

# WILDLIFE & FISHERIES CONSERVATION MINOR

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The Wildlife and Fisheries Conservation minor is ideal for students in biology-centered fields who seek additional instruction related to the management and conservation of undomesticated fish and animals. This minor is not available to NRES majors, but it is open to students in all other majors.

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The minor requires the completion of 17-19 hours of coursework selected from the following list. Six hours of advanced course work must be distinct from credit required in major or another minor.

Code	Title	Hours
<b>Required Courses for a Minor in Wildlife &amp; Fisheries</b>		
NRES 219 or IB 203	Applied Ecology Ecology	3
NRES 348	Fish and Wildlife Ecology	3
Pick one:		
NRES 407	Wildlife Population Ecology	
NRES 409	Fishery Ecol and Conservation	
Pick one:		
NRES 465	Landscape Ecology	
NRES 420	Restoration Ecology	
NRES 429	Aquatic Ecosystem Conservation	
NRES 480	Human-Wildlife Interactions	
NRES 485	Stream Ecology	
Pick one:		
NRES 302	Dendrology	
IB 407	Plant Diversity and Evolution	
NRES 415	Native Plant ID and Floristics	
IB/NRES 461	Ornithology	
IB 462/NRES 442	Mammalogy	
IB/NRES 463	Ichthyology	
IB/NRES 464	Herpetology	
<b>Total Hours</b>		<b>17</b>

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The Wildlife & Fisheries Conservation Minor provides students in biology-centered fields instruction related to the management and conservation of undomesticated animals. Courses in the minor are also part of the NRES major and each course addresses one or more of the following NRES major learning outcomes.

1. Understand the scientific method/ways of knowing and critically evaluate information.

2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade-offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.
