# COMPUTER SCIENCE + PHYSICS, BS

Physics focuses on quantitative descriptions for the behavior of physical systems. Computer science has a natural place in the study of physics. Computer science enables much more advanced computation than that available using pen and paper. These computational advances dramatically increase the complexity of physical systems that can be described quantitatively.

The Illinois CS+Physics program blends our physics and computer science degrees to give students the skills to both understand and carry out quantitative models of physical systems. This collaboration between Computer Science and Physics provides an innovative program for students who are interested in the intersection between computing and physics.

Students in the CS + Physics program will develop mastery in areas ranging from numerical methods and machine learning to algorithms for computational science and quantum computing. The program combines the domain expertise in Physics, including its computational aspects, with the broad-based expertise in computing from Computer Science. This unique approach allows students to bridge these two areas.

Students enrolled in CS+Physics have ample opportunity to explore both their interests in Physics and Computer Science through the selection of technical electives. In consultation with the academic advisor, each student will elect a set of technical courses broadening their knowledge of both Physics and Computer Science. Technical electives add a minimum of seventeen (17) hours to the core Physics and Computer Science combined curriculum.

The top-10 rated Physics and Computer Science programs provide students the unique opportunity to receive instruction from the top scientists in both subjects.

for the degree of Bachelor of Science in Computer Science plus Physics

## **Graduation Requirements**

Minimum hours required for graduation: 128 hours

Minimum Technical GPA (http://catalog.illinois.edu/undergraduate/ engineering/computer-science-physics-bs/go.grainger.illinois.edu/ TechnicalGPA/): 2.0.

TGPA is required for CS, Math, and Physics courses. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

## Minimum Overall GPA: 2.0

## **University Requirements**

Minimum of 40 hours of upper-division coursework, generally at the 300or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/generalinformation/degree-general-education-requirements/).

## **General Education Requirements**

Follows the campus General Education (Gen Ed) requirements (https:// courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Compositio	n	3
Humanities & the Arts (6 hours)		
Natural Sciences & Technology (6 hours)		
fulfilled by PHYS 2	11, PHYS 212	
Social & Behavioral Sciences (6 hours)		
Cultural Studies: Non-Western Cultures (1 course)		
Cultural Studies: US Minority Cultures (1 course)		
Cultural Studies: Western/Comparative Cultures (1 course)

#### Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

*Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree.*
