CONCENTRATION IN NEUROSCIENCE OF COMMUNICATION

The Neuroscience of Communication concentration provides an interdisciplinary understanding of the neurological systems that underline human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Students must also take 6 hours from the following specified electives:

- Any Chemistry or Physics 100-level class
- IB 100 Biology in Today’s World
- PSYC 204 Intro to Brain and Cognition
- PSYC 216 Child Psych
- or EPSY: Child Dev in Education
- PSYC 230 Perception & Sensory Processes
- PSYC 224 Cognitive Psych
- PSYC 248 Learning and Memory
- SHS 291 Research Lab Experience in SHS
- SHS 375 Comm Partners & Health
- SHS 473 Augmentative & Alt Comm

Total Hours 19-20

1. Approved substitutions include: CHEM 101, CHEM 102 & 103, CHEM 108, PHYS 101, PHYS 140, PHYS 150, or PHYS 193 provided this is not being used to satisfy a university General Education requirement.
2. Provided courses are not used to satisfy a university General Education requirement.
3. Approved for S/U grading only. Must be arranged with individual faculty member.
4. Prerequisite: Senior level in the SHS program or consent of instructor.
