The Computer Science + Education, BS is sponsored jointly by the Department of Computer Science and the Department of Curriculum & Instruction. The major in Computer Science and Education is a flexible program for undergraduate students who plan to pursue careers in either field and offers two foci of concentration.

The Secondary Education concentration provides the coursework and field experience for students to be licensed to teach computer science in grade 9-12. The degree will prepare students to join the workforce as a teacher in high school institutions in the state of Illinois, providing them with the knowledge necessary to teach and develop computer science curricula.
