Learning Outcomes: Landscape Architecture, BLA

Learning outcomes for the degree of Bachelor of Landscape Architecture

Bachelor of Landscape Architecture students will:

1. **Build Knowledge & Develop Reasoning Skills** in applying broad and deep knowledge across academic disciplines and fields and using this knowledge to develop design proposals.

2. Apply knowledge of the **Natural World** to guide design decisions and activities taking into account natural resource constraints that impact land use.

3. **Strengthen Social Awareness** to better understand the social and cultural influences on human behavior and the social, political, economic, and legal institutions which influence land-use and design decisions.

4. Employ **Creative Inquiry and Discovery** in addition to a range of analytical skills, and general knowledge to develop design proposals, solve problems, generate new ideas, and produce creative work.

5. Demonstrate **Responsible Leadership** in working with the land and the people for whom we design.
