SUSTAINABILITY, ENERGY, AND ENVIRONMENT FELLOWS PROGRAM (SEE FP)

http://sustainability.illinois.edu/education/sustainability-minor/

Why is true sustainability so hard to achieve? Behind every environmentally friendly practice is a web of consequences, trade-offs, feedbacks, and barriers — and this undergraduate minor administered by the Institute for Sustainability, Energy, and Environment (iSEE) will help you develop a systems-level perspective of the economic, environmental and social dimensions of sustainability to help you navigate them.

The Sustainability, Energy, and Environment Fellows Program (SEE FP) is a campuswide undergraduate minor that prepares students for pursuing careers in the corporate sector, nonprofit organizations, government agencies and environmental advocacy groups.

To find out more about the minor and the enrollment process, email Professor Madhu Khanna, iSEE Associate Director for Education & Outreach, at see-fellows@illinois.edu.

**Introduction to Sustainability: choose one of the following**

- ESE 200 Earth Systems
- NRES 287 Environment and Society
- ENVS 301 Tools for Sustainability

**Economic/Policy/Social Dimensions: Choose one of the following**

- ACE 210 Environmental Economics
