Economics is a social science concerned with the creation, consumption, and transfer of wealth, studying problems caused by scarcity and how individuals, institutions, and societies may deal with these problems. Economics shares common interests with business-oriented disciplines, such as finance and business administration. Students gain critical thinking and analytical skills, along with quantitative skills, such as calculus and statistics. These skills are used to derive economic principles useful in forming policies or models designed to solve economic problems.

The basic theoretical and statistical tools of economics are applied to virtually every field of human endeavor. Major fields of study within economics include Behavioral Economics, Economic Development, Econometrics, Economic History, Financial Economics, Industrial Organization, International Economics, Labor Economics, Macroeconomics, Mathematical Economics, Political Economics, Public Economics, Economic Theory, and Urban Economics. Economics can provide insights in areas as diverse as how workers should be rewarded, how government should conduct fiscal and monetary policy, and how health care markets work.

**Microeconomics**: concerned with understanding how individual persons and firms make choices. From a basic grounding in microeconomic theory, one can describe and predict the responses of consumers and firms to economic conditions and extrapolate from these individual choices to understand aggregate supply, demand, and price determination.

**Macroeconomics**: a higher-level perspective on the economy, focusing on national production, national income, and the overall level of employment of productive resources such as labor and capital. Benefits of this perspective are better understanding of country growth, monetary policy, and international trade.

**Econometrics**: grounded in classical statistics, provides tools for estimating all aspects of economic phenomena, including labor supply, supply and demand, and business cycles. Econometrics is used to test hypotheses about the world that are developed from economic theory. Econometric estimates can be used to forecast future conditions, aiding individuals, businesses, and governments in making decisions.

Economics students gain a variety of analytical skills through the Economics major, providing a broad range of career and graduate school opportunities. Sectors where our graduates work include for-profit and non-profit business organizations, all levels of government, and education. Examples of some of the industries our graduates have gone on to include banking and finance, marketing, insurance, and consulting.

The Economics Department offers the following Undergraduate Curriculum:

**DEPARTMENT OF ECONOMICS**

214 David Kinley Hall, 1407 W. Gregory, Urbana, IL
econug@illinois.edu
PH: (217) 333-2682
http://www.economics.illinois.edu/

- Provides a strong foundation of economics, statistics, and calculus, and requires supporting coursework outside the major selected based on the student’s interest and future goals, and approved by the Department.
- Students may take economics courses within a variety of areas, or focus on a specific area of interest, including Behavioral, Financial, Political, International, Public, and many more.
- Prepares students for a broad assortment of positions, including consulting, banking, finance, and many other areas in the public, private, or non-profit sector. Also prepares students for various graduate programs within fields of Finance, Statistics, Accounting, Business, Economics, and others.

**BSLAS in Econometrics and Quantitative Economics**

- Provides students with a quantitative curriculum, consisting of economics (specifically in econometrics), statistics, mathematics, and computer science.
- Students will be trained in advanced data analysis skills to answer economic questions, uncovering relationships while taking all information into account.
- Prepares students for positions in research departments of corporations and government agencies and working with large administrative data sets on consumers or firms. Also provides the technical training for graduate programs in economics and finance, research positions in industry, and quantitative policy positions in government.

**BSLAS in Computer Science and Economics Major** (http://catalog.illinois.edu/undergraduate/eng_las/computer-science-bslas) (CS + Economics)

- Provides students with enhanced quantitative analysis and programming skills.
- Students learn a variety of economic analytical skills, both theoretical and empirical, and computational skills.
- There is an increasing need for more sophisticated skills to examine large administrative datasets (“Big Data”), thus combining the computer science and economics curriculums will produce students who are able to write their own code and develop their own software for analyzing these data sets. Possible job opportunities for graduates include area such as banking, finance, insurance, policy centers, government agencies and non-profit organizations. The degree will also prepare students for various graduate programs, including areas of economics, finance, policy, and financial engineering.

**Economics Minor** (tracks: Microeconomics, Macroeconomics, and Econometrics)

- Enables students not majoring in economics to conduct comprehensive study within the discipline of economics.
- The Minor enables students to become knowledgeable in one of the three core fields of economics: microeconomics, macroeconomics, or econometrics. Students will take a set of core economics courses and then choose one of the fields above for their elective courses.

ECON Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ECON)

Information listed in this catalog is current as of 04/2019
Courses

**ECON 101 **Introduction to Economics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/101)
General survey of the operation of the economic system; emphasizes the determination of the level of national income, the pricing and allocation of products, and factors of production under existing conditions in the United States. This is an honors course limited to students currently enrolled in the Chancellor’s Scholar Program. Credit is not given for ECON 101 if credit has been earned in both ECON 102 and ECON 103. This course satisfies the General Education Criteria for:

Social Beh Sci - Soc Sci

**ECON 102 **Microeconomic Principles credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/102)
Introduction to the functions of individual decision-makers, both consumers and producers, within the larger economic system. Primary emphasis on the nature and functions of product markets, the theory of the firm under varying conditions of competition and monopoly, and the role of government in prompting efficiency in the economy. Credit is not given for ECON 102 and ACE 100. This course satisfies the General Education Criteria for:

Social Beh Sci - Soc Sci

**ECON 103 **Macroeconomic Principles credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/103)
Introduction to the theory of determination of total or aggregate income, employment, output, price levels, and the role of money in the economy. Primary emphasis on monetary and fiscal policy, inflation, unemployment, economic growth, and international economics. This course satisfies the General Education Criteria for:

Social Beh Sci - Soc Sci

**ECON 198 **Economics at Illinois credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ECON/198)
An introductory course intended to help students explore the various fields of economics. Presents brief introductions to various faculty members within the Department of Economics at Illinois and an overview of their respective fields. Enrollment limited to undergraduate Economics majors only. Approved for S/U grading only.

**ECON 199 **Undergraduate Open Seminar credit: 0 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ECON/199)
Approved for both letter and S/U grading. May be repeated.

**ECON 202 **Economic Statistics I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/202)
Introduction of basic concepts in statistics including the presentation of data, descriptive statistics, probability theory, discrete and continuous distributions, sampling distributions, estimation, and hypothesis testing. The approach of the class includes both learning the concepts behind basic statistics and also how to apply these concepts in "real-life" situations. Utilizes a practical project format. To complete the Business Statistics sequence, students must also complete ECON 203. Credit is not given for ECON 202 if credit for a college-level introductory statistics course such as PSYC 235, SOC 280, or STAT 100 has been earned. Prerequisite: Credit or registration in one of MATH 220, MATH 221, MATH 234.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

**ECON 203 **Economic Statistics II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/203)
Continuation of ECON 202. Builds upon point and interval estimation as well as hypothesis testing skills first introduced in ECON 202. Utilizes a practical project format to extend the student skill set to include simple and multiple linear regression and time series techniques. Students will: Understand the relevance of statistics in their future course-work and professions; Be trained to identify the proper statistical technique to apply to a problem; Be adept at finding the answers to statistical queries using excel; Be able to properly interpret the results of their analysis. Students must have completed a course on probability and statistical analysis before taking ECON 203. The best course to meet this requirement is ECON 202 at the University of Illinois. Prerequisite: ECON 202; one of MATH 220, MATH 221, or MATH 234.

**ECON 210 **Environmental Economics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/210)
Same as ACE 210, ENVS 210, NRES 210, and UP 210. See ACE 210. This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

**ECON 220 **Intl Economic Principles credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/220)
Principles-level course in international economics for non-majors. The first half of course, international trade, covers such topics as comparative advantage, protectionism (tariff and nontariff), impact on income distribution, and industrial policies. The second half, international finance, covers topics such as balance of payments, exchange-rate determination, currency crises, dollarization, and macroeconomic policy in an open economy. Issues relating to globalization will be covered in both halves. Prerequisite: ECON 101; or ECON 102 (or ACE 100) and ECON 103. Credit in ECON 220 is not applicable toward graduation in the Economics Major.

**ECON 302 **Inter Microeconomic Theory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/302)
Microeconomic analysis including value and distribution theory; analysis of the pricing of the factors of production integrated in a micro-general equilibrium context which builds towards explaining the resource allocation process. Prerequisite: ECON 102 or equivalent. MATH 220, MATH 221, MATH 234 or equivalent.

**ECON 303 **Inter Macroeconomic Theory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ECON/303)
The modern theory of the determination of the level and rate of growth of income, employment, output, and the price level; discusses alternate fiscal and monetary policies to facilitate full employment and economic growth. Prerequisite: ECON 102; ECON 103; and one of MATH 220, MATH 221, MATH 234.

**ECON 397 **Senior Research I credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/397)
Research and readings course for students majoring in economics; may be taken by students in the college honors program in partial fulfillment of the honors requirements. Prerequisite: Cumulative grade-point average of 3.0 or honors in the junior year, or consent of instructor; senior standing.

**ECON 398 **Senior Research II credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/398)
Research and readings course for students majoring in economics; may be taken by students in the college honors program in partial fulfillment of the honors requirements. Prerequisite: Cumulative grade-point average of 3.0 or honors in the junior year; senior standing.
Information listed in this catalog is current as of 04/2019
ECON 442 Women in the Economy  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/442)
Applies economic models of the labor market and household organization to a wide range of important topics, including marriage, fertility, discrimination, and family policies to better understand both personal life choices and public policy problems. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220 or 221 or other Calculus course are required.

ECON 447 Economics of the Workplace  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/447)
Application of economic theory to the relationship between workers and firms in the workplace. We will apply important economic concepts and models to issues including recruitment, personnel selection, employee training, managing turnover, job design, performance evaluation, and incentive compensation. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220/MATH 221 or other Calculus course.

ECON 448 Employee Compensation and Incentives  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/448)
Employee compensation is a critical tool for organizations to attract, retain, and motivate its employees. Students will be introduced to major principles in compensation design and will examine the incentives embedded in various compensation systems. The topics include forms of pay, incentive theory, pay structure, pay-for-performance, and employee benefits. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220/MATH 221 or other Calculus course.

ECON 450 Development Economics  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/450)
Analyzes the economic problems associated with newly developing nations; emphasizes their economic structures, their factor scarcities, and their programs for development. Not open for graduate credit to graduate candidates in economics. 3 undergraduate hours. 2 or 4 graduate hours. Graduate credit is not given for both ECON 450 and ECON 550 or ECON 551. Prerequisite: ECON 102 and ECON 103 or equivalent. ECON 302 strongly recommended.

ECON 451 Program Evaluation in Developing Economies  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/451)
Advanced economics course on microeconomic issues in developing countries with particular attention to empirical analyses and methodologies to address fundamental theoretical and policy relevant questions. Focus is on topics within health and education, although papers may cover other topics. An original empirical research paper is required, applying ideas and concepts covered in class. Class alternates between lectures (discussing new ideas or concepts and assigned readings) and lab (applying concepts to actual data using Stata). 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 203 and ECON 302 or equivalents; for undergraduate students only: Completion of campus Composition I general education requirement. Junior Standing Required. Priority registration provided to Economics Majors. This course satisfies the General Education Criteria for: Advanced Composition

ECON 452 The Latin American Economies  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/452)
Focuses on the economic history of the region, the recent industrialization process and its impact, the role of the state and foreign capital, the impact of the recent privatization processes, inflation and stabilization policies, and issues surrounding the distribution of income. Same as ACE 452. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 102 or ECON 103. ECON 302 or ECON 303 strongly recommended.

ECON 453 Economies of the Middle East and North Africa  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/453)
Study of the business and economic conditions in the Middle East and North Africa (MENA). Students are expected to expand their knowledge of microeconomic, macroeconomics, and economic development theories and to apply them to concrete cases in the MENA region. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220/MATH 221 or other Calculus course.

ECON 455 Economics of Poverty Alleviation in Developing Countries  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/455)
This course examines which policies are effective for alleviating poverty, which are not, and why. The course will have a strong methodological and analytical component, focus on why interventions and policies work, and how to establish evidence on the effectiveness of specific interventions and policies. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220/MATH 221 or other Calculus course are required.

ECON 460 Financial Economics  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/460)
Study of a variety of financial economics topics. Introduces basic financial products (stocks, bonds, futures, options, and other derivatives), asset pricing theory including capital asset pricing model (CAPM), arbitrage pricing theory (APT), financial institutions and the organization of financial markets, and some topics on financial crisis and monetary policy. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 202; ECON 302; MATH 220/MATH 221 or other Calculus course.

ECON 469 Economics of Risk  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/469)
Exploration of economic decisions under uncertainty. Includes expected utility theory and non-expected utility theory; applications to individual decision problems in investment and insurance; general equilibrium in markets under uncertainty, including problems generated by asymmetric information; measurement of risk; the value of information obtained before a decision. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ECON 302 or equivalent; one of MATH 220 or MATH 221 or equivalent.

ECON 471 Intro to Applied Econometrics  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/471)
Introduction to specification, estimation, prediction and evaluation of econometric models, emphasizing the interplay between statistical theory and economic applications. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 203 or equivalent; ECON 302 or ECON 303.

ECON 472 Financial Econometrics  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/472)
Examines the econometric modeling applied to empirical and computational finance. Explains the empirical properties of financial data as well as the statistical models behind these stylized facts from the data. Explains the statistics and time series concepts that will be useful to understand financial market dynamics, and investigates some popular econometric models and estimation methods. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 203; ECON 302; MATH 220/MATH 221 are required. MATH 231; ECON 471 are recommended.
ECON 474  Econometrics of Policy Evaluation  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/474)
Develops the basic tools to understand and use modern econometric methods for estimating and making inference of causal effects. The topics include randomized experiments, natural experiments, matching methods, instrumental variables, and regression discontinuity. Focuses on topics which are relevant for policy problems. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 203; ECON 302; MATH 220/ MATH 221 are required. MATH 231; ECON 471 are recommended.

ECON 475  Economic Forecasting  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/475)
Overview of modern, quantitative, statistical and econometric methods for forecasting and evaluating forecasts. Topics include linear regressions; modeling and forecasting trends and seasonality; characterizing and forecasting cycles; MA, AR, and ARMA models; forecasting with regressions; evaluating and combining forecasts. Advanced topics include unit roots, stochastic trends, ARIMA models, and smoothing will be covered as time permits. 3 undergraduate hours. 4 graduate hours. Prerequisite: ECON 203, ECON 302; MATH 220/ MATH 221 are required. MATH 231 is recommended.

ECON 480  Industrial Comp and Monopoly  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/480)
Analyzes the ways firms and markets are organized, how they interact, outcomes of various types of firm behavior and performance of markets, and causes and types of market failure. Particular emphasis on the contribution of game theory as the equilibrium concept in oligopoly settings. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302.

ECON 481  Govt Reg of Economic Activity  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/481)
Analysis of economic bases, policies, and consequences of government regulation of economic activity. Reasons for government intervention in market behavior, methods of government intervention, and outcomes are studied. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302 or consent of instructor.

ECON 483  Econ of Innovation and Tech  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/483)
Examines the economic factors shaping innovation and technical change since the industrial revolution with emphasis on the economic relationship between science and technology and the role of government in technical change. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 102 or equivalent; ECON 302 or consent of instructor.

ECON 484  Law and Economics  credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/484)
Applications of economic theory to problems and issues in both civil and criminal law and the effect of legal rules on the allocation of resources; includes property rights, liability and negligence assignment, the use of administrative and common law to mitigate market failure, and the logic of private versus public law enforcement. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: ECON 302 or equivalent.

ECON 490  Topics in Economics  credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ECON/490)
Special topics in advanced economics within a variety of areas. See course schedule for topics. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or separate terms to a maximum of 9 undergraduate hours or 8 graduate hours if topics vary. Prerequisite: ECON 202; ECON 302 or ECON 303; MATH 220 or MATH 221 or other Calculus course. Some topics may require additional prerequisites, read the section text for each topic.
