

COLLEGE OF VETERINARY MEDICINE

Transforming animal, human, and environmental health.

Biomedical science. The human-animal bond. Clinical care. Emerging infectious disease. Public health. Food safety. Food productivity. Environmental toxins. Specialized medicine.

It's all connected.

Through rigorous multi-species study, the College of Veterinary Medicine is uniquely positioned to explore **critical connections** among animal and human health, the environment, and agriculture. Through outreach programs and direct services, we touch the lives of thousands of animals and their owners. And through innovative education, we're preparing the next generation of veterinary scientists.
