sciences, or instructional technology at the University of Illinois or elsewhere.

Students are encouraged to pursue a relevant minor or coherent set of electives from several related departments. Suggested minors include: computer science, communication, psychology, informatics, media and cinema studies or sociology. Students may also consider a minor in a
specific content area from the arts and sciences to develop expertise in a particular field.

The DELTA concentration consists of 24 hours of course work. Students are required to take a minimum of two foundations courses, three core courses and three elective courses. The core courses are designed to ensure students leave the program with foundational knowledge and skills necessary to design, develop, implement, manage, and evaluate digital environments. The elective courses allow students to tailor the concentration to fit individual career goals and areas of interest. Students should take the foundation course Introduction to Digital Environments in the first semester they join DELTA. Similarly, the Capstone Research Project should be taken in the last semester after the majority of DELTA-related coursework is complete.

for the degree of Bachelor of Science Major in Learning & Education Studies, Digital Environments for Learning, Teaching & Agency concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

</tr>
</tbody>
</table>
This undergraduate non-licensure concentration will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Understanding how education as an institution operates to perpetuate social and economic stratification will give students a perspective on the challenges of creating a more equitable distribution of education. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory. Students will understand the contemporary and historical barriers to the distribution of education and examine recent human rights-based demands for extending education to people of all social classes, regions, ethnicity, language groups, and genders.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediary classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to international and domestic students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women’s Studies, or LGBT/Queer Studies.

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.
The following degree requirements also meet general education course requirements and must be selected from the campus general education (https://courses.illinois.edu/) course list. Selections of core requirements courses should be made in consultation with the adviser.

1. Course can be counted in the Core requirement or the Concentration requirement but not both.

2. Concentration courses found on the General Education Approved Course List may also be credited toward the General Education requirements.

Information listed in this catalog is current as of 09/2021
Learning & Education Studies: Workplace Training & Development, BS

for the degree of Bachelor of Science Major in Learning & Education Studies, Workplace Training & Development concentration

assistant dean for academic affairs: Kathy Ryan
department office: 110 Education Building
1310 South Sixth
Champaign, IL 61820
phone: (217) 333-2800
email: saao@education.illinois.edu
program website: Learning and Education Studies (https://education.illinois.edu/programs/undergrad/learning-and-education-studies/)
faculty: College of Education Faculty (https://education.illinois.edu/faculty-finder/)
overview of college admissions & requirements: U (https://admissions.illinois.edu/myillini-apply/) Undergraduate Admissions (https://education.illinois.edu/programs/undergrad/)
college website: https://education.illinois.edu/

Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees.

An internship is recommended during the program, but it is not required. For internship credit, students can register in HRD 491 Professional Skill Development before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Workplace Training and Development departmental contact.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;
- Individuals who wish to work in the business and industry outreach departments of community colleges;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

for the degree of Bachelor of Science Major in Learning & Education Studies, Workplace Training & Development concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

Learning Outcomes: Learning & Education Studies, BS
Learning Outcomes for the degree of Bachelor of Science Major in Learning & Education Studies

1. Students will acquire deep knowledge of content in the workplace.
2. Students will effectively learn the skills and disposition to develop, plan, and implement culturally relevant and responsive outcomes in their respective professions and civic engagements.
3. Students will use data to drive decisions and solve problems in their professional careers.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

Linguistics, BALAS
for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

department website: https://linguistics.illinois.edu/
department faculty: Linguistics Faculty (https://linguistics.illinois.edu/directory/faculty/)
advising: Linguistics Advising (https://linguistics.illinois.edu/academics/undergraduate-program/undergraduate-advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/

The Department of Linguistics offers undergraduate instruction of four types: courses in linguistics, in English as an International Language, English as a Second Language, and in non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest not only to linguistics majors, but to students in any field where the analysis of languages
is important: anthropology, speech and hearing science, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages, and are useful to any students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with literatures and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture. Languages offered by the department are: African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu), Arabic, Hindi, Modern Greek, Persian, Sanskrit, Turkish.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 50-52 hours.

Students must complete 21 hours of coursework at the 300- or 400-level, including at least 12 hours of 300- or 400-level linguistics courses on this campus. These courses may be included in the core courses or electives.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Major electives: 15 hours of Linguistics courses at the 200- to 400-level, chosen in consultation with the student's advisor

Students must fulfill the LAS foreign language requirement, and in addition, complete at least 8 hours in a second foreign language. One of these languages must be a non-Western language chosen from the following list or approved in consultation with the student's advisor: American Sign Language, Arabic, Basque, Chinese, Hebrew, Hindi/Urdu, Japanese, Korean, Lingala, Persian, Quechua, Sanskrit, Swahili, Turkish, Wolof, Zulu. Courses used to complete this requirement may also be used to meet the requirement of "Courses in linguistically relevant areas," below.

Courses in linguistically relevant areas chosen in consultation with the student's advisor. There are two ways of meeting this requirement:

A. The courses may come from any of the following disciplines: any foreign language, anthropology, classics, computer science, English, English as an international language, philosophy, psychology, speech and hearing science, communication.

B. Students desiring to specialize in the linguistics of a particular language should complete at least four semesters of instruction in that language beyond the elementary level, and a linguistics course or independent study focusing on the selected language or its language family.

Learning Outcomes: Linguistics, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics

1. Students will acquire substantial understanding of how languages are structured, including the organization of phonological, morphological, syntactic, and semantic systems; of the ways such systems vary from language to language; and of how they change over time.
2. Students will gain a sense of how languages function: how they are processed psychologically, how they are learned, how they are effectively taught, how they express social identity, and/or how computational and other technologies may be applied to them.
3. Students will learn to think analytically about language, to present and justify analyses systematically, to support claims with sound arguments and empirical evidence, and to evaluate claims about language critically.

Linguistics & Teaching English as a Second Language, BALAS (TESL)

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics & Teaching English as a Second Language (TESL)
The Department of Linguistics offers undergraduate instruction of three types: courses in linguistics, English as an International Language, English as a Second Language, and non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest to students in the Linguistics, CS + Linguistics, and as well as Linguistics + TESL majors. These courses will also be of interest to students in other fields where the analysis of languages is important: anthropology, speech and hearing science, education, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages. These courses are of interest not only to Linguistics + TESL majors, but to students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with literatures and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture. Languages offered by the department are: African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu), Arabic, Hindi, Modern Greek, Persian, Sanskrit, Turkish.

For the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Linguistics & Teaching English as a Second Language

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

**Minimum required major and supporting course work:** Minimum required course work equates to a total of 41 credit hours of Linguistics and TESL courses, including at least 8 hours of foreign languages. Please see your academic advisor. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Twelve hours of 300- and 400-level courses must be taken on this campus.

**Minimum hours required for graduation:** 120 hours. Students will complete 40 hours of upper-division coursework (these hours can be drawn from all elements of the degree).

Foreign Language Requirement 8

In addition the LAS foreign language language requirement, students must complete at least 8 hours in a second foreign language. One of the languages must be a non-Western language.

**Total Hours** 41

---

**Lyric Theatre, BMA**

*for the degree of Bachelor of Musical Arts Major in Lyric Theatre*

**department website:** https://music.illinois.edu
**department faculty:** Music Faculty (https://music.illinois.edu/people/)
**college catalog page:** Fine & Applied Arts (http://catalog.illinois.edu/faa/)
**college website:** https://faa.illinois.edu/

Students pursuing this major select one of two concentrations:

**Creative Concentration (p. 270)**

**Performance Concentration (p. 271)**

The Bachelor of Musical Arts with a major in Lyric Theatre is an interdisciplinary degree designed for the singer-actor, which incorporates training in dance and theatre in addition to music. This degree requires students to choose one of two Concentrations: Performance (performer) or Creative (director, choreographer, dramaturg, set designer, composer).

The BMA Lyric Theatre curriculum is formed around courses in music, dance, and theatre. Advanced coursework includes a senior project. This degree requires a minimum of 129 semester hours of credit for graduation.

For admission requirements for the Bachelor of Musical Arts, please see the School of Music’s Admissions website or contact the Music Admissions Office:

Music Admissions Office
School of Music
1114 W. Nevada Street
Urbana, IL 61801
Phone: (217) 244-7899
E-mail: musicadmissions@illinois.edu
(%20musicadmissions@illinois.edu)

Lyric Theatre: Creative, BMA
for the degree of Bachelor of Musical Arts Major in Lyric Theatre, Creative Concentration

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

In addition to the Music and Lyric Theatre core areas, students who choose the Creative Concentration must also complete a minimum of twelve (12) hours of coursework within the concentration. Students may choose a combination of the below courses in consultation with and approval of their advisor. At least six (6) hours must be taken from the first three (3) courses which deal with the performance of original work. With the other courses, similar type classes may be substituted with the approval of the Lyric Theatre faculty.

Creative Concentration Requirements
Minimum required major and supporting course work: In addition to the Music and Lyric Theatre core areas, students who choose the Creative Concentration must also complete a minimum of twelve (12) hours of coursework within the concentration. Students may choose a combination of the below courses in consultation with and approval of their advisor. At least six (6) hours must be taken from the first three (3) courses which deal with the performance of original work. With the other courses, similar type classes may be substituted with the approval of the Lyric Theatre faculty.

### Code | Title | Hours
--- | --- | ---
MUS 468 (Section C) | Contact Improvisation for Actors, Musicians and Dancers | 1-4
DANC 259 | Collaborative Performance | 2
DANC 424 | | 2

Choose from these courses to complete the Creative Concentration

### Code | Title | Hours
--- | --- | ---
MUS 106 | Beginning Composition | 2
MUS 206 | Intermediate Composition | 2
MUS 209 | Music, Sound, Technology | 3
MUS 404 | Contemp Compos Techniques | 2
MUS 406 | Advanced Composition | 3

### Management: International Business, BS

for the degree of Bachelor of Science Major in Management, International Business Concentration

overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

This program is no longer accepting applications, see Management, BS (p. 272).
The International Business Concentration is designed to educate and
train future business leaders, decision-makers and strategic thinkers
to skillfully manage human capital in firms and organizations. It
particularly focuses on challenges associated with multinational firms
and management in international contexts with different rules and
cultures.

This course includes limited voluntary participation as a subject in experiments.

CS 105 fulfills a Quantitative Reasoning I requirement.
Learning Outcomes: Management, BS

Learning Outcomes for the degree of Bachelor of Science Major in Management

1. Critical Thinking and Problem Solving Skills
2. Leadership and Teamwork
3. Communication Skills
5. Managing Small Business Formation & Growth

Marketing, BS

for the degree of Bachelor of Science in Marketing

department faculty: Marketing Faculty (https://business.illinois.edu/ba/directories/marketing/)
overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://business.illinois.edu/
email: ba-undergrad@illinois.edu

The Marketing student studies business activities directly related to the process of developing, deciding, and placing meaningful assortments of goods and services in the hands of the consumer. The Marketing major is concerned with the efficient and effective performance of marketing activities and coordinating with the other operations of the firm. In addition to the Marketing Major’s requirements, Business Administration students must also fulfill the Urbana-Champaign campus’s General Education requirements and the Gies College of Business’s Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section (http://catalog.illinois.edu/schools/gies-business/academic-units/)).

for the degree of Bachelor of Science in Marketing

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 124 hours.

**Total Hours:** 54

---

1. For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2. BUS 101, BUS 201, BUS 301, and BUS 401 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 301 and BUS 401 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

4. Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

5. Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

6. This course includes limited voluntary participation as a subject in experiments.

7. CS 105 fulfills a Quantitative Reasoning I requirement.

### Marketing Core

### Marketing Electives

Choose from the list for a minimum of 18 hours:

- BADM 311 Leading Individuals and Teams
- BADM 312 Designing and Managing Orgs
- BADM 321 Principles of Retailing (Prerequisite: BADM 320)
- BADM 323 Marketing Communications (Prerequisite: BADM 320)
- BADM 324 Purchasing and Supply Mgmt (Prerequisite: Credit or concurrent enrollment in BADM 320)
- BADM 326 Pricing Strategy (Prerequisite: BADM 320)
- BADM 327 Marketing to Business and Govt (Prerequisite: BADM 320)
- BADM 328 Advanced Sales Strategies (Course title changing to: Advanced sales strategies)
- BADM 329 New Product Development (Prerequisite: BADM 320)
- BADM 330 Brand Management
- BADM 331 Making Things
- BADM 351 E-Business Management
- BADM 360 Digital Marketing
- BADM 361 Marketing Analytics
- BADM 374 Management Decision Models
- BADM 378 Logistics Management
- BADM 382 International Marketing
- BADM 395 Special Topics (Section SMM: Social Media Marketing)
- GEOG 440 Business Applications of GIS

**Total Hours:** 27

### Learning Outcomes: Marketing, BS

Learning Outcomes for the degree of Bachelor of Science in Marketing

1. Master core concepts that pertain to contemporary marketing practices and technologies.
2. Demonstrate the ability to analyze real-world marketing problems, develop alternative solutions, evaluate the strengths and weaknesses of these solutions and choose and implement a solution.
3. Demonstrate the ability to collaborate and problem-solve in teams, and to collaborate with team members and clients across business functions and disciplines.
4. Cultivate a global mindset – an appreciation, curiosity, and empathy toward other cultures, and a capacity to develop innovative solutions to global as well as local marketing problems.
5. Communicate effectively in writing and orally across all modalities — written, oral, and digital.

Materials Science & Engineering, BS

for the degree of Bachelor of Science in Materials Science & Engineering

department website: https://matse.illinois.edu
department faculty: Materials Science & Engineering Faculty (https://matse.illinois.edu/people/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to provide the underpinning knowledge for graduate study. Note: students interested in biomaterials take a specific set of courses to provide them with a background in biology and chemistry while maintaining a strong engineering focus.

for the degree of Bachelor of Science in Materials Science & Engineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. Specific Advanced Composition courses required for this degree are listed below.

Orientation and Professional Development

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree.

**Total Hours of Curriculum to Graduate**

128

1. External transfer students take ENG 300 instead.
2. This optional course may be used to help meet free elective requirements.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Area unless one of their biomaterials area topical lectures and one of their topical lectures outside the biomaterials area are deemed by the Accreditation Board for Engineering and Technology (ABET) to be an engineering course. The extra hour of credit for STAT 400 may be used to help meet free elective requirements.
5. Advanced Composition satisfied by completing MSE 307 and MSE 308.
6. The Grainger College of Engineering approved liberal education course list can be found here [https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
7. The Grainger College of Engineering restrictions to free electives can be found here [https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives](https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

**Suggested Sequence**

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (biomaterials) [https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/matse-biomaterials-map/](https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/matse-biomaterials-map/) and here (all other areas) [https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/matse-non-biomaterials-map/](https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/matse-non-biomaterials-map/).

<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Hours all semesters</td>
<td>128</td>
<td></td>
</tr>
</tbody>
</table>

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/under Written Communication Requirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. This course is highly recommended for freshmen, who may use it to help meet free elective requirements.
5. The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Area unless one of their biomaterials area topical lectures and one of their topical lectures outside the biomaterials area are deemed by the Accreditation Board for Engineering and Technology (ABET) to be an engineering course. The extra hour of credit for STAT 400 may be used to help meet free elective requirements.
6. Satisfies the General Education Advanced Composition requirement.
7. To be selected from list of topical lecture courses (https://matse.illinois.edu/academics/undergraduate-programs/topical-lectures/) established by the department to provide an acceptable level of study in the student's chosen focus area.
8. During fourth year, strongly recommended is incorporation of one or more of an internship, co-op position, and a research project during summers or an academic semester, or both. For students who intend to continue in graduate school, recommended additionally is the undertaking of a research project (Senior Thesis) in the senior year. The project may take the place of up to 3 hours of technical electives with the remainder counting for free electives.
9. Each section of MSE 404 is 1.5 hours. Students take 2 unique sections of MSE 404 for 3 hours.
10. Selected from the departmental list of approved technical electives (https://matse.illinois.edu/academics/undergraduate-programs/undergraduate-curriculum/technical-electives/).

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Materials Science & Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Information listed in this catalog is current as of 09/2021
Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following: CS 196, CS 296, CS 397, CS 492, CS 493, CS 499, any CS course numbered 411 or higher, MATH 412, MATH 414, MATH 417, MATH 418, MATH 423, MATH 432, MATH 448, MATH 482, MATH 484, MATH 496.

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement. Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

Learning Outcomes: Mathematics & Computer Science, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics & Computer Science

By the time of graduation, students will have:

Computer Science:
1. An ability to apply knowledge of computing and mathematics appropriate to the discipline
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
4. An ability to function effectively on teams to accomplish a common goal
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
11. An ability to apply design and development principles in the construction of software systems of varying complexity
Mathematics:
1. An ability to construct proofs and recognize when proofs are complete
2. An ability to use theorems in order to solve problems
3. Technical proficiency in calculus and linear algebra

Mathematics, BSLAS
for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics

department website: https://www.math.illinois.edu/
department faculty: Mathematics Faculty (https://math.illinois.edu/directory/faculty/)
advisor: Math advising (https://math.illinois.edu/academics/undergraduate-program/undergraduate-advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: mathadvising@illinois.edu

Students in the Mathematics major can choose one of the following to complete the major:

Mathematics major (p. 289)
Mathematics major, Applied Mathematics concentration (p. 290)
Mathematics major, Graduate Preparation concentration (p. 291)
Mathematics major, Mathematics Teaching concentration (p. 292)
Mathematics major, Operations Research concentration (p. 293)

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics
Actuarial Science, BSLAS (p. 13)
Mathematics, BSLAS (p. 289)
Mathematics & Computer Science, BSLAS (p. 287)

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Mathematics

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement. Minimum required major and supporting course work: normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

One additional 400- or 500-level Math course 3

Total Hours 49-52

1 Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
2 Beginning in Fall 2012, students may not receive credit for both MATH 416 and either ASRM 406(formerly MATH 410) or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of ASRM 406(formerly MATH 410) or MATH 415.
3 If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied.
4 If STAT 400 is completed, a requirement for the Operations Research concentration has been satisfied.
Mathematics: Graduate Preparation, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Graduate Preparation Concentration

department website: https://math.illinois.edu/
department faculty: Mathematics Faculty (https://math.illinois.edu/directory/faculty/)
advising: Math advising (https://math.illinois.edu/academics/undergraduate-program/undergraduate-advising/)

email: mathadvising@illinois.edu

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

Mathematics, BSLAS (p. 289)
Mathematics & Computer Science, BSLAS (p. 287)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Graduate Preparation Concentration

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Undergraduate programs in Mathematics

Actuarial Science, BSLAS (p. 13)

Mathematics, BSLAS (p. 289)

Mathematics & Computer Science, BSLAS (p. 287)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Mathematics Teaching Concentration

This concentration fulfills state certification requirements to teach high school math (grades 9-12) through the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, with some students requiring 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://admissions.illinois.edu/Content/docs/Handbook_LAS.pdf) for more information.

To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education grade-point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 80-84 hours including 27-29 hours of mathematics beyond calculus, 3-4 hours of computer science, and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours).

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

Actuarial Science, BSLAS (p. 13)
Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.

Beginning in Fall 2012, students may not receive credit for both MATH 416 and either ASRM 406(formerly MATH 410) or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of ASRM 406(formerly MATH 410) or MATH 415.

If MATH 424 or MATH 447 is completed, a requirement for the Graduate Preparatory concentration has been satisfied.

Learning Outcomes: Mathematics, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics

1. Ability to construct proofs and recognize when proofs are complete.
2. Ability to use theorems in order to solve problems.
3. Technical proficiency in calculus and linear algebra
4. The ability to apply mathematics; translating real-world problems into mathematical problems and solving them.

Mechanical Engineering, BS

for the degree of Bachelor of Science in Mechanical Engineering

department website: http://mechse.illinois.edu/
department faculty: Mechanical Science & Engineering Faculty (https://mechse.illinois.edu/people/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

The Mechanical Engineering program at Illinois (accredited by the Engineering Accreditation Commission of ABET, www.abet.org) is one of the most diverse engineering majors and plays a major role in advancing almost every industry. Students study physical principles behind how forces act on bodies of solids or fluids and the interaction of these bodies with their environments through exchanges of energy. Further, Mechanical Engineering students learn how to apply these basic principles in designing, manufacturing, and controlling machines and complex systems. Examples include systems that apply loads, transport matter and energy, and convert one form of energy to another. Mechanical Engineering is a broad major that is well suited for students interested in how the world around them moves and changes.

for the degree of Bachelor of Science in Mechanical Engineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). Specific Advanced Composition courses required for this degree are listed below.

**Code**

The Grainger College of Engineering Liberal Education course list, or additional courses from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts 14

Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. 15

**Total Hours of Curriculum to Graduate** 128

1. External transfer students take ENG 300 instead.
2. CHEM 103 (http://catalog.illinois.edu/search/?P=CHEM%20103) requirement waived for students who received test-based credit (AP, IB, or proficiency) for CHEM 102 (http://catalog.illinois.edu/search/?P=CHEM%20102), similarly CHEM 105 (http://catalog.illinois.edu/search/?P=CHEM%20105) requirement waived for students who received test-based credit for CHEM 104 (http://catalog.illinois.edu/search/?P=CHEM%20104). Students are still required to have 128 hours minimum to graduate.
3. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
4. MATH 415 (http://catalog.illinois.edu/search/?P=MATH%20415) may be substituted for students entering prior to Fall 2021.
5. MATH 284 (http://catalog.illinois.edu/search/?P=MATH%20284) may be substituted.
6. CS 124 (http://catalog.illinois.edu/search/?P=CS%20124) or CS 125 (http://catalog.illinois.edu/search/?P=CS%20125) or ECE 220 (http://catalog.illinois.edu/search/?P=ECE%20220) may be substituted.
7. ECE 110 (http://catalog.illinois.edu/search/?P=ECE%20110) and ECE 210 (http://catalog.illinois.edu/search/?P=ECE%20210) (or ECE 211 (http://catalog.illinois.edu/search/?P=ECE%20211)) combined may be substituted.
8. Advanced Composition satisfied by completing ME 470.
9. Transfers and Physics minor/dual degree students may substitute PHYS 325 (http://catalog.illinois.edu/search/?P=PHYS%20325).
10. Transfers and ECE minor/dual degree students may substitute ECE 313 (http://catalog.illinois.edu/search/?P=ECE%20313).
11. A maximum of 3 hours of independent/individual study courses may be used to satisfy the MechSE Elective or Technical Elective requirements.
12. Depending on the technical content, some Special Topics courses may not be approved for Technical Elective credit. Please provide a syllabus of the course to the Mechanical Science and Engineering Undergraduate Programs Office to request use of the course for Technical Elective credit prior to registering for the course.
13. Professional Elective course. No more than 3 hours of professional elective credit may be used to satisfy the Technical Electives requirements.
14. The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
15. The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

Information listed in this catalog is current as of 09/2021
for the degree of Bachelor of Science in Mechanical Engineering

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite and corequisite sequencing, can be found here (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/mechanical-map/).

</tbody>
</table>

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). ME 170 is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/underwrittenCommunicationRequirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by taking (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education Cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. Science elective(s) — 4 hours required. Choose from CHEM 104 + CHEM 105, MCB 150, or PHYS 213 + PHYS 214. If MCB 150 is taken, then MCB 151 is recommended. Note that PHYS 213 and PHYS 214 will normally be taken in the fourth semester or later, since they have PHYS 211 and PHYS 212, respectively, as prerequisites, in addition to MATH 241.

Statistics elective—3 hours required. Choose either IE 300 or STAT 400.

Technical electives—6 hours required. Choose from a departmentally approved list of Technical Electives. (https://mechse.illinois.edu/undergraduate/bs-mechanical-engineering/#METechElectives)

Learning Outcomes: Mechanical Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Mechanical Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Mechanical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Media & Cinema Studies, BS

for the degree of Bachelor of Science Major in Media & Cinema Studies

department website: https://media.illinois.edu/media-cinema-studies (https://media.illinois.edu/media-cinema-studies/)
department faculty: https://media.illinois.edu/media-cinema-studies/faculty (https://media.illinois.edu/media-cinema-studies/faculty/)
overview of college admissions & requirements: College of Media (p. 1198)
college website: https://media.illinois.edu/

MEDIA AND CINEMA STUDIES (MACS), prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment.

Programs in Cinema Studies

Undergraduate Programs:

| major: Media & Cinema Studies, BS (p. 301) | minors: Cinema Studies (p. 484) | Critical Film Production (p. 489) | Media (p. 513) |

Graduate Programs:

| minor: Cinema Studies (p. 1128) |

for the degree of Bachelor of Science Major in Media & Cinema Studies

To graduate from the media and cinema studies curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

<table>

<td></td>
</tr>
</tbody>
</table>

### Required Area of Study or Minor Outside the College of Media

In addition to the courses in the major plan described above, students must complete 9 hours in an approved area outside the College of Media. Approved areas include: African American Studies; American Indian Studies; Anthropology; Art History; Asian American Studies; Business Administration; Communication; Computer Science; Creative Writing; Economics; Food Science and Human Nutrition; Gender and Women’s Studies; History; Kinesiology and Community Health; Latina/o Studies; Linguistics; Literature; Natural Resources and Environmental Sciences; Non-English Languages; Philosophy; Political Science; Psychology; Recreation, Sport and Tourism; Regional Area Studies; or Sociology. A university-approved minor may substitute for this requirement. Courses may, if they qualify, also count toward the requirement for advanced hours outside of the College.

### Advanced Hours Requirement

At least 20 hours in courses numbered 200 or above. These courses must be outside and not cross-listed with the College of Media. At least 9 of the 20 hours must be in courses numbered 300 and above.

### Total hours required for graduation

**Learning Outcomes: Media & Cinema Studies, BS**

Learning outcomes for the degree of Bachelor of Science Major in Media & Cinema Studies

---

**Student Learning Outcomes:** Students in Media and Cinema Studies will be able to:

1. Demonstrate a thorough knowledge of media and cinema studies’ subject matter areas.
   - Students demonstrate a broad knowledge of the field by accurately identifying and defining the subject matter areas of media and cinema studies.

2. Demonstrate a comprehension of foundational media and cinema studies’ theories and concepts.
   - Students can identify, use, and relate key concepts and frameworks that are central to the field.

3. Demonstrate critical thinking skills.
   - Students can reflexively apply concepts and frameworks to promote inquiry, understanding, and solutions.

4. Demonstrate the ability to critically evaluate media representations in relation to social justice issues.
a. Students apply methods to demonstrate, through a production-based activity, how representations are connected to social, political, economic, and cultural issues.

5. Demonstrate the ability to work collaboratively to successfully communicate ideas and outcomes of creative research across a range of modalities.

a. Students present their senior projects using at least two different platforms.

Metropolitan Food & Environmental Systems, BS

for the degree of Bachelor of Science Major in Metropolitan Food & Environmental Systems

department website: https://mfst.illinois.edu/
overview of college admissions & requirements: https://academics.aces.illinois.edu/prospective-students/ https://academics.aces.illinois.edu/prospective-students/
college website: https://aces.illinois.edu/
program director: Megan Dailey, Ph.D., mdailey5@illinois.edu
program office: 215 Mumford Hall, 1301 W. Gregory Dr., Urbana IL
program phone: (217) 244-5567

The Metropolitan Food & Environmental Systems (MFST) program uses an interdisciplinary approach to understanding and implementing solutions in the area of urban food and environmental systems to ensure the sustainability of readily available nutritious foods for metropolitan populations. The students in this major will learn to understand the science and practice of food production and security across urban environmental, economic, social, and health contexts, while maintaining environmental sustainability. Students in this program will be prepared for jobs in impact areas related to food systems, such as government, non-governmental organizations, institutional food buyers, investment firms, financial and insurance companies, industry, retail, and food service. Alternatively, students may choose to pursue post-baccalaureate education, including law school and graduate school in food systems or in specific areas of the food system. Because the MFST curricula includes required training in STEM education, critical thinking, scientific literacy, communication and leadership, students will obtain the skills necessary to traverse an ever-changing job market and have the freedom to choose from many career-life options.

A minimum of 127 credit hours are required for graduation, including General Education Requirements and the MFST Core Curriculum. Because the core curriculum includes many College of Agricultural, Consumer and Environmental Sciences (ACES) departmental course requirements, the students in MFST have the unique opportunity to minor in many of the ACES departments or to delve deeper into a food system area of interest in addition to the core courses, including (but not limited to) advanced nutrition, plant or animal production, food processing, food safety, environmental sustainability, climate change, or landscape architecture.

This program prepares teachers for grades five through eight. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

Students are admitted to Middle Grades Education as freshmen. In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional grade point averages of 2.5 (A=4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. For teacher education licensure applicable to all curricula, see the Council on Teacher Education.

---

1. Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.
2. If seeking the Science concentration, exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with adviser for further information.
3. PSYC 100 is a prerequisite for EPSY 201.
4. The total hours required for the degree may be higher for students who have not already completed the language other than English requirement.

### Concentration Requirements

Some concentration courses can count towards the general education requirements. Courses in concentrations may not be allowed to count for more than two degree requirements. If you have questions, see your adviser.
Science Electives: To complete any remaining required hours, select additional courses from the courses listed above.

**Learning Outcomes: Middle Grades Education, BS**

Learning Outcomes for the degree of Bachelor of Science in Middle Grades Education

1. Students will acquire deep knowledge of content in the field of Education
2. Students will effectively plan and implement relevant, culturally responsive and developmentally appropriate instruction for elementary students, grades 5-8.

Information listed in this catalog is current as of 09/2021
3. Students will use data to drive decisions and solve problems in and out of the classroom.

4. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

Molecular & Cellular Biology, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

school website: https://mcb.illinois.edu/undergrad/
school faculty: School Faculty (https://mcb.illinois.edu/people/)
advising: MCB advising (https://mcb.illinois.edu/undergrad/advising/)
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad@mcb.illinois.edu

The Molecular and Cellular Biology major provides students with a solid preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology. Students will also acquire a strong background in chemistry, math and physical sciences. After completion of the core curriculum in MCB, students may complete the required advanced course work by taking a variety of MCB courses or by selecting a more focused group of courses in any of the following areas: biochemistry, cells and tissues, developmental biology, infection and immunity, microbiology, genetics, neurobiology and physiology. The MCB Advising Program (MAP) staff is available to help students plan their combination of advanced courses.

For students interested in adding licensure to the BSLAS in Molecular & Cellular Biology, please visit the Biology Teaching page: http://mcb.illinois.edu/undergrad/advising/teaching/

Undergraduate degree programs in Molecular & Cellular Biology

Biochemistry, BS (p. 71)

Molecular & Cellular Biology, BSLAS (p. 308)

Molecular & Cellular Biology Honors Concentration, BSLAS (p. 309)

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

Certain advanced courses may be taken prior to completion of the MCB 250-MCB 253, MCB 354 sequence with permission of an academic advisor. A minimum of 15 hours of 300- or 400-level courses in MCB from the approved list is required.

In addition, undergraduate research (MCB 290, or departmental equivalent) is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290, or departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

Students earning a degree in Molecular and Cellular Biology may not also earn a second degree in the Specialized Curriculum in Biochemistry.

Students earning a degree in Molecular and Cellular Biology may not double major in Integrative Biology.

Distinction

Students in MCB can qualify for Distinction via one of the following:

Distinction for Excellence in Research:

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

Maintain a major GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Research:

To be eligible for graduation with High Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: 67-71 hours, including 21 hours of 300- or 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

- Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

---

Molecular & Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB concentration (http://catalog.illinois.edu/schools/las/academic-units/molecular-cellular-biology-concentration/). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (http://mcb.illinois.edu/undergrad/honors/) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

Complete 5 honors discussion sections in consecutive order:

Complete 4 or more additional MCB Honors Option courses

1 Students must consult the Honors Coordinator about MCB Honors Option courses. Only MCB 290 may be repeated, to a maximum of twice, although continuing 290 beyond two semesters is encouraged.

Learning Outcomes: Molecular & Cellular Biology, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

Upon successful completion of the Molecular & Cellular Biology undergraduate curriculum, students will be able to:

1. understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection and genetic change.
2. illustrate that fundamental structural units define the function of all living things.
3. explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. summarize that biological systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of physics.
5. illustrate that living systems are interconnected and interacting across scales of space and time.
6. design a scientific process and employ the scientific method, demonstrating that biology is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
7. execute quantitative analysis to interpret biological data.
8. construct and utilize predictive models to study and describe complex biological systems.
9. apply concepts from other sciences in order to interpret biological phenomena.
10. communicate biological concepts and understanding to members of a diverse scientific community as well as to the general public.
11. identify social and historical dimensions of biological investigation.

Music Composition, BMUS

for the degree of Bachelor of Music Major in Music Composition

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

for the degree of Bachelor of Music Major in Music Composition

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.
Minimum required major and supporting coursework: If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

Learning Outcomes: Music Composition, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Music Composition

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.

5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.

6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

**Music Education, BME**

*for the degree of Bachelor of Music Education Major in Music Education*

**department website:** https://music.illinois.edu

**department faculty:** Music Faculty (https://music.illinois.edu/people/)

**college catalog page:** Fine & Applied Arts (http://catalog.illinois.edu/faa/)

**college website:** https://faa.illinois.edu/

Students pursuing this major select one of four concentrations:

- Choral Music Concentration (p. 312)
- General Music Concentration (p. 314)
- Instrumental Music Concentration (p. 316)
- Technology Concentration (p. 318)

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte-s.education.illinois.edu/dotnet/webpages/webpage.aspx). Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) GPA of 2.75, and professional education course GPA of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

All music education students must earn a grade of C- or better in all music and education courses required for licensure.

1. **PSYC 100** is prerequisite to EPSY 201, required in all teacher education programs.
2. **Quantitative Reasoning I** is satisfied by students in the Technology concentration selecting CS 105 as a Technique course or elective.
3. The Language Requirement may be satisfied by successfully completing a third-semester college-level course in a language other than English; successful completion, in high school, of the third year of a language other than English; or demonstrating proficiency at the third semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.
4. At least 19 hours of general education requirements are met by courses required by the BME.
5. **Enrollment in the applied major is normally expected during the first six semesters, 2 semester hours each.**
6. All music education majors are required to participate in an approved ensemble every semester in residence.
7. All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.
8. Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school licensure is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student’s applied major, music theory, or music history.

Music Education: Technology, BME

for the degree of Bachelor of Music Education Major in Music Education, Technology Concentration

department website: https://music.illinois.edu
department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cte-s.education.illinois.edu/dotnet/webpages/webpage.aspx). Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) GPA of 2.75, and professional education course GPA of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

All music education students must earn a grade of C- or better in all music and education courses required for licensure.

for the degree of Bachelor of Music Education Major in Music Education, Technology Concentration

Minimum required major and supporting course work: In order to be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) GPA of 2.75, and professional education course GPA of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

Minimum hours required for graduation: 130 hours.

The Language Requirement may be satisfied by successfully completing, in high school, of the third year of a language other than English; or demonstrating proficiency at the third-semester college-level course in a language other than English; or presenting evidence of language proficiency at the third-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.

At least 19 hours of general education requirements are met by courses required by the BME.

Enrollment in the applied major is normally expected during the first six semesters, 2 semester hours each.

All music education majors are required to participate in an approved ensemble every semester in residence.

All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173.

Enrollment in the applied major is normally expected during the first six semesters, 2 semester hours each.

Student teaching coursework may be taken for 4-8 credits. Eight hours of student teaching apply toward graduation. Enrolling for at least 12 credits is needed to retain full-time status. You must register for both EDPR 438 and EDPR 442 during the semester of your student teaching. If public school licensure is not desired, the student selects alternative courses totaling 13 semester hours in consultation with the music education advisor, seven semester hours of which must be from the student's applied major, music theory, or music history.

Learning Outcomes: Music Education, BME

Learning outcomes for the degree of Bachelor of Music Education Major in Music Education

1. The well prepared music teacher has in-depth understanding of content area knowledge that includes central concepts, methods of inquiry, structures of the discipline, and multiple forms of music literacy.

2. The well prepared music teacher plans and designs instruction based on content area knowledge; diverse styles, genres, and repertoires; diverse student characteristics; student performance data; curriculum goals; and the community context.

3. The well prepared music teacher differentiates instruction by using a variety of strategies that support critical and creative thinking, problem-solving, and continuous musical growth and learning.

4. The well prepared music teacher understands and uses appropriate formative and summative assessments for determining student needs, monitoring student progress, measuring student growth, and evaluating student outcomes.

5. The well prepared music teacher is an ethical and reflective practitioner who promotes a culture of professional inquiry.

department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu

Music's Admissions website

Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

The Bachelor of Arts with a Major in Music is a 120-hour degree that is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students to select a specific area of study, called an "option." An option consists of advanced music courses and supporting (non-Music) coursework. The coursework is determined in consultation with the student's advisor. Current options include music technology, music theory, composition, and various branches of musicology; or students may work with an advisor to explore alternate options not listed here (music + "your choice").

BA students work with their BA advisor to designate supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students should designate their option by no later than the start of the spring semester of the sophomore year.

For admission requirements for the Bachelor of Arts in Music, please see the School of Music's Admissions website (http://www.music.illinois.edu/prospective-students/) or contact the Music Admissions Office: Music Admissions Office

School of Music: 1114 W. Nevada Street, Room 2014
Urbana, IL 61801
Phone: (217) 244-7899 | E-mail: musicadmissions@illinois.edu

Minimum required major and supporting course work: normally equates to 48-50 hours excluding the keyboard skills (MUS 172 and MUS 173) requirement, and includes 37-41 hours in music courses, 29-31 hours in core courses. Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music. Credits earned in applied music lessons are generally considered elective.

Learning Outcomes: Music, BA

Learning outcomes for the degree Bachelor of Arts Major in Music

Bachelor of Arts in Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
4. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
5. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
6. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
7. Appreciate how music interacts in communities to enhance and engage social and cultural identities to enrich lifelong learning.

Computer Science + Music, BS

for the degree of Bachelor of Science in Computer Science and Music

Computer Science "CS + X" degree information: https://cs.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs#requirements

School of Music website: https://music.illinois.edu/
Overview of Music Admissions & Requirements: https://music.illinois.edu/application-process/

Music Admissions email: musicadmissions@illinois.edu

The Bachelor of Science in Computer Science & Music (CS + Music) is designed for students who plan to pursue a career in music technology, as well as students who want to push the state-of-the-art in music composition and explore new avenues of expression. This degree will prepare students for advanced study at the graduate level for many existing programs in music and audio technology, as well as equip them with the proper skills to successfully join and lead a vibrant workforce centered around the creation and distribution of entertainment media through constantly evolving technological platforms.

The CS + Music curriculum provides a broad knowledge of the theory, design, and application of computer systems integrated with the theory, history, and application of music. The curriculum is formed around courses in music, mathematics, science, and computation. Advanced coursework includes either a senior thesis or a senior project. A minimum of 120 hours is required for graduation.

For admission requirements for the Bachelor of Science in CS + Music, please see the School of Music’s Admissions website (listed above) or contact the Music Admissions Office:

1. Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

String majors will register for four semester hours of applied music in the first year; thereafter, string majors will register for three semester hours of applied music and one semester hour of MUS 267 in the second, third, and fourth years. Brass majors will register for three semesters hours of applied music and one semester hour of MUS 267 each semester for all four years. All other instrumental majors register for four semester hours of applied music each semester.

Concurrent registration in MUS 250 is required for all students who register for any of MUS 183-MUS 186 and MUS 483-MUS 486.

Keyboard majors are required to complete only 6 hours of minor applied music.

All music majors are required to participate in an approved ensemble every semester in residence. All string majors must audition for the orchestras at the beginning of each fall. For a complete list of approved ensembles, please refer to the Undergraduate Music Handbook.

All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. Keyboard performance majors demonstrate keyboard competency by successfully completing MUS 454.

### Learning Outcomes: Instrumental Music, BMUS

Learning outcomes for the degree of Bachelor of Music Major in Instrumental Music

- Bachelor of Music graduates will:
  1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
  2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
  3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
  4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
  5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
  6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
  7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
  8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

### Jazz Performance, BMUS

For the degree of Bachelor of Music Major in Jazz Performance
Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, guitar, or voice as the major instrument.

For the degree of Bachelor of Music Major in Jazz Performance

Minimum required major and supporting coursework: Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242.

Junior Recital

Senior Recital

Electives as needed to total 130 hours

Total Hours required for graduation 130

1 Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

2 Of the eight semesters of applied music, two semesters (4 hours) must be in classical applied study.

3 All music majors are required to enroll in at least one approved performance ensemble each semester in residence. Jazz Performance majors register for at least one Jazz ensemble each semester. For a listing of approved ensembles, please refer to the Undergraduate Music Handbook.

4 All students must demonstrate keyboard competency by examination when they matriculate or by enrolling in MUS 172 and/or MUS 173. For students with no keyboard skills, MUS 172 and MUS 173 taken in the first year, followed by Jazz Keyboard I and II in the second year will satisfy the secondary applied instrument requirement. For students whose principal instrument is piano, a secondary instrument or jazz voice may be chosen as a substitute for MUS 172, MUS 173 and Jazz Keyboard I and II, in consultation with the advisor.

5 MUS 436 now replaces MUS 499 (Proseminar in Music).
This major offers a broad cultural education that unites academic and musical training. It also provides preparation for the graduate study required for research and teaching in musicology or ethnomusicology.

Minimum required major and supporting course work: The fourth-year student, working with an adviser, must complete a satisfactory thesis (MUS 299) as part of the requirements for the Musicology Major Bachelor of Music Degree.

department faculty: Music Faculty (https://music.illinois.edu/people/)
college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)
college website: https://faa.illinois.edu/

The Open Studies major allows students to focus on diverse fields such as music of other cultures, piano pedagogy, music technology, sound engineering, theatre, social or behavioral science, or any other areas of particular interest. Open Studies requires completion of the common requirements for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the assistant dean of undergraduate affairs in the College of Fine and Applied Arts. Additional information may be obtained from the:

Music Admissions Office

Voice, BMUS

for the degree of Bachelor of Music Major in Voice

department website: https://music.illinois.edu

department faculty: Music Faculty (https://music.illinois.edu/people/)

college catalog page: Fine & Applied Arts (http://catalog.illinois.edu/faa/)

college website: https://faa.illinois.edu/

The Voice Performance degree is designed to develop skilled performers in all areas of vocal techniques. Voice majors learn the appropriate stylistic approaches to the vocal literature of various historical periods and also study Italian, French, and German in order to better master the diction of works performed in these languages. There are opportunities to perform onstage throughout the degree program either in solo performance or in group productions with our Lyric Theatre program.

For Jazz Voice, please visit the BMUS-Jazz Performance pages.
Minimum required major and supporting coursework: At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.

2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.

3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.

4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.

5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Natural Resources & Environmental Sciences, BS
for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences

department website: https://nres.illinois.edu/
department faculty: https://nres.illinois.edu/directory/faculty (https://nres.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Students pursuing this major select one of four concentrations:

- Ecosystem Stewardship & Restoration Ecology (p. 329)
- Environmental Science & Management (p. 330)
- Fish, Wildlife & Conservation Biology (p. 332)
- Human Dimensions of the Environment (p. 333)

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world’s most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

Natural Resources & Environmental Sciences: Ecosystem Stewardship & Restoration Ecology, BS
for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences, Ecosystem Stewardship & Restoration Ecology Concentration

department website: https://nres.illinois.edu/
department faculty: https://nres.illinois.edu/directory/faculty (https://nres.illinois.edu/directory/faculty/)
overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Ecosystem Stewardship and Restoration Ecology emphasizes the ecology, structure, and function of ecosystems, with a particular focus on plant communities and their interactions with the living and nonliving parts of ecosystems. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. The concentration includes coursework in the areas of restoration, landscape, and plant ecology, as well as courses focused on specific ecosystems (e.g. streams, wetlands, agroecosystems), invasive species, community ecology, and ecosystem science.

**Natural Resources & Environmental Sciences: Environmental Science & Management, BS**

for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences, Environmental Science & Management Concentration

---

Information listed in this catalog is current as of 09/2021
Environmental Science and Management emphasizes the biological, chemical, and physical features of the environment. It is designed for students interested in the management of soil and water resources and in understanding how to protect and improve environmental quality. The concentration includes coursework in environmental chemistry, environmental microbiology, ecohydrology, and environmental quality, as well as courses focused more specifically on soil and water sciences.

For the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences, Environmental Science & Management Concentration

college website: https://aces.illinois.edu/

Fish, Wildlife and Conservation Biology emphasizes the ecology, conservation, and sustainable management of fish and wildlife species and communities. It is designed for students interested in understanding interactions among humans, wild animals, and their habitats. The concentration includes coursework in conservation of threatened and endangered species, management of harvested species, aquatic ecosystem conservation, animal behavior, vertebrate natural history, identification of animals and plants, and advanced ecology.

**college website:** https://aces.illinois.edu/

Human Dimensions of the Environment emphasizes the social scientific interpretations of human-environment interactions at multiple levels, as well as applied policy and management implications. This concentration requires advanced coursework in behavior change science, natural resource economics, environmental and conservation psychology, communications, social impact assessment, environmental policy, and environmental law. Students who have completed degrees in this concentration have gone on to careers in natural resource management, environmental policy, law, advocacy, and education.

## Learning Outcomes: Natural Resources & Environmental Sciences, BS

Learning outcomes for the degree of Bachelor of Science Major in Natural Resources & Environmental Sciences (NRES)

Students graduating with the B.S. in NRES should be able to:

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/
environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade-offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

**Nuclear, Plasma, & Radiological Engineering, BS**

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

---

department website: https://npre.illinois.edu/
department faculty: Nuclear, Plasma, & Radiological Engineering Faculty (https://npre.illinois.edu/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Nuclear, plasma, and radiological engineering is a branch of engineering that is concerned with the development and use of nuclear energy and radiation sources for a wide variety of applications in energy production, in materials processing and science, and for biomedical and industrial uses. Areas of interest include the continued safe and reliable application of fission reactors as central electric power plant thermal sources; plasma processing applications and the longer term development of fusion reactors for electric power generation; and the use of radiation sources in such areas as materials, biological systems, medical treatment, radiation instrumentation, environmental systems, and activation analysis.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in technical expertise but also requires depth of understanding in the area.

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

---

**Graduation Requirements**

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103).

</tbody>
</table>

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if your UIN is Odd). Free Electives are taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
3. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. ECON 102 or ECON 103 must be one of the Social and Behavioral Sciences courses. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
4. Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

Information listed in this catalog is current as of 09/2021
Consideration should be given to NPRE 101 as a free elective in the spring semester of the freshman or sophomore year. Alternately, free elective hours provide a means to fulfill requirements for campus minors such as Bioengineering, Computer Science, International Minor in Engineering, Mathematics, or Physics, without excessive additional hours beyond the normal degree requirements.

Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. This facilitates the minor in Physics. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

A student must fulfill the NPRE Professional Concentration Area requirement (https://npre.illinois.edu/academic/undergraduate/technical-electives/) by taking the required technical courses and technical elective courses in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

Students in the Power, Safety, and the Environment and in the Plasma and Fusion Science Engineering Professional Concentration Areas must take a fluid mechanics course (TAM 335 or ME 310) and NPRE 421. Students in the Radiological, Medical, and Instrumentation Applications Concentration are not required to take these courses. They may instead use the hours otherwise filled with these courses to take electives in the Radiological, Medical and Instrumentation Applications Areas.

Learning Outcomes: Nuclear, Plasma, & Radiological Engineering, BS

Learning Outcomes for the degree of Bachelor of Science Major in Nuclear, Plasma, & Radiological Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Nuclear, Plasma, & Radiological Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Operations Management, BS

for the degree of Bachelor of Science in Operations Management

overview of college admissions & requirements: Gies Catalog (http://catalog.illinois.edu/schools/gies-business/academic-units/)
college website: https://giesbusiness.illinois.edu/ (https://business.illinois.edu/)

The Operations Management (OM) Major prepares students for careers in manufacturing and service management, operations strategy consulting, purchasing and supply management, project management, and quality management. OM professionals work with most other units in any organization, more so with engineering, human resource management, information systems, and marketing. The OM curriculum focuses on analytical decision-making, logistics, new product development, operations strategy, process improvement, project management, quality control, and supply chain management. Students are trained in ways of developing, making, and delivering goods and services efficiently and effectively – generating value by satisfying ever-changing customer needs while improving profitability.

for the degree of Bachelor of Science in Operations Management

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit/no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Minimum hours required for graduation: 124 hours.

Total Hours: 54

1. For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2. BUS 101, BUS 201, BUS 301 and BUS 401 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 301 and BUS 401 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

3. Only one of these two Advanced Information Systems classes may be used for fulfilling the requirement for the major.

4. Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

5. Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

6. This course includes limited voluntary participation as a subject in experiments.

7. CS 105 fulfills a Quantitative Reasoning I requirement.

Learning Outcomes: Operations Management, BS

Learning Outcomes for the degree of Bachelor of Science in Operations Management

1. Disciplinary Competence: Students demonstrate an understanding of fundamental operations concepts, key principles of its management, and relevant analysis approaches.

2. Critical Thinking: Students demonstrate the ability to understand a real-world unstructured problem, and gather necessary information and data to formulate into a structured problem.

Information listed in this catalog is current as of 09/2021
3. Problem Solving: Students demonstrate ability to develop quantitative and qualitative analysis framework and solution methods, and appropriately implement them to obtain meaningful solutions.

4. Decision making: Students demonstrate ability to identify strengths and weaknesses of alternative solutions and obtain relevant managerial insights.

5. Communication: Students express themselves logically, persuasively and succinctly & using correct grammar and composition when communicating in oral or written form.

Philosophy, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences: Major in Philosophy

department website: http://www.philosophy.illinois.edu/
department faculty: Philosophy Faculty (https://philosophy.illinois.edu/directory/faculty/)
advising: Philosophy advising (https://philosophy.illinois.edu/academics/undergraduate-studies/advising/)
e-mail: phildept@illinois.edu
overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one’s ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

for the degree of Bachelor of Arts in Liberal Arts and Sciences: Major in Philosophy

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students who maintain a GPA ≥ 3.5 in the major and receive a grade of A− in PHIL 499 will graduate with distinction.

Students who maintain a GPA ≥ 3.5 but < 3.7 in the major and receive a grade of A or better in PHIL 499 will graduate with high distinction.

Students who maintain GPA ≥ 3.7 in the major and receive a grade of A or better in PHIL 499 will graduate with highest distinction.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: normally equates to 44 hours including at least 32 hours of Philosophy courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Total Hours 44

Learning Outcomes: Philosophy, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Philosophy

The Philosophy Department aims to produce four main learning outcomes.

1. Philosophical Knowledge: Students will be familiar with major figures and movements in the history of western philosophy; familiar with central topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and familiar with current developments in professional philosophy.

2. Philosophical Reading: Students will develop the ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.

3. Philosophical Inquiry: Students will develop the ability to formulate abstract principles in epistemology and metaphysics, in ethics.
The curriculum in photography requires 122 credit hours; its purpose is to encourage the study of photographic media for personal expression, to explore the social implications of pictures, and to develop the skills needed for careers in photography. General art requirements and electives provide a broad foundation in the visual arts, and photography courses provide a strong background in the history, theory, and practice of photography as art.

A portfolio review is required for admission to the School of Art and Design.

Learning Outcomes: Photography, BFA

Learning outcomes for the Bachelor of Fine Arts Major in Photography

Undergraduate Photography graduates will have:

1. acquired the ability to control the procedural construct of an image via camera, software and darkroom techniques.
2. an understanding of and an ability to employ photography’s unique narrative structure.
3. acquired a critical appreciation of the historical and social influences of the medium and the ability to evaluate their own work as well that of others via this construct.
4. developed a cohesive body of work demonstrating technical competency and conceptual awareness.

Physics

department website: Department of Physics (https://physics.illinois.edu)
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/faculty/)
overview of college admissions & requirements: The Grainger College of Engineering (https://grainger.illinois.edu/admissions/)
college website: https://grainger.illinois.edu/

Students interested in majoring in physics in the College of Liberal Arts & Sciences may choose the Specialized Curriculum in Physics (http://catalog.illinois.edu/undergraduate/лас/physics-bs/), leading to the Bachelor of Science Major in Physics, or the Physics Major (http://catalog.illinois.edu/undergraduate/лас/physics-bslas/#text), leading to the Bachelor of Science in Liberal Arts and Sciences.

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field.

The Physics Major in the Sciences and Letters Curriculum is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics.

Engineering Physics, BS

for the degree of Bachelor of Science in Engineering Physics
Engineering Physics, BS

is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

for the degree of Bachelor of Science in Engineering Physics

Graduation Requirements

Minimum Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement): 2.0

TGPA is required for Math and Physics courses. See Technical GPA (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-TechnicalGPARequirement) to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

**Technical/Professional Option Electives** (or a list designed for a departmentally approved custom option) below. The number of hours varies depending upon the option chosen.

### Acoustical Physics

- **ECE 210**: Analog Signal Processing 4
- **ECE 473**: Fund of Engrg Acoustics 3 or 4

Choose 2 classes from the following:

- **ECE 310**: Digital Signal Processing 3
- **ECE 417**: Multimedia Signal Processing 4
- **ECE 473**: Fund of Engrg Acoustics 3
- **ECE 402**: Electronic Music Synthesis 3
- **PHYS 402**: Light 3 or 4

### Astrophysics

- **ASTR 210**: Introduction to Astrophysics 3
- **ASTR 350**: The Big Bang, Black Holes, and the End of the Universe (OR ASTR 406: Galaxies and the Universe) 3

Choose 4 classes from the following:

- **ASTR 404**: Stellar Astrophysics 3
- **ASTR 405**: Planetary Systems 3
- **ASTR 414**: Astronomical Techniques 4

### Atmospheric Science

- **ATMS 201**: General Physical Meteorology 3

Choose 4 classes from the following:

- **ATMS 301**: Atmospheric Thermodynamics 3
- **ATMS 302**: Atmospheric Dynamics I 3
- **ATMS 304**: Radiative Transfer-Remote Sens 3
- **ATMS 305**: Computing and Data Analysis 3
- **ATMS 306**: Cloud Physics 3
- **ATMS 314**: Mesoscale Dynamics 3
- **ATMS 405**: Boundary Layer Processes 4

### BioPhysics

- **CHEM 104**: General Chemistry II (OR CHEM 204) 3
- **CHEM 105**: General Chemistry Lab II (OR CHEM 205) 1
- **CHEM 232**: Elementary Organic Chemistry I (OR CHEM 236) 3 or 4
- **CHEM 233**: Elementary Organic Chem Lab I 2

Choose 2 classes from the following:

- **BIOP 401**: Introduction to Biophysics 3
- **MCB 450**: Introductory Biochemistry (OR MCB 354: Biochemistry and Physical Basis of Life) 3
- **PHYS 498**: Special Topics in Physics (Quantitative Biology) 4

### Business

- **ENG 471**: Seminar Energy & Sustain Engrg 1
- **IE 420**: Financial Engineering 3 or 4
- **SE 400**: Engineering Law 3 or 4
- **TE 100**: Introduction to Innovation, Leadership and Engineering Entrepreneurship 1
- **TE 360**: Lectures in Engineering Entrepreneurship 1
- **TE 333**: Creativity, Innovation, Vision 4

Choose 1 class from the following:

- **MSE 206**: Mechanics for MatSE 4
- **MSE 280**: Engineering Materials 3
- **MSE 401**: Thermodynamics of Materials (OR PHYS 427: Thermal & Statistical Physics) 3

Choose 1 class from the following:

- **MSE 304**: Electronic Properties of Matls 3
- **MSE 402**: Kinetic Processes in Matls 3
- **MSE 403**: Synthesis of Materials 3
- **MSE 405**: Microstructure Determination 3
- **MSE 406**: Thermal-Mech Behavior of Matls 3

### Nuclear Physics

- **NPRE 402**: Nuclear Power Engineering 3 or 4

---

Information listed in this catalog is current as of 09/2021.
Free electives. Additional unrestricted course work, subject to certain exceptions as noted by the College, so that there are at least 128 credit hours earned toward the degree. The number of hours varies depending upon the total hours earned in both the Flexible Physics Core and the Technical/Professional Option and whether or not MATH 415 and PHYS 486 are taken in place of PHYS 485.

1. External transfer students take ENG 300 instead.
2. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
3. MATH 285 may be replaced by MATH 441 followed by MATH 442.
4. If PHYS 486 is chosen, take prerequisite MATH 415, which may be used to meet free elective requirements. If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.
5. The Grainger College of Engineering approved liberal education course list can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-GeneralEducationElectives). Note that these credit hours could carry the required cultural studies designation required for campus general education requirements.
6. The Grainger College of Engineering restrictions to free electives can be found here (https://wiki.illinois.edu/wiki/display/ugadvise/Degree+Requirements/#DegreeRequirements-FreeElectives).

for the degree of Bachelor of Science in Engineering Physics

Suggested Sequence

The curriculum sequence below is a suggested sequence, as all Grainger Engineering students work with a department academic advisor to achieve their educational goals, specific to their needs and preparation. Dynamic and Static curricular maps, which include prerequisite sequencing, can be found here (with Tech Electives) (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/physics-tech-map/) and here (Professional Track). </table>

**Total Hours:** 128

1. MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
2. Students with proficiency or advanced placement (AP or IB) credit in MATH 221 are strongly encouraged to enroll in MATH 231 and PHYS 211 for the first semester.
3. RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student’s UIN (Spring if your UIN is Odd). General Education Elective is taken the other semester. Composition I guidelines can be found at http://catalog.illinois.edu/general-information/degree-general-education-requirements/ under Written Communication Requirement.
4. Students must take 6 hours from the campus General Education Social and Behavioral Sciences list, 6 hours from campus General Education Humanities and the Arts list, and 6 hours from a liberal education list approved by the college or from the campus General Education lists for Social and Behavioral Sciences or Humanities and the Arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course, (ii) one non-western culture(s) course, and (iii) one U.S. Minority Culture(s) course from the General Education cultural studies lists. Most students select general education courses that simultaneously satisfy these cultural studies requirements.
5. MATH 285 may be replaced by MATH 441 followed by MATH 442.
6. To be chosen from a departmentally approved list of Technical/Professional Option Electives (http://physics.illinois.edu/current/undergrad/ep_options.asp), in consultation with the student’s advisor, for the option elected (or a list fashioned for a departmentally approved custom option). The number of credit hours varies 12-22 depending upon the option chosen.
7. The flexible physics core requirement consists of three courses chosen from a departmentally approved list of Flexible Physics Core Electives with at least one of them being a lab course, PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of credit hours varies 9-15 depending upon the courses chosen.
8. For courses chosen with more than 3 hours credit, the surplus hours may be used to meet free elective requirements.
9. To be chosen from a departmentally approved list of Mathematics Electives (http://physics.illinois.edu/undergrad/math-options.asp). Any course satisfying the Mathematics Elective cannot be used to satisfy any other requirement.
10. If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.
11. Taken if needed to complete a technical/professional option requiring more than 12 hours of credit.

**Physics, BS (LAS Specialized Curriculum)**

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. However, students who want to pursue a combined major and minor, a double...
 major, or a double degree should consider the LAS Science and Letters Curriculum in Physics because of the greater flexibility it offers.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to plan ahead to allow space in their programs for undergraduate research.

for the degree of Bachelor of Science Major in Physics (LAS Specialized Curriculum)

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

Departmental distinction: Graduation with distinctions awarded to students who complete 8 additional hours of 300- or 400-level physics courses or advanced courses in closely related technical subjects and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A minimum of 126 hours required for graduation.

GPA requirements: Students in the Specialized Curriculum beyond the freshman year must maintain an overall grade point average of at least 2.5 and also a grade point average of 2.5 in all required mathematics and physics courses.

for the degree of Bachelor of Science in Liberal Arts and Sciences: Major in Physics (Sciences and Letters)

department website: https://physics.illinois.edu/
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad-info@physics.illinois.edu

The Physics Major (Sciences and Letters) is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees.

Students in this major must choose an approved elective technical or professional option no later than the end of the second semester of the sophomore year. A set of pre-approved options is available via the departmental web site (http://physics.illinois.edu/undergrad/las-options.asp) and from the departmental undergraduate studies office. Students may also design and follow a "custom option" subject to departmental approval. Students completing the Astrophysics option will earn a minor in Astronomy, if appropriate Minor form is filed.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement
in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to plan ahead to allow space in their programs for undergraduate research.

for the degree of Bachelor of Science in Liberal Arts and Sciences: Major in Physics (Sciences and Letters)

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Graduation with distinction is awarded to students who complete 8 additional hours of 300- or 400- or 500-level physics courses or advanced courses in closely related technical subjects, and who have attained cumulative grade point averages as follows: distinction, 3.5; high distinction, 3.8; highest distinction, 3.8 plus acknowledgement of truly outstanding work/research.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 65-73 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus. Minimum hours required for graduation: 120 hours.

GPA requirements: Students in the major must maintain an overall grade point average of at least 2.0 and also a grade point average of at least 2.0 in all required physics and mathematics courses. To be permitted to enroll in advanced physics courses in this major a student must maintain at least a 2.0 average in all attempts at science and mathematics courses taken at the University of Illinois.

A set of technical or professional courses that addresses an intellectually coherent body of knowledge. At least 9 hours should be at the 200-level or higher. Required courses may not be included in the set. Students may select from a list of pre-approved options or design a custom option, subject to departmental approval.

1 MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Physics: Physics Teaching, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences: Major in Physics (Sciences and Letters), Physics Teaching Concentration

department website: https://physics.illinois.edu/
department faculty: Physics Faculty (https://physics.illinois.edu/people/directory/)

overview of college admissions & requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
college website: https://las.illinois.edu/
email: undergrad-info@physics.illinois.edu

This concentration fulfills state certification requirements to teach high school physics (grades 9-12) through the AP/honors level and general science (high school biology, chemistry, earth and space science, and environmental science up to but not including the AP/honors level).

Time to degree completion varies. Minimum time to completion is 8 semesters, some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook for more information.

for the degree of Bachelor of Science in Liberal Arts and Sciences, Major in Physics (Sciences and Letters), Physics Teaching Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Distinction is determined by a combination of grade point average and achievement in student teaching. The student's practice teaching experience will be evaluated by the departmental honors adviser and the teaching supervisor. Distinction requires a 3.2 grade point average; high distinction, 3.4; highest distinction, 3.6. Students desiring distinction should consult with the departmental honors adviser during the junior year.
General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required major and supporting course work normally equates to 65-73 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Teacher Education requirements: Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching. See the College of Education section for requirements of the minor (http://catalog.illinois.edu/undergraduate/education/secondary/) (39 hours).

GPA requirements: To remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. http://www.cote.illinois.edu/

Minimum hours required for graduation: 120 hours.

overview of college admissions & requirements: Agricultural, Consumer & Environmental Sciences (http://catalog.illinois.edu/schools/aces/academic-units/#text)
college website: https://aces.illinois.edu/

Information listed in this catalog is current as of 09/2021
With a degree in Plant Biotechnology you can help feed billions sustainably, improve our planet’s health, and make a direct impact on agriculture and the world. Advance plant breeding and plant improvement by learning critical skills in molecular biology, genetics, and genomics.

Plant Biotechnology is a part of our daily lives in applications such as developing nutritionally enhanced foods, enabling sustainable agricultural production, and engineering plants for industrial and medical purposes.

The plant biotechnology major provides an interdisciplinary curriculum integrating the science and practice of crop production through courses in molecular biology, genetics and genomics, biochemistry, plant protection, data analysis and more.

**college website:** [https://las.illinois.edu/](https://las.illinois.edu/)

**email:** pol@illinois.edu

Students must complete one concentration in consultation with an academic advisor.

---

*Information listed in this catalog is current as of 09/2021*
5 Year BALAS / MA in Political Science and European Union Studies

The Department of Political Science, along with the European Union Center, offers a 5 year BALAS/MA in Political Science and European Union Studies. In order to be admitted to this degree program, students apply through a joint application process to their BALAS — granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

**Departmental distinction**

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
   c. Earn a grade point average in of 3.67 or higher.
2. Honors Program Track. On this track, a student must:
   a. Complete a senior thesis,
   b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
   c. Be admitted to and maintain good standing within the departmental honors program, and
   d. Complete required coursework in the departmental honors program with a grade point average in and between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of or or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) of political science on this campus,
4. Application and affirmative vote of a departmental committee.

**High Distinction**

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in and of 3.67 or higher.

**Political Science: Citizen Politics, BALAS**

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration*

**department website:** https://www.pol.illinois.edu
**department faculty:** Political Science Faculty (https://pol.illinois.edu/directory/faculty/)
**advising:** Political Science advising (https://pol.illinois.edu/academics/undergraduate-program/advising/)
**overview of college admissions & requirements:** Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)
**college website:** https://las.illinois.edu/
**email:** pol@illinois.edu

Citizen politics is the study of mass politics. Topics include how and why citizens form political attitudes, beliefs, and identities; how people engage in political decision-making; and what political behaviors individuals choose to participate in.

See the Political Science BALAS page (p. 351) for departmental distinction information.

*for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration*

See the Political Science BALAS page (p. 351) for departmental distinction information.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor.

Restrictions: Except as otherwise noted, or by petition to the department, PS 191, PS 291, PS 292, PS 490, PS 491, and PS 492 are excluded from all concentration lists maintained by the department. These courses may be used only for requirements of courses “at any level” without respect to concentration. As an exception, these courses may be used toward the General Concentration or the Civic Leadership Concentration.

Students may include in the major no more than nine hours from any combination of PS 291, PS 292, PS 490, PS 491, and PS 492. Of these, only six hours from PS 490, PS 491, and PS 492 within that group can count toward the major.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student...
with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

**General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

### Citizen Politics Concentration Requirements

<table>
<thead>

email: pol@illinois.edu

International relations (IR) is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors across the interstate system.

Students take advanced courses in two or more of the following topics: international law and organization, international cooperation, international political economy, globalization, foreign policy, diplomacy, political strategy in IR, conflict, interstate war, civil war, terrorism, global environmental politics, and international human rights.

See the Political Science BALAS page (p. 351) for departmental distinction information.

See the Political Science Distinction page (p. 351) for departmental distinction information.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

The Law and Power concentration teaches students about how power, law, and ideas about justice shape political life. Courses cover questions concerning the procedures for social and legal change, the status of citizens in social and political institutions in society, and the ways that ideology and identity categories shape the pursuit of equality and justics.

See the Political Science BALAS page (p. 351) for departmental distinction information.

Information listed in this catalog is current as of 09/2021
This concentration explores political institutions and processes and how and why they work as they do. Courses use historical and contemporary examples to understand the political system the founders established and the ways it has shaped modern politics. Students study institutions such as the presidency, Congress, courts, the bureaucracy, and political parties, with a focus on their organization and on important patterns of behavior within them, such as interest group lobbying and campaigning.

See the Political Science BALAS page (p. 351) for departmental distinction information.

Learning Outcomes: Political Science, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science

1. Students will be able to apply central concepts of the scientific method to the study of politics, and demonstrate an ability to draw inferences from data.
2. Students will have a foundational knowledge of facts, concepts, and typologies in their chosen subfield in political science.
3. Students will be able to demonstrate basic knowledge of central theories in their chosen subfield and show how to evaluate those theories.
4. Students will be able to define political science and its subfields, drawing contrasts with other social sciences.
5. Students will be able to apply concepts, methods, and theories to research projects, internships, and/or off-campus experiences.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Portuguese

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department’s honors adviser.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: 42-45 hours including at least 27 hours in Portuguese courses beyond the 100 level.
Twelve hours of 300- and 400-level courses in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours

Supporting course work or a minor in a related area of study chosen by the student and approved by the adviser. There is a wide choice of supporting courses because the student’s interests may vary from Iberian literature to animal husbandry in Angola and urbanology in Brazil. Supporting areas may include humanities (comparative literature, comparative religion, linguistics, philosophy), social sciences (anthropology, geography, history, Latin American studies, political science, sociology), education, fine and applied arts, and/or journalism. Other fields, or groups of fields, may be approved by the Portuguese undergraduate adviser.

1 A minor consists of a minimum of 18 hours.

Learning Outcomes: Portuguese, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Portuguese

1. Students learn and practice the nuances of the language in all of its written and spoken modes, formally and informally
2. Students demonstrate special cultural and linguistic literacy in relation to Portuguese and the ability to use concepts and methods from multiple disciplines
3. Students know the history of Brazil’s interplay with Latin America and the Lusophone world
4. Students evaluate the dynamics of power between dominant and subordinate groups in Brazil, especially through the lens of class, ethnicity, gender, race, and sexuality
5. Students gain a global perspective on civil society and social justice through Brazil and the Portuguese language

Students choose from the following concentrations:

- Behavioral Neuroscience (p. 361)
- Clinical/Community Psychology (p. 361)
- Cognitive Neuroscience (p. 362)
- Cognitive Psychology (p. 363)
- Developmental Psychology (p. 364)
- Diversity Science (p. 365)
- Intradisciplinary Psychology (p. 365)
• Organizational Psychology (p. 366)
• Personality Psychology (p. 367)
• Social Psychology (p. 367)

The Psychology major is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others.

The Psychology major provides both depth and breadth of knowledge in Psychology. The major consists of an introductory course, a statistics course, a breadth of knowledge or foundation in the different areas of psychology that comes from a set of core courses, a research methods course, and elective courses that give students a depth of knowledge. Each concentration, except for intradisciplinary psychology, has a core course specific to that area of psychology with a research methods course designed for that concentration. In formulating their Plan of Study, students can decide either to undertake a concentration in Intradisciplinary Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

The Department of Psychology also offers a BSLAS in Brain & Cognitive Science (p. 76).

Academic Advising
The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Areas of Interest
Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major:

• Behavioral Neuroscience is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organismic processes.

• Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.

• Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.

• Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.

• Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.

• Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.

• Engineering psychology is the study of human behavior in the context of interactions between humans and machines.

• Organizational psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.

• Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual’s behavior and to predict an individual’s future behavior.

• Quantitative psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.

• Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.

• Visual cognition and human performance is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Prescribing Psychologists
The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

• 2-semester course sequence in chemistry or biochemistry with lab
• 1 semester microbiology with lab
• 1 semester general biology for science majors
• 1 semester physiology

Information listed in this catalog is current as of 09/2021
Minimum hours required for graduation: 120 hours.

Twelve hours of 300- and 400-level in the major must be taken on this campus. The remaining major and supporting coursework requirement normally equates to 32-36 hours of Psychology courses.

Minimum required major and supporting course work: Normally requiring 8 hours of coursework. Generally, students select four related courses from the major field of study. Stevenson and colleagues' (Stevenson et al., 2020) study revealed that students who select four related courses from the major field of study had higher academic performance and satisfaction compared to those who select four unrelated courses. Stevenson and colleagues (2020) recommended that students select four related courses from the major field of study to achieve higher academic performance and satisfaction.

Psychology: Behavioral Neuroscience, BSLAS

Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.

Learning outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology

The student learning outcomes are adapted from the American Psychological Association’s (APA) “Guidelines for the Undergraduate Psychology Major” (2013). These guidelines consist of general learning outcomes along with specific indicators that can be assessed. Two sets of indicators are provided by the APA depending on whether a student has completed just the foundational courses (100# level classes) or is finishing the elective courses (300# and 400# level classes) necessary for each concentration within the Psychology major. The four learning outcomes that we will be evaluating are:

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes, 1.2) developing a working knowledge of the different content or program areas in psychology, and 1.3) describing the application of psychology to everyday life.
2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific reasoning to interpret psychological phenomena; 2.2) demonstrating psychological information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.
3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels.
4. Students will be prepared to apply psychology#specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply
psychological content and skills to career goals; 4.2) demonstrate project management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

Recreation, Sport & Tourism, BS
for the degree of Bachelor of Science Major in Recreation, Sport & Tourism

department website: http://rst.illinois.edu/
department faculty: Recreation, Sport, & Tourism Faculty (http://rst.illinois.edu/faculty/)
college catalog page: Applied Health Sciences (http://catalog.illinois.edu/schools/ahs/academic-units/)
college website: http://ahs.illinois.edu/

The Recreation, Sport & Tourism, BS degree program includes a set of three concentrations, of which a student must complete at least one:

Recreation Management Concentration (p. 369)
Sports Management Concentration (p. 370)
Tourism Management Concentration (p. 371)

The Department of Recreation, Sport and Tourism (RST) originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals in the field. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver RST services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating theory, management, and research, the program allows students to focus on a major market segment within the RST field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 219 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program
All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses (RST 480 and RST 485). Students register for RST 480 after completing a series of required RST courses. During this semester, students make final arrangements for completing RST 485 the following semester.

The RST 485 Internship is taken after the student satisfactorily completes all required RST course work, including RST 480. RST 485 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

Learning Outcomes: Recreation, Sport & Tourism, BS

Learning outcomes for the degree of Bachelor of Science Major in Recreation, Sport & Tourism

Students graduating with the B.S. in Recreation, Sport & Tourism should be able to:

1. Communicate effectively in writing and in oral presentations about issues in recreation, sport and tourism.
2. Demonstrate a basic understanding of the history and theoretical underpinnings of recreation, sport and tourism in modern society.
3. Demonstrate basic knowledge about various dimensions of diversity, and the impact these dimensions have on service delivery recreation, sport and tourism organizations.
4. Demonstrate a basic understanding of the essential management functions necessary to deliver and manage services in recreation, sport and tourism organizations.
5. Demonstrate an ability to apply knowledge of basic management principles to professional practice.
6. Demonstrate the ability to design, implement, and evaluate services in recreation, sport and tourism venues.
7. Identify basic research methodologies at a level sufficient to collect, analyze, apply, and critique applied research data.

Total Concentration Hours  9

For the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser’s office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser’s office.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental adviser.

Restrictions: Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

Language Requirements

The major in Religion does not require any language study beyond meeting the University’s general education language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate language study.

Capstone Experience

Research paper for one 400-level course in Religion (REL): Each major must make special arrangements with a professor teaching a 400-level REL course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each Religion major has conducted a significant research project. REL 493 can be used to satisfy this requirement.

Departmental distinction

To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of REL 493. The level of distinction is based on evaluation of the thesis.
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: A minimum of 30 hours of coursework is required for the major. This includes (a) REL 230 or REL 231, and (b) completing a Capstone course. At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

</table>

Distribution Requirement: Courses taken must include:

(a) Two courses in the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office and

(b) Two courses in the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office.

| Three courses in a primary area of study | 9   |
| Two courses in a secondary area of study | 6   |
| Capstone Experience: a 400-level REL course in which a research project is undertaken and a 20 page research paper is written. This course can be REL 493 and can also be used to fulfill part of the distribution or primary or secondary area of study requirement. | 3   |

Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the primary area of study cannot also be used to fulfill the secondary area of study.

Learning Outcomes: Religion, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

1. Students will be able to understand and explain how global religious traditions reflect the social contexts in which they emerged, and in turn how the traditions have affected and continue to affect those societies;
2. Students will be able to analyze, and interpret (in both written and oral communication) the relationship between religious traditions and other forms of human cultural and social activity, including languages, literature, arts, political and social movements;
3. Students will be able to appreciate the diversity of global religious traditions and express that appreciation in activities and experiences meaningful to them;
4. Students will be able to develop sound and well-formed written arguments on matters of interest to them that respond insightfully to scholarship significant to their field of study.
5. Students will be able critically to assess and evaluate theories, arguments, and positions that have shaped the fields of the study of religion and individual global traditions.

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student’s interests and career goals, in consultation with the undergraduate advisor of the Center.

The major in Russian, East European, and Eurasian Studies consists of three components: 1) language study (Russian, Polish, Czech, Ukrainian, Bosnian-Croatian-Serbian, Turkish, and more); 2) a multidisciplinary area studies focus; and 3) concentration in a single discipline. Language study can be in Russian or in any of the other languages of the region offered at the University. Students also take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. In addition, the concentration in a single discipline provides students with deep knowledge of a specific field that can qualify them for graduate or professional study. Many students also use this concentration to double major. With this program, the REEES major provides students with an interdisciplinary focus on issues critical to the region and foundational language training necessary for professional specialization in the area.

Students often go on to careers in government service (foreign service, FBI, CIA) or to work at NGOs (environment, human rights, and other international careers) in addition to publishing, editing, writing, translation, international business, law, teaching, and research.

REEES is one of two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The REEES major has a current affairs focus and multidisciplinary area studies that develops students’ skill sets in the humanities, social sciences, and other fields. The major in Slavic Studies emphasizes the study of language and literature, and students develop intensive cultural literacy and communication skills through humanities-oriented training. Many Slavic Studies majors go on to careers in writing and editing, media, or work with international cultural foundations and organizations. Both
majors are excellent preparation for law school or graduate school and careers in teaching or research.

_for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies_

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 48 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Component 1</td>
<td>Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.</td>

Learning Outcomes: Russian, East European, & Eurasian Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

1. Global Competence and Intercultural Skills
   • Definition: REEES majors will engage and build productive relationships, founded in proficient language skills, with communities, organizations, and individuals across cultures, both at home and abroad.

2. Interdisciplinary Perspective
   • Definition: REEES majors will recognize and mobilize multiple types of data and forms of analysis, drawn from paradigms in the humanities and social sciences, to propose solutions to complex problems.

3. Analytical Reasoning and Broad Knowledge Base
   • Definition: REEES majors will critically analyze and evaluate interpretations of social, cultural, political, and economic phenomena, drawing on a broad knowledge base and research experience.

Slavic Studies, BALAS

_for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies_

department website: http://www.slavic.illinois.edu
department faculty: Slavic Faculty (http://www.slavic.illinois.edu/directory/faculty/)
overview of college admissions & requirements: LAS admissions information (https://www.las.illinois.edu/prospective/)
college website: https://las.illinois.edu/
email: slavic@illinois.edu

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

• Major in Slavic Studies, Czech Studies concentration (p. 375)
• Major in Slavic Studies, Polish Studies Concentration (p. 375)
• Major in Slavic Studies, Russian Language, Literature, & Culture Concentration (p. 376)
• Major in Slavic Studies, South Slavic Studies Concentration (p. 377)
• Major in Slavic Studies, Ukrainian Studies Concentration (p. 378)

Unlike the major in Russian, East European, and Eurasian Studies, which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies

The Department of Slavic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS -granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Learning Outcomes: Slavic Studies, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies

1. Proficiency in the target language associated with the major track of at least intermediate high level on the ACTFL scale, with some control of advanced low functions.
2. Improved and effective writing and communication skills in the English language.
3. Coherent knowledge and functional grasp of the culture(s) and history(ies) of the region or regions and peoples targeted by the major track.
4. Analytical and interpretive abilities making use of the critical tools and methodologies taught in our courses of literary and cultural study.

Social Work, BSW

for the degree of Bachelor of Social Work Major in Social Work

Information listed in this catalog is current as of 09/2021
The Bachelor of Science in Social Work can be completed through our traditional program on the Urbana campus or through our upper level completer program in the Chicago area. The traditional program is open to freshmen, off-campus transfers and inter-campus transfers. Courses are taken on the Urbana campus. The completer program is open to upper division (junior/senior level) off-campus transfers and inter-campus transfers. Courses are a blend of online and in-person in the Chicago area.

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, healthcare, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing status in many masters of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive an MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

The social work major prepares practitioners for generalist social work practice with individuals, groups, families and communities. The curriculum requires a minimum of 120 hours for graduation.

for the degree of Bachelor of Social Work Major in Social Work (on campus & online)

Departmental Distinction: The top 10% of the BSW graduating class will graduate with distinction.

Minimum required major and supporting course work: A minimum of 53 course hours of social work coursework, which includes 15 credit hours of combined agency-based field practicum (internship) and field seminar.

Information listed in this catalog is current as of 09/2021
Sociologists explore human social life at every level, from personal relationships to global society. Major topics of study include inequality, social movements, criminology, race and class relations, gender, social institutions such as religion and education, and fundamental population processes like immigration and mortality. Sociologists use a range of methods and theories to develop and evaluate ideas about social life.

As a student of Sociology, you will train in research methods and become fluent in social statistics while understanding the complexity of societal diversity and social change. These skills are usable in a wide variety of work settings and are skills that employers value.

Recent graduates have pursued careers with the FBI, as Human Resource Specialists, with non-profit organizations, as policy officers, and have earned advanced degrees in Social Work, Sociology, Law, Medicine, and more. The career paths of Sociology alumni are as diverse as our student population – who represent the best and the brightest from a variety of backgrounds.

In the Department of Sociology you can choose the major in Sociology, the minor in Sociology, or the minor in Criminology, Law and Society (CLS). Whereas the major and minor in Sociology provide an overview into the broader disciplines of Sociology, the minor in CLS is a more specialized approach for those students interested in law and justice related careers and occupations.

Each student should see a Sociology departmental advisor at least once a year to choose sociology courses and to monitor their progress.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

- Have completed SOC 490 or SOC 495
- Attain a UIUC GPA of 3.25 or higher
- If both these requirements are met, then the MAJOR GPA distributes as follows:
  - 3.25 – Distinction
  - 3.50 – High Distinction
  - 3.75 – Highest Distinction

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 44 hours including 32 hours of Sociology courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Large-scale societal change begins with individuals like you – hungry for knowledge and ready to make a real difference; in the Department of Sociology you will study the inner workings of society with a focus on either Inequalities or Global Sociology.

Learning Outcomes: Social Work, BSW

Learning outcomes for the degree of Bachelor of Social Work Major in Social Work

Students graduating with the Bachelor of Social Work should be able to:

1. Demonstrate ethical and professional behavior
2. Engage diversity and difference in practice
3. Advance human rights and social, economic, and environmental justice
4. Engage in practice-informed research and research-informed practice
5. Engage in Policy Practice
6. Engage with individuals, families, groups, organizations, and communities
7. Assess individuals, families, groups, organizations, and communities
8. Intervene with individuals, families, groups, organizations, and communities
9. Evaluate practice with individuals, families, groups, organizations, and communities

Sociology, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology
Learning Outcomes: Sociology, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

1. Apply sociological theories to understand social phenomena.
2. Critically evaluate explanations of human behavior and social phenomenon.
3. Apply scientific principles to understand the social world.
4. Evaluate the quality of social scientific methods and data.
5. Rigorously analyze social scientific data.
6. Use sociological knowledge to inform policy debates and promote public understanding.

Select one of the following capstone experiences:

- SOC 400 Internships
- SOC 450 Senior Capstone Seminar
- SOC 495 Senior Honors Seminar

Students may select any sociology courses to fulfill the requirement of 32 hours in Sociology

Supporting course work taken outside the Department of Sociology

1. If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 32 hours of Sociology courses.
2. Supporting course work is designed to expand the student’s education, and should be taken outside of Sociology. A student may take supporting course work from one department, such as psychology, economics, history, or statistics, or from a cohesive selection of courses in various units. With an advisor’s approval, departmental or interdisciplinary minors, or a double major, may be used to fulfill the requirements of supporting course work.

Undergraduate degree programs in Spanish & Portuguese Spanish, BALAS (p. 381)
Teaching of Spanish, BA (p. 423)
Portuguese, BALAS (p. 359)

5 Year BALAS/MA in Spanish and European Union Studies - In addition to our 4 year BALAS programs, the Department of Spanish and Portuguese with the European Union Center offers a 5-year BALAS /MA degree program in Spanish and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

A Major Plan of Study Form must be completed and submitted to the Student Affairs Office before the end of the fourth semester (48-60 hours). Please see your adviser.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department’s honors adviser.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: equates to 48 hours, including 33 hours in Spanish courses at the 200-level or higher.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Supporting course work, a minor, or a second major in an area of study chosen by the student and approved by the advisor.

Total Hours 48-54

1. With permission of the adviser, students will be able to take up to two SPAN courses that are taught in a language other than Spanish. Or up to two 200-level SPAN courses can be substituted with any of the following: BASQ 401 and BASQ 402, CATL 401 and CATL 402, PORT 401 and PORT 402, and LAST 445. These courses do not count for advanced hours and do not substitute for SPAN 228.
2. A minor generally consists of 16-21 hours.

Learning Outcomes: Spanish, BALAS

Learning Outcomes for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Spanish
1. Intellectual Reasoning and Knowledge
   • Definition: Students of Spanish will acquire and apply broad and deep knowledge about the Spanish language and the cultures of the Spanish-speaking world.

2. Translingual competence
   • Definition: Students of Spanish will understand and analyze the nature of the Spanish language, “languages” in general, the social nature of languages and demonstrate intercultural communicative competence.

3. Transcultural competence
   • Definition: Through critical reflection, students of Spanish will understand and analyze the products, practices and perspectives of their own culture, cultures of the Spanish-speaking world and the nature of “culture” itself.

4. Communicative Competence in Spanish
   • Definition: In reading, writing, listening comprehension and speaking, students will acquire advanced proficiency in Spanish as described by the standards set by the American Council on the Teaching of Foreign Languages (ACTFL).

department faculty: Special Education Faculty (https://education.illinois.edu/faculty-finder/sped/)
college website: https://education.illinois.edu/

Curriculum Preparatory for Learning and Behavior Specialist I in Special Education

This program is designed to prepare special education teachers for students ages 3-21. An applicant must have a cumulative grade point average of at least 2.5 (A = 4.0), a minimum of 50 hours of prior experience with individuals with disabilities, and sophomore or higher standing upon enrollment in the program. A minimum of 125 semester hours of credit is required for graduation. To proceed to the five semester professional education sequence, students must have completed all degree requirements outside of the professional education coursework.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade-point averages of 2.5 (A = 4.0). Candidates in teaching licensure programs must maintain a C or better in ALL content and professional education coursework. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu/)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Speech & Hearing Science: Audiology, BS
for the degree of Bachelor of Science Major in Speech & Hearing Science, Audiology Concentration

department website: http://shs.illinois.edu/
department faculty: https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory/)
college catalog page: http://catalog.illinois.edu/schools/ahs/academic-units/
college website: http://www.ahs.illinois.edu/

The Audiology concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the audiology concentration is the most directly connected to clinical practice in audiology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org.

Information listed in this catalog is current as of 09/2021
for the degree of Bachelor of Science Major in Speech & Hearing Science, Audiology Concentration

**General Education:** Students are advised to select their General Education course requirements from the University’s approved list of courses (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

**Electives**

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

- Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women’s Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science

Information listed in this catalog is current as of 09/2021
The Cultural-Linguistic Diversity concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socio-economic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org

Speech & Hearing Science: Neuroscience of Communication, BS
for the degree of Bachelor of Science Major in Speech & Hearing Science, Neuroscience of Communication Concentration

Department website: http://shs.illinois.edu/
Department faculty: https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory/)
College catalog page: http://catalog.illinois.edu/schools/ahs/academic-units/
College website: http://www.ahs.illinois.edu/

The Neuroscience of Communication concentration provides an interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org.

for the degree of Bachelor of Science Major in Speech & Hearing Science, Neuroscience of Communication Concentration

General Education: Students are advised to select their General Education course requirements from the University’s approved list of courses (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

Students must also take 6 hours from the following specified electives:

- Any Chemistry or Physics 100-level class
- IB 100 Biology in Today's World
- PSYC 204 Intro to Brain and Cognition
- PSYC 216 Child Psych
- or EPSY 236 Child Development in Education
- PSYC 230 Perception & Sensory Processes
- PSYC 224 Cognitive Psych
- PSYC 248 Learning and Memory

Speech & Hearing Science: Speech-Language Pathology, BS

for the degree of Bachelor of Science Major in Speech & Hearing Science, Speech-Language Pathology Concentration

department website: http://shs.illinois.edu/
department faculty: https://ahs.illinois.edu/shs-directory (https://ahs.illinois.edu/shs-directory)
college catalog page: http://catalog.illinois.edu/schools/ahs/
college website: http://www.ahs.illinois.edu/

The Speech-Language Pathology concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the Speech-Language Pathology concentration is the most directly associated with opportunities for clinical practice in speech-language pathology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: http://www.asha.org.

Learning Outcomes: Speech & Hearing Science, BS

Learning outcomes for the degree of Bachelor of Science Major in Speech & Hearing Science

1. Students will describe basic speech, language, and hearing processes across the lifespan from the biological, behavioral, and social science perspectives.
2. Students will apply knowledge of how disruptions in speech, language, and hearing processes relate to human communication functioning and disability.
3. Students will demonstrate the ability to read and evaluate literature related to human communication processes across academic disciplines.
4. Students will apply knowledge of cultural-linguistic diversity to inform discussions about human communication functioning and disability.

Statistics & Computer Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Statistics & Computer Science

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement. Minimum required major and supporting course work: Normally equates to 68-72 hours. At least 12 hours of 300- and 400-level courses must be taken on this campus. Minimum hours required for graduation: 120 hours
MATH 257  Linear Algebra with Computational Applications  3
or MATH 415  Applied Linear Algebra

Computer Science Foundation

CS 124  Introduction to Computer Science I  3
CS 128  Introduction to Computer Science II  3
CS 173  Discrete Structures  3
CS 222  Software Design Lab  1
CS 225  Data Structures  4

Choose one of the following combinations:  8-11

- CS 233  Computer Architecture & CS 241  and System Programming

OR

- CS 240  Introduction to Computer Systems

& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491. These two courses must be distinct from all other courses used to fulfill program requirements or options.

CS 357  Numerical Methods I  3
CS 374  Introduction to Algorithms & Models of Computation  4
CS 421  Programming Languages & Compilers  3

- CS 410  Text Information Systems
- CS 411  Database Systems
- CS 412  Introduction to Data Mining
- CS 446  Machine Learning
- CS 481  Advanced Topics in Stochastic Processes & Applications
- CS 482  Simulation

Total Hours  68-72

Statistics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major
in Statistics

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

Undergraduate degree programs in Statistics

Statistics, BSLAS (p. 391)

Statistics & Computer Sciences, BSLAS (p. 390)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major
in Statistics

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70-72 hours.

Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Learning Outcomes: Statistics, BSLAS

Learning Outcomes for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Statistics

Statistics students will:

1. Be able to apply mathematical and statistical reasoning to draw valid conclusions from data;
2. Communicate the results of a statistical analysis effectively in writing, through visualizations, and orally;
3. Be competent in the use of statistical software, in data management, and in writing statistical code;
4. Be adept in the use of modern methods of statistical computing, statistical learning, and data science;
5. Work effectively as part of a team.

**Total Hours:** 54

1. For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.

2. BUS 101, BUS 201, BUS 301, and BUS 401 are required for all Gies College of Business students. Students who enter the College their first year take each sequential course every fall. Inter-College transfer students take BUS 301 and BUS 401 in their sophomore year. Off-campus transfer students take BUS 101 and BUS 201 in their junior year.

3. Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.

4. Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

5. This course includes limited voluntary participation as a subject in experiments.

6. CS 105 fulfills a Quantitative Reasoning I requirement.

- **Overview of College Admissions & Requirements:** Fine & Applied Arts [http://catalog.illinois.edu/faa/](http://catalog.illinois.edu/faa/)
- **College Website:** [https://faa.illinois.edu/](https://faa.illinois.edu/)

Students pursuing this major select one of seven concentrations:

- General Studio Art Concentration (p. 395)
- Fashion Concentration (p. 394)
- New Media Concentration (p. 396)
- Painting Concentration (p. 397)
- Photography Concentration (p. 397)
- Printmaking Concentration [http://catalog.illinois.edu/undergraduate/faa/academic-units/school-art-design/studioart/ba/printmakingconcentration/](http://catalog.illinois.edu/undergraduate/faa/academic-units/school-art-design/studioart/ba/printmakingconcentration/)
- Sculpture Concentration (p. 399)

The Bachelor of Arts in Studio Art (with concentrations) focuses on the study of art, design, and art history in the context of a broader program of general study offered by the diverse research and teaching activities across the University of Illinois, Urbana-Champaign campus. It differs from the Bachelor of Fine Arts in that it offers students rigorous education in studio art while permitting them time to pursue studies in other areas, with a significant part of the educational experience occurring in areas outside the studio. Students choose from courses that will lead to concentrations in Fashion, Painting, Photography, Sculpture, Printmaking, New Media, or (general) Studio Art. These options permit students to experience a broad range of media practices or to focus on media-specific credits. Concentrations will be noted on the student’s degree, indicating a level of expertise in a particular sub-discipline that will be useful in the pursuit of advanced study or in employment opportunities where particular material skills are needed.
Foundation courses for the BA in Studio Art introduce basic materials and conceptual approaches to making art, using traditional media including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications. By incorporating new and traditional strategies and technologies students will understand visual organization and communication in 2D (artworks in two dimensions, such as drawing, painting or printmaking), 3D (artworks in three dimensions, such as sculpture and installation), and 4D (artworks of a time-based nature, such as coding, video, sound and performance).

The advanced BA Studio Art student can look forward to a changing menu of courses on a variety of topics, taught by a diverse faculty with expertise in a wide variety of conceptual, material and technical strategies for making art. The BA Studio Art's curriculum offerings are designed to reflect an increasingly dynamic culture and provide students with experiences and skills that promote adaptability after graduation.

BA Studio Art students are provided with individual studio spaces housed in a communal studio building, where they pursue a self-selected studio practice. The communal studio configuration provides the geography for a strong, vibrant community of student-artists working together as they establish their focus and participate in exhibitions, performances, and critiques.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

A portfolio review is required for admission to the School of Art and Design.

Studio Art: Fashion, BASA

Students in the BASA and BFASA who choose a concentration in Fashion will focus on developing their own unique apparel design process with an emphasis on sustainable practices while becoming familiar with the various aspects of the fashion industry from concept to consumer. Students will be introduced to various modes of research and ideation, gaining the tools to be able to effectively communicate and produce their two- and three-dimensional designs within the context of the history of fashion and the theoretical underpinnings that drive fashion and contemporary culture.

Introductory courses in Fashion give students an overview of the industry from customer development, design and production through manufacturing, promotion and sales. Students are introduced to the fundamentals of textiles and clothing design, and the basics of creating a fashion collection through the use of hand and digital illustration techniques. Further courses focus on the exploration of experimental design, patternmaking, and sewing skills while encouraging the development of the designer's personal creative vision within the context of fashion history and the consumer market. Additional courses bring a greater understanding of how to enact knowledge gained in an educational setting within the fashion industry, through sustainable fashion collection development and branding. Students are given the unique opportunity to showcase their constructed ensembles and mini-collections on the runway in the Re-Fashioned fashion show presented each spring. We offer experiences in a variety of classrooms designed to support explorations in bringing two-dimensional materials to three-dimensional forms, access to computer labs, digital output technologies including 3D printers, sewing and embroidery machines, and dress forms.

_for the degree of Bachelor of Arts in Studio Art Major in Studio Art, Fashion Concentration_

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

A portfolio review is required for admission to the School of Art and Design.

Students in the BASA and BFASA who choose a Photography concentration will focus on creating works of art that use photographic imagery. Faculty in the Photography program are committed to continually redefining fine art photography in an expansive and openly creative way. The ability to understand and employ photography’s unique narrative potential is emphasized alongside technical considerations. Our classes provide a balance of practice and theory, which assures the understanding and appreciation of both the interdependence and integration of creativity, production, and research.

Our photography faculty has international exhibition records and work in numerous museum and private collections. Their photographs, installations, books, films, and videos have won critical acclaim in the form of national reviews and grants ranging from the National Endowment for the Arts to the Illinois Arts Council. Faculty members have lectured on their work throughout the United States and abroad.

Collectively the faculty has a wide range of skills, and they use them to teach fine black and white printing, studio lighting, color photography, digital photography, video, installation art, the history of photography, and critical theory. Graduates of our program apply their knowledge in a variety of ways, as fine artists, commercial photographers, designers, gallery and museum professionals, or any field that requires visual literacy and creative thinking.

**Learning Outcomes: Studio Art, BASA**

Learning outcomes for the Bachelor of Arts Major in Studio Art

1. Students will understand and be able to apply basic principles of visual and material communication, including two-dimensional pictorial concepts, three-dimensional formal and spatial concepts, and a wide variety of media and formats for artistic production, and possess the ability to apply them to a specific aesthetic intent.

2. Students will demonstrate an ability and willingness to experiment and explore the expressive possibilities of various media, and artistic and creative strategies for self-directed art-making, and investigate the diverse activities and conceptual modes available to the contemporary artist, including work that directly addresses or engages with recent developments in the field of fine art as well as broader social questions and challenges. Students are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging.

3. Students will gain knowledge of, understand, and be able to apply concepts of visual rhetoric in the development of content, and be able to recognize and critically analyze an evolving variety of communicative practices in art and visual culture, including those that represent diverse cultures and sociopolitical positions, and to demonstrate openness to new social possibilities and a critical empathy towards both audiences and culture producers of differing histories, origins and identities.

4. Students will be willing and able to investigate and accommodate broad-ranging types of knowledge and artistic strategies for the purpose of synthesizing diverse and even disparate ideas in order to create sophisticated, unique works of art, participate in new types of collaboration, and to make innovative statements and hypotheses, or propose creative solutions to social, organizational and societal problems using aesthetic strategies.

5. Students concentrating in New Media create work for the new disciplinary mechanisms that have arisen to evaluate and promote artwork in digital media, but also for traditional institutional mechanisms of art distribution and art critique. As in Contemporary Art, work in New Media may take the form of performance, sound and
radio broadcast, gallery exhibition, curation, public art, cinema and video, a networked event, publication, or even scientific research.

6. Students will develop an innovative, imaginative, and entrepreneurial self-directed studio practice, will gain a deep understanding of their own creativity, be able to apply it in any context, and will learn to independently generate thematic investigation and implementation of research in a broad variety of social locations, including art and educational institutions, activist forums, and cyberspace. Students in the BASA will produce web and print based documents that serve to market and promote their practice as independent makers.

### Studio Art, BFASA

*for the degree of Bachelor of Fine Arts in Studio Art Major in Studio Art*

**school office**: 143 Art and Design Building, Champaign, IL 61820  
**contact**: Mark Avery, Coordinator of Undergraduate Academic Affairs  
**email**: mavery@illinois.edu  
**phone**: (217) 333-6632  
**department website**: School of Art & Design (https://faa.illinois.edu)  
**department faculty**: Art & Design Faculty (https://art.illinois.edu/index.php/people/faculty-staff/)  
**overview of college admissions & requirements**: Fine & Applied Arts (http://catalog.illinois.edu/faa/)  
**college website**: https://faa.illinois.edu/

Students pursuing this major select one of seven concentrations:

- General Studio Art Concentration (p. 403)  
- Fashion Concentration (p. 401)  
- New Media Concentration (p. 404)  
- Painting Concentration (p. 405)  
- Photography Concentration (p. 407)  
- Printmaking Concentration (p. 408)  
- Sculpture Concentration (p. 410)

The Bachelor of Fine Arts in Studio Art (BFASA) at the University of Illinois offers students unprecedented flexibility in determining their own courses and topics of study, engaging in a diverse, innovative curriculum. In response to a rapidly changing world in which artists and designers are constantly presented with new tools, platforms, topics, strategies and venues for exhibition, publication, performance and other types of cultural work, the BFASA prepares students for the workplaces of the future. The BFASA is designed to equip graduates with the skills necessary to not only create artwork, but to communicate, think critically and creatively, and gain experience in a broad range of topics that will prepare them as innovative artists and as global citizens. Students will navigate a dynamic curriculum that is responsive to current trends in art, culture and creativity. It encourages new, interdisciplinary initiatives and fosters collaboration and research at the undergraduate level within the context of a premier research university.

The BFASA at Illinois begins with basic material and technological tools and concepts in a variety of studio courses. Students are guided in the understanding of visual organization and communication in two, three, and four dimensions by utilizing both new and traditional technologies and strategies. Foundation courses introduce basic material and conceptual approaches to making art, using media from traditional disciplines including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications.

At the intermediate and advanced levels, curriculum offerings are designed to reflect an increasingly dynamic culture, and to provide students with experiences and skills that will enhance their adaptability. A changing menu of courses on a variety of topics is taught by a faculty with expertise in a wide variety of conceptual, material and technical strategies for making art.

BFASA students are provided individual studio spaces, where they develop a self-directed practice, housed in a communal studio building. The studio configuration provides the stage for a strong, vibrant community of student-artists working together as they establish their interests and participate in exhibitions, performances, and critiques. The capstone experience is the BFASA Thesis course, in which students develop an individually determined body of work based on their entire educational experience. A portfolio and written thesis paper will demonstrate their conceptual, technical and expressive abilities.

Our graduates will enter professional lives as artists at a time when the boundaries between art and other fields are vanishing. Creative individuals with broad and versatile material, technical and intellectual skills will be in demand within expanding diverse practices that comprise contemporary art and society.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/), Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

A portfolio review is required for admission to the School of Art and Design.

### Studio Art: Fashion, BFASA

*for the degree of Bachelor of Fine Arts in Studio Art Major in Studio Art, Fashion Concentration*

**contact**: Mark Avery  
**office**: 140 Art and Design Building, Champaign, IL 61820  
**email**: mavery@illinois.edu  
**phone**: (217) 333-6632  
**school website**: School of Art & Design (https://faa.illinois.edu/)  
**school faculty**: Art & Design Faculty (https://art.illinois.edu/about/faculty-directory/)  
**overview of college admissions & requirements**: Fine & Applied Arts (https://faa.illinois.edu/applying-faa/)

Students in the BASA and BFASA who choose a concentration in Fashion will focus on developing their own unique apparel design process with an emphasis on sustainable practices while becoming familiar with the various aspects of the fashion industry from concept to consumer. Students will be introduced to various modes of research and ideation, gaining the tools to be able to effectively communicate and produce their two- and three-dimensional designs within the context of the history

---

Information listed in this catalog is current as of 09/2021
of fashion and the theoretical underpinnings that drive fashion and contemporary culture.

Introductory courses in Fashion give students an overview of the industry from customer development, design and production through manufacturing, promotion and sales. Students are introduced to the fundamentals of textiles and clothing design, and the basics of creating a fashion collection through the use of hand and digital illustration techniques. Further courses focus on the exploration of experimental design, patternmaking, and sewing skills while encouraging the development of the designer’s personal creative vision within the context of fashion history and the consumer market. Additional courses bring a greater understanding of how to enact knowledge gained in an educational setting within the fashion industry, through sustainable fashion collection development and branding. Students are given the unique opportunity to showcase their constructed ensembles and mini-collections on the runway in the Re-Fashioned fashion show presented each spring. We offer experiences in a variety of classrooms designed to support explorations in bringing two-dimensional materials to three-dimensional forms, access to computer labs, digital output technologies including 3D printers, sewing and embroidery machines, and dress forms.

Studio Art: Photography, BFASA

for the degree of Bachelor of Fine Arts in Studio Art Major in Studio Art, Photography Concentration

contact: Mark Avery
office: 140 Art and Design Building, Champaign, IL 61820
email: mavery@illinois.edu
phone: (217) 333-6632

Students in the BASA and BFASA who choose a Photography concentration will focus on creating works of art that use photographic imagery. Faculty in the Photography program are committed to continually redefining fine art photography in an expansive and openly creative way. The ability to understand and employ photography's unique narrative potential is emphasized alongside technical considerations. Our classes provide a balance of practice and theory, which assures the understanding and appreciation of both the interdependence and integration of creativity, production, and research.

Our photography faculty has international exhibition records and work in numerous museum and private collections. Their photographs, installations, books, films, and videos have won critical acclaim in the form of national reviews and grants ranging from the National Endowment for the Arts to the Illinois Arts Council. Faculty members have lectured on their work throughout the United States and abroad.

Collectively the faculty has a wide range of skills, and they use them to teach fine black and white printing, studio lighting, color photography, digital photography, video, installation art, the history of photography, and critical theory. Graduates of our program apply their knowledge in a variety of ways, as fine artists, commercial photographers, designers, gallery and museum professionals, or any field that requires visual literacy and creative thinking.
